Calendar

Graduate School Calendar 2021/2022

FALL SEMESTER 2021*

Classes begin / Wednesday 25 August

Last day to withdraw from courses / Saturday 16 October

Last day to submit Intent to Graduate forms for December graduation / Sunday 7 November

Final day for submission of theses and dissertations to the Graduate School for graduation in December / Thursday 18 November

Thanksgiving holidays / Saturday 20 November–Sunday 28 November

Fall classes end / Friday 10 December

Fall semester ends / Saturday 18 December

SPRING SEMESTER 2022*

Classes begin / Monday 10 January

Last day to submit Intent to Graduate forms for May graduation / Sunday 27 February

Spring holidays (classes do not meet) /

Last day to withdraw from courses without academic penalty / Saturday 12 March

Final day for submission of theses and dissertations to the Graduate School for graduation in May / Thursday 24 March

Spring classes end / Monday 25 April

Commencement / Friday 13 May

SUMMER SESSION 2022*

Last day to submit Intent to Graduate forms for August graduation / Friday 12 June

Final day for submission of theses and dissertations to the Graduate School for graduation in August / Monday 18 July

**subject to change*

Graduate Study at Vanderbilt

Graduate education has held a central place in the program of Vanderbilt University since it opened in 1875. The first doctor of philosophy degree was granted in 1879; the 2,000th in 1975, the university's centennial year. The 3,000th was given in 1985. As of 2018, more than 8,000 doctor of philosophy degrees have been awarded. By way of comparison, the first Ph.D. given by an American university was awarded in 1861, and the second American institution to offer the degree did so in 1870.

A separate Graduate School was established at Vanderbilt in 1935 by action of the Board of Trust, with an official faculty selected from various schools of the university. Selection is based on the individual faculty member's administrative responsibility or substantial participation in graduate instruction.

Vanderbilt offers to able and serious students a faculty that is active in research and deeply committed to the development of scholars. Students participate in classroom, tutorial, and collegial modes of learning and in systematic independent inquiry, in a setting that allows them to see scholars at work, day in and day out, as an important means of learning the scholar's art. Students are in situations in which they are known personally and well, and concern for what happens to them is very strong.

Vanderbilt is a member of the Association of American Universities, a sixty-two-member organization of research-intensive universities. The doctor of philosophy especially, but also the master of arts and master of science, are research degrees, offered by a faculty of research scholars.

The objectives of the Graduate School are to train scholars and to promote research. The faculty seeks to provide every student with thorough knowledge of a particular field and a mastery of the methods of productive scholarship. Wherever feasible, the faculty intends to provide opportunity for all Ph.D. candidates to have supervised teaching experiences.

The Graduate School enrolls about 2,100 students. About 50 percent are women, and 29 percent are international students. The Graduate School is located in Alumni Hall on campus.

Facilities

Alumni Hall is home for the Graduate School, and newly renovated space on the first floor is designed to be a robust hub for student life within the Graduate School community. This inviting space provides opportunities for graduate students not only to study and socialize, but also to explore potential collaborations across diverse disciplines.

Vanderbilt has many special facilities for study and research in particular areas, as well as the traditional classroom and laboratory facilities associated with graduate instruction.

Graduate instruction in the humanities, the biological sciences, and the social sciences is conducted in Benson, Buttrick, Calhoun, Furman, Garland, and Wilson halls. Graduate work in religion uses the full facilities of Vanderbilt Divinity School. The E. Bronson Ingram Studio Arts Center, opened in fall 2005, has studios for sculpture, ceramics, photography, computer arts, painting, and drawing. Gallery space is designated for exhibits primarily of students' work.

The Stevenson Center for the Natural Sciences, a complex of seven connected buildings, includes laboratory and lecture facilities for biological sciences, chemistry, geology, mathematics, and physics.

Classrooms and laboratories of Peabody College are used for graduate instruction in education and psychology and human development.

Laboratories for the biomedical sciences—biochemistry, bioinformatics, cancer biology, cell and developmental biology, cellular and molecular pathology, microbiology and immunology, molecular physiology and biophysics, and pharmacology—are in the Vanderbilt University Medical Center in Medical Center North, Light Hall, Preston Research Building, Robinson Research Building, and Medical Research Building IV. The A. B. Learned Laboratories and Medical Research Building III provide additional facilities for biological sciences. Graduate students in neuroscience use facilities across campus with a home in the Vanderbilt Brain Institute.

Graduate work in engineering uses the laboratories of the School of Engineering, including those in the Olin Hall of Engineering, Featheringill Hall, Jacobs Hall, the Stevenson Center, and the new Engineering and Science Building.

The facilities of Owen Graduate School of Management are used for graduate study in management. Graduate students in nursing science use the facilities of Godchaux and Frist Halls, and those in hearing and speech sciences use classrooms and laboratories in the Vanderbilt Bill Wilkerson Center.

Graduate School Resources

Russell G. Hamilton Graduate Leadership Institute

As part of the Graduate School's mission to train the next generation of leaders, the Russell G. Hamilton Graduate Leadership Institute (GLI) offers training to graduate students to broaden their academic and professional skills. Through funding opportunities, alumni events and seminars, and workshops, the GLI provides students with a greater understanding of critical leadership skills, including interpersonal dynamics, operations and management, resilience, teamwork, strategic and innovative problem solving, and communications, creating a skill set students can use in their time at Vanderbilt and beyond. Through these activities, the GLI fosters interdisciplinary connections between the graduate student population and the Graduate School's robust network of alumni.

Academic Life Coach

Graduate students often face challenges during their time at Vanderbilt. The Academic Life Coach supports graduate students through individual coaching and group programming around effective time and stress management, resilience, conflict resolution, navigating academic relationships, and juggling work/life responsibilities. The Academic Life Coach works in collaboration with the Student Care Network and can connect students to appropriate resources that best meet their needs. For additional information on Academic Life Coach services, visit gradschool.vanderbilt.edu/lifecoach/.

Graduate Student Council

The Graduate Student Council promotes the general welfare and concerns of the Graduate School student body. This is achieved through creating new programs to provide opportunities for growth and interaction, as well as through communication with the Vanderbilt faculty and administration on behalf of graduate students. The GSC consists of elected representatives from each Graduate School department, committees, and an annually elected executive board. In the recent past, the GSC has helped change policies involving space allocation for teaching assistants, stipend reviews, parking, student health insurance, mental health initiatives, and allocation of student service fees. The GSC is also a member of the National Association of Graduate-Professional Students.

In addition to its representative function, the GSC organizes, hosts, and sponsors events and projects during the year, including seminars and panels with individual departments, the Vanderbilt 3 Minute Thesis competition, the Graduate Student Honor Council, community outreach activities, and social opportunities. The GSC also awards travel grants to graduate students who wish to present their research at conferences throughout the year. All Vanderbilt Graduate School students are welcome and encouraged to attend GSC's monthly meetings and to get involved. For more information, visit studentorg.vanderbilt.edu/gsc.

The Center for Teaching

The mission of the Center for Teaching is to promote university teaching that leads to meaningful student learning. The services of the center are available to all graduate students, including those teaching at Vanderbilt as teaching assistants (TAs) and instructors of record, as well as those who anticipate that teaching will be a part of their future careers.

Fall TA Orientation (TAO) introduces participants to teaching at Vanderbilt, focusing on the information and skills necessary to take on TA roles in the classroom. Workshops and practice teaching sessions are led by experienced graduate student teaching assistants.

The Certificate in College Teaching has been designed to assist graduate students who wish to develop and refine their teaching skills. The certificate focuses on the research on how people learn and best teaching practices, and supports the university's pursuit of excellence in teaching and learning. The certificate is ideal for graduate students whose goals are to become more effective educators and who want to prepare for future careers in higher education teaching.

The Blended and Online Learning Design (BOLD) Fellows Program helps graduate students partner with faculty members to design and develop online modules for integration into a course. The teams implement these modules in existing classes and investigate their impact on student learning.

The Certificate in Humanities Teaching & Learning is a program for humanities graduate students that comprises a sequential seminar and practicum in which participants explore humanistic pedagogies and teaching historically underrepresented populations.

The Graduate Teaching Fellows and Teaching Affiliates Program provides graduate students the opportunity to work at the center, facilitating the programs offered to graduate students, consulting with TAs, and collaborating on teaching-related projects.

For more information and other services, please visit the Center for Teaching website at cft.vanderbilt.edu or call (615) 322-7290.

Interdisciplinary Centers, Institutes, and Research Groups

Vanderbilt is home to more than 85 centers and institutes that work to tackle major challenges and meet important societal needs by bringing together faculty from a broad range of disciplines and producing cutting-edge research. Below is a sampling of Vanderbilt's interdisciplinary initiatives. For more information, see research.vanderbilt.edu/centers-and-institutes-at-vanderbilt.

The Center for Integrative and Cognitive Neuroscience investigates the relationship between brain function, behavior, and cognition, and promotes the development of new technologies like advanced prosthetics and autonomous robots.

The Center for Latin American Studies works to advance knowledge about and understanding of the region's history, culture, political economy, and social organization. as.vanderbilt.edu/clas/

The Frist Center for Autism and Innovation at Vanderbilt University School of Engineering brings engineers, business scholars, and disabilities researchers together with experts in neuroscience and education to understand,

maximize, and promote neurodiverse talent and to respond to opportunities for innovation in technology and in workplace practices. With engagement across academia, government, business, and nonprofit organizations, as well as the clinical, vocational, and self-advocacy domains, the center works to build a true community-based approach that improves lives, organizations, and society. vanderbilt.edu/autismandinnovation/

The Max Kade Center for European and German Studies fosters an international perspective on issues relating to Europe and transatlantic relations and seeks to prepare students for international careers or advanced study. as.vanderbilt.edu/europeanstudies/

The Robert Penn Warren Center for the Humanities promotes interdisciplinary research and study in the humanities, social sciences and natural sciences. Members of the Vanderbilt community representing a wide variety of specializations take part in the center's programs, which are designed to intensify and increase interdisciplinary discussions of academic, social, and cultural issues. vanderbilt.edu/rpw_center/

The Vanderbilt Brain Institute promotes and facilitates the discovery efforts of Vanderbilt neuroscientists, the training of undergraduate and graduate students, and the coordination of public outreach in brain sciences. Research endeavors in the VBI include more than five hundred faculty, students, and staff from departments, centers, and institutes across campus who engage in neuroscience-directed research, training, and clinical service. medschool.vanderbilt.edu/brain-institute/

The Vanderbilt Institute for Surgery and Engineering creates, develops, implements, and evaluates solutions to complex interventional problems. Physicians, engineers, and computer scientists work together to improve patient care with surgical innovation through engineering. Central to the mission of the institute is the translation of methods, techniques, and devices from the laboratory to the patient. vanderbilt.edu/vise/

The Vanderbilt Institute for Energy and Environment elucidates the relationships among individual, institutional, and societal choices for energy production and use, and the impacts and benefits of these choices on the environment and health through links with climate, water quality, economics, social psychology, and natural resources. A crucial part of its mission is to train the next generation of leaders in the energy and environmental arena. vanderbilt.edu/viee/

The Vanderbilt Institute for Global Health builds capacity through interdisciplinary global health education and training programs, conducts implementation science and research, and provides technical assistance service to government and civil sector organizations in other countries. As a leader in international education and research, VIGH seeks to improve health and well-being of people living in low-resource settings. vumc.org/global-health/

The Vanderbilt Institute for Integrative Biosystems Research and Education fosters and enhances interdisciplinary research in the biophysical sciences and bioengineering at Vanderbilt, integrated with a strong focus on undergraduate, graduate, and postdoctoral education. VIIBRE's mission is to invent the tools and develop the skills that are required to understand biological systems across spatiotemporal scales. vanderbilt.edu/viibre/

The Vanderbilt Institute of Chemical Biology provides research and training in the application of chemical approaches to the solution of important biomedical problems, harnessing the power of chemistry to improve human health. medschool.vanderbilt.edu/vicb/

The Vanderbilt Institute of Nanoscale Science and Engineering engages in theoretical and experimental research in science and engineering at the nanoscale (from one millionth to one billionth of a meter in size). VINSE supports an extensive infrastructure of materials fabrication and analytical facilities for research in nanoscale science and engineering. vanderbilt.edu/vinse/

The Vanderbilt Kennedy Center for Research on Human Development facilitates discoveries and best practices that make positive differences in the lives of persons with disabilities and their families through research, training, services, and dissemination. Nationally, it is among fourteen Eunice Kennedy Shriver Intellectual and Developmental Disabilities Research Centers, sixty-seven national University Centers for Excellence in Developmental Disabilities, fifty-two Leadership Education in Neurodevelopmental Disabilities training programs, and includes the Treatment and Research Institute for Autism Spectrum Disorders. Research, practicum, and clinical experiences are available to trainees. vkc.vumc.org/vkc/

The Vanderbilt University Institute of Imaging Science aims to support and integrate advances in physics, engineering, chemistry, computing, and other basic sciences for the development and application of new and enhanced imaging techniques to address problems and stimulate new research directions in biology and medicine, in health and disease.

The Wond'ry supports immersive experiences for students and interdisciplinary projects for faculty--from all schools and colleges--who are interested in innovation and entrepreneurship. In addition to connecting various resources across the university, the center serves as a common space for students to develop and test ideas alongside their peers with mentorship from faculty, alumni, corporate partners, the Nashville entrepreneurial community, and beyond. Programming, seminars, and workshops help students from all disciplines grow their ventures at any stage of development. vanderbilt.edu/thewondry/

Other initiatives include:

- Advanced Computing Center for Research and Education
- Bill Wilkerson Center for Otolaryngology and Communication Studies
- Center for Biomedical Ethics and Society
- Center for Bone Biology
- Center for Cognitive Medicine
- Center for Constructive Approximation
- Center for Entrepreneurship
- Center for Environmental Management Studies
- Center for Experiential Learning and Assessment
- Center for Health Services Research
- Center for Healthcare Market Innovation
- Center for Innovative Technology
- Center for Intelligent Mechatronics and Biomechanics and Assistive Technology Laboratory
- Center for Matrix Biology
- Center for Neuroscience Drug Discovery
- Center for Noncommutative Geometry and Operator Algebras
- Center for Research on Men's Health
- Center for Science Outreach
- Center for Structural Biology
- Center for the Digital Humanities
- Center for the Study of Democratic Institutions
- Center on the Social and Emotional Foundations of Early Learning
- Clinical Research Center (Vanderbilt Institute for Clinical and Translational Research)
- Diabetes Research and Training Center
- Digestive Disease Research Center
- Epithelial Biology Center
- Financial Markets Research Center
- Institute for Medicine and Public Health
- Institute for Software Integrated Systems
- Institute for Space and Defense Electronics
- IRIS Center
- John A. Oates Institute for Experimental Therapeutics
- Lamb Center for Pediatric Research
- Mass Spectrometry Research Center
- Multiscale Modeling and Simulation Center

Special Programs

Graduate Program in Economic Development

The Graduate Program in Economic Development is a professionally oriented master's program in economics preparing students for both domestic and international careers in economic development. The curriculum is made up of four core courses; microeconomics, macroeconomics, statistics, and econometrics, in addition to two field courses, three electives, and a one-semester research project. The program offers courses on a wide range of subjects including: international trade, project evaluation, policy analysis, and development economics. Students may also take courses in other areas of economics, business, finance, and public policy.

Center for Latin American Studies

The university offers a program of graduate instruction and specialized research that relates the disciplines of the social sciences and humanities to Latin America, with emphasis on Brazil, Colombia, Venezuela, Peru, and Mexico. Latin American Studies offers three dual degree programs: M.A./ MPH, M.A./MBA, and M.A./M.Ed. in IEPM. Applicants must apply independently to and be accepted by both the Graduate School and the appropriate professional school. The LAS component requires 30 credit hours of course work and a thesis. For further information, see Latin American Studies in the Courses of Study section.

Master of Fine Arts in Creative Writing

The English department's M.F.A. in creative writing is a three-year program, offering writing workshops and supervision in the composition of creative work. Students are required to take a complement of literature courses along with their workshops. The goal of the M.F.A. program is to produce creative writers with a broad and deep knowledge of their genres.

Applicants for the M.F.A. must submit an official college transcript, a manuscript of creative work, a statement of purpose, and three letters of recommendation. For more details see Vanderbilt's M.F.A. website: vanderbilt.edu/creativewriting.

Requirements for the M.F.A. include 48 hours of course work completed in the first two years, a thesis of creative work (a novel, a book of short stories, a collection of poems, or a collection of personal essays), plus an oral defense of the thesis. The course work includes graduate workshops (one per semester for four semesters) and seminars in the craft of writing and in literary studies. With guidance and approval of faculty, M.F.A. students may enroll in relevant courses in other departments, programs, or schools.

Master of Liberal Arts and Science

The master of liberal arts and science (M.L.A.S.) degree offers part-time adult students the intellectual stimulation of post-baccalaureate course work at a time in their lives when they can contemplate great ideas and enduring questions and measure them against their own life experiences. In discussion with other adult students under the leadership of distinguished faculty members, they are encouraged to look beyond disciplinary boundaries and explore connections that more specialized undergraduate degrees and focused career responsibilities may have obscured. Students often discover important professional and career benefits as well as personal development in earning a master of liberal arts and science degree. The requirements and curriculum provide flexibility in program design and course selection, and the tuition, scheduling, admission, and registration procedures acknowledge the special circumstances of the part-time adult student.

Courses are taught by distinguished Vanderbilt faculty members (and, occasionally, distinguished emeritus faculty) carefully selected for their recognized abilities as teachers and their special interest in the M.L.A.S. program. Each course meets one evening a week throughout the semester. Classes are limited in size to encourage optimal student-student and student-faculty interaction.

The master of liberal arts and science is awarded by the Graduate School and administered by the Dean's Office of the College of Arts and Science. For more information contact the director of the M.L.A.S. program in the College of Arts and Science or visit the M.L.A.S. website at as.vanderbilt.edu/mlas.

Medical Scientist Training Program (M.D./Ph.D.)

A combined course of study leading to the M.D. and Ph.D. degrees is offered through Vanderbilt School of Medicine and Vanderbilt Graduate School. The program facilitates the development of physician scientists leaders in clinical and basic medical sciences. Seven calendar years are usually required for completion of the combined degree program.

All candidates must meet both School of Medicine and Graduate School requirements for matriculation and graduation. Candidates are admitted into the program by the deans of the two schools upon the recommendation of the Medical Scientist Training Program subcommittee. After their acceptance in the program, students must select and be accepted into the graduate program of an affiliated department. The graduate programs currently affiliated with the Medical Scientist Training Program are biochemistry, biological sciences, biomedical engineering, biomedical informatics, cancer biology, cell and developmental biology, chemical and physical biology, epidemiology, health policy, human genetics, mechanical engineering, microbe-host interactions, molecular pathology and immunology, molecular physiology and biophysics, neuroscience, and pharmacology.

M.D./Ph.D. students must pass the qualifying examination for the Ph.D. degree and present an acceptable dissertation within their field of study as required by the Ph.D. Program. Most M.D./Ph.D. students begin full-time study and research for the Ph.D. degree after the second year in medical school and complete the dissertation research before entering the final year of medical study.

For more information, visit the program's catalog listing, [here](#).

Courses in Professional Degree Programs

Students may include in their programs of study certain professional degree courses offered by other schools in the university. They register for these courses through the Graduate School and often do additional work appropriate for a research degree. Six hours of such credit may be applied to a master's degree program and 12 hours to a Ph.D. program. Students must obtain written approval from their adviser, from the other school, and from the Graduate School. The courses may constitute part of the major or minor field, as approved by the student's adviser.

Individualized Programs

Students with special course goals should inquire in the Graduate School office about the possibility of individualized, interdisciplinary programs of study leading to the master's and Ph.D. degrees. The Graduate School may permit programs that combine several disciplines in unique ways. Financial support for individualized programs must be arranged with specific faculty members as there are no program or departmental financial awards available.

Master's and Ph.D. students may not apply for admission to the individualized program until they have been admitted to and enrolled in a department currently offering that degree. Except under extraordinary circumstances, interested students will be expected to apply, or make preliminary inquiry, to the Graduate School during their first year of graduate studies.

Combined B.A./M.A. (4+1) Program

The College of Arts and Science in collaboration with the Graduate School offers students in most departments and programs the opportunity to earn both the bachelor's degree and the master's degree in a shorter period of time and at less cost than is normally the case. Exceptional students in the College of Arts and Science can obtain both degrees in an expedited period, typically within but not less than five years.

The usual period of study for both the bachelor's and the master's degree is six years. Through the 4+1 option, the student and her or his adviser plan a five-year program of study. It is important to note that there is no provision for obtaining both degrees in a period shorter than five years.

The program is intended for selected students for whom the master's degree is sufficient preparation for their career goals, is desirable as a goal in itself, or is viewed as additional preparation before pursuing a doctorate or a professional degree.

The areas of study available for the Combined B.A./M.A. (4+1) option within Arts and Science are determined by individual departments and programs, who also determine the policies and guidelines to be followed. Students will be admitted to the Combined B.A./M.A. program only by approval of the department or program.

Programs of Study

The 4+1 option is currently available in the following departments and programs: English; French; German; history; history of art; Latin American studies; mathematics; medicine, health, and society; philosophy; political science; and psychology. Students are welcome to discuss the Combined B.A./M.A. (4+1) option with any of these departments and programs.

Admissions Overview

The Integrated B.A./M.A. program allows Vanderbilt University students to study for both degrees often, but not necessarily, in the same department. Undergraduates with strong academic records may apply for admission to the program after the first semester of their junior year. Qualifying students are normally accepted into the program in the second semester of the junior year.

To apply for admission, students will first consult with Roger Moore, Senior Associate Dean of Undergraduate Education, and then submit to the prospective graduate department or program a "Petition to Apply to the Combined B.A./M.A. (4+1) Degree Program" (available at as.vanderbilt.edu/academics/specialdegree/4plus1.php), a statement of purpose, a formal application to the Graduate School, a preliminary program proposal, two letters of recommendation from Vanderbilt faculty, and a current transcript. Application forms can be completed online at <https://apply.vanderbilt.edu/apply/>. GRE scores or other admissions requirements may be specified by the prospective department. Admission to the 4+1 option is highly selective. An accomplished academic record, a demonstrated commitment to pursue graduate study, and a strong endorsement from Vanderbilt faculty are key elements to the successful applicant. Students will be provisionally accepted as Graduate School students, pending completion of all undergraduate requirements.

Graduate student status will apply in the fifth year.

Scholarships and Financial Aid

Students who are receiving scholarships or other forms of financial aid as a Vanderbilt undergraduate are advised that such aid applies in most cases only toward the completion of the bachelor's degree or the first four years of their studies (which may include their taking some graduate courses during their senior year). Students wishing to pursue the 4+1 option should seek support for their fifth year of study through student loans and other financial aid.

For additional information, consult the website as.vanderbilt.edu/academics/specialdegree/4plus1.php.

Accelerated Graduate Program in Engineering

Students who enter Vanderbilt with a significant number of credit hours (20 to 30 hours), earned either through Advanced Placement tests or in college courses taken during high school, may be eligible for the Accelerated Graduate Program in Engineering. Through this program, a student is able to earn both a bachelor's degree and a master of science in about the same time required for the bachelor's degree, or slightly longer.

To be eligible for the program, a student must complete 86 hours (senior standing) by the end of the sophomore year with at least a 3.5 grade point average. With the approval of the student's adviser, the director of graduate studies in the student's major department, and the senior associate dean, students apply through the associate dean for graduate studies for admission to this accelerated dual degree program.

Upon admission to this program, a second "career" will be set up for the student which will allow the student to start taking graduate courses (course numbers > 5000) during the junior and senior years. These courses will be credited toward the master of science. Note that no double counting of courses is allowed (i.e., the student must meet the degree requirements for each degree independent of the other degree).

The student receives the bachelor's degree at the end of the fourth year and typically spends the summer finishing a master's thesis to complete the master of science. Further information can be obtained from the director of graduate studies of the student's major department.

Online Master's Program in Computer Science

The Graduate School offers an online program for a master of science in computer science. This program requires completion of 30 credit hours over three terms which, depending on the course schedules, students can expect to complete in twelve to twenty-one months. Students meet weekly for HD-streaming live classes, group work, and discussions, and can meet with faculty in online office hours. In addition to online learning, students can attend campus events, including career-building workshops and the Vanderbilt Entrepreneur Conference.

Upon completion of the program, students may participate in the Vanderbilt Commencement ceremony on campus to receive their Vanderbilt diplomas.

Online students have full access to Vanderbilt libraries, the Office of Student Financial Aid and Scholarships, veterans educational benefits, and Student Access Services (disability services). The rest of student services are offered in partnership with online program partner 2U or by 2U, which include Career Service, Student Success, and WeWork Membership. Except where noted, online students are subject to the policies outlined in this catalog.

Complete information on this program is available at engineeringonline.vanderbilt.edu/computer-science.

Certificate Programs Overseen by the Graduate School

A number of departments/programs offer graduate certificates. These are open to students already enrolled in a Vanderbilt University post-baccalaureate-degree program. Each certificate requires at least 12 credit/semester hours of interrelated graduate-level course work supporting a specified theme. The courses form an intellectually cohesive whole. The certificate programs include: Global Health; Latin American Studies; Jewish Studies; Latino and Latina Studies; Asian Studies; Gender Studies; American Studies; African American and Diaspora Studies; Second Language Studies; Mobile Cloud Computing; Surgical and Interventional Engineering; Technology Entrepreneurship; Medicine, Health, and Society; Carpenter Certificate in Religion, Gender, and Sexuality; Kelly Miller Smith Institute Certificate in Black Church Studies; Religion in the Arts and Contemporary Culture; Biomedical Ethics; Medical Student Certificate in Lesbian, Gay, Bisexual, and Transgender Health; Post-Master's Certificates in Nursing Program; and Law and Business Certificate. If interested in one of these certificate programs, a student should contact the director of the program to be sure that the appropriate requirements have been met, and if so, then submit to the Graduate School an "Intent to Enroll" in the certificate program.

Additional information on the available certificate programs is available at gradschool.vanderbilt.edu/academics/certificate_program.php.

Summer Session

Information concerning the summer session may be found on the Graduate School webpages at vanderbilt.edu/gradschool and at vanderbilt.edu/summer. A summer session announcement in mid-March of each year will describe the registration procedures. Students may log in to YES (Your Enrollment Services) to view the schedule which lists the limited course offerings.

Admission

Qualified applicants with bachelor's or comparable non-U.S. degrees are eligible for admission to the Graduate School. Applications from international students with three-year bachelor's degrees will also be considered. Admission is competitive and students are selected on the basis of their scholastic preparation and intellectual capacity.

Generally, minimum requirements for admission are these: an applicant should have completed or soon will complete a course of study equivalent to that required for the bachelor's degree at an accredited institution, maintained a minimum of a *B* average in undergraduate work, and maintained a *B* average in the field of expected graduate concentration. Individual programs in the Graduate School have additional requirements for admission.

Applications for admission are made electronically through the Graduate School website (vanderbilt.edu/gradschool).

Applicants must upload an unofficial copy of transcripts from prior undergraduate and graduate work as part of their online application for admission. Official transcripts are required only after an offer of admission is made and accepted. All admitted graduate students must submit all official transcripts prior to beginning their enrollment at Vanderbilt University. An official final transcript is required from all previously attended institutions of higher education (i.e., beyond high school). Incoming graduate students who are not able to provide evidence of prior degrees by the first day of classes are subject to having their classes canceled and may be subject to dismissal from the university.

Deadlines for fall applications range between December and January 15. Applicants should verify the deadline for the program to which they wish to apply by checking the website for that department or program. Typically, admission decisions for fall semester will be communicated by March 31 to all applicants whose files are complete by January 15.

The deadline for responses to offers of financial award and admission is April 15. If your reply is not received by April 15, the department may rescind the offer of admission and financial award.

Most programs do not admit students for the spring semester. Please check with the program in which you are interested before applying for spring semester admission.

Students seeking admission for the spring semester should file applications no later than November 1. Decisions are usually announced before December 1.

Further information regarding the application and admissions process is available at vanderbilt.edu/gradschool.

Graduate Record Examination

Submission of scores on the General Test of the Graduate Record Examination (GRE) is typically required as part of the application to the Graduate School, although some programs have now waived the GRE requirement. Refer to the appropriate department or program to confirm their GRE requirements. Some departments also require a report of the score on the Subject Test of the GRE before an application will be considered.

Information concerning the GRE may be obtained from Graduate Record Examinations, Educational Testing Service, Box 6000, Princeton, New Jersey 08541-6000, U.S.A., or the GRE website at gre.org.

Prior Degrees

It is the policy of Vanderbilt University to verify prior educational credentials for all admitted students who intend to matriculate. All matriculated students must provide official copies of transcripts and any other required supporting documentation to Vanderbilt University as part of the prior degree verification process. The Office of the University Registrar will review transcripts and other supporting documentation for authenticity and to confirm degrees earned prior to matriculation at Vanderbilt. Offers of admission are contingent on a student providing the required documentation.

Effective Spring 2022, incoming students will not be permitted to register for classes until they have provided the required evidence of prior degrees. Students for whom the Office of the University Registrar is unable to verify prior degrees may be subject to dismissal from the university.

Master of Liberal Arts and Science

Candidates for admission to the M.L.A.S. degree program must present to the Graduate School a formal application, three letters of recommendation, a Statement of Purpose, and a transcript indicating a completed course of study equivalent to that required for a bachelor's degree at an accredited institution, with a minimum of a *B* average in all undergraduate work (or significant life/work achievement that could compensate for a lower grade point average). Graduate Record Examination scores are not required. After receipt of all materials, the director of the program will interview all prospective students. For additional information regarding the M.L.A.S. requirements, visit as.vanderbilt.edu/mlas/application.

International Students

Vanderbilt has a large international community representing more than 117 countries. The university welcomes the diversity that international students bring to the campus and encourages academic and social interaction at all levels. International applicants who are offered admission will be contacted by the Vanderbilt Office of International Student and Scholar Services (ISSS) with instructions for initiating the visa process.

English Language Proficiency

Proficiency in written and oral English is required for enrollment in an academic program. Applicants whose first language or language of instruction is not English are required to submit the results of the Test of English as a Foreign Language (TOEFL) with the application, unless they have earned a degree from an American or English-speaking institution. International students transferring from unfinished degree programs of other universities in the United States should present TOEFL scores.

The minimum acceptable score on the TOEFL PBT (paper- based test) is 570, and for the TOEFL iBT (internet- based test), 88. Many programs, however, require a considerably higher level of proficiency.

Although International English Language Testing System (IELTS) test scores are not required, applicants who have taken the IELTS can report their scores in the online application.

English Language Instruction

Students wishing to focus on improving their English language use for the context of the U.S. academic setting may take classes and participate in programming at the Vanderbilt English Language Center to support their academic success. The ELC's courses include Academic Writing, Academic Speaking, Pronunciation, and International Teaching Assistant Communication. Throughout the academic year, academic workshops and one-to- one consultations for speaking and writing are also available through the ELC. Entering students may be required to take language support courses concurrently with their academic courses at the ELC. The ELC is located at 1208 18th Avenue South. For information about the ELC's programming, see the "English Language Center" section in the Life at Vanderbilt chapter of this catalog or visit vanderbilt.edu/elc.

Financial Resources

To meet requirements for entry into the United States for study, applicants must demonstrate that they have sufficient financial resources to meet expected costs of their educational program. Applicants must provide documentary evidence of their financial resources before visa documents can be issued.

United States laws and regulations restrict the opportunity for international students to be employed.

International students may work up to twenty hours per week on campus. Students may be allowed to work off campus only under special circumstances. Many spouses and dependents of international students are not allowed to be employed while in the United States.

Student Health Insurance Plan

International students are required to purchase the university's international student injury and sickness insurance. Information concerning the limits, exclusions, and benefits of this insurance coverage may be obtained from Student Health Services.

Financial Information

Tuition in the Graduate School for 2021/2022 is charged at the rate of \$2,150 per semester hour with a minimum tuition charge of \$200 per semester.

Tuition and fees are set annually by the Board of Trust and are subject to review and change without further notice.

Students who have completed the hours required and who are conducting research full time, register for thesis or dissertation research without hourly credit and are subject to a minimum tuition charge of \$200 per semester.

Master of Liberal Arts and Science Courses

Students in the M.L.A.S. program pay one-half of the regular graduate tuition rate for M.L.A.S. courses and full tuition

for courses selected from the regular curriculum. M.L.A.S. course tuition for 2021/2022 is \$3,225 per 3-hour course.

Supplemental Tuition and Continuous Registration

Continuous registration is required of all full-time degree candidates until the required number of course work hours have been completed. Responsibility to maintain registration rests with the student. To retain student status, individuals must register each fall and spring semester or secure an approved leave of absence. A person is in student status only if:

- registered, or
- on authorized leave of absence

A student who has completed the formal course work required for the degree may, with approval of the student's department and the Graduate School, conduct full-time thesis or dissertation research away from the university and register for research hours needed for the degree. Tuition is charged at the current rate per semester hour, or \$200 per semester if the student has completed the hours required for the degree.

In general, individuals who have completed the number of hours required for the degree and who are employed full time are not eligible to register as full-time students. Such persons pursuing the Ph.D. degree may register as half-time students if they are devoting a minimum of 20 hours per week to dissertation research and their program offers the half-time research course (3995) for a \$200 per semester fee.

A former student wanting to re-enter the Graduate School must apply for reinstatement, which is granted only on the recommendation of the student's graduate program and with approval of the Graduate School.

Other Fees

Student health insurance	3,515
Student service fees per academic year (fall & spring)	562
Student Health Fee (fall & spring)	696
Transcript fee (one time only)	100
Late registration	30
Audit fee for regular students (nonrefundable)	10

Payment of Tuition and Fees

Tuition, fees, and all other university charges incurred prior to or at registration are due and payment must be received by August 31 for the fall semester and January 2 for the spring semester. If courses are added AFTER the initial billing period, it is the student's responsibility to contact the Office of Student Accounts for due dates and amounts related to tuition in order to avoid any holds and/or late payment penalties. All other charges incurred after classes begin are due and payment must be received in full by the last business day of the month in which they are billed to the student. If payment is not made within that time, Commodore Cash may not be available and your classes may be canceled. Visit vanderbilt.edu/stuacct for payment options.

Students/Guarantors will be responsible for payment of all costs, including reasonable attorney fees and collection agency fees, incurred by the university in collecting monies owed to the university. The university will assess a \$25.00 fee for any check or e-payment returned by the bank and reserves the right to invoke the laws of the State of Tennessee governing bad check laws.

E-Billing and Access to a Student's Vanderbilt Account

Vanderbilt exclusively uses convenient and secure electronic billing (e-bills) for student account charges. Students may need to take action to enable parents, guardians, and other "invited payers" to receive e-bill notices and access to the e-bill website. Students may access their online invoices from their YES landing page at yes.vanderbilt.edu. Once they have signed in to YES, they may view invoices under the Billing Portal link.

Students are responsible for granting access to parents, guardians, or other payers who should receive email billing notifications. To do this, students log in to YES and click the “billing portal link.” On your CashNet Account page, click “Add New” in the “Other Payers” section. Enter the information that is requested, and click “OK.” (You must enter the “login name” that your authorized payer will use as a username—the logon and password will be sent to your authorized payer in an email.) Tutorials are located online at vanderbilt.edu/stuacct/ebill.html.

Any month in which there is activity on the student’s account, an e-bill will be generated and an email notification sent to the student’s Vanderbilt email address, as well as to the email addresses of others they have invited (and have completed the activation process). The email notification will have the subject line “Your E- Bill Is Now Available for Viewing” and will contain a link to the secure e-bill website.

Payments may be made electronically, or for those wishing to mail a payment, a payment coupon can be printed. When an electronic payment is made, a confirmation email will be sent. It remains the responsibility of the student to ensure that bills are paid on or before the due date.

The Office of Student Accounts can be contacted at (615) 322-6693, toll-free at (800) 288-1144, or via email at *student*: accounts@vanderbilt.edu. For additional information, please visit the Student Accounts website at vanderbilt.edu/stuacct.

Refunds of Tuition Charges

University policy for the refund of tuition charges provides a percentage refund based on the time of withdrawal. Students who withdraw officially or are dismissed from the university for any reason may be entitled to a partial refund. Fees are nonrefundable. The refund schedules may be viewed at vanderbilt.edu/stuacct.

Payment Options

Direct Payment: Tuition, fees, and all other charges are paid directly to the university. Payment for the fall semester is due by August 31. Payment for the spring semester is due by January 2. Students can pay online after viewing their e-bill at vanderbilt.edu/stuacct. There is no further action required for this option.

Interest-Free Monthly Payment Plan: Students can spread payment over five monthly installments for each semester (fall and spring), interest free, by enrolling in the VANDYPlan, currently administered by Higher One. The deadline to enroll in the VANDYPlan is August 31 for the fall semester (payments begin May 15) and January 31 for the spring semester (payments begin October 15).

The current estimated charges for the academic year are available at vanderbilt.edu/stuacct to assist students in determining their annual expenses. For further information, please contact the Office of Student Accounts at (615) 322- 6693 or (800) 288-1144.

Late Payment of Fees

All charges not paid by the specified due dates will be assessed a late payment fee of \$1.50 on each \$100 owed (minimum late fee of \$5).

Financial Clearance

No transcript (official or unofficial) will be issued for a student who has an outstanding balance. Diplomas of graduating students will not be released until all indebtedness to the university is cleared.

Student Service Fees

The required student service fees entitle degree-seeking students to use the facilities of Sarratt Student Center and

the David Williams II Student Recreation and Wellness Center. The fees also cover admission to certain social and cultural events and subscriptions to certain campus publications. The student service fees for graduate students also include funding for activities sponsored by the Graduate Student Council. Specific information on these fees is published annually in the *Student Handbook*. By payment of an additional fee, students and their spouses may use their identification cards for admission to athletic events.

Transcripts

Official academic transcripts are supplied by the Office of the University Registrar on authorization from the student.

Transcripts are not released for students with financial or other university holds.

Honor Scholarships

University Graduate Fellowships

Each year several University Graduate Fellowships are awarded to students entering a Ph.D. program for the first time. Based solely on merit, they are offered to students nominated by departments or programs in recognition of exceptional promise for research and academic excellence. These premier fellowships provide a stipend of up to \$5,000 in addition to a departmental award (fellowship or assistantship). Faculty committees review nominations from all graduate programs and make recommendations to the Graduate School which then selects the recipients.

Provost's Graduate Fellowships

Each year the Graduate School awards Provost's Graduate Fellowships to outstanding students from under-represented groups showing academic promise who want to study for the Ph.D. These fellowships carry a stipend of up to \$5,000 in addition to a departmental award.

Normally these awards run concurrently with the departmental awards.

Other Awards and Assistantships

The university intends, within its resources, to provide adequate financial assistance to students with high academic potential who need help in meeting expenses. Some support is service free; most requires assigned service to the university. Duties are compatible with the student's development and progress.

All M.F.A. and Ph.D. applicants to the Graduate School are considered for awards and assistantships available in their proposed area of study if they request such consideration and if the application for admission is complete by the application deadline.

University Fellowships

University fellowships with stipends ranging up to \$16,500 for nine months or \$32,500 are available in some programs.

A full Tuition Scholarship is normally provided in addition to the stipend. The fellowships are service-free and the student is expected to devote full time to graduate study and to have no other occupation.

Graduate Assistantships

These awards provide a stipend up to \$31,000 for the calendar year and normally receive an additional service-free full tuition scholarship. Duties are assigned by the program director and may include teaching and/or research responsibilities. Appointments are made for one year with renewal in subsequent years dependent upon satisfactory performance of assigned duties, as evaluated by the program director and school deans.

All persons who have responsibility for instruction are subject to university policies as outlined in the *Faculty Manual*, and any additional school and departmental policies that govern instruction. Graduate teaching assignments with major instructional responsibilities must have a master's degree or the equivalent.

Research Assistantships

Research assistantships ranging up to \$32,500 for twelve months are available in certain graduate programs. The holder is expected to assist an individual faculty member in research. Full or partial tuition scholarships may accompany a research assistantship.

Traineeships

Traineeships ranging up to \$32,500 for twelve months are available in certain graduate programs. The recipient is expected to carry out research with an individual faculty member. Full or partial tuition scholarships usually accompany a traineeship.

The Graduate School awards Russell G. Hamilton scholarships to highly qualified students intending to pursue a Ph.D. degree. These are service-free, full-tuition scholarships with the recipients designated as Russell G. Hamilton Scholars.

Tuition Scholarships

Some departments or programs offer service-free full or partial tuition scholarships without an accompanying fellowship or assistantship. Programs offering such tuition scholarships include Biostatistics, Chemistry, Economic Development, Political Science, the Graduate Department of Religion, and Nursing Science.

Other Graduate Awards

Various types of financial assistance other than university assistantships and fellowships are available. A number of private foundations and business and industrial firms support fellowships. The U.S. Government provides training grants for Ph.D. programs through the U.S. Public Health Service, the National Institutes of Health, the National Science Foundation, and other agencies. Awards are allocated to specific departments and to interdepartmental graduate programs of study. Traineeships and fellowships provide stipends and cover tuition and fees.

Loan Assistance

Loan assistance is available for graduate students in the form of the Federal Direct Unsubsidized Loan program, the Federal Graduate PLUS Loan program, and certain alternative/private loan programs. The Federal Direct Unsubsidized Loan is available regardless of need. The Federal Graduate PLUS Loan is not based on demonstrated need, but the student must be credit worthy. Alternative/private loans are available from private sources that are not based on financial need and must be credit approved.

Under the Federal Direct Loan program, a student may borrow up to a maximum annual limit of \$20,500 a year, all of which is unsubsidized. The maximum aggregate amount of Federal Direct Loans an eligible student may borrow is \$138,500 including any Federal Direct Subsidized/ Unsubsidized Loans borrowed for undergraduate and graduate/professional study. Under the Federal Graduate PLUS Loan program, a graduate/professional student may borrow up to the annual cost of attending Vanderbilt minus any other aid for which the student is eligible. There is no maximum aggregate limit.

In order to be considered for the Federal Direct Loan programs and/or the Federal Work-Study program, students must complete the Free Application for Federal Student Aid (FAFSA). The FAFSA application and additional information may be found on the Office of Student Financial Aid webpage, vanderbilt.edu/financialaid.

Academic Regulations

Vanderbilt's students are bound by the Honor System inaugurated in 1875. Fundamental responsibility for the preservation of the system inevitably falls on the individual student. It is assumed that students will demand of

themselves and their fellow students complete respect for the Honor System. All work submitted as a part of course requirements is presumed to be the product of the student submitting it unless credit is given by the student in the manner prescribed by the course instructor. Cheating, plagiarizing, or otherwise falsifying results of study are specifically prohibited under the Honor System. The system applies not only to examinations but also to written work and computer programs submitted to instructors. The student, by registration, acknowledges the authority of the Graduate Honor Council.

The university's Office of Student Accountability has original jurisdiction in all cases of non-academic misconduct involving graduate and professional students.

Students are expected to become familiar with the Rules Governing the Graduate Honor Council of Vanderbilt University, available at the time of registration. It contains the constitution and bylaws of the Graduate Student Honor Council, Appellate Review Board, and related regulations.

Detailed descriptions of Honor System violations and procedures are also available on the web at studentorg.vanderbilt.edu/gsc/honor-council.

Academic Requirements

Candidates for graduate degrees must have satisfactorily completed all residency, academic courses, and thesis or dissertation requirements, have passed all prescribed examinations, and be free of indebtedness to the university at the time of graduation.

The academic requirements described on the following pages have been established by the Graduate Faculty and are applicable to all graduate students at Vanderbilt.

Individual degree programs may have additional requirements. Students are advised to refer to the various program descriptions listed in this catalog and to consult their major advisers for requirements in the specialty of interest.

Students who were completing undergraduate or advanced degrees at the time of their admission must provide to the Graduate School, before initial registration, an official final transcript showing that the degree has been received and the date it was granted.

Responsible Conduct in Research

Vanderbilt University has an obligation to model, teach, and actively promote the responsible conduct of research in scholarship and science. Research integrity is fundamental to good research and crosses all disciplines and areas of focus. Vanderbilt's approach incorporates online and discussion-based content based on the individual's experience level and discipline. In addition to online education, individuals are expected to participate in discussion-based sessions to further explore the issues and challenges in conducting ethical research and . All new graduate students are required to take the Collaborative Institutional Training Initiative (CITI) course for their discipline during their first semester of study. Some are also required to participate in additional discussion-based RCR education, prior to completing their degrees. Each graduate program has defined the content of the discussion-based program for its students, based on the specific training needed within that disciplines. To find out more about your department's requirements, please check with the department chairman or [director of Graduate Studies \(DGS\)](#).

Intent to Graduate

An Intent to Graduate form must be submitted during the semester in which the student expects to receive a degree. Graduation dates are available at the Graduate School website. Students will receive a notification when the electronic Intent form for the end-of term conferral dates becomes available in the student's landing site in YES. All dates and deadlines will be posted on the academic calendar. If a student plans to graduate "IntraTerm" (January 31, February 28, March 31, May 31, June 30, August 31, September 30, October 31), these forms can be found at the Graduate School website and are to be submitted to the Graduate School at least fifteen days prior to the conferral date.

Requirements for the Master's Degree

The following master's degrees are awarded in the Graduate School: master of arts, master of science, master of fine arts, and master of liberal arts and science. Students should check regulations of their particular program; many have requirements in addition to those listed here.

Residence

The candidate for the master's degree shall spend at least one academic year of graduate study at Vanderbilt. Students enrolled in the online master of science in computer science program are exempt from the residency requirement.

Course Work

A minimum of 30 semester hours is required for the master's degree. This includes enrollment in at least 24 semester hours of formal course work plus enrollment in 6 additional hours of didactic course work or 6 credit hours of research. All requirements for the master's degree must be completed within a six-year period calculated from the student's first semester of enrollment in the Graduate School. Online master of science in computer science students must complete their program requirements within twenty-one months of initial enrollment. International students should contact the Office of International Student and Scholar Services concerning time limitations for completion of master's degrees.

"Formal, didactic coursework" is approved courses taken for credit other than thesis and dissertation research courses. Students should check departmental regulations for the number of "formal course" hours required for their particular program. On the recommendation of the student's program and approval of the Graduate School, credit up to 6 semester hours toward the master's degree may be transferred from graduate schools in accredited institutions, or other schools of the university.

An incoming graduate student deficient in areas the major department considers prerequisite to a graduate program shall take such course work without graduate credit, in addition to the courses required for the advanced degree.

Thesis

Electronic thesis submission is required through the VIREO ETD (Electronic Theses and Dissertations) website (vireo.library.vanderbilt.edu). Links on the Graduate School webpage outline the process. (See "Theses and Dissertations" under "Academics.") There are no fees associated with electronic submission.

Theses will be placed in the Vanderbilt University Institutional Repository. The student must provide the Graduate School with copies of the title page and the abstract. The title page must contain the original signatures of at least two graduate faculty members in the student's program. The abstract must contain the original signature of the thesis adviser. Specifications about required format, are available at gradschool.vanderbilt.edu/academics/theses.

Due dates are listed on the academic calendar.

Some programs require an examination or defense in addition to the thesis.

Non-Thesis Programs

Certain programs offer non-thesis master's degree programs and specify additional course work up to at least 30 hours. Some programs require an examination in addition to the 30 hours in lieu of a thesis. Not later than fourteen days prior to the end of the term, the student's department will verify that all degree requirements have been completed.

Master's Degree in Passing

Certain programs offering the Ph.D. degree will award a master's degree in passing. The minimum requirements are 30 hours of graduate study and a GPA of 3.0 or better. Students should check with their program to determine if this option is available and if additional course work and/or a thesis are required.

Final Examination

The candidate for the master's degree may, at the discretion of the program faculty, be required to take a final examination in the field of specialization. Such examination shall be completed not later than fourteen days before the end of the term in which the degree is to be granted.

Requirements for the M.L.A.S. Degree

A minimum of 30 semester hours of academic credit (ten courses) is required, including a Core Course (MLAS 6700) and a Capstone (MLAS 7340). Students must complete at least eight M.L.A.S. courses (24 hours) with the option of selecting the remaining two courses (6 hours) from the regular course offerings available to graduate students. Students normally take only one course each semester. All work must be completed within six years of the initial registration. A maximum of 6 credit hours may be transferred from graduate schools of other accredited universities and will count as part of the 6-hour non-M.L.A.S. course work. (M.L.A.S. discount tuition does not apply to the courses from the regular schedule.)

Curriculum

A range of seminars is offered in the humanities, social sciences, and natural sciences as well as core courses for beginning students and capstone workshops for advanced students.

Requirements for the Ph.D. Degree

The degree of doctor of philosophy is awarded in recognition of high attainment in a special field of knowledge, as evidenced by examination and by a dissertation presenting the results of independent research. General requirements are listed below. In many programs there are additional requirements, and students should carefully check regulations in their particular programs.

Admission to Candidacy

Admission to the Graduate School does not imply admission to candidacy for the Ph.D. degree. To be admitted to candidacy the student must satisfy the language requirements, if any, in the program, and must pass a qualifying examination. The examination must be scheduled and passed within four years of the student being admitted to the program. Upon petition to the Graduate School, a one-year extension may be granted to complete this requirement. The examination will be administered by the student's Ph.D. committee, which will supervise subsequent work toward the degree. Upon completion of these requirements the Ph.D. committee will recommend to the Graduate School that the student be admitted to candidacy.

Residence and Course Work

The Ph.D. degree requires at least three academic years of graduate study at Vanderbilt. A student must complete 72 hours of graduate work for credit, of which a minimum of 24 hours in formal, didactic course and seminar work in the Vanderbilt Graduate School is required. In most programs students are required to present considerably more hours in formal course work than the 24-hour minimum. The remainder of the 72 hours, above the program requirements in formal course hours, may be in dissertation research hours, in special readings, and in transfer credit if applicable. Performance in dissertation research does not affect the grade point average.

"Formal, didactic course work" is approved courses taken for credit other than thesis and dissertation research courses. Students should check departmental regulations for the number of "formal course" hours required for their particular program.

All students working full time toward the Ph.D. must register each fall and spring semester. When the required 72 hours of course work have been completed, registration for dissertation research without hourly credit applies; this reflects full-time effort on research and confers full-time student status. The minimum tuition of \$200 is charged.

Ph.D. Committee

The Ph.D. committee is appointed by the Graduate School on the advice of the chair or director of graduate studies of the program. The committee consists of not fewer than four members of the Graduate Faculty. Three of the members must be graduate faculty from within the student's department/program and one from outside the program. Any variation of the committee makeup must be approved by the Graduate School. The committee must be appointed by the Graduate School no less than two weeks before the time the student expects to take the qualifying examination.

The functions of the Ph.D. committee are (a) to administer the qualifying examination, (b) to approve the dissertation subject, (c) to aid the student and monitor the progress of the dissertation, and (d) to read and approve the dissertation and administer the final oral examination.

Graduate Faculty include all full-time tenured and tenure-track Vanderbilt University faculty members with primary appointments in departments or programs offering the M.A., M.S., and/or Ph.D. degrees. Those tenured or tenure-track faculty having secondary appointments in departments offering the M.A., M.S., and/or Ph.D. degrees will also be considered Graduate Faculty members.

Appointment of other faculty members to the Graduate Faculty can occur upon recommendation by the faculty member's department and with the approval of the Graduate School. Such appointment would require a majority vote by the Graduate Faculty of the department/program, plus the recommendation of the chair/director of graduate studies and approval by the Graduate School. Such appointments are restricted to full-time faculty members with the rank of assistant professor or above, with a primary or secondary appointment in programs offering the M.A., M.S., and/or Ph.D. degree. Faculty members appointed to the Graduate Faculty in this manner have all the privileges of Graduate Faculty, including supervising graduate students' research.

Other faculty can be assigned some duties normally reserved for Graduate Faculty on the recommendation of the chair and/or director of graduate studies of the department and with the approval of the Graduate School. The duties assigned must be specified and time-limited, e.g. membership on a Ph.D. committee or teaching a graduate-level class/ seminar in a particular semester. On occasion, these duties within a program or department may be specified without a specific time limit, e.g. standard graduate teaching duties or membership on any Ph.D. committee in the program. Faculty with limited responsibilities will not be permitted to direct theses or dissertations.

Faculty members, or others carrying out research or scholarship from outside universities, may also be appointed to serve on a specific student's Ph.D. committee without being considered for Graduate Faculty status, e.g., a faculty member from outside of Vanderbilt, a faculty member from a professional school such as law or medicine, or a scientist working in a national laboratory, with the approvals of the director of graduate studies or chair of the student's department and of the Graduate School. The request to appoint someone in this manner must be accompanied by a short letter of justification explaining what expertise this person brings to the student's committee along with a copy of the faculty member's curriculum vitae.

Qualifying Examination

The purpose of the qualifying examination is to test the student's knowledge of the field of specialization, to assess familiarity with the published research in the field, and to determine whether the student possesses those critical and analytic skills needed for a scholarly career.

The examination is conducted by a Ph.D. committee.

The qualifying examination may be administered at any time during the school year and shall be completed within a period of four weeks. Before a qualifying examination can be scheduled, the student must have completed at least 24 hours of graduate work (to include all course work required for the degree) and the language requirement, if any. In some programs the student may be required to demonstrate basic competence in the discipline through a written preliminary examination prior to the actual qualifying examination.

All departments and other units offering Ph.D. programs must set a maximum time limit within which a student, under normal circumstances, is required to take the qualifying examination. That maximum time limit must not exceed four years.

The qualifying examination may be written or oral, or both. The Graduate School must be notified of the time and place of the qualifying examination at least two weeks in advance. The qualifying examination is not a public examination, and voice recordings of it are not permitted. A student is allowed only two opportunities to pass the qualifying examination. The qualifying examination results form, signed by the committee members and the director of graduate studies for the program, shall be forwarded to the Graduate School immediately after the examination.

When the student has passed the qualifying examination, the Ph.D. committee shall recommend to the Graduate School that the student be admitted to candidacy for the degree.

Dissertation

A candidate for the Ph.D. degree must present an acceptable dissertation. The dissertation demonstrates that the candidate has technical competence in the field and has done research of an independent character. It must add to or modify what was previously known, or present a significant interpretation of the subject based upon original investigation. The subject of the dissertation must be approved by the student's faculty adviser and Ph.D. committee.

The dissertation must be completed within four years after a student has been admitted to candidacy for the degree. Upon petition to the Graduate School, a one-year extension of candidacy may be granted. If such a period has expired without successful completion of the dissertation, the student may be dismissed from the Graduate School. Readmission to the Graduate School, and to candidacy, requires application to the Graduate School, with approval of the program faculty. In such cases the student may be required, by the Graduate School or by the Ph.D. committee, to demonstrate competence for readmission by taking a qualifying examination or additional course work.

The candidate must submit a copy of the completed dissertation to the Ph.D. committee at least two weeks prior to the dissertation defense. The committee reviews the dissertation and conducts the final examination.

Students must also upload the dissertation for required format review in the VIREO Electronic Thesis and Dissertation website, vireo.library.vanderbilt.edu, at least two weeks prior to the dissertation defense. The final dissertation and accompanying requirements must be submitted through VIREO by the appropriate deadline specified on the academic calendar. Requirements include the title page with signatures of at least a majority of the Ph.D. committee, the signed abstract with a maximum of three hundred fifty words, properly formatted, a Curriculum Vitae, and the Survey of Earned Doctorates completion certificate.

Style specifications templates and VIREO submission instructions are listed at gradschool.vanderbilt.edu/academics/theses.

Students in foreign language departments may submit manuscripts in a language other than English. The abstract, however, must be in English.

Multi-Part and Journal Article Format

You may use a multi-part presentation format for combining original research that has been conducted in two or more related or non-related areas, or for presentation of combined journal articles (published or submitted for publication). You should organize the parts or articles into chapters, with well-defined subheadings, including an introduction, methods, results and discussion. Each chapter may contain its own list of references and appendices,

or you may list them all at the end, depending on the custom of your discipline.

When using this format, the thesis or dissertation should nonetheless consist of an integrated argument that binds the chapters together. You should include the appropriate preliminary pages, an introduction presenting the general theme of the research, and a conclusion summarizing and integrating the major findings. Any additional appendices related to the dissertation as a whole or any general references from the introduction, conclusion or transitional sections should come at the end of the dissertation.

Permission to Include Your Own Previously Published or Co-Authored Material

When you have previously published portions of your thesis or dissertation as an article or book chapter, you must ensure the work may also be published as part of the dissertation or thesis. The standard provisions of copyright law [<https://researchguides.library.vanderbilt.edu/copyright>] regarding quoted and previously published material under copyright apply to the publication of theses and dissertations. Many publishers provide exceptions to work published as part of graduation requirements and this is often clearly outlined as part of the publication agreement signed by the author. In order to include your own previously published or co-authored material in your thesis or dissertation, you must comply with the following:

1. You must be the first author, or obtain permission from your committee, to be uploaded as an Administrative file in Vireo.
2. The article must be based on research completed while you were enrolled at Vanderbilt University.
3. You must have permission from the publisher to reuse the work, which should be uploaded to Vireo as an Administrative file. The record of permission may take the form of the publishing agreement, a copy of the publisher's webpage describing reuse rights, or an email approval from the publisher. You should also identify which chapters are associated with which articles when prompted within Vireo.
4. If there are co-authors, you must obtain the permission of all co-authors to include the work in the thesis or dissertation both as a matter of copyright law and professional courtesy. Include these permission (email approval is acceptable) as an Administrative file in Vireo.
5. You must properly acknowledge previously published material and any co-authors within the text of your manuscript. This would typically take the form of a statement beneath the relevant chapter heading, such as "This chapter is adapted from [Title] published in [Journal] and has been reproduced with the permission of the publisher and my co-authors [List co-authors]" and include the full citation required by the publisher, if any, or appropriate to your discipline.

If the work is submitted to the ProQuest database, ProQuest will scan the document to ensure it contains no copyrighted material without consent and proper citation.

Inclusion of Third-Party Content in Your Dissertation; Copyright & Fair Use Issues

If you are including content in your dissertation not authored or created by you, consider copyright issues. If your use of the content would exceed fair use under the Copyright Act, then you will need to seek the copyright holder's permission in order to use the material. Obtaining copyright permissions often takes time and should not be left until the last minute.

You should discuss questions about copyrighted material with your dissertation advisor or contact the VU Librarian for Copyright and Scholarly Communications at disc@vanderbilt.edu for help evaluating fair use or obtaining permissions.

Copyright of Your Thesis or Dissertation

Your thesis or dissertation is automatically protected by copyright as soon as it is fixed in a tangible form, such as being saved as an electronic file. Although not required, it is good practice to include the copyright symbol, your name, and the year on the title page of your work (© 2017 by [your name]).

You also may choose to register your copyright, which will gain you additional protections in case of litigation for copyright infringement. You can file a copyright registration online directly with the U.S. Copyright Office. The U.S. Copyright Office charges a fee of \$45.00.

Publishing Agreements

You will be asked to agree to the license to deposit your submission to the Vanderbilt Institutional Repository. The Library, with the Vanderbilt Institutional Repository, enhances the metadata provided with your dissertation and adds your record to discovery tools like the Library Catalog and WorldCat, making it easily findable for scholars worldwide. The library also maintains the technical infrastructure of the repository. If you plan to make your dissertation open access, we can assist you in understanding the options for licensing. If your dissertation makes use of copyrighted content, you will want to think early on about whether you may rely on fair use or need to acquire licenses. We will be glad to meet with you to discuss the requirements of your particular project.

Ph.D. students also have the option to request deposit of your submission with ProQuest, at no additional cost to you. If you elect to deposit your submission with ProQuest, you must also agree to the ProQuest license. This agreement is entirely between you and ProQuest. Vanderbilt's sole responsibility is to pass on the license agreement and your work to ProQuest. Please contact ProQuest Dissertation Publishing, at 1(800) 521-0600 or dissspub@proquest.com with any questions.

Embargos

Dissertations are intended to be of benefit to the academic community and to society in general, and thus are required to be publicly available. This is accomplished by placing a copy in the Vanderbilt Institutional Repository. In some instances, students may request a delay in the release or posting of their dissertations for a limited time period. This can be done, for example, to protect intellectual property, to allow time to file a patent application, or to coordinate with the timing of publication in another form. In no circumstance will the release of the dissertation be delayed for more than two years. Unless requested for a shorter period of time, any request to delay public release will expire at the end of two years and the Graduate School will proceed with the public release through the library. Metadata, including the abstract, about your submission will still be visible in the Vanderbilt Institutional Repository, thereby indicating that your submission was accepted. You should discuss any anticipated hold on publication with your advisor. If selecting the ProQuest publishing option, be sure that you make the same embargo selection under the Vanderbilt options. Once your submission has been released to ProQuest, we have no ability to retract it.

If, after consultation with your advisor, you would like to request a temporary embargo, you can elect from the following: — No embargo and release immediately for worldwide access — Six (6) month embargo — Twelve (12) month embargo — Twenty-four (24) month embargo.

If you, after consultation with your advisor, determine that you need to extend your embargo beyond your initial selection, you can only do so with permission from the Graduate School. If you have questions about your embargo, you may email etdadmin@vanderbilt.edu.

Extra Copies

The Graduate School recommends Campus Copy for procuring bound copies of theses and dissertations. You may contact them directly at 615-936-4544, or online at printingservices.vanderbilt.edu.

Final Examination

The candidate must pass his or her dissertation defense by the appropriate deadline for the date the degree is to be conferred, or by March 24 for May graduation. All conferral dates and deadlines are listed on the academic calendar. The final oral examination is administered by the student's Ph.D. committee and is on the dissertation and significant related material; the student is expected to demonstrate an understanding of the larger context in which the dissertation lies. The public is invited to attend the final examination, which is announced in advance in Vanderbilt's electronic calendar.

The chair of the Ph.D. committee or the director of graduate studies of the program, after consultation with the candidate, shall notify the Graduate School in advance of the place and time of the examination and the title of the dissertation. This should be done no later than two weeks prior to the examination. The Graduate School then formally notifies the Ph.D. committee and submits the defense notice to Vanderbilt's electronic calendar. The dissertation defense results form, signed by the committee members and the director of graduate studies for the program, should be forwarded immediately to the Graduate School.

Further Requirements

It should be understood that the requirements stated above are minimum and that individual programs may add others. Students are urged to consult individual program entries in this catalog and departmental chairs and directors of graduate studies to learn the requirements of programs in which they are interested.

Language Requirements for the Master's and Ph.D. Degrees

The language requirements, if any, for the master's and Ph.D. degrees in each graduate program are determined by the program faculty, and are set forth in this catalog in the section devoted to program descriptions and course offerings.

Foreign language requirements are usually met by demonstration of proficiency in one or more of the following: French, German, or Spanish. Certain programs either permit or require proficiency in other languages; and some others restrict the choice to certain combinations within this group. Students should refer to the various program statements in this catalog and should consult their advisers regarding specific requirements.

Examinations in languages are usually administered by the appropriate language faculty by arrangement with the program. As an alternative to certification of proficiency by examination, the Graduate School may accept certification from the program that the minimum requirement in a language has been met if the student is able to present an acceptable academic record of the equivalent of at least 12 semester hours in the language.

A student who has fulfilled the language requirement at another graduate school prior to entering Vanderbilt may, at the discretion of the program and the Graduate School, transfer the certification if the student does so within three years after having received it.

International students may petition the Graduate School through the program to substitute their native language for one of the usual languages required for the Ph.D. degree.

Registration

The normal academic load for full-time registration is 9 to 13 hours in the fall and spring semesters. Students registered for 9 or more credit hours in fall or spring are defined as full time. Those registered for 7 or 8 hours in fall or spring are considered three-quarter time, those registered for 6 hours in fall or spring are half time, and those registered for less than 6 hours in fall or spring are less than half time. In the summer term, 6 or more hours is defined as full time, 5 hours is three-quarter time, 3 to 4 hours is half time, and less than 3 hours is less than half time. After completing the hourly requirements for the degree, full-time students register for master's (7999) or Ph.D. (8999, 9999) research without hourly credit to reflect full-time effort on research. Certain programs offer a half-time Ph.D. research course (9995) for students who are able to devote only half-time effort to dissertation research.

During each semester currently enrolled students are asked to meet with their advisers and directors of graduate studies to plan their schedules for the coming semester. All students must later complete official registration at the appropriate time using YES (Your Enrollment Services).

All full-time graduate students, including those receiving scholarship, assistantship, fellowship, or traineeship support through the university, must register each fall and spring semester with no breaks in registration to remain in good standing.

Changes in Registration

Changes in registration may be made through YES during the open enrollment period (the first ten class days of the semester) with consent of the major department. A student is not permitted to add or drop a course, change the number of hours in a variable-credit course, or change the audit status after the end of the open enrollment. A student may formally withdraw from a course after the end of the open enrollment with the permission of the department, and a grade of *W* will be given. A student is not permitted to withdraw from the course after the Last Day to Withdraw (see Graduate School calendar) except under certain circumstances. Failing the course is not considered one of the circumstances. Students should note, in the section on tuition and fees, the regulations concerning tuition obligations for courses dropped after the first week of the term.

Courses in which there is a significant change in subject matter each semester (e.g., special topics courses) may be repeated for credit within limits noted in the course listings of this catalog.

Grading System

The grading system in the Graduate School includes the letter grades *A*, *B*, *C*, and *F*. A student will not be granted graduate credit for any course in which a grade less than *C*- is received. Courses not designated as eligible to be repeated for credit may be repeated for grade replacement purposes. If a course was failed the last time it was taken, credit is awarded when the course is repeated with a passing grade. If a course was previously passed, no new credit will be earned. If a course previously passed is repeated and failed, credit originally earned for it is lost. In any case all grades earned are shown on the transcript. The most recent grade in a course replaces the previous grade in determining credit, in computing the grade point average, and in verifying the completion of degree requirements and progress toward the degree. Passed courses may be repeated only once. Failed courses may be repeated any number of times until passed. The letter *I* may be used at the discretion of the instructor in those cases in which the student is not able to complete work in the normal time. The notation *W* is entered onto the transcript when a student withdraws from a course or from the Graduate School. A grade point average of 3.0 is required for graduation.

Letter grades are assigned grade point values as follows:

A+ = 4.0	B- = 2.7
A = 4.0	C+ = 2.3
A- = 3.7	C = 2.0
B+ = 3.3	C- = 1.7
B = 3.0	F = 0.0

S/U grades are given every semester for all research courses (7999, 8999, and 9999), regardless of the number of hours registered. The accumulation of three (3) *U* grades over the course of study can lead to dismissal from the program and the Graduate School. No credit will be granted for courses in which a grade of *U* is received.

Students receive grades in all courses except those approved for credit/non-credit, audits, and some seminars. An *I* that is not replaced by a letter grade within one year may be changed to the grade *F* at the discretion of the instructor; otherwise, the *I* may become permanent and remain on the transcript as such.

Certain courses approved by the graduate faculty for credit/ non-credit or Pass/Fail count toward total hours. Courses that are strictly no-credit, however, do not count toward total hours or in calculating grade point average, although grades for such courses are entered on the student's record.

With the instructor's permission, students are permitted to audit certain courses. Students who audit are expected to attend the course regularly. Students must be registered for regular courses in order to audit. Audits are listed on the student's transcript. Audits are limited to two per semester.

Grade Change Policy

For a student enrolled in the Graduate School, a grade recorded in the Office of the University Registrar may be changed only upon the written request of the instructor, endorsed by the appropriate official (usually an associate dean) within the school/college that offered the course, and then the approval of the associate dean of the Graduate School. An instructor's petition to change a grade must include a brief rationale for the change.

Changing a recorded grade is a serious matter and, in general, petitions will be approved only upon certification

that the original grade was in error or, in the case of an Incomplete, that the outstanding requirement(s) have been completed. Request for exceptions to this policy should be directed to the associate dean of the Graduate School and will be considered on an individual basis; these may require additional certifications and approvals.

Academic Probation

A grade point average of 3.0 is necessary for graduation. Students who fall below an average of 3.0 are placed on probation for one semester. If the student's performance does not improve during that semester, the Graduate School and the appropriate department chair will decide whether to dismiss the student or to allow the continuation of probation. If at the end of the second semester the grade point average is still below 3.0, the student may be advised to withdraw or face dismissal. Students who earn a grade point average of 2.0 or less during their first semester of residence are subject to dismissal at the end of that semester. Accumulation of three *U* grades in research courses can lead to dismissal.

Student Grievances and Appeals

Students who believe their academic performance has not been judged reasonably or fairly, or who believe their intellectual contributions have not been fairly acknowledged, should discuss their concerns with the director of graduate studies in their program or, as necessary, the chair of the department. If the student's concerns cannot be resolved at the program or departmental level, the student may then request a further review of the issues in question by the associate dean for graduate studies or similar official in their school dean's office. The student may appeal the outcome of the school-level review to the Graduate School.

Credit

Courses not listed in this catalog that are numbered from 5000 to 9999 may be taken for credit by graduate students on the recommendation and consent of the faculty adviser and the director of graduate studies, unless some limit is noted in the description. Not all courses offered by various divisions of the university have been approved by the Graduate Faculty for graduate credit. In these cases, students should complete a "Request for Graduate Credit" form. In arranging schedules, students should consult their advisers and carefully check the Graduate School catalog for approved courses.

Students may register for graduate courses or other courses in the university on a non-credit basis—either to fulfill their own interests or to meet certain prerequisites and requirements. The designation "no-credit" presupposes the student's participation in the course, including written assignments and examinations. Grades are received and recorded in no-credit courses and tuition is billed at the regular hourly rate.

Credit Policy

Credit hours are semester hours; e.g., a three-hour course carries credit of 3 semester hours. One semester credit hour represents at least three hours of academic work per week, on average, for one semester. Academic work includes, but is not necessarily limited to, lectures, laboratory work, homework, research, class readings, independent study, internships, and practica. Some Vanderbilt courses may have requirements that exceed this definition.

Transfer Credit

Graduate credit may be transferred from graduate schools in accredited institutions. Transfer is made only on the recommendation of the chair or director of graduate studies of the major department and approval of the Graduate School.

A maximum of 6 semester hours of transfer credit may be applied toward the master's degree and 48 hours toward the Ph.D. (See requirements for the master's degree and Ph.D. degree elsewhere in this catalog.)

Only those hours in which the student has achieved the grade *B* or better will be considered for transfer. Grades earned on transferred credit do not affect the student's Graduate School average unless such courses are to be counted as didactic hours.

Students who want to transfer to the Graduate School from professional degree programs offered by other schools at Vanderbilt must submit a formal application for admission and are expected to do so not later than the end of their first year of graduate-level studies at Vanderbilt.

Credits earned through the Division of Unclassified Studies cannot generally be used toward a graduate degree at Vanderbilt University.

Special Non-Degree Students

Special non-degree student status is reserved for limited circumstances. It is not intended for students who seek regular admission or to be admitted later as degree-seeking students. Examples appropriate for special non-degree status include a student enrolled in an accredited university but will be in residence at Vanderbilt for up to one year, such as a student participating in an approved exchange program. Another example is a student enrolled for a degree at another accredited university and whose adviser becomes a faculty member at Vanderbilt. In those instances, the special student status at Vanderbilt is to maintain a connection to that faculty member and/or receive financial support while at Vanderbilt and completing the degree at their home university. Other circumstances may be considered on a case by case basis.

Students admitted as non-degree students may register for selected courses in areas where they are qualified. Such students must submit an application and transcript(s) of their previous academic work with the Graduate School. Approval of the instructor, the department in which the course is offered, and the Graduate School is required.

GRE scores are not required. Status as a non-degree student is expected to last no longer than one year. No more than 6 semester hours earned as a non-degree graduate student may be applied to graduate degrees at Vanderbilt.

Leave of Absence

The Graduate School requires continuous registration except for summer sessions. Students who want to interrupt their graduate study must petition the department, who on their behalf apply to the Graduate School for an authorized leave of absence. Leave of absence is granted for a maximum of one year. Those without authorized leave who do not register are dismissed from the Graduate School and are not considered students. If they want to resume graduate study at Vanderbilt, they must petition for reinstatement.

Leave of absence may be requested for personal reasons other than health and parental accommodation for up to 12 months and renewable for a maximum of four years.

Parental Leave

All students enrolled full-time in the Graduate School and supported by funding from either internal or external sources are covered by this policy. This includes students with funding through stipends, such as training grants or service-free fellowships, and students compensated for services, such as teaching or research assistants. Prior to and/or following childbirth or adoption of an infant, the primary caregiver (whether mother or father) will be allowed to take six weeks of parental leave. During this period, the student's current stipend, and, if applicable, funding for health insurance and tuition, will be continued without interruption. The student's enrollment status will be continued during this period as well.

Withdrawal

Students who intend to withdraw from the university should inform the department, who then informs the Graduate School in writing. Improper notification may result in academic and financial penalties.

Credit for Graduate Courses Taken as an Undergraduate

A qualified Vanderbilt University senior undergraduate may enroll in graduate courses and receive credit which, upon the student's admission to the Graduate School, may be applicable toward a graduate degree.

Undergraduate seniors interested in this option should review the regulations appearing in the Undergraduate

Catalog and consult their advisers and the Graduate School. Undergraduates should note that those wanting to take 5000-level courses or above, whether under this option or not, must obtain the written approval of their academic adviser, the instructor of the course, and the Graduate School.

In certain special cases, credit may be transferred for graduate-level course work completed during undergraduate degree studies by a student at another accredited institution. The course hours must be in excess of the minimum required for the undergraduate degree and the course(s) must not be a required part of the undergraduate degree or major. Requests for such transfer of credit must be carefully justified by the student's major department and approved by the Graduate School.

Commencement

The university holds its annual Commencement ceremony following the spring semester. Degree candidates must have completed successfully all curriculum requirements and have passed all prescribed examinations by the published deadlines to be allowed to participate in the ceremony. A student completing degree requirements in the summer or fall semester will be invited to participate in Commencement the following May; however, the semester in which the degree was actually earned will be the one recorded on the diploma and the student's permanent record. Students unable to participate in the graduation ceremony will receive their diplomas by mail. Please refer to the Commencement webpage at vanderbilt.edu/commencement/ for complete information on the May ceremony.

Graduate School Courses

Explanation of Symbols

5000-level courses listed in this catalog may be taken by graduate students for credit unless a specific restriction is indicated in the course description and provided there is no duplication of the student's previous courses.

6000-level courses and above listed in this catalog are graduate courses. They are on a level normally considered too high for undergraduates and are not open to undergraduates without consent of the instructor, the adviser, and the Graduate School.

Length of a course is one semester.

The semester in which a one-semester course is offered is indicated by the word FALL (or SPRING) in the course description.

Hours referred to are semester hours, and figures in brackets always indicate semester hours credit.

Formal course work means all courses taken for credit except thesis and dissertation research courses. The university reserves the right to change the arrangement or content of courses, to change texts and other materials used, or to cancel any course on the basis of insufficient enrollment or for any other reason.

Graduate School Administration and Faculty

CERTIFICATE OFFERED: AFRICAN AMERICAN AND DIASPORA STUDIES

COURSES OFFERED: [AADS](#)

Vanderbilt University's African American and Diaspora Studies program offers an interdisciplinary, cross-cultural, and comparative curriculum of study of the histories, literatures, music, visual cultures, and politics of people of African descent around the world. To that end, the African American and Diaspora Studies program focuses on several geographic areas: Africa, Europe, the Americas, and the Caribbean. The certificate in diaspora studies has been designed to complement students' disciplinary training, expose them to the interdisciplinary trends in the academy, and broaden their career possibilities.

The diaspora studies certificate provides graduate students with access to interdisciplinary scholarship in the dynamic and continually evolving field of studies in the worldwide African diaspora. The certificate also gives students a competitive edge and interdisciplinary training for the still robust career outlook for specialists in pan-black studies as well as in the search for postdoctoral fellowships in the humanities and social sciences.

The certificate in diaspora studies is open to any student enrolled in graduate study at Vanderbilt University. Acceptance to the program requires the approval of the African American and Diaspora Studies program graduate studies committee, comprising the director of graduate studies, the chair of African American and Diaspora Studies, and one other faculty member from African American and Diaspora Studies.

Students must also submit as part of the application to the certificate program: 1) a one-page description of their interests in African diaspora studies and how it relates to their graduate program of study; and 2) complete an Intent to Enroll form, which must be signed by the student, the AADS director of graduate studies, and the director of graduate studies for the degree program in which the student is enrolled. A signed copy of the form should be submitted to the Graduate School (graduateschool@vanderbilt.edu), to the Office of the University Registrar (URO) (university.registrar@vanderbilt.edu), and to the AADS program administrator (lennita.tate@vanderbilt.edu).

For more detailed information on the diaspora certificate, please go to yu.edu/aads or contact the director of graduate studies in the Department of African American and Diaspora Studies.

Requirements for the Graduate Certificate in Diaspora Studies

1. 12 credit hours of course work, which includes:
 - 3 credit hours of African American and Diaspora Studies 5002, an interdisciplinary introduction to materials, teaching methods, debates, and theoretical terms of scholarly research in diaspora studies. A three-week section devoted to course design and development will also be taught in conjunction with the Center for Teaching. Students will be required to prepare a syllabus for the introductory course in African Diaspora Studies, AADS 1010.
 - 9 credit hours of interrelated graduate-level course work on race and its intersection with gender, class, religion, power, and/or sexuality, which are appropriate to the student's graduate program of study. Students may also take African American and Diaspora Studies 5654 Memoirs and Biographies, African American Studies 5588 The Black Studies Movement, as well as African American and Diaspora Studies 5095 Directed Study with a faculty member in African American and Diaspora Studies to fulfill 6 credit hours. No more than 6 credit hours of specifically named courses required for the primary degree may be applied toward the certificate. All courses must be approved by the African American and Diaspora Studies program graduate committee and must form an intellectually cohesive whole. Students will be required to provide a copy of course syllabi to the graduate committee so that the committee may determine whether the courses taken or proposed to be taken by the student are indeed appropriate for certificate credit.
2. Participation in a minimum of five extracurricular activities sponsored by the Callie House Research Center for the Study of Global Black Cultures and Politics. A short paper reflecting on the insights gained from participating must be submitted to the director of graduate studies before conferral of the certificate.
3. The conferral of the certificate requires a cumulative GPA of 3.3, satisfactory performance of 3.3 or better in AADS 5002, and completion of all the aforementioned requirements.

Graduate courses successfully completed at Vanderbilt University prior to admission to the program may be counted toward the certificate requirements with the approval of the chair of the department if the course can satisfy one of the curriculum requirements of the program. Or if the program doesn't require the permission of the chair: Graduate courses successfully completed at Vanderbilt University prior to admission to the program may be counted toward the certificate requirements if the course can satisfy one of the curriculum requirements of the program.

An undergraduate course may be substituted for a graduate course required by the program's curriculum with the approval of the chair of the program and the Graduate School.

Approved List of Courses

AFRICAN AMERICAN AND DIASPORA STUDIES: 5002 (300), Theories of Diaspora; 5095 (395a), Directed Study; 5654 (265) Memoirs and Biographies, 5588 The Black Studies Movement.

ANTHROPOLOGY: 8220 (349), The Historical Archaeology of Latin America.

ENGLISH: 8137 (337a), Introduction to Literary Theory; 8150 (350), Special Problems in English and American Literature; 8155 (355), Special Topics in English and American Literature; 8430 (325), Seminar in Modern British and American Literature; 8450 (320), Studies in American Literature; 8455 (321), Studies in Southern Literature.

FRENCH: 8070 (388), Seminar in Francophone Literature.

GERMAN: 5795 (395), The Racial Imagination.

HISTORY: 6400 (302a), Readings in American History; 6410 (302b), Readings in American History; 6500 (303a), Readings in Early Latin American History; 6510 (303b), Readings in Modern Latin American History; 8050 (305), Studies in Comparative History; 8600 (358), Comparative Slavery in the Colonial Americas; 8610 (359), Atlantic World History, Fifteenth to the Nineteenth Century; 8620 (361), Studies in Latin American History; 8630 (365), Research Seminar in Latin American History; 8700 (371), Studies in Early American History to 1783; 8710 (372), Studies in the Middle Period of American History, 1783-1861; 8720 (373), Studies in U.S. History, 1861-1900; 8730 (374), Studies in Recent American History; 8732, Religion and the Civil Rights Movement; 8740 (375), Research Seminar in Recent American History; 8745 U.S. and the World; 8750 (381), Studies in American History.

PHILOSOPHY: 9000 (353), Figures in Philosophy (must be AADS-related); 9020 (352), Topics in Philosophy (must be AADS-related).

POLITICAL SCIENCE: 8305 (305), Feminist Social and Political Thought; 8330 (330), Studies in American Politics; 8332 (332), Electoral Behavior and Public Opinion.

RELIGIOUS STUDIES: 3442, African American Political Theology; 3535, Black Islam in America; 3538, The Black Church in America; 3822, The Amarna Period; 3852, Slave Thought; 3882, African American Biblical Hermeneutics;

7131 (3415), Feminist/Womanist Ethics.

SOCIOLOGY: 6302, Contemporary Theory; 8331, Survey Seminar on Collective Behavior and Social Movements;

8333, Survey Seminar on Cultural Sociology; 8345, Survey Seminar on Social Stratification.

SPANISH: 8200, Seminar: Studies in Colonial Literature; 8345, Introduction to Latin American Colonial Studies; 9240, Ordering and Disrupting Fictions in Latin America; 9270, The Politics of Identity in Latino U.S. Literature; 9520, Special Topics in Spanish American Literature.

WOMEN'S AND GENDER STUDIES: 8301, Gender and Sexuality: Feminist Approaches; 8302, Gender and Pedagogy.

ASSOCIATE DIRECTOR Gabriel A. Torres Colón (Anthropology)

PROFESSORS C. André Christie-Mizell (Sociology), Dan Cornfield (Sociology), Colin Dayan (English), Marshall C. Eakin (History), Ted Fischer (Anthropology), Vivien Fryd (History of Art), Joni Hersch

(Law and Economics), Larry Isaac (Sociology), Dana Nelson (English), Paul Stob (Communication Studies)

ASSOCIATE PROFESSORS Vanessa Beasley (Communication Studies), Teresa A. Goddu (English), Leah Lowe (Theatre), Ifeoma Kiddoe Nwankwo (English)

ASSISTANT PROFESSOR Aimi Hamraie (Medicine, Health, and Society)

SENIOR LECTURERS Alexander Jacobs

LECTURERS Susan Kevra (French), Mario Rewers, Danyelle Valentine

ADJUNCT ASSISTANT PROFESSOR Clay Stauffer

CERTIFICATE OFFERED: AMERICAN STUDIES

COURSES OFFERED: [AMST](#)

Vanderbilt University's Program in American Studies offers a graduate certificate designed to complement students' disciplinary training, expose them to larger interdisciplinary traditions and academic literatures, and enhance their professional careers. The certificate offers a structured introduction to the questions and methods of American Studies. It provides students with a valuable credential and strengthens their ability to compete for jobs as well as national fellowships and postdoctoral awards.

The certificate in American Studies is open to any student enrolled in graduate study at Vanderbilt University. Students wishing to enroll must complete an Intent to Enroll form, which must be signed by the student, the director of the program, and the director of the graduate program (DGS) for the degree program in which the student is enrolled. A signed copy of the form should then be submitted to the Graduate School (graduateschool@vanderbilt.edu) and to the Office of the University Registrar (university.registrar@vanderbilt.edu).

Acceptance to the program requires the approval of both the graduate director of the student's home department and the director of the Program in American Studies. Students must also submit an application that includes (1) a one-page rationale for their course of study to the American Studies graduate committee for approval, and (2) a plan of study focused on a specific theme, forming an intellectually coherent whole.

Graduate courses successfully completed at Vanderbilt University prior to admission to the program may be counted toward the certificate requirements with the approval of the director of the program if the course can satisfy one of the curriculum requirements of the program. An undergraduate course may be substituted for a graduate course

required by the program's curriculum with the approval of the director of the program and the Graduate School.

The awarding of a certificate requires a cumulative GPA of 3.3, of *B+* or better in AMER 8000, completion of all course requirements, and satisfactory completion of the practicum project requirement. Please contact the American Studies program for more information at american-studies@vanderbilt.edu.

Requirements for Graduate Certificate in American Studies

1. American Studies 8000: Graduate Workshop in American Studies.
2. Four additional graduate-level American Studies courses appropriate to the student's program of study. Courses must be approved by the graduate committee for credit and should include at least two courses outside the student's home discipline. One course may be devoted to the practicum project and can be satisfied through an independent study with a faculty member affiliated with the American Studies program, with the approval of the director of the American Studies program.
3. Participation in the monthly meetings of the Graduate Working Group.
4. A practicum project submitted to the graduate committee for evaluation. The project must demonstrate the application of an American Studies approach to research, teaching, or fieldwork in the context of the student's primary field and can take the form of an American Studies Salon, a detailed American Studies Road Trip or City Walk plan, an article draft, a conference paper for a regional or national American Studies Association meeting, or an annotated syllabus for an introductory American Studies course.

Anthropology

CHAIR Tiffany A. Tung

DIRECTOR OF GRADUATE STUDIES T.S. Harvey

PROFESSORS EMERITI Tom D. Dillehay, Thomas A. Gregor, Ronald Spores

PROFESSORS Arthur A. Demarest, Edward F. Fischer, Lesley Gill, Tiffany A. Tung

DISTINGUISHED RESEARCH PROFESSOR Tom D. Dillehay

ASSOCIATE PROFESSORS Jada Benn Torres, Beth A. Conklin, Markus Eberl, William R. Fowler Jr., T. S. Harvey, Norbert Ross, Steven A. Wernke

RESEARCH ASSOCIATE PROFESSOR Patricia J. Netherly

ASSISTANT PROFESSOR Carwil Bjork-James, Gabriel A. Torres Colon

ASSISTANT PROFESSOR OF THE PRACTICE Sophie Bjork-James

SENIOR LECTURER Mareike Sattler, Jacob Sauer

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [ANTH](#)

The graduate program in anthropology is designed to prepare students for careers in teaching and research and teaching, especially with an emphasis on specializations in the anthropology of Central America, Mexico, and South America. Our graduate program covers the four subfields of anthropology: archaeology, biological anthropology/bioarchaeology, cultural/medical anthropology, and linguistic anthropology. The graduate enrollment of approximately thirty graduate students assures a close tutorial relationship with faculty and ample student opportunities for field research, lab research, and publishing.

Students who are admitted to the Ph.D. program in anthropology may earn a master of arts (M.A.) in anthropology en route to the Ph.D. The M.A. is awarded to students who earn a minimum of 36 credit hours of graduate study, complete the foreign language requirement, and pass the comprehensive exams.

The Ph.D. degree requires at least 72 hours of graduate work of which 45 hours are formal coursework (this can include Independent Studies). The remaining hours are pre-doctoral and doctoral candidate research hours. Doctoral candidates must pass comprehensive examinations, present and defend a dissertation proposal (i.e., complete the qualifying exam), complete a dissertation on original research (field or archival), and successfully defend the dissertation. Subject to the approval of the director of graduate studies, students entering the program with a master's degree or with studies elsewhere may transfer up to 18 hours of graduate credit. Additional information about the Department of Anthropology Ph.D. program can be found at this website: as.vanderbilt.edu/anthropology/graduate/phd.php.

CHAIR Gerald Figal

PROFESSORS Robert Company, Gerald Figal (Joint with History)

ASSOCIATE PROFESSOR Ben Tran

ASSISTANT PROFESSORS Mabel Gergan, Guojun Wang, We Jung Yi,

PRINCIPAL SENIOR LECTURER Xianmin Liu

SENIOR LECTURERS Divya Chaudhry, Yinghui Guo, Seok Bae Jang, Pengfei Li, Elliott McCarter, Hideko Shimizu, Qing Wei

LECTURERS Ji Young Chung, Nozomi Imai, Asami Nakano, Ji You Whang

Interdepartmental Faculty

PROFESSORS Yoshikuni Igarashi (History), Tony K. Stewart (Religious Studies)

ASSOCIATE PROFESSORS Brett Benson (Political Science), Peter Lorge (History), Tracy Miller (History of Art), Ruth Rogaski (History), Samira Sheikh (History), Lijun Song (Sociology and Medicine, Health, and Society)

ASSISTANT PROFESSORS Adeana McNicholl (Religious Studies), Akshya Saxena (English), Anand V. Taneja (Religious Studies), Meng Zhang (History)

SENIOR LECTURER EMERITUS James Auer (Center for U.S.-Japan Studies)

CERTIFICATE OFFERED: ASIAN STUDIES

COURSES OFFERED: [ASIA](#)

Vanderbilt University's Department of Asian Studies offers a graduate certificate in the interdisciplinary study of the societies and cultures of Asia. The certificate offers graduate students a perspective on Asia that goes beyond the student's particular disciplinary specialization, and signals that the student has achieved competence in an Asian language. The certificate offers a valuable credential for students who wish to undertake career opportunities in Asia, or work in a field related to Asian countries, institutions, or populations. An Asian Studies certificate will also allow students in professional schools to take advantage of the many global opportunities opening up in business, law, education, and health care.

Requirements for the Certificate in Asian Studies

The certificate in Asian Studies is open to any student enrolled in graduate study at Vanderbilt University. The certificate is awarded upon fulfillment of the following three categories of requirements:

- Completion of at least 12 credit hours of interrelated graduate-level course work (see below);
- Demonstrated language competency in an Asian language; and
- Attendance at a minimum of five academic events.

Courses may include those offered directly by the Asian Studies Department, as well as graduate courses from other departments that have been approved by the chair of the Asian Studies Department. Course work must be focused on a specific theme and together form an intellectually coherent whole. Up to 6 credit hours of specifically named required courses of a student's primary degree program may count toward the certificate. At least 6 credit hours must come from outside the student's home discipline. Graduate courses successfully completed at Vanderbilt University prior to admission to the program may be counted toward the certificate requirements with the approval of the Department chair. An undergraduate course may be substituted for a graduate course required by the Department's curriculum, with the approval of the Department chair and the Graduate School.

Students wishing to enroll must complete an Intent to Enroll form, which must be signed by the student, the director of the Asian Studies Certificate Program, and the director of the graduate program (DGS) for the degree program in which the student is enrolled. A signed copy of the form must be submitted to the Graduate School (graduateschool@vanderbilt.edu) and to the Office of the University Registrar (university.registrar@vanderbilt.edu).

A number of courses are available in Asian languages, social sciences, and humanities for graduate credit. See the Asian Studies Course List on the department website: as.vanderbilt.edu/asianstudies/courselist-1.php. See departmental listings for courses offered in the current academic year.

ASIAN STUDIES: 5151, The Third World and Literature; 5210W, Hollywood Hanoi; 5508, Chinese Drama: 13th to 20th Centuries; 5511, Popular Culture in Modern Japan; 5512, Explorations of Japanese Animation; 5605, Romancing the Nation in Modern Chinese Literature; 5606, Martial Tradition in Chinese Literature; 5607, Self & Society in Pre-modern Chinese Literature; 5609, Writing and Gender in Traditional China; 5633, Self-Cultivation in Ancient China; 5851-5852, Independent Study; 5891-5892, Special Topics.

CHINESE: 5101, Elementary Chinese I; 5102, Elementary Chinese II; 5201, Intermediate Chinese I; 5202, Intermediate Chinese II; 5231, Calligraphy; 5301, Advanced Chinese I; 5302, Advanced Chinese II; 5401, Business Chinese I; 5402, Business Chinese II; 5403, Readings in Modern Chinese Media; 5404, Readings in Modern Chinese Media; 5405, Classical Chinese Literature and Philosophy; 5406, Readings in Modern Literary Chinese.

HISTORY: 5115, Play and Pleasure in Early Modern Japan; 5120, Japan's War and Postwar, 1931-1989; 5140, The Mughal World; 5150, India and the Indian Ocean.

HISTORY OF ART: 5112, The Arts of China during the Liao-Song Period.

JAPANESE: 5101, Elementary Japanese I; 5102, Elementary Japanese II; 5201, Intermediate Japanese I; 5202, Intermediate Japanese II; 5301, Advanced Japanese I; 5302, Advanced Japanese II; 5891, Special Topics in Advanced Japanese.

POLITICAL SCIENCE: 5216, The Chinese Political System.

RELIGIOUS STUDIES: 5665, Mythologies and Epics of South Asia; 5666, Devotional Traditions of South Asia: Hindu, Muslim, Sikh; 5669, Sacred Space in the Tibetan World; 5753, East Asian Buddhism; 5775, Chinese Religions through Stories.

Astrophysics

CHAIR M. Shane Hutson

DIRECTOR OF GRADUATE STUDIES Andreas A. Berlind

PROFESSORS Andreas A. Berlind, Kelly Holley-Bockelmann, Robert J. Scherrer, Keivan G. Stassun, David A. Weintraub

ASSISTANT PROFESSORS Jessie C. Runnoe, Stephen R. Taylor

DISTINGUISHED RESEARCH PROFESSOR C. Robert O'Dell

RESEARCH ASSISTANT PROFESSOR Jonathan Bird, Karan Jani

Affiliated Faculty

PROFESSOR Thomas Kephart

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [ASTR](#)

Astrophysics is the study of the universe on all physical scales—from nuclear reactions inside stars to the expansion of the universe as a whole—generally focusing on objects and physical phenomena beyond our own solar system. Areas of study include: stars (stellar astrophysics), their birth (star formation) and their death (stellar evolution); the discovery and characterization of other solar systems (exoplanetary science); the material between the stars (interstellar medium); large ensembles of stars (star clusters) and their interactions (stellar dynamics); our Milky Way galaxy and its local group of galaxies (galactic astrophysics); other galaxies (extragalactic astrophysics), their birth (galaxy formation) and their evolution (galactic evolution); the structure of the universe as a whole (large-scale structure); and the origin and evolution of the universe itself (cosmology). Astrophysics also includes the study of fundamental physics—forces, particles, the nature of matter and energy—in the astronomical context, including: particle astrophysics (e.g., solar neutrinos), gravitational wave physics, the extreme physics of compact objects (e.g., black holes), dark matter, and dark energy. Astrophysics involves experimental techniques (observational astrophysics), generally involving images or spectra from telescopes on the ground and/or space, or analysis of archival datasets (data mining); theory, which includes the application of physics first-principles to derive fundamental physical laws or relationships; modeling techniques (computational astrophysics), which generally involves use of massive computing resources to simulate complex objects and phenomena; and information science (astro-informatics), which includes development and application of algorithms for the analysis, deployment, and curation of large datasets (data-intensive astrophysics).

The master of arts in astrophysics is awarded to students who earn a *B* average in a minimum of 30 credit hours of graduate study and complete the formal course requirements for the Ph.D. in astrophysics.

The Ph.D. degree in astrophysics requires 72 hours of graduate work, including 28 hours of formal course work, including 22 credit hours of core graduate courses in astrophysics, and 6 credit hours of elective graduate courses in astrophysics and/or physics or an approved field. A student must earn a grade of *B* or higher in every course that counts toward these 28 hours. The remaining credit hours may be earned through some combination of dissertation research and approved lecture courses. In addition to satisfying these requirements, a student must take a minimum of two semesters of ASTR 8002 Teaching Practicum and four semesters of ASTR 8003 Astrophysics Seminars, which are both zero credit courses.

Biochemistry

CHAIR-Interim Chair Dave Cortez

DIRECTOR OF GRADUATE STUDIES Manuel Ascano Jr.

PROFESSORS Brian Bachmann, Richard Breyer, Richard Caprioli, Bruce Carter, Walter Chazin, David Cortez, Brandt Eichman, Martin Egli, Ron Emeson, Stephen Fesik, F. Peter Guengerich, Heidi Hamm, Scott W. Hiebert, Billy Hudson, Tina M. Iverson, D., Borden Lacy, Craig W. Lindsley, Lawrence J. Marnett, Houra Merrikh, Neil Osheroff, Cathleen Pettepher, Jennifer A. Pietenpol, Ned A. Porter, Vito Quaranta, W. Kimryn Rathmell, Carmelo J. Rizzo, Charles R. Sanders, Samuel A. Santoro, Kevin L. Schey, Michael Stone, William Tansey

ASSOCIATE PROFESSORS Lourdes Estrada, Andrew Link, Marija Zanic

ASSISTANT PROFESSORS Manuel Ascano Jr., Raymond D. Blind, Breann Brown, Sergey Budko, James Dewar, Emily C. Hodges, Lauren Parker Jackson, John Karijolich, Carlos Lopez, Adrian Olivares, Sun Peck, Yi Ren, Will Wan,

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [BCHM](#)

Students interested in this program participate in the Interdisciplinary Graduate Program or Quantitative and Chemical Biology Program in the Biomedical Sciences during their first year (see Biomedical Sciences). The second year of study comprises required and elective course work that may include Biochemistry 8300, 8301, 8302, 8303, 8323, 8325, 8327, 8336, 8337, 8343, 8349, and 8352 for a total of at least 24 hours of formal course work toward the Ph.D. degree (including 16 hours in the first year). A thesis-based master's degree is awarded only under special circumstances.

The program offers students fundamental training in biochemical principles and an opportunity to apply such knowledge to vital biological and medical problems.

The intent of the department is to maintain a graduate program that emphasizes quality of experience, academic scholarship, and professional achievement. All faculty members are involved in active research programs. Thirty-five to forty-five graduate students are generally enrolled.

Major research efforts are concerned with studies on: regulation of expression and mechanisms of detoxification by cytochrome P450 enzymes; oxygenase and arachidonic acid biochemistry; cancer drug development; biophysics of the cytoskeleton; proteinase inhibitor structure and regulation; lipid-based signaling; nucleic acid structure and interactions with carcinogens; DNA-binding proteins; mass spectrometric tissue imaging, proteomics, DNA topoisomerase; biochemistry and endocrinology of hypertension; human genetics; intracellular signaling in growth and development; molecular mechanisms of Alzheimer's disease; RNA-binding proteins; post-transcriptional regulation of gene expression; ion channels; neoplastic transformation by oncogenic transcription factors; cellular responses to DNA damage; bacterial toxins; innate immune mechanisms; host-pathogen interactions; chromatin structure and histone modifications; epigenetics and gene regulation; membrane protein-linked disease mechanisms, genome surveillance, nuclear RNA transport; DNA replication termination, replication, and transcriptional conflicts; force transduction involving the nuclear membrane; calcium-binding proteins; and one-carbon metabolism. These studies use state-of-the-art technology including molecular biology and high-throughput sequencing, mass spectrometry, NMR spectroscopy, cryo-electron microscopy, and X-ray crystallography.

Faculty of the department also participate in interdisciplinary training programs, supported by National Institutes of Health training grants, that offer specialized biochemical training in the areas of molecular toxicology, chemical biology, biochemical nutrition, molecular biophysics, infectious disease, cancer research, and molecular endocrinology.

Biological Sciences

CHAIR Brandt F. Eichman

DIRECTOR OF GRADUATE STUDIES Julian F. Hillyer

PROFESSORS EMERITI Burton J. Bogitsh, Wallace M. LeSturgeon, Terry L. Page, Charles K. Singleton, Gerald J. Stubbs, Robley C. Williams Jr.

PROFESSORS Seth R. Bordenstein, Kendal S. Broadie, Kenneth C. Catania, Brandt F. Eichman, Todd R. Graham, Julian F. Hillyer, Carl H. Johnson, Douglas G. McMahon, James G. Patton, Antonis Rokas, Laurence J. Zwiebel

ASSOCIATE PROFESSORS D. Kilpatrick Abbot, Larisa R. G. DeSantis, Katherine L. Friedman, Daniel J. Funk

RESEARCH ASSOCIATE PROFESSOR Yao Xu

ASSISTANT PROFESSORS Megan Behringer, Nicole Creanza, Lauren Parker Jackson, Jared T. Nordman, Maulik Patel, Lars Plate, Ann Thomas Tate

RESEARCH ASSISTANT PROFESSORS Tetsuya Mori, Elwood Mullins, Shuqun Shi

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [BSCI](#)

Research activities in the Department of Biological Sciences encompass the study of biology at the molecular, subcellular, cellular, organismal, population, and community levels. The faculty have primary research interests in the areas of biological clocks, evolution, genomics, genome maintenance, protein trafficking, vector biology, entomology, symbiosis, speciation, microbiomes, immunity, mitochondrial function, small RNAs, synapse formation and plasticity, and development and regeneration of visual and olfactory sensory systems.

Students interested in this program may apply for direct admission in the Biological Sciences graduate program, or they may enter through the Interdisciplinary Graduate Program (IGP) in Biomedical Sciences or the Quantitative and Chemical Biology (QCB) program, and choose Biological Sciences as their home department by the end of the second semester. (See IGP and QCB sections in this catalog.)

The program is designed to lead to the Ph.D. degree; however, M.S. degrees are granted under special circumstances and require a research thesis or successful completion of the qualifying exam. The Ph.D. degree requires 72 hours of credit for graduation, including at least 24 credit hours of formal course work with the remainder earned through dissertation research. Credit hours earned in the first-year IGP program will be counted toward the required 24 hours of formal course work.

Desirable backgrounds for graduate study in the Department of Biological Sciences, depending on the specific interests of the student, would be undergraduate programs emphasizing biological sciences, chemistry, mathematics, or physics course work, but students from other disciplines are also eligible.

Visit the departmental website at as.vanderbilt.edu/biosci for more information.

Note: Sections of BSCI 5890 associated with BSCI 2201, 2205, 2210, 2520 cannot be used to fulfill the Biological Sciences PhD requirements without prior permission. Graduate students in biological sciences may take graduate courses in School of Medicine departments by arrangement.

Biomedical Engineering

CHAIR Michael R. King

DIRECTOR OF GRADUATE STUDIES Cynthia A. Reinhart-King

DIRECTOR OF GRADUATE RECRUITING Mark D. Does

DIRECTOR OF UNDERGRADUATE STUDIES Craig Duvall

PROFESSORS EMERITI Robert L. Galloway Jr., Thomas R. Harris, Paul H. King, Knowles A. Overholser, Robert J. Roselli, Richard G. Shiavi

PROFESSORS Adam W. Anderson, Christos Constantinidis, Mark D. Does, Craig L. Duvall, Todd D. Giorgio, John C. Gore, Frederick R. Haselton, E. Duco Jansen, Anita Mahadevan-Jansen, Michael R. King, W. David Merryman, Michael I. Miga, Cynthia A. Reinhart-King, John P. Wikswa

ASSOCIATE PROFESSORS Franz Baudenbacher, Audrey K. Bowden, Brett C. Byram, William A. Grissom, Cynthia B. Paschal

ASSISTANT PROFESSORS Jonathan Brunger, Mikhail Rubinov, Yuankai K. Tao, Xin Maizie Zhou

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [BME](#)

Biomedical engineering as a research discipline is concerned with the development of new physical and mathematical concepts applicable to problems in biology, medicine, and the organization of health care. Biomedical engineering also deals with more pragmatic problems, such as biomedical use of information systems and development of advanced biomedical instrumentation. The vision of the BME graduate program is to provide the best advanced education to our graduate students such that they are optimally prepared for successful careers in academia, industry, and related fields. The goal of the program is to provide advanced education and research training in quantitative biology, biomaterials, cellular bioengineering, biomedical photonics, medical imaging, biomedical instrumentation, and the scientific principles underlying the origination of diagnostic and therapeutic devices and processes. The program is specifically concerned with the interface between biology, medicine, and the engineering, physical, computing, and mathematical sciences.

Candidates for the master of science (M.S.) degree must complete 30 hours of graduate-level credit, approved by the faculty, with the following minimum distribution of didactic hours: 12 hours in biomedical engineering, 3 hours in an approved life sciences course, and 9 hours in advanced life science, physical science, or engineering. At least 6 of the BME hours and 3 of the advanced science or engineering hours must be 6000+ level courses. One (1) hour of BME seminar and 6 hours of thesis research credit hours can count toward the total of 30 hours necessary for the M.S. degree. In addition, the candidate must submit a research thesis for faculty approval and give a final oral presentation.

Candidates for the Ph.D. degree must complete a minimum of 27 semester hours of graduate-level didactic courses approved by the program faculty, excluding seminar, research, and teaching hours. Candidates must complete 15 hours in biomedical engineering courses (required: BME 6110 or equivalent), 3 hours in an approved life sciences course, and 9 hours in advanced life science, physical science, or engineering, where 3 of those hours are in an approved quantitative course. At least 9 of the BME hours and 3 of the advanced science or engineering hours must be 6000+ level courses. The remainder of the 72 hours required for a Ph.D. will primarily consist of dissertation research, but may also include seminar and other approved (didactic) courses. In addition, students must pass a qualifying examination consisting of written and oral presentations of a proposal for doctoral research, present a dissertation showing the results of original research in biomedical engineering, and successfully defend the dissertation results in an oral examination.

Biomedical Informatics

CHAIR Kevin B. Johnson

DIRECTOR OF GRADUATE STUDIES Kim M. Unertl

PROFESSOR EMERITA Cynthia S. Gadd

PROFESSOR EMERITUS Mark E. Frisse, Randolph A. Miller

PROFESSORS Cynthia S. Gadd, Nunzia B. Giuse, Paul A. Harris, Kevin B. Johnson, Nancy M. Lorenzi, Bradley A. Malin, Josh F. Peterson, S. Trent Rosenbloom, William W. Stead, Adam Wright

ADJUNCT PROFESSORS Joshua Denny, Bing Zhang, Zhongming Zhao

ASSOCIATE PROFESSOR EMERITUS Edward K. Shultz

ASSOCIATE PROFESSORS Jessica Ancker, Steven H. Brown, Stephany N. Duda, Dario A. Giuse, Thomas A. Lasko, Michael E. Matheny, S. Trent Rosenbloom, Kim M. Unertl, Stuart T. Weinberg, Asli Weitkamp, Martin C. Were

ADJUNCT ASSOCIATE PROFESSORS Dominik Aronsky, Mia Levy, ClarLynda Williams-DeVane, Hua Xu

ADJOINT ASSOCIATE PROFESSOR Yevgeniy Vorobeychik

ASSISTANT PROFESSORS S. Toufeeq Ahmed, Cosmin A. Bejan, Robert J. Carroll, You Chen, Robert M. Cronin, Daniel Fabbri, Elliot Fielstein, Jacob Hughey, Yaa Kumah-Crystal, Allison McCoy, Dara Eckerle Mize, Scott D. Nelson, Laurie L. Novak, Travis Osterman, Sharidan Parr, Ruth Reeves, Joshua Smith, Shane P. Stenner, Colin G. Walsh, Wei-Qi Wei, Zhijun Yin

RESEARCH ASSISTANT PROFESSORS Lisa Bastarache, Aize Cao, Alex Cheng, Sharon Davis, Fern FitzHenry, Glenn Gobbel, Lina Sulieman, Juan Zhao

ADJUNCT ASSISTANT PROFESSORS Robert Cronin, Jason Karnes, William Lancaster, Russell Leftwich, Claude Pirtle, Siddharth Pratap, Laura Wiley

ADJOINT ASSISTANT PROFESSOR Mary Davis

ADJUNCT INSTRUCTOR Judith Dexheimer

INSTRUCTOR Aileen Wright

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [BMIF](#)

Biomedical informatics studies the structure, discovery, acquisition, integration, management, and optimal use of biomedical information. The field involves multidisciplinary research in all aspects of health care delivery, biomedical research, computational biology, and public health. Biomedical informatics applies, evaluates, and expands results from a variety of disciplines including information and computer science, library science, cognitive science, business management and organization, statistics and biometrics, data science, mathematics, artificial intelligence, operations research, economics, and of course, basic and clinical health sciences. Biomedical informatics has both “knowledge and methods” and “application domain” components. It expands beyond biomedical computer systems design, application, and evaluation to provide theory, tools, and systems that address today’s most urgent challenges in health care delivery, biomedical research, and health professions education.

The curriculum offers concentration areas including: Clinical Informatics, the application of informatics to direct patient care, such as advanced decision support and person-centered health records; Translational Bioinformatics, the application of informatics to support basic research in such areas as genomics, proteomics, and systems biology; Biomedical Data Science, which integrates computation, statistics, and biomedical science to achieve reproducible success in the data science field; and Informatics for HIV/AIDS Research, which allows students to apply biomedical informatics theories and methods to an critical disease domain.

Students typically enter with a background in computing, engineering, biology, or mathematics or with a background in one of the health professions (e.g., M.D., R.N., D.D.S., Ph.D. in a health-related area such as psychology or

biostatistics). After graduation they pursue careers as full-time academic researchers, part-time academic researchers/part-time clinicians, scientific managers or advanced scientists in industry, information managers in health care settings, consultants, or entrepreneurs.

All students take the six core biomedical informatics courses: Foundations of Biomedical Informatics, Foundations of Bioinformatics, Methodological Foundations of Biomedical Informatics, Scientific Communication, Student Journal Club and Research Colloquium, and Research Rotation in Biomedical Informatics. In addition, M.S. degree students take two selectives (advanced courses in biomedical informatics); two courses in each of two competency areas (unless satisfied by prior education or experience): Computer/Information Science, Biology/Medicine, and Research Methods; and take one additional elective. Ph.D. students take three selectives; two courses in each of three competency areas (unless satisfied by prior education or experience), depending on background; and three additional electives. The curriculum is adapted to students' backgrounds and concentration areas. Thus, a minimum of 30 course credit hours and a thesis are required for the M.S. degree, and a minimum of 72 credit hours is required for the Ph.D. degree. Ph.D. students must earn the M.S. degree, pass a qualifying examination, and successfully propose and defend a dissertation. Waivers for the M.S. degree requirement may be granted in selected cases. A teaching practicum is required for Ph.D. students.

Biomedical Sciences

DIRECTOR James G. Patton

DEGREE OFFERED: Master of Science

This graduate program is designed for students seeking to increase their competitiveness for admission to graduate and professional schools. The program provides an individualized curriculum to prepare for careers in medicine and the biomedical sciences. There are two curricular tracks that the student may follow: CHANGE and EDGE.

The CHANGE track is designed to provide students coming from diverse, non-science academic backgrounds the ability to change their career direction. Didactic training will encompass training in all pre-requisite courses needed for application to professional and graduate schools. Didactic training will be complemented by the opportunity to engage in biomedical research as well as clinical exposure activities.

The EDGE track is for designed students seeking to increase their competitiveness for application to professional and graduate schools. Advanced didactic course work and biomedical research experience will be coupled with clinical exposure activities to fully prepare students for admission to medical, graduate or other health professional schools.

Successful completion of the Master's Program in Biomedical Sciences will require 30 credit hours, 24 of which must be didactic hours.

Biostatistics

CHAIR Yu Shyr

DIRECTOR OF GRADUATE STUDIES Robert Greevy

PROFESSORS Jeffrey D. Blume, Leena Choi, William D. Dupont, Frank E. Harrell Jr., Christopher Lindsell, Jonathan S. Schildcrout, Bryan Shepherd, Yu Shyr

ASSOCIATE PROFESSORS Qingxia (Cindy) Chen,, Benjamin French, Robert Greevy, Robert Johnson, Hakmook Kang, Tatsuki Koyama, Dandan Liu, Qi Liu, Rameela Raman, Matt Shotwell, Chris Slaughter, Fei Ye, Chang Yu

ASSISTANT PROFESSORS Mario Davidson, Amber Hackstadt, , , Derek Smith, Andrew Spieker, Thomas Stewart, Ran Tao, Simon Vandekar, Yaomon Xu

RESEARCH ASSISTANT PROFESSORS Gustavo Amorim, Heidi Chen, Svetlana Eden, Lauren Samuels,

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [BIOS](#)

Biostatistics is the branch of statistics responsible for the proper interpretation of scientific data generated in the biology, public health, and biomedical sciences. As such, biostatisticians must be trained as apt mathematicians and cogent scientists. Our program features rigorous classroom training, real-world apprenticing, exceptional computational preparation, and one-to-one mentoring in the theory, methods, and applications of biostatistics in biomedical research. This program is unique in integrating a curriculum that is nondenominational with respect to the foundations of statistical inference, modern in its emphasis on computing and teaching of statistical principles, progressive in regression modeling strategies, aggressive in involving students in biomedical research early in their career, and *sui generis* in its emphasis on communication skills.

Both Ph.D. and M.S. curricula are proposed to meet the range of biostatistical career opportunities in academia, industry, and government. The program also features an interdisciplinary research rotation for all second-year students and summer chalk talk sessions with faculty. Students must demonstrate competency or strong proficiency in five generic skill areas of statistics: (1) theory, (2) application, (3) critical thinking, (4) communication (oral and written), and (5) computing.

Doctor of Philosophy

Candidates for the Doctor of Philosophy (Ph.D.) must complete a minimum of 72 semester hours of course work and dissertation research. A minimum of ten core biostatistics courses and five elective classes are required for the Ph.D. degree. The core Ph.D. curriculum consists of two probability courses, two statistical inference courses, four courses on statistical methods, and two courses of signature training. Ph.D. candidates must also pass the first-year and second-year comprehensive examination, complete the second-year interdisciplinary research rotation, pass the doctoral qualifying oral examination, submit and defend a doctoral dissertation detailing original research and methodological contributions that advance the knowledge of the discipline of biostatistics, and present their dissertation in a departmental seminar.

Master of Science

Candidates for the master of science (M.S.) must complete a minimum of 24 semester hours of graduate-level courses in biostatistics. The core M.S. curriculum consists of one probability course, one statistical inference course, five courses on statistical methods, and one course of signature training. A minimum of eight core biostatistics courses and four elective courses is required for the M.S. degree. Students who are currently Ph.D. candidates in other departments may be eligible for a waiver of the elective course requirement. M.S. candidates must also pass the first-year comprehensive examination, complete the second-year interdisciplinary research rotation, submit a master's thesis detailing an original investigation in an area of biostatistics, and present their thesis in a departmental seminar. A minimum of 30 semester hours is required for the master's degree. This includes enrollment in at least 24 semester hours of formal didactic course work plus enrollment in 6 additional hours of didactic course work or 6 credit hours of research.

Biophysics

See [Molecular Physiology and Biophysics](#) and [Physics and Astronomy](#).

Cancer Biology

PROGRAM DIRECTOR Ann Richmond

DIRECTOR OF GRADUATE STUDIES Jin Chen

PROFESSOR EMERITUS Harold Moses

PROFESSORS Daniel Beauchamp, Timothy Blackwell, Mark Boothby, Stephen Brandt, Jin Chen, Dai Chung, Robert Coffey, Michael Freeman, Todd Giorgio, David Gorden, Volker Haase, Rizwan Hamid, Alyssa Hasty, Walter Gray Jerome, Sebastian Joyce, Young

Jun Kim, Deborah Lannigan, Ethan Lee, Robert Matusik, Neil Osheroff, Andrea Page-McCaw, Ben Ho Park, Richard Peek, Jennifer Pietenpol, Ambra Pozzi, Vito Quaranta, Jeffrey Rathmell, Kimryn Rathmell, Al Reynolds, Ann Richmond, Yu Shyr, Alissa Weaver, Christopher Williams, Keith Wilson, Roy Zent, Mary Zutter

ASSOCIATE PROFESSORS Barbara Fingleton, Patrick Hu, Paula Hurley, Christine Lovly, Michael Savona, Jeffrey Smith, Julie Rhodes, Takamune Takahashi, Fiona Yull, Ming-Zhi Zhang, Sandy Zinkel Justin Balko, Rebecca Ihrie, Jonathan Irish, John Wilson

ASSISTANT PROFESSORS Dana Brantley-Sieders, Anthony Daniels, Brent Ferrell, Jeremy Goettel, Rachelle Johnson, Carlos Lopez, Aron Parekh, Mary Philip, Marjan Rafat, Vivien Weiss, Kathleen DelGiorno, Alex Bick

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [CANB](#)

(Cancer Biology does not offer a master of science degree program; however, if a student's goals change during the course of the Ph.D. program, an M.S. degree can be awarded provided the criteria as outlined in the program guidelines are met.)

Students interested in this program participate in the Interdisciplinary Graduate Program within the Division of Biomedical Sciences (see Biomedical Sciences) or in the Quantitative and Chemical Biology Program during the first year. The second year of study encompasses two required courses in Cancer Biology (8340 and 8342) and electives to complete a total of at least 24 hours of formal course work toward the Ph.D. degree (this includes the 16 hours completed in the first year). Additional requirements are: successful completion of the two-phase qualifying exam; regular meetings, initially with a mentoring committee and then biannual meetings with a dissertation committee; an annual presentation at the program's weekly "Science Hour Seminar Series," starting in the spring of the third year of study. Attendance at the program's weekly "Science Hour Seminar Series," the annual Vanderbilt- Ingram Cancer Center retreat, and the annual student-led Cancer Research retreat is encouraged. Most Cancer Biology students participate in the Cancer Biology Student Association (CBSA), which organizes a variety of events each year to enhance the quality of student experience in the Cancer Biology program.

The program offers focused and comprehensive training in the discipline of cancer biology. Modern cancer research is based on a broad range of technical skills, including molecular biology, cell biology, genetics, biochemistry, biostatistics, and bioinformatics, all of which the student will learn through course work and laboratory training. Further training includes exercises designed to develop independent thinking, skills in oral and written presentation, analysis of data and information, and dissemination of information through teaching. The program prepares students with the necessary theoretical and practical skills to succeed in an increasingly wide range of available careers, including academic research, undergraduate teaching, science writing, and basic or applied science in the biotechnology and pharmaceutical industry.

Major research efforts include studies on tumor immunity, angiogenesis, growth factor and cytokine signaling, oncogenes, tumor suppressors, matrix and matrix degradation, cell adhesion, metastasis, development and translation of new therapeutics for cancer, as well as systems biology as applied to cancer growth, metastasis, and response to drugs. These studies use state-of-the-art technologies, including all aspects of molecular and cell biology, biochemistry, genetically modified mice, “omics,” mathematical modeling, and others.

Faculty within the department also participate in interdisciplinary training programs in cancer research supported by the National Cancer Institute of the National Institutes of Health.

Cell and Developmental Biology

CHAIR Ian G. Macara

DIRECTOR OF GRADUATE STUDIES Andrea Page-McCaw

PROFESSORS EMERITI Arthur F. Dalley II, Steven Hanks, David M. Miller III, James McKanna, Jeanette Norden, Gary Olson

PROFESSORS Chin Chiang, Kathleen L. Gould, Irina N. Kaverina, Ethan Lee, Ian G. Macara, Andrea Page-McCaw, William P. Tansey, Matthew J. Tyska, Alissa Weaver, Susan R. Wentz, Christopher V. E. Wright

ASSOCIATE PROFESSORS Dylan T. Burnette, Vivian Gama, Guoqiang Gu, Rebecca A. Ihrie, Jonathan Irish, Ken Lau, Jason A. MacGurn, Marija Zanic,

ASSISTANT PROFESSORS Kristopher J. Burkewitz, Kathleen DelGiorno, Qiangjun Zhou

DEGREE OFFERED: Doctor of Philosophy

The mission of the Ph.D. Program in Cell and Developmental Biology is to train and support students from diverse backgrounds in becoming scientists and advancing basic biomedical science. Students are prepared for future careers including research at the cellular, molecular and organism. Graduate study in cell and developmental biology at Vanderbilt emphasizes an interdisciplinary approach to biological research, bridging a wide range of scales, from single molecules to whole organisms, with exciting opportunities in both basic and disease-oriented biomedical science.

Faculty are affiliated with several centers (Center for Matrix Biology, Center for Stem Cell Biology, Center for Structural Biology, Digestive Disease Research Center, the Epithelial Biology Center, Vanderbilt Diabetes Research and Training Center, the Vanderbilt-Ingram Cancer Center, and the Vanderbilt Kennedy Center for Research on Human Development) and there are significant collaborative interactions with the trans-institutional Program in Developmental Biology.

The department provides specialized training in basic cellular and organismal processes with the goal of solving fundamental biological problems as a foundation for addressing questions of biomedical significance. In each research area, multidisciplinary approaches in genetics, proteomics, and imaging are employed. Key model systems include yeast, *C. elegans*, *Drosophila*, *Xenopus*, zebrafish, chick, mice, and cultured cell lines. Research areas include cell cycle progression, cell signaling, motility and polarity, vesicle trafficking, gene regulation, cytoskeletal dynamics and molecular motors, apoptosis, cell differentiation and cell fate decisions, tissue patterning, embryogenesis, morphogenesis, organogenesis, and tumorigenesis. Graduate studies in each of these areas may include interdepartmental courses from Cell and Developmental Biology, Biochemistry, Pharmacology, Psychology, Biological Sciences, Neuroscience, and Molecular Physiology and Biophysics. The program is designed to lead to the Ph.D. degree.

Chemical and Biomolecular Engineering

CHAIR G. Kane Jennings

DIRECTOR OF GRADUATE RECRUITING Jamey D. Young

DIRECTOR OF GRADUATE PROGRAM Jamey D. Young

DIRECTOR OF UNDERGRADUATE PROGRAM Paul E. Laibinis

PROFESSORS EMERITI Thomas R. Harris, M. Douglas LeVan, K. Arthur Overholser, Robert J. Roselli, John A. Roth, Robert D. Tanner

PROFESSORS Peter T. Cummings, Todd D. Giorgio, Scott A. Guelcher, G. Kane Jennings, David S. Kosson, Paul E. Laibinis, Matthew J. Lang, Clare McCabe, Peter N. Pintauro, Sandra J. Rosenthal, Florence Sanchez, Jamey D. Young

PROFESSOR OF THE PRACTICE Russell F. Dunn

ASSOCIATE PROFESSOR EMERITUS Kenneth A. Debelak

ASSOCIATE PROFESSOR Shihong Lin, Bridget R. Rogers, John T. Wilson, Marija Zanic

RESEARCH ASSOCIATE PROFESSOR Ryszard Wycisk

ASSISTANT PROFESSORS Piran Kidambi, Ethan S. Lippmann, Marjan Rafat, Carlos Silvera Batista

RESEARCH ASSISTANT PROFESSORS Lihong Bishop, Christopher R. Iacovella, Bo Wang

ASSISTANT PROFESSOR OF THE PRACTICE Julianne Vernon

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [CHBE](#)

Chemical engineers play key roles in the development and production of commodity chemicals, pharmaceuticals and bioengineered materials, high-strength composites and specialty polymers, semiconductors and microelectronic devices, and a wide range of ultrapure fine chemicals. Indeed, chemical and biomolecular engineering is essential for the operation of contemporary society. The solutions to many of the problems that we face today—e.g., energy, the environment, development of high-performance materials—will involve chemical engineers.

Graduate study in chemical and biomolecular engineering provides a unique opportunity for students and faculty to work together toward advancing knowledge through innovative research. Graduate research opportunities are provided in the areas of biotechnology and biomolecular engineering, computational science and engineering, energy and sustainability, and materials and nanotechnology. Formal course work provides exposure to advanced chemical engineering and scientific principles that are designed to enhance the research and analytical skills of students. Additionally, students are provided numerous professional development opportunities, including attendance at conferences, professional workshops, career services, and teaching programs for those interested in academic careers.

Programs leading to the M.S. and Ph.D. degrees are offered through the Graduate School. Both require a combination of course work and a thesis. There is no language requirement for any degree.

Candidates for the master of science must complete 30 semester hours of work beyond the bachelor's degree. At least 24 of these hours are graduate-level courses (12 hours in chemical engineering core courses, with the remaining hours selected from courses in the major or from related areas of interest approved by the research adviser). Each degree candidate conducts research under the supervision of a faculty adviser (this will comprise at least 6 additional semester hours), prepares a written thesis, and presents it orally to the faculty.

Candidates for the doctor of philosophy complete a minimum of 72 semester hours of work beyond the bachelor's degree. At least 24 of these hours are course work including 12 hours in required chemical and biomolecular engineering courses. Of the remaining 12 hours at least 3 hours must be taken outside the department (and cannot

be for a co-listed course). These courses should complement the student's research interests. The remaining hours are Ph.D. dissertation research. The course load is designed to allow students to spend the majority of their studies on original research. Up to 24 hours of graduate course work with an equivalent of *A* or *B* grade may be transferred to Vanderbilt and applied to the Ph.D. At the end of the first year in residence, students complete a departmental examination. Admission to candidacy in the Ph.D. program is based upon this departmental examination, as well as the Ph.D. qualifying examination, which consists of written and oral presentations of a proposal for doctoral research. Following the examinations and at least 24 semester hours of dissertation research, the student prepares and publicly defends a dissertation presenting results of original research.

Chemical and Physical Biology

DIRECTOR Walter Chazin

DIRECTOR OF GRADUATE STUDIES Ivelin Georgiev

PROFESSORS Chris Aiken, Adam Anderson, Alan Brash, Richard Caprioli, Walter Chazin, Alan Cherrington, David

Cliffel, David Cortez, James Crowe, Mark Does, Manus Donahue, Brandt Eichman, Martin Egli, Stephen Fesik, John Gore, Fred Guengerich, Heidi Hamm, Billy Hudson, Shane Hutson, Tina Iverson, Carl Johnson, Jeff Johnston, D. Borden Lacy, Matthew Lang, Hassane Mchaourab, John McLean, Jens Meiler, Victoria Morgan, Richard O'Brien, Neil Osheroff, Vito Quaranta, Carmelo Rizzo, Sandra Rosenthal, Charles Sanders, Kevin Schey, Eric Skaar, Seth Smith, Michael Stone, Gary Sulikowski, Matthew Tyska, Alissa Weaver, John Wikswow, David Wright, Jamey Young

ASSOCIATE PROFESSORS Brian Bachmann, Charles Caskey, Li Min Chen, Suman Das, Sean Davies, Lourdes Estrada, Ivelin Georgiev, Daniel Gochberg, William Grissom, David Jacobson, Ken Lau, Andrew Link, Teru Nakagawa, Kevin Niswender, Todd Peterson, Wellington Pham, Ben Spiller, Marija Zanic

ASSISTANT PROFESSORS Ray Blind, Breann Brown, Dylan Burnett, Nicole Creanza, Jacob Hughey, Jonathan Irish, Lauren Parker Jackson, Erkan Karakas, Ethan Lippmann, Carlos Lopez, Gregor Neuert, Adrian Olivares, Jason MacGurn, Lars Plate, Yi Ren, Claus Schneider, William Wan, Zhongyue Yang, Junzong Xu, Qi Zhang, Qiangjun Zhou

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [CPBP](#)

The Ph.D. degree in chemical and physical biology is available to all students who enter the trans-institutional QCB or IGP graduate admissions programs, or the MSTP. The Ph.D. training program is designed to provide rigorous integrated training at the interface of the chemical and/or physical sciences and the biomedical sciences. The course work and research components of the program prepare students for research careers in which they can bring state-of-the-art tools of the modern chemical and physical sciences, mathematics, statistics and informatics, and computer science to bear on cutting-edge problems in biology and medicine.

The curriculum prepares students for research careers in four tracks: chemical biology; structural biology and molecular biophysics, imaging science, systems biology. Research opportunities are available in a broad range of areas including: biological mass spectroscopy, biomagnetics and nonlinear dynamics, computational biology and molecular modeling, protein-protein interactions, NMR and EPR, x-ray crystallography and scattering, cryo-electron microscopy, fluorescence spectroscopy and microscopy, in vivo imaging, protein-nucleic acid interactions, structural biology, chemical biology, molecular toxicology, macromolecular structure and dynamics, mechanistic enzymology, nanocrystals, proteomics, and mathematical modeling of biological systems.

Chemistry

CHAIR John A. McLean

DIRECTOR OF UNDERGRADUATE STUDIES Tara D. Todd

DIRECTOR OF GRADUATE STUDIES David E. Clffel

PROFESSORS EMERITI Darryl J. Bornhop, Robert V. Dilts, Larry C. Hall, Thomas M. Harris, David M. Hercules, B. Andes Hess Jr., Melvin D. Joesten, Charles M. Lukehart, Ned A. Porter, Joel Tellinghuisen,

PROFESSORS Brian O. Bachmann, Richard M. Caprioli, Walter J. Chazin, David E. Clffel, Stephen W. Fesik, Timothy P. Hanusa, Frederick R. Haselton, Jeffrey N. Johnston, Craig W. Lindsley, , Lawrence J. Marnett, Clare McCabe, Hassane S. Mchaourab, John A. McLean, Jens Meiler, Prasad L. Polavarapu, Carmelo J. Rizzo, Sandra J. Rosenthal, Kevin Schey, Michael P. Stone, Gary A. Sulikowski, C. ASSOCIATE PROFESSORS Andrew Link, Janet E. Macdonald, Renã Robinson

ASSISTANT PROFESSORS Lauren E. Buchanan, Lars Plate, Nathan D. Schley, Steven D. Townsend, Allison S. Walker, Zhongyue Yang

ADJOINT ASSISTANT PROFESSORS Glenroy Dean Martin

PRINCIPAL SENIOR LECTURERS Adam K. List, Shawn T. Phillips, Michelle M. Sulikowski, Tara D. Todd

SENIOR LECTURERS Hemant Badgandi, Katherine Clements, Aaron Daniel, Alissa Hare, Craig G. Tainter, Susan Verberne-Sutton

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [CHEM](#)

Research programs are offered in analytical, biological, inorganic, organic, and physical chemistry along with interdisciplinary research programs in chemical biology, molecular toxicology, materials chemistry, nanoscale science, structural and computational biology, and chemical physics. Excellent research facilities, modern instrumentation, and external funding support a wide range of research.

The program emphasizes doctoral studies. However, an M.S. degree may be granted under special circumstances and normally requires a research thesis. A research thesis of at least 6 hours is required for the master's degree. Specific requirements for the Ph.D. degree are defined in the Ph.D. program document that is available upon request from the Department of Chemistry. Both the master's and Ph.D. degrees require a minimum of 24 hours of formal course work.

Chinese

CHINESE LANGUAGE PROGRAM COORDINATOR AND PRINCIPAL SENIOR LECTURER Xianmin Liu

SENIOR LECTURER Yinghui Guo

LECTURERS Pengfei Li, Qing Wei

COURSES OFFERED: [CHIN](#)

Students should consult with the director of Asian Studies and their home department advisers about the acceptability of Chinese courses for their program of study. Courses are not designed for advanced native speakers.

RESEARCH ASSISTANT PROFESSOR Pranav Karve

ADJUNCT INSTRUCTORS J. Robin Barrick, Kenneth Church, David Livingston, Keith Loiseau, Said el Said, Bryan Tharpe, Ghina Absi, Ross Muirhead, Hannah Walter

LECTURERS Phillip Collins, Paul Litchy

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [CE](#)

Degree programs at the M.S. and Ph.D. level are offered in two areas of concentration: (1) Civil and Infrastructure Systems Engineering and (2) Materials and Structural Engineering.

The M.S. degree has two options: (1) 24 hours of graduate-level course work (5000 level or higher) and a research thesis of at least 6 semester hours, or (2) 30 hours of graduate-level course work. Course work requirements also include 12 hours of didactic course work (i.e., excluding directed/independent study) from the relevant area of concentration core curriculum completed at Vanderbilt and 6 hours of didactic course work taken in the major area (i.e., with CE designation) completed at Vanderbilt.

The Ph.D. degree requires completion of 72 hours of graduate-level course work plus a dissertation. A minimum of 24 course credit hours must be completed at Vanderbilt. Course work requirements also include a minimum of 30 hours of graduate course work that include 12 hours of didactic course work from the relevant area of concentration core curriculum completed at Vanderbilt and 6 hours of didactic course work taken in the major area (i.e., with CE designation) completed at Vanderbilt. The remaining credit hours can be fulfilled with courses or research hours. In addition, all Ph.D. students must pass the Civil Engineering Graduate Program preliminary exam, must complete the university-required qualifying exam, and must write and defend a dissertation.

Classical and Mediterranean Studies

DIRECTOR William Caferro

PROFESSORS EMERITI Robert Drews, F. Carter Philips, Jack M. Sasson, Barbara Tsakirgis, Susan Ford Wiltshire

PROFESSORS William Caferro

ASSOCIATE PROFESSORS Ari Bryen, Kathy L. Gaca, David Michelson, Joseph L. Rife

ASSISTANT PROFESSORS Monica Park

AFFILIATED FACULTY: Scott F. Aikin (Philosophy), Elsa Filosa (French & Italian), Mireille Lee (History of Art), Betsey Robinson (History of Art), David Wasserstein (Jewish Studies)

DEGREE OFFERED: CLASSICS. Master of Arts

COURES OFFERED: [CLAS](#), [GRK](#), [LAT](#)

Note: The department is presently not accepting applications to its M.A. program.

The Department of Classical and Mediterranean Studies offers a selective M.A. program that provides a solid basis for either of two important goals in the field of Classics. First, the department trains promising M.A. candidates who aspire to apply to and enter a nationally ranked Ph.D. program in classical languages or in other recognized fields of Classics, such as ancient history and classical art and archaeology. The department also trains M.A. candidates who aspire to become effective teachers of Latin and/or Greek. The program, as broadly defined, involves a minimum of 36 hours and a maximum of 48 hours of course work over a two-year period. During the two years, the Classics M.A. student is also required to pass proficiency examinations in Greek and Latin and either proficiency examinations or course requirements in history and art. The student must also demonstrate reasonable proficiency in reading classical scholarship in German or French, or in another Romance language (e.g., Italian or Spanish). Applicants should be able to read both Latin and Greek, though not necessarily both at the same level of proficiency, and they also should have completed an elementary course in German, French, or another Romance language.

On entering, every student takes diagnostic examinations in Greek and Latin prose and poetry. The examinations are not graded and are intended only to determine a student's proficiency in the languages at the time of matriculation and for placement in courses. The examinations test familiarity with language and with scansion.

Each semester each student takes at least three and no more than four courses for credit. It is expected that all classics M.A. students will take both graduate seminars regularly offered in Greek and Latin each semester and that they will strive to produce first-rate master's seminar papers in these graduate courses. When their papers attain an *A+* level of excellence, they are encouraged to present their papers to the Classics faculty and to submit their papers to professional academic conferences, such as the American Philological Association (APA), the Archaeological Institute of America (AIA), and the Classical Association of the Middle West and South (CAMWS). The proficiency examinations in Greek and Latin are made up of passages taken from the M.A. reading list. The two examinations test familiarity with language and scansion. The proficiency examinations are offered regularly over the course of the M.A. program.

Classics M.A. students are required to take at least one course each in the areas of ancient history and the history of art, and both courses must be in either the Greek or the Roman tradition. Students may fulfill their Greek or Roman history of art requirement in several possible ways, including: (1) undergraduate courses in Greek or Roman art history, (2) graduate seminars in Greek or Roman art and archaeology, or (3) summer participation in the summer program of the American School of Classical Studies at Athens, Greece, or of the American Academy in Rome, Italy. To fulfill the requirement for ancient history, M.A. students can either (1) take a regular course in Greek history (CLAS 2110 or CLAS 2120) or Roman history (CLAS 2150 or CLAS 2160), or (2) take an examination. In order to fulfill the requirement with course work, a student must earn a *B+* or better in each of the two courses in the given areas.

If the student chooses to fulfill the requirement with an examination, the examination of two hours' length is taken at the very beginning of the fourth semester. One re-take of each examination is allowed.

A distinguished feature of Vanderbilt's M.A. program in Classics is the anticipation that in the summer following the first year in residence, M.A. candidates will study in the Mediterranean. Students in good standing are urged to apply for the summer programs offered by the American School of Classical Studies in Athens (ASCSA) and the American Academy in Rome (AAR) in the hope of being accepted into one of these two summer programs. They also generally receive Rankin Fellowship funding from the department to support this study abroad in either the AAR or ASCSA summer program.

Because students pursuing a graduate degree in Classics normally do so with aims that include teaching Latin, Greek, or Classics, the department makes every effort to provide each student with some teaching experience. In the second year of residence, an M.A. candidate may expect to gain experience as a teaching assistant, primarily as an instructor in an elementary Latin section or, secondarily, as an assistant in a Greek, Latin, or Classics course.

Successful students in the Classics M.A. program are encouraged to pursue Classics Ph.D. studies in a nationally ranked doctoral program that is well positioned to help its Classics doctoral recipients to find a rewarding professional appointment. Faculty in the department are eager to support this aspiration, such as by advising the student about which Classics Ph.D. programs are best suited to his or her interests, and by doing their best to facilitate the student's successful entry into such a doctoral program.

If they so choose, Classics M.A. students with interdisciplinary interests are also welcome to apply for, and may be accepted into, an interdisciplinary Ph.D. program at Vanderbilt that promotes further graduate study in Classics, such as history, religious studies, Greek philosophy, English, and art history.

Community Research and Action

CHAIR Paul Speer

ASSOCIATE CHAIR Nicole Cobb

DIRECTOR OF GRADUATE STUDIES Brian Christens

PROFESSORS EMERITI Joseph Cunningham, Paul Dokecki, Craig Anne Heflinger

PROFESSORS Sandra Barnes, Bradley Erford, Velma Murry, Maury Nation, Douglas Perkins, Marybeth Shinn, Paul Speer

PROFESSOR OF THE PRACTICE Andrew Finch

RESEARCH PROFESSOR Mark Lipsey

ASSOCIATE PROFESSOR Brian Christens

ASSOCIATE PROFESSORS OF THE PRACTICE Kimberly Bess, Sarah Suiter

ASSISTANT PROFESSORS Ashley Carse, David Diehl, Anjali Forber-Pratt, Yolanda McDonald, Jessica Perkins, Sara Safransky

RESEARCH ASSISTANT PROFESSORS Gabrielle Chapman, Caroline Christopher

DEGREE OFFERED: Doctor of Philosophy

The graduate program in community research and action is an interdisciplinary program combining community psychology, urban sociology, human geography, applied anthropology, and human and community development. It trains action-researchers committed to promoting social justice in rigorous theoretical analysis and research methods to prepare them for careers in academia, research, and public policy. The Ph.D. degree includes (a) a core set of courses covering inequality, diversity and social justice, community intervention and change, community inquiry (social research methods), public policy and advocacy, and organizational theory and change; (b) advanced research methodology covering quantitative, qualitative, and critical methods, action research, field research, and program evaluation; and (c) minor concentrations that are designed individually, drawing from Human and Organizational Development Department courses (in community organizing and development, community health, human development and prevention science) and from other departments and specializations within Peabody College (e.g., quantitative methods, urban education) and throughout the university (e.g., anthropology, divinity, gender and sexuality studies, global health, political science, sociology). Planning is done with the major professor and approved by the student's committee. Students receive practical training and experience in teaching, grant-writing and applied research, and program or policy work in collaboration with nonacademic partners. Students entering without a relevant master's degree or with a nonempirical master's must complete an empirical study or thesis (and receive the master of science in CRA as part of the Ph.D. program).

Comparative Media Analysis and Practice

DIRECTOR Lutz Koepnick (German Studies; Cinema and Media Arts)

Affiliated Faculty

PROFESSORS Clifford Anderson (Religious Studies; Associate University Librarian for Research and Learning), Joy Calico (Music), Jay Clayton (English; Curb Center for Art, Enterprise, and Public Policy; Cinema and Media Arts), Jennifer Fay (Cinema and Media Arts; English), Douglas Fisher (Computer Science), Rogers Hall (Peabody College of Education and Human Development), Ruth Hill (Spanish), Lutz Koepnick (German Studies; Cinema and Media Arts), Daniel Levin (Psychology and Human Development), Kevin Murphy (History of Art), Lynn Ramey (French), John Sloop (Communication Studies), Helmut Smith (History), Mark Wallace (Neuroscience; Vanderbilt Brain Institute), Christoph Zeller (German Studies), Mel Ziegler (Art)

ASSOCIATE PROFESSORS Laura Carpenter (Sociology), Aimi Hamraie (Medicine, Health, and Society), Claire Sisco King (Communication Studies; Cinema and Media Arts), Stan Link (Music), Christopher Loss (History), James McFarland (German; Cinema and Media Arts), Tracy Miller (History of Art; Asian Studies), Vesna Pavlovic (Art), Jonathan Rattner (Cinema and Media Arts; Art), Betsey Robinson (History of Art), Steven Wernke (Anthropology)

ASSISTANT PROFESSORS Mireille Lee (History of Art), Ole Molvig (History), Haerin Shin (English; Cinema and Media Arts; Asian Studies), Rebecca VanDiver (History of Art)

LECTURERS Derek Bruff (Center for Teaching; Mathematics), Madeleine Casad (Center for Digital Humanities; Cinema and Media Arts)

DEGREE OFFERED: Joint Doctor of Philosophy

COURSES OFFERED: [CMAP](#)

The Comparative Media Analysis and Practice joint-Ph.D. program advances the critical investigation of modern media culture and the innovative making of digital objects. Open to Ph.D. students from all units of the university, the program adds intellectual perspectives and project-driven learning experiences in an interdisciplinary and collaborative framework. It enhances the preparedness of Ph.D. students with diverse backgrounds for academic or non-academic careers alike. Students completing the program will receive degrees such as Ph.D. in anthropology and comparative media analysis and practice or Ph.D. in English and comparative media analysis and practice.

Aside from taking the required courses in their home program, joint-Ph.D. students are required to take four core seminars (CMAP 8001–8004) sequenced over two years. CMAP students are also required to participate in two series of workshops (CMAP 8010–8011), specially designed to build more advanced skills in making creative media objects and handling digital information, offered in alternating years during the month of May. CMAP doctoral students will take their qualifying exams as stipulated by their primary departments. Doctoral students enrolled in CMAP write just one dissertation to fulfill the requirements for the joint-Ph.D. However, the CMAP program strongly encourages new and experimental formats of the dissertation. The candidate's Ph.D. committee for the dissertation must include at least one member of the CMAP affiliated faculty. In addition to satisfying all necessary expectations and requirements of their primary degree department, joint-degree dissertations typically incorporate perspectives that reflect a student's participation in CMAP core seminars and digital practice workshops. Additionally, during the semester leading up to their dissertation defense, students are required to design two online media presentations featuring their dissertation. One of these presentations should address specialized audiences, the other a general lay public.

CMAP students are required to carry out forty hours of internship work at some point in their graduate studies. These internships offer opportunities to probe one's knowledge and media skills within non-academic settings. During one semester of their fourth or fifth year of graduate study at Vanderbilt, CMAP students will use their expertise in the theory, analysis, and making of digital objects to serve as a TA in a select course on campus or contribute to the creative project of one or several undergraduate students in their respective home departments. Operating within the context of the Immersion Vanderbilt project, this latter contribution may take many different forms and will be closely coordinated between the CMAP student's home department and the CMAP program director.

Detailed information is available upon request from the program director.

Computer Science

CHAIR Xenofon D. Koutsoukos

DIRECTOR OF GRADUATE STUDIES Ákos Lédeczi

DIRECTOR OF GRADUATE RECRUITING Taylor Johnson

PROFESSORS EMERITI Charlotte F. Fischer, J. Michael Fitzpatrick, Stephen R. Schach

PROFESSORS Gautam Biswas, Robert E. Bodenheimer, Jr., Benoit Dawant, Aniruddha S. Gokhale, Gabor Karsai, Xenofon D. Koutsoukos, Bennett Landman, Ákos Lédeczi, Bradley Malin, Padma Raghavan, Douglas C. Schmidt, Nabil Simaan, Jonathan Sprinkle, Keivan Stassun, Janos Sztipanovits

RESEARCH PROFESSOR Robert Laddaga

PROFESSOR OF THE PRACTICE Julie L. Johnson, Gerald H. Roth

ASSOCIATE PROFESSORS Douglas H. Fisher, Ivelin S. Georgiev, Taylor T. Johnson , Jules White

ASSOCIATE PROFESSOR EMERITUS Jeremy P. Spinrad

ASSOCIATE PROFESSOR OF THE PRACTICE Dan Arena, Graham S. Hemingway, Robert Tairas

ASSISTANT PROFESSORS Matt Berger, Corey Brady, Catie Chang, Tyler Derr, Abhishek Dubey, J. Anthony Capra, Daniel Fabbri, Yu Huang, Yuankai Huo, David, Hyde, Soheil Kolouri, Maithilee Kunda, Forrest Laine, Kevin Leach, Meiyi Ma, Jack Noble, Ipek Oguz, Mikail Rubinov, Jie Ying Wu

RESEARCH ASSISTANT PROFESSORS Shilo Anders, Ana Gainaru, Ilwoo Lyu, Himanshu Neema, Hongyang Sun

ASSISTANT PROFESSORS OF THE PRACTICE Uttam Ghosh, Shervin Hajiamini, Md. Kamrul Hassan, Diego Mesa, Vikash Singh

ADJUNCT ASSISTANT PROFESSOR Zhiao Shi

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [CS](#)

The graduate program in computer science is structured around four primary research areas: (1) computing foundations, (2) computer and network systems, (3) information and intelligent systems, and (4) medical image computing. A variety of advanced graduate courses are offered in each of these areas.

Doctoral candidates are required to complete a minimum of 36 hours of formal course work, which may include at most 6 hours of independent study. The distribution of courses must contain at least one 6000-level course or above in each of three primary research areas, one of which must be the Computing Foundations area.

The master's degree in computer science may be earned through (a) the regular program that includes a thesis or (b) a non-thesis program requiring 30 hours of formal course work. For option (a), up to 6 hours of M.S. thesis research may be applied to the 30-hour total. Under either plan, at least 12 hours must be in 6000-level (or above) computer science courses. A master's degree in passing option is available to Ph.D. students.

An online master of science in computer science is also available. For information, please refer to Special Programs in the Academic Programs section of this catalog, or visit engineeringonline.vanderbilt.edu/computer-science/.

Creative Writing

See [English](#).

Data Science

DIRECTORS Andreas Berlind, Doug Schmidt

DIRECTOR OF GRADUATE STUDIES Jeffrey Blume

DEGREE OFFERED: Master of Science

COURSES OFFERED: [DS](#)

Data science is an interdisciplinary field whose goal is to extract knowledge and enable discovery from complex data. The field applies a fusion of principles from the disciplines of statistics and computer science to perform data-intensive tasks in domain-specific contexts. The program's goal is to train analysts who are knowledgeable about a broad spectrum of computational and statistical techniques for handling data-intensive tasks in a variety of quantitative, computational, and scientific disciplines. Additionally, students are taught how to work effectively and efficiently in teamwork environments.

Students will learn how to work with complex and large data sets, analyze data with appropriate statistical and computational tools to extract relevant knowledge, make effective displays and visualizations of the data, effectively communicate results to both experts and nonexperts, understand and communicate the scientific generalizability of their models, and respect relevant ethical/legal issues pertaining to data analytics.

The program's learning objectives are: (1) be able to acquire, clean, and manage (massive) data, (2) design computational pipelines to collect and process large-scale data, (3) visualize data and highlight data patterns graphically, (4) build and interpret a statistical model for large-scale data, (5) explain the advantages and limitations of competing statistical models, (6) implement machine learning algorithms to make predictions and optimize decisions, (7) understand and explain the difference between inference and prediction goals, (8) generate reproducible code and analyses, and work in a reproducible manner, (9) communicate data science methods and results in a clear and concise manner to variable audiences, and (10) recognize the ethical, policy, and privacy implications of data science research.

Master of Science

The Vanderbilt master of science in data science is a four-semester, sixteen-course (48 credit hours) program, which includes the completion and presentation of a capstone project. Curriculum is organized in three core sequences (Computation, Data-analysis, Practice); the computation and data-analysis sequences consist of four courses each, while the practice sequence has five courses. The curriculum is rounded out with two electives and a capstone course. Students must maintain an overall grade point average (GPA) of 3.0 (*B*) in order to graduate. To graduate with honors, students must complete 48 credit hours (four semesters) with an overall GPA of 3.5 (*B+*) or better and complete the capstone project.

For additional information, visit vanderbilt.edu/datascience.

Earth and Environmental Sciences

CHAIR Steven L. Goodbred

Co-DIRECTORS OF GRADUATE STUDIES David J. Furbish, Jessica L. Oster

PROFESSORS EMERITI Leonard P. Alberstadt, George M. Hornberger, Calvin F. Miller, Molly Fritz Miller, Arthur L. Reesman, William G. Siesser, Richard G. Stearns

PROFESSORS John C. Ayers, Ralf Bennartz, David J. Furbish, Steven L. Goodbred, Guilherme A. R. Gualda,

ADJOINT PROFESSORS Mark S. Ghiorso, David White

ASSOCIATE PROFESSORS Larisa R. G. DeSantis, Jonathan M. Gilligan, Jessica L. Oster

ASSISTANT PROFESSORS Simon A. F. Darroch, Kristen E. Fauria, Maria Luisa S. P. Jorge, Neil P. Kelley

RESEARCH ASSISTANT PROFESSORS Christopher P. Vanags

PRINCIPAL SENIOR LECTURERS Lily L. Claiborne, Daniel J. Morgan

DEGREES OFFERED: EARTH AND ENVIRONMENTAL SCIENCES. Master of Science, Doctor of Philosophy; ENVIRONMENTAL ENGINEERING. Doctor of Philosophy

COURSES OFFERED: [EES](#)

A student earns the master's degree in earth and environmental sciences by completing 24 hours of formal course work and submitting an approved research thesis of at least 6 credit hours. The doctoral degree requires at least 36 hours of formal course work and a total of 72 hours of total credits (research and course work combined); completion of the Ph.D. degree requires approval in a preliminary exam (Ph.D. in earth and environmental sciences) or comprehensive exam (Ph.D. in environmental engineering), approval in the qualifying exam, as well as submission and defense of a research thesis. Fields of study include sedimentology, geochemistry, geomorphology, transport processes, igneous and metamorphic petrology, volcanology, environmental geology, paleoclimate, paleobiology and paleoecology, atmospheric chemistry and physics, and climate dynamics.

Economics

CHAIR Peter L. Rousseau

VICE CHAIR Joel Rodrigue

DIRECTOR OF GRADUATE STUDIES Mattias Polborn

DIRECTOR OF THE GRADUATE PROGRAM IN ECONOMIC DEVELOPMENT Kevin X.D. Huang

PROFESSORS EMERITI Jeremy Atack, William W. Damon, Andrew F. Daughety, Malcolm Getz, Cliff J. Huang, Andrea Maneschi, Jennifer F. Reinganum, John J. Siegfried, George H. Sweeney, Anthony M. Tang

PROFESSORS Kathryn H. Anderson, Eric W. Bond, Christopher (Kitt) Carpenter, William J. Collins, John Conley, Mario Crucini, , Robert A. Driskill, Benjamin Eden, Kevin X. D. Huang, Gregory Huffman, Atsushi Inoue, Tong Li, Mattias Polborn, Peter L. Rousseau, Kamal Saggi, W. Kip Viscusi, John A. Weymark, Myrna Wooders

ASSOCIATE PROFESSORS Andrea Moro, Joel Rodrigue, Yuya Sasaki, Leslie Turner

ASSISTANT PROFESSORS Brian Beach, Andrew Dustan, Malin Hu, Gregory Leo, Michelle Marcus, Kathleen McKiernan, Analisa Packham, Sarah Quincy, Pedro Sant'Anna, Matthew Zaragoza-Watkins, Ariell Zimran

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [ECON](#)

Doctoral study in economics at Vanderbilt prepares students for research and teaching careers in universities and for leadership positions in government, international agencies, and business. The curriculum emphasizes economic theory, econometrics, and the use of theory and measurement in understanding economic phenomena and policy issues. Students have been attracted to the program from all parts of the United States and from more than sixty countries.

A master's degree (without thesis) may be awarded after completion of 42 hours of Ph.D. course work with an average of at least *B* or better.

For the Ph.D. degree, which requires 72 hours and a thesis, the student normally takes required courses in microeconomics and macroeconomics, economic history, statistics, and econometrics. There is a mathematics requirement, normally satisfied by taking Economics 8000, Selected Topics in Mathematics for Economists. There is no foreign language requirement.

All doctoral students must pass written examinations based on the first-year core courses in microeconomics, macroeconomics, and econometrics. Each year the department offers a variety of doctoral-level courses beyond the core, in areas such as Advanced Economic Theory, Econometrics, Economic Development, Economic History, Health Economics, Industrial Organization, International Economics, Labor Economics, Money and Financial Institutions, and Public Economics. After fulfilling the paper requirement in the third year, students turn to their thesis work.

[Graduate Program in Economic Development](#)

The GPED is intended for students seeking a master's degree in economics primarily with an interest in international development. Students who meet the academic requirements of 30 hours of course work, with at least a B average, receive the Master of Arts degree in economics. Students typically complete the program in sixteen to twenty-one months. Prospective students with an undergraduate background in economics, competency in calculus, and a good command of English are encouraged to apply. The program is described under Special Programs.

Electrical Engineering

CHAIR Xenofon D. Koutsoukos

ASSOCIATE CHAIR Robert A. Reed

DIRECTOR OF GRADUATE STUDIES Bennett A. Landman

DIRECTOR OF GRADUATE RECRUITING Jack H. Noble

DIRECTOR OF UNDERGRADUATE STUDIES W. Timothy Holman

PROFESSORS EMERITI Alfred B. Bonds, Arthur J. Brodersen, James A. Cadzow, George E. Cook, Jimmy L. Davidson, J. Michael Fitzpatrick, Kenneth F. Galloway, Dennis G. Hall, Robert W. House, L. Ensign Johnson, Kazuhiko Kawamura, Richard G. Shiavi, Robert A. Weller, Francis M. Wells, Edward J. White, James E. Wittig

PROFESSORS Bharat L. Bhuva, Robert E. Bodenheimer, Benoit M. Dawant, Mark Does, Philippe M. Fauchet, Daniel M. Fleetwood, Michael Goldfarb, Weng Poo Kang, Gábor Karsai, Xenofon D. Koutsoukos, Bennett A. Landman, Akos Ledeczki, Lloyd W. Massengill, Sokrates T. Pantelides, Robert A. Reed, William H. Robinson, Ronald D. Schrimpf, Janos Sztipanovits, Robert J. Webster III, Sharon M. Weiss

PROFESSOR OF THE PRACTICE Ralph W. Bruce

RESEARCH PROFESSORS Michael L. Alles, Sandeep Neema

ASSOCIATE PROFESSORS Audrey Bowden, Joshua Caldwell, William A. Grissom, Richard Alan Peters II, Jason Valentine, Greg Walker, D. Mitchell Wilkes, Yaqiong Xu

ASSISTANT PROFESSORS Catie Chang, Abhishek Dubey, Dariot Englot, Yuankai Huo, Taylor T. Johnson, Justus Ndukaife, Jack

Noble, Ipek Oguz

RESEARCH ASSISTANT PROFESSORS Jeffrey S. Kauppila, Brian D. Sierawski

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [EECE](#)

Programs in electrical engineering are offered in the areas of analog and digital circuits, computer engineering, intelligent systems, solid state devices, signal and image processing and analysis, robotics, microelectronics, photonics, nanotechnology, and related areas in biomedical engineering.

The master of science degree program requires 30 credit hours, including 18 hours in the major area (within EECE) and 6 hours in a minor area. At least 12 hours in the major area must be taken at or above the 6000 level. The courses taken must also include one of the gateway courses in each of two of the following areas: electronics, computer, and signals and systems. Gateway courses are graduate-level courses with senior-level prerequisite, the list of which is maintained by the DGS. The remainder of the course work in the major must be taken at or above the 5000 level. The minor will be 6 hours of graduate-level course work, typically outside of EECE. A maximum of 3 hours of independent study may be applied to the 18 hours required in the major area. The student's adviser must approve all courses. A research thesis is required. A non-thesis option is also offered, which requires an additional 6 hours of independent study constituting one single unit of research work.

A total of 72 hours is required for the Ph.D. Of these, 36 hours must be in course work with at least 24 of the 36 hours in EECE (exceptions can be made to this rule based on the recommendation of the student's adviser if the student's research topic requires taking additional courses outside EECE). The courses taken must also include one

of the gateway courses in each of the three following areas: electronics, computers, and signals and systems. Gateway courses are graduate-level courses with senior-level prerequisites, the list of which is maintained by the EE director of graduate studies, and posted on the EECS department website. Up to 6 hours of independent studies may be taken to fulfill the 36 hours requirement. Up to 24 hours of course work toward the master's degree or in transfer credit will normally be applied to this total on approval by the committee. Up to 12 total hours of course work in the range 5000-5999 are allowed. CS courses in the student's area of research can also be taken for EECE graduate program credit with written approval of the student's adviser. The remainder of the 72 hours may be in dissertation research hours and in additional course work or independent study classes applicable to the student's program of study. Students must complete at least 24 hours while in residence at Vanderbilt. At least 12 of these hours must be in formal course work.

Specific and current degree requirements (including course selection, committee selection, preliminary examination, thesis/dissertation, and dissertation defense policies) are detailed in the Graduate Policy Document. A copy of this document should be obtained from the program office.

English

CHAIR Dana Nelson

DIRECTOR OF GRADUATE STUDIES Vera Kutzinski

DIRECTOR OF CREATIVE WRITING Major Jackson

PROFESSORS EMERITI Vereen M. Bell, Paul Elledge, Roy K. Gottfried, R. Chris Hassel Jr., Mark Jarman, Michael Kreyling, Jonathan Lamb, Lorraine Lopez, Leah Marcus, John F. Plummer III, Hortense Spillers, Cecelia Tichi, Harold Lerow Weatherby Jr.

PROFESSORS Houston Baker, Jay Clayton, Kate Daniels, Colin (Joan) Dayan, Tony Earley, Lynn E. Enterline, Vera Kutzinski, Emily Lordi, Lorrie Moore, Dana Nelson, Nancy Reisman, Mark Schoenfield, Kathryn Schwarz, Rachel Teukolsky, Mark A. Wollaeger

ASSOCIATE PROFESSORS Christin Essin, Jennifer Fay, Teresa A. Goddu, Rick Hilles, Scott Juengel, Ifeoma Nwankwo, Bridget Orr, Anthony Reed, Allison Schachter, Ben Tran

ASSISTANT PROFESSORS Candice Amich, Alex Dubilet, Jessie Hock, Didi Jackson, Carlos Nugent, Akshya Saxena, Haerin Shin (adjunct)

WRITERS IN RESIDENCE Sheba Karim, Amanda Little, Sandy Solomon

PRINCIPAL SENIOR LECTURERS Roger Moore

SENIOR LECTURERS Pavneet Aulakh, Gabriel Briggs, Elizabeth Covington, Andrea Hearn, Elizabeth Meadows, Justin Quarry

DEGREES OFFERED: Master of Arts, Master of Fine Arts, Doctor of Philosophy

COURSES OFFERED: [ENGL](#)

The graduate program in English offers course work and research supervision in all areas of British and American literature, Anglophone literature from other countries, film and media studies, cultural studies, and literary theory. The goal of the Ph.D. program is to produce scholars, critics, and teachers of literature and culture for colleges and universities.

Requirements for the master's degree either en route to the Ph.D. or through Vanderbilt's 4+1 Program are 30 hours of course work and a thesis at the end of the first year.

Requirements for the M.F.A. are 42 to 48 hours of course work, a thesis of creative work (a novel, a book of short stories, a collection of poems, or a collection of personal essays), plus an oral defense of the thesis.

Requirements for the Ph.D. are 52 hours of course work, Ph.D.-level proficiency in a foreign language, comprehensive examinations, and a dissertation.

Through the combined B.A./M.A. (4+1) option, the Department of English offers exceptional students the opportunity to earn both the B.A. and the M.A. in five years. Students are admitted to the 4+1 program only by approval of the Graduate Faculty of the English Department. Further information about the program is available from the director of graduate studies.

Other regulations governing graduate work are available from the director of graduate studies. For more information on the M.F.A., see the Academic Programs chapter of this catalog.

Graduate seminars in creative writing may be repeated for credit with the program director's approval. Other graduate seminars may be repeated for credit if topics are not duplicated.

RESEARCH ASSOCIATE PROFESSORS Kevin G. Brown, Janey S. Camp, Andrew G. Garrabrants

ASSISTANT PROFESSORS Hiba Baroud, Ravindra Duddu, Jesus Gomez-Velez, Shihong Lin

RESEARCH ASSISTANT PROFESSOR Pranav Karve

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [ENVE](#)

The graduate program in environmental engineering provides opportunities for study and cutting-edge research that

have an immediate impact on society and that are at the nexus of energy, water, smart cities, and the environment, with an emphasis on long-term sustainability and resilience. Areas of research include water resources, quality, and treatment; resilience and sustainability; nuclear environmental engineering; and environmental materials and materials durability.

The master of science (M.S.) degree in environmental engineering requires completion of 30 hours of graduate credit (5000 level or higher) and may be earned through: (1) 24 hours of didactic graduate course work, including at least 15 hours of graduate-level courses at Vanderbilt in the major area (i.e., within Environmental Engineering graduate program) and a research thesis of at least 6 semester hours—*Thesis M.S. Degree* or (2) 30 hours of didactic graduate course work, including at least 15 hours of graduate-level courses at Vanderbilt in the major area (i.e., within Environmental Engineering graduate program) and a substantive report of 3 semester hours of independent study—*Non-Thesis M.S. Degree*.

The Ph.D. degree requires completion of 72 hours of graduate credit (5000 level or higher), a minimum of which must be 30 hours of didactic graduate course work with a minimum of 24 course credit hours to be completed at Vanderbilt and 6 hours of didactic graduate course work (excluding directed study) in the major area (i.e., within Environmental Engineering graduate program). The remaining credit hours can be fulfilled with courses or research hours. During the fall semester, entering graduate students are required to take a one-hour, zero credit seminar to orient them to how critical review of a topic is conducted and how research proposals are prepared. In addition, all Ph.D. students must pass the Environmental Engineering Graduate Program preliminary examination, must complete the university-required qualifying exam, and must write and defend a dissertation.

As part of the required 24 credit hours (thesis M.S. degree) or 30 credit hours (non-thesis M.S. degree and Ph.D. degree) of didactic graduate course work, students must demonstrate competency in four areas—(i) quantitative mechanisms and theory, (ii) experimental methods, (iii) data analysis techniques, and (iv) computation, simulation, and applied mathematics—by taking at least one course in each of the four areas selected from an approved list. Specific and degree requirements (including list of competency courses, Ph.D. committee selection, preliminary examination, thesis/dissertation, and dissertation defense policies) are available from the director of graduate studies.

Epidemiology

DIRECTOR OF GRADUATE STUDIES Peter F. Rebeiro

PROFESSORS EMERITUS Marie Griffin, Wayne Ray, William Blot

PROFESSORS Muktar Aliyu, Qiuyin Cai, Bruce Compas, William Cooper, Nancy Cox, Qi Dai, Robert Dittus, Tom Elasy, Wes Ely, Matthew Freiberg, Debra Friedman, Natasha Halasa, Tina Hartert, Katherine Hartmann, Douglas Heimburger, David Penson, Russell Rothman, Christianne Rouse, Timothy Sterling, Kristin Archer Swygert, Xiao-Ou Shu, Digna Velez Edwards, Wei Zheng

RESEARCH PROFESSORS John Boice, Loren Lipworth, Martha Shrubsole, Pingsheng Wu, Gong Yang

ADJUNCT PROFESSORS Maureen Sanderson, Pamela Talley

ASSOCIATE PROFESSORS Melinda Aldrich, Jennifer Piper Below, Cecilia Chung, Stephen Deppen, Todd Edwards, Carlos Grijalva, Jirong Long, Harvey Murff, April Pettit, Helen Keipp Talbot

RESEARCH ASSOCIATE PROFESSORS Hui Cai, Wanqing Wen

ASSISTANT PROFESSORS Carolyn Audet, Alicia Beeghly-Fadiel, Ayush Giri, Nikhil Khankari, Peter Rebeiro, Cassianne Robinson-Cohen, Staci Sudenga, Yaomin Xu, Danxia Yu

RESEARCH ASSISTANT PROFESSOR Natalia Jimenez-Truque

INSTRUCTOR Lauren Saag Peetluk

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [EPID](#)

The unique focus of the Ph.D. program in epidemiology is training epidemiologists with unparalleled excellence in advanced quantitative methods who have a strong grasp of causal logic, inference, probability, and other theoretical aspects of study design and data analysis, in addition to content area expertise. The curriculum features classroom, computing, and experience-based teaching. The program integrates training and research across clinical, laboratory, and quantitative disciplines. At the completion of the program, graduates will be prepared to develop an independent research portfolio in academia, research, or industry. Our goal is to train critical thinkers prepared to make fundamental advances using rigorous and cutting-edge approaches to research. Graduates will be able to contribute across a wide spectrum of content areas and research foci.

Students admitted to the program are required to complete a total of 72 credit hours, including course work and research. Selected core courses will be shared with the biostatistics graduate program. In addition to the required methods curriculum, students will take content area and advanced methods electives. Students are eligible to take relevant course work, for which they meet the prerequisites, in any Vanderbilt department. Requirements for program completion include a comprehensive examination at the end of the second year, an oral defense of the dissertation proposal and qualifying exam, and the doctoral dissertation. The program is expected to take four years to complete. Students can accelerate their studies to complete the program in three years.

Students will be matched shortly after acceptance with research preceptor teams. These established multidisciplinary teams include epidemiology faculty, clinical experts and clinical researchers, biostatisticians, and experienced research staff. The research preceptor team commits to involving the student as a co-investigator from the beginning of the student's graduate studies. Students will use data from their research teams in their course work. The goal is to create a mutually beneficial partnership that produces synergy between education, professional development, and the conduct of research.

Strong candidates for admission will have a master's degree in epidemiology, biostatistics, or another quantitative discipline; experience in the conduct of research and independent data analysis; and strong quantitative preparation and aptitude. Top applicants will be offered an interview during which they will meet with research teams. Both students and research teams will then have the opportunity to rank whom they feel would be the best match(es).

For further information, please visit our website at medschool.vanderbilt.edu/epi-phd/.

French and Italian

CHAIR Meike G. Werner

DIRECTOR OF GRADUATE STUDIES Robert F. Barsky

PROFESSORS EMERITI, Dan M. Church, Virginia M. Scott, Patricia A. Ward,

PROFESSORS Robert Barsky, William Franke, Lynn Ramey, Tracy Sharpley-Whiting, Holly A. Tucker

ASSOCIATE PROFESSORS Nathalie Debrauwere-Miller, Paul B. Miller, Andrea Mirabile, Letizia Modena, Anthère Nzabatsinda

ASSISTANT PROFESSORS Raisa Rexer

DEGREE OFFERED: FRENCH. Doctor of Philosophy

COURSES OFFERED: [FREN](#), [ITAL](#)

Requirements for the Ph.D. degree include a total of 42 credit hours of course work, taken in the Department of French and Italian and in other departments with the approval of the director of graduate studies. The Department of French & Italian does not offer a terminal M.A. degree, but they do earn the M.A. with the successful passing of the exam, en route to the Ph.D. For BA students and for non French Studies M.A. students, an M.A. qualifying exam, based on a departmental reading list, must be taken no later than before the beginning of classes in the student's fourth semester of study, and students who successfully pass the exam enter the Ph.D. stage.

Students are expected to begin to register for research credit no later than the beginning of classes in the student's fourth semester of study. Up to 33 credit hours may be taken as research credit. In addition to French and English, doctoral candidates must demonstrate a reading knowledge of an additional language to be determined in consultation with the student's dissertation adviser. Other regulations governing graduate work are available from the director of graduate studies.

After completing the M.A. exam, the student identifies an area of specialization (including, but not limited to, the subject of the dissertation). During the fourth semester, the student prepares an extensive reading list on this area of specialization. The Ph.D. qualifying exam is taken in the sixth semester upon completion of course work.

Upon successful completion of the Ph.D. exam, the student submits the dissertation proposal. After its approval by the Ph.D. committee, the student writes and defends the dissertation to complete the requirements for the Ph.D.

The Jean and Alexander Heard Libraries' rich collection of French materials makes research possible in all periods of French literature. The library's special collections department also houses the W. T. Bandy Center for Baudelaire and Modern French Studies, the Pascal Pia collection (nineteenth- and twentieth-century literary criticism), the Gilbert Sigaux collection (twentieth-century French literature), and the Wachs collection (eighteenth-century fiction and almanacs). In 2016 the W. T. Bandy Center acquired the Hervé Velez collection of Paul Verlaine materials, one of the finest collections of Verlaine works ever amassed.

Gender and Sexuality Studies

CHAIR Katherine Crawford

DIRECTOR OF UNDERGRADUATE STUDIES Elizabeth Covington

PROFESSOR EMERITA Charlotte Pierce-Baker

PROFESSORS Brooke Ackerly, Ellen Armour, Christopher Carpenter, Laura Carpenter, Katherine Crawford, Stacey Floyd-Thomas, Nancy Reisman, Laurel Schneider, Kathryn Schwarz, Shatema Threadcraft

SENIOR LECTURERS Rory Dicker, Allison Hammer, Kristen Navarro, Stacy Simpican, Cara Tuttle Bell

LECTURERS Rebecca Epstein-Levy, Danyelle Valentine

CERTIFICATE OFFERED: GENDER STUDIES

COURSES OFFERED: [GSS](#)

Vanderbilt University's Department of Gender and Sexuality Studies offers interdisciplinary graduate study in gender studies in cooperation with the Departments of Anthropology, English, French and Italian, History, Philosophy, Political Science, Sociology, and Spanish and Portuguese, and the Graduate Department of Religion. Affiliated faculty from other schools, including Vanderbilt Peabody College (Human and Organizational Development), Vanderbilt Law School (Law and Economics), and Vanderbilt Divinity School, also participate in the program. Students work toward a certificate in gender studies.

Requirements of the Graduate Gender Studies Certificate

A certificate in gender studies is awarded with either the M.A. or Ph.D. degree upon fulfillment of the following requirements: (1) Completion of at least 13 credit hours of course work across two or more disciplines. Two courses, WGS 8301 (3 credit hours) and WGS 8302 (variable credit hours), are required. Three additional interrelated graduate-level courses (9 credit hours) on women, gender, and/or sexuality, appropriate to the student's program of study and forming an intellectually cohesive whole, are required. At least one course (3 credit hours) must come from outside the student's home discipline. Up to 6 credit hours of specifically named required courses from a student's primary degree program may count toward the certificate. Courses must be approved for credit by the chair of the department. One course (3 credit hours) may be satisfied through an independent study with a faculty member affiliated with Gender and Sexuality Studies, with the approval of the department chair. (2) Completion of one paper or substantial project demonstrating the application of a gender studies or sexuality studies framework or methodology to research, teaching, or fieldwork.

Any student enrolled in a graduate program at Vanderbilt is eligible to apply for the certificate in gender studies. Acceptance in the program requires a minimum cumulative GPA of 3.3, satisfactory performance of *B+* or better in WGS 8301, and the approval of the student's primary adviser and the chair of Gender and Sexuality Studies. Courses taken at Vanderbilt prior to admission to the program may be counted toward the certificate requirements with the approval of the chair.

Students wishing to enroll must complete an Intent to Enroll form, which must be signed by the student, the chair of the Gender and Sexuality Studies department, and the director of the graduate program (DGS) for the degree program in which the student is enrolled. A signed copy of the form must be submitted to the Graduate School and to the Office of the University Registrar (university.registrar@vanderbilt.edu).

For more detailed information on the gender certificate, please go to as.vanderbilt.edu/wgs or contact the director.

ASSOCIATE PROFESSORS (SECONDARY APPOINTMENTS) Alexander Joskowicz (Jewish Studies), Shaul Kelner (Jewish Studies, Sociology), Allison Schachter (Jewish Studies)

**ASSISTANT PROFESSOR Simone Stirner
MELLON ASSISTANT PROFESSOR Kathryn David**

ASSISTANT PROFESSOR (SECONDARY APPOINTMENT) Karen Ng (Philosophy)

ASSISTANT PROFESSOR OF THE PRACTICE Albina Khabibulina, Silke Schade

DEGREES OFFERED: GERMAN. Master of Arts, Doctor of Philosophy

COURSES OFFERED: [EUS](#), [GER](#), [RUSS](#)

Master of Arts

The program leading to the M.A. degree is designed to deepen and broaden the student's knowledge of German culture, literature, and media from its beginnings to the present day, with special emphasis on major areas not usually covered in-depth in an undergraduate course of study.

In order to be admitted to candidacy for the master of arts degree, a student is required to prove ability in writing and speaking German to the satisfaction of the department.

Candidates for the master's degree must meet three separate requirements: complete 30 credit hours of formal course work, submit written evidence of research abilities, and pass an oral examination based on course work and the departmental core reading list. Nine of the 30 credit hours are to be at the 3000 level and above in the department, and a minimum of 3 credit hours should be in a graduate seminar. The oral examination is normally taken at the end of the student's third semester. As a rule, independent study will not fulfill the requirement of formal course work. Evidence of research abilities will usually take the form of a research paper of twenty-five to thirty pages that is based on a term paper and is to be submitted no later than the end of the student's fourth semester at Vanderbilt. As an alternative, students may choose to complete 24 credit hours of formal course work and to write a master's thesis. The latter is a research paper of sixty to eighty pages in length that gives evidence of scholarly competence and independent, critical thought. The research-writing requirement for this latter option is satisfied after the formal course work and the oral examination have been completed.

The department expects candidates to meet all formal course requirements for the master's degree within three semesters. The student must maintain a minimum B average, provide evidence of scholarly research abilities, and pass the oral examination to receive her/his degree. The M.A. examination committee consists of three faculty members drawn from the department; usually—but not necessarily—the chair or the director of graduate studies serves as one of the examiners.

All candidates awarded a Teaching Assistantship will enroll in Foreign Language Teaching Theory and Practice during their first term of teaching. The student arranges her/his program in consultation with the director of graduate studies and in recognition of departmental objectives.

Through the combined B.A./M.A. (4+1) option, the department offers exceptional students the opportunity to earn both the B.A. and the M.A. in five years. Students will be provisionally admitted to the 4+1 program only by approval of the department. Further information about the program is available from the director of graduate studies.

Doctor of Philosophy

Admission to the program does not imply acceptance for candidacy in the Ph.D. program. Performance well above the minimum Graduate School requirement of a *B* is expected for admission to the Ph.D. program. Candidates normally obtain the M.A. before going on for the Ph.D. The purpose of the doctoral degree at Vanderbilt is to develop the talented candidate's capacity to make independent contributions to the field of German literature, media, and cultural studies. Transfer students should consult the Graduate School requirements for the doctorate.

The Ph.D. degree requires a total of 72 credit hours to graduate. Students who enter the program with a B.A. are required to take 60 credit hours of formal course work; students who enter the program with an M.A. are required to take 42 credit hours of formal course work. Courses that count toward the formal course work requirement include the 6 core courses listed below and all of the other graduate courses listed in the catalog for the German Ph.D., with the exception of credit hours taken for non-candidate research and dissertation research. In addition to taking required and non-required seminars within the department, graduate students are expected to enroll in at least two seminars on relevant materials taught by members of the German Studies faculty outside of the department. Students are typically also allowed to take at least two additional courses (6 credit hours) outside of the department with other faculty members to enrich their interdisciplinary training. All formal course work needs to be completed in order to pass the Qualifying Exam. Students entering the program with an M.A. may transfer up to 6 credit hours in consultation with the DGS after the end of their first year; such transfer credits, however, cannot be used to offset any of the required formal course work. Remaining credit hours to complete the mandated 72 credit hours include non-candidate and dissertation research. Each student is required to take the following courses (18 credit hours) as part of their required 60/42 credit hours of formal course work:

- GER 7101 *Foundations I: Transition Points of Modern German Culture* [3]
- GER 7102 *Foundations II: Theories of Literary and Cultural Analysis* [3]
- GER 7103 *Foundations III: Modes of Scholarly Work and Writing* [3]
- GER 7104 *Pre-Exam Colloquium* [3]
- SLS 6030 *Foreign Language Learning and Teaching* [3]
- GER 8301 *Pre-Dissertation Colloquium* [3]

The director of graduate studies in German assists in devising related areas of concentration so that the student, at this stage, can be narrowing her/his focus for a dissertation topic. Faculty members actively assist students to determine the most promising topics for innovative research by pointing out interesting knowledge gaps, theoretical issues, or interdisciplinary questions.

A reading knowledge of French is usually expected, but another language may be substituted with the approval of the examination committee if it is felt that this language is relevant to the candidate's area of concentration or dissertation research. The second language requirement must be fulfilled before the candidate may take the comprehensive examination.

The teaching program option offers up to 12 credit hours in the area of teaching methodology (courses, research projects, and teaching internships). Work in this area does not count toward minimum degree requirements; 4 credit hours are normally the minimum in this program. Students opting for the full program should expect to add at least one semester to their course of study.

Students with strong interests in modern media culture and media studies are encouraged to apply for the joint-

Ph.D. program in Comparative Media Analysis and Practice (CMAP), typically at the end of their first year of doctoral studies at Vanderbilt. Students fulfilling all requirements for both German and CMAP will receive the Ph.D. in German and Comparative Media Analysis and Practice.

Health Policy

DIRECTOR Stacie Dusetzina

DIRECTOR OF GRADUATE STUDIES Stacie Dusetzina

PROFESSORS Muktar Aliyu, Laura M. Beskow, Melinda J.B. Buntin, Velma McBride Murry, Wayne Ray, William Schaffner, David Stevenson

ASSOCIATE PROFESSORS Stacie Dusetzina, John Graves, Carlos Grijalva

ASSISTANT PROFESSORS Carolyn Audet, Carrie Fry, Kevin Griffith, Laura M. Keohane, Ashley Leech, Marie H. Martin, Andrew Wiese

RESEARCH PROFESSORS, Melissa McPheeters

RESEARCH ASSISTANT PROFESSORS Margaret Adgent, Tiffanie M. Markus, Christine C. Whitmore

ASSOCIATE IN HEALTH POLICY Catherine M. Hammack

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [HPOL](#)

The Health Policy Ph.D. program trains students in using interdisciplinary methods to address a wide range of health policy and health service challenges in the United States. Students will develop skills in critical review, study design, analysis, proposal development, and professional development. During their coursework, students will have access to top faculty, nationally recognized leaders in Health Policy. They will also have interdisciplinary training in relevant techniques from disciplines including economics, biostatistics, informatics, and epidemiology, as well as hands-on experience in proposal development, research, and teaching. Graduates will be prepared to work in elite academic, private sector, and governmental settings as part of multidisciplinary teams.

Ph.D. students in the Health Policy Program are required to complete 72 credit-hours of methods curriculum, content-area courses, scientific writing, and ethics in health services research. In the first two years students will complete core coursework, including interdisciplinary courses according to their selected sequence in epidemiology, economics, or social sciences. Students will complete qualifying exams the end of their second year and will participate in Health Policy seminar and focus on their dissertation research, along with pursuing other relevant research opportunities in years three and four.

Hearing and Speech Sciences

CHAIR Anne Marie Tharpe

VICE CHAIR OF GRADUATE STUDIES Todd A. Ricketts

ASSOCIATE DIRECTOR OF GRADUATE STUDIES, PH.D. PROGRAM Melissa C. Duff

PROFESSORS EMERITI Daniel H. Ashmead, Fred H. Bess, Edward G. Conture, D. Wesley Grantham, R. E. Stone Jr., Robert T. Wertz

PROFESSORS James W. Bodfish, Stephen M. Camarata, René H. Gifford, Troy Hackett, Linda J. Hood, Gary P. Jacobson, Todd A. Ricketts, C. Melanie Schuele, Anne Marie Tharpe, Mark T. Wallace

ASSOCIATE PROFESSOR EMERITA Judith Rassi

ASSOCIATE PROFESSORS Michael de Riesthal, Melissa C. Duff, Mary Sue Fino-Szumski, P. Lynn Hayes, Benjamin W. Y. Hornsby, Barbara H. Jacobson, Ramnarayan Ramachandran, Stephen M. Wilson

RESEARCH ASSOCIATE PROFESSOR Alexandra Key

ADJUNCT ASSISTANT PROFESSORS: Linda Auther, Lisa de la Mothe, Andrew Dittberner, Kiara Ebinger

ADJUNCT ASSOCIATE PROFESSORS: Devin McCaslin, Micah Murray

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [HRSP](#)

The Ph.D. degree normally requires four to five years of study with a minimum of 72 graduate credit hours (24 of which can be by transfer). There are no foreign language requirements. The student must complete 12 hours of course work in statistics and research methodology and demonstrate research accomplishments (e.g., conference abstract or presentation, manuscript submission) prior to the dissertation and, prior to graduation, meet the departmental publication and external funding submission requirements. Laboratory work throughout the program and a teaching experience are also required as part of training. Doctoral candidates also present a minor of not less than 12 hours taken outside the department or from another subject area in hearing, speech, and language. The final year of the program is typically devoted to the dissertation

This department also offers the doctorate of audiology (Au.D.), master of education of the deaf (M.D.E.), and the master of science in speech-language pathology (M.S.) through the School of Medicine.

The teaching, clinical, and research programs of the department are housed primarily in Vanderbilt's Bill Wilkerson Center. For further information, visit medschool.vanderbilt.edu/hearing-speech/.

History

CHAIR Edward Wright-Rios

DIRECTOR OF UNDERGRADUATE STUDIES Thomas Alan Schwartz

DIRECTOR OF UNDERGRADUATE STUDIES FOR LAW, HISTORY, AND SOCIETY Thomas Alan Schwartz

DIRECTOR OF GRADUATE STUDIES Jefferson Cowie

PROFESSORS EMERITI Richard J. M. Blackett, David Lee Carlton, Paul K. Conkin, James A. Epstein, Jimmie L. Franklin, Matthew Ramsey, V. Jacque Voegeli, Donald L. Winters, Francis W. Wcislo

PROFESSORS Celia Applegate, Michael D. Bess, David Blackburn, William Caferro, Jefferson Cowie, Katherine B. Crawford, Dennis C. Dickerson, Marshall C. Eakin, Gerald Figal, Leor Halevi, Joel F. Harrington, Yoshikuni Igarashi, Sarah Igo, Peter Lake, Jane Gilmer

Landers, Thomas McGinn, Moses Ochonu, Thomas Alan Schwartz, Helmut Walser Smith, Arleen M. Tuchman, Daniel H. Usner Jr., David J. Wasserstein, Rhonda Y. Williams, Edward Wright-Rios

ASSOCIATE PROFESSORS Ari Bryen, Celso Castilho, Lauren Clay, Emily Greble, Paul A. Kramer, Peter Lorge, Catherine Molineux, Ruth Rogaski, Samira Sheikh

DEGREES OFFERED: Master of Arts, Doctor of Philosophy

COURSES OFFERED: [HIST](#)

Master of Arts

The Department of History does not accept external applications for a terminal master's degree. The M.A. is usually earned en route to the Ph.D. It is also available to Vanderbilt undergraduates who enroll in Vanderbilt's 4+1 program.

Doctor of Philosophy

The Ph.D. requires 72 hours of graduate credit, including 45 quality hours.

All candidates for the Ph.D. must demonstrate a reading knowledge of a foreign language or languages. In U.S. and British history, one language is required. In all other fields, the minimum is two. Students are expected to develop proficiency in any languages required for their dissertation research.

The first two years in the Ph.D. program are devoted to taking classes, writing two substantial research papers, passing the necessary language examination(s), and preparing for the qualifying examination. A full list of graduate history courses is available in the courses section of this catalog. All first-year students take a two-semester introduction to methods and research, History 6100 and 6110. These courses are designed to familiarize students with a range of theoretical and methodological approaches. Each second-year student, in consultation with his or her adviser and the director of graduate studies, chooses a Ph.D. Committee, consisting of the dissertation director, two other members of the Graduate Faculty from the Department of History, and one from outside the department, either at Vanderbilt or at another university.

Students take their qualifying examination either in the spring of the second year or fall of the third year. The examination is administered by the student's Ph.D. committee. *Note:* the examination cannot be scheduled until the student has 30 quality hours, with at least a *B* average and no incompletes, and has met the language requirement. When the student has passed the qualifying examination, the Ph.D. committee shall recommend to the Graduate School that the student be admitted to candidacy for the Ph.D.

The Vanderbilt history program does not have predetermined fields of study. In consultation with their adviser and the director of graduate studies, students define a major field and two minor fields that meet their interests and needs. The major field is typically defined as a long time span and either a regional or a national geographic framework (for example, Europe 1600–1789 or modern Germany). A large topical field such as legal history, economic history, the history of race and diaspora, modern medical history, or the Reformation may also be appropriate. One of the minor fields may be a subfield of the major field, defined by topic and/or geography. An example would be a major field on modern Latin America combined with a minor field on Brazil. The other minor field must be distant from the major field in terms of topic, chronology, and/or geography. Typically, this field will have theoretical, cross-cultural, and/or interdisciplinary components (e.g. comparative slavery, postcolonial theory and history, comparative nationalisms). This field may be primarily based in a department other than history or in an interdisciplinary program that trains students at the graduate level.

In the third year, all students take History 8200, which aids students in preparing the dissertation prospectus and

beginning work on the dissertation itself. The dissertation prospectus is approved through an oral examination conducted by members of the student's Ph.D. committee. The spring term schedule includes History 6300 (The Art and Craft of Teaching History), an introduction to teaching methods and teaching practicum designed to familiarize students with techniques for lecturing, leading discussions, designing examinations, and grading undergraduates.

From the fourth year forward, students will normally enroll in History 9999, Dissertation Research, each semester they are in residence.

The dissertation should be completed within four years after admission to candidacy for the Ph.D. The candidate will defend the dissertation at a public examination conducted by the Ph.D. committee.

History of Art and Architecture

CHAIR Kevin D. Murphy

DIRECTOR OF GRADUATE STUDIES Sheri Shaneyfelt

DIRECTOR OF UNDERGRADUATE STUDIES Sheri Shaneyfelt

PROFESSORS EMERITI Robert A. Baldwin, Vivien Green Fryd, F. Hamilton Hazlehurst, Robert L. Mode, Ljubica D. Popovich

PROFESSORS Leonard Folgarait, Christopher M. S. Johns, Kevin D. Murphy

ASSOCIATE PROFESSORS Tracy Miller, Elizabeth J. Moodey, Betsey A. Robinson

ASSISTANT PROFESSORS Mireille M. Lee, Rebecca K. VanDiver

ASSISTANT PROFESSOR OF THE PRACTICE Matthew Worsnick

MELLON ASSISTANT PROFESSOR Heeryoon Shin

PRINCIPAL SENIOR LECTURER Sheri Shaneyfelt

DEGREE OFFERED: Master of Arts

COURSES OFFERED: [HART](#)

The Department of History of Art and Architecture offers an M.A. program with two tracks, in History of Art and in Architecture and the Built Environment. The department does not accept external applications for a terminal master's degree. The M.A. is available only to Vanderbilt undergraduates who enroll in the department's 4+1 combined B.A./M.A. program.

The Department of History of Art and Architecture treats critically the major fields in world art and architecture, from ancient to contemporary, and serves to connect the arts to the other humanities. Many students will use the program in history of art or architecture and the built environment as a foundation for careers in which analytical reading and writing skills gained in the major are especially valued: as the basis for advanced training in professional schools (such as architecture, law, medicine, journalism, and business), for postgraduate work in history of art, architecture, urban studies, and related fields, and for employment in galleries, museums, or design-centered fields. A major goal of the department is to help students become readers of visual images and material culture throughout their lives, as well as to encourage visual approaches to learning.

Interdisciplinary research is fundamental to history of art and the study of architecture and the built environment, and graduate students are encouraged to pursue courses in other departments, programs, and schools: African American and Diaspora Studies, American Studies, Art, Asian Studies, Biological Sciences, Cinema and Media Arts, Classical and Mediterranean Studies, Communication of Science and Technology, Communication Studies, Earth and Environmental Sciences, English, European Studies, French and Italian, History, Jewish Studies, Mathematics,

Medicine, Health and Society, Neuroscience, Philosophy, Physics, Political Science, Psychology, Public Policy Studies, Religious Studies, Russian and East European Studies, Sociology, Spanish and Portuguese, Theatre, and Gender and Sexuality Studies (College of Arts and Science); Musicology and Ethnomusicology (Blair School of Music); Human and Organizational Development (Peabody College); and Civil Engineering, Computer Science, Engineering Science, Environmental Engineering, and Mechanical Engineering (School of Engineering).

The History of Art and Architecture 4+1 program allows outstanding students to complete a B.A. and M.A. in five years. It is available to current Vanderbilt undergraduate students majoring or minoring in History of Art or Architecture and the Built Environment, as well as students in related fields who have completed significant course work in the discipline. Students will be provisionally admitted to the 4+1 program only by approval of the department.

Typically, a 4+1 student will work closely with the undergraduate adviser to ensure that all B.A. requirements will be fulfilled, and then register for 3 to 6 credit hours of graduate course work in the senior year, in consultation with the director of graduate studies (DGS). Accepted students receive registration priority in order to complete the B.A. and begin M.A. requirements. Students will work with the DGS and other faculty advisers to design a program of study that addresses their academic interests and career goals. The average load per semester as a graduate student in the fifth year is 9-12 credit hours. Most 4+1 students engage in research, internships, or travel in the summer between their fourth and fifth years.

With the approval of the DGS, up to 3 courses in the M.A. program may be undergraduate courses at the 2000-level and above, with added work for graduate credit.

Track in History of Art

The track in History of Art prepares students for advanced graduate studies, careers in artistic and historical institutions. Students will acquire and demonstrate expertise in the discipline while having opportunities also to explore interdisciplinary studies.

A minimum of 30 didactic (letter-graded) credit hours is required for the master's degree in History of Art. This includes enrollment in at least 24 credit hours of course work, plus 3 credit hours in method, theory, historiography, and professional practice [HART 6010 The Methods of Art History], and 3 credit hours preparing a Qualifying Paper [HART 6999]. Of the 24 credit hours of formal course work, 15 must be taken in History of Art and Architecture. Courses in other departments shall be counted with approval of the director of graduate studies.

Track in Architecture and the Built Environment

The track in History of Art prepares students for advanced graduate studies and careers in artistic and historical institutions. Students will acquire and demonstrate expertise in the discipline while having opportunities also to explore interdisciplinary studies.

A minimum of 30 didactic (letter-graded) credit hours is required for the master's degree in Architecture and the Built Environment, with course work distributed as follows:

1. Four core courses in HART: 12 credit hours in history of architecture, design, landscape, or urbanism at the 5000- level or above, selected from HART 5100, 5110, 5112, 5120, 5140, 5150, 5172, 5174, 5240, 5252, 5270, 5285, 5290, 5740, 5757, 5780, 5782, 5810, 5815, 6010, 6265, 6740, and CLAS 5250.
2. Four elective courses: 12 credit hours selected from any HART courses listed above or in related fields, chosen in consultation with the A maximum of two elective courses may be taken from any one department (with the exception of History of Art and Architecture).
3. One HART course (3 credit hours) in method, theory, historiography, and professional practice [HART 6010 The Methods of Art History].
4. Qualifying Paper (3 credit hours) under the supervision of a HART faculty member [HART 6999].

Human Genetics

DIRECTOR David Samuels

DIRECTOR OF GRADUATE STUDIES Todd Edwards

ASSOCIATE DIRECTOR OF EDUCATION Douglas Mortlock

PROFESSORS Thomas Aune, H. Scott Baldwin, Seth Bordenstein, Kendal Broadie, Ellen Wright Clayton, Nancy Cox, James Crowe, Joshua Denny, Digna Velez Edwards, Katherine Friedman, Rizwan Hamid, Carl Johnson, MacRae Linton, James G. Patton, John A. Phillips III, Dan Roden, Antonis Rokas, Michelle Southard-Smith, Laurence J. Zwiebel

ASSOCIATE PROFESSORS Melinda Aldrich, Jennifer Below, Milam Brantley, Lea Davis, Todd Edwards, Antonis Hatzopoulos, Timothy Hohman, Ela Knapik, Bingshan Li, Chor Yin (Maggie) Ng, Douglas Ruderfer, David Samuels, Jeffrey Smith, James S. Sutcliffe

ASSISTANT PROFESSORS Ruben Martinez Barricarte, Alexander Bick, Eric Gamazon, Reyna Gordon, Emily Hodges, Douglas Mortlock, Bryan Venters, Quinn Wells

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [HGEN](#)

The overall goal of the Human Genetics Ph.D. degree program is to provide students with a solid foundation for a career in genetics research and teaching. Training is available in human genetic analysis and in genetic analysis of model systems that contribute to our understanding of human disease. The training combines a prescribed set of basic courses intended to ground students in the fundamentals of genetic analyses, the basics of human genetics, a set of elective courses designed to meet individual needs, and a rigorous research experience that will contribute to the field of genetics. Students completing the requirements of the Ph.D. program in Human Genetics will have demonstrated mastery of knowledge in genetics and contributed substantial and original scientific knowledge to the field.

Ph.D. students in the Human Genetics program are required to complete a minimum of 30 credit hours of formal course work, consisting of 24 hours of required course work and 6 hours of electives. One of the required courses will be a statistics course to be chosen from several currently available on campus and approved by the program faculty. Students will take a minimum of 6 hours of didactic classes per semester during their first two years of study. It is expected that during the second year at least one semester will exceed this minimum in order to complete the required courses prior to year three of study. The electives come from an approved list of advanced genetics courses and the choice of these courses will be based on the individual student's research interests.

Interdisciplinary Graduate Program in Biomedical Sciences

COURSES OFFERED: [IGP](#)

Eleven programs participate in the Interdisciplinary Graduate Program: [Biochemistry](#), [Biological Sciences](#), [Cancer Biology](#), [Cell and Developmental Biology](#), [Molecular Pathology and Immunology](#), [Chemical and Physical Biology](#), [Microbe-Host Interactions](#), [Molecular Physiology and Biophysics](#), [Neuroscience](#), [Pharmacology](#), and [Human Genetics](#). During their first year, students take a core curriculum and conduct research in four laboratories before selecting the discipline in which they will earn the Ph.D. degree. Additional course work during subsequent years is appropriate to each discipline and the student's interests.

Ph.D. dissertation research may be conducted in any one of over 250–300 laboratories. Research opportunities are available in the following areas: biochemistry, biological sciences, cancer biology, cell biology, developmental biology, genetics, microbiology, immunology, pharmacology, molecular biology, molecular pathology, molecular toxicology, molecular neuroscience, reproductive biology, signal transduction, structural biology, molecular biophysics, and vascular biology.

Interdisciplinary Materials Science

DIRECTOR D. Greg Walker

DIRECTOR OF GRADUATE STUDIES D. Greg Walker

PROFESSORS EMERITI Jimmy L. Davidson, George T. Hahn, Donald L. Kinser, Taylor G. Wang, James E. Wittig

PROFESSORS Douglas Adams, David E. Cliffel, Peter Cummings, Craig L. Duvall, Daniel M. Fleetwood, Todd D. Giorgio, Scott A. Guelcher, Richard F. Haglund, Timothy P. Hanusa, G. Kane Jennings, Paul Laibinis, Deyu Li, Clare McCabe, Robert Reed, Sandra Rosenthal, Florence Sanchez, Ronald D. Schrimpf, Norman Tolk, Kalman Varga, Sharon Weiss, David W. Wright

ASSOCIATE PROFESSORS Leon M. Bellan, Joshua Caldwell, Janet Macdonald, Bridget R. Rogers, Jason G. Valentine, D. Greg Walker, Yaqiong Xu

ASSISTANT PROFESSORS Lauren Buchanan, Kelsey Hatzell, Piran Kidambi, Justus Ndukaife, John T. Wilson

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [IMS](#)

Material advancements improve the standard and the quality of living of societies everywhere. They are indeed the underpinning of the development of new technologies with the potential for global impact. In today's sophisticated and complicated world, continued advancements in materials demand intimacy among a variety of disciplines. In recognition of this multidisciplinary need, professors at Vanderbilt University from departments of Chemistry, Physics, Biomedical Engineering, Chemical and Biomolecular Engineering, Electrical Engineering, Mechanical Engineering, and Civil Engineering, and School of Medicine have come together in the Interdisciplinary Materials Science program. Therefore, extensive collaboration in both the teaching of and research in materials science is pervasive, where multidisciplinary study is a hallmark of the educational experience.

The M.S. degree in materials science requires a minimum of 24 semester hours (beyond the baccalaureate) of formal course work plus a thesis of at least 6 semester hours. Nine semester hours are a selection of three of the four Materials Science core program courses. The core courses are Thermodynamics, Materials Chemistry, Atomic Arrangements in Solids, and Solid State Physics of Condensed Matter. Six additional hours are taken from an approved list of Interdisciplinary Materials Science program courses. A minor consisting of 6 semester hours is chosen in a separate but related field. The remaining 3 hours are an elective selected from either Interdisciplinary Materials Science program offerings or a related field.

The Ph.D. degree in materials science requires a total of 72 semester hours (beyond the baccalaureate) plus a dissertation. Within the requirement is a minimum of 24 semester hours of course work that includes 12 hours from the materials science core curriculum and 12 hours from an approved list of Interdisciplinary Materials Science program courses. The intent of these courses is to complement the student's technical interests. The remaining semester hours may be in research dissertation hours or in additional course electives.

Japanese

JAPANESE LANGUAGE SENIOR LECTURER Hideko Shimizu

LECTURERS Nozomi Imai, Asami Nakano

COURSES OFFERED: [JAPN](#)

Students should consult with the chair of Asian Studies and their home department advisers about the acceptability of Japanese courses for their program of study. Courses are not designed for advanced native speakers.

Jewish Studies

ASSISTANT PROFESSOR OF THE PRACTICE Mazalit Haim

LECTURER Judy Klass

CERTIFICATE OFFERED: JEWISH STUDIES

DEGREES OFFERED: See [Religion, Master of Arts](#)

COURSES OFFERED: [JS](#)

Jewish Studies at Vanderbilt offers an interdisciplinary academic program that seeks to facilitate the critical study of Jewish history, religion, language, philosophy, politics, culture, society, music, art, and literature across continents and eras, and to situate this study in relation to the world in the present. The program accesses the resources of the entire university to explore Judaism, its evolution and expression from biblical times onwards.

Students interested in graduate instruction in Jewish studies have the option of pursuing a master of arts in Jewish studies through the Graduate Department of Religion, or a graduate certificate in Jewish studies through the Program in Jewish Studies.

Graduate Certificate in Jewish Studies

The certificate in Jewish studies provides graduate and professional students with access to interdisciplinary scholarship in the field of Jewish studies, supplies them with a valuable professional credential, and strengthens their ability to compete for jobs as well as for national fellowship and postdoctoral awards.

Any student enrolled in a graduate or professional program at Vanderbilt University is eligible to apply for the certificate in Jewish studies. Acceptance to the program requires a minimum cumulative GPA of 3.3, and the approval of both the student's primary adviser and the director of the Program in Jewish Studies.

Courses taken at Vanderbilt University prior to admission to the certificate program may be counted toward the certificate requirements with the approval of the director of the Program in Jewish Studies.

Students wishing to enroll must complete an Intent to Enroll form, which must be signed by the student, the director of the Program in Jewish Studies, and the director of the graduate program (DGS) for the degree program in which the student is enrolled. A signed copy of the form must be submitted to the Graduate School (graduateschool@vanderbilt.edu) and to the Office of the University Registrar (university.registrar@vanderbilt.edu).

A certificate in Jewish studies is awarded with either the M.A. or Ph.D. degree upon fulfillment of the following requirements:

1. *Foundational Course, 3 credit hours.* JS 5000, Major Themes in Jewish Studies. As this course is not offered every year, students may petition to have this requirement waived. If this requirement is waived, students will be required to take an additional 3 credit hours under requirement 2.
2. *Focus Courses, 15 credit hours.* Students must complete 15 credit hours of interrelated courses in Jewish studies, appropriate to the student's program of study and forming an intellectually cohesive whole (or 18 credit hours, if the requirement to take JS 5000 is waived). Students are required to complete at least one course from three of four subfields, with at least 9 credit hours coming from a single subfield:
 - Area 1: Biblical Studies
 - Area 2: Antiquity and Medieval World
 - Area 3: Modern and Contemporary Experience
 - Area 4: Culture, Philosophy, and Literature

Courses listed below are approved for certificate credit. Other courses not on this list must be approved for credit by the director of the Program in Jewish Studies. Any courses at the 2000- or 3000-level also require instructor permission to enroll and arrangements for additional work beyond the undergraduate requirements.

No more than 6 credit hours of specifically named courses required for the primary degree may be applied toward the certificate.

3. A non-credit final project/paper submitted to the Jewish Studies steering committee that demonstrates an application of Jewish studies contents or methodology to research, teaching, or fieldwork. The project/paper may originate as an assignment in a graduate-level course.

Approved List of Courses

LANGUAGE: Jewish Studies: 5301, Jewish Language and Paleography. Classics: 6300, Akkadian. Hebrew (Modern Hebrew): 1101-1102, Elementary Hebrew; 2201-2202, Intermediate Hebrew; 3851-3852; Independent Study in Modern Hebrew; 5111, Hebrew for Graduate Reading; 5301, Advanced Hebrew Grammar; 5302, Advanced Hebrew Composition. Religion: 2514, Elementary Modern Hebrew I; 2515, Elementary Modern Hebrew II; 3102, Intermediate Modern Hebrew I; 3103, Intermediate Modern Hebrew II; 5101-5102, Elementary Biblical Hebrew; 5120, Intermediate Biblical Hebrew.

AREA 1. BIBLICAL STUDIES: Jewish Studies: 5100, The New Testament in Its Jewish Contexts. English: 3370, The Bible in Literature. Music Literature: 2310, The Bible and Music. Religious Studies: 5225, Sexuality in the Hebrew Bible and the Ancient Near East; 5926, Ancient Goddesses; 5938, Marriage in the Ancient Near East and the Hebrew Bible. Religion: 3109, Exilic Prophecy; 3111, The Pentateuch; 3112, Apocalyptic; 3113, The Wisdom Literature of the Ancient Near East; 3117, The Ethics of Ancient Israel; 3124, Esther and Ruth; 3127, Cultures of Ancient Near East; 3128, Jewish Messianism; 3129, Book of Judges; 3130, Book of Jeremiah; 3131, Voices of Women in the Ancient Near East; 3142, The Old Testament in Greek; 6177, Song of Songs; 6500, The Hebrew Bible; 6501, Literary Analysis of the Hebrew Bible; 6502, Leadership in Hebrew Bible; 6503, Seminar in the History of Ancient Israel; 6504, Modern Interpreters of Ancient Israel; 6505, Biblical Law and Ancient Israel; 6506, Politics and the Economy in Ancient Israel; 6510, Empire and Canon; 6511, Book of Genesis; 6513, The Book of Exodus; 6515, The Book of Deuteronomy; 6516, The Book of Numbers; 6517, Book of Joshua; 6518, Book of Job; 6519, Book of Qoheleth; 6520, Book of Daniel; 6522, Sexuality in the Hebrew Bible and ANE; 6524, Literature of the Ancient Near East; 6525, Ancient Goddesses; 6528, Book of Amos; 6529, Eighth-Century Prophecy; 6575, Old Testament Theology; 6580, West Semitic Inscriptions; 6609, Feminist Interpretations of Scripture; 9200, Reading Course in Hebrew Bible.

AREA 2. ANTIQUITY AND THE MEDIEVAL WORLD: Jewish Studies: 2600, Islam and the Jews; 5150, Issues in

Rabbinic Literature; 5210, Reading across Boundaries: Jewish and Non-Jewish Texts; 5620, Jews in Egypt; 5640, Jews and Greeks; 5892, Topics in Ancient and Medieval Jewish History. Anthropology: 8230, The Collapse of Civilizations. Classics: 5010, The Ancient Origins of Religious Conflict in the Middle East; 5100, History of the Ancient Near East; 5120, Greece and the Near East from Alexander to Theodosius; 5160, History of Roman Empire. History: 3210, Muslims, Christians, and Jews in Medieval Spain; 5160, Medicine in Islam; 5170, Islam and the Crusades. History of Art: 5260, The Art of Pagans, Christians, and Jews. Philosophy: 2101, Hellenistic and Late Ancient Philosophy; 2102, Medieval Philosophy. Religion: 3150, Lives of Jesus: Ancient and Modern; 3151, Jesus and the Early Christian Communities; 3156, Jewish and Christian Self- Definition; 3501, Judaism in New Testament Times; 6526, Jewish Life in Persian Egypt; 6527, Hellenistic Jewish Literature; 6608, Jewish/Christian Relation; 6794, Art of Pagans, Christians, and Jews. Religious Studies: 4554, The Qur'an and Its Interpreters.

AREA 3. MODERN AND CONTEMPORARY EXPERIENCE: Jewish Studies: 2400, American Jewish Life; 2450, The Jewish Diaspora; 2500, Modern Israel; 3100, The Holocaust; 3830, Contemporary Jewish Issues; 5300, Modern Jewish Thought; 5540, Power and Diplomacy in the Modern Middle East; 5560, Social Movements in Modern Jewish Life; 5894, Topics in Modern Jewish History. European Studies: 2208, Conspiracy Theories and Rumors in European and U.S. History. History: 3160, Immigration, Race, and Nationality: The American Experience; 5130, Russia: Old Regime to Revolution; 5135, Russia: The U.S.S.R. and Afterward; 5190, Last Empire of Islam; 5300, Twentieth-Century Germany; 2720, World War II; 5885, Cities of Europe and the Middle East. Political Science: 2230, Middle East Politics. Religion: 3502, Judaism and Modernity; 8817, The Holocaust: Its Meanings and Implications; 8822, The Holocaust: Representation and Reflection. Religious Studies: 2210W, Constructions of Jewish Identity in the Modern World; 3229, The Holocaust: Its Meanings and Implications; 4939, Religious Autobiography. Sociology: 3702, Racial and Ethnic Minorities in the United States.

AREA 4. CULTURE, PHILOSOPHY, AND LITERATURE: Jewish Studies: 2210W, Hebrew Literature in Translation; 2230W, American Southern Jews in Life and Literature; 2240W, Black-Jewish Relations in Post-War American Literature and Culture; 2280, Jewish Humor; 2280W, Jewish Humor; 2290W, Imagining the Alien: Jewish Science Fiction; 2420W, American Jewish Music; 5250W, Witnesses Who Were Not There: Literature of the Children of Holocaust Survivors; 5260, Coming of Age in Jewish Literature and Film; 5260W, Coming of Age in Jewish Literature and Film; 5270, Jewish Storytelling; 5270W, Jewish Storytelling; 5320, Freud and Jewish Identity; 5330, Is G-d Guilty? The Problem of Evil in Judaism; 5340, Jewish Philosophy after Auschwitz; 5520, Zionism: Politics, Religion, and Ethnicity; 5000, Major Themes in Jewish Studies. English: 3664, Jewish American Literature. French: 4430, The Struggle of Encounter: The Israeli-Palestinian Conflict in Literature. German: 5445, Nazi Cinema: The Manipulation of Mass Culture; 5344, Women at the Margins: German-Jewish Women Writers. History of Art: 5765, Art since 1945. Music Literature: 2150, Music, Identity, and Diversity. Philosophy: 2109, Twentieth-Century Continental Philosophy; 3005, Jewish Philosophy; 3006, Islamic Philosophy; 3011, Critical Theory. Religion: 3503, The Jewish Heritage; 3505, Jewish Ethics; 8805, Jewish Theories of Religion; 8825, Jewish Animals. Religious Studies: 2220, Jewish Ethics; 2940, Great Books of Literature and Religion; 5270, Jewish Theories of Religion; 5940, The Nature of Evil. Russian: 2434, The Russian Cinema; 5231, Jews in Russian Culture: Survival and Identity. Sociology: 3204, Tourism, Culture, and Place; 3222, Sociology of Religion.

Law and Economics

DIRECTORS Joni Hersch, W. Kip Viscusi

DIRECTOR OF GRADUATE STUDIES Kevin M. Stack

PROFESSORS Kathryn H. Anderson, Joni Hersch, Paige Marta Skiba, Jennifer Bennett Shinall, W. Kip Viscusi

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [LWEC](#)

The Ph.D. Program in Law and Economics combines analytical training in economic theory and methodology with the study of law. This fully-funded, fully-integrated program is designed to allow students to satisfy the requirements for the Ph.D. and J.D. within six years. For students who matriculate with a J.D., the requirements for the Ph.D. can be completed within four years. The Ph.D. degree is designed for students who wish to pursue careers in universities, research institutions, or government.

The program is based in Vanderbilt Law School, and courses are taught by faculty in the Law School and the Department of Economics. Students receive a solid grounding in microeconomic theory, econometrics, and law and economics theory.

Students admitted to the Ph.D. program are required to complete 72 hours of course work and research. This includes a minimum of 48 hours of formal course work in core, field, and elective courses, 6 hours of Ph.D. Workshop in Law and Economics, 12 hours of graduate credit granted for J.D. coursework, and up to 6 hours of research. The core consists of 30 hours in law and economics theory, economic theory, and empirical analysis.

After completing the first year of graduate study, all students must pass a written comprehensive examination based on the core Ph.D. courses.

In year 3 for joint-degree students and year 2 for Ph.D.-only students, students select two fields of concentration from a pre-approved list of fields and begin taking the associated field courses. Currently, the list of identified fields includes behavioral law and economics, labor and human resources, law and economics, and risk and environmental regulation. The program does not offer a field in corporate finance or financial economics. Field requirements include 12 hours of formal course work (6 hours in each field). In some circumstances, and with the consent of the director of graduate studies and program faculty, students are allowed to develop a new field.

Detailed information is available upon request from program staff (email phd.lawecon@vanderbilt.edu) or from the program webpage, law.vanderbilt.edu/phd.

CERTIFICATE OFFERED: LATIN AMERICAN STUDIES

DEGREE OFFERED: Master of Arts

COURSES OFFERED: [LAS](#)

Designated by the U.S. Department of Education as a National Resource Center for Latin America, Vanderbilt's Center for Latin American Studies draws on departmental strengths and faculty expertise from across campus.

Integrating teaching, research, and service, the center maintains substantive collaborations with all of Vanderbilt's colleges and schools. The center has special strengths in Maya studies, Brazilian studies, Andean studies, and the Black Atlantic, as well as unique library collections of Colombiana. Programs of instruction provided by the center promote greater understanding of the region's history, culture, political economy, and social organization and cultivate the ability to think strategically about global issues.

Faculty and courses come from the Departments of Anthropology, Economics, History, History of Art, Political Science, Sociology, and Spanish and Portuguese as well as from Vanderbilt's education, engineering, law, management, medical, music, and nursing schools. The center fosters a lively research community on campus by sponsoring colloquia, conferences, films, and a speaker series that brings distinguished scholars, government and business leaders, and social activists to campus.

Students work toward an M.A. in Latin American studies, a master's or doctoral degree in one of the related programs with an emphasis on Latin American studies, or a certificate in Latin American studies.

Candidates for the M.A. in Latin American studies choose a thesis (30 hours and thesis) or non-thesis (33 hours) option. Each option includes Latin American Studies 5901. The non-thesis option requires 15 hours in one broad area of specialization (history, social sciences, or language and literature), 9 hours in another of those areas of specialization, and 6 hours in additional course work. The thesis option requires 9 hours in one broad area of specialization (history, social sciences, or language and literature), 6 hours in another of those areas of specialization, and 6 hours in additional course work, in addition to 6 hours of thesis research and writing. Candidate for the master's degree must complete four semesters of graduate study as a full-time student. Master's degree candidates are expected to demonstrate advanced language ability in either Spanish, Portuguese, Haitian Creole, or an indigenous Latin American language as well as intermediate ability in another.

Through the Combined B.A./M.A. (4+1) Option, the department offers exceptional students the opportunity to earn both the B.A. and the M.A. in five years. Students will be provisionally admitted to the 4+1 program only by approval of the department. Further information about the program is available from the director of graduate studies.

Requirements for Graduate Certificate in Latin American Studies

The Center for Latin American Studies Graduate Certificate seeks to equip students with a broad, interdisciplinary view of Latin America. The program allows students enrolled in a post-baccalaureate degree program to document their specialization in Latin America and their language proficiency as well as to extend their studies beyond their disciplinary specialization. Students completing the certificate must fulfill the following requirements:

1. Complete at least 12 credit hours of interrelated graduate course work on Latin America, with at least 6 credit hours coming from outside the student's home discipline. No more than 6 credit hours of specifically named courses required for the primary degree may be applied toward the certificate. Graduate courses successfully completed at Vanderbilt prior to admission to the program may be counted toward the certificate requirements, and an undergraduate course may be substituted for a graduate course, with the approval of the director of the program and the Graduate School. All courses must be approved by the assistant director of the Latin American Studies program and form an intellectually cohesive whole.
2. Demonstrate conversational or reading proficiency in Spanish, Portuguese, Haitian Creole, or an indigenous Latin American language. Proficiency will be demonstrated by an oral examination administered by a Vanderbilt professor or lecturer (not a graduate student) following ACTFL (American Council on the Teaching of Foreign Languages) guidelines and resulting in a rating of at least "intermediate-mid."
3. Participate in a minimum of five extracurricular activities sponsored by CLAS. A short paper reflecting on the insights gained from participating must be submitted to the assistant director of CLAS.

Students wishing to enroll must complete an Intent to Enroll form, which must be signed by the student, the director of the LAS Certificate Program, and the director of the graduate program (DGS) for the degree program in which the student is enrolled. A signed copy of the form must be submitted to the Graduate School (graduateschool@vanderbilt.edu) and to the Office of the University Registrar (university.registrar@vanderbilt.edu).

Latin American Studies offers three dual degree programs: MA/MPH, MA/MBA, and MA/MEd in IEPM. Applicants must apply independently to and be accepted by both the Graduate School and the appropriate professional school. The LAS component requires 30 credit hours of course work and a thesis.

See departmental listings for courses offered 2021/2022. The following are specialized courses in the participating programs.

ANTHROPOLOGY: 5106, Culture and Power in Latin America; 5108, Indigenous Peoples of Lowland South America; 5220, Human Landscapes; 5231, Ancient Andean Civilizations; 5603, Comparative Writing Systems; 6122, The Anthropology of Globalization; 6130, Andean Culture and Society; 6140, Myth, Ritual, Belief: The Anthropology of Religion; 6141, Anthropology of Healing; 6143, Medical Anthropology; 6154, Environmental Anthropology; 6200, Ancient Cities; 6202, The Collapse of Civilizations; 6240, Ancient Mesoamerican Civilizations; 6241, The Aztecs; 6242, The Archaeology of the Ancient Maya Civilization; 6243, Classic Maya Religion and Politics; 6250, The Inca Empire; 6620, Maya Language and Literature; 6850-6851, Independent Research; 8000, History of Anthropological Theory I; 8001, History of Anthropological Theory II; 8010, Special Topics: Well-Being, Economics and Culture; 8010, Special Topics: Disease and Adaptation; 8100, Political Violence; 8110, Seminar in Maya Ethnography; 8104, Seminar on Political Economy and Anthropology; 8211, Space, Place, and Landscape; 8220, The Historical Archaeology of Latin America; 8230, The Collapse of Civilizations: General Theories and the Maya Collapse; 8232, Seminar in Mesoamerican Archaeology; 8240, Seminar in South American Archaeology and Ethnohistory; 8311, Violence and Its Embodiments in the Past and Present.

ECONOMICS: 7910, Seminar: Research Economic Development; 7920, Seminar: Research Economic Development.

HAITIAN CREOLE: 5101, Elementary Creole I; 5102, Elementary Creole II; 5201, Intermediate Creole I; 5202, Intermediate Creole II.

HISTORY: 5450, Reform, Crisis, and Independence in Latin America, 1700-1820; 5460, Colonial Mexico; 5470, Modern Mexico; 5480, Central America; 5490, Brazilian Civilization; 5510, Reform and Revolution in Latin America; 5530, African Religions in the Americas; 5535, Latin America and the United States; 5540, Race and Nation in Latin America; 5570, Caribbean History, 1492-1983; 6500, Readings in Colonial Latin America; 6510, Readings in Modern Latin American History; 8600, Comparative Slavery in the Colonial Americas; 8610, Atlantic World History, Fifteenth to the Nineteenth Century; 8620, Studies in Latin American History; 8630, Research Seminar in Latin American History.

K'ICHE' MAYAN LANGUAGE: 5101, Elementary K'iche' I; 5102, Elementary K'iche' II; 5201, Intermediate K'iche' I; 5202, Intermediate K'iche' II.

LAW: 7064, Comparative Law: Europe, Latin America and East Asia; 7128, Crossing Borders in Law and Literature; 7266, International Criminal Law; 7291, International Trade Short Course; 8101, International Mergers and Acquisitions Short Course.

MEDICINE, HEALTH, AND SOCIETY: 7313, Introduction to Medical Anthropology; 7316, Case Studies in Tropical Diseases.

NURSING: 5105, Enhancing Community and Population Health I; 5205, Enhancing Community and Population Health II; 5305, Enhancing Community and Public Health III; 6080, Interdisciplinary Topics in Global Health; 8072, Addressing Global Health Disparities: An Interdisciplinary Perspective.

POLITICAL SCIENCE: 5213, Democratization and Political Development; 5219, Politics of Mexico; 6228, International Politics of Latin America; 8315, Research in Latin American Politics; 8317, The Political Economy of Development.

PORTUGUESE: 5203, Intermediate Portuguese; 5301, Portuguese Composition and Conversation; 5302, Brazilian Pop Culture; 5303, Introduction to Luso-Brazilian Literature; 5350, Brazilian Culture through Native Material; 5420, Brazilian Literature through the Nineteenth Century; 5425, Modern Brazilian Literature; 5850, Independent Study; 5892, Special Topics in Portuguese Language, Literature, or Civilization; 7050, Introduction to Latin American Colonial Studies; 7070, Spanish American and Brazilian Literature I; 7071, Spanish American and Brazilian Literature II; 8200, Seminar: Studies in Colonial Literature; 8210, Seminar: Hispanic American Essay; 8400, Seminar: Studies in

In addition, qualified graduate students in the Latin American Studies program may, with appropriate permission, enroll in Special Topics (5891) courses directly relating to Latin America.

Latino and Latina Studies

DIRECTOR Celso Castillo

FACULTY DIRECTOR Lorraine López

CERTIFICATE OFFERED: LATINO AND LATINA STUDIES

COURES OFFERED: [LATS](#)

Latino and Latina Studies focuses on cultural production and political and socioeconomic experiences of people inculcated with the US experience, self-identifying as Latinx, and communicating primarily in English and sometimes in Spanish. The LATS graduate certificate will examine this enduring and dynamic population that crosses and re-crosses borders constructed by geography, linguistics, class, race, and gender. This program of study is designed to accommodate a range of voices and multiple manifestations of Latinx identity and cultural expression in historical and contemporary contexts to fill in this vital but often overlooked component of our national identity and discourse.

Students pursuing a LATS graduate certificate are expected to obtain language competence in Spanish before completing the program, though they do not need to meet this requirement when applying for the certificate.

Students may satisfy this requirement by completing SPAN 3303, or any other course with a higher number taught in Spanish, or an oral or written exam administered by the program.

Any student enrolled in a graduate program at Vanderbilt is eligible to apply for the certificate in Latino and Latina studies. Acceptance in the program requires the approval of the student's primary adviser and the director of the Program in Latino and Latina Studies, Gretchen Selcke. Graduate courses successfully completed at Vanderbilt University prior to admission to the program may be counted toward the certificate requirements with the approval of the director of the program. An undergraduate course may be substituted for a graduate course required by the program's curriculum with the approval of the director of the program and the Graduate School.

Students wishing to enroll must complete an Intent to Enroll form, which must be signed by the student, the director of the LATS Certificate Program, and the director of the graduate program (DGS) for the degree program in which the student is enrolled. A signed copy of the form should be submitted to the Graduate School (graduateschool@vanderbilt.edu), to the Office of the University Registrar (URO) (university.registrar@vanderbilt.edu), and to the LATS program administrator.

Requirements for the Graduate Certificate in Latino and Latina Studies

A certificate in Latino and Latina studies is awarded with either the M.A. or Ph.D. degree upon fulfillment of the following requirements: (1) Completion of at least 12 (M.A.) or 15 (Ph.D.) credit hours of interrelated course work across two or more disciplines. Two courses, LATS 2201/5201 or ENGL 3658 and LATS 5961, are required. Remaining courses must be taken in at least two different disciplines outside of students' home department, with no more than two courses (6 credit hours) coming from any one discipline. We strongly encourage students to take as wide a range of courses as possible appropriate to the student's program of study and forming an intellectually cohesive whole. Up to 6 credit hours of specifically named required courses from a student's primary degree program may count toward the certificate. Courses must be approved for credit by the LATS director. One course (3 credit hours) may be satisfied through an independent study with a faculty member affiliated with the Latino and Latina Studies program, with the approval of the director of Latino and Latina Studies. (2) Completion of two papers or projects demonstrating the application of concepts related to Latino and Latina studies framework or methodology to research, teaching, or fieldwork.

Leadership and Policy Studies

CHAIR Carolyn Heinrich

ASSOCIATE CHAIR Brenda McKenzie

DIRECTOR OF GRADUATE STUDIES Sean Corcoran

PROFESSORS EMERITI Robert Dale Ballou, John M. Braxton, Robert Crowson, James W. Guthrie, Stephen Heyneman, Joseph Murphy

PROFESSORS Ellen B. Goldring, Jason Grissom, Carolyn Heinrich, Will Doyle

ASSOCIATE PROFESSORS Felipe Barrera-Osorio, Sean P. Corcoran, Shaun Dougherty, Brent Evans, Christopher Loss, Claire E. Smrekar, Chezare Warren

PROFESSORS OF THE PRACTICE Mark D. Cannon, Christine Quinn Trank

ASSOCIATE PROFESSORS OF THE PRACTICE Marisa Cannata, Xiu Cravens, Susan Douglas, Brian L. Heuser, Catherine G. Loss, Brenda McKenzie

RESEARCH ASSISTANT PROFESSOR Mollie Rubin

ASSISTANT PROFESSORS Christopher Candelaria, Joanne W. Golann, Matthew Shaw, Kelly Slay, Adela Soliz

DEGREE OFFERED: EDUCATIONAL LEADERSHIP AND POLICY, Doctor of Philosophy; HIGHER EDUCATION LEADERSHIP AND POLICY, Doctor of Philosophy

COURSES OFFERED: [LPO](#)

The mission of the Department of Leadership, Policy, and Organizations (LPO) is to increase understanding and guide improvements in human learning and outcomes, in the political, economic, organizational, social, legal and regulatory contexts in which human development occurs. In our research, teaching and research-practice collaborations, the department embraces a range of disciplinary traditions and methodological approaches and fosters diversity in the study of education leadership, policy, and practice.

LPO's doctoral-level program in leadership and policy studies offers concentrations in K-12 Leadership and Policy and Higher Education Leadership and Policy. Students focus on their selected area of inquiry throughout the program, and are expected to conduct research, present papers at national academic conferences, and publish in academic journals.

The Ph.D. program is designed for those who intend to build a career focused on the study of education and policy, as researchers, professors, and policy analysts. It is a full-time, four- to five-year program that equips its graduates with the knowledge and methodological tools to conduct cutting-edge research on the pressing educational issues of the day. Students learn to examine education problems through the lenses of economics, political science, sociology, and history. All students are expected to develop strong statistical and data analysis skills, and a thorough understanding of causal inference, while developing expertise in other tools of social science, including experimental and quasi-experimental design, survey research methods, and qualitative research methods.

At the heart of the program is the mentor-apprentice model, where students work on research projects alongside a collection of esteemed faculty. As part of their course work and apprenticeship experiences, students learn to present papers at scholarly conferences and submit journal articles for publication.

Transfer Hours: Up to 24 hours of transfer credit may be accepted in consultation with the student's adviser.

Total Required Hours: 72 hours

Educational Leadership and Policy

Areas of study include educator labor markets, accountability, developing teachers and improving instruction, leadership and governance, educational equity, work force impacts, school finance, school choice, evaluation of education policies and programs, career and technical education, and school reform.

Higher Education Leadership and Policy

Areas of study include student access to higher education, student financial aid, higher education finance, student transitions, student persistence and success, and state higher education policy innovations.

Requirements for All Specializations

I. Social Science Core Requirements (12 hours)

Politics of Education

Sociology of Education

Economics of Education

History of Education

II. PhD Specialty Research Seminars (9 hours)

Education Leadership and Policy

Higher Education Leadership and Policy

III. Research Tools (18 hours)

Research Design and Methods for Education Policy

Statistical Methods for Education Research

Regression Analysis I

Regression Analysis II

Causal Inference

Qualitative Research Methods

IV. Research Practicum (6 hours)

V. Proseminar (3 hours)

VI. Electives or Transfer Hours (24 hours)

Learning, Teaching, and Diversity

CHAIR Deborah W. Rowe

ASSOCIATE CHAIR Marcy Singer-Gabella

DIRECTOR OF GRADUATE STUDIES Kevin Leander

PROFESSORS David Dickinson, Noel Enyedy, Melissa S. Gresalfi, Rogers Hall, Ilana Horn, Kevin M. Leander, Richard Milner, Deborah W. Rowe

PROFESSORS OF THE PRACTICE Chris Iddings, Lisa Pray, Marcy Singer-Gabella, Anita A. Wager

RESEARCH PROFESSORS Paul A. Cobb, Dale C. Farran, Kathy Ganske, Robert Jimenez, Richard Lehrer, Leona Schauble

ASSOCIATE PROFESSORS Amanda Goodwin, Ebony O. McGee

ASSOCIATE PROFESSORS OF THE PRACTICE Molly Collins, Shannon Daniel, Andrew Hostetler, Melanie Hundley, Heather L. Johnson, Catherine McTamane, Amy Palmeri, Emily Pendergrass, Ann M. Neely

ASSISTANT PROFESSORS Corey Brady, Nicole Joseph, Luis Leyva, Emily Phillips-Galloway, Jessica Watkins

ASSISTANT PROFESSORS OF THE PRACTICE Teresa K. Dunleavy, Elizabeth Self

SENIOR LECTURERS Andrea Henrie, Kristen Neal

DEGREE OFFERED: Doctor of Philosophy

The graduate program in learning, teaching, and diversity offered by the Department of Teaching and Learning is designed for persons who will conduct research on learning and activity and who will pursue careers as education faculty members at research universities. The program admits a very select number of students with strong academic credentials and relevant experience, who are interested in working closely with the faculty in research and development projects.

Programs of study for the doctor of philosophy include 72 class credits distributed between (a) a core set of courses that develops a knowledge base in the areas of learning, teaching, and diversity; (b) a specialization area, selected from Justice and Diversity in Education; Language, Literacy, and Culture; Learning and Design; and Mathematics and Science Education; and (c) quantitative and qualitative research methodology courses.

Students admitted to the doctor of philosophy program in learning, teaching, and diversity may obtain a master of science degree with a major in learning, teaching, and diversity upon completion of 30 semester hours and the completion of either a thesis or the major area paper.

Liberal Arts and Science

DIRECTOR Sheri Shaneyfelt

DEGREE OFFERED: Master of Liberal Arts and Science

COURSES OFFERED: [MLAS](#)

The Master of Liberal Arts and Science degree program offers part-time, adult students the opportunity to earn an interdisciplinary, nontraditional graduate degree.

Each course generally meets one night per week, and students select one course per semester. While the program is designed primarily for personal enrichment, students often discover important professional career benefits as well. The requirements and curriculum provide flexibility in program design and course selection, and the tuition, scheduling, admission, and registration procedures acknowledge the special circumstances of the part-time adult student. Although MLAS students take classes part time, in exceptional circumstances and with written approval from the program director, students may be enrolled full time. International students wishing to attend the MLAS program on certain visas will be required to enroll full time to maintain their visa status.

Specific titles, topics, and instructors of courses are available for each semester from the director of the Master of Liberal Arts and Science degree program. Requirements for the degree are listed in the chapter on Academic Regulations. Prospective students may also consult the website for additional information: vanderbilt.edu/mlas.

Materials Science and Engineering

RESEARCH ASSOCIATE PROFESSOR Rares Rasdeaconu

ASSISTANT PROFESSORS Anna Marie Bohmann, Marcelo Disconzi, Spencer Dowdall, William Holmes, Larry Rolan

POSTDOCTORAL SCHOLARS Leonardo Abbrescia, Simon André, Dylan Domel-White, Hengrong Du, Mitchell Faulk, Kevin Grace, James Hateley, Jocelyne Ishak, Alexander Margolis, Rocío Díaz Martín, Ivan Medri, Ian Runnels, Sam Shepherd, Oleksandr Vlasiuk, Ian Wagner, Yi Wang, Xinyue Zhao

DEGREES OFFERED: Master of Arts, Doctor of Philosophy

COURSES OFFERED: [MATH](#)

A master's degree may be earned by completing 36 credit hours of course work at the 5000 level or above. By careful selection of courses, a master's candidate may achieve special preparation in applied mathematics or computer science and thus become qualified for a position in industry or government, or as a teacher in high school or junior college.

Through the Combined B.A./M.A. (4+1) Option, the department offers exceptional students the opportunity to earn both the B.A. and the M.A. in five years. Students will be provisionally admitted to the 4+1 program only by approval of the department. Further information about the program is available from the director of graduate studies.

Candidates for the Ph.D. degree take at least 48 credit hours of formal course work, including seven courses from 6100–6101, 6200–6201, 6300–6301, and 7100–7101, and at least eight additional courses at the 6000 level or above. A complete description of Ph.D. requirements in mathematics may be obtained on request from the director of graduate studies. All Ph.D. students with a teaching assistantship participate in teaching activities.

Courses numbered above 5000 may be used for minor credit by students in other disciplines.

Mechanical Engineering

CHAIR Nilanjan Sarkar

ASSOCIATE CHAIR Haoxiang Luo

DIRECTOR OF GRADUATE STUDIES Eric J. Barth

DIRECTOR OF UNDERGRADUATE STUDIES Kenneth D. Frampton

DIRECTOR OF GRADUATE RECRUITING Jason G. Valentine

PROFESSORS EMERITI Thomas A. Cruse, George T. Hahn, Donald L. Kinser, Arthur M. Mellor, Carol A. Rubin, Taylor G. Wang, James J. Wert, John W. Williamson

PROFESSOR OF THE PRACTICE Amrutur V. Anilkumar, Kenneth D. Frampton

ADJOINT PROFESSORS Pietro Valdastri, Peiyong Wang

ASSOCIATE PROFESSORS Leon M. Bellan, Joshua D. Caldwell, Haoxiang Luo, Fabien Maldonado, Keith L. Obstein, Jason G. Valentine, Greg Walker, Karl E. Zelik

ASSOCIATE PROFESSORS OF THE PRACTICE Robert J. Barnett, Thomas J. Withrow

ASSISTANT PROFESSORS David Braun, Ravindra Duddu, Justus C. Ndukaife

ASSISTANT PROFESSORS OF PRACTICE Jason Mitchell

RESEARCH ASSISTANT PROFESSORS Neal P. Dillon, Kevin C. Galloway, Richard J. Hendrick, Zheng Li, Scott J. Webster

ADJOINT ASSISTANT PROFESSOR Carl A. Hall

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [ME](#)

The program in mechanical engineering allows concentration in a variety of areas of mechanical engineering research. Candidates for the master of science degree must complete 24 hours of course work and 6 hours of acceptable master's thesis. The course work must include at least 12 hours at or above the 5000 level, and a minor of at least 6 hours in courses separate from, but related to, the field of study. The Ph.D. program requires 24 hours of course work beyond the bachelor's degree and an acceptable dissertation. This course work must include a 6 hour minor in an area separate from, but related to, the field of study. At least 12 hours of the 24 must be at or above the 5000 level. A maximum of 6 hours in independent study may be included in the 24 hour requirement. There is also a master of science/doctor of medicine degree program joint between the Department of Mechanical Engineering and the School of Medicine. Details may be obtained from the director of graduate studies in Mechanical Engineering.

Medical Scientist Training Program (M.D./Ph.D.)

DIRECTOR Christopher S. Williams

ASSOCIATE DIRECTORS Lourdes Estrada, Danny G. Winder, Ambra Pozzi, Sally J. York

ASSISTANT DIRECTOR Megan A. Williams

DEGREES OFFERED: Doctor of Medicine *and* Doctor of Philosophy

COURSES OFFERED: [MSTP](#)

The central goal of the Medical Scientist Training Program at Vanderbilt University is to identify, mentor, and foster the careers of a diverse workforce of superior future leaders in academic medicine, industry, and government who are dedicated to improving human health through research, clinical activities, and leadership. Based on solid clinical training and rigorous, highly impactful research training, our program fosters the development of independent scientific careers. We provide students with an integrated curriculum comprising a strong core education in medicine and intensive training in scientific inquiry. Successful completion of the program leads to both the M.D. and Ph.D. degrees. MSTP students come from a diverse applicant pool drawn from throughout the nation and abroad.

The MSTP is a dual endeavor between the Vanderbilt University School of Medicine and the Vanderbilt University Graduate School. Trainees are required to fulfill all of the requirements for both the M.D. and Ph.D. degrees. Since some competencies for the M.D. degree are met by the graduate school experience, it is possible for MSTP students matriculating July 2013 or after to complete the M.D. program in a total of three years. The MSTP allows both dual and alternating enrollment in the School of Medicine and the Graduate School. MSTP students will typically complete the Foundations of Medical Knowledge (FMK) and Foundations of Clinical Care (FCC) phases, exit for graduate studies, then return for a single remaining medical school year, the Immersion Phase.

The cornerstone of the Vanderbilt MSTP is training in scientific inquiry afforded by a rigorous Ph.D. experience. After completing the first two years of medical school and at least two laboratory rotations, trainees select a laboratory and department for graduate studies. This selection is typically formalized before the end of the second year of medical school. Requirements for successful completion of the Ph.D. degree are the same for all students at Vanderbilt and the Ph.D. thesis must be successfully defended prior to reentry into medical school. Most MSTP students will re-enter clinical training sometime between April and July.

To facilitate the training of clinical investigators, we developed a distinct track within the Vanderbilt MSTP called the MSTP Clinical Investigation Track. The goal of the MSTP-CIT is to provide comprehensive training in science for physician scientists engaged in translational and patient-oriented research. This program is intended for students who enter the MSTP after the third year of medical school or during residency or fellowship.

For additional information about the Vanderbilt MSTP, including application information, visit the program's website at medschool.vanderbilt.edu/mstp.

DEGREE OFFERED: Master of Arts

CERTIFICATE OFFERED: MEDICINE, HEALTH, AND SOCIETY

COURSES OFFERED: [MHS](#)

Graduate study in medicine, health, and society at Vanderbilt offers an interdisciplinary master of arts and a graduate certificate for students interested in studying health-related beliefs and practices in their social and cultural contexts. It is available to graduate and professional students from the six participating Vanderbilt schools (Arts and

Science, Divinity, Law, Medicine, Nursing, and Peabody). External candidates are considered for admission, as are Vanderbilt undergraduates applying through the 4+1 program in the College of Arts and Science.

MHS draws on a variety of fields in the social sciences and humanities—anthropology, economics, history, literature, psychology, sociology, philosophy/ethics, and religious studies. It should be of particular interest to students preparing for careers in a health-related profession, but also has much to offer any graduate or professional student interested in examining an important part of human experience from multiple perspectives and developing a critical understanding of contemporary society.

Master of Arts

Students may choose a thesis option (24 credit hours of course work plus 6 credit hours of thesis research) or non-thesis option (30 hours). The thesis should draw on at least two disciplines.

Requirements include the 3 credit hour core colloquium (MHS 6100) and an additional 21 or 27 credit hours (depending on the option) of courses approved for the MHS graduate program.

It is expected that students who can devote themselves to the MHS program full time will complete their studies in three terms (i.e., two semesters and one summer or three semesters). However, the length of the program will be flexible to accommodate the needs of different constituencies.

M.D./M.A.

This program is available to current medical students, who may choose between the thesis and non-thesis options described above. The M.A. may be completed in one year, plus either a summer or two research electives.

4+1 M.A. Program

This program is available only to current Vanderbilt undergraduate students. Students may choose between the thesis and non-thesis options described above.

Requirements for Graduate Certificate in Medicine, Health, and Society

The certificate is available only to current graduate and professional students from the six participating Vanderbilt schools (Arts and Science, Divinity, Law, Medicine, Nursing, and Peabody). Acceptance to the program requires a minimum cumulative GPA of 3.3 and the approval of both the student's adviser and the director of graduate studies for Medicine, Health, and Society. To apply, students will:

1. Complete the Intent to Enroll form from the Graduate School's website.
2. Contact MHS to arrange a meeting with the director of graduate studies.
3. After fulfilling the program requirements, complete the MHS Graduate Certificate Application Form. Turn in the application form and a copy of the paper to be evaluated by the MHS Graduate Committee to the director of graduate studies.

Requirements include:

1. Completion of MHS 6100 and an additional 12 credit hours of graduate-level course work in Medicine, Health, and Society. The courses must form an intellectually cohesive whole. Courses must be approved by the MHS Graduate Committee for credit and should include at least two courses (at least 6 credit hours) outside the student's home discipline. One course may be satisfied through an independent study with a faculty member affiliated with the MHS with the approval of the director of graduate studies. Graduate courses taken at Vanderbilt University prior to admission to the MHS Graduate Certificate Program may be counted toward the certificate requirements with the approval of the MHS Graduate Committee if the course can satisfy one of the curriculum requirements of the program. No more than two courses (6 credit hours) of specifically named courses required for the primary degree may be applied toward the certificate.
2. Submission of a research paper to the MHS Graduate Committee for evaluation. The paper must demonstrate the application of interdisciplinary methods and knowledge of an area of study related to medicine, health, and society.
3. Participation in a minimum of five extracurricular activities sponsored by MHS. A short paper reflecting on the insights gained from participating must be submitted to the assistant director of MHS.

Other Approved Courses

Additional courses not on this list may be approved at the discretion of the MHS director. Graduate students enrolled

in mezzanine-level courses will complete additional work in order to gain graduate credit.

ANTHROPOLOGY: 4373, Health and Disease in Ancient Populations; 5310, Death and the Body; 6141, Anthropology of Healing; 6142, Medicine, Culture, and the Body; 6143, Medical Anthropology; 6344, Genetic Anthropology Lab Techniques; 6345, Human Evolutionary Genetics; 8010, Special Topics (as appropriate); 8310, The Anthropology of Death: Body, Place, and Memory.

DIVINITY/RELIGION: 5022, Reading Course in Medical Ethics; 7004, Theories of Personality; 7007, Religion and Coping; 7024, Research in Religion and Health; 7041, Pastoral Care for Persons with Addictions and Mental Disorders; 7049, The Religious Self According to Jung; 7051, Freudian Theories and Religion; 7052, Post-Freudian Theories and Religion; 7053, Seminar: Contemporary Psychotherapy and Pastoral Counseling; 7101, Methods in Ethics; 7220, Seminar in Clinical and Research Ethics.

ECONOMICS: 5350, Economics of Health; 9480, Health Economics; 9490, Seminar: Health Economics.

ENGLISH: 8155, Special Topics in English and American Literature (as appropriate). Note: topics vary; the MHS director will approve versions with sufficient MHS content for credit toward this program.

HISTORY: 5800, Modern Medicine; 5810, Women, Health, and Sexuality; 5830, Medicine, Culture, and the Body (same as Anthropology 6142).

MEDICINE, HEALTH, AND SOCIETY: 5030, Community Health Research; 5120, Medicine, Technology, and Society; 5230, Masculinity and Men's Health; 5250, War and the Body; 5310, Psychiatry, Culture, and Globalization; 5330, Men's Health Research; 5350, Perspectives on Trauma; 5410, HIV/AIDS in the Global Community; 6100, Theories and Methods in Critical Health Studies; 6200, Concepts and Methods in Health Disparities Research; 6300, Social Studies of Science and Medicine; 6400, Quantitative Research Methods; 6500, Special Topics: Social Foundations of Health; 7000, Interdisciplinary Research Methods; 7100, Research Workshop; 7305, Foundations in Global Health; 7306, Essential Skills in Global Health; 7308, Ethics, Law, and Medicine; 7311, Ethics in Global Health; 7312, Informatics for Global Health Professionals; 7313, Introduction to Medical Anthropology; 7314, Global Health Politics and Policy; 7315, Leadership and Development in Global Health; 7316, Case Studies in Tropical Diseases; 7317, Introduction to Quality Improvement; 7319, Lab Technology Low Resource Setting; 7830, Graduate Service Learning; 7831, Service Learning Research; 7832, Service Learning Readings; 7850, Independent Study; 7851, Independent Study; 7880, Internship Training; 7881, Internship Research; 7882, Internship Readings; 7999, Master's Thesis Research.

NURSING: 6040, Introduction to Health Informatics; 6149, Special Topics: Complementary and Alternative Therapies; 6812, The Evolution of Midwifery in America.

PSYCHOLOGY: 6310, Advanced General Psychology, as appropriate [topics vary; the program director will approve versions with sufficient MHS content for credit toward this program]; 8310, Research Methods in Clinical Psychology; 8360, Seminar: Clinical Psychology; 8942, Seminar: Social.

SOCIOLOGY: 9363, Special Topics Seminar on Institutions and Organizations (as appropriate).

ASSISTANT PROFESSORS Matthew Alexander, Rafael Arrojo e Drigo, Abigail Brown, Jonathan Brown, Erin Calipari, Lea Davis, Danielle Dean, Amanda Doran, Jose Gomez, Brad Greuter, AJ Hinton, Erkan Karakas, Annet Kirabo, Gregor Neuert, Elizabeth Rendina-Ruedy, Elma Zaganjor

ADJUNCT ASSISTANT PROFESSORS Douglas P. Mortlock

ADJOINT ASSISTANT PROFESSORS Jason Winnick

RESEARCH ASSISTANT PROFESSORS Derek Claxton, Louise Lantier, Anna Osipovich, Patrick S. Page-McCaw, Richard A. Stein

RESEARCH INSTRUCTORS Samuel Centanni, Rui Chen, Matthew Dickerson, Guillaume Kraft, Jose Maladonado, Smriti Mishra, Silvia Ravera, Marcela Reyna-Neyra, Brinda Selvaraj, Chiyo Shiota, Dollada Srisai, Hirohide Takahashi, Quan Wang, Qiang Wei

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [MP&B](#)

Students interested in this program generally participate in the Interdisciplinary Graduate Program in the Biomedical Sciences or Quantitative and Chemical Biology program during the first year (see Biomedical Sciences). The second year comprises required and elective courses in Molecular Physiology and Biophysics for a total of at least 24 hours of formal course work toward the Ph.D. degree. Variations are permitted in the number of formal course hours above the minimum of 24 required for the degree. A thesis-based master's degree is awarded only under special circumstances.

The emphasis of the graduate program is on research and research training in the areas of molecular and cell biology, cellular regulation and endocrinology, electrophysiology and biophysics, whole animal physiology and pathophysiology, and genetics. However, the training experience is applicable across a wide range of future career options. Students obtain a general background in physiology, biochemistry, molecular biology, and genetics through course work and laboratory exercises. Students are encouraged to rotate freely among various research laboratories in their first year in order to select a particular research area and thesis adviser for dissertation research.

Research areas available to the student include a broad range of multidisciplinary topics spanning the breadth of modern physiology. Students will apply diverse cutting edge techniques to address major questions in the field. Major themes in the department include:

1. Hormonal and developmental aspects of gene control at the molecular level, with emphasis on single cell analyses and the roles of DNA-protein interactions.
2. Cellular aspects of hormonal and immunological regulation of biological process involving glucose, fatty acid and ion transport, as well as the mechanism of action of hormonal second messengers such as cAMP, cGMP, and calcium.
3. Hormonal regulation of metabolism in whole animal models.
4. Neuroendocrine and neurobehavioral studies of energy homeostasis and drug addiction.
5. Biophysical and structural analysis of membrane protein function, with a focus on the regulation of synaptic transmission.
6. Examination of the genetic basis of neurological and metabolic disorders.

Departmental research programs have strong relevance to a range of human diseases including diabetes, obesity,

cardiovascular disorders, cancer, nutritional deficiencies, developmental abnormalities, and addiction.

Kaas, Ege Kavali, , Christine Konradi, Bennett Landman, Robert L. Macdonald, Beth Malow, René Marois, Douglas McMahon, David Miller, Lisa Monteggia, Jeffrey L. Neul, Paul Newhouse, Sachin Patel, Tonia Rex, -Richard Simerly, Frank Tong, Mark Wallace, Danny Winder, Laurence J. Zwiebel

ASSOCIATE PROFESSORS Julio Ayala, Jennifer Below, Carissa Cascio, Blythe Corbett, Melissa Duff, Kevin Ess, Sabine Fuhrmann, Martin Gallagher, Eugenia Gurevich, Fiona Harrison, Antonis Hatzopoulos, Suzanaerculano-Houzel, Kari Hoffman, Rebecca Ihrie, Jing-Qiong Kang , Sasha Key, Ela Knapik, Andre Lagrange, Alex Maier, Terunaga Nakagawa, Kevin Niswender, Wellington Pham, Sean Polyn, Renã A.S. Robinson, Michelle Southard-Smith, G. Christopher Stecker, James S. Sutcliffe, Warren D. Taylor, Stephen M. Wilson, Thilo Womelsdorf, Geoffrey F. Woodman, Neil Woodward

ASSISTANT PROFESSORS, Erin Calipari, Robert Carson, Catie Chang, Ryan Darby, John Eley, Dario Englot, Vivian Gama, Reyna Gordon, Bradley Grueter, Timothy Hohman, Kathryn Humphreys, Lauren Parker Jackson, Autumn Kujawa, Miriam Lense, Alan Lewis, Ethan S. Lippmann, William Nobis, Gavin Price, Ramnarayan Ramachandran, Mikail Rubinov, Douglas Ruderfer, Richard Sando, Matthew Schrag, Codi Siciliano, Tiffany G. Woynaroski, Qi Zhang, Chengwen Zhou, Qiangjun Zhou

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [NSC](#), [NURO](#)

The program of study provides a broad background in neuroscience and related disciplines, preparing a student for a career as a research scientist and teacher. Graduates are recruited for positions into academic institutions where the discipline of neuroscience is growing rapidly, as well as into government, industry, and biotechnology.

The Ph.D. program requires a minimum of 24 hours of formal didactic course work. Students enter the program via one of two paths—either directly or via the IGP (see Biomedical Sciences), and complete an interdisciplinary core of course work in their first year. This course work consists of a two-semester survey course of neuroscience along with a two-semester professional development course. These courses survey the broad areas of neuroscience and are designed to link fundamental principles to contemporary research, as well as focus on building the skills necessary for success. An individualized elective schedule augments the required material in areas that relate directly to the student's area of chosen research. Major research emphases within the program span the breadth of contemporary neuroscience, and are divided into twelve themes: addiction and reward, circadian rhythms and sleep, cognitive neuroscience, computational neuroscience and neuroengineering, developmental neuroscience, educational neuroscience, law and society, learning and memory, mood, anxiety and psychosis, neurodegeneration and neuroinflammation, synaptic function and neuroendocrine signaling, and sensory and motor neuroscience. An original research dissertation is required for the Ph.D. degree.

For additional information, see medschool.vanderbilt.edu/brain-institute/.

Nursing Science

DEAN Pamela R. Jeffries

PROFESSORS Julie Barroso, Mary Jo Gilmer, Sharon M. Karp, Ruth Kleinpell, Mariann R. Piano,

RESEARCH PROFESSOR Mary S. Dietrich, Marianna LaNoue

ASSOCIATE PROFESSORS Terrah Foster Akard (Program Director), Jana L. Lauderdale, Shelagh A. Mulvaney

ASSISTANT PROFESSORS Leanne Boehm, Kate Clouse, Alvin Jeffery, Cathy A. Maxwell, Mulubrhan Mogos, Jeremy Neal, Chorong Park, Julia C. Phillippi, Bethany A. Rhoten, Lori Schirle, Deonni Stoldal

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [NRSC](#)

This program prepares scholars for research and academic careers in public or private sectors of healthcare. All students receive education in the areas of clinical and health services research. These areas of study are reflective of the overall research interests and expertise of School of Nursing faculty members and resources available in the medical center, university, and School of Nursing. Examples of faculty research interests include acute and chronic illness, cognitive health and dysfunction, data science, health technologies, palliative care, and women's health.

Admission to the Ph.D. in Nursing Science Program is through the Graduate School. Application materials are online. Successful applicants to the program are those whose essay clearly articulates their research career goals, research interests, research experiences and potential faculty mentors. Previous academic performance, writing samples, and letters of recommendation are also considered.

The program requires 72 credit hours of study, of which 15 may be transferred from master's course work, pending review and approval by the Graduate School. The core curriculum of the program includes 47 credit hours of required course work, which includes 6 elective hours and 10 credit hours of course work that addresses the student's research (4 research practica and 6 dissertation research credits).

Course work is delivered using both face-to-face and technology-driven instruction. Students work with faculty mentors who guide and oversee their program of study from admission through degree completion. Students may have opportunities to participate in intensive research experiences connected with faculty research projects and are exposed to a variety of research designs and analytic techniques. Degree requirements include successful completion of advanced course work, a qualifying exam, and a dissertation.

For more information, visit nursing.vanderbilt.edu/phd.

Pathology, Microbiology, and Immunology

CHAIR Alice C. Coogan

DIVISION DIRECTOR AND VICE CHAIR FOR RESEARCH Eric P. Skaar

DIRECTOR OF GRADUATE STUDIES Molecular Pathology and Immunology, W. Gray Jerome; Associate Director, Jeffrey C. Rathmell

DIRECTOR OF GRADUATE STUDIES Microbe-Host Interactions, Christopher Aiken

Drake, Agnes B. Fogo, David Gailani, David W. Haas, J., Harold Helderman, Billy G. Hudson, Sebastian Joyce, D. Borden Lacy, Simon Mallal, Houra Merrikh, William (Bill) Mitchell, Harold L. Moses, Kevin G. Osteen, R. Stokes Peebles, Richard Peek, Elizabeth Phillips, John A. Phillips, Jeffrey C. Rathmell, Donald H. Rubin, Ed Sherwood, Eric P. Skaar, Subramaniam Sriram, Larry L. Swift, James Ward Thomas, Luc Van Kaer, Lorraine B. Ware, Alissa M. Weaver, Keith T. Wilson, Mary M. Zutter

ASSOCIATE PROFESSORS Justin Balko, Julie Bastarache, Ivelin Georgiev, Maria Hadjifrangiskou, W. Gray Jerome, Spyros Kalams, John Karijolic, Young Kim, Deborah A. Lannigan, Andrew J. Link, Susan Majka, Amy S. Major, Louise A. Rollins-Smith, Jonathan G. Schoenecker, Adam Seegmiller, Gregory Sephel, Ben Spiller, Jeanne Wallace, Sandra Zinkel

RESEARCH ASSOCIATE PROFESSORS Ingrid A. M. Verhamme, Lan Wu

ASSISTANT PROFESSORS Holly M. Algood, Manuel Ascano Jr., Megan Behringer, Rachel Bonami, Mariana Byndloss, James E. Cassat, Jennifer Gaddy, Jeremy Goettel, Jonathan Irish, Tae Kon Kim, Janet Markle, Oliver G. McDonald, Daniel J. Moore, Dawn Newcomb, Michael Noto, Kristen Ogden, Danyvid Olivares-Villagómez, Mary Philip, Heather Pua, Elisabeth Rendina-Ruedy, Jonathan Schmitz, Henrique Serezani, Scott Alan Smith, Vivian Lee Weiss, Wenhan Zhu

RESEARCH ASSISTANT PROFESSORS Shanna Arnold, Sung Hoon Cho, S. Kent Dickeson, Melissa Farrow, Sarika Saraswati

RESEARCH INSTRUCTORS Mathew Bechard, Damian Maseda, Gregory Sowd, Haichun Yang

DEGREES OFFERED: MOLECULAR PATHOLOGY AND IMMUNOLOGY, Doctor of Philosophy; MICROBE-HOST INTERACTIONS, Doctor of Philosophy

COURSES OFFERED: [M&IM](#), [PATH](#)

Molecular Pathology and Immunology Program

Students interested in the Molecular Pathology and Immunology Program enter the program after they participate in the Interdisciplinary Graduate Program in the Biomedical Sciences (see Biomedical Sciences). Molecular pathology and immunology occupies a unique niche among the biomedical sciences in that it bridges the basic science and translational disciplines. It seeks to determine the mechanism and etiology of disease, to study the agents and conditions that cause disease, and to elucidate the steps in the transformation of a normal tissue or process into an abnormal one, with an emphasis on inflammation and immunology. Pathology and Immunology students are ideally positioned to influence the conceptual and methodologic transfer of advances in the basic biological sciences to the alleviation of disease and the maintenance of health.

The program in molecular pathology and immunology leading to the Ph.D. degree is designed to prepare students for careers in biomedical sciences. The program focuses on research, but students from the program find positions in many biomedical science fields. Students in their first year complete a core of course work through the Interdisciplinary Graduate Program in the Biomedical Sciences (see Biomedical Sciences). The second year of study comprises required and elective courses for a total of at least 24 credit hours of formal course work (including the 16 credit hours in the first year). The curriculum is flexible so that course selection can be tailored to the interests and particular needs of the student. Elective hours are often taken in areas such as cell biology, biochemistry, molecular biology, and molecular physiology and biophysics. Qualifying examinations are administered after the second year of study, and the final two to three years of the program are devoted to research. A thesis-based master's degree is awarded only under special circumstances.

The research interests of the faculty include vascular biology and biochemistry, tumor biology, the immune response, inflammation and repair, the biology of the extracellular matrix in response to disease processes, the pathogenesis of infectious agents, and the regulation of gene expression in disease. The department is fully equipped with modern research training facilities and provides close faculty mentoring through a high faculty-to-student ratio.

Microbe-Host Interactions Program

Students interested in the Microbe-Host Interactions Program participate in the Interdisciplinary Graduate Program in the Biomedical Sciences during their first year (see Biomedical Sciences). The second year of study comprises required and elective courses in bacteriology, virology, and immunology for a total of at least 24 credit hours of formal course work toward the Ph.D. degree.

The Microbe-Host Interactions Program is designed to provide state-of-the-art training in modern bacteriology, virology, host cell and immune responses to microbes, molecular genetics and pathogenesis, and biotechnology. Research experience in a specific area provides the basis for a dissertation. Students normally enter via the Interdisciplinary Graduate Program in Biomedical Sciences, in which they do rotations in the laboratories of four faculty members prior to choosing a field of study. Dissertation research may be initiated in any of the following areas:

- Bacterial pathogenesis, including mechanisms of toxin action and drug resistance (Cover, Drake, Hadjifrangiskou, Lacy, Merrikh, Peek, Skaar, Spiller);
- Role of the intestinal microbiota in health and disease (Byndloss, Olivares-Villagomez, Zhu);
- Molecular biology of virus-host interactions (Aiken, Ascano, Crowe, Denison, Karijolic, Ogden);
- Immune responses to bacterial, viral, and fungal infections (Algood, Aronoff, Crowe, Gaddy, Joyce, Kalams, Mallal, Rollins-Smith, Sherwood, Van Kaer, Wilson);
- Molecular genetics (Aiken, Bordenstein, Crowe, Georgiev, Hadjifrangiskou, Merrikh, Ogden, Karijolic, Skaar);
- Protein structure and proteomics (Lacy, Link, Spiller).

Emphasis is on basic research aimed at understanding molecular mechanisms of microbial infections and the host cell and immune defenses. Students whose interests are primarily in ecological or taxonomic aspects of microbiology are not encouraged to apply.

Doctoral study is emphasized. However, an M.S. degree may be granted under special circumstances and may require a research thesis.

Pharmacology

ACTING CHAIR Ege T. Kavalali

VICE CHAIR Joey V. Barnett

DIRECTOR OF GRADUATE STUDIES Christine Konradi

ASSOCIATE DIRECTOR OF GRADUATE STUDIES Sean S. Davies

UNIVERSITY PROFESSORS Craig Lindsley, Lawrence Marnett

PROFESSORS EMERITI Wolf D. Dettbarn, L. Jackson Roberts II, Elaine Sanders-Bush,

ASSOCIATE PROFESSORS EMERITI Erwin J. Landon, Peter W. Reed

ASSOCIATE PROFESSORS Sean S. Davies, Barbara Fingleton, Eugenia Gurevich, Timothy Hohman, Carrie K. Jones, Jing-Qiong Kang, James M. Luther, Michael J. McLean, Jonathan Schoenecker, Henrique Serezani, Bih-Hwa Shieh, Ben Spiller, Brian E. Wadzinski, C. David Weaver, Matthew H. Wilson

RESEARCH ASSOCIATE PROFESSORS Olivier Boutaud, Ginger L. Milne, Jerri Rook, Alex Waterson

EDUCATION ASSOCIATE PROFESSOR Fiona Yull

ADJUNCT/ADJOINT ASSOCIATE PROFESSORS David L. Black, Chang Chung, J. Scott Daniels, Phyllis Freeman, Richard Gumina, Charles Hong, Hind Lal, Christine Saunders, Venkataswarup Tiriveedhi Xiaofei Wang

ASSISTANT PROFESSORS Raymond Blind, Erin Calipari, Robert Carson, Brad Grueter, Jennifer Herington, , Carlos Lopez, Gregor Neuert, Rick Sando, Elaine Shelton, Cody Siciliano, Quinn Wells

RESEARCH ASSISTANT PROFESSORS Mohamed Ahmed, John D. Allison, Michael Bubser, Darren W. Engers, Julie Engers, Andrew Felts, Daniel Foster, Masoud Ghamari-Langroudi, Garrett Kaas, Bruce Melancon, Ai-Dong Qi, Minati Singh, Anna Vinson, Zixiu Xiang

EDUCATION ASSISTANT PROFESSOR Kendra Oliver

ADJUNCT/ADJOINT ASSISTANT PROFESSORS Anna Blobaum, Christopher B. Brown, Rachel Crouch, R. Nathan Daniels, Hugh Fentress, Glenroy Dean Martin, Susan Mercer, Saumya Ramanathan, Anna Vilgelm

EDUCATION INSTRUCTORS Alice Rodriguez, Megan Williams

RESEARCH INSTRUCTORS Max Joffe, Munir Kutlu, Paula Luis, Zhenzhong Ma, Nathalie C. Schnetz-Boutaud, Ok-ho Shin, Kanzo Suzuki, Sergey Vishnivetskiy, Chi Yan

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [PHAR-GS](#)

Students interested in pharmacology participate in the Interdisciplinary Graduate Program in the Biomedical Sciences (see Biomedical Sciences). The program of study provides a broad background in pharmacology and other biomedical disciplines, preparing the student for a career as a research investigator. Graduates have been highly successful in obtaining positions in medical schools, government research institutes, and the pharmaceutical industry.

Students in their first year complete a core of course work through the Interdisciplinary Graduate Program in the Biomedical Sciences. The second year of study is composed of required and elective courses in Pharmacology for a total of 24 hours of formal course work toward the Ph.D. degree (including the 16 hours in the first year IGP). Requirements vary regarding the amount and distribution of course work that must be taken, but substantial work is taken in Pharmacology, and supplemented with course work in cell biology, biochemistry, molecular physiology, biophysics, and chemistry, according to the student's interests. Subsequent years focus on research and specialized course work as directed by mentors in the Pharmacological Sciences Training Program. Fields of research include molecular and biochemical pharmacology; neuropharmacology; autonomic, cardiovascular, endocrine, and clinical pharmacology; and drug metabolism and toxicology. A research dissertation is required for the Ph.D. degree.

For more information, visit medschool.vanderbilt.edu/pharmacology.

Philosophy

CHAIR Paul Taylor

DIRECTOR OF GRADUATE STUDIES Karen Ng

PROFESSORS EMERITI Robert R. Ehman, Marilyn Friedman, John Lachs, Larry May, Charles E. Scott, Donald W. Sherburne, Henry A. Teloh, Jeffrey Tlumak

PROFESSORS Lenn E. Goodman, Michael P. Hodges, Kelly Oliver, Lucius T. Outlaw Jr., Robert Talisse, Paul Taylor

ASSOCIATE PROFESSORS Scott Aikin, Idit Dobbs-Weinstein, Karen Ng, Julian Wuerth

ASSISTANT PROFESSORS Emanuele Costa, Matthew Congdon, Diana Heney

DEGREES OFFERED: Master of Arts, Doctor of Philosophy

COURSES OFFERED: [PHIL](#)

Work for the Ph.D. degree is offered in all major fields in the discipline. Candidates must complete at least 47 credit hours of formal course work and satisfy additional requirements. When appropriate, course work may include a limited number of seminars in other disciplines. For further details and current information, see the Department of Philosophy webpage: as.vanderbilt.edu/philosophy/.

Through the Combined B.A./M.A. (4+1) Option, the department offers exceptional students the opportunity to earn both the B.A. and the M.A. in five years. Students will be provisionally admitted to the 4+1 program only by approval of the department. Further information about the 4+1 program is available from the director of undergraduate studies.

Physics and Astronomy

CHAIR M. Shane Hutson

DIRECTORS OF GRADUATE STUDIES Senta V. Greene (Physics), Andreas Berlind (Astrophysics)

PROFESSORS EMERITI John Paul Barach, Charles A. Brau, Leonard C. Feldman, Dennis Hall, Arnold M. Heiser, P. Galen Lenhart, Charles F. Maguire, Volker E. Oberacker, Akunuri V. Ramayya, Medford S. Webster, Thomas J. Weiler, Robert A. Weller

PROFESSORS Andreas Berlind, David J. Ernst, Daniel M. Fleetwood, John C. Gore, Senta V. Greene, Richard F. Haglund Jr., Joseph H. Hamilton, Kelly Holley-Bockelmann, M. Shane Hutson, Will E. Johns, Thomas W. Kephart, Sokrates Pantelides, Sandra J. Rosenthal, Robert J. Scherrer, Paul D. Sheldon, Keivan G. Stassun, Norman H. Tolk, A. Sait Umar, Kalman Varga, Julia Velkovska, David A. Weintraub, Sharon Weiss, John P. Wikswo Jr.

DISTINGUISHED RESEARCH PROFESSOR C. Robert O'Dell

RESEARCH PROFESSORS Frank E. Block, C. Richard Chappell, Leonard C. Feldman

ASSOCIATE PROFESSORS Steven E. Csorna, Daniel F. Gochberg, Todd E. Peterson, Jason Valentine, Yaqiong Xu

RESEARCH ASSOCIATE PROFESSORS Alan Tackett

ASSISTANT PROFESSORS Alfredo Gurrola, William Holmes, Jessie C. Runnoe, David Smith, Stephen R. Taylor

RESEARCH ASSISTANT PROFESSORS Jonathan Bird, Lauren Campbell, Donald A. Cox III, William E. Gabella, Karan Jani,

Halina Krzyzanowska, Andrew O'Hara, Klaas Padeken, Dina M. Stroud, Sourav Tarafdar, Enhong Wang

DEGREES OFFERED: Master of Arts, Master of Science, Doctor of Philosophy

COURSES OFFERED: [ASTR](#), [PHYS](#)

Physics and astronomy are driving intellectual forces that expand our understanding of the universe, discover the science that underlies new technologies, and applies these technologies to both curiosity-driven and applied research. In keeping with this role, the Department of Physics and Astronomy has active research groups studying the theoretical and experimental physics of elementary particles; nuclear structure, heavy-ion reactions, and relativistic heavy-ion physics; linear and nonlinear interactions of photons, electrons, atoms, and molecules with nanocrystals, surfaces, and interfaces; the electric, magnetic, and active mechanical properties of living systems; the structure and dynamics of biopolymers; the physics and technology of medical imaging; computational physics; low mass and young stars; detection of extrasolar planets; structure and dynamics of galaxies; observational and theoretical cosmology; ultra-high energy cosmic rays; and cosmology.

The master of science degree in physics requires a minimum of 30 credit hours consisting of at least 24 hours of formal didactic course work and normally including 6 credit hours of master thesis research. The didactic course work must include at least 9 credit hours above the 8000 level. The master of science degree requires a written thesis approved by at least two graduate faculty members in the physics and astronomy program.

A non-thesis option (master of arts in physics) is available to students admitted to candidacy for the Ph.D. in physics. Under the non-thesis plan, the student presents an oral report on a research subject in the field of investigation and submits a written account of this subject to the program faculty. This degree also requires a minimum of 30 credit hours. For information regarding the master of science and professional doctorate degrees in medical physics, see the medical physics section in the School of Medicine catalog.

The Ph.D. degree requires 72 credit hours of graduate work, including 15 credit hours of core courses, the 1 hour Physics 8000 seminar, 3 credit hours in one breadth course outside the student's main research area, 9 credit hours of elective physics graduate courses, a minimum of six semesters of Physics 8001 Physics Colloquium, and a minimum of two semesters of Physics 8003 Teaching Practicum. The remaining credit hours may be earned through some combination of non-candidate research, dissertation research, and approved lecture courses.

Political Science

CHAIR Alan Wiseman

ASSOCIATE CHAIR Jennifer M. Larson

DIRECTOR OF GRADUATE STUDIES Emily H. Ritter

PROFESSORS EMERITI M. Donald Hancock, Erwin C. Hargrove, William C. Havard Jr., Bruce I. Oppenheimer, Richard A. Pride, James Lee Ray, Mitchell A. Seligson, Benjamin Walter

PROFESSORS Brooke A. Ackerly, Larry M. Bartels, W. James Booth, Joshua D. Clinton, John G. Geer, Cindy D. Kam, David E. Lewis, Edward Rubin, John M. Sides, Alan Wiseman, Elizabeth J. Zechmeister

ASSOCIATE PROFESSORS Brett V. Benson, Jonathan T. Hiskey, Jennifer M. Larson, Noam Lupu, Emily H. Ritter, Sharece Thrower

ASSISTANT PROFESSORS Allison P. Anoll, Peter Bills, Amanda B. Clayton, Andrew J. Coe, Cassy Dorff, Brenton Kenkel, Eunji Kim, Kristin Michelitch, Peter Schram, Bradley C. Smith, Guillermo Toral

DEGREES OFFERED: Master of Arts, Doctor of Philosophy

COURSES OFFERED: [PSCI](#)

The graduate program in political science provides graduate students with rigorous training in American politics, comparative politics, international relations, political methodology, and political theory.

The Department of Political Science does not accept external applications for a terminal master's degree. A terminal master's degree in political science may be earned by Ph.D. students electing not to continue with the program. The terminal master's can be earned through (a) a program that requires 24 credit hours of course work (including Political Science 8355 and 8356 and at least 18 hours of 8000-level courses), 6 credit hours of master's thesis work, and a thesis or (b) a non-thesis option requiring 33 credit hours of course work (including Political Science 8355 and 8356 and at least 27 credit hours of 8000-level courses). The student must maintain a GPA of at least 3.0 in the 8000-level courses. A master's degree in passing option is available to students en route to the Ph.D., who have completed all courses required for the Ph.D. degree, passed the preliminary examinations, and defended successfully the dissertation proposal.

At least 42 credit hours of formal course work are required for the Ph.D. degree; 72 credit hours (including dissertation research hours) are required in total to complete the degree. Research Design (8355) and Statistics for Political Research (8356) are required of all prospective candidates.

Candidates for the Ph.D. are expected to demonstrate proficiency in substantive topics and research skills, including statistics, at a level fixed by the program faculty.

Through the combined B.A./M.A. (4+1) program, the Department of Political Science offers exceptional Vanderbilt undergraduates the opportunity to earn both the B.A. and the M.A. in five years. Students will be provisionally admitted to the 4+1 program only by approval of the department. Further information about the program is available from the director of graduate studies.

ASSISTANT CLINICAL PROFESSOR Vicki S. Harris

DEGREES OFFERED: Master of Arts, Doctor of Philosophy

COURSES OFFERED: [PSY](#), [PSY-GS](#)

The doctoral program in psychological sciences is offered jointly by the Department of Psychology in the College of Arts and Science and the Department of Psychology and Human Development in Peabody College. The Psychological Sciences program focuses on psychological theory and the development of original empirical research. Students are admitted to work toward the Ph.D. degree in the following areas:

- Clinical Science
- Cognition and Cognitive Neuroscience
- Cognition in Context
- Developmental Science
- Neuroscience
- Quantitative Methods

A major goal of our doctoral program is the placement of its graduates in academic settings. The faculty aim to tailor graduate training to meet the needs and the interests of each individual student. Students are monitored very closely from the beginning of their training, and emphasis is on active student participation during every stage of training.

Through the Combined B.A./M.A. (4+1) option, the department of Psychology in the college of Arts & Science offers exceptional students the opportunity to earn both the B.A. and the M.A. in five years. Students will be provisionally admitted to the 4+1 program only by approval of the department. Further information about the program is available from the director of graduate studies.

The curriculum is designed to: (a) familiarize students with the major areas of psychology; (b) provide specialized training in at least one of the five specific areas of psychology emphasized in the program; and (c) provide students sufficient flexibility to enroll in classes consistent with their interests and long-term developmental trajectory. During the first two to three years, students take several core courses in quantitative methods and in substantive areas. Beyond this, the program consists of seminars, further research participation, and other inquiries expressly designed to fulfill career objectives. Each of the five areas offers a seminar on current research every semester, attended by all faculty and graduate students in that area.

We expect students to be continually involved in research throughout their tenure in our program. We use a one-on-one mentoring model as a primary though not exclusive means for the acquisition of scientific skills by students. As such, students work very closely with their advisers in all phases of the research process. In addition, advisory committees that consist of both the adviser and other faculty members offer guidance throughout the student's graduate school years. There is also potential for considerable interaction among programs and with other disciplines across campus. This interaction produces an exciting intellectual environment that is further enriched by visiting faculty members and speakers. Interested students are encouraged to find out more about our research programs by reading the descriptions of faculty research interests available on our program website (vanderbilt.edu/psychological_sciences).

The Clinical Science program in Psychological Sciences at Vanderbilt subscribes to the clinical scientist model of training, with the primary goal of training clinical scientists. Through the combination of advanced course work, practicum experiences, and research emphases, students concentrate in one or more of the following areas: developmental psychopathology (including children and/or adults), prevention and treatment, clinical health psychology, clinical neuroscience, socio-affective science, developmental disabilities (including children and/or adults), and quantitative methods. Regardless of concentration, the training experience includes a core curriculum, a common set of course requirements and research milestones, and a variety of practicum opportunities.

All of our Ph.D. program areas offer a range of financial support options for graduate students, including research fellowships, research assistantships, teaching assistantships, and graduate fellowships.

Applicants to our program need to submit scores on the Graduate Record Examination General Test. Applicants may also submit scores on the Psychology subject test, but this is not required. In addition to overall potential for a scientific career, the fit between an applicant's research interests and those of a potential faculty mentor significantly influence admissions decisions. Admission is not limited to students with undergraduate backgrounds in psychology. Specific program requirements are described in the *Graduate Student Handbook*, which is available on the Psychological Sciences website.

Quantitative and Chemical Biology

The Quantitative and Chemical Biology program is an interdepartmental umbrella graduate program seeking students who have earned undergraduate degrees in the quantitative and/or physical sciences (e.g., chemistry, computer science, engineering, mathematics, or physics) who wish to pursue a doctoral degree at the interface of the chemical, physical, engineering and biological sciences.

In the first year, students will complete four laboratory rotations of their choice as well as take courses related to their interests. The curriculum is designed to familiarize students from a quantitative sciences background with the concepts and nomenclature of modern biomedical research in an expeditious and efficient fashion. Following the completion of the first year, students may enter any of the following Ph.D. programs: Biochemistry, Biological Sciences, Cancer Biology, Cell and Developmental Biology, Chemical and Physical Biology, Chemistry, Human Genetics, Mathematics, Microbe-Host Interactions, Molecular Pathology and Immunology, Molecular Physiology and Biophysics, Neuroscience, Pharmacology, and Physics. Based on their field of research, students are welcome to pursue doctoral scholarship in the School of Medicine, the College of Arts and Science, and the School of Engineering.

Religion

CHAIR James P. Byrd

ASSOCIATE DEAN FOR GRADUATE EDUCATION AND RESEARCH James P. Byrd

PROFESSORS EMERITI/A J. Patout Burns, Larry Churchill, Paul R. Dokecki, Volney P. Gay, Thomas A. Gregor, Frank Gulley Jr., Charles H. Hambrick, Peter C. Hodgson, Joseph C. Hough Jr., Douglas A. Knight, Leah Marcus, Sallie McFague, M. Douglas Meeks, Bonnie J. Miller-McLemore, Daniel M. Patte, Jack M. Sasson, Richard M. Zaner

PROFESSORS Victor Anderson, Sandra Barnes, James P. Byrd, Robert Company, Erik Carter, Paul J. DeHart, Dennis C. Dickerson, William Franke, Lenn E. Goodman, Jacobus J. Hamman, Joel F. Harrington, James Hudnut-Beumler, Peter Lake, Thomas McGinn, Keith G. Meador, Bruce Morrill, David Price, Joerg Rieger, Laurel C. Schneider, Fernando F. Segovia, Choon-Leong Seow, Emilie M. Townes, David J. Wasserstein

ASSOCIATE PROFESSORS Ellen T. Armour, Gregory F. Barz, Vanessa Beasley, Beth Ann Conklin, Idit Dobbs-Weinstein, Juan Floyd-Thomas, Stacey Floyd-Thomas, Kathy L. Gaca, Leor Halevi, Paul C. H. Lim, Herbert R. Marbury, Thomas McGinn, Richard McGregor, David A. Michelson, Joseph L. Rife, Betsey A. Robinson, Allison Schachter, Phillis I. Sheppard, Melissa Snarr

ASSISTANT PROFESSORS Stephanie Budwey, Anand V. Taneja, Alexis S. Wells-Oghoghomeh

DEGREES OFFERED: Master of Arts, Doctor of Philosophy

COURSES OFFERED: [REL](#), [RLST](#)

Students may be admitted upon graduation from an accredited college with a baccalaureate degree or from an accredited seminary or graduate school with a post-baccalaureate degree. Ordinarily, students with only the baccalaureate degree are admitted to the M.A. program. Successful completion of the latter provides a foundation for doctoral studies but does not guarantee admission to the Ph.D. program. Students with an M.Div., M.T.S., or M.A. degree may be admitted directly to the Ph.D. program. Applicants with the B.A. degree are advised to consider not only the M.A. program in the Graduate School, but also the two-year M.T.S. program in the Divinity School of Vanderbilt University as preparation for Ph.D. work.

Degree programs are offered in ethics and society; Hebrew Bible; historical studies; critical studies in Asian, Islamic, and Jewish traditions; homiletics and liturgics; Jewish studies (M.A. only at present); New Testament; religion, psychology, and culture; and theological studies. Interdisciplinary studies, both within religion and in other areas of knowledge, are encouraged. The study of religion is pursued both as a critical, humanistic discipline, employing a variety of methodological perspectives, and as a theological discipline, interpreting religions and their historical, theological, and ethical heritage.

Master of Arts

The M.A. program is designed to enable students to explore personal interests or vocational options, to acquire a background for teaching at the secondary level, or to attain a foundation for further studies at the doctoral level. A total of 30 credit hours and a thesis are required for the first two programs described below, while the final two programs have special requirements.

1. *Specialty M.A.* This program involves a concentration in one of the subspecialties of religious study. Students will select a major of at least 12 hours and a minor of at least 6 hours from the following areas: ethics and society; Hebrew Bible; historical studies; critical studies in Asian, Islamic, and Jewish traditions; homiletics and liturgics; Jewish studies; New Testament; religion, psychology, and culture; and theological studies. The remaining hours may be chosen from the above areas or from other departments of the Graduate
2. *Cross-Disciplinary M.A.* This program, to which students are admitted under exceptional circumstances, provides an opportunity for students to relate one of the subspecialties of religious studies to an appropriate supportive discipline. Normally, 12 hours are taken in one of the areas listed under the specialty M.A., with the remaining hours taken in another department of the Graduate School. The thesis will attempt to integrate the methods and subject matters of the two disciplines in relation to a chosen
3. *Terminal M.A.* The terminal M.A., offered exclusively for D. students who elect not to complete the Ph.D. program, may be received by students who have demonstrated reading knowledge in at least one foreign

language at the level required for the M.A. degree; have completed 48 semester hours of formal, graded course work at the graduate level, including at least 24 hours at Vanderbilt; have passed an oral examination conducted by a committee of faculty members from the Graduate Department of Religion; and do not seek candidacy for the Ph.D. degree.

4. *Master's Degree in Passing.* D. candidates may earn the M.A. degree upon completion of at least 42 hours of graduate study, satisfaction of the language requirements, passing of the Ph.D. qualifying exam, and approval of the dissertation proposal according to the GDR guidelines.

M.A. candidates demonstrate reading competence in foreign languages, ancient or modern, as required in the program or area of concentration. Students should consult area policies for specific requirements. In most cases, however, reading knowledge in one foreign language is required for the M.A. Students will normally satisfy this requirement by performing satisfactorily in the departmentally administered Ph.D. language examination, taking and passing with the grade of B+ or higher a Vanderbilt University course designed specifically to teach graduate students to use the language in research, or by presenting an acceptable record of at least 12 hours (or its equivalent) in a language. Candidates specializing in Hebrew Bible or New Testament are expected to work with the original texts in Hebrew or Greek. Students designating Greek or Hebrew as the foreign language may not count introductory courses in these languages toward the requisite 30 hours for the degree.

Joint J.D.-M.A. Program. Students who have been admitted to both the Law School and the Graduate School may work toward the J.D. and the M.A. in religion concurrently. Six hours of religion credits will be accepted toward the J.D. degree, and 6 hours of law credits will be accepted toward the M.A. in religion. The joint program normally takes four years. For further information, write to the chair of the Graduate Department of Religion.

Doctor of Philosophy

Ph.D. programs are currently available in the following areas of major concentration: ethics and society; Hebrew Bible; historical studies; critical studies in Asian, Islamic, and Jewish traditions; homiletics and liturgics; New Testament; religion, psychology, and culture; and theological studies. Students applying to each of these areas may also apply for a fellowship from The Program in Theology and Practice (vanderbilt.edu/theology-and-practice/).

Candidates for the Ph.D. degree must demonstrate reading knowledge of one modern language of research, a second language as designated and approved by the area and the GDR, and additional languages as specified by the area (see area requirements). Each of the areas of major concentration specifies which languages are acceptable for its students. The requirement for modern languages may be satisfied by taking and passing with the grade of B+ or higher a Vanderbilt University course designed specifically to teach graduate students to use the language in research, or by passing the departmental reading examination. Beyond this department-wide requirement, in biblical studies a knowledge of Hebrew or Greek is required, and in some areas of historical studies a knowledge of Latin or Greek is required. Students should be prepared to learn such other languages, ancient and modern, as may appear requisite for scholarly interests. Students should check with their area directors concerning specific requirements.

Certificate Programs

Students enrolled full time in the M.A. or Ph.D. programs may earn graduate certificates in two areas: (1) Jewish Studies (offered through the interdisciplinary program in Jewish Studies, as.vanderbilt.edu/jewishstudies/graduate/certificate-program/) and (2) Religion, Gender, and Sexuality Studies (offered through the Carpenter program in Religion, Gender, and Sexuality Studies, divinity.vanderbilt.edu/programs/carpenter/carpenter.php).

Spanish and Portuguese

CHAIR Andrés Zamora

DIRECTOR OF GRADUATE STUDIES Benigno Trigo

PROFESSORS EMERITI Susan Berk-Seligson, Victoria A. Burrus, Cathy L. Jrade, C. Enrique Pupo-Walker, Edward H. Friedman

PROFESSORS Earl E. Fitz, Ruth Hill, William Luis, Philip D. Rasico, Benigno Trigo, Andrés Zamora

ASSOCIATE PROFESSORS Christina Karageorgou-Bastea, Emanuelle Oliveira-Monte, José Cárdenas Bunsen

ASSISTANT PROFESSORS Luis F. López González, N. Michelle Murray, Anna Castillo

DEGREES OFFERED: SPANISH. Master of Arts, Doctor of Philosophy; SPANISH-PORTUGUESE. Master of Arts, Doctor of Philosophy

COURSES OFFERED: [PORT](#), [SPAN](#)

The Department of Spanish and Portuguese does not accept external applications for a terminal master's degree. Only students planning to pursue a Ph.D. in Spanish or in Spanish and Portuguese are accepted into the program. All students will complete the requirements for and earn a Vanderbilt M.A. in Spanish or in Spanish and Portuguese as a step toward the doctoral degree. Subject to the approval of the director of graduate studies, students entering the program with a master's degree or with graduate studies elsewhere may transfer up to 15 hours of graduate credit. An M.A. in Spanish or in Spanish and Portuguese is awarded after successful completion of 30 credit hours of course work and an M.A. thesis in the form of a publishable paper. For the M.A. in Spanish, knowledge of Portuguese or another foreign language is also required. For the combined M.A. in Spanish and Portuguese, no further language study is required.

All doctoral candidates must pass a take-home comprehensive examination based on a reading list of key works, present and defend a dissertation proposal, and complete and defend a dissertation.

The Ph.D. program in Spanish requires 63 credit hours of course work, which includes the 30 credit hours corresponding to the M.A. and 9 credit hours for a minor, which may be Portuguese, a certificate program in Latin American studies, or another approved program of courses from one or more departments, as well as additional course work in Spanish. There is no additional language requirement beyond that required for the M.A.

The combined Ph.D. in Spanish and Portuguese requires 66 credit hours of course work, which includes the 30 credit hours of the M.A. and additional course work reflecting both areas. No minor is necessary. There is no additional language requirement.

Specific program requirements are described under the Graduate Studies tab on the Department of Spanish and Portuguese website.

Second Language Studies

DIRECTORS Patrick Murphy, Elyse Petit, and Silke Schade

CERTIFICATE OFFERED: SECOND LANGUAGE STUDIES

COURSES OFFERED: [SLS](#)

Vanderbilt University's Departments of French and Italian, Spanish and Portuguese, and German, Russian and East European Studies jointly oversee a Graduate Certificate in Second Language Studies. The courses and co-curricular programming offered through this certificate engage graduate students in critical reflection about current research in second language acquisition and foreign language teaching, thereby enhancing their ability to develop as teachers and succeed in a competitive job market. Any student enrolled in a graduate program at Vanderbilt is eligible to apply for the Graduate Certificate in Second Language Studies. Acceptance to the program requires the approval of the student's primary adviser and the director of the program in SLS. Designated graduate courses successfully completed at Vanderbilt prior to admission to the program may be counted toward the certificate requirements with the approval of the director of the program.

Requirements for Graduate Certificate in Second Language Studies

- *9 credit hours of course work, which includes:*
 - *two required courses (6 credit hours): SLS 6030 (Foreign Language Learning and Teaching), and SLS 7040 (Second Language Acquisition: Current Theories and Research) or SLS 8090 (Special Topics in Second Language Studies)*
 - *a minimum of 3 credit hours from the following list of courses:*
 - EDUC 6020 Culturally Responsive Pedagogy*
 - EDUC 6310 Classroom Ecology*
 - EDUC 6530 Educational Linguistics and Second Language Acquisition*
 - EDUC 6570 Teaching Second Language Literacy*
 - PSY-GS 8360 Human Cognition*
 - PSY-GS 8480 Educational Neuroscience*
 - SPAN 6020 Ibero-Romance Philology*

Note: Students may seek approval from the director of the SLS certificate program to include other relevant courses offered at Vanderbilt.

- Completion of at least two professional development workshop series offered through the Center for Second Language Studies. The center typically offers a professional development workshop series each semester.
- Additional teaching experience, which involves completion of at least one of the following activities:
 - Work as a teaching assistant or teaching apprentice in a class designed for undergraduate minors and/or majors. The work should include consulting with the professor on syllabus design, attending classes, and teaching one or two units.
 - The Certificate in College Teaching offered by the Center for Teaching. This program is non-credit-bearing and involves general orientation to college teaching, instructor authority, and diversity.
 - The Certificate in College Humanities Teaching and Learning offered by the Center for Teaching. This program is non-credit-bearing and involves developing an understanding of larger issues related to teaching in different institutional contexts.
 - Presentation of two Second Language Studies-related research projects at conferences.
 - Contribution to the Center for Second Language Studies' crowd-sourced database Language Panda
- Final presentation: Upon completion of the requirements for the certificate program in SLS, each student will give a thirty-to-forty minute public presentation in the Center for Second Language Studies reviewing an area of interest or specialization in second language development and/or foreign language pedagogy. This presentation will serve as a formal exercise in describing expertise in second language studies in preparation for a job interview.
- The conferral of the certificate requires a cumulative GPA of 3.5 and successful completion of all the aforementioned requirements.

Sociology

CHAIR Holly J. McCammon

DIRECTOR OF GRADUATE STUDIES Joshua Murray

PROFESSORS EMERITI George Becker, Karen Campbell, Jack P. Gibbs, Walter R. Gove, Gary F. Jensen, Ronnie Steinberg

PROFESSORS André Christie-Mizell, Daniel B. Cornfield, David J. Hess, Larry W. Isaac, Holly J. McCammon, Jonathan M. Metzl

ASSOCIATE PROFESSORS Laura M. Carpenter, Shaul Kelner, Richard Lloyd, Joshua Murray, Evelyn Patterson, Mariano Sana, Lijun Song

ASSISTANT PROFESSORS Christy Erving, Alexandre Frenette, Patrick Greiner, Bianca Manago

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [SOC](#)

The sociology program prepares students for research and teaching careers in academic and policy settings. Students are exposed to a wide range of sociological works and research methods. Emphasis is on becoming an independent social researcher and teacher. Students have an opportunity to work closely with faculty members, in part because of a low ratio of graduate students to faculty members.

The master's degree requires 36 hours of course work: 6301, 6302, 6310, 6311, 6312, 7500, and 18 hours of electives. Also, students must write a master's paper that must be finished before their fifth semester to receive a master's degree.

Students must satisfy all of the master's degree requirements in order to receive a Ph.D. In addition, Ph.D. degree course work requirements consist of a teaching workshop (7400) and 33 hours of electives (up to 20 hours of which may be 8999 or 9999). Students must pass two special area exams, defend a dissertation proposal, complete a dissertation, and defend a dissertation to receive a Ph.D. degree.

Students may request the transfer of credit hours of eligible, graduate course work performed at another institution, subject to the approval of the director of graduate studies, the department chair, and the Graduate School. However, these requests are not always honored.

Special Education

CHAIR Joseph H. Wehby

DIRECTOR OF GRADUATE STUDIES Robert M. Hodapp

DIRECTOR OF PROFESSIONAL STUDIES Alexandra Da Fonte

PROFESSORS Marcia Barnes, Erik Carter, Laurie Cutting, Douglas Fuchs, Lynn S. Fuchs, Mary Louise Hemmeter, Robert M. Hodapp, Ann P. Kaiser, Jeanne Wanzek

PROFESSOR OF THE PRACTICE Kimberly Paulsen

ASSOCIATE PROFESSORS Erin E. Barton, Jeannette Mancilla-Martinez, Joseph H. Wehby, Jennifer Ledford

ASSOCIATE PROFESSORS OF THE PRACTICE Alexandra Da Fonte, Naomi Chowdhuri Tyler, Andrea M. Capizzi

RESEARCH ASSOCIATE PROFESSOR Tamara Stambaugh

ASSISTANT PROFESSORS Elizabeth Biggs, Joseph Lambert, Blair P. Lloyd

ASSISTANT PROFESSOR OF THE PRACTICE Rachel Schles

LECTURERS Nea Houchins-Juarez, Johanna Staubitz, Brenna Tally Simmons

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [SPED](#)

The program of study is based in the multidisciplinary body of knowledge relevant to the understanding, education, and treatment of persons with disabilities. The Ph.D. degree is composed of three major elements of course work: core studies in special education, including 9 hours of proseminar in special education; at least 12 formal course hours in research methods; and a 15 hour minor or related area of study. The program of study will be planned individually with the major professor and approved by the student's qualifying committee. In addition, the program requires demonstration of competence in research methods, in college teaching, and in supervision. Students who enter without a master's degree may earn a thesis-based M.S. degree while working on their Ph.D.

Academic Life Coach

Graduate students often face challenges during their time at Vanderbilt. The Academic Life Coach supports graduate students through individual coaching and group programming around effective time and stress management, resilience, conflict resolution, navigating academic relationships, and juggling work/life responsibilities. The Academic Life Coach works in collaboration with the Student Care Network and can connect students to appropriate resources that best meet their needs. For additional information on Academic Life Coach services, visit gradschool.vanderbilt.edu/lifecoach/.

Academic Regulations

Vanderbilt's students are bound by the Honor System inaugurated in 1875. Fundamental responsibility for the preservation of the system inevitably falls on the individual student. It is assumed that students will demand of themselves and their fellow students complete respect for the Honor System. All work submitted as a part of course requirements is presumed to be the product of the student submitting it unless credit is given by the student in the manner prescribed by the course instructor. Cheating, plagiarizing, or otherwise falsifying results of study are specifically prohibited under the Honor System. The system applies not only to examinations but also to written work and computer programs submitted to instructors. The student, by registration, acknowledges the authority of the Graduate Honor Council.

The university's Office of Student Accountability has original jurisdiction in all cases of non-academic misconduct involving graduate and professional students.

Students are expected to become familiar with the Rules Governing the Graduate Honor Council of Vanderbilt University, available at the time of registration. It contains the constitution and bylaws of the Graduate Student Honor Council, Appellate Review Board, and related regulations.

Detailed descriptions of Honor System violations and procedures are also available on the web at studentorg.vanderbilt.edu/gsc/honor-council.

Academic Requirements

Candidates for graduate degrees must have satisfactorily completed all residency, academic courses, and thesis or dissertation requirements, have passed all prescribed examinations, and be free of indebtedness to the university at the time of graduation.

The academic requirements described on the following pages have been established by the Graduate Faculty and are applicable to all graduate students at Vanderbilt.

Individual degree programs may have additional requirements. Students are advised to refer to the various program descriptions listed in this catalog and to consult their major advisers for requirements in the specialty of interest.

Students who were completing undergraduate or advanced degrees at the time of their admission must provide to the Graduate School, before initial registration, an official final transcript showing that the degree has been received and the date it was granted.

Responsible Conduct in Research

Vanderbilt University has an obligation to model, teach, and actively promote the responsible conduct of research in scholarship and science. Research integrity is fundamental to good research and crosses all

disciplines and areas of focus. Vanderbilt's approach incorporates online and discussion-based content based on the individual's experience level and discipline. In addition to online education, individuals are expected to participate in discussion-based sessions to further explore the issues and challenges in conducting ethical research and . All new graduate students are required to take the Collaborative Institutional Training Initiative (CITI) course for their discipline during their first semester of study. Some are also required to participate in additional discussion-based RCR education, prior to completing their degrees. Each graduate program has defined the content of the discussion-based program for its students, based on the specific training needed within that disciplines. To find out more about your department's requirements, please check with the department chairman or [director of Graduate Studies \(DGS\)](#).

Intent to Graduate

An Intent to Graduate form must be submitted during the semester in which the student expects to receive a degree. Graduation dates are available at the Graduate School website. Students will receive a notification when the electronic Intent form for the end-of term conferral dates becomes available in the student's landing site in YES. All dates and deadlines will be posted on the academic calendar. If a student plans to graduate "IntraTerm" (January 31, February 28, March 31, May 31, June 30, August 31, September 30, October 31), these forms can be found at the Graduate School website and are to be submitted to the Graduate School at least fifteen days prior to the conferral date.

Requirements for the Master's Degree

The following master's degrees are awarded in the Graduate School: master of arts, master of science, master of fine arts, and master of liberal arts and science. Students should check regulations of their particular program; many have requirements in addition to those listed here.

Residence

The candidate for the master's degree shall spend at least one academic year of graduate study at Vanderbilt. Students enrolled in the online master of science in computer science program are exempt from the residency requirement.

Course Work

A minimum of 30 semester hours is required for the master's degree. This includes enrollment in at least 24 semester hours of formal course work plus enrollment in 6 additional hours of didactic course work or 6 credit hours of research. All requirements for the master's degree must be completed within a six-year period calculated from the student's first semester of enrollment in the Graduate School. Online master of science in computer science students must complete their program requirements within twenty-one months of initial enrollment. International students should contact the Office of International Student and Scholar Services concerning time limitations for completion of master's degrees.

"Formal, didactic coursework" is approved courses taken for credit other than thesis and dissertation research courses. Students should check departmental regulations for the number of "formal course" hours required for their particular program. On the recommendation of the student's program and approval of the Graduate School, credit up to 6 semester hours toward the master's degree may be transferred from graduate schools in accredited institutions, or other schools of the university.

An incoming graduate student deficient in areas the major department considers prerequisite to a graduate program shall take such course work without graduate credit, in addition to the courses required for the advanced degree.

Thesis

Electronic thesis submission is required through the VIREO ETD (Electronic Theses and Dissertations) website (vireo.library.vanderbilt.edu). Links on the Graduate School webpage outline the process. (See "Theses and Dissertations" under "Academics.") There are no fees associated with electronic submission.

Theses will be placed in the Vanderbilt University Institutional Repository. The student must provide the Graduate School with copies of the title page and the abstract. The title page must contain the original signatures of at least two graduate faculty members in the student's program. The abstract must contain the original signature of the thesis adviser. Specifications about required format, are available at

gradschool.vanderbilt.edu/academics/theses.

Due dates are listed on the academic calendar.

Some programs require an examination or defense in addition to the thesis.

Non-Thesis Programs

Certain programs offer non-thesis master's degree programs and specify additional course work up to at least 30 hours. Some programs require an examination in addition to the 30 hours in lieu of a thesis. Not later than fourteen days prior to the end of the term, the student's department will verify that all degree requirements have been completed.

Master's Degree in Passing

Certain programs offering the Ph.D. degree will award a master's degree in passing. The minimum requirements are 30 hours of graduate study and a GPA of 3.0 or better. Students should check with their program to determine if this option is available and if additional course work and/or a thesis are required.

Final Examination

The candidate for the master's degree may, at the discretion of the program faculty, be required to take a final examination in the field of specialization. Such examination shall be completed not later than fourteen days before the end of the term in which the degree is to be granted.

Requirements for the M.L.A.S. Degree

A minimum of 30 semester hours of academic credit (ten courses) is required, including a Core Course (MLAS 6700) and a Capstone (MLAS 7340). Students must complete at least eight M.L.A.S. courses (24 hours) with the option of selecting the remaining two courses (6 hours) from the regular course offerings available to graduate students. Students normally take only one course each semester. All work must be completed within six years of the initial registration. A maximum of 6 credit hours may be transferred from graduate schools of other accredited universities and will count as part of the 6-hour non-M.L.A.S. course work. (M.L.A.S. discount tuition does not apply to the courses from the regular schedule.)

Curriculum

A range of seminars is offered in the humanities, social sciences, and natural sciences as well as core courses for beginning students and capstone workshops for advanced students.

Requirements for the Ph.D. Degree

The degree of doctor of philosophy is awarded in recognition of high attainment in a special field of knowledge, as evidenced by examination and by a dissertation presenting the results of independent research. General requirements are listed below. In many programs there are additional requirements, and students should carefully check regulations in their particular programs.

Admission to Candidacy

Admission to the Graduate School does not imply admission to candidacy for the Ph.D. degree. To be admitted to candidacy the student must satisfy the language requirements, if any, in the program, and must pass a qualifying examination. The examination must be scheduled and passed within four years of the student being admitted to the program. Upon petition to the Graduate School, a one-year extension may be granted to complete this requirement. The examination will be administered by the student's Ph.D. committee, which will supervise subsequent work toward the degree. Upon completion of these requirements the Ph.D. committee will recommend to the Graduate School that the student be admitted to candidacy.

Residence and Course Work

The Ph.D. degree requires at least three academic years of graduate study at Vanderbilt. A student must complete 72 hours of graduate work for credit, of which a minimum of 24 hours in formal, didactic course and seminar work in the Vanderbilt Graduate School is required. In most programs students are required to present considerably more hours in formal course work than the 24-hour minimum. The remainder of the 72 hours, above the program requirements in formal course hours, may be in dissertation research hours, in special readings,

and in transfer credit if applicable. Performance in dissertation research does not affect the grade point average.

“Formal, didactic course work” is approved courses taken for credit other than thesis and dissertation research courses. Students should check departmental regulations for the number of “formal course” hours required for their particular program.

All students working full time toward the Ph.D. must register each fall and spring semester. When the required 72 hours of course work have been completed, registration for dissertation research without hourly credit applies; this reflects full-time effort on research and confers full-time student status. The minimum tuition of \$200 is charged.

Ph.D. Committee

The Ph.D. committee is appointed by the Graduate School on the advice of the chair or director of graduate studies of the program. The committee consists of not fewer than four members of the Graduate Faculty. Three of the members must be graduate faculty from within the student’s department/program and one from outside the program. Any variation of the committee makeup must be approved by the Graduate School. The committee must be appointed by the Graduate School no less than two weeks before the time the student expects to take the qualifying examination.

The functions of the Ph.D. committee are (a) to administer the qualifying examination, (b) to approve the dissertation subject, (c) to aid the student and monitor the progress of the dissertation, and (d) to read and approve the dissertation and administer the final oral examination.

Graduate Faculty include all full-time tenured and tenure-track Vanderbilt University faculty members with primary appointments in departments or programs offering the M.A., M.S., and/or Ph.D. degrees. Those tenured or tenure-track faculty having secondary appointments in departments offering the M.A., M.S., and/or Ph.D. degrees will also be considered Graduate Faculty members.

Appointment of other faculty members to the Graduate Faculty can occur upon recommendation by the faculty member’s department and with the approval of the Graduate School. Such appointment would require a majority vote by the Graduate Faculty of the department/program, plus the recommendation of the chair/director of graduate studies and approval by the Graduate School. Such appointments are restricted to full-time faculty members with the rank of assistant professor or above, with a primary or secondary appointment in programs offering the M.A., M.S., and/or Ph.D. degree. Faculty members appointed to the Graduate Faculty in this manner have all the privileges of Graduate Faculty, including supervising graduate students’ research.

Other faculty can be assigned some duties normally reserved for Graduate Faculty on the recommendation of the chair and/or director of graduate studies of the department and with the approval of the Graduate School. The duties assigned must be specified and time-limited, e.g. membership on a Ph.D. committee or teaching a graduate-level class/ seminar in a particular semester. On occasion, these duties within a program or department may be specified without a specific time limit, e.g. standard graduate teaching duties or membership on any Ph.D. committee in the program. Faculty with limited responsibilities will not be permitted to direct theses or dissertations.

Faculty members, or others carrying out research or scholarship from outside universities, may also be appointed to serve on a specific student’s Ph.D. committee without being considered for Graduate Faculty status, e.g., a faculty member from outside of Vanderbilt, a faculty member from a professional school such as law or medicine, or a scientist working in a national laboratory, with the approvals of the director of graduate studies or chair of the student’s department and of the Graduate School. The request to appoint someone in this manner must be accompanied by a short letter of justification explaining what expertise this person brings to the student’s committee along with a copy of the faculty member’s curriculum vitae.

Qualifying Examination

The purpose of the qualifying examination is to test the student's knowledge of the field of specialization, to assess familiarity with the published research in the field, and to determine whether the student possesses those critical and analytic skills needed for a scholarly career.

The examination is conducted by a Ph.D. committee.

The qualifying examination may be administered at any time during the school year and shall be completed within a period of four weeks. Before a qualifying examination can be scheduled, the student must have completed at least 24 hours of graduate work (to include all course work required for the degree) and the language requirement, if any. In some programs the student may be required to demonstrate basic competence in the discipline through a written preliminary examination prior to the actual qualifying examination.

All departments and other units offering Ph.D. programs must set a maximum time limit within which a student, under normal circumstances, is required to take the qualifying examination. That maximum time limit must not exceed four years.

The qualifying examination may be written or oral, or both. The Graduate School must be notified of the time and place of the qualifying examination at least two weeks in advance. The qualifying examination is not a public examination, and voice recordings of it are not permitted. A student is allowed only two opportunities to pass the qualifying examination. The qualifying examination results form, signed by the committee members and the director of graduate studies for the program, shall be forwarded to the Graduate School immediately after the examination.

When the student has passed the qualifying examination, the Ph.D. committee shall recommend to the Graduate School that the student be admitted to candidacy for the degree.

Dissertation

A candidate for the Ph.D. degree must present an acceptable dissertation. The dissertation demonstrates that the candidate has technical competence in the field and has done research of an independent character. It must add to or modify what was previously known, or present a significant interpretation of the subject based upon original investigation. The subject of the dissertation must be approved by the student's faculty adviser and Ph.D. committee.

The dissertation must be completed within four years after a student has been admitted to candidacy for the degree. Upon petition to the Graduate School, a one-year extension of candidacy may be granted. If such a period has expired without successful completion of the dissertation, the student may be dismissed from the Graduate School. Readmission to the Graduate School, and to candidacy, requires application to the Graduate School, with approval of the program faculty. In such cases the student may be required, by the Graduate School or by the Ph.D. committee, to demonstrate competence for readmission by taking a qualifying examination or additional course work.

The candidate must submit a copy of the completed dissertation to the Ph.D. committee at least two weeks prior to the dissertation defense. The committee reviews the dissertation and conducts the final examination.

Students must also upload the dissertation for required format review in the VIREO Electronic Thesis and Dissertation website, vireo.library.vanderbilt.edu, at least two weeks prior to the dissertation defense. The final dissertation and accompanying requirements must be submitted through VIREO by the appropriate deadline specified on the academic calendar. Requirements include the title page with signatures of at least a majority of the Ph.D. committee, the signed abstract with a maximum of three hundred fifty words, properly formatted, a Curriculum Vitae, and the Survey of Earned Doctorates completion certificate.

Style specifications templates and VIREO submission instructions are listed at gradschool.vanderbilt.edu/academics/theses.

Students in foreign language departments may submit manuscripts in a language other than English. The abstract, however, must be in English.

Multi-Part and Journal Article Format

You may use a multi-part presentation format for combining original research that has been conducted in two or more related or non-related areas, or for presentation of combined journal articles (published or submitted for publication). You should organize the parts or articles into chapters, with well-defined subheadings, including an introduction, methods, results and discussion. Each chapter may contain its own list of references and appendices, or you may list them all at the end, depending on the custom of your discipline.

When using this format, the thesis or dissertation should nonetheless consist of an integrated argument that binds the chapters together. You should include the appropriate preliminary pages, an introduction presenting the general theme of the research, and a conclusion summarizing and integrating the major findings. Any additional appendices related to the dissertation as a whole or any general references from the introduction, conclusion or transitional sections should come at the end of the dissertation.

Permission to Include Your Own Previously Published or Co-Authored Material

When you have previously published portions of your thesis or dissertation as an article or book chapter, you must ensure the work may also be published as part of the dissertation or thesis. The standard provisions of copyright law [<https://researchguides.library.vanderbilt.edu/copyright>] regarding quoted and previously published material under copyright apply to the publication of theses and dissertations. Many publishers provide exceptions to work published as part of graduation requirements and this is often clearly outlined as part of the publication agreement signed by the author. In order to include your own previously published or co-authored material in your thesis or dissertation, you must comply with the following:

1. You must be the first author, or obtain permission from your committee, to be uploaded as an Administrative file in Vireo.
2. The article must be based on research completed while you were enrolled at Vanderbilt University.
3. You must have permission from the publisher to reuse the work, which should be uploaded to Vireo as an Administrative file. The record of permission may take the form of the publishing agreement, a copy of the publisher's webpage describing reuse rights, or an email approval from the publisher. You should also identify which chapters are associated with which articles when prompted within Vireo.
4. If there are co-authors, you must obtain the permission of all co-authors to include the work in the thesis or dissertation both as a matter of copyright law and professional courtesy. Include these permission (email approval is acceptable) as an Administrative file in Vireo.
5. You must properly acknowledge previously published material and any co-authors within the text of your manuscript. This would typically take the form of a statement beneath the relevant chapter heading, such as "This chapter is adapted from [Title] published in [Journal] and has been reproduced with the permission of the publisher and my co-authors [List co-authors]" and include the full citation required by the publisher, if any, or appropriate to your discipline.

If the work is submitted to the ProQuest database, ProQuest will scan the document to ensure it contains no copyrighted material without consent and proper citation.

Inclusion of Third-Party Content in Your Dissertation; Copyright & Fair Use Issues

If you are including content in your dissertation not authored or created by you, consider copyright issues. If your use of the content would exceed fair use under the Copyright Act, then you will need to seek the copyright holder's permission in order to use the material. Obtaining copyright permissions often takes time and should not be left until the last minute.

You should discuss questions about copyrighted material with your dissertation advisor or contact the VU Librarian for Copyright and Scholarly Communications at disc@vanderbilt.edu for help evaluating fair use or obtaining permissions.

Copyright of Your Thesis or Dissertation

Your thesis or dissertation is automatically protected by copyright as soon as it is fixed in a tangible form, such as being saved as an electronic file. Although not required, it is good practice to include the copyright symbol, your name, and the year on the title page of your work (© 2017 by [your name]).

You also may choose to register your copyright, which will gain you additional protections in case of litigation for copyright infringement. You can file a copyright registration online directly with the U.S. Copyright Office. The U.S. Copyright Office charges a fee of \$45.00.

Publishing Agreements

You will be asked to agree to the license to deposit your submission to the Vanderbilt Institutional Repository. The Library, with the Vanderbilt Institutional Repository, enhances the metadata provided with your dissertation and adds your record to discovery tools like the Library Catalog and WorldCat, making it easily findable for scholars worldwide. The library also maintains the technical infrastructure of the repository. If you plan to make your dissertation open access, we can assist you in understanding the options for licensing. If your dissertation makes use of copyrighted content, you will want to think early on about whether you may rely on fair use or need to acquire licenses. We will be glad to meet with you to discuss the requirements of your particular project.

Ph.D. students also have the option to request deposit of your submission with ProQuest, at no additional cost to you. If you elect to deposit your submission with ProQuest, you must also agree to the ProQuest license. This agreement is entirely between you and ProQuest. Vanderbilt's sole responsibility is to pass on the license agreement and your work to ProQuest. Please contact ProQuest Dissertation Publishing, at 1(800) 521-0600 or disspub@proquest.com with any questions.

Embargos

Dissertations are intended to be of benefit to the academic community and to society in general, and thus are required to be publicly available. This is accomplished by placing a copy in the Vanderbilt Institutional Repository. In some instances, students may request a delay in the release or posting of their dissertations for a limited time period. This can be done, for example, to protect intellectual property, to allow time to file a patent application, or to coordinate with the timing of publication in another form. In no circumstance will the release of the dissertation be delayed for more than two years. Unless requested for a shorter period of time, any request to delay public release will expire at the end of two years and the Graduate School will proceed with the public release through the library. Metadata, including the abstract, about your submission will still be visible in the Vanderbilt Institutional Repository, thereby indicating that your submission was accepted. You should discuss any anticipated hold on publication with your advisor. If selecting the ProQuest publishing option, be sure that you make the same embargo selection under the Vanderbilt options. Once your submission has been released to ProQuest, we have no ability to retract it.

If, after consultation with your advisor, you would like to request a temporary embargo, you can elect from the following: — No embargo and release immediately for worldwide access — Six (6) month embargo — Twelve (12) month embargo — Twenty-four (24) month embargo.

If you, after consultation with your advisor, determine that you need to extend your embargo beyond your initial selection, you can only do so with permission from the Graduate School. If you have questions about your embargo, you may email etdadmin@vanderbilt.edu.

Extra Copies

The Graduate School recommends Campus Copy for procuring bound copies of theses and dissertations. You may contact them directly at 615-936-4544, or online at printingservices.vanderbilt.edu.

Final Examination

The candidate must pass his or her dissertation defense by the appropriate deadline for the date the degree is to be conferred, or by March 24 for May graduation. All conferral dates and deadlines are listed on the academic calendar. The final oral examination is administered by the student's Ph.D. committee and is on the dissertation

and significant related material; the student is expected to demonstrate an understanding of the larger context in which the dissertation lies. The public is invited to attend the final examination, which is announced in advance in Vanderbilt's electronic calendar.

The chair of the Ph.D. committee or the director of graduate studies of the program, after consultation with the candidate, shall notify the Graduate School in advance of the place and time of the examination and the title of the dissertation. This should be done no later than two weeks prior to the examination. The Graduate School then formally notifies the Ph.D. committee and submits the defense notice to Vanderbilt's electronic calendar. The dissertation defense results form, signed by the committee members and the director of graduate studies for the program, should be forwarded immediately to the Graduate School.

Further Requirements

It should be understood that the requirements stated above are minimum and that individual programs may add others. Students are urged to consult individual program entries in this catalog and departmental chairs and directors of graduate studies to learn the requirements of programs in which they are interested.

Language Requirements for the Master's and Ph.D. Degrees

The language requirements, if any, for the master's and Ph.D. degrees in each graduate program are determined by the program faculty, and are set forth in this catalog in the section devoted to program descriptions and course offerings.

Foreign language requirements are usually met by demonstration of proficiency in one or more of the following: French, German, or Spanish. Certain programs either permit or require proficiency in other languages; and some others restrict the choice to certain combinations within this group. Students should refer to the various program statements in this catalog and should consult their advisers regarding specific requirements.

Examinations in languages are usually administered by the appropriate language faculty by arrangement with the program. As an alternative to certification of proficiency by examination, the Graduate School may accept certification from the program that the minimum requirement in a language has been met if the student is able to present an acceptable academic record of the equivalent of at least 12 semester hours in the language.

A student who has fulfilled the language requirement at another graduate school prior to entering Vanderbilt may, at the discretion of the program and the Graduate School, transfer the certification if the student does so within three years after having received it.

International students may petition the Graduate School through the program to substitute their native language for one of the usual languages required for the Ph.D. degree.

Registration

The normal academic load for full-time registration is 9 to 13 hours in the fall and spring semesters. Students registered for 9 or more credit hours in fall or spring are defined as full time. Those registered for 7 or 8 hours in fall or spring are considered three-quarter time, those registered for 6 hours in fall or spring are half time, and those registered for less than 6 hours in fall or spring are less than half time. In the summer term, 6 or more hours is defined as full time, 5 hours is three-quarter time, 3 to 4 hours is half time, and less than 3 hours is less than half time. After completing the hourly requirements for the degree, full-time students register for master's (7999) or Ph.D. (8999, 9999) research without hourly credit to reflect full-time effort on research. Certain programs offer a half-time Ph.D. research course (9995) for students who are able to devote only half-time effort to dissertation research.

During each semester currently enrolled students are asked to meet with their advisers and directors of graduate studies to plan their schedules for the coming semester. All students must later complete official registration at the appropriate time using YES (Your Enrollment Services).

All full-time graduate students, including those receiving scholarship, assistantship, fellowship, or traineeship

support through the university, must register each fall and spring semester with no breaks in registration to remain in good standing.

Changes in Registration

Changes in registration may be made through YES during the open enrollment period (the first ten class days of the semester) with consent of the major department. A student is not permitted to add or drop a course, change the number of hours in a variable-credit course, or change the audit status after the end of the open enrollment. A student may formally withdraw from a course after the end of the open enrollment with the permission of the department, and a grade of *W* will be given. A student is not permitted to withdraw from the course after the Last Day to Withdraw (see Graduate School calendar) except under certain circumstances. Failing the course is not considered one of the circumstances. Students should note, in the section on tuition and fees, the regulations concerning tuition obligations for courses dropped after the first week of the term.

Courses in which there is a significant change in subject matter each semester (e.g., special topics courses) may be repeated for credit within limits noted in the course listings of this catalog.

Grading System

The grading system in the Graduate School includes the letter grades *A*, *B*, *C*, and *F*. A student will not be granted graduate credit for any course in which a grade less than *C-* is received. Courses not designated as eligible to be repeated for credit may be repeated for grade replacement purposes. If a course was failed the last time it was taken, credit is awarded when the course is repeated with a passing grade. If a course was previously passed, no new credit will be earned. If a course previously passed is repeated and failed, credit originally earned for it is lost. In any case all grades earned are shown on the transcript. The most recent grade in a course replaces the previous grade in determining credit, in computing the grade point average, and in verifying the completion of degree requirements and progress toward the degree. Passed courses may be repeated only once. Failed courses may be repeated any number of times until passed. The letter *I* may be used at the discretion of the instructor in those cases in which the student is not able to complete work in the normal time. The notation *W* is entered onto the transcript when a student withdraws from a course or from the Graduate School. A grade point average of 3.0 is required for graduation.

Letter grades are assigned grade point values as follows:

A+ = 4.0	B- = 2.7
A = 4.0	C+ = 2.3
A- = 3.7	C = 2.0
B+ = 3.3	C- = 1.7
B = 3.0	F = 0.0

S/U grades are given every semester for all research courses (7999, 8999, and 9999), regardless of the number of hours registered. The accumulation of three (3) *U* grades over the course of study can lead to dismissal from the program and the Graduate School. No credit will be granted for courses in which a grade of *U* is received.

Students receive grades in all courses except those approved for credit/non-credit, audits, and some seminars. An *I* that is not replaced by a letter grade within one year may be changed to the grade *F* at the discretion of the instructor; otherwise, the *I* may become permanent and remain on the transcript as such.

Certain courses approved by the graduate faculty for credit/ non-credit or Pass/Fail count toward total hours. Courses that are strictly no-credit, however, do not count toward total hours or in calculating grade point average, although grades for such courses are entered on the student's record.

With the instructor's permission, students are permitted to audit certain courses. Students who audit are

expected to attend the course regularly. Students must be registered for regular courses in order to audit. Audits are listed on the student's transcript. Audits are limited to two per semester.

Grade Change Policy

For a student enrolled in the Graduate School, a grade recorded in the Office of the University Registrar may be changed only upon the written request of the instructor, endorsed by the appropriate official (usually an associate dean) within the school/college that offered the course, and then the approval of the associate dean of the Graduate School. An instructor's petition to change a grade must include a brief rationale for the change.

Changing a recorded grade is a serious matter and, in general, petitions will be approved only upon certification that the original grade was in error or, in the case of an Incomplete, that the outstanding requirement(s) have been completed. Request for exceptions to this policy should be directed to the associate dean of the Graduate School and will be considered on an individual basis; these may require additional certifications and approvals.

Academic Probation

A grade point average of 3.0 is necessary for graduation. Students who fall below an average of 3.0 are placed on probation for one semester. If the student's performance does not improve during that semester, the Graduate School and the appropriate department chair will decide whether to dismiss the student or to allow the continuation of probation. If at the end of the second semester the grade point average is still below 3.0, the student may be advised to withdraw or face dismissal. Students who earn a grade point average of 2.0 or less during their first semester of residence are subject to dismissal at the end of that semester. Accumulation of three *U* grades in research courses can lead to dismissal.

Student Grievances and Appeals

Students who believe their academic performance has not been judged reasonably or fairly, or who believe their intellectual contributions have not been fairly acknowledged, should discuss their concerns with the director of graduate studies in their program or, as necessary, the chair of the department. If the student's concerns cannot be resolved at the program or departmental level, the student may then request a further review of the issues in question by the associate dean for graduate studies or similar official in their school dean's office. The student may appeal the outcome of the school-level review to the Graduate School.

Credit

Courses not listed in this catalog that are numbered from 5000 to 9999 may be taken for credit by graduate students on the recommendation and consent of the faculty adviser and the director of graduate studies, unless some limit is noted in the description. Not all courses offered by various divisions of the university have been approved by the Graduate Faculty for graduate credit. In these cases, students should complete a "Request for Graduate Credit" form. In arranging schedules, students should consult their advisers and carefully check the Graduate School catalog for approved courses.

Students may register for graduate courses or other courses in the university on a non-credit basis—either to fulfill their own interests or to meet certain prerequisites and requirements. The designation "no-credit" presupposes the student's participation in the course, including written assignments and examinations. Grades are received and recorded in no-credit courses and tuition is billed at the regular hourly rate.

Credit Policy

Credit hours are semester hours; e.g., a three-hour course carries credit of 3 semester hours. One semester credit hour represents at least three hours of academic work per week, on average, for one semester. Academic work includes, but is not necessarily limited to, lectures, laboratory work, homework, research, class readings, independent study, internships, and practica. Some Vanderbilt courses may have requirements that exceed this definition.

Transfer Credit

Graduate credit may be transferred from graduate schools in accredited institutions. Transfer is made only on the recommendation of the chair or director of graduate studies of the major department and approval of the Graduate School.

A maximum of 6 semester hours of transfer credit may be applied toward the master's degree and 48 hours toward the Ph.D. (See requirements for the master's degree and Ph.D. degree elsewhere in this catalog.)

Only those hours in which the student has achieved the grade *B* or better will be considered for transfer. Grades earned on transferred credit do not affect the student's Graduate School average unless such courses are to be counted as didactic hours.

Students who want to transfer to the Graduate School from professional degree programs offered by other schools at Vanderbilt must submit a formal application for admission and are expected to do so not later than the end of their first year of graduate-level studies at Vanderbilt.

Credits earned through the Division of Unclassified Studies cannot generally be used toward a graduate degree at Vanderbilt University.

Special Non-Degree Students

Special non-degree student status is reserved for limited circumstances. It is not intended for students who seek regular admission or to be admitted later as degree-seeking students. Examples appropriate for special non-degree status include a student enrolled in an accredited university but will be in residence at Vanderbilt for up to one year, such as a student participating in an approved exchange program. Another example is a student enrolled for a degree at another accredited university and whose adviser becomes a faculty member at Vanderbilt. In those instances, the special student status at Vanderbilt is to maintain a connection to that faculty member and/or receive financial support while at Vanderbilt and completing the degree at their home university. Other circumstances may be considered on a case by case basis.

Students admitted as non-degree students may register for selected courses in areas where they are qualified. Such students must submit an application and transcript(s) of their previous academic work with the Graduate School. Approval of the instructor, the department in which the course is offered, and the Graduate School is required.

GRE scores are not required. Status as a non-degree student is expected to last no longer than one year. No more than 6 semester hours earned as a non-degree graduate student may be applied to graduate degrees at Vanderbilt.

Leave of Absence

The Graduate School requires continuous registration except for summer sessions. Students who want to interrupt their graduate study must petition the department, who on their behalf apply to the Graduate School for an authorized leave of absence. Leave of absence is granted for a maximum of one year. Those without authorized leave who do not register are dismissed from the Graduate School and are not considered students. If they want to resume graduate study at Vanderbilt, they must petition for reinstatement.

Leave of absence may be requested for personal reasons other than health and parental accommodation for up to 12 months and renewable for a maximum of four years.

Parental Leave

All students enrolled full-time in the Graduate School and supported by funding from either internal or external sources are covered by this policy. This includes students with funding through stipends, such as training grants or service-free fellowships, and students compensated for services, such as teaching or research assistants. Prior to and/or following childbirth or adoption of an infant, the primary caregiver (whether mother or father) will be allowed to take six weeks of parental leave. During this period, the student's current stipend, and, if applicable, funding for health insurance and tuition, will be continued without interruption. The student's enrollment status will be continued during this period as well.

Withdrawal

Students who intend to withdraw from the university should inform the department, who then informs the Graduate School in writing. Improper notification may result in academic and financial penalties.

Credit for Graduate Courses Taken as an Undergraduate

A qualified Vanderbilt University senior undergraduate may enroll in graduate courses and receive credit which, upon the student's admission to the Graduate School, may be applicable toward a graduate degree.

Undergraduate seniors interested in this option should review the regulations appearing in the Undergraduate Catalog and consult their advisers and the Graduate School. Undergraduates should note that those wanting to take 5000-level courses or above, whether under this option or not, must obtain the written approval of their academic adviser, the instructor of the course, and the Graduate School.

In certain special cases, credit may be transferred for graduate-level course work completed during undergraduate degree studies by a student at another accredited institution. The course hours must be in excess of the minimum required for the undergraduate degree and the course(s) must not be a required part of the undergraduate degree or major. Requests for such transfer of credit must be carefully justified by the student's major department and approved by the Graduate School.

Commencement

The university holds its annual Commencement ceremony following the spring semester. Degree candidates must have completed successfully all curriculum requirements and have passed all prescribed examinations by the published deadlines to be allowed to participate in the ceremony. A student completing degree requirements in the summer or fall semester will be invited to participate in Commencement the following May; however, the semester in which the degree was actually earned will be the one recorded on the diploma and the student's permanent record. Students unable to participate in the graduation ceremony will receive their diplomas by mail. Please refer to the Commencement webpage at vanderbilt.edu/commencement/ for complete information on the May ceremony.

Accelerated Graduate Program in Engineering

Students who enter Vanderbilt with a significant number of credit hours (20 to 30 hours), earned either through Advanced Placement tests or in college courses taken during high school, may be eligible for the Accelerated Graduate Program in Engineering. Through this program, a student is able to earn both a bachelor's degree and a master of science in about the same time required for the bachelor's degree, or slightly longer.

To be eligible for the program, a student must complete 86 hours (senior standing) by the end of the sophomore year with at least a 3.5 grade point average. With the approval of the student's adviser, the director of graduate studies in the student's major department, and the senior associate dean, students apply through the associate dean for graduate studies for admission to this accelerated dual degree program.

Upon admission to this program, a second "career" will be set up for the student which will allow the student to start taking graduate courses (course numbers > 5000) during the junior and senior years. These courses will be credited toward the master of science. Note that no double counting of courses is allowed (i.e., the student must meet the degree requirements for each degree independent of the other degree).

The student receives the bachelor's degree at the end of the fourth year and typically spends the summer finishing a master's thesis to complete the master of science. Further information can be obtained from the director of graduate studies of the student's major department.

Admission

Qualified applicants with bachelor's or comparable non-U.S. degrees are eligible for admission to the Graduate School. Applications from international students with three- year bachelor's degrees will also be considered. Admission is competitive and students are selected on the basis of their scholastic preparation and intellectual capacity.

Generally, minimum requirements for admission are these: an applicant should have completed or soon will complete a course of study equivalent to that required for the bachelor's degree at an accredited institution, maintained a minimum of a *B* average in undergraduate work, and maintained a *B* average in the field of expected graduate concentration. Individual programs in the Graduate School have additional requirements for admission.

Applications for admission are made electronically through the Graduate School website (vanderbilt.edu/gradschool).

Applicants must upload an unofficial copy of transcripts from prior undergraduate and graduate work as part of their online application for admission. Official transcripts are required only after an offer of admission is made and accepted. All admitted graduate students must submit all official transcripts prior to beginning their enrollment at Vanderbilt University. An official final transcript is required from all previously attended institutions of higher education (i.e., beyond high school). Incoming graduate students who are not able to provide evidence of prior degrees by the first day of classes are subject to having their classes canceled and may be subject to dismissal from the university.

Deadlines for fall applications range between December and January 15. Applicants should verify the deadline for the program to which they wish to apply by checking the website for that department or program. Typically, admission decisions for fall semester will be communicated by March 31 to all applicants whose files are complete by January 15.

The deadline for responses to offers of financial award and admission is April 15. If your reply is not received by April 15, the department may rescind the offer of admission and financial award.

Most programs do not admit students for the spring semester. Please check with the program in which you are interested before applying for spring semester admission.

Students seeking admission for the spring semester should file applications no later than November 1. Decisions are usually announced before December 1.

Further information regarding the application and admissions process is available at vanderbilt.edu/gradschool.

Graduate Record Examination

Submission of scores on the General Test of the Graduate Record Examination (GRE) is typically required as part of the application to the Graduate School, although some programs have now waived the GRE requirement. Refer to the appropriate department or program to confirm their GRE requirements. Some departments also require a report of the score on the Subject Test of the GRE before an application will be considered.

Information concerning the GRE may be obtained from Graduate Record Examinations, Educational Testing Service, Box 6000, Princeton, New Jersey 08541-6000, U.S.A., or the GRE website at gre.org.

Prior Degrees

It is the policy of Vanderbilt University to verify prior educational credentials for all admitted students who intend to matriculate. All matriculated students must provide official copies of transcripts and any other required supporting documentation to Vanderbilt University as part of the prior degree verification process. The Office of the University Registrar will review transcripts and other supporting documentation for authenticity and to confirm degrees earned prior to matriculation at Vanderbilt. Offers of admission are contingent on a student providing the required documentation.

Effective Spring 2022, incoming students will not be permitted to register for classes until they have provided the required evidence of prior degrees. Students for whom the Office of the University Registrar is unable to verify prior degrees may be subject to dismissal from the university.

Master of Liberal Arts and Science

Candidates for admission to the M.L.A.S. degree program must present to the Graduate School a formal application, three letters of recommendation, a Statement of Purpose, and a transcript indicating a completed course of study equivalent to that required for a bachelor's degree at an accredited institution, with a minimum of a *B* average in all undergraduate work (or significant life/work achievement that could compensate for a lower grade point average). Graduate Record Examination scores are not required. After receipt of all materials, the director of the program will interview all prospective students. For additional information regarding the M.L.A.S. requirements, visit as.vanderbilt.edu/mlas/application.

International Students

Vanderbilt has a large international community representing more than 117 countries. The university welcomes the diversity that international students bring to the campus and encourages academic and social interaction at all levels. International applicants who are offered admission will be contacted by the Vanderbilt Office of International Student and Scholar Services (ISSS) with instructions for initiating the visa process.

English Language Proficiency

Proficiency in written and oral English is required for enrollment in an academic program. Applicants whose first language or language of instruction is not English are required to submit the results of the Test of English as a Foreign Language (TOEFL) with the application, unless they have earned a degree from an American or English-speaking institution. International students transferring from unfinished degree programs of other universities in the United States should present TOEFL scores.

The minimum acceptable score on the TOEFL PBT (paper-based test) is 570, and for the TOEFL iBT (internet-based test), 88. Many programs, however, require a considerably higher level of proficiency.

Although International English Language Testing System (IELTS) test scores are not required, applicants who have taken the IELTS can report their scores in the online application.

English Language Instruction

Students wishing to focus on improving their English language use for the context of the U.S. academic setting may take classes and participate in programming at the Vanderbilt English Language Center to support their academic success. The ELC's courses include Academic Writing, Academic Speaking, Pronunciation, and International Teaching Assistant Communication. Throughout the academic year, academic workshops and one-to-one consultations for speaking and writing are also available through the ELC. Entering students may be required to take language support courses concurrently with their academic courses at the ELC. The ELC is located at 1208 18th Avenue South. For information about the ELC's programming, see the "English Language Center" section in the Life at Vanderbilt chapter of this catalog or visit vanderbilt.edu/elc.

Financial Resources

To meet requirements for entry into the United States for study, applicants must demonstrate that they have sufficient financial resources to meet expected costs of their educational program. Applicants must provide documentary evidence of their financial resources before visa documents can be issued.

United States laws and regulations restrict the opportunity for international students to be employed.

International students may work up to twenty hours per week on campus. Students may be allowed to work off campus only under special circumstances. Many spouses and dependents of international students are not

allowed to be employed while in the United States.

Student Health Insurance Plan

International students are required to purchase the university's international student injury and sickness insurance. Information concerning the limits, exclusions, and benefits of this insurance coverage may be obtained from Student Health Services.

African American and Diaspora Studies

CHAIR Tracy D. Sharpley-Whiting

DIRECTOR OF GRADUATE STUDIES Gilman W. Whiting

PROFESSORS Victor Anderson, Houston Baker, David Ikard, Hector F. Myers, Alice Randall, Tracy D. Sharpley-Whiting, Paul Taylor, Rhonda Williams

ASSOCIATE PROFESSORS Tiffany Ruby Patterson, Gilman W. Whiting

SENIOR LECTURER Claudine Taaffe

WRITER-IN-RESIDENCE Alice Randall

CERTIFICATE OFFERED: AFRICAN AMERICAN AND DIASPORA STUDIES

COURSES OFFERED: [AADS](#)

Vanderbilt University's African American and Diaspora Studies program offers an interdisciplinary, cross-cultural, and comparative curriculum of study of the histories, literatures, music, visual cultures, and politics of people of African descent around the world. To that end, the African American and Diaspora Studies program focuses on several geographic areas: Africa, Europe, the Americas, and the Caribbean. The certificate in diaspora studies has been designed to complement students' disciplinary training, expose them to the interdisciplinary trends in the academy, and broaden their career possibilities.

The diaspora studies certificate provides graduate students with access to interdisciplinary scholarship in the dynamic and continually evolving field of studies in the worldwide African diaspora. The certificate also gives students a competitive edge and interdisciplinary training for the still robust career outlook for specialists in pan-black studies as well as in the search for postdoctoral fellowships in the humanities and social sciences.

The certificate in diaspora studies is open to any student enrolled in graduate study at Vanderbilt University. Acceptance to the program requires the approval of the African American and Diaspora Studies program graduate studies committee, comprising the director of graduate studies, the chair of African American and Diaspora Studies, and one other faculty member from African American and Diaspora Studies.

Students must also submit as part of the application to the certificate program: 1) a one-page description of their interests in African diaspora studies and how it relates to their graduate program of study; and 2) complete an Intent to Enroll form, which must be signed by the student, the AADS director of graduate studies, and the director of graduate studies for the degree program in which the student is enrolled. A signed copy of the form should be submitted to the Graduate School (graduateschool@vanderbilt.edu), to the Office of the University Registrar (URO) (university.registrar@vanderbilt.edu), and to the AADS program administrator (lennita.tate@vanderbilt.edu).

For more detailed information on the diaspora certificate, please go to vu.edu/aads or contact the director of graduate studies in the Department of African American and Diaspora Studies.

Requirements for the Graduate Certificate in Diaspora Studies

1. 12 credit hours of course work, which includes:
 - o 3 credit hours of African American and Diaspora Studies 5002, an interdisciplinary introduction to materials, teaching methods, debates, and theoretical terms of scholarly research in diaspora studies. A three-week section devoted to course design and development will also be taught in conjunction with the Center for Teaching. Students will be required to prepare a syllabus for the introductory course in African Diaspora Studies, AADS 1010.
 - o 9 credit hours of interrelated graduate-level course work on race and its intersection with gender, class, religion, power, and/or sexuality, which are appropriate to the student's graduate program of study. Students may also take African American and Diaspora Studies 5654 Memoirs and Biographies, African American Studies 5588 The Black Studies Movement, as well as African American and Diaspora Studies 5095 Directed Study with a faculty member in African American and Diaspora Studies to fulfill 6 credit hours. No more than 6 credit hours of specifically named courses required for the primary degree may be applied toward the certificate. All courses must be approved by the African American and Diaspora Studies program graduate committee and must form an intellectually cohesive whole. Students will be required to provide a copy of course syllabi to the graduate committee so that the committee may determine whether the courses taken or proposed to be taken by the student are indeed appropriate for certificate credit.
2. Participation in a minimum of five extracurricular activities sponsored by the Callie House Research Center for the Study of Global Black Cultures and Politics. A short paper reflecting on the insights gained from participating must be submitted to the director of graduate studies before conferral of the certificate.
3. The conferral of the certificate requires a cumulative GPA of 3.3, satisfactory performance of 3.3 or better in AADS 5002, and completion of all the aforementioned requirements.

Graduate courses successfully completed at Vanderbilt University prior to admission to the program may be counted toward the certificate requirements with the approval of the chair of the department if the course can satisfy one of the curriculum requirements of the program. Or if the program doesn't require the permission of the chair: Graduate courses successfully completed at Vanderbilt University prior to admission to the program may be counted toward the certificate requirements if the course can satisfy one of the curriculum requirements of the program.

An undergraduate course may be substituted for a graduate course required by the program's curriculum with the approval of the chair of the program and the Graduate School.

Approved List of Courses

AFRICAN AMERICAN AND DIASPORA STUDIES: 5002 (300), Theories of Diaspora; 5095 (395a), Directed Study; 5654 (265) Memoirs and Biographies, 5588 The Black Studies Movement.

ANTHROPOLOGY: 8220 (349), The Historical Archaeology of Latin America.

ENGLISH: 8137 (337a), Introduction to Literary Theory; 8150 (350), Special Problems in English and American Literature; 8155 (355), Special Topics in English and American Literature; 8430 (325), Seminar in Modern British and American Literature; 8450 (320), Studies in American Literature; 8455 (321), Studies in Southern Literature.

FRENCH: 8070 (388), Seminar in Francophone Literature.

GERMAN: 5795 (395), The Racial Imagination.

HISTORY: 6400 (302a), Readings in American History; 6410 (302b), Readings in American History; 6500 (303a), Readings in Early Latin American History; 6510 (303b), Readings in Modern Latin American History; 8050 (305), Studies in Comparative History; 8600 (358), Comparative Slavery in the Colonial Americas; 8610 (359), Atlantic World History, Fifteenth to the Nineteenth Century; 8620 (361), Studies in Latin American History; 8630 (365), Research Seminar in Latin American History; 8700 (371), Studies in Early American History to 1783; 8710 (372), Studies in the Middle Period of American History, 1783-1861; 8720 (373), Studies in U.S. History, 1861-1900; 8730 (374), Studies in Recent American History; 8732, Religion and the Civil Rights Movement; 8740 (375), Research Seminar in Recent American History; 8745 U.S. and the World; 8750 (381), Studies in American History.

PHILOSOPHY: 9000 (353), Figures in Philosophy (must be AADS-related); 9020 (352), Topics in Philosophy (must be AADS-related).

POLITICAL SCIENCE: 8305 (305), Feminist Social and Political Thought; 8330 (330), Studies in American Politics; 8332 (332), Electoral Behavior and Public Opinion.

RELIGIOUS STUDIES: 3442, African American Political Theology; 3535, Black Islam in America; 3538, The Black Church in America; 3822, The Amarna Period; 3852, Slave Thought; 3882, African American Biblical Hermeneutics; 7131 (3415), Feminist/Womanist Ethics.

SOCIOLOGY: 6302, Contemporary Theory; 8331, Survey Seminar on Collective Behavior and Social Movements;

8333, Survey Seminar on Cultural Sociology; 8345, Survey Seminar on Social Stratification.
SPANISH: 8200, Seminar: Studies in Colonial Literature; 8345, Introduction to Latin American Colonial Studies; 9240, Ordering and Disrupting Fictions in Latin America; 9270, The Politics of Identity in Latino U.S. Literature; 9520, Special Topics in Spanish American Literature.
WOMEN'S AND GENDER STUDIES: 8301, Gender and Sexuality: Feminist Approaches; 8302, Gender and Pedagogy.

American Studies

DIRECTOR Sarah Igo (History)

ASSOCIATE DIRECTOR Gabriel A. Torres Colón (Anthropology)

PROFESSORS C. André Christie-Mizell (Sociology), Dan Cornfield (Sociology), Colin Dayan (English), Marshall C. Eakin (History), Ted Fischer (Anthropology), Vivien Fryd (History of Art), Joni Hersch (Law and Economics), Larry Isaac (Sociology), Dana Nelson (English), Paul Stob (Communication Studies)

ASSOCIATE PROFESSORS Vanessa Beasley (Communication Studies), Teresa A. Goddu (English), Leah Lowe (Theatre), Ifeoma Kiddoe Nwankwo (English)

ASSISTANT PROFESSOR Aimi Hamraie (Medicine, Health, and Society)

SENIOR LECTURERS Alexander Jacobs

LECTURERS Susan Kevra (French), Mario Rewers, Danyelle Valentine

ADJUNCT ASSISTANT PROFESSOR Clay Stauffer

CERTIFICATE OFFERED: AMERICAN STUDIES

COURSES OFFERED: [AMST](#)

Vanderbilt University's Program in American Studies offers a graduate certificate designed to complement students' disciplinary training, expose them to larger interdisciplinary traditions and academic literatures, and enhance their professional careers. The certificate offers a structured introduction to the questions and methods of American Studies. It provides students with a valuable credential and strengthens their ability to compete for jobs as well as national fellowships and postdoctoral awards.

The certificate in American Studies is open to any student enrolled in graduate study at Vanderbilt University. Students wishing to enroll must complete an Intent to Enroll form, which must be signed by the student, the director of the program, and the director of the graduate program (DGS) for the degree program in which the student is enrolled. A signed copy of the form should then be submitted to the Graduate School (graduateschool@vanderbilt.edu) and to the Office of the University Registrar (university.registrar@vanderbilt.edu).

Acceptance to the program requires the approval of both the graduate director of the student's home department and the director of the Program in American Studies. Students must also submit an application that includes (1) a one-page rationale for their course of study to the American Studies graduate committee for approval, and (2) a plan of study focused on a specific theme, forming an intellectually coherent whole.

Graduate courses successfully completed at Vanderbilt University prior to admission to the program may be counted toward the certificate requirements with the approval of the director of the program if the course can satisfy one of the curriculum requirements of the program. An undergraduate course may be substituted for a graduate course required by the program's curriculum with the approval of the director of the program and the

Graduate School.

The awarding of a certificate requires a cumulative GPA of 3.3, of *B+* or better in AMER 8000, completion of all course requirements, and satisfactory completion of the practicum project requirement. Please contact the American Studies program for more information at american-studies@vanderbilt.edu.

Requirements for Graduate Certificate in American Studies

1. American Studies 8000: Graduate Workshop in American Studies.
2. Four additional graduate-level American Studies courses appropriate to the student's program of study. Courses must be approved by the graduate committee for credit and should include at least two courses outside the student's home discipline. One course may be devoted to the practicum project and can be satisfied through an independent study with a faculty member affiliated with the American Studies program, with the approval of the director of the American Studies program.
3. Participation in the monthly meetings of the Graduate Working Group.
4. A practicum project submitted to the graduate committee for evaluation. The project must demonstrate the application of an American Studies approach to research, teaching, or fieldwork in the context of the student's primary field and can take the form of an American Studies Salon, a detailed American Studies Road Trip or City Walk plan, an article draft, a conference paper for a regional or national American Studies Association meeting, or an annotated syllabus for an introductory American Studies course.

Anthropology

CHAIR Tiffany A. Tung

DIRECTOR OF GRADUATE STUDIES T.S. Harvey

PROFESSORS EMERITI Tom D. Dillehay, Thomas A. Gregor, Ronald Spores

PROFESSORS Arthur A. Demarest, Edward F. Fischer, Lesley Gill, Tiffany A. Tung

DISTINGUISHED RESEARCH PROFESSOR Tom D. Dillehay

ASSOCIATE PROFESSORS Jada Benn Torres, Beth A. Conklin, Markus Eberl, William R. Fowler Jr., T. S. Harvey, Norbert Ross, Steven A. Wernke

RESEARCH ASSOCIATE PROFESSOR Patricia J. Netherly

ASSISTANT PROFESSOR Carwil Bjork-James, Gabriel A. Torres Colon

ASSISTANT PROFESSOR OF THE PRACTICE Sophie Bjork-James

SENIOR LECTURER Mareike Sattler, Jacob Sauer

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [ANTH](#)

The graduate program in anthropology is designed to prepare students for careers in teaching and research and teaching, especially with an emphasis on specializations in the anthropology of Central America, Mexico, and South America. Our graduate program covers the four subfields of anthropology: archaeology, biological anthropology/bioarchaeology, cultural/medical anthropology, and linguistic anthropology. The graduate enrollment of approximately thirty graduate students assures a close tutorial relationship with faculty and ample student opportunities for field research, lab research, and publishing.

Students who are admitted to the Ph.D. program in anthropology may earn a master of arts (M.A.) in anthropology en route to the Ph.D. The M.A. is awarded to students who earn a minimum of 36 credit hours of

graduate study, complete the foreign language requirement, and pass the comprehensive exams.

The Ph.D. degree requires at least 72 hours of graduate work of which 45 hours are formal coursework (this can include Independent Studies). The remaining hours are pre-doctoral and doctoral candidate research hours. Doctoral candidates must pass comprehensive examinations, present and defend a dissertation proposal (i.e., complete the qualifying exam), complete a dissertation on original research (field or archival), and successfully defend the dissertation. Subject to the approval of the director of graduate studies, students entering the program with a master's degree or with studies elsewhere may transfer up to 18 hours of graduate credit. Additional information about the Department of Anthropology Ph.D. program can be found at this website: as.vanderbilt.edu/anthropology/graduate/phd.php.

SENIOR LECTURER EMERITUS James Auer (Center for U.S.-Japan Studies)

CERTIFICATE OFFERED: ASIAN STUDIES

COURSES OFFERED: [ASIA](#)

Vanderbilt University's Department of Asian Studies offers a graduate certificate in the interdisciplinary study of the societies and cultures of Asia. The certificate offers graduate students a perspective on Asia that goes beyond the student's particular disciplinary specialization, and signals that the student has achieved competence in an Asian language. The certificate offers a valuable credential for students who wish to undertake career opportunities in Asia, or work in a field related to Asian countries, institutions, or populations. An Asian Studies certificate will also allow students in professional schools to take advantage of the many global opportunities opening up in business, law, education, and health care.

Requirements for the Certificate in Asian Studies

The certificate in Asian Studies is open to any student enrolled in graduate study at Vanderbilt University. The certificate is awarded upon fulfillment of the following three categories of requirements:

- Completion of at least 12 credit hours of interrelated graduate-level course work (see below);
- Demonstrated language competency in an Asian language; and
- Attendance at a minimum of five academic events.

Courses may include those offered directly by the Asian Studies Department, as well as graduate courses from other departments that have been approved by the chair of the Asian Studies Department. Course work must be focused on a specific theme and together form an intellectually coherent whole. Up to 6 credit hours of specifically named required courses of a student's primary degree program may count toward the certificate. At least 6 credit hours must come from outside the student's home discipline. Graduate courses successfully completed at Vanderbilt University prior to admission to the program may be counted toward the certificate requirements with the approval of the Department chair. An undergraduate course may be substituted for a graduate course required by the Department's curriculum, with the approval of the Department chair and the Graduate School.

Students wishing to enroll must complete an Intent to Enroll form, which must be signed by the student, the director of the Asian Studies Certificate Program, and the director of the graduate program (DGS) for the degree program in which the student is enrolled. A signed copy of the form must be submitted to the Graduate School (graduateschool@vanderbilt.edu) and to the Office of the University Registrar (university.registrar@vanderbilt.edu).

A number of courses are available in Asian languages, social sciences, and humanities for graduate credit. See the Asian Studies Course List on the department website: as.vanderbilt.edu/asianstudies/courselist-1.php. See departmental listings for courses offered in the current academic year.

ASIAN STUDIES: 5151, The Third World and Literature; 5210W, Hollywood Hanoi; 5508, Chinese Drama: 13th to 20th Centuries; 5511, Popular Culture in Modern Japan; 5512, Explorations of Japanese Animation; 5605, Romancing the Nation in Modern Chinese Literature; 5606, Martial Tradition in Chinese Literature; 5607, Self & Society in Pre-modern Chinese Literature; 5609, Writing and Gender in Traditional China; 5633, Self-Cultivation in Ancient China; 5851-5852, Independent Study; 5891-5892, Special Topics.

CHINESE: 5101, Elementary Chinese I; 5102, Elementary Chinese II; 5201, Intermediate Chinese I; 5202, Intermediate Chinese II; 5231, Calligraphy; 5301, Advanced Chinese I; 5302, Advanced Chinese II; 5401, Business Chinese I; 5402, Business Chinese II; 5403, Readings in Modern Chinese Media; 5404, Readings in Modern Chinese Media; 5405, Classical Chinese Literature and Philosophy; 5406, Readings in Modern Literary Chinese.

HISTORY: 5115, Play and Pleasure in Early Modern Japan; 5120, Japan's War and Postwar, 1931-1989; 5140, The Mughal World; 5150, India and the Indian Ocean.

HISTORY OF ART: 5112, The Arts of China during the Liao-Song Period.

JAPANESE: 5101, Elementary Japanese I; 5102, Elementary Japanese II; 5201, Intermediate Japanese I; 5202, Intermediate Japanese II; 5301, Advanced Japanese I; 5302, Advanced Japanese II; 5891, Special Topics in Advanced Japanese.

POLITICAL SCIENCE: 5216, The Chinese Political System.

RELIGIOUS STUDIES: 5665, Mythologies and Epics of South Asia; 5666, Devotional Traditions of South Asia: Hindu, Muslim, Sikh; 5669, Sacred Space in the Tibetan World; 5753, East Asian Buddhism; 5775, Chinese Religions through Stories.

Astronomy

See [Astrophysics](#) and [Physics and Astronomy](#).

Astrophysics

CHAIR M. Shane Hutson

DIRECTOR OF GRADUATE STUDIES Andreas A. Berlind

PROFESSORS Andreas A. Berlind, Kelly Holley-Bockelmann, Robert J. Scherrer, Keivan G. Stassun, David A. Weintraub

ASSISTANT PROFESSORS Jessie C. Runnoe, Stephen R. Taylor

DISTINGUISHED RESEARCH PROFESSOR C. Robert O'Dell

RESEARCH ASSISTANT PROFESSOR Jonathan Bird, Karan Jani

Affiliated Faculty

PROFESSOR Thomas Kephart

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [ASTR](#)

Astrophysics is the study of the universe on all physical scales—from nuclear reactions inside stars to the expansion of the universe as a whole—generally focusing on objects and physical phenomena beyond our own solar system. Areas of study include: stars (stellar astrophysics), their birth (star formation) and their death (stellar evolution); the discovery and characterization of other solar systems (exoplanetary science); the material between the stars (interstellar medium); large ensembles of stars (star clusters) and their interactions (stellar dynamics); our Milky Way galaxy and its local group of galaxies (galactic astrophysics); other galaxies (extragalactic astrophysics), their birth (galaxy formation) and their evolution (galactic evolution); the structure of the universe as a whole (large-scale structure); and the origin and evolution of the universe itself (cosmology). Astrophysics also includes the study of fundamental physics—forces, particles, the nature of matter and energy—in the astronomical context, including: particle astrophysics (e.g., solar neutrinos), gravitational wave physics, the extreme physics of compact objects (e.g., black holes), dark matter, and dark energy. Astrophysics involves experimental techniques (observational astrophysics), generally involving images or spectra from telescopes on the ground and/or space, or analysis of archival datasets (data mining); theory, which includes the application of physics first-principles to derive fundamental physical laws or relationships; modeling techniques (computational astrophysics), which generally involves use of massive computing resources to simulate complex objects and phenomena; and information science (astro-informatics), which includes development and application of algorithms for the analysis, deployment, and curation of large datasets (data-intensive astrophysics).

The master of arts in astrophysics is awarded to students who earn a *B* average in a minimum of 30 credit hours of graduate study and complete the formal course requirements for the Ph.D. in astrophysics.

The Ph.D. degree in astrophysics requires 72 hours of graduate work, including 28 hours of formal course work, including 22 credit hours of core graduate courses in astrophysics, and 6 credit hours of elective graduate courses in astrophysics and/or physics or an approved field. A student must earn a grade of *B* or higher in every course that counts toward these 28 hours. The remaining credit hours may be earned through some combination of dissertation research and approved lecture courses. In addition to satisfying these requirements, a student must take a minimum of two semesters of ASTR 8002 Teaching Practicum and four semesters of ASTR 8003

Astrophysics Seminars, which are both zero credit courses.

Biochemistry

CHAIR-Interim Chair Dave Cortez

DIRECTOR OF GRADUATE STUDIES Manuel Ascano Jr.

PROFESSORS Brian Bachmann, Richard Breyer, Richard Caprioli, Bruce Carter, Walter Chazin, David Cortez, Brandt Eichman, Martin Egli, Ron Emeson, Stephen Fesik, F. Peter Guengerich, Heidi Hamm, Scott W. Hiebert, Billy Hudson, Tina M. Iverson, D., Borden Lacy, Craig W. Lindsley, Lawrence J. Marnett, Houra Merrikkh, Neil Osheroff, Cathleen Pettepher, Jennifer A. Pietenpol, Ned A. Porter, Vito Quaranta, W. Kimryn Rathmell, Carmelo J. Rizzo, Charles R. Sanders, Samuel A. Santoro, Kevin L. Schey, Michael Stone, William Tansey

ASSOCIATE PROFESSORS Lourdes Estrada, Andrew Link, Marija Zanic

ASSISTANT PROFESSORS Manuel Ascano Jr., Raymond D. Blind, Breann Brown, Sergey Budko, James Dewar, Emily C. Hodges, Lauren Parker Jackson, John Karijolich, Carlos Lopez, Adrian Olivares, Sun Peck, Yi Ren, Will Wan,

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [BCHM](#)

Students interested in this program participate in the Interdisciplinary Graduate Program or Quantitative and Chemical Biology Program in the Biomedical Sciences during their first year (see Biomedical Sciences). The second year of study comprises required and elective course work that may include Biochemistry 8300, 8301, 8302, 8303, 8323, 8325, 8327, 8336, 8337, 8343, 8349, and 8352 for a total of at least 24 hours of formal course work toward the Ph.D. degree (including 16 hours in the first year). A thesis-based master's degree is awarded only under special circumstances.

The program offers students fundamental training in biochemical principles and an opportunity to apply such knowledge to vital biological and medical problems.

The intent of the department is to maintain a graduate program that emphasizes quality of experience, academic scholarship, and professional achievement. All faculty members are involved in active research programs. Thirty-five to forty-five graduate students are generally enrolled.

Major research efforts are concerned with studies on: regulation of expression and mechanisms of detoxification by cytochrome P450 enzymes; oxygenase and arachidonic acid biochemistry; cancer drug development; biophysics of the cytoskeleton; proteinase inhibitor structure and regulation; lipid-based signaling; nucleic acid structure and interactions with carcinogens; DNA-binding proteins; mass spectrometric tissue imaging, proteomics, DNA topoisomerase; biochemistry and endocrinology of hypertension; human genetics; intracellular signaling in growth and development; molecular mechanisms of Alzheimer's disease; RNA-binding proteins; post-transcriptional regulation of gene expression; ion channels; neoplastic transformation by oncogenic transcription factors; cellular responses to DNA damage; bacterial toxins; innate immune mechanisms; host-pathogen interactions; chromatin structure and histone modifications; epigenetics and gene regulation; membrane protein-linked disease mechanisms, genome surveillance, nuclear RNA transport; DNA replication termination, replication, and transcriptional conflicts; force transduction involving the nuclear membrane; calcium-binding proteins; and one-carbon metabolism. These studies use state-of-the-art technology including molecular biology and high-throughput sequencing, mass spectrometry, NMR spectroscopy, cryo-electron microscopy, and X-ray crystallography.

Faculty of the department also participate in interdisciplinary training programs, supported by National Institutes of Health training grants, that offer specialized biochemical training in the areas of molecular toxicology,

chemical biology, biochemical nutrition, molecular biophysics, infectious disease, cancer research, and molecular endocrinology.

Biological Sciences

CHAIR Brandt F. Eichman

DIRECTOR OF GRADUATE STUDIES Julian F. Hillyer

PROFESSORS EMERITI Burton J. Bogitsh, Wallace M. LeSturgeon, Terry L. Page, Charles K. Singleton, Gerald J. Stubbs, Robley C. Williams Jr.

PROFESSORS Seth R. Bordenstein, Kendal S. Broadie, Kenneth C. Catania, Brandt F. Eichman, Todd R. Graham, Julian F. Hillyer, Carl H. Johnson, Douglas G. McMahon, James G. Patton, Antonis Rokas, Laurence J. Zwiebel

ASSOCIATE PROFESSORS D. Kilpatrick Abbot, Larisa R. G. DeSantis, Katherine L. Friedman, Daniel J. Funk

RESEARCH ASSOCIATE PROFESSOR Yao Xu

ASSISTANT PROFESSORS Megan Behringer, Nicole Creanza, Lauren Parker Jackson, Jared T. Nordman, Maulik Patel, Lars Plate, Ann Thomas Tate

RESEARCH ASSISTANT PROFESSORS Tetsuya Mori, Elwood Mullins, Shuqun Shi

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [BSCI](#)

Research activities in the Department of Biological Sciences encompass the study of biology at the molecular, subcellular, cellular, organismal, population, and community levels. The faculty have primary research interests in the areas of biological clocks, evolution, genomics, genome maintenance, protein trafficking, vector biology, entomology, symbiosis, speciation, microbiomes, immunity, mitochondrial function, small RNAs, synapse formation and plasticity, and development and regeneration of visual and olfactory sensory systems.

Students interested in this program may apply for direct admission in the Biological Sciences graduate program, or they may enter through the Interdisciplinary Graduate Program (IGP) in Biomedical Sciences or the Quantitative and Chemical Biology (QCB) program, and choose Biological Sciences as their home department by the end of the second semester. (See IGP and QCB sections in this catalog.)

The program is designed to lead to the Ph.D. degree; however, M.S. degrees are granted under special circumstances and require a research thesis or successful completion of the qualifying exam. The Ph.D. degree requires 72 hours of credit for graduation, including at least 24 credit hours of formal course work with the remainder earned through dissertation research. Credit hours earned in the first-year IGP program will be counted toward the required 24 hours of formal course work.

Desirable backgrounds for graduate study in the Department of Biological Sciences, depending on the specific interests of the student, would be undergraduate programs emphasizing biological sciences, chemistry, mathematics, or physics course work, but students from other disciplines are also eligible.

Visit the departmental website at as.vanderbilt.edu/biosci for more information.

Note: Sections of BSCI 5890 associated with BSCI 2201, 2205, 2210, 2520 cannot be used to fulfill the Biological Sciences PhD requirements without prior permission. Graduate students in biological sciences may take

graduate courses in School of Medicine departments by arrangement.

Biomedical Engineering

CHAIR Michael R. King

DIRECTOR OF GRADUATE STUDIES Cynthia A. Reinhart-King

DIRECTOR OF GRADUATE RECRUITING Mark D. Does

DIRECTOR OF UNDERGRADUATE STUDIES Craig Duvall

PROFESSORS EMERITI Robert L. Galloway Jr., Thomas R. Harris, Paul H. King, Knowles A. Overholser, Robert J. Roselli, Richard G. Shiavi

PROFESSORS Adam W. Anderson, Christos Constantinidis, Mark D. Does, Craig L. Duvall, Todd D. Giorgio, John C. Gore, Frederick R. Haselton, E. Duco Jansen, Anita Mahadevan-Jansen, Michael R. King, W. David Merryman, Michael I. Miga, Cynthia A. Reinhart-King, John P. Wikswo

ASSOCIATE PROFESSORS Franz Baudenbacher, Audrey K. Bowden, Brett C. Byram, William A. Grissom, Cynthia B. Paschal

ASSISTANT PROFESSORS Jonathan Brunger, Mikhail Rubinov, Yuankai K. Tao, Xin Maizie Zhou

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [BME](#)

Biomedical engineering as a research discipline is concerned with the development of new physical and mathematical concepts applicable to problems in biology, medicine, and the organization of health care. Biomedical engineering also deals with more pragmatic problems, such as biomedical use of information systems and development of advanced biomedical instrumentation. The vision of the BME graduate program is to provide the best advanced education to our graduate students such that they are optimally prepared for successful careers in academia, industry, and related fields. The goal of the program is to provide advanced education and research training in quantitative biology, biomaterials, cellular bioengineering, biomedical photonics, medical imaging, biomedical instrumentation, and the scientific principles underlying the origination of diagnostic and therapeutic devices and processes. The program is specifically concerned with the interface between biology, medicine, and the engineering, physical, computing, and mathematical sciences.

Candidates for the master of science (M.S.) degree must complete 30 hours of graduate-level credit, approved by the faculty, with the following minimum distribution of didactic hours: 12 hours in biomedical engineering, 3 hours in an approved life sciences course, and 9 hours in advanced life science, physical science, or engineering. At least 6 of the BME hours and 3 of the advanced science or engineering hours must be 6000+ level courses. One (1) hour of BME seminar and 6 hours of thesis research credit hours can count toward the total of 30 hours necessary for the M.S. degree. In addition, the candidate must submit a research thesis for faculty approval and give a final oral presentation.

Candidates for the Ph.D. degree must complete a minimum of 27 semester hours of graduate-level didactic courses approved by the program faculty, excluding seminar, research, and teaching hours. Candidates must complete 15 hours in biomedical engineering courses (required: BME 6110 or equivalent), 3 hours in an approved life sciences course, and 9 hours in advanced life science, physical science, or engineering, where 3 of those hours are in an approved quantitative course. At least 9 of the BME hours and 3 of the advanced science or engineering hours must be 6000+ level courses. The remainder of the 72 hours required for a Ph.D. will primarily consist of dissertation research, but may also include seminar and other approved (didactic) courses. In addition, students must pass a qualifying examination consisting of written and oral presentations of a proposal for doctoral research, present a dissertation showing the results of original research in biomedical engineering, and successfully defend the dissertation results in an oral examination.

Biomedical Informatics

ADJUNCT ASSISTANT PROFESSORS Robert Cronin, Jason Karnes, William Lancaster, Russell Leftwich, Claude Pirtle, Siddharth Pratap, Laura Wiley

ADJOINT ASSISTANT PROFESSOR Mary Davis

ADJUNCT INSTRUCTOR Judith Dexheimer

INSTRUCTOR Aileen Wright

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [BMIF](#)

Biomedical informatics studies the structure, discovery, acquisition, integration, management, and optimal use of biomedical information. The field involves multidisciplinary research in all aspects of health care delivery, biomedical research, computational biology, and public health. Biomedical informatics applies, evaluates, and expands results from a variety of disciplines including information and computer science, library science, cognitive science, business management and organization, statistics and biometrics, data science, mathematics, artificial intelligence, operations research, economics, and of course, basic and clinical health sciences. Biomedical informatics has both “knowledge and methods” and “application domain” components. It expands beyond biomedical computer systems design, application, and evaluation to provide theory, tools, and systems that address today’s most urgent challenges in health care delivery, biomedical research, and health professions education.

The curriculum offers concentration areas including: Clinical Informatics, the application of informatics to direct patient care, such as advanced decision support and person-centered health records; Translational Bioinformatics, the application of informatics to support basic research in such areas as genomics, proteomics, and systems biology; Biomedical Data Science, which integrates computation, statistics, and biomedical science to achieve reproducible success in the data science field; and Informatics for HIV/AIDS Research, which allows students to apply biomedical informatics theories and methods to an critical disease domain.

Students typically enter with a background in computing, engineering, biology, or mathematics or with a background in one of the health professions (e.g., M.D., R.N., D.D.S., Ph.D. in a health-related area such as psychology or biostatistics). After graduation they pursue careers as full-time academic researchers, part-time academic researchers/part-time clinicians, scientific managers or advanced scientists in industry, information managers in health care settings, consultants, or entrepreneurs.

All students take the six core biomedical informatics courses: Foundations of Biomedical Informatics, Foundations of Bioinformatics, Methodological Foundations of Biomedical Informatics, Scientific Communication, Student Journal Club and Research Colloquium, and Research Rotation in Biomedical Informatics. In addition, M.S. degree students take two selectives (advanced courses in biomedical informatics); two courses in each of two competency areas (unless satisfied by prior education or experience): Computer/Information Science, Biology/Medicine, and Research Methods; and take one additional elective. Ph.D. students take three selectives; two courses in each of three competency areas (unless satisfied by prior education or experience), depending on background; and three additional electives. The curriculum is adapted to students' backgrounds and concentration areas. Thus, a minimum of 30 course credit hours and a thesis are required for the M.S. degree, and a minimum of 72 credit hours is required for the Ph.D. degree. Ph.D. students must earn the M.S. degree, pass a qualifying examination, and successfully propose and defend a dissertation. Waivers for the M.S. degree requirement may be granted in selected cases. A teaching practicum is required for Ph.D. students.

Biomedical Science

DIRECTOR James G. Patton

DEGREE OFFERED: Master of Science

This graduate program is designed for students seeking to increase their competitiveness for admission to graduate and professional schools. The program provides an individualized curriculum to prepare for careers in medicine and the biomedical sciences. There are two curricular tracks that the student may follow: CHANGE and EDGE.

The CHANGE track is designed to provide students coming from diverse, non-science academic backgrounds the ability to change their career direction. Didactic training will encompass training in all pre-requisite courses needed for application to professional and graduate schools. Didactic training will be complemented by the opportunity to engage in biomedical research as well as clinical exposure activities.

The EDGE track is for designed students seeking to increase their competitiveness for application to professional and graduate schools. Advanced didactic course work and biomedical research experience will be coupled with clinical exposure activities to fully prepare students for admission to medical, graduate or other health professional schools.

Successful completion of the Master's Program in Biomedical Sciences will require 30 credit hours, 24 of which must be didactic hours.

Biophysics

See [Molecular Physiology and Biophysics](#) and [Physics and Astronomy](#).

Biostatistics

CHAIR Yu Shyr

DIRECTOR OF GRADUATE STUDIES Robert Greevy

PROFESSORS Jeffrey D. Blume, Leena Choi, William D. Dupont, Frank E. Harrell Jr., Christopher Lindsell, Jonathan S. Schildcrout, Bryan Shepherd, Yu Shyr

ASSOCIATE PROFESSORS Qingxia (Cindy) Chen,, Benjamin French, Robert Greevy, Robert Johnson, Hakmook Kang, Tatsuki Koyama, Dandan Liu, Qi Liu, Rameela Raman, Matt Shotwell, Chris Slaughter, Fei Ye, Chang Yu

ASSISTANT PROFESSORS Mario Davidson, Amber Hackstadt, , , Derek Smith, Andrew Spieker, Thomas Stewart, Ran Tao, Simon Vandekar, Yaomon Xu

RESEARCH ASSISTANT PROFESSORS Gustavo Amorim, Heidi Chen, Svetlana Eden, Lauren Samuels,

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [BIOS](#)

Biostatistics is the branch of statistics responsible for the proper interpretation of scientific data generated in the biology, public health, and biomedical sciences. As such, biostatisticians must be trained as apt mathematicians and cogent scientists. Our program features rigorous classroom training, real-world apprenticing, exceptional computational preparation, and one-to-one mentoring in the theory, methods, and applications of biostatistics in biomedical research. This program is unique in integrating a curriculum that is nondenominational with respect to the foundations of statistical inference, modern in its emphasis on computing and teaching of statistical principles, progressive in regression modeling strategies, aggressive in involving students in biomedical research early in their career, and *sui generis* in its emphasis on communication skills.

Both Ph.D. and M.S. curricula are proposed to meet the range of biostatistical career opportunities in academia, industry, and government. The program also features an interdisciplinary research rotation for all second-year students and summer chalk talk sessions with faculty. Students must demonstrate competency or strong proficiency in five generic skill areas of statistics: (1) theory, (2) application, (3) critical thinking, (4) communication (oral and written), and (5) computing.

Doctor of Philosophy

Candidates for the Doctor of Philosophy (Ph.D.) must complete a minimum of 72 semester hours of course work and dissertation research. A minimum of ten core biostatistics courses and five elective classes are required for the Ph.D. degree. The core Ph.D. curriculum consists of two probability courses, two statistical inference courses, four courses on statistical methods, and two courses of signature training. Ph.D. candidates must also pass the first-year and second-year comprehensive examination, complete the second-year interdisciplinary research rotation, pass the doctoral qualifying oral examination, submit and defend a doctoral dissertation detailing original research and methodological contributions that advance the knowledge of the discipline of biostatistics, and present their dissertation in a departmental seminar.

Master of Science

Candidates for the master of science (M.S.) must complete a minimum of 24 semester hours of graduate-level courses in biostatistics. The core M.S. curriculum consists of one probability course, one statistical inference course, five courses on statistical methods, and one course of signature training. A minimum of eight core biostatistics courses and four elective courses is required for the M.S. degree. Students who are currently Ph.D. candidates in other departments may be eligible for a waiver of the elective course requirement. M.S. candidates must also pass the first-year comprehensive examination, complete the second-year interdisciplinary research rotation, submit a master's thesis detailing an original investigation in an area of biostatistics, and present their thesis in a departmental seminar. A minimum of 30 semester hours is required for the master's degree. This includes enrollment in at least 24 semester hours of formal didactic course work plus enrollment in 6 additional hours of didactic course work or 6 credit hours of research.

Calendar

Graduate School Calendar 2021/2022 FALL SEMESTER 2021*

Classes begin / Wednesday 25 August

Last day to withdraw from courses / Saturday 16 October

Last day to submit Intent to Graduate forms for December graduation / Sunday 7 November

Final day for submission of theses and dissertations to the Graduate School for graduation in December /

Thursday 18 November

Thanksgiving holidays / Saturday 20 November–Sunday 28 November

Fall classes end / Friday 10 December

Fall semester ends / Saturday 18 December

SPRING SEMESTER 2022*

Classes begin / Monday 10 January

Last day to submit Intent to Graduate forms for May graduation / Sunday 27 February

Spring holidays (classes do not meet) /

Last day to withdraw from courses without academic penalty / Saturday 12 March

Final day for submission of theses and dissertations to the Graduate School for graduation in May / Thursday 24 March

Spring classes end / Monday 25 April

Commencement / Friday 13 May

SUMMER SESSION 2022*

Last day to submit Intent to Graduate forms for August graduation / Friday 12 June

Final day for submission of theses and dissertations to the Graduate School for graduation in August / Monday 18 July

**subject to change*

Cancer Biology

PROGRAM DIRECTOR Ann Richmond

DIRECTOR OF GRADUATE STUDIES Jin Chen

PROFESSOR EMERITUS Harold Moses

PROFESSORS Daniel Beauchamp, Timothy Blackwell, Mark Boothby, Stephen Brandt, Jin Chen, Dai Chung, Robert Coffey, Michael Freeman, Todd Giorgio, David Gorden, Volker Haase, Rizwan Hamid, Alyssa Hasty, Walter Gray Jerome, Sebastian Joyce, Young

Jun Kim, Deborah Lannigan, Ethan Lee, Robert Matusik, Neil Osheroff, Andrea Page-McCaw, Ben Ho Park, Richard Peek, Jennifer Pietenpol, Ambra Pozzi, Vito Quaranta, Jeffrey Rathmell, Kimryn Rathmell, Al Reynolds, Ann Richmond, Yu Shyr, Alissa Weaver, Christopher Williams, Keith Wilson, Roy Zent, Mary Zutter

ASSOCIATE PROFESSORS Barbara Fingleton, Patrick Hu, Paula Hurley, Christine Lovly, Michael Savona, Jeffrey Smith, Julie Rhodes, Takamune Takahashi, Fiona Yull, Ming-Zhi Zhang, Sandy Zinkel Justin Balko, Rebecca Ihrle, Jonathan Irish, John Wilson

ASSISTANT PROFESSORS Dana Brantley-Sieders, Anthony Daniels, Brent Ferrell, Jeremy Goettel, Rachelle Johnson, Carlos Lopez, Aron Parekh, Mary Philip, Marjan Rafat, Vivien Weiss, Kathleen DelGiorno, Alex Bick

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [CANB](#)

(Cancer Biology does not offer a master of science degree program; however, if a student's goals change during the course of the Ph.D. program, an M.S. degree can be awarded provided the criteria as outlined in the program

guidelines are met.)

Students interested in this program participate in the Interdisciplinary Graduate Program within the Division of Biomedical Sciences (see Biomedical Sciences) or in the Quantitative and Chemical Biology Program during the first year. The second year of study encompasses two required courses in Cancer Biology (8340 and 8342) and electives to complete a total of at least 24 hours of formal course work toward the Ph.D. degree (this includes the 16 hours completed in the first year). Additional requirements are: successful completion of the two-phase qualifying exam; regular meetings, initially with a mentoring committee and then biannual meetings with a dissertation committee; an annual presentation at the program's weekly "Science Hour Seminar Series," starting in the spring of the third year of study. Attendance at the program's weekly "Science Hour Seminar Series," the annual Vanderbilt- Ingram Cancer Center retreat, and the annual student-led Cancer Research retreat is encouraged. Most Cancer Biology students participate in the Cancer Biology Student Association (CBSA), which organizes a variety of events each year to enhance the quality of student experience in the Cancer Biology program.

The program offers focused and comprehensive training in the discipline of cancer biology. Modern cancer research is based on a broad range of technical skills, including molecular biology, cell biology, genetics, biochemistry, biostatistics, and bioinformatics, all of which the student will learn through course work and laboratory training. Further training includes exercises designed to develop independent thinking, skills in oral and written presentation, analysis of data and information, and dissemination of information through teaching. The program prepares students with the necessary theoretical and practical skills to succeed in an increasingly wide range of available careers, including academic research, undergraduate teaching, science writing, and basic or applied science in the biotechnology and pharmaceutical industry.

Major research efforts include studies on tumor immunity, angiogenesis, growth factor and cytokine signaling, oncogenes, tumor suppressors, matrix and matrix degradation, cell adhesion, metastasis, development and translation of new therapeutics for cancer, as well as systems biology as applied to cancer growth, metastasis, and response to drugs. These studies use state-of-the-art technologies, including all aspects of molecular and cell biology, biochemistry, genetically modified mice, "omics," mathematical modeling, and others.

Faculty within the department also participate in interdisciplinary training programs in cancer research supported by the National Cancer Institute of the National Institutes of Health.

Cell and Developmental Biology

CHAIR Ian G. Macara

DIRECTOR OF GRADUATE STUDIES Andrea Page-McCaw

PROFESSORS EMERITI Arthur F. Dalley II, Steven Hanks, David M. Miller III, James McKanna, Jeanette Norden, Gary Olson

PROFESSORS Chin Chiang, Kathleen L. Gould, Irina N. Kaverina, Ethan Lee, Ian G. Macara, Andrea Page-McCaw, William P. Tansey, Matthew J. Tyska, Alissa Weaver, Susan R. Wentz, Christopher V. E. Wright

ASSOCIATE PROFESSORS Dylan T. Burnette, Vivian Gama, Guoqiang Gu, Rebecca A. Ihrle, Jonathan Irish, Ken Lau, Jason A. MacGurn, Marija Zanic,

ASSISTANT PROFESSORS Kristopher J. Burkewitz, Kathleen DelGiorno, Qiangjun Zhou

DEGREE OFFERED: Doctor of Philosophy

The mission of the Ph.D. Program in Cell and Developmental Biology is to train and support students from diverse backgrounds in becoming scientists and advancing basic biomedical science. Students are prepared for future careers including research at the cellular, molecular and organism. Graduate study in cell and developmental

biology at Vanderbilt emphasizes an interdisciplinary approach to biological research, bridging a wide range of scales, from single molecules to whole organisms, with exciting opportunities in both basic and disease-oriented biomedical science.

Faculty are affiliated with several centers (Center for Matrix Biology, Center for Stem Cell Biology, Center for Structural Biology, Digestive Disease Research Center, the Epithelial Biology Center, Vanderbilt Diabetes Research and Training Center, the Vanderbilt-Ingram Cancer Center, and the Vanderbilt Kennedy Center for Research on Human Development) and there are significant collaborative interactions with the trans-institutional Program in Developmental Biology.

The department provides specialized training in basic cellular and organismal processes with the goal of solving fundamental biological problems as a foundation for addressing questions of biomedical significance. In each research area, multidisciplinary approaches in genetics, proteomics, and imaging are employed. Key model systems include yeast, *C. elegans*, *Drosophila*, *Xenopus*, zebrafish, chick, mice, and cultured cell lines. Research areas include cell cycle progression, cell signaling, motility and polarity, vesicle trafficking, gene regulation, cytoskeletal dynamics and molecular motors, apoptosis, cell differentiation and cell fate decisions, tissue patterning, embryogenesis, morphogenesis, organogenesis, and tumorigenesis. Graduate studies in each of these areas may include interdepartmental courses from Cell and Developmental Biology, Biochemistry, Pharmacology, Psychology, Biological Sciences, Neuroscience, and Molecular Physiology and Biophysics. The program is designed to lead to the Ph.D. degree.

Center for Latin American Studies

The university offers a program of graduate instruction and specialized research that relates the disciplines of the social sciences and humanities to Latin America, with emphasis on Brazil, Colombia, Venezuela, Peru, and Mexico. Latin American Studies offers three dual degree programs: M.A./ MPH, M.A./MBA, and M.A./M.Ed. in IEPM. Applicants must apply independently to and be accepted by both the Graduate School and the appropriate professional school. The LAS component requires 30 credit hours of course work and a thesis. For further information, see Latin American Studies in the Courses of Study section.

Certificate Programs Overseen by the Graduate School

A number of departments/programs offer graduate certificates. These are open to students already enrolled in a Vanderbilt University post-baccalaureate-degree program. Each certificate requires at least 12 credit/semester hours of interrelated graduate-level course work supporting a specified theme. The courses form an intellectually cohesive whole. The certificate programs include: Global Health; Latin American Studies; Jewish Studies; Latino and Latina Studies; Asian Studies; Gender Studies; American Studies; African American and Diaspora Studies; Second Language Studies; Mobile Cloud Computing; Surgical and Interventional Engineering; Technology Entrepreneurship; Medicine, Health, and Society; Carpenter Certificate in Religion, Gender, and Sexuality; Kelly Miller Smith Institute Certificate in Black Church Studies; Religion in the Arts and Contemporary Culture; Biomedical Ethics; Medical Student Certificate in Lesbian, Gay, Bisexual, and Transgender Health; Post-Master's Certificates in Nursing Program; and Law and Business Certificate. If interested in one of these certificate programs, a student should contact the director of the program to be sure that the appropriate requirements have been met, and if so, then submit to the Graduate School an "Intent to Enroll" in the certificate program.

Additional information on the available certificate programs is available at gradschool.vanderbilt.edu/academics/certificate_program.php.

Chemical and Biomolecular Engineering

CHAIR G. Kane Jennings

DIRECTOR OF GRADUATE RECRUITING Jamey D. Young

DIRECTOR OF GRADUATE PROGRAM Jamey D. Young

DIRECTOR OF UNDERGRADUATE PROGRAM Paul E. Laibinis

PROFESSORS EMERITI Thomas R. Harris, M. Douglas LeVan, K. Arthur Overholser, Robert J. Roselli, John A. Roth, Robert D. Tanner

PROFESSORS Peter T. Cummings, Todd D. Giorgio, Scott A. Guelcher, G. Kane Jennings, David S. Kosson, Paul E. Laibinis, Matthew J. Lang, Clare McCabe, Peter N. Pintauro, Sandra J. Rosenthal, Florence Sanchez, Jamey D. Young

PROFESSOR OF THE PRACTICE Russell F. Dunn

ASSOCIATE PROFESSOR EMERITUS Kenneth A. Debelak

ASSOCIATE PROFESSOR Shihong Lin, Bridget R. Rogers, John T. Wilson, Marija Zanic

RESEARCH ASSOCIATE PROFESSOR Ryszard Wycisk

ASSISTANT PROFESSORS Piran Kidambi, Ethan S. Lippmann, Marjan Rafat, Carlos Silvera Batista

RESEARCH ASSISTANT PROFESSORS Lihong Bishop, Christopher R. Iacovella, Bo Wang

ASSISTANT PROFESSOR OF THE PRACTICE Julianne Vernon

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [CHBE](#)

Chemical engineers play key roles in the development and production of commodity chemicals, pharmaceuticals and bioengineered materials, high-strength composites and specialty polymers, semiconductors and microelectronic devices, and a wide range of ultrapure fine chemicals. Indeed, chemical and biomolecular engineering is essential for the operation of contemporary society. The solutions to many of the problems that we face today—e.g., energy, the environment, development of high-performance materials—will involve chemical engineers.

Graduate study in chemical and biomolecular engineering provides a unique opportunity for students and faculty to work together toward advancing knowledge through innovative research. Graduate research opportunities are provided in the areas of biotechnology and biomolecular engineering, computational science and engineering, energy and sustainability, and materials and nanotechnology. Formal course work provides exposure to advanced chemical engineering and scientific principles that are designed to enhance the research and analytical skills of students. Additionally, students are provided numerous professional development opportunities, including attendance at conferences, professional workshops, career services, and teaching programs for those interested in academic careers.

Programs leading to the M.S. and Ph.D. degrees are offered through the Graduate School. Both require a combination of course work and a thesis. There is no language requirement for any degree.

Candidates for the master of science must complete 30 semester hours of work beyond the bachelor's degree. At least 24 of these hours are graduate-level courses (12 hours in chemical engineering core courses, with the remaining hours selected from courses in the major or from related areas of interest approved by the research adviser). Each degree candidate conducts research under the supervision of a faculty adviser (this will comprise at least 6 additional semester hours), prepares a written thesis, and presents it orally to the faculty.

Candidates for the doctor of philosophy complete a minimum of 72 semester hours of work beyond the bachelor's degree. At least 24 of these hours are course work including 12 hours in required chemical and biomolecular engineering courses. Of the remaining 12 hours at least 3 hours must be taken outside the department (and cannot be for a co-listed course). These courses should complement the student's research interests. The remaining hours are Ph.D. dissertation research. The course load is designed to allow students to spend the majority of their studies on original research. Up to 24 hours of graduate course work with an equivalent of *A* or *B* grade may be transferred to Vanderbilt and applied to the Ph.D. At the end of the first year in residence, students complete a departmental examination. Admission to candidacy in the Ph.D. program is based upon this departmental examination, as well as the Ph.D. qualifying examination, which consists of written and oral presentations of a proposal for doctoral research. Following the examinations and at least 24 semester

hours of dissertation research, the student prepares and publicly defends a dissertation presenting results of original research.

Chemical and Physical Biology

DIRECTOR Walter Chazin

DIRECTOR OF GRADUATE STUDIES Ivelin Georgiev

PROFESSORS Chris Aiken, Adam Anderson, Alan Brash, Richard Caprioli, Walter Chazin, Alan Cherrington, David

Cliffel, David Cortez, James Crowe, Mark Does, Manus Donahue, Brandt Eichman, Martin Egli, Stephen Fesik, John Gore, Fred Guengerich, Heidi Hamm, Billy Hudson, Shane Hutson, Tina Iverson, Carl Johnson, Jeff Johnston, D. Borden Lacy, Matthew Lang, Hassane Mchaourab, John McLean, Jens Meiler, Victoria Morgan, Richard O'Brien, Neil Osheroff, Vito Quaranta, Carmelo Rizzo, Sandra Rosenthal, Charles Sanders, Kevin Schey, Eric Skaar, Seth Smith, Michael Stone, Gary Sulikowski, Matthew Tyska, Alissa Weaver, John Wikswow, David Wright, Jamey Young

ASSOCIATE PROFESSORS Brian Bachmann, Charles Caskey, Li Min Chen, Suman Das, Sean Davies, Lourdes Estrada, Ivelin Georgiev, Daniel Gochberg, William Grissom, David Jacobson, Ken Lau, Andrew Link, Teru Nakagawa, Kevin Niswender, Todd Peterson, Wellington Pham, Ben Spiller, Marija Zanic

ASSISTANT PROFESSORS Ray Blind, Breann Brown, Dylan Burnett, Nicole Creanza, Jacob Hughey, Jonathan Irish, Lauren Parker Jackson, Erkan Karakas, Ethan Lippmann, Carlos Lopez, Gregor Neuert, Adrian Olivares, Jason MacGurn, Lars Plate, Yi Ren, Claus Schneider, William Wan, Zhongyue Yang, Junzjong Xu, Qi Zhang, Qiangjun Zhou

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [CPBP](#)

The Ph.D. degree in chemical and physical biology is available to all students who enter the trans-institutional QCB or IGP graduate admissions programs, or the MSTP. The Ph.D. training program is designed to provide rigorous integrated training at the interface of the chemical and/or physical sciences and the biomedical sciences. The course work and research components of the program prepare students for research careers in which they can bring state-of-the-art tools of the modern chemical and physical sciences, mathematics, statistics and informatics, and computer science to bear on cutting-edge problems in biology and medicine.

The curriculum prepares students for research careers in four tracks: chemical biology; structural biology and molecular biophysics, imaging science, systems biology. Research opportunities are available in a broad range of areas including: biological mass spectroscopy, biomagnetics and nonlinear dynamics, computational biology and molecular modeling, protein-protein interactions, NMR and EPR, x-ray crystallography and scattering, cryo-electron microscopy, fluorescence spectroscopy and microscopy, in vivo imaging, protein-nucleic acid interactions, structural biology, chemical biology, molecular toxicology, macromolecular structure and dynamics, mechanistic enzymology, nanocrystals, proteomics, and mathematical modeling of biological systems.

Chemistry

CHAIR John A. McLean

DIRECTOR OF UNDERGRADUATE STUDIES Tara D. Todd

DIRECTOR OF GRADUATE STUDIES David E. Cliffel

PROFESSORS EMERITI Darryl J. Bornhop, Robert V. Dilts, Larry C. Hall, Thomas M. Harris, David M. Hercules, B. Andes Hess Jr., Melvin D. Joesten, Charles M. Lukehart, Ned A. Porter, Joel Tellinghuisen,

PROFESSORS Brian O. Bachmann, Richard M. Caprioli, Walter J. Chazin, David E. Cliffel, Stephen W. Fesik, Timothy P. Hanusa, Frederick R. Haselton, Jeffrey N. Johnston, Craig W. Lindsley, , Lawrence

J. Marnett, Clare McCabe, Hassane S. Mchaourab, John A. McLean, Jens Meiler, Prasad L. Polavarapu, Carmelo J. Rizzo, Sandra J. Rosenthal, Kevin Schey, Michael P. Stone, Gary A. Sulikowski, C. David Weaver, David W. Wright

ADJOINT PROFESSORS Cody Covington, Norma Dunlap, Terry P. Lybrand, Rongson Pongdee, Lidia Smentek

ASSOCIATE PROFESSORS Andrew Link, Janet E. Macdonald, Renã Robinson

ASSISTANT PROFESSORS Lauren E. Buchanan, Lars Plate, Nathan D. Schley, Steven D. Townsend, Allison S. Walker, Zhongyue Yang

ADJOINT ASSISTANT PROFESSORS Glenroy Dean Martin

PRINCIPAL SENIOR LECTURERS Adam K. List, Shawn T. Phillips, Michelle M. Sulikowski, Tara D. Todd

SENIOR LECTURERS Hemant Badgandi, Katherine Clements, Aaron Daniel, Alissa Hare, Craig G. Tainter, Susan Verberne-Sutton

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [CHEM](#)

Research programs are offered in analytical, biological, inorganic, organic, and physical chemistry along with interdisciplinary research programs in chemical biology, molecular toxicology, materials chemistry, nanoscale science, structural and computational biology, and chemical physics. Excellent research facilities, modern instrumentation, and external funding support a wide range of research.

The program emphasizes doctoral studies. However, an M.S. degree may be granted under special circumstances and normally requires a research thesis. A research thesis of at least 6 hours is required for the master's degree. Specific requirements for the Ph.D. degree are defined in the Ph.D. program document that is available upon request from the Department of Chemistry. Both the master's and Ph.D. degrees require a minimum of 24 hours of formal course work.

Chinese

CHINESE LANGUAGE PROGRAM COORDINATOR AND PRINCIPAL SENIOR LECTURER Xianmin Liu

SENIOR LECTURER Yinghui Guo

LECTURERS Pengfei Li, Qing Wei

COURSES OFFERED: [CHIN](#)

Students should consult with the director of Asian Studies and their home department advisers about the acceptability of Chinese courses for their program of study. Courses are not designed for advanced native speakers.

Civil Engineering

CHAIR Douglas E. Adams

ASSOCIATE CHAIR Florence Sanchez

DIRECTOR OF GRADUATE STUDIES Dan Work

DIRECTOR OF GRADUATE RECRUITING Hiba Baroud

DIRECTOR OF UNDERGRADUATE STUDIES Lori Troxel

PROFESSORS EMERITI Paul Harrawood, Peter G. Hoadley, Frank L. Parker, John A. Roth, Karl B. Schnelle Jr., Richard E. Speece, Robert E. Stammer Jr., Edward L. Thackston, Prodyot K. Basu, George Hornberger

PROFESSORS Mark D. Abkowitz, Douglas E. Adams, David S. Kosson, Eugene J. Leboeuf, Sankaran Mahadevan, Caglar Oskay, Florence Sanchez, Matthew Weinger.

PROFESSORS OF THE PRACTICE Curtis D. Byers, Sanjiv Gokhale, Steven L. Krahn, Robert E. Stammer Jr., Lori A. Troxel

RESEARCH PROFESSOR Craig E. Philip

ADJUNCT PROFESSORS Susan Change, Gregory L. Cashion, , James H. Clarke, Allen G. Croff, James P. Dobbins IV, Boualem, Hadjerioua, Ofra Klein-BenDavid, Vic L. McConnell, Janette Meyer, Michael B. Nye, , L. Hampton Turner IV, Hans A. van der Sloot, Andrea George

ASSOCIATE PROFESSORS Alan R. Bowers, Jonathan Gilliga, Dan Work

RESEARCH ASSOCIATE PROFESSORS Kevin G. Brown, Janey S. Camp, Andrew G. Garrabrants

ASSISTANT PROFESSORS Hiba Baroud, Ravindra Duddu, Jesús Gomez-Velez, Shihong Lin

RESEARCH ASSISTANT PROFESSOR Pranav Karve

ADJUNCT INSTRUCTORS J. Robin Barrick, Kenneth Church, David Livingston, Keith Loiseau, Said el Said, Bryan Tharpe, Ghina Absi, Ross Muirhead, Hannah Walter

LECTURERS Phillip Collins, Paul Litchy

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [CE](#)

Degree programs at the M.S. and Ph.D. level are offered in two areas of concentration: (1) Civil and Infrastructure Systems Engineering and (2) Materials and Structural Engineering.

The M.S. degree has two options: (1) 24 hours of graduate-level course work (5000 level or higher) and a research thesis of at least 6 semester hours, or (2) 30 hours of graduate-level course work. Course work requirements also include 12 hours of didactic course work (i.e., excluding directed/independent study) from the relevant area of concentration core curriculum completed at Vanderbilt and 6 hours of didactic course work taken in the major area (i.e., with CE designation) completed at Vanderbilt.

The Ph.D. degree requires completion of 72 hours of graduate-level course work plus a dissertation. A minimum of 24 course credit hours must be completed at Vanderbilt. Course work requirements also include a minimum of 30 hours of graduate course work that include 12 hours of didactic course work from the relevant area of concentration core curriculum completed at Vanderbilt and 6 hours of didactic course work taken in the major area (i.e., with CE designation) completed at Vanderbilt. The remaining credit hours can be fulfilled with courses or research hours. In addition, all Ph.D. students must pass the Civil Engineering Graduate Program preliminary exam, must complete the university-required qualifying exam, and must write and defend a dissertation.

Classical and Mediterranean Studies

DIRECTOR William Caferro

PROFESSORS EMERITI Robert Drews, F. Carter Philips, Jack M. Sasson, Barbara Tsakirgis, Susan Ford Wiltshire

PROFESSORS William Caferro

ASSOCIATE PROFESSORS Ari Bryen, Kathy L. Gaca, David Michelson, Joseph L. Rife

ASSISTANT PROFESSORS Monica Park

AFFILIATED FACULTY: Scott F. Aikin (Philosophy), Elsa Filosa (French & Italian), Mireille Lee (History of Art), Betsey Robinson (History of Art), David Wasserstein (Jewish Studies)

DEGREE OFFERED: CLASSICS. Master of Arts

COURES OFFERED: [CLAS](#), [GRK](#), [LAT](#)

Note: The department is presently not accepting applications to its M.A. program.

The Department of Classical and Mediterranean Studies offers a selective M.A. program that provides a solid basis for either of two important goals in the field of Classics. First, the department trains promising M.A. candidates who aspire to apply to and enter a nationally ranked Ph.D. program in classical languages or in other recognized fields of Classics, such as ancient history and classical art and archaeology. The department also trains M.A. candidates who aspire to become effective teachers of Latin and/or Greek. The program, as broadly defined, involves a minimum of 36 hours and a maximum of 48 hours of course work over a two-year period. During the two years, the Classics M.A. student is also required to pass proficiency examinations in Greek and Latin and either proficiency examinations or course requirements in history and art. The student must also demonstrate reasonable proficiency in reading classical scholarship in German or French, or in another Romance language (e.g., Italian or Spanish). Applicants should be able to read both Latin and Greek, though not necessarily both at the same level of proficiency, and they also should have completed an elementary course in German, French, or another Romance language.

On entering, every student takes diagnostic examinations in Greek and Latin prose and poetry. The examinations are not graded and are intended only to determine a student's proficiency in the languages at the time of matriculation and for placement in courses. The examinations test familiarity with language and with scansion.

Each semester each student takes at least three and no more than four courses for credit. It is expected that all classics M.A. students will take both graduate seminars regularly offered in Greek and Latin each semester and that they will strive to produce first-rate master's seminar papers in these graduate courses. When their papers attain an *A+* level of excellence, they are encouraged to present their papers to the Classics faculty and to submit their papers to professional academic conferences, such as the American Philological Association (APA), the Archaeological Institute of America (AIA), and the Classical Association of the Middle West and South (CAMWS). The proficiency examinations in Greek and Latin are made up of passages taken from the M.A. reading list. The two examinations test familiarity with language and scansion. The proficiency examinations are offered regularly over the course of the M.A. program.

Classics M.A. students are required to take at least one course each in the areas of ancient history and the history of art, and both courses must be in either the Greek or the Roman tradition. Students may fulfill their Greek or Roman history of art requirement in several possible ways, including: (1) undergraduate courses in Greek or Roman art history, (2) graduate seminars in Greek or Roman art and archaeology, or (3) summer participation in the summer program of the American School of Classical Studies at Athens, Greece, or of the American Academy in Rome, Italy. To fulfill the requirement for ancient history, M.A. students can either (1) take a regular course in Greek history (CLAS 2110 or CLAS 2120) or Roman history (CLAS 2150 or CLAS 2160), or (2) take an examination. In order to fulfill the requirement with course work, a student must earn a *B+* or better in each of the two courses in the given areas. If the student chooses to fulfill the requirement with an examination, the examination of two hours' length is taken at the very beginning of the fourth semester. One re-take of each examination is allowed.

A distinguished feature of Vanderbilt's M.A. program in Classics is the anticipation that in the summer following the first year in residence, M.A. candidates will study in the Mediterranean. Students in good standing are urged to apply for the summer programs offered by the American School of Classical Studies in Athens (ASCSA) and the

American Academy in Rome (AAR) in the hope of being accepted into one of these two summer programs. They also generally receive Rankin Fellowship funding from the department to support this study abroad in either the AAR or ASCSA summer program.

Because students pursuing a graduate degree in Classics normally do so with aims that include teaching Latin, Greek, or Classics, the department makes every effort to provide each student with some teaching experience. In the second year of residence, an M.A. candidate may expect to gain experience as a teaching assistant, primarily as an instructor in an elementary Latin section or, secondarily, as an assistant in a Greek, Latin, or Classics course.

Successful students in the Classics M.A. program are encouraged to pursue Classics Ph.D. studies in a nationally ranked doctoral program that is well positioned to help its Classics doctoral recipients to find a rewarding professional appointment. Faculty in the department are eager to support this aspiration, such as by advising the student about which Classics Ph.D. programs are best suited to his or her interests, and by doing their best to facilitate the student's successful entry into such a doctoral program.

If they so choose, Classics M.A. students with interdisciplinary interests are also welcome to apply for, and may be accepted into, an interdisciplinary Ph.D. program at Vanderbilt that promotes further graduate study in Classics, such as history, religious studies, Greek philosophy, English, and art history.

Combined B.A./M.A. (4+1) Program

The College of Arts and Science in collaboration with the Graduate School offers students in most departments and programs the opportunity to earn both the bachelor's degree and the master's degree in a shorter period of time and at less cost than is normally the case. Exceptional students in the College of Arts and Science can obtain both degrees in an expedited period, typically within but not less than five years.

The usual period of study for both the bachelor's and the master's degree is six years. Through the 4+1 option, the student and her or his adviser plan a five-year program of study. It is important to note that there is no provision for obtaining both degrees in a period shorter than five years.

The program is intended for selected students for whom the master's degree is sufficient preparation for their career goals, is desirable as a goal in itself, or is viewed as additional preparation before pursuing a doctorate or a professional degree.

The areas of study available for the Combined B.A./M.A. (4+1) option within Arts and Science are determined by individual departments and programs, who also determine the policies and guidelines to be followed. Students will be admitted to the Combined B.A./M.A. program only by approval of the department or program.

Programs of Study

The 4+1 option is currently available in the following departments and programs: English; French; German; history; history of art; Latin American studies; mathematics; medicine, health, and society; philosophy; political science; and psychology. Students are welcome to discuss the Combined B.A./M.A. (4+1) option with any of these departments and programs.

Admissions Overview

The Integrated B.A./M.A. program allows Vanderbilt University students to study for both degrees often, but not necessarily, in the same department. Undergraduates with strong academic records may apply for admission to the program after the first semester of their junior year. Qualifying students are normally accepted into the

program in the second semester of the junior year.

To apply for admission, students will first consult with Roger Moore, Senior Associate Dean of Undergraduate Education, and then submit to the prospective graduate department or program a "Petition to Apply to the Combined B.A./M.A. (4+1) Degree Program" (available at as.vanderbilt.edu/academics/specialdegree/4plus1.php), a statement of purpose, a formal application to the Graduate School, a preliminary program proposal, two letters of recommendation from Vanderbilt faculty, and a current transcript. Application forms can be completed online at <https://apply.vanderbilt.edu/apply/>. GRE scores or other admissions requirements may be specified by the prospective department. Admission to the 4+1 option is highly selective. An accomplished academic record, a demonstrated commitment to pursue graduate study, and a strong endorsement from Vanderbilt faculty are key elements to the successful applicant. Students will be provisionally accepted as Graduate School students, pending completion of all undergraduate requirements.

Graduate student status will apply in the fifth year.

Scholarships and Financial Aid

Students who are receiving scholarships or other forms of financial aid as a Vanderbilt undergraduate are advised that such aid applies in most cases only toward the completion of the bachelor's degree or the first four years of their studies (which may include their taking some graduate courses during their senior year). Students wishing to pursue the 4+1 option should seek support for their fifth year of study through student loans and other financial aid.

For additional information, consult the website as.vanderbilt.edu/academics/specialdegree/4plus1.php.

Community Research and Action

CHAIR Paul Speer

ASSOCIATE CHAIR Nicole Cobb

DIRECTOR OF GRADUATE STUDIES Brian Christens

PROFESSORS EMERITI Joseph Cunningham, Paul Dokecki, Craig Anne Heflinger

PROFESSORS Sandra Barnes, Bradley Erford, Velma Murry, Maury Nation, Douglas Perkins, Marybeth Shinn, Paul Speer

PROFESSOR OF THE PRACTICE Andrew Finch

RESEARCH PROFESSOR Mark Lipsey

ASSOCIATE PROFESSOR Brian Christens

ASSOCIATE PROFESSORS OF THE PRACTICE Kimberly Bess, Sarah Suiter

ASSISTANT PROFESSORS Ashley Carse, David Diehl, Anjali Forber-Pratt, Yolanda McDonald, Jessica Perkins, Sara Safransky

RESEARCH ASSISTANT PROFESSORS Gabrielle Chapman, Caroline Christopher

DEGREE OFFERED: Doctor of Philosophy

The graduate program in community research and action is an interdisciplinary program combining community psychology, urban sociology, human geography, applied anthropology, and human and community development. It trains action-researchers committed to promoting social justice in rigorous theoretical analysis and research methods to prepare them for careers in academia, research, and public policy. The Ph.D. degree includes (a) a core set of courses covering inequality, diversity and social justice, community intervention and change, community inquiry (social research methods), public policy and advocacy, and organizational theory and change;

(b) advanced research methodology covering quantitative, qualitative, and critical methods, action research, field research, and program evaluation; and (c) minor concentrations that are designed individually, drawing from Human and Organizational Development Department courses (in community organizing and development, community health, human development and prevention science) and from other departments and specializations within Peabody College (e.g., quantitative methods, urban education) and throughout the university (e.g., anthropology, divinity, gender and sexuality studies, global health, political science, sociology). Planning is done with the major professor and approved by the student's committee. Students receive practical training and experience in teaching, grant-writing and applied research, and program or policy work in collaboration with nonacademic partners. Students entering without a relevant master's degree or with a nonempirical master's must complete an empirical study or thesis (and receive the master of science in CRA as part of the Ph.D. program).

Comparative Media Analysis and Practice

DIRECTOR Lutz Koepnick (German Studies; Cinema and Media Arts)

Affiliated Faculty

PROFESSORS Clifford Anderson (Religious Studies; Associate University Librarian for Research and Learning), Joy Calico (Music), Jay Clayton (English; Curb Center for Art, Enterprise, and Public Policy; Cinema and Media Arts), Jennifer Fay (Cinema and Media Arts; English), Douglas Fisher (Computer Science), Rogers Hall (Peabody College of Education and Human Development), Ruth Hill (Spanish), Lutz Koepnick (German Studies; Cinema and Media Arts), Daniel Levin (Psychology and Human Development), Kevin Murphy (History of Art), Lynn Ramey (French), John Sloop (Communication Studies), Helmut Smith (History), Mark Wallace (Neuroscience; Vanderbilt Brain Institute), Christoph Zeller (German Studies), Mel Ziegler (Art)

ASSOCIATE PROFESSORS Laura Carpenter (Sociology), Aimi Hamraie (Medicine, Health, and Society), Claire Sisco King (Communication Studies; Cinema and Media Arts), Stan Link (Music), Christopher Loss (History), James McFarland (German; Cinema and Media Arts), Tracy Miller (History of Art; Asian Studies), Vesna Pavlovic (Art), Jonathan Rattner (Cinema and Media Arts; Art), Betsey Robinson (History of Art), Steven Wernke (Anthropology)

ASSISTANT PROFESSORS Mireille Lee (History of Art), Ole Molvig (History), Haerin Shin (English; Cinema and Media Arts; Asian Studies), Rebecca VanDiver (History of Art)

LECTURERS Derek Bruff (Center for Teaching; Mathematics), Madeleine Casad (Center for Digital Humanities; Cinema and Media Arts)

DEGREE OFFERED: Joint Doctor of Philosophy

COURSES OFFERED: [CMAP](#)

The Comparative Media Analysis and Practice joint-Ph.D. program advances the critical investigation of modern media culture and the innovative making of digital objects. Open to Ph.D. students from all units of the university, the program adds intellectual perspectives and project-driven learning experiences in an interdisciplinary and collaborative framework. It enhances the preparedness of Ph.D. students with diverse backgrounds for academic or non-academic careers alike. Students completing the program will receive degrees such as Ph.D. in anthropology and comparative media analysis and practice or Ph.D. in English and comparative media analysis and practice.

Aside from taking the required courses in their home program, joint-Ph.D. students are required to take four core

seminars (CMAP 8001–8004) sequenced over two years. CMAP students are also required to participate in two series of workshops (CMAP 8010–8011), specially designed to build more advanced skills in making creative media objects and handling digital information, offered in alternating years during the month of May. CMAP doctoral students will take their qualifying exams as stipulated by their primary departments. Doctoral students enrolled in CMAP write just one dissertation to fulfill the requirements for the joint-Ph.D. However, the CMAP program strongly encourages new and experimental formats of the dissertation. The candidate's Ph.D. committee for the dissertation must include at least one member of the CMAP affiliated faculty. In addition to satisfying all necessary expectations and requirements of their primary degree department, joint-degree dissertations typically incorporate perspectives that reflect a student's participation in CMAP core seminars and digital practice workshops. Additionally, during the semester leading up to their dissertation defense, students are required to design two online media presentations featuring their dissertation. One of these presentations should address specialized audiences, the other a general lay public.

CMAP students are required to carry out forty hours of internship work at some point in their graduate studies. These internships offer opportunities to probe one's knowledge and media skills within non-academic settings. During one semester of their fourth or fifth year of graduate study at Vanderbilt, CMAP students will use their expertise in the theory, analysis, and making of digital objects to serve as a TA in a select course on campus or contribute to the creative project of one or several undergraduate students in their respective home departments. Operating within the context of the Immersion Vanderbilt project, this latter contribution may take many different forms and will be closely coordinated between the CMAP student's home department and the CMAP program director.

Detailed information is available upon request from the program director.

Computer Science

CHAIR Xenofon D. Koutsoukos

DIRECTOR OF GRADUATE STUDIES Ákos Lédeczi

DIRECTOR OF GRADUATE RECRUITING Taylor Johnson

PROFESSORS EMERITI Charlotte F. Fischer, J. Michael Fitzpatrick, Stephen R. Schach

PROFESSORS Gautam Biswas, Robert E. Bodenheimer, Jr., Benoit Dawant, Aniruddha S. Gokhale, Gabor Karsai, Xenofon D. Koutsoukos, Bennett Landman, Ákos Lédeczi, Bradley Malin, Padma Raghavan, Douglas C. Schmidt, Nabil Simaan, Jonathan Sprinkle, Keivan Stassun, Janos Sztipanovits

RESEARCH PROFESSOR Robert Laddaga

PROFESSOR OF THE PRACTICE Julie L. Johnson, Gerald H. Roth

ASSOCIATE PROFESSORS Douglas H. Fisher, Ivelin S. Georgiev, Taylor T. Johnson , Jules White

ASSOCIATE PROFESSOR EMERITUS Jeremy P. Spinrad

ASSOCIATE PROFESSOR OF THE PRACTICE Dan Arena, Graham S. Hemingway, Robert Tairas

ASSISTANT PROFESSORS Matt Berger, Corey Brady, Catie Chang, Tyler Derr, Abhishek Dubey, J. Anthony Capra, Daniel Fabbri, Yu Huang, Yuankai Huo, David, Hyde, Soheil Kolouri, Maithilee Kunda, Forrest Laine, Kevin Leach, Meiyi Ma, Jack Noble, Ipek Oguz, Mikail Rubinov, Jie Ying Wu

RESEARCH ASSISTANT PROFESSORS Shilo Anders, Ana Gainaru, Ilwoo Lyu, Himanshu Neema, Hongyang Sun

ASSISTANT PROFESSORS OF THE PRACTICE Uttam Ghosh, Shervin Hajiamini, Md. Kamrul Hassan, Diego Mesa, Vikash Singh

ADJUNCT ASSISTANT PROFESSOR Zhiao Shi

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [CS](#)

The graduate program in computer science is structured around four primary research areas: (1) computing foundations, (2) computer and network systems, (3) information and intelligent systems, and (4) medical image computing. A variety of advanced graduate courses are offered in each of these areas.

Doctoral candidates are required to complete a minimum of 36 hours of formal course work, which may include at most 6 hours of independent study. The distribution of courses must contain at least one 6000-level course or above in each of three primary research areas, one of which must be the Computing Foundations area.

The master's degree in computer science may be earned through (a) the regular program that includes a thesis or (b) a non-thesis program requiring 30 hours of formal course work. For option (a), up to 6 hours of M.S. thesis research may be applied to the 30-hour total. Under either plan, at least 12 hours must be in 6000-level (or above) computer science courses. A master's degree in passing option is available to Ph.D. students.

An online master of science in computer science is also available. For information, please refer to Special Programs in the Academic Programs section of this catalog, or visit engineeringonline.vanderbilt.edu/computer-science/.

Courses in Professional Degree Programs

Students may include in their programs of study certain professional degree courses offered by other schools in the university. They register for these courses through the Graduate School and often do additional work appropriate for a research degree. Six hours of such credit may be applied to a master's degree program and 12 hours to a Ph.D. program. Students must obtain written approval from their adviser, from the other school, and from the Graduate School. The courses may constitute part of the major or minor field, as approved by the student's adviser.

Creative Writing

See English.

Data Science

DIRECTORS Andreas Berlind, Doug Schmidt

DIRECTOR OF GRADUATE STUDIES Jeffrey Blume

DEGREE OFFERED: Master of Science

COURSES OFFERED: [DS](#)

Data science is an interdisciplinary field whose goal is to extract knowledge and enable discovery from complex data. The field applies a fusion of principles from the disciplines of statistics and computer science to perform data-intensive tasks in domain-specific contexts. The program's goal is to train analysts who are knowledgeable about a broad spectrum of computational and statistical techniques for handling data-intensive tasks in a variety of quantitative, computational, and scientific disciplines. Additionally, students are taught how to work effectively and efficiently in teamwork environments.

Students will learn how to work with complex and large data sets, analyze data with appropriate statistical and computational tools to extract relevant knowledge, make effective displays and visualizations of the data, effectively communicate results to both experts and nonexperts, understand and communicate the scientific generalizability of their models, and respect relevant ethical/legal issues pertaining to data analytics.

The program's learning objectives are: (1) be able to acquire, clean, and manage (massive) data, (2) design computational pipelines to collect and process large-scale data, (3) visualize data and highlight data patterns graphically, (4) build and interpret a statistical model for large-scale data, (5) explain the advantages and limitations of competing statistical models, (6) implement machine learning algorithms to make predictions and optimize decisions, (7) understand and explain the difference between inference and prediction goals, (8) generate reproducible code and analyses, and work in a reproducible manner, (9) communicate data science methods and results in a clear and concise manner to variable audiences, and (10) recognize the ethical, policy, and privacy implications of data science research.

Master of Science

The Vanderbilt master of science in data science is a four-semester, sixteen-course (48 credit hours) program, which includes the completion and presentation of a capstone project. Curriculum is organized in three core sequences (Computation, Data-analysis, Practice); the computation and data-analysis sequences consist of four courses each, while the practice sequence has five courses. The curriculum is rounded out with two electives and a capstone course. Students must maintain an overall grade point average (GPA) of 3.0 (*B*) in order to graduate. To graduate with honors, students must complete 48 credit hours (four semesters) with an overall GPA of 3.5 (*B+*) or better and complete the capstone project.

For additional information, visit vanderbilt.edu/datascience.

Earth and Environmental Sciences

CHAIR Steven L. Goodbred

Co-DIRECTORS OF GRADUATE STUDIES David J. Furbish, Jessica L. Oster

PROFESSORS EMERITI Leonard P. Alberstadt, George M. Hornberger, Calvin F. Miller, Molly Fritz Miller, Arthur L. Reesman, William G. Siesser, Richard G. Stearns

PROFESSORS John C. Ayers, Ralf Bennartz, David J. Furbish, Steven L. Goodbred, Guilherme A. R. Gualda,

ADJOINT PROFESSORS Mark S. Ghiorso, David White

ASSOCIATE PROFESSORS Larisa R. G. DeSantis, Jonathan M. Gilligan, Jessica L. Oster

ASSISTANT PROFESSORS Simon A. F. Darroch, Kristen E. Fauria, Maria Luisa S. P. Jorge, Neil P. Kelley

RESEARCH ASSISTANT PROFESSORS Christopher P. Vanags

PRINCIPAL SENIOR LECTURERS Lily L. Claiborne, Daniel J. Morgan

DEGREES OFFERED: EARTH AND ENVIRONMENTAL SCIENCES. Master of Science, Doctor of Philosophy; ENVIRONMENTAL ENGINEERING. Doctor of Philosophy

COURSES OFFERED: [EES](#)

A student earns the master's degree in earth and environmental sciences by completing 24 hours of formal course work and submitting an approved research thesis of at least 6 credit hours. The doctoral degree requires at least 36 hours of formal course work and a total of 72 hours of total credits (research and course work combined); completion of the Ph.D. degree requires approval in a preliminary exam (Ph.D. in earth and environmental sciences) or comprehensive exam (Ph.D. in environmental engineering), approval in the qualifying exam, as well as submission and defense of a research thesis. Fields of study include sedimentology, geochemistry, geomorphology, transport processes, igneous and metamorphic petrology, volcanology, environmental geology, paleoclimate, paleobiology and paleoecology, atmospheric chemistry and physics, and climate dynamics.

Economics

CHAIR Peter L. Rousseau

VICE CHAIR Joel Rodrigue

DIRECTOR OF GRADUATE STUDIES Mattias Polborn

DIRECTOR OF THE GRADUATE PROGRAM IN ECONOMIC DEVELOPMENT Kevin X.D. Huang

PROFESSORS EMERITI Jeremy Atack, William W. Damon, Andrew F. Daughety, Malcolm Getz, Cliff J. Huang, Andrea Maneschi, Jennifer F. Reinganum, John J. Siegfried, George H. Sweeney, Anthony M. Tang

PROFESSORS Kathryn H. Anderson, Eric W. Bond, Christopher (Kitt) Carpenter, William J. Collins, John Conley, Mario Crucini, Robert A. Driskill, Benjamin Eden, Kevin X. D. Huang, Gregory Huffman, Atsushi Inoue, Tong Li, Mattias Polborn, Peter L. Rousseau, Kamal Saggi, W. Kip Viscusi, John A. Weymark, Myrna Wooders

ASSOCIATE PROFESSORS Andrea Moro, Joel Rodrigue, Yuya Sasaki, Leslie Turner

ASSISTANT PROFESSORS Brian Beach, Andrew Dustan, Malin Hu, Gregory Leo, Michelle Marcus, Kathleen McKiernan, Analisa Packham, Sarah Quincy, Pedro Sant'Anna, Matthew Zaragoza-Watkins, Ariell Zimran

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [ECON](#)

Doctoral study in economics at Vanderbilt prepares students for research and teaching careers in universities and for leadership positions in government, international agencies, and business. The curriculum emphasizes economic theory, econometrics, and the use of theory and measurement in understanding economic phenomena and policy issues. Students have been attracted to the program from all parts of the United States and from more than sixty countries.

A master's degree (without thesis) may be awarded after completion of 42 hours of Ph.D. course work with an average of at least *B* or better.

For the Ph.D. degree, which requires 72 hours and a thesis, the student normally takes required courses in microeconomics and macroeconomics, economic history, statistics, and econometrics. There is a mathematics requirement, normally satisfied by taking Economics 8000, Selected Topics in Mathematics for Economists. There is no foreign language requirement.

All doctoral students must pass written examinations based on the first-year core courses in microeconomics, macroeconomics, and econometrics. Each year the department offers a variety of doctoral-level courses beyond the core, in areas such as Advanced Economic Theory, Econometrics, Economic Development, Economic History, Health Economics, Industrial Organization, International Economics, Labor Economics, Money and Financial Institutions, and Public Economics. After fulfilling the paper requirement in the third year, students turn to their thesis work.

[Graduate Program in Economic Development](#)

The GPED is intended for students seeking a master's degree in economics primarily with an interest in international development. Students who meet the academic requirements of 30 hours of course work, with at least a B average, receive the Master of Arts degree in economics. Students typically complete the program in sixteen to twenty-one months. Prospective students with an undergraduate background in economics, competency in calculus, and a good command of English are encouraged to apply. The program is described under Special Programs.

Electrical Engineering

CHAIR Xenofon D. Koutsoukos

ASSOCIATE CHAIR Robert A. Reed

DIRECTOR OF GRADUATE STUDIES Bennett A. Landman

DIRECTOR OF GRADUATE RECRUITING Jack H. Noble

DIRECTOR OF UNDERGRADUATE STUDIES W. Timothy Holman

PROFESSORS EMERITI Alfred B. Bonds, Arthur J. Brodersen, James A. Cadzow, George E. Cook, Jimmy L. Davidson, J. Michael Fitzpatrick, Kenneth F. Galloway, Dennis G. Hall, Robert W. House, L. PROFESSOR OF THE PRACTICE Ralph W. Bruce

RESEARCH PROFESSORS Michael L. Alles, Sandeep Neema

ASSOCIATE PROFESSORS Audrey Bowden, Joshua Caldwell, William A. Grissom, Richard Alan Peters II, Jason Valentine, Greg Walker, D. Mitchell Wilkes, Yaqiong Xu

RESEARCH ASSOCIATE PROFESSORS Theodore A. Bapty, Zhaohua Ding, W. Timothy Holman, Arthur F. Witulski, Enxia Zhang

ASSISTANT PROFESSORS Catie Chang, Abhishek Dubey, Dariot Englot, Yuankai Huo, Taylor T. Johnson, Justus Ndukaife, Jack

Noble, Ipek Oguz

RESEARCH ASSISTANT PROFESSORS Jeffrey S. Kauppila, Brian D. Sierawski

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [EECE](#)

Programs in electrical engineering are offered in the areas of analog and digital circuits, computer engineering, intelligent systems, solid state devices, signal and image processing and analysis, robotics, microelectronics, photonics, nanotechnology, and related areas in biomedical engineering.

The master of science degree program requires 30 credit hours, including 18 hours in the major area (within EECE) and 6 hours in a minor area. At least 12 hours in the major area must be taken at or above the 6000 level. The courses taken must also include one of the gateway courses in each of two of the following areas: electronics, computer, and signals and systems. Gateway courses are graduate-level courses with senior-level prerequisite, the list of which is maintained by the DGS. The remainder of the course work in the major must be taken at or above the 5000 level. The minor will be 6 hours of graduate-level course work, typically outside of EECE. A maximum of 3 hours of independent study may be applied to the 18 hours required in the major area. The student's adviser must approve all courses. A research thesis is required. A non-thesis option is also offered, which requires an additional 6 hours of independent study constituting one single unit of research work.

A total of 72 hours is required for the Ph.D. Of these, 36 hours must be in course work with at least 24 of the 36 hours in EECE (exceptions can be made to this rule based on the recommendation of the student's adviser if the student's research topic requires taking additional courses outside EECE). The courses taken must also include one of the gateway courses in each of the three following areas: electronics, computers, and signals and systems. Gateway courses are graduate-level courses with senior-level prerequisites, the list of which is

maintained by the EE director of graduate studies, and posted on the EECS department website. Up to 6 hours of independent studies may be taken to fulfill the 36 hours requirement. Up to 24 hours of course work toward the master's degree or in transfer credit will normally be applied to this total on approval by the committee. Up to 12 total hours of course work in the range 5000-5999 are allowed. CS courses in the student's area of research can also be taken for EECE graduate program credit with written approval of the student's adviser. The remainder of the 72 hours may be in dissertation research hours and in additional course work or independent study classes applicable to the student's program of study. Students must complete at least 24 hours while in residence at Vanderbilt. At least 12 of these hours must be in formal course work.

Specific and current degree requirements (including course selection, committee selection, preliminary examination, thesis/dissertation, and dissertation defense policies) are detailed in the Graduate Policy Document. A copy of this document should be obtained from the program office.

English

CHAIR Dana Nelson

DIRECTOR OF GRADUATE STUDIES Vera Kutzinski

DIRECTOR OF CREATIVE WRITING Major Jackson

PROFESSORS EMERITI Vereen M. Bell, Paul Elledge, Roy K. Gottfried, R. Chris Hassel Jr., Mark Jarman, Michael Kreyling, Jonathan Lamb, Lorraine Lopez, Leah Marcus, John F. Plummer III, Hortense Spillers, Cecelia Tichi, Harold Lerow Weatherby Jr.

PROFESSORS Houston Baker, Jay Clayton, Kate Daniels, Colin (Joan) Dayan, Tony Earley, Lynn E. Enterline, Vera Kutzinski, Emily Lordi, Lorrie Moore, Dana Nelson, Nancy Reisman, Mark Schoenfield, Kathryn Schwarz, Rachel Teukolsky, Mark A. Wollaeger

ASSOCIATE PROFESSORS Christin Essin, Jennifer Fay, Teresa A. Goddu, Rick Hilles, Scott Juengel, Ifeoma Nwankwo, Bridget Orr, Anthony Reed, Allison Schachter, Ben Tran

ASSISTANT PROFESSORS Candice Amich, Alex Dubilet, Jessie Hock, Didi Jackson, Carlos Nugent, Akshya Saxena, Haerin Shin (adjunct)

WRITERS IN RESIDENCE Sheba Karim, Amanda Little, Sandy Solomon

PRINCIPAL SENIOR LECTURERS Roger Moore

SENIOR LECTURERS Pavneet Aulakh, Gabriel Briggs, Elizabeth Covington, Andrea Hearn, Elizabeth Meadows, Justin Quarry

DEGREES OFFERED: Master of Arts, Master of Fine Arts, Doctor of Philosophy

COURSES OFFERED: [ENGL](#)

The graduate program in English offers course work and research supervision in all areas of British and American literature, Anglophone literature from other countries, film and media studies, cultural studies, and literary theory. The goal of the Ph.D. program is to produce scholars, critics, and teachers of literature and culture for colleges and universities.

Requirements for the master's degree either en route to the Ph.D. or through Vanderbilt's 4+1 Program are 30 hours of course work and a thesis at the end of the first year.

Requirements for the M.F.A. are 42 to 48 hours of course work, a thesis of creative work (a novel, a book of short stories, a collection of poems, or a collection of personal essays), plus an oral defense of the thesis.

Requirements for the Ph.D. are 52 hours of course work, Ph.D.-level proficiency in a foreign language, comprehensive examinations, and a dissertation.

Through the combined B.A./M.A. (4+1) option, the Department of English offers exceptional students the opportunity to earn both the B.A. and the M.A. in five years. Students are admitted to the 4+1 program only by approval of the Graduate Faculty of the English Department. Further information about the program is available from the director of graduate studies.

Other regulations governing graduate work are available from the director of graduate studies. For more information on the M.F.A., see the Academic Programs chapter of this catalog.

Graduate seminars in creative writing may be repeated for credit with the program director's approval. Other graduate seminars may be repeated for credit if topics are not duplicated.

Environmental Engineering

CHAIR Douglas E. Adams

ASSOCIATE CHAIR Florence Sanchez

DIRECTOR OF GRADUATE STUDIES Florence Sanchez

DIRECTOR OF GRADUATE RECRUITING Shihong Lin

DIRECTOR OF UNDERGRADUATE STUDIES Lori Troxel

PROFESSORS EMERITI Paul Harrawood, Peter G. Hoadley, Frank L. Parker, John A. Roth, Karl B. Schnelle Jr., Richard E. Speece, Robert E. Stammer Jr., Edward L. Thackston, Prodyot K. Basu, George Hornberger

PROFESSORS Mark D. Abkowitz, Douglas E. Adams, John Ayers, David J. Furbish, David S. Kosson, Eugene J. Leboeuf, Sankaran Mahadevan, Caglar Oskay, Florence Sanchez, Matthew Weinger

PROFESSORS OF THE PRACTICE Curtis D. Byers, Sanjiv Gokhale, Steven L. Krahn, Judson Newbern, Robert E. Stammer Jr., Lori A. Troxel

RESEARCH PROFESSOR Craig E. Philip

ADJUNCT PROFESSORS Susan Cange, Gregory L. Cashion, , James H. Clarke, Allen G. Croff, James P. Dobbins IV, Boualem, Hadjerioua, Ofra Klein-BenDavid, Janette Meyer, Vic L. McConnell, Michael B. Nye, L. Hampton Turner IV, Hans A. Van der Sloot

ASSOCIATE PROFESSORS Alan R. Bowers, Jonathan Gilligan, Daniel B. Work

RESEARCH ASSOCIATE PROFESSORS Kevin G. Brown, Janey S. Camp, Andrew G. Garrabrants

ASSISTANT PROFESSORS Hiba Baroud, Ravindra Duddu, Jesus Gomez-Velez, Shihong Lin

RESEARCH ASSISTANT PROFESSOR Pranav Karve

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [ENVE](#)

The graduate program in environmental engineering provides opportunities for study and cutting-edge research that have an immediate impact on society and that are at the nexus of energy, water, smart cities, and the environment, with an emphasis on long-term sustainability and resilience. Areas of research include water

resources, quality, and treatment; resilience and sustainability; nuclear environmental engineering; and environmental materials and materials durability.

The master of science (M.S.) degree in environmental engineering requires completion of 30 hours of graduate credit (5000 level or higher) and may be earned through: (1) 24 hours of didactic graduate course work, including at least 15 hours of graduate-level courses at Vanderbilt in the major area (i.e., within Environmental Engineering graduate program) and a research thesis of at least 6 semester hours—*Thesis M.S. Degree* or (2) 30 hours of didactic graduate course work, including at least 15 hours of graduate-level courses at Vanderbilt in the major area (i.e., within Environmental Engineering graduate program) and a substantive report of 3 semester hours of independent study—*Non-Thesis M.S. Degree*.

The Ph.D. degree requires completion of 72 hours of graduate credit (5000 level or higher), a minimum of which must be 30 hours of didactic graduate course work with a minimum of 24 course credit hours to be completed at Vanderbilt and 6 hours of didactic graduate course work (excluding directed study) in the major area (i.e., within Environmental Engineering graduate program). The remaining credit hours can be fulfilled with courses or research hours. During the fall semester, entering graduate students are required to take a one-hour, zero credit seminar to orient them to how critical review of a topic is conducted and how research proposals are prepared. In addition, all Ph.D. students must pass the Environmental Engineering Graduate Program preliminary examination, must complete the university-required qualifying exam, and must write and defend a dissertation.

As part of the required 24 credit hours (thesis M.S. degree) or 30 credit hours (non-thesis M.S. degree and Ph.D. degree) of didactic graduate course work, students must demonstrate competency in four areas—(i) quantitative mechanisms and theory, (ii) experimental methods, (iii) data analysis techniques, and (iv) computation, simulation, and applied mathematics—by taking at least one course in each of the four areas selected from an approved list. Specific and degree requirements (including list of competency courses, Ph.D. committee selection, preliminary examination, thesis/dissertation, and dissertation defense policies) are available from the director of graduate studies.

Epidemiology

DIRECTOR OF GRADUATE STUDIES Peter F. Rebeiro

PROFESSORS EMERITUS Marie Griffin, Wayne Ray, William Blot

PROFESSORS Muktar Aliyu, Qiuyin Cai, Bruce Compas, William Cooper, Nancy Cox, Qi Dai, Robert Dittus, Tom Elasy, Wes Ely, Matthew Freiberg, Debra Friedman, Natasha Halasa, Tina Hartert, Katherine Hartmann, Douglas Heimbürger, David Penson, Russell Rothman, Christianne Roumie, Timothy Sterling, Kristin Archer Swygert, Xiao-Ou Shu, Digna Velez Edwards, Wei Zheng

RESEARCH PROFESSORS John Boice, Loren Lipworth, Martha Shrubsole, Pingsheng Wu, Gong Yang

ADJUNCT PROFESSORS Maureen Sanderson, Pamela Talley

ASSOCIATE PROFESSORS Melinda Aldrich, Jennifer Piper Below, Cecilia Chung, Stephen Deppen, Todd Edwards, Carlos Grijalva, Jirong Long, Harvey Murff, April Pettit, Helen Keipp Talbot

RESEARCH ASSOCIATE PROFESSORS Hui Cai, Wanqing Wen

ASSISTANT PROFESSORS Carolyn Audet, Alicia Beeghly-Fadiel, Ayush Giri, Nikhil Khankari, Peter Rebeiro, Cassianne Robinson-Cohen, Staci Sudenga, Yaomin Xu, Danxia Yu

RESEARCH ASSISTANT PROFESSOR Natalia Jimenez-Truque

INSTRUCTOR Lauren Saag Peetluk

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [EPID](#)

The unique focus of the Ph.D. program in epidemiology is training epidemiologists with unparalleled excellence in advanced quantitative methods who have a strong grasp of causal logic, inference, probability, and other theoretical aspects of study design and data analysis, in addition to content area expertise. The curriculum features classroom, computing, and experience-based teaching. The program integrates training and research across clinical, laboratory, and quantitative disciplines. At the completion of the program, graduates will be prepared to develop an independent research portfolio in academia, research, or industry. Our goal is to train critical thinkers prepared to make fundamental advances using rigorous and cutting-edge approaches to research. Graduates will be able to contribute across a wide spectrum of content areas and research foci.

Students admitted to the program are required to complete a total of 72 credit hours, including course work and research. Selected core courses will be shared with the biostatistics graduate program. In addition to the required methods curriculum, students will take content area and advanced methods electives. Students are eligible to take relevant course work, for which they meet the prerequisites, in any Vanderbilt department. Requirements for program completion include a comprehensive examination at the end of the second year, an oral defense of the dissertation proposal and qualifying exam, and the doctoral dissertation. The program is expected to take four years to complete. Students can accelerate their studies to complete the program in three years.

Students will be matched shortly after acceptance with research preceptor teams. These established multidisciplinary teams include epidemiology faculty, clinical experts and clinical researchers, biostatisticians, and experienced research staff. The research preceptor team commits to involving the student as a co-investigator from the beginning of the student's graduate studies. Students will use data from their research teams in their course work. The goal is to create a mutually beneficial partnership that produces synergy between education, professional development, and the conduct of research.

Strong candidates for admission will have a master's degree in epidemiology, biostatistics, or another quantitative discipline; experience in the conduct of research and independent data analysis; and strong quantitative preparation and aptitude. Top applicants will be offered an interview during which they will meet with research teams. Both students and research teams will then have the opportunity to rank whom they feel would be the best match(es).

For further information, please visit our website at medschool.vanderbilt.edu/epi-phd/.

Financial Information

Tuition in the Graduate School for 2021/2022 is charged at the rate of \$2,150 per semester hour with a minimum tuition charge of \$200 per semester.

Tuition and fees are set annually by the Board of Trust and are subject to review and change without further notice.

Students who have completed the hours required and who are conducting research full time, register for thesis or dissertation research without hourly credit and are subject to a minimum tuition charge of \$200 per semester.

Master of Liberal Arts and Science Courses

Students in the M.L.A.S. program pay one-half of the regular graduate tuition rate for M.L.A.S. courses and full tuition for courses selected from the regular curriculum. M.L.A.S. course tuition for 2021/2022 is \$3,225 per 3-hour course.

Supplemental Tuition and Continuous Registration

Continuous registration is required of all full-time degree candidates until the required number of course work hours have been completed. Responsibility to maintain registration rests with the student. To retain student

status, individuals must register each fall and spring semester or secure an approved leave of absence. A person is in student status only if:

- registered, or
- on authorized leave of absence

A student who has completed the formal course work required for the degree may, with approval of the student's department and the Graduate School, conduct full-time thesis or dissertation research away from the university and register for research hours needed for the degree. Tuition is charged at the current rate per semester hour, or \$200 per semester if the student has completed the hours required for the degree.

In general, individuals who have completed the number of hours required for the degree and who are employed full time are not eligible to register as full-time students. Such persons pursuing the Ph.D. degree may register as half-time students if they are devoting a minimum of 20 hours per week to dissertation research and their program offers the half-time research course (3995) for a \$200 per semester fee.

A former student wanting to re-enter the Graduate School must apply for reinstatement, which is granted only on the recommendation of the student's graduate program and with approval of the Graduate School.

Other Fees

Student health insurance	3,515
Student service fees per academic year (fall & spring)	562
Student Health Fee (fall & spring)	696
Transcript fee (one time only)	100
Late registration	30
Audit fee for regular students (nonrefundable)	10

Payment of Tuition and Fees

Tuition, fees, and all other university charges incurred prior to or at registration are due and payment must be received by August 31 for the fall semester and January 2 for the spring semester. If courses are added AFTER the initial billing period, it is the student's responsibility to contact the Office of Student Accounts for due dates and amounts related to tuition in order to avoid any holds and/or late payment penalties. All other charges incurred after classes begin are due and payment must be received in full by the last business day of the month in which they are billed to the student. If payment is not made within that time, Commodore Cash may not be available and your classes may be canceled. Visit vanderbilt.edu/stuaccts for payment options.

Students/Guarantors will be responsible for payment of all costs, including reasonable attorney fees and collection agency fees, incurred by the university in collecting monies owed to the university. The university will assess a \$25.00 fee for any check or e-payment returned by the bank and reserves the right to invoke the laws of the State of Tennessee governing bad check laws.

E-Billing and Access to a Student's Vanderbilt Account

Vanderbilt exclusively uses convenient and secure electronic billing (e-bills) for student account charges. Students may need to take action to enable parents, guardians, and other "invited payers" to receive e-bill notices and access to the e-bill website. Students may access their online invoices from their YES landing page at yes.vanderbilt.edu. Once they have signed in to YES, they may view invoices under the Billing Portal link.

Students are responsible for granting access to parents, guardians, or other payers who should receive email billing notifications. To do this, students log in to YES and click the "billing portal link." On your CashNet Account page, click "Add New" in the "Other Payers" section. Enter the information that is requested, and click "OK." (You must enter the "login name" that your authorized payer will use as a username—the logon and password will be sent to your authorized payer in an email.) Tutorials are located online at vanderbilt.edu/stuaccts/ebill.html.

Any month in which there is activity on the student's account, an e-bill will be generated and an email

notification sent to the student's Vanderbilt email address, as well as to the email addresses of others they have invited (and have completed the activation process). The email notification will have the subject line "Your E- Bill Is Now Available for Viewing" and will contain a link to the secure e-bill website.

Payments may be made electronically, or for those wishing to mail a payment, a payment coupon can be printed. When an electronic payment is made, a confirmation email will be sent. It remains the responsibility of the student to ensure that bills are paid on or before the due date.

The Office of Student Accounts can be contacted at (615) 322-6693, toll-free at (800) 288-1144, or via email at student_accounts@vanderbilt.edu. For additional information, please visit the Student Accounts website at vanderbilt.edu/stuaccts.

Refunds of Tuition Charges

University policy for the refund of tuition charges provides a percentage refund based on the time of withdrawal. Students who withdraw officially or are dismissed from the university for any reason may be entitled to a partial refund. Fees are nonrefundable. The refund schedules may be viewed at vanderbilt.edu/stuaccts.

Payment Options

Direct Payment: Tuition, fees, and all other charges are paid directly to the university. Payment for the fall semester is due by August 31. Payment for the spring semester is due by January 2. Students can pay online after viewing their e-bill at vanderbilt.edu/stuaccts. There is no further action required for this option.

Interest-Free Monthly Payment Plan: Students can spread payment over five monthly installments for each semester (fall and spring), interest free, by enrolling in the VANDYPlan, currently administered by Higher One. The deadline to enroll in the VANDYPlan is August 31 for the fall semester (payments begin May 15) and January 31 for the spring semester (payments begin October 15).

The current estimated charges for the academic year are available at vanderbilt.edu/stuaccts to assist students in determining their annual expenses. For further information, please contact the Office of Student Accounts at (615) 322- 6693 or (800) 288-1144.

Late Payment of Fees

All charges not paid by the specified due dates will be assessed a late payment fee of \$1.50 on each \$100 owed (minimum late fee of \$5).

Financial Clearance

No transcript (official or unofficial) will be issued for a student who has an outstanding balance. Diplomas of graduating students will not be released until all indebtedness to the university is cleared.

Student Service Fees

The required student service fees entitle degree-seeking students to use the facilities of Sarratt Student Center and the David Williams II Student Recreation and Wellness Center. The fees also cover admission to certain social and cultural events and subscriptions to certain campus publications. The student service fees for graduate students also include funding for activities sponsored by the Graduate Student Council. Specific information on these fees is published annually in the *Student Handbook*. By payment of an additional fee, students and their spouses may use their identification cards for admission to athletic events.

Transcripts

Official academic transcripts are supplied by the Office of the University Registrar on authorization from the student.

Transcripts are not released for students with financial or other university holds.

Honor Scholarships University Graduate Fellowships

Each year several University Graduate Fellowships are awarded to students entering a Ph.D. program for the first time. Based solely on merit, they are offered to students nominated by departments or programs in recognition of exceptional promise for research and academic excellence. These premier fellowships provide a stipend of up to \$5,000 in addition to a departmental award (fellowship or assistantship). Faculty committees review nominations from all graduate programs and make recommendations to the Graduate School which then selects the recipients.

Provost's Graduate Fellowships

Each year the Graduate School awards Provost's Graduate Fellowships to outstanding students from under-represented groups showing academic promise who want to study for the Ph.D. These fellowships carry a stipend of up to \$5,000 in addition to a departmental award.

Normally these awards run concurrently with the departmental awards.

Other Awards and Assistantships

The university intends, within its resources, to provide adequate financial assistance to students with high academic potential who need help in meeting expenses. Some support is service free; most requires assigned service to the university. Duties are compatible with the student's development and progress.

All M.F.A. and Ph.D. applicants to the Graduate School are considered for awards and assistantships available in their proposed area of study if they request such consideration and if the application for admission is complete by the application deadline.

University Fellowships

University fellowships with stipends ranging up to \$16,500 for nine months or \$32,500 are available in some programs.

A full Tuition Scholarship is normally provided in addition to the stipend. The fellowships are service-free and the student is expected to devote full time to graduate study and to have no other occupation.

Graduate Assistantships

These awards provide a stipend up to \$31,000 for the calendar year and normally receive an additional service-free full tuition scholarship. Duties are assigned by the program director and may include teaching and/or research responsibilities. Appointments are made for one year with renewal in subsequent years dependent upon satisfactory performance of assigned duties, as evaluated by the program director and school deans.

All persons who have responsibility for instruction are subject to university policies as outlined in the *Faculty Manual*, and any additional school and departmental policies that govern instruction. Graduate teaching assignments with major instructional responsibilities must have a master's degree or the equivalent.

Research Assistantships

Research assistantships ranging up to \$32,500 for twelve months are available in certain graduate programs. The holder is expected to assist an individual faculty member in research. Full or partial tuition scholarships may accompany a research assistantship.

Traineeships

Traineeships ranging up to \$32,500 for twelve months are available in certain graduate programs. The recipient is expected to carry out research with an individual faculty member. Full or partial tuition scholarships usually accompany a traineeship.

The Graduate School awards Russell G. Hamilton scholarships to highly qualified students intending to pursue a

Ph.D. degree. These are service-free, full-tuition scholarships with the recipients designated as Russell G. Hamilton Scholars.

Tuition Scholarships

Some departments or programs offer service-free full or partial tuition scholarships without an accompanying fellowship or assistantship. Programs offering such tuition scholarships include Biostatistics, Chemistry, Economic Development, Political Science, the Graduate Department of Religion, and Nursing Science.

Other Graduate Awards

Various types of financial assistance other than university assistantships and fellowships are available. A number of private foundations and business and industrial firms support fellowships. The U.S. Government provides training grants for Ph.D. programs through the U.S. Public Health Service, the National Institutes of Health, the National Science Foundation, and other agencies. Awards are allocated to specific departments and to interdepartmental graduate programs of study. Traineeships and fellowships provide stipends and cover tuition and fees.

Loan Assistance

Loan assistance is available for graduate students in the form of the Federal Direct Unsubsidized Loan program, the Federal Graduate PLUS Loan program, and certain alternative/private loan programs. The Federal Direct Unsubsidized Loan is available regardless of need. The Federal Graduate PLUS Loan is not based on demonstrated need, but the student must be credit worthy. Alternative/private loans are available from private sources that are not based on financial need and must be credit approved.

Under the Federal Direct Loan program, a student may borrow up to a maximum annual limit of \$20,500 a year, all of which is unsubsidized. The maximum aggregate amount of Federal Direct Loans an eligible student may borrow is \$138,500 including any Federal Direct Subsidized/ Unsubsidized Loans borrowed for undergraduate and graduate/ professional study. Under the Federal Graduate PLUS Loan program, a graduate/professional student may borrow up to the annual cost of attending Vanderbilt minus any other aid for which the student is eligible. There is no maximum aggregate limit.

In order to be considered for the Federal Direct Loan programs and/or the Federal Work-Study program, students must complete the Free Application for Federal Student Aid (FAFSA). The FAFSA application and additional information may be found on the Office of Student Financial Aid webpage, vanderbilt.edu/financialaid.

French and Italian

CHAIR Meike G. Werner

DIRECTOR OF GRADUATE STUDIES Robert F. Barsky

PROFESSORS EMERITI, Dan M. Church, Virginia M. Scott, Patricia A. Ward,

PROFESSORS Robert Barsky, William Franke, Lynn Ramey, Tracy Sharpley-Whiting, Holly A. Tucker

ASSOCIATE PROFESSORS Nathalie Debrauwere-Miller, Paul B. Miller, Andrea Mirabile, Letizia Modena, Anthère Nzabatsinda

ASSISTANT PROFESSORS Raisa Rexer

DEGREE OFFERED: FRENCH. Doctor of Philosophy

COURSES OFFERED: [FREN](#), [ITAL](#)

Requirements for the Ph.D. degree include a total of 42 credit hours of course work, taken in the Department of French and Italian and in other departments with the approval of the director of graduate studies. The Department of French & Italian does not offer a terminal M.A. degree, but they do earn the M.A. with the successful passing of the exam, en route to the Ph.D. For BA students and for non French Studies M.A. students, an M.A. qualifying exam, based on a departmental reading list, must be taken no later than before the beginning

of classes in the student's fourth semester of study, and students who successfully pass the exam enter the Ph.D. stage.

Students are expected to begin to register for research credit no later than the beginning of classes in the student's fourth semester of study. Up to 33 credit hours may be taken as research credit. In addition to French and English, doctoral candidates must demonstrate a reading knowledge of an additional language to be determined in consultation with the student's dissertation adviser. Other regulations governing graduate work are available from the director of graduate studies.

After completing the M.A. exam, the student identifies an area of specialization (including, but not limited to, the subject of the dissertation). During the fourth semester, the student prepares an extensive reading list on this area of specialization. The Ph.D. qualifying exam is taken in the sixth semester upon completion of course work.

Upon successful completion of the Ph.D. exam, the student submits the dissertation proposal. After its approval by the Ph.D. committee, the student writes and defends the dissertation to complete the requirements for the Ph.D.

The Jean and Alexander Heard Libraries' rich collection of French materials makes research possible in all periods of French literature. The library's special collections department also houses the W. T. Bandy Center for Baudelaire and Modern French Studies, the Pascal Pia collection (nineteenth- and twentieth-century literary criticism), the Gilbert Sigaux collection (twentieth-century French literature), and the Wachs collection (eighteenth-century fiction and almanacs). In 2016 the W. T. Bandy Center acquired the Hervé Velez collection of Paul Verlaine materials, one of the finest collections of Verlaine works ever amassed.

Gender and Sexuality Studies

CHAIR Katherine Crawford

DIRECTOR OF UNDERGRADUATE STUDIES Elizabeth Covington

PROFESSOR EMERITA Charlotte Pierce-Baker

PROFESSORS Brooke Ackerly, Ellen Armour, Christopher Carpenter, Laura Carpenter, Katherine Crawford, Stacey Floyd-Thomas, Nancy Reisman, Laurel Schneider, Kathryn Schwarz, Shatema Threadcraft

SENIOR LECTURERS Rory Dicker, Allison Hammer, Kristen Navarro, Stacy Simpican, Cara Tuttle Bell

LECTURERS Rebecca Epstein-Levy, Danyelle Valentine

CERTIFICATE OFFERED: GENDER STUDIES

COURSES OFFERED: [GSS](#)

Vanderbilt University's Department of Gender and Sexuality Studies offers interdisciplinary graduate study in gender studies in cooperation with the Departments of Anthropology, English, French and Italian, History, Philosophy, Political Science, Sociology, and Spanish and Portuguese, and the Graduate Department of Religion. Affiliated faculty from other schools, including Vanderbilt Peabody College (Human and Organizational Development), Vanderbilt Law School (Law and Economics), and Vanderbilt Divinity School, also participate in the program. Students work toward a certificate in gender studies.

Requirements of the Graduate Gender Studies Certificate

A certificate in gender studies is awarded with either the M.A. or Ph.D. degree upon fulfillment of the following requirements: (1) Completion of at least 13 credit hours of course work across two or more disciplines. Two courses, WGS 8301 (3 credit hours) and WGS 8302 (variable credit hours), are required. Three additional interrelated graduate-level courses (9 credit hours) on women, gender, and/or sexuality, appropriate to the

student's program of study and forming an intellectually cohesive whole, are required. At least one course (3 credit hours) must come from outside the student's home discipline. Up to 6 credit hours of specifically named required courses from a student's primary degree program may count toward the certificate. Courses must be approved for credit by the chair of the department. One course (3 credit hours) may be satisfied through an independent study with a faculty member affiliated with Gender and Sexuality Studies, with the approval of the department chair. (2) Completion of one paper or substantial project demonstrating the application of a gender studies or sexuality studies framework or methodology to research, teaching, or fieldwork.

Any student enrolled in a graduate program at Vanderbilt is eligible to apply for the certificate in gender studies. Acceptance in the program requires a minimum cumulative GPA of 3.3, satisfactory performance of *B+* or better in WGS 8301, and the approval of the student's primary adviser and the chair of Gender and Sexuality Studies. Courses taken at Vanderbilt prior to admission to the program may be counted toward the certificate requirements with the approval of the chair.

Students wishing to enroll must complete an Intent to Enroll form, which must be signed by the student, the chair of the Gender and Sexuality Studies department,, and the director of the graduate program (DGS) for the degree program in which the student is enrolled. A signed copy of the form must be submitted to the Graduate School and to the Office of the University Registrar (university.registrar@vanderbilt.edu).

For more detailed information on the gender certificate, please go to as.vanderbilt.edu/wgs or contact the director.

German, Russian and East European Studies

ASSISTANT PROFESSOR Simone Stirner

MELLON ASSISTANT PROFESSOR Kathryn David

ASSISTANT PROFESSOR (SECONDARY APPOINTMENT) Karen Ng (Philosophy)

ASSISTANT PROFESSOR OF THE PRACTICE Albina Khabibulina, Silke Schade

DEGREES OFFERED: GERMAN. Master of Arts, Doctor of Philosophy

COURSES OFFERED: [EUS](#), [GER](#), [RUSS](#)

Master of Arts

The program leading to the M.A. degree is designed to deepen and broaden the student's knowledge of German culture, literature, and media from its beginnings to the present day, with special emphasis on major areas not usually covered in-depth in an undergraduate course of study.

In order to be admitted to candidacy for the master of arts degree, a student is required to prove ability in writing and speaking German to the satisfaction of the department.

Candidates for the master's degree must meet three separate requirements: complete 30 credit hours of formal course work, submit written evidence of research abilities, and pass an oral examination based on course work and the departmental core reading list. Nine of the 30 credit hours are to be at the 3000 level and above in the department, and a minimum of 3 credit hours should be in a graduate seminar. The oral examination is normally taken at the end of the student's third semester. As a rule, independent study will not fulfill the requirement of formal course work. Evidence of research abilities will usually take the form of a research paper of twenty-five to thirty pages that is based on a term paper and is to be submitted no later than the end of the student's fourth semester at Vanderbilt. As an alternative, students may choose to complete 24 credit hours of formal course work and to write a master's thesis. The latter is a research paper of sixty to eighty pages in length that gives evidence of scholarly competence and independent, critical thought. The research-writing requirement for this latter option is satisfied after the formal course work and the oral examination have been completed.

The department expects candidates to meet all formal course requirements for the master's degree within three semesters. The student must maintain a minimum B average, provide evidence of scholarly research abilities, and pass the oral examination to receive her/his degree. The M.A. examination committee consists of three faculty members drawn from the department; usually—but not necessarily—the chair or the director of graduate studies serves as one of the examiners.

All candidates awarded a Teaching Assistantship will enroll in Foreign Language Teaching Theory and Practice during their first term of teaching. The student arranges her/his program in consultation with the director of graduate studies and in recognition of departmental objectives.

Through the combined B.A./M.A. (4+1) option, the department offers exceptional students the opportunity to earn both the B.A. and the M.A. in five years. Students will be provisionally admitted to the 4+1 program only by approval of the department. Further information about the program is available from the director of graduate studies.

Doctor of Philosophy

Admission to the program does not imply acceptance for candidacy in the Ph.D. program. Performance well above the minimum Graduate School requirement of a *B* is expected for admission to the Ph.D. program. Candidates normally obtain the M.A. before going on for the Ph.D. The purpose of the doctoral degree at Vanderbilt is to develop the talented candidate's capacity to make independent contributions to the field of German literature, media, and cultural studies. Transfer students should consult the Graduate School requirements for the doctorate.

The Ph.D. degree requires a total of 72 credit hours to graduate. Students who enter the program with a B.A. are required to take 60 credit hours of formal course work; students who enter the program with an M.A. are required to take 42 credit hours of formal course work. Courses that count toward the formal course work requirement include the 6 core courses listed below and all of the other graduate courses listed in the catalog for the German Ph.D., with the exception of credit hours taken for non-candidate research and dissertation research. In addition to taking required and non-required seminars within the department, graduate students are expected to enroll in at least two seminars on relevant materials taught by members of the German Studies faculty outside of the department. Students are typically also allowed to take at least two additional courses (6 credit hours) outside of the department with other faculty members to enrich their interdisciplinary training. All formal course work needs to be completed in order to pass the Qualifying Exam. Students entering the program with an M.A. may transfer up to 6 credit hours in consultation with the DGS after the end of their first year; such transfer credits, however, cannot be used to offset any of the required formal course work. Remaining credit hours to complete the mandated 72 credit hours include non-candidate and dissertation research. Each student is required to take the following courses (18 credit hours) as part of their required 60/42 credit hours of formal course work:

- GER 7101 *Foundations I: Transition Points of Modern German Culture* [3]

- GER 7102 *Foundations II: Theories of Literary and Cultural Analysis* [3]
- GER 7103 *Foundations III: Modes of Scholarly Work and Writing* [3]
- GER 7104 *Pre-Exam Colloquium* [3]
- SLS 6030 *Foreign Language Learning and Teaching* [3]
- GER 8301 *Pre-Dissertation Colloquium* [3]

The director of graduate studies in German assists in devising related areas of concentration so that the student, at this stage, can be narrowing her/his focus for a dissertation topic. Faculty members actively assist students to determine the most promising topics for innovative research by pointing out interesting knowledge gaps, theoretical issues, or interdisciplinary questions.

A reading knowledge of French is usually expected, but another language may be substituted with the approval of the examination committee if it is felt that this language is relevant to the candidate's area of concentration or dissertation research. The second language requirement must be fulfilled before the candidate may take the comprehensive examination.

The teaching program option offers up to 12 credit hours in the area of teaching methodology (courses, research projects, and teaching internships). Work in this area does not count toward minimum degree requirements; 4 credit hours are normally the minimum in this program. Students opting for the full program should expect to add at least one semester to their course of study.

Students with strong interests in modern media culture and media studies are encouraged to apply for the joint-Ph.D. program in Comparative Media Analysis and Practice (CMAP), typically at the end of their first year of doctoral studies at Vanderbilt. Students fulfilling all requirements for both German and CMAP will receive the Ph.D. in German and Comparative Media Analysis and Practice.

Graduate Program in Economic Development

The Graduate Program in Economic Development is a professionally oriented master's program in economics preparing students for both domestic and international careers in economic development. The curriculum is made up of four core courses; microeconomics, macroeconomics, statistics, and econometrics, in addition to two field courses, three electives, and a one-semester research project. The program offers courses on a wide range of subjects including: international trade, project evaluation, policy analysis, and development economics. Students may also take courses in other areas of economics, business, finance, and public policy.

Graduate School Courses

Explanation of Symbols

5000-level courses listed in this catalog may be taken by graduate students for credit unless a specific restriction is indicated in the course description and provided there is no duplication of the student's previous courses.

6000-level courses and above listed in this catalog are graduate courses. They are on a level normally considered too high for undergraduates and are not open to undergraduates without consent of the instructor, the adviser, and the Graduate School.

Length of a course is one semester.

The semester in which a one-semester course is offered is indicated by the word FALL (or SPRING) in the course description.

Hours referred to are semester hours, and figures in brackets always indicate semester hours credit.

Formal course work means all courses taken for credit except thesis and dissertation research courses. The university reserves the right to change the arrangement or content of courses, to change texts and other materials used, or to cancel any course on the basis of insufficient enrollment or for any other reason.

Graduate Student Council

The Graduate Student Council promotes the general welfare and concerns of the Graduate School student body. This is achieved through creating new programs to provide opportunities for growth and interaction, as well as through communication with the Vanderbilt faculty and administration on behalf of graduate students. The GSC consists of elected representatives from each Graduate School department, committees, and an annually elected executive board. In the recent past, the GSC has helped change policies involving space allocation for teaching assistants, stipend reviews, parking, student health insurance, mental health initiatives, and allocation of student service fees. The GSC is also a member of the National Association of Graduate-Professional Students.

In addition to its representative function, the GSC organizes, hosts, and sponsors events and projects during the year, including seminars and panels with individual departments, the Vanderbilt 3 Minute Thesis competition, the Graduate Student Honor Council, community outreach activities, and social opportunities. The GSC also awards travel grants to graduate students who wish to present their research at conferences throughout the year. All Vanderbilt Graduate School students are welcome and encouraged to attend GSC's monthly meetings and to get involved. For more information, visit studentorg.vanderbilt.edu/gsc.

Graduate Study at Vanderbilt

Graduate education has held a central place in the program of Vanderbilt University since it opened in 1875. The first doctor of philosophy degree was granted in 1879; the 2,000th in 1975, the university's centennial year. The 3,000th was given in 1985. As of 2018, more than 8,000 doctor of philosophy degrees have been awarded. By way of comparison, the first Ph.D. given by an American university was awarded in 1861, and the second American institution to offer the degree did so in 1870.

A separate Graduate School was established at Vanderbilt in 1935 by action of the Board of Trust, with an official faculty selected from various schools of the university. Selection is based on the individual faculty member's administrative responsibility or substantial participation in graduate instruction.

Vanderbilt offers to able and serious students a faculty that is active in research and deeply committed to the development of scholars. Students participate in classroom, tutorial, and collegial modes of learning and in systematic independent inquiry, in a setting that allows them to see scholars at work, day in and day out, as an important means of learning the scholar's art. Students are in situations in which they are known personally and well, and concern for what happens to them is very strong.

Vanderbilt is a member of the Association of American Universities, a sixty-two-member organization of research-intensive universities. The doctor of philosophy especially, but also the master of arts and master of science, are research degrees, offered by a faculty of research scholars.

The objectives of the Graduate School are to train scholars and to promote research. The faculty seeks to provide every student with thorough knowledge of a particular field and a mastery of the methods of productive scholarship. Wherever feasible, the faculty intends to provide opportunity for all Ph.D. candidates to have supervised teaching experiences.

The Graduate School enrolls about 2,100 students. About 50 percent are women, and 29 percent are international students. The Graduate School is located in Alumni Hall on campus.

Facilities

Alumni Hall is home for the Graduate School, and newly renovated space on the first floor is designed to be a robust hub for student life within the Graduate School community. This inviting space provides opportunities for graduate students not only to study and socialize, but also to explore potential collaborations across diverse disciplines.

Vanderbilt has many special facilities for study and research in particular areas, as well as the traditional

classroom and laboratory facilities associated with graduate instruction.

Graduate instruction in the humanities, the biological sciences, and the social sciences is conducted in Benson, Buttrick, Calhoun, Furman, Garland, and Wilson halls. Graduate work in religion uses the full facilities of Vanderbilt Divinity School. The E. Bronson Ingram Studio Arts Center, opened in fall 2005, has studios for sculpture, ceramics, photography, computer arts, painting, and drawing. Gallery space is designated for exhibits primarily of students' work.

The Stevenson Center for the Natural Sciences, a complex of seven connected buildings, includes laboratory and lecture facilities for biological sciences, chemistry, geology, mathematics, and physics.

Classrooms and laboratories of Peabody College are used for graduate instruction in education and psychology and human development.

Laboratories for the biomedical sciences—biochemistry, bioinformatics, cancer biology, cell and developmental biology, cellular and molecular pathology, microbiology and immunology, molecular physiology and biophysics, and pharmacology—are in the Vanderbilt University Medical Center in Medical Center North, Light Hall, Preston Research Building, Robinson Research Building, and Medical Research Building IV. The A. B. Learned Laboratories and Medical Research Building III provide additional facilities for biological sciences. Graduate students in neuroscience use facilities across campus with a home in the Vanderbilt Brain Institute.

Graduate work in engineering uses the laboratories of the School of Engineering, including those in the Olin Hall of Engineering, Featheringill Hall, Jacobs Hall, the Stevenson Center, and the new Engineering and Science Building.

The facilities of Owen Graduate School of Management are used for graduate study in management. Graduate students in nursing science use the facilities of Godchaux and Frist Halls, and those in hearing and speech sciences use classrooms and laboratories in the Vanderbilt Bill Wilkerson Center.

Health Policy

DIRECTOR Stacie Dusetzina

DIRECTOR OF GRADUATE STUDIES Stacie Dusetzina

PROFESSORS Muktar Aliyu, Laura M. Beskow, Melinda J.B. Buntin, Velma McBride Murry, Wayne Ray, William Schaffner, David Stevenson

ASSOCIATE PROFESSORS Stacie Dusetzina, John Graves, Carlos Grijalva

ASSISTANT PROFESSORS Carolyn Audet, Carrie Fry, Kevin Griffith, Laura M. Keohane, Ashley Leech, Marie H. Martin, Andrew Wiese

RESEARCH PROFESSORS, Melissa McPheeters

RESEARCH ASSISTANT PROFESSORS Margaret Adgent, Tiffanie M. Markus, Christine C. Whitmore

ASSOCIATE IN HEALTH POLICY Catherine M. Hammack

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [HPOL](#)

The Health Policy Ph.D. program trains students in using interdisciplinary methods to address a wide range of

health policy and health service challenges in the United States. Students will develop skills in critical review, study design, analysis, proposal development, and professional development. During their coursework, students will have access to top faculty, nationally recognized leaders in Health Policy. They will also have interdisciplinary training in relevant techniques from disciplines including economics, biostatistics, informatics, and epidemiology, as well as hands-on experience in proposal development, research, and teaching. Graduates will be prepared to work in elite academic, private sector, and governmental settings as part of multidisciplinary teams.

Ph.D. students in the Health Policy Program are required to complete 72 credit-hours of methods curriculum, content-area courses, scientific writing, and ethics in health services research. In the first two years students will complete core coursework, including interdisciplinary courses according to their selected sequence in epidemiology, economics, or social sciences. Students will complete qualifying exams the end of their second year and will participate in Health Policy seminar and focus on their dissertation research, along with pursuing other relevant research opportunities in years three and four.

Hearing and Speech Sciences

CHAIR Anne Marie Tharpe

VICE CHAIR OF GRADUATE STUDIES Todd A. Ricketts

ASSOCIATE DIRECTOR OF GRADUATE STUDIES, PH.D. PROGRAM Melissa C. Duff

PROFESSORS EMERITI Daniel H. Ashmead, Fred H. Bess, Edward G. Conture, D. Wesley Grantham, R. E. Stone Jr., Robert T. Wertz

PROFESSORS James W. Bodfish, Stephen M. Camarata, René H. Gifford, Troy Hackett, Linda J. Hood, Gary P. Jacobson, Todd A. Ricketts, C. Melanie Schuele, Anne Marie Tharpe, Mark T. Wallace

ASSISTANT PROFESSORS Lea Helen Evans, Charles Hausman, Melissa Henry, Jourdan Holder, Robin Jones, Emily Kimball, Antje Mefferd, Erin Picou, Marcy Sipes, Tiffany Woynaroski, Erin Picou

ADJUNCT ASSISTANT PROFESSORS: Linda Auther, Lisa de la Mothe, Andrew Dittberner, Kiara Ebinger

ADJUNCT ASSOCIATE PROFESSORS: Devin McCaslin, Micah Murray

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [HRSP](#)

The Ph.D. degree normally requires four to five years of study with a minimum of 72 graduate credit hours (24 of which can be by transfer). There are no foreign language requirements. The student must complete 12 hours of course work in statistics and research methodology and demonstrate research accomplishments (e.g., conference abstract or presentation, manuscript submission) prior to the dissertation and, prior to graduation, meet the departmental publication and external funding submission requirements. Laboratory work throughout the program and a teaching experience are also required as part of training. Doctoral candidates also present a minor of not less than 12 hours taken outside the department or from another subject area in hearing, speech, and language. The final year of the program is typically devoted to the dissertation.

This department also offers the doctorate of audiology (Au.D.), master of education of the deaf (M.D.E.), and the master of science in speech-language pathology (M.S.) through the School of Medicine.

The teaching, clinical, and research programs of the department are housed primarily in Vanderbilt's Bill Wilkerson Center. For further information, visit medschool.vanderbilt.edu/hearing-speech/.

ASSOCIATE PROFESSORS Ari Bryen, Celso Castilho, Lauren Clay, Emily Greble, Paul A. Kramer, Peter Lorge, Catherine Molineux, Ruth Rogaski, Samira Sheikh

DEGREES OFFERED: Master of Arts, Doctor of Philosophy

COURSES OFFERED: [HIST](#)

Master of Arts

The Department of History does not accept external applications for a terminal master's degree. The M.A. is usually earned en route to the Ph.D. It is also available to Vanderbilt undergraduates who enroll in Vanderbilt's 4+1 program.

Doctor of Philosophy

The Ph.D. requires 72 hours of graduate credit, including 45 quality hours.

All candidates for the Ph.D. must demonstrate a reading knowledge of a foreign language or languages. In U.S. and British history, one language is required. In all other fields, the minimum is two. Students are expected to develop proficiency in any languages required for their dissertation research.

The first two years in the Ph.D. program are devoted to taking classes, writing two substantial research papers, passing the necessary language examination(s), and preparing for the qualifying examination. A full list of graduate history courses is available in the courses section of this catalog. All first-year students take a two-semester introduction to methods and research, History 6100 and 6110. These courses are designed to familiarize students with a range of theoretical and methodological approaches. Each second-year student, in consultation with his or her adviser and the director of graduate studies, chooses a Ph.D. Committee, consisting of the dissertation director, two other members of the Graduate Faculty from the Department of History, and one from outside the department, either at Vanderbilt or at another university.

Students take their qualifying examination either in the spring of the second year or fall of the third year. The examination is administered by the student's Ph.D. committee. *Note:* the examination cannot be scheduled until the student has 30 quality hours, with at least a *B* average and no Incompletes, and has met the language requirement. When the student has passed the qualifying examination, the Ph.D. committee shall recommend to the Graduate School that the student be admitted to candidacy for the Ph.D.

The Vanderbilt history program does not have predetermined fields of study. In consultation with their adviser and the director of graduate studies, students define a major field and two minor fields that meet their interests and needs. The major field is typically defined as a long time span and either a regional or a national geographic framework (for example, Europe 1600–1789 or modern Germany). A large topical field such as legal history, economic history, the history of race and diaspora, modern medical history, or the Reformation may also be appropriate. One of the minor fields may be a subfield of the major field, defined by topic and/or geography. An example would be a major field on modern Latin America combined with a minor field on Brazil. The other minor field must be distant from the major field in terms of topic, chronology, and/or geography. Typically, this field will have theoretical, cross-cultural, and/or interdisciplinary components (e.g. comparative slavery, postcolonial theory and history, comparative nationalisms). This field may be primarily based in a department other than history or in an interdisciplinary program that trains students at the graduate level.

In the third year, all students take History 8200, which aids students in preparing the dissertation prospectus and beginning work on the dissertation itself. The dissertation prospectus is approved through an oral examination conducted by members of the student's Ph.D. committee. The spring term schedule includes History 6300 (The Art and Craft of Teaching History), an introduction to teaching methods and teaching practicum designed to familiarize students with techniques for lecturing, leading discussions, designing examinations, and grading undergraduates.

From the fourth year forward, students will normally enroll in History 9999, Dissertation Research, each semester they are in residence.

The dissertation should be completed within four years after admission to candidacy for the Ph.D. The candidate will defend the dissertation at a public examination conducted by the Ph.D. committee.

History of Art and Architecture

CHAIR Kevin D. Murphy

DIRECTOR OF GRADUATE STUDIES Sheri Shaneyfelt

DIRECTOR OF UNDERGRADUATE STUDIES Sheri Shaneyfelt

PROFESSORS EMERITI Robert A. Baldwin, Vivien Green Fryd, F. Hamilton Hazlehurst, Robert L. Mode, Ljubica D. Popovich

PROFESSORS Leonard Folgarait, Christopher M. S. Johns, Kevin D. Murphy

ASSOCIATE PROFESSORS Tracy Miller, Elizabeth J. Moodey, Betsey A. Robinson

ASSISTANT PROFESSORS Mireille M. Lee, Rebecca K. VanDiver

ASSISTANT PROFESSOR OF THE PRACTICE Matthew Worsnick

MELLON ASSISTANT PROFESSOR Heeryoon Shin

PRINCIPAL SENIOR LECTURER Sheri Shaneyfelt

DEGREE OFFERED: Master of Arts

COURSES OFFERED: [HART](#)

The Department of History of Art and Architecture offers an M.A. program with two tracks, in History of Art and in Architecture and the Built Environment. The department does not accept external applications for a terminal master's degree. The M.A. is available only to Vanderbilt undergraduates who enroll in the department's 4+1 combined B.A./M.A. program.

The Department of History of Art and Architecture treats critically the major fields in world art and architecture, from ancient to contemporary, and serves to connect the arts to the other humanities. Many students will use the program in history of art or architecture and the built environment as a foundation for careers in which analytical reading and writing skills gained in the major are especially valued: as the basis for advanced training in professional schools (such as architecture, law, medicine, journalism, and business), for postgraduate work in history of art, architecture, urban studies, and related fields, and for employment in galleries, museums, or design-centered fields. A major goal of the department is to help students become readers of visual images and material culture throughout their lives, as well as to encourage visual approaches to learning.

Interdisciplinary research is fundamental to history of art and the study of architecture and the built environment, and graduate students are encouraged to pursue courses in in other departments, programs, and schools: African American and Diaspora Studies, American Studies, Art, Asian Studies, Biological Sciences, Cinema and Media Arts, Classical and Mediterranean Studies, Communication of Science and Technology, Communication Studies, Earth and Environmental Sciences, English, European Studies, French and Italian, History, Jewish Studies, Mathematics, Medicine, Health and Society, Neuroscience, Philosophy, Physics, Political Science, Psychology, Public Policy Studies, Religious Studies, Russian and East European Studies, Sociology, Spanish and Portuguese, Theatre, and Gender and Sexuality Studies (College of Arts and Science); Musicology and Ethnomusicology (Blair School of Music); Human and Organizational Development (Peabody College); and Civil Engineering, Computer Science, Engineering Science, Environmental Engineering, and Mechanical Engineering (School of Engineering).

The History of Art and Architecture 4+1 program allows outstanding students to complete a B.A. and M.A. in five years. It is available to current Vanderbilt undergraduate students majoring or minoring in History of Art or Architecture and the Built Environment, as well as students in related fields who have completed significant course work in the discipline. Students will be provisionally admitted to the 4+1 program only by approval of the department.

Typically, a 4+1 student will work closely with the undergraduate adviser to ensure that all B.A. requirements will be fulfilled, and then register for 3 to 6 credit hours of graduate course work in the senior year, in consultation with the director of graduate studies (DGS). Accepted students receive registration priority in order to complete the B.A. and begin M.A. requirements. Students will work with the DGS and other faculty advisers to design a program of study that addresses their academic interests and career goals. The average load per semester as a graduate student in the fifth year is 9–12 credit hours. Most 4+1 students engage in research, internships, or travel in the summer between their fourth and fifth years.

With the approval of the DGS, up to 3 courses in the M.A. program may be undergraduate courses at the 2000-level and above, with added work for graduate credit.

Track in History of Art

The track in History of Art prepares students for advanced graduate studies, careers in artistic and historical institutions. Students will acquire and demonstrate expertise in the discipline while having opportunities also to explore interdisciplinary studies.

A minimum of 30 didactic (letter-graded) credit hours is required for the master's degree in History of Art. This includes enrollment in at least 24 credit hours of course work, plus 3 credit hours in method, theory, historiography, and professional practice [HART 6010 The Methods of Art History], and 3 credit hours preparing a Qualifying Paper [HART 6999]. Of the 24 credit hours of formal course work, 15 must be taken in History of Art and Architecture. Courses in other departments shall be counted with approval of the director of graduate studies.

Track in Architecture and the Built Environment

The track in History of Art prepares students for advanced graduate studies and careers in artistic and historical institutions. Students will acquire and demonstrate expertise in the discipline while having opportunities also to explore interdisciplinary studies.

A minimum of 30 didactic (letter-graded) credit hours is required for the master's degree in Architecture and the Built Environment, with course work distributed as follows:

1. Four core courses in HART: 12 credit hours in history of architecture, design, landscape, or urbanism at the 5000- level or above, selected from HART 5100, 5110, 5112, 5120, 5140, 5150, 5172, 5174, 5240, 5252, 5270, 5285, 5290, 5740, 5757, 5780, 5782, 5810, 5815, 6010, 6265, 6740, and CLAS 5250.
2. Four elective courses: 12 credit hours selected from any HART courses listed above or in related fields, chosen in consultation with the A maximum of two elective courses may be taken from any one department (with the exception of History of Art and Architecture).
3. One HART course (3 credit hours) in method, theory, historiography, and professional practice [HART 6010 The Methods of Art History].
4. Qualifying Paper (3 credit hours) under the supervision of a HART faculty member [HART 6999].

Human Genetics

DIRECTOR David Samuels

DIRECTOR OF GRADUATE STUDIES Todd Edwards

ASSOCIATE DIRECTOR OF EDUCATION Douglas Mortlock

PROFESSORS Thomas Aune, H. Scott Baldwin, Seth Bordenstein, Kendal Broadie, Ellen Wright Clayton, Nancy Cox, James Crowe, Joshua Denny, Digna Velez Edwards, Katherine Friedman, Rizwan Hamid, Carl Johnson, MacRae Linton, James G. Patton, John A. Phillips III, Dan Roden, Antonis Rokas, Michelle Southard-Smith, Laurence J. Zwiebel

ASSOCIATE PROFESSORS Melinda Aldrich, Jennifer Below, Milam Brantley, Lea Davis, Todd Edwards, Antonis Hatzopoulos, Timothy Hohman, Ela Knapik, Bingshan Li, Chor Yin (Maggie) Ng, Douglas Ruderfer, David Samuels, Jeffrey Smith, James S. Sutcliffe

ASSISTANT PROFESSORS Ruben Martinez Barricarte, Alexander Bick, Eric Gamazon, Reyna Gordon, Emily Hodges, Douglas Mortlock, Bryan Venters, Quinn Wells

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [HGEN](#)

The overall goal of the Human Genetics Ph.D. degree program is to provide students with a solid foundation for a career in genetics research and teaching. Training is available in human genetic analysis and in genetic analysis of model systems that contribute to our understanding of human disease. The training combines a prescribed set of basic courses intended to ground students in the fundamentals of genetic analyses, the basics of human genetics, a set of elective courses designed to meet individual needs, and a rigorous research experience that will contribute to the field of genetics. Students completing the requirements of the Ph.D. program in Human Genetics will have demonstrated mastery of knowledge in genetics and contributed substantial and original scientific knowledge to the field.

Ph.D. students in the Human Genetics program are required to complete a minimum of 30 credit hours of formal course work, consisting of 24 hours of required course work and 6 hours of electives. One of the required courses will be a statistics course to be chosen from several currently available on campus and approved by the program faculty. Students will take a minimum of 6 hours of didactic classes per semester during their first two years of study. It is expected that during the second year at least one semester will exceed this minimum in order to complete the required courses prior to year three of study. The electives come from an approved list of advanced genetics courses and the choice of these courses will be based on the individual student's research interests.

Individualized Programs

Students with special course goals should inquire in the Graduate School office about the possibility of individualized, interdisciplinary programs of study leading to the master's and Ph.D. degrees. The Graduate School may permit programs that combine several disciplines in unique ways. Financial support for individualized programs must be arranged with specific faculty members as there are no program or departmental financial awards available.

Master's and Ph.D. students may not apply for admission to the individualized program until they have been admitted to and enrolled in a department currently offering that degree. Except under extraordinary circumstances, interested students will be expected to apply, or make preliminary inquiry, to the Graduate School during their first year of graduate studies.

Interdisciplinary Centers, Institutes, and Research Groups

Vanderbilt is home to more than 85 centers and institutes that work to tackle major challenges and meet important societal needs by bringing together faculty from a broad range of disciplines and producing cutting-edge research. Below is a sampling of Vanderbilt's interdisciplinary initiatives. For more information, see research.vanderbilt.edu/centers-and-institutes-at-vanderbilt.

The Center for Integrative and Cognitive Neuroscience investigates the relationship between brain function, behavior, and cognition, and promotes the development of new technologies like advanced prosthetics and autonomous robots.

The Center for Latin American Studies works to advance knowledge about and understanding of the region's history, culture, political economy, and social organization. as.vanderbilt.edu/clas/

The Frist Center for Autism and Innovation at Vanderbilt University School of Engineering brings engineers, business scholars, and disabilities researchers together with experts in neuroscience and education to understand, maximize, and promote neurodiverse talent and to respond to opportunities for innovation in technology and in workplace practices. With engagement across academia, government, business, and nonprofit organizations, as well as the clinical, vocational, and self-advocacy domains, the center works to build a true community-based approach that improves lives, organizations, and society. vanderbilt.edu/autismandinnovation/

The Max Kade Center for European and German Studies fosters an international perspective on issues relating to Europe and transatlantic relations and seeks to prepare students for international careers or advanced study. as.vanderbilt.edu/europeanstudies/

The Robert Penn Warren Center for the Humanities promotes interdisciplinary research and study in the humanities, social sciences and natural sciences. Members of the Vanderbilt community representing a wide variety of specializations take part in the center's programs, which are designed to intensify and increase interdisciplinary discussions of academic, social, and cultural issues. vanderbilt.edu/rpw_center/

The Vanderbilt Brain Institute promotes and facilitates the discovery efforts of Vanderbilt neuroscientists, the training of undergraduate and graduate students, and the coordination of public outreach in brain sciences. Research endeavors in the VBI include more than five hundred faculty, students, and staff from departments, centers, and institutes across campus who engage in neuroscience-directed research, training, and clinical service. medschool.vanderbilt.edu/brain-institute/

The Vanderbilt Institute for Surgery and Engineering creates, develops, implements, and evaluates solutions to complex interventional problems. Physicians, engineers, and computer scientists work together to improve patient care with surgical innovation through engineering. Central to the mission of the institute is the translation of methods, techniques, and devices from the laboratory to the patient. vanderbilt.edu/vise/

The Vanderbilt Institute for Energy and Environment elucidates the relationships among individual, institutional, and societal choices for energy production and use, and the impacts and benefits of these choices on the environment and health through links with climate, water quality, economics, social psychology, and natural resources. A crucial part of its mission is to train the next generation of leaders in the energy and environmental arena. vanderbilt.edu/viee/

The Vanderbilt Institute for Global Health builds capacity through interdisciplinary global health education and training programs, conducts implementation science and research, and provides technical assistance service to government and civil sector organizations in other countries. As a leader in international education and research, VIGH seeks to improve health and well-being of people living in low-resource settings. vumc.org/global-health/

The Vanderbilt Institute for Integrative Biosystems Research and Education fosters and enhances interdisciplinary research in the biophysical sciences and bioengineering at Vanderbilt, integrated with a strong focus on undergraduate, graduate, and postdoctoral education. VIIBRE's mission is to invent the tools and develop the skills that are required to understand biological systems across spatiotemporal scales. vanderbilt.edu/viibre/

The Vanderbilt Institute of Chemical Biology provides research and training in the application of chemical approaches to the solution of important biomedical problems, harnessing the power of chemistry to improve human health. medschool.vanderbilt.edu/vicb/

The Vanderbilt Institute of Nanoscale Science and Engineering engages in theoretical and experimental research in science and engineering at the nanoscale (from one millionth to one billionth of a meter in size). VINSE supports an extensive infrastructure of materials fabrication and analytical facilities for research in nanoscale science and engineering. vanderbilt.edu/vinse/

The Vanderbilt Kennedy Center for Research on Human Development facilitates discoveries and best practices that make positive differences in the lives of persons with disabilities and their families through research, training, services, and dissemination. Nationally, it is among fourteen Eunice Kennedy Shriver Intellectual and Developmental Disabilities Research Centers, sixty-seven national University Centers for Excellence in Developmental Disabilities, fifty-two Leadership Education in Neurodevelopmental Disabilities training programs, and includes the Treatment and Research Institute for Autism Spectrum Disorders. Research, practicum, and clinical experiences are available to trainees. vkc.vumc.org/vkc/

The Vanderbilt University Institute of Imaging Science aims to support and integrate advances in physics, engineering, chemistry, computing, and other basic sciences for the development and application of new and enhanced imaging techniques to address problems and stimulate new research directions in biology and medicine, in health and disease.

The Wond'ry supports immersive experiences for students and interdisciplinary projects for faculty--from all schools and colleges--who are interested in innovation and entrepreneurship. In addition to connecting various resources across the university, the center serves as a common space for students to develop and test ideas alongside their peers with mentorship from faculty, alumni, corporate partners, the Nashville entrepreneurial community, and beyond. Programming, seminars, and workshops help students from all disciplines grow their ventures at any stage of development. vanderbilt.edu/thewondry/

Interdisciplinary Graduate Program in Biomedical Sciences

COURSES OFFERED: [IGP](#)

Eleven programs participate in the Interdisciplinary Graduate Program: [Biochemistry](#), [Biological Sciences](#), [Cancer Biology](#), [Cell and Developmental Biology](#), [Molecular Pathology and Immunology](#), [Chemical and Physical Biology](#), [Microbe-Host Interactions](#), [Molecular Physiology and Biophysics](#), [Neuroscience](#), [Pharmacology](#), and [Human Genetics](#). During their first year, students take a core curriculum and conduct research in four laboratories before selecting the discipline in which they will earn the Ph.D. degree. Additional course work during subsequent years is appropriate to each discipline and the student's interests.

Ph.D. dissertation research may be conducted in any one of over 250–300 laboratories. Research opportunities are available in the following areas: biochemistry, biological sciences, cancer biology, cell biology, developmental biology, genetics, microbiology, immunology, pharmacology, molecular biology, molecular pathology, molecular toxicology, molecular neuroscience, reproductive biology, signal transduction, structural biology, molecular biophysics, and vascular biology.

Interdisciplinary Materials Science

DIRECTOR D. Greg Walker

DIRECTOR OF GRADUATE STUDIES D. Greg Walker

PROFESSORS EMERITI Jimmy L. Davidson, George T. Hahn, Donald L. Kinser, Taylor G. Wang, James E. Wittig

PROFESSORS Douglas Adams, David E. Cliffler, Peter Cummings, Craig L. Duvall, Daniel M. Fleetwood, Todd D. Giorgio, Scott A. Guelcher, Richard F. Haglund, Timothy P. Hanusa, G. Kane Jennings, Paul Laibinis, Deyu Li, Clare McCabe, Robert Reed, Sandra Rosenthal, Florence Sanchez, Ronald D. Schrimpf, Norman Tolk, Kalman Varga, Sharon Weiss, David W. Wright

ASSOCIATE PROFESSORS Leon M. Bellan, Joshua Caldwell, Janet Macdonald, Bridget R. Rogers, Jason G. Valentine, D. Greg Walker, Yaqiong Xu

ASSISTANT PROFESSORS Lauren Buchanan, Kelsey Hatzell, Piran Kidambi, Justus Ndukaife, John T. Wilson

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [IMS](#)

Material advancements improve the standard and the quality of living of societies everywhere. They are indeed the underpinning of the development of new technologies with the potential for global impact. In today's sophisticated and complicated world, continued advancements in materials demand intimacy among a variety of disciplines. In recognition of this multidisciplinary need, professors at Vanderbilt University from departments of Chemistry, Physics, Biomedical Engineering, Chemical and Biomolecular Engineering, Electrical Engineering,

Mechanical Engineering, and Civil Engineering, and School of Medicine have come together in the Interdisciplinary Materials Science program. Therefore, extensive collaboration in both the teaching of and research in materials science is pervasive, where multidisciplinary study is a hallmark of the educational experience.

The M.S. degree in materials science requires a minimum of 24 semester hours (beyond the baccalaureate) of formal course work plus a thesis of at least 6 semester hours. Nine semester hours are a selection of three of the four Materials Science core program courses. The core courses are Thermodynamics, Materials Chemistry, Atomic Arrangements in Solids, and Solid State Physics of Condensed Matter. Six additional hours are taken from an approved list of Interdisciplinary Materials Science program courses. A minor consisting of 6 semester hours is chosen in a separate but related field. The remaining 3 hours are an elective selected from either Interdisciplinary Materials Science program offerings or a related field.

The Ph.D. degree in materials science requires a total of 72 semester hours (beyond the baccalaureate) plus a dissertation. Within the requirement is a minimum of 24 semester hours of course work that includes 12 hours from the materials science core curriculum and 12 hours from an approved list of Interdisciplinary Materials Science program courses. The intent of these courses is to complement the student's technical interests. The remaining semester hours may be in research dissertation hours or in additional course electives.

Japanese

JAPANESE LANGUAGE SENIOR LECTURER Hideko Shimizu

LECTURERS Nozomi Imai, Asami Nakano

COURSES OFFERED: [JAPN](#)

Students should consult with the chair of Asian Studies and their home department advisers about the acceptability of Japanese courses for their program of study. Courses are not designed for advanced native speakers.

ASSISTANT PROFESSOR OF THE PRACTICE Mazalit Haim

LECTURER Judy Klass

CERTIFICATE OFFERED: JEWISH STUDIES

DEGREES OFFERED: See [Religion, Master of Arts](#)

COURSES OFFERED: [JS](#)

Jewish Studies at Vanderbilt offers an interdisciplinary academic program that seeks to facilitate the critical study

of Jewish history, religion, language, philosophy, politics, culture, society, music, art, and literature across continents and eras, and to situate this study in relation to the world in the present. The program accesses the resources of the entire university to explore Judaism, its evolution and expression from biblical times onwards.

Students interested in graduate instruction in Jewish studies have the option of pursuing a master of arts in Jewish studies through the Graduate Department of Religion, or a graduate certificate in Jewish studies through the Program in Jewish Studies.

Graduate Certificate in Jewish Studies

The certificate in Jewish studies provides graduate and professional students with access to interdisciplinary scholarship in the field of Jewish studies, supplies them with a valuable professional credential, and strengthens their ability to compete for jobs as well as for national fellowship and postdoctoral awards.

Any student enrolled in a graduate or professional program at Vanderbilt University is eligible to apply for the certificate in Jewish studies. Acceptance to the program requires a minimum cumulative GPA of 3.3, and the approval of both the student's primary adviser and the director of the Program in Jewish Studies.

Courses taken at Vanderbilt University prior to admission to the certificate program may be counted toward the certificate requirements with the approval of the director of the Program in Jewish Studies.

Students wishing to enroll must complete an Intent to Enroll form, which must be signed by the student, the director of the Program in Jewish Studies, and the director of the graduate program (DGS) for the degree program in which the student is enrolled. A signed copy of the form must be submitted to the Graduate School (graduateschool@vanderbilt.edu) and to the Office of the University Registrar (university.registrar@vanderbilt.edu).

A certificate in Jewish studies is awarded with either the M.A. or Ph.D. degree upon fulfillment of the following requirements:

1. *Foundational Course, 3 credit hours.* JS 5000, Major Themes in Jewish Studies. As this course is not offered every year, students may petition to have this requirement waived. If this requirement is waived, students will be required to take an additional 3 credit hours under requirement 2.
2. *Focus Courses, 15 credit hours.* Students must complete 15 credit hours of interrelated courses in Jewish studies, appropriate to the student's program of study and forming an intellectually cohesive whole (or 18 credit hours, if the requirement to take JS 5000 is waived). Students are required to complete at least one course from three of four subfields, with at least 9 credit hours coming from a single subfield:
 - Area 1: Biblical Studies
 - Area 2: Antiquity and Medieval World
 - Area 3: Modern and Contemporary Experience
 - Area 4: Culture, Philosophy, and Literature

Courses listed below are approved for certificate credit. Other courses not on this list must be approved for credit by the director of the Program in Jewish Studies. Any courses at the 2000- or 3000-level also require instructor permission to enroll and arrangements for additional work beyond the undergraduate requirements.

No more than 6 credit hours of specifically named courses required for the primary degree may be applied toward the certificate.

1. A non-credit final project/paper submitted to the Jewish Studies steering committee that demonstrates an application of Jewish studies contents or methodology to research, teaching, or fieldwork. The project/paper may originate as an assignment in a graduate-level course.

Approved List of Courses

LANGUAGE: Jewish Studies: 5301, Jewish Language and Paleography. Classics: 6300, Akkadian. Hebrew (Modern Hebrew): 1101-1102, Elementary Hebrew; 2201-2202, Intermediate Hebrew; 3851-3852; Independent Study in Modern Hebrew; 5111, Hebrew for Graduate Reading; 5301, Advanced Hebrew Grammar; 5302,

Advanced Hebrew Composition. Religion: 2514, Elementary Modern Hebrew I; 2515, Elementary Modern Hebrew II; 3102, Intermediate Modern Hebrew I; 3103, Intermediate Modern Hebrew II; 5101-5102, Elementary Biblical Hebrew; 5120, Intermediate Biblical Hebrew.

AREA 1. BIBLICAL STUDIES: Jewish Studies: 5100, The New Testament in Its Jewish Contexts. English: 3370, The Bible in Literature. Music Literature: 2310, The Bible and Music. Religious Studies: 5225, Sexuality in the Hebrew Bible and the Ancient Near East; 5926, Ancient Goddesses; 5938, Marriage in the Ancient Near East and the Hebrew Bible. Religion: 3109, Exilic Prophecy; 3111, The Pentateuch; 3112, Apocalyptic; 3113, The Wisdom Literature of the Ancient Near East; 3117, The Ethics of Ancient Israel; 3124, Esther and Ruth; 3127, Cultures of Ancient Near East; 3128, Jewish Messianism; 3129, Book of Judges; 3130, Book of Jeremiah; 3131, Voices of Women in the Ancient Near East; 3142, The Old Testament in Greek; 6177, Song of Songs; 6500, The Hebrew Bible; 6501, Literary Analysis of the Hebrew Bible; 6502, Leadership in Hebrew Bible; 6503, Seminar in the History of Ancient Israel; 6504, Modern Interpreters of Ancient Israel; 6505, Biblical Law and Ancient Israel; 6506, Politics and the Economy in Ancient Israel; 6510, Empire and Canon; 6511, Book of Genesis; 6513, The Book of Exodus; 6515, The Book of Deuteronomy; 6516, The Book of Numbers; 6517, Book of Joshua; 6518, Book of Job; 6519, Book of Qoheleth; 6520, Book of Daniel; 6522, Sexuality in the Hebrew Bible and ANE; 6524, Literature of the Ancient Near East; 6525, Ancient Goddesses; 6528, Book of Amos; 6529, Eighth-Century Prophecy; 6575, Old Testament Theology; 6580, West Semitic Inscriptions; 6609, Feminist Interpretations of Scripture; 9200, Reading Course in Hebrew Bible.

AREA 2. ANTIQUITY AND THE MEDIEVAL WORLD: Jewish Studies: 2600, Islam and the Jews; 5150, Issues in Rabbinic Literature; 5210, Reading across Boundaries: Jewish and Non-Jewish Texts; 5620, Jews in Egypt; 5640, Jews and Greeks; 5892, Topics in Ancient and Medieval Jewish History. Anthropology: 8230, The Collapse of Civilizations. Classics: 5010, The Ancient Origins of Religious Conflict in the Middle East; 5100, History of the Ancient Near East; 5120, Greece and the Near East from Alexander to Theodosius; 5160, History of Roman Empire. History: 3210, Muslims, Christians, and Jews in Medieval Spain; 5160, Medicine in Islam; 5170, Islam and the Crusades. History of Art: 5260, The Art of Pagans, Christians, and Jews. Philosophy: 2101, Hellenistic and Late Ancient Philosophy; 2102, Medieval Philosophy. Religion: 3150, Lives of Jesus: Ancient and Modern; 3151, Jesus and the Early Christian Communities; 3156, Jewish and Christian Self-Definition; 3501, Judaism in New Testament Times; 6526, Jewish Life in Persian Egypt; 6527, Hellenistic Jewish Literature; 6608, Jewish/Christian Relation; 6794, Art of Pagans, Christians, and Jews. Religious Studies: 4554, The Qur'an and Its Interpreters.

AREA 3. MODERN AND CONTEMPORARY EXPERIENCE: Jewish Studies: 2400, American Jewish Life; 2450, The Jewish Diaspora; 2500, Modern Israel; 3100, The Holocaust; 3830, Contemporary Jewish Issues; 5300, Modern Jewish Thought; 5540, Power and Diplomacy in the Modern Middle East; 5560, Social Movements in Modern Jewish Life; 5894, Topics in Modern Jewish History. European Studies: 2208, Conspiracy Theories and Rumors in European and U.S. History. History: 3160, Immigration, Race, and Nationality: The American Experience; 5130, Russia: Old Regime to Revolution; 5135, Russia: The U.S.S.R. and Afterward; 5190, Last Empire of Islam; 5300, Twentieth-Century Germany; 2720, World War II; 5885, Cities of Europe and the Middle East. Political Science: 2230, Middle East Politics. Religion: 3502, Judaism and Modernity; 8817, The Holocaust: Its Meanings and Implications; 8822, The Holocaust: Representation and Reflection. Religious Studies: 2210W, Constructions of Jewish Identity in the Modern World; 3229, The Holocaust: Its Meanings and Implications; 4939, Religious Autobiography. Sociology: 3702, Racial and Ethnic Minorities in the United States.

AREA 4. CULTURE, PHILOSOPHY, AND LITERATURE: Jewish Studies: 2210W, Hebrew Literature in Translation; 2230W, American Southern Jews in Life and Literature; 2240W, Black-Jewish Relations in Post-War American Literature and Culture; 2280, Jewish Humor; 2280W, Jewish Humor; 2290W, Imagining the Alien: Jewish Science Fiction; 2420W, American Jewish Music; 5250W, Witnesses Who Were Not There: Literature of the Children of Holocaust Survivors; 5260, Coming of Age in Jewish Literature and Film; 5260W, Coming of Age in Jewish Literature and Film; 5270, Jewish Storytelling; 5270W, Jewish Storytelling; 5320, Freud and Jewish Identity; 5330, Is G-d Guilty? The Problem of Evil in Judaism; 5340, Jewish Philosophy after Auschwitz; 5520, Zionism: Politics, Religion, and Ethnicity; 5000, Major Themes in Jewish Studies. English: 3664, Jewish American Literature. French: 4430, The Struggle of Encounter: The Israeli-Palestinian Conflict in Literature. German: 5445, Nazi Cinema: The Manipulation of Mass Culture; 5344, Women at the Margins: German-Jewish Women Writers. History of Art: 5765, Art since 1945. Music Literature: 2150, Music, Identity, and Diversity. Philosophy: 2109, Twentieth-Century Continental Philosophy; 3005, Jewish Philosophy; 3006, Islamic Philosophy; 3011, Critical Theory. Religion: 3503, The Jewish Heritage; 3505, Jewish Ethics; 8805, Jewish Theories of Religion; 8825, Jewish Animals. Religious Studies: 2220, Jewish Ethics; 2940, Great Books of Literature and Religion; 5270, Jewish Theories of

Religion; 5940, The Nature of Evil. Russian: 2434, The Russian Cinema; 5231, Jews in Russian Culture: Survival and Identity. Sociology: 3204, Tourism, Culture, and Place; 3222, Sociology of Religion.

CERTIFICATE OFFERED: LATIN AMERICAN STUDIES

DEGREE OFFERED: Master of Arts

COURSES OFFERED: [LAS](#)

Designated by the U.S. Department of Education as a National Resource Center for Latin America, Vanderbilt's Center for Latin American Studies draws on departmental strengths and faculty expertise from across campus.

Integrating teaching, research, and service, the center maintains substantive collaborations with all of Vanderbilt's colleges and schools. The center has special strengths in Maya studies, Brazilian studies, Andean studies, and the Black Atlantic, as well as unique library collections of Colombiana. Programs of instruction provided by the center promote greater understanding of the region's history, culture, political economy, and social organization and cultivate the ability to think strategically about global issues.

Faculty and courses come from the Departments of Anthropology, Economics, History, History of Art, Political Science, Sociology, and Spanish and Portuguese as well as from Vanderbilt's education, engineering, law, management, medical, music, and nursing schools. The center fosters a lively research community on campus by sponsoring colloquia, conferences, films, and a speaker series that brings distinguished scholars, government and business leaders, and social activists to campus.

Students work toward an M.A. in Latin American studies, a master's or doctoral degree in one of the related programs with an emphasis on Latin American studies, or a certificate in Latin American studies.

Candidates for the M.A. in Latin American studies choose a thesis (30 hours and thesis) or non-thesis (33 hours) option. Each option includes Latin American Studies 5901. The non-thesis option requires 15 hours in one broad area of specialization (history, social sciences, or language and literature), 9 hours in another of those areas of specialization, and 6 hours in additional course work. The thesis option requires 9 hours in one broad area of specialization (history, social sciences, or language and literature), 6 hours in another of those areas of specialization, and 6 hours in additional course work, in addition to 6 hours of thesis research and writing. Candidate for the master's degree must complete four semesters of graduate study as a full-time student. Master's degree candidates are expected to demonstrate advanced language ability in either Spanish, Portuguese, Haitian Creole, or an indigenous Latin American language as well as intermediate ability in another.

Through the Combined B.A./M.A. (4+1) Option, the department offers exceptional students the opportunity to earn both the B.A. and the M.A. in five years. Students will be provisionally admitted to the 4+1 program only by approval of the department. Further information about the program is available from the director of graduate studies.

Requirements for Graduate Certificate in Latin American Studies

The Center for Latin American Studies Graduate Certificate seeks to equip students with a broad, interdisciplinary view of Latin America. The program allows students enrolled in a post-baccalaureate degree program to document their specialization in Latin America and their language proficiency as well as to extend their studies beyond their disciplinary specialization. Students completing the certificate must fulfill the following requirements:

1. Complete at least 12 credit hours of interrelated graduate course work on Latin America, with at least 6 credit hours coming from outside the student's home discipline. No more than 6 credit hours of specifically named courses required for the primary degree may be applied toward the certificate. Graduate courses successfully completed at Vanderbilt prior to admission to the program may be counted toward the certificate requirements, and an undergraduate course may be substituted for a graduate course, with the approval of the director of the program and the Graduate School. All courses must be approved by the assistant director of the Latin American Studies program and form an intellectually cohesive whole.
2. Demonstrate conversational or reading proficiency in Spanish, Portuguese, Haitian Creole, or an

indigenous Latin American language. Proficiency will be demonstrated by an oral examination administered by a Vanderbilt professor or lecturer (not a graduate student) following ACTFL (American Council on the Teaching of Foreign Languages) guidelines and resulting in a rating of at least "intermediate-mid."

3. Participate in a minimum of five extracurricular activities sponsored by CLAS. A short paper reflecting on the insights gained from participating must be submitted to the assistant director of CLAS.

Students wishing to enroll must complete an Intent to Enroll form, which must be signed by the student, the director of the LAS Certificate Program, and the director of the graduate program (DGS) for the degree program in which the student is enrolled. A signed copy of the form must be submitted to the Graduate School (graduateschool@vanderbilt.edu) and to the Office of the University Registrar (university.registrar@vanderbilt.edu).

Latin American Studies offers three dual degree programs: MA/MPH, MA/MBA, and MA/MEd in IEPM. Applicants must apply independently to and be accepted by both the Graduate School and the appropriate professional school. The LAS component requires 30 credit hours of course work and a thesis.

See departmental listings for courses offered 2021/2022. The following are specialized courses in the participating programs.

ANTHROPOLOGY: 5106, Culture and Power in Latin America; 5108, Indigenous Peoples of Lowland South America; 5220, Human Landscapes; 5231, Ancient Andean Civilizations; 5603, Comparative Writing Systems; 6122, The Anthropology of Globalization; 6130, Andean Culture and Society; 6140, Myth, Ritual, Belief: The Anthropology of Religion; 6141, Anthropology of Healing; 6143, Medical Anthropology; 6154, Environmental Anthropology; 6200, Ancient Cities; 6202, The Collapse of Civilizations; 6240, Ancient Mesoamerican Civilizations; 6241, The Aztecs; 6242, The Archaeology of the Ancient Maya Civilization; 6243, Classic Maya Religion and Politics; 6250, The Inca Empire; 6620, Maya Language and Literature; 6850-6851, Independent Research; 8000, History of Anthropological Theory I; 8001, History of Anthropological Theory II; 8010, Special Topics: Well-Being, Economics and Culture; 8010, Special Topics: Disease and Adaptation; 8100, Political Violence; 8110, Seminar in Maya Ethnography; 8104, Seminar on Political Economy and Anthropology; 8211, Space, Place, and Landscape; 8220, The Historical Archaeology of Latin America; 8230, The Collapse of Civilizations: General Theories and the Maya Collapse; 8232, Seminar in Mesoamerican Archaeology; 8240, Seminar in South American Archaeology and Ethnohistory; 8311, Violence and Its Embodiments in the Past and Present.

ECONOMICS: 7910, Seminar: Research Economic Development; 7920, Seminar: Research Economic Development.

HAITIAN CREOLE: 5101, Elementary Creole I; 5102, Elementary Creole II; 5201, Intermediate Creole I; 5202, Intermediate Creole II.

HISTORY: 5450, Reform, Crisis, and Independence in Latin America, 1700-1820; 5460, Colonial Mexico; 5470, Modern Mexico; 5480, Central America; 5490, Brazilian Civilization; 5510, Reform and Revolution in Latin America; 5530, African Religions in the Americas; 5535, Latin America and the United States; 5540, Race and Nation in Latin America; 5570, Caribbean History, 1492-1983; 6500, Readings in Colonial Latin America; 6510, Readings in Modern Latin American History; 8600, Comparative Slavery in the Colonial Americas; 8610, Atlantic World History, Fifteenth to the Nineteenth Century; 8620, Studies in Latin American History; 8630, Research Seminar in Latin American History.

K'ICHE' MAYAN LANGUAGE: 5101, Elementary K'iche' I; 5102, Elementary K'iche' II; 5201, Intermediate K'iche' I; 5202, Intermediate K'iche' II.

LAW: 7064, Comparative Law: Europe, Latin America and East Asia; 7128, Crossing Borders in Law and Literature; 7266, International Criminal Law; 7291, International Trade Short Course; 8101, International Mergers and Acquisitions Short Course.

MEDICINE, HEALTH, AND SOCIETY: 7313, Introduction to Medical Anthropology; 7316, Case Studies in Tropical Diseases.

NURSING: 5105, Enhancing Community and Population Health I; 5205, Enhancing Community and Population Health II; 5305, Enhancing Community and Public Health III; 6080, Interdisciplinary Topics in Global Health; 8072, Addressing Global Health Disparities: An Interdisciplinary Perspective.

POLITICAL SCIENCE: 5213, Democratization and Political Development; 5219, Politics of Mexico; 6228, International Politics of Latin America; 8315, Research in Latin American Politics; 8317, The Political Economy of Development.

PORTUGUESE: 5203, Intermediate Portuguese; 5301, Portuguese Composition and Conversation; 5302, Brazilian Pop Culture; 5303, Introduction to Luso-Brazilian Literature; 5350, Brazilian Culture through Native Material; 5420, Brazilian Literature through the Nineteenth Century; 5425, Modern Brazilian Literature; 5850, Independent Study; 5892, Special Topics in Portuguese Language, Literature, or Civilization; 7050, Introduction to Latin American Colonial Studies; 7070, Spanish American and Brazilian Literature I; 7071, Spanish American and Brazilian Literature II; 8200, Seminar: Studies in Colonial Literature; 8210, Seminar: Hispanic American Essay; 8400, Seminar: Studies in Inter-American Literature; 9520, Seminar: Studies in Contemporary Literature of the Portuguese-Speaking World; 9670, Special Studies in Brazilian Literature.

PUBLIC HEALTH: 5255, Global Health in Nicaragua; 5541, Foundational Skills in Global Health; 5542, Foundations of Global Health; 5544, Ethics in Global Health; 5549, Case Studies in Tropical Diseases; 5550, Global Health Politics and Policy.

RELIGION: 6645, Political-Liberationist Biblical Criticism. SOCIOLOGY: 9888-9889, Directed Studies.

SPANISH: 5340, History of the Spanish Language; 5420, Spanish American Literature from the Conquest to 1900; 5425, Spanish American Literature from 1900 to the Present; 5440, Development of the Short Story; 5450, The Contemporary Novel; 5720, Literary Genres and National Identities in Latin America; 5730, Modern Latin American Poetry; 5740, Spanish-American Literature of the Boom Era; 5741, Spanish-American Literature of the Post-Boom Era; 5750, Afro-Hispanic Literature; 5755, Latina and Latin American Women Writers; 5850, Independent Study; 5891, Special Topics in Hispanic Culture; 5893, Special Topics in Hispanic Literature; 7050, Introduction to Latin American Colonial Studies; 7060, Seminar: Modernismo; 7070, Spanish American and Brazilian Literature I; 7071, Spanish American and Brazilian Literature II; 8200, Seminar: Studies in Colonial Literature; 8210, Seminar: Hispanic American Essay; 8220, Seminar: Studies in Spanish American Literature in a Global Context; 8400, Seminar: Studies in Inter-American Literature; 8600, Seminar: Issues in Latin American Cinema; 9240, Ordering and Disrupting Fictions in Latin America; 9250, Self-Writing in Latin America; 9260, The Spanish American Novel of the Boom Period; 9265, The Melancholy Novel in Latin America; 9270, The Politics of Identity in Latino U.S. Literature; 9520, Special Topics in Spanish American Literature; 9670, Special Studies in Spanish American Literature.

In addition, qualified graduate students in the Latin American Studies program may, with appropriate permission, enroll in Special Topics (5891) courses directly relating to Latin America.

Latino and Latina Studies

DIRECTOR Celso Castillo

FACULTY DIRECTOR Lorraine López

CERTIFICATE OFFERED: LATINO AND LATINA STUDIES

COURES OFFERED: [LATS](#)

Latino and Latina Studies focuses on cultural production and political and socioeconomic experiences of people inculcated with the US experience, self-identifying as Latinx, and communicating primarily in English and sometimes in Spanish. The LATS graduate certificate will examine this enduring and dynamic population that crosses and re-crosses borders constructed by geography, linguistics, class, race, and gender. This program of study is designed to accommodate a range of voices and multiple manifestations of Latinx identity and cultural expression in historical and contemporary contexts to fill in this vital but often overlooked component of our national identity and discourse.

Students pursuing a LATS graduate certificate are expected to obtain language competence in Spanish before completing the program, though they do not need to meet this requirement when applying for the certificate.

Students may satisfy this requirement by completing SPAN 3303, or any other course with a higher number taught in Spanish, or an oral or written exam administered by the program.

Any student enrolled in a graduate program at Vanderbilt is eligible to apply for the certificate in Latino and Latina studies. Acceptance in the program requires the approval of the student's primary adviser and the director of the Program in Latino and Latina Studies, Gretchen Selcke. Graduate courses successfully completed at Vanderbilt University prior to admission to the program may be counted toward the certificate requirements with the approval of the director of the program. An undergraduate course may be substituted for a graduate course required by the program's curriculum with the approval of the director of the program and the Graduate School.

Students wishing to enroll must complete an Intent to Enroll form, which must be signed by the student, the director of the LATS Certificate Program, and the director of the graduate program (DGS) for the degree program in which the student is enrolled. A signed copy of the form should be submitted to the Graduate School (graduateschool@vanderbilt.edu), to the Office of the University Registrar (URO) (university.registrar@vanderbilt.edu), and to the LATS program administrator.

Requirements for the Graduate Certificate in Latino and Latina Studies

A certificate in Latino and Latina studies is awarded with either the M.A. or Ph.D. degree upon fulfillment of the following requirements: (1) Completion of at least 12 (M.A.) or 15 (Ph.D.) credit hours of interrelated course work across two or more disciplines. Two courses, LATS 2201/5201 or ENGL 3658 and LATS 5961, are required. Remaining courses must be taken in at least two different disciplines outside of students' home department, with no more than two courses (6 credit hours) coming from any one discipline. We strongly encourage students to take as wide a range of courses as possible appropriate to the student's program of study and forming an intellectually cohesive whole. Up to 6 credit hours of specifically named required courses from a student's primary degree program may count toward the certificate. Courses must be approved for credit by the LATS director. One course (3 credit hours) may be satisfied through an independent study with a faculty member affiliated with the Latino and Latina Studies program, with the approval of the director of Latino and Latina Studies. (2) Completion of two papers or projects demonstrating the application of concepts related to Latino and Latina studies framework or methodology to research, teaching, or fieldwork.

Law and Economics

DIRECTORS Joni Hersch, W. Kip Viscusi

DIRECTOR OF GRADUATE STUDIES Kevin M. Stack

PROFESSORS Kathryn H. Anderson, Joni Hersch, Paige Marta Skiba, Jennifer Bennett Shinall, W. Kip Viscusi

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [LWEC](#)

The Ph.D. Program in Law and Economics combines analytical training in economic theory and methodology with the study of law. This fully-funded, fully-integrated program is designed to allow students to satisfy the requirements for the Ph.D. and J.D. within six years. For students who matriculate with a J.D., the requirements for the Ph.D. can be completed within four years. The Ph.D. degree is designed for students who wish to pursue careers in universities, research institutions, or government.

The program is based in Vanderbilt Law School, and courses are taught by faculty in the Law School and the Department of Economics. Students receive a solid grounding in microeconomic theory, econometrics, and law and economics theory.

Students admitted to the Ph.D. program are required to complete 72 hours of course work and research. This includes a minimum of 48 hours of formal course work in core, field, and elective courses, 6 hours of Ph.D. Workshop in Law and Economics, 12 hours of graduate credit granted for J.D. coursework, and up to 6 hours of research. The core consists of 30 hours in law and economics theory, economic theory, and empirical analysis.

After completing the first year of graduate study, all students must pass a written comprehensive examination based on the core Ph.D. courses.

In year 3 for joint-degree students and year 2 for Ph.D.-only students, students select two fields of concentration from a pre-approved list of fields and begin taking the associated field courses. Currently, the list of identified fields includes behavioral law and economics, labor and human resources, law and economics, and risk and environmental regulation. The program does not offer a field in corporate finance or financial economics. Field requirements include 12 hours of formal course work (6 hours in each field). In some circumstances, and with the consent of the director of graduate studies and program faculty, students are allowed to develop a new field.

Detailed information is available upon request from program staff (email phd.lawecon@vanderbilt.edu) or from the program webpage, law.vanderbilt.edu/phd.

RESEARCH ASSISTANT PROFESSOR Mollie Rubin

ASSISTANT PROFESSORS Christopher Candelaria, Joanne W. Golann, Matthew Shaw, Kelly Slay, Adela Soliz

DEGREE OFFERED: EDUCATIONAL LEADERSHIP AND POLICY, Doctor of Philosophy; HIGHER EDUCATION LEADERSHIP AND POLICY, Doctor of Philosophy

COURSES OFFERED: [LPO](#)

The mission of the Department of Leadership, Policy, and Organizations (LPO) is to increase understanding and guide improvements in human learning and outcomes, in the political, economic, organizational, social, legal and regulatory contexts in which human development occurs. In our research, teaching and research-practice collaborations, the department embraces a range of disciplinary traditions and methodological approaches and fosters diversity in the study of education leadership, policy, and practice.

LPO's doctoral-level program in leadership and policy studies offers concentrations in K-12 Leadership and Policy and Higher Education Leadership and Policy. Students focus on their selected area of inquiry throughout the program, and are expected to conduct research, present papers at national academic conferences, and publish in academic journals.

The Ph.D. program is designed for those who intend to build a career focused on the study of education and policy, as researchers, professors, and policy analysts. It is a full-time, four- to five-year program that equips its graduates with the knowledge and methodological tools to conduct cutting-edge research on the pressing educational issues of the day. Students learn to examine education problems through the lenses of economics, political science, sociology, and history. All students are expected to develop strong statistical and data analysis skills, and a thorough understanding of causal inference, while developing expertise in other tools of social science, including experimental and quasi-experimental design, survey research methods, and qualitative research methods.

At the heart of the program is the mentor-apprentice model, where students work on research projects alongside a collection of esteemed faculty. As part of their course work and apprenticeship experiences, students learn to present papers at scholarly conferences and submit journal articles for publication.

Transfer Hours: Up to 24 hours of transfer credit may be accepted in consultation with the student's adviser.

Total Required Hours: 72 hours

Educational Leadership and Policy

Areas of study include educator labor markets, accountability, developing teachers and improving instruction, leadership and governance, educational equity, work force impacts, school finance, school choice, evaluation of education policies and programs, career and technical education, and school reform.

Higher Education Leadership and Policy

Areas of study include student access to higher education, student financial aid, higher education finance, student transitions, student persistence and success, and state higher education policy innovations.

Requirements for All Specializations

I. Social Science Core Requirements (12 hours)

Politics of Education

Sociology of Education

Economics of Education

History of Education

II. PhD Specialty Research Seminars (9 hours)

Education Leadership and Policy

Higher Education Leadership and Policy

III. Research Tools (18 hours)

Research Design and Methods for Education Policy

Statistical Methods for Education Research

Regression Analysis I

Regression Analysis II

Causal Inference

Qualitative Research Methods

IV. Research Practicum (6 hours)

V. Proseminar (3 hours)

VI. Electives or Transfer Hours (24 hours)

Learning, Teaching, and Diversity

CHAIR Deborah W. Rowe

ASSOCIATE CHAIR Marcy Singer-Gabella

DIRECTOR OF GRADUATE STUDIES Kevin Leander

PROFESSORS David Dickinson, Noel Enyedy, Melissa S. Gresalfi, Rogers Hall, Ilana Horn, Kevin M. Leander, Richard Milner, Deborah W. Rowe

PROFESSORS OF THE PRACTICE Chris Iddings, Lisa Pray, Marcy Singer-Gabella, Anita A. Wager

RESEARCH PROFESSORS Paul A. Cobb, Dale C. Farran, Kathy Ganske, Robert Jimenez, Richard Lehrer, Leona Schauble

ASSOCIATE PROFESSORS Amanda Goodwin, Ebony O. McGee

ASSOCIATE PROFESSORS OF THE PRACTICE Molly Collins, Shannon Daniel, Andrew Hostetler, Melanie Hundley, Heather L. Johnson, Catherine McTamanev, Amy Palmeri, Emily Pendergrass, Ann M. Neely

ASSISTANT PROFESSORS Corey Brady, Nicole Joseph, Luis Leyva, Emily Phillips-Galloway, Jessica Watkins

ASSISTANT PROFESSORS OF THE PRACTICE Teresa K. Dunleavy, Elizabeth Self

SENIOR LECTURERS Andrea Henrie, Kristen Neal

DEGREE OFFERED: Doctor of Philosophy

The graduate program in learning, teaching, and diversity offered by the Department of Teaching and Learning is designed for persons who will conduct research on learning and activity and who will pursue careers as education faculty members at research universities. The program admits a very select number of students with strong academic credentials and relevant experience, who are interested in working closely with the faculty in research and development projects.

Programs of study for the doctor of philosophy include 72 class credits distributed between (a) a core set of courses that develops a knowledge base in the areas of learning, teaching, and diversity; (b) a specialization area, selected from Justice and Diversity in Education; Language, Literacy, and Culture; Learning and Design; and Mathematics and Science Education; and (c) quantitative and qualitative research methodology courses.

Students admitted to the doctor of philosophy program in learning, teaching, and diversity may obtain a master of science degree with a major in learning, teaching, and diversity upon completion of 30 semester hours and the completion of either a thesis or the major area paper.

Liberal Arts and Science

DIRECTOR Sheri Shaneyfelt

DEGREE OFFERED: Master of Liberal Arts and Science

COURSES OFFERED: [MLAS](#)

The Master of Liberal Arts and Science degree program offers part-time, adult students the opportunity to earn an interdisciplinary, nontraditional graduate degree.

Each course generally meets one night per week, and students select one course per semester. While the program is designed primarily for personal enrichment, students often discover important professional career benefits as well. The requirements and curriculum provide flexibility in program design and course selection, and the tuition, scheduling, admission, and registration procedures acknowledge the special circumstances of the part-time adult student. Although MLAS students take classes part time, in exceptional circumstances and with written approval from the program director, students may be enrolled full time. International students wishing to attend the MLAS program on certain visas will be required to enroll full time to maintain their visa status.

Specific titles, topics, and instructors of courses are available for each semester from the director of the Master of Liberal Arts and Science degree program. Requirements for the degree are listed in the chapter on Academic Regulations. Prospective students may also consult the website for additional information: vanderbilt.edu/mlas.

Master of Fine Arts in Creative Writing

The English department's M.F.A. in creative writing is a three-year program, offering writing workshops and supervision in the composition of creative work. Students are required to take a complement of literature courses along with their workshops. The goal of the M.F.A. program is to produce creative writers with a broad and deep knowledge of their genres.

Applicants for the M.F.A. must submit an official college transcript, a manuscript of creative work, a statement of purpose, and three letters of recommendation. For more details see Vanderbilt's M.F.A. website: vanderbilt.edu/creativewriting.

Requirements for the M.F.A. include 48 hours of course work completed in the first two years, a thesis of creative work (a novel, a book of short stories, a collection of poems, or a collection of personal essays), plus an oral defense of the thesis. The course work includes graduate workshops (one per semester for four semesters) and seminars in the craft of writing and in literary studies. With guidance and approval of faculty, M.F.A. students may enroll in relevant courses in other departments, programs, or schools.

Materials Science and Engineering

Mathematics

INTERIM HEAD David Wright

VICE CHAIR Mark Ellingham

DIRECTOR OF UNDERGRADUATE STUDIES John Rafter

DIRECTOR OF GRADUATE STUDIES Alexander Powell

PROFESSORS EMERITI John Ahner, Philip S. Crooke, Emmanuele DiBenedetto, Richard R. Goldberg, Matthew Gould, Robert L. Hemminger, C. Bruce Hughes, Ettore F. Infante, Gennadi Kasparov, Richard J. Larsen, Ralph N. McKenzie, Michael D. Plummer, John G. Ratcliffe, Eric Schechter, Daoxing Xia

PROFESSORS Akram Aldroubi, Dietmar Bisch, Paul H. Edelman, Mark N. Ellingham, Douglas P. Hardin, Michael L. Mihalik, Mike Neamtu, Alexander Olshanskiy, Denis Osin, Alexander Powell, Edward B. Saff, Mark V. Sapir, Larry L. Schumaker, Gieri Simonett, Constantine Tsinakis, Glenn F. Webb, Dechao Zheng

RESEARCH PROFESSORS Philip S. Crooke, Emmanuele DiBenedetto, Ralph N. McKenzie, Stephen G. Simpson

ASSOCIATE PROFESSORS Jesse Peterson, Jared Speck, Ioana Suvaina, Steven T. Tschantz

RESEARCH ASSOCIATE PROFESSOR Rares Rasdeaconu

ASSISTANT PROFESSORS Anna Marie Bohmann, Marcelo Disconzi, Spencer Dowdall, William Holmes, Larry Rolén

POSTDOCTORAL SCHOLARS Leonardo Abbrescia, Simon André, Dylan Domel-White, Hengrong Du, Mitchell Faulk, Kevin Grace, James Hateley, Jocelyne Ishak, Alexander Margolis, Rocío Díaz Martín, Ivan Medri, Ian Runnels, Sam Shepherd, Oleksandr Vlasiuk, Ian Wagner, Yi Wang, Xinyue Zhao

DEGREES OFFERED: Master of Arts, Doctor of Philosophy

COURSES OFFERED: [MATH](#)

A master's degree may be earned by completing 36 credit hours of course work at the 5000 level or above. By careful selection of courses, a master's candidate may achieve special preparation in applied mathematics or computer science and thus become qualified for a position in industry or government, or as a teacher in high school or junior college.

Through the Combined B.A./M.A. (4+1) Option, the department offers exceptional students the opportunity to earn both the B.A. and the M.A. in five years. Students will be provisionally admitted to the 4+1 program only by approval of the department. Further information about the program is available from the director of graduate studies.

Candidates for the Ph.D. degree take at least 48 credit hours of formal course work, including seven courses from 6100–6101, 6200–6201, 6300–6301, and 7100–7101, and at least eight additional courses at the 6000 level or above. A complete description of Ph.D. requirements in mathematics may be obtained on request from the director of graduate studies. All Ph.D. students with a teaching assistantship participate in teaching activities.

Courses numbered above 5000 may be used for minor credit by students in other disciplines.

Mechanical Engineering

CHAIR Nilanjan Sarkar

ASSOCIATE CHAIR Haoxiang Luo

DIRECTOR OF GRADUATE STUDIES Eric J. Barth

DIRECTOR OF UNDERGRADUATE STUDIES Kenneth D. Frampton

DIRECTOR OF GRADUATE RECRUITING Jason G. Valentine

PROFESSORS EMERITI Thomas A. Cruse, George T. Hahn, Donald L. Kinser, Arthur M. Mellor, Carol A. Rubin, Taylor G. Wang, James J. Wert, John W. Williamson

PROFESSORS Douglas E. Adams, Eric J. Barth, Michael Goldfarb, S. Duke Herrell, Deyu Li, Sankaran Mahadevan, Caglar Oskay, Robert W. Pitz, Nilanjan Sarkar, Nabil Simaan, Alvin M. Strauss, Robert J. Webster III

PROFESSOR OF THE PRACTICE Amrutur V. Anilkumar, Kenneth D. Frampton

ADJOINT PROFESSORS Pietro Valdastri, Peiyong Wang

ASSOCIATE PROFESSORS Leon M. Bellan, Joshua D. Caldwell, Haoxiang Luo, Fabien Maldonado, Keith L. Obstein, Jason G. Valentine, Greg Walker, Karl E. Zelik

ASSOCIATE PROFESSORS OF THE PRACTICE Robert J. Barnett, Thomas J. Withrow

ASSISTANT PROFESSORS David Braun, Ravindra Duddu, Justus C. Ndukaife

ASSISTANT PROFESSORS OF PRACTICE Jason Mitchell

RESEARCH ASSISTANT PROFESSORS Neal P. Dillon, Kevin C. Galloway, Richard J. Hendrick, Zheng Li, Scott J. Webster

ADJOINT ASSISTANT PROFESSOR Carl A. Hall

DEGREES OFFERED: Master of Science, Doctor of Philosophy

COURSES OFFERED: [ME](#)

The program in mechanical engineering allows concentration in a variety of areas of mechanical engineering research. Candidates for the master of science degree must complete 24 hours of course work and 6 hours of acceptable master's thesis. The course work must include at least 12 hours at or above the 5000 level, and a minor of at least 6 hours in courses separate from, but related to, the field of study. The Ph.D. program requires 24 hours of course work beyond the bachelor's degree and an acceptable dissertation. This course work must include a 6 hour minor in an area separate from, but related to, the field of study. At least 12 hours of the 24 must be at or above the 5000 level. A maximum of 6 hours in independent study may be included in the 24 hour requirement. There is also a master of science/doctor of medicine degree program joint between the Department of Mechanical Engineering and the School of Medicine. Details may be obtained from the director of graduate studies in Mechanical Engineering.

Medical Scientist Training Program (M.D./Ph.D.)

DIRECTOR Christopher S. Williams

ASSOCIATE DIRECTORS Lourdes Estrada, Danny G. Winder, Ambra Pozzi, Sally J. York

ASSISTANT DIRECTOR Megan A. Williams

DEGREES OFFERED: Doctor of Medicine *and* Doctor of Philosophy

COURSES OFFERED: [MSTP](#)

The central goal of the Medical Scientist Training Program at Vanderbilt University is to identify, mentor, and foster the careers of a diverse workforce of superior future leaders in academic medicine, industry, and government who are dedicated to improving human health through research, clinical activities, and leadership. Based on solid clinical training and rigorous, highly impactful research training, our program fosters the development of independent scientific careers. We provide students with an integrated curriculum comprising a strong core education in medicine and intensive training in scientific inquiry. Successful completion of the program leads to both the M.D. and Ph.D. degrees. MSTP students come from a diverse applicant pool drawn from throughout the nation and abroad.

The MSTP is a dual endeavor between the Vanderbilt University School of Medicine and the Vanderbilt University Graduate School. Trainees are required to fulfill all of the requirements for both the M.D. and Ph.D. degrees. Since some competencies for the M.D. degree are met by the graduate school experience, it is possible for MSTP students matriculating July 2013 or after to complete the M.D. program in a total of three years. The MSTP allows both dual and alternating enrollment in the School of Medicine and the Graduate School. MSTP students will typically complete the Foundations of Medical Knowledge (FMK) and Foundations of Clinical Care (FCC) phases, exit for graduate studies, then return for a single remaining medical school year, the Immersion Phase.

The cornerstone of the Vanderbilt MSTP is training in scientific inquiry afforded by a rigorous Ph.D. experience. After completing the first two years of medical school and at least two laboratory rotations, trainees select a laboratory and department for graduate studies. This selection is typically formalized before the end of the second year of medical school. Requirements for successful completion of the Ph.D. degree are the same for all students at Vanderbilt and the Ph.D. thesis must be successfully defended prior to reentry into medical school. Most MSTP students will re-enter clinical training sometime between April and July.

To facilitate the training of clinical investigators, we developed a distinct track within the Vanderbilt MSTP called the MSTP Clinical Investigation Track. The goal of the MSTP-CIT is to provide comprehensive training in science for physician scientists engaged in translational and patient-oriented research. This program is intended for students who enter the MSTP after the third year of medical school or during residency or fellowship.

For additional information about the Vanderbilt MSTP, including application information, visit the program's website at medschool.vanderbilt.edu/mstp.

Medicine, Health, and Society

DIRECTOR Jonathan M. Metzl

ASSISTANT DIRECTOR JuLeigh Petty

DIRECTOR OF GRADUATE STUDIES JuLeigh Petty

Hillyer (Biological Sciences), Rolanda Johnson (Nursing), Melanie Lutenbacher (Nursing), Ifeoma Nwankwo (English), Evelyn Patterson (Sociology), Ruth Rogaski (History), Norbert Ross (Anthropology), David Schlundt (Psychology), Phillis Sheppard (Religion), Tiffany Tung (Anthropology), Timothy J. Vogus (Management and Organization Studies)

ASSISTANT PROFESSORS Carolyn Audet (Preventive Medicine), Ian Campbell (Medicine), Troy Moon (Pediatric Infectious Disease), Sayeh Nikpay (Health Policy), Kevin T. Seale (Biomedical Engineering)

DEGREE OFFERED: Master of Arts

CERTIFICATE OFFERED: MEDICINE, HEALTH, AND SOCIETY

COURSES OFFERED: [MHS](#)

Graduate study in medicine, health, and society at Vanderbilt offers an interdisciplinary master of arts and a graduate certificate for students interested in studying health-related beliefs and practices in their social and cultural contexts. It is available to graduate and professional students from the six participating Vanderbilt schools (Arts and

Science, Divinity, Law, Medicine, Nursing, and Peabody). External candidates are considered for admission, as are Vanderbilt undergraduates applying through the 4+1 program in the College of Arts and Science.

MHS draws on a variety of fields in the social sciences and humanities—anthropology, economics, history, literature, psychology, sociology, philosophy/ethics, and religious studies. It should be of particular interest to students preparing for careers in a health-related profession, but also has much to offer any graduate or professional student interested in examining an important part of human experience from multiple perspectives and developing a critical understanding of contemporary society.

Master of Arts

Students may choose a thesis option (24 credit hours of course work plus 6 credit hours of thesis research) or

non-thesis option (30 hours). The thesis should draw on at least two disciplines.

Requirements include the 3 credit hour core colloquium (MHS 6100) and an additional 21 or 27 credit hours (depending on the option) of courses approved for the MHS graduate program.

It is expected that students who can devote themselves to the MHS program full time will complete their studies in three terms (i.e., two semesters and one summer or three semesters). However, the length of the program will be flexible to accommodate the needs of different constituencies.

M.D./M.A.

This program is available to current medical students, who may choose between the thesis and non-thesis options described above. The M.A. may be completed in one year, plus either a summer or two research electives.

4+1 M.A. Program

This program is available only to current Vanderbilt undergraduate students. Students may choose between the thesis and non-thesis options described above.

Requirements for Graduate Certificate in Medicine, Health, and Society

The certificate is available only to current graduate and professional students from the six participating Vanderbilt schools (Arts and Science, Divinity, Law, Medicine, Nursing, and Peabody). Acceptance to the program requires a minimum cumulative GPA of 3.3 and the approval of both the student's adviser and the director of graduate studies for Medicine, Health, and Society. To apply, students will:

1. Complete the Intent to Enroll form from the Graduate School's website.
2. Contact MHS to arrange a meeting with the director of graduate studies.
3. After fulfilling the program requirements, complete the MHS Graduate Certificate Application Form. Turn in the application form and a copy of the paper to be evaluated by the MHS Graduate Committee to the director of graduate studies.

Requirements include:

1. Completion of MHS 6100 and an additional 12 credit hours of graduate-level course work in Medicine, Health, and Society. The courses must form an intellectually cohesive whole. Courses must be approved by the MHS Graduate Committee for credit and should include at least two courses (at least 6 credit hours) outside the student's home discipline. One course may be satisfied through an independent study with a faculty member affiliated with the MHS with the approval of the director of graduate studies. Graduate courses taken at Vanderbilt University prior to admission to the MHS Graduate Certificate Program may be counted toward the certificate requirements with the approval of the MHS Graduate Committee if the course can satisfy one of the curriculum requirements of the program. No more than two courses (6 credit hours) of specifically named courses required for the primary degree may be applied toward the certificate.
2. Submission of a research paper to the MHS Graduate Committee for evaluation. The paper must demonstrate the application of interdisciplinary methods and knowledge of an area of study related to medicine, health, and society.
3. Participation in a minimum of five extracurricular activities sponsored by MHS. A short paper reflecting on the insights gained from participating must be submitted to the assistant director of MHS.

Other Approved Courses

Additional courses not on this list may be approved at the discretion of the MHS director. Graduate students enrolled in mezzanine-level courses will complete additional work in order to gain graduate credit.

ANTHROPOLOGY: 4373, Health and Disease in Ancient Populations; 5310, Death and the Body; 6141, Anthropology of Healing; 6142, Medicine, Culture, and the Body; 6143, Medical Anthropology; 6344, Genetic

Anthropology Lab Techniques; 6345, Human Evolutionary Genetics; 8010, Special Topics (as appropriate); 8310, The Anthropology of Death: Body, Place, and Memory.

DIVINITY/RELIGION: 5022, Reading Course in Medical Ethics; 7004, Theories of Personality; 7007, Religion and Coping; 7024, Research in Religion and Health; 7041, Pastoral Care for Persons with Addictions and Mental Disorders; 7049, The Religious Self According to Jung; 7051, Freudian Theories and Religion; 7052, Post-Freudian Theories and Religion; 7053, Seminar: Contemporary Psychotherapy and Pastoral Counseling; 7101, Methods in Ethics; 7220, Seminar in Clinical and Research Ethics.

ECONOMICS: 5350, Economics of Health; 9480, Health Economics; 9490, Seminar: Health Economics.

ENGLISH: 8155, Special Topics in English and American Literature (as appropriate). Note: topics vary; the MHS director will approve versions with sufficient MHS content for credit toward this program.

HISTORY: 5800, Modern Medicine; 5810, Women, Health, and Sexuality; 5830, Medicine, Culture, and the Body (same as Anthropology 6142).

MEDICINE, HEALTH, AND SOCIETY: 5030, Community Health Research; 5120, Medicine, Technology, and Society; 5230, Masculinity and Men's Health; 5250, War and the Body; 5310, Psychiatry, Culture, and Globalization; 5330, Men's Health Research; 5350, Perspectives on Trauma; 5410, HIV/AIDS in the Global Community; 6100, Theories and Methods in Critical Health Studies; 6200, Concepts and Methods in Health Disparities Research; 6300, Social Studies of Science and Medicine; 6400, Quantitative Research Methods; 6500, Special Topics: Social Foundations of Health; 7000, Interdisciplinary Research Methods; 7100, Research Workshop; 7305, Foundations in Global Health; 7306, Essential Skills in Global Health; 7308, Ethics, Law, and Medicine; 7311, Ethics in Global Health; 7312, Informatics for Global Health Professionals; 7313, Introduction to Medical Anthropology; 7314, Global Health Politics and Policy; 7315, Leadership and Development in Global Health; 7316, Case Studies in Tropical Diseases; 7317, Introduction to Quality Improvement; 7319, Lab Technology Low Resource Setting; 7830, Graduate Service Learning; 7831, Service Learning Research; 7832, Service Learning Readings; 7850, Independent Study; 7851, Independent Study; 7880, Internship Training; 7881, Internship Research; 7882, Internship Readings; 7999, Master's Thesis Research.

NURSING: 6040, Introduction to Health Informatics; 6149, Special Topics: Complementary and Alternative Therapies; 6812, The Evolution of Midwifery in America.

PSYCHOLOGY: 6310, Advanced General Psychology, as appropriate [topics vary; the program director will approve versions with sufficient MHS content for credit toward this program]; 8310, Research Methods in Clinical Psychology; 8360, Seminar: Clinical Psychology; 8942, Seminar: Social.

SOCIOLOGY: 9363, Special Topics Seminar on Institutions and Organizations (as appropriate).

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [MP&B](#)

Students interested in this program generally participate in the Interdisciplinary Graduate Program in the Biomedical Sciences or Quantitative and Chemical Biology program during the first year (see Biomedical Sciences). The second year comprises required and elective courses in Molecular Physiology and Biophysics for a total of at least 24 hours of formal course work toward the Ph.D. degree. Variations are permitted in the number of formal course hours above the minimum of 24 required for the degree. A thesis-based master's degree is awarded only under special circumstances.

The emphasis of the graduate program is on research and research training in the areas of molecular and cell biology, cellular regulation and endocrinology, electrophysiology and biophysics, whole animal physiology and pathophysiology, and genetics. However, the training experience is applicable across a wide range of future career options. Students obtain a general background in physiology, biochemistry, molecular biology, and genetics through course work and laboratory exercises. Students are encouraged to rotate freely among various research laboratories in their first year in order to select a particular research area and thesis adviser for dissertation research.

Research areas available to the student include a broad range of multidisciplinary topics spanning the breadth of modern physiology. Students will apply diverse cutting edge techniques to address major questions in the field. Major themes in the department include:

1. Hormonal and developmental aspects of gene control at the molecular level, with emphasis on single cell analyses and the roles of DNA-protein interactions.
2. Cellular aspects of hormonal and immunological regulation of biological process involving glucose, fatty acid and ion transport, as well as the mechanism of action of hormonal second messengers such as cAMP, cGMP, and calcium.
3. Hormonal regulation of metabolism in whole animal models.
4. Neuroendocrine and neurobehavioral studies of energy homeostasis and drug addiction.
5. Biophysical and structural analysis of membrane protein function, with a focus on the regulation of synaptic transmission.
6. Examination of the genetic basis of neurological and metabolic disorders.

Departmental research programs have strong relevance to a range of human diseases including diabetes, obesity, cardiovascular disorders, cancer, nutritional deficiencies, developmental abnormalities, and addiction.

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [NSC](#), [NURO](#)

The program of study provides a broad background in neuroscience and related disciplines, preparing a student for a career as a research scientist and teacher. Graduates are recruited for positions into academic institutions where the discipline of neuroscience is growing rapidly, as well as into government, industry, and biotechnology.

The Ph.D. program requires a minimum of 24 hours of formal didactic course work. Students enter the program via one of two paths—either directly or via the IGP (see Biomedical Sciences), and complete an interdisciplinary core of course work in their first year. This course work consists of a two-semester survey course of neuroscience along with a two-semester professional development course. These courses survey the broad areas of neuroscience and are designed to link fundamental principles to contemporary research, as well as focus on building the skills necessary for success. An individualized elective schedule augments the required material in areas that relate directly to the student's area of chosen research. Major research emphases within the program span the breadth of contemporary neuroscience, and are divided into twelve themes: addiction and reward, circadian rhythms and sleep, cognitive neuroscience, computational neuroscience and neuroengineering, developmental neuroscience, educational neuroscience, law and society, learning and memory, mood, anxiety and psychosis, neurodegeneration and neuroinflammation, synaptic function and neuroendocrine signaling, and sensory and motor neuroscience. An original research dissertation is required for the Ph.D. degree.

For additional information, see medschool.vanderbilt.edu/brain-institute/.

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [NRSC](#)

This program prepares scholars for research and academic careers in public or private sectors of healthcare. All students receive education in the areas of clinical and health services research. These areas of study are reflective of the overall research interests and expertise of School of Nursing faculty members and resources available in the medical center, university, and School of Nursing. Examples of faculty research interests include acute and chronic illness, cognitive health and dysfunction, data science, health technologies, palliative care, and women's health.

Admission to the Ph.D. in Nursing Science Program is through the Graduate School. Application materials are online. Successful applicants to the program are those whose essay clearly articulates their research career goals, research interests, research experiences and potential faculty mentors. Previous academic performance, writing samples, and letters of recommendation are also considered.

The program requires 72 credit hours of study, of which 15 may be transferred from master's course work, pending review and approval by the Graduate School. The core curriculum of the program includes 47 credit hours of required course work, which includes 6 elective hours and 10 credit hours of course work that addresses the student's research (4 research practica and 6 dissertation research credits).

Course work is delivered using both face-to-face and technology-driven instruction. Students work with faculty mentors who guide and oversee their program of study from admission through degree completion. Students may have opportunities to participate in intensive research experiences connected with faculty research projects and are exposed to a variety of research designs and analytic techniques. Degree requirements include successful completion of advanced course work, a qualifying exam, and a dissertation.

For more information, visit nursing.vanderbilt.edu/phd.

Online Master's Program in Computer Science

The Graduate School offers an online program for a master of science in computer science. This program requires completion of 30 credit hours over three terms which, depending on the course schedules, students can expect to complete in twelve to twenty-one months. Students meet weekly for HD-streaming live classes, group work, and discussions, and can meet with faculty in online office hours. In addition to online learning, students can attend campus events, including career-building workshops and the Vanderbilt Entrepreneur Conference.

Upon completion of the program, students may participate in the Vanderbilt Commencement ceremony on

campus to receive their Vanderbilt diplomas.

Online students have full access to Vanderbilt libraries, the Office of Student Financial Aid and Scholarships, veterans educational benefits, and Student Access Services (disability services). The rest of student services are offered in partnership with online program partner 2U or by 2U, which include Career Service, Student Success, and WeWork Membership. Except where noted, online students are subject to the policies outlined in this catalog.

Complete information on this program is available at engineeringonline.vanderbilt.edu/computer-science.

Pathology, Microbiology, and Immunology

CHAIR Alice C. Coogan

DIVISION DIRECTOR AND VICE CHAIR FOR RESEARCH Eric P. Skaar

DIRECTOR OF GRADUATE STUDIES Molecular Pathology and Immunology, W. Gray Jerome; Associate Director, Jeffrey C. Rathmell

DIRECTOR OF GRADUATE STUDIES Microbe-Host Interactions, Christopher Aiken

PROFESSORS EMERITI John H. Hash, George C. Hill, Geraldine Miller

PROFESSORS Christopher Aiken, David Michael Aronoff, Thomas N. Aune, Joey V. Barnett, Mark R. Boothby, Seth Bordenstein, Timothy Cover, Leslie Crofford, James Crowe, Mark R. Denison, Wonder Drake, Agnes B. Fogo, David Gailani, David W. Haas, J., Harold Helderman, Billy G. Hudson, Sebastian Joyce, D. Borden Lacy, Simon Mallal, Houra Merrikh, William (Bill) Mitchell, Harold L. Moses, Kevin G. Osteen, R. Stokes Peebles, Richard Peek, Elizabeth Phillips, John A. Phillips, Jeffrey C. Rathmell, Donald H. Rubin, Ed Sherwood, Eric P. Skaar, Subramaniam Sriram, Larry L. Swift, James Ward Thomas, Luc Van Kaer, Lorraine B. Ware, Alissa M. Weaver, Keith T. Wilson, Mary M. Zutter

ASSOCIATE PROFESSORS Justin Balko, Julie Bastarache, Ivelin Georgiev, Maria Hadjifrangiskou, W. Gray Jerome, Spyros Kalams, John Karijolic, Young Kim, Deborah A. Lannigan, Andrew J. Link, Susan Majka, Amy S. Major, Louise A. Rollins-Smith, Jonathan G. Schoenecker, Adam Seegmiller, Gregory Sephel, Ben Spiller, Jeanne Wallace, Sandra Zinkel

RESEARCH ASSOCIATE PROFESSORS Ingrid A. M. Verhamme, Lan Wu

ASSISTANT PROFESSORS Holly M. Algood, Manuel Ascano Jr., Megan Behringer, Rachel Bonami, Mariana Byndloss, James E. Cassat, Jennifer Gaddy, Jeremy Goettel, Jonathan Irish, Tae Kon Kim, Janet Markle, Oliver G. McDonald, Daniel J. Moore, Dawn Newcomb, Michael Noto, Kristen Ogden, Danyvid Olivares-Villagómez, Mary Philip, Heather Pua, Elisabeth Rendina-Ruedy, Jonathan Schmitz, Henrique Serezani, Scott Alan Smith, Vivian Lee Weiss, Wenhan Zhu

RESEARCH ASSISTANT PROFESSORS Shanna Arnold, Sung Hoon Cho, S. Kent Dickeson, Melissa Farrow, Sarika Saraswati

RESEARCH INSTRUCTORS Mathew Bechard, Damian Maseda, Gregory Sowd, Haichun Yang

DEGREES OFFERED: MOLECULAR PATHOLOGY AND IMMUNOLOGY, Doctor of Philosophy; MICROBE-HOST INTERACTIONS, Doctor of Philosophy

COURSES OFFERED: [M&IM](#), [PATH](#)

Molecular Pathology and Immunology Program

Students interested in the Molecular Pathology and Immunology Program enter the program after they participate in the Interdisciplinary Graduate Program in the Biomedical Sciences (see Biomedical Sciences). Molecular pathology and immunology occupies a unique niche among the biomedical sciences in that it bridges the basic science and translational disciplines. It seeks to determine the mechanism and etiology of disease, to study the agents and conditions that cause disease, and to elucidate the steps in the transformation of a normal

tissue or process into an abnormal one, with an emphasis on inflammation and immunology. Pathology and Immunology students are ideally positioned to influence the conceptual and methodologic transfer of advances in the basic biological sciences to the alleviation of disease and the maintenance of health.

The program in molecular pathology and immunology leading to the Ph.D. degree is designed to prepare students for careers in biomedical sciences. The program focuses on research, but students from the program find positions in many biomedical science fields. Students in their first year complete a core of course work through the Interdisciplinary Graduate Program in the Biomedical Sciences (see Biomedical Sciences). The second year of study comprises required and elective courses for a total of at least 24 credit hours of formal course work (including the 16 credit hours in the first year). The curriculum is flexible so that course selection can be tailored to the interests and particular needs of the student. Elective hours are often taken in areas such as cell biology, biochemistry, molecular biology, and molecular physiology and biophysics. Qualifying examinations are administered after the second year of study, and the final two to three years of the program are devoted to research. A thesis-based master's degree is awarded only under special circumstances.

The research interests of the faculty include vascular biology and biochemistry, tumor biology, the immune response, inflammation and repair, the biology of the extracellular matrix in response to disease processes, the pathogenesis of infectious agents, and the regulation of gene expression in disease. The department is fully equipped with modern research training facilities and provides close faculty mentoring through a high faculty-to-student ratio.

Microbe-Host Interactions Program

Students interested in the Microbe-Host Interactions Program participate in the Interdisciplinary Graduate Program in the Biomedical Sciences during their first year (see Biomedical Sciences). The second year of study comprises required and elective courses in bacteriology, virology, and immunology for a total of at least 24 credit hours of formal course work toward the Ph.D. degree.

The Microbe-Host Interactions Program is designed to provide state-of-the-art training in modern bacteriology, virology, host cell and immune responses to microbes, molecular genetics and pathogenesis, and biotechnology. Research experience in a specific area provides the basis for a dissertation. Students normally enter via the Interdisciplinary Graduate Program in Biomedical Sciences, in which they do rotations in the laboratories of four faculty members prior to choosing a field of study. Dissertation research may be initiated in any of the following areas:

- Bacterial pathogenesis, including mechanisms of toxin action and drug resistance (Cover, Drake, Hadjifrangiskou, Lacy, Merrikh, Peek, Skaar, Spiller);
- Role of the intestinal microbiota in health and disease (Byndloss, Olivares-Villagomez, Zhu);
- Molecular biology of virus-host interactions (Aiken, Ascano, Crowe, Denison, Karijolic, Ogden);
- Immune responses to bacterial, viral, and fungal infections (Algood, Aronoff, Crowe, Gaddy, Joyce, Kalams, Mallal, Rollins-Smith, Sherwood, Van Kaer, Wilson);
- Molecular genetics (Aiken, Bordenstein, Crowe, Georgiev, Hadjifrangiskou, Merrikh, Ogden, Karijolic, Skaar);
- Protein structure and proteomics (Lacy, Link, Spiller).

Emphasis is on basic research aimed at understanding molecular mechanisms of microbial infections and the host cell and immune defenses. Students whose interests are primarily in ecological or taxonomic aspects of microbiology are not encouraged to apply.

Doctoral study is emphasized. However, an M.S. degree may be granted under special circumstances and may require a research thesis.

Pharmacology

ACTING CHAIR Ege T. Kavalali

VICE CHAIR Joey V. Barnett

DIRECTOR OF GRADUATE STUDIES Christine Konradi

ASSOCIATE DIRECTOR OF GRADUATE STUDIES Sean S. Davies

UNIVERSITY PROFESSORS Craig Lindsley, Lawrence Marnett

PROFESSORS EMERITI Wolf D. Dettbarn, L. Jackson Roberts II, Elaine Sanders-Bush,

PROFESSORS Malcolm Avison, Brian Bachmann, Jeffrey Balsler, Joey V. Barnett, Italo Biaggioni, Alan R. Brash, Richard M. Breyer,

Kendal S. Broadie, David Calkins, Richard Caprioli, Jeffrey Conn, Jerod Denton, Ariel Y. Deutch, Ronald B. Emeson, Stephen Fesik, David Lee Gordon, Vsevolod Gurevich, David W. Haas, Heidi E. Hamm, David G. Harrison, Tina M. Iverson, Ege Kavalali, Bjorn Knollmann, Christine L. Konradi, Ethan Lee, MacRae Linton, Peter R. Martin, Douglas McMahon, Jens Meiler, W. David Merryman, Lisa Monteggia,

Paul Moore, Katherine T. Murray, Jeffrey Neul, Paul A. Newhouse, Sachin Patel, Elizabeth Phillips, Vito Quaranta, Albert Reynolds, Ann Richmond, Matthias Riess, Dan M. Roden, Sandra Rosenthal, Claus Schneider, C. Michael Stein, Gary Sulikowski, J. David Sweatt, Mark Wallace, Danny Winder, Laurence Zwiebel

RESEARCH PROFESSORS J. Oliver McIntyre, Jens Meiler, Colleen Niswender, Tao Yang

ADJUNCT/ADJOINT PROFESSORS Scott Akers, Nancy Brown, Sanika Chirwa, Lee E. Limbird, Sukhbir Mokha, Martin Ogletree, Margaret Whalen

ASSOCIATE PROFESSORS EMERITI Erwin J. Landon, Peter W. Reed

ASSOCIATE PROFESSORS Sean S. Davies, Barbara Fingleton, Eugenia Gurevich, Timothy Hohman, Carrie K. Jones, Jing-Qiong Kang, James M. Luther, Michael J. McLean, Jonathan Schoenecker, Henrique Serezani, Bih-Hwa Shieh, Ben Spiller, Brian E. Wadzinski, C. David Weaver, Matthew H. Wilson

RESEARCH ASSOCIATE PROFESSORS Olivier Boutaud, Ginger L. Milne, Jerri Rook, Alex Waterson

EDUCATION ASSOCIATE PROFESSOR Fiona Yull

ADJUNCT/ADJOINT ASSOCIATE PROFESSORS David L. Black, Chang Chung, J. Scott Daniels, Phyllis Freeman, Richard Gumina, Charles Hong, Hind Lal, Christine Saunders, Venkataswarup Tiriveedhi Xiaofei Wang

ASSISTANT PROFESSORS Raymond Blind, Erin Calipari, Robert Carson, Brad Grueter, Jennifer Herington, , Carlos Lopez, Gregor Neuert, Rick Sando, Elaine Shelton, Cody Siciliano, Quinn Wells

RESEARCH ASSISTANT PROFESSORS Mohamed Ahmed, John D. Allison, Michael Bubser, Darren W. Engers, Julie Engers, Andrew Felts, Daniel Foster, Masoud Ghamari-Langroudi, Garrett Kaas, Bruce Melancon, Ai-Dong Qi, Minati Singh, Anna Vinson, Zixiu Xiang

EDUCATION ASSISTANT PROFESSOR Kendra Oliver

ADJUNCT/ADJOINT ASSISTANT PROFESSORS Anna Blobaum, Christopher B. Brown, Rachel Crouch, R. Nathan Daniels, Hugh Fentress, Glenroy Dean Martin, Susan Mercer, Saumya Ramanathan, Anna Vilgelm

EDUCATION INSTRUCTORS Alice Rodriguez, Megan Williams

RESEARCH INSTRUCTORS Max Joffe, Munir Kutlu, Paula Luis, Zhenzhong Ma, Nathalie C. Schnetz-Boutaud, Ok-ho Shin, Kanzo Suzuki, Sergey Vishnivetskiy, Chi Yan

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [PHAR-GS](#)

Students interested in pharmacology participate in the Interdisciplinary Graduate Program in the Biomedical Sciences (see Biomedical Sciences). The program of study provides a broad background in pharmacology and

other biomedical disciplines, preparing the student for a career as a research investigator. Graduates have been highly successful in obtaining positions in medical schools, government research institutes, and the pharmaceutical industry.

Students in their first year complete a core of course work through the Interdisciplinary Graduate Program in the Biomedical Sciences. The second year of study is composed of required and elective courses in Pharmacology for a total of 24 hours of formal course work toward the Ph.D. degree (including the 16 hours in the first year IGP). Requirements vary regarding the amount and distribution of course work that must be taken, but substantial work is taken in Pharmacology, and supplemented with course work in cell biology, biochemistry, molecular physiology, biophysics, and chemistry, according to the student's interests. Subsequent years focus on research and specialized course work as directed by mentors in the Pharmacological Sciences Training Program. Fields of research include molecular and biochemical pharmacology; neuropharmacology; autonomic, cardiovascular, endocrine, and clinical pharmacology; and drug metabolism and toxicology. A research dissertation is required for the Ph.D. degree.

For more information, visit medschool.vanderbilt.edu/pharmacology.

Philosophy

CHAIR Paul Taylor

DIRECTOR OF GRADUATE STUDIES Karen Ng

PROFESSORS EMERITI Robert R. Ehman, Marilyn Friedman, John Lachs, Larry May, Charles E. Scott, Donald W. Sherburne, Henry A. Teloh, Jeffrey Tlumak

PROFESSORS Lenn E. Goodman, Michael P. Hodges, Kelly Oliver, Lucius T. Outlaw Jr., Robert Talisse, Paul Taylor

ASSOCIATE PROFESSORS Scott Aikin, Idit Dobbs-Weinstein, Karen Ng, Julian Wuerth

ASSISTANT PROFESSORS Emanuele Costa, Matthew Congdon, Diana Heney

DEGREES OFFERED: Master of Arts, Doctor of Philosophy

COURSES OFFERED: [PHIL](#)

Work for the Ph.D. degree is offered in all major fields in the discipline. Candidates must complete at least 47 credit hours of formal course work and satisfy additional requirements. When appropriate, course work may include a limited number of seminars in other disciplines. For further details and current information, see the Department of Philosophy webpage: as.vanderbilt.edu/philosophy/.

Through the Combined B.A./M.A. (4+1) Option, the department offers exceptional students the opportunity to earn both the B.A. and the M.A. in five years. Students will be provisionally admitted to the 4+1 program only by approval of the department. Further information about the 4+1 program is available from the director of undergraduate studies.

Physics and Astronomy

CHAIR M. Shane Hutson

DIRECTORS OF GRADUATE STUDIES Senta V. Greene (Physics), Andreas Berlind (Astrophysics)

PROFESSORS EMERITI John Paul Barach, Charles A. Brau, Leonard C. Feldman, Dennis Hall, Arnold M. Heiser, P. Galen Lenhert, Charles F. Maguire, Volker E. Oberacker, Akunuri V. Ramayya, Medford S. Webster, Thomas J. Weiler, Robert A. Weller

PROFESSORS Andreas Berlind, David J. Ernst, Daniel M. Fleetwood, John C. Gore, Senta V. Greene, Richard F. Haglund Jr., Joseph H. Hamilton, Kelly Holley-Bockelmann, M. Shane Hutson, Will E. Johns, Thomas W. Kephart, Sokrates Pantelides, Sandra J. Rosenthal, Robert J. Scherrer, Paul D. Sheldon, Keivan G. Stassun, Norman H. Tolk, A. Sait Umar, Kalman Varga, Julia Velkovska, David A. Weintraub, Sharon Weiss, John P. Wikswo Jr.

DISTINGUISHED RESEARCH PROFESSOR C. Robert O'Dell

RESEARCH PROFESSORS Frank E. Block, C. Richard Chappell, Leonard C. Feldman

ASSOCIATE PROFESSORS Steven E. Csorna, Daniel F. Gochberg, Todd E. Peterson, Jason Valentine, Yaqiong Xu

RESEARCH ASSOCIATE PROFESSORS Alan Tackett

ASSISTANT PROFESSORS Alfredo Gurrola, William Holmes, Jessie C. Runnoe, David Smith, Stephen R. Taylor

RESEARCH ASSISTANT PROFESSORS Jonathan Bird, Lauren Campbell, Donald A. Cox III, William E. Gabella, Karan Jani,

Halina Krzyzanowska, Andrew O'Hara, Klaas Padeken, Dina M. Stroud, Sourav Tarafdar, Enhong Wang

DEGREES OFFERED: Master of Arts, Master of Science, Doctor of Philosophy

COURSES OFFERED: [ASTR](#), [PHYS](#)

Physics and astronomy are driving intellectual forces that expand our understanding of the universe, discover the science that underlies new technologies, and applies these technologies to both curiosity-driven and applied research. In keeping with this role, the Department of Physics and Astronomy has active research groups studying the theoretical and experimental physics of elementary particles; nuclear structure, heavy-ion reactions, and relativistic heavy-ion physics; linear and nonlinear interactions of photons, electrons, atoms, and molecules with nanocrystals, surfaces, and interfaces; the electric, magnetic, and active mechanical properties of living systems; the structure and dynamics of biopolymers; the physics and technology of medical imaging; computational physics; low mass and young stars; detection of extrasolar planets; structure and dynamics of galaxies; observational and theoretical cosmology; ultra-high energy cosmic rays; and cosmology.

The master of science degree in physics requires a minimum of 30 credit hours consisting of at least 24 hours of formal didactic course work and normally including 6 credit hours of master thesis research. The didactic course work must include at least 9 credit hours above the 8000 level. The master of science degree requires a written thesis approved by at least two graduate faculty members in the physics and astronomy program.

A non-thesis option (master of arts in physics) is available to students admitted to candidacy for the Ph.D. in physics. Under the non-thesis plan, the student presents an oral report on a research subject in the field of investigation and submits a written account of this subject to the program faculty. This degree also requires a minimum of 30 credit hours. For information regarding the master of science and professional doctorate degrees in medical physics, see the medical physics section in the School of Medicine catalog.

The Ph.D. degree requires 72 credit hours of graduate work, including 15 credit hours of core courses, the 1 hour Physics 8000 seminar, 3 credit hours in one breadth course outside the student's main research area, 9 credit hours of elective physics graduate courses, a minimum of six semesters of Physics 8001 Physics Colloquium, and a minimum of two semesters of Physics 8003 Teaching Practicum. The remaining credit hours may be earned through some combination of non-candidate research, dissertation research, and approved lecture courses.

Political Science

CHAIR Alan Wiseman

ASSOCIATE CHAIR Jennifer M. Larson

DIRECTOR OF GRADUATE STUDIES Emily H. Ritter

PROFESSORS EMERITI M. Donald Hancock, Erwin C. Hargrove, William C. Havard Jr., Bruce I. Oppenheimer, Richard A. Pride, James Lee Ray, Mitchell A. Seligson, Benjamin Walter

PROFESSORS Brooke A. Ackerly, Larry M. Bartels, W. James Booth, Joshua D. Clinton, John G. Geer, Cindy D. Kam, David E. Lewis, Edward Rubin, John M. Sides, Alan Wiseman, Elizabeth J. Zechmeister

ASSOCIATE PROFESSORS Brett V. Benson, Jonathan T. Hiskey, Jennifer M. Larson, Noam Lupu, Emily H. Ritter, Sharece Thrower

ASSISTANT PROFESSORS Allison P. Anoll, Peter Bills, Amanda B. Clayton, Andrew J. Coe, Cassy Dorff, Brenton Kenkel, Eunji Kim, Kristin Michelitch, Peter Schram, Bradley C. Smith, Guillermo Toral

DEGREES OFFERED: Master of Arts, Doctor of Philosophy

COURSES OFFERED: [PSCI](#)

The graduate program in political science provides graduate students with rigorous training in American politics, comparative politics, international relations, political methodology, and political theory.

The Department of Political Science does not accept external applications for a terminal master's degree. A terminal master's degree in political science may be earned by Ph.D. students electing not to continue with the program. The terminal master's can be earned through (a) a program that requires 24 credit hours of course work (including Political Science 8355 and 8356 and at least 18 hours of 8000-level courses), 6 credit hours of master's thesis work, and a thesis or (b) a non-thesis option requiring 33 credit hours of course work (including Political Science 8355 and 8356 and at least 27 credit hours of 8000-level courses). The student must maintain a GPA of at least 3.0 in the 8000-level courses. A master's degree in passing option is available to students en route to the Ph.D., who have completed all courses required for the Ph.D. degree, passed the preliminary examinations, and defended successfully the dissertation proposal.

At least 42 credit hours of formal course work are required for the Ph.D. degree; 72 credit hours (including dissertation research hours) are required in total to complete the degree. Research Design (8355) and Statistics for Political Research (8356) are required of all prospective candidates.

Candidates for the Ph.D. are expected to demonstrate proficiency in substantive topics and research skills, including statistics, at a level fixed by the program faculty.

Through the combined B.A./M.A. (4+1) program, the Department of Political Science offers exceptional Vanderbilt undergraduates the opportunity to earn both the B.A. and the M.A. in five years. Students will be provisionally admitted to the 4+1 program only by approval of the department. Further information about the program is available from the director of graduate studies.

ASSISTANT CLINICAL PROFESSOR Vicki S. Harris

DEGREES OFFERED: Master of Arts, Doctor of Philosophy

COURSES OFFERED: [PSY](#), [PSY-GS](#)

The doctoral program in psychological sciences is offered jointly by the Department of Psychology in the College of Arts and Science and the Department of Psychology and Human Development in Peabody College. The Psychological Sciences program focuses on psychological theory and the development of original empirical research. Students are admitted to work toward the Ph.D. degree in the following areas:

- Clinical Science
- Cognition and Cognitive Neuroscience
- Cognition in Context
- Developmental Science
- Neuroscience
- Quantitative Methods

A major goal of our doctoral program is the placement of its graduates in academic settings. The faculty aim to tailor graduate training to meet the needs and the interests of each individual student. Students are monitored very closely from the beginning of their training, and emphasis is on active student participation during every stage of training.

Through the Combined B.A./M.A. (4+1) option, the department of Psychology in the college of Arts & Science offers exceptional students the opportunity to earn both the B.A. and the M.A. in five years. Students will be provisionally admitted to the 4+1 program only by approval of the department. Further information about the program is available from the director of graduate studies.

The curriculum is designed to: (a) familiarize students with the major areas of psychology; (b) provide specialized training in at least one of the five specific areas of psychology emphasized in the program; and (c) provide students sufficient flexibility to enroll in classes consistent with their interests and long-term developmental trajectory. During the first two to three years, students take several core courses in quantitative methods and in substantive areas. Beyond this, the program consists of seminars, further research participation, and other inquiries expressly designed to fulfill career objectives. Each of the five areas offers a seminar on current research every semester, attended by all faculty and graduate students in that area.

We expect students to be continually involved in research throughout their tenure in our program. We use a one-on-one mentoring model as a primary though not exclusive means for the acquisition of scientific skills by students. As such, students work very closely with their advisers in all phases of the research process. In addition, advisory committees that consist of both the adviser and other faculty members offer guidance throughout the student's graduate school years. There is also potential for considerable interaction among

programs and with other disciplines across campus. This interaction produces an exciting intellectual environment that is further enriched by visiting faculty members and speakers. Interested students are encouraged to find out more about our research programs by reading the descriptions of faculty research interests available on our program website (vanderbilt.edu/psychological_sciences).

The Clinical Science program in Psychological Sciences at Vanderbilt subscribes to the clinical scientist model of training, with the primary goal of training clinical scientists. Through the combination of advanced course work, practicum experiences, and research emphases, students concentrate in one or more of the following areas: developmental psychopathology (including children and/or adults), prevention and treatment, clinical health psychology, clinical neuroscience, socio-affective science, developmental disabilities (including children and/or adults), and quantitative methods. Regardless of concentration, the training experience includes a core curriculum, a common set of course requirements and research milestones, and a variety of practicum opportunities.

All of our Ph.D. program areas offer a range of financial support options for graduate students, including research fellowships, research assistantships, teaching assistantships, and graduate fellowships.

Applicants to our program need to submit scores on the Graduate Record Examination General Test. Applicants may also submit scores on the Psychology subject test, but this is not required. In addition to overall potential for a scientific career, the fit between an applicant's research interests and those of a potential faculty mentor significantly influence admissions decisions. Admission is not limited to students with undergraduate backgrounds in psychology. Specific program requirements are described in the *Graduate Student Handbook*, which is available on the Psychological Sciences website.

Quantitative and Chemical Biology

The Quantitative and Chemical Biology program is an interdepartmental umbrella graduate program seeking students who have earned undergraduate degrees in the quantitative and/or physical sciences (e.g., chemistry, computer science, engineering, mathematics, or physics) who wish to pursue a doctoral degree at the interface of the chemical, physical, engineering and biological sciences.

In the first year, students will complete four laboratory rotations of their choice as well as take courses related to their interests. The curriculum is designed to familiarize students from a quantitative sciences background with the concepts and nomenclature of modern biomedical research in an expeditious and efficient fashion. Following the completion of the first year, students may enter any of the following Ph.D. programs: Biochemistry, Biological Sciences, Cancer Biology, Cell and Developmental Biology, Chemical and Physical Biology, Chemistry, Human Genetics, Mathematics, Microbe-Host Interactions, Molecular Pathology and Immunology, Molecular Physiology and Biophysics, Neuroscience, Pharmacology, and Physics. Based on their field of research, students are welcome to pursue doctoral scholarship in the School of Medicine, the College of Arts and Science, and the School of Engineering.

Religion

CHAIR James P. Byrd

ASSOCIATE DEAN FOR GRADUATE EDUCATION AND RESEARCH James P. Byrd

PROFESSORS EMERITI/A J. Patout Burns, Larry Churchill, Paul R. Dokecki, Volney P. Gay, Thomas A. Gregor, Frank Gulley Jr., Charles H. Hambrick, Peter C. Hodgson, Joseph C. Hough Jr., Douglas A. Knight, Leah Marcus, Sallie McFague, M. Douglas Meeks, Bonnie J. Miller-McLemore, Daniel M. Patte, Jack M. Sasson, Richard M. Zaner

PROFESSORS Victor Anderson, Sandra Barnes, James P. Byrd, Robert Campany, Erik Carter, Paul J. DeHart, Dennis C. Dickerson, William Franke, Lenn E. Goodman, Jacobus J. Hamman, Joel F. Harrington, James Hudnut-Beumler, Peter Lake, Thomas McGinn, Keith G. Meador, Bruce Morrill, David Price, Joerg Rieger, Laurel C. Schneider, Fernando F. Segovia, Choon-Leong Seow, Emilie M.

Townes, David J. Wasserstein

ASSOCIATE PROFESSORS Ellen T. Armour, Gregory F. Barz, Vanessa Beasley, Beth Ann Conklin, Idit Dobbs-Weinstein, Juan Floyd-Thomas, Stacey Floyd-Thomas, Kathy L. Gaca, Leor Halevi, Paul C. H. Lim, Herbert R. Marbury, Thomas McGinn, Richard McGregor, David A. Michelson, Joseph L. Rife, Betsey A. Robinson, Allison Schachter, Phillis I. Sheppard, Melissa Snarr
ASSISTANT PROFESSORS Stephanie Budwey, Anand V. Taneja, Alexis S. Wells-Oghoghomeh

DEGREES OFFERED: Master of Arts, Doctor of Philosophy

COURSES OFFERED: [REL](#), [RLST](#)

Students may be admitted upon graduation from an accredited college with a baccalaureate degree or from an accredited seminary or graduate school with a post-baccalaureate degree. Ordinarily, students with only the baccalaureate degree are admitted to the M.A. program. Successful completion of the latter provides a foundation for doctoral studies but does not guarantee admission to the Ph.D. program. Students with an M.Div., M.T.S., or M.A. degree may be admitted directly to the Ph.D. program. Applicants with the B.A. degree are advised to consider not only the M.A. program in the Graduate School, but also the two-year M.T.S. program in the Divinity School of Vanderbilt University as preparation for Ph.D. work.

Degree programs are offered in ethics and society; Hebrew Bible; historical studies; critical studies in Asian, Islamic, and Jewish traditions; homiletics and liturgics; Jewish studies (M.A. only at present); New Testament; religion, psychology, and culture; and theological studies. Interdisciplinary studies, both within religion and in other areas of knowledge, are encouraged. The study of religion is pursued both as a critical, humanistic discipline, employing a variety of methodological perspectives, and as a theological discipline, interpreting religions and their historical, theological, and ethical heritage.

Master of Arts

The M.A. program is designed to enable students to explore personal interests or vocational options, to acquire a background for teaching at the secondary level, or to attain a foundation for further studies at the doctoral level. A total of 30 credit hours and a thesis are required for the first two programs described below, while the final two programs have special requirements.

1. *Specialty M.A.* This program involves a concentration in one of the subspecialties of religious study. Students will select a major of at least 12 hours and a minor of at least 6 hours from the following areas: ethics and society; Hebrew Bible; historical studies; critical studies in Asian, Islamic, and Jewish traditions; homiletics and liturgics; Jewish studies; New Testament; religion, psychology, and culture; and theological studies. The remaining hours may be chosen from the above areas or from other departments of the Graduate
2. *Cross-Disciplinary M.A.* This program, to which students are admitted under exceptional circumstances, provides an opportunity for students to relate one of the subspecialties of religious studies to an appropriate supportive discipline. Normally, 12 hours are taken in one of the areas listed under the specialty M.A., with the remaining hours taken in another department of the Graduate School. The thesis will attempt to integrate the methods and subject matters of the two disciplines in relation to a chosen
3. *Terminal M.A.* The terminal M.A., offered exclusively for D. students who elect not to complete the Ph.D. program, may be received by students who have demonstrated reading knowledge in at least one foreign language at the level required for the M.A. degree; have completed 48 semester hours of formal, graded course work at the graduate level, including at least 24 hours at Vanderbilt; have passed an oral examination conducted by a committee of faculty members from the Graduate Department of Religion; and do not seek candidacy for the Ph.D. degree.
4. *Master's Degree in Passing.* D. candidates may earn the M.A. degree upon completion of at least 42 hours of graduate study, satisfaction of the language requirements, passing of the Ph.D. qualifying exam, and approval of the dissertation proposal according to the GDR guidelines.

M.A. candidates demonstrate reading competence in foreign languages, ancient or modern, as required in the program or area of concentration. Students should consult area policies for specific requirements. In most cases, however, reading knowledge in one foreign language is required for the M.A. Students will normally satisfy this requirement by performing satisfactorily in the departmentally administered Ph.D. language examination, taking and passing with the grade of B+ or higher a Vanderbilt University course designed specifically to teach graduate students to use the language in research, or by presenting an acceptable record of at least 12 hours (or its

equivalent) in a language. Candidates specializing in Hebrew Bible or New Testament are expected to work with the original texts in Hebrew or Greek. Students designating Greek or Hebrew as the foreign language may not count introductory courses in these languages toward the requisite 30 hours for the degree.

Joint J.D.-M.A. Program. Students who have been admitted to both the Law School and the Graduate School may work toward the J.D. and the M.A. in religion concurrently. Six hours of religion credits will be accepted toward the J.D. degree, and 6 hours of law credits will be accepted toward the M.A. in religion. The joint program normally takes four years. For further information, write to the chair of the Graduate Department of Religion.

Doctor of Philosophy

Ph.D. programs are currently available in the following areas of major concentration: ethics and society; Hebrew Bible; historical studies; critical studies in Asian, Islamic, and Jewish traditions; homiletics and liturgics; New Testament; religion, psychology, and culture; and theological studies. Students applying to each of these areas may also apply for a fellowship from The Program in Theology and Practice (vanderbilt.edu/theology-and-practice/).

Candidates for the Ph.D. degree must demonstrate reading knowledge of one modern language of research, a second language as designated and approved by the area and the GDR, and additional languages as specified by the area (see area requirements). Each of the areas of major concentration specifies which languages are acceptable for its students. The requirement for modern languages may be satisfied by taking and passing with the grade of *B+* or higher a Vanderbilt University course designed specifically to teach graduate students to use the language in research, or by passing the departmental reading examination. Beyond this department-wide requirement, in biblical studies a knowledge of Hebrew or Greek is required, and in some areas of historical studies a knowledge of Latin or Greek is required. Students should be prepared to learn such other languages, ancient and modern, as may appear requisite for scholarly interests. Students should check with their area directors concerning specific requirements.

Certificate Programs

Students enrolled full time in the M.A. or Ph.D. programs may earn graduate certificates in two areas: (1) Jewish Studies (offered through the interdisciplinary program in Jewish Studies, as.vanderbilt.edu/jewishstudies/graduate/certificate-program/) and (2) Religion, Gender, and Sexuality Studies (offered through the Carpenter program in Religion, Gender, and Sexuality Studies, divinity.vanderbilt.edu/programs/carpenter/carpenter.php).

Russell G. Hamilton Graduate Leadership Institute

As part of the Graduate School's mission to train the next generation of leaders, the Russell G. Hamilton Graduate Leadership Institute (GLI) offers training to graduate students to broaden their academic and professional skills. Through funding opportunities, alumni events and seminars, and workshops, the GLI provides students with a greater understanding of critical leadership skills, including interpersonal dynamics, operations and management, resilience, teamwork, strategic and innovative problem solving, and communications, creating a skill set students can use in their time at Vanderbilt and beyond. Through these activities, the GLI fosters interdisciplinary connections between the graduate student population and the Graduate School's robust network of alumni.

Second Language Studies

DIRECTORS Patrick Murphy, Elyse Petit, and Silke Schade

CERTIFICATE OFFERED: SECOND LANGUAGE STUDIES

COURSES OFFERED: [SLS](#)

Vanderbilt University's Departments of French and Italian, Spanish and Portuguese, and German, Russian and East European Studies jointly oversee a Graduate Certificate in Second Language Studies. The courses and co-curricular programming offered through this certificate engage graduate students in critical reflection about current research in second language acquisition and foreign language teaching, thereby enhancing their ability to develop as teachers and succeed in a competitive job market. Any student enrolled in a graduate program at

Vanderbilt is eligible to apply for the Graduate Certificate in Second Language Studies. Acceptance to the program requires the approval of the student's primary adviser and the director of the program in SLS. Designated graduate courses successfully completed at Vanderbilt prior to admission to the program may be counted toward the certificate requirements with the approval of the director of the program.

Requirements for Graduate Certificate in Second Language Studies

- *9 credit hours of course work, which includes:*
 - *two required courses (6 credit hours): SLS 6030 (Foreign Language Learning and Teaching), and SLS 7040 (Second Language Acquisition: Current Theories and Research) or SLS 8090 (Special Topics in Second Language Studies)*
 - *a minimum of 3 credit hours from the following list of courses:*

EDUC 6020 Culturally Responsive Pedagogy

EDUC 6310 Classroom Ecology

EDUC 6530 Educational Linguistics and Second Language Acquisition

EDUC 6570 Teaching Second Language Literacy

PSY-GS 8360 Human Cognition

PSY-GS 8480 Educational Neuroscience

SPAN 6020 Ibero-Romance Philology

Note: Students may seek approval from the director of the SLS certificate program to include other relevant courses offered at Vanderbilt.

- Completion of at least two professional development workshop series offered through the Center for Second Language Studies. The center typically offers a professional development workshop series each semester.
- Additional teaching experience, which involves completion of at least one of the following activities:
 - Work as a teaching assistant or teaching apprentice in a class designed for undergraduate minors and/or majors. The work should include consulting with the professor on syllabus design, attending classes, and teaching one or two units.
 - The Certificate in College Teaching offered by the Center for Teaching. This program is non-credit-bearing and involves general orientation to college teaching, instructor authority, and diversity.
 - The Certificate in College Humanities Teaching and Learning offered by the Center for Teaching. This program is non-credit-bearing and involves developing an understanding of larger issues related to teaching in different institutional contexts.
 - Presentation of two Second Language Studies-related research projects at conferences.
 - Contribution to the Center for Second Language Studies' crowd-sourced database Language Panda
- Final presentation: Upon completion of the requirements for the certificate program in SLS, each student will give a thirty-to-forty minute public presentation in the Center for Second Language Studies reviewing an area of interest or specialization in second language development and/or foreign language pedagogy. This presentation will serve as a formal exercise in describing expertise in second language studies in preparation for a job interview.
- The conferral of the certificate requires a cumulative GPA of 3.5 and successful completion of all the aforementioned requirements.

Sociology

CHAIR Holly J. McCammon

DIRECTOR OF GRADUATE STUDIES Joshua Murray

PROFESSORS EMERITI George Becker, Karen Campbell, Jack P. Gibbs, Walter R. Gove, Gary F.

Jensen, Ronnie Steinberg

PROFESSORS André Christie-Mizell, Daniel B. Cornfield, David J. Hess, Larry W. Isaac, Holly J. McCammon, Jonathan M. Metzl

ASSOCIATE PROFESSORS Laura M. Carpenter, Shaul Kelner, Richard Lloyd, Joshua Murray, Evelyn Patterson, Mariano Sana, Lijun Song

ASSISTANT PROFESSORS Christy Erving, Alexandre Frenette, Patrick Greiner, Bianca Manago

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [SOC](#)

The sociology program prepares students for research and teaching careers in academic and policy settings. Students are exposed to a wide range of sociological works and research methods. Emphasis is on becoming an independent social researcher and teacher. Students have an opportunity to work closely with faculty members, in part because of a low ratio of graduate students to faculty members.

The master's degree requires 36 hours of course work: 6301, 6302, 6310, 6311, 6312, 7500, and 18 hours of electives. Also, students must write a master's paper that must be finished before their fifth semester to receive a master's degree.

Students must satisfy all of the master's degree requirements in order to receive a Ph.D. In addition, Ph.D. degree course work requirements consist of a teaching workshop (7400) and 33 hours of electives (up to 20 hours of which may be 8999 or 9999). Students must pass two special area exams, defend a dissertation proposal, complete a dissertation, and defend a dissertation to receive a Ph.D. degree.

Students may request the transfer of credit hours of eligible, graduate course work performed at another institution, subject to the approval of the director of graduate studies, the department chair, and the Graduate School. However, these requests are not always honored.

Spanish and Portuguese

CHAIR Andrés Zamora

DIRECTOR OF GRADUATE STUDIES Benigno Trigo

PROFESSORS EMERITI Susan Berk-Seligson, Victoria A. Burrus, Cathy L. Jade, C. Enrique Pupo-Walker, Edward H. Friedman

PROFESSORS Earl E. Fitz, Ruth Hill, William Luis, Philip D. Rasico, Benigno Trigo, Andrés Zamora

ASSOCIATE PROFESSORS Christina Karageorgou-Bastea, Emanuelle Oliveira-Monte, José Cárdenas Bunsen

ASSISTANT PROFESSORS Luis F. López González, N. Michelle Murray, Anna Castillo

DEGREES OFFERED: SPANISH. Master of Arts, Doctor of Philosophy; SPANISH-PORTUGUESE. Master of Arts, Doctor of Philosophy

COURSES OFFERED: [PORT](#), [SPAN](#)

The Department of Spanish and Portuguese does not accept external applications for a terminal master's degree. Only students planning to pursue a Ph.D. in Spanish or in Spanish and Portuguese are accepted into the program. All students will complete the requirements for and earn a Vanderbilt M.A. in Spanish or in Spanish and

Portuguese as a step toward the doctoral degree. Subject to the approval of the director of graduate studies, students entering the program with a master's degree or with graduate studies elsewhere may transfer up to 15 hours of graduate credit. An M.A. in Spanish or in Spanish and Portuguese is awarded after successful completion of 30 credit hours of course work and an M.A. thesis in the form of a publishable paper. For the M.A. in Spanish, knowledge of Portuguese or another foreign language is also required. For the combined M.A. in Spanish and Portuguese, no further language study is required.

All doctoral candidates must pass a take-home comprehensive examination based on a reading list of key works, present and defend a dissertation proposal, and complete and defend a dissertation.

The Ph.D. program in Spanish requires 63 credit hours of course work, which includes the 30 credit hours corresponding to the M.A. and 9 credit hours for a minor, which may be Portuguese, a certificate program in Latin American studies, or another approved program of courses from one or more departments, as well as additional course work in Spanish. There is no additional language requirement beyond that required for the M.A.

The combined Ph.D. in Spanish and Portuguese requires 66 credit hours of course work, which includes the 30 credit hours of the M.A. and additional course work reflecting both areas. No minor is necessary. There is no additional language requirement.

Specific program requirements are described under the Graduate Studies tab on the Department of Spanish and Portuguese website.

Special Education

CHAIR Joseph H. Wehby

DIRECTOR OF GRADUATE STUDIES Robert M. Hodapp

DIRECTOR OF PROFESSIONAL STUDIES Alexandra Da Fonte

PROFESSORS Marcia Barnes, Erik Carter, Laurie Cutting, Douglas Fuchs, Lynn S. Fuchs, Mary Louise Hemmeter, Robert M. Hodapp, Ann P. Kaiser, Jeanne Wanzek

PROFESSOR OF THE PRACTICE Kimberly Paulsen

ASSOCIATE PROFESSORS Erin E. Barton, Jeannette Mancilla-Martinez, Joseph H. Wehby, Jennifer Ledford

ASSOCIATE PROFESSORS OF THE PRACTICE Alexandra Da Fonte, Naomi Chowdhuri Tyler, Andrea M. Capizzi

RESEARCH ASSOCIATE PROFESSOR Tamara Stambaugh

ASSISTANT PROFESSORS Elizabeth Biggs, Joseph Lambert, Blair P. Lloyd

ASSISTANT PROFESSOR OF THE PRACTICE Rachel Schles

LECTURERS Nea Houchins-Juarez, Johanna Staubitz, Brenna Tally Simmons

DEGREE OFFERED: Doctor of Philosophy

COURSES OFFERED: [SPED](#)

The program of study is based in the multidisciplinary body of knowledge relevant to the understanding, education, and treatment of persons with disabilities. The Ph.D. degree is composed of three major elements of course work: core studies in special education, including 9 hours of proseminar in special education; at least 12 formal course hours in research methods; and a 15 hour minor or related area of study. The program of study will

be planned individually with the major professor and approved by the student's qualifying committee. In addition, the program requires demonstration of competence in research methods, in college teaching, and in supervision. Students who enter without a master's degree may earn a thesis-based M.S. degree while working on their Ph.D.

Summer Session

Information concerning the summer session may be found on the Graduate School webpages at vanderbilt.edu/gradschool and at vanderbilt.edu/summer. A summer session announcement in mid-March of each year will describe the registration procedures. Students may log in to YES (Your Enrollment Services) to view the schedule which lists the limited course offerings.

Teaching and Learning

See [Learning, Teaching, and Diversity](#).

The Center for Teaching

The mission of the Center for Teaching is to promote university teaching that leads to meaningful student learning. The services of the center are available to all graduate students, including those teaching at Vanderbilt as teaching assistants (TAs) and instructors of record, as well as those who anticipate that teaching will be a part of their future careers.

Fall TA Orientation (TAO) introduces participants to teaching at Vanderbilt, focusing on the information and skills necessary to take on TA roles in the classroom. Workshops and practice teaching sessions are led by experienced graduate student teaching assistants.

The Certificate in College Teaching has been designed to assist graduate students who wish to develop and refine their teaching skills. The certificate focuses on the research on how people learn and best teaching practices, and supports the university's pursuit of excellence in teaching and learning. The certificate is ideal for graduate students whose goals are to become more effective educators and who want to prepare for future careers in higher education teaching.

The Blended and Online Learning Design (BOLD) Fellows Program helps graduate students partner with faculty members to design and develop online modules for integration into a course. The teams implement these modules in existing classes and investigate their impact on student learning.

The Certificate in Humanities Teaching & Learning is a program for humanities graduate students that comprises a sequential seminar and practicum in which participants explore humanistic pedagogies and teaching historically underrepresented populations.

The Graduate Teaching Fellows and Teaching Affiliates Program provides graduate students the opportunity to work at the center, facilitating the programs offered to graduate students, consulting with TAs, and collaborating on teaching-related projects.

For more information and other services, please visit the Center for Teaching website at cft.vanderbilt.edu or call (615) 322-7290.

Women's and Gender Studies

See [Gender and Sexuality Studies](#).

Life at Vanderbilt

Accommodations for Students with Disabilities

Student Access provides accommodations to students with disability-related limitations. Common accommodations include, but are not limited to, extended time for testing, assistance with locating sign language interpreters, audio textbooks, physical adaptations, supplemental notes, and reading services. Students may also request accommodations related to housing, dining, and transportation. Accommodations are determined on an individual, case-by-case basis. Specific concerns pertaining to student accommodations or access on campus should be directed to the Office for Student Access (studentaccess@vanderbilt.edu) or by calling (615) 343-9727. For additional information please visit the Student Access website: vanderbilt.edu/student-access.

Bishop Joseph Johnson Black Cultural Center

The Bishop Joseph Johnson Black Cultural Center provides educational and cultural programming designed to highlight the history and cultural experiences of African Americans. Initially referred to as “the Afro House,” in 1984, the center was named in honor of the first African American student admitted to Vanderbilt University in 1953, Bishop Joseph Johnson (B.D. '54, Ph.D. '58). The BCC activities focus on providing student support and development, campus enrichment, and community engagement.

Student Support and Development (Inclusion)

One of the major aims of the BCC is student support and development. To accomplish this objective, the BCC offers student-driven programming, mentoring initiatives, organizational meeting spaces, service opportunities, and leadership skills training. The BCC also serves as a haven for students, with opportunities for informal fellowship with other students of all levels and backgrounds as well as with faculty and staff.

Campus Enrichment (Diversity)

With campus programming focused on Africans and African Americans, the BCC enriches the overall campus environment by promoting intercultural competence. Specifically, the BCC works with numerous campus partners to sponsor lectures, musical performances, art exhibitions, films, and discussions on African and African American history and culture.

Community Engagement (Equity)

Additionally, the BCC engages in community outreach and service by working with various civic and cultural groups in the Nashville area. Through community programs and by supporting students as they tutor and mentor young people from underserved areas in the city, the BCC advocates for social justice and equity on campus and in the larger community.

The BCC is located in the center of campus directly behind Buttrick Hall and across from the main campus mailroom. For more information, please call (615) 322-2524 or visit vanderbilt.edu/bcc.

David Williams II Recreation and Wellness Center

Vanderbilt’s David Williams II Recreation and Wellness Center is a fully functioning facility for Vanderbilt students, faculty, and staff.

More than two-thirds of Vanderbilt students utilize program spaces such as fitness rooms, participate in club sports, intramurals, group fitness classes, and many more of the student program offerings. The variety of programs available for meeting students’ diverse interests include over 30 club sports teams, and intramural sports such as softball, flag football, basketball, table tennis, and soccer.

The facility features a 289,000-square-foot layout that houses four full-sized courts for basketball, volleyball, and badminton; five racquetball and two squash courts; four-lane bowling alley; five group fitness classrooms; more than 14,000 square feet of weight and fitness room space; rock-climbing wall; seven multipurpose rooms; and an indoor field house featuring 120-yard turf field surrounded by a 300-meter track. The exterior surroundings include more than seven acres of field space, including three natural grass fields and one turf field.

There is a diverse selection of group fitness classes offered weekly, and a variety of wellness offerings that students can benefit from such as healthy eating through Vandy Cooks and personalized nutrition coaching.

If you are seeking outdoor adventure, you can create your own adventure trip with tips and gear from the outdoor rental center.

The Student Services fees support our facilities, fields, and programs (see Financial Information). Student spouses must also pay a fee to use the facilities.

For additional information, please visit us at vu.edu/vandyrec.

Eating on Campus

Vanderbilt Campus Dining operates several restaurants, cafés, and markets throughout campus that provide a variety of food. The two largest dining facilities are Rand Dining Center in Rand Hall (connected to Sarratt Student Center) and The Ingram Commons dining hall. E. Bronson Ingram College offers all-you-care-to-eat dining and is open to all Vanderbilt University students. Five convenience stores on campus offer grab-and-go meals, snacks, beverages, and groceries. The convenience stores located at Kissam Center and Highland Munchie offer hot and cold food bars which are open for breakfast, lunch, and dinner. All units accept the Commodore Card and meal plans. Graduate student meal plans are offered at a discount. For more information about meal plans, hours, and menus, please visit campusdining.vanderbilt.edu.

English Language Center

Students wishing to focus on improving their Academic and Pre-professional English language use for the context of the Vanderbilt University setting may take classes, engage in one-to-one consultations, and participate in workshops from the ELC to support their academic success. The ELC's courses include Academic Speaking, Academic Writing, and Pronunciation. One-to-one consultations focus on speaking, writing, and pronunciation. The ELC is located at 1208 18th Avenue South. For more information, please visit vanderbilt.edu/elc.

Follett Higher Education at Vanderbilt

The Vanderbilt University Bookstore is operated by Follett Higher Education and is located at 2525 West End Avenue. This bookstore offers textbooks (new, used, digital, and rental), computers, supplies, dorm accessories, licensed Vanderbilt merchandise, and best-selling books.

The bookstore features extended hours of operation and hosts regular special events. Visitors to the bookstore café can enjoy Starbucks coffees, sandwiches, and desserts while studying. Free customer parking is available in the 2525 garage directly behind the bookstore. For more information, visit bkstr.com/vanderbiltstore or call (615) 343-2665.

Graduate Student Council

The Graduate Student Council promotes the general welfare and concerns of the Graduate School student body. This is achieved through creating new programs to provide opportunities for growth and interaction, as well as through communication with the Vanderbilt faculty and administration on behalf of graduate students. The GSC consists of elected representatives from each Graduate School department, committees, and an annually elected executive board. In the recent past, the GSC has helped change policies involving space allocation for teaching assistants, stipend reviews, parking, student health insurance, mental health initiatives, and activities fee allocation. The GSC is also a member of the National Association of Graduate-Professional Students (NAGPS).

In addition to its representative function, the GSC organizes, hosts, and sponsors events and projects during the year, including seminars and panels with individual departments, the Vanderbilt 3 Minute Thesis competition, the Graduate Student Honor Council, community outreach activities, and social opportunities. The GSC also awards travel grants to graduate students who wish to present their research at conferences throughout the year. All

Vanderbilt Graduate School students are welcome and encouraged to attend GSC's monthly meetings and to get involved. For more information, visit studentorg.vanderbilt.edu/gsc.

Housing

To support the housing needs of new and continuing graduate and professional students, the Office of Housing and Residential Experience provides a web-based off-campus referral service (offcampushousing.vanderbilt.edu). The referral service lists information about housing accommodations off campus. Cost, furnishings, and conditions vary greatly. For best choices, students seeking off-campus housing should consult the website as early as possible. The website includes listings by landlords looking specifically for Vanderbilt-affiliated tenants. Listings are searchable by cost, distance from campus, number of bedrooms, and other parameters. Students may also complete a profile to assist in finding a roommate. On-campus university housing for graduate or professional students is not available.

Change of Address

Students who change either their local or permanent mailing address are expected to notify the Office of the University Registrar immediately. Candidates for degrees who are not in residence should keep the school and the Office of the University Registrar informed of current mailing addresses. For information on how to change or update addresses, please visit registrar.vanderbilt.edu/academic-records/change-of-address.php.

Inclusive Excellence

Diversity, inclusion, and community engagement are essential cornerstones of Vanderbilt's commitment to equity and trans-institutional discovery and learning. The Office for Inclusive Excellence has as its mission to work in partnership with members of the Office of the Provost and Vanderbilt colleges and schools to ensure that we advance the success and affirmation of all students and faculty. The Office for Inclusive Excellence oversees and establishes strategic initiatives to promote academic success, professional and cultural education, and inclusivity and belonging. Visit vanderbilt.edu/inclusive-excellence for more information.

International Student and Scholar Services

ISSS provides immigration advising and services, including the processing of immigration paperwork, to international students and scholars. The office works with admission units, schools, and departments to generate documentation needed to bring nonimmigrant students and scholars to the U.S. Further, ISSS keeps abreast of the regulations pertaining to international students and scholars in accordance with the Departments of Homeland Security and State. ISSS advising staff are available to support students' and scholars' requests through email, phone calls, virtual drop-in hours (Tuesday and Thursday from 7-9a.m.; Monday - Thursday from 1:30-3:30p.m.), and private appointments. ISSS puts a strong emphasis on providing employment workshops to inform international students about professional development and employment options while enrolled and after graduation. ISSS conducts regular workshops on Curricular Practical Training (CPT), Optional Practical Training (OPT), and Academic Training (AT). ISSS also supports more than 300 alumni international students who have already graduated and are either on OPT or AT work permission. For additional information on ISSS services, visit vanderbilt.edu/issss.

Margaret Cuninggim Women's Center

The Margaret Cuninggim Women's Center leads co-curricular campus initiatives related to women's and gender issues. The center partners with many departments, programs, and individuals across campus to raise awareness about the ways in which gender shapes and is shaped by our lived experiences. Because its aim is to make the Vanderbilt community more inclusive and equitable, the center encourages all members of the Vanderbilt community to take part in its events and resources.

The Women's Center celebrates women and their accomplishments and fosters empowerment for people of all identities. The center offers individual support and advocacy around a variety of issues, including gender stereotyping, gender equity, leadership, parenting, body image, disordered eating, pregnancy and reproduction, sexual health, and more. The Women's Center is open Monday through Friday, 8:00 a.m. to 5:00 p.m. and is located at 2304D Vanderbilt Place, Franklin House. For more information, please call (615) 322-4843, email womenctr@vanderbilt.edu, or visit vanderbilt.edu/womenscenter.

Nondiscrimination, Anti-Harassment, Anti-Retaliation, and Sexual Misconduct

The Title IX Office (vanderbilt.edu/title-ix) and/or the Equal Opportunity and Access Office (vanderbilt.edu/eoa) investigate allegations of prohibited discrimination, harassment, and retaliation involving members of the Vanderbilt community. This includes allegations of sexual misconduct and other forms of power-based personal violence. Mary Roy is Vanderbilt's Title IX coordinator.

If you believe that a member of the Vanderbilt community has engaged in prohibited discrimination, harassment, or retaliation, please contact the Title IX Office and/or the Equal Opportunity and Access Office. If the offense is criminal in nature, you may file a report with Vanderbilt University Police Department.

The Title IX Office also facilitates the provision of supportive measures and other accommodations for students affected by sexual misconduct and power-based personal violence. Some examples of these supportive measures are no contact orders, adjusted course schedules, and housing changes.

Specific concerns pertaining to prohibited discrimination, harassment, or retaliation, including allegations of sexual misconduct and other forms of power-based personal violence, should be directed to the Title IX Office at (615) 343-9004.

Office of LGBTQI Life

The Lesbian, Gay, Bisexual, Transgender, Queer, and Intersex (LGBTQI) Life office is a welcoming space for individuals of all identities and a resource for information and support about gender and sexuality. LGBTQI Life serves the entire Vanderbilt community through education, research, programming, support, and social events. The office also serves as a comfortable study and socializing space, as well as a connection point to the greater Nashville LGBTQIA+ community. In addition, LGBTQI Life conducts tailored trainings and consultations for the campus and community. The Office of LGBTQI Life is located in the K. C. Potter Center, Euclid House, 312 West Side Row. For more information, please visit vanderbilt.edu/lgbtqi.

Office of the University Chaplain and Religious Life

The Office of the University Chaplain and Religious Life provides opportunities to explore and practice religion, faith, and spirituality and to more deeply understand one's personal values and social responsibility via educational programming, encounters with various faith perspectives, and engagement with religious and spiritual communities. The office welcomes and serves all students, faculty, and staff and provides an intellectual home and ethical resource for anyone in the Vanderbilt community seeking to clarify, explore, and deepen understanding of their lives and/or faith.

Recognizing the importance of exploring one's faith in community, the office facilitates opportunities for individuals of a shared faith to worship/practice their particular religious tradition. Whether guided by one of our affiliated chaplains or a student-run religious organization, these groups foster a sense of community and common values. For a complete listing of campus religious groups, resources, services, and programming opportunities, visit vanderbilt.edu/religiouslife.

Official University Communications

Certain federal statutes require that information be delivered to each student. Vanderbilt delivers much of this information via email. Official electronic notifications, including those required by statutes, those required by university policy, and instructions from university officials, will be sent to students' Vanderbilt email addresses: `user.name@vanderbilt.edu`. Students are required to be familiar with the contents of official university notifications, and to respond to instructions and other official correspondence requiring a response. Some messages will include links to the YES Message Center, which is a secure channel for official communication of a confidential nature. However, students should not wait to receive such a message, and should check YES frequently to remain current on official, confidential communications.

The university makes every effort to avoid inundating students with nonessential email (often called "spam"), and maintains separate lists from which students may unsubscribe for announcements of general interest.

Parking, Vehicle Registration, and Alternative Transportation

Parking space on campus is limited. Motor vehicles operated on campus at any time by students, faculty, or staff must be registered with Parking Services located at 111 28th Ave S. A parking permit fee is charged. University Parking regulations are published annually and are strictly enforced. More information is available at vanderbilt.edu/traffic_parking.

Bicycles must be registered with Vanderbilt University Public Safety.

All full-and part-time graduate and professional school students can ride WeGo Public Transit for any trips around the city. To utilize this service, a valid student ID card is required for boarding the bus or train.

Information on transportation options available to campus and around Nashville can be found at vanderbilt.edu/movevu/commuter-options.

Project Safe Center

The Project Safe Center partners with students, faculty, and staff to create a campus culture that rejects sexual violence and serves as a resource for all members of the Vanderbilt community. The Project Safe Center provides support to survivors of intimate partner violence and engages the campus community in prevention of sexual assault, dating violence and domestic violence, and stalking.

Bystander intervention training, an online education module addressing sexual violence, and a variety of programs and presentations on consent, healthy relationships, and violence prevention are available through the Project Safe Center. A 24-hour support hotline answered by Project Safe's victim resource specialists is available at (615) 322-SAFE (7233).

The Project Safe Center, located at 304 West Side Row, is open Monday through Friday, 8:00 a.m. to 5:00 p.m.

For more information, please call (615) 875-0660 or visit vanderbilt.edu/projectsafe.

Schulman Center for Jewish Life

The 10,000-square-foot Ben Schulman Center for Jewish Life is the home of Vanderbilt Hillel. The goal of the center is to provide a welcoming community for Jewish students at Vanderbilt and to further religious learning, cultural awareness, and social engagement. Vanderbilt Hillel is committed to enriching lives and enhancing Jewish identity. It provides a home away from home, where Jews of all denominations come together, united by a shared purpose. The Schulman Center is also home to Grin's Cafe, Nashville's only kosher and vegetarian restaurant. For further information about the Schulman Center, please call (615) 322-8376 or email hillel@vanderbilt.edu.

Student Care Network

The Student Care Network is a holistic network of services and resources pertaining to health and wellness available to all Vanderbilt University students. Primary offices include the Office of Student Care Coordination, the University Counseling Center, the Student Health Center, and the Center for Student Wellbeing. Students also have access to a wide range of additional on-campus, virtual, and community resources through the Student Care Network - from the Vanderbilt Recreation and Wellness Center to the Project Safe Center - and a variety of community providers. To facilitate finding resources, students may refer to the Student Care Network website: vanderbilt.edu/studentcarenetwork/, or contact the Office of Student Care Coordination at vanderbilt.edu/carecoordination/.

Medical Notification Policy

Vanderbilt University expects students to be honest with their instructors about their ability to attend class and/or complete course work, and asks instructors to work with students on these issues. Therefore, the primary offices of the Student Care Network (Office of Student Care Coordination, University Counseling Center, Student

Health Center, and Center for Student Wellbeing) do not provide notes for minor illnesses or routine appointments that may lead to missed classes and/or a delay in completion of assignments. Instead, the primary offices provide students with cards documenting visits to their office, which students may use in discussion with their instructors regarding absences and/or missed work to demonstrate that they sought care for medical issues. The reason for the visit and any details of minor illnesses or routine appointments are not provided on the card. A student's right to privacy, particularly as it relates to medical information, is one of the important issues that guides this policy. In addition, since there is great variability in each student's response to minor illnesses, the primary offices cannot always predict which students will miss assignments and/or classes in response to such ailments. Honest communication between students and their instructors can better address these situations.

In cases of more serious illness, injury, or crisis, especially those that may require prolonged bed rest or hospitalization, the primary offices or the Office of Housing and Residential Experience will notify a student's academic dean so instructors may be formally informed through a dean's notification that the student may need short-term consideration related to absences and/or course work as a result of such illness, injury, or crisis. It is the student's responsibility to follow-up with their instructors to establish a plan for any make-up work. It is the instructor's prerogative to determine what, if any, alterations to course work are appropriate in either of the situations outlined above.

Office of Student Care Coordination

The [Office of Student Care Coordination](#) is committed to supporting undergraduate, graduate, and professional students in successfully navigating life events related to academic stress and/or medical, mental health, and/or other personal concerns that may interfere with a student's ability to achieve their academic and personal goals. This team of Student Care Coordinators is the central and first point of contact for students to help identify needs and determine the most appropriate resources in Vanderbilt's Student Care Network and in the Nashville community to address concerns. Student Care Coordinators collaborate with students to develop a student success plan, share education about and facilitate connections to appropriate on and off-campus resources, and provide accountability through supportive follow up meetings. Student Care Coordinators work closely with campus partners, including the Center for Student Wellbeing, the University Counseling Center, the Student Health Center, the Office of Housing and Residential Experience, and faculty and staff to help maintain the safety and health of Vanderbilt students.

In addition, the Office of Student Care Coordination supports the Campus Assessment, Response, and Evaluation (CARE) Team and Welfare Panel and coordinates support for students returning from medical leaves of absence. The Office of Student Care Coordination's goal is for students to have the right support, in the right place, at the right time. Information about scheduling an appointment with the office of Student Care Coordination is available at vanderbilt.edu/carecoordination/.

Confidentiality

Though staff typically have a background in mental health services, it is important to understand that work with a Student Care Coordinator is not counseling or therapy. The services of the Office of Student Care Coordination fall under the Family Educational Rights and Privacy Act (FERPA). This means the content of meetings with a Student Care Coordinator will be kept private to the extent possible; however, information may be shared on a need-to-know basis with appropriate personnel within Vanderbilt University in order to coordinate and provide you with the best care. If it is necessary to share information with off-campus providers or others, you will be asked to sign a written release.

Student Health Center

The Student Health Center provides primary care and some specialty services for students. Services include routine medical care, chronic disease management, office-based gynecology, travel medicine, nutrition services, and sports medicine. The Student Health Center also has a lab and can perform some office-based tests and can also send samples to the Vanderbilt Medical Center laboratory as needed.

The Student Health Center's hours of operation are posted on the center's website: vumc.org/student-health/about-center. Students seeking treatment should call ahead at 615-322-2427 to schedule appointments. Online appointments are available for most types of appointments: vumc.org/student-health/online-

[appointments](#). Telemedicine appointments are also available for some types of visits.

Students with urgent issues will be seen on a “same-day” basis, and if no appointment time is available, will be worked in on a “first-come, first-served” basis, and triaged according to severity of illness.

Emergency on-call consultation services are available at 615-322-2427, 24 hours a day, seven days a week. More detailed information about services and health related topics may be found at the Student Health Center website: yumc.org/student-health/.

Immunization Requirements

The State of Tennessee requires certain immunizations and tuberculosis screening for all students (undergraduate, graduate, and professional). ***Students not in compliance with these mandated immunizations and tuberculosis screening will NOT be allowed to register for classes.*** Waivers for required vaccines may be granted for religious or medical reasons. Waiver requests are reviewed by the Student Health Center and the Title IX and Student Discrimination Office or Student Access Services. Instructions for providing waiver request documentation can be found on the immunizations requirements website: yumc.org/student-health/immunization-requirements-new-students.

Immunization requirements include:

1. **Meningococcal meningitis vaccine (one injection after age 16)** for all incoming students living in on- campus housing.
2. **Measles, mumps, and rubella (2 injections)** for all incoming students.
3. **Varicella vaccine (two injections)** for all students who have not had documented chickenpox or bloodwork proof of immunity.
4. **Tuberculosis screening**, which includes on on-line risk assessment followed by blood testing or skin testing when indicated.

All incoming students must upload a Student Health Center Immunization and Tuberculosis Screening Requirements form. Instructions and further information are located on the immunizations requirements website: yumc.org/student-health/immunization-requirements-new-students. The completed Immunization and Tuberculosis Screening Requirements form must be uploaded to the Student Health Center immunization portal by May 15, 2021. The form also collects important health history information that enables the Student Health Center staff to better serve individual student needs.

Student COVID-19 Vaccination Requirement

Vanderbilt University requires new and returning students to be fully vaccinated against COVID-19. The requirement applies to all undergraduate, graduate, and professional students. Students can request accommodations for medical exemptions through the [Student Access office](#) and religious exemptions through the [Equal Opportunity and Access office](#).

Students must submit their vaccination record through the university’s [vaccine tracker submission form](#), including those who received their vaccine from the Student Health Center, Vanderbilt University Medical Center (VUMC), or a VUMC clinic. A hold will be placed on a student’s course registration until the vaccination record has been verified unless they have an approved (or in-process request for) accommodation. Students who do not comply with this requirement will have their class registration canceled prior to the first day of the term.

International students

International students may be able to be vaccinated upon arrival and should work with [International Student and Scholar Services](#) related to their arrangements and any requirements while they become fully vaccinated.

Charges

There are no office-visit co-pays for most routine visits, but students will incur small charges for some medications that are dispensed; there are also small co-pays associated with some office procedures or specialty visits (such as colposcopy). Many of the supplies, medications or in-house lab tests are free of charge. If charges are incurred, credit cards and the Commodore Card may be used for payment at the Student Health Center.

Any lab tests not performed at the Student Health Center are sent to the Vanderbilt University Medical Center and are billed to the student's health insurance company by the Medical Center. In addition, when a student is referred to a specialist outside of the Student Health Center, charges incurred are billed by that clinic to the student's health insurance company. Any amount remaining after health insurance has paid its share is the student's responsibility. If a student has an Emergency Department visit after-hours because of a serious illness or injury, the Medical Center will bill the student and his/her/their insurance company.

Sports Medicine specialists from the Medical Center come to Student Health for the convenience of the students, but these visits are not free of charge; the Sports Medicine specialists will bill the insurance on file for the student. The applicable co-pays will be billed by the Vanderbilt University Medical Center (not Student Health) after the visit.

Confidentiality

Care provided at the Student Health Center is confidential in compliance with the Health Insurance Portability & Accountability Act (HIPAA) regulations. It is only with explicit written consent from the student that the Student Health Center may communicate with Deans, parents, professors, or other health care professionals. HIPAA does have a clause that allows notification of families in the event that the student is in an emergency or life-threatening situation.

Vanderbilt University Medical Center personnel will ask treated students in the Emergency Department about notification of staff in Housing and Residential Experience and the Student Health Center. Except in cases of a life-threatening emergency, notification requires the student's permission and is strongly encouraged. This practice enables the University to provide support and assistance to students and their families.

Quarantine

Vanderbilt University must enforce public health mandates as required by public health authorities, and may also follow Medical Center and Student Health Center recommendations when the University determines them to be in the best interest of the Vanderbilt community and the public. Based on the aforementioned mandates and/or recommendations, the University may issue directives to students regarding isolation and/or quarantine. As a result, among other needed interventions, students in campus housing, or students traveling as part of Vanderbilt programs or activities, may be required to relocate so that appropriate isolation and/or quarantine can be accomplished. Failure to comply with University directives may result in corrective action through the University's accountability process.

The University Counseling Center

The University Counseling Center (UCC) provides mental health assessment, support, and treatment for students. The UCC promotes social justice and an affirming caring culture through clinical outreach, consultation, and training services. The UCC knows that each student is unique both in terms of their identity and lived experiences, and works with campus partners to provide a comprehensive pathway of support options for students that are flexible and attentive to each individual's particular needs, opportunities, and challenges in a spirit of collaboration and mutual respect.

The diverse team of clinical professionals includes psychologists, licensed counselors including substance use specialists, doctoral interns, practicum students, postdoctoral fellows, and psychiatric medical providers representing a wide variety of backgrounds and identities. Services include short-term individual therapy, a variety of group therapy and workshops options, drop-in consultations, ADHD and learning disabilities evaluations, and psychiatric assessment and treatment.

Students with pressing/acute issues may visit the UCC without appointment to meet with the Urgent Care Counseling clinician. If there are multiple students seeking Urgent Care Counseling services, the students will be seen on a “first-come, first-served” basis. Flexibility is maintained to address student needs according to level of acuity. Additionally, students may seek brief support for distressing situations through the UCC’s daily drop-in consultation services as detailed on the UCC’s website: vanderbilt.edu/ucc/services/drop-in-consultation/. This program enables students to have rapid access to a counselor for support and guidance. The UCC staff is also available to all VU community for consultations about students of concern and other mental health-related questions.

The UCC is open according to the schedule posted on the center’s website: vanderbilt.edu/ucc. Students seeking to schedule an appointment should visit the Office of Student Care Coordination’s website at vanderbilt.edu/carecoordination or call 615-343-WELL (9355).

The UCC also focuses on prevention and education programs, often collaborating with the Center for Student Wellbeing to design and deliver programs such as MAPS (Mental Health Awareness & Prevention of Suicide) and ADHD skill-building workshops. These initiatives are designed to foster coping skills and overall resilience and mental health.

More details about services may be found at the UCC website: vanderbilt.edu/ucc.

Charges

The UCC does not charge for services. Students requiring laboratory testing are referred to the Student Health Center. Charges for these tests are made in accordance with Student Health Center policies.

Confidentiality

The UCC is a confidential setting under the Family Educational Rights and Privacy Act (FERPA). To the extent permitted by law, the UCC does not share information about students or anything discussed in session, with the exception of safety concerns, which may override the confidentiality policy. For example, limits of confidentiality include situations that involve imminent risk to a client or another individual, and situations involving elder or child abuse. The UCC encourages students to sign a written release of information form if they would like for the UCC to share information with members of the student’s family or others. The UCC may share attendance and additional minimally necessary information with the other primary Student Care Network offices, including the Office of Student Care Coordination, Student Health Center, and Center for Student Wellbeing for the purposes of care coordination.

Center for Student Wellbeing

The Center for Student Wellbeing cultivates engagement in lifelong well-being practices and endeavors to create a culture that supports students’ personal development and academic success through a holistic and integrative framework. The Center’s areas of focus include, for example, alcohol and other drug education and recovery support, self-care and personal growth, strengthening physical and emotional health, developing academic skills and time management, and support for supporting students in distress. The Center provides prevention programming, individual coaching, skill building workshops, substance use screenings, meditation and yoga, and referrals to campus resources.

New appointments for Center for Student Wellbeing services may be scheduled through the Office of Student Care Coordination or by contacting the CSW at 615-322-0480. Information is available at vanderbilt.edu/healthdores/.

Student Health Insurance Plan (SHIP) Eligibility

Degree and non-degree seeking students (excluding Division of Unclassified (DUS) and Consortium students) enrolled in 4+ credit hours, a 0-credit research/dissertation course, or any other course that is considered to equate to full-time enrollment are automatically enrolled in and will be billed for SHIP underwritten by Aetna and

administered by Academic HealthPlans (AHP), unless they complete the online waiver process. Information about the plan is available online at vanderbilt.myahpcare.com/. In addition, students may email SHIP@vanderbilt.edu with questions.

Cost

The annual premium, which is approved each year by the Board of Trust, is billed to students through their student account. The premium is a separate charge from tuition.

Coverage Period

Coverage for students begins August 12 and extends through August 11 the following calendar year. If a student withdraws from school within the first 31 days of a coverage period, they will not be covered under the Policy and the full premium will be refunded, less any claims paid. After 31 days, the student will be covered for the remainder of the Plan year providing plan premiums are paid, and no refund will be allowed. Graduating within 31 days of the start of the coverage period shall not be considered a withdrawal from school.

Coverage Benefits

SHIP provides hospital, surgical, and major medical benefits. A brochure explaining the limits, exclusions, and benefits of the plan is available online at vanderbilt.myahpcare.com/ and the [Student Care Network](#) website. SHIP requires that the Student Health Center be the student's primary care provider in Nashville, but will provide coverage for referrals to specialists when a referral is made by a Student Health Center. SHIP does not require referrals for behavioral health.

Waiver of Insurance Plan

A student who does not wish to subscribe to SHIP must notify the University of comparable coverage under another policy. Comparable criteria coverage for domestic and international students is found at vanderbilt.edu/studentcarenetwork/waive/.

Waiver of the student insurance plan does not affect eligibility for services at the Student Health Center. The online waiver process may be found online at vanderbilt.myahpcare.com/waiver. The insurance charge will not be waived if the online process is not completed by August 1 for the fall semester, or by January 4 for students who are newly enrolled for the spring semester. **The waiver process must be completed each academic year.** Newly enrolled eligible summer session students planning to take full-time coursework in the fall must complete both a summer waiver form due July 22 and a fall waiver form due August 1. Additional information about the waiver process may be found on the Student Care Network website.

A student who does not wish to subscribe to SHIP must notify the University of comparable coverage under another policy. Comparable criteria coverage for domestic and international students is found at vanderbilt.edu/studentcarenetwork/waive/.

Waiver of the student insurance plan does not affect eligibility for services at the Student Health Center. The online waiver process may be found online at vanderbilt.myahpcare.com/waiver. The insurance charge will not be waived if the online process is not completed by August 1 for the fall semester, or by January 4 for students who are newly enrolled for the spring semester. **The waiver process must be completed each academic year.** Newly enrolled eligible summer session students planning to take full-time coursework in the fall must complete both a summer waiver form due July 22 and a fall waiver form due August 1. Additional information about the waiver process may be found on the Student Care Network website.

Family Coverage

An additional premium is charged for family insurance coverage. An eligible student who wishes to provide coverage for their spouse and/or children, may do so at vanderbilt.myahpcare.com/. It is the student's responsibility to enroll their dependents each year. Dependents are not automatically enrolled.

Qualifying Events for Students and Dependents

Students who initially waive coverage can request to add coverage if they experience a qualifying event. Examples of a qualifying event include (a) reaching the age limit of another health insurance plan, (b) loss of health insurance through marriage or divorce, (c) involuntary loss of coverage from another health insurance plan, and (d) entering the United States of America. A qualifying event does not include a student who is seeking enrollment to gain access to a benefit that was exhausted under their private insurance plan. Coverage will be effective beginning the first day following the loss of coverage, and the charges will be added to the student's account. Eligible dependents may also be added if the student experiences one of the following qualifying events: (a) marriage, (b) birth of a child, (c) divorce, (d) the dependent entering the country for the first time, or (e) the dependent losing coverage under another insurance plan. Requests to add coverage based on a qualifying event must be received within 31 days of the qualifying event. Forms received more than 31 days after the qualifying event will not be processed.

Student Centers

A variety of facilities, programs, and activities are provided in multiple student center locations or spaces managed by our team - Alumni Hall, Benton Chapel, The Commons Center, E. Bronson Ingram College, Kissam Center, Zeppos College, Engineering and Science Building, Community Event Space, Sarratt Student Center | Rand Hall, and the Student Life Center.

Sarratt Student Center | Rand Hall is the main student center hub, housing a 300-seat cinema, art gallery, art studios, multicultural space, large lounge spaces, large and small meeting spaces, and a courtyard. The facility is also home to Vanderbilt Student Communications, radio station, TV station, and the Pub at Overcup Oak restaurant. Rand Hall houses the Rand Dining Center, a multipurpose venue, meeting and seminar rooms, plus large, open lounge space. Some of the offices located in Sarratt Student Center | Rand Hall include the Dean of Students, Arts and Campus Events, Greek Life, International Student and Scholar Services, Student Center for Social Justice and Identity, Student Organizations, Leadership and Service, Student Care Coordination and Student Accountability, Community Standards and Academic Integrity. Also included in this facility is a United States Postal Service office.

The Vanderbilt Student Life Center is the university's large event space. It is both the fulfillment of students' vision to have a large social space on campus and a wonderful complement to Sarratt Student Center | Rand Hall. The Student Life Center has more than 18,000 square feet of event and meeting space, including the 9,000-square-foot Commodore Ballroom, which is one of the most popular spaces to have events on campus. The center is also home to the Career Center, Global Education Office, and Office of Immersion Resources.

The Commons Center is the community crossroads of The Ingram Commons living and learning community. It has it all: the Dining Hall and great food; a living room with a concert-grade grand piano, and the occasional live musical performance; a small rec room with cardio equipment, free weights, and weight machines; meeting and study rooms; and academic support services like the Writing Studio, the Career Center, and the CASPAR pre-major advising center. The third floor of The Commons Center is the home of the Department of Political Science.

Alumni Hall was the original student center on campus when the building opened in 1925. Re-opened in fall 2013 after a yearlong renovation that transformed every space in the facility, Alumni Hall has returned to its role as a student center after serving other purposes over the years. In the renovated Alumni Hall, students have access to an exercise room as well as several new meeting and event spaces. The Vanderbilt Graduate School calls Alumni Hall home, and lounge space on the first floor serves as a robust hub for student life within the Graduate School community.

Opened in fall 2014 and fall 2018, respectively, Kissam Center for Warren and Moore College and E. Bronson Ingram College are part of the Vanderbilt residential college system. Kissam Center is home to meeting and event spaces, the Kissam Market, and Kissam Kitchen. E. Bronson Ingram College offers a dining facility, including the award-winning Bamboo Bistro pho concept.

Zeppos College opened in the fall of 2020 and is the fourth residential college to open in the West End

neighborhood. It features a state-of-the-art dining hall, great room, study lounges, and several other event spaces designed to help foster community among students and residential faculty.

Benton Chapel is the largest and main chapel for Vanderbilt University. Dedicated in 1959, the chapel would become the ecumenical home for the various ministries, classes, promotions and special events in the lives of the students, staff, faculty and community here at Vanderbilt. Although decorated in a Christian theme, no one denomination is prevalent making the chapel available to be used by different denominations and traditions through the week.

Engineering and Science Building is a 250,000 square foot structure and home to both the ESB, which includes laboratories, classrooms and a state-of-the-art clean room, and Vanderbilt's Innovative Pavilion, which includes the Wond'ry and its makerspace.

Opened in fall 2020 as part of the reimagined West End Neighborhood, the Community Event Space is home to many student organization programs, rehearsals and events. The space has two large floors, one with a full-length mirror that allows for the ideal rehearsal space for our performing arts groups.

Student Records (Family Educational Rights and Privacy Act)

Vanderbilt University is subject to the provisions of federal law known as the Family Educational Rights and Privacy Act (also referred to as FERPA). This act affords matriculated students certain rights with respect to their educational records. These rights include:

1. The right to inspect and review their education records within 45 days of the day the University receives a request for access. Students should submit to the Office of the University Registrar written requests that identify the record(s) they wish to inspect. The Office of the University Registrar will make arrangements for access and notify the student of the time and place where the records may be inspected. If the Office of the University Registrar does not maintain the records, the student will be directed to the University official to whom the request should be addressed.
2. The right to request the amendment of any part of their education records that a student believes is inaccurate or Students who wish to request an amendment to their educational record should write the University official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. If the University decides not to amend the record as requested by the student, the student will be notified of the decision and advised of his or her right to a hearing.
3. The right to consent to disclosures of personally identifiable information contained in the student's education records to third parties, except in situations that FERPA allows disclosure without the student's consent. These exceptions include:
 - Disclosure to school officials with legitimate educational interests. A "school official" is a person employed by the University in an administrative, supervisory, academic or research, or support-staff position (including University law enforcement personnel and health staff); contractors, consultants, and other outside service providers with whom the University has contracted; a member of the Board of Trust; or a student serving on an official University committee, such as the Honor Council, Student Conduct Council, or a grievance committee, or assisting another school official in performing his or her A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.
 - Disclosure to parents if the student is a dependent for tax purposes
 - Disclosure to appropriate individuals (e.g., parents/guardians, spouses, housing staff, health care personnel, police,) where disclosure is in connection with a health or safety emergency and knowledge of such information is necessary to protect the health or safety of the student or other individuals.
 - Disclosure to a parent or legal guardian of a student, information regarding the student's violation of any federal, state, or local law, or of any rule or policy of the institution, governing the use or possession of alcohol or a controlled substance if the University has determined that the student has committed a disciplinary violation with respect to the use or possession and the student is under the age of 21 at the time of the disclosure to the parent/guardian.
 - Disclosure to various authorized representatives of government entities (such as, compliance with Student and Exchange Visitors Information System [SEVIS], Solomon Amendment, etc).

FERPA provides the university the ability to designate certain student information as "directory information."

Directory information may be made available to any person without the student's consent unless the student gives notice as provided for, below. Vanderbilt has designated the following as directory information: the student's name, address, telephone number, email address, student ID photos, major field of study, school, classification, participation in officially recognized activities and sports, weights and heights of members of athletic teams, dates of attendance, degrees and awards received, the most recent previous educational agency or institution attended by the student, and other information that would not generally be considered harmful or an invasion of privacy if disclosed. Any student who does not wish disclosure of directory information should notify the Office of the University Registrar in writing. No element of directory information as defined above is released for students who request nondisclosure except as required by statute.

The request for nondisclosure does not apply to class rosters in online class management applications, or to residential rosters—or rosters of groups a student may join voluntarily—in online, co-curricular engagement applications, or rosters of other information on the websites of student organizations that a student may join. Neither class rosters in online class management applications, nor residential rosters in online co-curricular engagement applications, are available to the public.

As of January 3, 2012, the U.S. Department of Education's FERPA regulations expand the circumstances under which students' education records and personally identifiable information (PII) contained in such records—including Social Security Numbers, grades, or other private information—may be accessed without consent. First, the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or state and local education authorities ("Federal and State Authorities") may allow access to student records and PII without consent to any third party designated by a Federal or State Authority to evaluate a federal- or state-supported education program. The evaluation may relate to any program that is "principally engaged in the provision of education," such as early childhood education and job training, as well as any program that is administered by an education agency or institution.

Second, Federal and State Authorities may allow access to education records and PII without consent, to researchers performing certain types of studies, in certain cases even when the University objects to or does not request such research. Federal and State Authorities must obtain certain use-restriction and data security promises from the third parties that they authorize to receive PII, but the Authorities need not maintain direct control over the third parties.

In addition, in connection with Statewide Longitudinal Data Systems, State Authorities may collect, compile, permanently retain, and share without student consent, PII from education records, and may track student participation in education and other programs by linking such PII to other personal information that they obtain from other Federal or State data sources, including workforce development, unemployment insurance, child welfare, juvenile justice, military service, and migrant student records systems.

If a student believes the university has failed to comply with FERPA, he or she may file a complaint using the Student Complaint and Grievance Procedures as outlined in the *Student Handbook*. If dissatisfied with the outcome of this procedure, students may file a written complaint with the Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue SW, Washington, DC 20202-5920.

Questions about the application of the provisions of the Family Educational Rights and Privacy Act should be directed to the Office of the University Registrar or to the Office of General Counsel.

The Center for Teaching

The mission of the Center for Teaching is to promote university teaching that leads to meaningful student learning. The services of the center are available to all graduate students, including those teaching at Vanderbilt as teaching assistants (TAs) and instructors of record, as well as those who anticipate that teaching will be a part of their future careers.

Fall TA Orientation (TAO) introduces participants to teaching at Vanderbilt, focusing on the information and skills necessary to take on TA roles in the classroom. Workshops and practice teaching sessions are led by

experienced graduate student teaching assistants.

The Certificate in College Teaching has been designed to assist graduate students who wish to develop and refine their teaching skills. The certificate focuses on the research on how people learn and best teaching practices, and supports the university's pursuit of excellence in teaching and learning. The certificate is ideal for graduate students whose goals are to become more effective educators and who want to prepare for future careers in higher education teaching.

The Blended and Online Learning Design (BOLD) Fellows Program helps graduate students partner with faculty members to design and develop online modules for integration into a course. The teams implement these modules in existing classes and investigate their impact on student learning.

The Certificate in Humanities Teaching & Learning is a program for humanities graduate students that comprises a sequential seminar and practicum in which participants explore humanistic pedagogies and teaching historically underrepresented populations.

The Graduate Teaching Fellows and Teaching Affiliates Program provides graduate students the opportunity to work at the center, facilitating the programs offered to graduate students, consulting with TAs, and collaborating on teaching-related projects.

For more information and other services, please visit the Center for Teaching at cft.vanderbilt.edu/ or call (615) 322-7290.

The Commodore Card

The Commodore Card is your official Vanderbilt ID. It is used for identification, for access to residence halls, academic buildings, and campus events, the rec center, libraries and as a debit card for meal plans and other purchases on and off campus. You will receive a digital Commodore Card on your iOS or Android device which you can provision prior to arriving at Vanderbilt, so you are all set the moment you step foot on campus. You will also receive a plastic card for some activities such as using Nashville public transit.

Physical ID cards are issued at the Commodore Card Office, 184 Sarratt Student Center, Monday through Friday from 8:30 am - 4:00 pm. Digital ID cards are available for iOS and Android devices. For more information, please visit vanderbilt.edu/cardservices.

The Writing Studio

The Writing Studio offers graduate students one-on-one writing support in the form of fifty-minute writing consultations on any piece of writing, from course papers, articles, and grant proposals to dissertations and other longer projects. Graduate writing consultants and the Writing Studio's professional staff are trained to be attentive generalist readers, capable of responding to projects across the disciplines.

The focus of a consultation varies according to the individual writer and project; for example, consultant and writer may discuss strategies for clarifying and developing an argument, or they might address issues regarding organization, audience, or the integration of quantitative information. Consultants will work with writers whether they are just beginning a project and determining its scope or they are working on final revisions. The Studio's one-to-one services can help graduate and professional students stay on schedule in pursuit of their academic goals.

All appointments can be scheduled online at vanderbilt.edu/writing. In addition to the standard fifty-minute consultations, the Writing Studio also offers dissertation writers the possibility of requesting extended appointments with the same consultant on an ongoing basis. Extended appointments must be arranged in advance, after holding an initial appointment, by emailing writing.studio@vanderbilt.edu. These may be limited in availability. Information about other programs for graduate and professional students, including weekly writing groups and the annual dissertation writers retreat series, can also be found at vanderbilt.edu/writing.

VA Compliance Statement

Any covered individual will be able to attend or participate in the course of education during the period beginning on the date on which the individual provides to the educational institution a certificate of eligibility for entitlement to educational assistance under chapter 31 or 33 (a "certificate of eligibility" can also include a

“Statement of Benefits” obtained from the Department of Veterans Affairs’ (VA) website – eBenefits, or a VAF 28-1905 form for chapter 31 authorization purposes) and ending on the earlier of the following dates:

1. The date on which payment from VA is made to the institution.
2. 90 days after the date the institution certified tuition and fees following the receipt of the certificate of eligibility.

Vanderbilt University will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual’s inability to meet his or her financial obligations to the institution due to the delayed disbursement funding from VA under chapter 31 or 33.

Vanderbilt Child and Family Center

Vanderbilt Child and Family Center provides support and resources to the community of Vanderbilt families across the spectrum of life. As reflected in our provision of new parent support, early childhood education, family life resources, and elder care support, VCFC values the university’s commitment to the education of the whole person and cultivation of lifelong learning. Visit vanderbilt.edu/child-family-center.

Vanderbilt Directory

Individual listings in the online People Finder Directory consist of the student’s full name, Vanderbilt email address, and campus mailing address (if available). Students may elect to add additional contact information to their listings, including school, academic classification, local phone number, local address, permanent address, cellphone, pager, and fax numbers. Student listings in the People Finder Directory are available to the Vanderbilt community via logon ID and e-password. Students may choose to make their online People Finder listings available to the general public (i.e., viewable by anyone with access to the internet), or to block individual directory items. Students who have placed a directory hold with the Office of the University Registrar will not be listed in the online directory.

Directory information should be kept current. Students may report address changes, emergency contact information, and missing person contact information via the web by logging in to YES (Your Enrollment Services) <https://yes.vanderbilt.edu> and clicking on the Personal Information link.

Vanderbilt University Police Department

The Vanderbilt University Police Department, (615) 322-2745, is a professional law enforcement agency dedicated to the protection and security of Vanderbilt University and its diverse community (police.vanderbilt.edu).

The Vanderbilt University Police Department comes under the charge of the Office of the Vice Chancellor for Administration. As one of Tennessee’s larger law enforcement agencies, the Vanderbilt University Police Department provides comprehensive law enforcement and security services to all components of Vanderbilt University including the academic campus, Vanderbilt University Medical Center, Vanderbilt Health at One Hundred Oaks, and a variety of university-owned facilities throughout the Davidson County area.

The Police Department includes a staff of more than one hundred people, organized into three divisions under the Office of the Associate Vice Chancellor and Chief of Police: Operations Division (Main Campus, Medical Center, and 100 Oaks Precincts), Administrative Division, and Auxiliary Services Division. All of Vanderbilt’s commissioned police officers have completed officer training at a state-certified police academy and are required to complete on-the-job training as well as attend annual in-service training. Vanderbilt police officers hold Special Police Commissions and have the same authority as that of a municipal law enforcement officer, while on property owned by Vanderbilt, on adjacent public streets and sidewalks, and in nearby neighborhoods. When a Vanderbilt student is involved in an off-campus offense, police officers may assist with the investigation in cooperation with local, state, or federal law enforcement. The department also employs non-academy-trained officers called community service officers (commonly referred to as CSOs) who lend assistance 24/7 to the Vanderbilt community through services that include providing walking escorts, providing jump starts, and unlocking cars. For non-emergency assistance from a community service officer, dial (615) 322-2745 (2-2745 from an on-campus extension).

The Vanderbilt University Police Department provides several services and programs to members of the Vanderbilt community:

VandyRide

The Vanderbilt University Police Department administers the VandyRide escort system at Vanderbilt University. The VandyRide escort system provides vehicular escorts to designated locations on campus. The service consists of vans that operate from 6:00 p.m. to 3:30 a.m. GPS technology allows students to track VandyRide on their route via computer or mobile phone using the VandySafe app, setting up text message alerts to let them know when a van will be arriving at their stop. Please visit vanderbilt.edu/movevu/commuter-options to download the app.

Stop locations were chosen based on location, the accessibility of a secure waiting area, and student input. Signs, freestanding or located on existing structures, identify each stop. A walking escort can be requested to walk a student from his/her stop to the final destination. An ADA van is also accessible to students with mobility impairments. For complete information about the VandyRide service, including routes, stops, and times, please visit vandyvans.com or call (615) 322-2554.

As a supplement to the VandyRide van service, walking escorts are available for students walking to and from any location on campus during nighttime hours. Walking escorts are provided by VUPS officers. The telephone number to call for a walking escort is either (615) 322-2745 (2-2745 from a campus phone) or (615) 421-8888 (1-8888 from a campus phone), after which, a representative from VUPD will be dispatched to the caller's location, or to a designated meeting point to accompany the caller to his or her destination.

Emergency Phones

Emergency telephones (Blue Light Phones) are located throughout the university campus, Medical Center, and 100 Oaks.

Each phone has an emergency button that when pressed automatically dials the VUPD Communications Center.

An open line on any emergency phone will activate a priority response from an officer. An officer will be sent to check on the user of the phone, even if nothing is communicated to the dispatcher. Cooperation is essential to help us maintain the integrity of the emergency phone system. These phones should be used only for actual or perceived emergency situations.

An emergency response can also be activated by dialing 911 from any campus phone. Cellphone users can dial (615) 421-1911 to summon an emergency response on campus. Cellphone users should dial 911 for off-campus emergencies. Callers should be prepared to state the location from which they are calling.

Exchange Area

The Vanderbilt University Police Department has designated the lobby of the Police building located at 111 28th Ave South as an "Exchange Area." The Exchange Area is for Vanderbilt University students, faculty, and staff to trade legal items bought and sold online on various secondhand applications in a safe environment. Either the seller or buyer must be Vanderbilt affiliated (student, faculty, or staff). The affiliated person must complete the online registration form at police.vanderbilt.edu/safedeal prior to the actual trade.

Security Notices

In compliance with the U.S. Department of Higher Education and the Jeanne Clery Act, Security Notices are issued to provide timely warning information concerning a potentially dangerous situation on or near Vanderbilt University. This information is provided to empower our students and employees with the information necessary to make decisions or take appropriate actions concerning their own personal safety. Security Notices are distributed throughout Vanderbilt to make community members aware of significant crimes that occur at the university. They are distributed through Vanderbilt email lists and through the department's webpage, police.vanderbilt.edu/pdfs/annual-security-report.pdf.

Educational and Assistance Programs

The Crime Prevention Unit of Vanderbilt University Police Department offers programs addressing issues such as sexual assault, domestic violence, workplace violence, personal safety, RAD (Rape Aggression Defense) classes, and victim assistance. VUPD provides additional services including property registration (for bikes, laptops, etc.), lost and found, weapons safekeeping, and Submit a Crime Tip. For further information on available programs and services, call (615) 322-7846 or visit police.vanderbilt.edu/services.

Additional information on security measures and crime statistics for Vanderbilt is available from the Vanderbilt University Police Department, 111 28th Avenue South, Nashville, Tennessee 37212. Information is also available at police.vanderbilt.edu.

Annual Security Report

The *Vanderbilt University Annual Security Report* is published each year to provide you with information on security-related services offered by the university and campus crime statistics in compliance with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act and the Tennessee College and University Security Information Act.

This booklet is prepared with information provided by the Nashville Metropolitan Police Department, the Department of Student Athletics, Office of the Dean of Students, the Office of Housing and Residential Experience, and the Vanderbilt University Police Department. It summarizes university programs, policies, and procedures designed to enhance personal safety for everyone at Vanderbilt.

A copy of this report may be obtained by writing or calling the Vanderbilt University Police Department, 111 28th Avenue South, Nashville, Tennessee 37212, or by telephone at (615) 875-9157. A PDF copy of this report may also be obtained on the website at police.vanderbilt.edu/crimeinfo/index.php.

Vanderbilt University

Accreditation

Vanderbilt University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award bachelor's, master's, and doctoral degrees. Questions about the accreditation of Vanderbilt University may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website (www.sacscoc.org).

Please contact SACSCOC only in relation to Vanderbilt's accreditation. Inquiries about admission requirements, educational programs, and financial aid should be directed to the university.

Equity, Diversity, and Inclusion

Excellence at Vanderbilt is inextricably tied to the university's commitment to fostering an inclusive community where people of all identities, backgrounds, and perspectives can thrive. The Vice Provost for Strategic Initiatives and the Vice Chancellor for Equity, Diversity and Inclusion and Chief Diversity Officer work in partnership with students, faculty, and staff to identify and implement best practices that advance equity, diversity, and inclusion across campus in pursuit of building and supporting an inclusive community enriched by a broad variety of experiences and knowledge. Visit vanderbilt.edu/diversity for more information.

Information Technology

Vanderbilt University Information Technology (VUIT) is the central technology provider for the University and offers a wide variety of services for students including but not limited to campus network connectivity, email services, help desk support, authentication services and application support.

VUIT maintains and supports the campus-wide data network that provides Wi-Fi access to the internet (it.vanderbilt.edu/services/network/wireless/index.php), as well as VU Identity, the authentication service that enables Vanderbilt users to securely identify themselves to many university services. Those services include YES (Your Enrollment Services), and Brightspace. In addition to your username and password, many services require multi-factor authentication using the DUO app. VUIT provides VPN access for secure connections to Vanderbilt resources from off campus.

VUIT partners with T-Mobile, Verizon, and AT&T to offer discounts for cellular phone service. For discount information see it.vanderbilt.edu/cellphone.

Vanderbilt offers all students a host of low-cost and free-of-charge software, including Microsoft Office and Microsoft Windows. See softwarestore.vanderbilt.edu for a complete product catalog and more information.

VUIT offers various collaboration services for students. All students have access to Office 365, including Microsoft Teams. A Zoom account without meeting length restrictions and hosting up to 300 participants is also available.

The Tech Hub assists students, faculty, and staff with many VUIT services, including Wi-Fi access. Tech Hub locations, hours, contacts, and other information can be found at it.vanderbilt.edu/techhub.

For more information on IT services and computing at Vanderbilt, please visit it.vanderbilt.edu.

Mission, Goals, and Values

Vanderbilt University is a center for scholarly research, informed and creative teaching, and service to the community and society at large.

Vanderbilt will uphold the highest standards and be a leader in the quest for new knowledge through scholarship, dissemination of knowledge through teaching and outreach, and creative experimentation of ideas and concepts.

In pursuit of these goals, Vanderbilt values most highly intellectual freedom that supports open inquiry, equality, compassion, and excellence in all endeavors.

Modification Policy and Nondiscrimination Statement

The university reserves the right, through its established procedures, to modify the requirements for admission and graduation and to change other rules, regulations, and provisions, including those stated in this bulletin and other publications, and to refuse admission to any student, or to require the withdrawal of a student if it is determined to be in the interest of the student or the university. All students, full time or part time, who are enrolled in Vanderbilt courses are subject to the same policies.

Policies concerning noncurricular matters and concerning withdrawal for medical or emotional reasons can be found in the Student Handbook, which is on the Vanderbilt website at vanderbilt.edu/student_handbook.

NONDISCRIMINATION STATEMENT

In compliance with federal law, including the provisions of Title VI and Title VII of the Civil Rights Act of 1964, Title IX of the Education Amendment of 1972, Sections 503 and 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act (ADA) of 1990, the ADA Amendments Act of 2008, Executive Order 11246, the Vietnam Era Veterans Readjustment Assistance Act of 1974 as amended by the Jobs for Veterans Act, and the Uniformed Services Employment and Reemployment Rights Act, as amended, and the Genetic Information Nondiscrimination Act of 2008, Vanderbilt University does not discriminate against individuals on the basis of their race, sex, sexual orientation, gender identity, religion, color, national or ethnic origin, age, disability, military service, covered veterans status, or genetic information in its administration of educational policies,

programs, or activities; admissions policies; scholarship and loan programs; athletic or other university-administered programs; or employment. In addition, the university does not discriminate against individuals on the basis of their gender expression. Requests for information, inquiries or complaints should be directed to these offices: Equal Opportunity and Access Office, eoaa@vanderbilt.edu, telephone (615) 343-9336; Title IX Office, Title IX Coordinator, titleix@vanderbilt.edu, telephone (615) 343-9004, 110 21st Avenue South, Suite 975, Nashville TN 37203; Student Access Office, studentaccess@vanderbilt.edu, telephone (615) 343-9727.

Obtaining Information about the University

Notice to current and prospective students:

In compliance with applicable state and federal law, the following information about Vanderbilt University is available:

Institutional information about Vanderbilt University, including accreditation, academic programs, faculty, tuition, and other costs, is available in the catalogs of the colleges and schools on the Vanderbilt University website at vanderbilt.edu/catalogs.

Information about financial aid for students at Vanderbilt University, including federal and other forms of financial aid for students, is available from the Office of Student Financial Aid and Scholarships on the Vanderbilt University website at vanderbilt.edu/financialaid. The Office of Student Financial Aid and Scholarships is located at 2309 West End Avenue, Nashville, Tennessee 37240-7810, (615) 322-3591 or (800) 288-0204.

Information about graduation rates for students at Vanderbilt University is available on the Vanderbilt University website at vanderbilt.edu/pie/student/. Paper copies of information about graduation rates may be obtained by writing the Office of the University Registrar, Vanderbilt University, PMB 407701, 110 21st Avenue South, Suite 110, Nashville, Tennessee 37240-7701 or by calling (615) 322-7701.

The Vanderbilt University Annual Security Report on university-wide security and safety, including related policies, procedures, and crime statistics, is available from the Vanderbilt University Police Department on the university website at police.vanderbilt.edu/pdfs/annual-security-report.pdf. A paper copy of the report may be obtained by writing the Vanderbilt University Police Department, 2800 Vanderbilt Place, Nashville, Tennessee 37212, or by calling (615) 343-9750. For more information, see the “Vanderbilt University Police Department” section of this catalog.

A copy of the annual Equity in Athletics Disclosure Act Report on the Vanderbilt University athletic program participation rates and financial support data may be obtained by writing the Vanderbilt University Office of Athletic Compliance, 2601 Jess Neely Drive, P.O. Box 120158, Nashville, Tennessee 37212 or by calling (615) 322-7992.

Information about your rights with respect to the privacy of your educational records under the Family Educational Rights and Privacy Act is available from the Office of the University Registrar on the Vanderbilt University website at registrar.vanderbilt.edu/ferpa. Paper copies of this information about educational records may be obtained by writing the Office of the University Registrar, Vanderbilt University, PMB 407701, 110 21st Avenue South, Suite 110, Nashville, Tennessee 37240-7701, or by calling (615) 322-7701. For more information, see the “Student Records (Family Educational Rights and Privacy Act)” section of this catalog.

The Jean and Alexander Heard Libraries

The Jean and Alexander Heard Libraries system at Vanderbilt University houses nearly five million items and provides access to millions more resources through its nine campus libraries: Central Library (A&S); Peabody Library; Annette and Irwin Eskind Family Biomedical Library and Learning Center; Walker Management Library; Wilson Music Library; Massey Law Library; Stevenson Science and Engineering Library; the Divinity Library; and the Special Collections Library. These libraries share an online presence that provides access to an integrated catalog of print and e-resources, as well as information about library services, workshops, programs, exhibitions, research guides, and librarian subject specialists.

Library staff teach students to be information literate and help them develop research skills in an increasingly complex information environment. Students can connect with a librarian in person or ask questions through the library website. Library spaces across campus offer quiet individual study spaces, group study, and instructional rooms, as well as learning commons and cafes. Faculty- and student-curated exhibitions throughout the libraries offer intellectual and creative insights that encourage students to think critically and see their own work in new ways. Students, faculty, and staff come to the library to read in a cozy nook, meet friends for group study, grab a quick meal, or attend an author's talk. Even if you are off campus, digital library resources are at your fingertips via your phone, laptop, or computer.

The oldest items in the library date from ca. 2500 BCE, and new publications are being added every day. Among the collection strengths are: Latin American history, politics, and culture; the History of Medicine Collections; the W. T. Bandy Center for Baudelaire and Modern French Studies; the Southern Literature and Culture Collections; the United States Playing Card Collection; and the Vanderbilt Television News Archive, the world's most extensive archive of television news covering 1968 to present. The libraries are also involved in digital scholarship, publishing and partnering with faculty on the *Revised Common Lectionary*, one of the first published web-based resources of scriptural readings for the liturgical year, *Ecclesiastical and Secular Sources for Slave Societies*, a digital preservation program for endangered documents related to slave societies, the *Global Music Archive*, a multimedia archive for traditional and popular song, music, and dance of Africa and the Americas, and *Syriaca*, a digital project for the study of Syriac literature, culture, and history.

Get to know your libraries and your librarians early in your career at Vanderbilt. They have the information you need—and can help you transform that information into knowledge, creativity, and success.

The University

Commodore Cornelius Vanderbilt, who gave a million dollars to build and endow Vanderbilt University in 1873, expressed the wish that it “contribute . . . to strengthening the ties which should exist between all geographical sections of our common country.”

A little more than a hundred years later, the Vanderbilt Board of Trust adopted the following mission statement: “We reaffirm our belief in the unique and special contributions that Vanderbilt can make toward meeting the nation's requirements for scholarly teaching, training, investigation, and service, and we reaffirm our conviction that to fulfill its inherited responsibilities, Vanderbilt must relentlessly pursue a lasting future and seek highest quality in its educational undertakings.”

Today as Vanderbilt pursues its mission, the university more than fulfills the Commodore's hope. It is one of a few independent universities with both a quality undergraduate program and a full range of graduate and professional programs. It has a strong faculty of more than 4,200 full-time members and a diverse student body of more than 12,800.

The 334-acre campus is about one and one-half miles from the downtown business district of the city of Nashville, combining the advantages of an urban location with a peaceful, parklike setting of broad lawns, shaded paths, and quiet plazas.

The schools of the university offer the following degrees:

College of Arts and Science. Bachelor of Arts.

Blair School of Music. Bachelor of Music, Bachelor of Musical Arts.

Divinity School. Master of Divinity, Master of Theological Studies, Master of Theology, Doctor of Ministry.

School of Engineering. Bachelor of Engineering, Bachelor of Science, Master of Engineering.

Graduate School. Master of Arts, Master of Fine Arts, Master of Liberal Arts and Science, Master of Science, Doctor of Philosophy.

Law School. Master of Laws, Doctor of Jurisprudence.

School of Medicine. Master of Education of the Deaf, Master of Genetic Counseling, Master of Public Health, Master of Science in Clinical Investigation, Master of Science in Medical Physics, Master of Science (Applied Clinical Informatics, Speech-Language Pathology), Doctor of Audiology, Doctor of Medical Physics, Doctor of Medicine.

School of Nursing. Master of Science in Nursing, Doctor of Nursing Practice.

Owen Graduate School of Management. Master of Accountancy, Master of Business Administration, Master of Management in Health Care, Master of Marketing, Master of Science in Finance.

Peabody College. Bachelor of Science, Master of Education, Master of Public Policy, Doctor of Education.

No honorary degrees are conferred.

University Courses

By tackling pressing real-world problems and addressing big questions, University Courses educate the whole student and promote lifelong learning. The courses leverage the natural synergies across Vanderbilt's ten schools and colleges, giving students the opportunity to reach beyond their area of study and interact with faculty at the intersection of disciplines. Each course promotes trans-institutional learning while providing opportunities to embrace diverse perspectives. For more information, visit vu.edu/university-courses.

Vanderbilt University Administration

DANIEL DIERMEIER, Ph.D., Chancellor

C. CYBELE RAVER, Ph.D., Provost and Vice Chancellor for Academic Affairs

ANDRÉ L. CHURCHWELL, M.D., Vice Chancellor for Equity, Diversity, and Inclusion and Chief Diversity Officer

Courses by Subject Areas

African American Diaspora Studies

AADS5002 - Theories of Diaspora

Title

Theories of Diaspora

Catalog Description

Interdisciplinary introduction to materials, methods, debates, and theoretical language of scholarly research in Diaspora Studies. [3]

AADS5095 - Directed Study

Title

Directed Study

Catalog Description

[3]

AADS5228 - Black Girlhood: History, Performance and Counter-Narratives

Title

Black Girlhood: History, Performance and Counter-Narratives

Catalog Description

Historical and current social, political, and cultural constructions of black girlhood in the United States. Performances in which black girls engage to deconstruct and interrupt these constructions. Scholarly works, poetry, film, photography, and novels. [3]

AADS5580 - The Black Studies Movement

Title

The Black Studies Movement

Catalog Description

Black Studies and student movements of the 1960s and early 1970s. Intellectual traditions, precedents, and political ideologies of movements. Issues that sparked the call for Black Studies at different college campuses and public school systems. [3]

AADS5654 - Memoirs and Biographies

Title

Memoirs and Biographies

Catalog Description

(Also listed as AADS 2654) Biographies and autobiographies as lenses for the study of historical trends and events; development of gender, sexual, and racial identities in subjects. No credit for students who have earned credit for 2654. [3]

AADS5890 - Special Topics

Title

Special Topics

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

American Studies

AMER5883 - Independent Study

Title

Independent Study

Catalog Description

May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3]

AMER5884 - Independent Study

Title

Independent Study

Catalog Description

May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3]

AMER8000 - Graduate Workshop In American Studies

Title

Graduate Workshop In American Studies

Catalog Description

Issues, methodologies, traditions, approaches, and problems in the interdisciplinary field of American Studies. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

Anthropology

ANTH5101 - Theories of Culture and Human Nature

Title

Theories of Culture and Human Nature

Catalog Description

(Also listed as ANTH 3900) Survey of the views of anthropological thinkers, from the late nineteenth century to the present, about the basic attributes of humankind and human culture. Comparison of different ideas of how people create culture and in turn are molded by culture. No credit for students who have earned credit for 3900. [3]

ANTH5102 - Problems in Anthropological Theory

Title

Problems in Anthropological Theory

Catalog Description

(Also listed as ANTH 3901, ANTH 6901) Seminar in anthropological theory: cultural evolution, cultural history, ethnic relations, cultural ecology, archaeological method and theory, social structure, political organizations, and religious institutions. Repeat credit for students who have earned credit for 6901. [3] (SBS)

ANTH5106 - Culture and Power in Latin America

Title

Culture and Power in Latin America

Catalog Description

(Also listed as ANTH 2106) Survey of native cultures and Spanish and Portuguese heritage. Fundamental traditions, including marriage and the family, the relationship between men and women, racial and ethnic identity, social class, and religion. Peasant communities and contemporary urban life. No credit for students who have earned credit for 2106. [3]

ANTH5108 - Indigenous Peoples of Lowland South America

Title

Indigenous Peoples of Lowland South America

Catalog Description

(Also listed as ANTH 2108) Native societies of Amazonia, the Orinoco basin, and other forest, savanna, and coastal regions of South America. Ecology, cosmology, social organization, and political relations in historical and contemporary populations. Government policies, human rights, environmentalism, sustainable development, and indigenous activism and advocacy. [3]

ANTH5109 - Food Politics in America

Title

Food Politics in America

Catalog Description

(Also listed as ANTH 2109) The cultural, social, political, and economic contexts of the contemporary food system. Issues of health and nutrition. Land use, ecological relations, food chains, and links to climate change. Ethics of food production, distribution, and consumption. Agricultural policy, immigration, work conditions, animal welfare, and local economies. Roles of citizens and consumers. Rise of movements seeking sustainable alternatives. No credit for students who have earned credit for 2109. [3]

ANTH5110 - Gender and Cultural Politics

Title

Gender and Cultural Politics

Catalog Description

(Also listed as ANTH 2110) Cross-cultural comparison of women's roles and status in western and non-Western societies. Role of myths, symbols, and rituals in the formation of gender identities and the politics of sexual cooperation, conflict, and inequality. Case studies from Africa, the Middle East, Europe, North and South America, Asia, and Melanesia. No credit for students who have earned credit for 2110. [3]

ANTH5112 - Psychological Anthropology

Title

Psychological Anthropology

Catalog Description

(Also listed as ANTH 2112) How personality and culture affect each other. Socialization and the life cycle, the definition of sex roles, individual psychology and group aggression, religion and group personality, and the nature of mental illness and normalcy in non-Western societies. No credit for students who have earned credit for 2112. [3]

ANTH5130 - Global Infrastructure and Everyday Life

Title

Global Infrastructure and Everyday Life

Catalog Description

Relations between infrastructure and society around the world, past and present. Analysis of large technical systems as sites of cultural meaning, political struggle, and everyday social interaction. Water, energy, communication, and transportation networks in Africa, Asia, and the Americas, with an emphasis on Latin America. [3]

ANTH5211 - Archaeology

Title

Archaeology

Catalog Description

(Also listed as ANTH 2211) An introduction to the methods used by archaeologists to study the nature and development of prehistoric societies. Approaches to survey, excavation, analysis, and interpretation are explored through lectures, case studies, and problem assignments. No credit for students who have earned credit for 2211. [3]

ANTH5220 - Anthropological Approaches to Human Landscapes

Title

Anthropological Approaches to Human Landscapes

Catalog Description

(Also listed as ANTH 2220) Anthropological approaches to sociocultural processes and human-environment interactions in the formation of landscapes and settlement systems. Relationship of archaeology and cultural anthropology in the understanding of social space, sacred landscapes, urban plans, and historical ecology. Cross-cultural comparisons. Methods of interpretation and quantification. No credit for students who have earned credit for 2220/2220W. [3]

ANTH5221 - Old World Archaeology

Title

Old World Archaeology

Catalog Description

(Also listed as ANTH 2221) Ancient Cultures of the Old World. Archaeology of the Near East, Africa, Asia, and Oceania. The origins of the great civilizations of Egypt and Mesopotamia. The beginnings of cities, agriculture, trade, and empires in light of recent archaeological discoveries. No credit for students who have earned credit for 2221. [3]

ANTH5223 - Native North Americans**Title**

Native North Americans

Catalog Description

(Also listed as ANTH 2223) Indian societies of North America; their archaeological origins, development, and changing adaptation to white society. No credit for students who have earned credit for 2223. [3]

ANTH5226 - Modern-World Archaeology**Title**

Modern-World Archaeology

Catalog Description

Historical archaeology, investigation of the post-1500 world, origins of modernity, and global networks. Colonialism, capitalism, racialization, and Eurocentrism. Social inequality. Structural history, network theory, world-systems analysis, dialectical thinking, epochal structures, microhistory, material culture, and socio-spatial analysis. [3]

ANTH5230 - South American Archaeology**Title**

South American Archaeology

Catalog Description

(Also listed as ANTH 2230) From 12,000 years ago to the present. Archaeology, ethnohistory, and ethnography. No credit for students who have earned credit for 2230. [3]

ANTH5231 - Ancient Andean Civilizations**Title**

Ancient Andean Civilizations

Catalog Description

(Also listed as ANTH 2231) Introduction to the archaeology and peoples of ancient South America. Early hunters and gatherers, origins of agriculture and urbanism, and the rise and fall of the Huari and Inca empires. No credit for students who have earned credit for 2231. [3]

ANTH5275 - Untimely People and Matters**Title**

Untimely People and Matters

Catalog Description

Time's effects on people and societies. Culturally constituted temporalities; notions of embodiment and alterity. Study of social change; process of innovation through invention and adaptation. Othering non-Western societies as traditional and unchanging. [3]

ANTH5342 - Biology of Inequality**Title**

Biology of Inequality

Catalog Description

(Also listed as ANTH 2342) Biological and health consequences of racial and social inequalities. Psychosocial stress and measurement of its health impact. Effects on disease and precursors to disease. Measures of molecular biology, such as epigenetics and gene expression. Biomarkers of inflammation, cardiometabolic health, and immune function. No credit for students who have earned credit for 2342. [3]

ANTH5370 - Death and the Body**Title**

Death and the Body

Catalog Description

(Also listed as ANTH 2370) Cross-cultural study of death rituals. Mortuary archaeology and anthropology of death and the body. Biological and social perspectives on the corpse and living body, and their treatment in ritual and everyday life. The body as biological specimen and social artifact. Nature of beauty, body modification, and adornment. No credit for students who have earned credit for 2370. [3]

ANTH5400 - Public Health, Language, Media, and Risk Management**Title**

Public Health, Language, Media, and Risk Management

Catalog Description

Role of language in the politics and ethics of expert, government, and community stakeholder responses to epidemics, environmental pollution, and natural disasters. Theory and case studies of communication in U.S. and global crises. Uses of science, narrative, and metaphor in formation of health policy and health inequalities based in race, ethnicity, sexuality, and geographic marginalization. [3]

ANTH5601 - Introduction to Linguistics**Title**

Introduction to Linguistics

Catalog Description

(Also listed as ANTH 2601) Systematic study and analysis of human language. Formation of language sounds, sound systems, the structure of words, the structure of sentences, meaning, language change. Data from diverse languages of the world. No credit for students who have earned credit for 2601. [3]

ANTH5602 - Anthropological Linguistics**Title**

Anthropological Linguistics

Catalog Description

(Also listed as ANTH 2602) An introduction to the study of language in its anthropological context. Language and culture, the structure of symbolic systems, vocabulary as a guide to the ways societies classify their universe. Linguistic analysis as a tool for ethno-graphic investigation. No credit for students who have earned credit for 2602. [3]

ANTH5603 - Comparative Writing Systems

Title

Comparative Writing Systems

Catalog Description

(Also listed as ANTH 2603) The origins, development, and social uses of writing in the ancient Middle East, Mediterranean, and Mesoamerica. Decipherments of hieroglyphic systems. Literacy, historiography, and cross-cultural translation. No credit for students who have earned credit for 2603. [3]

ANTH5604 - Introduction to Language Contact

Title

Introduction to Language Contact

Catalog Description

(Also listed as ANTH 2604) Structural, social, and cultural issues involved in protracted contact between speakers of different languages. Bilingualism and multilingualism, lexical and structural borrowing, nativization, code switching, and Pidgins and Creoles. Linguistic psychosocial theories regarding common contact patterns. The sociocultural meaning of language contact in different societies. Case studies. No credit for students who have earned credit for 2604. [3]

ANTH5612 - Introduction to a Maya Language

Title

Introduction to a Maya Language

Catalog Description

(Also listed as ANTH 2612) Beginning instruction in Kaqchikel, K'iche', or Q'eqchi'. Basic speaking, reading, and writing skills. No credit for students who have earned credit for 2612. [3]

ANTH5614 - Conversational K'iche' Maya

Title

Conversational K'iche' Maya

Catalog Description

(Also listed as ANTH 2614) Intermediate level course with advanced grammar. Counterfactual constructions, deixis, verbal derivations of positional roots, sound symbolic verbs, and verbal nominalizations. Vocabulary and idioms. Various literary genres. No credit for students who have earned credit for 2614. [3]

ANTH5800 - Theatre and Social Change: Theatre as Applied Activism

Title

Theatre and Social Change: Theatre as Applied Activism

Catalog Description

Role of theatre in social justice and social change movements, including Playback Theatre and Theatre of the Oppressed. Conducting improv theatre in class or in collaboration with a local / campus organization. Not open to students who have earned credit for 3890 section 05 offered spring 2020. [3]

ANTH5866 - Archaeological Excavation

Title

Archaeological Excavation

Catalog Description

(Also listed as ANTH 3866) Excavation techniques and field recording methods through participation in an archaeological dig. Excavation unit layout, digging techniques, feature and artifact identification. Mapping and field instrumentation. Data registry, statistical analysis, artifact curation, and conservation. Stratigraphy, relative and absolute dating, sampling strategies and techniques, data management. Research design and archaeological ethics. [4]

ANTH5867 - Digital Archaeology: Analysis and Curation of Material Culture

Title

Digital Archaeology: Analysis and Curation of Material Culture

Catalog Description

Laboratory analysis of archaeological artifacts using digital methods. Three dimensional modeling of artifacts, digital photography, artifact technical diagramming. Virtual Reality and other representational frameworks. PXRf compositional analysis. Artifact cleaning, labeling, and preservation techniques. Assemblage curation and integration with databases. Preparation of artifacts for exhibition. Ethics of curation, representation, repatriation. [3]

ANTH6120 - Sociocultural Field Methods

Title

Sociocultural Field Methods

Catalog Description

(Also listed as ANTH 3120) Research design and proposal writing, access to data, ethical issues, sampling techniques, interviewing questionnaire design and question writing, data analysis. No credit for students who have earned credit for 3120. [3]

ANTH6121 - Global Wealth and Poverty

Title

Global Wealth and Poverty

Catalog Description

(Also listed as ANTH 3121) The production of inequality. How wealth is accumulated, lost, exchanged, and displayed; how poverty is created, endured, and overcome. Explanations in terms of luck, hard work, immorality, occult forces, and public policies. Case studies. No credit for students who have earned credit for 3121. [3]

ANTH6122 - The Anthropology of Globalization

Title

The Anthropology of Globalization

Catalog Description

(Also listed as ANTH 3122) Perspectives on globalization based on ethnographic case studies. The impact of new technologies on native cultures; different cultural meanings of global commodities; creation of new diaspora cultures; effects of neoliberal reforms on local economies; ethnic movements and terror networks. No credit for students who have earned credit for 3122. [3]

ANTH6123 - Maya Culture and Ethnography

Title

Maya Culture and Ethnography

Catalog Description

(Also listed as ANTH 3123) Survey of the different cultural groups of the Maya peoples of Mexico and Guatemala. Comparison of cultural features and social and political history. Relationship of culture and language. Introduction to the Maya language family with a focus on Tzotzil. No credit for students who have earned credit for 3123. [3]

ANTH6125 - Public Scholarship Practicum in Community Research

Title

Public Scholarship Practicum in Community Research

Catalog Description

Theory and methods for publicizing research to policy makers, organizations, and the public. Uses of media. Communicating research in civil rights; environmentalism; and advocacy on gender, sexuality, health, and religion. Translating original scholarship into pieces for newspapers, blogs, websites, video resources, and public presentations. Prior research experience is expected. Consent of instructor is required. [3]

ANTH6130 - Andean Culture and Society

Title

Andean Culture and Society

Catalog Description

(Also listed as ANTH 3130) Historical and archaeological background, languages, economy, environment, and cultural adaptation of Andean peoples. Spanish and native American heritage. Religion, family structure, political organization, contemporary social issues, and economic background. Urban and rural traditions, social movements, and change. No credit for students who have earned credit for 3130. [3]

ANTH6132 - Social Movements

Title

Social Movements

Catalog Description

(Also listed as ANTH 3132) Collective action, past and present. Class- and identity-based movements, transnational activism, and networks. The early U.S. labor movement; 1960s gay, women's and civil rights movements. Global struggles for social justice. No credit for students who have earned credit for 3132. [3]

ANTH6133 - Political Anthropology: States and Their Secrets

Title

Political Anthropology: States and Their Secrets

Catalog Description

Development, workings, and techniques of the ancient and modern state. Bureaucracy, state secrecy, diplomacy, organization of warfare, surveillance. Anthropological theories of power, state formation, nationalism, authority, influence, and coercion. Case studies of atrocities, disclosure of secrets, and whistleblowing. Ethics and responsibility in complex power structures. [3]

ANTH6135 - Development, Social Enterprise, Social Justice

Title

Development, Social Enterprise, Social Justice

Catalog Description

Theories of economic and human development. Multidimensional approaches to poverty and well-being. Roles of inequality, discrimination, and social justice. Practical focus on social entrepreneurship in international context. [3]

ANTH6140 - Myth, Ritual, Belief: The Anthropology of Religion

Title

Myth, Ritual, Belief: The Anthropology of Religion

Catalog Description

(Also listed as ANTH 3140) Cross-cultural survey of religious and ritual beliefs in light of theories of religion. Topics include sacrifice, myth, witchcraft, divination, religious change, and millenarian movements. No credit for students who have earned credit for 3140. [3]

ANTH6141 - Anthropology of Healing

Title

Anthropology of Healing

Catalog Description

(Also listed as ANTH 3141) Ritual, symbols, belief, and emotion in health, illness, and therapeutic processes. Practices and politics of healing in western and non-western societies, including shamanism, faith healing, ecstatic religious experience, alternative medicine, and biomedicine. Mind-body interactions, medical pluralism, relations between patients and healers, and implications for improving medical care. No credit for students who have earned credit for 3141. [3]

ANTH6142 - Medicine, Culture, and the Body

Title

Medicine, Culture, and the Body

Catalog Description

(Also listed as ANTH 3142) Concepts of the human body from historical and cross-cultural perspectives. Exploration of experiences, representations, and medical theories of the body in birth, death, health, and illness in Western and non-Western societies. Comparison of methodologies of anthropology and history. No credit for students who have earned credit for 3142 or HIST 2830 or 5830. [3]

ANTH6143 - Medical Anthropology

Title

Medical Anthropology

Catalog Description

(Also listed as ANTH 3143) Biocultural aspects of human adaptations to health, disease, and nutrition. Non-Western medical and psychiatric systems. Effects of cultures on the interpretation, diagnosis, and treatment of illness. Case studies from Africa, Oceania, Latin America, and the contemporary United States. No credit for students who have earned credit for 3143. [3]

ANTH6144 - Politics of Reproductive Health

Title

Politics of Reproductive Health

Catalog Description

Reproductive health politics, with focus on the United States. Role of broader social, economic, and cultural concerns in diverse positions and public debates. How sexuality, race, class, gender, and disability shape experiences of conception, pregnancy, childbirth, kinship, and new medical technologies. [3]

ANTH6150 - Cognitive Anthropology

Title

Cognitive Anthropology

Catalog Description

(Also listed as ANTH 3150) A survey of methods and approaches in linguistics and the cognitive sciences. Exploration of culture and thought; how culture affects our ways of reasoning. No credit for students who have earned credit for 3150. [3]

ANTH6152 - Activism and Social Change: Theory, Experience, and Practice

Title

Activism and Social Change: Theory, Experience, and Practice

Catalog Description

(Also listed as ANTH 4152) Introduction to theory and ethics of social activism and advocacy. Roles of academics and scholars. Theories of political organizing and mobilization. Application of anthropological research methods. Case studies in local, national, and global social issues, processes of civic mobilization, and social change. No credit for students who have earned credit for 4152. [3]

ANTH6153 - Economic Anthropology

Title

Economic Anthropology

Catalog Description

(Also listed as ANTH 4153) Modern and postmodern cultural organization of Western and non-Western economies. Crosscultural comparison of concepts of self-interest and rationality. Relation of the growth of post-industrial (service and information) economies to economic strategies of ethnic groups. Survey of indigenous alternatives to development. Theoretical issues grounded in case studies from our own and other cultures. No credit for students who have earned credit for 4153. [3]

ANTH6154 - Environmental Anthropology

Title

Environmental Anthropology

Catalog Description

(Also listed as ANTH 4154) The relationship between human beings and the environments that sustain them. Global diversity of human ecological adaptations. Hunter-gatherers, pastoral nomads, slash-and-burn agriculturalists, and irrigation agriculturalists. Human impact on the environment. Theories of human ecological interaction. No credit for students who have earned credit for 4154. [3]

ANTH6156 - Racial Experience and Politics

Title

Racial Experience and Politics

Catalog Description

Politics in liberal democracies. Intellectual history and theory of racial experience; ethnographic studies of peoples' experience of race in everyday life; global and cross-cultural perspectives on processes of racialization. [3]

ANTH6160 - Creating Community

Title

Creating Community

Catalog Description

(Also listed as ANTH 3160) Creation, maintenance, and transformation of communities through time. Community as a village or settlement, and as an "imagined" or virtual aspect of social identity. Behaviorist, interactionist, discursive, and identity-oriented anthropological approaches to community. Community organization and the built environment. Ancient and modern case studies. No credit for students who have earned credit for 3160. [3]

ANTH6161 - Colonial Encounters in the Americas

Title

Colonial Encounters in the Americas

Catalog Description

(Also listed as ANTH 3161) Theoretical discussion of colonialism as a sociocultural process. Comparative colonialism in pre- and post-Hispanic contexts. Methodological consideration of archaeological and archival analyses and their complementary epistemological statuses. Pan-American case studies. No credit for students who have earned credit for 3161. [3]

ANTH6200 - Ancient Cities

Title

Ancient Cities

Catalog Description

(Also listed as ANTH 3200) Comparative examination of early cities in the Old World and pre-Columbian America. Analysis of social and economic processes supporting preindustrial urbanism. Role of geography, ideology, trade, and settlement systems in the rise of early urban societies. No credit for students who have earned credit for 3200. [3]

ANTH6202 - The Collapse of Civilizations

Title

The Collapse of Civilizations

Catalog Description

(Also listed as ANTH 3202) Causes of the decline or collapse of complex societies. Old World and New World examples. Historical, anthropological, and paleoecological theories and controversies. No credit for students who have earned credit for 3202. [3]

ANTH6240 - Ancient Mesoamerican Civilizations

Title

Ancient Mesoamerican Civilizations

Catalog Description

(Also listed as ANTH 3240) Development of pre-Hispanic civilization in Mesoamerica from the beginnings of village life to the rise of the great states and empires: Olmec, Maya, Toltec, and Aztec civilizations. No credit for students who have earned credit for 6240. [3]

ANTH6241 - The Aztecs

Title

The Aztecs

Catalog Description

(Also listed as ANTH 3241) Origins of the Aztec peoples of central Mexico and their culture; history and structure of the Aztec empire; pre-Columbian social, political, and economic organization; warfare and religion; the Spanish conquest; colonial society in central Mexico; ethno-graphic study of modern descendants of the Aztecs. No credit for students who have earned credit for 3241. [3]

ANTH6242 - The Archaeology of the Ancient Maya Civilization

Title

The Archaeology of the Ancient Maya Civilization

Catalog Description

Archaeological evidence and social theory on the enigmatic origins, complex nature, and sudden collapse of the ancient Maya civilization. May be repeated for credit more than once if there is no duplication in topic. Open to advanced undergraduates with consent of the instructor. [3]

ANTH6243 - Ancient Maya Gods and Rulers

Title

Ancient Maya Gods and Rulers

Catalog Description

(Also listed as ANTH 3243) Anthropology of politics and religion in Classic Maya culture, A.D. 100-1000. Interpretation of Classic Maya iconography and epigraphy. No credit for students who have earned credit for 3243. [3]

ANTH6250 - The Inca Empire

Title

The Inca Empire

Catalog Description

(Also listed as ANTH 3250) The rise and fall of the Inca state in the Southern American Andes. Inca society, agriculture, economy, warfare, ancestor worship, mummies, and royal wealth. Imperial expansion, the role of the feasting in Inca politics, and place of ecology in Inca religion. Destruction of the empire during the Spanish conquest; persistence of pre-Columbian culture among Inca descendants in Peru and Bolivia. No credit for students who have earned credit for 3250. [3]

ANTH6260 - Crafting Pottery in the Ancient World

Title

Crafting Pottery in the Ancient World

Catalog Description

Pottery as craft or locally-grounded knowledge of making. Phenomenological issues of perception, objectification, and embodiment. Practice-based versus formal textbook learning. Hands-on experience making and studying ceramic vessels. Qualitative and quantitative analysis of ceramic forms, fabrics, and decorations. [3]

ANTH6261 - Introduction to Geographic Information Systems and Remote Sensing

Title

Introduction to Geographic Information Systems and Remote Sensing

Catalog Description

(Also listed as ANTH 3261) Computerized graphics and statistical procedures to recognize and analyze spatial patterning. Spatial data-collection, storage and retrieval; spatial analysis and graphic output of map features. Integration of satellite imagery with data from other sources through hands-on experience. Assumes basic knowledge of computer hardware and software. [3]

ANTH6262 - Ethics in Anthropology, Archaeology, and Development

Title

Ethics in Anthropology, Archaeology, and Development

Catalog Description

(Also listed as ANTH 3262) Ethical perspectives on contemporary problems of archaeological and anthropological research, interaction, and interpretation of past and present non-Western societies. No credit for students who have earned credit for 3262. [3]

ANTH6343 - Biology and Culture of Race

Title

Biology and Culture of Race

Catalog Description

(Also listed as ANTH 3343) Biological and cultural perspectives on race in the United States and internationally. Patterns of human genetic variation. Biomedical use of racial categories. Social and cultural construction of race. Racism and racial discrimination. Racial disparities in health. No credit for students who have earned credit for 3343. [3]

ANTH6344 - Genetic Anthropology Lab Techniques

Title

Genetic Anthropology Lab Techniques

Catalog Description

(Also listed as ANTH 3344) Applications of molecular anthropology techniques. DNA data analysis. Genetic methods and findings. DNA comparisons between world populations. Studies of ancient DNA. No credit for students who have earned credit for 3344. [3]

ANTH6345 - Human Evolutionary Genetics

Title

Human Evolutionary Genetics

Catalog Description

(Also listed as ANTH 4345) Core issues in human evolution and population genetics. Molecular evidence for the origin of modern humans, reconstruction of human migrations, race, and detection of admixture between populations. Implications for human disease. Offered on a graded basis only. No credit for students who earned credit for 294 section 1 in fall 2012. Prerequisite or corequisite: BSCI 1100, BSCI 1105, or BSCI 1510. [3]

ANTH6347 - Bioethics in Anthropology

Title

Bioethics in Anthropology

Catalog Description

Humans as study subjects in research. Human complexities and experimentation; eugenics; and ethical, legal, and social issues of research. [3]

ANTH6371 - Social and Health Consequences of Pandemics

Title

Social and Health Consequences of Pandemics

Catalog Description

(Also listed as ANTH 3371) Origins, spread, mortality, and the biological and social consequences. The epidemic of bubonic plague in the 1300s, known as the European Black Death. The devastation of indigenous New World populations by European diseases after 1492. Social and medical responses. Implications for modern societies. No credit for students who have earned credit for 3371. [3]

ANTH6372 - Human Osteology

Title

Human Osteology

Catalog Description

(Also listed as ANTH 3372) Anatomy of the human skeleton. Determination of age, sex, stature, and biological affinity from bones and dentition. Analysis of archaeological skeletal remains for diagnosis of disease and identification of cultural practices. Use of human remains in criminal investigation. No credit for students who have earned credit for 3372. [3]

ANTH6373 - Hlth/Disease Anc Popltns

Title

Hlth/Disease Anc Popltns

Catalog Description

(Also listed as ANTH 4373) Paleopathology of mummies and skeletons. Skeletal evidence for violence and warfare. Gender and social status differences in diet, disease, and activity patterns to reconstruct ancient social organization. Biological relationships among ancient and modern populations. Ethics and federal law in the study of human remains. Laboratory analysis of skeletons. No credit for students who have earned credit for 4373. [3]

**ANTH6614 - Advanced K'iche' Maya
Title**

Advanced K'iche' Maya

Catalog Description

(Also listed as ANTH 3614) Vocabulary, listening, and speaking skills. Modern and colonial texts. Cultural context of linguistic practices in K'iche' communities. No credit for students who have earned credit for 3614. [3]

**ANTH6615 - Readings in K'iche' Mayan
Title**

Readings in K'iche' Mayan

Catalog Description

(Also listed as ANTH 3615) Taught in K'iche'. Advanced vocabulary, grammar, syntax, reading, and writing. Colonial and modern texts. No credit for students who have earned credit for 3615. [3]

**ANTH6620 - Maya Language and Literature
Title**

Maya Language and Literature

Catalog Description

(Also listed as ANTH 3620) Introduction to a contemporary Maya language. Linguistic analysis and cultural concepts. By permission of instructor. May be repeated for the study of different Maya languages for a total of 6 credits. No credit for students who have earned credit for 3620. [1-6; maximum of 6 credits total for all semesters of ANTH 6620]

**ANTH6622 - Classic Maya Language and Hieroglyphs
Title**

Classic Maya Language and Hieroglyphs

Catalog Description

(Also listed as ANTH 3622) Linguistic analysis of Classic Maya Hieroglyphs from A.D. 100-1000. Methods of decipherment, reading, and interpreting an ancient script. Role of socio-economic status in literacy. No credit for students who have earned credit for 3622. [3]

**ANTH6850 - Independent Research
Title**

Independent Research

Catalog Description

(Also listed as ANTH 3850) Readings on selected topics (of the student's choice) and the preparation of reports. No credit for students who have earned credit for 3850. [1-3]

**ANTH6851 - Independent Research
Title**

Independent Research

Catalog Description

(Also listed as ANTH 3851) Readings on selected topics (of the student's choice) and the preparation of reports. No credit for students who have earned credit for 3851. [1-3]

ANTH6852 - Independent Research

Title

Independent Research

Catalog Description

Readings on selected topics (of the student's choice) and the preparation of reports. Prerequisite: ANTH 6850, 6851. [1-3]

ANTH6853 - Independent Research

Title

Independent Research

Catalog Description

Readings on selected topics (of the student's choice) and the preparation of reports. Prerequisite: 6852. [1-3]

ANTH6865 - Field Research

Title

Field Research

Catalog Description

(Also listed as ANTH 3865) Directed field research on topics of the student's choice. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. No credit for students who have earned credit for 3865. [1-6]

ANTH6880 - Internship Readings and Research

Title

Internship Readings and Research

Catalog Description

(Also listed as ANTH 3880) Readings and research conducted under the supervision of a member of the Anthropology department and a substantial research paper are required. Students from any discipline can gain experience working with a local, national, or international organization in developing a project to broaden their understanding of anthropological issues. Hours for background readings and research will be completed in ANTH 6880 concurrently with and regardless of the numbers of hours taken in internship training in 6881. Normally a 2.90 grade point average, 6 hours of prior work in ANTH, and prior approval of the student's plan by the director of undergraduate studies in Anthropology are required. A research paper and report must be submitted at the end of the semester during which the internship training is completed. No credit for students who have earned credit for 3880. [Variable credit: 1-6]

ANTH6881 - Internship Training

Title

Internship Training

Catalog Description

(Also listed as ANTH 3881) Offered on a Pass/Fail basis only and must be taken concurrently with 6880. Hours of 6881 will not count toward the Anthropology major or minor. Students from any discipline can gain experience working with a local, national, or international organization in developing a project to broaden their understanding of anthropological issues. Hours for background readings and research will be completed in ANTH 6880 concurrently with and regardless of the numbers of hours taken in internship training in 6881. Normally a 2.90 grade point average, 6 hours of prior work in ANTH, and prior approval of the student's plan by the director of undergraduate studies in Anthropology are required. A research paper and report must be submitted at the end of the semester during which the internship training is completed. No credit for students who have earned credit for 3881. [Variable credit: 1-9]

ANTH6890 - Special Topics

Title

Special Topics

Catalog Description

(Also listed as ANTH 3890) Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. No credit for students who have earned credit for 3890. [3]

ANTH7150 - Urban Ecology

Title

Urban Ecology

Catalog Description

Environmental contexts and consequences of human and non-human life processes in cities through history. Transformations of landscapes, food systems, and built environments. Origins of cities, urbanization, industrial archaeology, urban planning, and environmental racism. Long-term perspectives on climate change, political ecology, environmental history, green politics, and prospects for sustainability. [3]

ANTH7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

[0-12]

ANTH8000 - History of Anthropological Theory I

Title

History of Anthropological Theory I

Catalog Description

An advanced consideration of the history of anthropological theory from its origins to the mid-twentieth century. [3]

ANTH8001 - History of Anthropological Theory II

Title

History of Anthropological Theory II

Catalog Description

An advanced consideration of the history of anthropological theory from the mid-twentieth century to the present. [3]

ANTH8010 - Special Topics

Title

Special Topics

Catalog Description

Problems, themes, or issues in anthropological theory and methods. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

ANTH8100 - Political Violence

Title

Political Violence

Catalog Description

Comparative and ethnographic analysis of state violence, guerrilla insurgencies, paramilitarism and vigilantism; consequences of repression, impunity, and social fragmentation on historical memory and democratic processes. [3]

ANTH8104 - Seminar on Political Economy and Anthropology

Title

Seminar on Political Economy and Anthropology

Catalog Description

Anthropological approaches to political economy and globalization. Fundamental works in political economy and economic anthropology. [3]

ANTH8106 - Ethics in Anthropology

Title

Ethics in Anthropology

Catalog Description

Ethical obligations of anthropologists in dealing with human subjects on the interpretation, interaction, and action with non-western societies. Ethics from Socrates to radical postmodernism. Debate of specific issues presented by non-Western practices, cultural property rights, sites versus sacred places, repatriation, cultural relativism, and anthropological activism. [3]

ANTH8107 - Race as a Cultural and Legal Construct

Title

Race as a Cultural and Legal Construct

Catalog Description

Historical and contemporary roles of race and racism in settler colonialism, slavery, the nation-state, and empire. Theoretical perspectives from social constructionism, anti-colonial literature, critical race theory, and standpoint theory. [3]

ANTH8110 - Seminar in Maya Ethnography

Title

Seminar in Maya Ethnography

Catalog Description

Ethnographic survey of the Maya of Mexico and Guatemala; historical and current data, methods, theories. [3]

ANTH8200 - Archaeological Method and Theory

Title

Archaeological Method and Theory

Catalog Description

Development of archaeology as a discipline; relationships with anthropology and history; intellectual trends. Prerequisite: consent of instructor. [3]

ANTH8201 - Advanced Spatial Analysis

Title

Advanced Spatial Analysis

Catalog Description

Theoretical and methodological training for advanced GIS applications in social science research. Implementing GIS in research design, field spatial data acquisition methods, data processing, management, visualization, and analysis. [3]

ANTH8210 - Preindustrial Political Systems

Title

Preindustrial Political Systems

Catalog Description

History, structure, and change of pre-modern political systems around the world. [3]

ANTH8211 - Space, Place, and Landscape

Title

Space, Place, and Landscape

Catalog Description

Cross-disciplinary approaches to the significance of space and landscape for human societies in the past and present. [3]

ANTH8212 - Historical Archaeology

Title

Historical Archaeology

Catalog Description

Development, practice, methods, and theoretical perspectives in historical archaeology; relationships between archaeology and history. [3]

ANTH8220 - The Historical Archaeology of Latin America

Title

The Historical Archaeology of Latin America

Catalog Description

The study of archaeological, historic, and ethnohistorical materials in examining the conquest, colonization, and process of culture change in Latin America. [3]

ANTH8230 - The Collapse of Civilizations: General Theories and the Maya Collapse

Title

The Collapse of Civilizations: General Theories and the Maya Collapse

Catalog Description

An advanced consideration of the causes and processes involved in the decline of complex societies. General theory is then illustrated by detailed interactive study of the evidence and interpretations of the collapse of the civilization of the Classic Maya, arguably the New World's most advanced society. A seminar allowing each student to develop and define their own perspective on this major problem in archaeology and social theory. [3]

ANTH8232 - Seminar in Mesoamerican Archaeology

Title

Seminar in Mesoamerican Archaeology

Catalog Description

Important themes in the prehistory of pre-Columbian civilizations of Mexico and Central America. May be repeated for credit if there is no duplication in topic. [3]

ANTH8240 - Seminar in South American Archaeology and Ethnohistory

Title

Seminar in South American Archaeology and Ethnohistory

Catalog Description

The prehistory of pre-Columbian civilizations of the Andean and lowland regions of South America. [3]

ANTH8300 - Human Variation and Osteology

Title

Human Variation and Osteology

Catalog Description

Survey of physical and genetic variation in modern human populations. Laboratory techniques in osteological analysis. [3]

ANTH8301 - Bioarchaeology Theory and Methods

Title

Bioarchaeology Theory and Methods

Catalog Description

The body as a form of material culture. Traumatic violence, structural violence, and community health profiles. Sex and gender in the bioarchaeological record. Skeletal analysis; paleopathology; stable isotope analysis; ancient DNA; radiocarbon dating. Knowledge of skeletal anatomy is encouraged. No credit for students who have earned credit for 8010 section 02 in fall 2015. [3]

ANTH8310 - The Anthropology of Death: Body, Place, and Memory

Title

The Anthropology of Death: Body, Place, and Memory

Catalog Description

Cultural responses to death in Western and non-Western societies. Emphasis on issues of how social relations, emotion, and memory are shaped in relation to ideas and practices focused on the body and the significance of places as sites of identity. Theory and perspectives from anthropology, religion, and philosophy. [3]

ANTH8311 - Violence and Its Embodiments in the Past and Present

Title

Violence and Its Embodiments in the Past and Present

Catalog Description

Anthropology and bioarchaeology of violence in ancient and modern communities. Bioarchaeological theory and method to identify trauma and violence against the body. Study of war and other forms of violence, including domestic abuse, ritual battles, corporeal punishment. [3]

ANTH8500 - Teaching Anthropology**Title**

Teaching Anthropology

Catalog Description

Preparation for teaching anthropology courses at the university level. Pedagogical practice and theory. Observations of master teachers; teaching practice and evaluation. Design of syllabi, readings, and assignments. Approaches to teaching challenging topics. [3]

ANTH8999 - Non-candidate Research**Title**

Non-candidate Research

Catalog Description

Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

ANTH9000 - Seminar in Research Design**Title**

Seminar in Research Design

Catalog Description

Objectives and strategies of contemporary research problems in anthropology; formulation, writing, and construction of grant proposals; interplay between data, method, and theory; develop skill in critiquing research ideas, techniques, and designs. [3]

ANTH9001 - Research Design in Anthropology**Title**

Research Design in Anthropology

Catalog Description

Research design, formulating research questions, and definition of appropriate data and methods. [3]

ANTH9002 - Publishing in Anthropology**Title**

Publishing in Anthropology

Catalog Description

Preparation to publish in peer-reviewed journals in anthropology and related fields. Peer-review process and editorial decisions. Issues in publishing patterns by sub-discipline, professional rank, and gender. Review of manuscripts in preparation. Familiarity with research design is expected. [3]

ANTH9999 - Ph.D. Dissertation Research**Title**

Ph.D. Dissertation Research

Catalog Description

[0-12]

Arabic

ARA5101 - Elementary Arabic

Title

Elementary Arabic

Catalog Description

(Also listed as ARA 1101) Development of reading, listening, speaking, and writing skills. No credit for students who have earned credit for a more advanced Arabic language course. No credit for students who have earned credit for 1101. [5]

ARA5102 - Elementary Arabic

Title

Elementary Arabic

Catalog Description

(Also listed as ARA 1102) Continuation of 5101. Development of reading, listening, speaking, and writing skills. No credit for students who have earned credit for a more advanced Arabic language course. No credit for students who have earned credit for 1102. [5]

ARA5201 - Intermediate Arabic

Title

Intermediate Arabic

Catalog Description

(Also listed as ARA 2201) Practice and development of all language skills at the intermediate-advanced level. Intensive work in spoken Arabic with emphasis on vocabulary acquisition, reading comprehension, and writing skills. Advanced grammar, modern Arabic word formation, verb aspect usage, and structure of complex sentences. Three hours of class work per week with an additional two hours per week of individual work in the language laboratory. No credit for students who have earned credit for a more advanced Arabic language course. No credit for students who have earned credit for 2201. [4]

ARA5202 - Intermediate Arabic

Title

Intermediate Arabic

Catalog Description

(Also listed as ARA 2202) Continuation of 5201. Practice and development of all language skills at the intermediate-advanced level. Intensive work in spoken Arabic with emphasis on vocabulary acquisition, reading comprehension, and writing skills. Advanced grammar, modern Arabic word formation, verb aspect usage, and structure of complex sentences. Three hours of class work per week with an additional two hours per week of individual work in the language laboratory. No credit for students who have earned credit for a more advanced Arabic language course. No credit for students who have earned credit for 2202. [4]

ARA5301 - Advanced Arabic

Title

Advanced Arabic

Catalog Description

(Also listed as ARA 3301) Further development of listening, reading, speaking, and writing skills in the Arabic language. Emphasis on grammar and literary techniques. Offered on a graded basis only. No credit for students who have earned credit for a more advanced Arabic language course. No credit for students who have earned credit for 3301. [3]

ARA5302 - Advanced Arabic**Title**

Advanced Arabic

Catalog Description

(Also listed as ARA 3102) Continuation of 5301. Further development of listening, reading, speaking, and writing skills in the Arabic language. Emphasis on grammar and literary techniques. Offered on a graded basis only. No credit for students who have earned credit for a more advanced Arabic language course. No credit for students who have completed 3102. [3]

ARA5401 - Media Arabic**Title**

Media Arabic

Catalog Description

(Also listed as ARA 3201) Listening to, discussing, simulating, and analyzing Arabic media materials. Coverage of current and historical events, such as TV broadcasts, headline news, documentaries, and public discussions on political, religious, and cultural issues. Offered on a graded basis only. No credit for students who have earned credit for 3201. [3]

ARA5501 - Arabic of the Qur'an and Other Classical Texts**Title**

Arabic of the Qur'an and Other Classical Texts

Catalog Description

(Also listed as ARA 3301) Syntactical and morphological features of Classical Arabic. Differences and similarities with Modern Standard Arabic in vocabulary usage, semantic extensions, and context; vocabulary borrowing. Texts drawn from the Qur'an, Hadith, and Sira (biographical) literature. No credit for students who have earned credit for 3301. [3]

Asian Studies

ASIA5151 - The Third World and Literature**Title**

The Third World and Literature

Catalog Description

(Also listed as ASIA 3151) The history of cultural and political concepts of the Third World from 1955 to the present. Contemporary literary and cultural debates regarding models of transnationalism and processes of globalization. National literatures and cultures foundational to the Third World model. The relationship between the genre of the novel and the formation of national communities. No credit for students who have earned credit for 3151. [3]

ASIA5210 - Hollywood Hanoi

Title

Hollywood Hanoi

Catalog Description

(Also listed as ASIA 2210W) Cultural narratives of the Vietnam War, including novels and films. War and representation. International, minority, and antiwar perspectives on the violence and aftermath. Muhammad Ali, Werner Herzog, Jean Genet, Graham Greene, and Dinh Linh. All texts in English translation. No credit for students who have earned credit for 2210W. [3]

ASIA5511 - Popular Culture in Modern Japan

Title

Popular Culture in Modern Japan

Catalog Description

(Also listed as ASIA 2511) Popular culture in Japan from 1900 to the present. The rise of mass culture and media, song, sports, food, fashion, and popular film genres. No credit for students who have earned credit for 2511. [3]

ASIA5512 - Explorations of Japanese Animation

Title

Explorations of Japanese Animation

Catalog Description

(Also listed as ASIA 2512) Introduction to the form and content of Japanese animation as globalized popular entertainment and as a speculative artistic medium that explores history and memory, nature and technology, human identity, carnivalesque comedy, and gender relations. No credit for students who have earned credit for 2512. [3]

ASIA5605 - Romancing the Nation in Modern Chinese Literature

Title

Romancing the Nation in Modern Chinese Literature

Catalog Description

[Also listed as 2605] From the fourteenth century to the present. Fiction, drama, and poetry. Family relations and nation-state in romantic writings. Knowledge of Chinese is not required. [3]

ASIA5606 - The Martial Tradition in Chinese Literature

Title

The Martial Tradition in Chinese Literature

Catalog Description

[Also listed as 2606] From eleventh century BCE to modern period. War, banditry, revenge, cannibalism, female knight-errant. All genres of literature, supplemented by visual material, theater, and film. Knowledge of Chinese is not required. [3]

ASIA5607 - Self and Society in Pre-modern Chinese Literature

Title

Self and Society in Pre-modern Chinese Literature

Catalog Description

From the seventeenth-century BCE to the seventeenth-century CE. Poetry, prose, fiction, and drama. Self, society, religion, gender, and print culture. No credit for students who have earned credit for 3891 section 01 offered fall 2015. Knowledge of Chinese is not required. [3]

ASIA5608 - Chinese Drama: 13th-20th Centuries

Title

Chinese Drama: 13th-20th Centuries

Catalog Description

Traditional and modern Chinese drama. Text, image, and performance. Gender, religious thinking, commerce, and censorship. Knowledge of Chinese is not required. [3]

ASIA5609 - Writing and Gender in Traditional China

Title

Writing and Gender in Traditional China

Catalog Description

Pre-modern China: 1st century CE to 20th century CE. Women writers, women in family and society, gender relations, cross-dressing, and foot-binding. Poetry, prose, drama, fiction, and visual materials. Knowledge of Chinese is not required. [3]

ASIA5633 - Self-Cultivation in Ancient China

Title

Self-Cultivation in Ancient China

Catalog Description

(Also listed as ASIA 3633) 300 BCE to 500 CE. Methods, goals, and contexts of self-cultivation in antiquity. Breathing exercises, meditation, visualization, sexual arts, sacrifice, alchemy, and other practices in their religious, cultural, and social contexts. No credit for students who have earned credit for 3633. [3]

ASIA5650 - Translating Sunzi (Sun Tzu) The Art of War

Title

Translating Sunzi (Sun Tzu) The Art of War

Catalog Description

Commentaries on Sunzi and related Chinese military texts from Classical and Literary Chinese into English. Advanced study of Classical and Literary Chinese. Advanced study of military thought. Prerequisite: CHIN 5405. [3]

ASIA5680 - Inside China**Title**

Inside China

Catalog Description

(Also listed as ASIA 1680) First-hand experience of China's dynamic society and expanding economy. Guided exploration of famous historical sites and contemporary institutions such as hospitals, businesses, factories, and art galleries in Beijing and Shanghai. Interviews with individuals from many different walks of life, including physicians, entrepreneurs, migrant workers, and college students. No knowledge of Chinese is required. Offered on a graded basis only. [3]

ASIA5851 - Independent Study**Title**

Independent Study

Catalog Description

(Also listed as ASIA 3851) Designed primarily for majors who want to study Asian topics not regularly offered in the curriculum. Must have consent of instructor. May be repeated for credit more than once, but students may earn only up to 3 credits per semester of enrollment. No credit for students who have earned credit for 3851. [1-3]

ASIA5852 - Independent Study**Title**

Independent Study

Catalog Description

(Also listed as ASIA 3852) Designed primarily for majors who want to study Asian topics not regularly offered in the curriculum. Must have consent of instructor. May be repeated for credit more than once, but students may earn only up to 3 credits per semester of enrollment. No credit for students who have earned credit for 3852. [1-3]

ASIA5891 - Special Topics**Title**

Special Topics

Catalog Description

(Also listed as ASIA 3891) Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. No credit for students who have earned credit for 3891. [1-3]

ASIA5892 - Special Topics**Title**

Special Topics

Catalog Description

(Also listed as ASIA 3892) Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. No credit for students who have earned credit for 3892. [1-3]

ASTR7999 - Master's Thesis Research
Title

Master's Thesis Research

Catalog Description

[0-13]

ASTR8001 - Order of Magnitude Astrophysics
Title

Order of Magnitude Astrophysics

Catalog Description

Order-of-magnitude estimates on astrophysical problems. May be repeated for credit more than once. Students may enroll in more than one section of this course each semester. [1]

ASTR8002 - Teaching Practicum
Title

Teaching Practicum

Catalog Description

Discussion of best teaching practices in weekly meeting with instructor. Application of teaching strategies via teaching undergraduate lab or leading homework help-desk sessions. Offered on satisfactory/unsatisfactory basis. [0-1]

ASTR8003 - Astrophysics Seminars
Title

Astrophysics Seminars

Catalog Description

Weekly attendance at Astrophysics program events: colloquium, journal club, and seminars. [0]

ASTR8010 - Radiative Processes
Title

Radiative Processes

Catalog Description

Electromagnetic radiation from astrophysical sources. Radiative transfer; blackbody radiation; atomic and molecular absorption and emission; radiation from moving charges. [3]

ASTR8020 - Special Topics in Astrophysics
Title

Special Topics in Astrophysics

Catalog Description

Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

ASTR8030 - Stellar Astrophysics

Title

Stellar Astrophysics

Catalog Description

Physics of stellar structure and evolution, including nuclear energy generation, equations of state, and heat transfer by radiation, conduction, and convection. Numerical stellar models. Observational aspects of stellar astrophysics. [3]

ASTR8040 - The Structure and Dynamics of Galaxies

Title

The Structure and Dynamics of Galaxies

Catalog Description

The stellar, gaseous, and dark matter content of galaxies; their internal bulk properties, structure, kinematics, and dynamics. Equilibrium and stability of stellar systems. Orbit theory, the gravitational N-body problem, relaxation, dynamical friction, and the Fokker-Planck equation. Galaxy evolution from the standpoint of stellar populations, the initial mass function, chemical evolution, and galaxy interactions. Serves as repeat credit for ASTR 3700. [3]

ASTR8050 - Structure Formation in the Universe

Title

Structure Formation in the Universe

Catalog Description

Dark matter and dark energy. Growth of linear and non-linear density fluctuations. Density and velocity fields, perturbation theory, and non-linear collapse models. Cosmological N-body simulations and the formation of dark matter halos. Galaxy clustering measurements and galaxy formation physics. Experimental cosmological probes of dark matter and dark energy. [3]

ASTR8060 - Astronomical Techniques: Observational Methods in Astronomy

Title

Astronomical Techniques: Observational Methods in Astronomy

Catalog Description

Observational tools of the professional astronomer. Observation planning including: telescope and instrument selection, conducting observations, calculation of expected signal-to-noise ratio, data reduction, and extraction of photometric and spectroscopic measurements. [3]

ASTR8070 - Astrostatistics

Title

Astrostatistics

Catalog Description

Statistical and computational techniques for data-mining and inference in an astronomical context. Probability theory, comparison of frequentist and Bayesian inference. Strategies for data exploration and visualization. Approaches to regression, parameter estimation, and model selection (e.g. Markov chain Monte Carlo). Overview of time-series analysis and deep-learning techniques. [3]

ASTR8080 - Astronomical Techniques: Data Mining in Large Astronomical Surveys

Title

Astronomical Techniques: Data Mining in Large Astronomical Surveys

Catalog Description

The manipulation and analysis of catalog-level data from large astronomical surveys. Survey observations, cross-matching catalogs, statistical analysis, version control. Emphasis on development of code and best practices. Not open to students who have completed 3890 section 01 offered fall 2019 or 8020 section 01 offered fall 2019. [3]

ASTR8090 - Relativistic Astrophysics

Title

Relativistic Astrophysics

Catalog Description

Studying the Universe through the extreme relativistic environments of neutron stars and black holes, along with the gravitational waves they produce. Differential geometry, spacetime curvature, the Einstein Field Equations, the Schwarzschild Metric for black holes, production and detection of Gravitational Waves, and the Friedmann-Robertson-Walker metric for cosmology. [3]

ASTR8900 - Independent Study

Title

Independent Study

Catalog Description

May be repeated for credit more than once, but students may earn only up to 3 credits per semester of enrollment. [1-3]

ASTR8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-13]

ASTR9995 - Half-time Ph.D. Dissertation Research

Title

Half-time Ph.D. Dissertation Research

Catalog Description

For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

ASTR9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-13]

Biochemistry (GS)

BCHM-GS7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

[0-12]

BCHM-GS8300 - Introduction To Structural Biology

Title

Introduction To Structural Biology

Catalog Description

Introduction to methods to determine the three-dimensional structures of biological macromolecules and macromolecular complexes at or near atomic resolution. Techniques covered include X-ray crystallography, NMR, EPR, and fluorescence spectroscopies, cryo-electron microscopy, and computational modeling. Emphasis is placed on practical aspects of each technique and the range of applications for which each technique is applicable. The course is given during the first third of the semester, just preceding Biochemistry 8303. SPRING. [1] Chazin, Egli, Lacy, Lang, Mchaourab, Ohi, Reiter, Sheehan.

BCHM-GS8301 - Enzyme Mechanisms and Kinetics of Catalysis

Title

Enzyme Mechanisms and Kinetics of Catalysis

Catalog Description

This course is focused on the chemical mechanisms by which enzymes catalyze reactions. Chemical principles are applied to biochemical problems. Major topics include principles of catalysis, enzyme kinetics (both steady-state and pre-equilibrium), roles of cofactors and prosthetic groups in catalysis, and interpretation of kinetic results. Prerequisites: Organic chemistry, biochemistry. SPRING [1] Guengerich

BCHM-GS8302 - Advanced Biochemistry, Cell Biology, And Genetics

Title

Advanced Biochemistry, Cell Biology, And Genetics

Catalog Description

Advanced concepts in genetics, biochemistry, and cell biology will be reviewed using a combination of lectures and discussion sections based on published manuscripts. Prerequisite: IGP core course or consent of instructor. FALL. [3] Course Co-Directors: Ascano, Hodges. Co-Instructors: Heibert, Merrikh, Ren, Schey

BCHM-GS8303 - Biomolecular X-Ray Crystallography

Title

Biomolecular X-Ray Crystallography

Catalog Description

Introduction to the theory and practice of X-ray crystallography for the determination of the three-dimensional structure of biological macromolecules at atomic resolution. Topics to be covered include X-ray diffraction, symmetry and space groups, crystallization, data collection, phasing, model building, refinement and validation. Prerequisite: Biochemistry 8300, Introduction to Structural Biology. Prerequisite: BCHM-GS 8300, SPRING. [2] Egli, Harp.

BCHM-GS8323 - Special Problems And Experimental Techniques

Title

Special Problems And Experimental Techniques

Catalog Description

Opportunity to master advanced laboratory techniques while pursuing special problems under direction of individual members of the faculty in areas of their specialized interests. Admission to course, hours, and credit by arrangement. FALL, SPRING, SUMMER. [Variable credit: 1-6] Cortez and Staff.

BCHM-GS8325 - Special Topics In Biochemistry

Title

Special Topics In Biochemistry

Catalog Description

Introduction to current research through the biochemical literature. Given on an individual basis by arrangement. May be taken more than once, but not for more than 2 hours credit with a single adviser, nor for more than 4 hours total. May be taken concurrently with 8323 with a different adviser. Prerequisite: consent of instructor. FALL, SPRING, SUMMER. [Variable credit: 1-2] Carter and Staff.

BCHM-GS8327 - Scientific Communication

Title

Scientific Communication

Catalog Description

This course will develop skills required for effective oral and written scientific communication. Students will present research from the current literature and will be required to write an NIH formatted grant proposal to be critiqued by faculty assigned by the course director. Students not working for a degree in biochemistry must have the consent of the instructor to enroll. FALL. [2] Schey, Wagner.

BCHM-GS8336 - Biochemical and Molecular Toxicology

Title

Biochemical and Molecular Toxicology

Catalog Description

Chemical and biological aspects of toxicology and carcinogenesis, including basic principles and mechanisms, metabolism and enzymology, cellular biology, chemistry of reactive intermediates, tissue-specific toxicity, and a survey of several classes of environmentally important compounds and drugs. Prerequisite: organic chemistry and general biochemistry. Three lectures per week. FALL. [3] Guengerich

BCHM-GS8337 - Molecular Aspects Of Cancer Research

Title

Molecular Aspects Of Cancer Research

Catalog Description

(Also listed as Cell and Developmental Biology 8337) A focused series of seminars and discussions to explore the molecular basis of cancer. Seminars rely heavily on extramural speakers with recognized expertise in selected research areas. Discussion sections led by a faculty member following each series of three to four seminars. SPRING. [1] Hiebert and Staff.

BCHM-GS8343 - Biomolecular NMR Spectroscopy

Title

Biomolecular NMR Spectroscopy

Catalog Description

Introduction to the theory and practice of nuclear magnetic resonance (NMR) spectroscopy for the study of the structure, dynamics, and biochemistry of biological macromolecules. After introducing the basic concepts of NMR and formalisms for predicting the outcome of experiments, topics to be covered will include multidimensional NMR, scalar and dipolar couplings, chemical exchange, relaxation, resonance assignment strategies, and determination of 3D structures. Prerequisite: Biochemistry 8300. FALL. [3] Chazin, Sanders, Voehler.

BCHM-GS8349 - Graduate Seminar In Molecular Biophysics

Title

Graduate Seminar In Molecular Biophysics

Catalog Description

(Also listed as CPB 8349) Introduction to research areas of current interest through examination of key publications in the preceding year. The weekly meetings consist of open discussions of assigned readings led by multiple student teams. May be repeated for credit. SPRING. [1] Chazin.

BCHM-GS8352 - Analytical Proteomics

Title

Analytical Proteomics

Catalog Description

Introduces analytical proteomics methods and approaches through lectures, directed readings, and group and individual data analysis exercises. Topics include (a) mass spectrometry instrumentation, (b) mass spectrometry approaches to protein and peptide analysis, (c) protein and peptide preparation and separation methods, (d) bioinformatics tools for identification of proteins from mass spectrometry data, (e) quantitative proteomics methods, (f) applications of proteomics in common experimental designs in biochemistry and cell biology, (g) applications to clinical studies. SPRING. [2]. Schey

BCHM-GS8381 - Molecular Foundations Of Medicine

Title

Molecular Foundations Of Medicine

Catalog Description

Molecular Foundations of Medicine is designed to familiarize students with the cellular structures, biomolecules, and processes that constitute life, human health, and disease at the molecular level. The course employs an integrated approach to teach underlying principles of biochemistry, cell and tissue biology, and genetics with an emphasis on human systems and medical conditions. The inclusion of clinical correlation sessions, small groups, and laboratory sessions will further integrate and broaden course material and relate molecular processes to the study of human disease. Prerequisite: MSTP students only. FALL. [Variable credit: 1-6] Osherooff, George, Pettepher.

BCHM-GS8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

BCHM-GS9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[Variable credit: 0-12]

Biological Sciences

BSCI5101 - Human Anatomy and Physiology I

Title

Human Anatomy and Physiology I

Catalog Description

Structure and function of the human organism. Integration of the gross anatomical structures and organ systems with microscopic structure, physiological function, and homeostatic mechanisms. Clinical relevance of selected topics. Not open to students who have completed NURS 3101 or MHS 3101. Prerequisite: 1510; Prerequisite or corequisite: 1511. [4]

BSCI5226 - Immunology

Title

Immunology

Catalog Description

(Also listed as BSCI 3226) The molecular and cellular basis of immunity. Emphasis on molecular structure, the genetic origin of diversity in B-cell and T-cell receptors, antigen presentation, and the cellular interactions leading to the immune response. Tolerance, tumor and transplantation immunity, autoimmune and immunodeficiency diseases, and allergy. Prerequisite: 2201 or 2210. [3]

BSCI5230 - Biological Clocks

Title

Biological Clocks

Catalog Description

(Also listed as BSCI 3230) Study of innate mechanisms for measurement of time in living organisms. Emphasis on the functional significance and physiological basis of biological clocks in animals and humans. Topics include circadian rhythms, time-compensated celestial navigation, photoperiodism, and the role of biological clocks in human behavior. No credit for students who have earned credit for 3230. [3]

BSCI5231 - Paleobiology

Title

Paleobiology

Catalog Description

Macroevolutionary processes as observed through the fossil record. Inference of evolutionary relationships, physiology, reproduction, behavior, and ecology. Fundamentals of paleobiology, paleoecology, paleoclimates, macroecology, biogeography, geology, geochemistry, anthropology, and conservation paleobiology. Effects of climate change and human impacts, in deep-time. [3]

BSCI5233 - Conservation Biology

Title

Conservation Biology

Catalog Description

Ecological, evolutionary, social, and economic aspects of biodiversity loss and ecosystem disruption due to human activities. Climate change, habitat fragmentation, species overexploitation, and invasive species. Sustainable development, habitat restoration, and species reintroduction. [3]

BSCI5234 - Microbiology

Title

Microbiology

Catalog Description

Microorganisms, including bacteria, archaea, eukaryotes, viruses, and their mobile genetic elements. Origins, universality, and diversity of microbial life. Modes of genome evolution, symbioses between microbes and hosts, biotechnology, applications, and human microbiome. Not open to students who have earned credit for 3234. [3]

BSCI5236 - Parasitology

Title

Parasitology

Catalog Description

(Also listed as BSCI 3236) Biology and epidemiology of eukaryotic parasites of medical and veterinary significance. Diagnosis, treatment, and control of parasitic protists, platyhelminthes, nematodes, and arthropods. Impact on global health. No credit for students who have earned credit for 3236. [3]

BSCI5238 - Ecology

Title

Ecology

Catalog Description

(Also listed as BSCI 2238) Population biology, evolutionary ecology, community structure, with emphasis on species interactions, including competition, predation, and symbiosis. No credit for students who have earned credit for 2238. [3]

BSCI5238L - Ecology Lab

Title

Ecology Lab

Catalog Description

(Also listed as BSCI 2238L) One three-hour laboratory and discussion period or field trip per week. Prerequisite or corequisite: 5238. No credit for students who have earned credit for 2238L. [1]

BSCI5239 - Evolution of Behavior

Title

Evolution of Behavior

Catalog Description

(Also listed as BSCI 3239) Theoretical and empirical research on the evolution of behavior. Evolutionary approaches to the study of animal behavior, including the role of behavior in foraging, competition, predator-prey interactions, and sociality. Behavioral adaptations and their roles in sexual selection, mating systems, and animal communication. No credit for students who have earned credit for 3239. [3]

BSCI5243 - Principles of Human Disease

Title

Principles of Human Disease

Catalog Description

(Also listed as BSCI 3243) Application of genetics, cell biology, and molecular biology to the study of human diseases. Genomics, gene mapping, and molecular techniques. Animal models of disease. Chromosomal abnormalities, single-gene and multifactorial diseases, and epigenetics. No credit for students who earn credit for 3243. [3]

BSCI5245 - Biology of Cancer

Title

Biology of Cancer

Catalog Description

(Also listed as BSCI 3245) Application of cell biology, molecular biology, and genetics to the study of cancer. Tumorigenesis; cellular oncogenes; growth factor signaling; tumor suppressor genes; apoptosis; metastasis and invasion. No credit for students who have earned credit for 3245. [3]

BSCI5247 - Molecular Evolution

Title

Molecular Evolution

Catalog Description

(Also listed as BSCI 3247) The theory of evolution at the molecular level. The evolution of DNA and RNA sequences, proteins, and genome structures will be studied using models from population genetics and comparative approaches. Molecular clocks, the evolution of gene regulation and globin genes, molecular phylogeny, and human evolution. No credit for students who have earned credit for 3247. [3]

BSCI5252 - Cellular Neurobiology

Title

Cellular Neurobiology

Catalog Description

(Also listed as BSCI 3252) Structure and function of nerve cells. Emphasis on electrical excitability, synaptic transmission, and sensory transduction. Cellular mechanisms underlying simple behaviors, sensory information processing, and learning and memory. No credit for students who have earned credit for 3252. [3]

BSCI5254 - Neurobiology of Behavior

Title

Neurobiology of Behavior

Catalog Description

(Also listed as BSCI 3254) Nerve cell interactions in neuronal networks of the central nervous system of animals and their impact for regulating behavior. Sensory systems, sensory-motor integration, central processing of information, neuronal-hormonal interactions; and brain anatomy and organization in invertebrates and vertebrates. No credit for students who have earned credit for 3254. [3]

BSCI5256 - Molecules of the Brain

Title

Molecules of the Brain

Catalog Description

(Also listed as BSCI 3256) Molecules of neural wiring, involving cell identity, pathfinding, synaptogenesis. Molecules of nerve cell communication, with relationship to drugs of addiction and abuse. Molecules of nervous system plasticity, and the mechanistic bases of learning and memory. Relation of these mechanisms to causes of human neurological diseases. No credit for students who have earned credit for 3256. [3]

BSCI5265 - Biochemistry II

Title

Biochemistry II

Catalog Description

(Also listed as BSCI 4265) Biochemistry of the expression, transmission, and maintenance of genetic information. DNA transcription, replication, recombination, and repair. Structural mechanisms and biological functions of DNA processing proteins. Offered on a graded basis only. No credit for students who have earned credit for 4265. [3]

BSCI5266 - Advanced Molecular Genetics

Title

Advanced Molecular Genetics

Catalog Description

(Also listed as BSCI 4266) Principles of classical and molecular genetic analysis: mutation and recombination, mapping, and the application of genetic methodology to the study of complex systems. Special emphasis on modern genomic approaches. No credit for students who have earned credit for 4266. [3]

BSCI5267 - Molecular Virology

Title

Molecular Virology

Catalog Description

(Also listed as BSCI 4267) Application of genetics, biochemistry, molecular and cell biology to the study of viruses. Virus structure and classification, viral strategies of gene expression, genome replication, particle assembly. Host defenses against viruses. Comparisons with other infectious agents. Discussion of real-world outbreaks. No credit for students who have earned credit for 4267. [3]

BSCI5270 - Statistical Methods in Biology

Title

Statistical Methods in Biology

Catalog Description

(Also listed as BSCI 3270) An introduction to statistical methods used in the analysis of biological experiments, including the application of computer software packages. Emphasis on testing of hypotheses and experimental design. Topics include descriptive statistics, analysis of variance, regression, correlation, contingency analysis, and the testing of methods for sampling natural populations. No credit for students who have earned credit for 3270. [3]

BSCI5272 - Genome Science

Title

Genome Science

Catalog Description

(Also listed as BSCI 3272) Aims and importance of the science. Retrieval of genome data from public databases; experimental and computational methods used in analysis of genome data and their annotation. Functional aspects of genomics, transcriptomics, and proteomics; use of phylogenetics and population genomics to infer evolutionary relationships and mechanisms of genome evolution. No credit for students who have earned credit for 3272. [3]

BSCI5890 - Special Topics in Biological Sciences

Title

Special Topics in Biological Sciences

Catalog Description

(Also listed as BSCI 3890) Topics vary. May be repeated for credit more than once by permission of the director of undergraduate studies. Students may enroll in more than one section of this course each semester. Prerequisite: 1511. [3]

BSCI6320 - Graduate Seminar in Biological Sciences

Title

Graduate Seminar in Biological Sciences

Catalog Description

May be repeated for credit more than once. Students may enroll in more than one section of this course each semester. [1]

BSCI6332 - Seminar in Biological Rhythms

Title

Seminar in Biological Rhythms

Catalog Description

May be repeated for credit more than once. Students may enroll in more than one section of this course each semester. [1-2]

BSCI6336 - Seminar in Ecology and Evolutionary Biology

Title

Seminar in Ecology and Evolutionary Biology

Catalog Description

May be repeated for credit more than once. Students may enroll in more than one section of this course each semester. [1-2]

BSCI6341 - Focal Topics in Molecular Biology

Title

Focal Topics in Molecular Biology

Catalog Description

In-depth analysis of three to four research areas in molecular and cell biology taught by experts in each subdiscipline through lectures and discussions of papers from the current literature. Prerequisite: IGP 8001 or permission of instructor. [3]

BSCI6384 - The Brain and Behavior

Title

The Brain and Behavior

Catalog Description

Brain and Behavior provides a basic understanding of the human central nervous system and human behavior. The format includes lectures, lab exercises, small-group discussions, and patient case presentations. Brain and Behavior integrates three areas of medical science: (1) neuroanatomy, physiology, and biochemistry; (2) psychopathology and systems neuroscience; and (3) pathology, pharmacology, and radiology. Prerequisites: MSTP students only. [1]

BSCI6385 - Advanced Reading in Biological Sciences

Title

Advanced Reading in Biological Sciences

Catalog Description

Specialized topics under the guidance of a member of the department's faculty. Open to qualified graduate students only. Admission to course by arrangement. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

BSCI7390 - Special Topics and Advanced Techniques in Biological Sciences

Title

Special Topics and Advanced Techniques in Biological Sciences

Catalog Description

Specialized laboratory experiments, open to a limited number of properly qualified students. Admission to course, hours, and credit by arrangement. May be repeated for credit more than once. Students may enroll in more than one section of this course each semester. [2-4]

BSCI7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

[0-12]

BSCI8999 - Non-candidate Research

Title

Non-candidate Research

Catalog Description

Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

BSCI9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Biomedical Engineering

BME5100 - Lasers in Surgery and Medicine

Title

Lasers in Surgery and Medicine

Catalog Description

(Also listed as BME 4100) Fundamentals of lasers, light-tissue interaction, problem-based design of optical instrumentation. Applications in laser surgery, disease detection, and surgical guidance. Includes hands-on experiences. No credit for students who have earned credit for 4100. FALL. [3]

BME5130 - Systems Physiology

Title

Systems Physiology

Catalog Description

(Also listed as BME 3100) Quantitative physiology from the engineering point of view. Descriptive physiology of several organ systems (nervous, musculoskeletal, cardiovascular, gastrointestinal). Mathematical modeling and computer simulation of organ systems and physiologic control mechanisms. No credit for students who have earned credit for 3100. FALL. [3]

BME5131 - Systems Physiology

Title

Systems Physiology

Catalog Description

(Also listed as BME 2302) Quantitative physiology from the engineering point of view. Descriptive physiology of several organ systems (blood, immune, endocrine, respiratory, renal, reproductive). Mathematical modeling and computer simulation of organ systems and physiologic control mechanisms. No credit for students who have earned credit for 2002, 2302, or 3101. SPRING. [3]

BME5200 - Principles and Applications of BioMicroElectroMechanical Systems (BioMEMS)

Title

Principles and Applications of BioMicroElectroMechanical Systems (BioMEMS)

Catalog Description

(Also listed as BME 4200) The principles, design, fabrication and application of micro- and nano-devices to instrument and control biological molecules, living cells, and small organisms, with a strong emphasis on development of microfabricated systems and micro- and nano-biosensors. Students will lead discussions from the research literature. Graduate students will prepare a research proposal or fabricate a functioning BioMEMS device. No credit for students who have earned credit for 4200. FALL. [3]

BME5400 - Foundations of Medical Imaging

Title

Foundations of Medical Imaging

Catalog Description

(Also listed as BME 4400) Physics and engineering of image formation by different modalities used for medical applications. Concepts common to different imaging modalities and limits of physical phenomena. Mathematical concepts of image formation and analysis; techniques for recording images using ionizing radiation (including CT), ultrasound, magnetic resonance, and nuclear (including SPECT and PET). Methods of evaluating image quality. No credit for students who have earned credit for 4400. SPRING. [3]

BME5500 - Nanobiotechnology

Title

Nanobiotechnology

Catalog Description

(Also listed as BME 4500) Synthesis and characterization of nanostructured materials for use in living systems. Clinical applications of nanoscale biosensors. Methods for single molecule detection in biological specimens. Quantitative structure/function assessment of nanostructures in living systems. No credit for students who have earned credit for 4500. SPRING. [3]

BME5950 - Design of Biomedical Engineering Devices and Systems I

Title

Design of Biomedical Engineering Devices and Systems I

Catalog Description

(Also listed as BME 4950) Integration of the engineering and life science backgrounds of senior biomedical engineering students through the presentation of design principles for medical devices and systems. Design principles and case examples for biomedical electronics, mechanical, chemical, and computing systems are presented. A full-semester design project is required. Evaluation is conducted through periodic oral and written presentations, and through a final written and poster report. No credit for students who have earned credit for 4950. [2]

BME5951 - Design of Biomedical Engineering Devices and Systems II

Title

Design of Biomedical Engineering Devices and Systems II

Catalog Description

(Also listed as BME 4951) Integration of the engineering and life science backgrounds of senior biomedical engineering students through the presentation of design principles for medical devices and systems. Design principles and case examples for biomedical electronics, mechanical, chemical, and computing systems are presented. A full-semester design project is required. Evaluation is conducted through periodic oral and written presentations, and through a final written and poster report. No credit for students who have earned credit for 4951. [3]

BME6110 - Research and Professional Development in Biomedical Engineering

Title

Research and Professional Development in Biomedical Engineering

Catalog Description

Database search strategies, interpreting engineering and scientific literature, communication skills, engineering design, proposal writing, preparation of engineering publications, technology transfer/intellectual property, engineering laboratory documentation, regulatory oversight, ethics, funding. FALL. [3].

BME6301 - Engineering in Surgery and Intervention: Provocative Questions

Title

Engineering in Surgery and Intervention: Provocative Questions

Catalog Description

Explores engineering and clinical aspects of treating disease or disorders by clinically-driven provocative questions. Surgical/Interventional mechanics, locoregional therapies such as convection-enhanced delivery, neuromodulation, and ablation. Image-guided therapies, and role of discovery and design in context of treatment. SPRING. [3].

BME6302 - Engineering in Surgery and Intervention: Clinical Interactions

Title

Engineering in Surgery and Intervention: Clinical Interactions

Catalog Description

Literature review coupled with clinical immersion experience. Literature review centers on clinical translation of engineering research in surgical/interventional applications. Clinical immersion involves observing surgical/interventional procedures and attending clinical conferences. Prerequisite: Permission of Instructor. FALL. [3].

BME7110 - Laser-Tissue Interaction and Therapeutic Use of Lasers

Title

Laser-Tissue Interaction and Therapeutic Use of Lasers

Catalog Description

Optical and thermal aspects and models of the interaction between laser/light and biological tissue as it is used for therapeutic applications in medicine and biology. Issues and objectives in therapeutic and surgical applications of lasers, overview of state-of-the-art topics and current research. FALL. [3]

BME7120 - Optical Diagnosis: Principles and Applications

Title

Optical Diagnosis: Principles and Applications

Catalog Description

Applications of light and tissue optical properties for the diagnosis of tissue pathology. Basic scientific and engineering principles for developing techniques and devices that use light to probe cells and tissues. Recent applications of different optical diagnostic techniques. SPRING. [3]

BME7310 - Advanced Computational Modeling and Analysis in Biomedical Engineering

Title

Advanced Computational Modeling and Analysis in Biomedical Engineering

Catalog Description

Survey of current topics within biomedical modeling: biotransport, biomechanics, tumor and virus growth dynamics, model-based medical imaging techniques, etc. Mathematical development and analysis of biomedical simulations using advanced numerical techniques for the solution of ordinary and partial differential equations. Emphasis will be on graduate research related topics. SPRING. [3]

BME7410 - Quantitative Methods in Biomedical Engineering

Title

Quantitative Methods in Biomedical Engineering

Catalog Description

Mathematics, quantitative analysis, and computational methods for biomedical engineering applications. Topics include applied probability and statistics, signal analysis and experiment design, linear systems, Fourier transforms, and numerical modeling and analysis. FALL. [3]

BME7413 - Advanced Biomechanics

Title

Advanced Biomechanics

Catalog Description

Application of advanced concepts in statics, dynamics, continuum mechanics, and strength of materials to biological systems. Topics include measurement of mechanical properties of biological materials; rheological properties of blood; mechanics of cells, bone, skeletal muscle, and soft tissue; normal and abnormal dynamics of human movement; mechanics of articular joint movement; pulmonary mechanics; cardiac mechanics; arterial mechanics; mechanics of veins and collapsible vessels; and mechanics of flow in the microcirculation. Prerequisite: BME 2100, BME 3000 or equivalent. [3]

BME7419 - Engineering Models of Cellular Phenomena

Title

Engineering Models of Cellular Phenomena

Catalog Description

Application of engineering methods to model and quantify aspects of cell physiology. Topics include receptor mediated cell processes, cell-cell signaling, cooperative barrier behavior, cell structural components, and cell motility. SPRING. [3] (Offered alternate years)

BME7420 - Magnetic Resonance Imaging Methods

Title

Magnetic Resonance Imaging Methods

Catalog Description

MR techniques to image tissue for clinical evaluation and research. RF pulses, k-space trajectories, chemical shift, motion, flow, and relaxation. Derivation of signal equations for pulse sequence design and analysis. Course includes hands-on experimental studies. SPRING. [3]

BME7425 - Physical Measurements on Biological Systems

Title

Physical Measurements on Biological Systems

Catalog Description

A survey of the state-of-the-art in quantitative physical measurement techniques applied to cellular or molecular physiology. Topics include the basis for generation, measurement, and control of the transmembrane potential; electrochemical instrumentation; optical spectroscopy and imaging; x-ray diffraction for determination of macromolecular structure; magnetic resonance spectroscopy and imaging. Prerequisite: PHYS 2250. SPRING. [3]

BME7430 - Cancer Imaging

Title

Cancer Imaging

Catalog Description

Applications of noninvasive, in vivo imaging (i.e., MRI, optical, CT, SPECT, PET, and ultrasound) to cancer biology. Emphasis on assessing the response of tumors to treatment using emerging and quantitative imaging techniques. Prerequisites: BME 4400 or PHYS 2805. SPRING. (Offered alternate years) [3]

BME7440 - Neuroimaging

Title

Neuroimaging

Catalog Description

Applications of noninvasive imaging techniques including MRI, fMRI, optical, EEG, and PET to the study of neural systems. Emphasis on the human brain, with a focus on current scientific literature. Prerequisites: BME 4400 or PHYS 2805. FALL. (Offered alternate years) [3]

BME7450 - Advanced Quantitative and Functional Imaging

Title

Advanced Quantitative and Functional Imaging

Catalog Description

Analysis of non-invasive imaging techniques to assess the structure and function of tissues in the body. Applications of computed tomography, positron emission tomography, ultrasound, and magnetic resonance imaging to tissue characterization, including measurement of tissue volume, microstructure, organ perfusion, blood flow, brain function, and receptor density. Prerequisite: working knowledge of MATLAB. FALL. [3]

BME7473 - Design of Medical Products, Processes, and Services

Title

Design of Medical Products, Processes, and Services

Catalog Description

Medical design projects involving teams of graduate level engineering and management students. Projects are solicited from industry or universities and are undertaken from the initial phase of a design request to the end product, prototype, plan, or feasibility analysis. Prerequisite: BME 4950 or equivalent. SPRING. [3]

BME7500 - Independent Study in Biomedical Engineering

Title

Independent Study in Biomedical Engineering

Catalog Description

Study of advanced biomedical engineering topics not regularly offered in the curriculum. Consent of instructor is required. FALL, SPRING. [3]

BME7999 - Master's Thesis Research

Title

Master's Thesis Research

Biomedical Informatics (GS)

BMIF6300 - Foundations Of Biomedical Informatics

Title

Foundations Of Biomedical Informatics

Catalog Description

This introductory course examines the unique characteristics of clinical and life science data and the methods for representation and transformation of health data, information, and knowledge to improve health care. Principles of information security and confidentiality are taught, along with functional components of information systems in clinical settings and the use of databases for outcome management. Through skill modules and weekly programming exercises, the course provides an introduction to methods underlying many biomedical informatics applications, including information retrieval, medical decision making, evaluation of evidence, and knowledge representation. The historical evaluation of the field of biomedical informatics is taught concurrently, using examples of landmark systems developed by pioneers in the field. FALL. [3] Ancker

BMIF6310 - Foundations Of Bioinformatics

Title

Foundations Of Bioinformatics

Catalog Description

This survey course introduces students to the experimental context and implementation of key algorithms in bioinformatics. The class begins with a review of basic biochemistry and molecular biology. The group will then focus on algorithms for matching and aligning biological sequences, given the context of molecular evolution. The emphasis will move from comparing sequences to the systems developed to enable high-throughput DNA sequencing, genome assembly, and gene annotation. Gene products will be the next focus as students consider the algorithms supporting proteomic mass spectrometry and protein structure inference and prediction. The informatics associated with transcriptional microarrays for genome-wide association studies will follow. Finally, the class will examine biological networks, including genetic regulatory networks, gene ontologies, and data integration. Formal training in software development is helpful but not required. Students will write and present individual projects. Undergraduates need the permission of the instructor to enroll. FALL. [3] Lopez.

BMIF6315 - Methodological Foundations Of Biomedical Informatics

Title

Methodological Foundations Of Biomedical Informatics

Catalog Description

In this course, students will develop foundational concepts of computation and analytical thinking that are instrumental in solving challenging problems in biomedical informatics. The course will use lectures and projects directed by co-instructors and guest lecturers. SPRING. [3] D. Giuse, Davis.

BMIF6321 - Scientific Communication

Title

Scientific Communication

Catalog Description

The course will enhance students' skills in written and oral scientific communication. An introductory segment covers categories of scientific writing, the peer review process, and ethical issues in research communication. Through a two-semester sequence, it provides direct, hands-on experience in writing papers, abstracts, and grant proposals; critiquing and copy editing; and preparing and giving presentations for scientific meetings. FALL, SPRING. [1-1] Rosenbloom, Davis.

BMIF6322 - Scientific Communication

Title

Scientific Communication

Catalog Description

The course will enhance students' skills in written and oral scientific communication. An introductory segment covers categories of scientific writing, the peer review process, and ethical issues in research communication. Through a two-semester sequence, it provides direct, hands-on experience in writing papers, abstracts, and grant proposals; critiquing and copy editing; and preparing and giving presentations for scientific meetings. FALL, SPRING. [1-1] .Rosenbloom, Davis.

BMIF6331 - Student Journal Club and Research Colloquium

Title

Student Journal Club and Research Colloquium

Catalog Description

The class meets weekly and is a seminar course that involves two revolving formats: journal club presentations and student research in progress presentations. For Biomedical Informatics graduate students only, usually taken in the second year of the program. Fall [1] Carroll.

BMIF6332 - Student Journal Club and Research Colloquium

Title

Student Journal Club and Research Colloquium

Catalog Description

The class meets weekly and is a seminar course that involves two revolving formats: journal club presentations and student research in progress presentations. For Biomedical Informatics graduate students only, usually taken in the second year of the program. Spring [1] Carroll.

BMIF6341 - Research Rotation In Biomedical Informatics

Title

Research Rotation In Biomedical Informatics

Catalog Description

Students will perform research under the direction of a faculty adviser. FALL. [1-1] Staff.

BMIF6342 - Research Rotation In Biomedical Informatics

Title

Research Rotation In Biomedical Informatics

Catalog Description

Students will perform research under the direction of a faculty adviser. SPRING. [1-1] Staff.

BMIF6390 - Special Topics

Title

Special Topics

Catalog Description

Selected topics in Biomedical Informatics. [3]

BMIF7320 - Healthcare System and Informatics

Title

Healthcare System and Informatics

Catalog Description

The purpose of this course is for students to understand the organizational world in which they will spend most of their professional lives. A better understanding will lead to strategies to build partnerships with physicians, researchers, hospitals, and academic organizations. In turn, better understanding will lead to working more closely as a team in planning future directions and implementing technological programs and changes. This course provides an overview of theoretical concepts as well as the practical tools for the student to understand and work effectively with two major topic areas: (1) understanding the health care environment; and (2) understanding organizational informatics, including the implementation of informatics systems and the concepts of behavioral change management. Prerequisite: BMIF 6300 is a required prerequisite to this course. SPRING. [3] Lorenzi.

BMIF7340 - Clinical Informatics

Title

Clinical Informatics

Catalog Description

Clinical informatics is the subdiscipline of biomedical informatics focused on clinical applications, particularly clinical information systems such as electronic health records. Topics covered include inpatient, outpatient and departmental information systems; clinical decision support; terminology and data standards; quality and safety; patient computing; population health; and innovation, governance, and leadership. The course broadly explores how information systems and informatics principles are applied in clinical settings and is intended to be useful to students interested in these application areas, including students with a clinical background or those new to the clinical environment. Prerequisite: BMIF 6315 or permission of instructors. SPRING. [3] Wright, McCoy

BMIF7350 - Technology and Society

Title

Technology and Society

Catalog Description

This course engages students in discovering relationships among individuals, institutions, and technologies, and how those relationships evolved in specific cultural contexts. Students and instructors will explore this topic in four modules: 1) understanding health care actors and technologies; 2) institutions and other infrastructures, including scientific disciplines, government, and information infrastructures; 3) principles of ethics and their application in biomedical informatics research and practice; and 4) integration of the concepts. The course will be conducted as a seminar, in which students and instructors will discuss assigned readings and films. Each student will present a final case to the group. FALL [3] Novak

BMIF7370 - Evaluation Methods In Biomedical Informatics

Title

Evaluation Methods In Biomedical Informatics

Catalog Description

Students are introduced to health information technology evaluation, with exposure to study design, including sampling, appropriate use of controls; data collection, including human subjects research considerations; analysis, including testing for statistical significance, definitions of sensitivity and specificity, ROC plots; and reporting of results. Quantitative and qualitative methods will be covered, as well as methods and issues specific to health care settings. FALL. [3] Peterson, Unertl.

BMIF7380 - Data Privacy In Biomedicine

Title

Data Privacy In Biomedicine

Catalog Description

This course introduces students to concepts for evaluating and constructing technologies that protect personal privacy in data collected for primary care and biomedical research. Material in this course touches on topics in biomedical knowledge modeling, data mining, policy design, and law. Prerequisite: students are expected to be proficient in writing basic software programs, although no specific programming language is required. SPRING. [3] Malin.

BMIF7390 - Special Topics: Error and Safety Critical Systems

Title

Special Topics: Error and Safety Critical Systems

Catalog Description

This case study based course will look at errors in safety critical systems, including healthcare and aviation. It will explore errors from multiple perspectives, specifically computer science and systems engineering. [3]

BMIF7391 - Special Topics Seminar In Biomedical Informatics

Title

Special Topics Seminar In Biomedical Informatics

Catalog Description

This course is designed for faculty to offer small groups of students a study course on a topic of mutual interest and concern in the faculty member's area of expertise.

BMIF7395 - Directed Research/Independent Study

Title

Directed Research/Independent Study

Catalog Description

Students will work under close supervision of a specific faculty member on an ongoing research problem. Depending on the specific project, students will learn aspects of study design, research methods, data collection and analysis, research manuscript writing, and human factors engineering. Completion of Course Plan and approval of the Director of Graduate Studies is required. SPRING/FALL. [1-3] Staff.

BMIF7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

Master's Thesis Research

BMIF8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

BMIF9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Biomedical Sciences

BMS7001 - Scientific Communication in the Biomedical Sciences

Title

Scientific Communication in the Biomedical Sciences

Catalog Description

Weekly reading assignments will be accompanied by writing assignments in which students will communicate their own life lessons in the context of assigned readings. A goal will be for each student to define personal motivation to pursue careers in the biomedical sciences. [1]

BMS7002 - Critical Thinking in the Biomedical Sciences

Title

Critical Thinking in the Biomedical Sciences

Catalog Description

Reading and critical analysis of primary scientific literature. [1-3]

BMS8002 - Narrative-based Healthcare

Title

Narrative-based Healthcare

Catalog Description

In this seminar, both classical and contemporary illness narratives are examined as a way to better understand the doctor-patient relationship. Readings are assigned to discuss each week and range from stories by Anton Chekhov to articles from the New England Journal of Medicine to illness narratives written by patients and providers. The primary text is Narrative Medicine (Oxford University Press) by Rita Charon. To understand multidisciplinary care, we will reach beyond the doctor-patient relationship to a broad range of care providers including nurses, dentists, pharmacists, and therapists, among others. Full realization of narrative medicine crosses the disciplines of medicine and the humanities to include issues of bioethics, cultural competency, spirituality, and social determinants of health. To better understand the doctor-patient relationship, each student writes a journal of someone they have known with illness. Writing is a crucial component of the class as each student writes two papers in addition to their journal. Selected videos will be used to portray the strengths and weaknesses of the doctor-patient relationship. Role play exercises allow the students to experience the perspective of both provider and patient. The format of this course is a seminar. As such, class participation is paramount for each student. [3]

BMS8003 - Service Learning in the Biomedical Sciences

Title

Service Learning in the Biomedical Sciences

Catalog Description

This course structures opportunities for students in the MS Program in the Biomedical Sciences to participate in service/learning experiences in the Nashville area. Students will arrange activities that complement medical school applications. The course will be one credit hour, offered every semester. At the end of each semester, students will need to write a paper describing their experiences and give an oral presentation to the course director. Dr. James G. Patton will serve as instructor/course director. [1]

Biostatistics

BIOS6301 - Introduction To Statistical Computing

Title

Introduction To Statistical Computing

Catalog Description

This course is designed for students who seek to develop skills in statistical computing. Students will learn how to use R and STATA for data management, database querying, reporting generating, data presentation, and data tabulation and summarization. Topics will include organization and documentation of data, input and export of data sets, methods of cleaning data, tabulation and graphing of data, programming capabilities, and an introduction to simulations and bootstrapping. Students will also be introduced to LaTeX and Sweave for report writing. Students will also be briefly introduced to SAS and SQL programming. FALL. [2] Staff.

BIOS6306 - Introduction to Study Design

Title

Introduction to Study Design

Catalog Description

This course will introduce principles of study design in medical and health statistics. The designs considered will be case series, ecologic studies, matched and unmatched case-control studies, observational cohort studies, historically controlled clinical trials, screening trials and randomized clinical trials. The goal is to introduce critical design challenges that ultimately impact the ability to make statistical inferences from observed samples to the target populations. Concepts such as internal and external validity, bias identification and control, confounding and effect modification will be discussed and illustrated with examples from the medical literature. The dependence of traditional univariate measures of statistical association (absolute risk, relative risk and odds ratios) on critical design elements will be highlighted. Statistical evaluation of diagnostic tests will also be introduced along with a brief introduction to causal inference. Permission of instructor required. Prerequisite: Access to STATA statistical software. Fall. [3] Dupont

BIOS6311 - Principles Of Modern Biostatistics

Title

Principles Of Modern Biostatistics

Catalog Description

This is the first in a two-course series designed for students who seek to develop skills in modern biostatistical reasoning and data analysis. Students learn the statistical principles that govern the analysis of data in the health sciences and biomedical research. Traditional probabilistic concepts and modern computational techniques will be integrated with applied examples from biomedical and health sciences. Statistical computing uses software packages STATA and R; prior familiarity with these packages is helpful but not required. Topics include: types of data, tabulation of data, methods of exploring and presenting data, graphing techniques (boxplots, q-q plots, histograms), indirect and direct standardization of rates, axioms of probability, probability distributions and their moments, properties of estimators, the Law of Large numbers, the Central Limit Theorem, theory of confidence intervals and hypothesis testing (one sample and two sample problems), paradigms of statistical inference (Frequentist, Bayesian, Likelihood), introduction to non-parametric techniques, bootstrapping and simulation, sample size calculations and basic study design issues. One hour lab required; Students are required to take 6311L concurrently. Prerequisite: Calculus I. FALL. [3] Vandekar.

BIOS6311L - Principles Of Modern Biostatistics Lab

Title

Principles Of Modern Biostatistics Lab

Catalog Description

This is a discussion section/lab for Principles of Modern Biostatistics. Students will review relevant theory and work on applications as a group. Computing solutions and extensions will be emphasized. Students are required to take 6311 concurrently. FALL. [1] Vandekar.

BIOS6312 - Modern Regression Analysis

Title

Modern Regression Analysis

Catalog Description

This is the second in a two-course series designed for students who seek to develop skills in modern biostatistical reasoning and data analysis. Students learn modern regression analysis and modeling building techniques from an applied perspective. Theoretical principles will be demonstrated with real- world examples from biomedical studies. This course requires substantial statistical computing in software packages STATA and R; familiarity with at least one of these packages is required. The course covers regression modeling for continuous outcomes, including simple linear regression, multiple linear regression, and analysis of variance with one-way, two-way, three-way, and analysis of covariance models. This is a brief introduction to models for binary outcomes (logistic models), ordinal outcomes (proportional odds models), count outcomes (poisson/negative binomial models), and time to event outcomes (Kaplan-Meier curves, Cox proportional hazard modeling). Incorporated into the presentation of these models are subtopic topics such as regression diagnostics, nonparametric regression, splines, data reduction techniques, model validation, parametric bootstrapping, and a very brief introduction to methods for handling missing data. One hour lab required. Students are required to take 6312L concurrently. Prerequisite: Biostatistics 6311 or equivalent; familiarity with STATA and R software packages. SPRING. [3] Spieker.

BIOS6312L - Modern Regression Analysis Lab

Title

Modern Regression Analysis Lab

Catalog Description

This is a discussion section/lab for Modern Regression Analysis. Students will review relevant theory and work on applications as a group. Computing solutions and extensions will be emphasized. Students are required to take 6312 concurrently. SPRING. [1]

BIOS6321 - Clinical Trials and Experimental Design

Title

Clinical Trials and Experimental Design

Catalog Description

This course covers the statistical aspects of study designs, monitoring and analysis. Emphasis is on studies of human subjects, i.e. clinical trials. Topics include: principles of measurement, selection of endpoints, bias, masking, randomization and balance, blocking, study designs, sample size projections, study conduct, interim monitoring of accumulating results, flexible and adaptive designs, sequential analysis, analysis principles, adjustment techniques, compliance, data and safety monitoring boards (DSMB), Institutional Review Boards (IRB), the ethics of animal and human subject experimentation, history of clinical trials, and the Belmont report. [3] Yu

BIOS6341 - Fundamentals of Probability

Title

Fundamentals of Probability

Catalog Description

The first in a two-course series (6341 - 6342), Fundamentals of Probability introduces and explores the probabilistic framework underlying statistical theory. Students learn probability theory -- the formal language of uncertainty -- and its application to everyday statistical concepts and analysis methods. Students will validate analytical solutions and explore limit theorems using R software. This course covers probability axioms, probability and sample space, events and random variables, transformation of random variables, probability inequalities, independence, discrete and continuous distributions, expectations and variances, conditional expectation, moment generating functions, random vectors, convergence concepts (in probability, in law, almost surely), Central Limit Theorem, weak and strong Law of Large Numbers, extreme value distributions, order statistics and exponential family. (Hackstadt) Fall [3]

BIOS6341L - Fundamentals of Probability Lab

Title

Fundamentals of Probability Lab

Catalog Description

This is a discussion section/lab for Fundamentals of Probability. Students will review relevant theory and work on applications as a group. Computing solutions and extensions will be emphasized. Students are required to take 6341 concurrently. [1]

BIOS6342 - Contemporary Statistical Inference

Title

Contemporary Statistical Inference

Catalog Description

The second in a two-course series (6341 - 6342), Contemporary Statistical Inference introduces and explores the fundamental inferential framework for parameter estimation, testing hypotheses, and interval estimation. Students learn classical methods of inference (hypothesis testing), and modes of inference (Frequentist, Bayesian and Likelihood approaches) and their surrounding controversies. Topics include: delta method, sufficiency, minimal sufficiency, exponential family, ancillarity, completeness, conditionality principle, Fisher's Information, Cramer-Rao inequality, hypothesis testing (likelihood ratios test, most powerful test, optimality, Neyman-Pearson lemma, inversion of test statistics), Likelihood principle, Law of Likelihood, Bayesian posterior estimation, Interval estimation (confidence intervals, support intervals, credible intervals), basic asymptotic and large sample theory, maximum likelihood estimation, resampling techniques (e.g., bootstrap). [3] Blume

BIOS6342L - Contemporary Statistical Inference Lab
Title

Contemporary Statistical Inference Lab

Catalog Description

This is a discussion section/lab for Contemporary Statistical Inference. Students will review relevant theory and work on applications as a group. Computing solutions and extensions will be emphasized. Students are required to take 6342 concurrently. [1]

BIOS7323 - Applied Survival Analysis
Title

Applied Survival Analysis

Catalog Description

This course provides an applied introduction to methods for time-to-event data with censoring mechanisms. Topics include: life tables, nonparametric approaches (e.g., Kaplan-Meier, log-rank), semi-parametric approaches (e.g., Cox model), parametric approaches (e.g., Weibull, gamma, frailty) competing Risks (introduce Poisson regression as connection to Cox model), and time-dependent covariates. Focus is on fitting the models and the relevance of those models for the biomedical application. [3] Chen

BIOS7323L - Applied Survival Analysis Lab
Title

Applied Survival Analysis Lab

Catalog Description

This is a discussion section/lab for Applied Survival Analysis. Students will review relevant theory and work on applications as a group. Computing solutions and extensions will be emphasized. Students are required to take 7323 concurrently. [1] Fall

BIOS7330 - Regression Modeling Strategies
Title

Regression Modeling Strategies

Catalog Description

The course presents strategies for, and a survey of current thinking on, building predictive models. Multivariable predictive modeling for a single response variable: using regression splines to relax linearity assumptions, perils of variable selection and over-fitting, where to spend degrees of freedom, shrinkage, imputation of missing data, data reduction, and interaction surfaces. Methods for graphically understanding models (e.g., using nomograms) and using resampling to estimate a model's likely performance on new data. Statistical methods related to binary logistic models and ordinal logistic and survival models will be covered. Students will develop, validate, and graphically describe multivariable regression models. Prerequisite: BIOS 6311 and 6312 or permission [3] Spring. Harrell.

BIOS7345 - Advanced Regression Analysis I (Linear and General Linear Models)

Title

Advanced Regression Analysis I (Linear and General Linear Models)

Catalog Description

Students are exposed to a theoretical framework for linear and generalized models. First half of the semester covers linear models: multivariate normal theory, least squares estimation, limiting chi-square and F-distributions, sum of squares (partial, sequential) and expected sum of squares, weighted least squares, orthogonality, Analysis of Variance (ANOVA). Second half of the semester focuses on generalized linear models: binomial, Poisson, multinomial errors, introduction to categorical data analysis, conditional likelihoods, quasi-likelihoods, model checking, matched pair designs. BIOS 6341 and 6342 are prerequisites for this course. [3] Kang

BIOS7345L - Adv Regression Analysis I Lab

Title

Adv Regression Analysis I Lab

Catalog Description

This is a discussion section/lab for Advanced Regression Analysis. Students will review relevant theory and work on applications as a group. Computing solutions and extension will be emphasized. BIOS 6341 and 6342 are prerequisites for this course. Students are required to take 7345 concurrently. Fall. [1]

BIOS7346 - Advanced Regression Analysis II (General Linear & Longitudinal Models)

Title

Advanced Regression Analysis II (General Linear & Longitudinal Models)

Catalog Description

Second in a yearlong series, students are exposed to a theoretical framework for generalized linear and longitudinal models. Covers classic repeated measures models, random effect models, generalized estimating equations (GEEs), Hierarchical models, and transitional models for binary data, marginal vs. mixed effects models, model fitting, model checking, clustering, and implication for study design. Also includes discussion of missing data techniques, Bayesian and Likelihood methods for GLMs, and various fitting algorithms such as maximum likelihood and generalized least squares. Prerequisite: BIOS 7345 [3] Spring. Schildcrout.

BIOS7346L - Advanced Regression Analysis II Lab

Title

Advanced Regression Analysis II Lab

Catalog Description

This is a discussion lab for Advanced Regression Analysis II. Students will review relevant theory and work on applications as a group. Computing solutions and extensions will be emphasized. Students are required to take BIOS 7346 concurrently. [1] Fall. Schildcrout.

BIOS7351 - Statistical Collaboration in Health Sciences I
Title

Statistical Collaboration in Health Sciences I

Catalog Description

First course of two on collaboration in statistical science. Students are exposed to a variety of problems that arise in collaborative arrangements. The course's goal is to sharpen students' consulting skills while exposing them to the application of advanced statistical techniques in routine health science applications. The importance of understanding and learning the science underlying collaborations will be emphasized. Students will role-play with real investigators, discuss real consulting projects that have gone awry, and face real-life problems such as opaque scientific direction, poor scientific formulation, lack of time, and ill-formulated messy data. Students will engage in several consulting projects that will involve the use of a wide range of biostatistics methods from design to analysis. Course content will also make use of departmental clinics that are run concurrently. [3] Davidson

BIOS7352 - Statistical Collaboration in Health Sciences II
Title

Statistical Collaboration in Health Sciences II

Catalog Description

Second course of a yearlong sequence in collaboration in statistical science. Students are exposed to a variety of problems that arise in collaborative arrangements. The course's goal is to sharpen students' consulting skills while exposing them to the application of advanced statistical techniques in routine health science applications. The importance of understanding and learning the science underlying collaborations will be emphasized. Students will role-play with real investigators, discuss real consulting projects that have gone awry, and face real-life problems such as opaque scientific direction, poor scientific formulation, lack of time, and ill-formulated messy data. Students will engage in several consulting projects that will involve the use of a wide range of biostatistics methods from design to analysis. Course content will also make use of departmental clinics that are run concurrently. Prerequisite: BIOS 7351 [3] Fall. Liu.

BIOS7361 - Advanced Concepts in Probability and Real Analysis for Biostatisticians
Title

Advanced Concepts in Probability and Real Analysis for Biostatisticians

Catalog Description

To include characteristic functions, modes of converge, uniform integrability, Brownian motion, classical limit theorems, L_p spaces, projections, sigma-algebras and RVs, martingales, random walks, Markov chains, probabilistic asymptotics. Emphasis on measure theory is minimal. Concepts are illustrated in biomedical applications whenever possible. [3] Johnson

BIOS7362 - Advanced Statistical Learning and Inference
Title

Advanced Statistical Learning and Inference

Catalog Description

This course is an in-depth examination of modern inferential tools. Topics include High-order asymptotics, Edgeworth expansions, nonparametric statistics, quasi-likelihood and estimating equations theory, multivariate classification methods, re-sampling techniques, statistical learning, methods and theory of high-dimensional data, estimation-maximization (EM) algorithms, and Gibbs sampling. Concepts are illustrated in biomedical applications whenever possible. [3]; Spring; Shotwell.

BIOS7362L - Advanced Statistical Learning and Inference
Title

Advanced Statistical Learning and Inference

Catalog Description

This is a discussion section/lab for Advanced Statistical Inference. Students will review relevant theory and work on applications as a group. Students are required to take 7362 concurrently. [1] Spring. Shotwell.

BIOS7393 - Independent Study in Biostatistics

Title

Independent Study in Biostatistics

Catalog Description

Designed to allow the student to explore and/or master advanced or specialized topics in Biostatistics under the guidance of faculty with relevant expertise. May be repeated. [1-3]

BIOS7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

Master's Thesis Research [0-12]

BIOS8366 - Advanced Statistical Computing

Title

Advanced Statistical Computing

Catalog Description

Course covers numerical optimization, Markov Chain Monte Carlo (MCMC) estimation-maximization (EM), algorithms, Gaussian processes, Hamiltonian Monte Carlo, and data augmentation algorithms with applications for model fitting and techniques for dealing with missing data. Prerequisite: BIOS 6341 and BIOS 6342 or permission of instructor. FALL [3] Fannesbeck.

BIOS8370 - Foundations of Statistical Inference

Title

Foundations of Statistical Inference

Catalog Description

Examines the foundations of statistical inference as viewed from Frequentist, Bayesian, and Likelihood approaches. Famous papers and controversies are discussed along with statistical theories of evidence and decision theory, and their historic significance. [3] Spring (Blume)

BIOS8372 - Bayesian Methods

Title

Bayesian Methods

Catalog Description

This course covers the methodology and rationale for Bayesian methods and their applications. Statistical topics include the historical development of Bayesian method such as hierarchical models, Markov Chain Monte Carlo (MCMC) and related sampling methods, specification of priors, sensitivity analysis, and model checking and comparison. This course features applications of Bayesian methods to biomedical research. Prerequisites: BIOS 6301, BIOS 6312, BIOS 7330, BIOS 6341, BIOS 6342 and BIOS 7345, or equivalent; for non-biostatistics students, permission required. FALL [3] Choi.

BIOS8375 - Causal Inference

Title

Causal Inference

Catalog Description

This course provides an introduction to causal inference methods for observational data and randomized studies. Topics include the Rubin causal model, directed acyclic graphs, propensity scores, inverse probability weighting, instrumental variables, causal mediation analysis, marginal structural models, g-computation, and sensitivity analyses to examine robustness to untestable assumptions. Students will learn the basic theory behind the methods and will apply them to biomedical data examples. Prerequisites: 6341, 6342, 7323, and 7346 or approval by the instructor. Spring. [3] (Shepherd)

BIOS8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

BIOS9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Business-Arts&Science

BUSA5700 - Investment Analysis

Title

Investment Analysis

Catalog Description

(Previously FNEC 5700) Investment principles and practices. Security analysis and valuation. Portfolio theory. Current issues in the financial sector. Stock market simulation. No credit for students who have earned credit for 3700. [3]

BUSA5705 - Financial Management
Title

Financial Management

Catalog Description

(Previously FNEC 5705) Analysis of cases representing capital budgeting, forecasting cash flow, risk assessment, capital structure, mergers and acquisitions. Seminar. No credit for students who have earned credit for 3705. [3]

Cancer Biology (GS)

CANB7999 - Master's Thesis Research
Title

Master's Thesis Research

Catalog Description

Master's Thesis Research

CANB8311 - Contemporary Technologies and Approaches
Title

Contemporary Technologies and Approaches

Catalog Description

This is a graduate-level course to provide knowledge of cutting edge techniques and approaches critical for contemporary cellular and molecular biology. Lectures are presented from faculty from multiple departments and cores across the Vanderbilt campus. Topics include proteomics, genomics, microscopy, stem cell biology, single-cell technology, drug discovery and model organisms and organoids Prerequisite: Bioregulation classes. SPRING [1]. Chiang

CANB8320 - Cancer And Development
Title

Cancer And Development

Catalog Description

A cross-listed CDB/CB graduate-level course that will examine relationships between cellular responses in normal tissue development and cancer. The goal of the course is to familiarize the students with major cellular pathways and responses that are regulated in normal embryonic and post-natal tissue development and how abnormal re-activation of these responses gives rise to malignant disease. SPRING. [3] deCaestecker.

CANB8326 - Cancer Biology Grant Writing
Title

Cancer Biology Grant Writing

Catalog Description

This self-guided course provides applied training in grant writing for students in their first year in the Cancer Biology program, second overall year in graduate school. Students will write an NRSA proposal and are assigned two faculty reviewers who will provide feedback in at least three meetings. Input from the mentor is essential but needs to be limited to verbal discussions with the student. The proposal will be written and submitted to the reviewers in stages, with three required face-to-face meetings. Passing of the course depends on the final quality of the proposal, the ability of the student to incorporate suggestions and to respond to criticism, and the adherence to deadlines laid out by the course director at the beginning of the course. Course Directors: Christine Konradi, Ph.D., Jin Chen, M.D., Ph.D., and Ann Richmond, Ph.D. SPRING. [1]

CANB8340 - Introduction To Cancer Biology

Title

Introduction To Cancer Biology

Catalog Description

This is a didactic lecture series in which general concepts in cancer biology will be reviewed. Topics range from molecular biology of cancer (oncogene and tumor suppressors) to novel concepts such as cancer stem cells and therapeutic approaches. Prerequisite: IGP core course or consent of instructor. FALL [2] Yull.

CANB8342 - Advanced Concepts In Cancer Biology

Title

Advanced Concepts In Cancer Biology

Catalog Description

Advanced concepts in cancer biology will be reviewed in depth using a combination of lectures and student-led discussion sessions based on current literature. This course is offered only in tandem with the Introduction to Cancer Biology course to be taken concurrently. Prerequisite: must be a Cancer Biology graduate student or have consent of instructor. FALL. [4] Fingleton.

CANB8344 - Cancer Immunotherapy

Title

Cancer Immunotherapy

Catalog Description

(Also listed as a module in IGP). The extraordinary rise of Cancer Immunotherapy is used as a platform to examine the past, current and future implications of this rapidly growing discipline. The team taught course combines didactic lecture with key literature assignments aimed at providing not only an understanding of the current immunotherapy landscape, but also an important sense of perspective. The first half of the course covers basic concepts in adaptive and innate immunology, and cancer, needed to read and understand the literature. The second half is based on recent landmark literature in "Cancer Immunotherapy". Instructor presentations aimed at addressing overarching concepts will be coordinated with student-presentations of key papers. Reynolds, Wilson, Joyce. [2]

CANB8347 - Cancer Systems Biology

Title

Cancer Systems Biology

Catalog Description

This course introduces students to the field of Cancer Systems Biology, which aims to frame cancer as a complex biological system through multidisciplinary approaches linking biology, engineering, and computer science. It is designed to teach students how to apply "systems thinking" to the analysis and modeling of fundamental questions in cancer research. The course will provide an overview of basic concepts in systems biology, including complexity, systems dynamics, networks, evolution and game theory. A survey of mathematical, statistical and computational tools will empower students to apply these concepts to concrete cancer biology projects. Examples of class activities include: construction of gene or signaling networks using literature-based knowledge and existing databases; visualization of multidimensional data; and, basic programming workshops. There will be strong emphasis on designing "systems" experiments and interpreting results in a modern cancer research laboratory. [3] Quaranta

CANB8351 - Teaching Assistantship in Cancer Biology Curriculum

Title

Teaching Assistantship in Cancer Biology Curriculum

Catalog Description

Enrollees in the course will act as teaching assistants for one of the Cancer Biology courses (8340 or 8342 in Fall; 8347 or 8384 in spring) with a maximum of 16 hours class contact time. All enrollees will be also required to participate in a monthly journal club for that semester devoted to teaching methods in STEM subjects; and to work with course directors on evaluations. Prerequisites: CANB 8340 and CANB 8342, Ph.D. candidacy. [1] Fingleton.

CANB8384 - Precision Cancer Medicine

Title

Precision Cancer Medicine

Catalog Description

Precision medicine is the tailoring of patient therapy based on pharmacogenetic biomarkers that predict the likelihood of drug response or risk of adverse events, and highlights the importance of foundational science translation in improving patient outcomes. Although precision medicine can be applied to a number of diseases, oncology, arguably, sits at the forefront. Over the last decade, there has been an increase in the understanding of cancer molecular drivers and based on this information, gene mutation-specific inhibitors have been successfully used in the clinic that target only sub-populations of patients with particular tumor genotypes. As a result, there is a need for oncologists to have an appreciation of the fundamental molecular biology underlying the patient's tumor to effectively translate tumor genotype to precision patient care. This course will provide a unique experience in oncology where medical and graduate students work together to explore the molecular drivers of cancer and how that information is translated into targeted cancer therapies. Foundational science topics will include anatomy, physiology, histology, biochemistry, cell biology, genetics, molecular biology, immunology, pathology, radiobiology, and toxicology. Students will explore the concepts of oncogene addiction, acquired resistance to targeted therapy, immunotherapy, tumor heterogeneity, drug discovery, genetic screening and counseling, molecular diagnostics, and cancer clinical trials through online modules, seminars, team-based learning, and case-based learning activities. The information learned will be used as a platform to describe how molecular changes are detected in the laboratory and leveraged in the clinic for personalized patient care. Students will examine the multidisciplinary teams necessary in the care of cancer patients and the benefits of and challenges that precision medicine offers to oncologists through participation in individualized clinical experiences and tumor boards. Students will also have the ability to pursue their own interests in oncology through student-led presentations on a topic of their choice. [2] Dahlman

CANB8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

CANB9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

CBIO-GS8310 - Effective Scientific Communication

Title

Effective Scientific Communication

Catalog Description

This is a graduate-level course with two major goals pivotal for success as a scientist: (1) To learn effective scientific written and oral communication (2) To learn effective grant writing and reviewing. The class features lectures and workshops with faculty from the Department of Cell and Developmental Biology and other departments. The course is divided into three sections: (1) Instruction on scientific writing, rigor and reproducibility, experimental design, manuscript preparation, and practical statistics (2) Grant Writing and Reviewing. Proposals written by the students on a topic related to their research interests will be discussed by the class in writing workshops and feedback sessions and reviewed by their fellow students at a mock study section (3) Student Presentations. Students will prepare and present lectures related to their research interests. Prerequisite: Bioregulation classes. [3] Weaver and Burkewitz.

CBIO-GS8311 - Contemporary Technologies and Approaches

Title

Contemporary Technologies and Approaches

Catalog Description

This is a graduate-level course to provide knowledge of cutting- edge techniques and approaches critical for contemporary cellular and molecular biology. Lectures are presented from faculty from multiple departments and cores across the Vanderbilt campus. Topics include proteomics, genomics, microscopy, stem cell biology, single cell technology, drug discovery and model organisms and organoids. Prerequisite: Bioregulation classes. [1] Chiang.

CBIO-GS8312 - Introduction to Developmental Biology

Title

Introduction to Developmental Biology

Catalog Description

This combined lecture and laboratory course, informally called "Boot Camp," will present students with the basics in the analysis of standard animal models used in modern developmental biology. Central concepts in development will be presented in lecture while the student will gain "hands on" training in the growth and care of embryos and analysis of embryonic development in model organisms. Standard methods of analysis (e.g. basic microscopy/morphological analysis, immunolabeling, time-lapse imaging, embryo microinjection) will be presented. Prerequisite: IGP Curriculum. Summer Session. [3] Ihrie.

CBIO-GS8313 - Introduction to Modern Biological Microscopy

Title

Introduction to Modern Biological Microscopy

Catalog Description

This lecture course will provide students an introduction to modern microscopy and its biological applications. Topics will include diverse methods of light and electron microscopy, the basic principles of each method, details of specific instrumentation, historical background, advantages and restrictions, as well as applicability to various model systems and organisms. Sample preparation, technical hurdles, tricks of live imaging, micro- and nanomanipulation, quantitative image analysis and other issues will be addressed. The course will also include a tour of microscopy facilities available at Vanderbilt. SPRING. [1] Burnette

CBIO-GS8315 - Teaching Cell Biology

Title

Teaching Cell Biology

Catalog Description

Students will gain mastery of basic cell biology principles through teaching the material to classmates. The format will consist of student-taught lectures with accompanying reading assignments. This class has several goals: to serve as a refresher (or foundational) course in cell biology; to help students prepare for their qualifying examinations; to give students experience in teaching to prepare for future career opportunities; to improve scientific presentation skills. Priority will be given to graduate students in the CDB program. SPRING [2] Page-McCaw.

CBIO-GS8320 - Cancer And Development

Title

Cancer And Development

Catalog Description

(Also listed as CANB 8320) Graduate-level course that will examine relationships between cellular responses in normal tissue development and cancer. The goal of the course is to familiarize the students with major cellular pathways and responses that are regulated in normal embryonic and post-natal tissue development and how abnormal re-activation of these responses gives rise to malignant disease. Offered every other year. SPRING. [3] (not currently offered)

CBIO-GS8324 - Epithelial Pathobiology

Title

Epithelial Pathobiology

Catalog Description

To introduce students to issues of polarized epithelial cell function in the context of normal physiology as well as alterations associated with disease. Two one-and-one-a-half-hour sessions per week, one-semester course; paper presentation and discussion on Wednesday, lecture on Friday by visiting scientists from outside Vanderbilt will present special topics changing each year. Prerequisite: Open to all graduate students. Offered every other year. [3] Coffey and Goldenring.

CBIO-GS8330 - Seminar In Cell and Developmental Biology

Title

Seminar In Cell and Developmental Biology

Catalog Description

The goal of the course is for graduate students to learn about two cutting-edge areas of research in cell and developmental biology. Each area will be presented by four outside speakers (eight dates total). The week before each seminar, the student will read and discuss, facilitated by a faculty member, a paper authored by the next week's speaker and prepare written critiques. The students will attend the seminar followed by a discussion section with the speaker. FALL, SPRING. [1] (not currently offered)

CBIO-GS8331 - Current Topics in Stem Cell and Developmental Biology

Title

Current Topics in Stem Cell and Developmental Biology

Catalog Description

This course in both fall and spring semesters meets once per week to hear a graduate student, postdoctoral fellow, or faculty member discuss a research paper from outside his or her own field of research, with substantial audience Q&A and discussion. Students taking the course for credit must attend most of the semester's presentations. After pairing with a faculty mentor, they together choose and prepare a topical paper that the trainee presents towards the end of the semester. Students planning to register must contact and discuss plans with the director (chris.wright@vanderbilt.edu) in the preceding semester. FALL, SPRING. [1] Wright.

CBIO-GS8333 - Classic Papers

Title

Classic Papers

Catalog Description

The goal of this one-credit course is to expose graduate students to landmark experiments in cell and developmental biology and to show how these studies have shaped contemporary research. Each week, a student, with help of a faculty member from the Department of Cell and Developmental Biology, will lead the discussion of a landmark paper on related topics. Other students will participate by engaging active discussion and writing a one-page essay to summarize how the original studies had addressed a key gap in a field and offer his/her perspective on how that had altered research trajectories. The course aims at helping students to learn how to identify key gaps in research and how to design experiments to address the gaps. The course also aims to encourage/teach students to use innovative thinking in project designing and planning in their thesis research. FALL. [1] Gu.

CBIO-GS8337 - Molecular Aspects of Cancer Research

Title

Molecular Aspects of Cancer Research

Catalog Description

(Also listed as Biochemistry 8337) A focused series of seminars and discussions to explore the molecular basis of cancer. Seminars rely heavily on extramural speakers with recognized expertise in selected research areas. Students meet with the speaker immediately following each seminar. Discussion sections led by a faculty member follow each series of three to four seminars. SPRING. [1] Hiebert (Biochemistry).

CBIO-GS8338 - Nobel Laureates in the Life Sciences

Title

Nobel Laureates in the Life Sciences

Catalog Description

This course is intended to give students a personal perspective on the careers of exceptional cell and developmental biology researchers. Each session will focus on Nobel Prize or Lasker Award winners in Physiology or Medicine that have impacted cell and developmental biology fields. A faculty member with training or interest ties to the researcher will present and lead a discussion on the research topic and the history of the researcher's career. In preparation for each session, the students will research the information at or linked to the award Web sites. For each session, the students will be given a key paper(s) of the winner (or the winner's acceptance speech, or biographical articles, etc. at the discretion of the faculty member). During the class-time interactions with the faculty member, the students will incorporate their perspectives on what they found interesting about the winner's history. In addition, before the joint student/faculty presentation, the designated students will give a journal club on one-two seminal papers by the Nobel winner. The rest of the class will turn in a one-page summary detailing one of the papers' importance and findings. Open to 1st year and 2nd year students. SPRING. [1], Lee, Ethan

CBIO-GS8339 - Research Seminar in Cell Biology

Title

Research Seminar in Cell Biology

Catalog Description

Students enrolled in the class will attend research presentations and engage in dialogue and constructive feedback with the presenters, who are advanced graduate students and postdocs. [1] FALL and SPRING. Instructors: Irish, Jonathan M. and Kaverina, Irina N.

CBIO-GS8340 - Special Problems and Experimental Techniques

Title

Special Problems and Experimental Techniques

Catalog Description

Designed to allow the student an opportunity to master advanced techniques in cell biology while pursuing special projects under individual members of the faculty in their areas of expertise. Admission to course, hours, and credit by arrangement. Variable credit. [1-6]

CBIO-GS8341 - Stem/Progenitor Cell and Regenerative Biology

Title

Stem/Progenitor Cell and Regenerative Biology

Catalog Description

The course covers at an advanced level the history, current and future research and potential translational applications of stem/progenitor-cell and regenerative biology. The course particularly covers how newly emerging concepts are revolutionizing our understanding of cell and developmental biology, and influencing, for example, prospective interventions relevant to human health and disease. Lectures and discussion topics will cover several seminal as well as controversial publications. Ethical concerns and consequences raised by basic and translational research and discovery will be paramount during lectures and discussions. Attendance is limited to trainees who have progressed beyond the first year of the Ph.D. (IGP, or an equivalent program). Two credit hours, with one two-hour session per week. Credit and grading are by recorded attendance, and the scoring of functional participation - to be audited by directors and co-directors - in discussion-based learning activities. Extramural lecturers/speakers will be featured, with opportunities for small-group interactions with trainees. The course is also available for audit by post-doctoral fellows or other personnel, but only after prior consultation with the course director (Prof. Chris Wright). Runs mid-January to mid-April. Director, Chris Wright (CDB). Associate Director, Mark Magnuson (MPB). SPRING. [2]

CBIO-GS8345 - Cellular and Molecular Neuroscience

Title

Cellular and Molecular Neuroscience

Catalog Description

(Also listed as Molecular Physiology and Biophysics 8345, Neuroscience 8345, Pharmacology 8345) This course is a required entry-level course for students in the Cell and Molecular Track of the Neuroscience Graduate Program at Vanderbilt that should be taken in the first graduate school year. It also serves as an elective for medical students and graduate students in a number of other programs. Its goal is to expose students to fundamental concepts and techniques in molecular and cellular neuroscience and provide a theoretical context for experimental analysis of brain function and disease. The course is divided into three modules. Module I: Neural Anatomy and Development provides an overview of the anatomy of the nervous system and neurotransmitters and examines concepts in neural pattern formation, neuronal migration, axon guidance, and synapse formation. Module II. Signaling, Plasticity, and Modulation reviews biophysical and molecular concepts relating to neuronal membrane excitability, secretion, and plasticity. Module III: Neural Diseases and Disease Models focuses on specific brain disorders such as epilepsy, pain disorders, Alzheimer's disease, depression, and schizophrenia and current models used to investigate their origin and/or treatment. This course combines faculty lecture with discussion of original articles, with an emphasis on fundamental concepts and the elucidation of important research paradigms in the discipline. Faculty and assistants guide students through important research paradigms with a critical analysis of the primary literature in the topic area. Prerequisite: Bioregulation I (IGP 8001) or consent of instructor. Course directors may consider undergraduate course work in cell biology or biochemistry to meet this requirement. SPRING. [4] Currie, Carter, and Staff

CBIO-GS8347 - The Visual System

Title

The Visual System

Catalog Description

(Also listed as Neuroscience 8347, Psychology 5780) An interdisciplinary approach to how humans see and interpret their visual environment. Topics include the structure of the eye and brain (including optics), the physiology of individual cells and groups of cells, machine vision and models of visual function, visual attention, and mechanisms of complex visual perception. Lectures by faculty from Psychology and Cell and Developmental Biology. Graduate students attend one hour discussion section per week in addition to lecture, and turn in a more extensive paper than undergraduates. SPRING. [3] Roe

CBIO-GS8349 - Genetics Of Model Organisms

Title

Genetics Of Model Organisms

Catalog Description

Basic genetic principles across a broad range of organisms (yeast, *C. elegans*, *Drosophila melanogaster*, plants, mouse, zebrafish) that are used in genetic analyses to investigate molecular pathways of interest for human disease will be presented. This course will provide students with in-depth terminology and understanding of the advantages, applications, and approaches specific to each organism. Genomic and bioinformatics tools that facilitate genetic analysis in each species will be emphasized. Specific examples of how each model organism has successfully contributed to elucidation of a human disease gene, pathway, or genetic principle will be presented. Course combines faculty lectures with student presentation and discussion of original articles to emphasize the uniqueness of each model system. Prerequisite: one statistics course at the upper undergraduate level or higher and Fundamentals of Genetic Analysis (MPB 8385), or permission of instructor SPRING. [3] (not currently offered)

CBIO-GS8999 - Non-Candidate Research
Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

CBIO-GS9999 - Ph.D. Dissertation Research
Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Chemical and Biomolecular Engineering

CHBE5200 - Phase Equilibria and Stage-Based Separations
Title

Phase Equilibria and Stage-Based Separations

Catalog Description

(Also listed as CHBE 3200) Thermodynamic principles and calculations of mixture phase equilibrium. Development of correlations to design chemical separation processes. Applications to separation processes involving gases, liquids, and solids such as distillation, adsorption, and extraction. Simulation of separation processes. No credit for students who have earned credit for 3200. FALL. [3]

CHBE5250 - Chemical Reaction Engineering
Title

Chemical Reaction Engineering

Catalog Description

(Also listed as CHBE 3250) Thermodynamic basis of chemical equilibrium. Analysis of chemical kinetic data and application to the design of chemical reactors. Batch, semibatch, and flow reactors are considered in both steady-state and transient operation. Brief treatments of catalysis and physical and chemical adsorption. No credit for students who have earned credit for 3250. SPRING. [3]

CHBE5300 - Fluid Mechanics and Heat Transfer
Title

Fluid Mechanics and Heat Transfer

Catalog Description

(Also listed as CHBE 3300) Principles of momentum and energy transport and their application to the analysis and design of chemical and biological engineering systems. No credit for students who have earned credit for 3300. FALL. [3]

CHBE5350 - Mass Transfer and Rate-Based Separations

Title

Mass Transfer and Rate-Based Separations

Catalog Description

(Also listed as CHBE 3350) Principles of mass transfer and their application to the analysis of chemical and biological engineering systems. Design of rate-based separation operations. No credit for students who have earned credit for 3350. SPRING. [3]

CHBE5500 - Bioprocess Engineering

Title

Bioprocess Engineering

Catalog Description

(Also listed as CHBE 4500) Application of cellular and molecular biology to process engineering to describe the manufacture of products derived from cell cultures. Design and scale-up of bioreactors and separation equipment. Metabolic and protein engineering utilizing genetically engineered organisms. No credit for students who have earned credit for 4500. [3]

CHBE5600 - Chemical Process Control

Title

Chemical Process Control

Catalog Description

(Also listed as CHBE 3600) Design of control systems for chemical processes. Principles of process dynamics and control of single and multivariable systems. Frequency and stability analyses and their effect on controller design. No credit for students who have earned credit for 3600. [3]

CHBE5800 - The Molecular and Cellular Mechanome

Title

The Molecular and Cellular Mechanome

Catalog Description

(Also listed as CHBE 4800) Applications of molecular and cellular biophysics and mechanics over various lengths, energy and timescales to describe biological phenomena through an 'omics' systems level perspective to molecular motors, cell machinery, mechanotransduction, cell migration, cell division, and nonequilibrium receptor ligand interactions. Physical and engineering based descriptions of molecular and cellular machinery incorporating biophysics and statistical and continuum mechanics perspectives. Modern and historical results, instrumentation, and measurement techniques. No credit for students who have earned credit for 4800. FALL. [3]

CHBE5810 - Metabolic Engineering

Title

Metabolic Engineering

Catalog Description

(Also listed as CHBE 4810) Analysis and synthesis of metabolic networks using principles of thermodynamics, kinetics, and transport phenomena. Computational approaches for predicting metabolic phenotypes. Experimental techniques to measure and manipulate key metabolic variables including pathway fluxes, protein/gene expression, enzyme regulation, and intracellular metabolite concentrations. No credit for students who have earned credit for 4810. [3]

CHBE5820 - Immunoengineering

Title

Immunoengineering

Catalog Description

CHBE 5820. Immunoengineering. (Also listed as CHBE 4820) Approaches and technologies for manipulating and studying the immune system. Topics include fundamentals of immunology, immunology tools and methods, vaccines and immunotherapies, drug delivery principles, and materials engineering for immunomodulation. No credit for students who have earned credit for 4820. [3]

CHBE5830 - Molecular Simulation

Title

Molecular Simulation

Catalog Description

(Also listed as CHBE 4830) Modern tools of statistical mechanics, such as Monte Carlo and molecular dynamics simulation, and variations. Methods, capabilities, and limitations of molecular simulation and applications to simple and complex fluids relevant to the chemical and related processing industries. No credit for students who have earned credit for 4830. [3]

CHBE5840 - Synthesis and Applications of 2D Nanomaterials

Title

Synthesis and Applications of 2D Nanomaterials

Catalog Description

(Also listed as CHBE 4840) Structure-property relationships and applications of atomically thin, two-dimensional materials and 2D/layered systems. Preparation by mechanical exfoliation, solution processing, and bottom-up synthesis. Nucleation/growth of 2D materials via gas/solid, liquid/solid, and catalytic/phase transformation reactions. Kinetic vs. thermodynamic processing, stabilizing meta-stable intermediates, interface engineering, and scale-up. No credit for students who have earned credit for 4840. [3]

CHBE5850 - Semiconductor Materials Processing

Title

Semiconductor Materials Processing

Catalog Description

(Also listed as CHBE 4850) Materials processing unit operations of silicon device manufacturing. Basic semiconductor physics and device theory, production of substrates, dopant diffusion, ion implantation, thermal oxidation and deposition processes, plasma deposition processes, photolithography, wet chemical and plasma etching, and analytical techniques. Lectures alternate with one two-hour laboratory on a weekly basis. No credit for students who have earned credit for 4850. FALL. [3]

CHBE5860 - Molecular Aspects of Chemical Engineering

Title

Molecular Aspects of Chemical Engineering

Catalog Description

(Also listed as CHBE 4860) Integration of molecular chemistry, property-based thermodynamic descriptions, and a focus on intermolecular energetics for process analysis and product design. Case studies involve molecular, macromolecular, supramolecular, and biomolecular systems. No credit for students who have earned credit for 4860. [3]

CHBE5870 - Polymer Science and Engineering

Title

Polymer Science and Engineering

Catalog Description

(Also listed as CHBE 4870) Macromolecular systems with emphasis on the interrelationship of chemical, physical, and engineering properties. Further relation of these properties to synthesis. Physicochemical and biological applications. No credit for students who have earned credit for 4870. [3]

CHBE5875 - Colloid Science and Engineering

Title

Colloid Science and Engineering

Catalog Description

(Also listed as CHBE 4875) Fundamental concepts (surface forces, self-assembly, electrokinetics) and experimental techniques (microscopy, scattering, measurement of charge) in colloid science. Applications to personal care products, energy devices, and drug delivery. No credit for students who have earned credit for 4875. [3]

CHBE5880 - Corrosion Science and Engineering

Title

Corrosion Science and Engineering

Catalog Description

(Also listed as CHBE 4880) Aqueous-phase metal and alloy corrosion phenomena. Fundamental chemistry and electrochemistry theories, as applied to corroding systems. Specific forms of corrosion including pitting, crevice corrosion, and galvanic corrosion. Methods for corrosion control based on electrochemical fundamentals. No credit for students who have earned credit for 4880. SPRING [3]

CHBE5890 - Special Topics

Title

Special Topics

Catalog Description

(Also listed as CHBE 3890) No credit for students who have earned credit for 3890. [Variable credit: 1-3 each semester]

CHBE6100 - Applied Mathematics in Chemical Engineering

Title

Applied Mathematics in Chemical Engineering

Catalog Description

Chemical engineering applications of advanced mathematical methods. Analytical and numerical methods for ordinary and partial differential equations. Emphasis on recognizing the form of a mathematical model and possible solution methods. Applications in heat and mass transfer, chemical kinetics. FALL. [3]

CHBE6110 - Advanced Chemical Engineering Thermodynamics

Title

Advanced Chemical Engineering Thermodynamics

Catalog Description

Application of the thermodynamics method to chemical engineering problems. Development of the first, second, and third laws of thermodynamics; estimation and correlation of thermodynamic properties; chemical and phase equilibria; irreversible thermodynamics. FALL. [3]

CHBE6120 - Applied Chemical Kinetics

Title

Applied Chemical Kinetics

Catalog Description

Experimental methods in kinetics. Kinetics of industrial reactions and reactor design. Absorption and catalytic systems are considered. FALL. [3]

CHBE6200 - Transport Phenomena

Title

Transport Phenomena

Catalog Description

The theory of non-equilibrium processes. Development of the analogy between momentum, energy, and mass transport with applications to common engineering problems. SPRING. [3]

CHBE6250 - Professional Communication Skills for Engineers

Title

Professional Communication Skills for Engineers

Catalog Description

Written and oral communication skills for engineers to produce peer-reviewed journal publications, research proposals, and research presentations. SPRING. [1]

CHBE7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

[0-6]

CHBE8900 - Special Topics

Title

Special Topics

Catalog Description

[Variable credit: 1-3 each semester]

CHBE8991 - Seminar**Title**

Seminar

Catalog Description

[0]

CHBE8999 - Non-Candidate Research**Title**

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

CHBE9999 - Ph.D. Dissertation Research**Title**

Ph.D. Dissertation Research

Catalog Description

[0-12]

Chemical and Physical Biology

CPBP8306 - Introduction to Chemical, Physical, and Systems Biology**Title**

Introduction to Chemical, Physical, and Systems Biology

Catalog Description

An introduction to living systems, with strong emphasis on the logic of component interactions, in scales ranging from molecules to organisms. Basic properties of complex biological systems are covered, including robustness, adaptability and self-organization. Cell component parts surveyed include: Nucleic Acids, Proteins, Carbohydrates, Lipids, Cytoskeleton, Secreted Factors, Transcription Factor Networks, Channels and Receptors. The Cell is presented as the principal context and actor for biology to happen, covering: Cell Identity, Epigenetics, Metabolism, Cell Growth Pathways, Stress Response Pathways, Tissue architecture, Organs, Immune System. State-of-the-art methods for computational and experimental analyses are addressed both throughout the lectures, and in specific topics including Drug Discovery, Imaging, Working with Big Data [1-5]

CPBP8307 - Ion Channel Structure and Function**Title**

Ion Channel Structure and Function

Catalog Description

Membrane Protein Structure and Function or Structural Biology [1]

CPBP8308 - Protein-Protein Interactions

Title

Protein-Protein Interactions

Catalog Description

Essentially all cellular functions depend on appropriately specific and dynamically modulated interactions of multiple proteins. This course is intended to provide students with a cohesive and comprehensive overview of current qualitative and quantitative methodology used in this field, and the application of these techniques to provide novel insights into disparate cellular functions/systems. [1]

CPBP8309 - Membrane Protein Structure and Function

Title

Membrane Protein Structure and Function

Catalog Description

Membrane proteins are key control points in cell communication, movement of molecules across membrane barriers, flow and use of energy, as well as in triggering the initiation of numerous signaling pathways. For instance ion channels set the pace of electrical activity, transporters have critical role in diverse critical functions such as drug clearance and neurotransmitters reuptake and G-protein coupled receptors mediate transduce ligand binding into cascades of cellular signaling. This module will provide an overview of these therapeutically important molecules. In addition, we will explore aspects of their structure, function and involvement in human diseases. [1]

CPBP8310 - Graduate Seminar In Chemical Biology

Title

Graduate Seminar In Chemical Biology

Catalog Description

This course aims to introduce fundamental concepts of contemporary science at the interface of chemical biology. A series of overviews and in-depth case studies will demonstrate the breadth of chemical biology and the importance of this emerging field in advancing biological sciences. [1]

CPBP8312 - Cur Top In Imaging Sci.

Title

Cur Top In Imaging Sci.

Catalog Description

Cur Top in Imaging Sci.

CPBP8320 - Foundations In Chemical Biology

Title

Foundations In Chemical Biology

Catalog Description

A series of overviews and in-depth case studies will demonstrate the breadth of chemical biology and the importance of this emerging field in advancing biological sciences. [3]

CPBP8324 - Scientific Communication in Chemical and Physical Biology

Title

Scientific Communication in Chemical and Physical Biology

Catalog Description

Principles of effective oral and written communication in the sciences. Each student will write, present, and defend a short research proposal based on their research area. [1]

CPBP8327 - Data Analysis for the Biomedical Sciences

Title

Data Analysis for the Biomedical Sciences

Catalog Description

This module will focus on the variety of analytical approaches for determination of quantitative physical and biological parameters from noisy data with an emphasis on programming. [1]

CPBP8328 - Systems Thinking in Biomedicine

Title

Systems Thinking in Biomedicine

Catalog Description

This course acts as an introduction to the field of Systems Biology. It is designed to help students consider the interaction among the component parts of various systems and learn approaches to defining these interactions mathematically and simulate them computationally in order to apply these concepts to human health. It will consist of one-hour lectures from invited speakers approximately every other week followed by an hour of discussion. This class fulfills the CPBP and QCB one credit hour seminar requirement. Fridays from 3-5 pm are also available (not mandatory) for more informal gatherings and open discussions about Systems Biology.

CPBP8329 - Practical Quantitative Analyses

Title

Practical Quantitative Analyses

Catalog Description

We have several goals with this course: 1) to orient you in a statistical frame of mind, 2) to get you comfortable using basic coding language, and 3) to introduce you to computational analysis in the context of systems biology. Some basic coding experience and familiarity with command line execution is recommended and laptop computer is required. FALL [3]. Bowman, Tyson.

CPBP8330 - Special Topics in Protein Biochemistry

Title

Special Topics in Protein Biochemistry

Catalog Description

Structural, chemical, biochemical, and biophysical studies of ligand-protein recognition including the activation of G protein-coupled receptors (GPCRs). May be repeated. [1]. Meiler.

CPBP8349 - Graduate Seminar In Molecular Biophysics

Title

Graduate Seminar In Molecular Biophysics

Catalog Description

Students are directed to in-depth reading and discussion of the top publications of the past year in which the tools of molecular biophysics have been used to greatly advance medicine and biology. A group learning format is used wherein all students work together each week in one of two teams. Each class is lead by the students, with the faculty mentor(s) serving to facilitate the discussion, answer questions, and provide broader insights.

[1]

CPBP8350 - Independent Study

Title

Independent Study

Catalog Description

FALL, SPRING, SUMMER. [1-6]

CPBP8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. FALL, SPRING, SUMMER. [0-12]

CPBP9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Chemistry

CHEM5010 - Inorganic Chemistry

Title

Inorganic Chemistry

Catalog Description

A survey of modern inorganic chemistry including coordination compounds and the compounds of the main-group elements. Representative reactions and current theories are treated. No credit for students who have earned credit for 3010. [3]

CHEM5020 - Introduction to Bioinorganic Chemistry

Title

Introduction to Bioinorganic Chemistry

Catalog Description

(Also listed as CHEM 3020) Functions of inorganic elements in living cells. The manner in which coordination can modify the properties of metallic ions in living systems. No credit for students who have earned credit for 3020. [3]

CHEM5030 - Physical Methods in Inorganic Chemistry

Title

Physical Methods in Inorganic Chemistry

Catalog Description

Application of spectroscopic methods to inorganic chemistry. Discussion of symmetry and group theory as required for the use of spectroscopic methods is also included. [3]

CHEM5040 - Nanoparticles

Title

Nanoparticles

Catalog Description

Bottom-up synthetic schemes for nanoparticle construction; characterization techniques; consequences of quantum confinement, and surface area enhancement; design for specific applications. No credit for students who earned credit for 304 section 1 in fall 2011 or spring 2013. Prerequisite or corequisite: 3010. [3]

CHEM5050 - Introduction to Organometallic Chemistry

Title

Introduction to Organometallic Chemistry

Catalog Description

(Also listed as CHEM 4050) A general description of the preparation, reaction chemistry, molecular structure, bonding, and spectroscopic identification of organometallic compounds of the transition metals. No credit for students who have earned credit for 4050. [3]

CHEM5120 - Instrumental Analytical Chemistry

Title

Instrumental Analytical Chemistry

Catalog Description

(Also listed as CHEM 3120) Chemical and physical principles of modern analytical chemistry instrumentation. No credit for students who have earned credit for 3120. [3]

CHEM5130 - Advanced Analytical Chemistry

Title

Advanced Analytical Chemistry

Catalog Description

Design and analysis of experimental data, instrumental design, and analytical surface science. [1-3]

CHEM5140 - Analytical Mass Spectrometry

Title

Analytical Mass Spectrometry

Catalog Description

Theory, design, and interpretation of mass spectrometry instrumentation and experiments. [3]

CHEM5150 - Electrochemistry: Theory and Analysis

Title

Electrochemistry: Theory and Analysis

Catalog Description

[3]

CHEM5160 - Separation Methods: A Practical Approach

Title

Separation Methods: A Practical Approach

Catalog Description

Theories of separation science; distillation, capillary electrophoresis, membrane separation, and supercritical fluid extraction; emphasis on chromatography. [3]

CHEM5170 - Analytical Optical Methods

Title

Analytical Optical Methods

Catalog Description

Analytical spectroscopy and biomedical imaging. [3]

CHEM5209 - Organic Chemistry Structure and Mechanism

Title

Organic Chemistry Structure and Mechanism

Catalog Description

The first half of 5210. Theory, models, and description of chemical bonding. Stereochemistry, and conformational analysis. Reaction thermodynamics, kinetics, and mechanism. Not open to students who have earned credit for CHEM 4210 or 5210 without permission. Total credit earned for this course and CHEM 4210 or 5210 will not exceed 4 hours. Credit reduced from most recent course taken (or from test or transfer credit) as appropriate. Prerequisite: One year of organic chemistry. [2]

CHEM5210 - Organic Structure, Mechanism, and Reactions

Title

Organic Structure, Mechanism, and Reactions

Catalog Description

Theory, models, and description of chemical bonding. Stereochemistry, and conformational analysis. Reaction thermodynamics, kinetics, and mechanism. Synthetic transformations employed in small molecule synthesis. Serves as repeat credit for CHEM 4210. Not open to students who have earned credit for CHEM 5209 without permission. Total credit earned for this course and CHEM 5209 will not exceed 4 hours. Credit reduced from most recent course taken (or from test or transfer credit) as appropriate. Prerequisite: One year of organic chemistry. [4]

CHEM5220 - Spectroscopic Identification of Organic Compounds

Title

Spectroscopic Identification of Organic Compounds

Catalog Description

(Also listed as CHEM 3220) Theoretical and practical aspects of spectroscopic methods, with an emphasis on NMR spectroscopy, for structural characterization of organic compounds. No credit for students who have earned credit for 3220. [3]

CHEM5230 - Physical Organic Chemistry

Title

Physical Organic Chemistry

Catalog Description

(Also listed as CHEM 4230) Structure and bonding in organic molecules. Reactive intermediates and organic reaction mechanisms. No credit for students who have earned credit for 4230. [3]

CHEM5240 - Advanced Organic Reactions

Title

Advanced Organic Reactions

Catalog Description

(Also listed as CHEM 4240) A comprehensive study of organic reactions and their application to the preparation of small molecules. Three lectures per week. No credit for students who have earned credit for 4240. [3]

CHEM5310 - Biophysical Chemistry: Thermodynamics in Chemical and Biological Systems

Title

Biophysical Chemistry: Thermodynamics in Chemical and Biological Systems

Catalog Description

(Also listed as CHEM 3310) Chemical thermodynamics and equilibrium, their statistical foundation, and applications to chemical and biological phenomena in biomedical research. No credit for students who have earned credit for 3310. [3] (MNS)

CHEM5320 - Quantum Chemistry

Title

Quantum Chemistry

Catalog Description

Limits of classical mechanics at the atomic and molecular level; postulates of quantum mechanics applied to problems in one, two, and three dimensions; perturbation and other methods. Prerequisite: 3300 or equivalent. [3]

CHEM5330 - Spectroscopy

Title

Spectroscopy

Catalog Description

Experimental and theoretical aspects of spectroscopy. Energy levels, selection rules, and spectral transitions related to atomic and molecular structure. Design of contemporary magnetic resonance and optical spectroscopy measurements. Prerequisite: 3310. [3]

CHEM5340 - Applications of Group Theory

Title

Applications of Group Theory

Catalog Description

Molecular symmetry, point groups, and character tables. Application to molecular orbitals, vibrational spectra, organic and inorganic systems. [3]

CHEM5350 - Statistical Thermodynamics

Title

Statistical Thermodynamics

Catalog Description

Statistical mechanics and chemical equilibrium; distribution laws, partition functions, and thermodynamic properties of atoms and molecules; applications to gases, liquids, and solids. Prerequisite: 232. [3]

CHEM5360 - Advanced Quantum Chemistry

Title

Advanced Quantum Chemistry

Catalog Description

Advanced topics in the application of quantum mechanics to chemical bonding and spectroscopy. Prerequisite: 5320. [3]

CHEM5410 - Molecular Modeling Methods

Title

Molecular Modeling Methods

Catalog Description

Computer simulation studies of molecules with emphasis on applications to biological molecules and complexes. Background theory, implementation details, capabilities and practical limitations. Prerequisite: 3300 and 3310. Includes one threehour laboratory per week. Serves as repeat credit for students who completed 233 prior to fall 2010. [4]

CHEM5420 - Computational Structural Biochemistry

Title

Computational Structural Biochemistry

Catalog Description

Theoretical and practical aspects of protein sequence alignments, secondary structure prediction, comparative modeling, protein-protein and protein-ligand docking. Structure-based drug design, virtual screening, quantitative structure activity relations, cheminformatics, and pharmacophore mapping in therapeutic development. Prerequisite: 3310. Serves as repeat credit for students who completed 238 prior to fall 2010. [4]

CHEM5600 - Chemical Literature

Title

Chemical Literature

Catalog Description

(Also listed as CHEM 3600) Assigned readings and problems in the nature and use of the chemical literature. No credit for students who have earned credit for 3600. [1]

CHEM5610 - Chemistry of Inorganic Materials

Title

Chemistry of Inorganic Materials

Catalog Description

Chemical synthesis, processing, characterization, and applications of inorganic materials. Molecular precursor routes to inorganic solids. Structure and bonding properties of materials at the atomic, molecular, or extended molecular level and their relationship to desired properties. Carbon-based materials (graphene, fullerenes, diamond), ceramics and zeolites, semiconductors, electronic, magnetic, and optical materials, and nanomaterials. Prerequisite: General chemistry. Serves as repeat credit for students who completed 350 in fall 2011, fall 2009, or fall 2007. [3]

CHEM5620 - Chemistry of Biological Materials

Title

Chemistry of Biological Materials

Catalog Description

The synthesis, directed self-assembly, and hierarchical organization of naturally occurring materials. Engineering of new bioinspired artificial materials for diverse applications. Materials and devices from DNA, genetic reprogramming of the design of new materials. Peptide-, protein-, and carbohydrate-based materials. Biom mineralization, biomimetic systems, and complexity in self-assembly. [3]

CHEM5630 - Macromolecular Chemistry: Polymers, Dendrimers, and Surface Modifications

Title

Macromolecular Chemistry: Polymers, Dendrimers, and Surface Modifications

Catalog Description

(Also listed as CHEM 3630) Synthesis and characterization of macromolecular materials including linear, branched, dendrimetric, and star polymers. Mechanical and physiochemical properties of polymeric types. Kinetics of living polymerization. Applications to nanostructures, templates, and advanced devices. No credit for students who have earned credit for 3630. [3]

CHEM5710 - Bioorganic Chemistry

Title

Bioorganic Chemistry

Catalog Description

(Also listed as CHEM 3710) Essential metabolites including vitamins, steroids, peptides, and nucleotides. Consideration of phosphate esters and the synthesis of oligodeoxynucleotides. Three lectures per week. No credit for students who have earned credit for 5710. [3]

CHEM5720 - Drug Design and Development

Title

Drug Design and Development

Catalog Description

(Also listed as CHEM 4720) Concepts of drug design; physical chemistry of drug interactions with receptors, enzymes, and DNA; drug absorption and distribution. Organic chemistry of drug metabolism; mechanism of action for selected therapeutic classes. No credit for students who have earned credit for 4720. [3]

CHEM5902 - Pedagogy Chem Education

Title

Pedagogy Chem Education

Catalog Description

Pedagogical techniques for the chemistry classroom. Knowledge application in discussion sections and development of teaching materials. Consent of Instructor required for registration. Offered on a graded basis only. May be repeated once for credit. Prerequisite: 2212 or 2222. [1]

CHEM6050 - Special Topics in Inorganic Chemistry

Title

Special Topics in Inorganic Chemistry

Catalog Description

[3]

CHEM6150 - Special Topics in Analytical Chemistry

Title

Special Topics in Analytical Chemistry

Catalog Description

[3]

CHEM6250 - Special Topics in Organic Chemistry

Title

Special Topics in Organic Chemistry

Catalog Description

[1-3]

CHEM6340 - Special Topics in Chemical Physics

Title

Special Topics in Chemical Physics

Catalog Description

[3]

CHEM6900 - Professional Development

Title

Professional Development

Catalog Description

Grant writing, from specific aims and development of hypotheses to broader impact statements. The curriculum vitae, the "three-minute thesis" pitch, scientific presentations, and responsible conduct in research. Open only to chemistry graduate students. May be repeated for credit once for a total of two credit hours. [1]

CHEM6901 - Introduction to Research**Title**

Introduction to Research

Catalog Description

Introduction to chemical research under the guidance of individual faculty members. Students participate in three rotations among faculty research groups and provide graded work. For chemistry graduate students only. [1-2]

CHEM6902 - Practicum in Chemistry Instruction**Title**

Practicum in Chemistry Instruction

Catalog Description

Preparation for and the teaching of chemistry to undergraduate students. [0-1]

CHEM6903 - Advanced Reading in Chemistry**Title**

Advanced Reading in Chemistry

Catalog Description

Specialized topics under the guidance of a departmental faculty member. Open to qualified graduate students only. [3]

CHEM7999 - Master's Thesis Research**Title**

Master's Thesis Research

Catalog Description

[0-12]

CHEM8999 - Non-candidate Research**Title**

Non-candidate Research

Catalog Description

Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

CHEM9999 - Ph.D. Dissertation Research**Title**

Ph.D. Dissertation Research

Catalog Description

[0-12]

CHIN5101 - Elementary Chinese I**Title**

Elementary Chinese I

Catalog Description

(Also listed as CHIN 1101) Introduction to Modern Chinese pronunciation, grammar, conversation, reading, and writing. Two hours of lecture and three hours of drill per week. No credit for students who have earned credit for a more advanced Chinese language course. No credit for students who have earned credit for 1101. [5]

CHIN5102 - Elementary Chinese II**Title**

Elementary Chinese II

Catalog Description

(Also listed CHIN 1102) Continuation of 5101. Introduction to Modern Chinese pronunciation, grammar, conversation, reading, and writing. Two hours of lecture and three hours of drill per week. No credit for students who have earned credit for a more advanced Chinese language course. No credit for students who have earned credit for 1102. [5]

CHIN5110 - Calligraphy**Title**

Calligraphy

Catalog Description

(Also listed as CHIN 1110) Basic skills of writing standard script kaishu. Basic aesthetic of Chinese calligraphy. No Chinese language background necessary. No credit for students who have earned credit for 1231. [1]

CHIN5201 - Intermediate Chinese I**Title**

Intermediate Chinese I

Catalog Description

(Also listed as CHIN 2201) Oral and written language training. Two hours of lecture and three hours of drill per week. No credit for students who have earned credit for a more advanced Chinese language course. Prerequisite: 1102. [5] (INT)

CHIN5202 - Intermediate Chinese II**Title**

Intermediate Chinese II

Catalog Description

(Also listed as CHIN 2202) Continuation of 2201. Language training in oral and written Chinese. Two hours of lecture and three hours of drill per week. No credit for students who have earned credit for a more advanced Chinese language course. Prerequisite: 2201. [5] (INT)

CHIN5301 - Advanced Chinese I**Title**

Advanced Chinese I

Catalog Description

(Also listed as CHIN 3301) Readings in Chinese culture to enhance proficiency in oral and written Chinese. No credit for students who have earned credit for a more advanced Chinese language course. No credit for students who have earned credit for 3301. [3]

CHIN5302 - Advanced Chinese II**Title**

Advanced Chinese II

Catalog Description

(Also listed as CHIN 3302) Readings in Chinese culture to enhance proficiency in oral and written Chinese. No credit for students who have earned credit for a more advanced Chinese language course. No credit for students who have earned credit for 3302 or 3302W. [3]

CHIN5401 - Business Chinese I**Title**

Business Chinese I

Catalog Description

(Also listed as CHIN 4401) Language skills for listening, speaking, reading, and writing in business environments. Modern China from economic and business perspectives. No credit for students who have earned credit for a more advanced Chinese language course. No credit for students who have earned credit for 4401. [3]

CHIN5402 - Business Chinese II**Title**

Business Chinese II

Catalog Description

(Also listed as CHIN 4402) Continuation of 5402. Language skills for listening, speaking, reading, and writing in business environments. Modern China from economic and business perspectives. No credit for students who have earned credit for 4402. [3]

CHIN5403 - Readings in Modern Chinese Media**Title**

Readings in Modern Chinese Media

Catalog Description

(Also listed as CHIN 4403) Books, newspapers, Internet, and television documents and productions pertaining to political, social, and economic issues in China, including foreign trade-related issues. No credit for students who have earned credit for 4403. [3]

CHIN5404 - Readings in Modern Chinese Media**Title**

Readings in Modern Chinese Media

Catalog Description

(Also listed as CHIN 4404) Books, newspapers, and Internet sources pertaining to political, social, and cultural issues. No credit for students who have earned 4404. [3]

CHIN5405 - Classical Chinese Literature and Philosophy

Title

Classical Chinese Literature and Philosophy

Catalog Description

(Also listed as CHIN 4405) Classical writings by Confucius, Sunzi, and Zhuangzi. Poems by Li Bai and Du Fu. Excerpts from The Dream of the Red Chamber. Linguistic comparisons between classical and modern Chinese. No credit for students who have earned credit for 4405. [3]

CHIN5406 - Readings in Modern Literary Chinese

Title

Readings in Modern Literary Chinese

Catalog Description

(Also listed as CHIN 4406) 1910 to the present. Chinese literature and poetry. Linguistic transformations that produced modern literary Chinese. No credit for students who have earned credit for 4406. [3]

CHIN5851 - Independent Study

Title

Independent Study

Catalog Description

(Also listed as CHIN 3851) Designed primarily for majors who want to study Chinese not regularly offered in the curriculum. Must have consent of instructor. May be repeated for a total of 12 credits in 5851 and 5852 combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum 12 credits total for all semesters of CHIN 5851 and 5852.] No credit for students who have earned credit for 3851. (No AXLE credit)

CHIN5852 - Independent Study

Title

Independent Study

Catalog Description

(Also listed as CHIN 3852) Designed primarily for majors who want to study Chinese not regularly offered in the curriculum. Must have consent of instructor. May be repeated for a total of 12 credits in 5851 and 5852 combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum 12 credits total for all semesters of CHIN 5851 and 5852.] (No AXLE credit)

Civil Engineering

CE5100 - Geographic Information Systems (GIS)

Title

Geographic Information Systems (GIS)

Catalog Description

(Also listed as CE 4100) Principles of computerized geographic information systems (GIS) and analytical use of spatial information. Integration with global positioning systems (GPS) and internet delivery. Includes GIS software utilization and individual projects. No credit for students who have earned credit for 4100. SPRING. [3]

CE5150 - Energy Systems Engineering**Title**

Energy Systems Engineering

Catalog Description

(Also listed as CE 4150) Physical principles of energy conversion. Energy sources and usage. Sustainability and carrying capacity. Systems tools and economics for energy systems. Energy distribution and storage. Future energy system design. SPRING. [3]

CE5200 - Advanced Structural Steel Design**Title**

Advanced Structural Steel Design

Catalog Description

(Also listed as CE 4200) Advanced topics in column and beam design including local buckling, composite beams, plate girders, and torsion design. Behavior and design of bolted and welded connections. Structural planning and design of structural systems such as multistory buildings including computer applications. No credit for students who have earned credit for 4200. FALL. [3]

CE5210 - Advanced Reinforced Concrete Design**Title**

Advanced Reinforced Concrete Design

Catalog Description

(Also listed as CE 4210) Design and behavior of two-way slab systems. Yield line theory. Shear and torsion analysis and design. Serviceability requirements and control of deflections of reinforced concrete systems. Prestressed concrete. No credit for students who have earned credit for 4210. SPRING. [3]

CE5240 - Infrastructure Systems Engineering**Title**

Infrastructure Systems Engineering

Catalog Description

(Also listed as CE 4240) Systems-level approach to the infrastructure of the built environment. Elements of systems engineering. Case studies of infrastructure under duress. Smart infrastructure. Transportation, building, and water and wastewater supply and distribution systems. Infrastructure interdependencies and concepts of smart cities. Applications to infrastructure system design. FALL. [3]

CE5250 - Foundation Analysis and Design**Title**

Foundation Analysis and Design

Catalog Description

(Also listed as CE 4250) Study of shallow and deep foundation elements and systems for civil engineering structures. Soil exploration and site investigation. No credit for students who have earned credit for 4250. SPRING. [3]

CE5300 - Reliability and Risk Case Stud
Title

Reliability and Risk Case Stud

Catalog Description

(Also listed as CE 4300) Review of historical events involving successes and failures in managing system reliability and risk from a wide range of perspectives, including design, production, operations, organizational culture, human factors and exogenous events. Analysis of risk factors leading to event occurrence, as well as event consequences in terms of impacts to public health, safety, security and environmental protection. Evaluation of risk mitigation strategies based on achievable goals, technical and political feasibility, and economic impact. Cases drawn from natural disasters, industrial accidents, and intentional acts. No credit for students who have earned credit for CE 4300. FALL. [3]

CE5320 - Data Analytics for Engineers
Title

Data Analytics for Engineers

Catalog Description

(Also listed as CE 4320) Programming, analysis, and visualization of real data for the purposes of informing decision making in engineering problems. Statistical modeling in a practical and applied perspective; application of data analytics to bridge the gap between data and decisions; fundamentals of design of experiments. No credit for students who have earned credit for CE 4320. FALL. [3]

CE5340 - Risk and Decision Analysis
Title

Risk and Decision Analysis

Catalog Description

(Also listed as CE 4340) Risk quantification, risk perception, decision-making under uncertainty, risk communication. Model risk and decisions using analytical and simulation approaches. Focus on theory and methodology, applications in engineering, environmental systems, business, and healthcare. No credit for students who have earned credit for CE 4340. FALL. [3]

CE5400 - Construction Project Management
Title

Construction Project Management

Catalog Description

(Also listed as CE 4400) Theory and application of the fundamentals of construction project management. The construction process and the roles of professionals in the process. Overview of the construction project from conception through completion. Application of management practices including planning, directing, cost minimizing, resource allocation, and control of all aspects of construction operations and resources. No credit for students who have earned credit for 4400. FALL. [3]

CE5401 - Advanced Construction Project Management
Title

Advanced Construction Project Management

Catalog Description

(Also listed as CE 4401) Current and critical issues in the construction industry, including best practices developed at the Construction Industry Institute (CII). Guest lecturers include representatives of the CII and visiting industry leaders. No credit for students who have earned credit for 4401. FALL. [3]

CE5405 - Construction Estimating

Title

Construction Estimating

Catalog Description

(Also listed as CE 4405) Estimation of material, labor, and equipment quantities, including costing and pricing of construction projects. Application of estimating practices using real-world examples and project estimating software. Corequisite: CE 5400. No credit for students who have earned credit for 4405. FALL. [3]

CE5410 - Construction Planning and Scheduling

Title

Construction Planning and Scheduling

Catalog Description

(Also listed as CE 4410) Fundamentals of construction planning and scheduling. Application of management practices including: process planning; directing, costing; resource allocation; and controlling all aspects of construction operations and resources, from pre-construction through operation and maintenance. Use of real-world examples and project scheduling software. No credit for students who have earned credit for 4410. SPRING. [3]

CE5415 - Construction Materials and Methods

Title

Construction Materials and Methods

Catalog Description

(Also listed as CE 4415) Implications of design realities, material specifications, code limitations, and regulations on the construction process. Natural and man-made materials, construction techniques, and other issues that impact quality, constructability, and life-cycle assessment. No credit for students who have earned credit for 4415. SUMMER. [3]

CE5420 - Construction Law and Contracts

Title

Construction Law and Contracts

Catalog Description

(Also listed as CE 4420) Review of case studies involving successes and failures in legal principles and landmark cases relevant to civil engineering and construction. Contracts, torts, agency and professional liability, labor laws, insurance, expert testimony, arbitration, patents and copyrights, sureties, and ethics. No credit for students who have earned credit for 4420. SPRING. [3]

CE5425 - Building Information Modeling

Title

Building Information Modeling

Catalog Description

(Also listed as CE 4425) Generation and management of building data during its life cycle. Three-dimensional, real-time, dynamic modeling to increase productivity in building design and construction. Considerations of building geometry, spatial relationships, geographic information, and building components. No credit for students who have completed 4425. FALL. [3]

CE5430 - High Performance and Green Buildings

Title

High Performance and Green Buildings

Catalog Description

(Also listed as CE 4430) Design and construction of high performance buildings and related systems in buildings. Leadership in Energy and Environmental Design (LEED) green Building Rating System (TM) building approach to sustainability No credit for students who have earned credit for 4430. SPRING. [3]

CE5500 - Transportation System Design

Title

Transportation System Design

Catalog Description

(Also listed as CE 4500) Geometric analysis of transportation ways with particular emphasis on horizontal and vertical curve alignment. Design of highways, interchanges, intersections, and facilities for air, rail, and public transportation. No credit for students who have earned credit for 4500. SPRING. [3]

CE5505 - Urban Transportation Planning

Title

Urban Transportation Planning

Catalog Description

(Also listed as CE 4505) Analytical methods and the decision-making process. Transportation studies, travel characteristic analysis, and land-use implications are applied to surface transportation systems. Emphasis is on trip generation, trip distribution, modal split, and traffic assignment. Computerized planning programs are used. No credit for students who have earned credit for 4505. SPRING. [3]

CE5510 - Traffic Engineering

Title

Traffic Engineering

Catalog Description

(Also listed as CE 4510) Analysis of the characteristics of traffic, including the driver, vehicle, volumes, speeds, capacities, roadway conditions, and accidents. Traffic regulation, control, signing, signalization, and safety programs are also discussed. No credit for students who have earned credit for 4510. FALL. [3]

CE5884 - Internship

Title

Internship

Catalog Description

Internship working in a professional setting. Intended for M.Eng. students in the area of construction management. Coreq: CE 5400. [0]

CE5999 - Special Topics

Title

Special Topics

Catalog Description

(Also listed as CE 3890) No credit for students who have earned credit for 3890. [3]

CE6200 - Continuum Mechanics

Title

Continuum Mechanics

Catalog Description

Mathematical preliminaries: tensor algebra, tensor calculus, coordinate transformation, principal values and directions. Kinematics of continuum: motion and deformation, infinitesimal and finite strain theory, balance of mass. Stress and integral formulations: traction on planes, stress invariants and failure theories, Piola-Kirchhoff stress tensors, balance of momentum, stress power. Elastic solid: linear isotropic and anisotropic elasticity, engineering material constants, plane elastic waves, non-linear isotropic elasticity. FALL. [3].

CE6205 - Theory of Inelasticity

Title

Theory of Inelasticity

Catalog Description

Physical mechanisms of deformation and failure. Modern theories of plasticity, viscoplasticity and continuum damage mechanics. Thermodynamics of plasticity and damage processes. Numerical and computational aspects of inelastic deformation mechanisms in solids and structures. SPRING. [3]

CE6210 - Finite Element Analysis

Title

Finite Element Analysis

Catalog Description

Discrete modeling of problems of the continua. Mathematical basis of finite element method-weighted residual and variational concepts. Finite element formulations; displacement, force, and mixed methods. 1-D problems of the continua and finite element solution-C0 and C1 elements, eigenvalue and transient problems. Error checks and control. Mapping, shape functions, numerical quadrature, and solution of equations. Formulation of 2-D problems (single and multi-field)-mapping and shape functions, triangular and quad elements with straight or curved boundaries. 3-D elements, singular problems, buckling, and nonlinear problems. Error estimation and quality control. Computer implementation. Commercial packages. Prerequisite: MATH 2410, MATH 3620. FALL. [3]

CE6212 - Advanced Computational Mechanics

Title

Advanced Computational Mechanics

Catalog Description

Nonlinear mechanics, geometric and material nonlinearities. Discrete Lagrangian, Eulerian and other formulations. Nonlinear material models. Numerical solution algorithms in space and time. Solution of nonlinear (second-order and higher) problems. Multi-disciplinary problems. Error estimation and adaptive model improvement. Multi-scale modeling and atomistic/continuum coupling. Prerequisite: CE 6210. SPRING. [3]

CE6215 - Structural Dynamics and Control

Title

Structural Dynamics and Control

Catalog Description

Analysis of single- and multi-degree-of-freedom systems. Modal superposition method. Time and frequency domain analyses. Numerical methods and nonlinear dynamic analysis. Application to structures subject to earthquake and impact forces. Elements of feedback control systems. Control of lumped parameter systems. Active, passive, and hybrid mass dampers. Application to simple building and bridge structures. SPRING. [3]

CE6300 - Probabilistic Methods in Engineering Design

Title

Probabilistic Methods in Engineering Design

Catalog Description

Applications of probabilistic methods in the analysis and synthesis of engineering systems. Review of basic probability concepts, random variables and distributions, modeling and quantification of uncertainty, testing the validity of assumed models, linear regression and correlation analyses, Monte Carlo simulation, reliability analysis and reliability-based design. Prerequisite: MATH 2410. FALL. [3]

CE6305 - Engineering Design Optimization

Title

Engineering Design Optimization

Catalog Description

Methods for optimal design of engineering systems. Optimization under uncertainty, reliability-based design optimization, robust design, multidisciplinary problems, multi-objective optimization. Discrete and continuous design variables, advanced numerical algorithms, and formulations and strategies for computational efficiency. Practical applications and term projects in the student's area of interest. Prerequisite: MATH 4630, MATH 4620 or CE 6300. [3]

CE6310 - Uncertainty Quantification

Title

Uncertainty Quantification

Catalog Description

Computational methods for analysis and design of modern engineering systems under uncertainty. Emphasis on epistemic uncertainty due to data and models. Topics include stochastic finite elements; time-dependent reliability; Bayesian methods and networks; surrogate modeling; advanced simulation; global sensitivity analysis; model verification, validation, and calibration; and optimization under uncertainty. Applications to practical engineering systems. Prerequisite: CE 6300. SPRING. [3]

CE6313 - Multiscale Modeling

Title

Multiscale Modeling

Catalog Description

State-of-the-art and emerging multiscale computational methods for modeling of mechanics, transport, and materials phenomena. Principles of information transfer between multiple spatial and temporal scales, including atomistic-to-continuum coupling, continuum-to-continuum coupling, and bridging of time scales. Enrichment methods including generalized finite elements, partition of unity, variational multiscale methods. FALL. [3]

CE6318 - Prestressed Concrete

Title

Prestressed Concrete

Catalog Description

Behavior and design of statically determinate prestressed concrete structures under bending moment, shear, torsion, and axial load effects. Design of statically determinate prestressed structures such as continuous beams, frames, slabs and shells. Creep and shrinkage effects and deflections of prestressed concrete structures. Application to the design and construction of bridges and buildings. Prerequisite: CE 3205. [3]

CE6359 - Emerging Information Systems Applications

Title

Emerging Information Systems Applications

Catalog Description

Role of emerging information systems technologies in improving productivity and efficiency and in managing engineering operations. Design of integrated approaches to enhance the speed, accuracy, reliability, and quantity of information available for decision support. Emphasis on case studies of innovative applications in transportation and manufacturing, leading to individual and group projects requiring new product development. Prerequisite: Background in transportation or manufacturing operations. FALL. [3]

CE7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

[0-6]

CE8000 - Individual Study of Civil Engineering Problems

Title

Individual Study of Civil Engineering Problems

Catalog Description

Literature review and analysis of special problems under faculty supervision. FALL, SPRING, SUMMER. [1-4 each semester]

CE8001 - Individual Study of Civil Engineering Problems

Title

Individual Study of Civil Engineering Problems

Catalog Description

Literature review and analysis of special problems under faculty supervision. FALL, SPRING, SUMMER. [1-4 each semester]

CE8002 - Individual Study of Civil Engineering Problems

Title

Individual Study of Civil Engineering Problems

Catalog Description

Literature review and analysis of special problems under faculty supervision. FALL, SPRING, SUMMER. [1-4 each semester]

CE8300 - Reliability and Risk Engineering Seminar

Title

Reliability and Risk Engineering Seminar

Catalog Description

Perspectives on reliability and risk assessment and management of multi-disciplinary engineering systems. Topics on infrastructure and environmental systems, mechanical, automotive, and aerospace systems; network systems (power distribution, water and sewage systems, transportation etc.); manufacturing and construction; and electronic and software systems. FALL, SPRING. [1]

CE8301 - Reliability and Risk Engineering Seminar

Title

Reliability and Risk Engineering Seminar

Catalog Description

Seminars by expert speakers provide a wide range of perspectives on reliability and risk assessment and management of multidisciplinary engineering systems. Topics on infrastructure and environmental systems; mechanical, automotive, and aerospace systems; network systems (power distribution, water and sewage systems, transportation, etc.); manufacturing and construction; and electronic and software systems. FALL, SPRING. [1]

CE8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

CE9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Classics

CLAS5000 - Classical Tradition in America

Title

Classical Tradition in America

Catalog Description

(Also listed as CLAS 3000) Influences of classical Greece and Rome on the literature, politics, architecture, and values of the United States from the colonial period to the present. No credit for students who have earned credit for 3000. [3]

CLAS5010 - The Ancient Origins of Religious Conflict in the Middle East

Title

The Ancient Origins of Religious Conflict in the Middle East

Catalog Description

(Also listed as CLAS 3010) Religious oppositions in the eastern Mediterranean world from the Maccabean revolt to the Muslim conquests of the seventh century; beginnings of religious militancy; challenges of monotheism to Greco-Roman civilization; conversion, persecution, and concepts of heresy and holy war in Christianity, Judaism, and Islam. No credit for students who have earned credit for 3010. [3]

CLAS5100 - History of the Ancient Near East

Title

History of the Ancient Near East

Catalog Description

(Also listed as CLAS 2100) From the neolithic period to the conquests of Alexander the Great, in the geographical area from Persia to Troy and Egypt. Special attention to the history of Israel. No credit for students who have earned credit for 2100. [3]

CLAS5110 - History of Greece to Alexander the Great

Title

History of Greece to Alexander the Great

Catalog Description

(Also listed as CLAS 2110) The Greek world from the beginning of the Mycenaean Age (1650 B.C.) to the end of the Classical period. Special attention to the relationship between political history and the development of Hellenism. No credit for students who have earned credit for CLAS 2110. [3]

CLAS5120 - The Greek World from Alexander the Great to the Roman Empire

Title

The Greek World from Alexander the Great to the Roman Empire

Catalog Description

The eastern Mediterranean from the rise of Macedon and Alexander the Great to the High Roman Empire. Social, cultural, political, and religious changes. Issues of imperialism and colonialism, and questions of identity in a geographically expansive Greek world. [3]

CLAS5150 - History of the Roman Republic

Title

History of the Roman Republic

Catalog Description

(Also listed as CLAS 2150) The growth and evolution of the Roman world, from the foundation of the city in the seventh century B.C. to the reign of Caesar Augustus. The Romans' unification of Italy, conquest of the Mediterranean and western Europe, adoption of Hellenism, and overthrow of the Republic. No credit for students who have earned credit for 2150. [3]

CLAS5160 - History of the Roman Empire

Title

History of the Roman Empire

Catalog Description

(Also listed as CLAS 2160) The Roman world from Augustus to the collapse of the western empire in the fifth century. Political, military, social, and religious history. Special attention given to problems arising from use of the primary sources as well as to controversies in modern scholarship. No credit for students who have earned credit for 2160. [3]

CLAS5180 - From Late Antiquity to Islam

Title

From Late Antiquity to Islam

Catalog Description

(Also listed as CLAS 2180) The Eastern Roman Empire from Constantine to the Arab conquests. Political, social, cultural, and religious history, including monasticism, barbarian invasions, and the changing roles of the Emperor and Church. Special attention to developments in urban life and landscape. No credit for students who have earned credit for 2180. [3]

CLAS5200 - Archaic and Classical Greek Art and Architecture, 1000 to 400 B.C.E.

Title

Archaic and Classical Greek Art and Architecture, 1000 to 400 B.C.E.

Catalog Description

(Also listed as CLAS 2200) Sculpture, vase painting, architecture, and the minor arts. Formal and stylistic developments in relation to changing cultural background. No credit for students who have earned credit for HART 2200 or 2220. [3]

CLAS5210 - Late Classical Greek and Hellenistic Art and Architecture

Title

Late Classical Greek and Hellenistic Art and Architecture

Catalog Description

(Also listed as CLAS 2210) Sculpture, vase painting, architecture, and the minor arts from after the Parthenon to the Roman Empire. Media that developed significantly in this period, such as wall painting and mosaic. No credit for students who have earned credit for HART 2220. No credit for students who have earned credit for 2210. [3]

CLAS5250 - Roman Art and Architecture

Title

Roman Art and Architecture

Catalog Description

(Also listed as CLAS 2250) Sculpture, architecture, and painting from the tenth century B.C.E. to the early fourth century C.E. Daily life of the Romans as seen in excavations of the towns of Pompeii and Herculaneum. No credit for students who have earned credit for 2250. [3]

CLAS6030 - Death, Disease, and Health in the Ancient World

Title

Death, Disease, and Health in the Ancient World

Catalog Description

From the Bronze Age to early Christianity and Late Antiquity. Biological history of the Greeks, Romans, and other Mediterranean peoples. Changing concepts of death and afterlife; interpretations of disease; medical thought and practice. Healing, epidemics, natural catastrophe, and dietary variation. Evidence from classical literature, archaeology, bones and teeth. [3]

CLAS6100 - Women, Sexuality, and the Family in Ancient Greece and Rome

Title

Women, Sexuality, and the Family in Ancient Greece and Rome

Catalog Description

(Also listed as CLAS 3100) The status and role of women, law and the regulation of the private sphere, sexuality and gender roles, demography and family structure, marriage, children, religion, domestic architecture and the household economy, ancient critiques of the family, and the impact of Christianity. No credit for students who have earned credit for 3100. [3]

CLAS6110 - Warfare in the Ancient Mediterranean

Title

Warfare in the Ancient Mediterranean

Catalog Description

Continuity and change in ancient Greek and Roman warfare 800 B.C. to A.D. 120. Social, political, and religious aspects of war. Effects of war, imperialism, and militarism on internal and external populations. [3]

CLAS6120 - Humor, Ancient to Modern

Title

Humor, Ancient to Modern

Catalog Description

(Also listed as CLAS 3120) Ancient comic forms juxtaposed with modern theories of humor. Aristophanic Old Comedy, New Comedy, and Satire. Modern parallels. No credit for students who have earned credit for 3120. [3]

CLAS6150 - Roman Law

Title

Roman Law

Catalog Description

(Also listed as CLAS 3150) The relationship between law and society as illustrated by cases drawn from Roman legal and literary sources. The development of legal reasoning and the rise of an autonomous legal profession at Rome. No credit for students who have earned credit for 3150. [3]

CLAS6160 - Roman Law and Social History

Title

Roman Law and Social History

Catalog Description

(Also listed as CLAS 3160) Relationship of law and society as illustrated by legal, literary, epigraphic, and papyrological evidence. Views and methodologies of leading modern scholars. Focus on methodology. Marriage, family, personal status, the economy, and judicial system. Basic familiarity with Roman history or law is expected. [3]

CLAS6190 - Augustan Rome**Title**

Augustan Rome

Catalog Description

(Also listed as CLAS 3190W) Social, administrative, religious, and military reforms. Common themes in art, architecture, and literature; changes in national identity in the transition from Republic to Empire. No credit for students who have earned credit for 3190W. [3]

CLAS6200 - The Greek City**Title**

The Greek City

Catalog Description

(Also listed as CLAS 3200) The example of ancient Athens. The stoa, the theatre, the house, and fortifications. Institutions such as the courts, the public assembly, and the family. Literary, historical, archaeological, and philosophical sources. No credit for students who have earned credit for HART 263. No credit for students who have earned credit for 3200. [3]

CLAS6210 - The Archaeology of Greek Sanctuaries**Title**

The Archaeology of Greek Sanctuaries

Catalog Description

(Also listed as CLAS 3210) Study of ancient Greek religious worship through an examination of temples, altars, cult images, votives, priests, and processions. Panhellenic sanctuaries and oracular and mystery cults. No credit for students who have earned credit for 3700 or 3210. [3]

CLAS6220 - The Trojan War in History, Art, and Literature**Title**

The Trojan War in History, Art, and Literature

Catalog Description

(Also listed as CLAS 3220) Representations in Classical Greek art, literature, and archaeological evidence. The composition of the Homeric epics; the meaning of the Trojan War to later audiences. No credit for students who have earned credit for 3220. [3]

CLAS6230 - Alexander the Great**Title**

Alexander the Great

Catalog Description

(Also listed as CLAS 3230) Alexander's rise to power and conquests in Europe, Asia, and Africa; the legacy of his introduction of Greek culture to the East; his significance to later audiences. Offered on a graded basis only. No credit for students who have earned credit for 3230. [3]

CLAS6240 - The Parthenon, the Akropolis, and Fifth Century Athens

Title

The Parthenon, the Akropolis, and Fifth Century Athens

Catalog Description

(Also listed as CLAS 3210) Ancient Athens in the fifth century BCE. Art, architecture, literature, history, and historical evidence for religious and political life in the city. No credit for students who earned credit for 295 or 295W prior to fall 2014. [3] (HCA)

CLAS6300 - Akkadian

Title

Akkadian

Catalog Description

(Also listed as CLAS 3300) Introduction to the cuneiform script and to the grammar of Akkadian, the language of ancient Mesopotamia. Selected readings in Old Babylonian (CODEX Hammurabi, Mari letters) and Neo-Assyrian texts (Creation Poem, Gilgamesh Epic). No credit for students who have earned credit for 3300. [3]

CLAS6301 - Akkadian

Title

Akkadian

Catalog Description

(Also listed as CLAS 3301) Continuation of 6300. Introduction to the cuneiform script and to the grammar of Akkadian, the language of ancient Mesopotamia. Selected readings in Old Babylonian (CODEX Hammurabi, Mari letters) and Neo-Assyrian texts (Creation Poem, Gilgamesh Epic). No credit for students who have earned credit for 3301. [3]

CLAS6310 - Culture of the Ancient Near East

Title

Culture of the Ancient Near East

Catalog Description

(Also listed as CLAS 3310) A survey of highly sophisticated Near East cultures of the last three millennia before the common era (B.C.). Discussion of political histories, and the social, religious, and intellectual heritage of Mesopotamia, Egypt, and Anatolia through excavated artifacts and written documents. No credit for students who have earned credit for 3310. [3]

CLAS6320 - The Amarna Age

Title

The Amarna Age

Catalog Description

(Also listed as CLAS 3320) The Amarna period from the sixteenth through the twelfth centuries B.C.E., as illumined by excavations of palaces and temples in Egypt, Anatolia, Canaan, and Mesopotamia as well as the vast historical, legal, and literary documents of the period. Focus on the internationalism and theological speculation of the period as seen through the powerful personalities and accomplishments of leaders such as Thutmose III, Suppiluliumas, Ramses II, and the spiritually influential Akehnaten. No credit for students who have earned credit for 3320. [3]

CLAS7000 - Seminar in Classics**Title**

Seminar in Classics

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

CLAS7100 - Seminar: Studies in Ancient History**Title**

Seminar: Studies in Ancient History

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

CLAS7200 - Seminar in Classical Art and Architecture**Title**

Seminar in Classical Art and Architecture

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

CLAS7850 - Independent Study**Title**

Independent Study

Catalog Description

An individual reading and study program on an author or area of classical antiquity not treated in the regular curriculum. No formal instruction is given, but the student's work is supervised and evaluated by one or more members of the staff. Open only to students who have completed one year of graduate study in classics. May be repeated for a total of 12 credits, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 12 credits for all semesters of CLAS 7850]

CLAS7999 - Master's Thesis Research**Title**

Master's Thesis Research

Catalog Description

[0-12]

Communication of Science and Technology

CSET5090 - Introduction to Science and Technology Policy Analysis

Title

Introduction to Science and Technology Policy Analysis

Catalog Description

Interactions between science, technology, and policy, including regulatory failures, funding controversies, and the public perception of the value of scientific research. American context and comparative perspectives. Multidisciplinary approach drawing on political science, philosophy, economics, sociology, and history. [3]

CSET5100 - Science Communication Tools and Techniques

Title

Science Communication Tools and Techniques

Catalog Description

(Also listed as CSET 2100) Translating technical research for a general readership. Benefits and limitations of different formats, texts, and media for telling stories about science. No credit for students who earned credit for 150 in fall 2011 or fall 2012. No credit for students who earned credit for CMST 237 before fall 2013. No credit for students who have earned credit for 2100. [3]

CSET5200 - Technical Writing

Title

Technical Writing

Catalog Description

Introduction to technical and professional composition for careers in science, business, and industry. Prerequisite: major or minor in Communication of Science and Technology. Open to other students with permission of instructor. [3] (HCA)

CSET5240 - Pop Science: The Art and Impact of Popular Science Writing

Title

Pop Science: The Art and Impact of Popular Science Writing

Catalog Description

Mechanics and influence of popular science writing in the 21st century. Students will critique bestselling books and award-winning journalism; develop and publish their own blogs with a focus on science, technology, and the environment; and interact with top science writers, editors, and podcasters. Not open to students who have earned credit for CSET 3890 section 01 offered fall 2019. [3]

CSET5257 - Virtual Reality Design

Title

Virtual Reality Design

Catalog Description

Interdisciplinary, project-based introduction to Virtual Reality (VR). Creation of immersive environments. Student projects guided by faculty mentors to create real-world, consequential VR simulations relevant to, and innovative in, their respective fields. Serves as repeat credit for students who have completed UNIV 3279. [3]

CSET5320 - Environmental Journalism: Investigating Climate Change
Title

Environmental Journalism: Investigating Climate Change

Catalog Description

Science, solutions, stakeholders, players, politics, history, and local impacts of climate change. Students pursue their own local reporting, investigating the effects of climate change and the emerging green economy in Nashville. Not open to students who have earned credit for 3890 section 01 offered spring 2020 or ENGL 3896 section 01 offered spring 2020 or ENGL 3896 section 01 offered spring 2019. [3]

CSET5890 - Special Topics
Title

Special Topics

Catalog Description

Topics as announced. May be repeated for credit more than once if there is no duplication in topic, but students may earn only 3 credits per semester of enrollment. [3]

CSET6100 - Science Policy Bootcamp, from Concept to Conclusion
Title

Science Policy Bootcamp, from Concept to Conclusion

Catalog Description

Interdisciplinary service learning. Trends that shape science and innovation policy. Active policy-making. Prerequisite: Major or minor in Communication of Science and Technology or Public Policy Studies. Open to other students with permission of instructor. [3]

Comparative Media Analysis and Practice

CMAP8001 - Media and the Senses
Title

Media and the Senses

Catalog Description

Seminal theories of modern media and how different media shape sensory perception. Impact of media technologies such as phonography, photography, cinema, and digital imaging on vision, hearing, touch, smell, taste, and locomotion. How human body and brain have been theorized as media. Team-taught by interdisciplinary group of faculty. [3]

CMAP8002 - History of Media
Title

History of Media

Catalog Description

History of media technologies with special emphasis on historical moments of rupture: invention of the printing press; advent of photography and phonography; transition from silent to sound film; introduction of personal computing; emergence of satellite imaging and MRI technologies. Team-taught by interdisciplinary group of faculty. [3]

CMAP8003 - Media and Society

Title

Media and Society

Catalog Description

Political and economic frameworks of media practice. Authorship, copyright, privacy and publicness in times of big data. Media and power, gender, body, disability, knowledge, and identity. Social media and networks. Media literacy and accessibility. Team-taught by interdisciplinary group of faculty. [3]

CMAP8004 - Media Ecology

Title

Media Ecology

Catalog Description

Interplay between technology, culture, and all aspects of human life. Media as environment. Effects of media technologies on built environments such as urban centers, academic learning spaces, museum and gallery settings, hospitals, transitory spaces, domestic interiors, and natural surroundings. Team-taught by interdisciplinary group of faculty. [3]

CMAP8005 - Project, Research, and Professionalization Colloquium

Title

Project, Research, and Professionalization Colloquium

Catalog Description

Discussion and development of various media-based research work, including dissertations. Institutional and professionalization matters and development of various perspectives for careers, academic or alternative-academic. [3]

CMAP8010 - Creative Media Practice

Title

Creative Media Practice

Catalog Description

Creative work with moving images and sound. Principles of web design. Text and print in the digital age. Animation and game development strategies. Tools and strategies of digital pedagogy and online education. Fundamentals in programming and coding. 3D modeling. Desktop fabrication. Team-taught by interdisciplinary group of faculty. [3-4]

CMAP8011 - Working with Data

Title

Working with Data

Catalog Description

Fundamentals of digitization and digital curation. Working with databases: text and data mining strategies and topic modeling. Medical imaging techniques and technologies. Geographical information and mapping systems. Copyright law in the digital age. Team-taught by interdisciplinary group of faculty. [3-4]

Computer Science

CS5249 - Projects in Virtual Reality Design

Title

Projects in Virtual Reality Design

Catalog Description

Students work in groups on specification, design, and construction of complex immersive 3D virtual environments. Includes modeling, interaction, usability, rendering, perception, and tracking. No credit for students who have earned credit for 4249. FALL. [3].

CS5250 - Algorithms

Title

Algorithms

Catalog Description

(Also listed as CS 3250) Advanced data structures, systematic study and analysis of important algorithms for searching; sorting; string processing; mathematical, geometrical, and graph algorithms, classes of P and NP, NP-complete and intractable problems. No credit for students who have earned credit for 3250. FALL, SPRING. [3]

CS5251 - Intermediate Software Design

Title

Intermediate Software Design

Catalog Description

(Also listed as CS 3251) High quality development and reuse of architectural patterns, design patterns, and software components. Theoretical and practical aspects of developing, documenting, testing, and applying reusable class libraries and object-oriented frameworks using object-oriented and component-based programming languages and tools. No credit for students who have earned credit for 3251. FALL, SPRING [3]

CS5252 - Theory of Automata, Formal Languages, and Computation

Title

Theory of Automata, Formal Languages, and Computation

Catalog Description

(Also listed as CS 3252) Finite-state machines and regular expressions. Context-free grammars and languages. Pushdown automata. Turing machines. Undecideability. The Chomsky hierarchy. Computational complexity. No credit for students who have earned credit for 3252. SPRING. [3]

CS5253 - Parallel Functional Programming

Title

Parallel Functional Programming

Catalog Description

Conceptual and practical aspects of designing, implementing, and debugging parallel software programs using functional programming language features and frameworks. Systematic reuse of scalable and robust software patterns and architectures for parallel programs. No credit for students who have earned credit for 3253. FALL. [3]

CS5254 - Concurrent Object-Oriented Programming

Title

Concurrent Object-Oriented Programming

Catalog Description

Conceptual and practical aspects of designing, implementing, and debugging concurrent software programs using object-oriented programming language features and frameworks. Systematic reuse of scalable and robust software patterns and architectures for concurrent programs. No credit for students who have earned credit for 3254. SPRING. [3]

CS5258 - Computer Graphics

Title

Computer Graphics

Catalog Description

(Also listed as CS 3258) 2D rendering and image-based techniques, 2D and 3D transformations, modeling, 3D rendering, graphics pipeline, ray-tracing, and texture-mapping. No credit for students who have earned credit for 3258. FALL. [3]

CS5259 - Project in Computer Animation Design and Technology

Title

Project in Computer Animation Design and Technology

Catalog Description

(Also listed as CS 3259) Principles and techniques of computer animation. Storyboarding, camera control, skeletons, inverse kinematics, splines, keyframing, motion capture, dynamic simulation, particle systems, facial animation, and motion perception. Students work in groups on the design, modeling, animation, and rendering of a computer animation project. No credit for students who have earned credit for 3259. FALL. [3]

CS5260 - Artificial Intelligence

Title

Artificial Intelligence

Catalog Description

(Also listed as CS 4260) Principles and programming techniques of artificial intelligence. Strategies for searching, representation of knowledge and automatic deduction, learning, and adaptive systems. Survey of applications. No credit for students who have earned credit for 4260. FALL. [3]

CS5262 - Foundations of Machine Learning

Title

Foundations of Machine Learning

Catalog Description

Theoretical and algorithmic foundations of supervised learning, unsupervised learning, and reinforcement learning. Linear and nonlinear regression, kernel methods, support vector machines, neural networks and deep learning methods, instance-based methods, ensemble classifiers, clustering and dimensionality reduction, value and policy iteration. Explainable AI, ethics, and data privacy. SPRING. [3]

CS5265 - Database Management Systems

Title

Database Management Systems

Catalog Description

(Also listed as CS 3265) Logical and physical organization of databases. Data models and query languages, with emphasis on the relational model and its semantics. Data independence, security, integrity, concurrency. No credit for students who have earned credit for 3265. [3]

CS5266 - Topics in Big Data

Title

Topics in Big Data

Catalog Description

Principles and practices of big data processing and analytics. Data storage databases and data modeling techniques, data processing and querying, data analytics and applications of machine learning using these systems. SPRING. [3]

CS5269 - Project in Artificial Intelligence

Title

Project in Artificial Intelligence

Catalog Description

(Also listed as CS 4269) Students work in small groups on the specification, design, implementation, and testing of a sizeable AI software project. Projects (e.g., an "intelligent" game player) require that students address a variety of AI subject areas, notably heuristic search, uncertain reasoning, planning, knowledge representation, and learning. Class discussion highlights student progress, elaborates topics under investigation, and identifies other relevant topics (e.g., vision) that the project does not explore in depth. No credit for students who have earned credit for 4269. SPRING. [3]

CS5270 - Programming Languages

Title

Programming Languages

Catalog Description

(Also listed as CS 3270) General criteria for design, implementation, and evaluation of programming languages. Historical perspective. Syntactic and semantic specification, compilations, and interpretation processes. Comparative studies of data types and data control, procedures and parameters, sequence control, nesting, scope and storage management, run-time representations. Problem solving using non-standard languages. No credit for students who have earned credit for 3270. FALL, SPRING. [3]

CS5274 - Modeling and Simulation

Title

Modeling and Simulation

Catalog Description

(Also listed as CS 3274) General theory of modeling and simulation of a variety of systems: physical processes, computer systems, biological systems, and manufacturing processes. Principles of discrete-event, continuous, and hybrid system modeling, simulation algorithms for the different modeling paradigms, methodologies for constructing models of a number of realistic systems, and analysis of system behavior. Computational issues in modeling and analysis of systems. Stochastic simulations. No credit for students who have earned credit for 3274. [3]

CS5276 - Compiler Construction

Title

Compiler Construction

Catalog Description

(Also listed as CS 3276) Review of programming language structures, translation, loading, execution, and storage allocation. Compilation of simple expressions and statements. Organization of a compiler including compile-time and run-time symbol tables, lexical scan, syntax scan, object code generation, error diagnostics, object code optimization techniques, and overall design. Use of a high-level language to write a complete compiler. No credit for students who have earned credit for 3276. [3]

CS5277 - Cyber Security

Title

Cyber Security

Catalog Description

Software issues, secure software design, attacks and detection, identity, sessions, human security mistakes, and security auditing. No credit for students who have earned credit for 4277. FALL. [3]

CS5278 - Principles of Software Engineering

Title

Principles of Software Engineering

Catalog Description

(Also listed as CS 4278) The nature of software. The object-oriented paradigm. Software life-cycle models. Requirements, specification, design, implementation, documentation, and testing of software. Object-oriented analysis and design. Software maintenance. No credit for students who have earned credit for 4278. FALL. [3]

CS5279 - Software Engineering Project

Title

Software Engineering Project

Catalog Description

(Also listed as CS 4279) Students work in teams to specify, design, implement, document, and test a nontrivial software project. The use of CASE (Computer Assisted Software Engineering) tools is stressed. No credit for students who have earned credit for 4279. SPRING. [3]

CS5281 - Principles of Operating Systems I

Title

Principles of Operating Systems I

Catalog Description

(Also listed as CS 3281) Resource allocation and control functions of operating systems. Scheduling of processes and processors. Concurrent processes and primitives for their synchronization. Use of parallel processes in designing operating system subsystems. Methods of implementing parallel processes on conventional computers. Virtual memory, paging, protection of shared and non-shared information. Structures of data files in secondary storage. Security issues. Case studies. No credit for students who have earned credit for 3281. FALL, SPRING. [3]

CS5282 - Principles of Operating Systems II

Title

Principles of Operating Systems II

Catalog Description

(Also listed as CS 3282) Projects involving modification of a current operating system. Lectures on memory management policies, including virtual memory. Protection and sharing of information, including general models for implementation of various degrees of sharing. Resource allocation in general, including deadlock detection and prevention strategies. Operating system performance measurement, for both efficiency and logical correctness. Two hours lecture and one hour laboratory. No credit for students who have earned credit for 3282. [3]

CS5283 - Computer Networks

Title

Computer Networks

Catalog Description

(Also listed as CS 4283) Computer communications. Network (Internet) architecture. Algorithms and protocol design at each layer of the network stack. Cross-layer interactions and performance analysis. Network simulation tools. Lab and programming assignments. No credit for students who have earned credit for 4283. [3]

CS5284 - Computer Systems Analysis

Title

Computer Systems Analysis

Catalog Description

(Also listed as CS 4284) Techniques for evaluating computer system performance with emphasis upon application. Topics include measurement and instrumentation techniques, benchmarking, simulation techniques, elementary queuing models, data analysis, operation analysis, performance criteria, case studies. Project involving a real computer system. No credit for students who have earned credit for 4284. [3]

CS5285 - Network Security

Title

Network Security

Catalog Description

(Also listed as CS 4285) Principles and practice of network security. Security threats and mechanisms. Cryptography, key management, and message authentication. System security practices and recent research topics. No credit for students who have earned credit for 4285. [3]

CS5287 - Principles of Cloud Computing

Title

Principles of Cloud Computing

Catalog Description

(Also listed as CS 4287) Fundamental concepts of cloud computing, different service models, techniques for resource virtualization, programming models, management, mobile cloud computing, recent advances, and hands-on experimentation. No credit for students who have earned credit for 4287. [3]

CS5288 - Web-based System Architecture

Title

Web-based System Architecture

Catalog Description

(Also listed as CS 4288) Core concepts necessary to architect, build, test, and deploy complex web-based systems; analysis of key domain requirements in security, robustness, performance, and scalability. No credit for students who have earned credit for 4288. FALL. [3]

CS5891 - Special Topics

Title

Special Topics

Catalog Description

(Also listed as CS 3891) [Variable credit: 1-3 each semester] No credit for students who have earned credit for 3891.

CS5892 - Special Topics

Title

Special Topics

Catalog Description

(Also listed as CS 3892) [Variable credit: 1-3 each semester] No credit for students who have earned credit for 3892.

CS6310 - Design and Analysis of Algorithms

Title

Design and Analysis of Algorithms

Catalog Description

Set manipulation techniques, divide-and-conquer methods, the greedy method, dynamic programming, algorithms on graphs, backtracking, branch-and-bound, lower bound theory, NP-hard and NP-complete problems, approximation algorithms. Prerequisite: CS 3250. SPRING. [3]

CS6311 - Graph Algorithms

Title

Graph Algorithms

Catalog Description

Algorithms for dealing with special classes of graphs. Particular emphasis is given to subclasses of perfect graphs and graphs that can be stored in a small amount of space. Interval, chordal, permutation, comparability, and circular-arc graphs; graph decomposition. Prerequisite: CS 6310 or Math 4710. [3]

CS6315 - Automated Verification

Title

Automated Verification

Catalog Description

Systems verification and validation, industrial case studies, propositional and predicate logic, syntax and semantics of computational tree and linear time logics, binary decision diagrams, timed automata model and real-time verification, hands on experience with model checking using the SMV, SPIN and UPPAAL tools, and state reduction techniques. [3]

CS6320 - Algorithms for Parallel Computing

Title

Algorithms for Parallel Computing

Catalog Description

Design and analysis of parallel algorithms for sorting, searching, matrix processing, FFT, optimization, and other problems. Existing and proposed parallel architectures, including SIMD machines, MIMD machines, and VLSI systolic arrays. Prerequisite: CS 6310. [3]

CS6350 - Artificial Neural Networks

Title

Artificial Neural Networks

Catalog Description

Theory and practice of parallel distributed processing methods using networks of neuron-like computational devices. Neurobiological inspirations, attractor networks, correlational and error-correction learning, regularization, unsupervised learning, reinforcement learning, Bayesian and information theoretic approaches, hardware support, and engineering applications. SPRING. [3]

CS6351 - Advanced Animation

Title

Advanced Animation

Catalog Description

Current research issues and problems in computer animation, with special focus on motion capture, dynamic simulation, and key-framing. Cloth, deformable bodies, natural phenomena, geometric algorithms, procedural techniques, facial animation, hair, autonomous characters, flocking, empirical evaluation, and interfaces for animation. Prerequisite: CS 3259. FALL. [3]

CS6352 - Human-Computer Interaction

Title

Human-Computer Interaction

Catalog Description

An overview of human computer interaction and problems of current interest. Topics include: Human factors, GOMS, user interface design and evaluation, interaction modalities, distributed cognition, ubiquitous computing. A project involving design and evaluation will be performed. [3]

CS6358 - Computer Vision

Title

Computer Vision

Catalog Description

The fundamentals of computer vision and techniques for image understanding and high-level image processing. Includes image segmentation, geometric structures, relational structures, motion, matching, inference, and vision systems. Prerequisite: EECE 6357. SPRING. [3]

CS6359 - Medical Image Registration

Title

Medical Image Registration

Catalog Description

Foundations of medical image registration. Mathematical methods and practical applications. Image-to-image registration, image-to-physical registration, applications to image-guided procedures and the most commonly used imaging modalities with an emphasis on tomographic images. FALL. [3]

CS6360 - Advanced Artificial Intelligence

Title

Advanced Artificial Intelligence

Catalog Description

Discussion of state-of-the-art and current research issues in heuristic search, knowledge representation, deduction, and reasoning. Related application areas include: planning systems, qualitative reasoning, cognitive models of human memory, user modeling in ICAI, reasoning with uncertainty, knowledge-based system design, and language comprehension. Prerequisite: CS 4260 or equivalent. [3]

CS6362 - Advanced Machine Learning

Title

Advanced Machine Learning

Catalog Description

Theory and algorithms for designing systems that learn from data including modern machine learning methods that take advantage of increased complexity to provide improved performance. Data types, data pre-processing, measures of similarity and dissimilarity. Supervised learning: decision trees, logistic regression, support vector machines, Bayesian methods, and neural networks; unsupervised learning: partitional, hierarchical, density-based, and graph clustering algorithms. Feature selection for classification and clustering. Evaluation methods. Reinforcement learning: Markov Decision processes, dynamic programming, Monte Carlo methods, TD-learning. Prerequisite: CS 4262 or 5262 or 6360. FALL. [3]

CS6364 - Intelligent Learning Environments

Title

Intelligent Learning Environments

Catalog Description

Theories and concepts from computer science, artificial intelligence, cognitive science, and education that facilitate designing, building, and evaluating computer-based instructional systems. Development and substantiation of the concept, architecture, and implementation of intelligent learning environments. Multimedia and web-based technology in teaching, learning, collaboration, and assessment. Prerequisite: CS 5260, CS 6360, or equivalent. [3]

CS6366 - Distributed Artificial Intelligence

Title

Distributed Artificial Intelligence

Catalog Description

Principles and practice of multiple agent systems for distributed artificial intelligence. Game theory, distributed negotiation and decision making, distributed problem solving, cooperation, coalition formation and distributed learning. Prerequisite: CS 4260. [3]

CS6368 - Computational Economics

Title

Computational Economics

Catalog Description

Models and methods in computational economics, such as linear and non-linear optimization, decision theory, game theory, mechanism design, and computational tools. Applications in areas such as auctions, economics of security and privacy, market design, and algorithmic trading. Prereq: CS 4260 or 5260. SPRING. [3]

CS6375 - Discrete-Event Systems: Supervisory Control and Diagnosis

Title

Discrete-Event Systems: Supervisory Control and Diagnosis

Catalog Description

Algebraic structures, automata and formal language theory, process modeling with finite-state automata, supervisory control theory, controllability and supervision, supervisory control under partial observation, modular and hierarchical supervisory control, supervisory control of real-time systems, fault diagnosis of discrete-event systems, and modular diagnosis approaches. SPRING. [3]

CS6376 - Foundations of Hybrid and Embedded Systems

Title

Foundations of Hybrid and Embedded Systems

Catalog Description

Modeling, analysis, and design of hybrid and embedded systems. Heterogeneous modeling and design of embedded systems using formal models of computation, modeling and simulation of hybrid systems, properties of hybrid systems, analysis methods based on abstractions, reachability, and verification of hybrid systems. FALL. [3]

CS6377 - Topics in Embedded Software and Systems

Title

Topics in Embedded Software and Systems

Catalog Description

Specification and composition of domain-specific modeling languages. Design methodologies for embedded systems. Platforms for embedded system design and implementation. Analysis of embedded systems. SPRING. [3]

CS6381 - Distributed Systems Principles

Title

Distributed Systems Principles

Catalog Description

Techniques and mechanisms in distributed system design, such as logical clocks, distributed consensus, distributed mutual exclusion, consistency models, fault tolerance and paradigms of communication. Contemporary distributed system case studies and open challenges. Prerequisite: CS 3281. [3]

CS6384 - Performance Evaluation of Computer Systems

Title

Performance Evaluation of Computer Systems

Catalog Description

Techniques for computer systems modeling and analysis. Analytical modeling with emphasis on queuing network models, efficient computational algorithms for exact and approximate solutions, parameter estimation and prediction, validation techniques, workload characterization, performance optimization, communication and distributed system modeling. Prerequisite: CS 3281 or 6381. SPRING. [3]

CS6385 - Advanced Software Engineering

Title

Advanced Software Engineering

Catalog Description

An intensive study of selected areas of software engineering. Topics may include CASE tools, formal methods, generative techniques, aspect-oriented programming, metrics, modeling, reuse, software architecture, testing, and open-source software. Prerequisite: CS 5278. FALL. [3]

CS6386 - System-Level Fault Diagnosis

Title

System-Level Fault Diagnosis

Catalog Description

An overview of the basic concepts of the theory of fault diagnosis and problems of current interest. Topics include the classical PMC and BGM models of fault diagnosis, hybrid (permanent and intermittent faults) models, diagnostic measures for one-step, sequential, and inexact diagnosis. Emphasis is on algorithmic techniques for solving the diagnosis and diagnosability problems in various models. Prerequisite: CS 6381. SPRING. [3]

CS6387 - Topics in Software Engineering

Title

Topics in Software Engineering

Catalog Description

Topics may include empirical software engineering and open-source software engineering. Prerequisite: CS 5278 or consent of instructor. SPRING. [3]

CS6388 - Model-Integrated Computing

Title

Model-Integrated Computing

Catalog Description

Problems of designing, creating, and evolving information systems by providing rich, domain-specific modeling environments including model analysis and model-based program synthesis tools. Class presentation and project are required. FALL. [3]

CS7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

[0-6]

CS8390 - Individual Studies

Title

Individual Studies

Catalog Description

[1-3]

CS8395 - Special Topics

Title

Special Topics

Catalog Description

[3]

CS8396 - Special Topics

Title

Special Topics

Catalog Description

[3]

CS8991 - Seminar

Title

Seminar

Catalog Description

[1-3 each semester]

CS8992 - Seminar

Title

Seminar

Catalog Description

[1-3 each semester]

CS8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [0-12]

CS9999 - Ph.D. Dissertation Research
Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Data Science

DS5220 - Principles of Programming and Simulation
Title

Principles of Programming and Simulation

Catalog Description

Students learn the foundations of effective software design and programming practice, how to program and evaluate a simulation, and how to apply modern resampling techniques in simulations in both R and Python. Students learn workflow solutions, e.g., Jupyter Notebooks, Latex, Knitr, Markdown reports, and collaboration platforms (e.g., GitHub and version control). Reproducible methods for programming and data processing are emphasized. [3]

DS5320 - Survey of Data Science Applications
Title

Survey of Data Science Applications

Catalog Description

This course introduces foundational data science terminology and conventions, and exposes students to a wide range of data science applications, e.g., in genomics, health care, informatics, astronomy/physics, neuroimaging, cyber-physical systems, business, and finance. [3]

DS5340 - Data Science Rights and Responsibility
Title

Data Science Rights and Responsibility

Catalog Description

This course explores the ethos, ethics, and obligations of the modern data scientist. Modern data security and privacy vulnerabilities, as well as solutions, for individual-level data and the institutions from which the data is derived will be discussed. The history, ethics, and standards for human experimentation are reviewed. The legal landscape concerning data ownership and privacy will be surveyed. [3]

DS5360 - Case Studies in Data Science
Title

Case Studies in Data Science

Catalog Description

This course will focus on an in-depth exploration of multiple (e.g., 6-8) case studies of modern data science applications. For half of the case studies, students in small groups will attempt their own solutions by re-analyze data and comparing their findings to each other and the original solution. The other case studies will focus on high-profile data science solutions, in academia and business, in which two yielded generally positive outcomes (reproducible, impactful) and two did not (not-reproducible, unethical). The processes of obtaining and processing the data, performing the analysis, and communicating the results will be discussed. [3]

DS5380 - Data Science in Teams I

Title

Data Science in Teams I

Catalog Description

Students will work in small groups to engage in real world problems, and apply their skills in a supervised environment where active learning is reinforced, and learn to make practical decisions. First students will learn how to process data, generate analysis reports and data summaries. Data will come from many sources, e.g. Kaggle competitions, VU/VUMC labs, and online documented data sets. Students will experience a goal-oriented teamwork environment and learn how to participate and support teams as the primary data curator and data analyst. [3]

DS5384 - Data Science in Teams II

Title

Data Science in Teams II

Catalog Description

Second-year students will lead the small groups formed the Data Science in Teams I class. Here second-year students get to take on the responsibility of team leader and presenter; they will learn supervisory skills by managing team members and taking responsibility for the final project. This also allows student cohorts to interact in a formal setting. [3]

DS5420 - Data Management Systems

Title

Data Management Systems

Catalog Description

This course covers database management systems, e.g., relation databases, data architecture, and security. Topics include entity-relationship models and relational theory; storage and access of data; complex SQL queries; and non-relational databases including NoSQL databases. Students are exposed to data base architectures as time allows. [3]

DS5440 - Data Science Algorithms

Title

Data Science Algorithms

Catalog Description

An applied and practical combination of discrete structures and computational algorithms that are relevant for data science applications and infrastructure. Topics include natural language processing, graph and network models, (stochastic) gradient descent, block coordinate descent, and (quasi-) newton methods along with an overview of more traditional topics such as sorting and searching, hashing, queues, trees, string processing, advanced data structures, recurrence relations, shortest paths, matching, and dynamic programming. The course will also cover streaming algorithms for computational statistics, e.g., Monte-Carlo Markov Chain, simulated annealing, and stability of numerical algorithms. [3]

DS5460 - Big Data Scaling

Title

Big Data Scaling

Catalog Description

This course will address key challenges that arise when working with big data and parallel processing. Practical techniques for storing, retrieving, and scaling are discussed. Topics include high-performance computing, parallel processing, commercial cloud architectures, and mapping of data science algorithms onto scalable computing platforms. [3]

DS5610 - Exploratory Data Analysis

Title

Exploratory Data Analysis

Catalog Description

This course will teach students how to explore, summarize, and graph data (big and small). Topics include principles of perception, how to display data, scatterplots, histograms, boxplots, bar charts, dynamite plots, proper data summaries, dimensionality reduction, multidimensional scaling, and unsupervised clustering algorithms, such as principal component analysis, k-means clustering, and nearest neighbor algorithms. [3]

DS5620 - Probability and Statistical Inference

Title

Probability and Statistical Inference

Catalog Description

This course covers the fundamentals of probability theory and statistical inference. Topics in probability include random variables, distributions, expectations, moments, Jensen's inequality, law of large numbers, central limit theorem. Topics in inference include maximum likelihood, point estimation (Bayesian, frequentist, and likelihood versions); hypothesis and significance testing; re-sampling techniques. Complex mathematical proofs will be illustrated with computational solutions. [3]

DS5640 - Modeling and Machine Learning I

Title

Modeling and Machine Learning I

Catalog Description

This is the first course in a sequence exploring statistical modeling and machine learning techniques. Both courses emphasize unifying and advanced concepts, such as prediction and calibration, classification and discrimination, optimism and cross-validation, re-sampling methods for model assessment, the evaluation of modeling assumptions and bias-variance trade-off. This first course focused on regression, generalized linear models, regularized regression, support-vector machines and kernel methods, and simple neural networks. [3]

DS5660 - Modeling and Machine Learning II

Title

Modeling and Machine Learning II

Catalog Description

This is the second course in a sequence exploring statistical modeling and machine learning techniques. Both courses emphasize unifying and high-level concepts such as prediction and calibration, classification and discrimination, optimism and cross-validation, re-sampling methods for model assessment, the evaluation of modeling assumptions and bias-variance trade-off. This second course covers nonparametric regression, neural networks (convolution and recurrent), deep learning, reinforcement learning, long-short term memory models, hidden-markov models and Bayesian networks. [3]

DS5700 - Data Science Internship

Title

Data Science Internship

Catalog Description

This course is a supervised internship external to Vanderbilt. Students have an opportunity to apply concepts learned in the classroom to real-world settings in a supervised internship experience. The experience hones technical skills, fosters professional development, and enhances communication, critical-thinking, and teamwork skills. Students must present a one-page plan for their internship and generate at least one deliverable (talk, report, etc.) based on their internship experience. Student will need to identify a Data Science faculty mentor to monitor their progress and discuss their experience. [0-3]

DS5720 - Social Network Analysis

Title

Social Network Analysis

Catalog Description

Explores recent research on the analysis of social networks and on models and algorithms that are used to abstract their properties and make predictions. Key topics covered in this course are: Graph models; Network centrality measurements; Computational methods of link prediction, clustering and classification on graphs, and network diffusion; Deep learning on graphs including network embedding and graph neural network models and their applications. Prerequisites: DS 5440 and 5660. [3]

DS5740 - Data Science for Business and Finance

Title

Data Science for Business and Finance

Catalog Description

This course explores data science tools and applications in business and finance. Students will learn common business applications of data science and work with real world data for a hands-on experience. The class will explain how data science can drive business value and how to connect that value with overall business strategy. Example applications include topics such as time series forecasting, loan approval, credit scoring, churn prediction, customer segmentation, portfolio risk management, portfolio selection, and customer sentiment monitoring. [3]

DS5799 - Independent Study

Title

Independent Study

Catalog Description

Designed to allow the student to explore and/or master advanced or specialized topics in Data Science. Can be used for research project credit, internship experience. [0-3]

DS5800 - Data Science Practicum

Title

Data Science Practicum

Catalog Description

This course is a supervised practicum in data science at Vanderbilt or VUMC. Students have an opportunity to apply concepts learned in the classroom to real-world settings in a supervised lab experience. The experience hones technical skills, fosters professional development, and enhances communication, critical-thinking, and teamwork skills. Students must present a one-page plan for their practicum and generate at least one deliverable (talk, report, etc.) based on their experience. Student will need to identify a Data Science faculty mentor to monitor their progress and discuss their experience. [0-3]

DS5999 - Capstone Development

Title

Capstone Development

Catalog Description

A structured environment in which students develop their capstone projects; get feedback from students, faculty, and industry mentors; learn how to construct a poster presentation; and practice oral presentations. Students will also learn how to set a timeline and work toward completion in a supervised environment. [3]

DS7999 - Master's Research

Title

Master's Research

Catalog Description

Master's Research in Data Science [0-3]

Digital Humanities

DHUM5100 - Introduction to Digital Humanities

Title

Introduction to Digital Humanities

Catalog Description

Hands-on experience with essential technologies including digital archives, geospatial humanities, and data and text analysis. History, sub-fields, and major debates; quantitative and qualitative research; intersections of race, gender, and technology; and software studies. Offered on a graded basis only. [3]

DHUM6300 - Computational Humanities

Title

Computational Humanities

Catalog Description

Computational analysis of texts, images, video, and sound recordings. Text analysis and data analysis using Python and R, fundamentals of machine learning, creating and using databases, and statistical modeling for humanities research. Debates and controversies surrounding computational humanities. Writing about computational research for humanities audiences. No prior statistical or computing experience is necessary. [3]

Earth and Environmental Sciences

EES5110 - Global Climate Change

Title

Global Climate Change

Catalog Description

(Also listed as EES 2110) Science and policy of global climate change: history and causes of climate change in Earth's past, with emphasis on the last 2 million years; evidence of human impacts on climate since 1850; future climate change and its economic, social, and ecological consequences; economic, technological, and public policy responses. No credit for students who have earned credit for 2110. [3]

EES5220 - Life Through Time**Title**

Life Through Time

Catalog Description

(Also listed as EES 3220) Ecology, classification, and evolution of important groups of fossils, emphasizing invertebrates. Change in marine ecosystems through geologic time. Causes and effects of rapid evolution events and mass extinctions. Three hours of lecture and one laboratory period per week. No credit for students who have earned credit for 3220 or 3220W. [4]

EES5233 - Conservation Biology**Title**

Conservation Biology

Catalog Description

Ecological, evolutionary, social, and economic aspects of biodiversity loss and ecosystem disruption due to human activities. Climate change, habitat fragmentation, species overexploitation, and invasive species. Sustainable development, habitat restoration, and species reintroduction. [3]

EES5238 - Ecology**Title**

Ecology

Catalog Description

Population biology, evolutionary ecology, community structure, with emphasis on species interactions, including competition, predation, and symbiosis. No credit for students who have earned credit for 4238. [3]

EES5250 - Earth Materials**Title**

Earth Materials

Catalog Description

(Also listed as EES 3250) Solid materials that make up the earth; rock, soil, and sediment - with emphasis on the minerals that are their major constituents. Hand specimen, optical, and X-ray methods of description and identification. Physical and chemical processes that form and modify earth materials and the use of these materials in interpreting earth processes of the past and present. Field trips. Three lectures and one laboratory per week. No credit for students who have earned credit for 3250. [4]

EES5260 - Petrology**Title**

Petrology

Catalog Description

(Also listed as EES 3260) Nature, distribution, and theories of origin of igneous, metamorphic, and sedimentary rocks. Mineralogy as a function of rock-forming conditions. Laboratory emphasis on description and interpretation of rocks, using hand sample and microscope techniques. Field trips. Three lectures and one laboratory period per week. No credit for students who have earned credit for 3260. [4]

EES5300 - Earth's Natural Resources

Title

Earth's Natural Resources

Catalog Description

Natural resource formation, production, and use. Geologic controls on resource distribution. Analysis of historical trends and prediction of future resource availability. Environmental impacts of mining, use, and disposal. Fossil fuels, alternative energy, nuclear fuels, metals, industrial minerals, water, soil, and elements used in agriculture. Synthesis of knowledge from the geosciences, chemistry, engineering, and economics. [3]

EES5310 - Global Climate Change

Title

Global Climate Change

Catalog Description

Scientific principles and policy applications. Earth's past; evidence of human impact; future climate change; and economic, social, and ecological consequences. Economic, technological, and public policy responses. Repeat credit for 5110. Students who have earned credit for 5110 will earn only one credit hour. [4]

EES5340 - Structural Geology and Rock Mechanics

Title

Structural Geology and Rock Mechanics

Catalog Description

(Also listed as EES 3340) Principles of rock deformation; mechanics, fractures, folds, foliation, primary structures, applications of principles. Interactions and feedbacks between tectonics, climate, and erosion. Field trips. Two lectures and one laboratory period per week. No credit for students who have earned credit for 3340. [4]

EES5420 - Geomorphology

Title

Geomorphology

Catalog Description

(Also listed as EES 4420) Analysis of the Earth's landforms, their morphology, history, and the processes that form them. The building of relief and its subsequent transformation by geologic processes on hillslopes, rivers, coasts, wetlands, and glaciers. The natural history and human impacts on land forms. Field trips. Familiarity with basic physics (mechanics) is expected. No credit for students who have earned credit for 4420. [3]

EES5440 - Glacial Geology

Title

Glacial Geology

Catalog Description

Metamorphism of snow and ice; mass balance at snow and ice surfaces; and rheology of ice. Destruction and creation of landscapes by glacial movement and debris. Response of ice bodies to changes in climate; physical, chemical, and biological evidence of climate change; and methods of paleoclimate reconstruction. Glacial impacts on societies through sea-level, hazards, coastlines, and water supplies. [3]

EES5510 - Earth Systems through Time
Title

Earth Systems through Time

Catalog Description

(Also listed as EES 2510) Effects of feedbacks between the geologic cycles on the lithosphere, hydrosphere, biosphere, and atmosphere at diverse intervals in the Earth's history. Present and future implications. Interpretations of evidence recorded in Earth materials. Three hours of lecture and one laboratory per week. No credit for students who have earned credit for 2510. [4]

EES5550 - Transport Processes in Earth and Environmental Systems
Title

Transport Processes in Earth and Environmental Systems

Catalog Description

(Also listed as EES 4550) Principles of conservation and constitutive transport laws; classic and emerging styles of modeling natural systems. Prior study of basic calculus (functions, derivatives, integrals) and physics (mechanics) is expected. No credit for students who have earned credit for 4550. [3]

EES5600 - Geochemistry
Title

Geochemistry

Catalog Description

(Also listed as EES 4600) Application of chemistry to study the distribution and cycling of elements in the crust of the earth. Includes chemical bonding and crystallization, phase rules and phase diagrams, chemical equilibria, theories on the origin of elements, earth, ocean, atmosphere, and crust. No credit for students who have earned credit for 3600. [3]

EES5650 - Physics of the Climate System
Title

Physics of the Climate System

Catalog Description

Physical processes affecting the climate system. Global energy balance of Earth and planets. Surface temperature and how it is regulated. Electromagnetic radiation and its interaction with atmospheric gases, clouds, and aerosols. Ocean heat storage, cloud and precipitation processes, and the impact of sea and inland ice on temperature. Processes that govern the water and carbon cycle. No credit for students who have earned credit for 290-01 offered spring 2014 or spring 2015. [3]

EES5680 - Paleoclimates
Title

Paleoclimates

Catalog Description

(Also listed as EES 4680) Fluctuations in Earth's climate with an emphasis on the past 700 million years. Forcings and feedback that influence climate and drive change. Techniques used to reconstruct past climate change using marine and terrestrial geologic deposits and geochronologic methods. No credit for students who have earned credit for 4680. [3]

EES5760 - Agent- and Individual-Based Computational Modeling

Title

Agent- and Individual-Based Computational Modeling

Catalog Description

Applications in natural, social, and behavioral sciences and engineering. Designing, programming, and documenting models. Using models for experiments. Examples from environmental science, ecology, economics, urban planning, and medicine. Familiarity with basic statistics and proficiency in algebra are expected. [3]

EES5820 - Paleoecological Methods

Title

Paleoecological Methods

Catalog Description

(Also listed as EES 4820) Tools used to interpret past environments and climates, including plant microfossils, pollen and phytoliths, vertebrate morphology, and dental microwear and mesowear. Geochemical tools such as stable isotopes and rare earth elements. Integrating methods for paleontological and anthropological studies, including the use of databases and meta-analyses. Readings from primary sources. Serves as repeat credit for students who completed 390 section 4 in spring 2010. No credit for students who have earned credit for 4820. [3]

EES5830 - Volcanic Processes

Title

Volcanic Processes

Catalog Description

Nature, behavior, and origin of volcanoes. Magmatic processes that lead to eruptions. Eruptive processes and volcano construction. Impacts of volcanism on Earth's surface environment. Prerequisite: 3260. No credit for students who have earned credit for 4830. [3] (MNS)

EES5841 - Directed Study

Title

Directed Study

Catalog Description

(Also listed as EES 3841) Readings in related fields and/or laboratory research in pursuit of a scholarly project conceived and executed under the supervision of a faculty member. Open to senior majors and graduate students or by consent of the department chair. Does not count toward minimum requirements for the major. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 2 credits per semester of enrollment. [1-2] (No AXLE credit)

EES5842 - Directed Study

Title

Directed Study

Catalog Description

(Also listed as EES 3842) Readings in related fields and/or laboratory research in pursuit of a scholarly project conceived and executed under the supervision of a faculty member. Open to senior majors and graduate students or by consent of the department chair. Does not count toward minimum requirements for the major. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 2 credits per semester of enrollment. [1-2] (No AXLE credit)

EES5851 - Independent Study**Title**

Independent Study

Catalog Description

(Also listed as EES 3851) Readings with related field and/or laboratory research in pursuit of a scholarly project conceived and executed under the supervision of a faculty member. Open to senior majors and graduate students. Other students must have consent of department chair. Does not count toward minimum requirements for the major. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. No credit for students who have earned credit for 3851. [1-3] (No AXLE credit)

EES5852 - Independent Study**Title**

Independent Study

Catalog Description

(Also listed as EES 3852) Readings with related field and/or laboratory research in pursuit of a scholarly project conceived and executed under the supervision of a faculty member. Open to senior majors and graduate students. Other students must have consent of department chair. Does not count toward minimum requirements for the major. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. No credit for students who have earned credit for 3852. [1-3] (No AXLE credit)

EES5891 - Special Topics**Title**

Special Topics

Catalog Description

(Also listed as EES 3891) Topics vary. May be repeated for credit more than once by permission of the director of undergraduate studies. Students may enroll in more than one section of this course each semester. No credit for students who have earned credit for 3891. [3] (No AXLE credit)

EES5990 - Mass Extinctions**Title**

Mass Extinctions

Catalog Description

Synthesizing causes, consequences, and dynamics of past mass extinction events. Using fossil records to interpret current and future trends in biodiversity loss. No credit for students who have earned credit for 3891-02 offered spring 2017 or spring 2018. [3]

EES6100 - Earth Fluids**Title**

Earth Fluids

Catalog Description

Fluid dynamics in relation to natural Earth systems, including low and high Reynolds number flows. No credit for students who have earned credit for 390 section 1 in spring 2007, section 3 in fall 2009, section 1 in fall 2011, or section 1 in fall 2013. [3]

EES6891 - Special Topics and Advanced Techniques in Geology

Title

Special Topics and Advanced Techniques in Geology

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-4]

EES7110 - Advanced Topics in Earth Materials

Title

Advanced Topics in Earth Materials

Catalog Description

Selected topics in the structure, composition, properties of the materials that constitute the Earth, and the natural processes that control their stability and transformations. May be repeated for credit if there is no duplication in topic. [3]

EES7300 - Isotopes and the Environment

Title

Isotopes and the Environment

Catalog Description

Isotope systems, research techniques and applications used to trace, date, and understand environmental processes on Earth's surface. Stable, radiogenic, and cosmogenic isotope systems. Radiometric dating of low temperature processes. No credit for students who earned credit for 390 section 1 in fall 2012. [3]

EES7350 - Magmatic Processes and the Construction of Earth's Crust

Title

Magmatic Processes and the Construction of Earth's Crust

Catalog Description

Generation of magma and its role in construction of Earth's crust. Connection between magmatism and large-scale tectonics. Introduction to magmatic tracers: isotopes, trace elements, phase equilibria; geochronology; and the history of the crust, Hadean to present. No credit for students who completed 390 section 1 in fall 2008. [3]

EES7380 - Sedimentary Systems: Source-to-Sink

Title

Sedimentary Systems: Source-to-Sink

Catalog Description

Generation and distribution of sediment from mountain tops to deep-sea basins. Construction of depositional landscapes and stratigraphy. Sediment dispersal and interactions between source-to-sink components along transport pathways; feedbacks with climate, tectonics, the biosphere, and humans. Earth system interactions, energy budgets, and nutrient and geochemical cycling. No credit for students who earned credit for 390 section 1 in spring 2007, section 3 in spring 2011, or section 2 in spring 2013. [3]

EES7620 - Macroecology and Biogeography

Title

Macroecology and Biogeography

Catalog Description

Integration of evolutionary biology, paleobiology, ecology, and biogeography to understand interactions between organisms and their environments over large spatial and temporal scales, including in ancient ecosystems. The discipline of macroecology; nature of species, niches, and communities; abundance and distribution of species; species diversity; composition and assembly of continental biotas; allometry and body size; evolutionary dynamics; methodological advances. [3]

EES7640 - Topics in Macroevolution

Title

Topics in Macroevolution

Catalog Description

Evolutionary processes that operate on geological time scales. Evolutionary theory; systematics; speciation and extinction; evolutionary benefits of sexual reproduction; co-evolution; convergence; biogeography; and relevance of evolution to modern ecology and conservation. Effects of abiotic processes on the evolution of terrestrial and marine organisms. [3]

EES7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

[0-12]

EES8003 - Graduate Teaching Practicum

Title

Graduate Teaching Practicum

Catalog Description

Discussion of best teaching practices in weekly meeting with instructor. Application of teaching strategies via teaching undergraduate lab, discussion, or lecture. [0-1]

EES8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

EES9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[Variable credit: 0-12]

Economics

ECON5050 - Topics in Econometrics

Title

Topics in Econometrics

Catalog Description

(Also listed as ECON 4050) Emphasis on applications. May include generalized method of moments, empirical likelihood, resampling methods, and nonparametric techniques. No credit for students who have earned credit for 4050. [3] (SBS)

ECON5100 - Wages, Employment, and Labor Markets

Title

Wages, Employment, and Labor Markets

Catalog Description

(Also listed as ECON 3100) Theories of wages and employment, dual labor markets, internal labor markets, and labor's share of national income. Empirical studies of labor mobility, the effects of unions on relative wages and resource allocation, occupational and industrial wage differentials, and selected labor markets. No credit for students who have earned credit for 3100. [3]

ECON5110 - Macroeconomic Models for Policy Analysis

Title

Macroeconomic Models for Policy Analysis

Catalog Description

(Also listed as ECON 4110) Mathematical models of overlapping generations, rational expectations, and open economies with price rigidities applied to social security, government debt, exchange rates, monetary policy, and time inconsistent optimal policy. No credit for students who have earned credit for 4110. [3]

ECON5220 - Social Choice Theory

Title

Social Choice Theory

Catalog Description

Strategic and non-strategic social choice theory. Preference aggregation, formal models of voting, and matching. Prerequisite: 3010 or 3012 or PHIL 3003 or any Mathematics course numbered 2500 or above. [3]

ECON5230 - Urban Economics

Title

Urban Economics

Catalog Description

(Also listed as ECON 3230) Urban growth, development of suburbs, location of firms, housing markets, transportation, property taxes, and local government services. Offered on a graded basis only. No credit for students who have earned credit for 3230. [3]

ECON5240 - Poverty and Discrimination

Title

Poverty and Discrimination

Catalog Description

Theories and empirical evidence concerning inequality, poverty, and discrimination, and their relationship to economic growth. Evaluation of anti-poverty and anti-discrimination policies. [3]

ECON5250 - Industrial Organization

Title

Industrial Organization

Catalog Description

(Also listed as ECON 3250) The structure of contemporary industry and the forces that have shaped it, including manufacturing, trade, and transportation. The role of the large corporation in modern industrial organization. The relation of industrial structure to economic behavior and performance. No credit for students who have earned credit for 3250. [3]

ECON5260 - Game Theory with Economic Applications

Title

Game Theory with Economic Applications

Catalog Description

(Also listed as ECON 4260) Rational decision-making in non-cooperative, multi-person games. Single play and repeated games with complete and incomplete information. Economic applications of games, such as auctions, labor-management bargaining, pricing and output decisions in oligopoly, and common property resources. No credit for students who have earned credit for 4260. [3]

ECON5270 - Economics of Information and Communications Technology

Title

Economics of Information and Communications Technology

Catalog Description

The Internet, cloud computing, social networks, e-commerce, and Internet telephony as influencers of commerce and consumer welfare. Streaming content, big data, informatics, and open source software in economic perspective. Property rights, competition, and regulation in cyberspace. No credit for students who have earned credit for 3893-01 offered spring 2016 or 293-01 offered spring 2015. [3]

ECON5280 - Experimental Economics

Title

Experimental Economics

Catalog Description

Design, methodology, and interpretation of economic experiments. Laboratory experiments with applications in labor markets, discrimination, and voluntary contributions. [3]

ECON5300 - Financial Instruments and Markets

Title

Financial Instruments and Markets

Catalog Description

(Also listed as ECON 3300) Theoretical and empirical approaches to the analysis of monetary and other financial instruments. Portfolio analysis, interest rate risk, and financial futures and options markets. No credit for students who have earned credit for 3300. [3]

ECON5350 - Economics of Health

Title

Economics of Health

Catalog Description

(Also listed as ECON 3350) An examination of some of the economic aspects of the production, distribution, and organization of health care services, such as measuring output, structure of markets, demand for services, supply of services, pricing of services, cost of care, financing mechanisms, and their impact on the relevant markets. No credit for students who have earned credit for 3350. [3]

ECON5510 - Seminar in Macroeconomic Policy

Title

Seminar in Macroeconomic Policy

Catalog Description

Intensive study of three or four current problems in economic policy. Studies in topics such as macroeconomic policy for the year ahead, financial market issues, international economic policy issues. Limited to majors in economics and public policy. [3]

ECON5610 - International Finance

Title

International Finance

Catalog Description

(Also listed as ECON 3610) Economics of international monetary, financial, and macroeconomic relationships. Effects of monetary and fiscal politics in open economies, balance of payments, exchange rate determination, and international monetary institutions. No credit for students who have earned credit for 3610. [3]

ECON5650 - Development Economics

Title

Development Economics

Catalog Description

(Also listed as ECON 3650) Determinants of national economic growth for pre-industrial and newly industrial countries. Inequality and poverty. Imperfect credit markets and microfinance. Political constraints and corruption. Policy issues relevant to developing economics. No credit for students who have earned credit for 3650. [3]

ECON6100 - Microeconomic Theory (M.A. Level)**Title**

Microeconomic Theory (M.A. Level)

Catalog Description

The price system in consumer demand and as a mechanism for organizing production, allocating resources, and distributing the national income. [3]

ECON6200 - Macroeconomic Theory (M.A. Level)**Title**

Macroeconomic Theory (M.A. Level)

Catalog Description

National income accounting. Theories of income, employment and price determination. Growth and planning models. Monetary theory. [3]

ECON6500 - Statistical Analysis (M.A. Level)**Title**

Statistical Analysis (M.A. Level)

Catalog Description

Interpretation of statistical materials, the principles of statistical inference, the use of available statistics for problems of economic analysis, and the importance of statistics in economic policy and administration. [3]

ECON6600 - Econometrics (M.A. Level)**Title**

Econometrics (M.A. Level)

Catalog Description

Empirical measurements with applications to basic economic relations. Specification, estimation of microeconomics and macroeconomics models for the purpose of testing hypotheses, forecasting, and evaluating policy. Prerequisite: 6500. [3]

ECON7100 - Project Evaluation**Title**

Project Evaluation

Catalog Description

Social-benefit cost analysis of investment projects: investment criteria, estimation of benefits and costs, and evaluation of shadow prices and of the social discount rate. The role of national planning. Case studies utilize the experience of developing economies. [3]

ECON7500 - The Chinese Economy**Title**

The Chinese Economy

Catalog Description

Growth, development, and fluctuations in the Chinese economy. Transition from central planning to markets since 1978. Implications for global economy. Primarily designed for students in the Economic Development program. [3]

ECON7550 - Econometric Methods for Big Data

Title

Econometric Methods for Big Data

Catalog Description

Econometric methods for analyzing large datasets with modern statistical and machine learning techniques. Model selection, regularization, classification, resampling, tree-based methods, and support vector machines. Research projects in development economics and related fields. Prerequisite: ECON 6600.

ECON7600 - International Trade and Economic Development

Title

International Trade and Economic Development

Catalog Description

Selected topics concerning the exchange and transfer of goods and resources between less- and more-developed countries. Possible topics include: the international monetary system, the SDR-aid link, dependence and imperialism, the role of trade in economic growth, foreign exchange strategies, and the structure of protection. Primarily designed for students in the Economic Development program. [3]

ECON7841 - Directed Readings

Title

Directed Readings

Catalog Description

Intensive study in an area of special interest beyond regular course offerings. Prerequisites: consent of the instructor and the director of graduate studies. [1-3]

ECON7881 - Special Topics in Development Policies

Title

Special Topics in Development Policies

Catalog Description

Selected topics in the economic analysis of problems in developing countries. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

ECON7882 - Special Topics in Development Policies

Title

Special Topics in Development Policies

Catalog Description

Selected topics in the economic analysis of problems in developing countries. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

ECON7910 - Seminar in Research on Economic Development: Microeconomic Applications
Title

Seminar in Research on Economic Development: Microeconomic Applications

Catalog Description

How to select and define a microeconomic problem, assemble relevant factual and statistical information, and analyze and interpret it. Students will write a research paper. Open only to students in the Economic Development program. May be repeated for credit. [3]

ECON7920 - Seminar in Research on Economic Development: Macroeconomic Applications
Title

Seminar in Research on Economic Development: Macroeconomic Applications

Catalog Description

How to select and define a macroeconomic problem, assemble relevant factual and statistical information, and analyze and interpret it. Students will write a research paper. Open only to students in the Economic Development program. May be repeated for credit. [3]

ECON7930 - Field Experience in Economic Development
Title

Field Experience in Economic Development

Catalog Description

How to select and define an economic problem, assemble relevant factual and statistical information, and analyze and interpret it. Students will write a research paper. Participation in a policy relevant field experience is required. Open only to students in the Economic Development program. [3]

ECON7998 - Internship in Economic Development
Title

Internship in Economic Development

Catalog Description

Internship working in professional setting appropriate to the degree program. Repeatable. Consent of faculty advisor required. Credit hours earned do not apply to the degree requirements for the Graduate Program in Economic Development. Offered on a satisfactory/unsatisfactory basis. [0-3]

ECON7999 - Master's Research
Title

Master's Research

Catalog Description

[0-12]

ECON8000 - Selected Topics in Mathematics for Economists
Title

Selected Topics in Mathematics for Economists

Catalog Description

Mathematics used in the analysis of economic models. [3]

ECON8100 - Microeconomic Theory I

Title

Microeconomic Theory I

Catalog Description

Analysis of resource allocation and relative prices. Behavior of individual economic units and markets. Models of technology, cost, and profit and the firm; consumer preferences, constraints, and choice; expected utility theory and risk aversion; partial equilibrium under competition and monopoly; partial equilibrium welfare and surplus. [3]

ECON8110 - Microeconomic Theory II

Title

Microeconomic Theory II

Catalog Description

Non-cooperative game theory, information economics, public goods. Nash equilibrium, sequential rationality, and incomplete information; oligopoly; bargaining; adverse selection, signaling and screening; principal-agent models; externalities and public goods. Prerequisite: 8100 [3]

ECON8120 - Microeconomic Theory III

Title

Microeconomic Theory III

Catalog Description

General equilibrium, welfare economics, social choice, and mechanism design. Prerequisites: 8100 and 8110; or consent of the instructor and the director of graduate studies. [3]

ECON8200 - Macroeconomic Theory I

Title

Macroeconomic Theory I

Catalog Description

Dynamic models and solution techniques. Development of models to study growth, business cycles, and government policies. [3]

ECON8210 - Macroeconomic Theory II

Title

Macroeconomic Theory II

Catalog Description

Inflation and growth, optimal monetary and fiscal policy, overlapping-generations models and money non-neutrality. Prerequisite: 8200 or consent of the instructor and the director of graduate studies. [3]

ECON8220 - Macroeconomic Theory III

Title

Macroeconomic Theory III

Catalog Description

Theories of consumption, investment, demand and supply of money, the labor market, monetary and fiscal policy, and New Keynesian economics. Prerequisite: 8210. [3]

ECON8300 - Statistical Analysis**Title**

Statistical Analysis

Catalog Description

Statistical methods applicable to quantitative research in economics. Distribution theory, statistical inference, and selected multivariate statistical methods. [3]

ECON8310 - Econometrics I**Title**

Econometrics I

Catalog Description

Analysis of specification errors in single-equation estimation of economic relations. Introduction to the estimation and application of simultaneous-equation models. Prerequisite: 8300. [3]

ECON8320 - Econometrics II**Title**

Econometrics II

Catalog Description

Identification and estimation of econometric models with nonlinearity and/or endogeneity/simultaneity. Asymptotic theory and finite-sample properties of M-estimation and inference. Model building and testing of economic theory. Prerequisite: 8310. [3]

ECON8400 - Introduction to Economic History**Title**

Introduction to Economic History

Catalog Description

Measurement and theory. Factors associated with modern economic growth and institutional change in various countries and time periods. Prerequisites: 8100 and 8200, or consent of the instructor and the director of graduate studies. [3]

ECON8981 - Reading Course**Title**

Reading Course

Catalog Description

Intensive study in an area of special interest beyond regular course offerings. Prerequisites: consent of the instructor and the director of graduate studies. [1-3]

ECON8982 - Reading Course**Title**

Reading Course

Catalog Description

Intensive study in an area of special interest beyond regular course offerings. [1-3]

ECON8999 - Non-candidate Research

Title

Non-candidate Research

Catalog Description

Prerequisites: consent of the instructor and the Economics Director of Graduate Studies. [0-12]

ECON9110 - Topics in Microeconomics

Title

Topics in Microeconomics

Catalog Description

Advanced theory and applications. Variable topics including auctions, networks, contract theory, social choice, political economy, and market design. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: 8110, or consent of the instructor and the director of graduate studies. [3]

ECON9210 - Topics in Macroeconomics

Title

Topics in Macroeconomics

Catalog Description

Advanced theory and applications. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: 8210. [3]

ECON9250 - Theory of Money and Finance I

Title

Theory of Money and Finance I

Catalog Description

Advanced topics in monetary and financial economics theory and applications. Recently developed dynamic theories of money and asset pricing. Inflationary dynamics; money, welfare, and growth; money and business cycles; financial development and growth; credit market imperfections and financial crises. Prerequisites: 8210. [3]

ECON9260 - Theory of Money and Finance II

Title

Theory of Money and Finance II

Catalog Description

Analyses of microeconomic foundations and general equilibrium models of money and financial markets. Theory of payments structure, capital asset pricing, rational expectations, efficient markets, and contingent claims markets. Prerequisite: 8210. [3]

ECON9310 - Time Series Econometrics

Title

Time Series Econometrics

Catalog Description

Methods for estimating structural vector autoregressive models and dynamic economic models, such as maximum likelihood method, Bayesian method, and generalized method of moments. Prerequisite: 8320, or consent of the instructor and the director of graduate studies. [3]

ECON9320 - Non-parametric and Semi-parametric Econometrics

Title

Non-parametric and Semi-parametric Econometrics

Catalog Description

Non-parametric and semi-parametric methods for estimation and inference in econometric models. [3]

ECON9330 - Microeconometrics

Title

Microeconometrics

Catalog Description

Econometric models and methods for dealing with micro data. Structural and reduced-form approaches. Statistical inference using the models and their applications in IO, labor, health, and elsewhere in economics and social sciences. Prerequisite: 8320, or consent of the instructor and the director of graduate studies. [3]

ECON9440 - Topics in Economic History: Microeconomic

Title

Topics in Economic History: Microeconomic

Catalog Description

Examination of various microeconomic aspects of long-term development. Topics include demographic change, labor market outcomes, the development of institutions, industrialization, migration, health, and inequality. Prerequisites: 8310 and 8400. [3]

ECON9450 - Topics in Economic History: Macroeconomic

Title

Topics in Economic History: Macroeconomic

Catalog Description

Macroeconomic aspects of long-term development. Economic growth, the development of financial markets and the role of financial markets in economic development, the history and evolution of monetary and fiscal policy, capital market integration, and business cycles, including the Great Depression. Prerequisites: 8310 and 8400. [3]

ECON9480 - Health Economics

Title

Health Economics

Catalog Description

Conceptual and empirical analysis of demand for health, medical services, and insurance. Causes and consequences of various health risk behaviors. Emphasis on tools and designs of research in modern health economics. Prerequisites: 8110 and 8310, or consent of the instructor and the director of graduate studies. [3]

ECON9490 - Health Economics

Title

Health Economics

Catalog Description

Conceptual and empirical analysis of the origins of health attributes; joint investments in skill and health capitals; health-related consumption and lifestyles; the value of health, life, and medical innovation; the demand for health insurance; and the supply of health care. Applied econometrics methods, with a particular emphasis on comparisons among alternative methods used in health economics research. Prerequisite: 8110 and 8310. [3]

ECON9500 - Industrial Organization I

Title

Industrial Organization I

Catalog Description

Primary models of imperfect competition. Topics include bargaining; monopoly and oligopoly, allowing for differentiated products and incomplete information. Applications include quality provision and product pricing; consumer search for the lowest price; auctions; network externalities; innovation and market structure; liability and market structure; the theory of the firm; and settlement bargaining. Prerequisite: 8110 [3]

ECON9510 - Industrial Organization II

Title

Industrial Organization II

Catalog Description

Emphases on empirical research in the field and application of models. Consumer demand for differentiated products, static games of imperfect competition, dynamic models of individual choice, dynamic games of imperfect competition, and the estimation of production functions. Prerequisites: 8320 and 9500, or consent of the instructor and the director of graduate studies. [3]

ECON9540 - Applied Microeconomic Research Designs and Methods

Title

Applied Microeconomic Research Designs and Methods

Catalog Description

Core methods for research in applied microeconomics with a focus on research design and the identification of causal effects. Particular focus on applied tools used in the fields of empirical labor, public, development, health, and education economics. Prerequisite: 8310. [3]

ECON9550 - Labor Economics

Title

Labor Economics

Catalog Description

Static and dynamic models of labor demand and labor supply, and models of human capital development. Applications of the theory to migration, fertility, health, wage determination, education, unionism and industrial relations, employment policies, implicit contracting and layoffs, and discrimination. Methodological problems related to the analysis of labor markets. Prerequisite: 8110 and 8310. [3]

ECON9560 - Labor Economics

Title

Labor Economics

Catalog Description

Static and dynamic models of labor demand and labor supply, and models of human capital development. Applications of the theory to topics such as migration, fertility, health, wage determination, education, unionism and industrial relations, employment policies, implicit contracting and layoffs, and discrimination. Methodological problems related to the analysis of labor markets. Prerequisite: 8110 and 8310. [3]

ECON9600 - International Trade Theory

Title

International Trade Theory

Catalog Description

Trade and growth. Models and empirical evidence. Commercial policy, tariffs, the terms of trade and income distribution, international factor movements, and trade agreements. Prerequisite: 8110. [3]

ECON9610 - International Macroeconomics

Title

International Macroeconomics

Catalog Description

Neoclassical and New Keynesian international business cycle models; interaction of asset markets and goods markets. Dynamic models of exchange rates, relative prices, and the trade balance. Monetary and fiscal policy in the open economy. Simulation and estimation of business cycle models. Prerequisite: 8210, or consent of the instructor and the director of graduate studies. [3]

ECON9710 - Public Economics: Expenditure

Title

Public Economics: Expenditure

Catalog Description

Analysis of issues. Possible topics include externalities, public goods, local public goods, and aspects of public choice and voting theory. Prerequisite: 8110. [3]

ECON9720 - Public Economics: Taxation

Title

Public Economics: Taxation

Catalog Description

Analysis of issues. Possible topics include: optimal taxation theory, tax reform, tax incidence, behavioral impacts of taxation, dynamic taxation, tax competition, and the political economy of taxation. Prerequisite: 8810 [3]

ECON9730 - Topics in Public Economics

Title

Topics in Public Economics

Catalog Description

Analysis of issues. Possible topics include externalities, public goods, local public goods, and aspects of public choice and voting theory. Prerequisite: 8110. [3]

ECON9810 - Economic Development**Title**

Economic Development

Catalog Description

Contemporary theories and empirical studies. Topics include missing markets and market imperfection in developing countries; health, education, and labor market performance in low-income countries; credit, savings and insurance in rural economies; property rights, infrastructure and public provision of goods; intra-household bargaining and allocation; technology adoption; inequality and redistributive policy; and macroeconomic policy. Empirical strategies in development economics. Prerequisite: 8110, 8210, and 8310. [3]

ECON9820 - Economic Development**Title**

Economic Development

Catalog Description

Contemporary theories and empirical studies. Topics include missing markets and market imperfection in developing countries; health, education, and labor market performance in low-income countries; credit, savings and insurance in rural economies; property rights, infrastructure and public provision of goods; intra-household bargaining and allocation; technology adoption; inequality and redistributive policy; and macroeconomic policy. Strategies in development economics. Prerequisite: 8110, 8210, and 8310. [3]

ECON9890 - Workshop on Economics**Title**

Workshop on Economics

Catalog Description

Research seminar to aid advanced students in the selection of thesis topics and presentation of research papers. Topics covered depend on interests of students and faculty. [0-3]

ECON9999 - Ph.D. Dissertation Research**Title**

Ph.D. Dissertation Research

Catalog Description

[0-12]

Education

EDUC7999 - Master's Thesis Research**Title**

Master's Thesis Research

Catalog Description

Master's Thesis Research

EDUC8010 - Inquiry into Education

Title

Inquiry into Education

Catalog Description

An introduction to the function and means of various practices of educational research. Promotes understanding of the language of educational inquiry, aims and uses of research, various ways of framing research questions and designing studies, and procedures for obtaining, analyzing, and interpreting qualitative and quantitative data. Presents issues of procedure or design and related issues of validity: construct definition and data generation, instrumentation and data collection; and data quality, meaning, appropriateness, credibility, and inferences made based on data. For doctoral students or by permission of instructor. [3]

EDUC8020 - Teaching as a Social Practice

Title

Teaching as a Social Practice

Catalog Description

This course provides an investigation into teaching as situated in the social context of the school and school district. Classroom observation in tandem with a series of readings are the basis of the course. Assignments are intended to provide students opportunities to coordinate important aspects of the readings with observations of practice. For doctoral students or by permission of instructor. [3]

EDUC8030 - Advanced Learning and Instruction

Title

Advanced Learning and Instruction

Catalog Description

Introduces theories of learning and explores their utility for the design of learning environments. Contrasts socio-cultural and cognitive approaches toward concepts and categories, problem solving, and model-based reasoning. For doctoral students or by permission of instructor. [3]

EDUC8040 - Diversity and Equity in Education

Title

Diversity and Equity in Education

Catalog Description

Provides an introduction to the structural, systemic, and institutional dimensions and complexities of diversity that often emerge in education across multiple contexts. Central constructs of the course include race, culture, SES, gender, language, achievement, policy, epistemology, and learning. For doctoral students or by permission of instructor. [3]

EDUC8100 - Epistemological Foundations of Mathematics and Sciences

Title

Epistemological Foundations of Mathematics and Sciences

Catalog Description

Examines the social, cognitive and material mechanisms that contribute to generating, sustaining and revising knowledge in mathematics and in sciences. [3]

EDUC8200 - Foundations in Learning and Development

Title

Foundations in Learning and Development

Catalog Description

Provides a foundation in relevant developmental milestones related to children's academic behaviors from pre-kindergarten through high school. Children's development and learning is viewed in the context of school expectations with an emphasis on the diversity among learners. [3]

EDUC8410 - Sociocognitive Perspectives of Literacy Theory and Practice

Title

Sociocognitive Perspectives of Literacy Theory and Practice

Catalog Description

This seminar critically examines literacy research from a sociocognitive perspective. Critical reading of seminal and new works on theoretical models is complimented by research on effective literacy instruction an emerging promising practices in print and digital contexts. Particular attention is paid to reading comprehension, digital literacies and new media, design of scaffolded learning environments, and students who experience learning difficulties. [3]

EDUC8420 - Sociocultural Theories of Literacy

Title

Sociocultural Theories of Literacy

Catalog Description

A doctoral readings seminar on social and cultural theories in their relation to literacy and literacy learning. [3]

EDUC8800 - Scientific Writing

Title

Scientific Writing

Catalog Description

Students who have completed substantial reading in an area of their research interest participate in a lecture/workshop setting to conceptualize, draft, and revise a scientific manuscript. Most students who take the course will be in the process of completing a major area paper for the Department of Teaching and Learning. These papers take the form of a literature review (typically 50-100 pages), but other writing projects are welcome, as well. [3]

EDUC8810 - Discourse Analysis in Education

Title

Discourse Analysis in Education

Catalog Description

This course provides a rigorous introduction to the analysis of discourse in educational contexts. The course draws on critical discourse analysis, sociocultural approaches, and other traditions to consider relations of learning, identity, and power in educational texts and communicative activity. The course provides experience and instruction through processes of data collection, transcription, and analysis. [3]

**EDUC8820 - Methods of Educational Research: Qualitative
Title**

Methods of Educational Research: Qualitative

Catalog Description

Covers issues and strategies involved in collection and analysis of qualitative data. Focuses on the assumptions and related research techniques of qualitative research, framed by the post-positivist paradigm (i.e., naturalistic inquiry, ethnography). [3] Recommended for advanced doctoral students)

**EDUC8830 - Advanced Qualitative Methods: Learning and the Interaction
Title**

Advanced Qualitative Methods: Learning and the Interaction

Catalog Description

Graduate Level research methods course for students who will use video and/or audio recordings as data in studies of learning and teaching. Readings cover conversation analysis, ethnomethodology, gesture studies, and micro-ethnographies of life in classrooms and workplaces. Assignments focus on technologies and procedures for capturing and managing video and audio recordings of human interactions that can serve as data for these kinds of studies, as well as procedures for indexing, transcribing, and conducting comparative analysis. Prerequisite: Introductory Qualitative or interpretive research methods course. [3]

**EDUC8999 - Non-Candidate Research
Title**

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

**EDUC9700 - Research Groups
Title**

Research Groups

Catalog Description

Examination of a research issue of mutual interest in a year-long study. Multiple topics will be offered. May be repeated. [0-3]

**EDUC9995 - Half-Time Dissertation Research
Title**

Half-Time Dissertation Research

Catalog Description

[0-6]

**EDUC9999 - Ph.D. Dissertation Research
Title**

Ph.D. Dissertation Research

Catalog Description

[0-12]

Electrical & Computer Engineering

EECE5218 - Microcontrollers

Title

Microcontrollers

Catalog Description

(Also listed as EECE 2218) Microprocessor and microcontroller architecture with emphasis on control applications. Usage of assembly language and interfacing with programs written in high-level languages. Interfacing and realtime I/O with 8-bit microprocessors, control algorithms, and networking with microcontrollers. Graduate credit only for non-majors. No credit for students who have earned credit for 2218. Corequisite: EECE 5218L. SPRING. [3]

EECE5218L - Microcontrollers Laboratory

Title

Microcontrollers Laboratory

Catalog Description

(Also listed as EECE 2218L) Laboratory for EECE 5218. A small structured project is required. One three-hour laboratory per week. Graduate credit only for non-majors. No credit for students who have earned credit for 2218L. Corequisite: EECE 5218. SPRING. [1]

EECE5233 - Electromagnetics

Title

Electromagnetics

Catalog Description

(Also listed as EECE 3233) Electromagnetic field theory. Maxwell's equations developed from a historical approach. Electromagnetic waves with regard to various media and boundary conditions. Graduate credit only for non-majors. No credit for students who have earned credit for 3233. FALL. [3]

EECE5235 - Electronics I

Title

Electronics I

Catalog Description

(Also listed as EECE 3235) Semiconductor devices and electronic circuits. Diodes, BJT and MOS transistors. Device models, modes of operation, biasing. Small-signal models, lowfrequency analysis of single- and multi-stage analog amplifiers, simple amplifier design. Large signal models, dc analysis of digital circuits. Graduate credit only for non-majors. Corequisite: EECE 5235L. No credit for students who have earned credit for 3235. FALL. [3]

EECE5235L - Electronics I Laboratory

Title

Electronics I Laboratory

Catalog Description

(Also listed as EECE 3235L) Laboratory for EECE 3235. One three-hour laboratory per week. Corequisite: EECE 5235. No credit for students who have earned credit for 3235L. FALL. [1]

EECE5252 - Signal Processing and Communications

Title

Signal Processing and Communications

Catalog Description

(Also listed as EECE 4252) AM and FM modulation. Also, advanced topics in signal processing are treated. No credit for students who have earned credit for 4252. SPRING. [3]

EECE5257 - Control Systems I

Title

Control Systems I

Catalog Description

(Also listed as EECE 4257) Theory and design of feedback control systems, steady-state and transient analysis, stability considerations. Model representation. State-variable models. No credit for students who have earned credit for 4257. FALL. [3]

EECE5267 - Power System Analysis

Title

Power System Analysis

Catalog Description

(Also listed as EECE 4267) Analysis of large transmission and distribution networks. Analysis of power lines, load flow, short circuit studies, economic operation, and stability are introduced. No credit for students who have earned credit for 4267. [3]

EECE5268 - Distributed Electrical Energy Systems

Title

Distributed Electrical Energy Systems

Catalog Description

Uses of photovoltaics and wind as well as micro-hydro, fuel cells, and geothermal for producing electricity. Comparison with traditional generating methods based on the prime movers (steam, gas, etc.) and types (primarily three-phase) of electrical generators used. The economics of stand-alone and grid connected systems are covered. Prerequisite: EECE 2112. [3]

EECE5275 - Microelectronic Systems

Title

Microelectronic Systems

Catalog Description

(Also listed as EECE 4275) Active devices in the context of digital systems, with an emphasis on embedded systems integration. Characteristics and utilization of different digital integrated circuit families, common bus structures and protocols and realworld interfaces (comparators, A/D/A conversion). No credit for students who have earned credit for 4275. SPRING. [3]

EECE5283 - Principles and Models of Semiconductor Devices

Title

Principles and Models of Semiconductor Devices

Catalog Description

(Also listed as EECE 4283) Physical principles of operation of the p-n junction, MOS field-effect transistor, and bipolar transistor. Fundamentals of charge transport, charge storage, and generation-recombination; application to the operation of MOSFET and BJT. Device modeling with emphasis on features and constraints of integrated circuit technologies. No credit for students who have earned credit for 4283. [3]

EECE5284 - Integrated Circuit Technology and Fabrication

Title

Integrated Circuit Technology and Fabrication

Catalog Description

(Also listed as EECE 4284) Monolithic integrated circuit technology. Basic semiconductor properties and processes that result in modern integrated circuit. Bipolar and MOSFET processes and structures. Fabrication, design, layout, and applications as regards semiconductor microelectronic technologies. No credit for students who have earned credit for 4284. SPRING. [3]

EECE5286 - Audio Engineering

Title

Audio Engineering

Catalog Description

(Also listed as EECE 4286) Engineering aspects of high fidelity sound reproduction, with emphasis on digital audio and loudspeakers. Analog-to-digital and digital-to-analog conversion, data storage, perceptual coding, loudspeaker design. No credit for students who have earned credit for 4286. [3]

EECE5287 - Engineering Reliability

Title

Engineering Reliability

Catalog Description

(Also listed as EECE 4287) Topics in engineering reliability with emphasis on electrical devices and systems. Reliability concepts and models. Risk analysis. Lifetime evaluation. System examples. No credit for students who have earned credit for 4287. [3]

EECE5288 - Optoelectronics

Title

Optoelectronics

Catalog Description

(Also listed as EECE 4288) Fundamentals and applications of light generation, propagation, and modulation in passive and active optoelectronic components. Waveguides, lasers, electro-optic modulators, and emerging optoelectronic technology for optical communication, computing, and sensing applications. No credit for students who have earned credit for 4288. SPRING. [3]

EECE5334 - RF and Microwave Design

Title

RF and Microwave Design

Catalog Description

Modeling of components and transmission structures at RF and microwave frequencies (30 MHz to 30 GHz), with emphasis on the effects of materials and geometry on passive structures for filtering and impedance matching. Modeling and design of active circuits and components such as RF amplifiers with input and output impedance matching structures. Prereq: EECE 3233. SPRING. [3]

EECE5353 - Image Processing

Title

Image Processing

Catalog Description

Digital imaging and computational photography. Image formation. Point processing. Color perception and manipulation. Spatial filtering via convolution. 2D Fourier transforms. Frequency-domain filtering. Intensity quantization. High dynamic range imaging. Resampling for image resizing, rotation, and warping. Image compositing. Panorama generation. Noise reduction. Mathematical morphology. Image compression. Three lectures and one three-hour virtual laboratory. No credit for students who have earned credit for 4353. FALL. [4]

EECE5354 - Computer Vision

Title

Computer Vision

Catalog Description

Computational processes. Python and OpenCV for real-time processing. Feature detection: edges, corners, and oriented histogram methods. Feature matching. Scale space. Projective geometry. Camera models. Stereopsis. Image rectification. Multi-baseline stereo. Motion estimation. 3D reconstruction. Machine learning for computer vision including multilayer neural networks. No credit for students who have earned credit for 4354. SPRING. [3]

EECE5356 - Digital Signal Processing

Title

Digital Signal Processing

Catalog Description

(Also listed as EECE 4356) Applications of Digital Signal Processing (DSP) chips to sampling, digital filtering, FFTs, etc. Three lectures and one laboratory period. No credit for students who have earned credit for 4356. SPRING. [4]

EECE5358 - Control Systems II

Title

Control Systems II

Catalog Description

(Also listed as EECE 4358) Modern control design. Discrete-time analysis. Analysis and design of digital control systems. Nonlinear systems and optimum control systems. Fuzzy control systems. Two lectures and one laboratory. No credit for students who have earned credit for 4358. SPRING. [3]

EECE5371 - Mobile and Wireless Networks

Title

Mobile and Wireless Networks

Catalog Description

(Also listed as EECE 4371) Design, development, and applications of mobile applications and services. Topics include wireless technologies, smart phone programming, cloud computing services. No credit for students who have earned credit for 4271. [3]

EECE5376 - Embedded Systems

Title

Embedded Systems

Catalog Description

(Also listed as EECE 4376) Design and application of embedded microcontroller-based systems. Programming for real-time systems and the Internet of Things. Embedded system modeling, design, analysis, and implementation using real-time and event-driven techniques. A structured project is required. No credit for students who have earned credit for 4376. Corequisite: EECE 5376L. FALL. [3]

EECE5376L - Embedded Systems Laboratory

Title

Embedded Systems Laboratory

Catalog Description

(Also listed as EECE 4376L) Laboratory for EECE 5376. A team-oriented structured project is required. One three-hour laboratory per week. Corequisite: EECE 5376. No credit for students who have earned credit for 4376L. FALL. [1]

EECE5377 - FPGA Design

Title

FPGA Design

Catalog Description

(Also listed as EECE 4377) Design and applications of field-programmable gate arrays, Electronic Design Automation (EDA) tools for design, placement, and routing. Hardware description languages. Implementation of designs on prototype FPGA board. No credit for students who have earned credit for 4377. [3]

EECE5380 - Electronics II

Title

Electronics II

Catalog Description

(Also listed as EECE 4380) Integrated circuit analysis and design. High frequency operation of semiconductor devices. Frequency-response and feedback analysis of BJT and MOS analog amplifier circuits, multi-stage frequency-compensated amplifier design. Transient analysis of BJT and MOS digital circuit families. Digital-to-analog and analog-to-digital conversion circuits. No credit for students who have earned credit for 3380. SPRING. [3]

EECE5385 - VLSI Design**Title**

VLSI Design

Catalog Description

(Also listed as EECE 4385) Integrated circuit and fabrication techniques; CAD tools for design, layout, and verification; parasitic elements and their effects on circuit performance; system-level design experience is gained by completing design and layout phases of a project. No credit for students who have earned credit for 4385. FALL. [3]

EECE5891 - Special Topics**Title**

Special Topics

Catalog Description

(Also listed as EECE 3891) No credit for students who have earned credit for 3891. [1-3 each semester]

EECE5892 - Special Topics**Title**

Special Topics

Catalog Description

(Also listed as EECE 3892) No credit for students who have earned credit for 3892. [1-3 each semester]

EECE6301 - Solid-State Materials**Title**

Solid-State Materials

Catalog Description

Properties of charged particles under the influence of an electric field, quantum mechanics, particle statistics, fundamental particle transport, and band theory of solids. FALL. [3]

EECE6302 - Electric and Magnetic Properties of Solids**Title**

Electric and Magnetic Properties of Solids

Catalog Description

Electromagnetic theory of solids using advanced mathematical and computational techniques. Dielectric, magnetic, and optical properties. Fundamental interactions of electromagnetic radiation and charged particles in solids. Prerequisite: EECE 6301. SPRING. [3]

EECE6303 - Nanophotonic Devices**Title**

Nanophotonic Devices

Catalog Description

Review of basic photonics concepts and investigation of applications of nanophotonic devices in free-space, photonic and optoelectronic circuits, medicine, and energy. Emphasis is placed on recent literature and new technologies. SPRING. [3]

EECE6304 - Radiation Effects and Reliability of Microelectronics

Title

Radiation Effects and Reliability of Microelectronics

Catalog Description

The space radiation environment and effects on electronics, including basic mechanisms of radiation effects and testing issues. Total dose, single-event, high-dose-rate, and displacement damage radiation effects. Effects of defects and impurities on MOS long-term reliability. SPRING. [3]

EECE6306 - Solid-State Effects and Devices I

Title

Solid-State Effects and Devices I

Catalog Description

The semiconductor equations are examined and utilized to explain basic principles of operation of various state-of-the-art semiconductor devices including bipolar and MOSFET devices. FALL. [3]

EECE6307 - Solid-State Effects and Devices II

Title

Solid-State Effects and Devices II

Catalog Description

The structure of solids, phonons, band theory, scattering phenomena, and theory of insulators. [3]

EECE6311 - Systems Theory

Title

Systems Theory

Catalog Description

Use of linear algebra and matrix analysis for solving systems of linear and ordinary differential equations. State space representations of control systems. Stability, controllability, and observability. Support-vector machines as applied functional analysis. Gradient-based optimization techniques. Dimensionality reduction. SPRING. [3]

EECE6321 - Cyber-Physical Systems

Title

Cyber-Physical Systems

Catalog Description

Modeling, design, and analysis of cyber-physical systems that integrate computation and communication with physical systems. Modeling paradigms and models of computation, design techniques and implementation choices, model-based analysis and verification. Project that covers the modeling, design, and analysis of CPS. [3]

EECE6341 - Advanced Analog Electronics

Title

Advanced Analog Electronics

Catalog Description

Analysis and design of analog electronics circuits with emphasis on integrated circuits. Topics include operational amplifiers, wideband amplifiers, multipliers, and phase-locked loops. FALL. [3]

EECE6342 - Advanced Digital Electronics

Title

Advanced Digital Electronics

Catalog Description

Analysis and design of digital electronic circuits with emphasis on integrated circuits. Topics include logic families, semiconductor memories, and the analog-digital interface. [3]

EECE6343 - Digital Systems Architecture

Title

Digital Systems Architecture

Catalog Description

Architectural descriptions of various CPU designs, storage systems, IO systems, parallel and von Neumann processors and interconnection networks. [3]

EECE6354 - Advanced Real-Time Systems

Title

Advanced Real-Time Systems

Catalog Description

Fundamental problems in real-time systems, with focus on modeling, analysis, and design. Topics include: scheduling theory and techniques, time synchronization, time- and event-triggered systems, distributed architectures, advanced programming languages for real-time systems. Literature reviews and projects. [3]

EECE6356 - Intelligent Systems and Robotics

Title

Intelligent Systems and Robotics

Catalog Description

Fundamental technologies in autonomous vehicles. Bayesian probability. Probabilistic robotics. Coordinate changes. Representations of rotation. Motion and sensor models. Bayes filters. Simultaneous localization and mapping. Current machine learning approaches. FALL. [3]

EECE6357 - Advanced Image Processing

Title

Advanced Image Processing

Catalog Description

Techniques of image processing with an emphasis on medical images. Topics include image formation, digitization, linear shift-invariant processing, feature detection, segmentation, and registration. FALL. [3]

EECE6358 - Quantitative Medical Image Analysis

Title

Quantitative Medical Image Analysis

Catalog Description

Image processing and statistical methods for quantitative analysis and interpretation of medical imaging data. Neuroimaging approaches related to brain structure, function, and connectivity. Massively univariate analysis (parametric mapping), multiple comparison issues, random fields, independent components, non-parametric approaches, and Monte Carlo methods. Students should have knowledge of undergraduate probability and computer programming. [3]

EECE6361 - Random Processes**Title**

Random Processes

Catalog Description

Concepts of random variables, functions of random variables, and random processes. Spectral properties of random processes and of the response of linear systems to random inputs. Linear mean square estimation. Emphasis on engineering applications. FALL. [3]

EECE6362 - Detection and Estimation Theory**Title**

Detection and Estimation Theory

Catalog Description

Fundamental aspects of signal detection and estimation. Formulation of maximum likelihood, maximum a posteriori, and other criteria. Multidimensional probability theory, signal and noise problems, and Kalman filter structure are studied. SPRING. [3]

EECE7999 - Master's Thesis Research**Title**

Master's Thesis Research

Catalog Description

[0-6]

EECE8395 - Special Topics**Title**

Special Topics

Catalog Description

Based on research and current developments in electrical engineering of special interest to staff and students. [3]

EECE8396 - Special Topics**Title**

Special Topics

Catalog Description

Based on research and current developments in electrical engineering of special interest to staff and students. [3]

EECE8850 - Independent Study**Title**

Independent Study

Catalog Description

Readings and/or projects on advanced topics in electrical engineering under the supervision of the staff. Consent of instructor required. [Variable credit: 1-3 each semester]

EECE8991 - Seminar
Title

Seminar

Catalog Description

[1]

EECE8992 - Advanced Seminar for Ph.D. Candidates
Title

Advanced Seminar for Ph.D. Candidates

Catalog Description

[1]

EECE8999 - Non-Candidate Research
Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit 0-12]

EECE9999 - Ph.D. Dissertation Research
Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Engineering Management

ENGM5000 - Enterprise System Design
Title

Enterprise System Design

Catalog Description

(Also listed as ENGM 3000) Design of complex enterprise systems and processes including enterprise requirements analysis, process-mapping, modeling, performance measurement, benchmarking, solution development, and change management. No credit for students who have earned credit for 3000. FALL, SPRING. [3]

ENGM5010 - Systems Engineering
Title

Systems Engineering

Catalog Description

(Also listed as ENGM 3010) Fundamental considerations associated with the engineering of large-scale systems. Models and methods for systems engineering and problem solving using a systems engineering approach. No credit for students who have earned credit for 3010. FALL, SPRING. [3]

ENGM5100 - Finance and Accounting for Engineers

Title

Finance and Accounting for Engineers

Catalog Description

(Also listed as ENGM 3100) Time value of money, capital budgeting and formation, financial accounting and reporting, double entry bookkeeping, taxation, performance ratio measurements, and working capital management. Probabilistic models for expected net present value and rate of return, dividend pricing models for alternative growth scenarios, cost and market based models for average cost of capital, taxation algorithms, and regression analysis for individual firm betas. No credit for students who have earned credit for 3100. FALL, SPRING, SUMMER. [3]

ENGM5200 - Technology Marketing

Title

Technology Marketing

Catalog Description

(Also listed as ENGM 3200) Strategies for marketing technology-based products and services. Demand analysis, segmentation, distribution, and personal selling. Economic analysis from inception to end use. No credit for students who have earned credit for 3200. FALL. [3]

ENGM5300 - Technology Assessment and Forecasting

Title

Technology Assessment and Forecasting

Catalog Description

(Also listed as ENGM 3300) Methods of forecasting technological advancements and assessing their potential intended and unintended consequences. Delphi method, trend exploration, environmental monitoring, and scenario development. No credit for students who have earned credit for 3300. SPRING. [3]

ENGM5600 - Technology-Based Entrepreneurship

Title

Technology-Based Entrepreneurship

Catalog Description

(Also listed as ENGM 3600) Identification and evaluation of opportunities: risks faced by entrepreneurs, market assessment, capital requirements, venture capital acquisition, legal structures, tax implications for sharing technology-based businesses. No credit for students who have earned credit for 3600. FALL. [3]

ENGM5650 - Operations and Supply Chain Management

Title

Operations and Supply Chain Management

Catalog Description

(Also listed as ENGM 3650) Manufacturing strategy, process analysis, product and process design, total quality management, capacity planning, inventory control, supply chain design, and advanced operations topics. Modeling and analysis using cases and spreadsheets. No credit for students who have earned credit for 3650. FALL. [3]

ENGM5700 - Program and Project Management
Title

Program and Project Management

Catalog Description

(Also listed as ENGM 3700) Scheduling, cost estimation/predictions, network analysis, optimization, resource/load leveling, risk/mitigation, quality/testing, international projects. Term project required. Provides validated preparation for the Project Management Institute CAPM certification for undergraduates or the PMP for graduate students. Credit given for only one of ENGM 3700 or 5700, CE 4400 or 5400, or EECE 4950. FALL, SPRING, SUMMER. [3]

ENGM5890 - Special Topics
Title

Special Topics

Catalog Description

Variable credit each semester. [1-3]

ENGM6500 - Applied Leadership in Engineering Management
Title

Applied Leadership in Engineering Management

Catalog Description

Application of core principles of leadership and program management for engineering professionals. Strategic planning, people management, staffing, compensation, business process improvement theory, business interruption, leadership styles, emotional intelligence, negotiation, ethical business practices. [3]

English

ENGL5290 - Special Topics in Creative Writing
Title

Special Topics in Creative Writing

Catalog Description

(Also listed as ENGL 3891) Advanced instruction in creative writing in emerging modes and hybrid genres. [3] (HCA)

ENGL7430 - Graduate Fiction Workshop
Title

Graduate Fiction Workshop

Catalog Description

May be repeated for credit. [4]

ENGL7440 - Graduate Poetry Workshop
Title

Graduate Poetry Workshop

Catalog Description

[May be repeated for credit with the program director's approval] [4]

ENGL7450 - Graduate Nonfiction Workshop

Title

Graduate Nonfiction Workshop

Catalog Description

[May be repeated for credit with the program director's approval] [4]

ENGL7460 - Literature and the Craft of Writing

Title

Literature and the Craft of Writing

Catalog Description

[May be repeated for credit with the program director's approval] [4]

ENGL7470 - Special Topics in Creative Writing

Title

Special Topics in Creative Writing

Catalog Description

Advanced instruction in creative writing, including new and emerging genres, special topic/author studies, professional aspects of creative writing, and interdisciplinary approaches to creative writing. May be repeated. [4]

ENGL7997 - Teaching Creative Writing

Title

Teaching Creative Writing

Catalog Description

Graduate level instruction in the pedagogy of creative writing. Not open to students who have earned credit for 5290 section 01 offered spring 2019 or spring 2020. [4]

ENGL7998 - Master of Fine Arts Pedagogy Tutorial

Title

Master of Fine Arts Pedagogy Tutorial

Catalog Description

Instruction with faculty adviser for MFA students teaching undergraduate courses. [2]

ENGL7999 - MFA Thesis Research

Title

MFA Thesis Research

Catalog Description

[0-12]

ENGL8110 - Proseminar

Title

Proseminar

Catalog Description

[4]

ENGL8120 - Pedagogy Seminar

Title

Pedagogy Seminar

Catalog Description

[4]

ENGL8137 - Introduction to Literary Theory

Title

Introduction to Literary Theory

Catalog Description

[4]

ENGL8138 - Seminar in Critical Theory and Methodology

Title

Seminar in Critical Theory and Methodology

Catalog Description

Topics include gender and sexuality studies, critical race studies, visibility and/or spectrality, postcolonial studies, disability studies, archival research and editorial practices, digital and public humanities, and environmental humanities. May be repeated for credit more than once if there is no duplication in topic. [4]

ENGL8150 - Indep Study Problems in Engl/Amer Lit

Title

Indep Study Problems in Engl/Amer Lit

Catalog Description

May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 4 credits per semester of enrollment. [1-4]

ENGL8155 - Special Topics in English and American Literature

Title

Special Topics in English and American Literature

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

ENGL8303 - Queer Theory

Title

Queer Theory

Catalog Description

History and development of queer theory. Key intellectual antecedents, significant theorists, and current trends. How sexuality intersects with gender, race, class, nationality, ability, and religion. [3]

ENGL8331 - Studies in Medieval and Early-Modern British Literature

Title

Studies in Medieval and Early-Modern British Literature

Catalog Description

Early-modern through 17th century. May be repeated for credit more than once if there is no duplication in topic. [4]

ENGL8340 - Seminar in Shakespeare

Title

Seminar in Shakespeare

Catalog Description

[4]

ENGL8351 - Studies in 20th and 21st Century American Literatures

Title

Studies in 20th and 21st Century American Literatures

Catalog Description

Topics include modernisms, African American, Asian American, Latino/a, and Caribbean American literatures. May be repeated for credit more than once if there is no duplication in topic. [4]

ENGL8370 - Studies in 18th Century British Literature

Title

Studies in 18th Century British Literature

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. [4]

ENGL8410 - Studies in Romantic and Victorian Literatures

Title

Studies in Romantic and Victorian Literatures

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. [4]

ENGL8430 - Studies in Modern and Contemporary British and Irish Literatures

Title

Studies in Modern and Contemporary British and Irish Literatures

Catalog Description

Topics include British and Anglo-Irish modernisms, black British writers. May be repeated for credit more than once if there is no duplication in topic. [4]

ENGL8440 - Studies in Comparative Literatures

Title

Studies in Comparative Literatures

Catalog Description

Topics include classical or ancient legacies; hemispheric American literatures, Caribbean literatures in different languages; translation studies; studies of literary genres and forms; global modernisms; transatlantic and transpacific studies. May be repeated for credit more than once if there is no duplication in topic. [4]

ENGL8441 - Studies in Anglophone World Literatures

Title

Studies in Anglophone World Literatures

Catalog Description

Topics in global colonial and global postcolonial Anglophone literatures, including Asian, African, and Caribbean writers; global modernisms. May be repeated for credit more than once if there is no duplication in topic. [4]

ENGL8442 - Media Studies

Title

Media Studies

Catalog Description

Topics include new models of science and the humanities; modes of reality and representation in the age of cyberculture; American literature and the cinema; early cinema (1893-1920). May be repeated for credit more than once if there is no duplication in topic. [4]

ENGL8450 - Studies in Early and 19th-Century American Literatures

Title

Studies in Early and 19th-Century American Literatures

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. [4]

ENGL8998 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

[0]

ENGL8999 - Non-candidate Research
Title

Non-candidate Research

Catalog Description

Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

ENGL9995 - Half-time Ph.D. Dissertation Research
Title

Half-time Ph.D. Dissertation Research

Catalog Description

For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

ENGL9999 - Ph.D. Dissertation Research
Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Environmental Engineering

ENVE5305 - Enterprise Risk Management
Title

Enterprise Risk Management

Catalog Description

(Also listed as ENVE 4305) Development of an organization-wide risk management program for protecting human health, the environment and business continuity. Focus on defining an all-hazards risk management process and program implementation, performing risk assessments, determining and selecting appropriate risk reduction strategies, and influencing risk management decisions internally and externally. Applications drawn from natural disasters, man-made accidents and intentional acts. No credit for students who have earned credit for ENVE 4305. SPRING. [3]

ENVE5600 - Environmental Chemistry
Title

Environmental Chemistry

Catalog Description

(Also listed as ENVE 4600) Theoretical aspects of physical, organic, and inorganic chemistry applied to environmental engineering. Estimation of chemical parameters based on thermodynamic and structural activity relationships, kinetics of chemical reactions, equilibrium processes in the environment, including the carbonate system, metal complexation and precipitation. No credit for students who have earned credit for 4600. FALL. [3]

ENVE5605 - Environmental Thermodynamics, Kinetics, and Mass Transfer

Title

Environmental Thermodynamics, Kinetics, and Mass Transfer

Catalog Description

(Also listed as ENVE 4605) Examination of fundamental environmental processes and phenomena that provide the analytical tools necessary to solve a broad range of environmental problems. These tools include equilibrium phenomena, process rate and mass transport phenomena. No credit for students who have earned credit for 4605. SPRING. [3]

ENVE5610 - Biological Processes in Environmental Systems

Title

Biological Processes in Environmental Systems

Catalog Description

(Also listed as ENVE 4610) Principles of biology and their application to wastewater treatment processes with emphasis on microbial ecology, bioenergetics, and the role of chemical structure in biodegradability. Utilization kinetics of inhibitory and non-inhibitory organic compounds. Biological process analysis and design (aerobic and anaerobic) for municipal and industrial wastewaters, using a mass balance approach. No credit for students who have earned credit for ENVE 4610. SPRING. [3]

ENVE5615 - Environmental Assessments

Title

Environmental Assessments

Catalog Description

(Also listed as ENVE 4615) Design and conduct of environmental assessments to evaluate risks posed by infrastructure systems or environmental contamination. Impact analyses for sources, infrastructure modifications, due diligence environmental audits, and contaminated site remedial investigations. No credit for students who have earned credit for 4615. FALL. [3]

ENVE5620 - Environmental Characterization and Analysis

Title

Environmental Characterization and Analysis

Catalog Description

(Also listed as ENVE 4620) Acquisition and interpretation of environmental data. Principles of chemical measurement, sample collection and sample program design; laboratory safety and good laboratory practices; analytical instrumentation and methods; quality assurance and quality control; and statistical interpretation of data. Hands-on experience through demonstrations featuring state-of-the-art analytical instrumentation. No credit for students who have earned credit for 4620. SPRING. [3]

ENVE5625 - Environmental Separations Processes

Title

Environmental Separations Processes

Catalog Description

(Also listed as ENVE 4625) Fundamentals and applications of separations processes relevant to water and wastewater treatment and other environmental systems. Topics include coagulation/flocculation, sedimentation, granular filtration; advanced separation processes such as various membrane processes, absorption, ion exchange, thermally driven separations, and electrically driven separations including electrodialysis and capacitive deionization. No credit for students who have earned credit for ENVE 4625. SPRING. [3]

ENVE5700 - Energy and Water Resources

Title

Energy and Water Resources

Catalog Description

(Also listed as ENVE 4700) Scientific, technological, philosophical, and social issues surrounding approaches to carbon-based energy and alternative energy resources, management of carbon through sequestration, supplying and treating water for agriculture, communities, and industry, and changing climate impacts on regional distribution of water resources. No credit for students who have earned credit for 4700. SPRING. [3]

ENVE5705 - Physical Hydrology

Title

Physical Hydrology

Catalog Description

(Also listed as ENVE 4705) Development of fundamental bases of hydrological processes. Landatmosphere processes, surfacewater flows, soil moisture dynamics, and groundwater flows. Exposition of physical principles, their embodiment in mathematical models, and their use in interpreting observations in the field and laboratory. No credit for students who have earned credit for 4705. FALL. [3]

ENVE5710 - Hydrology

Title

Hydrology

Catalog Description

(Also listed as ENVE 4710) The hydrologic cycle, study of precipitation, evapotranspiration, hydrometeorology, stream flow, flood flow, flood routing, storm sewer design, detention basin design, and water quality. No credit for students who have earned credit for 4710. FALL. [3]

ENVE5715 - Groundwater Hydrology

Title

Groundwater Hydrology

Catalog Description

(Also listed as ENVE 4715) The occurrence and flow of ground water. Basic concepts of the effects of varying permeability and capillarity on seepage flow. Flow toward wells, through dikes, and beneath dams. No credit for students who have earned credit for 4715. SPRING. [3]

ENVE5720 - Surface Water Quality Modeling

Title

Surface Water Quality Modeling

Catalog Description

(Also listed as ENVE 4720) Analysis of physical, chemical, biological, and physiological contaminants in streams, lakes, and estuaries, and surface water/groundwater interfaces. Analytical and numerical modeling techniques. One- and two-dimension computer simulation of surface water quality. No credit for students who have earned credit for 4720. SPRING. [3]

ENVE5800 - Nuclear Environmental Engineering

Title

Nuclear Environmental Engineering

Catalog Description

(Also listed as ENVE 4800) The nuclear fuel cycle and environmental and societal impacts associated with its traditional implementation. Technical and programmatic challenges associated with fuel production, and waste management including processing, storage, transportation, decontamination, decommissioning, and environmental restoration. Technologies and approaches for reducing impacts of the nuclear fuel cycle. No credit for students who have earned credit for 4800. SPRING. [3]

ENVE6800 - Nuclear Facilities Life Cycle Engineering

Title

Nuclear Facilities Life Cycle Engineering

Catalog Description

The life cycle (including siting, licensing, construction, operations and decommissioning) of the nuclear facilities that comprise the nuclear fuel cycle--from mining uranium ore through the potential recycling of used nuclear fuel. SPRING. [3]

ENVE6805 - Storage, Treatment and Disposal of Radioactive Waste

Title

Storage, Treatment and Disposal of Radioactive Waste

Catalog Description

Evolution of current domestic and international approaches, including waste forms, classification, storage and disposal locations, and environmental and safety assessments. FALL. [3]

ENVE7531 - Nuclear Chemistry and Processes

Title

Nuclear Chemistry and Processes

Catalog Description

Chemistry and chemical processing of the actinides and important fission products and byproducts. Development of nuclear chemical engineering processes for these materials. SPRING. [3]

ENVE7533 - Nuclear Process Safety

Title

Nuclear Process Safety

Catalog Description

Approaches for evaluating the safety of nuclear radiochemical processing systems. Safety analysis practices from the chemical industry, the nuclear power community, and the United States nuclear weapons complex, and other quantitative and qualitative risk assessment methods. FALL. [3]

ENVE7534 - Nuclear Environmental Regulation, Law and Practice

Title

Nuclear Environmental Regulation, Law and Practice

Catalog Description

Environmental laws and regulations governing radionuclides and radioactive waste, including those concerning hazardous chemicals and wastes and those impacting commercial nuclear fuel cycle facilities and former nuclear weapons and materials sites. Interplay between regulatory agencies such as the US Nuclear Regulatory Commission, the US Environmental Protection Agency, and the states. Self-regulation of activities by the U.S. Department of Energy. SUMMER. [3]

ENVE7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

[0-6]

ENVE8000 - Individual Study

Title

Individual Study

Catalog Description

Literature review and analysis, or laboratory investigation of special problems under faculty supervision. FALL, SPRING, SUMMER. [Variable credit: 1-4 each semester]

ENVE8001 - Individual Study

Title

Individual Study

Catalog Description

Literature review and analysis, or laboratory investigation of special problems under faculty supervision. FALL, SPRING, SUMMER. [Variable credit: 1-4 each semester]

ENVE8002 - Individual Study

Title

Individual Study

Catalog Description

Literature review and analysis, or laboratory investigation of special problems under faculty supervision. FALL, SPRING, SUMMER. [Variable credit: 1-4 each semester]

ENVE8300 - Research Methods Seminar

Title

Research Methods Seminar

Catalog Description

Coverage of graduate-level skills required to conduct critical review of a topic and produce research proposals, research presentations, and peer-reviewed journal publications. Includes discussion of responsible conduct in research and ethics. FALL. [0]

ENVE8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

ENVE9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Epidemiology

EPID8301 - Introduction To Statistical Computing And Programming Workshop

Title

Introduction To Statistical Computing And Programming Workshop

Catalog Description

This course is designed for students who seek to develop skills in statistical computing. Students will learn how to use R and STATA for data management, database querying, reporting generating, data presentation, and data tabulation and summarization. Topics include: organization and documentation of data, input and export of data sets; methods of cleaning data; tabulation and graphing of data; programming capabilities; and an introduction to simulations and bootstrapping. Students will also be introduced to LATEX and SWEAVE for report writing. Students will also be briefly introduced to SAS. [2]

EPID8310 - Causal Inference

Title

Causal Inference

Catalog Description

This course will concentrate on conceptually grasping tools of logic and critical thinking as they apply to epidemiologic research. Our emphasis will be on rigorous definition of a causal effect and the minimal conditions necessary to consistently estimate such effects. In a small group format, we will examine case studies and anchor our discussions in readings from philosophy of science, logic, and probability. We will cover examples of valid and fallacious arguments, probability calculus, probabilistic fallacies, applications of Bayes theorem, the frequentist and Bayesian perspective, counterfactual logic, introduction of directed acyclic graphs (DAG), and interpretation of p-values and confidence intervals in epidemiologic research. [3]

EPID8311 - Epidemiologic Theory And Methods I

Title

Epidemiologic Theory And Methods I

Catalog Description

This is the first of a two-course series on advanced epidemiologic concepts and methods that includes measures of disease frequency, measures of effect, descriptive epidemiology, study designs, bias, misclassification and effect measure modification, and ethics in epidemiologic research. A case-based approach will engage students in demonstrating concepts using actual research data and in critical appraisal of case studies and publications that feature strong and weak examples. [4]

EPID8312 - Epidemiologic Theory And Methods II

Title

Epidemiologic Theory And Methods II

Catalog Description

This second in a two-course series provides an in-depth treatment of concepts and skills in epidemiologic research, including problem conceptualization, study design, data analysis and interpretation. Includes emphasis on how to design studies to best measure etiologic effects and includes advanced discussion of confounding, interaction, and missing data. A continued case-based approach will engage students in demonstrating concepts and methods using the students' own data. Prerequisite: 8311: Epidemiologic Theory and Methods I. [4]

EPID8315 - Scientific Writing I

Title

Scientific Writing I

Catalog Description

Scientific Writing I. Participatory course in which students develop skills in presenting research results in manuscripts, abstracts, and posters. Students work in small groups to write and critique published and unpublished manuscripts, with a focus on understanding the essential components of a scientific manuscript or presentation, as well as the process of publishing in the peer-reviewed literature and managing reviewer and editor comments and requests. [2]

EPID8321 - Applied Epidemiologic Methods in Regression I: Binary Data

Title

Applied Epidemiologic Methods in Regression I: Binary Data

Catalog Description

Applied Epidemiologic Methods in Regression I: Binary Data. Concepts and applications, including logistic regression, binomial regression, ordinal regression, multinomial regression, quantile regression, model building strategy, additive and multiplicative interaction, clustered and longitudinal data, and graphical exploration. Includes computer-based experience with real data, and an emphasis on logistic regression.

EPID8323 - Epidemiologic Methods: Design and Analysis with Time-to-Event Data

Title

Epidemiologic Methods: Design and Analysis with Time-to-Event Data

Catalog Description

Epidemiologic Methods: Design and Analysis with Time-to-Event Data. Concepts and applications in survival analysis and analysis of incidence rates, including truncation and censoring, life tables, nonparametric approaches (e.g. Kaplan-Meier, log-rank), semi-parametric approaches (e.g. Cox models, proportional hazards regression), parametric approaches (e.g. Weibull, gamma regression) accommodating time-dependent exposures, Poisson regression, sensitivity analysis, bootstrapping, and multiple imputation. [4]

EPID8325 - Scientific Writing II - Proposal Development in Epidemiology

Title

Scientific Writing II - Proposal Development in Epidemiology

Catalog Description

Scientific Writing II - Proposal Development in Epidemiology. Participatory course in which each student develops a high quality, detailed research proposal suitable for submission to NIH or AHRQ that includes both a technical proposal and a draft budget justification. Includes lecture, in-class exercises and group processes. SPRING

EPID8330 - Training in Molecular and Genetic Epidemiology of Cancer (MAGEC)

Title

Training in Molecular and Genetic Epidemiology of Cancer (MAGEC)

Catalog Description

To provide advanced training in concepts and issues central to cancer epidemiology. Topics will include methodology for conducting a cancer epidemiology study, state-of-the-art technologies for such studies, key cancer exposures, biology and major risk factors for common cancers. [1]

EPID8331 - Seminar In Quantitative Methods And Measurement

Title

Seminar In Quantitative Methods And Measurement

Catalog Description

Concepts and application of cross-cutting tools used for unique and/or specialized types of measurement and instrument development for areas such as physical activity, clinical laboratory tests, and imaging studies. May be repeated. [2]

EPID8332 - Advanced Methods For Epidemiology

Title

Advanced Methods For Epidemiology

Catalog Description

These methods electives will be taught in modular format, most often with three modules on related methods topics, which will vary annually. Students will explore methodological issues in epidemiology like measurement error, missing data, intermediate variables, complex study designs, meta-analysis, splines, propensity scores, simulation. Exercises with provided datasets and the student's own data will be included. May be repeated. [1-3]

EPID8333 - Analytic Techniques for Genetic Epidemiology

Title

Analytic Techniques for Genetic Epidemiology

Catalog Description

This course will take an example-based approach to provide students with the skills necessary to conduct statistical association analysis of genetic data from human populations for genetic epidemiology studies. Topics will include quality control, statistical methods for association testing, common study design issues, future directions of genetic epidemiology and advanced topics. HGEN 8330, HGEN 8340, MP&B 8341 recommended. [4]

EPID8334 - Critical Perspectives on Sex, Gender, and Medical Research

Title

Critical Perspectives on Sex, Gender, and Medical Research

Catalog Description

This course is designed to provide students with the foundation necessary to critically assess research protocols and published literature on the inclusion and omission of sex and/or gender. This course will also provide understanding of the biological mechanisms involved in sex as a biological variable and will investigate the differences and relationship between sex and gender. Topics discussed include: basic definitions and measurements of sex and gender, biological and sociological contributions to sex and gender, review of sex chromosomes, health disparities and ethical implications, and study designs and statistical assessment of sex and/or gender in research. Examples are stressed with reference to assumptions and limitations. Students should have a basic knowledge of introductory biology (what one would learn in an introductory biology course) and they should have taken, or be taking concurrently, an introductory course in epidemiology, genetics, public health, statistics or biostatistics. If unsure about pre-requisites contact course instructors and exceptions will be considered. [2]

EPID8340 - Content Area Intensives

Title

Content Area Intensives

Catalog Description

These intensives are offered on a rotating basis and taught by faculty with research expertise in the content area of focus. Areas of epidemiology may include cancer, cardiovascular disease, child health, chronic disease/diabetes, genetics, global health, health care, infectious disease, nutrition, pharmacoepidemiology, reproductive, and social. May be repeated. [1-3]

EPID8370 - Current Topics In Research

Title

Current Topics In Research

Catalog Description

Students attend weekly presentations selecting from the Vanderbilt Epidemiology Center Seminar Series, Biostatistics Clinic, clinical grand rounds on topics related to content area interests, and other relevant seminars. Students will convene with faculty to reflect on and critique components of research presentations relevant to the students' interests and to the contemporaneous topics being covered in the core epidemiology curriculum. Course assignments will focus on critical appraisal of a methodologic challenge identified in a seminar setting that has immediate relevance to the student's own research. May be repeated. [1]

EPID8371 - Special Topics Seminar In Epidemiology

Title

Special Topics Seminar In Epidemiology

Catalog Description

Faculty offer small groups of students a study course on a topic of mutual interest and concern in the faculty member's area of expertise. May be repeated with topic change. [1-3]

EPID8372 - Advanced Readings In Epidemiology

Title

Advanced Readings In Epidemiology

Catalog Description

Additional readings in specialized epidemiologic topics will be explored in depth under the guidance of a faculty member. May be repeated. [1-3]

EPID8373 - Independent Study In Epidemiology

Title

Independent Study In Epidemiology

Catalog Description

Designed to allow the student an opportunity to master advanced skills in epidemiology while pursuing special projects under individual members of the faculty in their areas of expertise. May be repeated. [1-3]

EPID8374 - Advanced Readings in Epidemiologic Context, Thought, and History

Title

Advanced Readings in Epidemiologic Context, Thought, and History

Catalog Description

Reading and discussion of seminal literature in the history of epidemiology as well as contemporary literature that provides social and cultural context for the development of the field, challenges to the application of epidemiologic findings, consideration of roles and history of public health advocacy, and exploration of topics like social justice and research ethics through the lens of fiction, nonfiction, and scientific literature. A core reading will be selected to launch each semester and students will work as a group to select the balance of the readings for the semester from a recommended source list. Discussions will be facilitated by faculty and students including guest lecturers. Minimum of masters training in quantitative discipline and research experience in epidemiology or related field is required; other graduate students with permission of the instructor.

EPID8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

EPID9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

European Studies

EUS5220 - Religion and Politics in Modern Europe, 1648-Present

Title

Religion and Politics in Modern Europe, 1648-Present

Catalog Description

(Also listed as EUS 2220) Toleration in the Enlightenment; the French Revolution; antisemitism; genocide; secularism and political Islam. No credit for students who have earned credit for 2220. [3]

French

FREN5111 - French for Graduate Reading

Title

French for Graduate Reading

Catalog Description

Survey of grammar and vocabulary, with extensive reading. Available to graduate students for "no credit" only. [0]

FREN5850 - Independent Study

Title

Independent Study

Catalog Description

(Also listed as FREN 3850) Content varies according to the needs of the individual student. Primarily designed to cover pertinent material not otherwise available in the regular curriculum. May be repeated for a total of 12 credits over a four-semester period, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 12 credits total for four semesters of FREN 5850] No credit for students who have earned credit for 3850. (No AXLE credit)

FREN6030 - Foreign Language Learning and Teaching

Title

Foreign Language Learning and Teaching

Catalog Description

(Also listed as German 5310, Portuguese 6030, and Spanish 6030) Principles and practices of teaching a second language, with concentration on recent interactive and communicative models of foreign language instruction. Goals of the course are 1) to introduce principles of Second Language Acquisition and learning, 2) to critically read relevant literature in the area(s), and 3) to develop FL instructor's awareness through reflective and critical thinking. Classroom observations, journal writing, development of materials, and a small action-research project are expected. Required of all entering teaching assistants. [3]

FREN7010 - Introduction to Research

Title

Introduction to Research

Catalog Description

Materials and methods of scholarly research, with attention to their relation to theories of literature. [3]

FREN7020 - History of the French Language: Medieval Period

Title

History of the French Language: Medieval Period

Catalog Description

Syntax, morphology, phonology, emphasis on textual explication. Prerequisite: elementary knowledge of Latin. [3]

FREN7040 - Second Language Acquisition Theories and Research
Title

Second Language Acquisition Theories and Research

Catalog Description

A review of current sociocultural and cognitive theories and research in SLA. [3]

FREN7050 - Applied French Linguistics
Title

Applied French Linguistics

Catalog Description

Phonetics, morphology, syntax, and semantics, with application to teaching; theories of second language acquisition. [3]

FREN7060 - French Literary Theory
Title

French Literary Theory

Catalog Description

Literary theory as it has been shaped by and shapes the French tradition. [3]

FREN8000 - Apprenticeship in Undergraduate Teaching
Title

Apprenticeship in Undergraduate Teaching

Catalog Description

Supervised experience and instruction of pedagogical practices in foreign language and literature courses. Consent of supervisor and Director of Graduate Studies required. [3]

FREN8010 - Seminar in Medieval French Literature
Title

Seminar in Medieval French Literature

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

FREN8020 - French Feminism from de Beauvoir to the Present
Title

French Feminism from de Beauvoir to the Present

Catalog Description

Ideological, political, and cultural contexts. French feminist theory explored through essays, novels, drama, and poetry. Principal theoretical feminists (Beauvoir, Delphy, Guillaumin, Leclerc, Cixous, Irigaray, Kristeva), as well as lesser-known figures (Halimi, Badinter, Agacinsky, Roudinesco, Amara) and literary figures (Duras, Abv©cassis, Schwarz-Bart, Ednan and Bvç. [3]

FREN8030 - Seminar in Seventeenth-Century French Literature

Title

Seminar in Seventeenth-Century French Literature

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

FREN8040 - Seminar in Eighteenth-Century French Literature

Title

Seminar in Eighteenth-Century French Literature

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

FREN8050 - Seminar in Nineteenth-Century French Literature

Title

Seminar in Nineteenth-Century French Literature

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

FREN8060 - Seminar in Twentieth-Century French Literature

Title

Seminar in Twentieth-Century French Literature

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

FREN8070 - Seminar in Francophone Literature

Title

Seminar in Francophone Literature

Catalog Description

Literature of the French-speaking world ("La Francophonie"). May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

FREN8075 - Seminar in Francophone Caribbean Literature

Title

Seminar in Francophone Caribbean Literature

Catalog Description

Major literary figures and intellectual traditions. No credit for students who earned credit for 388 section 1 in fall 2012. [3]

FREN8080 - Seminar in French Film**Title**

Seminar in French Film

Catalog Description

Theory and practice of French-language film, often in comparative context, for example in a side-by-side study of French and Italian New Wave. No credit for students who completed 390 section 1 in fall 2009. [3]

FREN8090 - Special Topics in French Studies**Title**

Special Topics in French Studies

Catalog Description

Problems, themes, or issues in literature, language, or culture approached in ways that transcend traditional chronological distinctions. [3]

FREN8999 - Non-candidate Research**Title**

Non-candidate Research

Catalog Description

Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

FREN9995 - Half-time Ph.D. Dissertation Research**Title**

Half-time Ph.D. Dissertation Research

Catalog Description

For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

FREN9999 - Ph.D. Dissertation Research**Title**

Ph.D. Dissertation Research

Catalog Description

[0-12]

Gender and Sexuality Studies

GSS5201 - Women and Gender in Transnational Context**Title**

Women and Gender in Transnational Context

Catalog Description

(Also listed as GSS 3201) Gender as a social construction. Feminist critiques of knowledge, family and work, sexuality, health and medicine, and the women's movement. The future of feminism in global context. No credit for students who have earned credit for 3201. [3]

GSS5305 - Gender and Sexuality in Times of Pandemic

Title

Gender and Sexuality in Times of Pandemic

Catalog Description

Integration of science and medicine to the social construction of race, gender and identity. Interconnections with national security, economic growth, and natural risks: sex, death and illness. Challenges to gender and sexual justice by infectious diseases. Historical and literary research; sex, sexuality and gender during times of disease. Expressions, regulations, and resistance of sex, sexuality, and gender during medical/scientific crises. [3]

GSS5970 - Sexing the Archive: Research Methods in Women's and Gender Studies

Title

Sexing the Archive: Research Methods in Women's and Gender Studies

Catalog Description

Conducting research through a feminist and queer lens. Archival research; examining oral histories using specialized Vanderbilt resources, as well as other local and online archives. Offered on a graded basis only. [3]

GSS8301 - Gender and Sexuality: Feminist Approaches

Title

Gender and Sexuality: Feminist Approaches

Catalog Description

Interdisciplinary introduction to the major debates, theoretical terms, and research methods in feminist, gender, sexuality, and queer studies. [3]

GSS8302 - Gender and Pedagogy

Title

Gender and Pedagogy

Catalog Description

Feminist theories of teaching and learning; gender and diversity in the classroom; critical pedagogy. Classroom practicum. [1-4]

GSS8303 - Queer Theory

Title

Queer Theory

Catalog Description

History and development of queer theory. Key intellectual antecedents, significant theorists, and current trends. How sexuality intersects with gender, race, class, nationality, ability, and religion. [3]

GSS8304 - Gender, Power, and Justice

Title

Gender, Power, and Justice

Catalog Description

Theoretical, historical, and cultural analysis of power structures and politics; analysis of activist and academic responses to contemporary political questions. [3]

GSS8305 - Sexual Politics: Theory and Practice
Title

Sexual Politics: Theory and Practice

Catalog Description

Connections and conflicts between academic theory and activist practice. Gender and sexuality theories in relation to community formation, collective action, and inclusive social justice. [4]

GSS8989 - Independent Study
Title

Independent Study

Catalog Description

Work in a tutorial relationship with an individual faculty member or in a student seminar, subject to faculty approval, should several students share a common interest. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3]

German

GER4999 - Honors Research
Title

Honors Research

Catalog Description

Senior Honors Thesis. Open only to honors candidates. [1-3] (No AXLE credit)

GER5111 - German for Graduate Reading
Title

German for Graduate Reading

Catalog Description

Survey of grammar and vocabulary, with extensive reading. Available only to graduate students for "No Credit". [0]

GER5310 - Foreign Language Learning and Teaching
Title

Foreign Language Learning and Teaching

Catalog Description

(Also listed as French 6030, Portuguese 6030, and Spanish 6030) Principles and practices of teaching a second language, with concentration on recent interactive and communicative models of foreign language instruction. Goals of the course are 1) to introduce principles of Second Language Acquisition and learning, 2) to critically read relevant literature in the area(s), and 3) to develop FL instructor's awareness through reflective and critical thinking. Classroom observations, journal writing, development of materials, and a small action-research project are expected. Required of all entering teaching assistants. [3]

GER5343 - The Aesthetics of Violence: Terror, Crime, and Dread in German Literature
Title

The Aesthetics of Violence: Terror, Crime, and Dread in German Literature

Catalog Description

(Also listed as GER 3343) The "dark" side of imagination in twentieth-century German literature including history and theory of modern art, emphasis on literary representation, mutual influences between aesthetic reflection and political action. No knowledge of German required. No credit for students who have earned credit for 3343. [3]

GER5344 - Women at the Margins: German-Jewish Women Writers
Title

Women at the Margins: German-Jewish Women Writers

Catalog Description

(Also listed as GER 3344) Examination of themes, forms, and sociocultural issues shaping the work of German-Jewish women writers from the Enlightenment to the present. Readings and discussions in English. No credit for students who have earned credit for 3344. [3]

GER5345 - Love and Friendship
Title

Love and Friendship

Catalog Description

(Also listed as GER 3345) Concepts of life and friendship, Greek antiquity to Romanticism, modern and postmodern times. Philosophical and literary texts, letters, and essays. Taught in English. No credit for students who have earned credit for 3345. [3]

GER5375 - Art and Rebellion: Literary Experiment in the 1960s and 1970s
Title

Art and Rebellion: Literary Experiment in the 1960s and 1970s

Catalog Description

(Also listed as GER 3375) German literature under the conditions of protest and rebellion. Experiments in poetry, prose, and theatre; new directions in art and media theory; historical influences. Taught in English. No credit for students who have earned credit for 3375. [3]

GER5378 - Dreams in Literature
Title

Dreams in Literature

Catalog Description

(Also listed as GER 3378) The difference between sleeping and being awake. Literary and philosophical texts. Novels, short stories, diaries, poems, and drama written within the last two hundred years. Taught in English. No credit for students who have earned credit for 3378. [3]

GER5443 - A History of German Cinema, With Subtitles

Title

A History of German Cinema, With Subtitles

Catalog Description

A curated presentation of the history of German cinema with special emphasis on its sociocultural contexts and artistic achievements. Discussion will include pertinent theories of cinematography and cinematic narration. Taught in English. [3]

GER5445 - Nazi Cinema: The Manipulation of Mass Culture

Title

Nazi Cinema: The Manipulation of Mass Culture

Catalog Description

(Also listed as GER 2445) Nazi manipulation of mass culture through film (propaganda, musicals, westerns). Some comparison with American film of the era, additional examination of "fascist" aesthetic legacy in American culture today. No knowledge of German required. No credit for students who have earned credit for 2445. [3]

GER5535 - German Romanticism

Title

German Romanticism

Catalog Description

(Also listed as GER 4535) The contributions of Schlegel, Tieck, Novalis, Eichendorff, and others to literature, philosophy, and theory. Intellectual, social, and political currents. No credit for students who have earned credit for 4535. [3]

GER5537 - Women and Modernity

Title

Women and Modernity

Catalog Description

(Also listed as GER 4537) Women in German literature from the eighteenth century to the present, focusing on questions of sexuality, political emancipation, artistic identity. No knowledge of German required. No credit for students who have earned credit for 4537. [3]

GER5548 - German Lyric Poetry-Form and Function

Title

German Lyric Poetry-Form and Function

Catalog Description

(Also listed as GER 4548) Lyric forms as a reaction to personal trauma, collective desire, scientific and technological advances, and social change since the Thirty Years' War. Love, loss, liberation. Students compose poems in imitation of classic examples of the folk song, ballad, sonnet. No credit for students who have earned credit for 4548. [3]

GER5555 - Topics in German Studies (ENGL)

Title

Topics in German Studies (ENGL)

Catalog Description

Seminal aspects of German literature, culture, and civilization through interdisciplinary focus. Taught in English. May be repeated for credit if there is no duplication in topic. [3]

GER5563 - The Age of Goethe-Weimar 1775 to 1805

Title

The Age of Goethe-Weimar 1775 to 1805

Catalog Description

(Also listed as GER 4563) Rational pragmatism, aesthetic innovation in response to Kant and French Revolution. Readings drawn from Goethe's Iphigenia, Hermann und Dorothea, Schiller's Maria Stuart and Wallenstein, and Wieland's Oberon. No credit for students who have earned credit for 4563. [3]

GER5564 - Pleasures and Perils in Nineteenth-Century Theatre

Title

Pleasures and Perils in Nineteenth-Century Theatre

Catalog Description

(Also listed as GER 4564) The German drama and dramatic theory from Romanticism up to Naturalism with emphasis on selected works by Kleist, Büchner, Grillparzer, and Hebbel. No credit for students who have earned credit for 4564. [3]

GER5565 - Revolutionizing Twentieth-Century Theatre

Title

Revolutionizing Twentieth-Century Theatre

Catalog Description

(Also listed as GER 4565) German drama and dramatic theory from Naturalism to the present. Emphasis on Brecht and post-Brechtian drama. No credit for students who have earned credit for 4565. [3]

GER5566 - Nineteenth-Century Prose

Title

Nineteenth-Century Prose

Catalog Description

(Also listed as GER 4566) A study of representative works of the main literary trends from Romanticism to Naturalism. No credit for students who have earned credit for 4566. [3]

GER5567 - The German Novel from Kafka to Grass

Title

The German Novel from Kafka to Grass

Catalog Description

(Also listed as GER 4567) A study and interpretation of the main literary trends and major figures in twentieth-century narrative. No credit for students who have earned credit for 4567. [3]

GER5569 - Writing under Censorship

Title

Writing under Censorship

Catalog Description

(Also listed as GER 4569) An introduction to the main literary trends and authors of the former East Germany (1949-1989). No credit for students who have earned credit for 4569. [3]

GER5574 - Who Am I? German Autobiographies

Title

Who Am I? German Autobiographies

Catalog Description

(Also listed as GER 4574) Canonical and non-canonical texts from the nineteenth and twentieth centuries constructing cultural, religious, and gender identities. Taught in English. No credit for students who have earned credit for 4574. [3]

GER5852 - Independent Readings

Title

Independent Readings

Catalog Description

(Also listed as GER 3852) Designed for majors and qualified undergraduates. Projects are carried out under the supervision of a member of the department. All projects must be approved by the department. May be repeated for a total of 6 credits over a four-semester period in 289a and 289b combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for four semesters of GER 289a and 289b] (No AXLE credit)

GER5884 - Teaching Program Option: Internship in Advanced Language and Literature Courses

Title

Teaching Program Option: Internship in Advanced Language and Literature Courses

Catalog Description

Graduate interns participate in the teaching of advanced language or literature courses and receive training in the writing of syllabi, text selection, testing, the development of supplementary materials, the selection of visual aids. May be repeated for a total of 6 credits, but students may earn only up to 2 credits per semester of enrollment. [1-2; maximum of 6 credits for all semesters of GER 5884]

GER5890 - Selected Topics

Title

Selected Topics

Catalog Description

(Also listed as GER 3890) May be repeated for a total of 12 credits in 3890 and 3891 combined if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3; maximum of 12 credits total for all semesters of GER 3890 and 3891]. No credit for students who have earned credit for 3890. (No AXLE credit)

GER5891 - Selected Topics**Title**

Selected Topics

Catalog Description

(Also listed as GER 3891) May be repeated for a total of 12 credits in 3890 and 3891 combined if there is no duplication in topic. Students may enroll in more than one section of this course per semester. [3; maximum of 12 credits total for all semesters of GER 3890 and 3891]. No credit for students who have earned credit for 3891. (No AXLE credit)

GER6555 - Topics in German Studies (GER)**Title**

Topics in German Studies (GER)

Catalog Description

Seminal aspects of German literature, culture, and civilization through interdisciplinary focus. May be repeated for credit if there is no duplication in topic. Readings and instruction in German; advanced German is presumed. [3]

GER7101 - Foundations I: Transition Points of Modern German Culture**Title**

Foundations I: Transition Points of Modern German Culture

Catalog Description

Analysis and practice of scholarly genres and related academic texts. Different forms of presentation. Efficient time and project management. [3]

GER7102 - Foundations II: Theories of Literary and Cultural Analysis**Title**

Foundations II: Theories of Literary and Cultural Analysis

Catalog Description

Key texts on modern thought, media, and the human condition. Twentieth and twenty-first century. From Hermeneutics to Neuraesthetics. [3]

GER7103 - Foundations III: Modes of Scholarly Work and Writing**Title**

Foundations III: Modes of Scholarly Work and Writing

Catalog Description

Analysis and practice of scholarly genres and related academic texts. Different forms of presentation. Efficient time and project management. [3]

GER7104 - Pre-Exam Colloquium**Title**

Pre-Exam Colloquium

Catalog Description

Preliminary Exam preparation. Exam topics. Major works, writers, and genres. [3]

GER7105 - Graduate Tutorials

Title

Graduate Tutorials

Catalog Description

Graduate Tutorials. Supervised reading in special areas of German language and literature according to a fixed syllabus. Number, content, and schedule of meetings with the instructor are predetermined, as are reading assignments, tests, term papers, and grading procedure. Units are related to the content and method of period seminars and other graduate courses and allow students to deepen their knowledge of subjects not covered in depth in formal courses offered by the department. Students may not take more than one unit per semester. [3]

GER7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

[0-12]

GER8102 - Problems in Germanic Languages and Literatures

Title

Problems in Germanic Languages and Literatures

Catalog Description

[3]

GER8103 - Seminar: Studies in Medieval Literature

Title

Seminar: Studies in Medieval Literature

Catalog Description

[3]

GER8104 - Seminar: Studies in Literature 1400-1680

Title

Seminar: Studies in Literature 1400-1680

Catalog Description

[3]

GER8201 - Seminar: Eighteenth-Century German Literature

Title

Seminar: Eighteenth-Century German Literature

Catalog Description

[3]

GER8202 - Seminar: Nineteenth-Century German Literature
Title

Seminar: Nineteenth-Century German Literature

Catalog Description

[3]

GER8203 - Seminar: Twentieth-Century German Literature
Title

Seminar: Twentieth-Century German Literature

Catalog Description

[3]

GER8204 - Seminar: Problems of Theory in German Studies
Title

Seminar: Problems of Theory in German Studies

Catalog Description

Author, Archive, Work. [3]

GER8205 - Seminar: Intellectual Constellations
Title

Seminar: Intellectual Constellations

Catalog Description

[3]

GER8206 - Seminar: Society and Ethics
Title

Seminar: Society and Ethics

Catalog Description

[3]

GER8207 - Nature. History of an Illusion
Title

Nature. History of an Illusion

Catalog Description

Concepts such as genuineness, authenticity, and purity, 1750 to the present. Focus on Enlightenment, Romanticism, Realism, and post-war literature and media in Germany and Austria. [3]

GER8208 - Romanticism: An Aesthetic Idea and Its Transformation.

Title

Romanticism: An Aesthetic Idea and Its Transformation.

Catalog Description

German culture, art, and politics, 1790-1830. From artistic avant-garde movement to political conservatism. Introduction of genres such as fragment and fairy tale. Origins of literary criticism and hermeneutics. [3]

GER8301 - Pre-Dissertation Colloquium

Title

Pre-Dissertation Colloquium

Catalog Description

Qualifying Exam Colloquium. Dissertation topics. Major thinkers, works, genres, and eras. [3]

GER8999 - Non-candidate Research

Title

Non-candidate Research

Catalog Description

Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

GER9995 - Half-time Ph.D. Dissertation Research

Title

Half-time Ph.D. Dissertation Research

Catalog Description

For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

GER9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Greek

GRK5101 - Beginning Greek I

Title

Beginning Greek I

Catalog Description

(Also listed as GRK 1101) Elements of classical Greek. Reading of simplified texts from authors of the fifth and fourth centuries B.C. No credit for students who have earned credit for a more advanced Greek language course. No credit for students who have earned credit for GRK 1101. [3]

GRK5102 - Beginning Greek II

Title

Beginning Greek II

Catalog Description

(Also listed as GRK 1102) Continuation of 5101. Completion of the elements of classical Greek through readings from classical authors. Introduction to Homeric and Hellenistic Greek. No credit for students who have earned credit for a more advanced Greek language course. No credit for students who have earned credit for 1102. [3]

GRK5201 - Intermediate Greek I: Classical and Koinv© Greek

Title

Intermediate Greek I: Classical and Koinv© Greek

Catalog Description

(Also listed as GRK 2201) Review of Greek grammar, and reading from classical and biblical texts. No credit for students who have earned credit for a more advanced Greek language course. No credit for students who have earned credit for 2201. [3]

GRK5202 - Intermediate Greek II: Homer's Iliad

Title

Intermediate Greek II: Homer's Iliad

Catalog Description

(Also listed as GRK 2202) Selected reading and interpretation; history and literary characteristics of the Homeric epic; practice in reading of meter. No credit for students who have earned credit for a more advanced Greek language course. No credit for students who have earned credit for 2202. [3]

GRK6010 - The Greek Orators

Title

The Greek Orators

Catalog Description

(Also listed as GRK 3010) Classical Athenian orators, with a focus on Lysias and Demosthenes. Historical context, rhetorical technique, and prose style. No credit for students who have earned credit for 3010. [3]

GRK6020 - The Greek Historians

Title

The Greek Historians

Catalog Description

(Also listed as GRK 3020) Selections from the major Greek historians, especially Herodotus and Thucydides, and study of their philosophy of history; investigation of the development of historical prose writing. No credit for students who have earned credit for 3020. [3]

GRK6040 - Readings in Plato and Aristotle

Title

Readings in Plato and Aristotle

Catalog Description

(Also listed as GRK 3040) Selected readings from the dialogues of Plato and from the ethical writings of Aristotle. Corollary readings and discussions of the pre-Socratic philosophers and the post-Aristotelian schools. No credit for students who have earned credit for 3040. [3]

GRK6100 - The Greek Tragedians**Title**

The Greek Tragedians

Catalog Description

(Also listed as GRK 3100) Selections from the plays of Aeschylus, Sophocles, and Euripides. Survey of the development of tragedy. May be repeated for credit with change of subject matter. No credit for students who have earned credit for 3100. [3]

GRK6110 - Greek Lyric Poetry**Title**

Greek Lyric Poetry

Catalog Description

(Also listed as GRK 3110) The Greek melic, elegiac, and iambic traditions, with an introduction to the Greek dialects and special emphasis on Archilochus, Tyrtaeus, Alcaeus, and Sappho. No credit for students who have earned credit for 3110. [3]

GRK6200 - Early Christian Writers**Title**

Early Christian Writers

Catalog Description

(Also listed as GRK 3200) Writings of Greek Christians, from the New Testament to critical works and letters by the Cappadocian fathers. Historical and intellectual context. Rhetoric and style. The Roman East. No credit for students who have earned credit for 3200. [3]

GRK6890 - Special Topics in Greek Literature**Title**

Special Topics in Greek Literature

Catalog Description

(Also listed as GRK 3890) May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. No credit for students who have earned credit for 3890. [3] (HCA)

GRK7000 - Seminar in Classical Greek Prose**Title**

Seminar in Classical Greek Prose

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

GRK7010 - Seminar in Classical Greek Poetry**Title**

Seminar in Classical Greek Poetry

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

GRK7850 - Independent Study

Title

Independent Study

Catalog Description

(Also listed as GRK 3850) Designed for majors wanting to familiarize themselves with works and authors not covered in the regular curriculum. May be repeated for a total of 6 credits if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. No credit for students who have earned credit for 3850. [1-3; maximum of 6 credits total for all semesters of GRK 7850] (No AXLE credit)

Haitian Creole Language

CRE05101 - Elementary Creole I (Duke)

Title

Elementary Creole I (Duke)

Catalog Description

(Also listed as CREO 1101) Essential elements of Haitian Creole or Kreyòl language and Haitian culture. Understanding, speaking, reading, and writing in contexts of health care, Haitian women's rights, and unpaid child servants (restavèk). Vocabulary and idioms. Offered on a graded basis only. [3]

CRE05102 - Elementary Creole II (Duke)

Title

Elementary Creole II (Duke)

Catalog Description

Essential elements of Creole language and aspects of Haitian culture. Speaking, listening, reading, and writing. Exposure to Haitian culture through films, storytelling, games, music, and proverbs. Prerequisite: 1101 or a comparable level of previous Creole language experience, such as familial background in Creole. Offered on a graded basis only. [3]

CRE05201 - Intermediate Creole I (Duke)

Title

Intermediate Creole I (Duke)

Catalog Description

(Also listed as CREO 2201) Understanding, speaking, reading, and writing in cultural context; issues of rural life in Haiti, religion, Frenchified Creole vs popular Creole. Texts, poems, novel excerpts. Focus on contemporary events and debates in Haitian culture. Offered on a graded basis only. Prerequisite: 1102. [3]

CRE05202 - Intermediate Creole II (Duke)

Title

Intermediate Creole II (Duke)

Catalog Description

Second semester of Intermediate Creole. Offered on a graded basis only. Prerequisite: 2201 or equivalent. [3]

CREO5301 - Advanced Haitian-Creole I (Duke)

Title

Advanced Haitian-Creole I (Duke)

Catalog Description

Listening, speaking, reading, and writing skills. Themes related to Ayiti such as literature(s), language(s), education, history, and different types of Haitian music. Pioneers of Haitian Kreyòl literature and works of Haitian scholars/authors published in the past ten years. Music groups that left their mark on Haitian music. [3]

CREO5302 - Advanced Haitian-Creole II

Title

Advanced Haitian-Creole II

Catalog Description

TBD

Health Policy

HPOL8225 - Health Policy Research Seminar

Title

Health Policy Research Seminar

Catalog Description

This seminar series will give students the opportunity to engage with Health Policy faculty on active research projects as well as join discussions on the latest health policy topics and methodologies. [1]

HPOL8520 - Introduction to Health Policy

Title

Introduction to Health Policy

Catalog Description

The aim of this course is to provide students with an overview of the U.S. health care system and key features of its financing and delivery. We will discuss the strengths and weaknesses of our health care system, historical trends, and how we compare to other countries. Moreover, we will discuss the major components of the Affordable Care Act and implementation challenges going forward. Drawing on materials from different academic disciplines, including economics, political science, and sociology, the course will place particular emphasis on analytic approaches to evaluate policy impact. The course will address a range of topics, including the structure of the delivery system, drivers of spending growth, quality of care, and long-term care. [2]

HPOL8521 - Introduction to Health Policy Lab

Title

Introduction to Health Policy Lab

Catalog Description

This is a discussion section/lab for Intro to Health Policy. Students are required to take HPOL 8520 concurrently. [1]

HPOL8525 - Health Economics

Title

Health Economics

Catalog Description

This course is intended to survey the major topics in Health Economics. Each class is organized around a topical theme: those themes include health reform, health insurance, health promotion and disease prevention, and the health care workforce. Each theme will be approached from an economic perspective using recent articles from the literature. [2]

HPOL8526 - Health Economics Lab

Title

Health Economics Lab

Catalog Description

This is a discussion section/lab for Health Econ. Students are required to take HPOL 8525 concurrently. [1]

HPOL8530 - Health Policy II

Title

Health Policy II

Catalog Description

This goal of this course is twofold: 1) to give students an in-depth look at parts of the delivery and financing systems of the U.S. health care system and 2) to help students critically examine study designs and methodologies used in assessments of the U.S. health care system. Health system topics covered in the course will include variation in the costs and quality of the U.S. health care system, how a health system might assess new technologies, and the ethical implications embedded in the US health care system. Methodological topics will include types of validity, risk adjustment, randomized controlled trials, quasi-experimental study designs, and cost effectiveness analysis. This course will draw on multiple disciplines, including bioethics, economics, sociology, and biostatistics. The prerequisite for this course is HPOL 8520. [2]

HPOL8531 - Health Policy II Lab

Title

Health Policy II Lab

Catalog Description

This is a discussion section/lab for Health Policy II. Students are required to take HPOL 8530 concurrently. [1]

HPOL8538 - Health Services Administration: Program and Policy Evaluation

Title

Health Services Administration: Program and Policy Evaluation

Catalog Description

This course addresses the evaluation of changes in the health care delivery system, either through programs specifically implemented to achieve such changes or through changes in health care delivery/financing policies. The primary designs--before/after, concurrent/retrospective control, interrupted time-series--and their strengths and limitations. The course includes didactic lectures and small group critical reading/presentation of current program/policy evaluations published in leading medical journals. [3]

HPOL8539 - Health Services Admin: Program and Policy Evaluation Lab
Title

Health Services Admin: Program and Policy Evaluation Lab

Catalog Description

This is a discussion section/lab for Health Services Administration: Program and Policy Evaluation. Students are required to take HPOL 8538 concurrently. [1]

HPOL8990 - Independent Study

Title

Independent Study

Catalog Description

Designed to allow the student to explore and/or master advanced or specialized topics in Health Policy under the guidance of faculty with relevant expertise. May be repeated. [1-4]

HPOL8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

Hearing & Speech Sciences

HRSP8000 - Introduction to Doctoral Studies and Research

Title

Introduction to Doctoral Studies and Research

Catalog Description

This course covers professional issues and interdisciplinary research in communicative disorders and related fields, use of common research tools and methods, human and animal research issues, philosophy of science, and provides opportunities to learn key disciplinary skills needed for career success.FALL. [0-3] Duff.

HRSP8001 - Language and Memory

Title

Language and Memory

Catalog Description

This course focuses on the relationship between language and memory, two quintessential human abilities. Taking a multiple memory systems perspective, we will discuss theoretical accounts and empirical data on the interaction of language and memory in language acquisition, language use and processing in healthy and disordered populations (e.g., specific language impairment, Alzheimer's disease and other dementias, aphasia, healthy aging) and the implications for rehabilitation of disorders of language and memory. SPRING., [3] Duff.

HRSP8327 - Hearing Loss and Speech Understanding

Title

Hearing Loss and Speech Understanding

Catalog Description

This seminar course will use student-led journal discussions and a group research project to examine various factors that contribute to the speech understanding difficulties of persons with hearing loss (with a focus on older adults with hearing loss). The contribution of individual factors, such as variations in degree of hearing loss (audibility), suprathreshold processing abilities (e.g., frequency and temporal resolution), and cognitive abilities will be discussed. In addition, the impact of environmental factors, such as the level and type of background noise, reverberation, and talker characteristics, on unaided and aided speech understanding will be discussed. Finally, students will complete a group research project using ANSI S3.5 Methods for Calculation of the Speech Intelligibility Index to explore the impact of some of these factors on speech understanding. prerequisites - undergraduate degree in Hearing and Speech Sciences or permission of the instructor. Offered Spring semester, biennially (even numbered years). [3]

HRSP8341 - Seminar: Research In Audiology

Title

Seminar: Research In Audiology

Catalog Description

An advanced study of research for the second-year doctoral student. Directed individual research culminating in oral presentation and a manuscript. Prerequisite: consent of instructor. [2-2] (Offered on demand)

HRSP8342 - Seminar In The Neurobiology Of Hearing And Multisensory Processes

Title

Seminar In The Neurobiology Of Hearing And Multisensory Processes

Catalog Description

(Also listed as Neuroscience 8342) Study at the doctoral level of the neural processes underlying auditory and multisensory perception. The course will focus on critical readings of recently published findings that emphasize the connection between plasticity, neural systems, and behavior. May be repeated for credit. Prerequisite: consent of instructor. FALL, SPRING. [Variable credit: 1-2] Polley, Wallace.

HRSP8344 - Grant Writing in Communication Sciences and Disorders

Title

Grant Writing in Communication Sciences and Disorders

Catalog Description

A discussion of the grant writing and grant review processes in communication disorders. Emphasis is on fellowship (F31 and F32) proposals, with additional information on K series training and R series research grants to the National Institutes of Health with a focus on the National Institute on Deafness and Other Communication Disorders. Content includes writing research and training plans and on how proposal is peer reviewed. Spring. [2-3] Camarata

HRSP8351 - Special Problems In Speech Pathology

Title

Special Problems In Speech Pathology

Catalog Description

Areas and problems not included in other courses in speech pathology, chosen to fit the students' interests and the needs of their programs. May be repeated to a total of 12 hours. FALL, SPRING, SUMMER. [Variable credit: 1-6]

HRSP8352 - Special Problems In Audiology

Title

Special Problems In Audiology

Catalog Description

Areas and problems not included in other courses in audiology, chosen to fit the students' interests and the needs of their programs. May be repeated to a total of 12 hours. FALL, SPRING, SUMMER. [Variable credit: 1-4]

HRSP8366 - Practical Electrophysiology

Title

Practical Electrophysiology

Catalog Description

This course will provide a hands-on introduction to human electrophysiology research methods. The theoretical and practical issues related to experimental design, data acquisition, and analytic procedures will be discussed. Students will collect sample EEG/ERP data. Summer of odd numbered years. Instructor: Key. [3]

HRSP8371 - Research Design And Statistical Analysis

Title

Research Design And Statistical Analysis

Catalog Description

Covers topics in research design and statistics for students preparing for research careers in hearing science, speech science, and communication disorders. Reviews mathematical bases for probability theory and statistical inference. Covers fundamental parametric and nonparametric statistical tests, with extensive discussion of research design in the context of analysis of variance. Presents statistical properties of psychophysical methods and signal detection theory. FALL, SPRING. [3-3] Woynaroski (Also listed as AUD 5371)

HRSP8372 - Research Design And Statistical Analysis

Title

Research Design And Statistical Analysis

Catalog Description

Covers topics in research design and statistics for students preparing for research careers in hearing science, speech science, and communication disorders. Reviews mathematical bases for probability theory and statistical inference. Covers fundamental parametric and nonparametric statistical tests, with extensive discussion of research design in the context of analysis of variance. Presents statistical properties of psychophysical methods and signal detection theory. FALL, SPRING. [3-3] Woynaroski.

HRSP8373 - Signals And Systems For Hearing And Speech Sciences

Title

Signals And Systems For Hearing And Speech Sciences

Catalog Description

A hands-on laboratory course that concentrates on applications for communications science. The course covers: (1) the fundamentals of analog signals, including the Fourier transform and representation of signals in the time and frequency domains; (2) the fundamentals of analog systems (filters), including representation in the time and frequency domains and the analysis of signals that pass through systems; (3) an introduction to digital signals and digital systems, including digital filter design; and (4) an introduction to MATLAB, a powerful tool for understanding and implementing signals and systems. SUMMER of odd-numbered years. [3] Grantham.

HRSP8376 - Language Research Methods

Title

Language Research Methods

Catalog Description

This doctoral-level seminar provides an in-depth analysis of research methods to study language development in children of all ages. Methods used within various fields (e.g. linguistics, communication sciences and disorders, developmental psychology) are reviewed. Critical analysis of research articles with typical and atypical language learners. Spring of even-numbered years. [3] Schuele/Camarata.

HRSP8379 - Cognitive Neuroscience of Language

Title

Cognitive Neuroscience of Language

Catalog Description

The neural and cognitive underpinnings of language are examined from the perspective of cognitive neuroscience, integrating findings from experimental methods including functional neuroimaging, lesion symptom mapping, direct and transcranial cortical stimulation, and electrocorticography. This course is geared toward graduate students in Hearing and Speech Sciences, Psychology, Neuroscience, and related fields. FALL. [3] Wilson.

HRSP8380 - Advanced Seminar In Speech Language Pathology

Title

Advanced Seminar In Speech Language Pathology

Catalog Description

A doctoral-level course focusing on special topics of interest to faculty and students and based on recent research developments in speech pathology. May be repeated for credit. Prerequisite: consent of instructor. FALL, SPRING, SUMMER. [3]

HRSP8381 - Advanced Seminar In Language

Title

Advanced Seminar In Language

Catalog Description

A doctoral-level course focusing on special topics of interest to faculty and students and based on recent research developments in language. May be repeated for credit. Prerequisite: consent of instructor. FALL, SPRING, SUMMER. [3]

HRSP8382 - Seminar: Research In Audiology

Title

Seminar: Research In Audiology

Catalog Description

An advanced study of research for the second-year doctoral student. Directed individual research culminating in oral presentation and a manuscript. Prerequisite: consent of instructor. [2-2] (Offered on demand)

HRSP8383 - Seminar in Auditory and Vestibular Neuroscience

Title

Seminar in Auditory and Vestibular Neuroscience

Catalog Description

This is a full semester course that combines a small amount of didactic teaching with seminar style discussions to introduce students to the neuroscience of the auditory and vestibular systems. For each topic discussed in the course (see below for possible list of topics), the short didactic component introduces/refamiliarizes the students with the basic knowledge requisite for that particular topic; the seminar component following the didactic material involves a presentation of both classic papers as well as recent papers that represent the state of art in the field. The seminar component will train students to critically read primary literature, to present scientific information in clear and concise fashion, and provide a theoretical foundation for understanding sensory function and dysfunction, and the neuroscience of possible therapeutic interventions. The group discussion will also explore the impact of the findings in the papers on various aspects of the field. Specific topics will be based on student interest, and may include: auditory and vestibular sensory encoding of stimuli, synaptic specializations, peripheral and central mechanisms of dysfunction, auditory processing disorders, hair cell regeneration, and therapeutics for auditory and vestibular disorders. NOTE: Open to all graduate students. Permission of instructor required for registration, in addition to approval of academic advisor or completion of introductory neuroscience course. [3]

HRSP8384 - Advanced Seminar In Audiology

Title

Advanced Seminar In Audiology

Catalog Description

A doctoral-level course focusing on special topics of interest to faculty and students based on recent research developments in audiology. May be repeated for credit. Prerequisite: consent of instructor. FALL, SPRING, SUMMER. [3] Staff.

HRSP8388 - Independent Study and Readings In Speech Pathology

Title

Independent Study and Readings In Speech Pathology

Catalog Description

FALL, SPRING, SUMMER. [1-3]

HRSP8389 - Ind Study and Readings in Aud

Title

Ind Study and Readings in Aud

Catalog Description

FALL, SPRING, SUMMER. [1-3]

HRSP8995 - Research Colloquium

Title

Research Colloquium

Catalog Description

The Hearing and Speech Sciences Research Colloquium provides a weekly forum for research presentations by faculty and students of the Department, and by invited guest speakers. The Colloquium is attended by all students in the Program, by Program faculty, and by faculty and guests from other departments and programs on campus. [0-1]

**HRSP8999 - Non-Candidate Research
Title**

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

**HRSP9995 - Half-Time Ph
Title**

Half-Time Ph

Catalog Description

D. Dissertation Research. For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

**HRSP9999 - Ph.D. Dissertation Research
Title**

Ph.D. Dissertation Research

Catalog Description

[0-12]

Hebrew

**HEBR5101 - Elementary Hebrew
Title**

Elementary Hebrew

Catalog Description

Introduction to alphabet, the basics of grammar, and elementary conversation. Classes meet three times per week with an additional two hours a week required in the language laboratory. No credit for students who have earned credit for a more advanced Hebrew language course. [4]

**HEBR5102 - Elementary Hebrew II
Title**

Elementary Hebrew II

Catalog Description

Continuation of 5101. Greater stress upon conversation and grammar. Classes meet three times a week with an additional two hours a week required in the language laboratory. No credit for students who have earned credit for a more advanced Hebrew language course. Prerequisite: 5101. [4]

**HEBR5111 - Hebrew for Graduate Reading
Title**

Hebrew for Graduate Reading

Catalog Description

Survey of grammar and vocabulary, with extensive reading. Available only to graduate students for "No Credit". [0]

HEBR5201 - Intermediate Hebrew I

Title

Intermediate Hebrew I

Catalog Description

Introduction to modern Hebrew reading, conversation, advanced grammar, and conversation. Classes meet three times a week with an additional three hours a week spent in independent work in the language laboratory. No credit for students who have earned credit for a more advanced Hebrew language course. Prerequisite: 5102. [3]

HEBR5202 - Intermediate Hebrew II

Title

Intermediate Hebrew II

Catalog Description

Continuation of 5201. Greater emphasis on reading and writing. Classes meet three times a week with an additional three hours a week spent in independent work in the language laboratory. No credit for students who have earned credit for a more advanced Hebrew language course. Prerequisite: 5201. [3]

HEBR5301 - Advanced Hebrew Grammar

Title

Advanced Hebrew Grammar

Catalog Description

(Also listed as HEBR 2301) Emphasis on syntax and grammar supplemented by listening, speaking, and reading. No credit for students who have earned credit for a more advanced Hebrew language course. No credit for students who have earned credit for 2301. [3]

HEBR5302 - Advanced Hebrew Composition

Title

Advanced Hebrew Composition

Catalog Description

(Also listed as HEBR 2302W) Development of writing skills through the study of short stories, poems, articles, television, and web materials. No credit for students who have earned credit for 2302W. [3]

History

HIST5107 - Chinese Economic History

Title

Chinese Economic History

Catalog Description

Title

Studies in Early Modern European History

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST8310 - Studies in European History, 1815-1914

Title

Studies in European History, 1815-1914

Catalog Description

May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST8320 - Studies in European History

Title

Studies in European History

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST8330 - Studies in Recent European History

Title

Studies in Recent European History

Catalog Description

May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST8340 - Studies in German History

Title

Studies in German History

Catalog Description

May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST8350 - Studies in Early Modern English History

Title

Studies in Early Modern English History

Catalog Description

May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST8400 - Studies in Modern England (Formerly 344a)

Title

Studies in Modern England (Formerly 344a)

Catalog Description

May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST8475 - United States in the World

Title

United States in the World

Catalog Description

Recent trends in internationalizing the historiography of the modern United States, both to deepen the study of the past and to identify alternative, non-national frames of historical analysis. Immigration and nativism, transnational social movements, cultural borrowings, colonialism, war, missionary projects, and international dimensions of civil rights politics. Repeat credit for students who completed 381 in spring 2011, spring 2013, or fall 2014. [4]

HIST8500 - Studies in East Asian History

Title

Studies in East Asian History

Catalog Description

[4]

HIST8600 - Comparative Slavery in the Colonial Americas

Title

Comparative Slavery in the Colonial Americas

Catalog Description

Interdisciplinary and cross-cultural study of slavery and resistance in Spanish, British, French, Dutch, and Portuguese America. Does not cover antebellum slavery in the United States. [4]

HIST8615 - Readings in African History

Title

Readings in African History

Catalog Description

Themes, sources, debates, and methods in the historiography of pre-modern and modern Africa. [3]

HIST8620 - Studies in Latin American History

Title

Studies in Latin American History

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST8625 - Readings in African American History

Title

Readings in African American History

Catalog Description

Chronological and thematic exploration of major themes, debates, and subjects of inquiry. Classic works; historiography; recent trends in the field. [4]

HIST8630 - Research Seminar in Latin American History

Title

Research Seminar in Latin American History

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST8640 - Readings in Global History

Title

Readings in Global History

Catalog Description

Methods and critiques. Topics include long-distance trade, labor and migration, empires and states, human rights and citizenship, international law and politics, capitalism, cross-cultural exchange, environmental issues, and transnational movements. [4]

HIST8700 - Studies in Early American History to 1783

Title

Studies in Early American History to 1783

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST8710 - Studies in the Middle Period of American History, 1783-1861

Title

Studies in the Middle Period of American History, 1783-1861

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST8720 - Studies in U.S. History, 1861-1900

Title

Studies in U.S. History, 1861-1900

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST8730 - Studies in Recent American History

Title

Studies in Recent American History

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST8732 - Religion & Civil Rights

Title

Religion & Civil Rights

Catalog Description

Influence of religion in the shaping of the civil rights movement. Impact of Gandhi; white and black religious leaders; nonviolence. [4]

HIST8733 - African American Methodism

Title

African American Methodism

Catalog Description

African American Methodists' interpretation and implementation of Wesleyan theology. Blending of African American religious sensibilities with Methodism. [4]

HIST8740 - Research Seminar in Recent American History

Title

Research Seminar in Recent American History

Catalog Description

May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST8750 - Studies in American History

Title

Studies in American History

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST8760 - Studies in U.S. International History (Formerly 380)

Title

Studies in U.S. International History (Formerly 380)

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST8770 - Research Seminar in U.S. International History

Title

Research Seminar in U.S. International History

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST8800 - Dissertation Seminar

Title

Dissertation Seminar

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Offered on a pass/fail basis only. [0-4]

HIST8999 - Non-candidate Research

Title

Non-candidate Research

Catalog Description

Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

HIST9995 - Half-time Ph.D. Dissertation Research
Title

Half-time Ph.D. Dissertation Research

Catalog Description

For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

HIST9999 - Ph.D. Dissertation Research
Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

History Of Art

Catalog Description

This course is designed to acquaint incoming Community Research in Action (CRA) students with the core theories and theoretical perspectives germane to the study of inequality broadly defined. The course includes readings that critically address structural, community, and individual levels of analysis. [3]

HOD8120 - Community Organizing

Title

Community Organizing

Catalog Description

This course provides graduate students an introduction to theories, processes and models for community organizing. Focus of the course is on post-Alinsky models, particularly congregation-based models in the US. Methods of civic engagement, leadership development, organizational processes and community change are addressed through readings and cases studies. Exposure to and analysis of local organizing efforts are part of this course. [3]

HOD8130 - Public Policy and Advocacy

Title

Public Policy and Advocacy

Catalog Description

This course will provide students with a hands on-opportunity to learn about the social policy development process with a focus on community health, youth development, and urbanization and the environment. Students will gain an understanding of the different ways in which policies are made through the legislative, executive, and judicial branches of government at the federal and local levels, as well as the role of the media and advocates/stakeholder groups in shaping social policy. Students will also gain practical experience designing and implementing a campaign aimed at changing social policy. Specifically, students will be asked to select a problem that has policy implications, and then develop a policy analysis and advocacy strategy around their chosen topic. [3]

HOD8200 - Community Development and Urban Policy

Title

Community Development and Urban Policy

Catalog Description

Provides the beginning graduate student with an introduction to theory, practice and research in community development (CD) and in urban social policy. It has a laboratory portion in which the student works on a CD project in the local community and uses that to propose to the relevant authorities, a new social policy to implement the findings of the CD project. [3]

HOD8400 - Theory and Application in Action Research

Title

Theory and Application in Action Research

Catalog Description

This course is designed to provide students with both intellectual and practical exposure to action research and applied research methods-particularly in relation to working for social change. The course will focus on the issue of knowledge generation and the role of knowledge production in social power. Practical experience will be gained by conducting research on community projects and applying the concepts gained in course work. Prerequisite: one graduate statistics course. [3]

HOD8810 - Doctoral Community Inquiry

Title

Doctoral Community Inquiry

Catalog Description

Overview of issues and methods in community research. Epistemology, theory, research design, critical analysis, levels of inquiry, and the range of data collection and analysis methods available for community research. Doctoral students only. [3]

HOD8820 - Ethnographic Research Methods in Communities

Title

Ethnographic Research Methods in Communities

Catalog Description

Through empirical data collection on human behavior in communities, ethnography and other qualitative research methods build hypotheses and theory grounded in the values, beliefs, and aspirations of different societies and cultures. This course introduces and explores the tools and techniques of ethnography and their uses in (1) research problem conceptualization, delineation of assumptions, and generation of culturally competent hypotheses and (2) identification and construction of data sets, field research to collect data, and theory building and practical application derived from data analysis. The course is explicitly interdisciplinary. [3]

HOD8830 - Evaluation Research

Title

Evaluation Research

Catalog Description

This course is a doctoral-level introduction to evaluation research. It is designed for people who expect to work as university faculty members or principal investigators in research organizations with a commitment to using research to understand the contribution of social programs and social change efforts to ending social problems. The first half of the course will be devoted to understanding multiple approaches and types of evaluations and how they are embedded in social and political contexts. The second half will introduce design and analytic techniques particularly useful in large scale social experiments, and some of their limitations. [3]

HOD8850 - Practical Meta-Analysis

Title

Practical Meta-Analysis

Catalog Description

The topics covered in this seminar will include the major steps involved in conducting a meta-analysis, with particular emphasis on the technical issues and statistical analyses distinctive to this form of research. Specifically, the course will focus on providing students with the skills needed to be intelligent consumers of systematic reviews and meta-analyses; conduct a systematic, replicable search of the literature used to identify studies eligible for a meta-analysis; create and analyze meta-analytic databases using appropriate statistical techniques; and prepare written reports of meta-analytic findings. [3]

HOD8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

HOD9995 - Half-time Ph.D Dissertation Research

Title

Half-time Ph.D Dissertation Research

Catalog Description

For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

HOD9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

Variable credit [0-12]

Human Genetics

HGEN8320 - Human Genetics

Title

Human Genetics

Catalog Description

Research/techniques in human genetics. Human Genetics students only, by arrangement. [Variable credit]

HGEN8330 - Special Topics In Human Genetics

Title

Special Topics In Human Genetics

Catalog Description

This course will provide students with an introduction to special topics in human genetics research, with emphasis on unanswered questions in the field. An introductory module will give students a basic understanding of human genetic principles. This will be followed by discussion of current special topics. Potential topics include: What do we know about the human genome and what do we have to learn? Is there a gene for everything? Is personalized medicine feasible? SPRING. [3].

HGEN8335 - Genetics Interest Group Seminar Part 1

Title

Genetics Interest Group Seminar Part 1

Catalog Description

The class meets weekly and is a seminar course that involves four revolving formats: journal club presentations, clinical and ethics talks, directed discussion on current topics of interest in human genetics, and student research in progress presentations. For Human Genetics graduate students only. Fall and Spring [0]

HGEN8336 - Genetics Interest Group Seminar Part 2

Title

Genetics Interest Group Seminar Part 2

Catalog Description

The class meets weekly and is a seminar course that involves four revolving formats: journal club presentations, clinical and ethics talks, directed discussion on current topics of interest in human genetics, and student research in progress presentations. For Human Genetics graduate students only. Fall and Spring [1]

HGEN8340 - Human Genetics I

Title

Human Genetics I

Catalog Description

(Also listed as Molecular Physiology and Biophysics 8340) Designed to cover background and latest advances in human molecular genetics. Topics will include the content of the human genome; human gene structure, function, and expression; cytogenetics and chromosomal abnormalities; the landscape of human genetic variation; genotyping and sequencing methods; the basis of human genetic disease; approaches to treating genetic disease, such as gene therapy; genetic counseling; ethical considerations of genetic testing and human gene editing. Topics will be discussed with reference to specific genetic diseases. FALL. [3] Mortlock

HGEN8341 - Human Genetics II

Title

Human Genetics II

Catalog Description

(Also listed as Molecular Physiology and Biophysics 8341) This course will cover the statistical, population, and analytical aspects of modern human genetics research. Topics to be covered include human population genetics, quantitative genetics, disease gene discovery (emphasizing design, statistical and molecular techniques), linkage and association analyses, computational genetics, and evolutionary genetics. Clinical examples, subject ascertainment, and study design will also be emphasized. Students must have a strong understanding of Mendelian genetics and basic biostatistics. Prerequisite: consent of instructor. SPRING. [3]

HGEN8349 - Genetics Of Model Organisms

Title

Genetics Of Model Organisms

Catalog Description

(Also listed as Cell and Developmental Biology 8349, Molecular Physiology and Biophysics 8349) Basic genetic principles across a broad range of organisms (yeast, *C. elegans*, *Drosophila melanogaster*, plants, mouse, zebrafish) that are used in genetic analyses to investigate molecular pathways of interest for human disease will be presented. This course will provide students with in-depth terminology and understanding of the advantages, applications, and approaches specific to each organism. Genomic and bioinformatics tools that facilitate genetic analysis in each species will be emphasized. Specific examples of how each model organism has successfully contributed to elucidation of a human disease gene, pathway, or genetic principle will be presented. Course combines faculty lectures with student presentation and discussion of original articles to emphasize the uniqueness of each model system. Prerequisite: one statistics course at the upper undergraduate level or higher and Fundamentals of Genetic Analysis (MPB 8385), or permission of instructor. Offered every other year. SPRING. [3]

HGEN8350 - Directed Study In Human Genetics

Title

Directed Study In Human Genetics

Catalog Description

Introduction to current research through readings of the genetics literature. Given on an individual basis by arrangement. May be taken more than once, but not for more than 4 hours credit with a single adviser, nor for more than 5 hours total. Prerequisite: consent of instructor and DGS. FALL, SPRING, SUMMER. [Variable credit: 1-4]

HGEN8370 - Tutorials In Human Genetics

Title

Tutorials In Human Genetics

Catalog Description

A weekly seminar critically evaluating current and past scientific literature from many areas of genetic research. The focus will be on study methods and analysis. FALL. [1]

HGEN8371 - Tutorial In Statistical And Population Genetics

Title

Tutorial In Statistical And Population Genetics

Catalog Description

The class meets once weekly. Graduate students critically evaluate research publications in areas statistical methods in human genetic analysis and in the area of human population genetics. Also, there are faculty presentations on ancillary science skills, such as oral and poster presentations, and grant and proposal writing. SPRING. [1]

HGEN8381 - Molecular Foundations Of Medicine

Title

Molecular Foundations Of Medicine

Catalog Description

Molecular Foundations of Medicine is designed to familiarize students with the cellular structures, biomolecules, and processes that constitute life, human health, and disease at the molecular level. The course employs an integrated approach to teach underlying principles of biochemistry, cell and tissue biology, and genetics with an emphasis on human systems and medical conditions. The inclusion of clinical correlation sessions, small groups, and laboratory sessions will further integrate and broaden course material and relate molecular processes to the study of human disease. Prerequisite: THSP students only. FALL. [Variable credit: 1-6]

HGEN8384 - The Brain And Behavior

Title

The Brain And Behavior

Catalog Description

Brain and Behavior provides a basic understanding of the human central nervous system and human behavior. The format includes lectures, lab exercises, small group discussions, and patient and case presentations. Brain and Behavior integrates three areas of medical science: (1) neuroanatomy, physiology, and biochemistry; (2) psychopathology and systems neuroscience; and (3) pathology, pharmacology, and radiology. Prerequisite: THSP students only. SPRING. [1]

HGEN8385 - Fundamentals Of Genetic Analysis

Title

Fundamentals Of Genetic Analysis

Catalog Description

This course is designed to accomplish three goals: (1) introduce students to critical topics of genetic research, (2) introduce students to important areas of genetic research not covered in first-year course work, and (3) promote an understanding of classical genetic analysis by learning genetics using the original literature. Emphasis will be placed on research problems that utilize the full power of genetic analysis.

HGEN8390 - Human Genetic Epidemiology

Title

Human Genetic Epidemiology

Catalog Description

This course will cover in detail the study design and methods of modern genetic epidemiology. This will include concepts of familial aggregation, linkage analyses, population genetics as it is applied to studies of human traits, and association studies, both candidate genes and genome-wide association. The concept of linkage disequilibrium and its use in disease-gene studies will be extensively discussed. The underlying principles of each approach will be developed and current methods and software programs used to perform these will be discussed. Emphasis will be placed on the advantages and disadvantages of each approach and how to best design a genetic epidemiology study. [3]

HGEN8391 - BioVU Study Design

Title

BioVU Study Design

Catalog Description

This is a practical, hands-on course on the design of research projects using the de-identified version of Vanderbilt's electronic medical record (Synthetic Derivative, SD) and DNA bio-repository (BioVU). Students will go through the process of developing a BioVU project proposal, from initial project design through construction of a written proposal and application process. Topics covered will include an overview of the clinical data available in the Synthetic Derivative (SD), techniques for defining phenotypes within the SD, proper control definition, limitations of BioVU for research, available genetic data, common problem with study design and how to address them, population stratification, IRB approval procedures and other RCR topics, and the BioVU application workflow. The goal of this course is to guide the student through the process of developing a practical BioVU proposal to the point of application submission. Prerequisite: None. [3] Spring. Instructors: David Samuels and Quinn Wells.

HGEN8392 - Structure, Function, And Development

Title

Structure, Function, And Development

Catalog Description

Structure, Function, and Development is designed to provide students with the means to develop an effective understanding of the normal micro and macroscopic structure, function, and development of the human body. The course employs a coordinated, integrated approach to the presentation and learning of the disciplines of human gross anatomy, cell and tissue biology (histology), human development (embryology), and physiology in a context of clinical application. Prerequisite: THSP students only. SPRING. [Variable credit: 1-3]

HGEN8393 - Introduction to The Vanderbilt Center for Undiagnosed Diseases

Title

Introduction to The Vanderbilt Center for Undiagnosed Diseases

Catalog Description

The Vanderbilt Center for Undiagnosed Diseases (VCUD) is one of six sites added to the NIH sponsored Undiagnosed Diseases Network (UDN). The purpose of the UDN is to bring together clinical and research experts from across the United States to solve the most challenging medical mysteries using advanced technologies. Interested patients apply to the network; if accepted, they undergo full phenotyping and if appropriate, whole exome- or whole genome-sequencing. The VCUD receives these data files and completes the analysis with a team of bioinformatics, biology, genetics, protein modeling, and clinical experts. The purpose of this course is to introduce students to the "needle in a haystack" problem of determining the causal genetic variants, out of the millions of variants carried by each individual, that underlie rare diseases. Students will attend two meetings per week in which new cases will be discussed. For a final project, the student will present one of the cases at the Genomics Meeting at the end of the semester. The student will describe the findings from sequencing data after investigating the evidence associated with the variants, and make a case for which variants are diagnostic or which should continue to be pursued in the evaluation of the UDN participant. This will require the student to integrate the sequencing results, data from model organisms, and information in published literature with the presenting features of the participant. Prerequisites: Enrolled in MPH, MSCI or PhD program or consent of instructor. Participants should have mastery of basic genetic concepts including inheritance patterns and sequencing modalities. Participants will need to maintain current IRB training for research with human subjects for the duration of the semester (CITI Course). FALL and SPRING. [2] Hamid.

HGEN8394 - Practical Python Programming and Algorithms for Data Analysis

Title

Practical Python Programming and Algorithms for Data Analysis

Catalog Description

This course is intended for students who are focused on big data analysis in the Python programming language, from large scale epidemiologic datasets, electronic medical records, or next generation sequence data. It will cover basic programming, including strings, arrays, dictionaries, conditional statements, data visualization, external data sources, and algorithms, with a focus on using programming to solve challenges within the students' own research projects. At the end of the course, students will have an understanding of the foundation of programming in Python. They will understand the importance and use of regular expressions and efficient data search tools and will demonstrate proficiency in algorithms and data visualization. Evaluations will be based on a midterm exam, homework, a final project, and class participation. SPRING. Instructor: Jennifer Below and staff. [3]

HGEN8395 - Anti-Racism and Human Genetics

Title

Anti-Racism and Human Genetics

Catalog Description

History of racial injustice in genetics and provide foundations for anti-racist development of scientific and academic identity. Students must have successfully completed their qualifying exam and must be engaged in their thesis research. [2]

HGEN8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

HGEN9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Interdisciplinary (GS)

INTE7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

Master's Thesis Research

INTE8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

INTE9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Interdisciplinary Grad Programs

IGP8001 - Bioregulation I

Title

Bioregulation I

Catalog Description

Fundamental aspects of biomedical sciences, experimental approaches, problem solving, and skill development for first year PhD students entering any of the graduate programs that make up the IGP. FALL. [1-8] Patton and Staff.

IGP8002 - Bioregulation II

Title

Bioregulation II

Catalog Description

Fundamental aspects of biomedical sciences taught in modular format covering cells, molecules, cell-cell communication, information flow and regulation of these processes. Strong emphasis on quantitative experimental approaches analyses. SPRING. [Variable credit: 1-8] Patton and Staff.

IGP8004 - Responsible Conduct in Research

Title

Responsible Conduct in Research

Catalog Description

Formal lectures and small group discussions on a range of issues encountered in research activities. Included are responsibilities of researchers and the university to the federal government; scientific misconduct, ethical use of animals in research; ethics of publication, lab management, and grant writing.

IGP8999 - Non-Candidate Research
Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

Interdisciplinary Materials Science

IMS5320 - Nanoscale Science And Engineering
Title

Nanoscale Science And Engineering

Catalog Description

A multidisciplinary approach to the study of the fundamentals uniquely pertaining to the processing, structure, and performance of materials on the dimensional scale of tens to hundreds of atoms. The science and engineering of nanomaterials. Methods for synthesis and fabrication, techniques for characterization, and the attainment of special properties at the nanoscale. An examination of present and future applications in biotechnology, medicine, and engineering. FALL. [3]

Italian

ITA8090 - Special Topics in Italian Studies
Title

Special Topics in Italian Studies

Catalog Description

[3]

Japanese

JAPN5101 - Elementary Japanese I
Title

Elementary Japanese I

Catalog Description

(Also listed as JAPN 1101) Acquisition of oral-aural skills and basic grammar. Introduction to reading and writing Japanese syllabaries and Chinese characters. Two hours of lecture and three hours of drill per week. No credit for students who have earned credit for a more advanced Japanese language course. No credit for students who have earned credit for 1101. [5]

JAPN5102 - Elementary Japanese II

Title

Elementary Japanese II

Catalog Description

(Also listed as JAPN 1102) Two hours of lecture and three hours of drill per week. No credit for students who have earned credit for a more advanced Japanese language course. No credit for students who have earned credit for 1102. [5]

JAPN5201 - Intermediate Japanese I

Title

Intermediate Japanese I

Catalog Description

(Also listed as JAPN 2201) Development of conversational skills and linguistic competence. Syntax, writing, and reading. Two hours of lecture and three hours of drill per week. No credit for students who have earned credit for a more advanced Japanese language course. No credit for students who have earned credit for 2201. [5]

JAPN5202 - Intermediate Japanese II

Title

Intermediate Japanese II

Catalog Description

(Also listed as JAPN 2202) Two hours of lecture and three hours of drill per week. No credit for students who have earned credit for a more advanced Japanese language course. No credit for students who have earned credit for 2202. [5]

JAPN5301 - Advanced Japanese I

Title

Advanced Japanese I

Catalog Description

(Also listed as JAPN 3301) Reading and writing in contemporary Japanese texts. Conversation, discussion, and development of pragmatic competence. No credit for students who have earned credit for a more advanced Japanese language course. No credit for students who have earned credit for 3301. [3]

JAPN5302 - Advanced Japanese II

Title

Advanced Japanese II

Catalog Description

(Also listed as JAPN 3302) No credit for students who have earned credit for a more advanced Japanese language course. No credit for students who have earned credit for 3302. [3]

JAPN5851 - Independent Study

Title

Independent Study

Catalog Description

(Also listed as JAPN 3851) A reading course which may be repeated with variable content according to the needs of the individual student. Primarily designed to cover materials not otherwise available in the regular curriculum. May be repeated for a total of 12 credits in 289a and 289b combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 12 credits total for all semesters of JAPN 289a and 289b] (No AXLE credit)

JAPN5852 - Independent Study

Title

Independent Study

Catalog Description

(Also listed as JAPN 3852) A reading course which may be repeated with variable content according to the needs of the individual student. Primarily designed to cover materials not otherwise available in the regular curriculum. May be repeated for a total of 12 credits in 3851 and 3852 combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 12 credits total for all semesters of JAPN 3851 and 3852] No credit for students who have earned credit for 3852. (No AXLE credit)

JAPN5891 - Special Topics in Advanced Japanese

Title

Special Topics in Advanced Japanese

Catalog Description

(Also listed as JAPN 3891) Reading, writing, and discussion in authentic Japanese cultural, literary, and historical texts. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. No credit for students who have earned credit for 3891. [3] (INT)

Jewish Studies

JS5000 - Major Themes in Jewish Studies

Title

Major Themes in Jewish Studies

Catalog Description

(Also listed as JS 3000) The study of Jews, Judaism, and Jewish culture. History of Jewish Studies, core perspectives, key methodologies, critical debates. Classical literature, current trends. No credit for students who have earned credit for 3000. [3]

JS5100 - The New Testament in Its Jewish Contexts

Title

The New Testament in Its Jewish Contexts

Catalog Description

(Also listed as JS 2100) Documents of the origin of Christianity and the social, literary, ideological, and theological contexts in which they emerged and which they reflect. Various critical methodologies employed in interpreting them. No credit for students who have earned credit for 2100. [3]

JS5150 - Issues in Rabbinic Literature

Title

Issues in Rabbinic Literature

Catalog Description

(Also listed as JS 2150) History of Rabbinic thought from its origins to the Middle Ages through the reading of central Rabbinic texts. Capital punishment, women in Rabbinic culture, sectarianism, and the power structures of Roman Palestine and Sasanian Babylonia. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. No credit for students who have earned credit for 2150. [3]

JS5210 - Reading Across Boundaries: Jewish and Non-Jewish Texts

Title

Reading Across Boundaries: Jewish and Non-Jewish Texts

Catalog Description

(Also listed as JS 3210) Jewish and non-Jewish literary and historical texts studied in parallel so as to discover the differences between them. The course will consider texts from the ancient world to the early modern period and ask what constitutes Jewish writing and how it has been defined through time and geography. All readings will be in English. No credit for students who have earned credit for 3210. [3]

JS5250 - Witnesses Who Were Not There: Literature of the Children of Holocaust Survivors

Title

Witnesses Who Were Not There: Literature of the Children of Holocaust Survivors

Catalog Description

(Also listed as JS 2250W) Fiction and non-fiction produced by children of Holocaust survivors. No credit for students who have earned credit for 2250W. [3]

JS5260 - Coming of Age in Jewish Literature and Film

Title

Coming of Age in Jewish Literature and Film

Catalog Description

(Also listed as JS 2260) The transition of young Jewish protagonists into adulthood as portrayed in literary works and films from Europe, Africa, and the Americas. No credit for students who have earned credit for 2260 or 2260W. [3]

JS5270 - Jewish Storytelling

Title

Jewish Storytelling

Catalog Description

(Also listed as JS 2270) Twentieth-century short fiction and narrative traditions. The transition from religious to secular cultural forms. Immigration and ethnic literary forms. All works are in English or English translation from Yiddish, Hebrew, and Russian. No credit for students who have earned credit for 2270 or 2270W. [3]

JS5300 - Modern Jewish Thought

Title

Modern Jewish Thought

Catalog Description

(Also listed as JS 2300) Jewish intellectual responses to major transformations of modernity. Impact of secularization, universalism, pluralism, nationalism, and gender theories on Jewish thought and identity. Conflicting perspectives of tradition, education, culture, and religion. Relationship between Israel and the diaspora. No credit for students who have earned credit for 2300. [3]

JS5301 - Jewish Language and Paleography

Title

Jewish Language and Paleography

Catalog Description

(Also listed as JS 4301) Advanced study in a language of the Jewish people with a particular focus on the linguistic and paleographic features that define its cultural context. Each section focuses on one of the following languages: Aramaic, Ladino, Judaeo-Arabic, Rabbinic Hebrew, or Yiddish. May be repeated for credit up to two times when the language studied differs. Consent of instructor required. No credit for students who have earned credit for 4301. [3]

JS5320 - Freud and Jewish Identity

Title

Freud and Jewish Identity

Catalog Description

(Also listed as JS 2320) Analysis of rhetoric and themes in selected writings of Sigmund Freud and his times, development of assimilation and of anti-Semitic repudiation. No credit for students who have earned credit for 2320. [3]

JS5330 - Is G-d Guilty? The Problem of Evil in Judaism

Title

Is G-d Guilty? The Problem of Evil in Judaism

Catalog Description

(Also listed as JS 2330) Origin, nature, and representations of evil from Scripture through the Hasidic masters. Reflections of modern thinkers. No credit for students who have earned credit for 2330. [3]

JS5340 - Jewish Philosophy after Auschwitz

Title

Jewish Philosophy after Auschwitz

Catalog Description

(Also listed as JS 2340) Critical responses to social and political institutions and the corresponding modes of thought that made Auschwitz possible and continue to sustain the barbarism that many leading philosophers have identified at the heart of culture. No credit for students who have earned credit for 2340. [3]

JS5520 - Zionism: Politics, Religion, and Ethnicity

Title

Zionism: Politics, Religion, and Ethnicity

Catalog Description

(Also listed as JS 2520) Tensions among religion, nationalism, and political activism. Translations of Messianism into a secular program. Criticism from within and without the movement. No credit for students who have earned credit for 2520. [3]

JS5540 - Power and Diplomacy in the Modern Middle East

Title

Power and Diplomacy in the Modern Middle East

Catalog Description

(Also listed as JS 2540) History of the Middle East in the 19th and 20th centuries with an emphasis on U.S. involvement after 1945. U.S. relationship with Israel, and its impact on the region. No credit for students who have earned credit for 2540. [3]

JS5560 - Social Movements in Modern Jewish Life

Title

Social Movements in Modern Jewish Life

Catalog Description

(Also listed as JS 2560) How social movements shape contemporary American Jewish culture and politics. Explores movements internal to Judaism and those bringing religion into the public sphere. No credit for students who have earned credit for 2560. [3]

JS5620 - Jews in Egypt

Title

Jews in Egypt

Catalog Description

(Also listed as JS 2620) Jewish life and experience under Egyptian, Greek, Roman, and Muslim rule in Egypt from the Ptolemies to 1956. Jewish self-government, economic life, and culture over twenty-two centuries, through letters, documents, and imaginative literature. No credit for students who have earned credit for 2620. [3]

JS5640 - Jews and Greeks

Title

Jews and Greeks

Catalog Description

(Also listed as JS 2640) From the seventh century BCE to ca. 1500 CE. Sites of interaction, languages, cultural ties, religious tensions, political conflicts, and competing philosophies. Works by Elephantine, Alexander the Great, the Maccabees, the Septuagint, Aristeas, Josephus, Philo, the rabbis, the New Testament, Ezekiel the Tragedian, Byzantium. No credit for students who have earned credit for 2640. [3]

JS5700 - Judaism and Medicine

Title

Judaism and Medicine

Catalog Description

Medicine, healing, health, and disease in Jewish text, history, ritual, literature, and lived experience. Jewish encounters with Jewish and gentile medical expertise, disability, aging, and death. Jewish approaches to problems in biomedical ethics. Intersection of health, Jewish identity, and sex and gender. [3]

JS5840 - Directed Readings

Title

Directed Readings

Catalog Description

Advanced readings and research on a selected topic done under the supervision of a faculty mentor. [1-3]

JS5890 - Special Topics

Title

Special Topics

Catalog Description

(Also listed as JS 3890) Topics as announced. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. No credit for students who have earned credit for 3890. [3] (No AXLE credit)

JS5892 - Topics in Ancient and Medieval Jewish History

Title

Topics in Ancient and Medieval Jewish History

Catalog Description

(Also listed as JS 3892) From antiquity to 1492. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. No credit for students who have earned credit for 3892. [3] (No AXLE credit)

JS5894 - Topics in Modern Jewish History

Title

Topics in Modern Jewish History

Catalog Description

(Also listed as JS 3894) From 1492 to the present. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. No credit for students who have earned credit for 3894. [3] (No AXLE credit)

K'iche' - Mayan Language

KICH5101 - Elementary K'iche' I
Title

Elementary K'iche' I

Catalog Description

(Also listed as KICH 1101) Kaqchikel, K'iche', or Q'eqchi'. Basic speaking, reading, and writing skills. Offered on a graded basis only. Serves as repeat credit for students who have earned credit for ANTH 2612. No credit for students who have earned credit for 1101. [3]

KICH5102 - Elementary K'iche' II
Title

Elementary K'iche' II

Catalog Description

Intermediate level course with advanced grammar. Counterfactual constructions, deixis, verbal derivations of positional roots, sound symbolic verbs, and verbal nominalizations. Vocabulary and idioms. Various literary genres. No credit for students who have earned credit for ANTH 2614. Offered on a graded basis only. Prerequisite: 5101 or ANTH 2612. [3]

KICH5201 - Intermediate K'iche' I
Title

Intermediate K'iche' I

Catalog Description

Vocabulary, listening, and speaking skills. Modern and colonial texts. Cultural context of linguistic practices in K'iche' communities. No credit for students who have earned credit for Anthropology 278. Offered on a graded basis only. Prerequisite: 5102. [3]

KICH5202 - Intermediate K'iche' II
Title

Intermediate K'iche' II

Catalog Description

Taught in K'iche'. Advanced vocabulary, grammar, syntax, reading, and writing. Colonial and modern texts. No credit for students who have earned credit for ANTH 3615. Offered on a graded basis only. Prerequisite: 5201 or ANTH 3614. [3]

Latin

LAT6010 - The Writings of Caesar
Title

The Writings of Caesar

Catalog Description

(Also listed as LAT 3010) Selections from The Civil War and The Gallic War. Literary style and historical context. No credit for students who have earned credit for 3010. [3]

LAT6020 - Cicero and the Humanistic Tradition

Title

Cicero and the Humanistic Tradition

Catalog Description

(Also listed as LAT 3020) Study of Cicero's career and thought, and of his contribution to the development of the concept of humanitas. Readings from his letters, speeches, or philosophical works. No credit for students who have earned credit for 3020. [3]

LAT6030 - Latin Letters

Title

Latin Letters

Catalog Description

(Also listed as LAT 3030) The literary letters of Seneca and Pliny, with a brief introduction to the personal correspondence of Cicero and the letters discovered at Vindolanda. No credit for students who have earned credit for 3030. [3]

LAT6040 - The Roman Historians

Title

The Roman Historians

Catalog Description

(Also listed as LAT 3040) Selections from Sallust, Livy, and Tacitus, with attention to their objectives and methods; analysis of Roman historiography and its relation to Greek and early Christian historiography. No credit for students who have earned credit for 3040. [3]

LAT6050 - Suetonius

Title

Suetonius

Catalog Description

(Also listed as LAT 3050) Selections from the works of one of Rome's most important biographers, read in the context of the Latin biographical tradition as well as the political and social background. No credit for students who have earned credit for 3050. [3]

LAT6060 - Tacitus

Title

Tacitus

Catalog Description

(Also listed as LAT 3060) Selections from the works of one of Rome's most important historians, read in the context of historiographical tradition and political and social background. No credit for students who have earned credit for 3060. [3]

LAT6100 - Roman Comedy

Title

Roman Comedy

Catalog Description

(Also listed as LAT 3100) Reading of selected comedies of Plautus and Terence: study of the form of Roman comedy and its relation to the Greek New Comedy. No credit for students who have earned credit for 3100. [3]

LAT6110 - Catullus**Title**

Catullus

Catalog Description

(Also listed as LAT 3110) Reading and interpretation of Catullus' poems; aesthetic, political, and rhetorical contexts; fundamentals of Latin meter. No credit for students who have earned credit for 3110. [3]

LAT6120 - Lucretius: De Rerum Natura**Title**

Lucretius: De Rerum Natura

Catalog Description

(Also listed as LAT 3120) Lucretius' poem studied both in the tradition of Epicurean philosophy and as a landmark in the development of the Latin didactic epic; background material in the fragments of Epicurus and some treatment of the Epicurean movement in Italy and especially in Rome. No credit for students who have earned credit for 3120. [3]

LAT6130 - Vergil: The Aeneid**Title**

Vergil: The Aeneid

Catalog Description

(Also listed as LAT 3130) An intensive study of the entire poem, in the context of the epic tradition. No credit for students who have earned credit for 3130. [3]

LAT6140 - The Lyric Poetry of Horace**Title**

The Lyric Poetry of Horace

Catalog Description

(Also listed as LAT 3140) Reading and interpretation of Horace's Epodes and Odes; relation to the Greco-Roman lyric tradition and to Augustan politics. No credit for students who have earned credit for 3140. [3]

LAT6150 - Latin Elegy**Title**

Latin Elegy

Catalog Description

(Also listed as LAT 3150) Authors who created a new type of love poetry during the rule of emperor Augustus: Tibullus, Propertius, Ovid, and Sulpicia. Construction and contestation of gender roles; political contexts; development of the elegiac couplet; modern responses. No credit for students who have earned credit for 3150. [3]

LAT6160 - Ovid**Title**

Ovid

Catalog Description

(Also listed as LAT 3160) Reading and interpretation of selections from the Metamorphoses or other works of Ovid. No credit for students who have earned credit for 3160. [3]

LAT6170 - Roman Satire**Title**

Roman Satire

Catalog Description

(Also listed as LAT 3170) The satires of Horace and Juvenal; the origins of Roman satire; history and conventions of the genre; background reading in other Roman satirists. No credit for students who have earned credit for 3170. [3]

LAT6180 - Neronian Writers**Title**

Neronian Writers

Catalog Description

(Also listed as LAT 3180) Selections from authors in the literary renaissance during the reign of the artistic Emperor Nero, including Seneca, Lucan, Persius, and Petronius. Stylistic innovations, literary merits, and cultural contexts. No credit for students who have earned credit for 3180. [3]

LAT6200 - Early Christian Writers**Title**

Early Christian Writers

Catalog Description

(Also listed as LAT 3200) Selections from the writings of Latin Christians, from the account of Perpetua's martyrdom to the Confessions of Augustine. No credit for students who have earned credit for 3200. [3]

LAT6890 - Special Topics in Latin Literature**Title**

Special Topics in Latin Literature

Catalog Description

(Also listed as LAT 3890) May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (HCA)

LAT7000 - Seminar in Classical Latin Prose**Title**

Seminar in Classical Latin Prose

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

LAT7010 - Seminar in Classical Latin Poetry**Title**

Seminar in Classical Latin Poetry

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

LAT7850 - Independent Study**Title**

Independent Study

Catalog Description

(Also listed as LAT 3850) Designed for majors wanting to familiarize themselves with works or authors not covered in the regular curriculum. Prerequisite: 6 hours above 2202. May be repeated for a total of 6 credits if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. No credit for students who have earned credit for 3850. [1-3; maximum of 6 credits total for all semesters of LAT 3850] (No AXLE credit)

Latin American Studies**LAS5851 - Independent Study****Title**

Independent Study

Catalog Description

A program of independent readings and research in a minimum of two disciplines, to be selected in consultation with the center's graduate adviser. [3]

LAS5852 - Independent Study**Title**

Independent Study

Catalog Description

A program of independent readings and research in a minimum of two disciplines, to be selected in consultation with the center's graduate adviser. [3]

LAS5891 - Special Topics in Latin American Studies**Title**

Special Topics in Latin American Studies

Catalog Description

(Also listed as LAS 3891) Selected special topics suitable for interdisciplinary examination from the perspective of the social sciences and humanities. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. No credit for students who have earned credit for 3891. [3] (No AXLE credit)

LAS5901 - Research Seminar**Title**

Research Seminar

Catalog Description

(Also listed as LAS 4901) Selected topics for the interdisciplinary study of Latin America. [3]

LAS7999 - Master's Thesis Research
Title

Master's Thesis Research

Catalog Description

[0-12]

Latino and Latina Studies

LATS5850 - Independent Study
Title

Independent Study

Catalog Description

[1-3]

LATS5961 - Seminar
Title

Seminar

Catalog Description

Overview of cultural production, history, and political and socioeconomic experiences of Hispanic people living in the United States. Synthesis of issues, traditions, approaches, and problems. [3]

Law and Economics

LWEC8349 - Reading Course
Title

Reading Course

Catalog Description

Designed to permit graduate students to do more intensive study in the area of their special interest than regular course offerings provide. Admission by consent of director of graduate studies and supervising professor. [Variable credit]

LWEC8401 - Law and Economics Theory I
Title

Law and Economics Theory I

Catalog Description

Principles of economic analysis as applied to legal issues. Topics include, among others, torts, property, litigation, and government regulation. Pre- or corequisite ECON 8100. [3]

LWEC8402 - Law and Economics Theory II

Title

Law and Economics Theory II

Catalog Description

Economic analysis of the law with applications from civil and criminal procedure, law enforcement, property, torts, decision making by courts, settlement negotiation, contracts, and antitrust. Prerequisite: LWEC 8401; pre- or corequisite: ECON 8110. [3]

LWEC8403 - Behavioral Law and Economics I

Title

Behavioral Law and Economics I

Catalog Description

Economic principles underlying behavioral law and economics research. Analyses of the rationality of individual choice will be undertaken, including research that involves the interaction of economics, psychology, and decision sciences. Applications of behavioral law and economics methods will be applied to the analysis of jury behavior. Pre- or corequisite: ECON 8100. [3]

LWEC8404 - Behavioral Law and Economics II

Title

Behavioral Law and Economics II

Catalog Description

Research contributions at the frontier of behavioral law and economics research. Each student will structure a controlled experiment to test the rationality of jury behavior, the effect of alternative jury instructions, or a similar kind of scientifically controlled study of behavior relating to the performance of the legal system. Students will administer and analyze the survey results and will prepare an original research paper on their chosen topic. Prerequisite: LWEC 8403. [3]

LWEC8405 - Econometrics For Legal Research

Title

Econometrics For Legal Research

Catalog Description

Analysis and critique of empirical legal research using advanced econometric techniques. Topics will be drawn from the program's core fields. Students will perform independent empirical research using primary data sources. Pre- or corequisite: ECON 8300, ECON 8310, LWEC 8401. [3]

LWEC8406 - Research in Law And Economics

Title

Research in Law And Economics

Catalog Description

Students will develop and complete an original research paper. The paper may pose an original research question or may be a replication of an existing empirical result. [3]

LWEC8420 - Labor Markets And Human Resources I
Title

Labor Markets And Human Resources I

Catalog Description

Economic, econometric, and legal analysis of the labor market. Topics include analysis of the economic impact of employment laws with a particular focus on antidiscrimination laws, use of labor market studies to estimate the value of statistical life, and behavioral labor economics and economic models of fairness in the employment relationship. Prerequisite: ECON 8100, ECON 8300, ECON 8310. [3]

LWEC8421 - Labor Markets and Human Resources II
Title

Labor Markets and Human Resources II

Catalog Description

Application of economic and legal analysis to labor market and demographic transformations, including changes in the gender composition of labor market participants, aging of the workforce, immigration, education, poverty, inequality, and provision of health services. Prerequisites ECON 8100, ECON 8300, ECON 8310. [3]

LWEC8430 - Risk and Environmental Regulation I
Title

Risk and Environmental Regulation I

Catalog Description

Analysis of the sources of market failure that create a rationale for risk and environmental regulation. Methodologies pertaining to appropriate valuation and enforcement of these regulatory policies. Applications include procedures for estimating the value of statistical life, perception of risk, the role of hazard warnings, risk analysis by government agencies, and the enforcement of regulatory programs. Prerequisite: ECON 8100, ECON 8300, ECON 8310. [3]

LWEC8431 - Risk and Environmental Regulation II
Title

Risk and Environmental Regulation II

Catalog Description

Risk and Environmental Regulation II. Analysis of the sources of market failure that create a rationale for risk and environmental regulation. Methodologies pertaining to appropriate valuation and enforcement of these regulatory policies. This course will focus on theoretical economic models of risk and environmental regulation. Among the topics included will be the economics of risk and uncertainty, discounting, and benefit-cost analysis. Prerequisite: ECON 8100, ECON 8300, ECON 8310. [3]

LWEC8490 - Ph.D. Law And Economics Workshop
Title

Ph.D. Law And Economics Workshop

Catalog Description

Research workshop on the presentation and interpretation of research and literature on law and economics. Topics vary with student and faculty interest. [3]

LWEC8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

LWEC9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0]

Leadership, Policy & Organization

LPO7100 - Leadership in the Professions

Title

Leadership in the Professions

Catalog Description

Professions are distinct from ordinary occupations in that professional work involves the application of unique abstract knowledge as part of practice and doing so with integrity and a commitment to particular values that transcend any particular job or organization. Leadership in such contexts must go beyond generic leadership theories that focus solely individual or organizational performance to include theories that incorporate broader commitments to public, professional, and social values. In this course, leadership will be explored and supporting the dual roles of professionals as autonomous knowledge workers and as stewards of broader social values. [3]

LPO7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

Master's Thesis Research for Graduate School Ph.D. masters in passing students only [0-6]

LPO8100 - History of American Education

Title

History of American Education

Catalog Description

This doctoral seminar will examine the social, political, intellectual, and organizational history of American education in the twentieth century. The class will read and analyze some of the best work on the history of K-12 and higher education together. My hope is to begin to erase the intellectually expedient but artificial boundary that scholars have erected between the two sectors by deploying a comparative approach. By thinking of the study of K-16 as a single pipeline, albeit a circuitous one with many blockages and leaks, this class will broaden students' understanding of the American education system writ large, alerting them to the distant origins of the nation's education debates and to the longstanding efforts to improve the system in the last century. At the end of this course, students will possess a more historically grounded conception of the American way of education - an appreciation of the system as an institution deeply rooted in the nation's history that endures despite the many calls for its reform if not reconstruction. [3]

LPO8110 - Economics of Education**Title**

Economics of Education

Catalog Description

This course focuses on key issues and challenges in education systems, drawing on theory, econometric methods and related social sciences research to investigate and understand their implications for educational effectiveness. We will study leading concerns in early education, K-12 and higher education policy, including the following topics: education as an investment in future productivity and returns to education; the education production function; the role of education in economic growth; the organization of education and education markets; school quality and choice, and education reforms efforts. [3]

LPO8120 - Governance and Politics in Education**Title**

Governance and Politics in Education

Catalog Description

This course deals with a central question in political science and public policy--how can public institutions be redesigned to improve accountability? This question is examined with particular attention to governance and politics in public school systems. Specifically, students will examine three sets of issues: (1) What is the role of politics in allocating resources in public schools? (2) What are key political challenges in the governance of urban school systems? (3) What is the politics of school choice? Ph.D. only) [3]

LPO8130 - Social Context of Education**Title**

Social Context of Education

Catalog Description

Explores contemporary social, philosophical, and political dimensions of education and their relationship to leadership, including issues related to social class and culture, democracy and diversity, and equality and choice. Ph.D. students only. [3]

LPO8140 - International Issues in Education Policy**Title**

International Issues in Education Policy

Catalog Description

This course covers education outside the United States, including primary, secondary, and higher education. Depending on student demand, it can cover any country in any region. It is designed for those who intend to enter the field of education policy or administration and who need to be able to bring knowledge and experience with education in diverse global contexts to bear on issues of policy and practice. Ph.D. students only. [3]

LPO8200 - Ph.D. Proseminar**Title**

Ph.D. Proseminar

Catalog Description

The purpose of this seminar is to inform and support LPO PhD students as they move through graduate school and in the transition to their future roles as education researchers and faculty members. Seminar topics vary each semester and are based on student and faculty input. [.5]

LPO8500 - Special Topics in Leadership and Policy Studies

Title

Special Topics in Leadership and Policy Studies

Catalog Description

Explores special issues or topics related to leadership and policy studies. May be repeated with change of topic. [1-6]

LPO8610 - Ph. D. Seminar in K-12 Education Leadership and Policy

Title

Ph. D. Seminar in K-12 Education Leadership and Policy

Catalog Description

This course for Ph.D. students in the K-12 Leadership and Policy Program focuses on research and policy issues that are studied in depth by LPO faculty. The content of the course changes each year, based on the research interests and focus of the faculty member teaching it. Rotating topics have included Measurement and Assessment; Instructional Leadership; Urban School Reform; and Teacher Policy. [3]

LPO8620 - Ph.D. Seminar in Higher Education Leadership and Policy

Title

Ph.D. Seminar in Higher Education Leadership and Policy

Catalog Description

This course for Ph.D. students in the Higher Education Leadership and Policy Program focuses on research and policy issues that are studied in depth by LPO higher education faculty. The content of the course changes each year, based on the research interests and focus of the faculty members teaching it. Rotating topics have included History of American Higher Education; Organization and Governance of Higher Education; The Academic Profession: Structure and Roles; The College Student: Structure, Processes, and Effects; and Comparative Issues in Higher Education Policy Reform. [3]

LPO8800 - Statistical Methods in Education Research

Title

Statistical Methods in Education Research

Catalog Description

This course is an introduction to the theory, methods, and practice of statistics. It is intended as a foundational prerequisite for graduate students who intend to complete the core quantitative methods sequence in the Leadership & Policy Studies program (Regression I & II, Causal Inference, and Research Practicum). Topics will include probability theory, descriptive statistics, population distributions, hypothesis testing and confidence interval estimation, correlation, and regression. While concepts will be introduced with some mathematical rigor, the primary emphasis of the class will be the practical application and conceptual understanding of statistics. The course will be taught using the Stata statistical software package, and using large-sample data sets commonly used in educational policy research. [3]

LPO8810 - Research Design and Methods of Education Policy

Title

Research Design and Methods of Education Policy

Catalog Description

The purpose of this course is to provide an introduction to the practice of research and a survey of various research designs used in the study of education policy. The course develops understandings of the principles, processes and techniques used in educational research. The course is based on the premise that final published research develops and evolves through an iterative process. This research process requires decisions and judgements and careful consideration of alternatives. The goal for this course is for students to learn the formal principles of research design and to begin to understand how to conduct research by identifying and evaluating advantages and disadvantages and trade-offs of various research designs and data collection strategies. Ph.D. students only. [3]

LPO8840 - Modeling Context Effects in Educational Organizations

Title

Modeling Context Effects in Educational Organizations

Catalog Description

This seminar explores the methodological challenges and substantive implications of studying schools as complex organizations. Substantively, this course covers the literature on school effects, moving from early input-output studies to current research that examines the organizational context of schools, particularly the impact of within- and between-school stratification on student outcomes. Methodologically, this course provides an introduction to hierarchical linear modeling, including the conceptual background of hierarchical models, preparing data sets for use with HLM software, using the HLM software, strategies for analysis of data, applications of two- and three-level models, interpreting HLM output, and presenting results. Ph.D. students only. [3]

LPO8851 - Regression Analysis I

Title

Regression Analysis I

Catalog Description

Regression analysis is a widely used technique that allows us to 1) to describe average patterns of association among multiple variables observed in a sample and 2) to make inferences about the patterns of association among these variables in a population. The goal of this course is to develop an understanding of the basic methods, including their limitations, and to develop skill in using regression analysis to analyze non-experimental data. As an important part of any analysis is communicating the results to an audience, we will also place considerable emphasis on learning to present (in writing, tables, and figures) the results. [3]

LPO8852 - Regression II

Title

Regression II

Catalog Description

This is a practical, hands-on course in statistical research methods. The focus is on drawing casual inferences from observational (i.e., non-experimental) data, with particular emphasis on instrumental variables and longitudinal (panel) data estimators. Additional topics include binary and categorical dependent variables models and methods for dealing with missing data, including multiple imputation. [3]

LPO8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. Ph.D. students only. [Variable credit: 0-12]

LPO9951 - Ph.D. Student Research Practicum

Title

Ph.D. Student Research Practicum

Catalog Description

LPO 9951, 9952, and 9953 are a single practicum that is taken over three semesters (Fall, Spring, Maymester) by first-year PHD students in LPO. The three courses must be taken in sequence. This practicum is designed to introduce students to the practice of research, particularly the applied side of quantitative research. This class has a strong emphasis on using programming skills to aid in the replication of work and to simplify complex analyses. [1]

LPO9952 - Ph.D. Student Research Practicum

Title

Ph.D. Student Research Practicum

Catalog Description

LPO 9951, 9952, and 9953 are a single practicum that is taken over three semesters (Fall, Spring, Maymester) by first-year PHD students in LPO. The three courses must be taken in sequence. This practicum is designed to introduce students to the practice of research, particularly the applied side of quantitative research. This class has a strong emphasis on using programming skills to aid in the replication of work and to simplify complex analyses. [2]

LPO9953 - Ph.D. Student Research Practicum

Title

Ph.D. Student Research Practicum

Catalog Description

LPO 9951, 9952, and 9953 are a single practicum that is taken over three semesters (Fall, Spring, Maymester) by first-year PHD students in LPO. The three courses must be taken in sequence. This practicum is designed to introduce students to the practice of research, particularly the applied side of quantitative research. This class has a strong emphasis on using programming skills to aid in the replication of work and to simplify complex analyses. [3]

LPO9960 - Readings and Research in Leadership Policy Studies

Title

Readings and Research in Leadership Policy Studies

Catalog Description

Semi-independent readings and research on selected topics in leadership policy studies. May be repeated. Consent of instructor required. [1-3]

**LPO9995 - Part-Time Dissertation
Title**

Part-Time Dissertation

Catalog Description

For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

**LPO9999 - Ph.D. Dissertation Research
Title**

Ph.D. Dissertation Research

Catalog Description

Ph.D. Dissertation Research. [0-12]

Interdisciplinary Selected Topics

Catalog Description

Interdisciplinary Selected Topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

MLAS7840 - Independent Study**Title**

Independent Study

Catalog Description

Individual reading and study program on a topic of the student's choice not treated in the regular curriculum. No formal instruction is given, but the student's work is supervised and evaluated by the instructor of record. [1-3]

MLAS7999 - Master's Thesis Research**Title**

Master's Thesis Research

Catalog Description

[0-3]

Materials Science & Engineering

MSE6310 - Atomic Arrangements in Solids**Title**

Atomic Arrangements in Solids

Catalog Description

Atomic arrangements in metals, ceramics, semiconductors, glasses, and polymers. Lattice geometry and crystal symmetry to describe crystal structures. Nanocrystalline materials. Scattering theory and diffraction phenomena for structural characterization. FALL. [3]

MSE6343 - Electron Microscopy**Title**

Electron Microscopy

Catalog Description

Principles and applications of transmission electron microscopy in the study of materials. Electron scattering, image contrast theory, operation of electron microscope, and specimen preparation. Use of the electron microscope in experimental investigations. Two lectures and one laboratory period. FALL. [3]

MSE6391 - Special Topics**Title**

Special Topics

Catalog Description

Based on faculty research projects and highly specialized areas of concentration. FALL, SPRING. [Variable credit: 1-3 each semester]

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Mathematics

MATH5000 - History of Mathematics

Title

History of Mathematics

Catalog Description

(Also listed as MATH 3000) Major developments in mathematics from ancient times to the early twentieth century. Emphasis both on the historical perspective and the mathematics; assignments include many exercises and theorems. Highly recommended for teacher candidates. No credit for students who have earned credit for 3000. [3]

MATH5100 - Introduction to Analysis

Title

Introduction to Analysis

Catalog Description

(Also listed as MATH 3100) Properties of real numbers, compactness and completeness. Limits, sequences and series, uniform convergence, and power series. Basic properties of functions on the real line, and the elementary theory of differentiation and integration. Emphasis on methods of proof used in advanced mathematics courses. No credit for students who have earned credit for 3100. [3]

MATH5110 - Complex Variables

Title

Complex Variables

Catalog Description

(Also listed as MATH 3110) Complex numbers, analytic and elementary functions, transformations of regions. Complex integrals, Cauchy's integral theorem and formula, Taylor and Laurent series. The calculus of residues with applications, conformal mappings. No credit for students who have earned credit for 3110. [3]

MATH5120 - Introduction to Partial Differential Equations

Title

Introduction to Partial Differential Equations

Catalog Description

(Also listed as MATH 3120) Initial- and boundary-value problems for partial differential equations using separation of variables in conjunction with Fourier series and integrals. Explicit solutions of problems involving the heat equation, the wave equation, and Laplace's equation. No credit for students who have earned credit for 3120. [3]

MATH5130 - Fourier Analysis

Title

Fourier Analysis

Catalog Description

Fourier series topics including convolution, Poisson kernels, Dirichlet kernels, and pointwise and mean-square convergence. Integral transforms including one-dimensional and multidimensional Fourier integrals, Fourier inversion formula and Plancherel theorem, Poisson summation formula, Radon transform, and X-ray transform. Fourier analysis on Abelian groups including finite Fourier analysis and fast Fourier transform. Applications to signal processing, Shannon sampling theory, and/or compressed sensing. Repeat credit for students who have earned credit for 267 section 1 in spring 2011 or spring 2013. [3]

MATH5165 - Advanced Calculus

Title

Advanced Calculus

Catalog Description

(Also listed as MATH 3165) Advanced treatment of multivariable calculus. Differentiation of functions of several variables, including inverse and implicit function theorems. Vector differential calculus. Integration of functions of several variables. Vector integral calculus, including Stokes' theorem. No credit for students who have earned credit for 3600 {229}. No credit for students who have earned credit for 3165. [3]

MATH5200 - Introduction to Topology

Title

Introduction to Topology

Catalog Description

(Also listed as MATH 3200) Open sets, closed sets, continuity, compactness, and connectivity. Subspaces, product spaces, and quotient spaces. Knot theory, topology of surfaces, and applications. No credit for students who have earned credit for 3200. [3]

MATH5210 - Transformation Geometry

Title

Transformation Geometry

Catalog Description

(Also listed as MATH 3210) Transformations of the plane, groups of transformations, reflections, glide reflections, classification of the isometries of the plane, frieze groups, analysis of frieze patterns, wall paper groups, and analysis of wall paper patterns. Especially recommended for prospective teachers of mathematics. No credit for students who have earned credit for 3210. [3]

MATH5220 - Differentiable Manifolds

Title

Differentiable Manifolds

Catalog Description

(Also listed as MATH 4220) Manifolds in n-dimensional Euclidean space, smooth maps; inverse and implicit function theorems. Regular value theorem, immersions and submersions, Sard's theorem, and transversality. Degree of a map; winding numbers and the Fundamental Theorem of Algebra; intersection theory modulo 2. No credit for students who have earned credit for 4220. [3]

MATH5230 - Intro to Differential Geometry

Title

Intro to Differential Geometry

Catalog Description

Smooth maps, tangent space, and surfaces and hypersurfaces in n-dimensional Euclidean space. Inverse and Implicit Function theorems. Sard's theorem. Transversality. Degree of a map; intersection theory modulo 2. Orientability and oriented intersection number. [3]

MATH5300 - Abstract Algebra

Title

Abstract Algebra

Catalog Description

(Also listed as MATH 3300) Fundamental properties of integers and polynomials. Elementary properties of groups, rings, integral domains, fields, and lattices. No credit for students who have earned credit for 3300. [3]

MATH5310 - Introduction to Mathematical Logic

Title

Introduction to Mathematical Logic

Catalog Description

(Also listed as MATH 3310) Development of the first order predicate calculus and fundamental metamathematical notions. No credit for students who have earned credit for 3310. [3]

MATH5320 - Error-Correcting Codes and Cryptography

Title

Error-Correcting Codes and Cryptography

Catalog Description

(Also listed as MATH 3320) Applications of algebra to reliability and secrecy of information transmission. Error-correcting codes, including linear, Hamming, and cyclic codes, and possibly BCH or Reed-Solomon codes. Cryptography, including symmetric-key, DES and RSA encryption. No credit for students who have earned credit for 3320. [3]

MATH5330 - Advanced Linear Algebra

Title

Advanced Linear Algebra

Catalog Description

Orthogonal bases, orthogonal projections, Gram-Schmidt orthogonalization, Householder transformations, and Courant-Fisher min-max Theorem. Normal, self-adjoint matrices, pseudo inverses, and positive definite and semi-definite matrices. Matrix decompositions including QR factorization, diagonalization, Jordan decomposition, and singular value decomposition. Hilbert spaces, linear functionals, and Riesz Representation Theorem. Applications include least squares problems, regression models, optimization, data denoising, principle component analysis, and dimension reduction for data analysis. [3]

MATH5600 - Linear Algebra

Title

Linear Algebra

Catalog Description

(Also listed as MATH 2600) Algebra of matrices, real and complex vector spaces, linear transformations, and systems of linear equations. Eigenvalues, eigenvectors, inner product spaces, and orthonormal bases. [3]

MATH5610 - Ordinary Differential Equations

Title

Ordinary Differential Equations

Catalog Description

(Also listed as MATH 2610) First- and second-order differential equations, applications. Matrix methods for linear systems; stability theory of autonomous systems; existence and uniqueness theory. Intended for mathematics and advanced science majors. No credit for students who have earned credit for 2400 or 2420. No credit for students who have earned credit for 2610. [3]

MATH5620 - Introduction to Numerical Mathematics

Title

Introduction to Numerical Mathematics

Catalog Description

(Also listed as MATH 3620) Numerical solution of linear and nonlinear equations, interpolation and polynomial approximation, non-numerical differentiation and integration. Least-squares curve fitting and approximation theory, numerical solution of differential equations, errors and floating point arithmetic. Application of the theory to problems in science, engineering, and economics. Student use of the computer is emphasized. Familiarity with computer programming is expected. No credit for students who have earned credit for 3620. [3]

MATH5630 - Mathematical Modeling in Biology and Medicine

Title

Mathematical Modeling in Biology and Medicine

Catalog Description

(Also listed as MATH 3630) Basic mathematical modeling tools, such as interpolation, least-squares regression, difference equations, and ordinary and partial differential equations. Statistical analysis of data, support vector machines, and computer simulation. Familiarity with computer programming is expected. No credit for students who have earned credit for 3630. [3]

MATH5640 - Probability

Title

Probability

Catalog Description

(Also listed as MATH 3640) Combinatorics, probability models (binomial, Poisson, normal, gamma, etc.), Stochastic independence, generating functions, limit theorems and types of convergence, bivariate distributions, transformations of variables. Markov processes and applications. Prerequisite: MATH 5820. [3]

MATH5641 - Mathematical Statistics

Title

Mathematical Statistics

Catalog Description

(Also listed as MATH 3641) Distribution theory, order statistics, theory of point estimation and hypothesis testing, normal univariate inference, Bayesian methods, sequential procedures, regression, nonparametric methods. No credit for students who have earned credit for 3641. [3]

MATH5650 - Financial Stochastic Processes

Title

Financial Stochastic Processes

Catalog Description

(Also listed as MATH 4650) The theory of stochastic processes and applications to financial economics. Brownian motion; martingales; Itô's Lemma; stochastic integration. Monte Carlo simulations with variance reduction techniques. Applications include discrete-time option pricing and delta hedging. No credit for students who have earned credit for 4650. [3]

MATH5651 - Evaluation of Actuarial Models

Title

Evaluation of Actuarial Models

Catalog Description

(Also listed as MATH 4651) Applications of statistics to the evaluation and selection of actuarial models. Severity, frequency, and aggregate models. Measure of risk. Applications of Bayesian analysis to credibility theory. Simulation and bootstrap methods. No credit for students who have earned credit for 4651. [3]

MATH5660 - Mathematical Modeling in Economics

Title

Mathematical Modeling in Economics

Catalog Description

(Also listed as MATH 3660) Modeling microeconomic problems of supply and demand, profit maximization, and Nash equilibrium pricing. Auctions and bargaining models. Statistical models and data analysis. Computational experiments. No credit for students who have earned credit for 3660. [3]

MATH5670 - Mathematical Data Science

Title

Mathematical Data Science

Catalog Description

Linear methods for regression and classification, bias-variance tradeoff, and basis expansions and regularization. Kernel methods, support vector machines, dimension reduction, and clustering algorithms. No credit for students who completed Math 3890/5890 section 01 offered fall 2017. [3]

MATH5700 - Discrete Mathematics

Title

Discrete Mathematics

Catalog Description

(Also listed as MATH 3700) Elementary combinatorics including permutations and combinations, the principle of inclusion and exclusion, and recurrence relations. Graph theory including Eulerian and Hamiltonian graphs, trees, planarity, coloring, connectivity, network flows, some algorithms and their complexity. Selected topics from computer science and operations research. No credit for students who have earned credit for 3700. [3]

MATH5800 - Theory of Numbers

Title

Theory of Numbers

Catalog Description

(Also listed as MATH 3800) Factorization of integers, Fundamental Theorem of Arithmetic, congruences, Wilson's theorem. Fermat's theorem, arithmetic functions, perfect numbers, Law of Quadratic Reciprocity. Diophantine equations, Pythagorean triples, sums of squares. No credit for students who have earned credit for 3800. [3]

MATH5820 - Introduction to Probability and Mathematical Statistics

Title

Introduction to Probability and Mathematical Statistics

Catalog Description

(Also listed as MATH 2820) Discrete and continuous probability models, mathematical expectation, joint densities. Laws of large numbers, point estimation, confidence intervals. Hypothesis testing, nonparametric techniques, applications. Students taking 5820 are encouraged to take 5820L concurrently. No credit for students who have earned credit for 2810 or 2820. [3]

MATH5821 - Introduction to Applied Statistics

Title

Introduction to Applied Statistics

Catalog Description

(Also listed as MATH 2821) Review of basic applied statistics. Development of the analysis of variance as a technique for interpreting experimental data. Generalized likelihood ratio principle, confounding, multiple comparisons, introduction to response surface methodology, and nonparameteric methods. Experimental design including: completely randomized, nested, orthogonal contrasts, randomized block, Latin squares, factorial, and fractional factorial. Prerequisite: 5820. [3]

MATH5859 - Independent Study**Title**

Independent Study

Catalog Description

(Also listed as MATH 3859) Reading and independent study in mathematics under the supervision of an adviser. Designed primarily for honors candidates, but open to others with approval by department chair. No credit for students who have earned credit for 3859. [Variable credit: 1-3 each semester, not to exceed 6 without departmental permission] (No AXLE credit)

MATH5890 - Selected Topics**Title**

Selected Topics

Catalog Description

Topics vary. May be repeated if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MATH6100 - Theory of Functions of a Real Variable**Title**

Theory of Functions of a Real Variable

Catalog Description

The real number system, transfinite numbers, spaces, point sets in metric spaces, sequences and series of functions, measure. Lebesgue integration, convergence theory, inversion of derivatives. Prerequisite: 3100. [3]

MATH6101 - Theory of Functions of a Real Variable**Title**

Theory of Functions of a Real Variable

Catalog Description

Continuation of 6100. The real number system, transfinite numbers, spaces, point sets in metric spaces, sequences and series of functions, measure. Lebesgue integration, convergence theory, inversion of derivatives. Prerequisite: 6100. [3]

MATH6200 - Topology**Title**

Topology

Catalog Description

(Also listed as MATH 4200) Connectedness, compactness, countability, and separation axioms. Complete metric spaces. Function spaces. No credit for students who have earned credit for 4200. [3]

MATH6201 - Topology**Title**

Topology

Catalog Description

(Also listed as MATH 4201) The fundamental group and covering spaces. Topology of surfaces. Simplicial complexes and homology theory. Homotopy theory. No credit for students who have earned credit for 4201. [3]

MATH6210 - Differential Topology**Title**

Differential Topology

Catalog Description

Manifolds; submanifolds; tangent and vector bundles. Vector fields and flows, Lie brackets, distributions, and the Frobenius theorem. Sard's theorem; transversality and intersection theory; degree theory and applications. Tensors and differential forms; the exterior derivative; Stokes' theorem and integration; de Rham cohomology. No credit for students who have earned credit for 270. Prerequisite: either 2410, 2600, or 2501, and either 3200, 4220, or 4200. [3] (MNS)

MATH6300 - Modern Algebra**Title**

Modern Algebra

Catalog Description

(Also listed as MATH 4300) Group theory through Sylow theorems and fundamental theorem of finitely generated abelian groups. No credit for students who have earned credit for 4300. [3]

MATH6301 - Modern Algebra**Title**

Modern Algebra

Catalog Description

(Also listed as MATH 4301) Introductory theory of commutative rings and fields, and additional topics such as Galois theory, modules over a principal ideal domain and finite dimensional algebras. No credit for students who have earned credit for 4301. [3]

MATH6310 - Set Theory**Title**

Set Theory

Catalog Description

(Also listed as MATH 4310) The basic operations on sets. Cardinal and ordinal numbers. The axiom of choice. Zorn's lemma, and the well-ordering principle. Introduction to the topology of metric spaces, including the concepts of continuity, compactness, connectivity, completeness, and separability. Product spaces. Applications to Euclidean spaces. Strongly recommended for beginning graduate students and for undergraduates who plan to do graduate work in mathematics. No credit for students who have earned credit for 4310. [3]

MATH6600 - Numerical Analysis**Title**

Numerical Analysis

Catalog Description

(Also listed as MATH 4600) Finite difference and variational methods for elliptic boundary value problems, finite difference methods for parabolic and hyperbolic partial differential equations, and the matrix eigenvalue problem. Student use of the computer is emphasized. No credit for students who have earned credit for 4600. [3]

MATH6620 - Linear Optimization

Title

Linear Optimization

Catalog Description

(Also listed as MATH 4620) Linear programming and its applications. Formulation of linear programs. The simplex method, duality, complementary slackness, dual simplex method, and sensitivity analysis. The ellipsoid method. Interior point methods. Applications to networks, management, engineering, and physical sciences. Familiarity with computer programming is expected. No credit for students who have earned credit for 4620. [3]

MATH6630 - Nonlinear Optimization

Title

Nonlinear Optimization

Catalog Description

(Also listed as MATH 4630) Mathematical modeling of optimization problems. Theory of unconstrained and constrained optimization, including convexity and the Karush-Kuhn-Tucker conditions. Derivative- and non-derivative-based methods. Familiarity with computer programming is expected. No credit for students who have earned credit for 4630. [3]

MATH6700 - Combinatorics

Title

Combinatorics

Catalog Description

(Also listed as MATH 4700) Elements of enumerative analysis including permutations, combinations, generating functions, recurrence relations, the principle of inclusion and exclusion, and Polya's theorem. Some special topics will be treated as class interest and background indicate (e.g., Galois fields, theory of codes, and block designs). No credit for students who have earned credit for 4700. [3]

MATH6710 - Graph Theory

Title

Graph Theory

Catalog Description

(Also listed as MATH 4710) The mathematical theory of networks. Traversing graphs using paths, cycles, and trails. Matchings and other graph factors. Coloring of vertices and edges. Connectivity and its relation to paths and flows. Embeddings of graphs in surfaces, especially the plane. Prerequisite: linear algebra. Students unfamiliar with basic ideas of graph theory, including paths, cycles, and trees, should take 5700 prior to 6710. No credit for students who have earned credit for 4710. [3]

MATH7100 - Theory of Functions of a Complex Variable

Title

Theory of Functions of a Complex Variable

Catalog Description

Complex integration, calculus of residues, harmonic functions, entire and meromorphic functions, conformal mapping, normal families, analytic continuation, Riemann surfaces, analytic functions of several complex variables. Prerequisite: 3110. [3]

MATH7101 - Theory of Functions of a Complex Variable

Title

Theory of Functions of a Complex Variable

Catalog Description

Continuation of 7100. Complex integration, calculus of residues, harmonic functions, entire and meromorphic functions, conformal mapping, normal families, analytic continuation, Riemann surfaces, analytic functions of several complex variables. Prerequisite: 7100. [3]

MATH7110 - Partial Differential Equations

Title

Partial Differential Equations

Catalog Description

(Also listed as MATH 4110) Classification of equations: equations of elliptic, parabolic, and hyperbolic type. Separation of variables, orthonormal series, solutions of homogeneous and nonhomogeneous boundary value problems in one-, two-, and three-dimensional space. Possible additional topics include subharmonic functions and the Perron existence theorem for the Laplace equation of Sturm-Liouville theory. No credit for students who have earned credit for 4110. [3]

MATH7120 - Functional Analysis

Title

Functional Analysis

Catalog Description

Function spaces, topological vector spaces, linear operators, conjugate spaces, Hilbert and Banach spaces, Banach algebras. Applications to function theory, differential equations, and integral equations. Prerequisite: 6100. [3]

MATH7121 - Functional Analysis

Title

Functional Analysis

Catalog Description

Continuation of 7120. Function spaces, topological vector spaces, linear operators, conjugate spaces, Hilbert and Banach spaces, Banach algebras. Applications to function theory, differential equations, and integral equations. Prerequisite: 7120. [3]

MATH7130 - Harmonic Analysis

Title

Harmonic Analysis

Catalog Description

Fourier series; Wiener's Lemma; Fourier integral; Plancherel Theorem; Haar measure on an LCA group G , Dual group and the Fourier integral; Hausdorff-Young inequality; Hilbert transform; Hardy-Littlewood maximal functions; Marcinkiewicz Interpolation theorem; Singular integrals and the Calderon-Zygmund decomposition; multiresolution approximations; special topics from harmonic analysis, such as wavelets, frames, abstract harmonic analysis, symmetric spaces. Prerequisite: 6101. [3]

MATH7140 - Approximation Theory

Title

Approximation Theory

Catalog Description

Best approximation in metric and normed vector spaces; Tchebycheff approximation, Weierstrass-type theorems, rational approximation, orthogonal polynomials, trigonometric approximation, moduli of continuity, spline approximation; expansions and bases in function spaces. Prerequisite: 3110 and 6100. [3]

MATH7200 - Algebraic Topology

Title

Algebraic Topology

Catalog Description

Homology, cohomology, homotopy theory. Prerequisite: 4201. [3]

MATH7210 - Riemannian Geometry

Title

Riemannian Geometry

Catalog Description

Vector fields, brackets; Riemannian metrics; Riemannian connections; geodesic flow; curvature: sectional curvature, Ricci curvature, scalar curvature; Jacobi fields; Hopf-Rinow Theorem; Hadamard Theorem. Complex manifolds, Hermitian metrics, Kahler metrics, complex projective space, first Chern class of a line bundle. Prerequisite: 270. [3]

MATH7300 - Universal Algebra

Title

Universal Algebra

Catalog Description

Theory of general algebraic systems. Concepts discussed will include subalgebras, congruences, automorphism groups, direct and subdirect products, ultraproducts, free algebras, varieties and quasi-varieties, with applications to groups, rings fields, lattices, Boolean algebras, semilattices, and semi-groups. Connections with model theory and category theory will be included as time permits. Prerequisite: 4300. [3]

MATH7320 - Lattice Theory and the Theory of Ordered Sets

Title

Lattice Theory and the Theory of Ordered Sets

Catalog Description

(Also listed as MATH 4320) An introduction to basic concepts and theorems in lattice theory and the theory of ordered sets with connections to universal algebra and computer science. Boolean algebras, modular and distributive lattices, ordered topological spaces, algebraic lattices and domains, fixed point theorems, cosets, free lattices. No credit for students who have earned credit for 4320. [3]

MATH7610 - Methods of Mathematical Physics**Title**

Methods of Mathematical Physics

Catalog Description

(Also listed as MATH 4610) Linear operators on vector spaces, matrix theory, and Hilbert spaces. Functions of a complex variable and calculus of residues. Ordinary and partial differential equations of mathematical physics, boundary value problems, special functions. No credit for students who have earned credit for 4610. [3]

MATH7899 - Selected Advanced Topics**Title**

Selected Advanced Topics

Catalog Description

Topics of special interest at a level suitable for graduate students in mathematics. [Variable credit: 1-3]

MATH7999 - Master's Thesis Research**Title**

Master's Thesis Research

Catalog Description

[0-12]

MATH8100 - Theory of Ordinary Differential Equations**Title**

Theory of Ordinary Differential Equations

Catalog Description

Existence and uniqueness theorems, systems of linear differential equations, self-adjoint eigenvalue problems, asymptotic behavior, stability properties, perturbation theory, and applications. Prerequisite: 6100 and either 2420 or 2610. [3]

MATH8110 - Theory of Partial Differential Equations**Title**

Theory of Partial Differential Equations

Catalog Description

Equations of the first order. Classification of equations of second order, existence and uniqueness, methods for solving elliptic, parabolic, and hyperbolic equations. Prerequisite: 3120 and 6100. [3]

MATH8120 - Operator Algebras**Title**

Operator Algebras

Catalog Description

Banach algebras. The Gelfand transform. C^* -algebras and von Neumann algebras. Positivity. States. The Gelfand-Naimark-Segal construction. $*$ -representations of C^* -algebras. Von Neumann's bicommutant theorem. Kaplansky's density theorem. Comparison theory of projections. Examples and applications. Prerequisites: 6101 and 7120. [3]

MATH8300 - Combinatorial and Geometric Group Theory

Title

Combinatorial and Geometric Group Theory

Catalog Description

Generators and defining relations of groups; Cayley graphs and Van Kampen diagrams; subgroups and automorphisms of free groups; graphs of groups; fundamental groups of topological spaces; Magnus embedding; homology of groups; residual properties of groups; hyperbolic groups; small cancellation groups; 1-relator groups; algorithmic problems in groups. Prerequisite: 4300. [3]

MATH8301 - Combinatorial and Geometric Group Theory

Title

Combinatorial and Geometric Group Theory

Catalog Description

Continuation of 8300. Generators and defining relations of groups; Cayley graphs and Van Kampen diagrams; subgroups and automorphisms of free groups; graphs of groups; fundamental groups of topological spaces; Magnus embedding; homology of groups; residual properties of groups; hyperbolic groups; small cancellation groups; 1-relator groups; algorithmic problems in groups. Prerequisite: 8300. [3]

MATH8310 - Lie Groups and Lie Algebras

Title

Lie Groups and Lie Algebras

Catalog Description

Continuous groups; classical groups; real and complex Lie algebras; applications to physics, geometry, and mechanics. Prerequisite: 3300 or 4300. [3]

MATH8997 - Advanced Independent Study

Title

Advanced Independent Study

Catalog Description

Reading and independent study in an advanced area of mathematics under the supervision of an adviser. Requires approval of director of graduate studies. [Variable credit: 1-3]

MATH8999 - Non-candidate Research

Title

Non-candidate Research

Catalog Description

Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

MATH9100 - Seminar in Analysis

Title

Seminar in Analysis

Catalog Description

Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MATH9101 - Seminar in Analysis

Title

Seminar in Analysis

Catalog Description

Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MATH9200 - Seminar in Topology

Title

Seminar in Topology

Catalog Description

Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MATH9201 - Seminar in Topology

Title

Seminar in Topology

Catalog Description

Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MATH9300 - Seminar in Algebra

Title

Seminar in Algebra

Catalog Description

Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MATH9301 - Seminar in Algebra

Title

Seminar in Algebra

Catalog Description

Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MATH9600 - Seminar in Applied Mathematics

Title

Seminar in Applied Mathematics

Catalog Description

Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MATH9601 - Seminar in Applied Mathematics

Title

Seminar in Applied Mathematics

Catalog Description

Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MATH9700 - Seminar in Discrete Mathematics

Title

Seminar in Discrete Mathematics

Catalog Description

Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MATH9701 - Seminar in Discrete Mathematics

Title

Seminar in Discrete Mathematics

Catalog Description

Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MATH9800 - Seminar in Number Theory

Title

Seminar in Number Theory

Catalog Description

Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MATH9801 - Seminar in Number Theory

Title

Seminar in Number Theory

Catalog Description

Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MATH9996 - Directed Study

Title

Directed Study

Catalog Description

A reading course designed to give graduate students more background. [Variable credit: 1-3 each semester]

MATH9999 - Ph.D. Dissertation Research
Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Mechanical Engineering

ME5236 - Linear Control Theory

Title

Linear Control Theory

Catalog Description

(Also listed as ME 4236) Classical and modern approaches to the analysis and design of single-input/single-output (SISO) and multiple-input/multiple-output (MIMO) linear time invariant control systems. Classical (frequency-domain) and modern (state-space) approaches to SISO and MIMO control, including optimal control methods. No credit for students who have earned credit for 4236. [3]

ME5251 - Modern Manufacturing Processes

Title

Modern Manufacturing Processes

Catalog Description

(Also listed as ME 4251) Manufacturing science and processes. A quantitative approach dealing with metals, ceramics, polymers, composites, and nanofabrication and microfabrication technologies. No credit for students who have earned credit for 4251. [3]

ME5258 - Engineering Acoustics

Title

Engineering Acoustics

Catalog Description

(Also listed as 4258) The wave equation and its solutions; acoustic sources; reflection and transmission of sound; propagation in pipes, cavities, and waveguides; noise standards and effects of noise on people; principles of noise and vibration control; signal processing in acoustics; environmental noise measurement and control; and various contemporary examples. No credit for students who have earned credit for 4258. [3]

ME5259 - Engineering Vibrations

Title

Engineering Vibrations

Catalog Description

(Also listed as ME 4259) Theory of vibrating systems and application to problems related to mechanical design. Topics include single degree of freedom systems subject to free, forced, and transient vibrations; systems with several degrees of freedom, methods of vibration suppression and isolation, and critical speed phenomena. No credit for students who have earned credit for 4259. [3]

ME5260 - Energy Conversion

Title

Energy Conversion

Catalog Description

(Also listed as ME 4260) Energy resources, use, and conservation are studied. The fundamentals of positive displacement machinery, turbo-machinery, and reactive mixture are introduced and used to examine various forms of power-producing systems. No credit for students who have earned credit for 4260. [3]

ME5261 - Basic Airplane Aerodynamics

Title

Basic Airplane Aerodynamics

Catalog Description

(Also listed as ME 4261) Study of the atmosphere; analysis of incompressible and compressible flows, shock waves, boundary layer and skin friction drag, lift and drag forces over airfoils and wings, and flight performance; aircraft stability and control, wing icing, and parachute-based recovery; history of flight and aerodynamics. No credit for students who have earned credit for 4261. [3]

ME5262 - Environmental Control

Title

Environmental Control

Catalog Description

(Also listed as ME 4262) Heating and cooling systems, energy conservation techniques, use of solar energy and heat pumps. No credit for students who have earned credit for 4262. [3]

ME5263 - Computational Fluid Dynamics and Multiphysics Modeling

Title

Computational Fluid Dynamics and Multiphysics Modeling

Catalog Description

(Also listed as ME 4263) Computational modeling of viscous fluid flows and thermal-fluid-structure interaction. Computational techniques including finite-difference, finite-volume, and finite-element methods; accuracy, convergence, and stability of numerical methods; turbulence modeling; rotating machinery; multiphase flows; and multiphysics modeling. No credit for students who have earned credit for 4263. SPRING. [3]

ME5264 - Internal Combustion Engines

Title

Internal Combustion Engines

Catalog Description

(Also listed as ME 4264) Thermodynamics of spark ignition and compression ignition engines; gas turbines and jet propulsion. No credit for students who have earned credit for 4264. [3]

ME5265 - Direct Energy Conversion

Title

Direct Energy Conversion

Catalog Description

(Also listed as ME 4265) The principles and devices involved in converting other forms of energy to electrical energy. Conversion devices: electro-mechanical, thermoelectric, thermionic, fluid dynamic, and fuel cell. No credit for students who have earned credit for 4265. [3]

ME5267 - Aerospace Propulsion

Title

Aerospace Propulsion

Catalog Description

(Also listed as ME 4267) Application of classical mechanics and thermodynamics to rocket and aircraft propulsion. Design and performance analysis of air-breathing and chemical rocket engines. Advanced propulsion systems for interplanetary travel. Contemporary issues in aerospace propulsion: space exploration, renewable fuels. No credit for students who have earned credit for 4267. [3]

ME5271 - Robotics

Title

Robotics

Catalog Description

History and application of robots. Robotic mechanical architecture, mobility analysis of linkages, rotations and rigid body transformations and their parametrizations. Homogeneous coordinates of points and lines, exponential coordinates of rotation and twist coordinates, direct and inverse position analysis of serial manipulators and elimination theory. Serial robot statics and compliance, motion interpolation/path planning, instantaneous kinematics and Jacobian formulations. Lagrangian dynamics of serial robots, and motion control. No credit for students who have earned credit for 4271. [3]

ME5275 - Finite Element Analysis

Title

Finite Element Analysis

Catalog Description

(Also listed as ME 4275) Development and solution of finite element equations for solid mechanics and heat transfer problems. Commercial finite element and pre- and post-processing software. Two lectures and one three-hour laboratory each week. No credit for students who have earned credit for 4275. [3]

ME5280 - Advanced Dynamics of Mechanical Systems

Title

Advanced Dynamics of Mechanical Systems

Catalog Description

(Also listed as ME 4280) Development of methods for formulating differential equations to model mechanical systems, including formalisms of Newton-Euler, Lagrange, and virtual work methods to two- and three-dimensional systems. No credit for students who have earned credit for 4280. [3]

ME5284 - Modeling and Simulation of Dynamic Systems

Title

Modeling and Simulation of Dynamic Systems

Catalog Description

(Also listed as ME 4284) Incorporates bond graph techniques for energybased lumped-parameter systems. Includes modeling of electrical, mechanical, hydraulic, magnetic and thermal energy domains. Emphasis on multi-domain interaction. No credit for students who have earned credit for 4284. [3]

ME7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

[0-6]

ME8320 - Statistical Thermodynamics

Title

Statistical Thermodynamics

Catalog Description

Old and modern quantum theory, including H atom, rigid rotor, and harmonic oscillator. Atomic and molecular structure and spectra. Maxwell-Boltzmann statistical model for ideal, chemically reacting, electron, or photon gas. Gibbs method. Prerequisite: ME 2220. [3]

ME8323 - Micro/NanoElectroMechanical Systems

Title

Micro/NanoElectroMechanical Systems

Catalog Description

Fabrication techniques and mechanical behavior of modern MEMS/NEMS structures. Application of NEMS/MEMS devices to sensing and actuation. [3]

ME8326 - Gas Dynamics

Title

Gas Dynamics

Catalog Description

Study of compressible fluid flow from subsonic to supersonic regimes in confined regions and past bodies of revolutions. Includes heat transfer, frictional effects, and real gas behavior. Prerequisite: ME 3224. [3]

ME8327 - Energy Conversion Systems

Title

Energy Conversion Systems

Catalog Description

An advanced study of energy conversion systems that include turbomachinery, positive displacement machinery, solar energy collection and combustion, with consideration for optimizing the systems. [3]

ME8331 - Robot Manipulators

Title

Robot Manipulators

Catalog Description

Constrained optimization for robotics. Jacobian subspaces/singular value decomposition and redundancy resolution methods in robotics. Performance measures for robot design and modeling. Quaternions and dual quaternions in robotics. Parallel robot modeling: instantaneous kinematics and screw-based formulation for parallel robot Jacobians. Singularity analysis of parallel robots. Parallel robot direct kinematics (homotopy methods and resultants). Robot stiffness. Modeling of wire-actuated robots and multi-fingered hands. Motion control of serial robots, robust min/max control of serial robots, hybrid motion/force control. [3]

ME8333 - Topics in Stress Analysis

Title

Topics in Stress Analysis

Catalog Description

An investigation of thermal stress, transient stress, and temperatures in idealized structures; consideration of plasticity at elevated temperatures; and some aspects of vibratory stresses. [3]

ME8348 - Convection Heat Transfer

Title

Convection Heat Transfer

Catalog Description

A wide range of topics in free and forced convection is discussed. Solutions are carried out using analytical, integral, and numerical methods. Internal and external flows are considered for both laminar and turbulent flow cases. Convection in high speed flow is also studied. Prerequisite: ME 3248. [3]

ME8351 - Adaptive Control

Title

Adaptive Control

Catalog Description

Real-time parameter estimation methods. Self-tuning regulators. Model reference adaptive control. Adaptive control for nonlinear systems. A research project is required. Prerequisite: ME 5236. [3]

ME8352 - Non-linear Control Theory

Title

Non-linear Control Theory

Catalog Description

Phase plane analysis, nonlinear transformations, Lyapunov stability, and controllability/observability calculations. A multidimensional geometric approach is emphasized. Prerequisite: MATH 2410. [3]

ME8353 - Design of Electromechanical Systems

Title

Design of Electromechanical Systems

Catalog Description

Analog electronic design for purposes of controlling electromechanical systems, including electromechanical sensors and actuators, analog electronic design of filters, state-space and classical controllers, and transistor-based servoamplifiers and high voltage amplifiers. Significant laboratory component with design and fabrication circuits to control electromechanical systems. Implementation of digital controllers. Prerequisite: ME 3234. [3]

ME8359 - Advanced Engineering Vibrations

Title

Advanced Engineering Vibrations

Catalog Description

The development and application of Lagrange's equations to the theory of vibrations. Nonlinear systems and variable spring characteristics are analyzed by classical methods and by digital computer techniques. Applications to the design of high speed machines are emphasized. Prerequisite: ME 4259; MATH 3120, MATH 4110. [3]

ME8363 - Conduction and Radiation Heat Transfer

Title

Conduction and Radiation Heat Transfer

Catalog Description

A comparative study of available methods for solution of single and multidimensional conduction heat transfer problems. Both steady and transient problems are considered. Mathematical and numerical methods are stressed. Radiant exchange between surfaces separated by non-participating media is studied. Numerical methods are developed and discussed for non-isothermal surfaces and combined radiation and conduction problems are solved. Prerequisite: ME 3248. [3]

ME8364 - Nanophotonic Materials

Title

Nanophotonic Materials

Catalog Description

Physics, design, modeling, and applications of nanophotonic materials in modern optical systems. Topics include waveguides and chip-based photonics, photonic crystals, plasmonics, and metamaterials. [3]

ME8365 - Micro/Nano Energy Transport

Title

Micro/Nano Energy Transport

Catalog Description

Theoretical examination of energy transport by electrons and phonons and modeling of transport phenomena in crystalline solids at reduced length scales. Particle transport models and solution methods for energy carriers in the context of semiconductor electronics, direct energy conversion devices and nanostructure. [3]

ME8366 - Combustion**Title**

Combustion

Catalog Description

Processes, thermodynamics, chemical kinetics, premixed flame theory, diffusion flame theory, ignition and detonation. Prerequisite: ME 3224, ME 4221. [3]

ME8391 - Special Topics**Title**

Special Topics

Catalog Description

A course based on faculty research projects and highly specialized areas of concentration. [Variable credit: 1-3 each semester]

ME8393 - Independent Study**Title**

Independent Study

Catalog Description

Readings and/or projects on advanced topics in mechanical engineering under the supervision of the faculty. Consent of instructor required. [Variable credit: 1-3 each semester]

ME8991 - Seminar**Title**

Seminar

Catalog Description

[0]

ME8999 - Non-Candidate Research**Title**

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit 0-12]

ME9999 - Ph.D. Dissertation Research**Title**

Ph.D. Dissertation Research

Catalog Description

[0-12]

MSTP8310 - MSTP Seminar Series

Title

MSTP Seminar Series

Catalog Description

The MSTP Seminar Series is a student-driven course in research guided by faculty preceptors. Formal objectives are to: (1) foster development of critical-thinking skills by appraisal of contemporary scientific literature; (2) enhance scientific creativity through discussion of experimental approaches and techniques; and (3) develop oral presentation skills. The seminar series is interdisciplinary in scope with topics drawn from all areas of biomedical research. The primary focus is on cutting-edge, discovery-based, and hypothesis-driven science. Students in the MSTP have primary responsibility for choosing the manuscripts to be presented as centerpieces of the seminars. More advanced students are expected to play a key role in mentoring before, during, and after junior student presentations. Prerequisites: None. MSTP students only. Other students with specific permission of the Course Director. [1]

MSTP8314 - MSTP Clinical Preceptorship Program

Title

MSTP Clinical Preceptorship Program

Catalog Description

The MSTP Clinical Preceptorship Program (CPP) provides MSTP students with exposure to clinical medicine during the period of research training. The CPP course objectives are to: (1) maintain and enhance their competency in clinical skills developed during the FCC year; (2) provide an opportunity for students to explore subspecialties of interest to help them determine a target residency track; and (3) help students identify potential clinical mentorship in the area of their future clinical training. The program is a required component of the MSTP curriculum for all students initiating graduate studies following completion of the second year of Medical School. Students meet with preceptors monthly during the academic year. The course is P/F. Prerequisites: None. For MSTP students only. Course Director: Sally York. [0]

MSTP8315 - Foundations of Biomedical Research I

Title

Foundations of Biomedical Research I

Catalog Description

The major goals of Foundations of Biomedical Research I (for MSTP students in their first year of Medical School) will be to: 1) recognize and interpret the significance of rigorous experimental design and its impact to reproducible research and 2) to gain familiarity in working with the primary research literature. These goals will be accomplished in a small group, informal setting through interactions with potential MSTP-eligible faculty and lab members, consultation with the course directors, and through primary literature paper discussions. Students will be assessed based upon attendance, course presentations, and class contributions. The course is P/F. Prerequisites : none; MSTP students only. Fall, Spring [2]

MSTP8316 - Foundations of Biomedical Research II

Title

Foundations of Biomedical Research II

Catalog Description

The major goals of Foundations of Biomedical Research II (for MSTP students in their second year of Medical School) will be to: 1) describe the foundational principles of rigorous experimental design, fundamental principles of biostatistics, and access to campus resources that promote reproducibility; 2) enhance critical analysis skills with primary research literature, including emphasis on understanding statistical techniques; and 3) discuss effective pre-doctoral fellowship strategies. These goals will be accomplished in a small group, informal setting through discussion with course faculty and peers. Students will be assessed based upon class contributions. The course is P/F. Prerequisites : none; For MSTP students only. Fall, Spring [2]

MSTP8317 - Responsible Conduct of Research Training, Phase I.

Title

Responsible Conduct of Research Training, Phase I.

Catalog Description

The MSTP RCR Training Phase I course is offered at the end of June to coincide with the arrival of the entering class of MSTP students and immediately prior to the first laboratory rotation. The course consists of an eight-hour session. The topics covered include: (1) Mentor/Trainee Responsibilities; (2) Research Misconduct, (3) Publication Practices, Responsible Authorship, and Peer Review; and (4) Data Acquisition, Management, Sharing, and Ownership. Each session consists of didactic presentations, followed by small-group case-based discussions focusing on the issues presented. The course is P/F. Prerequisites: None. For MSTP students only. Others with permission of the course director . Summer [0]

MSTP8318 - MSTP Responsible Conduct of Research, Phase II

Title

MSTP Responsible Conduct of Research, Phase II

Catalog Description

The MSTP RCR Phase II course is offered after the second year of graduate research. This component of the RCR curriculum is offered in a an eight-hour session, which begins with a brief review of the RCR Phase I course. The topics covered in this session include: (1) Ethics of Human Research; (2) Ethics of Animal Welfare and Use of Animals in Research; (3) Conflict of Interest; and (4) Collaborative Science. Similar to the format for the RCR Phase I course, topics in the Phase II course are presented first in didactic form, followed by small-group case-based discussions for analysis and debate. All nine topics in the NIH RCR guidelines are covered during the two courses. The course is P/F. Prerequisites: None, but MSTP RCR Phase I normally completed first. For MSTP students only. Others with permission of the course director . Summer [0]

MSTP8999 - Non-candidate Research

Title

Non-candidate Research

Catalog Description

Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. Fall, Spring, Summer [Variable credit: 0-12]

Medicine, Health, and Society

MHS5010 - Global Health Principles and Practice

Title

Global Health Principles and Practice

Catalog Description

(Also listed as MHS 3010) Introduction to major global health principles and practices in the developing and developed world. Perspectives of public health practitioners and critical thinking about global health challenges and solutions. [3]

MHS5020 - U.S. Public Health Ethics and Policy

Title

U.S. Public Health Ethics and Policy

Catalog Description

(Also listed as MHS 3020) Critical perspectives on ethical and policy issues in U.S. public health. No credit for students who have earned credit for 3020. [3]

MHS5030 - Community Health Research

Title

Community Health Research

Catalog Description

(Also listed as MHS 3030) Conceptual and methodological challenges. Focus on descriptive studies and intervention research to address health disparities in chronic diseases and psychiatric disorders. No credit for students who have earned credit for 3030. [3]

MHS5120 - Medicine, Technology, and Society

Title

Medicine, Technology, and Society

Catalog Description

(Also listed as MHS 3120) Tensions between art and science in medicine. The effect of science and technology on the doctor-patient relationship. Social and ethical issues raised by new biomedical developments. No credit for students who have earned credit for 3120. [3]

MHS5140 - Afrofuturism and Cultural Criticisms of Medicine

Title

Afrofuturism and Cultural Criticisms of Medicine

Catalog Description

(Also listed as MHS 3140) Exploration of Afrofuturism as a literary genre and its critique of the impact of technology and medicine on black health, life, and futurity. Multidisciplinary approach in understanding novels, memoirs, and secondary texts. No credit for students who earned credit for 290 section 3 in fall 2013. No credit for students who have earned credit for 3140. [3]

MHS5230 - Masculinity and Men's Health

Title

Masculinity and Men's Health

Catalog Description

(Also listed as MHS 2230) Interdisciplinary approach to men's health issues and to perceptions of masculinity. The history of men's diseases. Men in clinical settings. Social policies that affect men's health behaviors. No credit for students who earned credit for 290 section 5 in fall 2012. No credit for students who have earned credit for 2230. [3]

MHS5240 - Bionic Bodies, Cyborg Cultures

Title

Bionic Bodies, Cyborg Cultures

Catalog Description

(Also listed as MHS 2240) Historical and cultural evolution of prosthetics, artificial limbs, and other assistive technologies. Shifts in social views resulting from war, economics, and art and design. Critical texts, films, art practices, and technological advancements. No credit for students who have earned credit for 2240. [3]

MHS5250 - War and the Body

Title

War and the Body

Catalog Description

(Also listed as MHS 2250) Impact of war on the human body. Anthropology of the body and theories of bodily experience. Production, representation, and experience of war and of military and medical technologies on a bodily level. Acceptable and unacceptable types of harm. No credit for students who earned credit for 290 section 2 in fall 2012. No credit for students who have earned credit for 2250. [3]

MHS5330 - Men's Health Research

Title

Men's Health Research

Catalog Description

(Also listed as MHS 2330) Concepts and theories of men's health. Global and domestic issues. Effect of men's social and economic advantages on health outcomes. Strategies to improve men's health; relationships between cultural values and health policy; and cultural explanations that shape men's health campaigns. No credit for students who earned credit for 290 section 14 in spring 2013. No credit for students who have earned credit for 2330. [3]

MHS5350 - Perspectives on Trauma

Title

Perspectives on Trauma

Catalog Description

(Also listed as MHS 3250) Trauma as a framework for understanding individual and collective suffering. Trauma in the context of medicine, war, and politics, and of racial, sexual, and gender inequalities. Alternative ways of conceptualizing feeling, memory and loss. No credit for students who earned credit for 295 section 02 in spring 2013. No credit for students who have earned credit for 3250. [3]

MHS5410 - HIV/AIDS in the Global Community

Title

HIV/AIDS in the Global Community

Catalog Description

(Also listed as MHS 2410) Medical, social, political, economic, and public policy dimensions of HIV/AIDS. Prevention and treatment strategies, social stigma, and discrimination. No credit for students who have earned credit for 2410. [3]

MHS5420 - Economic Demography and Global Health

Title

Economic Demography and Global Health

Catalog Description

(Also listed as MHS 2420) Economic consequences of demographic change in developing and developed countries. Links between socioeconomic status and health; relationship between health and economic growth; determinants of fertility, mortality, and migration. [3] (SBS)

MHS6010 - Psychiatry, Culture, and Globalization

Title

Psychiatry, Culture, and Globalization

Catalog Description

(Also listed as MHS 4010) Cross-cultural analysis of mental illness; the emergence of cultural psychiatry; and the globalization of biopsychiatry and neuroscience. No credit for students who earned credit for 295 section 2 in fall 2012. No credit for students who have earned credit for 4010. [3]

MHS6100 - Theories and Methods in Critical Health Studies

Title

Theories and Methods in Critical Health Studies

Catalog Description

Introduction to graduate-level research and professionalization. Core social theories and forms of evidence. Practical skills related to scholarly engagement, presentation, and writing. [3]

MHS6120 - Writing and Presentation

Title

Writing and Presentation

Catalog Description

Instruction in writing of academic and professional documents for interdisciplinary audiences. Emphasis on writing and defending a thesis, developing good writing habits, and working with a writing group. No credit for students who have earned credit for MHS 6500 section 03 offered spring 2020 or sections 01 and 03 offered spring 2021. [3]

MHS6150 - Death and Dying in America

Title

Death and Dying in America

Catalog Description

Interdisciplinary introduction to thanatology; changes in medicine and attitudes towards dying as they reshape the American way of death in a multicultural landscape. No credit for students who have earned credit for 3150. [3]

MHS6200 - Concepts and Methods in Health Disparities Research
Title

Concepts and Methods in Health Disparities Research

Catalog Description

Conceptual and methodological challenges faced in conducting studies on racial/ethnic, SES, and gender disparities. Descriptive and intervention research with emphasis on community-based studies. No credit for students who have earned credit for MHS 6500-01 offered spring 2016. [3]

MHS6300 - Social Studies of Science and Medicine
Title

Social Studies of Science and Medicine

Catalog Description

Technologies, social groups, institutions, and other factors shaping the human and natural sciences. Qualitative research methods. No credit for students who have earned credit for MHS 6500-01 offered fall 2015. [3]

MHS6350 - Critical Bioethics
Title

Critical Bioethics

Catalog Description

Bioethics as a professional field in the U.S. and globally. Debates in data justice and indigenous ethics regimes. Readings taken from ancient texts, modern law, and fiction. No credit for students who have earned credit for MHS 6500 section 01 offered spring 2020 or section 02 offered spring 2021. [3]

MHS6400 - Quantitative Research Methods
Title

Quantitative Research Methods

Catalog Description

Basic skills in generating, interpreting, and presenting statistical evidence. Emphasis on applied skills. No credit for students who have earned credit for 6500 section 02 offered fall 2016. [3]

MHS6500 - Special Topics in the Social Foundations of Health
Title

Special Topics in the Social Foundations of Health

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MHS7000 - Interdisciplinary Research Methods
Title

Interdisciplinary Research Methods

Catalog Description

Key methods in the analysis of health and medicine from epidemiology, anthropology, sociology, history, and philosophy. No credit for students who earned credit for 295 section 1 in fall 2013. [3]

MHS7100 - Research Workshop

Title

Research Workshop

Catalog Description

Research presentations by faculty members, visiting scholars, and graduate students. Assists students in the selection of research topics and in the presentation of research. May be repeated for credit. [1]

MHS7200 - Thesis Seminar

Title

Thesis Seminar

Catalog Description

Preparation of a thesis proposal and development of a thesis. May be repeated for credit. [1]

MHS7305 - Foundations of Global Health

Title

Foundations of Global Health

Catalog Description

Determinants of health and interventions used to better health, particularly in low-resource settings. Core research and evaluation methodologies used in the field. [3]

MHS7306 - Essential Skills in Global Health

Title

Essential Skills in Global Health

Catalog Description

Core field tools, needs assessment, implementation techniques, and methodologies in global health program implementation. Determinants of global health and development from an interdisciplinary perspective. Global health theories and practices with an emphasis on collective, partnership-based action. No credit for students who have earned credit for IGHM 5240 or PUBH 5550. [3]

MHS7308 - Ethics, Law, and Medicine

Title

Ethics, Law, and Medicine

Catalog Description

Explores intersection of ethical, legal, and medical concerns in the modern world of health care. Case-based and discussion format. Serves as repeat credit for students who have completed DIV 3452, MED 5240, or LAW 9078 [3]

MHS7311 - Ethics in Global Health

Title

Ethics in Global Health

Catalog Description

Overview of ethical issues and standards in global health, particularly ethics in international research. Serves as repeat credit for students who have completed VIGH 5244 or IGHM 5244. [1]

MHS7312 - Informatics for Global Health Professionals

Title

Informatics for Global Health Professionals

Catalog Description

Medical informatics with emphasis on a global health care setting. As global health bridges both patient care and public health, so informatics. Patient-based information systems and public health information systems. Serves as repeat credit for students who have completed VIGH 5242 or IGHM 5242. [1]

MHS7313 - Introduction to Medical Anthropology

Title

Introduction to Medical Anthropology

Catalog Description

The study of illness, suffering, and healing in cultures around the world. Medical anthropology topics, theoretical approaches, and research techniques. Case studies on chronic illness, sorcery and traditional healing, modern pandemics, and treatment/illness expectations. Serves as repeat credit for students who have completed PUBH 5548 or IGHM 5248. [1]

MHS7314 - Global Health Politics and Policy

Title

Global Health Politics and Policy

Catalog Description

Global health problems facing the world's populations today and efforts taken to improve health at a global level. Political movements of global health issues in the US and among the G8 nations from 2000-2011. Serves as repeat credit for students who have completed PUBH 5550 or IGHM 5250. [1]

MHS7315 - Leadership and Development in Global Health

Title

Leadership and Development in Global Health

Catalog Description

Leadership theory and practice in the area of global health. Serves as repeat credit for students who have completed VIGH 5246 or IGHM 5246. [1]

MHS7316 - Case Studies in Tropical Diseases

Title

Case Studies in Tropical Diseases

Catalog Description

Tropical diseases and parasitology in a clinical case study format. Serves as repeat credit for students who have completed VIGH 5249 or IGHM 5249. [1]

MHS7317 - Introduction to Quality Improvement

Title

Introduction to Quality Improvement

Catalog Description

Concept and methodology of Quality Improvement (QI) science as it applies to health care delivery in the U.S. and in the developing world. Serves as repeat credit for students who have completed VIGH 5252 or IGHM 5252. [1]

MHS7319 - Laboratory Technologies in Low Resource Settings

Title

Laboratory Technologies in Low Resource Settings

Catalog Description

Core laboratory principles, technologies, and applications used in the delivery of care and the performance of clinical research in resource-limited settings. Strengths, limitations, and appropriate use of laboratory technologies in the changing landscape of international research and clinical care. [3]

MHS7830 - Graduate Service Learning

Title

Graduate Service Learning

Catalog Description

Must be taken concurrently with 7831 and/or 7832. After completing the experience, all students must write a thorough report. [1-3].

MHS7831 - Service Learning Research

Title

Service Learning Research

Catalog Description

Students will write a substantial research paper under the supervision of a Vanderbilt faculty member, on a topic related to their service learning experience. [1-3]

MHS7832 - Service Learning Readings

Title

Service Learning Readings

Catalog Description

Readings and a substantial interpretive essay on topics related to the service learning experience, under the supervision of a Vanderbilt faculty member. [1-3]

MHS7850 - Independent Study

Title

Independent Study

Catalog Description

Readings and research in a minimum of two disciplines, to be selected in consultation with a faculty adviser and subject to the approval of the program director. [1-3]

MHS7851 - Independent Study

Title

Independent Study

Catalog Description

Readings and research in a minimum of two disciplines, to be selected in consultation with a faculty adviser and subject to the approval of the program director. [1-3]

MHS7880 - Internship Training
Title

Internship Training

Catalog Description

Must be taken concurrently with 7881 and/or 7882. [1-3]

MHS7881 - Internship Research
Title

Internship Research

Catalog Description

Students will write a substantial research paper under the supervision of a Vanderbilt faculty member. [1-3]

MHS7882 - Internship Readings
Title

Internship Readings

Catalog Description

Readings and a substantial interpretive essay on topics related to the internship training, under the supervision of a Vanderbilt faculty member. [1-3]

MHS7999 - Master's Thesis Research
Title

Master's Thesis Research

Catalog Description

[0-12]

Microbe - Host Interactions

M&IM8327 - Experimental Methods In Microbiology
Title

Experimental Methods In Microbiology

Catalog Description

Laboratory work concerned with (a) regulation of gene transcription; (b) signal transducing molecules and pathways; (c) entry and replication of mammalian viruses; (d) techniques in nucleic acid and peptide chemistry, rapid methods of DNA sequencing, gene knock-out in transgenic animals, design of probes, antigens, and synthetic vaccines; and (e) structure-function analysis of ligands, receptors, toxins, and transcription factors. Available only to M&IM students. Admission to course, hours, and credit by arrangement. FALL, SPRING, SUMMER. [2-4].

M&IM8328 - Molecular Virology

Title

Molecular Virology

Catalog Description

This course focuses on interactions of animal viruses with their host cells, discussed at the molecular and cellular level as model systems. Special emphasis is placed on current literature and methodology. Prerequisite: IGP 8001 or an undergraduate course in biochemistry or microbiology. FALL. [2] (Aiken)

M&IM8329 - Principles of Immunology and the Immune System in Disease

Title

Principles of Immunology and the Immune System in Disease

Catalog Description

The immune system plays a vital role to protect from pathogens and is intimately linked to a wide range of diseases. The goal of this course is to introduce the basics of immunology through discussion of principles of immunobiology and clinical immunology. Topics to be covered include principles of innate and adaptive immunity, antigen recognition and signaling, immune disease processes, discussion of clinical cases including immunodeficiencies, autoimmunity, inflammation, neuroinflammation, and tumor immunology. The class will consist of lectures followed by small group discussions of how those topics apply to basic and clinical immunology and will include discussions of current literature. Following the class, students will have the background to understand and interpret basic principles of immune function and understand how the immune system contributes to health and disease.

M&IM8332 - Foundations in Microbiology and Immunology

Title

Foundations in Microbiology and Immunology

Catalog Description

In this reading/discussion-based course students study the functions of specific immune cell types and their roles in controlling infections. SUMMER. [2]

M&IM8334 - Special Topics in Molecular Pathogenesis

Title

Special Topics in Molecular Pathogenesis

Catalog Description

This course provides Ph.D. students in the biomedical sciences with the opportunity to study various topics of relevance to their thesis research and within their broader field of study. Class time will be devoted to a discussion of those topics with peers and faculty who share similar interests (topic leaders). In consultation with the course director and the research mentor, students will select from a menu of two-week modules to create a personalized course syllabus. Credit hours: variable (1-4). Students will receive one credit hour per two course modules completed. Students in the MHI and MPI programs must have completed Foundations II prior to this course. Students in the MPI program must have taken either the Fall Immunology of Pathophysiology course. For students in other Ph.D. programs, completion of the first-year IGP or QCB curriculum and permission of the course directors are required. [1-4]

M&IM8335 - Research Proposals: Preparation and Critical Review

Title

Research Proposals: Preparation and Critical Review

Catalog Description

An essential skill for scientists in an academic setting is the ability to obtain extramural research funding through peer reviewed grant applications. This course will offer didactic sessions in which the process of preparing and reviewing grant applications is discussed. Each student will write a grant application using the NRSA format for postdoctoral fellowships. The student should propose research in one of the four major emphasis areas of the department: microbial genetics, virology, immunology, or microbial pathogenesis. The initial grant submission will be reviewed by the faculty thesis mentor and a course instructor. The student will amend the application according to the reviewer's comments and submit a final version. Procedures for reviewing grant applications will then be discussed. A student and a faculty member will provide a written review for each of the final grants. The course will conclude with a mock NIH study section in which grants are reviewed orally and scored. SPRING. [2]

M&IM8350 - Bacteriology Through the Lens of NanoMachines

Title

Bacteriology Through the Lens of NanoMachines

Catalog Description

The objective of this course is to provide learners with in-depth knowledge on core processes of bacterial physiology in the context of bacterial motors and machines that drive them. In addition, examples will be provided in which such bacterial motors are deployed and regulated (to the benefit of the bacteria) during the course of infection. FALL. [2] (Hadjifrangiskou)

M&IM8351 - Functional Genomics And Proteomics: Applications To Immunobiology

Title

Functional Genomics And Proteomics: Applications To Immunobiology

Catalog Description

Biological applications of functional genomics and proteomics in immunology. Topics include: 1) proteomic analysis of blood cells, vascular endothelial cells, and smooth muscle cells involved in immunity and inflammation, 2) functional genomics of immunobiology using genome-wide mutagenesis, 3) gene expression profiling of immune/inflammatory responses based on DNA microarray technology, 4) peptide/protein transduction and its applications to cell-based proteomics and intracellular protein therapy, 5) proteomic analysis of MHC antigens, 6) genomics and proteomic analysis of host-pathogen interactions, 7) genomic and proteomic analysis of immunological diseases, and 8) development and application of new genomic and proteomic strategies in immunology. SPRING. [2]

M&IM8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

M&IM9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Molecular Pathology and Immunology

PATH-GS8322 - Experimental Methods In Pathology

Title

Experimental Methods In Pathology

Catalog Description

Special techniques and preparations. Topics include electron microscopy, tissue culture, histochemistry, cytochemistry, and molecular biology. Admission to course, hours, and credit by arrangement. FALL, SPRING, SUMMER. [1-4]

PATH-GS8329 - Lipoprotein Metabolism

Title

Lipoprotein Metabolism

Catalog Description

The immune system plays a vital role to protect from pathogens and is intimately linked to a wide range of diseases. The goal of this course is to provide an introduction to the basics of immunology through discussion of principles of immunobiology and clinical cases where the immune system plays a key role in the disease process. Topics to be covered include principles of innate and adaptive immunity, antigen recognition and signaling, immune disease processes, discussion of clinical cases including immunodeficiencies, autoimmunity, inflammation, and tumor immunology. The first portion of the class will consist of instruction and discussion of the language and basic principles of immunology. The second portion of the class will be directed towards the application of immunology in human diseases, including autoimmunity, diabetes, and cancer. Following the class, students will have the background to understand and interpret basic principles of immune function and understand how the immune system contributes to health and disease. [2]. Staff. Course is offered as needed by arrangement with the Director of Graduate Studies.

PATH-GS8331 - Seminar In Experimental Pathology

Title

Seminar In Experimental Pathology

Catalog Description

Seminar In Experimental Pathology. Students and faculty participate in a weekly discussion of current research projects and literature. FALL. [1] Lannigan and Staff.

PATH-GS8332 - Current Topics In Experimental Pathology

Title

Current Topics In Experimental Pathology

Catalog Description

Students and faculty participate in a weekly discussion of current research projects and literature. SPRING. [1] Lannigan and Staff

PATH-GS8335 - Molecular Pathology Of Extracellular Matrix

Title

Molecular Pathology Of Extracellular Matrix

Catalog Description

Lectures on the structure, genes, metabolism, and regulation of the collagens, structural glycoproteins, proteoglycans, and elastin. The role of these macromolecules in maintaining normal tissue integrity and function and in development and wound healing is emphasized, as is the molecular basis for the involvement of these proteins in both inherited and acquired diseases (e.g., atherosclerosis, diabetes, and cancer). Prerequisite: biochemistry and/or cell biology. SPRING. [2] Staff. Course is offered as needed by arrangement with the Director of Graduate Studies.

PATH-GS8337 - Cellular And Molecular Basis Of Vascular Disease

Title

Cellular And Molecular Basis Of Vascular Disease

Catalog Description

Lectures on contemporary research in cell biology, protein and lipid biochemistry, and molecular biology of the vascular system. Open to graduate and medical students, postdoctoral fellows, and undergraduate students with consent of instructors and the Graduate School. [3] Staff. Course is offered as needed by arrangement with the Director of Graduate Studies.

PATH-GS8339 - Foundations of Immunology

Title

Foundations of Immunology

Catalog Description

This course is a comprehensive study of Immunology in the Molecular Pathology and Immunology Ph.D. program. Students in other programs may enroll with consent of the course director. Instructor: Luc Van Kaer [2-3] Fall.

PATH-GS8345 - Human Biology and Disease

Title

Human Biology and Disease

Catalog Description

The aim of this course is to provide students with a comprehensive, organ-based overview, of human biology and disease pathophysiology from a clinical perspective. What distinguishes the proposed course from any other courses or programs that are currently offered at Vanderbilt, is that it will be comprehensive, covering all the major organ systems in the human body, and will be taught by clinicians from a clinical, rather than a basic science, perspective. There will be 15 topics taught covering 12 organ systems, each over 2-hour blocks coordinated by a physician or physician scientist involved in treating patients with common diseases affecting that organ system. Students will be instructed to register with Medscape, on-line portals for students, physicians and healthcare professionals, and use to read about and write brief reports on clinical topics being discussed each day. The last session of each block will be in a case report format in which instructors bring along a patient suffering from the disease being discussed, so that students can develop an intimate understanding of what it is like to suffer from the disease being discussed during that teaching block. To complete three credit hours (quality hours for full credit), students will be expected to attend 15 mornings of didactic and interactive teaching blocks over the three-week Human Biology and Disease immersion course. Some students may elect to attend 5 contiguous morning blocks for 1 credit hour each (1 week) rather than complete the whole course. There are no prerequisites for attending this course other than being a PhD student or post-doctoral fellow enrolled in one of the biomedical sciences programs at Vanderbilt University. The course will be graded based on attendance and on grading daily entries for each of the topic areas using a time stamped, on-line course management system. [1]

PATH-GS8351 - Cellular And Molecular Basis Of Disease

Title

Cellular And Molecular Basis Of Disease

Catalog Description

An introduction to human disease and the accompanying changes in normal structure and function. The course consists of modules focused on a physiologic system and its related diseases. The course emphasis hands-on experience to supplement and enhance didactic material. [3] FALL. Lannigan and Staff

PATH-GS8355 - Clinical Rounds for Basic Scientists

Title

Clinical Rounds for Basic Scientists

Catalog Description

This interactive course will relate clinical problems/diseases with basic science research. During the semester, the course will involve six different disease topics, with each topic covered over two successive weeks. During the first week, a basic scientist will discuss patient pathophysiology, current treatments, and current state of research on the condition (including known gaps). In the second week of a topic, a physician will introduce 1-2 patients with the disease and discuss the condition from the perspective of a patient and a clinician. [1]

PATH-GS8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

PATH-GS9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Molecular Physiology and Biophysics

MP&B7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

Students who decide against continuing their Ph.D. studies can opt to take a Master's degree if they meet the requirements. At that point students would be registered under MP&B 7999. Carrasco and Staff.

MP&B8323 - Advanced Neurophysiology

Title

Advanced Neurophysiology

Catalog Description

(Also listed as Pharmacology 8323 and Neuroscience 8324) This class is a tutorial in methods for recording electrical signals in neurons. We will begin with a crash course on ion channels and transporters, spending a significant proportion of class time on discussion of recent primary research papers. In the latter part of the semester, we will move on to live demonstrations and personal training in the details of electrophysiological recording methods in several preparations. By the end of the course, students will be prepared to perform electrophysiological experiments as part of their dissertation research. SPRING. Greuter and Staff.

MP&B8324 - Tutorials In Physiology

Title

Tutorials In Physiology

Catalog Description

The class meets once weekly. In the fall semester, graduate students critically evaluate research publications in areas of active research in the department (e.g., gene transcription, molecular biology, electrophysiology, membrane transport, intercellular signaling, beta cell biology, and regulation of intermediary metabolism). Also, there are faculty presentations on ancillary science skills, such as oral and poster presentations, and grant and proposal writing. In the spring semester, each student presents and defends a short research proposal based on their current research area in preparation for their Candidacy Examination. FALL, SPRING. [1] McGuinness, Karakas, Simerly and Jacobson

MP&B8326 - Exercise Physiology

Title

Exercise Physiology

Catalog Description

The responses of different physiological systems to exercise. The effect and role of exercise under special conditions such as diabetes, reproduction, heart disease, and orthopedics and rehabilitation. Invited speakers will discuss the clinical and scientific aspects of the above topics. Prerequisite: consent of instructor. SPRING. [1-2] Wasserman.

MP&B8327 - Molecular Endocrinology

Title

Molecular Endocrinology

Catalog Description

A survey of the molecular biology of hormone action from the target cell surface to the nucleus. Special emphasis on (i) diabetes and obesity and (ii) how receptors and intracellular messengers mediate hormone action, (iii) how hormones regulate gene expression, and (iv) signaling in adipocytes. Discussion of the use of genetic, molecular biology, and biochemical techniques to study hormone action. The faculty encourage an interactive atmosphere in the class through the discussion of seminal papers. This is an advanced course so some prior background in cell signaling is recommended. Prerequisite: consent of instructor. FALL. [2] O'Brien, Colbran, Carrasco, and Vickers.

MP&B8329 - Experimental Statistics Short Course

Title

Experimental Statistics Short Course

Catalog Description

The goal of this course is to insure basic proficiency in statistical concepts, methods for analysis of experimental data, and enhance statistical communication skills. Core concepts to be discussed are: (1) Sources of data variation, data types that lead to different analyses (e.g. parametric vs nonparametric); (2) Variation in samples and populations, real world vs theoretical data distributions; (3) Importance and use of confidence intervals, effect size, power related to experimental design; (4) Meaning of statistical vs functional significance; and (5) Aspects of data analysis pitfalls (e.g., outliers, multiple tests, clustered data). Prerequisite: consent of instructor. SPRING [1] Carrasco and Staff

MP&B8330 - Human Physiology And Molecular Medicine

Title

Human Physiology And Molecular Medicine

Catalog Description

Lectures and research correlations on advanced aspects of human physiology, with emphasis on communication between and control of the major tissue types and organ systems. Recent biochemical and molecular biology research findings will be incorporated into the study of normal physiology and pathophysiology. This course is required of all graduate students majoring in Molecular Physiology and Biophysics. Prerequisite: consent of instructor. The class size limit is 16. Preference will be given to Ph.D. students in the Molecular Physiology and Biophysics Graduate Program, students in the Master's Program in Biomedical Sciences and second year Ph.D. students who matriculated through the IGP/QCB. FALL. [3] Cobb.

MP&B8332 - Scientific Reasoning and Logic in Gene Regulation

Title

Scientific Reasoning and Logic in Gene Regulation

Catalog Description

Objective: To gain a detailed understanding of rigorous approaches to experimental design, strategies, and data interpretation using one of the most developed fields in modern biology - gene regulation - as a contextual backdrop. Drawing on over 40 years of primary research papers in gene control, this course will dissect how important problems are identified, how questions are framed to give rigorous answers, and how data are interpreted and new hypotheses generated. The topics to be covered include eukaryotic RNA polymerase and basal factor structure and function, chromatin and nucleosome structure, DNA and nucleosome modification and the effects of these components and factors on transcription, cell- and tissue-specific transcription factors and molecular mechanisms of gene control. As these topics are discussed, particular emphasis will be placed upon accessing the appropriateness of controls, techniques, data interpretation, and formulation of future experimentation in these areas. Class meetings are fully interactive, and require extensive input and critical evaluation from students. All class meetings revolve around the detailed discussion of assigned reading materials and require students to perform extensive reading of the original research literature. Prerequisite: IGP Bioregulation I. SPRING. [2] Tansey, Stein and Staff

MP&B8335 - Assessment of Metabolism in vivo: A Laboratory Course

Title

Assessment of Metabolism in vivo: A Laboratory Course

Catalog Description

The objective of the course is to give students the tools needed to assess whether an experimental intervention (pharmacologic, genetic, dietary, or environmental) alters macronutrient metabolism, energy balance, cardiovascular homeostasis, or animal behavior. Students will learn how to measure whole body and tissue specific kinetics, the principles of which can be applied to the kinetics of drugs, substrates, and hormones. To accomplish this, we will use a combination of lectures, hands-on laboratories, demonstrations, and data-problem sessions. Prerequisite: consent of instructor. McGuinness and Staff

MP&B8340 - Human Genetics I

Title

Human Genetics I

Catalog Description

(Also listed as Human Genetics HGENI 8340) Designed to cover background and latest advances in human molecular genetics. Topics will include the content of the human genome; human gene structure, function, and expression; cytogenetics and chromosomal abnormalities; the landscape of human genetic variation; genotyping and sequencing methods; the basis of human genetic disease; approaches to treating genetic disease, such as gene therapy; genetic counseling; ethical considerations of genetic testing and human gene editing. Topics will be discussed with reference to specific genetic diseases. FALL. [3] Mortlock

MP&B8341 - Human Genetics II

Title

Human Genetics II

Catalog Description

Also listed as HGEN 8341) This course will cover the statistical, population, and analytical aspects of modern human genetics research. Topics to be covered include human population genetics, quantitative genetics, disease gene discovery (emphasizing design, statistical and molecular techniques), linkage and association analyses, computational genetics, and evolutionary genetics. Clinical examples, subject ascertainment, and study design will also be emphasized. Students must have a strong understanding of Mendelian genetics and basic biostatistics. Prerequisite: consent of instructor. SPRING. [3]

MP&B8342 - Introduction to Physiology, Metabolism and Endocrinology

Title

Introduction to Physiology, Metabolism and Endocrinology

Catalog Description

This course is designed to introduce first-year students in the "Masters Program in Biomedical Sciences" to essential basic concepts in the fields of physiology, metabolism and endocrinology. In the first part of the course the lecturers will discuss basic concepts in physiology with respect to: the circulatory system, heart, the pulmonary system, kidney, acid/base balance, muscle, liver and the autonomic nervous system. In the second part of the course the lecturers will discuss basic concepts in metabolism with respect to: glycolysis, the citric acid cycle, fatty acids and amino acids. This section will use exercise to illustrate how metabolism changes under different physiological conditions. In the third part of the course the lecturers will discuss basic concepts in endocrinology with respect to: thyroid hormone, insulin, glucagon and glucocorticoids. This section will also describe the critical role of the hypothalamic-pituitary axis in regulating secretion of multiple hormones with an emphasis on the regulation of energy balance and how this balance is perturbed in obesity. This course is designed to prepare students for two, more advanced second year courses: MPB 8330 (Human Physiology and Molecular Medicine) and MPB 8327 (Molecular Endocrinology). This course will be held in the Spring Semester. For students other than those in the Master's program, prior approval of the course director is required before signing up for this class. O'Brien and Staff. [2]

MP&B8345 - Cellular And Molecular Neuroscience
Title

Cellular And Molecular Neuroscience

Catalog Description

(Also listed as Cell Biology 8345, Neuroscience 8345, Pharmacology 8345) This course is a required entry-level course for students in the Cell and Molecular Track of the Neuroscience Graduate Program at Vanderbilt that should be taken in the first graduate school year. It also serves as an elective for medical students and graduate students in a number of other programs. Its goal is to expose students to fundamental concepts and techniques in molecular and cellular neuroscience and provide a theoretical context for experimental analysis of brain function and disease. The course is divided into three modules. Module I: Neural Anatomy and Development provides an overview of the anatomy of the nervous system and neurotransmitters and examines concepts in neural pattern formation, neuronal migration, axon guidance, and synapse formation. Module II. Signaling, Plasticity, and Modulation reviews biophysical and molecular concepts relating to neuronal membrane excitability, secretion, and plasticity. Module III: Neural Diseases and Disease Models focuses on specific brain disorders such as epilepsy, pain disorders, Alzheimer's disease, depression, and schizophrenia and current models used to investigate their origin and/or treatment. This course combines faculty lecture with discussion of original articles, with an emphasis on fundamental concepts and the elucidation of important research paradigms in the discipline. Faculty and assistants guide students through important research paradigms with a critical analysis of the primary literature in the topic area. Prerequisite: Bioregulation I (IGP 8001) or consent of instructor. Course directors may consider undergraduate course work in cell biology or biochemistry to meet this requirement. SPRING. [4] Nakagawa, Emeson and Staff

MP&B8350 - Independent Study
Title

Independent Study

Catalog Description

Students who are having difficulty in a specific area of biomedical sciences can obtain individual or small group coaching through this class. Carrasco and Staff. [1-3]

MP&B8999 - Non-Candidate Research
Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. Carrasco and Staff. [Variable credit: 0-12]

MP&B9999 - Ph.D. Dissertation Research
Title

Ph.D. Dissertation Research

Catalog Description

This course is used for research following entry into Ph.D. candidacy (following successful completion of the Candidacy Examination). Carrasco and Staff. [0-12]

Music Teacher Education

MUED5000 - Philosophical Foundations and Contemporary Issues in Music Teaching
Title

Philosophical Foundations and Contemporary Issues in Music Teaching

Catalog Description

A comprehensive study of historical trends and philosophies relevant to music teaching. Readings and discussions of the practical application of educational research studies to music teaching. SUMMER. [3] Perez.

MUED5010 - Methods and Materials in Instrumental Music
Title

Methods and Materials in Instrumental Music

Catalog Description

Techniques and materials for teaching instrumental music from elementary through senior high school. Emphasizes instrumental organization, administration, pedagogical practices, and developing school instrumental music programs. FALL. [3] Verrier.

MUED5020 - Methods and Materials in Vocal/Choral Music
Title

Methods and Materials in Vocal/Choral Music

Catalog Description

Techniques and materials for teaching vocal/choral music from elementary through senior high school. Emphasizes vocal music organization, administration, and pedagogical practices. FALL. [3] Biddlecombe.

MUED5030 - Methods and Materials in General Music, PreK through 12
Title

Methods and Materials in General Music, PreK through 12

Catalog Description

Techniques and materials for teaching general music, PreK through 12. Classroom organization, administration, pedagogical practices, and general musical activities such as Orff, Kodály, Dalcroze. FALL. [3] Alley.

MUED5100 - Advanced Studies for the Wind Band Conductor
Title

Advanced Studies for the Wind Band Conductor

Catalog Description

Knowledge of concert band repertoire as applicable to band programs from intermediate to advanced levels. Score preparation, rehearsal strategies, and expansion of conducting skills to include longer and more complex musical structures. Specific emphasis on developing historical and pedagogical context for repertoire evaluation and selection. Repertoire to encompass a broad range of genres, styles, and levels of difficulty. FALL. [2] Verrier.

Musicianship

MUSC5110 - Intensive Musicianship I
Title

Intensive Musicianship I

Catalog Description

Intensive immersive musical instruction modeled on language acquisition process, designed to provide musicians with practical skills in real-time aural processing, including interval identification, reading and notating pitch and rhythm, facility in each of the diatonic modes, aural tracking of multiple simultaneous parts. Open by instructor approval. SUMMER. [1] Ploger.

MUSC5120 - Intensive Musicianship II
Title

Intensive Musicianship II

Catalog Description

Intensive immersive musical instruction modeled on language acquisition process, designed to provide musicians with practical skills in real-time aural processing, including interval identification, reading and notating pitch and rhythm, facility in each of the diatonic modes, aural tracking of multiple simultaneous parts. Open by instructor approval. SUMMER. [1] Ploger.

MUSC5130 - Intensive Musicianship III
Title

Intensive Musicianship III

Catalog Description

Continuation of materials covered in Intensive Musicianship MUSC 5110 and 5120, including further real-time aural processing, with discussion of pedagogical approaches to teaching musicianship using a language-acquisition model. Prerequisite: MUSC 5120. SUMMER. [1] Ploger.

Neurodiversity Inspired Science and Engineering

NISE6100 - The Science of Neurodiversity-Inspired Science and Engineering
Title

The Science of Neurodiversity-Inspired Science and Engineering

Catalog Description

An overview of neurodiversity generally and autism specifically, for engineering and science students having no prior exposure. The course content will be custom-developed from primary literature on the basic neuroscience of autism (cell biology, electrophysiology, anatomy, neural networks), the clinical understanding of challenges faced by individuals with autism, the psychology and neuro-imaging research into autism-related capabilities, engineering examples of assistive technologies, and case studies of businesses hiring neurodiverse talent. [4]

NISE6200 - Applications of Neurodiversity-Inspired Science and Engineering
Title

Applications of Neurodiversity-Inspired Science and Engineering

Catalog Description

Real-life applications of NISE are explored to inspire thesis projects and to gain appreciation for the connections across the broad swath of STEM disciplines involved. For example, students will learn about new artificial-intelligence approaches modeled on autistic visual thinking, virtual reality environments to develop social skills for the workplace, eye-tracker enabled apps for assessing visual cognitive skills, business approaches for matching neurodiverse individuals to jobs, and data visualization tools invented and commercialized by autistic developers. [4]

NISE6300 - Collaborative Approaches to Neurodiversity-Inspired Science and Engineering
Title

Collaborative Approaches to Neurodiversity-Inspired Science and Engineering

Catalog Description

In this project-based course, student pairs will undertake future of work at the human-technology frontier design challenges directly connected to Vanderbilt Frist Center for Autism & Innovation Research themes, which include but not limited to: 1) understanding the unique capabilities of neurodiverse individuals and learning how to match these capabilities to 21st-century workforce needs, 2) prototyping assistive technologies to enable employment and workplace success and 3) Exploring organizational practices that leverage the talents of autistic individuals and enhance innovation. In parallel the students will be introduced to topics in robotics, psychometrics, apps development, data visualization, and others. Students identify a specific science or engineering challenge question and final project presentations will be conducted. [4]

Neuroscience

NSC5240 - Neurobiology of Addiction
Title

Neurobiology of Addiction

Catalog Description

Neural basis of the regulation and dysregulation of reward processing. Pathophysiology of addiction. Prerequisite 5201. [3]

NSC5260 - Psychopharmacology
Title

Psychopharmacology

Catalog Description

(Also listed as NSC 3260) Actions of therapeutic drugs for psychiatric disorders and of drugs of abuse. Molecular mechanisms of effects on perception, cognition, and emotion. No credit for students who have earned credit for 3260. [3]

NSC5269 - Developmental Neuroscience
Title

Developmental Neuroscience

Catalog Description

(Also listed as NSC 3269) Normal and abnormal brain development. Cell division, migration, and death; synapse formation and plasticity; and clinical syndromes. No credit for students who have earned credit for 3269. [3]

NSC5272 - Structure and Function of the Cerebral Cortex

Title

Structure and Function of the Cerebral Cortex

Catalog Description

(Also listed as NSC 3272) Classic and current concepts of cerebral function. Species differences, receptive field organization, neurotransmitters, modifications by experience, and behavioral effects. No credit for students who have earned credit for 3272. [3]

NSC5274 - Neuroanatomy

Title

Neuroanatomy

Catalog Description

(Also listed as NSC 3274) Functional and comparative anatomy of nervous systems, emphasis on vertebrate brains. Fundamental concepts, organizational principles, structure, connectivity, and how these relate to function and behavior. Demonstrations using plates with human brain sections. Prerequisite: 5201. [3]

NSC6270 - Computational Neuroscience

Title

Computational Neuroscience

Catalog Description

Theoretical, mathematical, and simulation models of neurons, neural networks, or brain systems. Computational approaches to analyzing and understanding data from behavior, neurophysiology, electrophysiology, or brain imaging. Simulation methods for neural models. Course taught using Python. Recommended: NSC 2201. [3]

Neuroscience (GS)

NURO8302 - Techniques And Preparations

Title

Techniques And Preparations

Catalog Description

Laboratory rotations undertaken by Integrative Track students that culminate in the selection of a thesis adviser. May be repeated for credit more than once if there is no duplication of topic. Students may enroll in more than one section of this course each semester. FALL, SPRING. [0-6]

NURO8320 - Neuroscience Research Forum

Title

Neuroscience Research Forum

Catalog Description

Required of all students, and second-year students are required to take this course for credit. Students make oral presentations and are evaluated based on the clarity of the presentation and visual aids, as well as the ability of the presenter to answer questions. The course meets every other week for one hour with two students presenting at each session. FALL, SPRING. [0]

NURO8324 - Advanced Neurophysiology

Title

Advanced Neurophysiology

Catalog Description

(Also listed as Molecular Physiology and Biophysics 8323 and Pharmacology 8323) This class is a tutorial in methods for recording electrical signals in neurons. We will begin with a crash course on ion channels and transporters, spending a significant proportion of class time on discussion of recent primary research papers. In the latter part of the semester, we will move on to live demonstrations and personal training in the details of electrophysiological recording methods in several preparations. By the end of the course, students will be prepared to perform electrophysiological experiments as part of their dissertation research. SPRING. [3] Grueter.

NURO8325 - Experimental Design and Statistical Methodology

Title

Experimental Design and Statistical Methodology

Catalog Description

The course provides an understanding of statistical methodology relevant to contemporary neuroscience research and uses computer software packages. Experimental design, constructing and deconstructing hypotheses are built into the course work. Statistical topics include descriptive statistics, analysis of variance, regression, correlation, contingency analysis, and the testing of methods for sampling natural populations. The course supports the goal of the Vanderbilt Neuroscience Program to produce a cohort of quantitatively savvy neuroscientists prepared to become future leaders in their area of research interest. FALL. [2] Konradi, Leich Hilbun

NURO8326 - Neuroscience Grant Writing

Title

Neuroscience Grant Writing

Catalog Description

This self-guided course provides applied training in grant writing. Students will write an NRSA proposal and are assigned two faculty reviewers who will provide feed-back. Input from the mentor is essential but needs to be limited to verbal discussions with the student. The proposal will be written and submitted to the reviewers in stages, with three required face-to-face meetings. Passing of the course depends on the final quality of the proposal, the ability of the student to incorporate suggestions and to respond to criticism, and the adherence to deadlines laid out by the course directors at the beginning of the course. Course directors: Christine Konradi and Blythe Corbett. Eligible students: Neuroscience Direct Admit students in their first year, IGP students in their first year in the Neuroscience program, second overall year in graduate school. SPRING. [1] Konradi

NURO8327 - Graduate Neuroanatomy

Title

Graduate Neuroanatomy

Catalog Description

This is a course on functional and comparative neuroanatomy, that is, on the structure of nervous systems and their commonalities and differences across different types of animals, including humans, and how that structure underlies function and behavior. The course is offered to up to 40 undergraduate and 10 graduate students, and consists of lectures that will also be heavily based on the discussion of reading materials that must be read prior to each class. Anatomical demonstrations will occur in the classroom. [3] Herculano

NURO8330 - Cognitive Neuroscience

Title

Cognitive Neuroscience

Catalog Description

This course provides a broad understanding of the state of our knowledge in cognitive neuroscience. The emphasis is on the findings and concepts in the major branches of cognitive neuroscience, rather than techniques (although these will be discussed). The level of analysis will focus on human and non-human primate systems. Prerequisite: an introductory-level undergraduate course in neuroscience or physiological psychology. Basic knowledge of experimental cognitive psychology is desirable but not necessary. FALL. [3] Marois.

NURO8332 - Experimental Statistics Short Course

Title

Experimental Statistics Short Course

Catalog Description

The goal of this course is to insure basic proficiency in statistical concepts, methods for analysis of experimental data, and enhance statistical communication skills. Core concepts to be discussed are: (1) Sources of data variation, data types that lead to different analyses (e.g. parametric vs nonparametric); (2) Variation in samples and populations, real world vs theoretical data distributions; (3) Importance and use of confidence intervals, effect size, power related to experimental design; (4) Meaning of statistical vs functional significance; and (5) Aspects of data analysis pitfalls (e.g., outliers, multiple tests, clustered data). Prerequisite: Permission of faculty. [1] Summer.

NURO8340 - Fundamentals of Neuroscience II

Title

Fundamentals of Neuroscience II

Catalog Description

This is the second part of a two-semester course required for all Neuroscience graduate students. Parts I and II can be taken individually as electives for medical students and graduate students in other programs. The goal is for students to learn the general organization of the nervous system and its circuitry and understand the fundamental molecular and cellular bases underlying its development and function in normal and pathological conditions. In addition, the students learn how the cellular systems in the brain relate to the major branches of cognitive neuroscience. There are three themes that will be woven into the course to provide a continuum from molecules to cognition and disease: sensory systems, motor systems and memory. This course combines faculty lecture with discussion of original articles with an emphasis on fundamental concepts and the elucidation of important research paradigms in the discipline. Part I (NURO 8345) will emphasize the cellular and molecular aspects of neuroscience. Part II (NURO 8340) will emphasize systems in the brain and principles of cognition. Fall. [3] Womelsdorf

NURO8342 - Seminar In The Neurobiology Of Hearing And Multisensory Processes

Title

Seminar In The Neurobiology Of Hearing And Multisensory Processes

Catalog Description

(Also listed as Hearing and Speech Sciences 8342) Study at the doctoral level of the neural processes underlying auditory and multisensory perception. The course will focus on critical readings of recently published findings that emphasize the connection between plasticity, neural systems, and behavior. May be repeated for credit. Prerequisite: consent of instructor. FALL, SPRING. [Variable credit: 1-2] Polley, Wallace.

NURO8345 - Fundamentals of Neuroscience I

Title

Fundamentals of Neuroscience I

Catalog Description

This is the first part of a 2-semester course required for all Neuroscience graduate students. Parts I and II can be taken individually as electives for medical students and graduate students in other programs. The goal is for students to learn the general organization of the nervous system and its circuitry and understand the fundamental molecular and cellular bases underlying its development and function in normal and pathological conditions. In addition, the students learn how the cellular systems in the brain relate to the major branches of cognitive neuroscience. There are 3 themes that will be woven into the course to provide a continuum from molecules to cognition and disease: sensory systems, motor systems and memory. This course combines faculty lecture with discussion of original articles with an emphasis on fundamental concepts and the elucidation of important research paradigms in the discipline. Part I (NURO 8345) will emphasize the cellular and molecular aspects of neuroscience. Part II (NURO 8340) will emphasize systems in the brain and principles of cognition. Prerequisite: Undergraduate coursework in cell biology or biochemistry or permission of the course directors. SPRING [4]. Emeson, Nakagawa and staff.

NURO8346 - Advanced Molecular Neurobiology

Title

Advanced Molecular Neurobiology

Catalog Description

(Also listed as Pharmacology 8346) This course examines molecular components and interactions that regulate neuronal development, signaling, and disease. Topics include development of neuronal identity, axonal transport, growth factors and cell death, axon guidance and synapse formation, electrical and chemical transmission, regulation of neuronal excitability and genetic analysis of signaling and neural disorders. Didactic and literature discussions provide students with a sound foundation for understanding the molecular bases underlying the development and function of the nervous system. Prerequisite: Neuroscience 8345 or Pharmacology 8320, or consent of instructor. SPRING. [3] Emeson and Staff.

NURO8347 - The Visual System

Title

The Visual System

Catalog Description

(Also listed as Cell and Developmental Biology 8347, Psychology 5780) An interdisciplinary approach to how humans see and interpret their visual environment. Topics include the structure of the eye and brain (including optics), the physiology of individual cells and groups of cells, machine vision and models of visual function, visual attention, and mechanisms of complex visual perception. Lectures by faculty from Psychology and Cell and Developmental Biology. Graduate students attend one hour discussion section per week in addition to lecture, and turn in a more extensive paper than undergraduates. SPRING. [3] Roe.

NURO8350 - Independent Study

Title

Independent Study

Catalog Description

Qualified students work with individual faculty members in areas not covered in available courses. Prerequisite: approval by individual faculty member and program director. FALL, SPRING, SUMMER. [Variable credit: 1-3, with total credit limited to 3]

NURO8352 - Methods and Experimental Design in Neuroscience Research

Title

Methods and Experimental Design in Neuroscience Research

Catalog Description

This course will focus on professional development and early-career planning, as well as guide students in the independent production of a National Science Foundation Graduate Research Fellowship Program grant, which will be submitted as part of the course. The class meets weekly to discuss topics including scientific ethics, communication, time management, as well as hear presentations on career options. [1] Grueter

NURO8365 - Neurobiology Of Disease

Title

Neurobiology Of Disease

Catalog Description

Neurobiology of Disease. The goal of this graduate-level neuroscience course is to provide comprehensive understanding of pathology and pathophysiology of neuropsychiatric disorders. The course is divided in three modules: neurodevelopmental, neurological/neurodegenerative and psychiatric/addiction diseases. The course prepares students for intensive collaborations along the basic-translational-clinical continuum. The lectures will discuss clinical presentation and pathological features epidemiology, treatment, status of clinical research, animal models, and postulated cellular/molecular bases for >30 diseases. Prerequisite: NURO 8340 and 8345 and consent of instructor. [3] Spring , Deutch.

NURO8383 - Seminar in Auditory and Vestibular Neuroscience

Title

Seminar in Auditory and Vestibular Neuroscience

Catalog Description

The course is a full semester course that combines a small amount of didactic teaching with seminar discussions to introduce students to the neuroscience of the auditory and vestibular systems. For each topic, the short didactic component introduces/refamiliarizes the students with the basic knowledge requisite for that particular topic; the seminar component following the didactic material involves a presentation of both classic papers as well as recent papers that represent the state of art in the field. The seminar component will train students to critically read primary literature, to present scientific information in clear and concise fashion, and provide a theoretical foundation for understanding sensory coding and its relationship with perception using the auditory brain as a model system. The group discussion will also explore the impact of the findings in the papers on various aspects of the field. NOTE: For Ph.D. students, completion of an introductory neuroscience course, or advisor approval required. For other students, permission of instructor required. FALL [3]

NURO8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

NURO9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Nursing Science

NRSC8301 - Foundations in Health Research: Concepts, Theories, and Approaches

Title

Foundations in Health Research: Concepts, Theories, and Approaches

Catalog Description

This course focuses on the research continuum from initial idea to dissemination. The student will examine organizational theory and concepts as they will apply to their own area of research. Health research resources including funding organizations, research agendas and the state of the science will be emphasized. Students will gain an understanding of publishing and disseminating their own research in the literature. Through the course, understanding of research interests within the current health research environment is emphasized as a foundation for developing and disseminating focused research. [2] SPRING

NRSC8302 - Advanced Doctoral Seminar I

Title

Advanced Doctoral Seminar I

Catalog Description

This course consists of a series of seminars focusing on issues related to qualifying examinations, the dissertation, and continued development of a program of research. The topics are selected by course faculty and the students who plan to take the comprehensive examinations within the next 9-12 months. Topics and experiences may include proposal development, grant applications, mock proposal reviews, qualifying examination situations, and dissemination of research findings. The seminar is required for two consecutive semesters. Prerequisite: Core Ph.D. course completion consistent with ability to complete the qualifying examination within 9-12 months after registration. [1] SPRING

NRSC8303 - Advanced Doctoral Seminar II

Title

Advanced Doctoral Seminar II

Catalog Description

This is the second seminar course in this series. Prerequisite: completion of NRSC 8302: Advanced Doctoral Seminar I. [1] SUMMER

NRSC8304 - Ethical And Legal Issues In Research

Title

Ethical And Legal Issues In Research

Catalog Description

This course provides an overview of issues related to the responsible conduct of research, including data management, vulnerable populations, authorship and publication, conflicts of interest and collaboration. Federal and institutional guidelines are included. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [2] SPRING

NRSC8305 - Informatics And Scholarly Inquiry
Title

Informatics And Scholarly Inquiry

Catalog Description

This course provides an overview of informatics, a specialty that joins nursing science with information and analytical sciences throughout the data, information, knowledge, wisdom continuum. To take advantage of the current data-rich healthcare environment, scholars need to understand core informatics principles in order to use data for knowledge generation. In addition, this course familiarizes the student with technology tools to organize, interpret, and present data. [2 credits]. FALL

NRSC8306 - Research Design And Statistics I
Title

Research Design And Statistics I

Catalog Description

This course focuses on understanding and applying the basic concepts of descriptive and relational research design and statistics. Students will be introduced to the full range of designs available to address research aims, moving from descriptive to experimental and quasi-experimental. After examining the relationship of research aims to research design, the nature of measurement, and causal inference, relevant statistical methods for visualizing, describing, and making inferences from data will be introduced. The focus will be on univariate and bivariate descriptive methods. Statistical computing packages will be used. Published research will be used to develop the student's ability to evaluate the design and statistical methods used to describe health care phenomena as well as relationships among them. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [3] FALL

NRSC8307 - Research Design And Statistics II
Title

Research Design And Statistics II

Catalog Description

The course expands the concepts and applications of RD&S I including an introduction to longitudinal and randomized control design issues. Topics related to internal validity, experimental designs, and issues in comparing individuals and groups cross-sectionally and longitudinally will be detailed. Students will be introduced to issues in external validity and the relationships between internal and external validities. Parametric and non-parametric univariate comparative statistical methods used to analyze data resulting from cross-sectional and randomized controlled designs will be included. Students will be expected to generate and interpret results from statistical software and present relevant information in figures, tables, and text. Concepts will be studied within the context of evaluating published research. Prerequisite: completion of Research Design and Statistics I or consent of faculty. [3] SPRING

NRSC8308 - Research Design And Statistics III
Title

Research Design And Statistics III

Catalog Description

This course is focused on advanced designs and multivariate statistical techniques. Design topics include advanced issues in external validity, field experimentation versus laboratory experiments, quasi-experimental and blended designs as well as special considerations for nested and complex longitudinal designs. Related statistical topics include advanced multiple linear regression methods (e.g. path and structural equation modeling), log-linear models and advanced techniques in survival and longitudinal data analysis. These methods and concepts will be discussed and evaluated through educational resources and published research using them. Students will have the opportunity to develop advanced skills in statistical applications most commonly used in their respective areas of interest. Prerequisite: completion of Research Design and Statistics II or consent of faculty. [3] SUMMER

NRSC8309 - Special Topics In Quantitative Methods

Title

Special Topics In Quantitative Methods

Catalog Description

This course provides an overview of varied and timely topics in the field of quantitative methods. Exemplar topics may include issues in data collection methods such as using online or other resources, an examination of how quantitative data collection methods influence data management and analytic approaches, collection methods for physiological or psycho-social outcomes, and the benefits and drawbacks of using public data sets, conventional and new analytic techniques, as well as broader issues in the evolution of quantitative methods. Prerequisites: NRSC 8308, NRSC 8313; NRSC 8352 or NRSC 8382; or with permission from instructor(s). [2] FALL

NRSC8310 - Health, Health Care, Research, And Public Policy

Title

Health, Health Care, Research, And Public Policy

Catalog Description

This course explores and critically analyzes theoretical and empirical approaches to understanding dynamic synergies between research, nursing practice, health care organization, and public policy and their impact on health. Strategies for dissemination, translation, and evaluation of evidence-based research findings to support health care practices and public policies to measurably improve health outcomes for selected populations and the student's phenomenon of interest will be discussed. Local, national, and global implications will be explored. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [2] SPRING

NRSC8311 - Role of Scientist In Academe, Community, And World

Title

Role of Scientist In Academe, Community, And World

Catalog Description

This seminar course assists the student to develop a personal framework for behavior within academe, the scientific community, and the world beyond. Through readings and discussions, the student will explore a variety of viewpoints about the duties and responsibilities of an educated citizen scientist in an interdependent world. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [1] SPRING

NRSC8312 - Programs of Research And Grantsmanship

Title

Programs of Research And Grantsmanship

Catalog Description

This course provides the foundational information necessary for developing a program of research. Focus is placed on acquiring practical skills necessary to develop a program of research, narrowing the focus of student's area of research, and for basic grantsmanship. Focus is placed upon developing the knowledge and practical skills necessary to investigate an area of research interest and draft a research proposal appropriate to current level of career development needs and/or phenomenon of interest. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [2] FALL

NRSC8313 - Theories of Science

Title

Theories of Science

Catalog Description

This course provides students with an introduction to the central theoretical and philosophical issues concerning the nature of science, the patterns of knowing and knowledge development, criteria for evaluating knowledge claims, and philosophy of science. The course will enable students to become knowledgeable about the forces affecting the development of knowledge and critical analyses of theories commonly used in nursing research.

Prerequisite: enrollment in the Ph.D. program or consent of faculty. [2] FALL

NRSC8350 - Conceptual Foundations For Clinical Research

Title

Conceptual Foundations For Clinical Research

Catalog Description

Critical analysis of theories, concepts, and research related to the promotion, protection, and restoration of health across the lifespan at individual, family, and community levels. Emphasis will be on the individual level. Students conduct a critical analysis of existing and emerging scientific knowledge in a chosen field of study.

Prerequisite: enrollment in the Ph.D. program or consent of faculty. [3] SPRING

NRSC8352 - Measurement in Research

Title

Measurement in Research

Catalog Description

In this course, the student will develop expertise in the design, measurement, and analysis of studies employing generic outcomes. The impact of the researcher's decisions regarding conceptual models, treatment definition, risk adjustment strategies, and the application of statistical techniques will be explored. The student will also be expected to critically evaluate key measures to develop an overview, including measurement and analysis plans for a condition-specific outcome related to their phenomenon of interest. At least one controversy attendant to each generic outcome will be debated in class. Prerequisite: completion of Research Design and Statistics I and II. [3] SUMMER

NRSC8353 - Designing and Testing Interventions

Title

Designing and Testing Interventions

Catalog Description

Analysis of methodological, ethical, and practical issues related to the design and implementation of theory-based intervention studies. Students conduct a critical analysis of existing and emerging interventions or consider a novel hypothetical intervention related to their chosen field of study and write an intervention research proposal. Prerequisites: NRSC 8308; NRSC 8313; NRSC 8352; or with permission from instructor(s). [2] FALL

NRSC8366 - Curriculum Strategies For Health Professional Education
Title

Curriculum Strategies For Health Professional Education

Catalog Description

This course introduces the student to the foundations of learning theory and learning styles. The impact of technology on learning practices and the appropriate use of technology to facilitate learning is emphasized. Students will create electronic elements for effective learning and use a course management system. Copyright and fair use issues are discussed. Overall curriculum strategies that integrate content, organization, informatics, and sequencing of courses are discussed. Students will design a learning program that integrates learning styles, technology use, and a course management system. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [3]

NRSC8368 - Contextual Nature Of Health And Health Behaviors
Title

Contextual Nature Of Health And Health Behaviors

Catalog Description

This course explores and critically analyzes theoretical and empirical approaches to understanding the interaction of health and environment in affecting health by examining contextual factors that impact health and health behaviors of various system levels. Examines disparity (e.g., social and economic) as a determinant of health among individuals and sub-populations. Critique selected models of health, health behavior, community organization, and health care delivery and their usefulness to understand and impact selected health phenomena and various ethno-cultural populations and communities. Students critically analyze and synthesize the literature related to a selected phenomenon of interest. Prerequisite: enrollment in the Ph.D. program or consent of faculty.

NRSC8371 - Advanced Concepts in Nursing Education
Title

Advanced Concepts in Nursing Education

Catalog Description

This course is designed to facilitate expertise in the application of advanced educational concepts, principles, and theories related to nursing education in the academic setting. The underlying premise for the value of such knowledge is that nurse educators encounter situations and issues that warrant systematic consideration, and reflection. Moreover, students will acquire competence in facilitating learner development and role socialization, review accreditation parameters for nursing programs, and explore various aspects and topics such as legal, ethical and socio-cultural factors related to the role of the nurse educator. Prerequisites: 366, 367 [3] FALL

NRSC8377 - Special Topics In Nursing Science
Title

Special Topics In Nursing Science

Catalog Description

Students will discuss research and current developments of special interest to faculty and students (may be repeated for credit). Prerequisite: enrollment in the Ph.D. program or consent of faculty. [Variable credit: 1-3]

NRSC8380 - Knowledge Synthesis In Nursing Science

Title

Knowledge Synthesis In Nursing Science

Catalog Description

This course provides a critical appraisal of the theoretical and empirical basis of nursing science. Theories and research generated to study phenomena related to nursing are evaluated and synthesized. Strategies for synthesizing extant knowledge in nursing are discussed. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [3] SPRING

NRSC8381 - Current Topics In Health Services Research

Title

Current Topics In Health Services Research

Catalog Description

This course assists the student's development of expertise in knowing and applying resources (scholarly, organization, theoretical and methodological) to her/his health services research (HSR) foci as well as the position of her/his research interest within the current HSR environment. [3 credits]. SPRING. Prerequisite: enrollment in the PhD program or consent of faculty.

NRSC8382 - Introduction to Health Services Research

Title

Introduction to Health Services Research

Catalog Description

This course assists the student in acquiring skills for health services research (HSR). The course addresses common outcomes of HSR, as well as the knowledge and skills needed to evaluate the effectiveness of health service interventions within clinical settings, organizations and systems. The student will develop expertise in the design, analysis, and execution of core HSR methodologies from the perspective of safety and quality. The complex nature of health service interventions is emphasized within the context of implementation science. Strategies of attending to the execution and analysis of multilevel, multi-organizational studies will be addressed. Prerequisite: completion of Research Design and Statistics I and II. [2] FALL

NRSC8383 - Issues in Health Services Research Intervention Studies

Title

Issues in Health Services Research Intervention Studies

Catalog Description

The student will develop expertise in the design and execution of intervention studies in health services research. Emphasis will be placed on the selection of interventions and the valid and reliable execution of the interventions through examination of issues such as treatment fidelity, intervention duration, location and interventionist expertise. The intervention categories studied include: labor, capital and processes (e.g., working conditions and work design). Strategies of attending to the execution and analysis of multilevel, multi-organizational studies will be addressed. [3] FALL

NRSC8390 - Independent Study In Nursing Science

Title

Independent Study In Nursing Science

Catalog Description

Individualized study and reading in areas of mutual interest to the student and faculty member. Prerequisite: consent of instructor. [Variable credit: 1-3]

NRSC8394 - Qualitative Research Methods

Title

Qualitative Research Methods

Catalog Description

This course introduces and explores qualitative research methods, including their theoretical and methodological foundations, and practical applications. Course participants will explore and pilot test one method in the context of their topic of interest. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [3]

NRSC8395 - Research Practicum

Title

Research Practicum

Catalog Description

This course provides students with exposure to and involvement in the research process. Learning activities are based on student need and interest and determined according to best fit with available faculty research programs. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [Variable credit: 1-3]

NRSC8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [Variable credit: 0-6]

NRSC9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

Prerequisite: Enrollment in the Ph.D. program and consent of faculty. [Variable credit: 0-6]

Pharmacology (GS)

PHAR-GS8320 - Fundamentals of Pharmacology and Drug Discovery

Title

Fundamentals of Pharmacology and Drug Discovery

Catalog Description

This course is divided into three five- week modules. The first focuses on fundamentals aspects of pharmacological targets: receptor theory, enzyme kinetics, and cell signaling pathways. The second focuses on quantitative modeling of drug absorption, distribution, metabolism, and elimination. The third focuses on key aspects of drug discovery including target selection and validation, identification of early drug leads, optimization of those leads into compounds suitable for clinical development, transitioning from discovery to the early clinical development phase, and medical and marketing consideration that impact progress of a drug discovery program. The course will be taught by a team of faculty members with considerable real- world experience applying these concepts to drug discovery. In addition to guided readings and lectures, students will participate in weekly journal article discussions and active learning exercises designed to enhance students understanding of recent developments and application of fundamental concepts. FALL. [1] Davies, Spiller, Jones.

PHAR-GS8321 - Targets, Systems, and Drug Discovery

Title

Targets, Systems, and Drug Discovery

Catalog Description

This interactive course gives students the opportunity to learn how pharmacology has been used to understand (patho)physiology and to treat diseases. The course is divided into three five-week modules. The first module focuses on the cardiovascular system and renal function. The second module focuses on immunology and cancer biology. The third module focuses on endocrinology and neuroscience. Lectures emphasize the molecular and cellular underpinnings of normal organ function and how these go awry in disease. Mechanisms of action for important drug classes are discussed in a systemic fashion and supported by guided readings and student presentations. Prerequisite: Enrollment in the Pharmacology Ph.D. program or consent of course directors. SPRING. [1-3] Brash.

PHAR-GS8322 - Scientific Communications I

Title

Scientific Communications I

Catalog Description

This interactive course gives students experience preparing and delivering scientific presentations that effectively communicate scientific research. In the course, students will prepare and present a 10-minute journal club, a 10-minute specific aims talk for the Pharmacology Retreat, and a 15-minute presentation of their scientific research for a lay audience. Following the course, the student will also be required to present a 30-min Journal Club to the Pharmacology Department during the spring semester. As preparation for their retreat talk, students will also write a draft Specific Aims page and a 2-page Background and Significance section that will be further developed into a full fellowship proposal during the Spring Scientific Communication II course. Prerequisite: Enrollment in the Pharmacology Ph.D. program or consent of course directors. FALL. Davies. [1]

PHAR-GS8323 - Scientific Communication Skills II

Title

Scientific Communication Skills II

Catalog Description

This course will leverage the writing assignments of the fall Scientific Communications course (8322) to accelerate preparation of a draft NRSA fellowship (or equivalent such as AHA) application. During the fall course, a draft Specific Aims page is written and critiqued. In this spring course, students will write the next two sections of their application and have it peer-reviewed. These writing assignments are intended to be self-guided with significant support by the student's mentor. The applications will subsequently be submitted for funding to the proper agency. Pre-requisite: Completion of PHAR-GS 8322 and Enrollment in the Ph.D. program. SPRING. [1]

PHAR-GS8328 - Experimental Design and Statistical Methodology

Title

Experimental Design and Statistical Methodology

Catalog Description

This course provides the fundamentals necessary to conceptualize all components that lead to responsible research approaches, including methodical experimental design, analytical assessment of relevant literature, and proper interpretation of data. Students learn how to design experiments with rigorous and reproducible results and how to appropriately develop models. The MATLAB program will be used for analysis. Topics include implicit bias, scientific transparency, data and material sharing, proper record maintenance, and statistical analysis methods such as analysis of variance, general and generalized linear models, survival analysis, and multivariate models. FALL. [2] Konradi, Leich Hilbun.

PHAR-GS8330 - Advanced Neurophysiology

Title

Advanced Neurophysiology

Catalog Description

Dubbed as "Fundamentals of the Excitable Membrane for Biologists", this course will begin with an introduction to electrical properties of excitable cell membranes and tools to study those properties. It will be followed by a series of lectures on the structure, function and types of ion channels accompanied with lab sessions and paper discussions. In the latter part of the semester, it will focus on synapse formation, its biophysical properties, and a role in storing memory within a neuronal network, ending with an overview on and available tools to study of in vivo neurophysiology of primates. Overall, this course is designed to provide basic knowledge of generation, regulation and propagation of electrical signals to IGP students. By the end of the course, students will have a foundation to understand and critique Research Articles in the field of Neurophysiology. SPRING [3] Grueter

PHAR-GS8345 - Fundamentals of Neuroscience I

Title

Fundamentals of Neuroscience I

Catalog Description

This course can be taken as an elective for graduate students in Pharmacology. It emphasizes the cellular and molecular aspects of neuroscience. The goal is for students to learn the general organization of the nervous system and its circuitry and understand the fundamental molecular and cellular bases underlying its development and function in normal and pathological conditions. In addition, the students learn how the cellular systems in the brain relate to the major branches of cognitive neuroscience. There are 3 themes that will be woven into the course to provide a continuum from molecules to cognition and disease: sensory systems, motor systems and memory. This course combines faculty lecture with discussion of original articles with an emphasis on fundamental concepts and the elucidation of important research paradigms in the discipline. Prerequisite: Undergraduate coursework in cell biology or biochemistry or permission of the course directors. SPRING [4].

PHAR-GS8346 - Advanced Molecular Neurobiology

Title

Advanced Molecular Neurobiology

Catalog Description

(Also listed as Neuroscience 8346) This course examines molecular components and interactions that regulate neuronal development, signaling, and disease. Topics include development of neuronal identity, axonal transport, growth factors and cell death, axon guidance and synapse formation, electrical and chemical transmission, regulation of neuronal excitability and genetic analysis of signaling and neural disorders. Didactic and literature discussions provide students with a sound foundation for understanding the molecular bases underlying the development and function of the nervous system. Prerequisite: Neuroscience 8345 or Pharmacology 8320, or consent of instructor. SPRING. [3] Emeson and Staff.

PHAR-GS8350 - Independent Study

Title

Independent Study

Catalog Description

Qualified students work with individual staff members in areas not covered in other available courses. Prerequisite: approval of staff member and department chair. FALL, SPRING, SUMMER. [1-2,] Staff.

PHAR-GS8360 - Current Issues In Pharmacology

Title

Current Issues In Pharmacology

Catalog Description

Presentation of current advances, paradigm shifts, and problems in pharmacology with an emphasis on experimental approaches and their interpretation. Prerequisite: consent of instructor. SPRING. [Variable credit: 1-3] Staff.

PHAR-GS8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

PHAR-GS9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Philosophy

PHIL5665 - Racial Justice Lab

Title

Racial Justice Lab

Catalog Description

Application of philosophical race theory to concrete problems of racial justice. Collaborative, problem-centered exercise culminating in student-designed projects. Themes vary by semester. [3]

PHIL5900 - Figures in Philosophy

Title

Figures in Philosophy

Catalog Description

[3]

PHIL5903 - Kant's Theoretical Philosophy

Title

Kant's Theoretical Philosophy

Catalog Description

Immanuel Kant's 1781/1787 Critique of Pure Reason in context of his earlier philosophy and broader system of philosophy. [3]

PHIL5905 - History of Normative Ethics

Title

History of Normative Ethics

Catalog Description

Normative ethics in Western philosophy, including eudaimonism, virtue ethics, deontology, utilitarianism, and care ethics. Historical texts and contemporary applications. [3]

PHIL5910 - History of Philosophy

Title

History of Philosophy

Catalog Description

[3]

PHIL5920 - Topics in Philosophy

Title

Topics in Philosophy

Catalog Description

[3]

PHIL5922 - Democracy

Title

Democracy

Catalog Description

Democratic government: duty to vote, alternatives to full suffrage, the epistemic dimension of democratic authority, and various cognitive dysfunctions that democracy encourages. Readings from contemporary journal literature. [3]

PHIL7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

[0-12]

PHIL8000 - Teaching and Research Methods

Title

Teaching and Research Methods

Catalog Description

Survey of methods of research in philosophy and examination and discussion of teaching methods. Required of all first-year graduate students. [2]

PHIL8001 - Philosophical Readings in French

Title

Philosophical Readings in French

Catalog Description

Selected major philosophical works or a selected bibliography about a major philosophical problem, read in French. A translation examination and appropriate reports. Prerequisite: department approval. [3]

PHIL8002 - Philosophical Readings in German

Title

Philosophical Readings in German

Catalog Description

Selected major philosophical works or a selected bibliography on a major philosophical problem. A translation examination and appropriate reports. Prerequisite: department approval. [3]

PHIL8003 - Philosophical Readings in Classical Languages (Latin or Greek)

Title

Philosophical Readings in Classical Languages (Latin or Greek)

Catalog Description

Reading in Latin or Greek of selected major philosophical works or a selected bibliography on a major philosophical problem. A translation examination and appropriate reports. Prerequisite: department approval. [3]

PHIL8050 - Readings in Philosophy

Title

Readings in Philosophy

Catalog Description

Selected major philosophical works or a selected bibliography about a major philosophical problem. Appropriate reports and examination. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PHIL8999 - Non-candidate Research

Title

Non-candidate Research

Catalog Description

Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

PHIL9000 - Figures in Philosophy

Title

Figures in Philosophy

Catalog Description

Survey of figures in the history of philosophy. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PHIL9010 - History of Philosophy**Title**

History of Philosophy

Catalog Description

Survey of figures and/or topics in history of philosophy. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PHIL9020 - Topics in Philosophy**Title**

Topics in Philosophy

Catalog Description

Survey of topics in philosophy. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PHIL9999 - Ph.D. Dissertation Research**Title**

Ph.D. Dissertation Research

Catalog Description

[0-12]

Physics

PHYS5200 - Statistical Physics**Title**

Statistical Physics

Catalog Description

Temperature, work, heat, and the first law of thermodynamics. Entropy and the second law of thermodynamics. Kinetic theory of gases with applications to ideal gases and electromagnetic radiation. Serves as repeat credit for students who have completed 5207. No credit for students who have earned credit for 3200 or 3207. Prerequisite or corequisite: 5270 or 5275. [3]

PHYS5210 - Classical and Modern Optics**Title**

Classical and Modern Optics

Catalog Description

(Also listed as PHYS 2210) Geometrical optics, including reflection, refraction, ray tracing, aberrations, and interference. Physical optics, including wave theory, absorption, dispersion, diffraction, and polarization. Properties of light from lasers and synchrotron sources. Photodetectors and optical technology. No credit for students who have earned credit for 2210. [3] (MNS)

PHYS5237 - Computational Physics

Title

Computational Physics

Catalog Description

(Also listed as PHYS 2237) Topics in modern physics analyzed exclusively with computer programs. Three-body solar system orbits. Random walk diffusion and entropy growth. Magnetism in the second order using model, non-equilibrium molecular dynamics. Solutions to the Schrödinger equation with numerical methods. No credit for students who have earned credit for 2237. [3]

PHYS5250 - Concepts and Applications of Quantum Physics

Title

Concepts and Applications of Quantum Physics

Catalog Description

(Also listed as PHYS 2250) Atomic and molecular structure, interaction of light with atoms and molecules, and spectroscopy. One three-hour laboratory per week. No credit for students who have earned credit for 2250 or 2250W. [4] (MNS)

PHYS5260 - Modern Physics

Title

Modern Physics

Catalog Description

(Also listed as PHYS 2260) Condensed-matter physics, biophysics, special theory of relativity, and nuclear and particle physics. One three-hour laboratory per week. No credit for students who have earned credit for 2260 or 2260W. [4]

PHYS5290 - Electricity, Magnetism, and Electrodynamics I

Title

Electricity, Magnetism, and Electrodynamics I

Catalog Description

(Also listed as PHYS 2290) Electrostatic fields and potentials. Gauss's law. Electrical properties of insulators, semiconductors, and metals. The Lorentz force. Magnetic fields and forces. Electromagnetic induction, Maxwell's equations, and electromagnetic waves. No credit for students who have earned credit for 2290. [3]

PHYS5291 - Electricity, Magnetism, and Electrodynamics II

Title

Electricity, Magnetism, and Electrodynamics II

Catalog Description

(Also listed as PHYS 2291) Continuation of 229a. Electromagnetic waves in dielectrics and conductors. Electromagnetic radiation in waveguide structures. Relativistic electrodynamics. Magnetism as a relativistic phenomenon. No credit for students who have earned credit for 2291. [3]

PHYS5640 - Physics of Condensed Matter**Title**

Physics of Condensed Matter

Catalog Description

(Also listed as PHYS 3640) Crystal structure and diffraction. Phonons and lattice vibrations. Free-electron theory of metals. Elementary band theory of solids. Semiconductors. Optical properties of insulators. Applications to solid-state devices, magnetism, and superconductivity. No credit for students who have earned credit for 3640. [3]

PHYS5651 - Advanced Quantum Mechanics I**Title**

Advanced Quantum Mechanics I

Catalog Description

(Also listed as PHYS 3651) Wave-particle duality, indeterminacy, superposition, the Schrödinger equation, angular momentum, the hydrogen atom, and spin and indistinguishability. No credit for students who have earned credit for 3651. [3]

PHYS5652 - Advanced Quantum Mechanics II**Title**

Advanced Quantum Mechanics II

Catalog Description

(Also listed as PHYS 3652) Time-independent and time-dependent perturbation theory, matrix theory, scattering, applications to atomic physics, condensed matter physics, and astrophysics. No credit for students who have earned credit for 3652. [3]

PHYS5660 - Introduction to Particle Physics**Title**

Introduction to Particle Physics

Catalog Description

(Also listed as PHYS 3660) Weak, strong, and electromagnetic forces as evidenced by the interactions of elementary particles. Classification of particles and experimental techniques. No credit for students who have earned credit for 3660. [3]

PHYS5890 - Selected Topics**Title**

Selected Topics

Catalog Description

(Also listed as PHYS 3890) No credit for students who have earned credit for 3890. [1-3] (No AXLE credit)

PHYS7007 - Radiation Dose Assessment

Title

Radiation Dose Assessment

Catalog Description

Advanced physics of radiation interactions, shielding, and dosimetry. Gamma ray and neutron shielding; internal and external dosimetry methods and models; radiation protection regulations; environmental monitoring for radioactive materials; and response to radiation accidents and emergencies. Use of specialized computer programs. Prerequisite: 3125. [3]

PHYS7125 - Health Physics

Title

Health Physics

Catalog Description

(Also listed as PHYS 3125) Theory and instrumentation in health physics and radiological physics. Radiation shielding design, methods of external and internal dosimetry, and radiation regulatory issues. No credit for students who have earned credit for 3125. [3]

PHYS7645 - Radiation Detectors and Measurements

Title

Radiation Detectors and Measurements

Catalog Description

(Also listed as PHYS 3645) Basic physics principles and applications of radiation detecting instruments, with laboratory exercises. Techniques and instrumentation for nuclear radiation detection and measurements as they relate to health physics (radiation safety) and nuclear physics. No credit for students who have earned credit for 3645. [4]

PHYS7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

[0-13]

PHYS8000 - Seminar

Title

Seminar

Catalog Description

[1]

PHYS8001 - Physics Colloquium

Title

Physics Colloquium

Catalog Description

Weekly colloquium attendance and mandatory participation in online discussion forum. Required evaluation of presentations based on content, visual aids, and delivery. Offered on satisfactory/unsatisfactory basis. [0]

PHYS8002 - Learning to Teach, Teaching to Learn

Title

Learning to Teach, Teaching to Learn

Catalog Description

Directed readings and discussion of topics in the teaching of science and engineering. Practical application of best teaching practices will be emphasized. Intended primarily for first-time teaching assistants and first-year graduate students. [1]

PHYS8003 - Teaching Practicum

Title

Teaching Practicum

Catalog Description

Discussion of best teaching practices in weekly meeting with instructor. Application of teaching strategies via teaching undergraduate lab or leading homework help-desk sessions. Offered on satisfactory/unsatisfactory basis. [0-1]

PHYS8005 - Mathematical Methods for Physicists

Title

Mathematical Methods for Physicists

Catalog Description

Linear spaces and operators; matrix algebra; differential equations; Green's function; and complex analysis. May include variational calculus; perturbation methods; group theory. [3]

PHYS8010 - Particle and Continuum Mechanics

Title

Particle and Continuum Mechanics

Catalog Description

Least action principle, Lagrange formalism, conservation laws, two-body problem, small-amplitude vibrations, non-inertial reference frames, canonical formalism, rigid body motion, continuous media, and field theory. Includes programming on scientific work stations. Prerequisite or corequisite: 8005. [3]

PHYS8020 - Advanced Electrodynamics

Title

Advanced Electrodynamics

Catalog Description

Electrostatics, potentials, boundary value problems, multipole moments, polarization, magnetostatics, Maxwell's equations, electromagnetic wave propagation, dissipative and conductive media. Prerequisite or corequisite: 8005. [3]

PHYS8021 - Advanced Electrodynamics

Title

Advanced Electrodynamics

Catalog Description

Continuation of 8020. Covariant formulation, least-action principle and Lagrange density, energy momentum tensor, charges in external fields, radiation from accelerated charges, multipole radiation. Prerequisite: 8020. [3]

PHYS8030 - Quantum Mechanics

Title

Quantum Mechanics

Catalog Description

Underlying assumptions. Schrodinger equation: interpretation, discrete and continuous basis, change of basis. One-dimensional examples: square potential, harmonic oscillator. Uncertainty relations, symmetries and their implications, angular momentum, hydrogen atom, spin, systems with N-degrees of freedom; time independent perturbation theory, Fermi's golden rule. Corequisite: 8005. [3]

PHYS8031 - Quantum Mechanics

Title

Quantum Mechanics

Catalog Description

Continuation of Phys 8030. Variational method, degenerate second order perturbation theory. Brief introduction to group theory with rotation group and Lorentz group as examples, addition of angular momentum, Wigner-Ekharth theorem, derivation of covariant spin-half wave functions. Potential scattering theory: angular momentum decomposition, T-matrix, S-matrix, Lippman-Schwinger equation, scattering by two potentials, local and separable potentials. Dirac equation: current conservation; completeness; parity, time reversal, and charge conjugation symmetries; co-variant solution of the hydrogen atom; Feynman propagator. Prerequisite: 8030. [3]

PHYS8040 - Statistical Mechanics

Title

Statistical Mechanics

Catalog Description

Phase space, entropy and reversibility; ensemble theory; Fermi and Bose Statistics; systems of interacting particles; equation of state, critical phenomena, and phase transitions; pairing and superfluidity. [3]

PHYS8100 - Selected Topics in Theoretical Physics

Title

Selected Topics in Theoretical Physics

Catalog Description

Topics such as Lie groups and symmetry principles in quantum mechanics, quantum electrodynamics of strong field, phenomenological modes of nuclear structure. Prerequisite: consent of instructor. [3]

PHYS8105 - Special Topics in Experimental Physics

Title

Special Topics in Experimental Physics

Catalog Description

Current topics in experimental physics relevant to research areas in the department, such as biological, condensed- matter, elementary-particle, nuclear, and optical physics, astronomy, astrophysics and cosmology. [Variable credit: 1-3]

PHYS8120 - Biomolecular Physics

Title

Biomolecular Physics

Catalog Description

Physical principles applied to the structure and dynamics of biological molecules on the nanometer scale. Emphasis on the random Brownian motion that dominates at all length scales, and how biomolecular structures move, function, and interact amid chaotic thermal fluctuations. Selected measurement techniques. [3]

PHYS8122 - Physics of Living Systems

Title

Physics of Living Systems

Catalog Description

Physical principles applied to biological phenomena. Development of physical models of biological systems on scales ranging from molecules to organisms. Biological applications of mechanics, thermodynamics, and dynamical systems. [3]

PHYS8124 - Physical Measurements on Biological Systems

Title

Physical Measurements on Biological Systems

Catalog Description

(Also listed as Biomedical Engineering 7425) A survey of the state of the art in quantitative physical measurement techniques applied to cellular or molecular physiology. Topics include the basis for generation, measurement, and control of the transmembrane potential; electrochemical instrumentation; optical spectroscopy and imaging; X-ray diffraction for determination of macromolecular structure; magnetic resonance spectroscopy and imaging. One lecture and one recitation. [3]

PHYS8126 - Theoretical and Experimental Systems Biology

Title

Theoretical and Experimental Systems Biology

Catalog Description

Introduction to systems biology from the perspective of the emergence of complexity in toy models. Simple biological subsystems, their reductionist and equivalent models, and measurements required to specify model architecture and parameters. Multiple interconnected organs-on-chips as dynamic biological systems that can model organismal biology. [3]

PHYS8128 - Biophysical Electrodynamics

Title

Biophysical Electrodynamics

Catalog Description

The physics of bioelectric phenomena: the mechanisms that lead to the transmembrane resting and action potentials in nerve and muscle cells, the differential equations describing propagation of the nerve action potential, and the relationship between the transmembrane and extracellular potentials in nerve and cardiac muscle. [3]

PHYS8140 - Nuclear Theory

Title

Nuclear Theory

Catalog Description

Basic experimental facts and phenomenological models (shell model and collective model). Nucleon-nucleon interaction, mean-fields theories of nuclear structure (Hartree-Fock, BSC pairing, HFB, RPA, and QRPA). Ab-initio calculations for light nuclei. Time-dependent Hartree-Fock calculations of heavy-ion reactions. Prerequisite or co-requisite 8030. [3]

PHYS8142 - Relativistic Heavy Ion Physics

Title

Relativistic Heavy Ion Physics

Catalog Description

Basic experimental facts and phenomenological models of ultra-relativistic heavy-ion collisions. Quark-gluon plasma formation, signatures, and properties. Thermodynamics and hydrodynamical evolution of nuclear matter in extreme conditions. Prerequisite or corequisite: 8030, 8040. [3]

PHYS8144 - Experimental Nuclear Physics

Title

Experimental Nuclear Physics

Catalog Description

Interactions of charged particles and photons in matter, coordinate transformations, statistics of nuclear processes, radiation detectors and analyzers, and selected topics in the design and application to experiments of particle accelerators and instrumentation used in nuclear and high energy physics. [3]

PHYS8150 - Electromagnetic Spectroscopy

Title

Electromagnetic Spectroscopy

Catalog Description

Interaction of electromagnetic radiation with matter as a function of photon energy and flux. Mechanisms of absorption, emission, and scattering of light within the visible, infrared, ultraviolet, and x-ray wavelength regimes. Experimental and computational techniques and instrumentation for assessing and analyzing spectroscopic information. Prerequisite: 8030. [3]

PHYS8152 - Quantum Mechanics of Solids

Title

Quantum Mechanics of Solids

Catalog Description

Free-electron theory of metals; elementary band theory of solids; quantum theory of the harmonic crystal; elementary excitations; optical properties of materials; electronic basis of magnetic interactions; density-functional theory; relativistic band structure; electronic localization and amorphous solids; two-dimensional phase transitions and superlattices. Consent of instructor required. [3]

PHYS8154 - Nanoscale Condensed Matter

Title

Nanoscale Condensed Matter

Catalog Description

Evolution of elementary excitations; optical, magnetic, electronic, and mechanical characteristics of matter at nanometer length scales. Effects of one, two, and three dimensional electron confinement. Novel single-particle and collective properties of nanometer-size objects, including optical, magnetic, thermal, and transport phenomena. Prerequisite: 8030. [3]

PHYS8156 - Surface Structure and Dynamics

Title

Surface Structure and Dynamics

Catalog Description

Geometrical and electronic structure of surfaces, including surface reconstruction, density of states, and effects of adsorbates, impurities, and electronic defects. Prerequisite: 8030-8031. [3]

PHYS8158 - Interactions of Photons with Atoms, Molecules, and Solids

Title

Interactions of Photons with Atoms, Molecules, and Solids

Catalog Description

Macroscopic optical properties of solids. Lorentz model of optical excitation, radiative and non-radiative relaxation. Coherence and dephasing in two-level systems. Interband transitions and luminescence. Optical properties of quantum-confined systems. Excitons, phonons, plasmons, and polaritons. Lasers, Raman and Brillouin scattering, nonlinear optical phenomenology. Prerequisite: 5651, 5640 or CHEM 5360. [3]

PHYS8159 - Experimental Nanoscale Fabrication and Characterization

Title

Experimental Nanoscale Fabrication and Characterization

Catalog Description

Laboratory introduction to nanofabrication and characterization. Preparation for independent and original research in nanotechnology and nanoscience. Review of nanomaterials, nanofabrication, characterization, nanoelectronics, and photonics. [3]

PHYS8160 - General Relativity and Cosmology

Title

General Relativity and Cosmology

Catalog Description

Einstein's geometric theory of gravity in terms of tensor analysis and differential geometry. Einstein's field equations are derived and solutions are discussed. Applications of general relativity are explored, including those to very strong gravitational fields, gravitational collapse, neutron stars, black holes, and quantum gravity. Topics in cosmology will include red shifts and cosmic distance relations, big bang cosmology, primordial nucleosynthesis, the very early universe and inflationary cosmologies. Prerequisite: consent of instructor. [3]

PHYS8161 - General Relativity and Cosmology

Title

General Relativity and Cosmology

Catalog Description

Continuation of 8160. Einstein's geometric theory of gravity in terms of tensor analysis and differential geometry. Einstein's field equations are derived and solutions are discussed. Applications of general relativity are explored, including those to very strong gravitational fields, gravitational collapse, neutron stars, black holes, and quantum gravity. Topics in cosmology will include red shifts and cosmic distance relations, big bang cosmology, primordial nucleosynthesis, the very early universe and inflationary cosmologies. Prerequisite: consent of instructor. [3]

PHYS8164 - Many-Particle Quantum Theory

Title

Many-Particle Quantum Theory

Catalog Description

Nonrelativistic theory of atoms, solids, and nuclei; operators in second quantization, fermions and bosons, pair correlation function, interacting electron gas (metal), propagators, Wick's theorem and Feynman diagrams, Hartree-Fock theory, shell model, pairing forces in nuclei, and superconductivity. Prerequisite: 8031. [3]

PHYS8170 - Quantum Field Theory

Title

Quantum Field Theory

Catalog Description

Relativistic quantum mechanics, canonical and path-integral field quantization, relativistic scattering theory, perturbation expansions; Feynman diagrams and radiative corrections, renormalization and regularization, with applications to quantum electrodynamics and non Abelian gauge theories. Prerequisite: 8010, 8020, 8030, and 8031. Corequisite: 8021. [3]

PHYS8171 - Quantum Field Theory

Title

Quantum Field Theory

Catalog Description

Relativistic quantum mechanics, canonical and path-integral field quantization, relativistic scattering theory, perturbation expansions; Feynman diagrams and radiative corrections, renormalization and regularization, with applications to quantum electrodynamics and non Abelian gauge theories. Prerequisite: 8170. [3]

PHYS8190 - Independent Study

Title

Independent Study

Catalog Description

May be repeated for credit more than once, but students may earn only up to 3 credits per semester of enrollment. [1-3]

**PHYS8999 - Non-candidate Research
Title**

Non-candidate Research

Catalog Description

Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-13]

**PHYS9995 - Half-time Ph.D. Dissertation Research
Title**

Half-time Ph.D. Dissertation Research

Catalog Description

For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

**PHYS9999 - Ph.D. Dissertation Research
Title**

Ph.D. Dissertation Research

Catalog Description

[0-13]

Political Science

**PSCI5202 - Ancient Political Thought
Title**

Ancient Political Thought

Catalog Description

(Also listed as PSCI 2202) Greek and Roman political traditions. Plato, Aristotle, Cicero, and early Christian thinkers. Questions of justice, equality, democracy, and political knowledge. No credit for students who have earned credit for 2202. [3]

**PSCI5203 - History of Modern Political Philosophy
Title**

History of Modern Political Philosophy

Catalog Description

(Also listed as PSCI 2203) Intensive analysis of the principal political philosophers in the modern tradition. No credit for students who have earned credit for 2203. [3]

**PSCI5205 - Contemporary Political Theory
Title**

Contemporary Political Theory

Catalog Description

(Also listed as PSCI 2205) Debates in contemporary political thought. Justice, democracy, freedom, identity, and individualism. Includes emerging contemporary theories. No credit for students who have earned credit for 2205. [3]

PSCI5207 - Liberalism and Its Critics**Title**

Liberalism and Its Critics

Catalog Description

(Also listed as PSCI 2207) The liberal tradition in political theory and its major challengers. Critical debates surrounding the relationship between individuals and political community, rights, freedom and equality. No credit for students who have completed 2207 or 2207W. [3]

PSCI5208 - Law, Politics, and Justice**Title**

Law, Politics, and Justice

Catalog Description

(Also listed as PSCI 2208) Contemporary and classical theories of law and society: rights theories, gender and the law; law and transitions to democracy; law between nations. No credit for students who have earned credit for 2208. [3]

PSCI5209 - Issues in Political Theory**Title**

Issues in Political Theory

Catalog Description

(Also listed as PSCI 2209) Topics vary from semester to semester. May be repeated once if there is no overlap with previous offerings. No credit for students who have earned credit for 2209. [3]

PSCI5210 - West European Politics**Title**

West European Politics

Catalog Description

(Also listed as PSCI 2210) Analysis of political development, social forces, institutions, and public policy in Great Britain, France, Germany, Italy, and Sweden. No credit for students who have earned credit for 2210. [3]

PSCI5213 - Democratization and Political Development**Title**

Democratization and Political Development

Catalog Description

(Also listed as PSCI 2213) Comparative study of political development, with a focus on institutions. The effect of political choices about voting systems, executive and legislative powers, cabinet formation, and other institutions on political competition, parties and government stability. Cases from established democracies and countries undergoing democratization. No credit for students who have earned credit for 2213 or 8317. [3]

PSCI5215 - Change in Developing Countries

Title

Change in Developing Countries

Catalog Description

(Also listed as PSCI 2215) Comparative study of political and economic change in developing countries. Political implications of ethnicity, economic dependency, and environmental degradation. No credit for students who have earned credit for 2215. [3]

PSCI5216 - The Chinese Political System

Title

The Chinese Political System

Catalog Description

(Also listed as PSCI 2216) Governmental institutions and political processes in the People's Republic of China with emphasis upon the interaction of traditional and revolutionary elements. Some attention to Taiwan since 1950 and to the overseas Chinese as parts of the Chinese political universe. No credit for students who have earned credit for 2216. [3]

PSCI5219 - Politics of Mexico

Title

Politics of Mexico

Catalog Description

(Also listed as PSCI 2219) A survey of contemporary Mexican politics from a comparative perspective. Interaction of economic, social, and political forces that led to the demise of one of the world's most durable one-party political regimes and the prolonged transition to democracy. No credit for students who have earned credit for 2219. [3]

PSCI5220 - Crisis Diplomacy

Title

Crisis Diplomacy

Catalog Description

(Also listed as PSCI 2220) Foreign policy decision making and strategy. Emphasis on differences between crises that lead to war and those that do not. Foreign relations of Britain, France, Germany, Russia, and Japan. No credit for students who have earned credit for 2220. [3]

PSCI5221 - Causes of War

Title

Causes of War

Catalog Description

(Also listed as PSCI 2221) Scientific study of the onset of expansion and consequences of war; conditions of peace, emphasizing alliances, arms races, and crisis escalation. No credit for students who have earned credit for 2221. [3]

PSCI5222 - American Foreign Policy

Title

American Foreign Policy

Catalog Description

(Also listed as PSCI 2222) Critical analysis of major international and domestic factors shaping U.S. foreign relations as reflected in selected twentieth- and twenty-first-century experiences. No credit for students who have earned credit for 2222. [3]

PSCI5224 - Theories of World Politics

Title

Theories of World Politics

Catalog Description

(Also listed as PSCI 2224) Analysis of major theories of the basic factors underlying global relations. No credit for students who have earned credit for 2224. [3] (SBS)

PSCI5225 - International Political Economy

Title

International Political Economy

Catalog Description

(Also listed as PSCI 2225) Survey of major issues involving the interaction of political and economic forces at the global level. Particular attention to theories of interdependence and imperialism, the position of developing countries in the international system, multinational corporations, and the economic origins of war. No credit for students who have earned credit for 2225. [3]

PSCI5226 - International Law and Organization

Title

International Law and Organization

Catalog Description

(Also listed as PSCI 2226) The role of international law and international organizations in the contemporary global political system. Focus on the evolution and impact of international law, the United Nations, the International Monetary Fund (IMF), and selected regional organizations. No credit for students who have earned credit for 2226. [3]

PSCI5240 - Political Parties

Title

Political Parties

Catalog Description

(Also listed as PSCI 2240) Theories of party formation, organization, and behavior. Historical development of party systems. Criteria for the comparative evaluation of party systems. Parties as instruments of citizen control. Implications for electoral outcomes, coalition formation, legislative decision making, and public policy. No credit for students who have earned credit for 2240. [3]

PSCI5243 - Political Campaigns and the Electoral Process

Title

Political Campaigns and the Electoral Process

Catalog Description

(Also listed as PSCI 2243) Theories of representation and democratic accountability; electoral strategies and tactics, including political polling and analysis. No credit for students who have earned credit for 2243. [3]

PSCI5245 - The American Presidency

Title

The American Presidency

Catalog Description

(Also listed as PSCI 2245) Constitutional, historical, and political aspects. Attention to electing and nominating president, presidential leadership and personality, governing, and relations with Congress and the public. No credit for students who have earned credit for 2245. [3]

PSCI5255 - Public Policy Problems

Title

Public Policy Problems

Catalog Description

(Also listed as PSCI 2255) Specific problems of public policies and their relations to political and institutional structures. Particular policy problems vary from semester to semester. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. No credit for students who have earned credit for 2255. [3]

PSCI5259 - Political Strategy and Game Theory

Title

Political Strategy and Game Theory

Catalog Description

(Also listed as PSCI 2259) Campaigns and elections, legislative politics, political bargaining, and political organization. Applications of decision and game theory. Models of complete and perfect information, and games of incomplete information. No credit for students who have earned credit for 2259 or 8359. [3]

PSCI5262 - The Judicial Process

Title

The Judicial Process

Catalog Description

(Also listed as PSCI 2262) Functioning of the judiciary in the American political process; operation and powers of the courts; non-legal aspects of the judicial process; political role and effects of judicial decisions. No credit for students who have earned credit for 2262. [3]

PSCI5263 - Religion and Politics

Title

Religion and Politics

Catalog Description

(Also listed as PSCI 2263) Religion in democratic societies. Abortion, gay marriage, faith-based initiatives, and the Pledge of Allegiance. Historical works and contemporary contributions to debates. No credit for students who have earned credit for 2263. [3]

PSCI5267 - Voting and Political Representation in America

Title

Voting and Political Representation in America

Catalog Description

(Also listed as PSCI 2267) The history of voting rights and the efficacy of representation in the American political system. Political participation, voting rights, felony disenfranchisement, redistricting, and alternative electoral systems. No credit for students who have earned credit for 2267. [3]

PSCI5270 - Conducting Political Research

Title

Conducting Political Research

Catalog Description

(Also listed as PSCI 2270) Research sources, designs, and methods used by political scientists. Locating and accessing data, the logic of causal inferences, and basic data presentation and analysis. No credit for students who have earned credit for 2270. [3]

PSCI6211 - The European Union

Title

The European Union

Catalog Description

(Also listed as PSCI 3211) Political and economic integration. Origins, institutions, decision processes, policies, achievements, and prospects of the European integration movement. No credit for students who have earned credit for 3211. [3]

PSCI6217 - Latin American Politics

Title

Latin American Politics

Catalog Description

(Also listed as PSCI 3217) Cross-national analysis of political institutions, cultures, and processes of change in Latin America. No credit for students who have earned credit fro 3217. [3]

PSCI6228 - International Politics of Latin America

Title

International Politics of Latin America

Catalog Description

(Also listed as PSCI 3228) Examination of Latin America's role in the international and inter-American system. Special attention to the international response to revolutionary change in the area, and to the region's major actors and their changing relationship with the United States, with other major powers, and with other actors such as multinational corporations and international financial institutions. No credit for students who have earned credit for 3228. [3]

PSCI6229 - Strategy and International Politics

Title

Strategy and International Politics

Catalog Description

(Also listed as PSCI 3229) Strategic behavior and strategic choices arising from interactive decision making within the context of international politics. General principles of strategy. In-class experiments and game playing. No credit for students who have earned credit for 3229. [3]

PSCI6241 - American Public Opinion and Voting Behavior

Title

American Public Opinion and Voting Behavior

Catalog Description

(Also listed as PSCI 3241) The development and dynamics of political opinion and its effects on voting and public policy. Models of political behavior. No credit for students who have earned credit for 3241. [3]

PSCI6244 - The Legislative Process

Title

The Legislative Process

Catalog Description

(Also listed as PSCI 3244) Legislative organization and processes in the U.S. Congress. Attention to parties, elections, institutional structure, interest groups, and other branches of government as they relate to the legislative process. No credit for students who have earned credit for 3244. [3]

PSCI6247 - American Political Culture

Title

American Political Culture

Catalog Description

(Also listed as PSCI 3247) Content, historical development, and political consequences of the American public's deeply rooted values concerning how the political system ought to work and the ends it ought to serve. Attention to regional variation. No credit for students who have earned credit for 3247. [3]

PSCI6253 - Ethics and Public Policy

Title

Ethics and Public Policy

Catalog Description

(Also listed as PSCI 3253) Political and moral values in assessing policy-making, public policies and processes, and policy impacts. No credit for students who have earned credit for 3253. [3]

PSCI6260 - Introduction to American Law

Title

Introduction to American Law

Catalog Description

(Also listed as PSCI 3260) Law as a component of public policy and the political system; the elements and rationale of private law. No credit for students who have earned credit for 3260. [3]

PSCI6265 - Constitutional Law: Powers and Structures of Government

Title

Constitutional Law: Powers and Structures of Government

Catalog Description

(Also listed as PSCI 2265) U.S. constitutional system and fundamental principles of constitutional interpretation. Judicial development of principles of distribution and scope of governmental powers. Case method. No credit for students who have earned credit for 2265. [3]

PSCI6266 - Constitutional Law: Civil Liberties and Rights

Title

Constitutional Law: Civil Liberties and Rights

Catalog Description

(Also listed as PSCI 2266) Supreme Court's interpretation of the Bill of Rights and the Fourteenth Amendment. Case method. No credit for students who have earned credit for 2266. [3]

PSCI6891 - Topics in Contemporary Politics

Title

Topics in Contemporary Politics

Catalog Description

(Also listed as PSCI 3891) Political, governmental, and policy issues. May be repeated for credit when topics vary. No more than three hours may be counted toward the major. No credit for students who have earned credit for 3891. [1-3] (No AXLE credit)

PSCI7238 - Comparative Political Parties

Title

Comparative Political Parties

Catalog Description

(Also listed as PSCI 4238) Political parties and their role in the democratic process of modern liberal western democracies, focusing on party systems and party organizations. No credit for students who have earned credit for 4238. [3]

PSCI7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

[0-12]

PSCI8300 - Political Theory

Title

Political Theory

Catalog Description

Basic course in political theory. Surveys major texts in political theory, as well as central concepts and debates in the current literature. [3]

PSCI8301 - Human Rights

Title

Human Rights

Catalog Description

Provides a historical and contemporary context for reflection on the meaning of human rights. Focus on the theory of human rights. [3]

PSCI8302 - Democratic Theory

Title

Democratic Theory

Catalog Description

Growth of democratic theory in political philosophy and historical application. Connections between democratic theory and political institutions. [3]

PSCI8304 - Identity Politics: From Democracy to Conflict

Title

Identity Politics: From Democracy to Conflict

Catalog Description

Economic, social, and psychological theories of identity. Studies of ethnic, partisan, class and religious identities. Identity's impact on policy, patronage, collective action, and conflict. [3]

PSCI8305 - Feminist Social and Political Thought

Title

Feminist Social and Political Thought

Catalog Description

Feminist political theorists, both as critics of the history of political thought and as authors of contemporary social and political theory. [3]

PSCI8307 - The Politics of Gender

Title

The Politics of Gender

Catalog Description

Gender and politics. Women's political representation. Gender gaps in political behavior. Not open to students who have earned credit for 8370 section 01 offered spring 2018. [3]

PSCI8308 - Studies in Historical Political Thought

Title

Studies in Historical Political Thought

Catalog Description

Major texts and themes focusing on a single thinker, a school of thought, or a theme. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PSCI8309 - Research in Political Theory

Title

Research in Political Theory

Catalog Description

Supervised individual research and reading on selected topics in political theory. [3]

PSCI8310 - Studies in Comparative Analysis

Title

Studies in Comparative Analysis

Catalog Description

A survey of important literature and concepts in the field of comparative politics. [3]

PSCI8311 - Regional and International Dimensions of European Integration

Title

Regional and International Dimensions of European Integration

Catalog Description

Theories of political and economic integration; key actors in the European Union (including national and subnational governments, EU institutions, interest groups, and citizens); principal EU policy arenas and issues (including economic and monetary union, the single market, the common agricultural policy, regional policies, joint foreign and security policies). [3]

PSCI8314 - Comparative Political Parties

Title

Comparative Political Parties

Catalog Description

Origin of political parties, party organizations and ideologies, party systems, democratic representation. [3]

PSCI8315 - Research in Latin American Politics

Title

Research in Latin American Politics

Catalog Description

Recurring and novel topics in Latin American politics, such as the relation between economic growth and political regimes, the role of the Church, human rights, and U.S. foreign policy. Particular issues vary from semester to semester. [3]

PSCI8317 - The Political Economy of Development

Title

The Political Economy of Development

Catalog Description

The causes of international and national inequalities in the distribution of wealth. Factors related to economic development and tied to domestic and international income distribution, such as geography, natural resources, culture, democracy, and dependency. Examples from throughout the world, especially Asia and Latin America. [3]

PSCI8319 - Research in Comparative Analysis

Title

Research in Comparative Analysis

Catalog Description

Supervised individual research and reading on selected topics in comparative politics. [3]

PSCI8320 - Political Economy of Conflict

Title

Political Economy of Conflict

Catalog Description

Surveys research on interstate and intrastate conflict, political violence, and war. Theories of conflict and war, microfoundations and economic dimensions of political violence, and political and economic implications of conflict. [3]

PSCI8321 - International Conflict: Theories and Methods

Title

International Conflict: Theories and Methods

Catalog Description

Analysis of international conflict and war. [3]

PSCI8324 - Political Violence

Title

Political Violence

Catalog Description

Use and organization of violence against political actors. Violence against civilians, perpetrators of violence, riots, genocide, and effects of violence. Focus on civil conflict and violence. Not open to students who have completed 8370 section 09 offered fall 2018. [3]

PSCI8328 - Ideas and International Security

Title

Ideas and International Security

Catalog Description

Role of collectively-held meanings and shared ideas (identity, norms, beliefs, values) in national security and political behavior. Texts from political science, economics, philosophy, military strategy and history, and sociology. Real world applications include perceptions of war and war outcomes, security strategy formulation, and impact of identity on international relations. [3]

PSCI8329 - Research in International Politics

Title

Research in International Politics

Catalog Description

Supervised individual research and reading on selected topics in international politics. [3]

PSCI8330 - Studies in American Politics

Title

Studies in American Politics

Catalog Description

A survey of important literature and concepts in the field of American politics. [3]

PSCI8331 - Party Politics

Title

Party Politics

Catalog Description

Structure and functions of political parties; theories of partisan change, party formation, and party organization. Influence on rules and the behavior of politicians on party policies. [3]

PSCI8332 - Electoral Behavior and Public Opinion

Title

Electoral Behavior and Public Opinion

Catalog Description

Theories of voting and behavior of candidates in American elections; models of electoral change; the development and dynamics of public opinion. Effects of elections and public opinion on policy and governmental action. [3]

PSCI8333 - Political Culture, Opinion, and Behavior

Title

Political Culture, Opinion, and Behavior

Catalog Description

Politics as a contest of meaning; how issues, structures, and events are signified; the patterns and distributions of core beliefs as the foundation of individual and collective political behavior and institutional politics. [3]

PSCI8334 - Political Psychology

Title

Political Psychology

Catalog Description

The psychological roots of individual choice and judgment in politics. Cognitive and affective theories of political decision-making. Survey responses, political identity, and explicit or implicit attitudes. [3]

PSCI8335 - Politics of American Legislation

Title

Politics of American Legislation

Catalog Description

The structure and function of American legislative institutions, especially Congress, and their relation to the wider setting. [3]

PSCI8338 - Comparative Representations and Accountability

Title

Comparative Representations and Accountability

Catalog Description

Political representation and democratic accountability in advanced industrial societies and in developing democracies. [3]

PSCI8339 - Research in American Politics

Title

Research in American Politics

Catalog Description

Supervised individual research and reading on selected topics in American politics. [3]

PSCI8340 - Gender, Institutions, Behavior

Title

Gender, Institutions, Behavior

Catalog Description

Empirical research on gender, political institutions, elite and citizen behaviors. [3]

PSCI8342 - Race and Racism in American Politics

Title

Race and Racism in American Politics

Catalog Description

Political construction of race in the United States. Racial animus in policy making, group-identity politics, and racial connections to wealth distribution and political power. No credit for students who earned credit for 8370 section 1 in Spring 2017. [3]

PSCI8355 - Research Design**Title**

Research Design

Catalog Description

Introduction to Analysis of Tables, Measures of Association, OLS regression. Coverage of research design. Experimental design, survey research, elite interviewing, in-depth interviewing, aggregate data, field research, content analysis, case studies, and small-n analysis. Emphasis on concept formation and measurement. [3]

PSCI8356 - Statistics for Political Research I**Title**

Statistics for Political Research I

Catalog Description

Introduction to statistical analysis with applications in political science, statistical distributions, statistical inference, bivariate and multiple regression, logit, and probit. [3]

PSCI8357 - Statistics for Political Research II**Title**

Statistics for Political Research II

Catalog Description

Advanced topics in statistical analysis with research applications in maximum likelihood estimation, logit and probit analysis, simultaneous equation models, generalized least squares, and introductory time series concepts. [3]

PSCI8358 - Topics in Political Methodology**Title**

Topics in Political Methodology

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PSCI8359 - Introduction to Formal Theory and Modeling**Title**

Introduction to Formal Theory and Modeling

Catalog Description

Social choice and game theory. Instability and disequilibria of group decisions under different decision-making rules. Theoretical model building as a way to generate hypotheses. Rules in decision making, manipulability of outcomes, bargaining strategies and the evolution of cooperation. [3]

PSCI8360 - Topics in Formal Theory and Modeling**Title**

Topics in Formal Theory and Modeling

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PSCI8361 - Writing Proposals and Securing Grants in the Empirical Social Sciences

Title

Writing Proposals and Securing Grants in the Empirical Social Sciences

Catalog Description

[3]

PSCI8362 - Data Collection Methods

Title

Data Collection Methods

Catalog Description

Data collection methods to build theory and investigate theory empirically. Creating a pre-analysis plan. Practical skills to undertake surveys, focus groups, semi-structured interviews, archival or web data collection, and behavioral tasks. Role of experimental intervention. Ethics on working with human subjects. Access and collaboration with NGOs and policymakers. Logistics such as timelines, budgets, grant proposals, data management, and incentivizing or managing employees. Repeat credit for 370-03 offered fall 2013. [3]

PSCI8363 - Survey Research Methods

Title

Survey Research Methods

Catalog Description

Questionnaire design, sampling, data analysis, longitudinal surveys, and experimental techniques. No credit for students who have earned credit for 8370 section 08 offered spring 2017. [3]

PSCI8364 - Formal Political Theory II: Advanced Modeling and Applications

Title

Formal Political Theory II: Advanced Modeling and Applications

Catalog Description

Advanced game theory and formal modeling with applications in political science. Not open to students who have earned credit for 8360 offered spring 2019. [3]

PSCI8365 - Topics in Network Analysis

Title

Topics in Network Analysis

Catalog Description

Methods for studying role of social networks in political behavior. Applications to international relations, comparative politics, and American politics. Overview includes survey methods, statistical methodology, experiments, agent-based models, and game theory. Prerequisite: 8356 and 8359. [3]

PSCI8370 - Topics in Political Science

Title

Topics in Political Science

Catalog Description

An inquiry into selected topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PSCI8398 - Dissertation Seminar

Title

Dissertation Seminar

Catalog Description

Focus on developing the theoretical, empirical, and normative aspects of each student's dissertation research. [3]

PSCI8901 - Independent Study

Title

Independent Study

Catalog Description

[Variable credit: 1-3 each semester]

PSCI8902 - Independent Study

Title

Independent Study

Catalog Description

[Variable credit: 1-3 each semester]

PSCI8999 - Non-candidate Research

Title

Non-candidate Research

Catalog Description

Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

PSCI9995 - Half-time Ph.D. Dissertation Research

Title

Half-time Ph.D. Dissertation Research

Catalog Description

For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

PSCI9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Portuguese

PORT5203 - Intermediate Portuguese**Title**

Intermediate Portuguese

Catalog Description

(Also listed as PORT 2203) Review of Portuguese grammar with emphasis on conversation, composition, and reading of modern Portuguese literary texts. No credit for students who have earned credit for a higher level Portuguese language course. No credit for students who have earned credit for 2203. [3]

PORT5205 - Portuguese and Global Health**Title**

Portuguese and Global Health

Catalog Description

Speaking, reading, and writing; advanced grammar. Health in Brazil and Lusophone Africa, through literary texts, films, articles, and public health publications. Virtual language-learning partnerships with medical students in Lusophone Africa. Prerequisite: 5203. [3]

PORT5301 - Portuguese Composition and Conversation**Title**

Portuguese Composition and Conversation

Catalog Description

(Also listed as PORT 3301) Expository writing and development of speaking skills. Emphasis on pronunciation, vocabulary, and grammar. No credit for students who have earned credit for 3301. [3]

PORT5302 - Brazilian Pop Culture**Title**

Brazilian Pop Culture

Catalog Description

(Also listed as PORT 3302) Development of written and oral communication skills through the study of Brazilian popular culture. Movies, music, television, and magazines. No credit for students who have earned credit for 3302. [3]

PORT5303 - Introduction to Luso-Brazilian Literature**Title**

Introduction to Luso-Brazilian Literature

Catalog Description

(Also listed as PORT 3303) Critical readings and methods of literary analysis. Masterpieces from Portugal and Brazil from all genres in several periods. Conversation and writing. No credit for students who have earned credit for 3303. [3]

PORT5350 - Brazilian Culture through Native Material**Title**

Brazilian Culture through Native Material

Catalog Description

(Also listed as PORT 4350) Differences between spoken and written Portuguese in Brazil. Modern culture, including popular music, film, politics, family life, and sports. No credit for students who have earned credit for 4350. [3]

PORT5420 - Brazilian Literature through the Nineteenth Century

Title

Brazilian Literature through the Nineteenth Century

Catalog Description

(Also listed as PORT 4420) Main literary trends, principal writers and works of Brazilian literature, from colonial beginnings through the nineteenth century. Study of the works of Gregório de Matos, Gonçalves Dias, Alencar, Machado de Assis, and Euclides da Cunha. No credit for students who have earned credit for 4420. [3]

PORT5425 - Modern Brazilian Literature

Title

Modern Brazilian Literature

Catalog Description

(Also listed as PORT 4425) Brazilian literature from the Semana de Arte Moderna to the present. Modernist and neo-Modernist movements. No credit for students who have earned credit for 4425. [3]

PORT5892 - Special Topics in Portuguese Language, Literature, or Civilization

Title

Special Topics in Portuguese Language, Literature, or Civilization

Catalog Description

(Also listed as PORT 3892) May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. No credit for students who have earned credit for 3892. [3] (No AXLE credit)

PORT5900 - Brazilian Civilization through English Language Material

Title

Brazilian Civilization through English Language Material

Catalog Description

(Also listed as PORT 2900) The cultural heritage of Brazil from its earliest days to the present. National identity, race relations, and Brazil's emergence as a major force in the Americas and beyond. Taught in English. No credit for graduate students in Spanish and Portuguese. No credit for students who have earned credit for 2900. [3]

PORT6010 - Literary Analysis and Theory

Title

Literary Analysis and Theory

Catalog Description

(Also listed as Spanish 6010) Methods of literary analysis for the teaching of literature. The systematic application of contemporary theories - structuralist and poststructuralist - in the analysis of poetry and narrative. [3]

PORT6020 - Ibero-Romance Philology

Title

Ibero-Romance Philology

Catalog Description

(Also listed as Spanish 6020) Study of the evolution of the languages and dialects of the Iberian Peninsula. Analysis of selected linguistic developments and readings from medieval texts. [3]

PORT6030 - Foreign Language Learning and Teaching

Title

Foreign Language Learning and Teaching

Catalog Description

(Also listed as Spanish 6030) Principles and practices of teaching a second language with concentration on recent interactive and communicative models of foreign language instruction. Classroom observations, journal writing, development of materials, and a small action research project are expected. Required of all entering teaching assistants. [3]

PORT7050 - Introduction to Latin American Colonial Studies

Title

Introduction to Latin American Colonial Studies

Catalog Description

(Also listed as Spanish 7050) Provides a panoramic introduction to the canonical works of the colonial period from "discovery" to "independence," as well as an overview of the theoretical debates in colonial studies within the Latin American context. Topics include the construction and reshaping of identities and otherness through various stages of Latin American cultural history, the emergence of what has been called the American consciousness during the "New World Baroque," and the discourses of "independence" and early nation building. [3]

PORT7070 - Spanish American and Brazilian Literature I

Title

Spanish American and Brazilian Literature I

Catalog Description

(Also listed as Spanish 7070) Literature in a comparative perspective: from the conquests to the end of the nineteenth century. Authors may include Sor Juana, Matos, Alencar, Assis, and Carrasquilla. [3]

PORT7071 - Spanish American and Brazilian Literature II

Title

Spanish American and Brazilian Literature II

Catalog Description

Literature in a comparative perspective: twentieth century to the present. Texts may include: Os Sertões, La Guerra del Fin del Mundo, Ficciones, Perto do Coração Selvagem, and Água Viva. [3]

PORT8200 - Seminar: Studies in Colonial Literature

Title

Seminar: Studies in Colonial Literature

Catalog Description

(Also listed as Spanish 8200) May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PORT8210 - Seminar: Hispanic American Essay

Title

Seminar: Hispanic American Essay

Catalog Description

(Also listed as Spanish 8210) May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PORT8400 - Seminar: Studies in Inter-American Literature

Title

Seminar: Studies in Inter-American Literature

Catalog Description

(Also listed as Spanish 8400) Comparative approaches to literary texts from such New World cultures as Brazil, Spanish America, the United States, the Caribbean, and Canada (both its French and English traditions). Fluency in Spanish and/or Portuguese required; reading competency in English and French. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PORT8999 - Non-candidate Research

Title

Non-candidate Research

Catalog Description

Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

PORT9300 - Comparative Methodology

Title

Comparative Methodology

Catalog Description

(Also listed as Spanish 9300) Comparative methodology of the literatures of the Spanish and Portuguese speaking world; emphasis on issues of theme, genre, period and movement, translation, and the relationship of literary scholarship to other humanistic endeavors, such as music, film, philosophy, painting, and the plastic arts. [3]

PORT9520 - Seminar: Studies in Contemporary Literature of the Portuguese-Speaking World

Title

Seminar: Studies in Contemporary Literature of the Portuguese-Speaking World

Catalog Description

Variable topics to be announced. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PORT9660 - Special Studies in Portuguese Literature

Title

Special Studies in Portuguese Literature

Catalog Description

[Variable credit: 1-6]

PORT9670 - Special Studies in Brazilian Literature**Title**

Special Studies in Brazilian Literature

Catalog Description

May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [1-6]

PORT9995 - Half-time Ph.D. Dissertation Research**Title**

Half-time Ph.D. Dissertation Research

Catalog Description

For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

PORT9999 - Ph.D. Dissertation Research**Title**

Ph.D. Dissertation Research

Catalog Description

[0-12]

Psychology (AS)

PSY5780 - The Visual System**Title**

The Visual System

Catalog Description

(Also listed as Cell and Developmental Biology 8347 and Neuroscience 8347) An interdisciplinary approach to how humans see and interpret their visual environment. Topics include the structure of the eye and brain (including optics), the physiology of individual cells and groups of cells, machine vision and models of visual function, visual attention, and mechanisms of complex visual perception. Lectures by faculty from Psychology, Engineering, and Cell and Developmental Biology. Graduate students attend one hour discussion section per week, in addition to lecture, and turn in a more extensive paper than undergraduates. [3]

PSY6104 - Quantitative Methods and Experimental Design**Title**

Quantitative Methods and Experimental Design

Catalog Description

Principles and methods for the design and analysis of experiments and for the investigation of individual differences. Principles of experimental design and descriptive and inferential statistics. [3]

PSY6218 - Computational Cognitive Modeling

Title

Computational Cognitive Modeling

Catalog Description

Computational modeling of human perception and cognition. Model implementation, parameter estimation, statistical model evaluation; developing and testing new models; stochastic processes, simulation and Monte Carlo methods, high-performance computing. [3]

PSY6219 - Scientific Computing for Psychological and Brain Science

Title

Scientific Computing for Psychological and Brain Science

Catalog Description

Computer programming, scientific computing methods, and high performance computing applied to psychological and brain sciences problems, such as experimental control, data analysis and visualization, image and signal processing, optimization, and simulation. Familiarity with computer programming is assumed. Not open to students who have completed 8219. [3]

PSY6220 - Bayesian Modeling with Python

Title

Bayesian Modeling with Python

Catalog Description

Statistical and cognitive modeling. Models of memory, psychophysics, categorization, and decision-making. Probabilistic programming in Python. Bayesian parameter estimation and model comparison. [3]

PSY6300 - Research Seminar

Title

Research Seminar

Catalog Description

[Variable credit: 1-4]

PSY6310 - Advanced General Psychology

Title

Advanced General Psychology

Catalog Description

Physiological psychology, perception and sensation, learning, complex processes, developmental, personality, social psychology, and psychopathology. Participation in various sections determined by each student's background and career interests. [3]

PSY6370 - Independent Study

Title

Independent Study

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. [1-6]

PSY6775 - Models of Human Memory

Title

Models of Human Memory

Catalog Description

Mathematical and computational models of the cognitive processes underlying human memory. Attribute-based models, instance theories, neural network models, retrieved-context models, executive function and working memory models. Methods of fitting models to empirical data. [3]

PSY7031 - Advanced Investigational Techniques

Title

Advanced Investigational Techniques

Catalog Description

A non-thesis research project. [0-6]

PSY7032 - Advanced Investigational Techniques

Title

Advanced Investigational Techniques

Catalog Description

A non-thesis research project. [0-6]

PSY7033 - Second-Year Research

Title

Second-Year Research

Catalog Description

Second-year research project in psychological sciences. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 12 credits per semester of enrollment. [0-12]

PSY7034 - Advanced Research in Psychological Sciences

Title

Advanced Research in Psychological Sciences

Catalog Description

Advanced research project in psychological sciences leading to the dissertation proposal. May be repeated for credit. [0-12]

PSY7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

[0-12]

PSY8120 - Categorical Data Analysis

Title

Categorical Data Analysis

Catalog Description

Analysis of categorical data. Statistical analysis of binary, nominal, ordinal, and count data from the perspective of generalized linear models. Logistic and Poisson regression models. Population-averaged and subject-specific approaches to repeated measures. Prerequisite: 6104, 8310, or equivalents. [3]

PSY8216 - Brain Imaging Methods

Title

Brain Imaging Methods

Catalog Description

Principles and methods used in human neuroimaging, with emphasis on functional magnetic resonance imaging (fMRI). [3]

PSY8218 - Computational Modeling

Title

Computational Modeling

Catalog Description

Developing and testing computational models of human cognition and brain function. How to implement models, recognize good modeling, fit models to data, evaluate models, contrast competing models, develop and test new models. Discussion of Monte Carlo simulations, statistical numeric methods, and high-performance computing. [3]

PSY8305 - Linear and Nonlinear Mixed Effects Models

Title

Linear and Nonlinear Mixed Effects Models

Catalog Description

The analysis of data from hierarchical and multilevel designs. Theory and computational methods, specification and testing of fixed effects, random effects and residuals, assessment of fit, graphical examination, applications to repeated measures data, and missing data models. Prerequisite: 6401 or equivalent. [3]

PSY8310 - Research Methods in Clinical Psychology

Title

Research Methods in Clinical Psychology

Catalog Description

Major methodological and quantitative issues in clinical psychology, including statistical significance testing and its alternatives; threats to internal and external validity; psychometric theory; quantitative approaches to classification; behavioral, genetic, and psychophysiological methods; animal models; analysis of change, mediation, and moderation. [3]

PSY8312 - Psychological Assessment

Title

Psychological Assessment

Catalog Description

Major techniques of psychological assessment, with an emphasis on the rationale, administration, and interpretation of measures assessing personality and psychopathology. [3]

PSY8315 - Theories of Psychotherapy

Title

Theories of Psychotherapy

Catalog Description

Advanced study on the major principles, concepts, techniques, and issues relevant to the theory and practice of psychotherapy. Experience in supervised clinical settings or observation of clinical sessions is provided to further understanding of psychotherapeutic processes. [3]

PSY8323 - Practicum in Psychological Assessment

Title

Practicum in Psychological Assessment

Catalog Description

[Variable credit: 1-5 each semester]

PSY8324 - Practicum in Psychotherapy

Title

Practicum in Psychotherapy

Catalog Description

[Variable credit: 1-5 each semester]

PSY8325 - Advanced Standing in Psychological Assessment

Title

Advanced Standing in Psychological Assessment

Catalog Description

[Variable credit: 1-5 each semester]

PSY8326 - Advanced Standing in Psychotherapy

Title

Advanced Standing in Psychotherapy

Catalog Description

[Variable credit: 1-5 each semester]

PSY8352 - Seminar: Clinical Psychology

Title

Seminar: Clinical Psychology

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PSY8353 - Professional Ethics in Clinical Psychology

Title

Professional Ethics in Clinical Psychology

Catalog Description

Issues and practical applications of ethical principles in clinical and research settings. Cultural context for clinical and ethical issues. [3]

PSY8354 - Clinical Neuropsychology

Title

Clinical Neuropsychology

Catalog Description

Cognitive and behavioral disorders associated with brain injury and disease. Methods of neuropsychological assessment. Prerequisite: PSY-GS 8300 or permission of instructor. [3]

PSY8355 - Diversity and Differentness

Title

Diversity and Differentness

Catalog Description

Theory, issues, and practical application of cultural sensitivity and competency in research and clinical settings. [1-3]

PSY8360 - Seminar in Clinical Science

Title

Seminar in Clinical Science

Catalog Description

Integration of the subareas of clinical science. Includes history and systems of psychology as related to clinical science, ethical issues, and problems encountered in professional psychology. May be repeated for credit more than once if there is no duplication in topic. Students may earn only up to 2 credits per semester of enrollment. [0-2]

PSY8398 - Internship

Title

Internship

Catalog Description

[0]

PSY8505 - Judgment and Decision-Making

Title

Judgment and Decision-Making

Catalog Description

Historical origins and development of human judgment and decision-making as a specialty within cognitive psychology. Expected utility theory; heuristics and biases; decision-making in clinical psychology; neurobiology of decision-making; neuroeconomics. No credit for students who have earned credit for 8551 section 01 in spring 2016. [3]

PSY8507 - Computational Neuroscience of Human Vision

Title

Computational Neuroscience of Human Vision

Catalog Description

Neurocomputational modeling and deep learning have transformed our understanding of how the brain encodes sensory information to infer the presence of surfaces, shapes and objects in complex scenes. This seminar will discuss key literature, computational models and deep neural networks, and provide computational assignments for students to gain experience. [3]

PSY8543 - Seminar: Perception

Title

Seminar: Perception

Catalog Description

In-depth discussion and exploration of a specialized topic in Perception. The topic can cover any and all aspects of perception, from the molecular neurobiology of retinal processing to the phenomenology of consciousness, and can emphasize particular methodological approaches (e.g. single-cell recording, neuroimaging). May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PSY8551 - Seminar: Cognitive Psychology

Title

Seminar: Cognitive Psychology

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PSY8557 - Seminar in Cognitive Science

Title

Seminar in Cognitive Science

Catalog Description

Integration of the subareas of cognitive science. May be repeated for credit more than once if there is no duplication in topic. Students may earn only up to 2 credits per semester of enrollment. [0-2]

PSY8744 - Seminar: Neuroscience

Title

Seminar: Neuroscience

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PSY8750 - Scientific Writing in Psychology and Neuroscience

Title

Scientific Writing in Psychology and Neuroscience

Catalog Description

Journal articles, grants, scientific papers, press releases, and dissertations. Revising and editing. [3]

PSY8758 - Seminar in Neuroscience

Title

Seminar in Neuroscience

Catalog Description

Integration of the subareas of neuroscience. May be repeated for credit more than once if there is no duplication in topic. Students may earn only up to 2 credits per semester of enrollment. [0-2]

PSY8901 - Teaching Practicum

Title

Teaching Practicum

Catalog Description

Discussion of teaching practices in weekly meeting with instructor. Application of teaching strategies through hands-on experience with undergraduates. [0-1]

PSY8906 - Evolutionary Psychology

Title

Evolutionary Psychology

Catalog Description

Interdisciplinary analysis of the origins of mind, with particular emphasis on the mind/brain as a product of biological evolution. [3]

PSY8942 - Seminar: Social

Title

Seminar: Social

Catalog Description

In-depth investigation of a specialized topic in Social Psychology. The topic might cover any and all aspects of social psychology, emphasize intra-personal and/or extra-personal perspectives, and focus on theoretical and/or experimental approaches. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PSY8999 - Non-candidate Research

Title

Non-candidate Research

Catalog Description

Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

PSY9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Psychology and Human Development (GS)

PSY-GS7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

Open only to candidates for the Master of Science degree engaged in thesis research and writing. Consent of major professor required. [Variable credit: 1-6]

PSY-GS8100 - Behavioral Pediatrics and Child Health Psychology

Title

Behavioral Pediatrics and Child Health Psychology

Catalog Description

Behavioral pediatrics and child health psychology for advanced predoctoral and postdoctoral trainees. Topics include the scope and definition of behavioral pediatrics, measurement of child behavior, children's health beliefs and understanding of illness, theories of psychosomatic illness, immunologic and endocrinologic aspects of stress, compliance, psychological effects of physical illness, families' responses to stress, and psychological intervention strategies. [3]

PSY-GS8120 - Psychological Intervention with Children

Title

Psychological Intervention with Children

Catalog Description

Various intervention approaches with children, including parent training, behavior therapy, group therapy, psychopharmacological intervention, individual psychotherapy, cognitive behavioral intervention, psychoanalytic play therapy, and residential treatment. [3]

PSY-GS8200 - Psychopathology

Title

Psychopathology

Catalog Description

Focuses on descriptive, epidemiological, and casual psychopathology research, with an emphasis on developmental and cultural influences. The course goal is to increase students' ability to think creatively and critically about psychopathology research and to conduct their own psychopathology-related research. Prerequisite: Consent of instructor [3]

PSY-GS8300 - Psychological Assessment

Title

Psychological Assessment

Catalog Description

A general introduction to clinical assessment, with a particular emphasis on children. The major purpose is to familiarize students with the theoretical issues and psychometric properties of several different methods of assessment including objective and projective personality measures, behavior checklists, behavioral observation, and clinical interviews. Required before taking practica. Prerequisite: consent of instructor. [3]

PSY-GS8350 - Individual Differences

Title

Individual Differences

Catalog Description

Focuses on traditional concepts and findings in the area of individual differences broadly defined. The psychological content will primarily involve abilities, interests, and personality; methodological issues encountered in assessing these attributes will be stressed throughout; and particular attention will be devoted to how these concepts can enhance research programs in both applied and theoretical areas. The specific variables discussed within each domain will be restricted to those that have empirically "panned out" (viz., variables that are reliable and related to meaningful behaviors and outcomes that psychologists are interested in predicting and better understanding), rather than theoretical constructs and measures whose external validity is unknown. [3]

PSY-GS8360 - Human Cognition

Title

Human Cognition

Catalog Description

Current research and theory in cognitive psychology. Emphasis on memory, perception, and language. Some applications of cognitive theories are explored. [3]

PSY-GS8400 - Developmental Psychology

Title

Developmental Psychology

Catalog Description

Central issues, theories, and methods. [3]

PSY-GS8410 - Advanced Seminar in Educational Psychology
Title

Advanced Seminar in Educational Psychology

Catalog Description

May be repeated with change of topic. [Variable credit: 1-3]

PSY-GS8420 - Advanced Seminar in Clinical Psychology
Title

Advanced Seminar in Clinical Psychology

Catalog Description

May be repeated with change of topic. [3]

PSY-GS8430 - Advanced Seminar: Cognitive Studies
Title

Advanced Seminar: Cognitive Studies

Catalog Description

Special topics in cognitive studies. May be repeated with change of topic. [3]

PSY-GS8440 - Seminar in Behavioral Biology
Title

Seminar in Behavioral Biology

Catalog Description

Selected topics in behavioral biology-e.g., ethology. Content varies according to student needs and interests. May be repeated. [3]

PSY-GS8450 - Seminar in Cognitive Development
Title

Seminar in Cognitive Development

Catalog Description

Major theoretical and conceptual issues in cognitive development. Emphasis in current research topics like memory development, reading, conceptual development, semantic development, problem solving, and reasoning. Recommended background: 352P and/or 8400 [3]

PSY-GS8460 - Advanced Seminar in Developmental Psychology
Title

Advanced Seminar in Developmental Psychology

Catalog Description

May be repeated with a change of topic. [3]

PSY-GS8470 - Cognitive Science to the Classroom

Title

Cognitive Science to the Classroom

Catalog Description

This course focuses on the interplay between basic research in cognitive science and educational innovation. There is a major push to design learning environments that are based on cognitive science research and theory and to rigorously evaluate these environments. How do we go about doing this? We will use a case study approach of successful educational innovations, the basic research behind them, and their impact on basic research in turn. This will allow us to develop a framework for developing and evaluating educational innovations. [3]

PSY-GS8480 - Educational Neuroscience

Title

Educational Neuroscience

Catalog Description

Seminar that examines the interdisciplinary intersection between cognitive neuroscience investigations of the development of brain structure and function and studies of cognitive development relevant to education. Topics including the emerging theoretical and empirical contribution of neuroscience approaches to understanding the typical and atypical development of domain specific academic skills such as reading and mathematics, as well as the neural basis of domain general processes crucial for educational success such as working memory, motivation, attention, and social cognition. [3]

PSY-GS8500 - Special Topics in Psychology

Title

Special Topics in Psychology

Catalog Description

May be repeated with change of topic. [1-3]

PSY-GS8550 - Neuroscience of Cognition & Behavior

Title

Neuroscience of Cognition & Behavior

Catalog Description

The purpose of this course is to introduce students to cognitive and behavioral neuroscience. Through this course students will develop an understanding of brain function and how it supports cognition and behavior, as well as the maturational and environmental factors that influence brain development. The course will focus on functional magnetic resonance imaging (fMRI) as the principal neuroimaging method and address issues such as where does fMRI signal come from and how can we interpret it in the context of cognition and behavior. A key goal of the course is for students to become more informed consumers of neuroscience research.[3]

PSY-GS8600 - Seminar in Social and Personality Development

Title

Seminar in Social and Personality Development

Catalog Description

Development of personality and social processes, with emphasis on methods of inquiry. Trait theory, socialization processes, origins of gender differences, cultural differences in childbearing practices, experimental and observational methods in developmental research, and development of motivational systems. [3]

PSY-GS8690 - Cognitive Science of Learning and Development Research Forum
Title

Cognitive Science of Learning and Development Research Forum

Catalog Description

The Cognitive Science of Learning and Development Research Forum serves as a venue for delivering and hosting research presentations relevant to cognitive science, learning and development hosted by graduate students and faculty within the Psychological Sciences program, as well as researchers from other departments and Universities. May be repeated for credit. This is a 1 credit year-long course. Students register for 0 credit hours in the Fall and 1 credit hour in the Spring.

PSY-GS8751 - Exploratory Data Analysis
Title

Exploratory Data Analysis

Catalog Description

Exploratory Data Analysis (EDA) is a modern statistical paradigm developed by John Tukey in the 1970's. EDA emphasizes fitting mathematical models to data as preliminary to the traditional hypothesis testing approach used in confirmatory analyses. Hallmarks of EDA include graphical methods, residual analysis, robust/resistant statistical methods, and data re-expression/transformation. But EDA is actually a whole philosophy of data analysis, and includes treatment of ethics and propriety in research. In this class we study EDA, as it has developed over the past four decades. We also do a great deal of EDA. An "EDA Portfolio" is developed by each student of different data analysis and graphical analysis projects. Included within the course is treatment of "big data" and data mining approaches, and also discussion of the current "replication crisis" and its emphasis on Questionable Research Practices (QRP's); EDA provides a certain type of prescriptive treatment of QRP's. Prerequisites: PSY-GS 8861 and PSY-GS 8870 or equivalent. [3]

PSY-GS8810 - Methods of Psychological Research
Title

Methods of Psychological Research

Catalog Description

Methods for collecting and analyzing empirical information about behavior. Serves as a base upon which to build research competence through more advanced courses and research apprenticeships. [3]

PSY-GS8815 - Advanced Research Methods in Developmental Psychology
Title

Advanced Research Methods in Developmental Psychology

Catalog Description

Major empirical approaches to the study of development. Emphasis on human behavioral development, although elements from comparative psychology and biomedical sciences included. [3] (Offered by independent study)

PSY-GS8820 - Program Evaluation
Title

Program Evaluation

Catalog Description

The evaluation of social programs. The design of evaluations to produce both theoretically meaningful and practical information about the program and its effectiveness. Such topics as needs assessment, monitoring, impact assessment, and cost/effectiveness evaluations. Covers programs in education, health, and human services. [3]

PSY-GS8850 - Advanced Seminar in Measurement, Statistics, and Evaluation

Title

Advanced Seminar in Measurement, Statistics, and Evaluation

Catalog Description

Special topics in measurement, statistics, and program evaluation. May be repeated with change of topic. Prerequisite: consent of instructor. [3]

PSY-GS8855 - Quantitative Methods Forum

Title

Quantitative Methods Forum

Catalog Description

The Forum serves as a venue for delivering and hosting methodological research presentations by graduate students and faculty within the Quantitative Methods program, as well as researchers from other departments. Periodically, the Forum will also provide workshops on methodological topics, feature panels on professional development topics, and host invited talks by visiting scholars. May be repeated for credit. [0-1]

PSY-GS8858 - Introduction to Statistical Inference

Title

Introduction to Statistical Inference

Catalog Description

Introduction to statistical methods for graduate students in education and psychology with minimal undergraduate statistical background. The course will present descriptive and inferential methods for assessing distributional shape, central tendency, variability, and association. An introduction to statistical computing with popular general purpose statistical computer programs will be provided. [3]

PSY-GS8861 - Statistical Inference

Title

Statistical Inference

Catalog Description

Introductory course designed to familiarize doctoral students with the principles and procedures of statistical inference and to prepare them for more advanced work in research design and analysis. [3]

PSY-GS8864 - Experimental Design

Title

Experimental Design

Catalog Description

Application of statistical concepts and inferential techniques to the design and analysis of experiments in the behavioral sciences. Advanced procedures for analysis of variance and analysis of covariance. Prerequisite: 8861 or equivalent. [3]

PSY-GS8867 - Multivariate Statistics

Title

Multivariate Statistics

Catalog Description

Psychological measurement theory, along with correlational and regression analysis techniques essential to the development of that theory. Prerequisite: 8861 or equivalent. [3]

PSY-GS8870 - Correlation and Regression

Title

Correlation and Regression

Catalog Description

Fundamental concepts in bivariate and multiple regression and correlation techniques. Emphasizes the theory and assumptions underlying OLS and logistic regression, computational procedures, and interpretation of results. Specific applications include: (1) coverage of the full range of correlation indices; (2) a range of regression strategies (e.g., reduced-form regression, path analysis, ordered and unordered step-wise inclusion); (3) statistical power; (4) regression diagnostics; (5) nonlinear regression and linearizing transformations; (6) testing interactions; and (7) conditions for causal analysis and analysis of change. [3]

PSY-GS8873 - Structural Equation Modeling

Title

Structural Equation Modeling

Catalog Description

This course introduces the basic principles of path analysis, confirmatory factor analysis, and latent variable structural modeling, which constitute a powerful set of statistical tools for examining correlational, observational, and even experimental data in the social sciences. Computer techniques for conducting these analyses will also be taught: the LISREL program in particular, but AMOS will also be introduced. [3]

PSY-GS8876 - Psychological Measurement

Title

Psychological Measurement

Catalog Description

Fundamental concepts, methods, and principles of psychological measurement. Particular attention will be devoted to reliability and validity issues underlying psychometric theory, and how psychometric theory relates to the assessment of individual differences or human variation more generally. Topics will include multiple regression, factor analysis, and item response theory. [3]

PSY-GS8878 - Statistical Consulting

Title

Statistical Consulting

Catalog Description

The objective of this course is to prepare students for providing statistical consulting in collaborative applied research settings. Statistical consulting skills are increasingly vital for research and analytic jobs in industry, education, medicine, and academia. Yet a variety of data analysis experiences beyond formal methodological coursework are needed to hone statistical consulting skills. Students work in a mentored environment on statistical and theoretical problems confronted by applied researchers in real data analysis settings within the social sciences and education. Students work in small groups or individually on consulting projects and also have opportunities for providing constructive feedback on others' projects. This course will synthesize and further develop students' understanding of how to translate subject-matter questions into statistical language, select an appropriate statistical method, research and develop workable solutions to new problems, write an analysis plan, and effectively communicate results through oral and written reports. This course will not only focus on the content of statistical consulting but also on the process - covering how to communicate effectively, professionally, and ethically with clients about expectations, responsibilities, hypotheses, analyses, and results. Permission of Instructor required. [3]

PSY-GS8879 - Factor Analysis

Title

Factor Analysis

Catalog Description

This course covers primarily Exploratory Factor Analysis (EFA), which is extensively used in psychology, education, medicine, and management. The course covers the theory behind factor analysis, hands-on application to data, exposure to uses of factor analysis in the applied literature, and instruction in popular EFA software. Key topics include model specification, fit and evaluation, rotation methods, questionnaire development, sample size and power issues, and extensions to confirmatory factor models. [3]

PSY-GS8880 - Introduction to Item Response Theory

Title

Introduction to Item Response Theory

Catalog Description

In this course, students are introduced to the basic concepts of educational and psychological measurement, classical test theory (CTT), and item response theory (IRT). These concepts will be taught with the practice by illustrating the construction of instruments using the 'Four Building Blocks' approach (Wilson, 2005) and investigating their measurement properties (e.g., validity and reliability). This class will present both the 'how to' and the 'why' of IRT. The primary objective of the course is to sharpen the skill, sophistication, and intuition of the student in the interpretation of educational and psychological test data, and in the construction and use of tests as instruments of educational and psychological theory and as tools in the practical problems of selection, evaluation, and guidance in the light of IRT. [3]

PSY-GS8881 - Item Response Theory II

Title

Item Response Theory II

Catalog Description

Item Response Theory (IRT) II covers IRT models commonly used in education and psychology and their parameter estimation techniques using currently available software. This course will focus on developing a conceptual understanding of the mathematical concepts underlying the IRT models in so far as this is necessary for appropriate use of IRT models. In addition, the class covers topics in applications of IRT including equating/linking (as preliminary procedures for complex IRT models) and differential item functioning (DIF) analysis. [3]

PSY-GS8882 - Multilevel Modeling

Title

Multilevel Modeling

Catalog Description

This course covers multilevel (or hierarchical linear) modeling, which is used extensively in psychology, education, sociology, and medical research. The course covers the theory behind multilevel modeling, hands-on application to data, exposure to uses of multilevel modeling in the applied literature, and instruction in popular multilevel modeling software. Key topics include random effects ANOVA, random slopes, cross-level interactions, multivariate and multi-group models, centering, growth models, discrete outcomes, and dealing with cross-classified data. [3]

PSY-GS8885 - Applied Latent Class and Mixture Modeling
Title

Applied Latent Class and Mixture Modeling

Catalog Description

Often social science and educational researchers hypothesize that there are unobserved groups--or latent classes--of persons who show different behavioral patterns, or different patterns of change over time. This course covers mixture modeling, a statistical approach that allows assessment of the number and size of classes, as well as class homogeneity or heterogeneity. Longitudinal mixture models are also covered, which allow classes to transition between states at different rates and/or have different functional forms of change. [3]

PSY-GS8888 - Latent Growth Curve Modeling
Title

Latent Growth Curve Modeling

Catalog Description

The analysis of longitudinal data (repeated measurements on the same people over time) is central for evaluating many theories in social science and educational research. This applied course will focus on one flexible and powerful approach for analyzing within-individual change over time, and between-individual differences in change: the latent growth curve model. Emphasis will be placed on attaining a solid understanding of the statistical model, applications to real data, and interpretation of results. [3]

PSY-GS8999 - Non-Candidate Research
Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

PSY-GS9950 - Clinical Applications and Practicum I
Title

Clinical Applications and Practicum I

Catalog Description

This two-semester sequence is required for doctoral students in clinical psychology. The sequence involves applications of theoretical principles of behavior change in clinical settings. Didactic meetings will integrate the empirical and theoretical literatures with problems in clinical application. Students will participate in clinical practice (assessment and intervention) under program faculty supervision. Prerequisite: psychopathology, clinical assessment, and intervention, as well as consent of instructor. [0-3]

PSY-GS9951 - Clinical Applications and Practicum II
Title

Clinical Applications and Practicum II

Catalog Description

This two-semester sequence is required for doctoral students in clinical psychology. The sequence involves advanced application of theoretical principles of behavior change in clinical settings. Students will participate in clinical practice (assessment and intervention) under the joint supervision of program faculty and adjunct faculty in community settings. Prerequisite: 9950 [1-3]

PSY-GS9960 - Readings and Research in Psychology

Title

Readings and Research in Psychology

Catalog Description

Individual programs of reading or empirical research in psychology. Prerequisite: consent of faculty supervisor. May be repeated. [Variable credit: 1-3]

PSY-GS9980 - Clinical Psychology Internship

Title

Clinical Psychology Internship

Catalog Description

Required of all Ph.D. students in the clinical program. Specialty rotations, generalized training, didactic instruction, and supervised research are offered during one full year of clinical experience in an academic clinical setting or similar internship facility accredited by the American Psychological Association (APA). Credit hours: students register for zero hours to reflect full-time involvement in supervised clinical psychology internship. Grading is on a Pass/Fail basis. [0]

PSY-GS9995 - Half-Time Ph.D. Dissertation Research

Title

Half-Time Ph.D. Dissertation Research

Catalog Description

For students who have completed 72 hours and devote a half-time effort to dissertation research. [0].

PSY-GS9999 - Ph.D. Dissertation Research

Title

Ph.D. Dissertation Research

Catalog Description

[0-12]

Public Policy Studies

PPS4999 - Senior Honors Thesis

Title

Senior Honors Thesis

Catalog Description

Supervised readings and independent research for honors thesis. Open to seniors in the PPS honors program. [3] (No AXLE credit)

Religion

REL5101 - Elementary Biblical Hebrew, Part I
Title

Elementary Biblical Hebrew, Part I

Catalog Description

This is the first course in a two-semester sequence leading to a reading knowledge of the Hebrew Bible; concentration is on the basic elements and grammatical study of the language, leading students to begin reading from the original texts. [3] Staff.

REL5102 - Elementary Biblical Hebrew, Part II
Title

Elementary Biblical Hebrew, Part II

Catalog Description

This is the second course in a two-semester sequence leading to a reading knowledge of the Hebrew Bible; concentration is on the basic elements and grammatical study of the language, leading students to begin reading from the original texts. [3] Staff.

REL5103 - Beginning Greek I
Title

Beginning Greek I

Catalog Description

Elements of ancient Greek. Reading of simplified texts from authors of the Classical, Hellenistic, and Imperial period, including religious scripture and related genres. [3]

REL5104 - Beginning Greek II
Title

Beginning Greek II

Catalog Description

This is the second course in a two-semester sequence of study leading to a knowledge of the New Testament. [3] Staff.

REL5105 - Intermediate Greek I
Title

Intermediate Greek I

Catalog Description

Classical and Koin^v© Greek. Review of Greek grammar and readings from classical and biblical texts. Open for credit to M.A. students only. [3] Gaca.

REL5106 - Elementary Modern Hebrew I
Title

Elementary Modern Hebrew I

Catalog Description

Introduction to alphabet, the basics of grammar, and elementary conversation. [3] Staff.

REL5107 - Elementary Modern Hebrew II

Title

Elementary Modern Hebrew II

Catalog Description

Emphasis on conversation and grammar. [3] Staff.

REL5108 - Intermediate Modern Hebrew I

Title

Intermediate Modern Hebrew I

Catalog Description

Modern Hebrew reading, conversation, and advanced grammar. Spring: greater emphasis on reading and writing. Prerequisite: one year of Modern Hebrew or its equivalent. [3] Staff.

REL5109 - Intermediate Modern Hebrew II

Title

Intermediate Modern Hebrew II

Catalog Description

Modern Hebrew reading, conversation, and advanced grammar. Spring: greater emphasis on reading and writing. Prerequisite: one year of Modern Hebrew or its equivalent. [3] Staff.

REL5120 - Intermediate Biblical Hebrew

Title

Intermediate Biblical Hebrew

Catalog Description

Designed for students who have completed an elementary course in Hebrew and need more work in the areas of grammar, syntax, and reading of Hebrew texts. [3]

REL5125 - Ugaritic

Title

Ugaritic

Catalog Description

Elements of Ugaritic grammar, with reading in selected texts. Prerequisite: Elementary Biblical Hebrew. [3]

REL5126 - Arabic of the Qur'an and Other Classical Texts

Title

Arabic of the Qur'an and Other Classical Texts

Catalog Description

Syntactical and morphological features of classical Arabic. Differences and similarities with modern standard Arabic in vocabulary usage, semantic extensions, and context; vocabulary borrowing. Texts drawn from the Qur'an, Hadith, and Sira (biographical) literature. [3]

REL5247 - Religion in the Global Context

Title

Religion in the Global Context

Catalog Description

This course explores the evolving relationships of religious traditions in the context of globalization. Religion, both theoretically and in practice, is a "global" phenomenon, and the world's religions are now recognized as major players in an increasingly interconnected world. This course, thus takes globalization as its orienting theory or description of social reality, and examines the role and place of religion in that context. What is globalization, and what is religion's relationship to it? How have religious traditions furthered globalization? How have they resisted it? What has globalization meant for religious identity and practice? What does it mean to be religious in the context of globalization? Over the course of the semester, we will: 1) study the key aspects of globalization as a social process; 2) examine the global religious landscape, and 3) identify and research key trends of religion in this context. 4) Finally, we will consider issues of global concern for religions: global health, poverty, and issues of gender and sexuality. [3] Mr. Reside

REL5279 - The Sacred and the Secular

Title

The Sacred and the Secular

Catalog Description

Ethnographies of ritual and religious life. Politics of secularism and religious revival. Issues in anthropology, literature, and philosophy. Christianity, Hinduism, Islam, and Native American Religions. [3] Fall. Taneja.

REL5353 - Baptist History And Polity

Title

Baptist History And Polity

Catalog Description

Investigates the origins, development, and theological positions throughout the history of the Baptist tradition and examines current trends in the tradition's polity. [3] Byrd.

REL5356 - Episcopal Liturgy: The Book of Common Prayer and Its Resources

Title

Episcopal Liturgy: The Book of Common Prayer and Its Resources

Catalog Description

This seminar course will examine the history, theology, and practices of worship in the Episcopal/Anglican tradition, with the goal of preparing students for ministry (broadly defined) in the Episcopal Church. Students will become familiar with the Book of Common Prayer (BCP) and its supplemental rites and resources, preparing them for planning worship, occasional services, and other rituals. They also will have the opportunity to lead and participate in the Daily Offices at the beginning of each class. [3] Ms. Budwey

REL5412 - Survey of Christian Congregational Song
Title

Survey of Christian Congregational Song

Catalog Description

This course will survey the various styles of congregational song that have been used in Christian worship from the beginnings of Christianity to the present day. By analyzing the texts and music of congregational songs from a global and ecumenical perspective, the goal is to prepare students for the variety of settings in which they will be charged to choose congregational songs for their specific contexts (whether inside or outside the church walls). Particular attention will be given to congregational songs from the 21st century and how they address topics including violence, poverty, immigration, and natural disasters, as well as justice issues of race, class, ethnicity, ability, sex, gender identity, and sexual orientation. [3] Ms. Budwey

REL5432 - Women and Religion
Title

Women and Religion

Catalog Description

This course will explore the ways that femaleness and woman-gendered identities configure religious consciousness and performance across cultures and chronologies. Through an examination of women's sacred productions and roles in Native American, West African, Hindu, Muslim, Christian, Vodou, and other religious traditions, we will interrogate how religion shapes gender identity, and conversely, how woman-gendered identity informs religiosity. Finally, the course will analyze woman-centered movements, such as feminism and womanism, in light of religious women's experiences and seek new ways to categorize these experiences. [3]

REL5458 - The Golden Age of Islam
Title

The Golden Age of Islam

Catalog Description

The history and origins of Islam are topics of increasing public interest and concern. Many have heard of Islam's Golden Age, the brilliant works of art and architecture, the medical and astronomical discoveries, the advances in literature, philosophy, and history writing, the spiritual subtleties of Sufism. Students wonder how the flowering of Islam led to today's rivalry between Shi'ites and Sunnis, or how the fierce partisanship of militants and extremists colored or pushed aside the cosmopolitan openness of an earlier age. This course aims to open up a richer, fuller appreciation of Islamic civilization than will be seen in the daily news feeds. It will provide the background needed to appreciate the rich diversity of Islamic culture and history indispensable for an informed encounter with our present world. Illustrated lectures, discussions, distinguished visiting speakers, and key artifacts will be part of the course experience. [3]

REL5459 - Buddhist Traditions
Title

Buddhist Traditions

Catalog Description

Historical and thematic survey of foundational, Mahayana, and esoteric Buddhist traditions. Mythology, doctrine, meditation, devotional practices, and institutions. Contemporary case studies from Asia and North America. [3]

REL5460 - East Asian Buddhism

Title

East Asian Buddhism

Catalog Description

East Asian Buddhism is a vast subject. Many scholars have spent their entire careers working in just a corner of it. Rather than attempting a comprehensive survey, this course focuses on aspects of East Asian Buddhism carefully chosen to illuminate the powerful, variegated, long-lasting religion it was and still is. Readings include the Lotus Sutra and the famous Zen text known as the Platform Sutra. [3] Mr. Company

REL5466 - Through the Eyes of the Other: A History of Muslim-Christian Relations

Title

Through the Eyes of the Other: A History of Muslim-Christian Relations

Catalog Description

Charting the trajectory of mutual discovery through the following criteria: (1) official religious and political texts that delineate the contours of each religion vis-à-vis the other; (2) histories and narrative of significant episodic moments of rupture in the relationship between Islam and Christianity; (3) travelogues written from the Muslim and Christian vantage points to describe the other, and in so doing deepening the process of self-discovery and/or defending the salutariness of their own religion. [3] Mr. P. Lim and Mr. R. McGregor

REL5475 - Daoist Tradition

Title

Daoist Tradition

Catalog Description

Historical and thematic survey of the Daoist tradition in China. Philosophical classics and religious scriptures, as well as social history are covered. Daoism today. [3] Mr. Company

REL5477 - Religion and Climate Change

Title

Religion and Climate Change

Catalog Description

Role of religion in climate change and as response to planetary catastrophe. Religious and literary texts. Historical, philosophical, and anthropological work. [3] Mr. Taneja

REL5492 - Dante and Theology

Title

Dante and Theology

Catalog Description

Dante's poetic, philosophical, critical, and political work will be considered especially from the standpoint of the theological vision it promulgates and of the possibilities for aesthetic theology that it discloses. The course serves also as an introduction to Literature and Religion. The emphasis will be placed on Dante's *Paradiso* but also on the pertinence of his pre-modern theological ideas and passions as developed in *Convivio*, *De monarchia*, and *De vulgari eloquentia* for our contemporary and postmodern world. Dante's theology will be developed in its own context by comparison especially with Thomas Aquinas, Bonaventure, Meister Eckhart, and Duns Scotus, the last being his exact contemporary. Dante's own pioneering of a modern approach to theology in the context of an incipient secular world will be brought out, but also the implications of his expressly imperialist political theology for our global age and the tension between claims of universal truth and of negative theology. We will scrutinize, for example, issues of Transgression and Transcendence, or What Makes Religion Radical. [3] Mr. Franke

REL6013 - Warrior Chants and Unquiet Spirits

Title

Warrior Chants and Unquiet Spirits

Catalog Description

A focus upon the Christian protest tradition, in historical and contemporary contexts, through the autobiographies of men and women who have used their voices and actions to address and to make significant differences in church and society. Analysis of personal descriptions and basic commitments for social justice form the framework for integrating spirituality with social witness. We study the relationship of the work of such movements within and beyond church structures. [3]

REL6080 - Womanist Thought in Religion and Psychology

Title

Womanist Thought in Religion and Psychology

Catalog Description

This seminar course will introduce students to, and deepen their engagement with, womanists' thought, and the methods, aims, approaches, and sources of womanist scholarship in religion and psychology. Womanist scholars situate black women's experience as the epistemological starting place for reflection, theory building and praxis; therefore, a primary presupposition of this course is that black women's particularity, and the challenges their experiences pose for existing perspectives, is integral to womanist approaches to psychology and religion and is the privileged source of knowledge building in this class. Fall. [3] Sheppard.

REL6087 - Psychology and Religion in Butch, Femme, and Queer Women's Ethnographies and Narratives

Title

Psychology and Religion in Butch, Femme, and Queer Women's Ethnographies and Narratives

Catalog Description

This course is concerned with identity/identities, the formation of subjectivities in the midst of highly defined spaces as well as broader self-defined inclusive spaces. Questions related to religion, psychology, and culture will guide us as will questions such as what/who is a woman, what is butch-femme, and queer. All will be subjected to the contribution, challenge, and critique of lived experience. Pre-requisites: Graduate student in Religion or advanced DIV student. [3]

REL6177 - Song of Songs

Title

Song of Songs

Catalog Description

The Song of Songs text, analysis of the literature, study of the religious significance and social background of the book, and its place in the theology of the Hebrew Bible. Prerequisite: knowledge of biblical Hebrew. [3]

REL6500 - The Hebrew Bible

Title

The Hebrew Bible

Catalog Description

The life and thought of ancient Israel, with emphasis on the community's understanding of itself and of its role in history, are addressed in this course; concentration is upon both the problems of historical and literary interpretations and the Israelites' religious practices and faith. Not available for Ph.D. credit in biblical studies. [3]

REL6501 - Literary Analysis of the Hebrew Bible

Title

Literary Analysis of the Hebrew Bible

Catalog Description

This course focuses on narrative criticism of the Hebrew Bible, comparing it to similar methodologies (poetics, rhetorical criticism, etc.) and contrasting it with other forms of exegesis (historical criticism, deconstruction, etc.). Students will study key literary terms and discuss the elements that work together to form a story. The class will consider the narrator's voice in relation to the text and the reader, examining narrative omniscience, key type scenes, and themes in the Hebrew Bible and ancient Near Eastern literature. [3]

REL6502 - Leadership in Hebrew Bible

Title

Leadership in Hebrew Bible

Catalog Description

Using Jotham's fable (Judges 9) as a paradigm for leadership, this course examines various types of leaders in the Hebrew Bible and ancient Near East. Employing folkloristics, socio-historical criticism, and other methodologies, students will study the roles of kings, queens, priests, prophets, prophetesses, and other leaders in the ancient world. As students compare and contrast the ideologies and imagery associated with different types of authority, the class invites them to explore practical applications in their own vocations. [3]

REL6503 - History Of Ancient Israel

Title

History Of Ancient Israel

Catalog Description

Examination of the major areas of debate in the reconstruction of the history of ancient Israel and analysis of the important extra-biblical sources that have contributed to the scholarship on ancient Israel's history. The course will also address the roles that ancient Israel's Near Eastern neighbors played in the development of ancient Israel's history. [3] Azzoni.

REL6504 - Modern Interpreters of Ancient Israel

Title

Modern Interpreters of Ancient Israel

Catalog Description

Characteristic approaches to the history and religion of ancient Israel, as seen in selected writings by prominent scholars since the Enlightenment. Attention to the presuppositions of each scholar and to the view of Israel afforded in each study. [3] Marbury

REL6505 - Law in the Hebrew Bible & ANE

Title

Law in the Hebrew Bible & ANE

Catalog Description

The legal materials in the Pentateuch, their relation to the prophetic movement, and the role of law in ancient Israel's thought and society against the ancient Near Eastern background. [3] Ms. Azzoni

REL6508 - Death and Transfiguration in Pharaonic Egypt

Title

Death and Transfiguration in Pharaonic Egypt

Catalog Description

This course explores the conceptual world of Ancient Egyptian mortuary religion: how the ancient Egyptians viewed death and the afterlife, prepared the body for eternity, and created lasting funerary monuments. Attention will be given to how these concepts are evoked in Ancient Israel, and how they are presented today through museum exhibitions and in popular culture.

REL6509 - Exegesis Seminar

Title

Exegesis Seminar

Catalog Description

Study of the principles, methods, and tools used in the critical study of the Hebrew Bible, including textual, historical-critical, ideological, literary, and other exegetical methods. [3] Seow

REL6510 - Empire and Canon

Title

Empire and Canon

Catalog Description

Arguably, two eras of imperial domination, the Persian and Hellenistic periods, are the most literarily active in the formation of the Hebrew Bible. This advanced-level seminar looks at the Persian imperial context as the social world from which much of the Hebrew Bible emerged. Its seminal question, "How much did Persian imperial policy shape the writings of the early Second Temple priesthood?" will guide both the discussions and the readings. With this in mind, the course examines struggles between the priesthood, imperial authorities, and the Jerusalem populace and raises questions about specific biblical texts which may provide insights into these relationships. [3] Mr. Marbury

REL6511 - Book Of Genesis

Title

Book Of Genesis

Catalog Description

Book of Genesis, concentrating on the definition of its major themes and purposes. Hebrew language not required. [3] Mr. Seow

REL6514 - The Exodus in African American Biblical Interpretation

Title

The Exodus in African American Biblical Interpretation

Catalog Description

This seminar surveys the politics of African American biblical interpretation and the Book of Exodus in the 19th and 20th centuries. The seminar will rely entirely upon primary source materials. [3]

REL6515 - The Book of Deuteronomy

Title

The Book of Deuteronomy

Catalog Description

An exegesis class on the Book of Deuteronomy, concentrating on defining the book's major themes and purposes as well as examining the book's poetry.

REL6516 - The Book of Numbers

Title

The Book of Numbers

REL6518 - Book Of Job

Title

Book Of Job

Catalog Description

A study of the book of Job, attending to its literary features, religious themes, internal disputes regarding theodicy, and its relation to other texts from the region. [3] Seow.

REL6519 - Book of Qoheleth

Title

Book of Qoheleth

Catalog Description

Israelite skepticism, with emphasis on the literary form, thematic coherence, and religious viewpoint of Job and Qoheleth, interpreted within the broad spectrum of Israelite wisdom and consideration of Greek influence. [3]

REL6520 - Book Of Daniel

Title

Book Of Daniel

Catalog Description

An in-depth analysis of the Book of Daniel, with particular attention to the text's historical background and literary form. The place of the Book of Daniel within Prophetic and Apocalyptic literature will also be explored. [3] Mr. Seow

REL6522 - Sexuality in the Hebrew Bible and ANE

Title

Sexuality in the Hebrew Bible and ANE

Catalog Description

Explores how various sexual practices (prostitution, homosexuality, heterosexuality, rape, sodomy, incest) are dealt with in the Hebrew Bible and in the larger context of the ANE. [3]

REL6523 - Religions and Cultures of the Ancient Near East

Title

Religions and Cultures of the Ancient Near East

Catalog Description

A consideration of the cultural and religious milieus of Egypt, Mesopotamia, Anatolia, Canaan and beyond before Alexander the Great. The goals of the course include a deeper understanding of the cultures of the area that surrounded, chronologically and geographically, the people who wrote the Hebrew Bible, and an awareness of the complex interactions and mutual influences among these cultures the world of the Bible in its ancient context. [3] Ms. Azzoni

REL6524 - From the Invention of Writing to Literary Classics

Title

From the Invention of Writing to Literary Classics

Catalog Description

This course will begin with the invention of writing in ancient Sumer and Egypt; the development of the writing systems in Mesopotamia, Egypt, Anatolia, and the origin and development of the alphabet in the Levant and its reflexes in Greek and Latin. The course will then explore various literary classics in that cradle of world literature. [3] Mr. Seow

REL6525 - Ancient Goddesses

Title

Ancient Goddesses

Catalog Description

This course will examine how ancient cultures (Mesopotamia, Egypt, Ancient Israel, and beyond) conceived of the feminine divine, primarily through a survey of the available literature (myths, hymns, and prayers) and iconographic evidence (statues, plaques, figurines). The roles of specific goddesses, their spheres of influence, and their place in the various pantheons will be taken into account, while also paying attention to cultic practices and religious syncretism across the cultures.

REL6526 - Jewish Life in Persian Egypt

Title

Jewish Life in Persian Egypt

Catalog Description

The Aramaic documents from the island of Elephantine offer a unique portrayal of the life of a Jewish community in fifth-century Egypt BCE. In this seminar, students will learn to read the papyri and ostraca in the original language and script, and explore the historical, linguistic, and cultural implications of the documents in relationship with relevant Biblical material.[3]

REL6527 - Hellenistic Jewish Literature

Title

Hellenistic Jewish Literature

Catalog Description

In the Second Temple period, Israel's ancient library of sacred texts was becoming the Bible. This period witnessed a proliferation of enormously versatile literary texts with religious themes written in the dominant languages of the time: Aramaic, Hebrew, and Greek. Those works that are left out the Hebrew Bible, but became a part of the canonical literature of the early Christian churches, we call here Apocrypha. Pseudepigrapha, conversely, is a vague term for the ancient Jewish national literature that grew around biblical figures and events but was left out of the ancient scriptural traditions. In this course we will examine most of the Apocrypha and a selection of the Pseudepigrapha, in English, and compare them with the literature of a similar genre and period, such as testaments (Testament of Abraham, The Testament of 12 Patriarchs), romances (Joseph and Aseneth), tales of adventure (Books of Tobit, Judith, Esther), letters, apocalyptic literature, historiographies (1-2 Maccabees, Josephus), and philosophical essays (Philo). In these numerous readings of the primary sources, we will also look at the main contemporary methods of interpretation: midrash and allegory. The canonical issues, the scriptural and ecclesiastical authority of the Apocrypha and Pseudepigrapha, and their use and function in the confessional and academic setting will receive due attention.

REL6529 - Eighth-Century? Prophecy

Title

Eighth-Century? Prophecy

Catalog Description

A study of the prophetic literature against its ancient Near Eastern background; emphasis placed on the eighth-century B.C.E. prophets and on the contemporary significance of their message. [3] Marbury

REL6532 - Marriage in the Beginning

Title

Marriage in the Beginning

Catalog Description

An examination of different aspects (religious, legal, socio-economic) of marriage, through a survey of ancient Sumerian, Assyrian, Babylonian, Egyptian sources and the relevant sections of the Hebrew Bible. The variety of literary and historical texts will reveal a complex picture of how this institution developed at the very beginning of recorded history. [3]

REL6534 - Job, Literature, and Visual Arts

Title

Job, Literature, and Visual Arts

Catalog Description

After an orientation of the book of Job as a literary work of art, the course will consider the reception of the story in literature. Lectures will include broad surveys of literature from various periods, cultures, and genres. Students will have opportunities to explore topics that are commensurate with their interests and areas of study, including English literature (or French, German, Spanish, Japanese), Jewish studies, theatre, and music. [3] Mr. Seow

REL6535 - Hebrew Poetry

Title

Hebrew Poetry

Catalog Description

This course explores the nature and modes of poetry in the Hebrew Bible in various genres through lectures, secondary literature, and close reading of selected poems. Prerequisite: knowledge of Biblical Hebrew. [3] Mr. Seow

REL6536 - The Book of Judges

Title

The Book of Judges

Catalog Description

Critical exegesis of major sections of the Book of Judges, with evaluation of its historical, historiographic, and literary contents. [3] Mr. Seow

REL6543 - Religion, Ecology, and Power in Africa

Title

Religion, Ecology, and Power in Africa

Catalog Description

As people increasingly worry over the environmental challenges that the world faces, this course will guide students through an exploration of the interwoven destinies of human beings, animals, and land across Sub-Saharan Africa. To begin, we shall consider how ideas about the divine origin and development of the earth and its peoples have influenced African social structure, ethnically-based occupations, and stewardship over the environment. From here students will examine further how power relations in pre-colonial Africa through the present-day have determined human-earth relations and how resources are cared for and consumed. We also shall discuss and debate the role of ritual in addressing environmental problems alongside ongoing issues regarding the management and ownership of African resources. [3]

REL6546 - Secularism

Title

Secularism

Catalog Description

As a cultural phenomenon commonly associated with the contemporary world, especially the modern Western world, secularism is not mere atheism or anti-religion. Rather, it advocates or assumes a separation of government, education, and other social institutions from religious authority. The course aims to survey the complexities of secularism from a variety of angles: history, geographical variations, philosophy, religion, ethics, law, sociology, economics, psychology, education, literature and art. Prerequisite: Prior coursework in the humanities and social sciences. SPRING. [3]

REL6548 - Middle Egyptian Hieroglyphs

Title

Middle Egyptian Hieroglyphs

Catalog Description

Ancient Egyptian culture has captivated western societies for centuries, and the hieroglyphic writing system is particularly fascinating. In this class, we will focus on Middle Egyptian, the "classical" language of Pharaonic Egypt. You will acquire a solid grounding in Middle Egyptian grammar and be able to sample hieroglyphic texts that were written during four millennia. Additionally, you will gain valuable insights into ancient Egypt culture. [3] Ms. Azzoni

REL6550 - Akkadian I**Title**

Akkadian I

Catalog Description

Elements of Akkadian (Assyro-Babylonian) grammar, with reading in selected texts. Consent of the instructor required. [3] Ms. Azzoni

REL6551 - Akkadian II**Title**

Akkadian II

Catalog Description

Reading in selected historical, mythical, legal, and epistolary texts. Consent of the instructor required. [3] Ms. Azzoni

REL6552 - Introduction to Classical Syriac**Title**

Introduction to Classical Syriac

Catalog Description

Classical Syriac (also called "literary" Syriac --ktabanaya) is a dialect of Aramaic that flourished for over a millennium in the Middle East and Asia. Today, perhaps more than ten thousand manuscripts written in Classical Syriac survive; many are unique sources for the history of Judaism, Christianity, and Islam. Reading classical Syriac literature is thus of interest to a variety of scholars including ancient and medieval historians, classicists, scholars of religious studies, biblical scholars, and comparative linguists. In this course students will learn the basic structure of Classical Syriac grammar and learn to read simple texts from the Syriac translations of Christian and Jewish scriptures. [3] Mr. Michelson

REL6553 - Historical Hebrew Grammar**Title**

Historical Hebrew Grammar

Catalog Description

The course will offer a diachronic overview of the Hebrew Language, tracing its origin in connection and comparison with other Semitic languages, particularly within the Northwest Semitic subgroup. Different theoretical models will be discussed, and comparative Semitics data will be offered to examine linguistic features, with specific focus on phonology, morphology, and the lexicon. [3]

REL6554 - Readings in Reception Theory**Title**

Readings in Reception Theory

Catalog Description

A directed reading course in reception theory. [1] Mr. Seow

REL6555 - Consequences of Scripture

Title

Consequences of Scripture

Catalog Description

This course considers the "history of consequences" (variously called "history of interpretation," "history of reception," and "history of effects") of the Hebrew Bible/Old Testament, as evident in Jewish, Christian, and Islamic commentaries, theological writings, literature, liturgy, music, and visual arts. [3] Mr. Seow

REL6571 - African American Biblical Hermeneutics

Title

African American Biblical Hermeneutics

Catalog Description

Surveys the field of discourse in African American biblical scholarship from its beginnings through the twenty-first century; students will analyze the work of the most prominent hermeneutics; discussions will emphasize the social and ideological currents that have contributed to the development of African American biblical hermeneutics as resistance discourse. [3] Marbury.

REL6575 - Old Testament Theologies

Title

Old Testament Theologies

Catalog Description

Traces Old Testament Theology in modern biblical criticism from the late 18th century through the mid 20th century. The class will turn to primary sources to engage both the major expressions and major critiques of the enterprise. [3]

REL6580 - North-West Semitic Epigraphy

Title

North-West Semitic Epigraphy

Catalog Description

Participants in this course will read from Hebrew, Aramaic, Phoenician, and Moabite texts, and emphasis will be placed upon relevant grammatical analyses. Prior to enrolling in this language course, students must demonstrate a proficient knowledge of Hebrew. [3] Azzoni.

REL6600 - The New Testament

Title

The New Testament

Catalog Description

How the New Testament shows the main characteristics of early Christianity as compared and contrasted with early Judaism and with Hellenistic religions. Religious authority in early Christian communities and the types of faith and ethics found within the New Testament traditions. [3]

REL6603 - The Gospel of Mark

Title

The Gospel of Mark

Catalog Description

This course addresses various theories concerning Mark's historical context, narrative art, Christology, depiction of the disciples, political views, and presentations of gender, ethnicity, and social status. Students taking this course will consider the Gospel in its Roman imperial context, economics (e.g., money and trade, rich and poor), social groups (e.g., slaves, military, government officials, religious leaders, patrons and clients, beggars, women and children, families), Christology, and ecclesiology. Discussion will attend both to what the text might have meant in its first-century context and what it might mean for how it has been used by readers today. [3] Levine

REL6604 - The Gospel of John

Title

The Gospel of John

Catalog Description

This course addresses various theories concerning John's historical context, narrative art, Christology, depiction of disciples, dualistic language and depictions of those outside the circle of Jesus-believers (e.g., "the world" "the Jews"), presentations of gender, ethnicity, and social status; eschatology (futurist, realized), and use/misuse within Christian teaching and preaching. [3] Levine

REL6605 - Readings in Greek: The Gospel of John

Title

Readings in Greek: The Gospel of John

Catalog Description

This upper-level course focuses on the Greek text of the Fourth Gospel. Along with exegetical questions prompted by thesaurus of biblical approaches, attention will be focused on the style, nuances, and intertextual echoes of John's narrative. The pre-requisite for enrolling in the course is successful completion of course work in the Greek language. [3] Levine

REL6607 - Acts Of The Apostles

Title

Acts Of The Apostles

Catalog Description

Exegesis of selected passages from Acts 1-15 with foci on various methodological perspectives. Greek required. [3] Levine.

REL6608 - Jewish/Christian Relations

Title

Jewish/Christian Relations

Catalog Description

This course offers a brief history of relations between Christians and Jews and invites participants into critical engagement with present practices in light of that history. [3] Ms. Levine and Mr. Lim

REL6609 - Feminist Interpretations Of Scripture

Title

Feminist Interpretations Of Scripture

Catalog Description

Examination of the representations of women, religious and ethnic "others," and sexuality in biblical and contemporary noncanonical (ANE, Pseudepigrapha, Gnosticism) texts, utilizing various approaches (literary, historical, anthropological, ideological, Womanist, Mujerista). [3] Levine.

REL6610 - The Pauline Interpretation Of Christianity

Title

The Pauline Interpretation Of Christianity

Catalog Description

Pauline Christianity and its place in the early church, using the letters of Paul, the deuter-Pauline letters, and the portrait of Paul in Acts. Attention to the problems of method. Greek not required. [3] Patte.

REL6611 - Global Interpretations of Christian Scriptures

Title

Global Interpretations of Christian Scriptures

Catalog Description

This course will compare the interpretations of biblical texts by Christians in Africa, Asia, Latin America, and Oceania-where at present two-thirds of the readers of the Bible are-with those by Orthodox Christians in Eastern Europe and the Middle East, and by Catholic and Protestant Christians in Western Europe and North America.

REL6612 - Semiotics and Biblical Studies

Title

Semiotics and Biblical Studies

Catalog Description

Why are several, different, and often opposed interpretations of the same biblical text equally legitimate and plausible? (This is the question raised by Ricoeur in *The Conflict of Interpretations*, and by Fish in *Is There a Text in This Class?*, and also raised by the shelves of diverging scholarly commentaries on the same biblical book.) Thus, why do interpreters of the Bible have the moral responsibility of choosing among these legitimate and plausible interpretations one which "does no harm" and to take the risk of choosing an interpretation which will be helpful, liberating, and constructive by challenging systemic evil? Semiotic theories address these questions by providing theories of the way meaning is produced through the interaction of texts, intertexts, contexts, and readers. Most helpful in biblical studies are the semiotic theories of Umberto Eco (*A Theory of Semiotics and The Role of the Reader*), A.-J. Greimas (*Semiotics and Language*), who opens the possibility to account for *The Religious Dimensions of Biblical Texts*), and their applications in biblical studies by Mieke Bal, in *Narratology: Introduction to the Theory of Narrative; On Meaning-Making: Essays in Semiotics*; and her spectacular study of Judges 4 and 5, *Murder and Difference: Gender, Genre, and Scholarship on Sisera's Death*; and *Loving Yusuf: Conceptual Travels from Present to Past*, in which she reads biblical texts together with modern literature, feminist issues, visual art, and other religious texts (in the latter case, the Qur'an). [3]

REL6614 - The Parables of Jesus

Title

The Parables of Jesus

Catalog Description

Examining the nature of parable as form, the history of the interpretation of parables, the study of parables in the setting of the ministry of Jesus and the theology of the Evangelists, and literary criticism and the interpretation of parables. [3] Levine

REL6616 - Greek Readings: The Gospel of Matthew

Title

Greek Readings: The Gospel of Matthew

Catalog Description

Through analytical approaches such as historical-critical, literary, sociological, and ideological, students will reconstruct Matthew's audience, both actual and ideal, and explore the topics of Christology, ecclesiology, debates with the synagogue, politics, and artistry of composition. [3] Levine.

REL6617 - Gospel According to Luke

Title

Gospel According to Luke

Catalog Description

Exploration of Luke's compositional techniques, possible sources, Christology, community formation, and ethics, utilizing a variety of approaches (socio-historical, literary, ideological, feminist). Knowledge of Greek required. [3] Levine

REL6618 - Christian-Jewish Relations in Medieval and Early Modern Europe

Title

Christian-Jewish Relations in Medieval and Early Modern Europe

Catalog Description

Political and cultural history from the medieval persecutions to the expansion of legal toleration in the Enlightenment; close consideration of legal toleration, banishments, re-admissions, and the impact of Christian reform movements. [3] Mr. Price.

REL6619 - Early Christian Writers

Title

Early Christian Writers

Catalog Description

Writings of Greek Christians, from the New Testament to critical works and letters by the Cappadocian fathers. Historical and intellectual context. Rhetoric and style. The Roman East. [3]

REL6641 - New Testament Studies: Ethos and Locus, Methods and Theories

Title

New Testament Studies: Ethos and Locus, Methods and Theories

Catalog Description

Current methods of New Testament analysis, including textual, source, form, redaction, sociological, semiotic, and literary criticisms. [3]

REL6642 - New Testament Studies II: Ideological & Cultural Criticisms

Title

New Testament Studies II: Ideological & Cultural Criticisms

Catalog Description

This course constitutes the second part of a two-part introduction to New Testament Studies as presently conceived and practiced. It is an advanced course, presupposing previous and substantial work in the field and designed primarily for students in the Graduate Department of Religion. The course is also open to advanced and students in either the M.Div. or the M.T.S. degree program, although with permission of the instructor required. Contemporary biblical criticism may be approached in terms of five interpretive paradigms, each with its own distinctive though complex mode of discourse: historical criticism; literary criticism; sociocultural criticism; ideological criticism; cultural criticism. This second part will examine the role and future of biblical criticism in general as well as the methods and theories at work in the paradigms of ideological and cultural criticism. Its goal is to provide a comprehensive, critical picture of the discipline in terms of differential formations and relations of power as well as of different traditions of reading. The course will encompass three major components. First, a general introduction to the history of the discipline from the 1970s through today, with a focus on the questions raised by ideological and cultural criticisms. Second, sustained analysis of various ideological approaches (feminist and materialist criticisms, ethnic-racial and queer criticisms, postcolonial criticism, disability and ecological criticism) as well as focused consideration of cultural criticism, problematics, trajectories, critiques, interdisciplinary conversations. Finally, a brief view at both the role and the future of biblical criticism.[3]

REL6643 - Materialist Biblical Criticism

Title

Materialist Biblical Criticism

Catalog Description

Focuses on the question of political economy and the resultant constructions and relations of social class, an angle of vision closely associated with the liberation criticism of the 1970s and beyond but also with roots in earlier Marxist approaches to the Bible; the course deals with the juncture between economic studies and biblical criticism, both with regard to the texts and contexts of early Christianity and the interpretations/interpreters of such texts and contexts in modernity and postmodernity; course will consider a study of political economy, approaches to the political economy of the Roman Empire, and the trajectory of materialist criticism. [3] Mr. Segovia.

REL6644 - Racial-Ethnic Biblical Criticism

Title

Racial-Ethnic Biblical Criticism

Catalog Description

Students participating in this seminar will analyze the juncture between Early Christian Studies and Racial-Ethnic Studies with a focus on the problems of race and ethnicity in biblical texts and contexts as well as in modern and postmodern interpretations and interpreters. The grounding phenomenon of migration; representations of Self and Others, signification of race and ethnicity, approaches to race and ethnicity in the Roman Empire; approaches to race and ethnicity in early Christian texts and contexts are among the topics students will explore. [3] Mr. Segovia

REL6645 - Political Biblical Criticism

Title

Political Biblical Criticism

Catalog Description

An analysis of the methods and goals of contemporary Biblical interpretation in Latin America. [3]

REL6646 - Postcolonial Criticism

Title

Postcolonial Criticism

Catalog Description

Analysis of the juncture between Early Christian Studies and Postcolonial Studies, with a focus on geopolitics and imperial-colonial formations and relations, in biblical texts and contexts as well as in modern-postmodern interpretations and contexts. [3] Mr. Segovia

REL6648 - Imperial Biblical Criticism

Title

Imperial Biblical Criticism

Catalog Description

This course addresses the problematic of geopolitics-the differential formations and relations of power revolving around the axis of imperial-colonial frameworks-and the tradition of imperial biblical criticism. As such, the course deals with the juncture between Early Christian Studies and Empire Studies. Its focus is twofold: the world of production-the texts and contexts of early Christianity; and the world of reception-the texts and contexts of geopolitical interpretations and interpreters of early Christianity. Topics to be addressed include: (1) the tradition of Empire Studies as a field of studies; (2) the analysis of the imperial-colonial framework of Rome, including its religious-theological dimensions; (3) overview of geopolitical approaches to the texts and contexts of the New Testament; and (4) the significance and relevance of such study in our contemporary social-cultural world, especially our religious-theological world. [3] Mr. Segovia

REL6700 - History of Global Christianities I

Title

History of Global Christianities I

Catalog Description

This course surveys key themes in the origins, spread, and diversity of the various movements that identified themselves as "Christian" from the second century of the current era to year 1700. Students will be introduced to selected cultural, social, political, religious, and intellectual contexts in which Christian communities formed in the Middle East, Africa, Europe, Asia, and the Americas. Throughout the course, students will learn and apply historical methods of inquiry. The primary purpose of the course is for students to use primary sources to investigate questions of doctrine and practice, religion and politics, the creation of institutions, and varieties of Christian experience and identity. These questions are examined within a wider context of pre-modern to early modern global history. Special attention will be given to recovering voices and perspectives lost or muted in the sources. This is the first of the two-course sequence in History of Global Christianities. The course focuses especially on two formative periods: Christian formation in Late Antiquity and again surrounding the reformations beginning in the 1500s. [3]

REL6701 - Introduction to Christian Worship

Title

Introduction to Christian Worship

Catalog Description

This course will examine the history, theology, and practices of Christian worship from global and ecumenical perspectives with the goal of preparing students for ministry (broadly defined), including the planning of worship, occasional services, and other rituals. Particular attention will be paid to helping students think critically as practical and pastoral theologians as they design and lead worship in their specific contexts while also being attentive to how justice issues such as race, class, ethnicity, ability, sex, gender identity, and sexual orientation affect and are affected by worship. [3] Ms. Budwey

REL6706 - The History of Monasticism

Title

The History of Monasticism

Catalog Description

This course examines the rise of Christian asceticism in Late Antiquity. Students will study the specific historical and geographic contexts of the development of monasticism in Syria, Egypt, and its spread across the Mediterranean and beyond. The course will be primarily focused on interpreting the large body of ascetic literature which developed from the fourth through sixth centuries. Students will read various genres and monastic theologians including the sayings of the Desert Fathers and Mothers, Athanasius' Life of Anthony, Gerontius' Life of Melania the Younger, the works of Evagrius Ponticus, Isaac of Nineveh, Philoxenos of Mabbug and others. The course will also examine the legacy of desert spirituality for later Christian traditions and for contemporary theology and monastic practice (such as in the work of Roberta Bondi or Thomas Merton) [3] Mr. Michelson

REL6708 - History of Global Christianities II

Title

History of Global Christianities II

Catalog Description

This courses aims to acquaint divinity students with the history of the North American religious cultures and those of the global South as recipients and participants in a broader movement of Christianities in time and across space. Key moments to be explored include colonialism, slavery, interchristian rivalry, evangelicalism, participation in democratic, reform, and military institutions, and the world missionary movements - old and new. The term begins with the transmission of European and African peoples and religious traditions to the Western hemisphere in contact and interaction with indigenous peoples. Key moments to be explored include colonialism, slavery, interchristian rivalry, evangelicalism, participation in democratic, reform, and military institutions, and the world missionary movements - old and new. The second half of the semester moves with much of the modern Christian population to the so-called global South. Growth of 19th century colonial mission field and earlier Christian churches will be tracked in Africa, Asia, and Latin America. The growth of worldwide Pentecostalism and indigenous churches will figure strongly, along with the Western Christian traditions of Roman Catholicism and Protestantism but also to Eastern Christian churches and the global Christian communities of the modern era. Throughout the semester students will explore the distinctions of East or West, North or South, national or transnational, marginalized or majority, lay or clerical, as well as the dynamics of gender, race, class, sexuality which have influenced variegated Christianities around the globe. [3]

REL6709 - Religion, Culture, Politics in Post Reformation England

Title

Religion, Culture, Politics in Post Reformation England

Catalog Description

The course will examine the interaction between religious change and politics in the period after the reformation. The focus will be on the Elizabethan and early Stuart periods. Emphasis will be given to questions of "political culture"; the ways in which the peculiar exigencies of the Elizabethan regime, in Collinson's phrase "the Elizabethan exclusion crisis", led to various experiments in the ways in which politics was conducted. Central here will be the notion of the monarchical republic of Elizabeth 1 and the politics of popularity and the various monarchical reactions thereby provoked. The doings of both catholics and puritans will be examined and a wide range of primary sources will be consulted. Various literary texts will also be used.

REL6710 - History of Anti-Trinitarian Theology

Title

History of Anti-Trinitarian Theology

REL6711 - Theodicy: God and Human Suffering in Historical Perspectives

Title

Theodicy: God and Human Suffering in Historical Perspectives

Catalog Description

The story of Christianity has the notion of God who suffers with and in our place at its crux. This course surveys the variegated histories of Christian attitudes toward and responses to evil and suffering: both individually, ecclesially, both in its theology and praxis. Readings will range from Dorothy Day to Irenaeus of Lyons, from Toni Morrison to Shusaku Endo, from Karl Barth to Hannah Arendt. Particular attention will be given to the contemporary issue of human trafficking and global economic disparity and its global impact. [3]

REL6713 - Seminar in Late Antiquity

Title

Seminar in Late Antiquity

Catalog Description

This course is a survey of the scholarly literature on the transformation of the Roman world (its state apparatus, society, and culture) from the third through seventh centuries of the current era. We will study the end of the classical world and the origins of Byzantium, the Islamic world, and the medieval West. This class will review historiography on the questions of the fall of Rome and the birth of the heirs to Roman civilization. The course will present key themes for analysis of late Roman society such as wealth and poverty, the crisis of the third century, Roman imperial ideology, gender roles and family structures, the rise of Christianity, the geographic divisions of the Empire, and the last great war of antiquity. Particular attention will be paid to religious practices, communities, and institutions in the later Roman world. Students will gain an overview of scholarly literature on Greek and Roman religious institutions, Jewish, Christian, Manichean, and Muslim communities and a wide range of religious practices. Together, we will traverse recent scholarship concerning a variety of evidence including geography, material evidence, and primary source texts. Students will be encouraged to formulate their own positions with regard to current scholarly debate on the following questions: How did the Roman world change in late antiquity? Why did these changes develop and what alternative trajectories existed? [3] Mr. Michelson

REL6715 - Images of Mary in Christian Thought and Practice

Title

Images of Mary in Christian Thought and Practice

Catalog Description

The first half of this course will survey the history of Marian theology and devotion from an ecumenical perspective in order to lay the foundation for the second half of the course, which will focus on engaging with diverse contemporary perspectives (Feminist, Latinx, Black, Womanist, Asian, Queer, ecumenical, and interreligious) on Mary. Particular attention will be paid to how the arts--music, literature, and the visual arts--have been and are being used to both reinforce oppressive views of Mary as well as create new and liberating views of Mary. [3]

REL6722 - History of Syriac Christianity

Title

History of Syriac Christianity

Catalog Description

This course is a seminar on Syriac Christian traditions. Syriac is a dialect of Aramaic which was influential in the spread of Christianity across the Middle East and Asia. By the time of the rise of Islam, Syriac-speaking Christian communities could be found in what today would be a region stretching from modern day Lebanon across Iraq and the Persian Gulf on to India, Central Asia, and China. In the Middle Ages, Syriac culture and literature flourished as a cultural bridge between the Byzantine Empire and the Islamic states of the Middle East. In the modern era, Syriac communities have continued to persist to the present as minorities in the Middle East and India and in a global diaspora. This course surveys the history of these communities, the theological literature that they produced, and historiographical debates about their origins and development. [3] Mr. Michelson

REL6723 - History of Early Christian Poetry

Title

History of Early Christian Poetry

Catalog Description

This course explores the writing and reception of Christian verse from Late Antiquity and the early Middle Ages. Students will study the specific historical, cultural, and geographic contexts for the development of early Christian poetry (roughly from the New Testament era to the 9th century). The course will examine a variety of genres including classical Greek and Roman styles (e.g. epic poetry, elegiac couplets, epigrams, and Virgilian imitations) and emerging early Christian forms (e.g. translations of Biblical psalms and verse, hymns, poetic sermons and Biblical interpretations, liturgical texts, and verses in praise of Christians saints). All readings will be done in English translations of texts from variety of the linguistic traditions including Syriac, Greek, Latin, Armenian, and Old English. Readings will include the work of Ephrem the Syrian, Proba, Gregory of Nazianzus, Basil of Caesarea, Prudentius, Romanos, Radegund, Kassia and anonymous texts including the Dream of the Rood. Students will also examine the impact of early Christian poetry on later Christian imagination including its influence on later authors and musicians such as in the work of J.M. Neale, Christina Rossetti, and John Tavener. Lastly, students will have the opportunity to add their own voices to the long legacy of Early Christian verse through interpretation, composition, or other engagement with the tradition. [3] Mr. Michelson

REL6729 - The Historiography Of American Religion

Title

The Historiography Of American Religion

Catalog Description

This course focuses on the major important interpretive accounts of the history of American Religion. The course is designed especially for graduate students who intend to specialize within, or take a doctoral exam on, the field of American religious and church history, key problems and significant monographs in the field. [3] Hudnut-Beumler, Byrd

REL6730 - The History Of Religion In America

Title

The History Of Religion In America

Catalog Description

The history of the religions in America beginning with colonial religious experiments in the New World. Examines American "church history" as well as the influence of non-Christian religions in American culture. [3] Dickerson.

REL6731 - Religion And War In American History

Title

Religion And War In American History

Catalog Description

An examination of complex interactions between religion and war in American history. Considers the various functions of religion in social and political crises, contrasting theological interpretations of violence, and the religious construction of national identity through warfare. [3] Byrd.

REL6732 - Theology in America 1630-1865

Title

Theology in America 1630-1865

Catalog Description

Theology in America from the arrival of the Puritans through the Revolutionary period was a complex mixture of academic doctrines and popular beliefs. The scope of theological ideas extended beyond religious institutions to influence cultural patterns and social issues such as war, slavery, religious persecution, and the nature of citizenship. This intermediate-level seminar examines various theologies in America, including an examination of key theologians (broadly considered) and important themes and traditions, including the Reformed Tradition, Antinomianism, political theologies, revivalism, and Deism. [3] Byrd.

REL6733 - Seminar: American Revivals

Title

Seminar: American Revivals

Catalog Description

This course examines selected revivals in American Christianity from the colonial period through the twentieth century. We will focus on the varieties of revival practice, including the ways in which revivals have interacted with views of ministerial authority, doctrine, the body in worship, social reform, and church architecture. Primary and secondary resources will include texts and audio-visual representations of revival experience.

REL6734 - American Apocalyptic Thought and Movements

Title

American Apocalyptic Thought and Movements

Catalog Description

This course explores apocalyptic and millennial ideas and movements in North America from the colonial period to the present. The primary focus will be on apocalyptic themes in relation to social and political crises in the history of the United States. Particular attention will be given to apocalyptic images and ideas in popular culture.

REL6736 - America's Bibles

Title

America's Bibles

Catalog Description

This course asks why and to what ends have Americans produced so many kinds of Bibles; not just different translations, but different versions of the same translation? Students will examine that history of Bible creation to understand better what it tells us about particular religious communities and American religion generally. In doing so, students will consider the broad themes of American religious history, such as race, gender, nationalism, millennialism, and science and will use such theories as narrative criticism and material Christianity. Most broadly this course invites students to consider the significance of the Christian Bible to the creation and display of a variety of religious and no-so-religious meanings throughout U.S. history. Thus, students will study the Bible as both a sacred text for some and an unavoidable cultural object for all Americans. [3] Mr. Byrd.

REL6738 - Jesus In Modern America

Title

Jesus In Modern America

Catalog Description

The period from 1880 to 2000 featured a high level of American cultural interest in Jesus of Nazareth. More books were produced on Jesus during this period than on any other biblical figure. Through various modes of cultural production—plays, novels, movies, biblical commentaries, theologies, and moral essays—Americans depicted Jesus to meet their needs and conceptions of who this man was and what he represented for their congregations. Students will examine a wide range of "American Jesuses." [3] Hudnut-Beumler.

REL6739 - American Religious Intolerance

Title

American Religious Intolerance

Catalog Description

This course studies the art of religious defamation as evidenced by 19th and 20th century exposés and memoirs. The following questions guide our study: what are the enduring anxieties that beget and tropes that express religious prejudice; what do they tell us about American society and culture; and how may these anxieties and prejudices be recognized in contemporary culture and ourselves. Memoirs and exposés comprise the focus of course readings, while secondary literature provides the context and theoretical frame for our study of intolerance more generally. This term, anti-Catholicism and anti-Mormonism will provide our chief case studies, but the assignment structure and some reading assignments encourage application to other groups. Class discussion will be oriented to identifying the manner in which past and present religious prejudices continually inform one another, both sustaining and imaginatively reshaping meanings to fit instant anxieties and disparate religious groups. At the end of the course, students will better understand the history of religious intolerance in America; recognize the enduring tropes of religious intolerance; be able to critically engage such tropes as applied to different religions; and be more adept in identifying their own prejudices. Grades will be based on contribution to seminar discussions and completion of a research paper. [3]

REL6741 - Contemporary Issues in American Religion

Title

Contemporary Issues in American Religion

Catalog Description

This course invites students to reflect upon our inheritance from the late twentieth century. We will not march through the years but will consider important themes, key developments, pivotal moments, and still significant writings in order to understand better our contemporary situation. Specifically, we will study how religion has and is responding to recent social crises and cultural developments. Three themes will frame our subject. We will look at the state of organized religion, as well as consider what it means to be "spiritual not religious." Second, by examining civil rights and wrongs, including but not limited to race, we will attempt to better understand the diverse political strategies employed by religious people. Finally, not just the public, but also the private sphere deserves attention. We will look at religious interests in the sexual revolutions (broadly construed) of the last few decades. This allows us to consider, among other things, the continuing challenge science poses to religious values and worldviews. Certainly, other topical frameworks could be developed and additional sub-topics explored. The reading done for the paper assignments will facilitate your working on topics of particular interest or delving more deeply on ones listed here. Moreover, there will be room on the syllabus for the class to suggest additional themes. A book review, two short papers, and an even shorter class presentation will be required. [3]

REL6744 - The Evangelical Protestant Movement In America

Title

The Evangelical Protestant Movement In America

Catalog Description

An examination of evangelical traditions from the colonial period to their present manifestations in twentieth century America, with some attention to the European background. Special attention is devoted to debates concerning the authority and inerrancy of scripture, theology, church-state relations, the role of the Christian in society, education, the relationship between science and religion, the church and racism, the moral character of America, and other areas of cultural cleavage. Cultural conflict or "wars of faith" between conservative black and white Christians studied in terms of their historical significance and political implications. [3] Baldwin.

REL6745 - Evangelicalism, Pentecostalism, and the Shape of World Christianity

Title

Evangelicalism, Pentecostalism, and the Shape of World Christianity

REL6746 - Material History In American Religion

Title

Material History In American Religion

Catalog Description

Enables students to become familiar with the use of non-textual sources to help recover the historical record, and aid in the interpretation, of people and movements in American religious history. The first half of the seminar will consist of analysis of exemplary techniques for reading the material culture and evidence of the religious past. The second half will consist of hands-on fieldwork and interpretation of aspects of American religion such as dress, architecture, food ways, rituals, money practices, visual imagery, music, and the use of time. [3] Hudnut-Beumler.

REL6748 - History of Religion in the American South

Title

History of Religion in the American South

Catalog Description

This seminar examines the religious history of the American South from colonization to the present with an emphasis on racial, regional, and gendered aspects of the history. Readings will focus on the interpretation of religion in the South by diverse contemporary historians. Topics include: slave religion, "lost cause" religion, Jewish life in the South, the freedom movement, gospel and blues music, megachurches and the prosperity gospel. [3] Mr. Hudnut-Beumler

REL6749 - Race and Religion in America

Title

Race and Religion in America

Catalog Description

Race and Religion in America explores the historical conflicts and critical questions that emerge at the intersection of race, religion, and nationalism - offering a space for students interested in American history, American religious history, and race in the Americas to consider how American identities have been constituted through subjugation, negotiations, and intersections. By combining two critical topics in American history, the course illuminates the racialized religious myths, symbols, and images encapsulated within the concept of the American. [3] Ms. Wells-Oghoghomeh.

REL6760 - Black Churches and the Quest for Economic Justice

Title

Black Churches and the Quest for Economic Justice

Catalog Description

The efforts of Black women, men, and children to realize justice from their status of being historically oppressed and economically exploited status within U.S. society has contributed greatly to the expansion and evolution of movements to both civil society and political economy in order to include countless other disadvantaged groups - women, immigrants, LGBTQ people, the disabled and the working poor to name a few. Towards this end, the course seeks to help students comprehend diverse visions of human freedom, justice, equality, and dignity predicated upon the intersectional viewpoints of those individuals and communities who have been largely exploited and excluded by the Church, the State, and the Market in the hopes of fomenting the societal transformation necessary to make them the beneficiaries of new laws, sociocultural norms, political rights, religious values, and economic relations. [3] Mr. Floyd-Thomas

REL6762 - Religions of the African Diaspora

Title

Religions of the African Diaspora

Catalog Description

This course is a survey of the religious traditions of people of African descent by exploring the historic and phenomenological connections among diverse religious beliefs, values, rituals, institutions, and worldviews throughout the African Diaspora. Using several methodological and theoretical approaches, the course will explore various forms of experiences and practices that provide a deep understanding and appreciation of the sacred meaning of human existence (myth, doctrine, prayers, rituals, institutions, and symbols) drawn from African-derived faith communities dispersed across the Atlantic World such as indigenous African religions, Christianity, Judaism, Islam, Vodoun, Santería, alternative religious movements, and humanism amongst others.

REL6763 - Religion, Slavery, and the American Civil War

Title

Religion, Slavery, and the American Civil War

Catalog Description

This seminar examines slavery in relation to the religious history of the American Civil War. Based on reading and discussion of primary and secondary sources, the seminar will begin by assessing the development of slavery in colonial America and its relation to religious groups through the American Revolution and the early republic. The seminar will examine religious themes in the debates, protests, and revolts over slavery in the nineteenth century. In addition, the seminar will examine broadly the religious history of the Civil War and its aftermath. [3]

REL6764 - Slave Religion and Culture in the American South

Title

Slave Religion and Culture in the American South

Catalog Description

The cosmologies, theologies, ethics, rituals, and material realities of enslaved Africans and African-Americans beginning in pre-colonial Africa and ending in the Civil War. Music, Movement, Myth, Magic, and Sexuality. [3].

REL6765 - Black Church Studies

Title

Black Church Studies

Catalog Description

This course is an introductory exploration of the historical legacy, progressive traditions, spiritual depth, and social witness of the Black Church as it has been studied through theories and methods that make up the interdisciplinary field of Black Church Studies. Towards this end, we will take a definitive look at the various Black Church Studies sub-disciplines, namely: Black Church History; African American Biblical Hermeneutics; Black Theologies; Black Church, Culture, and Society; African American Social Ethics; African American Pastoral Care, Black Christian Education; African American Worship; and Black Preaching,. The course will also facilitate opportunities for the intellectual, professional, and inspirational development of transformational leadership for students interested in working in or in collaboration with African-American Christian churches and communities. [3] Mr. Floyd-Thomas

REL6766 - Black Religion in Context: Harlem

Title

Black Religion in Context: Harlem

Catalog Description

This course examines the dynamic issues of racial identity and religious diversity within a specific social context. New York City's Harlem will serve as a case study to focus our religious imaginations on the issues of race, religion and social transformation in the United States. Special emphasis will be paid to the Black religious tradition in Harlem and how its religious communities are adapting to pressing social issues and other elements of change such as immigration, urbanization, poverty, and globalization. Also critical to this examination are the ways in which the Black Church tradition adapts to different cultural settings and interacts with other world religions as it attends to the religious pluralism of the twenty-first century world. The course is designed as an interdisciplinary study, and a wide range of methodologies and perspectives will be utilized to investigate these issues. [3]

REL6767 - Cultural Significations and Black Religion

Title

Cultural Significations and Black Religion

Catalog Description

This course focuses on the origins and varieties of religious experience - scriptural interpretations, ritual practices, mythical narratives, symbolic representations, cultural artifacts, vernacular folk traditions, sociopolitical ideologies, and power dynamics - that historically have been subsumed under the heavy-laden concept of "Black religion." Utilizing the work of pioneering historian of religion Charles H. Long, considerable attention will be paid to the process of signifying as a system of general theorizing about the ways in which human beings communicate, seek, and negotiate meaning and social power in both the sacred and secular spheres. Through an interdisciplinary examination of sources drawn from across the African diaspora, this course will emphasize the study of religion in the modern world as both a mode of orientation as well as a process of meaning-making, but with the description and critical analysis of Black religious phenomena--the complex matrix of sights, sounds, movements, and other sensory stimuli--in contradistinction to the invisibility and invalidation imposed upon subjugated peoples around the world by normative Western discourses. [3]

REL6768 - Critical Readings in African American Religion: W. E. B. Du Bois
Title

Critical Readings in African American Religion: W. E. B. Du Bois

Catalog Description

This course is designed to survey the genealogy of African American religious thought. As an intense reading discussion of fundamental texts of W. E. B. Du Bois, the pioneering African American historian, sociologist, activist, and critical theorist, this course will focus on the relationship of his research and the study of African American religious thought in light of the historic and contemporary problems associated with race, class, and gender oppression. [3] Mr. Floyd-Thomas.

REL6769 - The Religious Thought of Howard Thurman
Title

The Religious Thought of Howard Thurman

Catalog Description

This course will explore the prophetic ministry of Howard Thurman (1900-1981) as a minister, scholar, poet, theologian, pastor, and mystic by focusing on key themes in Thurman's thought through an interrogation of his intellectual foundations, spiritual formation, his particular vision of justice-making, mysticism, theological praxis, homiletics, liturgy, and doxology. There will be critical insights into Thurman's intellectual and spiritual growth as well as offering a window onto the landscape of the defining issues, events, movements, institutions, and individuals that shaped his sacred worldview.

REL6770 - Religion And The Civil Rights Movement
Title

Religion And The Civil Rights Movement

Catalog Description

Students who enroll in this course should note that the seminar carries four semester hours. The seminar will examine the religious ideas and individuals that played pivotal roles in the civil rights movement by exploring the theological foundations of the black freedom struggle, the crucial impact of religion in debates about social change, and the participation of religious institutions and organizations in an effort to achieve racial equality. [4] Dickerson.

REL6771 - New Religious Movements
Title

New Religious Movements

Catalog Description

The rise and development of new religious movements in nineteenth- and twentieth-century America. Emphasizes the following themes: utopian, restorationist, and social reform movements in relation to American primitivism and political orders; the role of text and ritual in creating and maintaining religious order and community; and the problematic nature of the sociological categories "sect" and "cult." [3] Mr. J. Floyd-Thomas

REL6772 - Race, Religion, and Protest Music
Title

Race, Religion, and Protest Music

Catalog Description

This course examines how music and other related forms of art emerge from a particular social location in order to: help define pressing social issues; galvanize mass social movements; and function as symbols of protest. Using several methodological and theoretical approaches, the course will explore a wide variety of musical genres such as the spirituals, the blues, gospel, jazz, rhythm and blues, rock and roll, folk music, soul music, punk rock, reggae, Afrobeat, and hip hop in order to determine how racial identity and religious themes have articulated themselves within protest music. Various historical and contemporary examples derived from cross-cultural perspectives will be used to illustrate the impact of race and religion on social protest music.

REL6773 - Reel Black Faith: Race, Religion, and Film
Title

Reel Black Faith: Race, Religion, and Film

Catalog Description

This course is an examination of the religious and spiritual dimensions of films selected from across the African diaspora through from the silent film era to contemporary cinema. The emphasis of this course will focus on race, gender, class, sexuality, nationality, and other aspects of social location juxtaposed with theological concepts, spiritual concerns, religious imagery, and moral values to better understand the interplay of cinematic representation of Black religious experience. [3]

REL6775 - Seminar in Black Religion and Culture Studies
Title

Seminar in Black Religion and Culture Studies

Catalog Description

As an emergent field, Black Cultural Studies is interdisciplinary and has greatly developed since the late 1960s from a few Black Studies programs and departments at a few notable universities, Yale leading the way in the early 1970s. The conversation has grown with the increase in student enrollments in black philosophy, black queer studies, and women's studies programs, on the one hand, and traditional theological studies, on the other. Black Religion and Culture Studies appears most appropriate as a rubric of study. It best captures the ambiguities of history, culture, and religion signified by the larger discourse on the Black Atlantic. The discourse includes not only the North American, but also Caribbean and Brazilian diaspora cultures and Black Britannia. Black Religion and Culture Studies displays a concerted methodological interest in bringing Black Culture Studies into conversation with the study of black religion as defined by Charles H. Long with a focus on the history of religions approach and phenomenological hermeneutics. [3] Mr. Anderson

REL6777 - Black Prophetic Witness: Martin Luther King, Malcolm X, and James Baldwin
Title

Black Prophetic Witness: Martin Luther King, Malcolm X, and James Baldwin

Catalog Description

This course is a study of Martin, Malcolm, and Baldwin as the three distinctly Modern US prophetic voices that have not only marked the distinctive and diverse genius of the civil rights movement to which they greatly contributed but also the ways in which their writings, theologies, and activism inform the depths of theological education and religious studies for this present generation as their religious heritage, cultural context, spiritual/personal formation and global leadership have expanded and evolved to include the scholarly trajectories and political platforms of countless marginalized groups who strive to reconcile social justice with divine justice. In this class we will see how these three modern day prophets have inspired countless marginalized groups-women, immigrants, LGBTQ people, the disabled and the working poor to name a few-who found themselves the beneficiaries of new laws, social customs, and religious perspectives due to their legacy. Through an examination of their respective religious worldviews and writings, this course will compare and contrast the personal, political and religious basis of the formation of their Black prophetic discourses. [3]
Mr. Floyd-Thomas

REL6790 - African American Methodism
Title

African American Methodism

Catalog Description

Examines how African Americans interpreted and implemented their understanding of Wesleyan theology and blended it with their African and African American religious sensibilities. The impact of black Methodists in both African American and majority white bodies and upon freedom movements in the United States and the world will be explored. [3]

REL6791 - The History of the United Methodist Tradition
Title

The History of the United Methodist Tradition

Catalog Description

The history of United Methodism from its rise in England in the eighteenth century to the present. Forces that have shaped the movement and its impact on its own culture. Consideration of John Wesley and English Methodism (to 1790). Examination of Methodism on the American scene. [2-3]

REL6793 - Topics in Digital Humanities
Title

Topics in Digital Humanities

Catalog Description

The course provides an introduction to the theory and methods of the digital humanities. This course is designed for graduate and professional students across the disciplines of the humanities. Students engage with theoretical questions concerning the application of digital methods to research in the humanities, they will be trained in practical digital research skills such as the guidelines of Text Encoding Initiative. By the conclusion of the course, students will have built a working prototype of a digital database specific to their research needs. [3]
Mr. Michelson

REL6796 - Human Rights, Human Trafficking, and Re-making of Global Christianity

Title

Human Rights, Human Trafficking, and Re-making of Global Christianity

Catalog Description

Issues surrounding human rights advocacy, especially regarding human trafficking, have become a key contemporary ethical concern. This course will offer a historical survey on the way global Christian communities-particularly the Pentecostals and evangelicals-have been evolving in its attitude toward social justice and commitment to eradication of human trafficking. A crucial interpretive key is identifying the contribution made by Christians from the Global South in resisting neocolonial encroachments from the West, and situating their biblical hermeneutical praxis of subverting trends-economic, ethical, political and cultural-that further perpetuate human rights violations and trafficking of persons. Particular attention will be given to Christian communities in Kenya, India, South Korea and the United States. [3] Mr. Lim

REL6797 - Colonialism, Christ, Capitalism: Reformation, Christianities, and the Advent of Modernity

Title

Colonialism, Christ, Capitalism: Reformation, Christianities, and the Advent of Modernity

Catalog Description

The period popularly known as "Reformation in Europe" also overlapped with the birth and expansion of the early modern Empires: Spain, Portugal, England, France, and the Dutch Republic. This class transcends the boundaries between religious, political and economic history, with particular attention to the development of theologies of salvation among the Catholic and Protestants; articulation and defense of racial hierarchies encoded within Christian theo-grammar; and justification and promotion of capital and goods for the dual sake of Empire and Ecclesia. In so doing, the class will serve the purpose of contextualizing the currently popular concepts of colonialism, capitalism, and critique of religious nationalism. Key texts will be drawn from both Catholic and Protestant traditions, as well as from materials pertaining to the racial and religious Others from the "New World." [3] Lim

REL6801 - Introduction to Christian Theology

Title

Introduction to Christian Theology

Catalog Description

In this introduction to the discipline of theology, students will gain practice in reading, thinking, discussing, and writing critically and constructively about central themes, questions, and issues in Christian life, faith, and thought. Students will reflect on and with important historical and contemporary theological texts in light of past and present challenges. Themes include the nature and tasks of theology, revelation, God, human being, Christology, pneumatology, ecclesiology, and eschatology. (The prerequisites are Divinity 6500, Hebrew Bible; Divinity 6600, New Testament; Divinity 6700, History of Global Christianities, Part I; Divinity 6708, History of Global Christianities, Part II.) [3]

REL6803 - The Skill and Practice of Theological Conversation

Title

The Skill and Practice of Theological Conversation

Catalog Description

This course is an introduction to the skills that inform theological literacy and to the critical thinking that sustains theological reflection. The primary focus will be on introducing students to the habit of theological reflection, and it presupposes very little background knowledge of Christian theology or the Christian theological tradition(s). Students will engage in short, close readings of a wide variety of primary sources, ancient and contemporary, in order to analyze the logic of theological claims, and the varying ways theological discourse addresses its ever-changing situation. Attention will be paid to the function of doctrine in theological discourse, the sources and norms employed in theological formulation, and the theologian's relationship to philosophical, cultural, and political contexts.

REL6805 - Christian Praxis: Liturgy and Ethics

Title

Christian Praxis: Liturgy and Ethics

Catalog Description

This seminar seeks to understand the interrelated roles of sacrament, word, and ethics in the praxis of Christian faith in church and society. Methodologically focused, the course attends to history, major theologians, and current constructive proposals in the areas of early Christian sources, fundamental and political theology, and liturgical and sacramental theology. [3] B. Morrill

REL6807 - Suffering, Politics, and Liberation

Title

Suffering, Politics, and Liberation

Catalog Description

Close reading of biographical and theological texts to explore the practical role religious faith plays in people's experiences and responses to suffering caused by systemic injustice in societies. Primarily focused on Christianity in North and South America and Europe, along with examples of indigenous American religion and Islam, study includes perspectives of women and men of a variety of races. [3] B. Morrill

REL6809 - Eucharistic Theology

Title

Eucharistic Theology

Catalog Description

This course examines Eucharistic theology and practice as the sacramental source and summit of Christian life in community and its individual members. Study of historical and contemporary sources will encourage the development of a critical appreciation of what liturgy does, a constructive theology of the faith revealed in symbol and ritual, and why this all matters ecclesially, pastorally, and ethically. [3] Morrill

REL6810 - Theories Of Race, Gender, Sexuality, And Disability

Title

Theories Of Race, Gender, Sexuality, And Disability

Catalog Description

Recently many subfields of religious studies, including theology, have taken up theories of race, gender, and sexuality generated by scholars in the humanities and social sciences. This course will cover important texts in the theoretical literature with an eye toward their import for constructive work in theology and other subfields. In addition to critical race theory, gender theory, and queer theory, we also will explore the emerging field of disability theory. [3] Armour.

REL6811 - Participation: Ritual Theory and Theology

Title

Participation: Ritual Theory and Theology

Catalog Description

A reading-intensive graduate seminar studying historical and contemporary Christian theologies of participation (koinonia/communio) and a selection of current ritual theories with a view toward constructive proposals for various theological sub-disciplines. [3] Morrill

REL6812 - Theologies of Salvation

Title

Theologies of Salvation

Catalog Description

From the origins of Christianity, salvation has been a fundamental symbol for expressing and reflecting upon experiences and proclamation of what God has done for humanity (and all creation) in the person and ongoing mission of Christ Jesus, in the power of the Spirit. This course surveys theologies of salvation-both theories and practices-through Christian history and in selected diverse contemporary contexts. [3] Morrill

REL6820 - God In The Western Tradition

Title

God In The Western Tradition

Catalog Description

The major philosophical and theological texts of the Western tradition from Plato to the twentieth century. The changing history of the interpretation of God from Christian neoplatonism to nineteenth- and twentieth-century challenges of classical approaches. [3] DeHart.

REL6821 - Thomas Aquinas

Title

Thomas Aquinas

Catalog Description

Systematic investigation of Aquinas' major theological and philosophical assertions by considering his conception of the two disciplines and their relationships. All readings will be available in English translations. [3] DeHart.

REL6822 - Theology In The Nineteenth Century

Title

Theology In The Nineteenth Century

Catalog Description

Major movements during the nineteenth century, from Schleiermacher to Troeltsch. [3] DeHart.

REL6823 - Kierkegaard The Theologian

Title

Kierkegaard The Theologian

Catalog Description

An advanced exploration of Kierkegaard's philosophy of Christian belief, with particular attention to his analysis of faith, the relation of ethics and religion, sin and human existence, and his metaphysical and theistic assumptions. Based on close reading and classroom analysis and discussion of selected texts from the pseudonymous authorship. [3] DeHart.

REL6824 - Theology Of Karl Barth

Title

Theology Of Karl Barth

Catalog Description

An introduction to the thought of one of the most important and controversial theologians of the twentieth century. [3] DeHart.

REL6825 - Seminar in Rahner, Schillebeeckx, and Metz

Title

Seminar in Rahner, Schillebeeckx, and Metz

Catalog Description

This reading-intensive seminar provides the opportunity to study works by three of the most significant Roman Catholic theologians of the second half of the twentieth century. Study of these three authors, then, will access a certain trajectory in systematic-theological content and methods that emerged from the era of the Second Vatican Council. [3] B. Morrill

REL6826 - St. Paul and Continental Philosophy

Title

St. Paul and Continental Philosophy

Catalog Description

A number of prominent philosophers in Europe have surprisingly 'rediscovered' Jewish and Christian monotheism and eschatology, and especially the writings of Paul, as a resource for thinking in radical new ways about politics, ethics, and social agency. This course brings students into engagement with texts by these thinkers, but also with earlier texts similarly on the boundary between theology and philosophy that helped contribute to this recent development. Authors include Karl Barth, Carl Schmitt, Walter Benjamin, Jacob Taubes, Alain Badiou, Giorgio Agamben, Slavoj Zizek, and Michel de Certeau. [3] Mr. DeHart

REL6827 - Theology of Dietrich Bonhoeffer

Title

Theology of Dietrich Bonhoeffer

Catalog Description

Through close reading and discussion students will gain a sense of the development and unity of Bonhoeffer's thought, and also of the relation of that thought to his biography. They will also be encouraged to think more deeply and critically about their assumptions concerning the nature of moral and political existence in light of the God of Christian belief. [3] Mr. DeHart

REL6840 - Seminar In Systematic Theology

Title

Seminar In Systematic Theology

Catalog Description

An advanced seminar (required for doctoral students in the theology area) deals with a topic or figure of general theological importance; instructor and topics change yearly. [3]

REL6841 - Process Theology

Title

Process Theology

Catalog Description

Contributions made to Christian theology by the tradition of process thought, and the questions raised for process thought by the character of Christian theology. [3]

REL6842 - Practical Theology

Title

Practical Theology

Catalog Description

This seminar explores the development of practical theology as an academic discipline, focusing primarily on its revitalization in the last half-century, current debates, and future potential. [3]

REL6843 - Theology In The United Methodist Tradition

Title

Theology In The United Methodist Tradition

Catalog Description

A survey of theological developments in the United Methodist tradition, beginning with John Wesley and the rise of the Methodist movements, and ending with current debates. This course will consider the distinct contributions of Methodist theology in the context of Christianity, other religious traditions, and the world. United Methodist doctrinal statements are explored in light of the difference they are making and have made, both locally and globally. [2] Mr. Rieger

REL6844 - Contemporary Theology

Title

Contemporary Theology

Catalog Description

The major movements in Christian thought from the beginnings of dialectical theology to the present. [3]

REL6845 - Feminist Womanist Theology

Title

Feminist Womanist Theology

Catalog Description

Introduce students to the classic texts and themes of feminist, womanist, and mujerista theologies as well as to current issues and important texts on the relationships among sexuality, gender, and race, the validity of "women's experiences" as sources for feminist theological reflection, and feminist critiques and reconstructions of traditional theological loci. [3] Armour.

REL6846 - Queer Theology

Title

Queer Theology

Catalog Description

This course examines emergent queer theology in relationship to the theological and cultural issues (historical and contemporary) that it seeks to address.

REL6847 - Theology And Contemporary Continental Philosophy

Title

Theology And Contemporary Continental Philosophy

Catalog Description

Certain continental philosophers are central to the so-called "return of the religious" in contemporary thought. This course will explore this development through readings in major figures in the field and in appropriations of and responses to their work by theologians.

REL6848 - Religion, Economics and Labor

Title

Religion, Economics and Labor

Catalog Description

Growing disparities between those who have to work for a living (the 99 percent) and those whose wealth and power derives from other sources affect all of us. This course is designed to engage students in explorations of how these disparities shape us all the way to the core in religion, politics, and economics, and what viable alternatives might look like. Traditions from the three Abrahamic religions, Judaism, Christianity, and Islam, will be presented in order to conceptualize justice from the perspective of the exploited and the oppressed, considering possible divine options for the margins, and how emerging movements of solidarity along the lines of class might shape deep solidarity along the lines of race, ethnicity, gender, and sexuality. This course will combine theological reflection, ethical imagination, and practical suggestions for organizing. [3] Mr. Rieger

REL6851 - Visions of the Future

Title

Visions of the Future

Catalog Description

Critical and postmodern theories in gender, colonialism, race and sexuality emphasize dystopic possibilities for the future, whereas religious traditions emphasize eutopic eschatologies. Examination of the intersection of theories and imagination on the theological question of the future. [3]

REL6854 - Native American Philosophies and Theologies

Title

Native American Philosophies and Theologies

Catalog Description

An in-depth study of key concepts and shared principles in philosophical, theological, and anthropological texts by selected Native American writers (Cordova, Waters, Bruchac, Grande, Norton-Smith); social, historical, and political contexts, and the challenges and contributions they offer to contemporary philosophical, ethical, and religious questions. [3] Ms. Schneider

REL6855 - Theologies of Multiplicity

Title

Theologies of Multiplicity

Catalog Description

Exploration of recent theological and philosophical works relating to multiplicity and relationality. Emphasis on questions of ontology and new materialisms, embodiment, liberation, poetics, and Christian ideas of incarnation. [3]

REL6856 - Theology Between God and the Excluded
Title

Theology Between God and the Excluded

Catalog Description

Four major turns have shaped theology since the beginnings of modern theology in the eighteenth and nineteenth centuries: the turns to the self, the divine Other, the texts of the church, and to other people. This course provides a critical and constructive engagement of these turns in light of the location between God and the increasing numbers of persons excluded from the resources of life, in which religious communities find themselves today. Here, theology becomes a matter of life and death. What contributions can theological discourses make to support life? What are the potential pitfalls and challenges? What are the options for the future of theology and religion more broadly conceived? The goal is to explore and develop constructive theological paradigms and liberative practices that emerge in the creative tensions of various theologies and the multiple pressures of life. [3] Mr. Rieger.

REL6857 - Derrida's Death Penalty Volume II
Title

Derrida's Death Penalty Volume II

Catalog Description

This seminar examines the philosophical argument against the death penalty presented in the "teaching lectures" delivered by Jacques Derrida. [3] Ms. Armour and Ms. Oliver

REL6858 - Theology, Religion, and Postcolonialism
Title

Theology, Religion, and Postcolonialism

Catalog Description

This seminar explores postcolonial/decolonial theories and their interconnections with the study of religion and theology. The goal is to engage in critical conversations that develop religious and theological discourses in the context of particular postcolonial/decolonial struggles in global perspective. Of particular interest are constructive proposals that do not merely reproduce or copy existing theories. [3] Mr. Rieger

REL6859 - Theology, Visual Culture, and New Media
Title

Theology, Visual Culture, and New Media

Catalog Description

In recent years, a dramatic change has occurred in our media landscape. Online social media outlets - Facebook, Twitter, Instagram and the like - are now ubiquitous. Legacy media players (newspapers, magazines, television news) have moved online as well often partnering with social media to share content and attract readers and viewers. Faith communities are part of this shift, as well, using on-line platforms as auxiliaries to brick and mortar presence and/or to create new and experimental forms of community. Drawing on scholarship on visual culture and new media, this course explores the theological, political, and communal import of these changes. [3] Ms. Armour

REL6861 - Feminism, Religion, and Race: Mary Daly and Audre Lorde
Title

Feminism, Religion, and Race: Mary Daly and Audre Lorde

Catalog Description

This is a figure seminar on two mightily formative writers of the 20th century in theology and literature. This means that the reading list will be entirely composed of their own works. We will focus on their individual developments and will reflect on various issues in gender, religion, and race that they appear to share, as well as those that publically divide them. [3] Ms. Schneider

REL6862 - Ethical Approaches to Preaching
Title

Ethical Approaches to Preaching

Catalog Description

This course investigates four ethical approaches to preaching: the social gospel and activist ethics within the preaching of the civil rights movement, the countercultural ethic within post-liberal homiletics, the communicative ethic within conversational and collaborative homiletics, and the ethic of risk and solidarity in liberationist homiletics. Students will preach sermons that make use of these theoretical and theological approaches. [3]

REL6870 - The Craft of Academic Writing in Theology and Religion
Title

The Craft of Academic Writing in Theology and Religion

Catalog Description

This course is focused on the craft of academic research and writing in theology and religion and is designed around opportunities for practicing the craft, giving and receiving feedback, honing a publishable article, and reading memoirs on writing and literature on the craft of research and writing. Restricted to graduate students. Divinity students by request only. [3]

REL6893 - African American Biblical Interpretation
Title

African American Biblical Interpretation

Catalog Description

This seminar attends to the aesthetics and politics of African American Biblical interpretation during the Harlem Renaissance, the eras of Civil Rights and the Black Power Movements, and within the rise of Black Academic Biblical Interpretation. [3]

REL6900 - Introduction To Homiletics
Title

Introduction To Homiletics

Catalog Description

The course is an examination of the theologies and methods of preparing sermons from Biblical texts and an exploration of hermeneutical approaches, oral/aural skills, rhetorical strategies, narrative and connective logic; students are responsible for developing a working theology of the Word, reviewing major homiletic theories, completing exegetical assignments, skill-building exercises, sermon sketches, and sermon manuscripts; in-class preaching is required. [3]

REL6901 - Fundamentals of Preaching

Title

Fundamentals of Preaching

Catalog Description

Examination of theologies and methods of preparing sermons from Biblical texts. Hermeneutical approaches, oral/aural skills, rhetorical strategies, narrative and connective logic. Students are responsible for developing a working theology of the Word, review of major homiletic theories, exegetical assignments, skill-building exercises, sermon sketches, and sermon manuscripts. In-class preaching required. [3]

REL6903 - Worship Across Traditions and Cultures

Title

Worship Across Traditions and Cultures

Catalog Description

Working to expand our familiarity with preaching and worship across denominational and cultural patterns and across faith traditions, this course will study preaching and worship practices and formation that embrace the ever-increasing experience of multiculturalism or pluralism within and between faith communities. [3]

REL6907 - Preaching the Headlines

Title

Preaching the Headlines

Catalog Description

This course examines the use of current events at local, national, and global levels within the creative process of preaching. Subject exploration will include, but is not limited to matters of gender and sexuality, race, violence, poverty, the environment, and religion. The goal of the course is to help participants become astute in the pastoral and prophetic practices of proclamation that engage the world in which we live; critical processes of theological reflection support these practices. [3] Ms. Thompson

REL6921 - Oratory and Rhetoric for Proclamation

Title

Oratory and Rhetoric for Proclamation

Catalog Description

This course studies the formulaic oratory structures of folk traditions among oral cultures and rhetorical structures of public discourse among classical and contemporary traditions for homiletics and the preaching event. [3]

REL6922 - Ministry, Voice, and Vocation: Civil Rights, Martin Luther King Jr., and Preaching

Title

Ministry, Voice, and Vocation: Civil Rights, Martin Luther King Jr., and Preaching

Catalog Description

This course will integrate study in the social and preaching ministries of Martin Luther King Jr. The course will explore the social and cultural contexts of King's life from a national and global perspective, giving careful attention to the secular and sacred elements that shaped both his life and the Civil Rights movement. The critical theological voices and practical theological influences that shaped his ministry and mission will serve as evaluative material for analysis of his voice in American religion. This course will also weigh this important dialectic for preaching and social justice ministry in the contemporary Church extending between cross-cultural and multi-cultural public ministries. Primarily, our examination of the sacred-secular dialectic in public ministry, exemplified by King and the Civil Rights era, will be oriented to issues of race, gender, and class, which in the end evaluates or explores the pastoral-prophetic dialectic of preaching and public ministry to deal with social conflict or oppressive conditions today. [3]

REL6924 - Preaching In The African American Tradition

Title

Preaching In The African American Tradition

Catalog Description

The theology and styles of black preaching. Sermons of the most effective black preachers of today and yesterday. Methodologies for effective outlining, manuscript development, and use of illustrations are discussed. [3]

REL6925 - Preaching Theology

Title

Preaching Theology

Catalog Description

In-depth exploration of the ways that theology comes to play in sermon preparation and preaching. Particular attention is given to the presence in preaching of theological methods, authorities (scripture, reason, experience, and tradition), theistic worldviews, theodicies, models of church and culture, ideas of atonement, the relationship between religions, and personal and historical eschatologies. Graduate students will be expected to do sermon analyses and/or preach twice for the class. [3]

REL6927 - New Perspectives on Preaching

Title

New Perspectives on Preaching

Catalog Description

Homiletic theory and practice have undergone tremendous changes in the past century. This course traces developments from the deductive and propositional homiletics of the late nineteenth century, through the liberal topical and "project" method of the early twentieth century, new-orthodox and Barthian emphases, inductive homiletics, narrative homiletics, structuralist and phenomenological models, and more recent postmodern construals of homiletic theory. Students will read and analyze sermons using these theories, and opportunity will be given to construct sermons using these methods as well. [3]

REL6928 - Non-pulpit Preaching: Homiletics in Popular Culture

Title

Non-pulpit Preaching: Homiletics in Popular Culture

Catalog Description

What religious themes are prevalent in popular music today? How does popular music shape religious identity? How does faith shape popular music? What religious and spiritual experiences shape how music is heard, performed, consumed, or otherwise experienced? How is the music industry shaped by, and a shaper of, religious truth and identity today? These are among the questions this course will seek to address. [3]

REL6931 - Readings in Liturgical Theology

Title

Readings in Liturgical Theology

Catalog Description

This seminar course will explore diverse topics in liturgical theology, including history, specific liturgical traditions (both denominational and cultural), pedagogy, ritual studies, feminist and gender studies, multicultural worship and inculturation, ecumenics and liturgical renewal, liturgical language, the arts, ethics, pastoral care, and contemporary liturgical theology. It will also look at different methodologies employed for the use of liturgical studies, especially in the study of historical texts. This course is designed for those students who want an in depth look at liturgical theology, particularly doctoral students preparing for their comprehensive exams in this area. [3]

REL6932 - Voice, Imagination, and Sacred Utterances

Title

Voice, Imagination, and Sacred Utterances

Catalog Description

This course explores using one's voice as act of imagination that is connected to our deepest convictions. Participants will engage various genres of historical and contemporary works and place these works in conversation with traditions of religious rhetoric (including: sermons, testimonies, prayers, and speeches). [3]

REL6940 - Homiletic Analysis

Title

Homiletic Analysis

Catalog Description

Students will learn criterion and skills for analyzing, evaluating, and providing feedback on sermons. The course will focus on establishing essential criteria for sermon evaluation, learning methods for offering sermon feedback in small groups, and developing skills for individual sermon supervision. [3]

REL6941 - Practical Theology and the Public Church

Title

Practical Theology and the Public Church

Catalog Description

This course studies practical theology topics and methods/methodology for the church's role in society/public arena, dealing with public theology and a range of social, cultural, economic, and political issues. [3]

REL6942 - Liturgy and Preaching

Title

Liturgy and Preaching

Catalog Description

An exploration of the historical roots of liturgical preaching, preaching and sacraments, preaching the Church Year and other calendars, lectionary preaching, preaching inclusivity and worship, preaching performance and worship arts, and occasional sermons in liturgical context. [3] Staff

REL6943 - Bodies Power and the Pulpit

Title

Bodies Power and the Pulpit

Catalog Description

This course examines the interplay of embodiment and power as they connect to culture, the pulpit space and rhetoric, the person of the preacher, and Scripture. Participants will engage texts, films, and colleagues in order to inform a critical discussion about the tasks, content, and performance of preaching. [3] Ms. Thompson

REL6944 - Language, Communication, and Practical Theology

Title

Language, Communication, and Practical Theology

Catalog Description

Most works in the field of practical theology contain normative assumptions about the nature of language and communication. These assumptions inform the analysis of situations, persons, or contexts, and influence the theology shaped in light of those analyses. This course will look especially at the ways in which poetics (theories of myth, symbol, and metaphor), speech act theory, semiotics, rhetoric, narrative theory, communicative action theory, cultural hermeneutics, and ritual theory inform a range of texts in practical theology. Scholars of language and communication under consideration are Suzanne Langer, Kenneth Burke, Claude Levi-Strauss, James Carey, J. L. Austin, Paul Ricoeur, Catherine Bell, Northrop Frye, Gregory Bateson, Ferdinand de Saussure, Alfred Schutz, Jean Piaget, C.S. Pierce, Ian Barbour, and Victor Turner. Practical theologians under consideration include James Fowler, James Hopewell, Denham Grierson, Robert Shreiter, Alex Garcia-Rivera, Don Browning, Elaine Ramshaw, Herbert Anderson, and Edward Foley, James Loder, Mary Fulkerson, Johannes A. Van der Ven, Gerrit Immink, and Gerben Heitink.

REL7000 - Pastoral Theology And Care

Title

Pastoral Theology And Care

Catalog Description

This course introduces students to basic theories and methods of pastoral care, especially in the ecclesial context. This course assumes that care is mediated through acts of pastoral leadership, liturgy, preaching, and the forming of congregational life and programming as well as through specific individual conversations. Special attention is paid to the person of the pastor as caregiver and leader of a community of faith and care. [3]

REL7002 - Pastoral Care and Global Consumerism

Title

Pastoral Care and Global Consumerism

Catalog Description

This course delineates the salient features of late capitalism, often designated by the term neoliberalism, and its profound effects upon global politics and economics, societies, communities, and institutions. It focuses particularly on how contemporary technologies and cultural assumptions extend the influence of free markets into interpersonal relationships and individual selves, as well as into religious congregations, theological reflection, and the practices of pastoral care and counseling. In each instance it asserts that the effects include distorted notions of freedom, identity and tolerance, as well as affective alterations, all of which erode or even corrupt these areas of life and thus contribute to widespread human suffering. Finally, it explores possible practices for congregations and pastoral caregivers that might oppose and alleviate these effects, as well as theories that might guide such practices. [3]

REL7003 - Theology and Personality

Title

Theology and Personality

Catalog Description

This seminar from the pastoral theology and counseling discipline explores variable topics. [3]

REL7004 - Theories Of Personality

Title

Theories Of Personality

Catalog Description

A study of representative theorists within each of the four forces of psychology to clarify alternative understandings of the nature of personality and approaches to the psychological sciences. Attention is given to relationships with pastoral theology and counseling. [3] B. Miller-McLemore.

REL7005 - Methods In Theology And The Social Sciences

Title

Methods In Theology And The Social Sciences

Catalog Description

A study of the relationship of theology and science in general and religion and personality theory specifically. Uses several classic models as illustrative of the ways that persons have attempted to bring these two disciplines and enterprises together. [3] B. Miller-McLemore.

REL7021 - Women, Psychology, And Religion

Title

Women, Psychology, And Religion

Catalog Description

An exploration of the psychological and religious ideas that support a system of advantage based on gender and sexuality, with particular focus on women's development, self-concept, and altered views of counseling and religious practice. [3] B. Miller-McLemore.

REL7022 - Men, Psychology, and Religion

Title

Men, Psychology, and Religion

Catalog Description

This course undertakes an examination and critique of culturally dominant forms of "masculinity" and explores alternative versions, utilizing contemporary social theories, historical perspectives, psychological theories, religious practices and theology. [3] Rogers-Vaughn

REL7023 - Bodies and Theological Knowledge

Title

Bodies and Theological Knowledge

Catalog Description

This class will be conducted as a seminar based on shared reading and discussion rather than lecture and will explore the question of how theological knowledge is shaped in and through the body, focusing on exploratory reading in human science research, critical theory, constructive theology, and practical theology. [3]

REL7024 - Theology and Health in a Therapeutic Culture

Title

Theology and Health in a Therapeutic Culture

Catalog Description

Introduces the empirical study of the relationship between health and religion. The ways in which the disciplines of theology, religion, psychology, and medicine inform these studies are examined. [3]

REL7026 - Self And Social Context

Title

Self And Social Context

Catalog Description

Pastoral theology and practices of care are aided and directed by operative understandings of the self. What is the self? Is it real? Is it universal? How does it come into being? How does it develop, and how does it relate to the divine? These are fundamental questions in pastoral theology. Responding to the insights of feminists, social theorists, and philosophers, contemporary pastoral theologians have been revising their theological anthropologies to include an understanding of the self that takes more seriously its social dimensions. What does attention to the situated self tell us about effective pastoral care, the meaning of healing/salvation, and the nature of God? In this course we will read social scientific, philosophical, and theological accounts of a self formed within its social, institutional, and cultural contexts. We will also explore the implications of this theological anthropology for a variety of practices. [3]

REL7029 - Evil, Aggression and Cultural Trauma

Title

Evil, Aggression and Cultural Trauma

Catalog Description

Evil, Aggression and Cultural Trauma: This advanced course is concerned with the lived experience - and life shaping reality - of evil, aggression and cultural trauma. The course will concern itself with the "habitus" of evil and aggression and the the trauma of culture as well as traumas acted against, upon and throughout the cultural landscapes in which we are embedded. Religion, Psychology and Culture course aimed at advanced masters level students and doctoral students in need of a course on trauma and religion. Doctoral students will, in addition to other course requirements, write a research paper appropriate for submission for publication and/or presentation at a guild conference.

REL7032 - Womanist Ethnography

Title

Womanist Ethnography

Catalog Description

This course introduces students to womanist ethnography generated by Black and Brown women, primarily of the US, who identify as womanist and whose research approach is ethnographic and centered around the lives of black diasporic experience in religion and society. This class re-situates knowledge production by decentering notions of "objective" vs. "subjective" vs. "intersubjective" vs. "intrapsychic" and directs our attention to narrative, stories, and process as epistemological sources of theory and practice.[3] Ms. Sheppard

REL7033 - Seminar in Catastrophe, Trauma, and Hope

Title

Seminar in Catastrophe, Trauma, and Hope

Catalog Description

In this course we will analyze the practical and ideological implications of a hope that lies at the center of community, not at the end of times. We will explore monstrosities, crisis that can trigger trauma, and catastrophes in search of new revelation through sustainable practices of hope. We will speak of collective patterns that are influenced by trauma that especially minoritized bodies continue to experience. [3]

REL7037 - Shame And Guilt

Title

Shame And Guilt

Catalog Description

Students enrolled in this seminar will examine the dynamics of shame and guilt in social and personal life from theological, psychological, and pastoral perspectives. [3] Flesberg.

REL7038 - Sexuality: Ethics, Theology, And Pastoral Practice

Title

Sexuality: Ethics, Theology, And Pastoral Practice

Catalog Description

A critical investigation of selected readings in the general area of sexuality, intimacy, and relationships as they inform pastoral practice. Uses autobiography and case study methods in conversation with theories in social sciences, ethics, and theology. [3] Flesberg.

REL7039 - Gender, Sexuality, And The Family

Title

Gender, Sexuality, And The Family

Catalog Description

Addresses such issues as divorce, custody, blended families, reproductive issues, infidelity and adultery, unpaid labor in the household, rape, incest, domestic violence, and coming out. The class will focus on the delivery of pastoral care and counseling related to these issues and will also address the utilization of community resources to facilitate further care. The course's design seeks to equip those who intend to be front-line care providers; an introductory course in pastoral care is a prerequisite unless approval is given by the instructor. [3] Flesberg.

REL7040 - Pastoral Theology For Transitions And Crises

Title

Pastoral Theology For Transitions And Crises

Catalog Description

Examines various pastoral responses to persons facing transitions (e.g., birth, vocational choice, partnering, marriage, aging, and dying) and crises (e.g., illness, bereavement, and interpersonal discord). Close attention paid to the theological and psychological dimensions of these experiences. Current research in coping and religious coping theory to develop strategies for theological reflection and pastoral action. Prerequisite; 7000. [3] Flesberg.

REL7041 - Pastoral Care for Persons with Mental Disorders and Addictions

Title

Pastoral Care for Persons with Mental Disorders and Addictions

Catalog Description

In this seminar, students engage in a rigorous examination of the behavioral patterns that characterize addictions and study the effects of the addictive behavior not only on the patient but upon the patient's family and peers. The course will also explore the different approaches to pastoral care both to the patient and to those who are affected by the patient's illness.

REL7042 - Seminar in Pastoral Care: Death and Dying

Title

Seminar in Pastoral Care: Death and Dying

Catalog Description

Addresses the issues of theology and pastoral practice that pertain to ministering to the dying and the bereaved. Participants will have opportunities to consider and to clarify their theological postures regarding theodicy, eschatology, sin and sickness, prayer, suicide, euthanasia, and hope. The course also will examine how ones' theological commitments translate into authentic acts of care such as accompanying the dying, offering support to the bereaved, and assisting the family in making decisions.

REL7049 - The Religious Self According to Jung

Title

The Religious Self According to Jung

Catalog Description

The religious core of human existence as related to the concepts of the archaic unconscious and the birth of the self in C. G. Jung's analytical psychology. Study of the life and thought of Jung as illustrated by his autobiography, Memories, Dreams, Reflections. Critical assessment of his theory as a means of understanding religious phenomena. [3]

REL7050 - Psychology Of Ritual And Myth

Title

Psychology Of Ritual And Myth

Catalog Description

Examination of religious rituals and myths from both Christian and other traditions. Critical review of major psychological theories of ritual and myth and their relevance to an understanding of myth and ritual as religious phenomena. To be offered alternately with 3752. [3] Gay.

REL7051 - Freudian Theories And Religion

Title

Freudian Theories And Religion

Catalog Description

An intense reading and discussion of fundamental texts in psychoanalysis and their relationship to Freud's critique of religion. The basic requirements and texts are introductory; more advanced students can use supplementary texts and approaches. [3] Gay.

REL7052 - Post-Freudian Theories And Religion

Title

Post-Freudian Theories And Religion

Catalog Description

An examination of the Object Relations school of contemporary psychoanalysis (M. Klein, D. Winnicott, W. R. D. Fairbairn, Otto Kernberg, Heinz Kohut). Focus on both the clinical and the explanatory theories as they relate to the examination of religious experience and similar self states. [3]

REL7053 - Contemporary Psychotherapy And Pastoral Counseling

Title

Contemporary Psychotherapy And Pastoral Counseling

Catalog Description

Recent trends in psychotherapy. Theories of personality and personality change, as do strategies for psychotherapy. Students will assess critically the implications of these theories for pastoral counseling.

REL7054 - Critical Issues In Psychotherapy

Title

Critical Issues In Psychotherapy

Catalog Description

Examination of key areas of psychotherapy including patient's experience of therapy, unconscious thought processes in therapy, interpretation as intervention, transference and the interpretation of transference. [3] Gay.

REL7055 - Play, Subversion, and Change

Title

Play, Subversion, and Change

Catalog Description

Designed for those pursuing pastoral leadership, this seminar explores play and its liminal quality as foundational to social life in general and a spiritual/religious life in particular. Play is a practice that restores and rejuvenates even as it facilitates emotional, relational, and spiritual well-being. As a form of knowing, play teaches, informs, and invites discoveries. Through select readings, seminar participants will become knowledgeable about the anthropological and sociological roots of play, the neuroscience and psychodynamics behind play, play and human development, and various other dimensions of play (such as ritual, fantasy, rough-and-tumble, and technological play). Playful practices will be explored and special attention will be given to play within pastoral leadership and religious education. Mr. Hamman [3]

REL7056 - Pastoral Care and Community Justice

Title

Pastoral Care and Community Justice

Catalog Description

This course situates pastoral care as communal in nature and invested in pastoral theology and practices that seek to listen to and effectively collaborate with those in communities subjected to structural and interpersonal injustices. [3] Ms. Sheppard

REL7057 - Franz Fanon's Psychology: Race, Gender, and Religion
Title

Franz Fanon's Psychology: Race, Gender, and Religion

Catalog Description

This course is an introduction to the work of Franz Fanon and will explore his critical psychology as a resource for understanding the psycho-cultural dynamics of racial and gender oppression, anti-colonial resistance, and the contemporary implications and potential of his work in psychology and society. [3] Ms. Sheppard

REL7058 - Religion, Science and Evolution
Title

Religion, Science and Evolution

Catalog Description

The course is designed into five sections: Section one is on Darwin's core concepts of evolution; two is on the response to Darwin by religionists, among many; three is on contemporary uses of Darwinian theory to model religion and other value systems; four is on attempts to mimic human cognition using immense computing power, e.g., IBM's "Watson" system which won a famous "Jeopardy" game against human opponents; five is on ethical implications and further questions. [3] Mr. Gay

REL7059 - Decolonizing Theologies of Care
Title

Decolonizing Theologies of Care

Catalog Description

The theology and practice of pastoral care is only beginning to grapple fully with its colonial roots. This course will examine critically the continuing implications of colonialism's infused approaches through the lens of contemporary critiques and indigenous, cultural, ritual, local, ancestral practices of healing. At the core of the course is the importance of the understanding of pastoral, spiritual, chaplaincy, therapeutic, soul care as communal and sacred. In this conceptualizing of theology and care, the psychological and the spiritual are intertwined and inextricably tied; furthermore, to serve in a caring role is not a job but a response to the community's need for maintaining, and restoring, wholeness and harmony of the community because the community has called forth this role. Finally, decolonized theology and care recognizes that we exist in socio-political contexts that affect the well being of the community, and decolonized approaches must take this into account in its practice of care. Thus, decolonizing care is a form of resistance to the destructive effects of colonialism. [3] Ms. Sheppard

REL7064 - Humanity and Technology
Title

Humanity and Technology

Catalog Description

A critical exploration of how especially handheld and virtual technologies (phones, tablets, gaming consoles, VR head sets) and computer technologies are shaping persons, relationships, communities, societies and our engagement with nature. By addressing themes such as: the gendered, sexual and racial self; the relational self; the economic self, the discerning self, the real and the virtual; violence and acts of reparation; and living creatively, this graduate seminar seeks to empower students to build a personal anthropology. One question drives the seminar: What does it mean to be human in a technologically driven world? The seminar draws primarily on psychodynamic, neuroscientific, social, philosophical, economic, and theological theories. [3] Mr. Hamman

REL7065 - Pastoral Method In Ministry

Title

Pastoral Method In Ministry

Catalog Description

Critical examination of pastoral method in the ministry of care and counseling. Close attention given to the place of the social sciences in pastoral method. Considers issues in the use of quantitative and qualitative research methods. [3]

REL7066 - Method And Evaluation

Title

Method And Evaluation

Catalog Description

The use of the social sciences in the investigation of religious phenomena. The psychological analysis of religion. Representative studies and empirical investigations are sampled. [3] Gay.

REL7067 - Pastoral Theologies and Ethics of the Streets

Title

Pastoral Theologies and Ethics of the Streets

Catalog Description

This course takes as its point of departure the local-of the streets-contexts of the pastoral theologies and ethical impulses that shape and guide individuals and communities' public theologies and practices. Too frequently these kind of explicit and implicit motivations undergirding local-on the ground-responses to community concerns fail to make their way in to academic and scholarly discourse. The end result is that, except with rare exception, local-of the street and on the ground-pastoral theologies and ethical categories are not represented in most of the scholarship appropriated for pastoral theological education. This course is demanding in its requirement that students spend significant time listening to those whose vocational practices are lived out in their own communities and represent their commitment to individual and social transformation. [3] Ms. Sheppard

REL7068 - Work, Love, and Vocation: Composing a Life

Title

Work, Love, and Vocation: Composing a Life

Catalog Description

To what are people called in each phase of life, and how do these callings evolve and transform as we change and develop? How do we discern our callings, and how do we help others do so? What are some of the unspoken complexities and challenges of callings that we hesitate to name? In a word, how do people compose their lives despite or amid impediments, failures, and diverse pressures and demands? This class focuses on a classic Christian theme-vocation. But it disrupts conventional understandings and invites fresh engagement with life choices as a living breathing evolving reality, shaped by culture, time, and our physical embodiment, a matter of composition and recurrent recreation rather than simply a once-in-a-lifetime summons, a lofty religious aspiration, or a vague doctrinal claim. The class provides tools to analyze and explore your own vocational desires and those of others, resources to understand how vocation arises at different life phases, and a sampling of spiritual life writing in which other people recount their efforts to reach vocational clarity about life. [3] Ms. Miller-McLemore

REL7076 - Theories of Inequality, Diversity, and Social Justice

Title

Theories of Inequality, Diversity, and Social Justice

Catalog Description

The course reflects the multi-level orientation of the department and includes readings that critically address structural, community, and individual levels of analysis. The focus of the course will be on careful reading and critical evaluation of classic and contemporary texts about inequality with the goal of helping students develop a sophisticated theoretical grounding from which to approach their studies. [3] Ms. Barnes

REL7078 - Heinz Kohut, Self-Psychology, and Religion

Title

Heinz Kohut, Self-Psychology, and Religion

Catalog Description

Investigates the writings on self psychology of theorist and analyst Heinz Kohut, with attention to the implications of his ideas about the formation and fragmentation of the self for individual health and development, cultural context, psychotherapy, and pastoral care and counseling. Evaluation of the theory in conversation with various critical theological perspectives. [3] Ms. Miller-McLemore

REL7079 - Faith, Film and Pastoral Care

Title

Faith, Film and Pastoral Care

Catalog Description

This course offers an alternative avenue to learning and practicing pastoral care in a variety of institutional settings and capacities. It uses film, reading, and experiential learning, all in dialogue with one another, to stimulate and enrich imagination, understanding, and capacity to practice care. Following a general introduction, the class meets for four extended Friday/Saturday sessions approximately every other week to review and analyze the film; explore the assigned reading; and engage in exercises to learn specific pastoral skills, strategies, and practices. [3] Ms. B. Miller-McLemore

REL7080 - Spirituality and Social Activism: In a Time of Trauma

Title

Spirituality and Social Activism: In a Time of Trauma

Catalog Description

Spirituality and Social Activism is a practice-theo-pastoral-reflection course where we will focus on the need to amplify the need for sustaining spiritual practices in a time of spiritual, communal, and cultural trauma in the work of social transformation. Drawing on life - our own and cultural figures, film, music, news/social media, guest speakers, and auto-ethnography, this course will embody a commitment to intersectionality, justice, and deep heart work. Wisdom will be sought from the spiritual practices we do together and the social activism we do in the age of virtual reality and global crisis. The class will gather on May 18th for a Virtual Retreat 9:00-3:00 pm and will meet from 9-12 for the remainder of the class for discussion, spiritual practice, planning, and engaging in social activism in this current space of spiritual, communal, and cultural trauma. [3] Ms. Sheppard

REL7081 - Young Adult Faith, Spirituality and Leadership

Title

Young Adult Faith, Spirituality and Leadership

Catalog Description

This seminar explores the faith, spirituality, and leadership of the "nones" and the "somes" - young adults who do not (readily) identify with traditional and/or mainline religious identities. Drawing on primarily a postfoundationalist spirituality, young adults are creating alternative communities, ministries, and non-profits of social, economic, and ecological justice. As such, the seminar asks the question: What is the young adult witness (or testimony) to human life discovered in the narratives of personal, political, and societal resistance to structures of abuse and oppression? The seminar suggests that the witness can be summarized as: embracing anxiety, loss, and trauma; believing in belonging (or community); nurturing one's spiritual life; seeking racial, social, political, economic, and environmental accountability while working toward a just society; and, making a positive difference in the world. In these foci lie hidden The Good Life, which can be distinguished from The Good News (of personal salvation in Jesus Christ and the traditional focus of mainline Christianity). The seminar draws primarily on philosophical, sociological/cultural, ethnographic, anthropological, psychological, economic, theological, and biblical sources. Guests of and visits to innovative ministries and non-profit work in Nashville will explore the importance of place. Students will be encouraged to identify and create an action plan to guide their cause engagement, advocacy, activism, and leadership. [3] Mr. J. Hamman

REL7082 - Climate Violence & Earth Justice

Title

Climate Violence & Earth Justice

Catalog Description

Even in places where protest against injustice has a long legacy, people do not always recognize the earth as a subject of subjugation. This class speaks to this oversight and takes one small step toward addressing the "wicked" problems of climate change and environmental degradation. It enlists non-conventional sources, turning in the first part of the class to the literary arts, fiction, tree science, and indigenous knowledge to foster new ways of seeing and fresh tools to aid students in affecting change. The second part of the class sustains the concrete focus, looking at pastoral and prophetic implications and inviting students to deliberate on steps to stimulate earth justice in local and global communities. [3] Ms. B. Miller-McLemore

REL7101 - Methods In Ethics

Title

Methods In Ethics

Catalog Description

A survey of various methods, styles, and contexts under which moral philosophy has been developed and transmitted in Western thought. Topics treated are classical moral philosophy (Plato, Aristotle, Cicero), Christian sources (Augustine, Thomas Aquinas), modern philosophical ethics (Spinoza, Kant, Mill, and several twentieth century thinkers). [3] Anderson.

REL7102 - Ethics Human Develop

Title

Ethics Human Develop

Catalog Description

Ethics Human Develop

REL7103 - Ethics in Crisis

Title

Ethics in Crisis

Catalog Description

This course is an intensive examination of what has been most famously referenced as the "seven deadly sins:" pride, envy, gluttony, sloth, wrath, lust, and greed, and how these transgressive principles actually have shaped the moral character and sociopolitical condition of American society and culture. We will examine how the innermost workings of US society are informed and ultimately beholden to these "capital vices." Furthermore, given Gandhi's summative reassessment of these vices as the "world's seven great blunders," his framework will serve as an important schema for self-examination, social analysis, and moral formation for the central foci of the course. By utilizing liberative ethics, liberation theology, critical race theory, and feminist-womanist thought, this course will equip students with critical methodological skills and theological competencies associated with ethical theory and moral practices necessary for effective conflict analysis and crisis intervention in service of social transformation as well as justice making efforts. [3] Ms. Floyd-Thomas

REL7104 - Exodus in America: Black Christians and White Jews in Interreligious Dialogue

Title

Exodus in America: Black Christians and White Jews in Interreligious Dialogue

Catalog Description

This interreligious seminar will examine the central role the Exodus narrative and motif have played in the religious and identity formation of both black Christians and white Jews in the United States. The examination will be guided by an interdisciplinary framework: Scriptural Interpretation and Witness; Cultural Traditions; Moral Reasoning; and Experiences of Oppression. For each component of this framework, the appropriation, application, and interpretation of the Exodus experience for both communities will be described, compared, and contrasted. The interdisciplinary approaches of Black Church studies and Jewish studies will serve as the methodological basis for these comparisons and contrasts, with special attention given to their subsidiary disciplines of Biblical studies and religious ethics. [3] Ms. Floyd-Thomas.

REL7120 - Modern Christian Political Thought

Title

Modern Christian Political Thought

Catalog Description

Surveying Christian Political Thought from the late nineteenth century to contemporary debates, we will analyze theo-ethical understandings of the relation of Christianity to political life. Some questions the course will focus on are: Is there a necessary and important relationship between Christianity and democracy? What is the role of the public theo-ethicist in political debates? In what ways do various ecclesial and theological assumptions impact the political engagement of the church? Social gospel, Christian Realist, Anabaptist, Liberation, Catholic Social Thought, Feminist, and Fundamentalist approaches will receive particular attention. A theory-practice option for those who want to study the concurrent U.S. campaign season is available. [3] Snarr.

REL7121 - Religion And Social Movements

Title

Religion And Social Movements

Catalog Description

This course focuses upon the roles of religious organizations, persons, and resources in social-political movements for change. Students will be engaged in the interdisciplinary conversations on the contributions and constraints that religious groups provide for social movements. Among the questions students will investigate are: What makes an activist? In what ways do religions provide resources-materially, ideationally, and culturally for the emergence and maintenance of social movements? In what ways are religious groups transformed by their interaction with the political process?

REL7122 - Religion And War In An Age Of Terror

Title

Religion And War In An Age Of Terror

Catalog Description

Looking at both Christian and Islamic political thought, this course will wrestle with questions such as: When, if ever, is it appropriate to go to war? How has the emergence of "terrorism" as a form of war challenged traditional just war and pacifist theories? Are there ways in which religion and violence are inherently connected? How have religion and war been linked historically? In what ways do religious worldviews challenge or complement contemporary efforts at peacemaking? [3] Snarr.

REL7123 - Christian Social Ethics

Title

Christian Social Ethics

Catalog Description

This course is a critique of selected readings from contemporary Christian social ethical perspectives. We will employ historical and ethical analyses of case studies in order to gain some orientation to doing ethical reasoning on current perennial social issues and pursue reading in the literature of the field. The fundamental problems guiding our inquiry will be: (1) the way in which each account interprets morality as the relation between justice and good; (2) the social theoretical assumptions and views that make each of these accounts intelligible and help explain their differences, this will include special attention to the relevant intellectual and social history of each issue and its public advocates; and (3) the theological warrants for how a just society may reside in religious and secular communities of moral discourse.

REL7124 - Twentieth-Century North Atlantic Ethics

Title

Twentieth-Century North Atlantic Ethics

Catalog Description

An examination of figures and movements that influenced the discourse on religious ethics in both Europe and North America. Special attention to representatives of History of Religions School (Troeltsch, Ott); logical positivism, political theology (Moltmann, Metz, Habermas); neo-orthodox and existential theologies (Brunner, Barth, Buber, Reinhold Niebuhr); as well as ethics influenced by Wittgenstein. [3] Anderson.

REL7125 - American Pragmatism & Empirical Theology

Title

American Pragmatism & Empirical Theology

Catalog Description

Explores the philosophical, theological, and ethical legacies of American philosophers and theologians who have significantly influenced theology and ethics in the United States and American public discourse. Students may encounter the traditions of American pragmatism, American Empirical Theology, Theology of the Social Gospel, American Neo-Orthodoxy, and American Public Theology and figures from William James and R. and H. R. Niebuhr to James M. Gustafson. [3] Anderson.

REL7126 - Political Ethics: The Tradition Of Political Liberalism

Title

Political Ethics: The Tradition Of Political Liberalism

Catalog Description

An examination of the political thought of prominent thinkers. [3] Anderson.

REL7127 - Liberation Ethics

Title

Liberation Ethics

Catalog Description

An examination of how religious commitments, particularly Christian sensibilities, work to ameliorate or perpetuate the oppression resulting from race, class, and gender.

REL7128 - Critical Race Theory and Social Ethics

Title

Critical Race Theory and Social Ethics

Catalog Description

Drawing on literature from criminology, critical race theory, social ethics and feminist/womanist thought, this seminar will reflect on the religious, legal, and intellectual context out of which white supremacy, hypermasculinity, and economic exploitation pervade our understanding of normativity. Students will map and critically examine the multiple trajectories along which the moral authority of the state is engendered by the convergence of racism, sexism and classism under the guise of normality, social order, common good and the will of God. Further we will explore how to develop social interventions that disrupt these normative patterns of discrimination and facilitate the elimination of racially-based, gender biased structures and practices in order to facilitate critical pedagogy, moral leadership, legal practice, and social movement organizing. [3] Ms. Floyd-Thomas.

REL7129 - Moral Philosophy of Black Popular Culture

Title

Moral Philosophy of Black Popular Culture

Catalog Description

A critical examination of aesthetics and moral philosophical traditions as a lens by which to understand black popular culture; this course explores the cultural currency of a black aesthetic, its significance to and dissonance with the religious. [3] Ms. Floyd-Thomas and Mr. Floyd-Thomas

REL7130 - Ethics and Feminism

Title

Ethics and Feminism

Catalog Description

Ethics and Feminism. Implications of gender theory for understanding the Judeo-Christian moral traditions. Topics include: the nature of the moral subject, the social construction of gender, patriarchal consciousness, the abuse of women, black feminism, motherhood, and feminist ecology. [3]

REL7131 - Feminist Theological Ethics

Title

Feminist Theological Ethics

Catalog Description

Using resources from feminist traditions (womanist, mujerista, Asian, white), the course focuses on some major methodological, theoretical, and policy issues in feminist theological ethics. After tracing the historical development of the field of feminist theological/social ethics, we will analyze how feminists choose/use theological resources, the impact of varying theoretical frameworks on feminist analysis, major policy foci of feminists, and whether/how to stay with a "patriarchal" religious tradition. Readings from Christian, post-Christian, pagan, Islamic feminist. [3] Snarr.

REL7132 - Womanist Ethics and Theology

Title

Womanist Ethics and Theology

Catalog Description

This seminar places the moral agency and theological reflections of African American women at the center of human social relations and ecclesiastical institutions. Using various womanist ethical methods and theories, we will develop a range of tools, conceptual and practical, by which to assess ways for going beyond normative reflections of theology and dominant ethical systems which often discount the exigencies of tripartite oppression. This course will explore and analyze the insights into the relationship between black women and the Divine and the ways this relationship shapes their moral agency in attaining wholeness, integrity, and meaning. Issues under our investigation will include womanist explorations of: the Divine or ultimate reality; the origin and purpose of human existence; authority and freedom in religious understanding; pluralism and religious truth; embodiment and sexuality, evil, suffering and death; compassion, joy, and hope; and Divine involvement in human history. [3] Ms. Floyd-Thomas

REL7133 - Womanist Literature

Title

Womanist Literature

Catalog Description

This seminar examines the Black women's literary tradition as a repository for doing constructive ethics. Attention will be given to how Black women of various periods, cultures, and literary traditions have brought distinctive imaginative and critical perspectives to bear on "the sacred." In addition to addressing the complicated presence of religious themes, biblical references, and theological issues in these texts, literary and religious methods of "reading" and "writing" will be employed by comparing constructive and hermeneutical approaches among both literary writers and womanist ethicists. [3]

REL7134 - Women's Bodies, Politics and Policy Making

Title

Women's Bodies, Politics and Policy Making

Catalog Description

In this course, students will be active participants in exploring the many dimensions of politics in the United States and abroad concerning how women have organized to subvert the oppression of women's bodies in an effort to have a greater role in politics and the skills women need to fully participate in politics and policymaking. Students explore how politics and government, morality and religion, church and state affect women's lives today, and examine the ways that women participate in the social and religious political process in order to influence the course of public policy. Readings and class discussion on the intersection of race/ethnicity and gender/sexuality, work/class and ability/aesthetics in policies are central to the theoretical perspectives that provide the foundation of this course.

REL7135 - Race, Sexuality, Class, and Inequality

Title

Race, Sexuality, Class, and Inequality

Catalog Description

This seminar considers practical applications for religious leaders. [3]

REL7139 - What is in a Text?

Title

What is in a Text?

Catalog Description

A detailed examination of one formative text in Christian ethics to explore a thinker's ideas and how he or she states a theme, develops an argument, and is able to argue his or her case in a persuasive manner. Attention to consistency, reasoning, style, and rhetoric are also a part of the course. Finally, we consider the book in relation to the renewal of the church, its implication for ministry, and its place in enriching scholarly debate and thought. Students may repeat the course as different texts are studied. For Spring 2016, the text will be Cornel West's "Keeping Faith: Philosophy and Race in America." [3] Ms. Townes

REL7141 - The Political Economy of Misery

Title

The Political Economy of Misery

Catalog Description

An examination of the ways in which the intersections of various forms of oppression; such as racism, sexism, ageism, heterosexism, and classism; coalesce to form lifestyles of misery that produce social patterns of domination & subordination. [3] Emilie Townes

REL7142 - Vexations: Religion and Politics in the Black Community

Title

Vexations: Religion and Politics in the Black Community

Catalog Description

This course explores the theo-ethical perspectives of the intersection between religion and politics in Black communities in the United States that forms a matrix of vexation-the complex encounter with social problems on a multi-dimensional basis. We take up the challenge of how to use Christian ethics to examine contemporary social issues, how to identify basic elements of Christian ethical reflection in political discourse, how to consider a variety of ethical perspectives for decision-making, and how to evaluate Black ethical thinkers as they respond to concrete political and social issues. Our conversations may be informed by social issues such as mass incarceration, gang violence, health care, poverty, drugs, voting rights, education, unemployment, and police brutality as entry points to the matrix, the impact of these social issues on Black communities in the U.S., and their implications for prophetic witness in the academy, community, church, and society. [3] Ms. Townes

REL7144 - Metaphors of Evil

Title

Metaphors of Evil

Catalog Description

This course is an examination of the ways in which metaphors and symbols function at the intersections of various forms of oppression that coalesce into lifestyles of misery to produce social patterns of domination and subordination. We will consider how conversations between Christian ethics and theology as well as other disciplines help frame possible trajectories of justice and justice making. [3] Ms. Townes

REL7145 - African American Social Ethics

Title

African American Social Ethics

Catalog Description

This course is an introduction to the African American moral landscape as espoused by Black moral thinkers and the real-lived plight of Black people. This broad experience will be explored via social ethics and through the collective quest for freedom, the struggle for liberation, the meaning agency, and the nature of moral faith and witness. In depth study will be given to particular contestable ethical issues (namely, sexuality, violence, rage, racism, sexism, poverty, and justice) via the religious rationale of Black people whose efforts have been to link divine justice and social justice. This course is taught with a commitment to social change through attention to anti-racism, diversity, and multiculturalism. [3] Ms. Floyd-Thomas

REL7221 - Healthcare Ethics: Theory & Practice

Title

Healthcare Ethics: Theory & Practice

Catalog Description

This seminar examines contemporary healthcare ethics in the U.S. and the disciplinary perspectives that inform this field. Attention is given to the political and cultural forces that have shaped the chief ethical problems in healthcare and to the philosophical, religious and social scientific tools used to address them. A major aim of the seminar is to gain critical purchase on these tools, and to assess their uses and limits. We will explore a range of practical issues, probing the ways these concerns shape professional and public life beyond their immediate sphere of occurrence. This seminar serves as a gateway for additional work in the field. [3]

REL7222 - Ethics in Healthcare: Theological and Philosophical Perspectives

Title

Ethics in Healthcare: Theological and Philosophical Perspectives

Catalog Description

This course examines a broad range of theological and philosophical methods for addressing ethical questions in American healthcare. Texts will be drawn from Protestant and Catholic Christianity, Jewish thought, contemporary Anglo-American philosophy and the virtue traditions. Issues to be considered will include those at the beginning and ending of life, routine patient care and questions of health policy and social justice. Churchill and Meador. [3]

REL7240 - Seminar In Sociology Of Religion

Title

Seminar In Sociology Of Religion

Catalog Description

Religion is a constitutive feature of social life, always shaping and being shaped by its particular social context. Indeed, the very content and form of religion itself is always and necessarily formed from the stuff of the socio-cultural world (language, symbols, ritual interactions, resources, organizations, norms, etc). The sociology of religion has focused on this relationship of religion and its broader socio-cultural world, and has developed a particular set of preoccupations: secularization, modernization, myth and meaning-making, and the role of religion in social ordering, for example. In this course, we hope to examine and experiment with some of the core assumptions of the sociological study of religion. What does it mean to be religious? What is the relationship of religion and culture? Do we live in a secular society? How do we enact religious life? How is religion produced and re-produced? [3]

REL7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

[0-6]

REL8000 - Theology And Practice Colloquy

Title

Theology And Practice Colloquy

Catalog Description

The colloquy provides a social space for deliberation about the goods of theological education. Driven by student presentations, the colloquy considers especially questions of vocation, teaching, and research. Enrollment is limited to fellows in the Program in Theology and Practice. Fellows are required to enroll in the colloquy in each semester of their first three years of doctoral study. Pass/Fail. [1, awarded at the end of each full year] [0-3]

REL8001 - Theology And Practice Core Seminar - Research for Ministry

Title

Theology And Practice Core Seminar - Research for Ministry

Catalog Description

Various topics. [3] Staff.

REL8002 - Theories and Practices in Critical Pedagogy: Identity Politics in Teaching Theology and Religion

Title

Theories and Practices in Critical Pedagogy: Identity Politics in Teaching Theology and Religion

Catalog Description

This doctoral seminar explores critical, liberative and emancipatory pedagogies, and interrogates their applicability for teaching theological education and religious studies. Particular attention will be devoted to critical theories grounded in race, gender, and class analysis, as well as to the promise and problems posed by doing critical pedagogy on the margins of academe and religious life. This seminar will also survey inter/multi/disciplinary pedagogical approaches in order to demonstrate the manner in which subject matter impacts both knowledge production and concrete, everyday life experience. Finally, students will begin working on intellectual design and course development skills in an effort to articulate their own signature pedagogy.

REL8003 - Qualitative Research

Title

Qualitative Research

Catalog Description

This doctoral seminar introduces qualitative research methods geared to practical theological methodologies. Students will encounter a range of research methods and exercises drawn from various qualitative designs, but often regarded as shared practices among respective disciplines. This course weighs the philosophical and practical bases of said designs and their theories to construct or study research questions. Students will develop skills in conceptualizing and conducting a qualitative research project: determining a research question and research design, accessing a research site, collecting and analyzing data, writing up the findings, and weighing the challenges of theory building. Students will also learn about a range of ethical considerations involved in conducting research. [3]

REL8004 - Practicum in the Teaching of Religion, Part I
Title

Practicum in the Teaching of Religion, Part I

Catalog Description

This two-semester (no credit) course for first year PhD students in the GDR. This course will be led by a GDR faculty member and will include various faculty members presenting on selected topics, as scheduled in the syllabus. The focus will be on training in the basics of teaching in a university setting. Topics include syllabus preparation and course design, inclusivity in the classroom, grading, lecturing, discussion leadership, technologies in teaching, teaching documentation (teaching statements, etc.), grant design and writing. In addition, discussion of mentoring in the GDR, using the GDR mentoring policy as a guide, planning a strategy for professional development training catered to each student's needs and expectations. This plan includes specific Center for Teaching certificates that the student is expected to complete, and other training offered in the CFT. [0]

REL8005 - Clinical Seminar

Title

Clinical Seminar

Catalog Description

This two-semester (fall/spring required) 3-hour credit supervisory course focuses on discussion of readings from a clinical practice orientation (the first hour) and presentation of cases from a context in which students provide care or counseling (the second hour). Requirements include critical engagement with the assigned texts, rigorous clinical discussion, and the submission and presentation of written case reports. Participants must be actively engaged in pastoral ministry or other care-giving roles. Enrollment is limited to six doctoral and upper level divinity students. Divinity students are admitted only after interview and confirmation by clinical seminar faculty. [0-3] Instructors: Drs. S. Bruce Rogers-Vaughn and Evon O. Flesberg.

REL8007 - Theology and Practice Core Seminar-Teaching for Ministry

Title

Theology and Practice Core Seminar-Teaching for Ministry

Catalog Description

Various topics. [3] Staff.

REL8008 - Practicum in the Teaching of Religion, Part II

Title

Practicum in the Teaching of Religion, Part II

Catalog Description

Students shadow a faculty member in one course, as approved by the GDR chair. In each case, they and their faculty mentor commit to a limited number of hours (approximately 12) to discuss course planning, syllabus writing, lecture preparation, classroom observation, grading, and other matters relevant to teaching. [0]

REL8010 - Religion Research for MA students

Title

Religion Research for MA students

Catalog Description

Required of entering M.A. students in their first semester. Workshops that examine introductory issues related to teaching and research in religious and theological studies. [0]

REL8050 - Special Topics in Religion

Title

Special Topics in Religion

REL8600 - Winnicott & Interpretation Religion and Psychology Seminar

Title

Winnicott & Interpretation Religion and Psychology Seminar

Catalog Description

This graduate seminar will explore the work of the post-Freudian pediatrician and psychoanalyst D. W. Winnicott (1896 - 1971) and his significance for psychodynamic theory and psychology of religion. Winnicott is the leading theorist of the Independent Group in British psychoanalysis (who located themselves between Anna Freud and Melanie Klein). Winnicott has been described as "intriguing, intellectually invigorating, startlingly innovative, clinically helpful, and sometimes frustration to read and understand." He informs our understanding of especially, children, families, play, and the creative impulse. Besides, reading a significant amount of Winnicott's work, the seminar will discuss works by contemporary interpreter and critics. [3] Hamman.

REL8801 - Martin Luther King, Jr

Title

Martin Luther King, Jr

Catalog Description

King's role as a religious leader and as an agent of social change, with some attention to the intellectual sources of his thought and social activism. His views concerning the social roles of religion are seen against the background of classical Christian views, late nineteenth-century dissenting traditions, the early twentieth-century American Social Gospel Movement, and the more radical ideas of Malcolm X and Albert B. Cleage, Jr., during the 1960s. Critical evaluations of King are also made in terms of classical Christian views (e.g., Aquinas, Luther, Calvin, Wesley). [3]

REL8803 - Postmodern Theory: In the Wake of the Death of God

Title

Postmodern Theory: In the Wake of the Death of God

Catalog Description

If modernism is understood to be the age of the subject, the age that begins when self-consciousness says, "I think, therefore I am" (Descartes, 1638), making itself the foundation of its very existence, postmodernity begins when this postulate of the autonomous, self-grounding subject enters into crisis and collapses. Without the individual subject as secure foundation, the presumably stable values of modern tradition since the Renaissance are undermined in all domains from market economies based on the free choices of independent individuals to aesthetic styles of subjective self-expression familiar, for example, in Romantic and Expressionist art. The new sense of a lack of foundations, of no tangible or knowable reality underlying and grounding the flux of appearances in experience, opens thought and praxis in the diverse directions that have come to be characterized as postmodern. Simulacra, inauthenticity, lack of origins or originals, hence proliferating pluralities which nevertheless evince no real distinctions from one another in a consumer society of mass production are some of the typical manifestations of this postmodern milieu. We will undertake to survey important theoretical responses to this predicament particularly from philosophers of religion, primarily those in the continental tradition writing currently.

REL8804 - The Nature of Evil

Title

The Nature of Evil

Catalog Description

Human evil as expressed in the Shoah, religious fundamentalism, and ethnic cleansing. Theological, philosophical, biological, and literary texts. Evil transformed by scientific inquiry since 1600.

REL8805 - Jewish Theories of Religion

Title

Jewish Theories of Religion

Catalog Description

Critical analysis and discussion of modern Jewish constructions of religion: politically, symbolically, ethically, normatively, and aesthetic-mystically. Selected readings from Cohen, Buber, Rosenzweig, Kaplan, and social philosophers such as Simmel and Habermas on the function, nature, and meaning of religion in secular culture.

REL8807 - Mythologies and Epics of South Asia

Title

Mythologies and Epics of South Asia

Catalog Description

Classical Hindu and Buddhist mythologies of South Asia; Sanskrit Mahabharata and Ramayana epics; regional adaptations of mythical themes in vernacular languages; Buddhist and Islamic narratives of romance and chronicle; interpretive and performative strategies, orality, literacy, and modes of visual representation; political deployment of mythic tropes. [3]

REL8808 - Devotional Traditions of South Asia: Hindu, Muslim, Sikh

Title

Devotional Traditions of South Asia: Hindu, Muslim, Sikh

Catalog Description

Mythology of Hindu pantheon and worship through devotion or bhakti. Techniques for inculcating devotion through meditation, temple rituals, and pilgrimage. Entry of Islam into South Asia. Shi'i and Sufi practices. Sikh traditions. Role of vernacular languages in creating local traditions. Hindu-Muslim interaction, syncretism, and shared sacred space. Challenges to orthodoxy. [3] Taneja

REL8811 - Mysticism In Islam

Title

Mysticism In Islam

Catalog Description

A survey of the origins and development of Islamic mysticism, the rise of asceticism, the development of the Sufi orders, the gradual systematization of Sufi teachings, and modern forms of Sufism. The spread of Islamic mysticism was primarily due to the teachings of great thinkers such as Ibn Arabi, Rabi'a, al-Hallaj, Rumi, al-Ghazali, and others. No prior knowledge of Islam is required. [3] McGregor.

REL8812 - The Qur'an And Its Interpreters

Title

The Qur'an And Its Interpreters

Catalog Description

This course will focus upon the Qur'an and the Islamic tradition of interpretation through a critical examination of the treatment of the biblical prophets, Jesus, and Satan. Interpretations will be drawn from the earliest period to the modern era. Rationalist, dogmatic, Shi'i, and mystical schools of interpretation will be discussed. [3] McGregor.

REL8814 - Asian Conceptions of Wisdom, Liberation, and Enlightenment

Title

Asian Conceptions of Wisdom, Liberation, and Enlightenment

Catalog Description

Philosophical conceptions and practices as found in classical works, including the Bhagavad Gita, the Confucian Analects, the Tao Te Ching, and Buddhist texts that have functioned as religious life-guides in India, China, and Japan for thousands of years.

REL8815 - Chinese Rel. through Stories

Title

Chinese Rel. through Stories

Catalog Description

Analysis of narratives from various religious traditions and genres within early and medieval China. The role of narrative in Chinese religious, cultural, and political life. Primary texts in English translation. Offered on a graded basis only. [3] Company.

REL8816 - Sacred Space in the Tibetan World

Title

Sacred Space in the Tibetan World

Catalog Description

How is sacred space created, mediated, and reproduced in the greater Tibetan world? To investigate this question, we proceed through loci of increasing scale, from religious icons and bodies to built structures to sacred geographies. In the process, we analyze how sacred space is formed and affirmed through narrative, ritual, cosmology, and interaction with natural environments. We will attend to interactions between Buddhist, Bv'an, and local religious traditions, as well as to continuities and changes from premodern to modern periods. Our case studies will extend beyond the current political borders of Tibet to include ethnically Tibetan communities in India and Nepal, historically significant sites in China and Bhutan, and the circulation of Tibetan objects and bodies in America and worldwide. [3]

REL8817 - The Holocaust: Its Meanings And Implications

Title

The Holocaust: Its Meanings And Implications

Catalog Description

This course examines the systematic destruction of European Jewry and other groups during World War II, its background, and its aftermath. It addresses the attempts by victims, bystanders, perpetrators, and their descendants-and we are all their descendants-to create meaningful narratives about an event that appears to lack discernible meaning. To that end it focuses upon historical accounts, case studies, memoirs, fiction, and theology and such issues as history, memory, witness, conscience, language, evil, and otherness that they raise. Particular emphasis is upon the many roles of film in both the Third Reich and the postwar world. National Socialism employed films to mobilize support for its rule and to inculcate its racial-eugenic worldview. In the wake of the Holocaust, film has been employed for other purposes: to document, to bear witness, to mitigate or reduce its import, to provide meaning, to unmask attempts to mystify or suppress the past, to explore relationships between those events and contemporary societies, to say the unsayable, to examine the life of the traumatized victim. No prior study is presupposed of these events that have come to be known as the Holocaust. [3] Geller.

REL8824 - Apophatic Mysticism

Title

Apophatic Mysticism

Catalog Description

Unsayable or negative, theology from Plato and Neoplatonism through medieval mysticism, Kabbalah and Sufism. Baroque expressions in Silesius Angelus and John of the Cross. Romantic authors and modern and postmodern writers. Chinese Taoism, Advaita Vedanta, and the Buddhism of Nagarjuna. [3]

REL8830 - Islam in South Asia

Title

Islam in South Asia

Catalog Description

History of Islam in South Asia. Cultural memory of conquest. Inter-religious interactions. Sufism and Bhakti. Mughal traditions of cosmopolitanism. Legacy of colonialism. Impact of Partition. Shared popular culture and shared sacred spaces. [3]. Taneja.

REL8835 - Islam in the Modern World

Title

Islam in the Modern World

Catalog Description

Impact of colonialism on Muslim societies and everyday life in the cities of the Middle East. Analysis through literary, religious, political, and ethnographic texts. Relationship of Sharia to the modern state; impact of modernity on the understanding and practice of religion. [3]

REL8900 - The Study Of Religion

Title

The Study Of Religion

Catalog Description

Required of entering Ph.D. students in their first semester. Discussion of such topics as the methods, diversities, connections, purposes, and contexts of religious studies. [3]

REL8999 - Non-Candidate Research
Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

Religious Studies

RLST5178 - Native American Religious Traditions

Title

Native American Religious Traditions

Catalog Description

(Also listed as RLST 3178) Diversity of First Nation religious traditions in North America, especially Eastern Woodlands and Plains. Spiritual and cultural dimensions of diversity, cosmologies, stereotypes, cultural resilience, creativity and storytelling, humor, rituals and practices, healing, and sovereignty. No credit for students who have earned credit for 3178. [3]

RLST5225 - Sexuality in the Hebrew Bible and the Ancient Near East

Title

Sexuality in the Hebrew Bible and the Ancient Near East

Catalog Description

(Also listed as RLST 3225) Issues of sexuality in the Hebrew Bible in the context of the Ancient Near East. Homosexuality, virginity, and incest. No credit for students who have earned credit for 3225. [3]

RLST5270 - Jewish Theories of Religion

Title

Jewish Theories of Religion

Catalog Description

(Also listed as RLST 3270) Critical analysis and discussion of modern Jewish constructions of religion: politically, symbolically, ethically, normatively, and aesthetic-mystically. Selected readings from Cohen, Buber, Rosenzweig, Kaplan, and social philosophers such as Simmel and Habermas on the function, nature, and meaning of religion in secular culture. No credit for students who have earned credit for 3270. [3]

RLST5371 - Through the Eyes of the Other: A History of Muslim-Christian Relations

Title

Through the Eyes of the Other: A History of Muslim-Christian Relations

Catalog Description

Travelogues and interpretive accounts of encountering the religious and cultural 'Other,' Christian or Muslim. Increased awareness of long-standing relationship between two major religious traditions. [3]

RLST5459 - Buddhist Traditions

Title

Buddhist Traditions

Catalog Description

Historical and thematic survey of foundational, Mahayana, and esoteric Buddhist traditions. Mythology, doctrine, meditation, devotional practices, and institutions. Contemporary case studies from Asia and North America. [3]

RLST5461 - Islam in Africa

Title

Islam in Africa

Catalog Description

(Also listed as RLST 2461) Social and cultural development of Islam across Africa from the eighth century to the present, as illuminated by historical, ethnographic, and literary sources. Interplay between Muslims and outside religious groups, jihads in pre-colonial Africa, and Islam during European colonization. Attention to Sub-Saharan Africa. No credit for students who have earned credit for 2461. [3]

RLST5472 - Religion, Ecology, and Power in Africa

Title

Religion, Ecology, and Power in Africa

Catalog Description

(Also listed as 2472) The interrelationship between religion and ecology in Africa; the ways power relations in pre-colonial Africa through the present have determined human-Earth relations. Divine origin and development of the Earth and its peoples; influence on African social structure, ethnically-based occupations, and stewardship over the environment. No credit for students who have earned credit for 2472. [3]

RLST5552 - Reformers of the Islamic Tradition

Title

Reformers of the Islamic Tradition

Catalog Description

(Also listed as RLST 4552) Historical survey of Muslim reformists. Religious responses to crises in the pre-modern debates over orthodoxy and heresy; modern (Western colonialism) and recent periods. No credit for students who have earned credit for 4552. [3]

RLST5562 - Culture, Religion, and Politics of the Arab World

Title

Culture, Religion, and Politics of the Arab World

Catalog Description

(Also listed as RLST 4562) Diversity and unity in Arab culture. Religious, sociopolitical, and historical factors shaping Arab identity in the modern age. Encounters and relationships between Arabs and the Western world. The Israeli-Palestinian conflict. No credit for students who have earned credit for 4562. [3]

RLST5592 - Advanced Seminar in Arabic

Title

Advanced Seminar in Arabic

Catalog Description

(Also listed as RLST 4592) Analysis of style and forms. Poetry, novels, popular literature, and historical chronicles. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. No credit for students who have earned credit for 4592. [3]

RLST5593 - Advanced Seminar in Islamic Tradition

Title

Advanced Seminar in Islamic Tradition

Catalog Description

(Also listed as RLST 4593) Analysis of original Arabic texts, manuscript reading, and research methods. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. No credit for students who have earned credit for 4593. [3]

RLST5665 - Mythologies and Epics of South Asia

Title

Mythologies and Epics of South Asia

Catalog Description

(Also listed as RLST 4665) Classical Hindu and Buddhist mythologies of South Asia. Sanskrit Mahabharata and Ramayana epics. Regional adaptations of mythical themes in vernacular languages. Buddhist and Islamic narratives of romance and chronicle. Interpretive and performance strategies. Oral, literary, and visual modes of representation. Political deployment of myths. No credit for students who have earned credit for 4665. [3]

RLST5666 - Devotional Traditions of South Asia: Hindu, Muslim, Sikh

Title

Devotional Traditions of South Asia: Hindu, Muslim, Sikh

Catalog Description

(Also listed as RLST 4666) Mythology of Hindu pantheon and worship through devotion or bhakti. Techniques for inculcating devotion through meditation, temple rituals, and pilgrimage. Entry of Islam into South Asia. Shi'i and Sufi practices. Sikh traditions. Role of vernacular languages in creating local traditions. Hindu-Muslim interaction, syncretism, and shared sacred space. Challenges to orthodoxy. No credit for students who have earned credit for 4666. [3]

RLST5669 - Sacred Space in the Tibetan World

Title

Sacred Space in the Tibetan World

Catalog Description

(Also listed as RLST 3669) Creation, mediation, and reproduction of sacred space from artifacts to built structures to geographies. Narrative, ritual, and cosmological aspects of Tibetan Buddhist, Bön, and local religious traditions. Cases include premodern to modern periods, and local to global contexts. No credit for students who have earned credit for 3669. [3]

RLST5670 - Buddhism and the State

Title

Buddhism and the State

Catalog Description

(Also listed as RLST 3670W) Models relating Buddhism and the state in ancient and modern Asia. Kingship and spiritual leadership; sacred territory and national identity; legitimation theory and its alternatives; and religious responses to the modern state. Case studies from India, Nepal, Thailand, Burma, Tibet, Mongolia, China, and Japan. No credit for students who have earned credit for 3670W. [3]

RLST5747 - Daoist Tradition

Title

Daoist Tradition

Catalog Description

(Also listed as RLST 3747) Historical and thematic survey of the Daoist tradition in China. Philosophical classics and religious scriptures, as well as social history are covered. Daoism today. No credit for students who have earned credit for 3747. [3]

RLST5753 - East Asian Buddhism

Title

East Asian Buddhism

Catalog Description

(Also listed as RLST 3753) East Asian Buddhist texts. Key Buddhist ideas, values, practices, and institutions. Chronological surveys of key developments in major historical periods. No credit for students who have earned credit for 3753. [3]

RLST5775 - Chinese Religions through Stories

Title

Chinese Religions through Stories

Catalog Description

(Also listed as RLST 3775) Analysis of narratives from various religious traditions and genres within early and medieval China. The role of narrative in Chinese religious, cultural, and political life. Primary texts in English translation. Offered on a graded basis only. No credit for students who have earned credit for 3775. [3]

RLST5900 - Mysticism and Spirituality, Comparative Study

Title

Mysticism and Spirituality, Comparative Study

Catalog Description

(Also listed as RLST 3900) Philosophical, historical, and textual perspectives. Key mystical traditions, philosophies, texts, and figures from Hindu, Buddhist, and Christian traditions. The popular emergence of spirituality as a contemporary mode of religiosity in advanced capitalist societies. No credit for students who have earned credit for 3900. [3]

RLST5921 - Ethics and Ecology

Title

Ethics and Ecology

Catalog Description

(Also listed as RLST 3921) Relationships among humans, nature, and the sacred. Focus on understandings of our 'dominion' over non-human nature. The role of religion in shaping attitudes and behaviors regarding the environment. Topics include eco-centered ethics, 'creation care,' reliance on fossil fuels, and alternative sustainable scenarios. [3]

RLST5926 - Ancient Goddesses

Title

Ancient Goddesses

Catalog Description

(Also listed as RLST 3926) Ancient concepts of the feminine divine in literature and iconographic evidence. Specific goddesses, their spheres of influence, and their place in the various pantheons. Cultic practices and religious syncretism across cultures, including Mesopotamia, Egypt, and Ancient Israel. Offered on a graded basis only. No credit for students who have earned credit for 3926. [3]

RLST5938 - Marriage in the Ancient Near East and the Hebrew Bible

Title

Marriage in the Ancient Near East and the Hebrew Bible

Catalog Description

(Also listed as RLST 4938) Religious, legal, and socio-economic aspects of marriage. Survey of ancient Sumerian, Assyrian, Babylonian, and Egyptian sources, and relevant sections of the Hebrew Bible. Marriage as an institution at the beginning of recorded history. No credit for students who have earned credit for 4938. [3]

Scientific Computing

SC5250 - Scientific Computing Toolbox

Title

Scientific Computing Toolbox

Catalog Description

(Also listed as SC 3250) Use of computational tools in multiple science and engineering domains. Simulations of complex physical, biological, social, and engineering systems, optimization and evaluation of simulation models, Monte Carlo methods, scientific visualization, high performance computing, or data mining. No credit for students who have earned credit for 3250. FALL. [3]

SC5260 - High Performance Computing

Title

High Performance Computing

Catalog Description

(Also listed as SC 3260) Parallel computing, grid computing, GPU computing, data communication, high performance security issues, performance tuning on shared-memory-architectures. SPRING. [3]

SC5890 - Special Topics

Title

Special Topics

Catalog Description

(Also listed as SC 3890) No credit for students who have earned credit for 3890. [1-3]

Second Language Studies

SLS6030 - Foreign Language Learning and Teaching

Title

Foreign Language Learning and Teaching

Catalog Description

(Also listed as Spanish 6030, Portuguese 6030, French 6030, German 5310) Principles and practices of teaching a second language with concentration on recent interactive and communicative models of foreign language instruction. Classroom observations, journal writing, development of materials, and a small action research project. [3]

SLS7040 - Second Language Acquisition Theories and Research

Title

Second Language Acquisition Theories and Research

Catalog Description

(Also listed as French 7040 and German 5311) A review of current sociocultural and cognitive theories and research. [3]

SLS8090 - Special Topics in Second Language Studies

Title

Special Topics in Second Language Studies

Catalog Description

Topics in applied linguistics including second language acquisition, curriculum design, and assessment. [3]

Sociology

SOC6301 - Classical Theory

Title

Classical Theory

Catalog Description

Theoretical perspectives and theorists in the early history of sociology, focusing primarily on Durkheim, Marx, and Weber. [3]

SOC6302 - Contemporary Theory

Title

Contemporary Theory

Catalog Description

Modern developments including neo-Marxist, functionalist, structuralist, conflict, interactionist, exchange/rational choice, and feminist theories. [3]

SOC6310 - Sociological Inquiry

Title

Sociological Inquiry

Catalog Description

Introduction to research methods, including theory construction, sociological reasoning, study design, and specific research techniques. Normally limited to graduate students in the department. [3]

SOC6311 - Multivariate Analysis I

Title

Multivariate Analysis I

Catalog Description

Basic concepts in probability and statistical analysis. Multivariate analysis of sociological data, with special attention to regression analysis. The use of computers. Prerequisite: enrollment in graduate program in sociology or permission of the instructor. [3]

SOC6312 - Multivariate Analysis II

Title

Multivariate Analysis II

Catalog Description

The general linear model in analyzing sociological data, including analysis of variance, regression, path analysis, and parametric techniques for contingency-table analysis. Practice in the use of computers. Prerequisite: 6311 or an equivalent statistics course approved by the instructor. [3]

SOC7400 - Teaching Workshop

Title

Teaching Workshop

Catalog Description

For students wanting to improve their teaching skills. Students visit the classrooms of outstanding teachers on campus and discuss their approach to teaching; deliver lectures in the presence of critics; examine their own lectures on videotape; discuss methods of evaluation; read outstanding books on college teaching; and survey teaching materials produced by the American Sociological Association. Normally limited to graduate students in the department. Graded P/F only. [3]

SOC7500 - Workshop on Sociological Criticism

Title

Workshop on Sociological Criticism

Catalog Description

Intensive introduction to peer review for publication, using materials from journal submissions to editorial correspondence. [3]

SOC7600 - Quantitative Methods Workshop

Title

Quantitative Methods Workshop

Catalog Description

Analysis of large data sets from the social sciences or of data brought to the course by students. Scaling and measurement; nonparametric analysis of contingency tables; and advanced topics in regression and path analysis. Prerequisite: 6312 or an equivalent statistics course approved by the instructor. [3]

SOC7700 - Qualitative Methods Workshop

Title

Qualitative Methods Workshop

Catalog Description

Organization and execution of research in natural settings. Processes of collecting, analyzing, and reporting qualitative social data and documentary evidence. Theoretical and methodological bases of comparative-historical sociology. No credit for students who earned credit for 371 section 1 in fall 2009, spring 2011, fall 2012, or spring 2014. [3]

SOC7999 - Master's Thesis Research

Title

Master's Thesis Research

Catalog Description

[0-12]

SOC8329 - Survey Seminar on Gender and Sexuality

Title

Survey Seminar on Gender and Sexuality

Catalog Description

Recent contributions to the field, including micro- and macro-level theories of the development of gender ideology/roles, labor force stratification, gender and social protest, and feminist methodologies. Attention to research on sexual meanings, identities, and behaviors. No credit for students who earned credit for 367 in spring 2013. [3]

SOC8331 - Survey Seminar on Collective Behavior and Social Movements

Title

Survey Seminar on Collective Behavior and Social Movements

Catalog Description

Theories accounting for causes, dynamics, and consequences of collective behavior and/or social movements. Critiques of such theories for understanding historically specific revolutions, rebellions, and nonviolent forms of protest. [3]

SOC8333 - Survey Seminar on Cultural Sociology

Title

Survey Seminar on Cultural Sociology

Catalog Description

The creation of culture, including values, norms, beliefs, symbols, and life-styles. The reproduction of society through culture; institutions that purposefully preserve, produce, and transmit aspects of culture. [3]

SOC8343 - Survey Seminar on Social Psychology**Title**

Survey Seminar on Social Psychology

Catalog Description

The interaction of social structure and personality. Socialization, social perception, small groups, exchange theory, and symbolic interactionism. [3]

SOC8345 - Survey Seminar on Social Stratification**Title**

Survey Seminar on Social Stratification

Catalog Description

Major theories and lines of research pertaining to the origin, nature, and functioning of systems of social inequality. [3]

SOC8347 - Survey Seminar on Sociology of Science and Knowledge**Title**

Survey Seminar on Sociology of Science and Knowledge

Catalog Description

How ideas and systems of thought are related to the social structure and culture of societies. Institutionalization of scientific and intellectual activity, scientific and intellectual communities or organizations, and social influences on the directions of research by scientists and academicians. [3]

SOC8351 - Survey Seminar on Medical Sociology**Title**

Survey Seminar on Medical Sociology

Catalog Description

Theoretical paradigms and methodologies for the study of social and cultural factors in the perception, diagnosis, treatment, and distribution of disease. Emphases on medicalization, mental health, medical technology, and roles of patients and medical professionals. No credit for students who earned credit for 363 section 1 in fall 2011 or fall 2013. [3]

SOC8353 - Survey Seminar on Social Networks and Health

Title

Survey Seminar on Social Networks and Health

Catalog Description

Social network-based concepts, theories, and methodologies; applications to health and illness. Social integration, cohesion, capital, regulation, support. Negative social interactions and comparisons. Social contagion and social cost. [3]

SOC8355 - Survey Seminar on Sociology of Family

Title

Survey Seminar on Sociology of Family

Catalog Description

Examinations of the family as a social institution. Principles of social organization applied to family relationships. Macro-level analyses of family structure, the effects of families on individuals, and interactions of family systems with other institutions. No credit for students who earned credit for 363 section 1 in fall 2011 or 2013. [3]

SOC8357 - Survey Seminar on Sociology of Education

Title

Survey Seminar on Sociology of Education

Catalog Description

Comparative and functional analyses of education in society and education as society. Theories accounting for the form, role, and evolution of educational systems. Intersection of education and other institutions. No credit for students who earned credit for 363 section 1 in fall 2011. [3]

SOC8359 - Survey Seminar on International Migration

Title

Survey Seminar on International Migration

Catalog Description

Key current theoretical debates about international migration and intersection with the empirical data and case studies. Emphases on interdisciplinarity and method, and comparative studies. No credit for students who earned credit for 361 section 1 in fall 2011. [3]

SOC8999 - Non-candidate Research

Title

Non-candidate Research

Catalog Description

Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

SOC9361 - Special-Topic Seminars on Social Phenomena at the Macro Level

Title

Special-Topic Seminars on Social Phenomena at the Macro Level

Catalog Description

Each focuses on some aspect of social structure, social organization, culture, international relations, global systems, spatial organization, or the social division of labor. Cities, communities, urban areas, metropolitan areas, regions, countries, or status categories are the principal units of comparison. May be repeated more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SOC9363 - Special-Topic Seminars on Institutions and Organizations

Title

Special-Topic Seminars on Institutions and Organizations

Catalog Description

Each focuses on some type of institution-economic, educational, familial, medical, political, or religious-or some type of organization, including business firms and voluntary associations. May be repeated more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SOC9365 - Special-Topic Seminars on Norms, Power, and Related Normative Phenomena

Title

Special-Topic Seminars on Norms, Power, and Related Normative Phenomena

Catalog Description

Each focuses on a particular type of deviance, the sociology of law, social control, or political sociology. May be repeated more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SOC9367 - Special-Topic Seminars on Social Processes and Social Change

Title

Special-Topic Seminars on Social Processes and Social Change

Catalog Description

Each focuses on collective behavior, social movements, innovation and diffusion, societal development, cultural evolution, revolutions, migration, mortality, fertility, or mobility. May be repeated more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SOC9369 - Special-Topic Seminars on Methodology

Title

Special-Topic Seminars on Methodology

Catalog Description

Each seminar focuses on a particular kind of research method or statistical technique. May be repeated more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SOC9371 - Special-Topic Seminars on Theory**Title**

Special-Topic Seminars on Theory

Catalog Description

Each seminar focuses on a particular theorist, a particular theoretical perspective, or the methodology of theory construction. May be repeated more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SOC9888 - Directed Studies**Title**

Directed Studies

Catalog Description

Students work independently on topics of special interest not covered in depth in course offerings. Work in a tutorial relationship with an individual faculty member or in a student seminar, subject to faculty approval, should several students share a common interest. Prerequisite: consent of the instructor. May be repeated more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3]

SOC9889 - Directed Studies**Title**

Directed Studies

Catalog Description

Students work independently on topics of special interest not covered in depth in course offerings. Work in a tutorial relationship with an individual faculty member or in a student seminar, subject to faculty approval, should several students share a common interest. Prerequisite: consent of the instructor. May be repeated more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3]

SOC9995 - Half-time Ph.D. Dissertation Research**Title**

Half-time Ph.D. Dissertation Research

Catalog Description

For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

SOC9999 - Ph.D. Dissertation Research**Title**

Ph.D. Dissertation Research

Catalog Description

[0-12]

Spanish

SPAN5111 - Spanish for Graduate Reading

Title

Spanish for Graduate Reading

Catalog Description

Survey of grammar and vocabulary, with extensive reading. Available only to graduate students for "No Credit". [0]

SPAN5315 - Contrastive Analysis of Spanish and English

Title

Contrastive Analysis of Spanish and English

Catalog Description

(Also listed as SPAN 4315) A comparison of the phonological, morphological, and syntactical structures of Spanish and English to demonstrate the similarities and differences between the linguistic systems of these two languages. No credit for students who have earned credit for 4315. [3] (SBS)

SPAN5320 - Phonology

Introduction to Latin American Colonial Studies

Catalog Description

(Also listed as Portuguese 314) Provides a panoramic introduction to the canonical works of the colonial period from "discovery" to "independence," as well as an overview of the theoretical debates in colonial studies within the Latin American context. Topics include the construction and reshaping of identities and otherness through various stages of Latin American cultural history, the emergence of what has been called the American consciousness during the "New World Baroque," and the discourses of "independence" and early nation building. [3]

SPAN7060 - Seminar: Modernismo**Title**

Seminar: Modernismo

Catalog Description

The major literary movement of the end of the nineteenth century and beginning of the twentieth century in the Spanish-speaking world. Major authors, their context, and the fundamental ideological and literary shifts evident in their works. [3]

SPAN7070 - Spanish American and Brazilian Literature I**Title**

Spanish American and Brazilian Literature I

Catalog Description

(Also listed as Portuguese 7070) Spanish-American and Brazilian literature from the conquests to the end of the nineteenth century. Authors may include: Sor Juana, Matos, Alencar, Assis, and Carrasquilla. [3]

SPAN7071 - Spanish American and Brazilian Literature II**Title**

Spanish American and Brazilian Literature II

Catalog Description

(Also listed as Portuguese 7071) Spanish American and Brazilian literature from twentieth century and to the present. Texts may include: Os sertões, La guerra del fin del mundo, Ficciones, Perto do coração selvagem, and Água viva. [3]

SPAN7999 - Master's Thesis Research**Title**

Master's Thesis Research

Catalog Description

[0-12]

SPAN8100 - Seminar: Studies in Medieval Literature

Title

Seminar: Studies in Medieval Literature

Catalog Description

Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN8110 - Seminar: Early Modern Spanish Narrative

Title

Seminar: Early Modern Spanish Narrative

Catalog Description

Readings in Spanish prose fiction from 1550 to 1700, including the picaresque tradition and works by Cervantes, Mar√≠a de Zayas, and other writers. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN8120 - Seminar: Studies in Golden Age Drama

Title

Seminar: Studies in Golden Age Drama

Catalog Description

The comedia nueva in cultural and critical contexts. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN8130 - Seminar: Studies in Eighteenth- and Nineteenth-Century Spanish Literature

Title

Seminar: Studies in Eighteenth- and Nineteenth-Century Spanish Literature

Catalog Description

A broad survey of specific topics such as: textual civil wars; literary constructions of the nation; reconstruction of the narrative genre (1700-1900); eccentricities of Spanish Enlightenment and/or Spanish Romanticism; theatrical spectacles. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN8140 - Seminar: Modern Hispanic Poetry and Poetics

Title

Seminar: Modern Hispanic Poetry and Poetics

Catalog Description

Key moments of Spanish lyric poetry during the nineteenth and twentieth centuries. Theory and praxis, Romanticism, Avant-Garde, and Post-Modernism. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN8150 - Seminar: Studies in 20th- and 21st-Century Spanish Literature

Title

Seminar: Studies in 20th- and 21st-Century Spanish Literature

Catalog Description

Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN8200 - Seminar: Studies in Colonial Literature

Title

Seminar: Studies in Colonial Literature

Catalog Description

(Also listed as Portuguese 8200) May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN8210 - Seminar: Hispanic American Essay

Title

Seminar: Hispanic American Essay

Catalog Description

(Also listed as Portuguese 8210) May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN8220 - Seminar: Studies in Spanish American Literature in a Global Context

Title

Seminar: Studies in Spanish American Literature in a Global Context

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN8300 - Seminar: Studies in Trans-Atlantic Literature and Culture

Title

Seminar: Studies in Trans-Atlantic Literature and Culture

Catalog Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN8400 - Seminar: Studies in Inter-American Literature

Title

Seminar: Studies in Inter-American Literature

Catalog Description

(Also listed as Portuguese 8400) Comparative approaches to literary texts from such New World cultures as Brazil, Spanish America, the United States, the Caribbean, and Canada (both its French and English traditions). Fluency in Spanish and/or Portuguese required; reading competency in English and French. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN8500 - Seminar: Issues in Hispanic Cinema

Title

Seminar: Issues in Hispanic Cinema

Catalog Description

Possible topics include: feminine reflections in contemporary Spanish cinema; Hispanic variations on the cinematic Bildungsroman; traveling films; delivering the nation (Spain 1975-2005). [3]

SPAN8600 - Seminar: Issues in Latin American Cinema

Title

Seminar: Issues in Latin American Cinema

Catalog Description

Films from Brazil and Argentina in the early twenty-first century. Globalization, gender, sexuality, ethnicity, and race. Brazilian films will have English subtitles. [3]

SPAN8999 - Non-candidate Research

Title

Non-candidate Research

Catalog Description

Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

SPAN9110 - Love in Late Medieval Spanish Literature

Title

Love in Late Medieval Spanish Literature

Catalog Description

Examination of the different conceptions and discourses of love in Spain during the fourteenth and fifteenth centuries. [3]

SPAN9140 - Seminar: The Realist Novel of the Nineteenth-Century

Title

Seminar: The Realist Novel of the Nineteenth-Century

Catalog Description

A multifaceted approach to the Spanish Realist novel with attention to the sociopolitical context, contemporary cultural discourses and practices; European literary and artistic currents of the day, and theoretical formulations on the genre. [3]

SPAN9240 - Ordering and Disrupting Fictions in Latin America

Title

Ordering and Disrupting Fictions in Latin America

Catalog Description

Fictions of the mid nineteenth and early twentieth centuries. The racialized and sexualized nature of these imagined communities and their uncanny tendency to disassemble themselves. [3]

SPAN9250 - Self-Writing in Latin America

Title

Self-Writing in Latin America

Catalog Description

Theory and practice of self-writing; memoir, testimony, autobiography in Latin America. The connection between the body, language, and memory in a subject of both national and individual dimensions. [3]

SPAN9260 - The Spanish American Novel of the Boom Period

Title

The Spanish American Novel of the Boom Period

Catalog Description

An examination of the Boom novel, from the 1960s: La muerte de Artemio Cruz, Rayuela, La casa verde or Conversación en la Catedral, Tres tristes tigres, and Cien años de soledad. [3]

SPAN9265 - The Melancholy Novel in Latin America

Title

The Melancholy Novel in Latin America

Catalog Description

Construction of a melancholy subject built on the loss of a linguistic, sexual, and racial identity. The works of mourning and remembering of an abject maternal body. Texts by Latin American women writers and Latinas. [3]

SPAN9270 - The Politics of Identity in Latino U.S. Literature

Title

The Politics of Identity in Latino U.S. Literature

Catalog Description

The writings of Latinas/Latinos from the four largest groups: Chicanos, Cuban Americans, Puerto Rican Americans, and Dominican Americans. Redefinition of borders, cultures, and languages. [3]

SPAN9300 - Comparative Methodology

Title

Comparative Methodology

Catalog Description

(Also listed as Portuguese 9300) Comparative literature as an academic discipline; scholarly and theoretical distinctions; methodologies, applications, relationship to national literature units and humanities programs. [3]

SPAN9510 - Special Topics in Spanish Literature

Title

Special Topics in Spanish Literature

Catalog Description

Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN9520 - Special Topics in Spanish American Literature

Title

Special Topics in Spanish American Literature

Catalog Description

Topics vary. For list of previous topics, please see departmental Web page. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN9560 - Special Studies in Spanish Linguistics**Title**

Special Studies in Spanish Linguistics

Catalog Description

May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [1-6]

SPAN9660 - Special Studies in Spanish Literature**Title**

Special Studies in Spanish Literature

Catalog Description

May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [1-6]

SPAN9670 - Special Studies in Spanish American Literature**Title**

Special Studies in Spanish American Literature

Catalog Description

May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [1-6]

SPAN9995 - Half-time Ph.D. Dissertation Research**Title**

Half-time Ph.D. Dissertation Research

Catalog Description

For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

SPAN9999 - Ph.D. Dissertation Research**Title**

Ph.D. Dissertation Research

Catalog Description

[0-12]

Special Education

SPED7999 - Master's Thesis Research**Title**

Master's Thesis Research

Catalog Description

Open only to candidates for the Master of Science degree engaged in thesis research and writing. Consent of major professor required. [Variable credit 0-6]

SPED8100 - Proseminar I

Title

Proseminar I

Catalog Description

Advanced review of research and scientific principles, methods, and the status of research and other professional developments in special education. Required for post-master's degree students in special education. [3]

SPED8200 - Proseminar II: Contrasting Research Methodologies in Special Education Research

Title

Proseminar II: Contrasting Research Methodologies in Special Education Research

Catalog Description

The purpose of this course is to provide an overview of the frameworks and major designs within three alternative research methodologies within Special Education: single-subject research, group design, and qualitative methods. Prerequisite: 8100. [3]

SPED8300 - Research Design in Special Education

Title

Research Design in Special Education

Catalog Description

Provides in-depth analysis of group research methodology within Special Education. Design features and statistical methods are reviewed; research is critiqued; and sample studies are designed. Prerequisite: 8100, 8200. [3]

SPED8400 - Experimental Analysis of Behavior

Title

Experimental Analysis of Behavior

Catalog Description

Overview of basic behavioral processes. Presents information relating to human and nonhuman learning with a focus on the experimental analysis of behavior. Topics covered include environmental feedback mechanisms, schedules of reinforcement, establishing operations, multi-operant performances, discriminative stimulus control, stimulus equivalence, rule-governed behavior, behavioral pharmacology, and remembering/forgetting. The course also focuses on research methodologies and the critical analysis of research. Students apply their skills using computer based simulations of laboratory experiments. [3]

SPED8600 - Leadership in Special Education

Title

Leadership in Special Education

Catalog Description

This is a doctoral seminar focusing on areas where leadership is critical to the field. Leadership in special education, regardless of career choice, requires continuing development toward excellence in teaching, research and service. The major focus of this course is to develop knowledge, understandings, and skills that continue the trajectory toward excellence and leadership abilities in these areas. At this time, this course addresses the following areas: the role of theory in leading, informing, and organizing research; research, practice, and leadership in college teaching; current research, needs, and leadership in preservice teacher preparation; and an exploration of career choices after the Ph.D. [3]

SPED8810 - Introduction to Single Case Research Design

Title

Introduction to Single Case Research Design

Catalog Description

Initial course in the use of single case research methodology within special education. Overview of behavioral measurement, single case research designs, and methods of data analysis. Critical analysis of research articles. Development of a single case research proposal is required. [3]

SPED8820 - Advanced Procedures in Single-Subject Research Methodology

Title

Advanced Procedures in Single-Subject Research Methodology

Catalog Description

Use of research procedures to investigate problems in the education of persons with disabilities. Advanced procedures in single-subject research methodology, including design strategies and experimental control, are emphasized. Design and implementation of a research study is required. Prerequisite: 8810, 7400. [3]

SPED8830 - Hierarchical Linear Modeling in Educational Research

Title

Hierarchical Linear Modeling in Educational Research

Catalog Description

This course provides an introduction to hierarchical linear modeling (HLM). HLM is a methodology that can be used when a dataset possesses some form of nesting or hierarchical structure. This includes conditions where data are collected among clustered units, such as students within schools or employee within organizations. It also includes many longitudinal studies, as repeated measures can be viewed as nested with persons. (Not currently offered) [3]

SPED8840 - Observational Methods

Title

Observational Methods

Catalog Description

This doctoral-level course addresses what is known about quantitative, systematic observation of behavior to measure behavior that may or may not be used to infer status on psychological constructs. The content emphasis is on providing students with the rationale for selecting among the many options at all stages of observational measurement. Among the topics covered are (a) classical measurement theory and Generalizability theory as they relate to observational measurement, (b) principles for selecting measurement procedures, selecting behavior sampling methods, designing coding systems, selecting appropriate metrics (including nonsequential and sequential variables), (c) sequential analysis of behavior, (d) the tension between ecological validity, representativeness, and construct validity, (e) interobserver reliability issues, and (f) other issues related to the direct observation of behavior. [3] Yoder.

SPED8999 - Non-Candidate Research

Title

Non-Candidate Research

Catalog Description

Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

SPED9995 - Half-time Ph. D. Dissertation Research
Title

Half-time Ph. D. Dissertation Research

Catalog Description

Ph.D. Dissertation Research. For students who have completed 72 hours and devote a half-time effort to dissertation research. [0-9]

SPED9999 - Ph.D. Dissertation Research
Title

Ph.D. Dissertation Research

Catalog Description

Ph.D. Dissertation Research. [0-12]

Theatre

THTR5201 - Contemporary Drama and Performance Criticism
Title

Contemporary Drama and Performance Criticism

Catalog Description

(Also listed as THTR 3201W) Dramatic literature and performance theory. Advanced techniques in writing performance criticism. No credit for students who have earned credit for 3201W. [3]

THTR5202 - Histories of Theatre and Drama II: The European Stage
Title

Histories of Theatre and Drama II: The European Stage

Catalog Description

(Also listed as THTR 2202W) Including the Italian Renaissance, French neoclassicism, English Restoration, German and French romanticism, and the modernist movements of realism, symbolism, Dada and futurism, expressionism, epic theatre, and absurdism. No credit for students who have earned credit for 2202W. [3]

THTR5204 - Histories of Theatre and Drama III: The U.S. Stage
Title

Histories of Theatre and Drama III: The U.S. Stage

Catalog Description

(Also listed as THTR 2204) Including British colonial and revolutionary drama; frontier theatre; melodrama; minstrelsy, vaudeville, burlesque, and the musical stage; pageantry and community theatre; postwar realism; African-American, Chicana/o, feminist, and Asian-American theatre movements. No credit for students who have earned credit for 2204. [3]

THTR5211 - Shakespeare in the Theatre
Title

Shakespeare in the Theatre

Catalog Description

(Also listed as THTR 4201) Selected plays and scenes. Theoretical and practical exploration of script, theatre, and audience in terms of production past and present. Prerequisite: at least junior standing. No credit for students who have earned credit for 4201. [3]

THTR5651 - Intermediate Play Direction
Title

Intermediate Play Direction

Catalog Description

(Also listed as THTR 3651) Development of theoretical and practical approaches to directing dramatic texts. Emphasis on research, interpretation, and communication. No credit for students who have earned credit for 3651. [3]

Tibetan Language

TBTN5101 - Elementary Tibetan I (UVA)
Title

Elementary Tibetan I (UVA)

Catalog Description

(Also listed as TBTN 1101) Grammar and syntax of spoken and written Tibetan. Listening, speaking, reading and writing from Tibetan short stories, proverbs, and other sources. Tibetan culture. Offered on a graded basis only. No credit for students who have earned credit for 1101. [4]

TBTN5102 - Elementary Tibetan II (UVA)
Title

Elementary Tibetan II (UVA)

Catalog Description

Grammar and syntax of spoken and written Tibetan; listening, speaking, reading and writing. Examples from Tibetan short stories and proverbs, among other sources. Exposure to Tibetan culture to improve communication skills, using a dynamic, interactive format. Offered on a graded basis only. Prerequisite: 5101. [4]

TBTN5201 - Intermediate Tibetan I (UVA)
Title

Intermediate Tibetan I (UVA)

Catalog Description

(Also listed as TBTN 2201) Grammar and syntax of spoken and written Tibetan. Listening, speaking, reading, and writing through the integrated use of spoken and literary forms. Enhanced knowledge of Tibetan culture. Offered on a graded basis only. No credit for students who have earned credit for 2201. [4]

TBTN5202 - Intermediate Tibetan II (UVA)

Title

Intermediate Tibetan II (UVA)

Catalog Description

Grammar and syntax of spoken and written Tibetan; listening, speaking, reading and writing through spoken and literary forms. Further study of Tibetan culture to improve communication skills. Offered on a graded basis only. Prerequisite: 5201. [4]

University Courses

UNIV5150 - Justice, Mercy, and Mass Incarceration

Title

Justice, Mercy, and Mass Incarceration

Catalog Description

Mass incarceration is a central legal and moral challenge of our era, which draws upon the historically powerful synergies between law and religion. Mass incarceration is a legal creation, and law defines the experience of incarceration and re-entry. But theories of crime and punishment have long depended upon religious legitimation, and the impact of mass incarceration on our society ultimately presents deeply moral and theological questions. The issue cannot be effectively addressed from the perspective of a single discipline. By addressing mass incarceration through law and religion together, this course will equip students with a deeper understanding of the causes and consequences of our current system, and it will address the racial dimensions of incarceration as both legal and religious constructions. It will explore the legal structures and justifications that create mass incarceration as well as the moral and theological arguments mass incarceration provokes. This interdisciplinary study will enable students to become better advocates for change through policy, law, outreach, and activism. [3] Mr. Reside and Mr. Rubin

UNIV5225 - Social Entrepreneurship

Title

Social Entrepreneurship

Catalog Description

This course will help nascent social entrepreneurs consider both opportunities and challenges presented by this emerging form of social action. Through a combination of lecture and discussion, guest speakers and written case studies, we will engage the important questions of "what," "so what," and "what next" that drive the ideas and practice of social entrepreneurs. While the course will place particular emphasis on the areas of education and community development, time will be spent looking at social change in other arenas as well. [3]

UNIV5278 - Tackling Big Questions with Mobile Cloud Computing

Title

Tackling Big Questions with Mobile Cloud Computing

Catalog Description

This course will address big questions motivated by the rapid growth of interest across disciplines in computing technologies that have occurred over the past decade, due in part to the pervasive and profound impact of mobile devices and powerful cloud computing services on many aspects of our daily lives. Examples of these big questions include how mobile cloud computing technologies are (1) being used to engage teens with chronic diseases, (2) changing political discourse in the US and around the world, and (3) helping economically disadvantaged individuals bridge the digital divide to obtain better guidance on nutrition and legal matters. This class will provide a multidisciplinary environment where undergraduate and graduate students from multiple Schools team with Computer Science students to address big questions in a project-based format. Each project will be sponsored and mentored by a subject matter expert in the field from other Schools on campus, with the goal of providing students a hands-on experience understanding and applying key mobile cloud computing techniques, tools, and principles needed to tackle these big questions. FALL, SPRING [3 each semester; maximum of 6 hours total for all semesters]

UNIV5315 - Planetary Health, Policy and Social Justice

Title

Planetary Health, Policy and Social Justice

Catalog Description

This is a three credit hour elective course designed for students interested in exploring the intersections between primary care, planetary health and climate change (according to WHO, currently the greatest threat to global health), social justice and policy. The causes of climate change and the resulting primary, secondary and tertiary impacts on people and communities will be examined through the lens of global health and policy. Students will develop evidence based and targeted adaptation and mitigation strategies as well as policy-based solutions, all incorporating science and engineering, political science and policy, law and economics as well as nursing and medicine to address healthspan disparities related to climate change and social vulnerability. [3]

UNIV5320 - The Causes and Consequences of LGBT Public Policies

Title

The Causes and Consequences of LGBT Public Policies

Catalog Description

This new Multicultural University Course will introduce students to critical questions about public policies relevant to LGBTQIA populations, including: legal access to same-sex marriage; nondiscrimination policies in employment, housing, and public accommodation, including whether they are trans-inclusive; so-called 'bathroom bills'; religious freedom restoration laws (also called 'conscience' acts); and others. The course will investigate the causes, correlates, and consequences of these policies using the lenses of economics, law, sociology, political science, and public health and medicine. Students will critically analyze leading research articles and mainstream media discussions of LGBTQ-related public policies; hear from guest speaker experts; perform an immersive research project; and visit Tennessee policymakers to understand views on a range of LGBTQ-related issues. [3]

UNIV5325 - Health Policy Analysis & Advocacy

Title

Health Policy Analysis & Advocacy

Catalog Description

Health is both wildly sought after and wildly controversial. We race for cures, rally for affordable and accessible health care, debate the ethics of various treatments and pass laws meant to keep our people healthy. This Multicultural University Course will prepare students to be more effective and skillful participants in debates over health policy by immersing them in the national and Tennessee health policy environment. This course promotes critical scholarship and leadership through engagement with national policy experts, media and locally elected officials. Students will learn how to leverage publicly available data to write policy reports that address important health policy problems; additional readings and skills-based exercises are required for graduate students. [3]

UNIV5330 - The History of Science and Brewing

Title

The History of Science and Brewing

Catalog Description

Historical and scientific perspectives on brewing beer and related beverages. History of brewing and beer production, religious dimensions of beer consumption in past societies, biochemical processes of fermentation and alcohol abuse, and neuroscience of reward and addiction. The course includes a laboratory component. [3]

UNIV5350 - Design Thinking, Design Doing

Title

Design Thinking, Design Doing

Catalog Description

This course is an introduction to theories and practices of design. The design thinking elements of the course offer a critical understanding of methods for researching interactions between humans and the social and built environment, whereas the design doing elements teach how to develop purposeful interventions that result in more meaningful and effective interactions. Throughout, we will examine how (and what) people can learn while engaged in the design process. Working in teams, students in the course will spend significant time observing, listening, analyzing, storytelling, and otherwise engaging users as they work in teams to develop and implement meaningful and transformative designs to projects in the domains of education, health and business. [3]

UNIV5360 - Data Science Methods for Smart City Applications

Title

Data Science Methods for Smart City Applications

Catalog Description

Integrating technological and socio-economic approaches to challenges facing metropolitan areas experiencing unprecedented growth. Infrastructure and resources needed for sustainable development and maintaining quality of life. Adapting technology-driven internet-of-things framework to Smart Cities concept of urban development. Ethical and justice concerns, including privacy and equitable access to data. Algorithmic methods of machine learning and statistics, such as supervised and unsupervised learning, factor analysis, multi-dimensional regression analysis, and hierarchical linear modeling. Agent-based and equation-based simulation modeling. Linear and nonlinear optimization. Mixed methods approaches to gathering and analyzing qualitative and quantitative socio-economic data. Computational methods for data from large distributed infrastructure. The course will combine lectures on the fundamental material, and a semester-long multi-disciplinary group project. [3]

UNIV5370 - Cultural Heritage in Context: The Future of the Past
Title

Cultural Heritage in Context: The Future of the Past

Catalog Description

Cultural heritage is under threat globally as a casualty of war, economic development, and environmental changes. This course is concerned with the preservation the tangible and intangible products of human societies from prehistory to the present. Given the complexities of cultural heritage management, this course is relevant to multiple disciplines in the humanities (anthropology, archaeology, art, history, history of art, philosophy), social sciences (communication studies, economics, sociology) and physical sciences (aerospace, computer science, materials sciences), as well as law and music. Students will learn about current issues in cultural heritage from Vanderbilt faculty and invited experts and will undertake independent research projects. [3]

UNIV5655 - Historic Black Nashville
Title

Historic Black Nashville

Catalog Description

This course will explore the under-developed history of black Nashville from settlement to the early twentieth century. Through instructor and guest lectures, digital humanities instruction, site visits, and independent research in local archives, students will recover and document the lives of the city's enslaved and free people of color as well as the community institutions and social and artistic movements that defined the black experience in Nashville. As students gain substantive expertise, they will also learn research methods and multiple media and technologies for telling historical narratives. No credit for students who have earned credit for HIST 2655. Offered on a graded basis only. FALL [3] (US) Landers and Sharfstein.
