

Undergraduate Catalog

Vanderbilt University

2025/2026

Containing general information and courses of study for the 2025/2026 session

Table Of Contents

Table Of Contents	2
Calendar 2025/2026	19
FALL SEMESTER 2025	19
SPRING SEMESTER 2026	19
MAYMESTER 2026	19
SUMMER SESSION 2026	19
Special Programs for Undergraduates	19
Immersion Vanderbilt	20
Hoogland Undergraduate Business Program	20
The Undergraduate Business Minor	21
BUS Pathways (all courses are 3.0 hours unless otherwise noted)	21
Entrepreneurship	21
Finance and Accounting	22
Marketing	22
Operations	22
Organizational Effectiveness	22
Strategy	23
Business-in-Society Electives	23
Course Descriptions	24
Undergraduate Minor in Legal Studies	25
Air Force Reserve Officer Training Corps (AFROTC)	25
AFROTC Program/Scholarships	26
General Benefits	26
Sponsored Activities	26
Aerospace Studies Courses at TSU	27
FRESHMAN YEAR	27
SOPHOMORE YEAR	27
JUNIOR YEAR	27
SENIOR YEAR	27
Army Reserve Officers' Training Corps (ROTC)	27
Military Science Department	29
Military Science Courses	29
FIRST YEAR	29
SOPHOMORE YEAR	30
JUNIOR YEAR	30
SUMMER BETWEEN JUNIOR AND SENIOR YEAR	31
SENIOR YEAR	31
Naval Reserve Officers' Training Corps (NROTC)	31
Naval Science	33
Naval Science Courses	33
FIRST YEAR	33
SOPHOMORE YEAR	33
JUNIOR YEAR	33
SENIOR YEAR	33
Admission	33
Admission	33
Academic Preparation	34
Application Procedure — First-year Applicants	34
Application Procedure — Transfer Applicants	35
International Applicants	35
Advanced Credit	35
Advanced Credit	36
College Entrance Exams	36
Advanced Placement Credit Policy	36
International Baccalaureate Credit Policy	36
Advanced Placement Examination Grades Accepted by Various Departments at Vanderbilt for Advanced Placement with Credit	36
African American Studies	37
Art	37
Computer Science	37
Economics	37
English	37
Government and Politics	37
History	37
Human Geography (No credit)	37
Languages	37

Mathematics	38
Music	38
Psychology	38
Sciences	38
Statistics	39
International Baccalaureate Test Scores Accepted by Various Departments at Vanderbilt for Advanced Credit	39
Pre-College Summer School Program	40
Credit for Previous College Work	40
International Students	42
Transfer Credit	43
Prior Degrees	43
Intra-University Transfer	44
Division of Unclassified Studies	45
Summer Session	45
Maymester	46
Financial Information	46
Financial Information	46
Payment of Tuition and Fees	46
Transcripts	46
Fraternity and Sorority Membership	46
Need-Based Financial Aid	47
University General Medals, Prizes, and Awards	47
Undergraduate Academic Regulations	56
Institutional Policies and Student Obligations	57
Honor System	57
Responsibility to be Informed	57
Class Attendance	57
Classroom Recording Policy	57
Change of Address	57
Catalog Authority	57
Academic Advising	58
Course Enrollment and Management	58
Course Registration	58
Normal Course Load	58
Add/Drop a Course	58
Pass/Fail	58
Course Withdrawal	60
Taking Courses for Zero Credit	60
Auditing	60
Independent Study	60
Duplication of Course Content	61
Repeating a Course	61
Undergraduate Enrollment in Graduate School Courses	62
Reserving Credit for Graduate School	62
Grading and Credits	63
Credit Hour Definition	63
Grade Reports	63
Grade Point Average	63
Defined Grades with Corresponding Grade Points per Credit Hour	63
F: Failure	64
Mid-Semester Progress Reports	64
Temporary Grades	64
Transfer Credit	65
Credit by Examination	65
Degree Requirements	65
Graduation Requirements	66
Residence Requirement	66
Grade Point Average Requirements	66
Academic Record and Degree Audit	66
Examinations	67
Final Examinations	67
Dead Week	67
Comprehensive Examination	67
Senior Re-Examination	67

Dismissal	72
Enrollment Status-Changes	72
Leave of Absence	72
Withdrawal from the University	73
Reinstatement	73
Study Abroad	73
College of Arts and Science	75
College of Arts and Science Administration and Faculty	75
Faculty	76
A Community of Interdisciplinary Learning	76
Faculty and Students	77
Academic Support	77
The Writing Studio / Tutoring Services	77
Computers	77
Advising	78
Public Lectures	78
Degree Programs in the College	80
Bachelor of Arts / Bachelor of Science	80
Limitation on Credit Hours outside the College	81
A&S College Core (for students entering Fall 2025 and later)	81
AXLE: Achieving eXcellence in Liberal Education (For students who entered before Fall 2025)	82
What Is AXLE?	82
The First-Year Writing Seminar	82
The Writing Requirement	82
The Liberal Arts Requirement	83
The Major	85
AXLE Curriculum Course Distribution	85
AXLE, the Major, and the Optional Minor	85
Advanced Placement under AXLE	85
Transfer Credit under AXLE	85
Area of Concentration	85
Major Field	85

Declaration of the Area of Concentration	86
Individually Designed Interdisciplinary Majors	87
Double and Triple Majors	87
Approved Second Majors Outside the College	87
Additional Programs in the College of Arts and Science	88
The Optional Minor	88
Approved Minors Outside the College	89
Undergraduate Research	90
Study Abroad Programs	90
Pre-Professional Studies	90
Medicine	90
Dentistry	91
Nursing	91
Architecture	91
Engineering	91
Law	91
Teacher Education	91
Internships	91
Finding an Internship	92
Interdisciplinary Internships	92
Departmental Internships	92
Cost of an Internship	93
Combined B.A./M.A. (4+1) Program	93
Programs of Study	93
Admissions Overview	94
Advising	94
Curriculum	94
Scholarships and Financial Aid	94
Honors in the College of Arts and Science	95
Founder's Medal	95
Latin Honors Designation	95
College Scholars Program (only available to students under AXLE)	95
Departmental Honors	95
Dean's List	96
Phi Beta Kappa	96
Honor Societies for First-Year Students	97
Other Awards and Prizes	97
College of Arts and Science Programs of Study	98
College of Arts and Science Courses	100
Blair School of Music	102
Music at Vanderbilt	102
Facilities	103
The Blair Concert Series	104
Blair Academy at Vanderbilt	104
Classes for Students in Other Vanderbilt Schools and Colleges	104
Ensembles	105
Performance	105
Group Performance Instruction: Non-Major	105
Individual Performance Instruction	105
Music Minors	106
Music Minor. 24 or 25 hours.	106
Musicology/Ethnomusicology Minor. 18 or 19 hours.	107
Music Composition Minor. 26 hours.	107
Music Technology Minor. 18 to 23 hours.	108
Music Performance Minor. 25 or 26 hours.	108
Music as a Second Major	109
Music Major (Second Major). 31 hours.	109
Blair School of Music Administration and Faculty	109
Music Library	110

Area Coordinators	110
Faculty Coordinators and Program Directors	110
Committees	111
Faculty	111
The Degree Programs	111
Bachelor of Music	111
Bachelor of Music Degree Requirements	111
Requirements by Major Area	111
BRASS PERFORMANCE	112
COMPOSITION	113
HARP PERFORMANCE	114
INTEGRATED STUDIES	115
INTEGRATED STUDIES/TEACHER EDUCATION, INSTRUMENTAL/GENERAL	116
INTEGRATED STUDIES/TEACHER EDUCATION, VOCAL/GENERAL	118
JAZZ STUDIES	119
PERCUSSION PERFORMANCE	120
PIANO PERFORMANCE	121
STRING PERFORMANCE	122
VOICE PERFORMANCE	123
WOODWIND PERFORMANCE	124
Bachelor of Musical Arts	125
Bachelor of Musical Arts Degree Requirements	126
Liberal Arts Core	127
English/writing (6 hours)	128
Humanities (9 hours)	128
HUMANITIES REQUIREMENTS	128
HUMANITIES ELECTIVES	128
History, Social Science (3 hours)	129
HISTORY	129
SOCIAL SCIENCE	129
Mathematics, Natural Science (3 hours)	130
MATHEMATICS	130
NATURAL SCIENCE	130
Academic Electives (9 hours)	130
Free electives (sufficient to complete 126 hours)	131
Blair-Specific Regulations	131
Internships	131
Performance Instruction: B. Mus. and B. Mus. Arts Degrees	131
Upper Divisional Hearing	131
Pre-Recital Hearing	132
Recital and Recital Committee	132
Recital Attendance	132
Extracurricular Performance	133
Additional Programs in the Blair School of Music	133
Minor Area and Concentration Requirements	133
CONCENTRATION IN COLLABORATIVE ARTS. 24 hours	133
CONCENTRATION IN COMPOSITION. 20 hours minimum	134
CONCENTRATION IN ETHNOMUSICOLOGY. 20 hours minimum	134
CONCENTRATION IN JAZZ. 20 hours minimum	134
CONCENTRATION IN MULTIPLE WOODWINDS. 23 hours	134
CONCENTRATION IN MUSIC AND THE MIND. 23 hours	134
CONCENTRATION IN MUSICOLOGY. 20 hours minimum	135
CONCENTRATION IN PEDAGOGY. 18-20 hours	135
CONCENTRATION IN MUSIC THEORY. 18-20 hours	135
HONORS IN MUSICOLOGY AND ETHNOMUSICOLOGY. 9 hours	135
MINOR INSTRUMENT. 10 hours	135
Teacher Education	136
Junior Mid-Program Review [Screening I]	136
Admission to Student Teaching [Screening II]	137
3+2 B.Mus.Arts/MBA Blair-to-Owen Program	138
Tuition and Financial Aid	139

Honors in the Blair School of Music	139
Founder's Medal	139
Academic Honors Designation	139
Honors Program in Musicology and Ethnomusicology	139
Dean's List	140
Pi Kappa Lambda	140
Awards and Prizes	140
Blair School of Music Courses	142
College of Connected Computing	144
College of Connected Computing Administration and Faculty	144
Administration	144
Faculty	144
College of Connected Computing	144
College of Connected Computing Minors	144

General Education Core Program	218

Licensure for Teaching	218
Security Clearance	219
Degree Audits	219
SCREENING	219
Screening I (Formal Admission to an Undergraduate Teacher Education Program)	220
Screening II (Admission to Student Teaching)	221
Student Teaching	221
Application for Teacher Licensure and University Recommendation for Licensure	221
Accreditation	222
Special Program in Peabody College	223
Peabody Scholars Program	223
Interdisciplinary Majors	223
Language and Literacy Studies (36 hours)	223
Mathematics and Science Studies (35–37 hours)	224
Natural Science Studies (35–36 hours)	225
Social Studies (36 hours)	226
Anthropology	226
Economics	226
United States History	226
European History	226
American Politics	227
World Politics	227
Sociology	227
Human and Organizational Development	227
Major in Human and Organizational Development	228
Curriculum	230
Honors Program	233
Potential Peabody Second Majors	234
Human and Organizational Studies	235
Psychology and Human Development	235
Majors in Child Development, Child Studies, and Cognitive Studies	235
Major in Child Development	236
Honors Program	236
Curriculum	236
General Education Core Requirements. Minimum 31 hours.	236
Writing Requirement	237
Major Requirements. 30 hours.	237
Major Core. 21 hours.	237
Major Elective Area. A minimum of 9 hours.	237
Second Major or Electives. 50 hours (or less if additional hours are earned in the General Education Core, Major Core, or Major Elective Area).	238
Major in Child Studies	238
Honors Program	238
Curriculum	239
General Education Core Requirements. Minimum 40 hours.	239
Writing Requirement	239
Child Studies Major Courses	239
Major in Cognitive Studies	241
Honors Program	242
Curriculum	242
General Education Core Requirements. Minimum 31 hours.	242
Writing Requirement	242
Major Requirements. 33 hours.	242
Major in Language Sciences	244
Curriculum	244
General Education Core Requirements. Minimum 31 hours.	244
Writing Requirement	244
Major Requirements. 33 hours.	244
Special Education	245
Major in Special Education	245
Honors Program	246
B.S. Degree Requirements	246
General Education Core Requirements. Minimum 31 hours.	246
Writing Requirement	246
Specializations	246

Disability Studies	248
Teaching and Learning	248
Majors in Early Childhood and Elementary Education, Secondary Education, Multilingual and Multicultural Studies, and Minor in Multilingual Learner Education	248
Elementary Education	248
B.S. Degree Requirements	249
Elementary Education (K-5 Licensure)	249
Secondary Education	250
B.S. Degree Requirements	250
Secondary Education (6-12 Licensure)	250
B.S. Degree Requirements	252
Educational Studies	252
Multilingual and Multicultural Studies (2nd major)	254
Peabody Minors	255
Human and Organizational Development Minor	255
Psychology and Human Development minors:	256
Child Psych and Mental Health	256
Cognitive Studies	257
Language Sciences	258
Quantitative Methods	259
Special Education Minors	259
Minor in Special Education	259
Minor in Instruction in Special Education	260
Teaching and Learning Minors	261
Education Studies	261
Multilingual Learner Education	261
Reading/Literacy Education	261
STEM Education Minor	261
Honors in Peabody College	262
Founder's Medal	262
Latin Honors Designation	262
Dean's List	263
Kappa Delta Pi	263
Honor Societies for Freshmen	263
Awards	263
Human Organization and Development	263
Psychology and Human Development	263
Special Education	264
Teaching and Learning	264
Peabody College Courses	265
Undergraduate Programs of Study	265
African American and Diaspora Studies	265
Program of Concentration in African American and Diaspora Studies	266
Honors Program	266
Minor in African American and Diaspora Studies	266
Areas of Study	267
Area of Study I, Gender and Sexuality	267
Area of Study II, Literature, Theory, and Visual Culture	267
Area of Study III, Social Sciences	267
Other Electives	267
Anthropology	269
Program of Concentration in Anthropology	270
Honors Program	270
Minor in Anthropology	271
Arabic	271
Art	271
Program of Concentration in Art	273
Requirements for the Program of Concentration in Art	273
Honors Program in Art	273
Minor in Art	274
Asian Studies	274
Program of Concentration in Asian Studies	275
Program of Concentration in Asian American and Asian Diaspora Studies	276
Honors Program in Asian Studies	276
Minor in Asian Studies	276
Minor in Chinese Language and Culture	276
Minor in Japanese Language and Culture	277

Minor in Korean Language and Culture	277
Minor in South Asian Language and Culture	277
Minor in Asian American and Asian Diaspora Studies	277
Asian Studies Course List	278
Biochemistry and Chemical Biology	285
Program of Concentration-BA	285
Required Math and Science Courses for Both Tracks	285
Foundational Courses for all Tracks (12 credit hours)	286
Tracks	286
Biochemistry Track	286
Chemical Biology Track	286
General Electives (6 credit hours)	286
Program of Concentration - BS	286
Required Math and Science Courses	286
Foundational Courses (13 credit hours)	287
Laboratory Requirement (6 credit hours)	287
BCB Electives (15 credit hours)	287
General Electives (6 credit hours)	287
Honors Program	287
Biological Sciences	287
Requirements for Biological Sciences BA degree	289
Requirements for the Molecular and Cellular Biology (MCB) BS degree	289
Requirements for the Integrative Biology (I-Bio) BS degree	289
Requirements for Honors	290
Minor in Biological Sciences	290
Biomedical Engineering	290
Curriculum Requirements	292
Specimen Curriculum for Biomedical Engineering	293
Double Majors	294
Business Studies	295
Chemical Engineering	295
Curriculum Requirements	297
Dual Majors	297
Specimen Curriculum for Chemical Engineering	298
Chemistry	299
Program of Concentration in Chemistry	300
In-Depth Chemistry Courses	302
Minor in Chemistry	303
Honors Program	303
Licensure for Teaching	303
Introductory Courses	303
Civil Engineering	303
Curriculum Requirements	305
Specimen Curriculum for Civil Engineering	306
Pre-Architecture Advising	308
Cinema and Media Arts	308
Program of Concentration in Cinema and Media Arts	308
Honors Program	309
Minor in Cinema and Media Arts	309
Classical and Mediterranean Studies	310
Program of Concentration in Classical and Mediterranean Studies	311
Track 1: Classical and Near Eastern Languages and Cultures	311
Track 2: Mediterranean Archaeology	312
Track 3: Mediterranean Studies	312
Honors Program	312
Minor in Mediterranean Archaeology	313
Minor in Mediterranean Studies	313
Approved List of Courses	313
Climate and Environmental Studies	315
Computer Science	318
Curriculum Requirements	319
Specimen Curriculum for Computer Science	320
Second Major in Computer Science for Non-Engineering Students	321
Communication of Science and Technology	322
Program of Concentration in Communication of Science and Technology	322
Approved Courses:	325

Honors Program	326
Requirements for Admission to Honors in CSET	326
Requirements for Completion of Honors in CSET	326
Course of Study for Honors in CSET	326
Minor in Communication of Science and Technology	326
Communication Studies	327
Program of Concentration in Communication Studies	327
Minor in Communication Studies	328
Culture, Advocacy, & Leadership	328
Program of Concentration in Culture, Advocacy, & Leadership (30 credit hours)	328
Minor in Culture, Advocacy, & Leadership (15 credit hours)	329
Minor in Sports and Society (15 credit hours)	329
Honors Program	329
Approved List of Courses	330
INTERDISCIPLINARY PROGRAMS	330
ELECTIVES	330
Earth and Environmental Sciences	332
Program of Concentration in Earth and Environmental Sciences	333
B.A. DEGREE OPTION	333
B.S. DEGREE OPTION	334
Designing EES Area of Focus	336
Honors in Earth and Environmental Sciences	336
Minor in Earth and Environmental Sciences	337
Licensure for Teaching	337
Economics	337
Program of Concentration in Economics	338
Mathematics Prerequisite	338
Minor in Economics	338
Honors Program	338
Program of Concentration in Economics and History	339
Licensure for Teaching	339
Economics and History	339
Honors Program (9 more credit hours)	340
Electrical and Computer Engineering	340
Curriculum Requirements	342
Electrical and Computer Engineering Areas of Concentration	343
Specimen Curriculum for Electrical and Computer Engineering	344
Engineering Science and Management	346
Engineering Science Major (Bachelor of Science)	346
Curriculum Requirements	347
English	348
Programs of Concentration	349
Program I: Literary Studies (30 credit hours)	349
Program II: Creative Writing (30 credit hours)	349
Program III: Specialized Critical Studies (30 credit hours)	349
Minor in English: Literature	350
Minor in English: Creative Writing	350
General Requirements and Advice for Majors and Minors in All Programs	350
Honors Program	351
Licensure for Teaching	351
Environmental Engineering	351
Curriculum requirements	352
Specimen Curriculum for Environmental Engineering	353
European Studies	354
Program of Concentration in European Studies (27-30 credit hours)	355
Honors Program	356
The Minor in European Studies	356
French and Italian	357
Program of Concentration in French	358
Honors Program in French	358
Program of Concentration in French and European Studies	358
Minor in French	359
Minor in Italian Studies	359
Program of Concentration in Italian and European Studies	360
Licensure for Teaching	360
French	360
Italian	360
Gender and Sexuality Studies	361
Program of Concentration in Gender and Sexuality Studies	361

Honors Program	362
Minor in Gender and Sexuality Studies	362
German, Russian and East European Studies	364
Program of Concentration in German Studies	365
German Language Proficiency	366
Honors Program in German Studies	366
Minor in German Studies	366
Study Abroad	366
Program of Concentration in Russian Studies	367
Study Abroad	367
Honors Program	367
Minor in Russian Studies	367
Licensure for Teaching	368
German	368
Russian	368
Hebrew	368
History	368
Program of Concentration in History	369
Program of Concentration in Law, History, and Society	372
Honors Program	373
Program of Concentration in Economics and History	373
Licensure for Teaching	373
Minor in History	373
History of Art and Architecture	374
Program of Concentration in History of Art	374
Program of Concentration in Architecture and the Built Environment	375
Honors Program	379
Minor in History of Art	379
Minor in Architecture and the Built Environment	379
Minor in Museum Studies	380
Honors	381
Jewish Studies	381
Program of Concentration in Jewish Studies	382
Honors Program	382
Minor in Jewish Studies	382
LANGUAGE:	383
ELECTIVES:	383
Latin American, Caribbean, and Latinx Studies	384
Program of Concentration in Latin American, Caribbean, and Latinx Studies	385
Minor in Latin American and Latinx Studies	385
Minor in Caribbean Studies	385
Minor in Brazilian Studies	386
Honors Program	386
Latino and Latina Studies	386
Program of Concentration in Latino and Latina Studies	387
Minor in Latino and Latina Studies	387
Approved List of Courses	387
Mathematics	389
Program of Concentration	390
Program I (Standard Track)	390
Program II (Applied Track)	390
Program III (Bachelor of Science Track)	391
Program IV (Honors Track)	391
Honors Program	391
Minor in Mathematics	392
Licensure for Teaching	392
Calculus	392
Mechanical Engineering	392
Curriculum Requirements	394
Specimen Curriculum for Mechanical Engineering	394
Medicine, Health, and Society	396
Program of Concentration in Medicine, Health, and Society	397
Honors Program	398
Minor in Medicine, Health, and Society	398
Approved Courses	398
Nanoscience and Nanotechnology	405
Nanoscience and Nanotechnology Minor	406
Neuroscience	407

Program of Concentration	408
Required Math and Science Courses	408
Neuroscience Courses	408
Related Course Electives	409
Honors Program	409
Minor in Neuroscience	409
Philosophy	410
Program of Concentration in Philosophy	410
Honors Program	410
Minor in Philosophy	411
Physics and Astronomy	411
Program of Concentration in Physics	412
B.A. in Physics:	412
B.S. in Physics	413
Licensure for Teaching	413
Honors Program	413
Departmental Minors	414
Minor in Physics	414
Minor in Astronomy	414
Introductory Courses - Physics	414
Intermediate Courses - Physics	415
Advanced Courses - Physics	415
Medical and Health Physics Courses	415
Physics Education Courses	415
Introductory Courses - Astronomy	415
Intermediate Courses - Astronomy	415
Advanced Courses - Astronomy	415
Political Economy	416
Minor in Political Economy	416
Prerequisites	416

Calendar 2025/2026

Dates are subject to change.

FALL SEMESTER 2025

Classes begin. Wednesday 20 August

Registration ends. Friday 29 August.

Deadline to pay fall charges. Sunday 31 August.

Thanksgiving holidays. Saturday 22 November - Sunday 30 November

Classes end. Thursday 4 December

Reading days and examinations. Friday 5 December - Saturday 13 December

Fall semester ends. Saturday 13 December

SPRING SEMESTER 2026

Deadline to pay spring charges. Wednesday 31 December 2025

Classes begin. Monday 5 January

Registration ends. Wednesday 14 January

Spring holidays. Saturday 7 March - Sunday 15 March

Classes end. Monday 20 April

Reading days and examinations. Tuesday 21 April - Thursday 30 April

Commencement. Friday 8 May

MAYMESTER 2026

Classes begin. Monday 4 May

Classes end; examinations. Friday 29 May

SUMMER SESSION 2026

Classes begin. Tuesday 2 June

Examinations for first-half courses. Friday 2 July

Second-half courses begin. Tuesday 7 July

Examinations for second-half and full-term summer courses. Friday 6 August

Special Programs for Undergraduates

Immersion Vanderbilt

Immersion Vanderbilt is an innovative program that enhances the undergraduate experience through hands-on experiential and applied learning. Each student shall complete at least one immersive experience and one culminating project. At its core, Immersion Vanderbilt gives every Vanderbilt student the opportunity to pursue their academic, creative, and/or career interests through immersive experiences and culminating projects. Throughout the Immersion Vanderbilt process, students are supported by faculty and Immersion Vanderbilt staff.

Immersion Vanderbilt is a graduation requirement for all undergraduates. Some majors, minors, programs of study, and classes are approved to satisfy the immersive experience, culminating project, or both. To complete Immersion Vanderbilt, students engage in one or more experiential learning activities, such as an internship, hands on research or artistic projects, or community volunteer work, among many other applied experiences. Students will have a faculty or staff adviser for the immersion experience and will select one of six experiential pathways: 1) Research; 2) Study Abroad; 3) Innovation, Arts, & Design; 4) Civic & Community Engagement; 5) Leadership & Professional Development; or 6) Internships. When a student engages in research for Immersion, a Vanderbilt faculty member serve as the adviser. Throughout the program, students are prompted to reflect upon their immersive experiences, which can inform the development of the culminating project. This reflective process ensures that students gain a deeper understanding of their immersive experience(s) and its significance to their goals.

Upon completing their immersive experience(s), students plan and complete their culminating project. Although students are encouraged to base their culminating project on their immersive experience(s), this is not required; the culminating project can relate to an immersive experience already completed or a new topic. As with the immersive experiences, students complete their culminating project in one of the six immersion pathways: 1) Research; 2) Study Abroad; 3) Innovation, Arts, & Design; 4) Civic & Community Engagement; 5) Leadership & Professional Development; or 6) Internships. The format of the culminating project can take many forms, including oral or poster presentations, artistic displays at a showcase, performances, design projects, short films or videos, websites, prototypes, white papers, or senior theses, among others. The Immersion Vanderbilt faculty adviser mentors the student in the creation and completion of the culminating project and assesses its quality before marking it complete.

When the Immersion Vanderbilt faculty adviser approves the student's culminating project submission, the Immersion Vanderbilt requirement is complete and cannot be changed. Completion of the Immersion Vanderbilt graduation requirement is noted on the student's degree audit and the student transcript is updated with the culminating project title and project pathway. More information about Immersion Vanderbilt can be found at: <https://www.vanderbilt.edu/immersion/>.

Blair: Most Blair students will take advantage of the senior recital experience or honors thesis in ethnomusicology/musicology to satisfy the requirements of Immersion Vanderbilt. However, students may choose to pursue an Immersion plan outside their home program. Students should consult the Office of Experiential Learning and Immersion Vanderbilt. Completion of the Immersion Vanderbilt graduation requirement will be shown on the student's degree audit, and the title of the Immersion project will be added to the student's transcript. [vanderbilt.edu/immersion](https://www.vanderbilt.edu/immersion/)

Hoogland Undergraduate Business Program

Vanderbilt University offers a transinstitutional, interdisciplinary undergraduate minor in business that is administered by the Owen Graduate School of Management. The undergraduate business minor requires 16.5 credit hours and is directed by Gary Kimball. Professor Kimball also serves as the director of undergraduate studies for the program.

The Hoogland Undergraduate Business Program (BUS) provides students with a rigorous exposure to the fundamental business disciplines of financial reporting, finance, organizational behavior, marketing, and operations. The program also intentionally grounds the study of business within the liberal arts tradition, allowing students to understand the context within which business operates in society.

Students declaring the undergraduate business minor (BUS) may not also declare either of the minors in human and organizational development (HOD) or engineering management (ENGM). Students electing the undergraduate business minor must follow academic regulations regarding minors in their home school, including but not limited to regulations regarding unique hours.

Three of the five mandatory courses in the undergraduate business minor require one of the following prerequisites, which may be completed in any order or simultaneously; Advanced Placement (AP) or International Baccalaureate (IB) credit may be used to satisfy the Microeconomics and Statistics prerequisites.

1. Introductory Microeconomics: ECON 1020
2. Introductory Statistics: One of BME 2400, ECON 1500, ECON 1510, MATH 1010, MATH 1011, MATH 2810, MATH 2820, MATH 2821, PSY 2100, PSY-PC 2110, or SOC 2100

The Undergraduate Business Minor

The undergraduate business minor (BUS) requires 16.5 credit hours of course work, distributed as follows:

1. 7.5 credit hours of required course work composed of 5 half-semester courses listed below. While not required, it is recommended that students complete the five required courses prior to fulfilling the elective requirement. Students may concurrently enroll in two of the five required courses.

BUS 1100	Essentials of Financial Reporting	(1.5 hours)
BUS 1300	Principles of Finance	(1.5 hours)
BUS 1400	Organizational Behavior	(1.5 hours)
BUS 1600	Principles of Marketing	(1.5 hours)
BUS 1700	Managing Operations	(1.5 hours)

2. At least 6 credit hours of courses selected from one or more of the six “BUS pathways” (entrepreneurship, finance and accounting, marketing, operations, organizational effectiveness, and strategy).
3. At least 3 credit hours of courses selected either from the “BUS pathways” or from the “business-in-society” electives. “Business-in-society” electives represent business-related disciplines in the liberal arts tradition, and are listed following the “BUS pathway” electives below.

BUS Pathways (all courses are 3.0 hours unless otherwise noted)

Entrepreneurship

BUS 2310, Introduction to Entrepreneurship (1.5 hours)

BUS 2320, Innovation Strategy (1.5 hours)

BUS 2330, Launching the Venture (1.5 hours)

BUSA 2300, Entrepreneurship: The Business Planning Process

BUSA 2335, Understanding the Family Business

BUSA 3300, Entrepreneurial Challenge

ENGM 3600, Technology-based Entrepreneurship

SOC 3206, Creativity and Innovation in Society

Finance and Accounting

BUS 2710, Business Finance (1.5 hours)

BUS 2720, Introduction to Real Estate (1.5 hours)

BUS 2730, Financial Modeling (1.5 hours)

BUS 2740, Real Estate Finance and Development (1.5 hours)

BUS 2750, Private Capital Markets (1.5 hours)

BUS 3720, Case Problems in Finance (1.5 hours)

BUSA 2600, Managerial Accounting

BUSA 2705, Corporate Finance

BUSA 3605, Financial Reporting and Analysis

BUSA 3700, Investment Analysis

BUSA 3705, Financial Management

BUSA 3710, Corporate Valuation

ECON 2300, Money and Banking

ECON 3200, Public Finance

ECON 3300, Financial Instruments and Markets

ECON 3610, International Finance

Marketing

BUS 2210, Consumer Behavior (1.5 hours)

BUS 2220, Digital Marketing Strategy (1.5 hours)

BUS 2330, Marketing Strategy (1.5 hours)

BUSA 2205, Business Development

BUSA 3200, Applied Marketing

ENGM 3200, Technology Marketing

Operations

BUS 2630, Sports Analytics (1.5 hours)

BUSA 2200, Data Analysis and Presentation

ENGM 3000, Enterprise Systems Design

ENGM 3650, Operation and Supply Chain Management

ENGM 3700, Program and Project Management

Organizational Effectiveness

BUSA 3105, Negotiation

BUSA 2160, Corporate Social Responsibility
BUSA 2180, Intro into the U.S. Healthcare Industry
BUSA 2200, Data Analysis and Presentation
BUSA 2335, Understanding the Family Business
BUSA 3110, Business Management
BUSA 3255, Corporate Strategy
ECON 2160, Strategic Analysis
ECON 3250, Industrial Organization
ECON 4260, Game Theory with Economic Applications

Business-in-Society Electives

ANTH 3135, Development, Social Enterprise, Social Injustice
ANTH 4153, Economic Anthropology
BUS 2700, Consumer Finance
CHIN 4401, Business Chinese I
CHIN 4402, Business Chinese II
ECON 2100, Labor Economics
ECON 2150, Economic History of the United States
ECON 2220, Latin American Development
ECON 3100, Wages, Employment, and Labor Markets

ECON 3160, Economic History of Europe

ENGL 3898, Special Topics in English and American Literature: Business Leader's Bookshelf

EUS 2260, European Cities - French & Italian Fashion

FREN 3111, French for Business

GER 4558, Business German

HEBR 2205, Hebrew for the Professions

HIST 1600, European Economic History, 1000-1700

HIST 1640, History of American Capitalism

HIST 1660, American Enterprise

HIST 1665, Capital, Labor, and Democracy

HIST 2138, Blood Diamonds, Blood Oil, Commodities, and Conflicts in Africa

HIST 3190, Religion, Culture, and Commerce: the World Economy in Historical Perspective

HIST 3200, Poverty, Economy, and Society in Sub-Saharan Africa

HODL 3890, Special Topics: Introduction to Data Science: Using Data for Understanding

MENT 1120, The Business of Music

MENT 1135, Arts Administration: Best Practices and Careers in the Arts Organization [2 credit hours]

MENT 1140, Creating Funding and Nonprofit Vehicles for 21st-Century Community Service [2 credit hours]

MENT 3200, Career Preparedness II: Music Entrepreneurship and Community Engagement [1 credit hour]

PSY-PC 2120, Statistical Analysis (second course in sequence)

PSY-PC 3735, Correlation and Regression

PSY-PC 3749, Applied Nonparametric Statistics

SOC 1020, Contemporary Social Issues: Corporations and Society (only this emphasis)

SOC 3316, Business, Civil Society, and the Environment

SOC 3318, Sociology of Green Jobs

SPAN 3345, Spanish for Business and Economics

[Course Descriptions](#)

Undergraduate Minor in Legal Studies

The Undergraduate Minor in Legal Studies, designed and taught by Vanderbilt Law School Faculty, offers a comprehensive introduction to law for Vanderbilt undergraduate students. Through five courses totaling 15 credits and supplemental programming, the Minor will enable students to make informed judgments about whether to pursue law school and legal careers, as well as gain knowledge and skills that will give them a leg up in law school and their future careers. Students will also graduate with a better understanding of how the law shapes our society. Students pursuing the Undergraduate Minor in Legal Studies will have access to specialized programming throughout the school year on a variety of Law School topics, including the admissions process, legal career paths, and the graduate student experience.

Students are required to take Introduction to Law and the Legal System, which is offered each semester. They must also take four additional minor-specific Law School courses, of which at least one will be offered every semester. One of these four additional courses may be taken from an approved list of non-Law School Vanderbilt University courses.

Subject	Course #	Course Title
ULAW	1000	Introduction to American Law
ULAW	2100	Access to Justice
ULAW	2120	AI, Law, and Society
ULAW	2200	Behavioral Law and Economics
ULAW	2300	Constitutional Law: Structure of Government and Equal Protection of the Law
ULAW	2330	Contract Law
ULAW	2350	Corporate Law: The Structure of Business Entities
ULAW	2370	Courts and Social Policy
ULAW	2380	Criminal Law and Procedure
ULAW	2440	Education Law
ULAW	2500	Foreign Relations and International Law
ULAW	2540	International Protection of Human Rights
ULAW	2545	Justice and the Constitution
ULAW	2560	Juvenile Justice
ULAW	2580	Law and Psychology
ULAW	2590	Legal Research and Writing
ULAW	2800	Patent Law
ULAW	2890	Separation of Powers: Theory, Doctrine, and Practice
CLAS	3150	Roman Law
PSCI	2208	Law, Politics, and Justice
PSCI	2266	Constitutional Law - Civil Liberties and Rights
PSCI	3260	Introduction to American Law
PSCI	3262	Election Law

Air Force Reserve Officer Training Corps (AFROTC)

[AFROTC Program/Scholarships](#)

[General Benefits](#)

[Sponsored Activities](#)

[Aerospace Courses at TSU](#)

The Air Force Reserve Officer Training Corps (AFROTC) provides pre-commission training for college men and women who desire to serve as commissioned officers in the United States Air Force and Space Force. When combined with the academic disciplines offered at the college level, the program provides the student a broad-based knowledge of management, leadership, and technical skills required for a commission and subsequent active-duty service in the Air Force or Space Force.

Graduates are commissioned as Second Lieutenants and will enter active duty. The main objectives of producing officers through the AFROTC program are (1) to procure officers with a broad educational base, (2) to provide a basic military education for college students, (3) to teach fundamentals and techniques of leadership, management, and decision making, and (4) to develop, in conjunction with other academic disciplines, individual character and attributes required of a commissioned officer in the United States Air Force.

AFROTC Program/Scholarships

Enrolling in AFROTC. Please go to www.tnstate.edu/afrotc for application deadlines. Vanderbilt University students may participate in the Air Force ROTC program in cooperation with Tennessee State University. Call Detachment 790, (615) 963-5980, and ask for a Cross-Town Application. Mail this application and your official transcripts with your immunization records back to Detachment 790. The program provides training and education that will develop skills and attitudes vital to the professional Air Force officer.

Students who participate in the Air Force ROTC program must be enrolled at Vanderbilt University. The student is also jointly enrolled as a TSU student and participates in Aerospace Studies (Air Force ROTC) at TSU. For more information, contact the unit admissions officer at (615) 963-5931/5979 or check our website at www.tnstate.edu/afrotc.

Currently there is no charge for tuition to take Air Force ROTC. The grade and credit can transfer back for graduation as indicated below.

Curriculum. The General Military Course (GMC) is composed of the first four semesters of aerospace studies (AERO) and is for freshmen and sophomores. The Professional Officer Course (POC) constitutes the final four semesters of AFROTC study and enrolls juniors and seniors. The Leadership Lab is required.

General Benefits

All students enrolled in the AFROTC program are provided textbooks and uniforms at no expense. Professional Officer Course (POC) students (juniors and seniors) and all scholarship students receive a monthly subsistence allowance which will increase each year the student remains in the program. All AFROTC students that remain in the program until their junior year, will contract with Air Force ROTC and receive a scholarship. Additionally, Vanderbilt University offers a generous stipend to all AFROTC cadets.

Sponsored Activities

Professional Development Training is provided during the summers to cadets interested in enhancing their knowledge of Air Force leadership and management opportunities, increasing their cultural awareness, and learning about specific career specialties.

AFROTC Flight Orientation Program is designed to allow all cadets, regardless of intended career field, the chance to

fly as front seat or back seat passengers in Civil Air Patrol aircraft. Everyone can experience the joy of flight.

Aerospace Studies Courses at TSU

FRESHMAN YEAR

Heritage and Values of the United States Air Force and Space Force (no credit at Vanderbilt)

A survey course designed to introduce students to the United States Air Force and Space Force. This class provides an overview of the role of military in U.S. society, military history, officership, professionalism, core values, career opportunities, and customs/courtesies. Freshman Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing followership experiences.

SOPHOMORE YEAR

Team and Leadership Fundamentals (transfers as GNEL 2000)

A course that focuses on laying the foundation for teams and leadership. The topics include; development/deployment of air power, leadership and quality principles, ethics and values, leadership development based on student participation in group problem solving, as well as oral/written communication development. The purpose of this course is to instill a leadership mindset and to motivate sophomore students to transition from an AFROTC cadet to AFROTC officer candidate. Sophomore Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing followership experiences.

JUNIOR YEAR

Leading People and Effective Communication (transfers as HOD 2051)

A course that teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. A mandatory junior year Leadership Laboratory provides advanced leadership experiences and the opportunity to apply the leadership and management principles of this course.

SENIOR YEAR

National Security Affairs/Preparation for Active Duty (no credit at Vanderbilt)

This course is designed for college seniors and provides them with the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the cadets for Active Duty. A mandatory senior year Leadership Laboratory provides advanced leadership experiences and the opportunity to apply the leadership and management principles of this course.

Army Reserve Officers' Training Corps (ROTC)

[Military Science Department](#)

[Military Science Courses](#)

The Army Reserve Officers' Training Corps (ROTC) is a sequential and progressive academic program that provides pre-commission training for college-educated men and women who desire to serve as commissioned officers in the active Army, Army Reserve, and Army National Guard. As the Army's largest commissioning source, it fulfills a vital role in providing mature young men and women for leadership and management positions in an increasingly technological Army. Admission is open to both men and women who meet mental, moral, and physical qualifications.

Training goes beyond the typical college classroom and is designed to build individual confidence and self-

discipline, instill values and ethics, and develop leadership skills. The course load consists of one course per semester. Each succeeding year will address course topics in greater depth as students receive feedback on their leadership style and assume positions of greater responsibility within the program. Graduates are commissioned as Second Lieutenants and will enter active duty with follow-on employment in the Army Reserves, National Guard, or active duty. Educational delays may be granted for graduates who desire to pursue advanced degrees prior to entry on active duty.

All university students in the Nashville area may participate in the Army ROTC program at Vanderbilt University. While Vanderbilt serves as the host university, students at partnership schools are not charged additional tuition to take military science courses. Grades are transferred back to each university and added to the students' transcripts.

Scholarships. Students can earn merit scholarships in several ways. High school seniors and graduates compete for four-year scholarships that are determined by local competition among Vanderbilt applicants. Although determined locally, the application process is centrally managed. Scholarship students receive financial benefits that cover the cost of full tuition scholarships each year, an annual \$1,200 book allowance, all uniforms, and a monthly tax-free stipend of \$420. Vanderbilt University also provides Vanderbilt ROTC scholarship students an additional \$6,000 tuition grant each year for room and board.

Students who are not on scholarship receive the monthly stipend during their junior and senior years. All students enrolled in the Army ROTC program are provided textbooks and uniforms at no expense. Contracted non-scholarship students also receive the monthly stipend \$420. For more information, see the website at goarmy.com/rotc.html.

Summer training. Students have the opportunity to attend several training events over the summer.

Advanced Camp — This five-week leadership exercise at Fort Knox, Kentucky, is a commissioning requirement. This is normally done between the junior and senior years. Travel, room, and board are provided free, and cadets are paid approximately \$700.

Cultural Understanding and Language Program (CULP) Internships — Students are encouraged to spend a semester, special or summer session in academic studies abroad if feasible. Special incentives are available to further attract qualified students to these valuable programs.

Cadet Troop and Leadership Training Internships (CTLT) — CTLT Internships are leadership development opportunities for students who are placed with military organizations throughout the world to gain perspective and understanding on the role of the military officer.

Cadet Professional Field Training (CPFT) — Airborne, Air Assault, Mountain Warfare, Robin Sage (U.S. Special Forces), Helicopter Flight Training, and Sapper.

Other training opportunities exist for qualified applicants who are interested.

Commissioning and career opportunities. A commission in the U.S. Army is a distinctive honor earned through hard work, demonstrated commitment, and a desire to serve the nation. Post-graduate military education, usually starting within six months of graduation and commissioning and continuing through the officer's service career, begins with the basic officer leadership course followed by officer basic course that qualify new lieutenants in their specific branch of service. Education delays are available for critical specialties requiring postgraduate civilian education such as law and medical degrees.

Course credit. During the four-year program, Army ROTC students complete eight courses of military science plus associated labs. Academic credit varies by university.

Vanderbilt University College Credit: All AROTC courses count toward elective credit. See course descriptions below.

Information. Inquiries regarding enrollment in the Army ROTC program should be made to the Army ROTC Admissions Officer at (615) 322-8550 or (800) 288-7682 (1-800-VUOTC). Also see vanderbilt.edu/army.

Military Science Department

MILITARY INSTRUCTORS Christine N. Kendzior, Jermaine Denny, Ethan Orr

Military Science Courses

During the four-year program, Army ROTC students complete eight courses of military science plus associated labs, and must complete an American Military History course and Advanced Camp.

FIRST YEAR

MS-PC 1210. Leadership and Personal Development. Leadership is one of the most compelling topics of our time, and might be one of the most important attributes for effectiveness in all levels of human endeavor. The success of one of the most admired and respected institutions in our country, the military, is founded upon the understanding and effective application of leadership, and the development of leaders. This course introduces students to the personal challenges and competencies that are critical to effective leadership. The focus is on developing basic knowledge and comprehension of leadership attributes and core leader competencies in a universal setting and exploring potential applications of these principles and practices at Vanderbilt, in the military and in the corporate world. [1]

MS-PC 1210L. Leadership and Personal Development Lab. Leader development is a continuous process of training, assessment and feedback with the goal of instilling and enhancing desirable behavior in individuals and organizations. Within the military science curriculum, this process is called the Leadership Development Program (LDP), modeled after the principles spelled out in Field Manual 22-100, *Army Leadership*, and is standardized both on campus and in Advanced Camp environments. The flexible methodology of LDP accommodates personalized, individual development at all levels of proficiency throughout the officer educational experience, from program entry to commissioning. The LDP includes basic leadership training, periodic assessment and counseling at both team and individual levels by experienced observers. Trends and deficiencies are identified and addressed with retraining and reassessment in a continuous cycle. Effective leader development is progressive, building on lessons learned and maximizing individual potential. This course introduces students to the leadership development process by providing structured leadership opportunities in a variety of training settings. Student performance in leadership roles is assessed and notable strengths and weaknesses are identified. A plan for improvement is discussed in detail during one-on-one counseling sessions. [1]

MS-PC 1230. Leadership and Personal Development II. What motivates others to follow a person is intriguing, inspiring and alluring. Through routine observation, we learn from leaders regardless of the setting (military, business, education, etc.). Leadership and Personal Development II provides an overview of leadership fundamentals such as setting direction, problem solving, listening and providing feedback. You will explore dimensions of leadership, values, attributes, skills, and actions in a military context through practical, hands-on, and interactive exercises. [1]

MS-PC 1230L. Leadership and Personal Development II Lab. Leader development is a continuous process of

training, assessment and feedback with the goal of instilling and enhancing desirable behavior in individuals and organizations; this process is called the Leadership Development Program. Effective leader development is progressive, building on lessons learned and maximizing individual potential. This course introduces students to the leadership development process by providing structured leadership opportunities in a variety of training settings. A plan for improvement is discussed in detail during one-on-one counseling sessions. [1]

SOPHOMORE YEAR

MS 1510. American Military History: Principles of War.

MS-PC 2150. Foundations of Leadership. MS-PC 2150 introduces the process of understanding and defining leaders in order to develop leadership skills appropriate for future commissioned Army officers. This class is broken down into five key skills development areas: 1) values and ethics, 2) personal development, 3) officership, 4) leadership, and 5) tactics and techniques. The class emphasizes individual leadership values and characteristics with a focus on Leadership Theory and Interpersonal Communications, Army Values, Troop Leading Procedures, Problem Solving, and Team Building in a military environment. [2]

MS-PC 2150L. Foundations of Leadership Lab. This lab builds upon the classroom topics in MS-PC 2150 and introduces the process of understanding and defining leaders in order to develop leadership skills appropriate for future commissioned Army officers. The lab is broken down into five key skill development areas: 1) leadership, 2) values and ethics, 3) personal development, 4) professional officership, and 5) various tactics, techniques, and procedures. The lab emphasizes individual leadership values and characteristics with a focus on leadership theory and interpersonal communications, Army values, troop leading procedures, problem solving, and team building in a military environment. [1]

MS-PC 2160. Foundations of Tactical Leadership. MS-PC 2160 builds upon MS-PC 2150. The class is broken down into five key skill development areas: 1) leadership, 2) values and ethics, 3) personal development, 4) professional officership, and 5) various tactics, techniques, and procedures. During this class we will focus on individual leadership development where the student begins to plan, organize, and lead small teams and groups in situational training exercises. Students begin to apply leadership skills at the smallest unit level. [2]

MS-PC 2160L. Foundations of Tactical Leadership Lab. MS-PC 2160L builds upon MS-PC 2150 and MS-PC 2150L. The lab is broken down into five key skill development areas: 1) leadership, 2) values and ethics, 3) personal development, 4) professional officership, and 5) various tactics, techniques, and procedures. During the lab we will focus on individual leadership development where the student begins to plan, organize, and lead small teams and groups in situational training exercises. Students begin to apply leadership skills at the smallest unit level. [1]

JUNIOR YEAR

MS-PC 3110. Leadership and Problem Solving. This course builds upon your skills developed in MS-PC 2160 and continues to develop leadership, officership skills, self-awareness, and critical thinking skills through challenging scenarios related to small-unit tactical operations. Cadets receive systematic and specific feedback on their leadership values, attributes, skills, and actions. Prerequisite: MS-PC 1210, 1230, 2150, and 2160. [3]

MS-PC 3110L. Leadership and Problem Solving Lab. MS-PC 3110L builds upon MS-PC 3110 and MS-PC 2150L. The lab is broken down into five key skill development areas: 1) leadership, 2) values and ethics, 3) personal development, 4) professional officership, and 5) various tactics, techniques, and procedures. During the lab we will focus on individual leadership development where the student begins to plan, organize, and lead small teams and groups in situational training exercises. Students begin to apply leadership skills at the smallest unit level. [1]

MS-PC 3120. Applied Team Leadership. Challenging scenarios related to small-unit tactical operations are used to develop self-awareness and critical thinking skills. Students receive systematic and specific feedback on their leadership values, attributes, skills, and actions. Prerequisite: MS-PC 3110. [3]

MS-PC 3120L. Applied Team Leadership Lab. MS-PC 3120L builds upon MS-PC 3120 and MS-PC 3110L. The lab is broken down into five key skill development areas: 1) leadership, 2) values and ethics, 3) personal development, 4) professional officership, and 5) various tactics, techniques, and procedures. During the lab we will focus on individual leadership development where the student begins to plan, organize, and lead small teams and groups in situational training exercises. Students begin to apply leadership skills at the smallest unit level. [1]

SUMMER BETWEEN JUNIOR AND SENIOR YEAR

Cadet Leader Course (1 Cr) — All students pursuing a commission as an Army Officer must complete Advanced Camp during the summer between their junior and senior year. Students may apply for 1 credit hour of academic credit with the designation of interdisciplinary internship (INDS 3881). This course may be taken once and repeated once for a maximum of 2 credits on a Pass/Fail basis only.

SENIOR YEAR

MS-PC 4150. Leadership and Ethics. Students develop proficiency in planning, executing, and assessing complex operations, functioning as a member of a staff, and providing leadership-performance feedback to subordinates. Students are given situational opportunities to assess risk, make sound ethical decisions, and provide coaching and mentoring to fellow ROTC Cadets. Prerequisite: MS-PC 3120. [3]

MS-PC 4150L. Leadership and Ethics Lab. MS-PC 4150L builds upon MS-PC 4150 and MS-PC 3120L. The lab is broken down into five key skill development areas: 1) leadership, 2) values and ethics, 3) personal development, 4) professional officership, and 5) various tactics, techniques, and procedures. During the lab we will focus on individual leadership development where the student begins to plan, organize, and lead small teams and groups in situational training exercises. Students begin to apply leadership skills at the smallest unit level. [1]

MS-PC 4160. Leadership in a Complex World. Students develop proficiency in leadership and management skills required of junior officers serving in military companies. The course further explores the dynamics of leading in complex situations of the contemporary operating environment and applies a cultural lens to problem solving. Students continue to gain leadership experience through situational opportunities, organizational projects, and coaching and mentoring fellow ROTC Cadets.

MS-PC 4160L. Leadership in a Complex World Lab. MS-PC 4160L builds upon MS-PC 4160 and MS-PC 4150L. The lab is broken down into five key skill development areas: 1) leadership, 2) values and ethics, 3) personal development, 4) professional officership, and 5) various tactics, techniques, and procedures. During the lab we will focus on individual leadership development where the student begins to plan, organize, and lead small teams and groups in situational training exercises. Students begin to apply leadership skills at the smallest unit level. [1]

Naval Reserve Officers' Training Corps (NROTC)

[Naval Science](#)

[Naval Science Courses](#)

The Naval Reserve Officer Training Corps (NROTC) unit at Vanderbilt conducts the Naval Officer Education program.

Challenging academic courses and experience-building events prepare a select group of highly accomplished students for the opportunity to serve their country as a Navy or Marine Corps officer and receive an education. The primary focus of the NROTC program is to develop the most capable leaders possible by building upon the academic strength of Vanderbilt and providing essential military and leadership education.

Students participate in the NROTC unit in the scholarship program, the college program, or the naval science program. College Program students take the prescribed naval science course each semester, participate weekly in naval science lab, and engage in summer training programs after each academic year. The NROTC College Program is identical to the scholarship program except for tuition financial benefit and that students only participate in summer training upon completion of their junior academic year. Also, any Vanderbilt student may take any or all of the naval science courses without participating in naval science lab or summer training.

Scholarship students receive tuition, fees, uniforms, \$375 per semester for textbooks, and a monthly stipend beginning at \$250 for freshmen and increasing to \$400 for seniors. Vanderbilt may provide scholarship students with up to a \$6,000-per-year stipend toward room and board. College Program students are provided uniforms, textbooks for naval science courses, and a monthly stipend of \$350 upon commencement of their junior year with approval by higher authority based on academic performance and military aptitude.

Scholarships. Students can earn scholarships in several ways. Four-year scholarships are determined by national competition among high school seniors and graduates. Based on the national ranking, students may be awarded a scholarship that covers full tuition. To be eligible, applicants must have less than 30 semester hours of college credit. College Program students can also be nominated for three- and two-year scholarships by the NROTC unit. These nominations are based on the students' academic and military performance at the college level. Sophomores not enrolled in the College Program are eligible to apply for the two-year NROTC scholarship program. This is a national competition and application is made through the NROTC unit.

Service obligation. For most students at the beginning of their sophomore year, should they choose to continue with the NROTC program, Navy option scholarship students incur a minimum service obligation of five years active duty, and Marine option scholarship students incur a minimum service obligation of four years of active duty, to be served upon graduation or withdrawal from the program. College Program students incur a three-year active duty commitment upon graduation or withdrawal from the program. Additional requirements may be required for specific job assignments.

Summer training. Summer training for three to four weeks is conducted aboard naval vessels and naval shore stations after each of the first three academic years. Scholarship students are normally required to participate each year. All scholarship and College Program midshipmen are required to participate in summer training prior to their final academic year.

Course credit. During the four-year program, NROTC Navy-option students are required to complete eight courses (24 hours) of naval science, and Marine-option students are required to complete six courses (18 hours) of naval science. Academic credit awarded varies by course and is outlined in the course descriptions below.

Required Courses for Navy/Marine Scholarship. The following courses are required for students on scholarship:

- Calculus (Navy option only) (6 credits minimum): Mathematics 1200-1201, or 1300-1301 completed by the end of the sophomore year.
- Physics (Navy option only) (6 credits): 1501-1502 or 1601-1602 completed by the end of the junior year.
- English (6 credits): Two semesters of any English course or courses containing a designated writing component.
- American History/National Security Policy (3 credits): Contact the Naval ROTC unit for a listing of courses fulfilling this requirement.
- World Culture/Regional Studies (Navy option only) (3 credits): Contact the Naval ROTC unit for a listing of courses fulfilling this requirement.

Information. Inquiries regarding enrollment in the Naval ROTC program should be made to the Naval ROTC unit recruiting officer at (615) 322-2671, or by contacting a local Navy or Marine Corps recruiting station.

Admission to the program is open to both men and women. Physical qualification to Naval Service standards is required.

Naval Science

COMMANDING OFFICER Aaron Buckles

EXECUTIVE OFFICER Brian Fremming

MARINE INSTRUCTOR Kenneth St Cyr

Naval Science Courses

For Navy-option NROTC students, the following naval science courses are required for commissioning: NS 1100, HIST 1690, NS-PC 2410, ES 3231, ES 3230, ES 3232, ES 4233, and NS-PC 4242 and their appropriate labs. For Marine-option NROTC students, the following naval science courses are required for commissioning: NS 1100, HIST 1690, NS-PC 2410, HIST 1691, HIST 1693, and NS-PC 4242 and their appropriate labs.

Admission

Admission

[Academic Preparation](#)

[Application Procedure - First-Year Applicants](#)

[Application Procedure - Transfer Applicants](#)

[International Applicants](#)

The admissions process for first-year applicants to Vanderbilt is holistic in nature and based on students' academic records and personal accomplishments. All available information is considered, including secondary school academic record, evidence of academic maturity and independence, extracurricular activities, contributions to and impact on the school and community, scores on standardized tests if submitted (see #3 in Application Procedure below), and letters of recommendation.

The admissions process supports the university's mission of scholarship and discovery and is designed to select a student body with exceptional academic talent, high standards of personal character, serious educational aims, and wide-ranging backgrounds, experiences, and perspectives. Policies that govern the selection process have been set by the vice provost for university enrollment affairs. Please refer to the nondiscrimination statement which appears earlier in this catalog.

Admission to the four undergraduate schools is managed by the Office of Undergraduate Admissions.

Prospective students are encouraged to investigate the university by visiting the campus, exploring the Office of Undergraduate Admissions website, connecting via social media, and attending college fairs and other programs hosted by Vanderbilt's Office of Undergraduate Admissions across the country, around the world, and online. Admissions staff are available to answer questions, assist with understanding campus visit opportunities, provide additional information about degree programs, and link visitors with appropriate campus offices and members of the university community.

Academic Preparation

Every candidate for admission must present an official transcript of work completed in high school. While our admissions process is holistic, most successful candidates will present a curriculum that includes the equivalent of five academic subjects each year for four years. Recommended course work includes 4 units of English, 4 units of mathematics, 4 units of natural science, 2 units of foreign language, 2 units of social science/humanities, and 4 units of additional course work in these areas, or other academic courses such as engineering science, computer science, social science or natural science research, or advanced work in the humanities. Close attention will be paid to the rigor of course work presented. It is highly recommended that candidates applying to the School of Engineering have taken calculus, calculus-based physics, and chemistry.

Most successful candidates will have meaningfully engaged with the academic, intellectual, social, and leadership opportunities available in the context of their high schools and communities. In exceptionally rare cases, students may be considered for admission before completing four years of high school. In these cases particularly, the Admissions Committee considers evidence of maturity and readiness for an immersive, residential college experience.

Application Procedure — First-year Applicants

1. Applicants must apply to Vanderbilt through Coalition, powered by Scoir, the Common Application, or the QuestBridge Application. Applications for admission may be accessed online at admissions.vanderbilt.edu/apply.
2. Applicants must arrange for their high school to submit an official transcript and their School Report to the Office of Undergraduate Admissions via one of the application portals.
3. For students applying for fall 2026 entry, Vanderbilt is test optional. Scores from the ACT or SAT are not required to be considered for admission. Applicants who want their test scores to be considered may self-report them on the application or may have official scores sent to Vanderbilt by the testing agency. Score reports appearing on official high school transcripts are accepted as official. Official test scores will be required for students who applied with testing and who are admitted and enroll.
4. Applicants must provide a counselor letter of recommendation.
5. Applicants must provide two academic teacher letters of recommendation.
6. A \$50 nonrefundable application fee, or fee waiver for qualified students, is required.
7. On the application for admission, select the decision plan for which you wish to be considered: Early Decision

I, Early Decision II, or Regular Decision.

- Early Decision plans are designed for students whose first-choice college is Vanderbilt. These plans are binding: if offered admission, students agree to attend Vanderbilt and to withdraw all other applications for admission. In addition to the other application requirements, the Early Decision Agreement must be submitted. Signatures are required from the applicant, the applicant's parent/guardian, and the high school counselor.
 - The Regular Decision plan is designed for students who are considering many college options and who wish to compare offers of admission and financial aid before committing to one college. Applicants will be admitted, denied, or offered a spot on the waitlist. Waitlisted students may be offered admission later in the spring or summer.
 - Deadlines:
 - Early Decision I — submit application by November 1
 - Early Decision II — submit application by January 1*
 - Regular Decision — submit application by January 1*
- *Priority deadline for Blair applicants is December 1

8. Blair School of Music applicants are required to follow the audition protocol detailed on the Blair website (blair.vanderbilt.edu/admissions/apply.php). Selected applicants will be invited to audition in person on campus.

Application Procedure — Transfer Applicants

Admission of transfer students to Vanderbilt is competitive and holistic. The priority deadline to submit the transfer application is February 15. It is Vanderbilt's practice to offer transfer admission only for the fall semester.

1. Apply online through Coalition, powered by Scoir, or through the Common Application Transfer Application.
2. For students applying for fall 2026 entry, Vanderbilt is test optional. Scores from the ACT or SAT are not required to be considered for admission. Applicants who want their test scores to be considered may self-report them on the application or may have official scores sent to Vanderbilt by the testing agency. Score reports appearing on official high school transcripts also are accepted as official. Official test scores will be required for students who applied with testing and who are admitted and enroll.
3. A \$50 nonrefundable application fee, or fee waiver for qualified students, is required.
4. Provide a fully complete Transfer College Report and be in good academic and social standing at the institution last attended.
5. Provide a list of courses in which the student is currently enrolled.
6. Provide an official secondary school transcript.
7. Provide official transcripts from each college attended.
8. Submit two academic letters of recommendation.
9. Agree to attend a Vanderbilt undergraduate program for at least four semesters (60-plus hours) of full-time work (63-plus hours for Blair School of Music students). Two of these semesters (30-plus hours) must be within the senior year.
10. Blair School of Music applicants are required to follow the audition protocol detailed on the Blair website (blair.vanderbilt.edu/admissions/apply.php). Selected applicants will be invited to audition in person on campus.

International Applicants

For the purpose of admission, the term "international applicants" refers to students who are not citizens of the United States or who are not eligible non-citizens. International applicants must complete all admission requirements of the university. (See "Application Procedure" above, for first-year and for transfer applicants.)

Applicants whose first language or language of instruction is not English are required to submit the results of the Test of English as a Foreign Language (TOEFL) iBT (including Home and Paper editions) TOEFL Essentials, the International English Language Testing Service (IELTS), the Duolingo English Test (DET), the Cambridge English C1 Advanced or C2 Proficiency, or the LanguageCert. This testing requirement may be waived if a student has scored above a 26 on the ACT English section or above 630 on the SAT Evidence-based Reading and Writing section. Minimum recommended scores for Vanderbilt are 100 TOEFL iBT, 10.5 on the TOEFL Essentials, 7.0 on the IELTS, 130 on the Duolingo English Test, 185 on the Cambridge English C1 Advanced or C2 Proficiency, and 75 for LanguageCert.

Advanced Credit

Honors courses and other accelerated study in high school are excellent preparation for Vanderbilt. The well-established advanced-placement policy endeavors to recognize exceptional high school preparation, to avoid requiring first-year students to take courses clearly mastered in high school, and to encourage students to begin their college learning experience at the level most appropriate to their preparation. Advanced placement may be granted on the basis of good performance on the College Board Advanced Placement Examinations, on International Baccalaureate tests, or, in some cases, on placement tests given by Vanderbilt. Credit may also be awarded for the British G.C.E. A level examinations, the Advanced International Certificate of Education (AICE), the Cambridge Pre-U diploma, and similar tests, such as the French *baccalauréat*, the German *abitur*, or the Swiss *maturité* examinations. To qualify for credit for the AICE examinations or individual A-level examinations, students must have achieved an *A**, *A*, or *B* thereon. More information on international exam credit is available at registrar.vanderbilt.edu/international-examinations.

College Entrance Exams

Students may not take college entrance exams after they begin their enrollment at Vanderbilt University for the purpose of course placement or academic credit. This applies to SAT, ACT, Advanced Placement, International Baccalaureate, and any similar international exams.

Advanced Placement Credit Policy

Advanced Placement Examination grades accepted for advanced placement with credit by the various departments at Vanderbilt are listed below. At the determination of individual departments, Advanced Placement Examination grades with a score of 4 or 5 may be accepted for credit. The amount of credit that may be awarded corresponds to the course work waived. Advanced Placement credit does not affect the Vanderbilt grade point average.

Students of the College of Arts and Science are limited to a total of 18 credit hours earned by any combination of advanced placement, international baccalaureate credit, advanced international credit, and credit by departmental examination, counting toward the minimum number of hours required toward the degree. For students in the College of Arts and Science, no form of advanced placement credit can be used to fulfill CORE requirements for students entering Fall 2025 and later or the Achieving Excellence in Liberal Education (AXLE) requirements for students who entered before Fall 2025.

International Baccalaureate Credit Policy

International Baccalaureate test scores accepted for advanced credit by the various departments at Vanderbilt are listed below. Students who have taken tests in other areas may submit their scores to the Office of Academic Services for evaluation by the appropriate departments. Credits are awarded for exams taken at the higher level only. The amount of credit that may be awarded is subject to the same limitations as credit for Advanced Placement.

Pre-College Summer School Program

Upon completion of the sophomore or junior year in high school, students may enroll, at the freshman level, for regular work in the Vanderbilt summer session.

The following conditions must be met: (a) students must be in the upper 25 percent of their high school class and be recommended by their principal or counselor; (b) courses taken in the Vanderbilt summer session must be chosen by the student in consultation with his or her high school counselor and the director of the Division of Unclassified Studies so as to supplement and not overlap the total high school program. A student may take two courses in any one summer, or three courses by special authorization of the director of the Division of Unclassified Studies.

Course work done at Vanderbilt by a pre-college student may count toward the high school diploma and as part of the entrance requirements for regular admission to Vanderbilt. All course work done at Vanderbilt by pre-college students will be credited toward the degree for those who may subsequently matriculate at Vanderbilt. Admission to the pre-college summer school program does not admit a student as a regular entering freshman, nor does it commit the university to a student's admission.

Credit for Previous College Work

Entering first-year students who have taken college work in high school through dual enrollment or concurrent enrollment programs, or during summers prior to their offer of admission to Vanderbilt, must indicate such work on the undergraduate admission application. An official transcript showing any prior college work must be provided. Once all required documentation has been received, the coursework will be reviewed to determine whether it is eligible for credit at Vanderbilt.

Students should submit all required documentation for review prior to the end of the first year of enrollment.

Credit will be awarded only if:

1. A course is regularly offered by an accredited two-year or four-year college or university. For domestic schools, the school must be regionally accredited; for international schools, the school must have country-specific accreditation. Courses taught at a high school or taken at a college strictly for high school students do not satisfy this requirement.
2. The teacher was a regular faculty member of that college or university. High school teachers who are hired as affiliate faculty to teach college courses on a high school campus do not meet this requirement.
3. The majority of the students in the course were duly matriculated college students seeking either an associate's or bachelor's degree.

Additional requirements and guidelines regarding pre-freshman credit are available at registrar.vanderbilt.edu/transfer-credit.php.

The College of Arts and Science and Peabody College usually do not award credit for work at other colleges in the summer immediately preceding the student's first semester at Vanderbilt. Summer work elsewhere will be accepted for credit only if an unusual educational opportunity can be demonstrated and if the courses sought are as rigorous as courses offered at Vanderbilt. Approval for work to be taken elsewhere must be obtained in advance from the appropriate dean.

College of Arts and Science. In no case may credits completed elsewhere after the student has been offered admission by the College of Arts and Science satisfy CORE requirements for students entering Fall 2025 or later, or AXLE requirements for students who entered before Fall 2025.

International Students

Vanderbilt has a large international community representing more than 95 countries. The university welcomes the diversity international students bring to the campus and encourages academic and social interactions at all levels.

Admission. See International Applicants section.

English Language Instruction. Students wishing to focus on improving their English language use for the context of the U.S. academic setting may take classes and participate in programming at the Vanderbilt English Language Center to support their academic success. The ELC's courses include *writeELC*, Academic Speaking, and Pronunciation. Throughout the academic year, academic workshops and one-to-one consultations for speaking and writing are also available through the ELC. Entering students may be required to take language support courses concurrently with their academic courses at the ELC. The ELC is located at 1208 18th Avenue South. For information about the ELC's programming, see the "English Language Center" section or visit vanderbilt.edu/elc.

Financial Resources. To meet requirements for entry into the United States for study, applicants must demonstrate that they have sufficient financial resources to meet the expected costs of their educational program. Applicants must provide documentary evidence of their financial resources before visa documents can be issued.

United States laws and regulations restrict the opportunity for international students in a non-immigrant visa status to be employed. Undergraduate international students are allowed to work on campus for nineteen hours per week while school is in session. Students may be allowed to work off campus only under special circumstances and after approval from ISSS. Many spouses and dependents of international students are not allowed to be employed while in the United States.

Limited need-based financial aid is available to students who are neither citizens nor permanent residents of the United States, and are considered to be international students in Vanderbilt's admissions process. Our admissions process is need-aware for international students; international students who demonstrate that they can afford the cost of attending Vanderbilt will be given preferential treatment. To apply for need-based financial aid, international students are required to submit the College Scholarship Service (CSS) Financial Aid Profile. Based upon an evaluation of academic qualities, financial need, and availability of resources, an international student may be considered for need-based financial assistance. International students who apply for need-based financial aid will be admitted only if they are competitive in our holistic review and if Vanderbilt is able to provide adequate financial assistance.

International Student Health Insurance. International students are required to have health insurance throughout their academic program and are automatically enrolled in the Vanderbilt-approved health insurance plan for international students. For information concerning the limits, exclusions, and benefits of this insurance coverage, please contact the Student Health Center.

Transfer Credit

Work presented for transfer must be from an accredited college and is subject to evaluation in light of the degree requirements of this university. For domestic schools, the school must be regionally accredited; for international schools, the school must have country-specific accreditation.

Work transferred to Vanderbilt from another institution will not carry with it a grade point average. No course in which a grade below *C-* was received will be credited toward a degree offered by the university.

College of Arts and Science. Transfer students must complete at least 60 credit hours of work in the College of Arts and Science. Credit earned as a degree-seeking student at another university may be used to fulfill CORE requirements for students entering Fall 2025 or later, or AXLE requirements for students who entered before Fall 2025.

Blair School of Music. In addition to an application for admission, transfer students applying to Blair must also submit a Blair School of Music Application, which includes a required prescreening video, by the March 15 deadline. Selected applicants will be invited to audition in person. See the Blair website for information and instructions about the Blair admissions process. Transfer students will be assigned a level of program study based on the entrance audition. Credit for music courses may be granted following an examination at Blair. Credit for non- music courses is subject to evaluation by the university. Transfer students must complete at least 63 credit hours at Blair.

School of Engineering. Transfer students must complete at least 60 credit hours of work at Vanderbilt.

Peabody College. Transfer students must complete at least 60 credit hours of work at Peabody. Two of the four semesters in residence must be the last two semesters of the student's degree program.

Prior Degrees

It is the policy of Vanderbilt University to verify prior educational credentials for all admitted students who intend to matriculate. All matriculated students must provide official copies of transcripts and any other required supporting documentation to Vanderbilt University as part of the prior degree verification process. The Office of the University Registrar will review transcripts and other supporting documentation for authenticity and to confirm degrees earned prior to matriculation at Vanderbilt. Offers of admission are contingent on a student's providing the required documentation. Undergraduate students who are not able to provide evidence of prior degrees will not be permitted to register for subsequent terms and may be subject to dismissal from the university.

Intra-University Transfer

Undergraduate students in the College of Arts and Science, Blair School of Music, School of Engineering, and Peabody College may request a transfer between the schools. Students are eligible for intra-university transfer after having been enrolled on a full-time basis at Vanderbilt for two semesters. Students who transferred to Vanderbilt from another institution are eligible for intra-university transfer after having completed at least one full semester at Vanderbilt and having achieved sophomore standing. To be eligible for transfer, students must meet the requirements of the school they wish to enter.

Applications are available on the Office of the University Registrar website, registrar.vanderbilt.edu/intra-university-transfers/, and should be submitted to the Office of the University Registrar by the required deadlines listed on this webpage.

Students seeking transfer between schools within the university must meet the following requirements: (a) a student who has been in residence for two regular semesters must have a minimum of 24 hours and a cumulative grade point average of 1.800; (b) a student who has been in residence for three regular semesters must have a minimum of 39 hours and a cumulative grade point average of 1.850; (c) a student who has been in residence for four regular semesters must have a minimum of 54 hours and a cumulative grade point average of 1.900; (d) a student who has been in residence for five regular semesters must have a minimum of 69 hours and a cumulative grade point average of 1.950.

Individual schools and/or majors may impose additional restrictions beyond the minimum requirements listed above. Students applying to the Blair School of Music must audition as part of the process. Transfer applicants to the School of Engineering should present at least two semesters of college calculus and two semesters of laboratory-based science as required in the intended major. Advanced Placement or International Baccalaureate credit, if accepted by Vanderbilt, can be used to meet these requirements.

Division of Unclassified Studies

The Division of Unclassified Studies provides an opportunity to take undergraduate courses at Vanderbilt as follows:

- a. adults not interested in working toward a degree,
- b. visiting students working toward a degree at another institution (students in this category may not remain enrolled in the division for more than two regular semesters and one summer session), and
- c. rising junior and senior students in high school who have received special permission to enroll in courses for college credit.

Such students register in the Division of Unclassified Studies. Records are kept of their work, and a transcript may be made available to them as it would be if they were regularly enrolled at Vanderbilt. Work taken in the division may be transferred to a degree-granting unit of the university provided it is work that will count as part of the program of that unit. Work so transferred may not amount to more than one-fourth of the requirements for the Vanderbilt degree. Requests for transfer to a Vanderbilt degree-granting school must be made to the Office of Undergraduate Admissions. Division of Unclassified Studies students are not eligible for intra-university transfer.

Students who want to enroll in the Division of Unclassified Studies must apply and be admitted to the division at least one week before the first day of classes for the term or session they wish to attend. Requests for exceptions to the admission criteria must be addressed in writing to the vice provost for university enrollment affairs and dean of admissions and financial aid, whose decision is final.

All university regulations, including the Honor System, apply to students registered in the Division of Unclassified Studies.

Degree candidates have priority in enrollment at Vanderbilt, and students registering in the Division of Unclassified Studies should be prepared for this contingency. DUS students must meet all course prerequisites. Permission of the Office of the Dean is required for enrollment in some courses. Tuition is charged at the standard rate.

Division of Unclassified Studies students are not charged health insurance fees, and do not have access to student health services.

Summer Session

The ten-week summer session begins in early June and ends early in August. In addition, some units of the university offer an accelerated four-week Maymester. Vanderbilt offers the summer program for regularly enrolled students at the university, for part-time students, and for students enrolled during the regular year in other colleges and universities (visiting students).

Summer courses are normally offered by the College of Arts and Science, Blair School of Music, the School of Engineering, the Graduate School, the School of Nursing, and Peabody College.

Some courses extend over the entire summer session and complete the work of a full semester. Others are offered in modular units of eight, six, five, or four weeks, for full semester credit. Still other summer courses complete a full semester's work in the first five-week or second five-week half of summer session, with classes meeting twice as many hours per week. In full-year courses offered in summer, the work of the first semester is covered in the first half-session, the work of the second semester in the second half.

Classrooms, residence halls, libraries, and dining halls are air conditioned. The David Williams II Student Recreation and Wellness Center and other athletic facilities are open in the summer. Information about the summer session is available on request from the Division of Unclassified Studies or from each school's Office of Academic Services. Students may also visit vanderbilt.edu/summer for additional information.

Maymester

In the interval of several weeks between final examinations in the spring semester and the beginning of summer session, Vanderbilt offers educational travel opportunities and a variety of courses that would be difficult to offer during a regular semester.

Students are permitted to take no more than one course during the Maymester. Housing and food services are available during the session. Visiting students are eligible for Maymester courses.

Information about May courses on campus or abroad can be found at vanderbilt.edu/summer.

Financial Information

Financial Information

Information about undergraduate tuition and fees for 2025-26 is available at https://www.vanderbilt.edu/stuaccts/fees/tuition_fees_2025-26_ugrd.php.

Payment of Tuition and Fees

The Office of Student Accounts can be contacted at (615) 322-6693, toll-free at (800) 288-1144, or via email at student.accounts@vanderbilt.edu. For additional information, please visit the Student Accounts website at vanderbilt.edu/stuaccts.

Transcripts

Official academic transcripts are supplied by the Office of the University Registrar on authorization from the student. Additional information is available at <https://registrar.vanderbilt.edu/transcripts/>.

Fraternity and Sorority Membership

There is a financial commitment associated with joining a fraternity or sorority. The costs go toward inter/national fees, chapter operating expenses, and social functions. Financial obligations differ for men and women and among individual chapters. New members can expect to pay higher dues their first semester. Many chapters participate in the Facility Management Program, and members pay \$322 each semester, charged to their student account, for the maintenance and upkeep of the chapter house. Dues range from \$750 to \$1,500 for Interfraternity Council (IFC) and Panhellenic women. Initiation fees for National Pan-Hellenic Council (NPHC) and Intercultural Greek Council (IGC) chapters range from \$500 to \$1,500 and continuing dues range from \$100 to \$500 each year. Additional costs throughout the semester may be for meal plans, conference attendance, philanthropic contributions, pictures, gifts, parties, T-shirts, etc. Chapter fees are paid directly to the fraternity or sorority. There are payment plans available to students, as well as scholarships within the individual chapters.

For more information, please visit the [Office of Greek Life](#).

Need-Based Financial Aid

Vanderbilt is committed to accessibility and affordability for all admitted and enrolled students. Grants, scholarships, and work opportunities are available to eligible students who apply for assistance and have demonstrated financial need. Beginning in the fall of 2009, financial aid packages offered to incoming and current undergraduate students no longer included need-based loans. While continuing to meet the full demonstrated need of all eligible students, this expanded aid initiative, Opportunity Vanderbilt, announced in October 2008 provides increased amounts of need-based grants and/or scholarships (gift assistance) to replace need-based loans that would have otherwise been offered to meet a student's demonstrated financial need.

Demonstrated financial need is the difference between the cost of attending Vanderbilt and the amount that students and their families are expected to contribute toward that cost. The amount of aid to fully meet each student's demonstrated financial need is determined annually on the basis of current financial information required/provided on relevant application forms.

Additional information is available at <https://www.vanderbilt.edu/financialaid/undergraduate/index.php>.

University General Medals, Prizes, and Awards

Also see the Honors chapters in the College of Arts and Science, Blair School of Music, School of Engineering, and Peabody College sections of this catalog for listings of additional awards and prizes.

THE JESSICA ACESTE AND ELIZABETH BEALE RIPPLE IN THE POND AWARD was established in 2001 by Mr. and Mrs. George G. Strong through the Strong Family Foundation to reward an undergraduate student in any area of the university for random acts of kindness. The award was created to express the extreme gratitude of Mr. and Mrs. Strong in recognition of the assistance and care that their daughter, Meredith, received from her friends and the Vanderbilt community as she was stricken with meningococcal meningitis. Physicians credit the quick action taken by Meredith's classmates and Vanderbilt personnel with saving her life.

THE CHARLES FORREST ALEXANDER PRIZE IN JOURNALISM was endowed in 1982 by friends of Mr. Charles Forrest Alexander, B.A. 1950, who died in 1976. As a student, he was editor of the *Commodore*, *V Book*, and a staff member of the *Hustler*. The fund provides support for an annual prize to be awarded to a student who has achieved distinction in journalistic projects at Vanderbilt University.

THE GREG A. ANDREWS CIVIL ENGINEERING MEMORIAL AWARD was established in 1969 by James M. Andrews, Sr. to support a senior in civil engineering who has made the greatest progress and who plans to pursue graduate study in environmental and water resources engineering at the School of Engineering. Donor established the fund to honor the memory of his son, Greg, a junior at Vanderbilt who was fatally injured in an auto accident.

THE THOMAS G. ARNOLD FUND was established in 1988 by multiple donors to provide an award for the best research/design project completed by a senior student in the Biomedical Engineering Department at the School of Engineering. The fund was established by family, colleagues, and other friends of Mr. Thomas Arnold Jr., G 1956, in recognition of his long and distinguished service to Vanderbilt from 1952 until his retirement in 1989. Mr. Arnold died in 1989.

THE DAN BARGE JR. AWARD IN CIVIL ENGINEERING was established in 2011 by multiple donors to recognize a junior civil engineering student who exhibits outstanding academic performance and dedication to professional or community service at the School of Engineering. This fund was established to honor the legacy of Daniel B. Barge Jr., B.E. 1943, who was named a Distinguished Alumnus by the School of Engineering in 1981. Dan served his school in numerous capacities, both formal and informal: as an advisor, an employer of graduates, a donor, volunteer solicitor, and most importantly, as a role model for students. For many years, thanks to Dan's efforts, the school has presented an annual American Society of Civil Engineers (ASCE) Award, given in recent years as the ASCE/Dan

Barge Award, to honor Dan's professional accomplishments and contributions to ASCE that culminated in his 1987 presidency.

THE MORRIS H. BERNSTEIN JR. PRIZE IN LATIN DECLAMATION was endowed in 1983 by Mr. William H. Bernstein, B.A. 1983, open to any undergraduate student who has completed at least two semesters of Latin at Vanderbilt University. Contestants shall deliver from memory selected Latin prose or poetry passages which reflect the classical ideal. The fund is named for Mr. Bernstein's father, Dr. Morris H. Bernstein, Jr., B.A. 1943, M.D. 1946.

THE BLAIR STUDENT SERVICE AWARD fund established in 2009 by an anonymous donor to provide an annual award for the Blair student who best exemplifies the spirit and tradition of volunteer service through music at the Blair School of Music.

THE GLENN AND ELIZABETH BOGITSH AWARD was established in 1989 by Burton J. Bogitsh, professor of biology, and Mr. and Mrs. James T. Norris, Jr., to provide an annual award to the student at Vanderbilt University who has best demonstrated a strong commitment to campus recreational programs and, by example and leadership, has inspired participation and sportsmanlike conduct in these activities. The award recognizes physical fitness, participation in recreational sports, and sportsmanship and was established to honor the memory of the Donors' son, Glenn, and daughter, Libby, both Vanderbilt graduates who died in a 1988 plane crash. The award recipient will be given a small prize and will have his or her name engraved on a plaque, which describes the award and lists annual winners, to be mounted on a wall of the Student Recreation Center.

THE CASEY CARTER BONAR LEADERSHIP AWARD was established in 2011 by multiple donors to provide awards to undergraduate students in their senior year based on leadership, broad collaboration, enthusiasm, passion for campus involvement, selfless service to Vanderbilt, and dedication to positive change at Vanderbilt University. This fund was established to honor the memory of Casey Carter Bonar, B.A. 1985, a dedicated and selfless leader who inspired excellence and propelled others to join in her commitment to serve. Casey's vitality, warmth, compassion, and boundless enthusiasm served to energize and enhance each of the many campus activities in which she was involved, including student government, student media, Greek life, and Impact. Her passion for facilitating friendship and camaraderie for higher purpose, for promoting service to all and helping expand the horizons of the "underdog," earned her the lifelong gratitude and admiration of her Vanderbilt community. An active member of the Alumni Association Board, she often interviewed prospective students and organized alumni activities. Casey was proud of her Vanderbilt education. She exemplified Cornelius Vanderbilt's vision of strengthening the ties that bind as she consistently reached out to make someone's life better.

THE MARGARET BRANSCOMB PRIZE was established in 1993 to support an undergraduate prize at the Blair School of Music. The wife of Vanderbilt's fourth Chancellor, Harvie Branscomb (1946-1963), Mrs. Branscomb served as president of the Vanderbilt Garden Club from 1952 to 1954. Historically, the prize is given annually to a Blair freshman judged by the faculty to have the musical and personal qualities that best exemplify the spirit and standards of the school.

THE SUE BREWER FUND SCHOLARSHIP was established in 1987 by the Songwriters Guild Foundation to provide support to either composition or guitar majors at the Blair School of Music. To qualify, an entering freshman must be ranked in the upper 25th percentile of his or her class, and an upperclassman must have maintained at least a 3.0 GPA in the performance area, a 2.5 GPA in music, and a 2.0 overall GPA. This fund was established in memory of Sue Brewer, who befriended many of Nashville's struggling songwriters in the late 1960s and early 1970s.

THE FRANKLIN BROOKS MEMORIAL AWARD was established in 1995 by multiple donors to defray travel costs for students studying in France through the Vanderbilt in France program at the College of Arts and Science. This fund was established in memory of H. Franklin Brooks, former associate professor of French and three-time director of the Vanderbilt in France program during his 25-year teaching career at Vanderbilt.

THE LARRY ROSS CATHEY MEMORIAL AWARD was established in 1974 by Arnold M. Heiser to support an award that will recognize the most outstanding student majoring in astronomy in the Astronomy Department at the College of Arts and Science. This award was established in 1974 in memory of Larry Ross Cathey, who graduated in 1966 with honors in physics and astronomy.

THE NORA C. CHAFFIN SCHOLARSHIP was established 1956 by the Women's Council of the Women's Student Government Association to provide scholarship support for deserving undergraduate students at Vanderbilt University. This fund was established in honor of Nora C. Chaffin, former Dean of Women known for her service and loyalty to Vanderbilt University and its women students. The scholarship is awarded to a junior student who has displayed service to the University in the area of student government, religious, literary and scholastic activities, and in the arts.

THE CLASSICS DEPARTMENT STUDENT TRAVEL FUND FOR ROME, ITALY was established in 2006 by Richard H. Davis, B.E. 1969, and Barbara C. Davis, B.S.N. 1969, to support undergraduate student travel expenses in Rome, Italy, through the Classics Department at the College of Arts and Science.

THE PAUL CONKIN FUND was established in 1999 by an anonymous donor to establish a prize for the best undergraduate term paper written on American History in the History Department at the College of Arts and Science. Paul Conkin, Distinguished Professor of History Emeritus at Vanderbilt University, is the author of the history of Vanderbilt University, *Gone with the Ivy*, and the *Peabody College History* which was published in 2002.

THE COOLEY MEDAL was established in 1920 to provide recognition for students who excel in fine arts at the College of Arts and Science. The medal is named after Comrade Theodore Cooley, known as one of the most public-spirited citizens of Nashville. Cooley was a successful Nashville businessman and supporter of the Tennessee Centennial and International Exposition held in Nashville in 1897 at the current location of Centennial Park on West End Avenue.

THE WALTER CRILEY PRIZE PAPER AWARD was established in 1978 by Robert Derrick, B.E. 1954, and the Simons-Eastern Company to be given for the best paper on an advanced senior project in electrical engineering at the School of Engineering at Vanderbilt University. This award was created in honor of Walter Criley, professor emeritus of electrical engineering, who taught from 1947 until his retirement in 1965. Professor Criley helped organize both the student chapter and the Nashville section of the Institute of Electrical Engineers, and also served as southeastern regional vice-president of the National Institute of Electrical Engineers. He passed away in 1977.

THE DONALD DAVIE MEMORIAL POETRY PRIZE was established in 2005 by multiple donors to support an annual prize to be awarded each spring to the best poem submitted by a current graduate student in the Department of English at the College of Arts and Science. This fund was created in memory of poet and Vanderbilt University professor Donald Davie.

THE EDWARD PRENTICE DAVIS MEMORIAL PRIZE was established in 1997 by classmates of Mr. Edward 'Ward' Prentice Davis, B.A. 1987, to provide support for an annual prize awarded to a deserving NROTC college program midshipman. Ward was commissioned as a Second Lieutenant in the United States Marine Corps and served honorably for three years as an artillery officer. To his Marine Corps peers, Ward was an inspiration because he pursued his commission as a college program midshipman, without any scholarship. Ward passed away in 1995. This fund was established to honor Ward's commitment and perseverance.

THE ALLAN P. DELOACH MEMORIAL PRIZE IN PHOTOGRAPHY was established in 1998 by Mr. Rusty Edmister and Mrs. Pat Adams to support a prize in photography in the Fine Arts Department at the College of Arts and Science. This fund was established in memory of Mr. Edmister's and Mrs. Adam's former co-worker at IBM and Vanderbilt University alumnus, Allan P. DeLoach, B.A. 1963. The award is open to any student who has taken a studio class of any discipline. Students will submit one to three photographs to be judged by a professional photographer, outside

of the Vanderbilt community, who will pick the winner and give a slide lecture to students on his/her work.

THE ROBERT V. DILTS AWARD was established in 1994 by multiple donors to provide an award to a deserving undergraduate chemistry student in the Department of Chemistry at the College of Arts and Science. This award was established to honor Professor Robert V. Dilts, who served on the chemistry faculty from 1960 to 1994.

THE ARTHUR J. DYER JR. MEMORIAL PRIZE was established in 1938 by Arthur J. Dyer, Sr. to award a medal to the Civil Engineering student in his/her senior year who shows the greatest proficiency in the study and/or design in the use of structural steel at the School of Engineering, and who is a student member of the American Society of Civil Engineers. This fund was established in memory of a former Vanderbilt student, Arthur James Dyer, Jr., who was injured while prosecuting engineering duties on a bridge at Panama City, Florida, and died September 2, 1928.

THE DAVID ELIA AWARD was established in 2002 by Mrs. Jean M. Elia to provide a \$300 annual award to a varsity women's soccer player in the Department of Athletics. Players will vote on who they consider to be the hardest working player. This fund was established in memory of Mr. David Elia, a parent of a Vanderbilt soccer player.

THE T. ALDRICH FINEGAN AWARD FOR EXCELLENCE IN UNDERGRADUATE ECONOMIC RESEARCH was established in 2005 by T. Aldrich Finegan, Professor Emeritus, to recognize excellence in undergraduate research conducted by a senior graduating from the economics honors program. The award should be given for an outstanding thesis written by a student in the Department of Economics Honors Program at the College of Arts and Science.

THE EDWIN S. GARDNER MEMORIAL PRIZE FOR EXCELLENCE IN FRENCH was established in 1980 by Grace D. Gardner, B.A. 1932, to be used, at the discretion of the Department of French at the College of Arts and Science, in one of two ways: 1) to fund an annual award to a graduating senior excelling in French studies, or 2) to purchase books for the French collection in Jean and Alexander Heard Library. Donor made this gift in honor of her late husband, Edwin S. Gardner, B.A. 1927, who served as treasurer of Vanderbilt from 1953 to 1971.

THE GENERAL MOTORS POLITICAL SCIENCE FUND was established to support undergraduate prizes for political science students at the College of Arts and Science.

THE GEYER AWARD was established in 1979 by Mr. Richard A. Geyer Jr. to support a competitive journalism award designed to give recognition to campus reporters "who consistently write articles resulting from thorough research" and whose articles are, at the same time, "lively, informative, and logical" in any area of Vanderbilt University.

THE GUY GOFFE MEANS AWARD was established in 1975 through the bequest of Marie Hochle Means to provide an award to a student with ability in creative writing in the Department of English at the College of Arts and Science.

THE NORMAN L. AND ROSELEA J. GOLDBERG PRIZE was established in 1988 by Roselea J. Goldberg to support an annual award for the best manuscript submitted each year to Vanderbilt University, preferably in the area of art and medicine. The manuscript will be judged by a committee from Vanderbilt University Press.

THE JOHN P. GREER AWARD was established in 2006 by Professor John and Mrs. Shirley Lachs to provide an award to graduating seniors majoring in philosophy and going to medical school. Donors established this award in honor of Dr. John P. Greer, Professor of Medicine in Vanderbilt's Department of Hematology, to commend his career path and in gratitude of the care given by Dr. Greer to Mrs. Lachs.

THE LARRY C. HALL STUDENT TRAVEL FUND was established in 1995 by multiple donors to support a student traveling to the Pittcon Conference, a chemistry related conference, through the College of Arts and Science. The fund was established in honor of Dr. Larry Hall at the time of his retirement.

THE MARGARET STONEWALL WOOLDRIDGE HAMBLET AWARD was established in 1985 by Clement H. Hamblet and Margaret Hamblet Sarner at the College of Arts and Science. The fellowship was established in memory of Margaret Hamblet's love of art and travels to Europe to study art. Margaret Hamblet was a graduate of Peabody College in the Class of 1926. Clement and Margaret Hamblet met in Paris where Margaret was an art student. The fellowship is awarded to a deserving senior with outstanding merit in art and completion of three or more studio art courses and provides one year of travel and furtherance of creative endeavor following graduation from the College of Arts and Science. The second priority for the fund is to provide a continued small subsidy for a second graduating senior.

THE ANDREW SANG HAN MEMORIAL AWARD was established in 2017 to support an award for a woodwind or brass student at the Blair School of Music who demonstrates remarkable musicianship and leadership in all areas of ensemble playing. The award honors Sang Han, a clarinet performance major at the Blair School of Music from 2012–2015. Sang's dedication to excellence in all areas of performance, as well as the care and consideration he showed his peers, served as an example to his friends and colleagues at Blair.

THE JEAN AND ALEXANDER HEARD AWARD was established in 2013 by the children of Jean and Alexander Heard to provide need-based financial assistance to deserving undergraduate students who have been accepted to one of the summer music festivals through a summer study program at the Blair School of Music. This fund was established in memory of Jean and Alexander Heard. Chancellor Alexander Heard served as Vanderbilt University's fifth Chancellor from 1963 to 1982 and oversaw many changes in the campus. Under his tenure, Peabody College, Blair School of Music, and the Owen Graduate School of Management became part of the University.

THE JEAN KELLER HEARD PRIZE was established in 1985 by the Vanderbilt Woman's Club to provide an award for excellence in music performance to a string student seeking a Bachelor of Music degree at the Blair School of Music. This fund was established to honor violinist Jean Keller Heard, the wife of Vanderbilt's former Chancellor Alexander Heard. Mrs. Heard passed away in 2011.

THE FRANK HOUSTON AWARD FOR ORATORY was established in 1974 by Mr. Frank K. Houston, B.A. 1904, and former member of the Vanderbilt Board of Trust, to support an annual prize given to a student who excels in a presentation in public speaking in any department at Vanderbilt University. Mr. Houston grew up in Murfreesboro, Tennessee, and took public speaking while he was a student at Vanderbilt. He established this competition to encourage competent public speaking, as he believed that his experience at Vanderbilt had made a very real difference in his own life.

THE MELVIN D. JOESTEN SCIENCE VOLUNTEER AWARD FUND was established in 1998 by multiple donors to provide an award for outstanding science student volunteers in the Chemistry Department at the College of Arts and Science. This endowed fund was established in the name of Melvin "Mel" D. Joesten in recognition of his many years of service to the department and to Vanderbilt University.

THE MARK M. JONES UNDERGRADUATE AWARD IN INORGANIC CHEMISTRY was established in 1998 by colleagues and other friends of Professor Jones to recognize undergraduates who have excelled in inorganic chemistry at the College of Arts and Science. Preference will be given to students showing excellence in undergraduate research. Dr. Jones taught chemistry from 1957 until his retirement in 1998 and chaired the chemistry department from 1970 until 1976.

THE MICHAEL B. KEEGAN TRAVELING FELLOWSHIP was established in 2004 by Michael B. Keegan and others to provide one or more current or graduating undergraduate student(s) with an opportunity to study and travel abroad in pursuit of an issue or topic of personal and intellectual passion. The Fellowship will provide a minimum of one

annual award, each in the amount of not less than \$10,000 to help pay for travel expenses for the recipient(s), allowing the recipient(s) to study and possibly work outside the United States of America for approximately one year. The fund was established as an international fellowship to foster in the student(s) a sense of his/her potential as a citizen of the world, and as a traveling fellowship to create a deep cross-cultural experience.

THE W. G. KIRKPATRICK ENGINEERING PRIZE was established in 1926 through a bequest from Walter Gill Kirkpatrick, B.E. 1887, B.S. and M.S. 1889, to provide support for an annual prize for the most deserving third-year student in the Department of Civil Engineering at the School of Engineering.

THE MAGDA LACHS AWARD was established in 2008 by Brenda Higgins, a former employee in Development and Alumni Relations for the Blair School of Music, to support a voice or orchestra student at Blair who participates in the opera presentation in the school year in which it was given. The fund was established in honor of Magda Lachs' 100th birthday.

THE C. MAXWELL LANCASTER AWARD FOR EXCELLENCE IN ITALIAN was established in 1990 by Professor Luigi Monga to honor the memory of C. Maxwell Lancaster, professor of French and Italian at Vanderbilt University from 1939 until his retirement in 1976, and to promote the study of the Italian language and literature at Vanderbilt University. The annual prize will consist of a medal which will be awarded to a fourth- semester student for excellence in Italian, at the recommendation of the faculty of the Department of French and Italian.

THE R. J. LARSEN PRIZE FOR EXCELLENCE IN MATHEMATICS was established in 2005 by multiple donors to provide an award to a graduating senior for excellence in mathematics at the College of Arts and Science. This fund was established in honor of Professor Richard Larsen to celebrate his retirement. Professor Larsen worked in the Department of Mathematics at the College of Arts and Science for over thirty years.

THE JOEL CARL LICHTER MEMORIAL AWARD was established in 1996 by Professor and Mrs. Barry D. Lichter to provide an award that will be presented each year at the Magnolia Awards ceremony to a graduating senior who contributes by example to the promotion of outdoor education, combining academic excellence and expertise in wilderness skills along with friendship and service to others in any area of Vanderbilt University. Professor and Mrs. Lichter established the award to honor the life of their son Joel Lichter, an avid outdoorsman who graduated from Vanderbilt University magna cum laude in 1981 with honors in chemical engineering. Joel Lichter died in a 1992 accident in Alaska while commercial fishing.

THE LEE J. LOVENTHAL PRIZE was established in 1937 by Mr. Lee Jefferson Loventhal, class of 1896 and member of the Vanderbilt University Board of Trust from 1919 to 1940, to establish a prize in the Department of Communication Studies.

THE S. S. AND I. M. F. MARSDEN AWARD IN MUSICAL SCHOLARSHIP was established in 1998 by Dr. Sullivan F. Marsden for a written paper on a topic that might lie outside the normal core of scholarship at the Blair School of Music. The award will be an annual \$1,000 prize to encourage and recognize excellence in scholarship.

THE THOMAS W. MARTIN MEMORIAL AWARD was established in 1992 by multiple donors to support an award recognizing an outstanding undergraduate physical chemistry student at the College of Arts and Science. This fund was established in memory of Thomas W. Martin Jr., chair of the Department of Chemistry from 1967 to 1970.

THE CARL MASON AWARD was established in 1986 to provide assistance to incoming graduate students in the area of environmental engineering in the School of Engineering.

THE DELENE LAUBENHEIM MCCLURE MEMORIAL PRIZE IN OPERA was established in 1997 by multiple donors to provide support for voice majors who exhibit excellence in opera at the Blair School of Music. This scholarship was established to honor the memory of Delene Laubenheim McClure, BMUS, 1991. While at Vanderbilt, Mrs. McClure was a member of the Blair Opera Workshop. She debuted at the Kennedy Center in Washington, D.C., in 1994 as a finalist in the National Symphony Orchestra's Young Soloists competition and won the competition in 1995. Mrs. McClure passed away in 1997.

THE JOHN T. AND LIZZE ALLEN MCGILL AWARD was established in 1960 by Lizzie Allen McGill to provide support for awards for students who have the best developed qualities of leadership and scholarship. This fund was established in memory of Mrs. McGill's husband who passed away in 1946, and who spent his life in service to Vanderbilt as a student in the class of 1879, professor emeritus of chemistry, Dean of the School of Pharmacy, and historian of the university.

THE SAMUEL T. MCSEVENEY AWARD was established in 2001 by Professor Samuel T. McSeveney to recognize an undergraduate student with the best paper written in a freshman seminar in the Department of History.

THE MERRILL MOORE AWARD was established in 1961 by Mrs. Merrill Moore, Vanderbilt alumna and widow of the late Merrill Moore, M.D. 1928, to provide a cash award to a student graduating from Vanderbilt University or a junior or senior student on the basis of the student's literary promise and the psychological or practical usefulness of award to him/her at the College of Arts and Science. Dr. Moore was an internationally known Boston psychiatrist and a poet.

THE HENRIETTA HICKMAN MORGAN PRIZE was established in 1946 by William B. Morgan II to provide awards to freshmen students with the best pieces of original writing at the College of Arts and Science. This fund was established in memory of the donor's wife, Henrietta Hickman Morgan. Mrs. Morgan received her B.A. in 1938 from Vanderbilt University and was a member of the Kappa Alpha Theta sorority, and Phi Beta Kappa Phi Sigma Iota, an honorary romance language group. She served as flag secretary and aide to Rear Admiral Martin K. Metcalf for more than two years before falling ill in 1945.

THE NED PARKER NABERS AWARD was established in 1984 by multiple donors to provide an annual prize for the best essay or research paper by an undergraduate student in the fields of classical archaeology or ancient art or architecture. The fund was established in memory of Ned Parker Nabers who served on faculty from 1966 until his death in 1984.

THE DANA W. NANCE PRIZE was established in 1985 by Professor Francis C. Nance, B.A. 1953, and family to provide an annual award to a student at the College of Arts and Science. The award will recognize an outstanding student from the pre-medical curriculum who has demonstrated perseverance in overcoming academic, financial, or social obstacles to succeed, who is well-trained in the technical skills acquired through the undergraduate pre-medical curriculum, and who possesses an abiding sense of ethical and moral concern for the patient. The fund was established to honor Dana W. Nance, B.A. 1925, M.D. 1929, who served for many years as the area chairman of the Vanderbilt Alumni Fund.

THE ELLIOTT AND AILSA NEWMAN CLARINET AWARD was established in 1999 through the bequest of Ailsa MacKay Newman along with additional memorial gifts to provide an award to a deserving clarinet student at the Blair School of Music. Preference when awarding is given to a clarinet major who shows strong musical promise. If a clarinet major is not available, the award should be given to a woodwind student. This fund is named for Mrs. Newman and her husband, who predeceased her.

THE L. HOWARD NICAR MEMORIAL FUND was established in 1997 by multiple donors to award a prize or scholarship to a collegiate student at the Blair School of Music. This fund was established in memory of L. Howard Nicar, former Assistant Dean of Admissions at the Blair School of Music.

THE DONALD E. PEARSON AWARD was established in 1980 by the Chemistry Department and endowed in 2008 by Dr. and Mrs. Frank Pinkerton to provide support for an annual award to an outstanding chemistry major who has done undergraduate research in chemistry. Professor Donald E. Pearson served as faculty in the Department of Chemistry at the College of Arts and Science until his retirement in 1986.

THE PHI BETA KAPPA CENTENNIAL AWARD was established in 1998 by the Phi Beta Kappa Council to provide support for an annual award at the College of Arts and Science. This fund, established in celebration of the Alpha of Tennessee chapter's centennial in 2001, will be presented to a Vanderbilt senior who has been elected to Phi Beta Kappa in their junior year and who has demonstrated excellence in several different fields of academic endeavor, and has applied his or her intellectual talents in extracurricular activities within the university or community that exemplify a dedication to improve the human condition.

THE EMILY ANN BENNETT PLANT AWARD IN ANTHROPOLOGY was established in 1995 by Emily Ann Bennett Plant, B.A. 1994, to provide financial support based on merit and need to recognize excellence in the study of anthropology at the College of Arts and Science. The award may be applied to the cost of tuition and living expenses or to fund supplemental educational activities that will enrich the study of anthropology, such as summer research or participation in a field school.

THE ROBERT PETER PRATT MEMORIAL AWARD was established in 1991 by multiple donors to honor Robert Peter Pratt (1954–1991), former associate director of Undergraduate Admissions and longtime leader in promoting diversity within the student population. The award is presented annually to the Chancellor's Scholar whose accomplishments best exemplify Peter Pratt's commitment to diversity and unity, leadership and cooperation, warmth and openness, and unselfish service to others. The award recognizes a Chancellor's Scholar of junior or senior standing whose campus leadership and service promote diversity and enhance understanding among the various groups that comprise the university community. Academic performance is also considered in selecting the award recipient.

THE DAVID RABIN PRIZE was established in 1985 by multiple donors to provide an annual prize to a student chosen on the basis of music ability and talent at the Blair School of Music. This prize was established in memory of Dr. David Rabin, former professor of medicine in obstetrics and gynecology at the School of Medicine. Dr. Rabin passed away in 1984.

THE JERRY REVES STUDENT ATHLETE GPA AWARD was established through funds from the terminated trust of Dr. Joseph Gerald Reves, Jr., B.A. 1965, to annually fund a plaque for the student-athlete with the highest GPA.

THE JIM ROBINS AWARD was established in 1969 by Michael G. Wagner, B.A. 1957, to honor the memory of James A. Robins, class of 1892, whose life and teaching exemplified selfless devotion to learning, to honor, to participation in sports and to service to youth and Vanderbilt. The prize is awarded to a member of the football team voted as the most outstanding representative of the group.

THE JOE L. ROBY NROTC ESPRIT DE CORPS AWARD was established in 2006 by Mr. Duff Anderson and Mr. W. Patrick McMullan III, B.A. 1974, to recognize and reward Vanderbilt NROTC Midshipmen who display outstanding enthusiasm and esprit de corps as members of the battalion through involvement in NROTC and university activities and provide inspiration to fellow midshipmen and students at Vanderbilt University. The award was created in honor of Joe L. Roby, B.A. 1961, Vanderbilt trustee emeritus, and a former Battalion Commanding Officer of the Vanderbilt NROTC Midshipmen Battalion in recognition of his inspiring leadership at Vanderbilt University and with the Vanderbilt Naval ROTC program and his subsequent service in the United States Navy.

THE KATHRYN SEDBERRY POETRY PRIZE was established in 2003 through the estate of Kathryn Sedberry, M.A. 1963,

to provide support for an annual poetry prize in the Department of English at the College of Arts and Science.

THE JAMES G. STAHLMAN NROTC AWARD was established in 1972 by former Vanderbilt Trustee, James Geddes Stahlman, B.A. 1919, to provide an award to the top Navy ROTC member and the top Marine ROTC member from the senior class who have proven themselves to be the most outstanding in citizenship, scholarship, and leadership in the Naval ROTC unit. The award recipients will be chosen by their Commanding Officer.

THE DAVID STEINE ECONOMICS AND BUSINESS AWARD was established in 2006 by James B. Johnson Jr., B.A. 1954, to recognize undergraduates in the Hoogland Undergraduate Business Program who show exceptional promise for a career in business. The fund may be awarded to any graduating student from any of Vanderbilt's four undergraduate schools who will graduate with a business minor. The award was established to honor the memory and distinguished career of David Steine, a professor held in the highest esteem by the donor.

THE STEIN STONE MEMORIAL AWARD was established in 1948 by Mrs. James N. Stone to provide an award to students in the School of Engineering. This fund is to be awarded to a graduating senior who has lettered in a sport, preferably football, and who is judged to have made the most satisfactory scholastic and extramural progress as an undergraduate. This fund was established in memory of Mrs. Stone's late husband, James "Stein" Stone, student at the School of Engineering in 1908 and an "All Southern" center on the Vanderbilt University football team from 1904 to 1907.

THE HENRY LEE SWINT AWARD was established in 1976 by Frank A. Woods, B.A. 1963, LL.B. 1966, for an undergraduate history major with the best history essay or research paper in the Department of History at the College of Arts and Science. The fund was established in honor of Henry Lee Swint, a former Holland N. McTyeire Professor of History who served on the faculty from 1939 until his retirement in 1977.

THE ROBERT D. TANNER UNDERGRADUATE RESEARCH AWARD was established in 2005 by multiple donors to provide an award to an undergraduate student conducting research in the Department of Chemical Engineering at the School of Engineering. This award was established in honor of Dr. Robert D. Tanner, emeritus faculty, at the time of his retirement. Dr. Tanner was a professor of chemical engineering at Vanderbilt University.

THE JOEL TELLINGHUISEN PHI BETA KAPPA AWARD was established in 2006 by James B. Johnson, Jr., B.A. 1954, to recognize undergraduate students who have been initiated into Phi Beta Kappa and have shown exceptional ability at the College of Arts and Science. The award honors Joel Tellinghuisen, professor of chemistry, for his positive impact and influence in educating undergraduate students at Vanderbilt, including Mr. Johnson's daughter, Katherine Johnson, B.S. 1994, M.Ed. 1995. The annual awards will be made to graduating seniors who are members of Phi Beta Kappa, in recognition of outstanding performance in research as an undergraduate at Vanderbilt.

THE UNDERWOOD MEMORIAL AWARD was established in 1961 by Newton Underwood to support a senior in the Department of Physics or Department of Biology selected alternately by the head of the physics department and the head of the biology department to be awarded each year at commencement. The award honors his father, Judge Emory Marvin Underwood, B.A. 1900, LL.B. 1902, and a member of the Vanderbilt Board of Trust from 1922 until his death in 1960, who devoted his life to justice and to bringing out the best in people.

THE JACQUELINE AND MORRIS WACHS ESSAY PRIZE was established in 1999 by multiple donors to support a prize in the Department of French and Italian at the College of Arts and Science. This fund was established in memory of Jacqueline Wachs, former French professor from 1966 until her retirement in 1994, and Morris Wachs, emeritus professor of French at Vanderbilt. Mrs. Wachs died in 1999 and Mr. Wachs died in 2001.

THE WALTHER AWARD FOR VUCEPT EXCELLENCE (WAVE) was established in 2005 by Beverly R. Walther, B.S. 1990,

MBA 1990, and Michael C. Walther II, B.S. 1989, MBA 1990, to reward undergraduate students serving as mentors in the VUcept orientation program at the discretion of the Provost and Vice Chancellor for Academic Affairs, or designee.

THE THOMAS M. WESER AWARD was established in 1989 by multiple donors to provide support for an annual award honoring an international student who has demonstrated an exceptional commitment to intellectual life, cross-cultural appreciation, and personal integrity at Vanderbilt University. Weser Award recipients are typically active in student organizations and community service projects outside of the classroom and maintain a solid record of academic performance at the undergraduate or graduate level. This fund was established in memory of Thomas M. Weser, an exchange student from Germany who was killed while attending Vanderbilt University in 1988.

THE MARTIN WILLIAMS AWARD was established in 1992 by multiple donors to provide an award to a music major writing the most outstanding paper for a music theory or literature/history course at the Blair School of Music. This fund was established in memory of Martin Williams, director of the Smithsonian Institution's jazz program and adjunct professor of jazz history at the Blair School of Music.

THE FRANK A. WOODS AWARD IN HISTORY was established in 2008 by Mr. James Lachs, B.S. 1993, to provide an award for a graduating senior majoring in history with the most distinguished academic record at the College of Arts and Science. The fund was created in honor of Mr. Frank A. Woods, B.A. 1963, LL.B. 1966.

THE KATHERINE B. WOODWARD PRIZE IN SPANISH was established in 1943 by Katherine B. Woodward, B.A. 1919, to provide an award to the student with the highest average majoring in Spanish at the College of Arts and Science. Preference in awarding will be given to senior year students. Miss Woodward served as a teacher then head of the Spanish Department at the Woodrow Wilson High School in Portsmouth, Virginia, from 1919 until her retirement in 1956. She had a deep love for Vanderbilt and an intense interest in promoting the teaching of Spanish.

Undergraduate Academic Regulations

Institutional Policies and Student Obligations

[Honor System](#)

[Responsibility to be Informed](#)

[Class Attendance](#)

[Classroom Recording Policy](#)

[Change of Address](#)

[Catalog Authority](#)

Honor System

All academic work at Vanderbilt is done under the Honor System. (See the section on [Life at Vanderbilt](#) in the chapter on Campus Resources.)

Responsibility to be Informed

It is the responsibility of the student to keep informed of course requirements and scheduling. Failure to do so may jeopardize graduation.

Class Attendance

Students are expected to attend all scheduled meetings of each class in which they are enrolled. Students having excessive absences will be reported to the Office of the Dean. Class attendance may be a factor in determining the final grade in a course.

Classroom Recording Policy

The use of technologies for audio and video recording of lectures and other classroom activities is allowed only with the express permission of the instructor. In cases where recordings are allowed, such content is restricted to personal use only unless permission is expressly granted in writing by the instructor and by other classroom participants, including other students. Personal use is defined as use by an individual student for the purpose of studying or completing course assignments. When students have permission for personal use of recordings, they must still obtain written permission from the instructor to share recordings with others.

For students registered with the Office of Student Access Services and who have been approved for audio and/or video recording of lectures and other classroom activities as a reasonable accommodation, applicable federal law requires instructors to permit those recordings. Such recordings are also limited to personal use, except with written permission of the instructor and other students in the class.

Change of Address

Students are responsible for keeping the university informed of their correct mailing addresses, both during and outside semesters of enrollment. Any change of address must be reported to the Office of the University Registrar using the YES online form. The university will consider notices or other information delivered if mailed to the address currently on file in YES or emailed to the student's Vanderbilt email address.

Catalog Authority

This catalog is the authority on degree requirements and academic regulations. If there is a discrepancy between the catalog and other resources such as a website or handbook, this catalog shall prevail. Final authority over interpretation of catalog language rests with the relevant associate dean for undergraduate education.

Academic Advising

All entering students are assigned academic advisers who assist in the planning of programs and course schedules. Students are required to meet with their advisers prior to registration for each semester to consult about course selection and to have their advising hold removed. Students should also check their degree audit in YES regarding remaining degree requirements. Students are ultimately responsible for being aware of all requirements they need to fulfill.

[Taking Courses for Zero Credit](#)

[Auditing](#)

[Independent Study](#)

[Duplication of Course Content](#)

[Repeating a Course](#)

[Undergraduate Enrollment in Graduate School Courses](#)

[Reserving Credit for Graduate School](#)

Course Registration

A period is designated in each semester during which continuing students, after consultation with their advisers, register for courses to be taken during the next term. Entering students receive instructions to register in the summer. Students can access their registration appointment times and the registration system via YES at yes.vanderbilt.edu. Any holds on registration will also be shown in YES.

Normal Course Load

A student must be enrolled in a minimum of 12 hours. Students wishing to carry more than 18 hours or fewer than 12 hours must obtain the approval of the relevant Office of Academic Services of their home college or school. Tuition is charged on the basis of a normal course load of 12 to 18 semester hours. Credit hours either above or below the norm, which must be approved, are charged at an hourly tuition rate. Students taking fewer than 12 hours are placed on probation, unless their underload is pre-approved. A student must be enrolled in a minimum of 12 hours to be classified as a full-time student.

A&S: Summer loads exceeding 14 credit hours must be authorized by the A&S Office of Academic Services.

Engineering: An underload of fewer than six credit hours in one term will not generally be authorized.

Add/Drop a Course

During the add/drop period of registration, also referred to as open enrollment and published in the Academic Calendar, students may add or drop courses without academic penalty. No record of courses dropped during the change period/open enrollment appears on the academic record.

Pass/Fail

Students may elect to take a limited number of courses on a Pass/Fail basis. To enroll for a course on a Pass/Fail basis, students must have completed at least two semesters at Vanderbilt and must have achieved at least sophomore standing.

Students may elect grading on a Pass/Fail basis or change from Pass/Fail to graded status until the deadline date published in the Academic Calendar. Those electing the Pass/Fail option must meet all course requirements (e.g. reports, papers, examinations, attendance, etc.) and are graded in the normal way. Instructors are not informed of the names of students enrolled on a Pass/Fail basis. At the end of the semester, a regular grade is submitted for the student enrolled under the Pass/Fail option. Any grade of D- or above is converted in student records to a P. The grade of P is neither counted in the grade point average nor used in the determination of honors. A failing grade will appear on the student record as F and will be counted in the student's grade point average.

Please see below for details that apply based on the student's home college/school.

A&S: Students on probation cannot elect Pass/Fail. A student must be enrolled in a minimum of 12 graded hours to be classified as a full-time student. A graduating senior who has permission to take fewer than 12 credit hours on a graded basis may take one course on a P/F basis in addition to the courses required for graduation. If the student does not graduate at the end of that semester, the P grade is automatically converted to the grade actually earned. No more than one course per term may be taken P/F, and no more than 18 credit hours graded P may be counted toward the degree. The P/F option does not apply to courses in the following categories: Courses counted toward AXLE or Core requirements; Courses in the major field(s), other courses that may be counted toward the major(s), or courses required for the major(s); For students with a defined interdisciplinary major, courses that are required for the major or that are eligible to count toward the major; For students with an individually designed interdisciplinary major, courses listed in the student's plan of study; For students planning an optional minor, courses in the minor field or those eligible to count toward an interdisciplinary minor; Courses eligible to count toward the major or minor, regardless of whether the student has already satisfied major or minor requirements; Courses that have been specifically excluded from the P/F option; Courses taken previously. Pass/Fail rules, requirements, and deadlines are not able to be petitioned. The grade for a class will be converted from P to the recorded letter grade if a student later declares a major or minor toward which that class counts. The recorded letter grade will be included in both the overall and the major or minor grade point average.

Blair: Students on probation cannot elect pass/fail. For B.Mus. and B.Mus.Arts students, the Pass/Fail option is limited to courses taken as free electives. Course work in the area of a minor or second major is governed by the school in which the department or program is housed. No more than one course may be elected on a Pass/Fail basis in any one semester. Only a total of 18 hours towards the 126-hour degree total may be taken on a Pass/Fail basis. Students electing course work on a Pass/Fail basis must be enrolled for 12 graded hours. A graduating senior who has permission to take fewer than 12 hours on a graded basis may take one course on a P/F basis in addition to the courses required for graduation. If the student does not graduate at the end of that semester, the grade P is automatically converted to the grade actually earned. Performance-based courses and independent studies are not eligible to take Pass/Fail; this includes private lessons, group lessons, chamber ensembles, and large ensembles.

Engineering: No more than 9 hours graded Pass will be accepted toward the B.S. or B.E. degree, as designated by each program's curriculum. No more than two courses may be taken on a Pass/Fail basis in any one semester. A minimum of 12 hours must be taken on a graded basis in any semester that a Pass/Fail course is taken. A graduating senior who needs fewer than 12 hours to graduate may take courses on a Pass/Fail basis as long as he or she takes the number of hours needed to graduate on a graded basis.

Pass/Fail Electives Options by Program

	Open Elective	Liberal Arts Core	Technical Elective
BME	X	X	
CE	X	X	
CHE	X		
CS	X	X	X
ECE	X		
ENVE	X	X	
ES	X	X	
ME	X	X	X (non-ME)

Peabody: No more than one course per semester may be taken on a P/F basis and no more than three total during the undergraduate career. No more than one course from any Liberal Education Core area (e.g. humanities) may be taken under this option. Note that neither courses taken for transfer credit (grade of "T") nor courses that are only offered on a pass/fail basis by the university (e.g., certain field experience courses) are counted against the number of courses that a student may voluntarily elect to take on a pass/fail basis, either within or across semesters. The P/F option does not apply to courses in the following categories: Liberal Education Core Courses that have been specifically identified by the student's primary major as needing to be taken on a graded basis. For students with a single or double major, courses in the department(s) of the major(s) or other courses that may be counted for the major(s); For students with an interdisciplinary major, courses listed in the student's plan of study; For students planning an optional minor, courses in the department of the minor or those counting toward an interdisciplinary minor. Students taking a course on a P/F basis must be enrolled for at least 12 additional hours on a regularly graded basis. If a student drops a course and falls below 12 graded hours, the P/F course is converted automatically to a regularly graded basis. Seniors who meet the above criteria and have permission to take fewer than 12 hours on a graded basis may take one course on a P/F basis in one of their last two semesters (e.g., a semester in which an internship or student teaching is not being taken). If the student does not graduate at the end of the senior year, the grade of P is automatically converted to the grade actually earned. When a student wishes to complete a major or minor in a field in which a grade of P has been received, the registrar converts this grade to the regular grade originally earned.

Course Withdrawal

After the end of the add/drop period / open enrollment and extending to the withdrawal deadline published in the Undergraduate Academic Calendar, a student may withdraw from a course. Under certain conditions, withdrawal may require approval by the student's adviser and college/school leadership. A mark of W is recorded in the student record for any course from which a student withdraws. A course in which a W is recorded is not used in computing grade point averages. A student who defaults in a course without dropping or withdrawing from it receives the grade F.

Taking Courses for Zero Credit

No-credit courses count in computation of the student's academic load and in computation of tuition, but not in computation of the grade point average. They also do not count toward the attainment of class standing.

Auditing

Regularly enrolled students who want to audit courses in any of the undergraduate schools of the university must submit the appropriate online form to request permission. Not all courses are available to audit. No permanent record is kept of the audit and no grade or credit is awarded. Regular students may audit one class each semester free of charge.

Blair: Performance-based courses and independent studies are not eligible to audit. These include large ensembles, chamber ensembles, jazz combos, and private lessons. If you are unsure whether a course is eligible for audit, please contact the Blair Office of Academic Services.

Independent Study

A&S: Independent study and directed study courses are intended primarily for students in their junior and senior years. Students may not take an independent study or directed study course that duplicates a regular course being

offered in the same semester. Juniors or seniors who wish to take independent study or directed study courses must use the following procedure:

1. Students may initiate the independent study enrollment process in YES by clicking on the Individual Study link on the student landing page.
2. Students must be registered in the independent study before the end of the change period.

Blair: Students must obtain permission to enroll in Independent Study from the instructor of their choice prior to registration. Independent Study request forms must be submitted via Kualii before the end of the Change Period. The instructor's approval of the request form indicates a willingness to supervise the Independent Study project. A contract or study plan, approved by the instructor in consultation with the appropriate department chair and the associate dean, must be attached to the Kualii Independent Study request, submitted before the end of the Change Period. Kualii Independent Study requests missing a study plan will automatically be denied. An Independent Study project should result in a substantial written report, paper, or lecture/recital. The report, recording, or some physical manifestation of the project should be retained by the instructor. Independent Study projects proposed by students for cross-school registration should be approved through the mechanisms of both schools. Consult associate deans from both schools for guidance.

A student may register for a maximum of 3 hours in Independent Study in a semester. A student may count a total of 6 hours in Independent Study toward the degree. A faculty member may supervise no more than four students per semester in Independent Study projects.

Independent Study cannot substitute for courses which are part of the curriculum.

Peabody: Independent study courses, ranging from zero to three hours of credit, are listed in the *Schedule of Courses* and are intended for students in their junior and senior years. Students wanting to undertake an independent study must follow these guidelines: 1. Students must be in academic "good standing" (may not be on probation or Leave of Absence). 2. Students must arrange the independent study with a Vanderbilt full time faculty member who has agreed to supervise and grade this course. 3. Students may enroll for up to 3 hours of independent study in one semester. 4. Students must make a study plan detailing the nature of the project and the amount of credit. The Individual Learning/Directed Study contract must be approved by the instructor and the department chair (or the chair's designee) by the last day of the change period. 5. Registration for the course occurs when the completed Individual Learning/Directed Study contract is submitted to the Peabody Office of Academic Services. Registration for an independent study will not be allowed after the change period has ended. Students may not repeat independent study courses for grade replacement.

Duplication of Course Content

Students may not take for credit more than one course with the same content. Certain courses (e.g. ensemble, performance instruction, special topics, and directed study) are designated in the course description as repeatable as they contain evolving or iteratively new content. These courses may be taken multiple times for credit.

Repeating a Course

Students may repeat a course*,** to replace a grade, with no additional credit hours earned, subject to the following conditions:

1. Courses taken at Vanderbilt may not be repeated elsewhere.
2. Failed courses may be repeated until passed; passed courses may be repeated only once.
3. A course may be repeated only on a graded basis, even if the course was originally taken Pass/Fail.
4. Courses taken Pass/Fail in which the student earned a Pass may not be repeated.
5. A course cannot be repeated through credit by examination.
6. Independent and directed study courses may not be repeated for grade replacement.
7. Only the most recent final grade is calculated in the grade point average, though all grades show on the transcript.

Students should note that repeating a course may improve the grade point average, but it may also lead to problems in meeting minimum hour requirements for class standing and progress toward a degree.

***A&S:** Students in the College of Arts and Science cannot repeat Core 1010 and Core 1020.

****Engineering:** Students in the School of Engineering may only repeat courses in which a grade of C+ or below was earned.

Undergraduate Enrollment in Graduate School Courses

A qualified student with appropriate permissions may take certain 5000-level or above graduate courses; these are limited to courses approved for graduate credit, excluding thesis and dissertation research courses and similar individual research and reading courses.

For A&S and Peabody students, if the 5000-level or above course has a co-taught 3000- or 4000-level (i.e., undergraduate) course, only the undergraduate version may be taken.

Credit from 5000-level or above graduate courses may be applied to undergraduate degree requirements or may be reserved for a future graduate career (see next section for more information). Vanderbilt cannot guarantee that another graduate school will grant credit for such courses. Permission for undergraduates to enroll in graduate-level courses does not constitute a commitment on the part of any department or program to accept the student as a graduate or professional student in the future.

The student must use the online Special Enrollment Action form available in YES to obtain approval of their academic adviser, the instructor of the course, and the director of graduate studies in the discipline of the course.

An undergraduate student exercising this option will be treated as a graduate student with regard to class requirements and grading standards.

A&S: Students must have senior standing and a 3.000 GPA or better. The total course load, graduate and undergraduate courses, must not exceed 15 hours in that semester. A&S students may not take professional courses for credit.

Blair: Students must have senior standing and a 3.000 GPA or better. The total course load, graduate and undergraduate courses, must not exceed 18 hours in that semester.

Engineering: Students must have junior or senior standing and must, at the time of registration, have a 3.500 grade point average in the preceding two semesters. The total course load, graduate and undergraduate courses, must not exceed 18 hours in that semester.

Peabody: Students must have senior standing and a 3.000 GPA or better. The total course load, graduate and undergraduate courses, must not exceed 15 hours in that semester. Peabody undergraduates with appropriate permission may enroll in select Peabody professional courses.

Reserving Credit for Graduate School

Undergraduates enrolling in graduate/professional courses according to the guidelines of the previous section may elect to reserve the credit from such courses for a future possible graduate degree program as long as the following conditions are met:

1. The credits must be in excess of those needed for the bachelor's degree.
2. The election to reserve the credit must be made at the time of registration.
3. The student must be simultaneously enrolled in at least 12 credit hours applied to the bachelor's degree in order to preserve full-time student-status and, if relevant, to remain eligible for financial aid. If fewer than 12 credit hours remain to complete the undergraduate degree, the student only need register for the hours required for the degree.

A grade is recorded on the transcript for a reserved course but with a notation that it does not count toward the degree. Such courses count in computation of the student's total academic load and in computation of tuition but not in computation of the grade point average. The credits also do not count toward the attainment of class standing.

Grading and Credits

[Credit Hour Definition](#)

[Grade Reports](#)

[Grade Point Average](#)

[Defined Grades with Corresponding Grade Points per Credit Hour](#)

[F: Failure](#)

[Mid-Semester Progress Reports](#)

[Temporary Grades](#)

[Transfer Credit](#)

[Credit by Examination](#)

Credit Hour Definition

Credit hours are semester hours; e.g., a three-hour course carries credit of three semester hours. One semester credit hour represents at least three hours of academic work per week, on average, for one semester. Academic work includes, but is not necessarily limited to, lectures, laboratory work, homework, research, class readings, independent study, internships, practica, studio work, recitals, practicing, rehearsing, and recitations. Some Vanderbilt courses may have requirements which exceed this definition.

Certain courses (e.g., ensemble, performance instruction, and independent study) are designated as repeatable as they contain evolving or iteratively new content. These courses may be taken multiple times for credit. If a course can be repeated, the number of credits allowable per semester will be included in the course description.

Grade Reports

Grade reports (and in the case of Blair, faculty critiques of performance examinations) will be provided to students at the conclusion of each semester. Grades are available online in the Academic Record within YES (Your Enrollment Services). This report will give the total hours and grade points earned during the semester, as well as the cumulative hours and grade points earned to date. Students should examine these reports carefully and discuss them with their faculty advisers. Any errors should be reported immediately to the college or school's Office of Academic Services.

A grade reported and recorded in the Office of the University Registrar may be changed only upon written request of the instructor, on certification that the original report was in error, with approval of the associate dean or Administrative Committee.

Grade Point Average

A student's grade point average is obtained by dividing the total grade points earned by the number of hours for which the student registered, excluding courses taken for no credit, those from which the student has withdrawn, those with the temporary grade of I or M, those taken in a study abroad program, and those that are completed with the grade Pass.

In no case is the grade point average affected by transfer credit.

Defined Grades with Corresponding Grade Points per Credit Hour

Grades that can be awarded and the corresponding grade points per credit hour are as listed here.

A	4.0	C	2.0
A-	3.7	C-	1.7
B+	3.3	D+	1.3
B	3.0	D	1.0
B-	2.7	D-	0.7
C+	2.3	F	0.0

Engineering: The School of Engineering also uses the grade of A+ for its students. An A+ corresponds to 4.0 grade points per credit hour.

F: Failure

The grade F indicates failure. F's are counted in the computation of grade point averages, except when a course is repeated and is subsequently passed. Any time a course is repeated, the latest grade is used for computation of the grade point average and credits earned. The original grade remains on the transcript. If a student fails a course more than once only one F will be included in GPA calculation.

A course in which the grade F is received must be repeated as a regular course if credit is to be given. It may not be repeated as a course in independent or directed study, under the procedures for credit by examination, or on a P/F basis.

Mid-Semester Progress Reports

At mid-semester, the Office of the University Registrar posts deficiency notices for students whose mid-semester grade in any course is a C- or below or who have excessive absences. (Deficiency notices are found in the Academic Detail in YES.) Deficiencies are issued as a matter of information and warning. Deficiencies do not show on transcripts, but information is shared with the faculty advisers.

A student who receives a deficiency notice is expected to meet with their faculty adviser before the deadline for withdrawal and in more serious cases may be expected to meet with a member of their Office of Academic Services.

Temporary Grades

Temporary grades are placeholders that are assigned under defined circumstances and are not replacements for failing grades. Missing work must be completed by the deadline specified by the instructor (usually before the end of the second week of classes in the next regular term but no later than the end of the following semester) after which the permanent grade is recorded (either the newly assigned or default grade). The default grade is calculated by assigning zero points for work not submitted. Temporary grades are not calculated in the GPA, but a student who receives a temporary grade is ineligible for the Dean's List. An undergraduate student cannot graduate with any temporary grades on their record. Temporary grades may also impact a student's financial aid eligibility. The following temporary grades are available:

I: Incomplete

To be assigned only if the following conditions apply:

1. An extenuating circumstance has emerged after the course withdrawal deadline
2. The student is up to date on all work prior to the extenuating circumstance
3. The student successfully completed at least 60% of the assigned work throughout the semester
4. The student requests the incomplete before the end of classes
5. The student has been attending a significant majority of the classes

M: Missed Final Examination or Final Evaluation

To be assigned only if the following conditions apply:

1. The student misses only the final examination or final evaluation and promptly informs the instructor as to the extenuating circumstances for missing the final exam/evaluation. In the absence of prompt notification of extenuating circumstances, a grade of zero for the final exam/evaluation is recorded.
2. The student could pass the course if the final examination is successfully completed. (The grade of F is given

if the student could not pass the course even with the final examination.)

Transfer Credit

It is the student's responsibility to provide all of the information required by the Office of the University Registrar to assess the program for which transfer of credit is requested. Work presented for transfer must be from a regionally accredited college. Transfer credit is subject to evaluation in light of the student's degree requirements. It is the student's responsibility to determine in advance of taking a class elsewhere if and how the class might count toward degree requirements.

Work transferred to Vanderbilt from another institution will not carry with it a grade point average. No course in which a grade below C- was received, or which was taken on a Pass/Fail basis, will be credited toward a degree. Credit will not be awarded for independent study, physical education, or dance performance courses. Any questions of credit for previous work done at another institution must be settled in advance of the student's first registration.

Students enrolled during a regular (fall or spring) semester cannot take additional courses elsewhere that overlap with any portion of the Vanderbilt semester. This includes online courses as well as courses offered by nearby institutions.

A&S: A maximum of two courses may be taken elsewhere for transfer credit during summers and winters post matriculation. Students cannot transfer credit for summer or winter work from outside of the country of their permanent home address.

Blair: Transfer credit does not fulfill core music requirements.

Engineering: During compressed time periods such as the break between fall and spring terms or the Maymester term, no more than one course (up to four credit hours) may be taken for transfer credit in one such period.

Peabody: A maximum of 12 credit hours may be taken elsewhere for transfer credit.

Credit by Examination

In certain circumstances students may be awarded course credit by departmental examination. (This procedure is distinct from the award of credit through the College Board Advanced Placement or International Baccalaureate Examinations, taken prior to a student's first enrollment at Vanderbilt or another college.)

Students who want to earn credit by departmental examination should consult the Office of Academic Services concerning procedures. To be eligible, students must be in good standing and registered for at least 12 hours. Students must pay a fee of \$50 for the cost of administering the examination. Students do not register for the course in which they wish to pursue credit by examination.

Students must obtain the approval of the department that is to give the examination and of the instructor designated by the chair. Students may earn up to 8 hours of credit by examination in any one department, although this limitation might be raised on approval of the Administrative Committee. Students may attempt to obtain credit by examination no more than twice in one semester, no more than once in one course in one semester, and no more than twice in one course.

Credit hours and grade are awarded on the basis of the grade earned on the examination, subject to the policy of the department awarding credit. Students have the option of refusing to accept the credit hours and grade after learning the results of the examination.

Credit hours earned under this provision are added to the other credit hours of the student's registration for current term. If the resulting credit hour total, including those for any course(s) from which the student may have withdrawn after the add/drop period, is over 18-hours, additional tuition will be charged.

Degree Requirements

[Graduation Requirements](#)

[Residence Requirement](#)

[Grade Point Average Requirements](#)

[Academic Record and Degree Audit](#)

Graduation Requirements

Candidates for a degree must have completed satisfactorily all curriculum requirements, have passed all prescribed examinations, and be free of indebtedness to the university. If graduation requirements change during the time students are in school, students in Blair, Engineering, and Peabody may elect to be bound by the requirements published in the catalog in their entering year or in any ensuing catalog until their graduating year. A&S students are bound by the requirements published in the catalog of their entering year but may choose to update to the academic major requirements of a newer catalog published during their undergraduate years.

The specific course requirements and total hours required for the bachelor's degree vary with the student's major program. Detailed requirements for each college, school, or program are shown in the relevant sections of the catalog.

Residence Requirement

To earn a Vanderbilt degree, students must complete a minimum number of regular (i.e., fall or spring) semesters and a minimum number of credit hours in residence at Vanderbilt as specified by their college or school below. All colleges and schools require students to be in residence for the final two semesters. A student is considered "in residence" if the student is (a) enrolled in Vanderbilt University classes offered on campus and is physically present for classes, or (b) enrolled in at least 12 credit hours in an approved Vanderbilt study away or abroad program and is physically present for classes.

A&S: A minimum of four semesters and at least 60 credit hours, including the last 30 credit hours, must be spent in residence in the College of Arts and Science.

Blair: A minimum of four semesters and at least 63 credit hours, as well as the last 30 credit hours, must be spent in residence in the Blair School.

Engineering: Persons entering VU as first-year students: A minimum of six semesters and at least 90 credit hours must be spent in residence in Vanderbilt with a minimum of four semesters including the last two semesters spent in residence in the School of Engineering.

Persons entering VU as transfer students: A minimum of four semesters including the last two semesters and at least 63 credit hours must be spent in residence in the School of Engineering.

Peabody: Students must complete a minimum of 60 hours in residence at Vanderbilt including the final two semesters.

Grade Point Average Requirements

The minimum grade point averages required for graduation are 2.000 overall and 2.000 in each academic major. Students in the School of Engineering must also earn a minimum grade point average of 2.000 in courses taken within the School of Engineering, computer science, and data science. Blair and Peabody students majoring in teacher education must earn a minimum grade point average of 2.750 overall.

Academic Record and Degree Audit

Students are responsible for regularly monitoring their academic record in YES. An online degree audit is available on YES to all students, showing total hours earned, degree requirements completed, and those still to be met. The Degree Audit is also a useful tool for students exploring a change or addition of a major or minor through the "What-If" tool. Students should examine the audit carefully and consult with their faculty advisers. Problems or suspected errors should be discussed immediately with their Office of Academic Services. If there is a discrepancy between the Degree Audit and this catalog, the catalog prevails.

Examinations

Final Examinations

All examinations are conducted under the honor system. Students are responsible for checking the final exam schedule published each semester by the University Registrar and for verifying examination details with each of their instructors. Primary and alternate exam schedules, which allow two hours for a final exam in each course or three hours for courses in the College of Connected Computing and the School of Engineering, are listed on the University Registrar's website. The instructor may use the alternate schedule in addition to, but not instead of, the primary schedule. The College of Connected Computing and the School of Engineering do not use the alternate schedule, and their afternoon exams start at 2:00 p.m.

A take-home or oral examination, if used, should make approximately the same demand on a student's time as an in-class examination and should be conducted during the final examination period. A take-home examination must be completed by the course's examination period.

Dead Week

A&S: No examinations of any type—including quizzes, hour examinations, and portions of final examinations—are allowed during the last week of classes; papers and in-class presentations are permitted during dead week. The Administrative Committee may grant special permission to the instructor in charge of a course to give laboratory examinations during the last regular laboratory period of the last week of classes. The last week of classes is defined as the last seven calendar days preceding the end of classes. If, for example, classes end on Tuesday, then the "dead week" begins the preceding Wednesday and lasts through Tuesday. Students should notify the Dean's Office of Undergraduate Education of any violation.

Blair: The last week of classes, i.e., the last seven calendar days before the final examination period each semester, is designated as dead week. No examinations of any type, including quizzes, portions of final examinations, recitals, or ensemble performances, may be given during this time without the express written permission of the dean and notification of students at least two weeks before dead week. Violations should be reported to the dean.

Peabody: Because Peabody classes integrate theory and practice, many courses include significant semester-long group and individual projects that culminate in papers, presentations, simulations, or other activities at the end of the semester. Therefore, while instructors are discouraged from scheduling quizzes, tests, or short-term assignments for the last week of the semester, Peabody's "dead week" policy does not prohibit assignments during the week before finals.

Comprehensive Examination

A&S: Any department or interdisciplinary program may require a comprehensive examination of its major students as a condition of graduation.

Senior Re-Examination

A candidate for graduation who fails not more than one course in the final semester may be allowed one re-examination, provided the course failed prevents the student's graduation, and provided the student could pass the course by passing a re-examination. Certain courses may be excluded from re-examination. The re-examination must be requested through the Office of Academic Services in the student's home college or school, and if approved, it is given immediately after the close of the last semester of the student's senior year. A student who passes the re-examination will receive a D- in the course. The terms and administration of senior re-examination are the responsibility of the school that offers the course. For engineering students, this senior re-examination policy applies if a student fails a course in the final semester or fails a course in the penultimate semester that is not offered in the final semester, provided that failure in that one course is the only thing preventing the student's graduation.

Academic Standards-Discipline

[A&S](#)

[Blair](#)

[Engineering](#)

[Peabody](#)

A&S

The College of Arts & Science requires each student to maintain an academic record that will guide them through to graduation according to a specified schedule, usually 8 semesters of full-time coursework. Any student considered full-time who does not attain the prescribed levels of academic progress will have their record reviewed by the Administrative Committee and may be placed on probation or dismissed from the university.

Class Standing

The below requirements are applied to all students considered full-time and taking 12 to 18 credit hours in a given regular semester. The Administrative Committee determines the number of semesters necessary for each part-time student to attain sophomore, junior, or senior standing.

Sophomore Standing

A student qualifies for sophomore standing upon:

1. completion of 24 credit hours of work with a grade point average of at least 1.800
2. completion of two regular semesters (fall or spring)
3. successful completion of English 1100 if required

Junior Standing

A student qualifies for Junior standing upon:

1. completion of 54 credit hours of work with a grade point average of 1.900
2. completion of four regular semesters (fall or spring)

Senior Standing

A student qualifies for senior standing upon

1. completion of 84 credit hours of work with a grade point average of 2.000
2. completion of six regular semesters (fall or spring)

Semester Requirements

Fall and spring semesters are defined as regular semesters. Full-time students are expected to earn at least 12 credit hours each regular semester and a minimum grade point average of 1.500. Students who fall short of these levels will be placed on probation.

Students who earn fewer than 6 credit hours in a semester or who earn a semester grade point average lower than 1.000 have seriously compromised their academic standing and will be required to take a probationary leave of absence for a minimum of one regular semester.

Students who earn fewer than 9 credit hours or a grade point average lower than 1.500 in a given semester will be placed on probation. At the direction of the Administrative Committee, the student may choose 1) a probationary leave for the subsequent semester and must qualify for appropriate class standing within two semesters of return; or 2) probation with required academic support, such as committing to regular meetings with the Office of Undergraduate Education and participating in academic coaching as directed by the Administrative Committee.

Students authorized to carry fewer than 12 credit hours will be placed or continued on academic probation if their

semester grade point average falls below 1.500.

Did Not Make Class Standing

Students who fail to qualify for class standing by 6 or fewer credit hours receive the notation of "Did Not Make Standing" (DNMS) on their internal academic record. Failure to qualify for class standing across two consecutive regular semesters will result in review by the Administrative Committee. Students who fail to qualify for class standing by more than 6 credit hours are placed on probation.

Probation

Students are considered to fall short of the expected rate of progress and will be placed on probation when:

1. They pass fewer than 12 credit hours in a semester or have a semester grade point average lower than 1.500
2. They fall short of achieving sophomore, junior, or senior standing by more than 6 credits within the time allowed
3. In a summer term (Summer I and/or Summer II), they take 12 or more credit hours but pass fewer than 12 credit hours or earn a grade point average lower than 1.500
4. They earn fewer than 6 credit hours in a semester or earn a semester grade point average lower than 1.000, in which case they will be required to take a probationary leave of absence
5. They earn fewer than 9 credit hours in a semester or a semester grade point average lower than 1.500, in which case they may be offered a choice to take a probationary leave of absence or probation with required academic support
6. They are seniors who fail to maintain a cumulative grade point average of 2.000; such students must make an appointment with the Office of Undergraduate Education to ensure ability to graduate on time

Students are removed from probation after achieving minimum semester requirements (12 credit hours, semester grade point average of 1.500), or being within at least 6 credit hours of the appropriate class standing.

Probationary Leave

A student on probationary leave may not earn credit at another institution for transfer to Vanderbilt without prior authorization from the Administrative Committee. In appropriate cases the Administrative Committee may prescribe conditions that must be satisfied before the student returns from a probationary leave. Students can request to extend their leave by one additional semester through the Office of Undergraduate Education.

Dismissal

Any student who fails to meet the minimum standards of 1) academic progress, 2) overall grade point average, and/or 3) semester requirements and has already accumulated two probations, will be reviewed by the Administrative Committee and may be dismissed from the university. Students who have not been placed on probation previously but who fail to meet the above minimum standards by a wide margin will be reviewed by the Administrative Committee and may be dismissed from the university.

The internal record of a student dismissed from the university under these regulations shows the notation "Dropped Academic Deficiency."

Blair

Class Standing

Sophomore standing requires a minimum of 24 hours with a grade point average of 1.8 on a 4.0 scale. Junior standing requires a minimum of 54 hours with a grade point average of 1.9 and the successful completion of MUTH 2200 and MUTH 2200. Senior standing requires a minimum of 86 hours with a grade point average of 2.0. A student who fails to reach the appropriate class standing after two semesters is placed on academic probation.

Sudden Academic Insufficiency

Any student who fails by a wide margin to reach prescribed levels of academic achievement, either at the end of a semester or at mid-semester, is reviewed by the associate dean's office in conjunction with the academic and studio

adviser(s). If the student is not making satisfactory progress towards the degree, the student may be placed on probation or may be advised or required to take a leave of absence or advised to withdraw from the university. Appeals of such findings should be addressed to the Blair Curriculum Committee.

Academic Discipline

Students are placed on academic probation if they fail to qualify for class standing, if they fail to earn a minimum of 12 credits in a single semester, or if the grade point average (GPA) falls below 1.8 overall or 2.0 in music courses. Students whose situation places them at risk for future academic probation receive warning letters. Students placed on academic probation more than twice will be dismissed from the University.

Academic Probation and Dismissal

Students are placed on probation if they fail to meet class standing benchmarks, as noted above. Students on probation must qualify for class standing in one additional semester or risk being dropped from the university. Students are placed on academic probation: if they fail to meet class standing benchmarks; if they complete fewer than 12 hours in a fall or spring semester except in cases involving documented mitigating circumstances (illness, injury, or family emergency); or if their semester grade point averages fall below 1.8 overall or 2.0 in music. In addition, first-year students are placed on academic probation if they do not complete one writing course. Incomplete grades may adversely affect class standing or grade point averages. Students on academic probation may not transfer summer study credit, elect to take courses on a Pass/Fail basis, earn credit by departmental examination, or participate in any extracurricular performance activity. They are required to participate in a special academic advising program. Students will be placed on probation no more than twice. Students who are candidates for probation a third time will be dropped from the university.

Engineering

Academic Standing

The School of Engineering requires each student to maintain an academic record that will guide them through to graduation in a timely manner, generally eight semesters of full-time coursework. To remain in good academic standing, a student must pursue a program leading toward a degree in the School of Engineering and meet all GPA and hours earned requirements at the conclusion of each fall and spring semester. A first-year student must successfully complete at least 12 hours and earn at least a 1.8 semester GPA each semester to remain in good standing. A sophomore, junior, or senior must complete at least 12 hours and earn at least a 2.0 semester GPA each semester to remain in good standing. In addition, a student must also promote to the next academic class every two regular semesters according to the VUSE class standing / promotion standards (below) to remain in good standing.

Class Standing

School of Engineering students are promoted on the basis of cumulative GPA, hours earned, and regular semesters in residence. For the purposes of promotion, a regular semester is defined as any fall or spring term in which a student is enrolled at Vanderbilt University. Test credit and transfer credit can be used to satisfy the credit hour requirement.

VUSE Promotion Standards

Class Standing	GPA Requirement	Credit Hour Requirement	Minimum Residence Requirement
Sophomore	1.80	24 hours earned	2 regular semesters
Junior	1.90	54 hours earned	4 regular semesters
Senior	2.00	86 hours earned	6 regular semesters

Probation

Students who fail to meet the GPA, hours earned, or class standing promotion standards required to remain in good standing will be placed on academic probation. Students who are not progressing toward a degree in the School of Engineering may be placed on academic probation. Students who fail to return to good standing after a semester on probation will be continued on probation or dismissed. Students who are on probation for three semesters risk

dismissal.

A student authorized by the Associate Dean for Undergraduate Education to carry fewer than 12 hours may be placed on probation if the student's work is deemed unsatisfactory.

Students who meet all requirements to be in good standing with the exception of being slightly behind in total credit hours as needed to promote to the next class standing may receive the designation of "Did not make standing" on their internal academic record in lieu of probation at the discretion of the Administrative Committee.

Required Leave of Absence

Under certain circumstances, a student may be required to take a semester-long leave of absence from the university. Such a leave may be required for students for whom one or more of the following conditions apply:

- Failing to pass 6 or more credit hours in a semester;
- Earning a semester grade point average of 1.4 or less; or
- Failing to improve academic achievement while on probation.

Dismissal

Any student who is deemed by the Administrative Committee not to be making satisfactory progress toward a degree in engineering will be dismissed from the School of Engineering and from Vanderbilt University. Satisfactory progress includes completing required courses in a timely manner and maintaining a 2.000 GPA in all courses, in the school, and in the student's major. Causes of dismissal include:

- Failure of all courses in any semester
- Three or more semesters on probation
- Failure to promote to the next class standing after three semesters
- Failure to progress toward a degree in the School of Engineering

Dismissed students are eligible to apply for reinstatement to the School of Engineering and to Vanderbilt University after one calendar year. The reinstatement process is outlined at registrar.vanderbilt.edu/reinstatement. Students who are dismissed and later apply for reinstatement are ineligible to receive transfer credit for courses taken while dismissed.

Peabody

Academic Standing

Peabody requires each student to maintain an academic record that will guide them through to graduation in a timely manner, generally eight semesters of full-time coursework. To remain in good academic standing, a student must meet all GPA and hours earned requirements at the conclusion of each fall and spring semester. A first-year student must successfully complete at least 12 hours and earn at least a 1.8 semester GPA each semester to remain in good standing. A sophomore, junior, or senior must complete at least 12 hours and earn at least a 2.0 semester GPA each semester to remain in good standing. In addition, a student must also promote to the next academic class every two regular semesters according to the Peabody class standing / promotion standards (below) to remain in good standing.

Class Standing

Peabody students are promoted based on cumulative GPA, hours earned, and regular semesters in residence. For the purposes of promotion, a regular semester is defined as any fall or spring term in which a student is enrolled at Vanderbilt University. Test credit and transfer credit can be used to satisfy the credit hour requirement.

Peabody Promotion Standards

Class Standing	GPA Requirement	Credit Hour Requirement	Minimum Residence Requirement
Sophomore	1.80	24 hours earned	2 regular semesters
Junior	1.90	54 hours earned	4 regular semesters
Senior	2.00	84 hours earned	6 regular semesters

Probation

Students who fail to meet the GPA, hours earned, or class standing promotion standards required to remain in good standing will be placed on academic probation. Students who fail to return to good standing after a semester on probation will be continued on probation or dismissed. Students who are on probation for three semesters risk for dismissal.

Students who meet all requirements to be in good standing with the exception of being slightly behind in total credit hours as needed to promote to the next class standing may receive the designation of “Did not make standing” on their internal academic record in lieu of probation at the discretion of the Administrative Committee.

Dismissal

Any student who is deemed by the Administrative Committee not to be making satisfactory progress toward a degree will be dismissed from Peabody College and from Vanderbilt University. Satisfactory progress includes completing required courses in a timely manner and maintaining a 2.000 GPA in all courses. Causes of dismissal include:

- Failure of all courses in any semester
- Three or more semesters on probation
- Failure to promote to the next class standing after three semesters

Dismissed students are eligible to apply for reinstatement to Peabody College and to Vanderbilt University after one calendar year. The reinstatement process is outlined at registrar.vanderbilt.edu/reinstatement. Students who are dismissed and later apply for reinstatement are ineligible to receive transfer credit for courses taken while dismissed.

Enrollment Status-Changes

[Leave of Absence](#)

[Withdrawal from the University](#)

[Reinstatement](#)

Leave of Absence

A student who desires to take a leave of absence must apply through their home college/school, via the Office of Academic Services and with the deadlines and conditions noted below for each unit. Upon approval by the dean, leave may be elected for one or two regular academic terms. A maximum total of one year (two terms) of elective leave in aggregate is permitted during the undergraduate career for students in all units except A&S for which the maximum is two years. During the leave, the student's academic record and VU email remain active. However, the student cannot live on campus or use other university services beyond those open to the general public. Elective leave of absence may not be used in lieu of or to circumvent required academic or disciplinary leaves of absence or dismissal.

During the leave, registration notification regarding the following term will be emailed to the student. A student failing to register for the next term by the conclusion of the stated leave will be withdrawn from the university and must apply for reinstatement.

During the leave of absence, students cannot take courses elsewhere for transfer credit to apply to the Vanderbilt degree unless an exception is granted by the associate dean for undergraduate education in the student's home college/school. Petitions for such exceptions must be submitted at least one month before the start of the term of

leave.

If the leave of absence is for medical reasons, the student must work with Student Care Coordination in advance of the leave to discuss any available alternative academic options, review the process of taking a medical leave, discuss expectations of the student during the leave, and confirm what is required to return from a medical leave. A student who begins a medical leave after the mid-semester withdrawal deadline is required to be on leave for the following regular semester as well.

A&S: Deadlines to apply are August 15 for fall term leave and the end of the fall term for spring term leave.

Only a student in good standing may apply to transfer to Vanderbilt credit earned elsewhere while on leave of absence. Requests for leave of absence for purpose of semester study away may be allowed if the semester study-away institution is domestic to the student. Requests for leave of absence plus semester study away are not allowed if the semester study-away institution is international to the student.

Blair: Deadlines to apply are May 1 for fall term leave and December 1 for spring term leave. A student returning from leave may be required to have a performance examination during the first two weeks of the semester to determine the student's standing in the major performance area.

Engineering: Deadline to apply is the last business day before the start of the relevant term.

Peabody: Deadlines to apply are August 15 for fall term leave and the end of the fall term for spring term leave.

Withdrawal from the University

A student proposing to withdraw from the university during an academic semester must contact the Office of Academic Services of their college or school to initiate proper clearances prior to the last day of classes in that semester. If withdrawal during a term of enrollment is officially authorized, the student will receive withdrawal grades on the same basis as a student withdrawing from a particular course or courses. (See the section on Course Withdrawal under Course Enrollment and Management.)

Reinstatement

Previously enrolled undergraduates whose academic record was discontinued one time due to withdrawal, academic dismissal, or not returning from a leave of absence may apply for reinstatement through the Office of the University Registrar. In most cases, reinstatement is not granted unless there has been an intervening period of at least a year. Reinstatement is competitive, and there is no assurance that it will be granted. Blair students seeking reinstatement must readmission. Students reinstated after having been advised to withdraw or after having been dismissed are automatically on final probation. Students discontinued a second time are not eligible for reinstatement. Application deadlines for reinstatement are posted online by the Office of the University Registrar.

Study Abroad

Students may study abroad any time after their first year at Vanderbilt. Transfer students can apply to study abroad after completing their first semester at Vanderbilt. Vanderbilt's study abroad programs are open to students in good academic, financial, and disciplinary standing, with an overall grade point average of 2.700 or better, or a grade point average at this level in each of the two most recent semesters. Many programs require a higher grade point average. The student's application must also be approved by the appropriate host university, institute, or consortium.

Studying abroad during senior year requires special approval from the student's home college/school and may delay graduation.

Students must follow both the program provider's and Vanderbilt's academic requirements including meeting both

institutions' requirements for enrolling in and earning a full-time credit load. The Vanderbilt course equivalency evaluation determines the number of credits awarded, and students are required to take the equivalent of 12 or more VU credit hours during an abroad term.

While abroad a student may not retake a class that they have taken on campus or vice versa; that is, a class having the same Vanderbilt course number.

VU students are not permitted to take hybrid, multimodal, or online courses while participating in a study abroad program.

Pass/Fail cannot be elected for classes in any study abroad program.

Hours earned in VU study abroad programs and approved in advance through the VU study abroad credit portal by the appropriate department can serve to satisfy major and minor requirements as well as the residence requirement. Grades and credits for all study abroad classes show on the Vanderbilt transcript and may generate academic actions such as probation but do not count in the VU grade point average.

Grades earned while participating in a study abroad program are based on the student's performance as judged by program instructors according to the host institution's standard practices. Once reported to Vanderbilt, grades cannot be changed, except when amended via a newly issued transcript from the host institution.

Additional information and requirements are published on the website of VU Study Abroad.

A&S: AXLE credit is not awarded for study abroad courses, except for select Maymester courses. Core capacity tags may be awarded for eligible study abroad credit, and courses taken abroad that carry equivalent VU credit may be eligible for the LA (World Language) tag.

Blair: Five Vanderbilt study abroad programs are coordinated with the degree programs in music: the IES programs in Milan, Italy; Vienna, Austria; and in Amsterdam, The Netherlands; the DIS program at the Royal Danish Academy of Music in Copenhagen, Denmark, and the IFSA/Butler program at the University of Sydney and Sydney Conservatorium of Music in Sydney, Australia. These programs include provisions for lesson and ensemble credits, contingent upon audition and admission to the program. These will count towards the Blair music core and are covered at least in part by regular tuition and fees, although students are responsible for any instrument rental fees they accrue. All programs also allow for a range of liberal arts and elective credits. Further information can be obtained from the Vanderbilt Global Education Office, Suite 103, Student Life Center, or vanderbilt.edu/geo, and from Blair's associate dean.

Blair students may also elect any of the Vanderbilt-approved study abroad programs; see descriptions under "Study Abroad" in the front chapters of the catalog. Blair students in these programs have typically enrolled in music electives, courses in the liberal arts core, and course work toward minors and second majors. Students in these programs typically arrange alternative performance or composition instruction, and those fees are usually not covered by tuition. It should be noted that if a program has been approved by Vanderbilt students must enroll in the program via the Global Education Office. In no case, after matriculating at Vanderbilt, may a student apply to participate in a program for transfer credit through a different university, or through an external agency, and then seek to transfer that credit into Vanderbilt. Any student studying abroad must register with Vanderbilt's global travel office.

Engineering: No study abroad is permitted in the senior year.

[Advising](#)

[Public Lectures](#)

The College of Arts and Science sits at the heart of Vanderbilt University. As the oldest, largest, and most academically diverse of all the schools, A&S touches practically every corner of the university and reaches all undergraduate students throughout their time here.

For more than 150 years, the College of Arts and Science has developed scholars and visionaries who explore and innovate within and across disciplines. The college is home to natural sciences, social sciences, and humanities, from Chemistry to Economics to History. With 34 academic units and more than 100 majors and minors, students in A&S have countless opportunities to develop deep knowledge and expertise within a given discipline, as well as the breadth of exposure to different fields needed to put that expertise to work in new, exciting, and impactful ways.

Because of the academic breadth within the college, we are inherently interdisciplinary. Our faculty find unexpected connections across disciplines in their research, incorporate a range of perspectives and approaches in their teaching, and encourage students to explore issues through various lenses. As a result, students leave A&S with extraordinary preparation to understand the complexities of the challenges facing our world today, and how to address them.

The academic experience in the College of Arts and Science is exactly what college should be: an intellectual environment where you can explore everything you're curious about, interested in, and fascinated by. Through the College Core curriculum, students learn fundamental skills that teach them how to think, analyze, and communicate effectively, preparing them to succeed as professionals and as citizens. Through their major(s), students develop a depth of knowledge that prepares them for their chosen career path. And through their electives, students explore areas of interest and passion that they might not otherwise be exposed to. Students are encouraged to be curious, collaborative, and open-minded as they explore new ideas, perspectives, and fields. Throughout their time in the College of Arts and Science, students work closely with world-renowned faculty who are deeply dedicated to their teaching, research, and creative expression.

At A&S, the urge to cross boundaries and forge unexpected connections is at our core. And more often than not, we find that those intersections create something far greater than the sum of their parts.

Because when art and science come together, *anything* is possible.

Faculty and Students

The College of Arts and Science derives its strength from the range of its academic offerings, from the quality of the faculty who teach, and from the talented students who eagerly come to learn. The College of Arts and Science has more than 600 full-time professors who are as engaged in the classroom as they are with their accomplished research, creativity, and writing. Many faculty members hold awards for distinguished scholarship and have received the highest recognitions for their work. They include Pulitzer Prize winners, MacArthur Fellows, Fulbright Scholars, Guggenheim Fellows, Carnegie Fellows, and members of the National Academy of Sciences, American Academy of Arts and Sciences, National Academy of Medicine, American Philosophical Society, and American Mathematical Society.

Our alumni pursue a wide range of careers in which they achieve extraordinary accomplishments, including a Nobel Laureate and a Nobel Prize in Chemistry.

The quality of the college's faculty is matched by that of its diverse student body. With close to 4,000 undergraduates, the student body represents all 50 U.S. states and 79 countries and is fairly evenly split between men and women.

Academic Support

The Writing Studio / Tutoring Services

The Writing Studio provides undergraduate students the opportunity to meet with trained writing consultants to discuss individual writing concerns, from invention to drafting to revision. The Writing Studio provides a space for students to discuss work-in-progress with expert writers, to create their own writing, and to utilize available resources for improving both writing and critical thinking skills.

The mission of the Vanderbilt Writing Studio is to enhance student writing and writing instruction, and to encourage regular conversation about the writing process. The Writing Studio's extensive programming includes individual consultations, creative writing groups, workshops focused on specific issues in academic writing, open- mike readings, and student-run writers' support groups.

The Writing Studio is located at 1801 Edgehill Avenue, Suite 112, and there is a satellite location in 217 Commons Center convenient to the first-year residence halls. The Writing Studio website can be accessed at <https://www.vanderbilt.edu/writing/>.

One-on-one tutoring in many subjects is available through Tutoring Services, also located at 1801 Edgehill Avenue. Consultations in the Writing Studio and in Tutoring Services are free to all undergraduates.

Computers

Access to computers in the College of Arts and Science is extensive and available at locations across campus. The following locations are available for walk-in use of computers and software:

Vanderbilt Center for Languages (Furman Hall 001)

Stevenson computer lab and lounge (Stevenson Center 2200)

Wilson computer lab (Wilson Hall 120)

All of the college's computer labs and classrooms offer a wide variety of "courseware" and commercial "productivity software," including word processing packages. Color printing and scanners are available in most of the labs. In addition to accessing software on the local servers, students may connect to both campus services and the internet, including e-resources in the libraries, as well as course materials in Brightspace. While use of the above facilities is free, printing is charged per page.

The computer classrooms in the Vanderbilt Center for Languages and Wilson Hall are available for walk-in use during the late afternoon and evening hours. Stevenson Center lab and lounge are card-accessible weeknights until 1:00 a.m. All lab hours are posted by semester at In addition to the college facilities, a few "kiosk" systems are available in the Sarratt Student Center.

Most Vanderbilt students own a personal computer. Since all students also have a high-speed network connection, it is convenient for students to have their own system (please consult the ResNet guidelines for supported systems). However, most students will find that the college computing facilities provide all of the computing resources needed succeed at Vanderbilt.

Advising

All A&S students have access to dedicated advisers that help them craft a personal academic pathway that best suits their interests and needs.

Entering first-year students are assigned pre-major advisers, who work closely with students during their freshmen and sophomore years. Pre-major advisers are specially trained to help students move efficiently through the requirements of the A&S College Core (for students entering in Fall 2025 and beyond) and of AXLE (for student who entered prior to Fall 2025).

Once a student declares a major before the end of their sophomore year, they are assigned a faculty adviser in their major department or program. These major advisers provide guidance and counseling within the specified field of study and sometimes also teach and conduct research with their advisees.

Students are encouraged to see their advisers at any time; they must, however, consult their pre-major adviser three times during the first year: during summer before the fall semester, prior to the opening of enrollment windows for the spring semester, and prior to the opening of enrollment windows for the fall semester of their second year. Prior to their first semester, entering first-year students must consult in June with their pre-major adviser who will assist with course selections for registration for the fall and begin to understand each student's interests and goals. (This initial contact is typically via phone and/or email.)

Advisers talk through any challenges students may have, although their chief function is academic counseling. In addition, several members of the A&S Office of Academic Services can counsel students and refer them to both academic and non-academic resources.

Public Lectures

THE BERRY LECTURES. Established in 1988 through the generosity of Kendall and Allen Berry, John and Shirley Lachs, Steve Turner, and Jim Burke. Three annual lectures—the Berry lecture, the Steve Turner lecture, and the Jim Burke lecture—are given by distinguished philosophers.

THE LOUIS JACOB BIRCHER LECTURE IN CHEMISTRY. Established in 1976 in recognition of Professor Bircher's forty-one years of service to Vanderbilt beginning in 1921. He served as the sole professor of physical chemistry until 1954, was chair of the Department of Chemistry from 1955 to 1961, and retired as professor emeritus in 1962. Family, colleagues, students, and friends of Professor Bircher have provided generous support for the series. The lecture is presented by a leading physical chemist.

THE BYRN HISTORY LECTURE. Established in 1986 and endowed by the late J. W. Byrn of Dickson, Tennessee, a student and admirer of the thought of the British historian Arnold Toynbee. Annual lectures deal with his fields of interest: world history, philosophy of history, and historiography.

THE FREDERICK LEROY CONOVER MEMORIAL LECTURE. First given in 1977 in honor of Vanderbilt's first analytical chemist. Professor Conover came to Vanderbilt in 1923 and remained for thirty-seven years. Lectures given by a distinguished analytical chemist are supported by family, colleagues, students, and friends of Professor Conover.

THE WALTER CLYDE CURRY SHAKESPEARE LECTURE. Inaugurated in 1982 and funded by one of his former students, this lectureship honors the late Walter Clyde Curry, distinguished medieval and Renaissance scholar, author of books on Chaucer, Shakespeare, and Milton, and for forty years beloved professor of English at Vanderbilt. Bringing to campus in alternate years eminent Shakespearean scholars and experienced Shakespearean performers, the lectureship gratefully recognizes Professor Curry's devoted service and lasting contributions to the university.

THE WAITE PHILIP FISHEL LECTURE. Established in 1974 as a tribute to Professor Fishel, who was known as an outstanding, popular teacher and was renowned for his research in metallurgy. Through the generosity of family, colleagues, students, and friends, the lecture is presented by a leading inorganic chemist.

THE HARRY C. HOWARD JR. LECTURESHIP. Established in 1994 at the Robert Penn Warren Center for the Humanities in honor of Harry C. Howard Jr. (B.A. 1951). The lectureship was endowed by Mr. and Mrs. Thomas Nash Jr. and Mr. and Mrs. George Renfro, all of Asheville, North Carolina, in honor of their longtime friend and attorney. The lectureship allows the Warren Center to bring an outstanding scholar to Vanderbilt annually to deliver a lecture on a significant topic in the humanities.

THE ARTHUR WILLIAM INGERSOLL MEMORIAL LECTURE. Established in 1973 to honor Arthur Ingersoll, professor of organic chemistry at Vanderbilt until his death in 1969. Each year contributions for this lecture are received from family, colleagues, students, and friends. A leading organic chemist is invited to present the lecture.

THE CARL K. SEYFERT LECTURE IN ASTRONOMY. Established in 1983 as part of the astronomy program's commemoration of the thirtieth anniversary of the Arthur J. Dyer Observatory. The lectureship recognizes the untiring efforts and contributions to astronomy made by Carl K. Seyfert, professor of astronomy and first director of the Dyer Observatory. A distinguished astronomer is invited to present this lecture every third year.

THE SHANKS LECTURES. Established in 1984 and named for E. Baylis Shanks and Olivia H. Shanks in honor of their accomplishments in the fields of mathematics and education and in recognition of their loyalty and service to Vanderbilt University, these lectures are presented on two successive days in the fall of each year. A special committee from the Department of Mathematics, influenced by the professional interests of Professor and Mrs. Shanks, chooses the lecturers from mathematicians of the highest reputation. The topics of the lectureship vary from year to year according to the area of specialization of the speaker chosen. The lectures have been endowed by

members of the family of Olivia and Baylis Shanks.

THE FRANCIS G. SLACK LECTURES IN PHYSICS. Established in 1977 by the Department of Physics and Astronomy in honor of Francis G. Slack, former Landon C. Garland professor of physics and chair of the department, these lectures recognize his many contributions to physics. The series was first partially endowed by his colleagues and students and then with the generous help of Professor Slack. Each speaker gives one lecture of general interest to the university and one more specialized lecture for the department.

THE DAVID STEINE LECTURE. Established in 1978 as a memorial to David Steine, professor of business administration in the Department of Economics and Business Administration, by members of his family, friends, and associates. The lecture is devoted to an economic problem of interest to the general public.

THE GERTRUDE VANDERBILT AND HAROLD S. VANDERBILT VISITING WRITERS PROGRAM. Established in the Department of English in 1958 under the generous sponsorship of the late Mrs. Vanderbilt, this program has annually presented readings and public lectures by a poet, a novelist, and a critic—each of whom also visits classes and meets informally with members of the university and Nashville communities. Recent participants have included Dannie Abse, Madison Smartt Bell, Ellen Gilchrist, Alison Lurie, Czeslaw Milosz, Wyatt Prunty, Ann Thwaite, Anthony Thwaite, and Helen Vendler.

Bachelor of Arts / Bachelor of Science

The bachelor of arts degree or bachelor of science degree is granted upon successful completion of the following five requirements:

1. At least 120 semester hours of creditable college work,
2. A final grade point average of at least 2.000,
3. Completion of the A&S College CORE requirements for students entering Fall 2025 and later, or completion of AXLE requirements for students who entered before Fall 2025,
4. Completion of one of the options listed under Area of Concentration,
5. Completion of at least 102 credit hours of course work within the College of Arts and Science, or a minimum of 90 credit hours for those students with a second major outside the College of Arts and Science.

Limitation on Credit Hours outside the College

Candidates for a bachelor's degree must successfully complete a minimum of 102 credit hours within the College of Arts and Science. Students who are completing an approved second major from one of the other schools within Vanderbilt are required to complete 90 credit hours within the College of Arts and Science.

Students who double major will choose which degree (Bachelor of Arts or Bachelor of Science) appears on their diploma when they declare their second major.

A&S College Core (for students entering Fall 2025 and later)

Beginning in the Fall 2025 term, all incoming A&S students will take the College Core. This innovative and flexible curriculum is the foundation for undergraduate study, centered on exploration and integrative learning. Students will gain a firm grounding in the arts and sciences, providing a meaningful educational experience and developing skills that will prepare them for life-long success.

Through the College Core, students will develop five Core Capacities:

1. **Written & Creative Expression:** communicating effectively and confidently across various formats
2. **Systemic & Structural Reasoning:** analyzing complex systems, from molecules to traffic patterns to societal groups
3. **Cultural & Interpretive Investigation:** understanding the wide range of values, histories, and cultures that make up the human record
4. **Data Literacy & Computational Thinking:** evaluating and employing varied types of evidence, using scientific methods and quantitative reasoning
5. **Ethical & Social Engagement:** examining power, justice, and responsibility through diverse perspectives

Students gain these capacities through a thoughtful selection of courses offered across the humanities, social sciences, and natural sciences.

The College Core curriculum is comprised of the following elements:

- **Core Courses.** All first-year students take two First-Year Core seminars: CORE 1010: Being Human (in the fall), and CORE 1020: Science, Technology & Values (in the spring). These courses introduce the five Capacities and offer the richness and breadth of an art + science education.
- **Exploratory Core electives.** Then students take two Exploratory Core electives, designed to address complex, multi-faceted problems and open up new areas of study.
- **Capacity Courses.** Students will also take five Capacity Courses, offered across the college, that provide breadth.
- **World Language and Inquiry Lab course.** Finally, students will need to complete one World Language course, to foster understanding of new cultures and outlooks, and one Inquiry Lab, to learn how to design, conduct, and analyze research. Inquiry Labs are offered in all divisions of the college, not just in the sciences.

Upon graduation, students in the College of Arts and Science will receive a bachelor of arts or bachelor of science degree upon completion of the other four requirements in addition to the College Core: fulfillment of requirements for one major, a 2.000 grade point average in the major, 120 cumulative earned credit hours, and a 2.000 grade

point average overall.

AXLE: Achieving eXcellence in Liberal Education (For students who entered before Fall 2025)

What Is AXLE?

AXLE is the acronym for Achieving eXcellence in Liberal Education. It is the core curriculum that students who entered the College of Arts and Science prior to Fall 2025 must fulfill. The AXLE curriculum is flexible and very user-friendly. It consists of two parts: the Writing Requirement and the Liberal Arts Requirement.

The Writing Requirement has four segments: completion of English 1100 or demonstration of basic skills in English composition; completion of a First-Year Writing Seminar; completion of a writing course (indicated by a “W”) no later than the fourth semester in residence; and completion of a second writing course (indicated by a “W”) or an approved course in oral communication (CMST 2100, 2110, or 2120).

The Liberal Arts Requirement is composed of a total of thirteen courses taken at Vanderbilt, and distributed across six categories. The First-Year Writing Seminar and all writing courses, and approved Oral Communication courses are also counted in the thirteen-course Liberal Arts Requirement.

1. The Writing Requirement (three to four courses)
 - a. English Composition ENGL 1100 (appropriate test score or one course)
 - b. First-Year Writing Seminar (one course)
 - c. a W course before the end of the fourth semester (one course)
 - d. a second W course or approved Oral Communication course (one course)
2. The Liberal Arts Requirement (13 courses)
 - a. HCA — Humanities and the Creative Arts (three courses)
 - b. INT — International Cultures (three courses)
 - c. US — History and Culture of the United States (one course)
 - d. MNS — Mathematics and Natural Sciences (three courses)
 - e. SBS — Social and Behavioral Sciences (two courses)
 - f. P — Perspectives (one course)

All students must also complete requirements for at least one major (between 27 and 48 credit hours of course work) and earn a minimum number of 120 earned credit hours in order to graduate.

The First-Year Writing Seminar

All first-year students who matriculated prior to Fall 2025 must have completed a First-Year Writing Seminar. (First-Year Writing Seminars in the College of Arts and Science are numbered 1111.) Students are permitted to enroll in only one First-Year Writing Seminar per semester. All First-Year Writing Seminars also count in their appropriate distribution areas within the Liberal Arts Requirement, but a second seminar will not count toward the writing requirement. Students who transfer into the College of Arts and Science (whether from another school at Vanderbilt or from another college or university) do not complete a First-Year Writing Seminar. Students beyond their second semester in residence may not register for First-Year Writing Seminars, nor may First-Year Writing Seminars be repeated after completion of the second semester in residence.

The Writing Requirement

Excellent communication skills, including the ability to articulate ideas and defend positions in writing, will be paramount for the 21st-century graduates of Vanderbilt University; therefore, all students in the College of Arts and Science must successfully complete the Writing Requirement.

- a. All students must demonstrate competence in English composition. Appropriate skills in composition are essential to successful progress at the Competence is demonstrated by completion of ENGL 1100 or any of the following test-based or transfer-credit satisfiers:
 - i. SAT: Combined score of at least 1220 on the Writing and Critical Reasoning sections, with a minimum score of 500 on each (test taken prior to March 2016).
 - ii. SAT: Score of at least 660 on the Evidence-Based Reading and Writing section.

- iii. ACT: Score of at least 30 on the English portion (beginning October 2016).
- iv. AP: Minimum score of 4 on the English Language or English Literature exam.
- v. IB: Minimum score of 6 on the Higher level English
- vi. Transfer credit for English 1100
- vii. Transfer credit for English 1210W, 1220W, 1230W, 1250W, 1260W, 1270W, or 1300W. (If used to satisfy the English composition requirement, the transfer credit does NOT also count as the W course required to achieve junior standing).
- b. First-Year Writing Seminar (see above).
- c. All students must successfully complete at least one Arts and Science writing course (indicated by a “W”) at Vanderbilt University, regardless of AP or IB credits, SAT scores, or ACT scores earned prior to matriculation. The 1000-level writing-intensive courses emphasize general writing skills within the context of discipline-specific subject matter. The 2000 and higher-level writing-intensive courses foster advanced, discipline-specific writing skills. Departments or programs that offer these courses determine their specific writing. In 2000 or higher-level W courses, continued attention to the process of writing is included in the classroom. Students receive regular feedback on their writing that will contribute toward enhancing writing skills appropriate to specific disciplines. The process of revising written work allows students to reflect on the writing process; writing tutorials may also be included. All students are required to complete a W course (other than ENGL 1100 or a First-Year Writing Seminar) **no later than the fourth semester**. All Arts and Science W courses also count in their appropriate distribution areas within the Liberal Arts Requirement.
- d. All students must successfully complete either a second Arts and Science W course (other than ENGL 1100 or a First-Year Writing Seminar), or an approved course in oral communication (CMST 2100, 2110, 2120) at Vanderbilt University, regardless of AP or IB credits, SAT scores, or ACT scores earned prior to Oral communication courses focus on developing improved public speaking skills. These courses introduce students to the principles and practices of public discourse and reasoned argument. Attention to the process of effective oral communication is integral to these classes. Students receive regular speaking assignments throughout the semester and regular feedback to enhance effective speaking skills. **All students must complete Part d of the Writing Requirement before graduation.**

The Liberal Arts Requirement

The Liberal Arts Requirement consists of successful completion of thirteen courses from the College of Arts and Science. Most courses in the College of Arts and Science fulfill one of these Liberal Arts requirements. Courses must carry three or more credits to count toward the AXLE Liberal Arts Requirement. Although some courses may be appropriate to more than one requirement, each course will fulfill only one requirement. These thirteen courses must be distributed as outlined below. They must be taken from at least seven departments or subject areas.

a. Humanities and the Creative Arts — HCA (3 courses)

Courses in the humanities and the creative arts challenge students to examine their personal understanding of life and how their individual experiences overlap with those of the rest of humankind. These courses testify to the varying ways in which people think, form values, confront ambiguity, express spiritual and aesthetic yearnings, and grapple with moral and ethical problems. By analyzing and interpreting literary, philosophical, religious, or artistic works, students examine the foundations of human experience. By producing original artistic works in imaginative writing, studio art, theatre, film, music, and dance, students have the opportunity to connect the universal sources of human inspiration with their own creative processes.

b. International Cultures — INT (3 courses)

The study of international cultures provides students with a basis for understanding the diversity of experiences and values in our contemporary, global society. Options in this category include not only international history and cultural studies courses, but also courses in literature, cinema and media arts, the social sciences, art, music, and languages. Students may satisfy this requirement by choosing courses that focus on the history and culture of a single society or time period in human history and/or that represent a broad spectrum of different human societies and time periods.

Language courses introduce students to the language of a different culture and provide insight into that culture in ways that are not possible to achieve through detached study. At intermediate and advanced levels, students are able to explore the culture in depth, using the language itself to read, discuss, and write about its various aspects. Even at the most basic level, exposure to the language of a different culture prepares students to think and act in terms of living in a global community.

Intermediate and advanced language courses prepare students for study abroad programs, which the College of Arts and Science strongly recommends. A maximum of one course in this requirement may be satisfied through study abroad in a Vanderbilt-approved program. A summer study abroad program must earn 6 or more credit hours to satisfy this requirement.

The Global Education Office maintains a list of pre-approved programs.

Note: All students who study abroad must register their travel in advance with Vanderbilt's international security provider. Registration is completed on your behalf if you enroll in a program offered through the Global Education Office. Otherwise, information is available on the GlobalVU website: vanderbilt.edu/global.

All students must complete three courses in this category, irrespective of previous language study or proficiency in a language other than English. At least one of the three courses presented in fulfillment of this category must be a second-semester (or higher) language acquisition class taught at Vanderbilt University (or through the Duke-UVA-Vanderbilt Partnership for Less Commonly Taught Languages), unless the student successfully demonstrates proficiency in a language other than English at or above the level achieved by second-semester language acquisition classes taught at Vanderbilt University. Students may demonstrate proficiency in a number of ways: SAT Subject Test scores (French, 540; German, 470; Hebrew, 530; Italian, 540; Japanese with Listening, 440; Latin, 530; Spanish, 520); by appropriate score on proficiency tests (written and oral) administered by the Tennessee Language Center; or with AP or IB credit in a foreign language. The first semester of an introductory language acquisition class in any language a student has studied for at least two years in high school, or in which a student transfers credit from another institution, cannot be used in partial fulfillment of this requirement. Intensive elementary language courses that cover the content of two semesters in one shall count as one course toward this category.

Students who, because of special ability and achievement, are admitted to the College of Arts and Science without the normally required two years of one foreign language in high school must enroll in a foreign language course during their first semester and must remain continuously enrolled until they successfully complete a full year of one foreign language. They must complete this requirement by the end of their fourth semester in the College of Arts and Science.

c. History and Culture of the United States — US (1 course)

The study of the history and culture of the United States provides students with a basis for understanding the American experience and the shaping of American values and viewpoints within the context of an increasingly global society. Interpreting history and culture in the broadest sense, options in this category include traditional history and cultural studies courses, but also courses in literature, cinema and media arts, the social sciences, art, and music, which illuminate historical periods or cultural themes in United States history. Students may satisfy this requirement by choosing a course that focuses on the history and culture of a single social group or time period in American history and/or that represents a broad spectrum of different social groups and time periods.

d. Mathematics and Natural Sciences — MNS (3 courses, one of which must be a laboratory science)

Courses in mathematics emphasize quantitative reasoning and prepare students to describe, manipulate, and evaluate complex or abstract ideas or arguments with precision. Skills in mathematical and quantitative reasoning provide essential foundations for the study of natural and social sciences. Students are generally introduced to mathematical reasoning through the study of introductory courses in calculus or probability and statistics.

Courses in the natural sciences engage students in hypothesis-driven quantitative reasoning that helps to explain natural phenomena, the roles of testing and replication of experimental results, and the processes through which scientific hypotheses and theories are developed, modified, or abandoned in the face of more complete evidence, or integrated into more general conceptual structures. Laboratory science courses engage students in methods of

experimental testing of hypotheses and analysis of data that are the hallmarks of the natural sciences. Natural science courses prepare students to understand the complex interactions between science, technology, and society; teach students to apply scientific principles to everyday experience; and develop the capacity to distinguish between science and what masquerades as science.

e. Social and Behavioral Sciences — SBS (2 courses)

Social scientists endeavor to study human behavior at the levels of individuals, their interactions with others, their societal structures, and their social institutions. The remarkable scope represented by these disciplines extends from studying the underpinnings of brain function to the dynamics of human social groups to the structures of political and economic institutions. The methods employed by social scientists are correspondingly broad, involving approaches as varied as mapping brain activity, discovering and charting ancient cultures, identifying the societal forces that shape individual and group behavior, and using mathematics to understand economic phenomena. By studying how humans and societies function, students will learn about individual and societal diversity, growth, and change.

f. Perspectives — P (1 course)

Courses in Perspectives give significant attention to individual and cultural diversity, multicultural interactions, sexual orientation, gender, racial, ethical, and religious issues within a culture across time or between cultures, thereby extending the principles and methods associated with the liberal arts to the broader circumstances in which students live. These courses emphasize the relationship of divergent ethics and moral values to contemporary social issues and global conflicts.

The Major

All students must successfully complete a course of study leading to one of the approved major programs in the College of Arts and Science, or successfully complete an individually designed interdisciplinary major designed in consultation with College of Arts and Science faculty and approved by the Committee on Individual Programs in the College of Arts and Science.

AXLE Curriculum Course Distribution

The distribution of Arts and Science courses into AXLE categories is available in YES. Using the advanced-class-search dialog box, use the pull-down menu under “Class Attributes” to select an AXLE category.

AXLE, the Major, and the Optional Minor

Courses used to satisfy requirements of AXLE may also be used to satisfy requirements of the major or the optional minor.

Advanced Placement under AXLE

With the exception of basic English composition and the foreign language proficiency requirements, no AXLE requirement may be fulfilled with any form of advanced placement credit (AP, IB, A-level, etc.).

Transfer Credit under AXLE

Generally, only courses taken in the College of Arts and Science may be used toward AXLE; however, any college course credit earned **prior** to graduation from high school, and transfer credit earned **before** admission to Vanderbilt, may be used toward fulfilling AXLE requirements.

Area of Concentration

During the junior and senior years, much of the student’s work is concentrated in one large unit of intellectually related courses. The program of concentration may be arranged through a single major, an interdisciplinary major, or a double major. Each of the three options is described below. A triple major may be declared with the approval of the Administrative Committee.

Major Field

Under this plan, the student majors in one of the recognized fields. There shall not be fewer than 27 credit hours in the major field, but a given department may require up to 48 credit hours. Students may take more than the required number of credit hours in any major; any given department, however, may limit the total permissible credit hours in a discipline.

For graduation, a student must have achieved a grade point average of at least 2.000 in all classes taken in the major. This set of courses includes all courses a student takes in the department or program of the major and all courses a student takes outside the department or program that may count toward the major. All courses that are listed as fulfilling credit hours required for the major, as listed in the *Undergraduate Catalog*, are included in calculating the grade point average in the major.

Within the framework of these general requirements, each department has its own policies governing major work, which are published elsewhere in this catalog or otherwise available to students.

Academic programs of the College of Arts and Science are varied and broad in scope, with majors offered in the following fields:

African American and Diaspora Studies	History of Art and Architecture
Anthropology	Jewish Studies
Architecture and the Built Environment	Integrated Biology
Art	Latin American, Caribbean, & Latinx Studies
Asian Studies	Law, History, and Society
Biological Sciences	Mathematics
Chemistry	Medicine, Health, and Society
Cinema and Media Arts	Molecular and Cellular Biology
Classical and Mediterranean Studies	Neuroscience
Communication Studies	Philosophy
Culture, Advocacy, and Leadership	Physics
Earth and Environmental Sciences	Political Science
Economics	Psychology
Economics and History	Public Policy
English	Religious Studies
Environmental Sociology	Russian Studies
European Studies	Sociology
French	Spanish
Gender and Sexuality Studies	Spanish and Portuguese
German Studies	Theatre
History	

Declaration of the Area of Concentration

Students may formally declare a major at any time during the third semester of residence and must do so no later than the Friday before Spring Break of the fourth semester. The student selects a department or interdisciplinary program and contacts that department or program for assignment to an adviser. Students who wish to develop an individually designed interdisciplinary program apply to the associate dean who chairs the Committee on Individual Programs.

Each fall a program is arranged that provides for consultation of sophomores with department chairs, for the purpose of helping students select a major. Sophomore students who have not declared a major should participate in this program if they intend to attain junior standing before the next spring.

Students should declare their intention to pursue specific majors by completing forms available in the A&S Office of Academic Services as well as the various departmental and program offices. Departments and programs assign advisers to students who declare majors in their respective areas. Students have the responsibility to know and satisfy all requirements for majors that they intend to complete. When the student's major has been registered, access to the student's academic record is transferred from the pre-major adviser to the new major adviser, with whom they should work closely.

Students may not add a major(s) past the fifth class-day of the first semester of the senior year.

Individually Designed Interdisciplinary Majors

This plan permits students to contract for an individually designed program of concentration consisting of at least 48 credit hours of approved work. The program is constructed around a coherent academic purpose and may draw together the academic resources of a number of departments and schools. The program's purpose may include topical, period, or area studies, and must be consistent with the philosophy underlying a liberal arts education (see the "A Community of Interdisciplinary Learning" section of this catalog). The program should not be designed with a focus on pre-professional training (e.g., pre-business, pre-law, or pre-medicine). The student may be required to achieve a standard of proficiency in appropriately related areas such as foreign languages or mathematics in addition to the 48 credit hours constituting the program of concentration.

Each student must identify a major adviser who will offer advice and guidance. The major adviser must be a professor or full-time senior lecturer in the College of Arts and Science.

The student's plan for an individually designed interdisciplinary major is a statement of required courses. Furthermore, because of the nature of interdisciplinary majors, all courses that have previously been included in the student's plan are considered to be part of the major discipline. The student must achieve at least a 2.000 grade point average in all courses that are (or have been) part of the plan.

Normally, no more than three introductory-level courses will be counted toward the interdisciplinary major.

Students may not add a major(s) past the fifth class day of the first semester of the senior year.

Double and Triple Majors

This program permits a student to concentrate in two or three fields, which may or may not be intellectually related. With approval of the departments concerned, the student completes all of the requirements stipulated for the majors. Triple majors require approval of the Administrative Committee.

Each A&S major must include at least 24 credit hours that are being counted solely toward the major. This rule also applies to students who combine (in a double or triple major) a non-interdisciplinary major with an interdisciplinary major.

Students in the School of Engineering may use courses taken in the College of Arts & Science for relevant second majors even if those courses also fulfill a School of Engineering degree requirement.

Approved Second Majors Outside the College

All undergraduate courses, majors, and minors offered by Blair School of Music, School of Engineering, and Peabody College are approved for students in the College of Arts and Science. See the appropriate sections of the *Undergraduate Catalog* under each school for details. Arts and Science students with a second major from another Vanderbilt undergraduate school must earn a minimum of 90 credit hours in Arts and Science. Consultation with the student's Arts and Science major adviser is especially important.

For information on the College Scholars program and departmental honors, please see the section titled Honors.

The Optional Minor

A minor is a program within a recognized area of knowledge offering students more than a casual introduction to the area but less than a major in it. Although the completion of a minor is not a degree requirement, students may elect to complete the courses specified for one or more minors. A student who completes all designated courses in a minor with a grade point average of at least 2.000 will have the minor entered on the transcript at the time of graduation.

Minors may be combined with any departmental major or interdisciplinary major as long as the minor does not lead to excessive duplication of course content. For that reason, each minor must include at least 15 credit hours that are being counted solely toward the minor. Students desiring to complete a major and minor in the same department or program require permission from both the respective Director of Undergraduate Studies and the Office of Academic Services. Courses may not be taken on a P/F basis if they are offered in the department of the minor or if they are being counted toward an interdisciplinary minor (see Academic Regulations).

Minors consist of a minimum of five courses of 3 or more credit hours each. Many minors require a greater number of credit hours and specific courses. When a minor is offered in a discipline that offers a major, only those courses that count toward the major may be counted toward the minor.

Students should refer to the appropriate sections of this catalog for specific requirements. Departments and programs assign advisers to students who declare minors in their respective areas. Students have the responsibility to know and satisfy all requirements for minors that they intend to complete.

Students may not add or change a minor after the final day of classes in the second semester of their senior year.

Optional minors are offered in the following fields and interdisciplinary programs:

African American and Diaspora Studies	Economics	Museum Studies
American Studies	English	Nanoscience and Nanotechnology**
Anthropology	Environmental and Sustainability Studies	National Security
Arabic Language	European Studies	Neuroscience
Architecture and the Built Environment	French	Philosophy
Art	Gender and Sexuality Studies	Physics
Asian Studies	German Studies	Political Science
Astronomy	History	Portuguese
Biological Sciences	History of Architecture	Psychology
Brazilian Studies	Islamic Studies	Quantum Information Science and Engineering
Caribbean Studies	Italian Studies	Religious Studies
Chemistry	Japanese Language and Culture	Russian Studies
Chinese Language and Culture	Jewish Studies	Scientific Computing**
Cinema and Media Arts	Korean Language and Culture	Sociology
Communication of Science and Technology	Latin American and Latinx Studies	South Asian Language and Culture
Communication Studies	Mathematics	Spanish
Culture, Advocacy, & Leadership	Medicine, Health, and Society	Sports and Society
Data Science*	Mediterranean Archaeology	Theatre
Earth and Environmental Sciences	Mediterranean Studies	Undergraduate Business Minor^

* Administered by the four undergraduate schools

**Administered by the School of Engineering in collaboration with the College of Arts and Science

^Administered by the four undergraduate schools and the Owen Graduate School of Management

Approved Minors Outside the College

Arts and Science students are permitted to pursue a second major and/or a minor that has been approved by the faculties of the other Vanderbilt undergraduate schools: the Blair School of Music, the School of Engineering, and Peabody College of Education and Human Development. See the appropriate sections of the Undergraduate Catalog under each school for details. Minors may not be earned in the department or program of the major.

Undergraduate Research

All students have ample opportunity to participate in faculty research projects or to pursue research projects independently, both on campus and at remote sites. Such research has led to the publication of coauthored or student-authored papers and other presentations to the scholarly community. Summer and academic year research by undergraduates in all fields may be subsidized by the university or the College of Arts and Science. Students should contact the director of undergraduate studies in the field of interest for more information.

Study Abroad Programs

Vanderbilt offers study programs for all undergraduate students from Arts and Science, Blair School of Music, School of Engineering, and Peabody College to provide undergraduates immediate contact with cultures different from their own and to aid in the mastery of foreign languages. Students interested in applying for study abroad should consult their advisers to determine whether all degree requirements can be completed on schedule.

Information on all approved programs is available at vanderbilt.edu/geo or in the Study Abroad Office in Room 115, Student Life Center. The study abroad programs are described in more detail in the Special Programs for Undergraduates section of this catalog.

When choosing programs in a city for study abroad, College of Arts and Science students may only apply to the Vanderbilt-approved overseas program(s). The College only accepts credit from international schools and programs that have been approved by Vanderbilt faculty, and for which the University has a contract or agreement.

Pre-Professional Studies

Medicine

Students interested in the study of medicine should plan their undergraduate programs in consultation with the Health Professions Advisory Office. There is no formal premedical program of courses in the College of Arts and Science or elsewhere at Vanderbilt. Each student should plan a program to meet individual needs. The program should include whatever courses may be necessary to meet medical school admission requirements, all courses required for the major, all AXLE/College Core requirements, and elective options. Students may choose majors from any of the four undergraduate colleges, and may elect to pursue a double major or an interdisciplinary program of concentration.

A student who plans to apply for admission to the Vanderbilt University School of Medicine, as well as other medical schools, may choose either of the following options:

1. A student may qualify for admission with a B.A. or B.S. degree, whether completed in three years or in four. Minimum requirements for admission generally would be met by completing at least two semesters of English, four semesters of chemistry including organic, two semesters of biology, two semesters of physics, and at least one semester of calculus/math. Since prerequisites may vary across medical schools, students are urged to consult the online resource, *Medical School Admission Requirements* (MSAR) published by the American Association of Medical Schools (at aamc.org) for school-specific information.

For the Medical College Admissions Test (MCAT), it is recommended that students take one semester of biochemistry and one semester of introductory statistics. Additionally, through course work or self-directed study, students will need to be knowledgeable in basic concepts of psychology, sociology, and bioethics.

For more information, students are advised to visit the website of the Health Professions Advisory Office (vanderbilt.edu/hpao) and refer to the links for 1) "Premedical Preparation" and 2) "Threading a path through premedical expectations."

2. A student may qualify as a three-year student in the senior-in-absentia program (see Senior-in-Absentia in this catalog).

Dentistry

Students interested in pre dental studies should plan their undergraduate program in consultation with the Health Professions Advisory Office. There is no formal pre dental program of courses at Vanderbilt. Pre dental studies should include courses necessary to meet dental school admission requirements, all courses required for the major, all AXLE or CORE requirements, and elective options. Students may choose majors from any of the four undergraduate colleges. They may also elect a double major or an interdisciplinary program of concentration. A student may apply to dental school under the senior-in-absentia program (see Senior-in-Absentia in this catalog) or apply for admission after three years of college work without a degree.

Any student contemplating application to dental school should take at least two semesters of English, four semesters of chemistry including organic, two semesters of biology, two semesters of physics, and at least one semester of calculus/math. Since prerequisites may vary across dental schools, students are urged to consult the *ADEA Official Guide to Dental Schools* published by the American Association of Dental Schools.

Nursing

Students interested in developing a program that could lead to a master of science in nursing are advised to consult the Office of Admissions in the School of Nursing.

Architecture

Undergraduate students in the College of Arts and Science expecting to pursue architecture at the graduate level should consult with the Pre-Architecture Advising Program. Students should complete at least one year of analytic geometry and calculus and one year of physics. Students may select any major but would want to include courses that emphasize a broad sense of art and architectural history, including courses in studio art. Before applying to specific schools of architecture, they would develop a portfolio of creative work. Further information is available from the pre-architecture advisers: Matthew Worsnick, Department of History of Art and Architecture, and Farrar Hood Cusomato, Department of Art.

Engineering

Undergraduate students in the College of Arts and Science expecting to pursue engineering at the graduate level should normally major in a natural science or mathematics and, at a minimum, should complete two years of calculus or its equivalent, one year each of chemistry and physics, and at least an additional year of a natural science or mathematics. A minimum of one year of computer science is highly desirable. Students should seek specific information concerning admission from the engineering school of their choice as early as possible, preferably by the end of the sophomore year, to assure optimum preparation for entry into that school. Standards for admission vary, but usually a 3.00 average or better is required.

Law

Undergraduate students in the College of Arts and Science expecting to pursue a law degree consult with the Pre-Law Advising program. There is no formal program of prelaw studies at Vanderbilt. Most law schools have no specific requirements for a prelaw curriculum but place great emphasis on the development of the student's ability to read and comprehend accurately, thoroughly, and rapidly; to speak and write clearly and correctly; to think precisely; and to analyze complex situations and weigh and appraise their several elements. The development of analytical skills and of mature study habits is vital. A broad cultural background is important—since law touches life at every point, every subject in the college curriculum may bear on the lawyer's work.

Teacher Education

Details will be found in Licensure for Teaching in the Peabody College section of this catalog.

Internships

Students may earn academic credit for the work of internships in the College of Arts and Science on a Pass/Fail basis through interdisciplinary or departmental internships. Credit hours earned will not count toward major or minor requirements or toward AXLE/College Core, but will count as part of the total credit hours required for graduation. Students obtain their own placement and faculty adviser who works with them to develop a list of readings or research agenda for the internship, which must be approved by the director of internships in the College of Arts and Science (Assistant Dean Alissa Hare). The necessary forms for earning academic credit for an internship may be obtained from the A&S Office of Academic Services in Buttrick Hall, although students register for internships through their respective school. The deadline for submitting registration forms to the A&S Office of Academic Services for internship courses taken during summer term and fall semester is May 1. Students expecting to intern during the spring semester should submit registration forms by January 1.

Finding an Internship

Students searching for an internship opportunity locally or elsewhere should contact the Career Center.

Interdisciplinary Internships

INDS 3880 (fall, spring), 3884 (summer). 1 credit hour (repeatable)

Any student who is at least a sophomore and in good academic standing may earn one credit hour per semester or summer for an internship under this designation. This course may be repeated twice for a maximum of 3 credit hours exclusively on a Pass/Fail basis.

Departmental Internships

Maximum of 15 credit hours (may be taken only once)

Under this option students from any discipline may earn academic credit for internships in the departments listed below if they meet the minimum GPA requirements and have 6 credit hours of prior work in the department in which they wish to intern. Students are responsible for securing a faculty adviser for the internship and developing an academic plan of work for the internship opportunity, both of which must be approved by the director of undergraduate studies in the department in which the internship is housed. (In some instances, the DUS will serve as the faculty adviser for all internships taken in that discipline.) All internships under this designation are taken concurrently with a research and/or readings course. The latter is taken on a graded basis and may count toward requirements for a major or minor. Students should consult the director of undergraduate studies in the department of interest to obtain additional information about internships in that discipline. The following departments offer up to 15 credit hours of academic credit per semester or summer for the following courses (internship courses are offered during FALL, SPRING, and SUMMER sessions):

AADS 3880-3881. 3880: Internship Training [1-9], 3881: Internship Readings and Research [3-6].

ANTH 3880-3881. 3880: Internship Training [1-9], 3881: Internship Readings and Research [1-6].

BCB 3880-3881. 3880: Internship Training [1-9], 3881: Internship Readings and Research [1-6].

CAL 3880-3881. 3880: Internship Training [1-6], 3881: Internship Readings and Research [3-6]

CLAS 3880-3881. 3880: Internship Training [1-9], 3881: Internship Readings and Research [1-6].

CMA 3880-3881. 3880: Internship Training [1-9], 3881: Internship Readings and Research [1-6].

EES 3880-3881. 3880: Internship Training [1-9], 3881: Internship Readings and Research [3-6].

FREN 3880-3881. 3880: Internship Training in France [1], 3881: Internship Readings and Research in France [3].

GSS 3880, 3882-3883. 3880: Internship Training [1-9], 3882: Internship Readings [1-3], 3883: Internship Research [1-3].

HART 3880, 3883. 3880: Internship Training [1-9], 3883: Internship Research [1-3].

HIST 3880, 3882-3883. 3880: Internship Training [3-9], 3882: Internship Readings [3], 3883: Internship Research

[3].

JS 3880, 3883. 3880: Internship Training [1-3], 3883: Internship Research [3].

LAS 3880-3881. 3880: Internship Training [1-9], 3881: Internship Readings and Research [3-6].

MHS 3880-3881. 3880: Internship Training [1-9], 3881: Internship Readings and Research [1-6].

PSCI 3880, 3881. 3880: Internship Training [1-9], 3881: Internship Readings and Research [1-6].

PSY 3880-3881. 3880: Internship Training [1-9], 3881: Internship Readings and Research [3-6].

RUSS 3880-3881. 3880: Internship Training [1-9], 3881: Internship Readings and Research [3-6].

SOC 3880-3881. 3880: Internship Training [1-9], 3881: Internship Readings and Research [3-6].

SPAN 3880-3881. 3880: Internship Training in Spain [1], 3881: Internship Readings and Research in Spain [3].

More complete information regarding departmental internship courses may be found in the course descriptions in this catalog.

Cost of an Internship

Internships taken during the fall or spring semester will fall under the normal tuition charge unless the student falls below 12 or exceeds 18 credit hours during the semester. In both instances, the hourly tuition charge will apply with permission for an underload/overload from the appropriate academic dean. Students will be charged for internships taken during summer on the basis of the hourly tuition rate for summer school unless approved in advance to receive the internship subsidy (see the Career Center website).

Combined B.A./M.A. (4+1) Program

The College of Arts and Science offers students in certain departments and programs the opportunity to earn both a bachelor's degree and the master's degree in a shorter period of time and at less cost than is normally the case.

Exceptional students in the College of Arts and Science can obtain both degrees in an expedited period, typically within, but not less than, five years.

The usual period of study for both the bachelor's and the master's degree is six years. Through the 4+1 option, the student and her or his adviser plan a five-year program of study. It is important to note that there is no provision for obtaining both degrees in a period shorter than five years. The program is intended for selected students for whom the master's degree is sufficient preparation for their career goals, is desirable as a goal in itself, or is viewed as additional preparation before pursuing a doctorate or a professional degree.

The areas of study available for the Combined B.A./M.A. (4+1) option within Arts and Science are determined by individual departments and programs, which also determine the policies and guidelines to be followed. Students will be admitted to the Combined B.A./M.A. program only by the invitation and the approval of the department or program.

Programs of Study

The 4+1 option is currently available in the following departments and programs:

Architecture & the Built Environment

English Literature

Creative Writing

History

History of Art

Mathematics

MHS

Philosophy

Students are welcome to discuss the Combined B.A./M.A. (4+1) option with any of these departments and programs.

Admissions Overview

The Combined B.A./M.A program allows Vanderbilt University students to study for both degrees typically, but not necessarily, in the same department. Undergraduates with strong academic records may apply for admission to the program after the first semester of their junior year. Qualifying students are normally accepted into the program in the second semester of the junior year.

To apply for admission, students will first consult with the A&S Office of Academic Services, and then submit to the prospective graduate department or program a “Petition to Apply to the Combined B.A./M.A. (4+1) Degree Program” (available at as.vanderbilt.edu/academics/specialdegree/4plus1.php), a statement of purpose, a formal application to the Graduate School, a preliminary program proposal, two letters of recommendation from Vanderbilt faculty, and a current transcript. Application forms are available for download or can be completed online at vanderbilt.edu/gradschool. GRE scores or other admissions requirements may be specified by the prospective department. Admission to the 4+1 option is highly selective. An accomplished academic record, a demonstrated commitment to pursue graduate study, and a strong endorsement from Vanderbilt faculty are key elements to the successful applicant. Students will be provisionally accepted as graduate students, pending completion of all undergraduate requirements. Graduate student status will apply in the fifth year.

Advising

Prospective students should discuss with one of their advisers general information on the program and whether this program is appropriate to their long-term goals. All students are encouraged to discuss their plans and goals with their undergraduate pre-major and major adviser. Especially in cases where the intended graduate program differs from the undergraduate major, the student is further encouraged to seek advice from the advisers in the graduate program.

Curriculum

Students in a 4+1 program must satisfy all requirements for both degrees. Advanced Placement (AP) credits will often be used toward satisfying general curriculum requirements, for a maximum of 18 credit hours. The principal distinction between this program and the standard graduate program is two-fold: (1) students are allowed to take master’s courses while completing the bachelor’s degree, and (2) students are thereby enabled to complete both degrees within five years.

In order to complete the program in five years, students will be expected to complete most, if not all, of the requirements for their undergraduate degree by the end of the first semester of the senior year. Until all baccalaureate requirements are fulfilled, the student will follow College of Arts and Science undergraduate policies and procedures. It is also suggested that students begin taking graduate courses toward the master’s degree in the second semester of the senior year. Most graduate programs participating in this option have a non-thesis plan of study requiring 30 graduate credit hours in addition to the requirements for the undergraduate degree. An average load per semester as a graduate student is 9–12 credit hours.

Scholarships and Financial Aid

Students who are receiving scholarships or other forms of financial aid as a Vanderbilt undergraduate are advised that such aid applies in most cases only toward the completion of the bachelor’s degree or the first four years of their studies (which may include their taking some graduate courses during their senior year). Students wishing to pursue the 4+1 option should seek support for their fifth year of study through student loans and other financial aid.

For additional information, contact the A&S Office of Academic Services in Buttrick Hall, or consult the website as.vanderbilt.edu/academics/specialdegree/4plus1.php.

Honors in the College of Arts and Science

[Founder's Medal](#)

[Latin Honors Designation](#)

[College Scholars Program \(only available to students under AXLE\)](#)

[Departmental Honors](#)

[Dean's List](#)

[Phi Beta Kappa](#)

[Honor Societies for First-Year Students](#)

[Other Awards and Prizes](#)

Founder's Medal

The Founder's Medal, signifying first honors, was endowed by Commodore Cornelius Vanderbilt as one of his gifts to the university. The recipient is named by the Dean after consideration of faculty recommendations and overall academic achievements, as well as grade point averages of the year's highest ranking summa cum laude graduates.

Latin Honors Designation

Honors noted on diplomas and published in the Commencement program are earned as follows:

Summa Cum Laude. Students whose grade point average equals or exceeds that of the top 5 percent of the previous three years' Arts and Science graduating seniors.

Magna Cum Laude. Students whose grade point average equals or exceeds that of the next 8 percent of the previous three years' Arts and Science graduating seniors.

Cum Laude. Students whose grade point average equals or exceeds that of the next 12 percent of the previous three years' Arts and Science graduating seniors.

College Scholars Program (only available to students under AXLE)

The College Scholars Program is the honors program for the College of Arts and Science. All first-year students in the College of Arts & Science are invited to apply at the end of their first semester. Students are selected to participate in the College Scholars program based on their academic record and achievements from their first semester on campus. These students have the opportunity to pursue advanced scholarly work in honors seminars and enriched courses or independent-studies projects. The College Scholars program is open only to Arts and Science students.

College Scholars may achieve the designation "Honors in the College of Arts and Science" on their diplomas by acquiring fifteen "honors points" in the program. The honors points system encourages breadth and depth. Students accomplish these goals by taking honors seminars in several AXLE categories and by doing independent projects (independent studies, enriching courses, departmental honors research, internships, service, and creative projects). A maximum of thirteen points may be earned in honors seminars, and a minimum of two research projects must be completed to earn fifteen points. Students must earn a grade of "B" or better in classes that earn honors points. To remain in good standing in the program, students must maintain a minimum grade point average of 3.000.

Further information on the College Scholars program and honors in the College of Arts and Science may be obtained from Assistant Dean Alissa Hare.

Departmental Honors

To encourage individual development and independent study within their field, many departments and interdisciplinary programs of the College of Arts and Science offer honors programs for selected, superior candidates. Students often begin departmental honors work in the junior year, but some projects start in the senior year. To qualify for consideration, students must have (a) attained a minimum grade point average of 3.300 in all work previously taken for credit and in the major, and (b) exhibited to the department(s) and/or interdisciplinary program(s) other evidence of the student's capacity for independent study. Some departments and interdisciplinary programs require higher grade point averages in all work previously taken for credit and/or in the major. Formal admission is by the director of honors study in the A&S Office of Academic Services after nomination by the department(s) and/or interdisciplinary program(s) concerned.

Requirements to complete departmental honors vary from department to department (see descriptions in the appropriate department sections of this catalog). Candidates are required to demonstrate some degree of originality and maturity in the methods of independent investigation, analysis, and criticism, and skill in the written presentation of independent work. This standard usually requires a senior thesis but may be satisfied, in departments that have gained approval of this procedure, by a series of briefer critical papers.

Departmental honors work culminates in an examination given in the second semester of the senior year. The examination shall be both oral and written except in departments where honors students must take all courses required of standard majors in addition to those required of honors students. These departments have the option of making the examination either oral or both oral and written. The examination shall be conducted by a committee with a majority of examiners who have not participated in the candidate's honors work. Where feasible, examiners from other institutions may be included. The examination shall cover the thesis and specific fields of the independent work and may, at the discretion of the department, include all of the major work. Successful candidates are awarded honors or highest honors in their field, and this designation appears on their diplomas.

Dean's List

The Dean's List recognizes outstanding academic performance in a semester. Students are named to the Dean's List when they earn a grade point average of at least 3.500 while carrying 12 or more graded credit hours, with no temporary or missing grades in any course (credit or non-credit), and no grade of *F*. A student must be in a degree-granting school.

Phi Beta Kappa

The Alpha Chapter of Phi Beta Kappa in the state of Tennessee honors scholarly attainments in the liberal arts and sciences and annually elects seniors and juniors to membership during the spring semester.

Seniors who have completed at least 60 credit hours in the College of Arts and Science and earned a cumulative grade point average of 3.65 or higher are eligible for consideration, as are juniors who have completed at least 70 credit hours at Vanderbilt with a cumulative grade point average of at least 3.90. For calculating credit hours and judging residence requirements, the chapter treats foreign study programs in the same manner as does the College of Arts and Science.

Attainment of the minimum required grade point average does not guarantee election. Membership in Phi Beta Kappa is based on a demonstration of scholarly achievements, broad cultural interests, and high moral character. The scholarly work must emphasize liberal rather than applied or professional studies. As a guideline, for seniors at least 90 credit hours must qualify as liberal. Grades earned in applied (vocational) or professional course work are not counted in computing the grade point average. The breadth of a candidate's program, as shown by the number and variety of courses taken outside the major, is also considered.

Phi Beta Kappa has long emphasized the importance of mathematics and foreign language in a liberal education. In keeping with this tradition, the chapter considers only those students who have demonstrated proficiency in these areas. Proficiency in reading, writing, and speaking a foreign language is typically demonstrated by passing a course in a language at an intermediate level (i.e. 2201 or above). Courses must be taken on a graded rather than a P/F basis. The foreign language requirement may be satisfied with College Board SAT Subject, Advanced Placement, International Baccalaureate, or Tennessee Language Center test scores.

Mathematics proficiency may be demonstrated by completing two semesters of calculus or one semester of calculus and one semester of statistics. Courses must be taken on a graded rather than a P/F basis. The mathematics requirement may be satisfied with Advanced Placement, International Baccalaureate, or A-Level exam credit, but not College Board SAT Subject test scores.

In no event may the total number of persons elected from any senior class exceed 10 percent of the class, and from any junior class exceed six persons. Eligible juniors who are not elected are reconsidered for membership in their senior year.

Refer to the chapter website phibetakappa.digitallab.library.vanderbilt.edu.

Honor Societies for First-Year Students

First-year students who earn a grade point average of 3.500 or better for their first semester are eligible for membership in the Vanderbilt chapters of Phi Eta Sigma and Alpha Lambda Delta.

Other Awards and Prizes

MORRIS H. BERNSTEIN JR. PRIZE IN LATIN DECLAMATION. Established in 1983 by William H. Bernstein (B.A. 1983) in memory of his father (B.A. 1943, M.D. 1946). Awarded after a competition, open to any undergraduate who has studied two semesters of Latin, in which participants deliver from memory Latin passages selected to reflect classical ideals.

FOUNDER'S MEDAL FOR ORATORY. Awarded to the senior who has demonstrated the highest standard in public speaking.

FRENCH GOVERNMENT PRIZES. Awarded for excellence in French studies.

EDWIN S. GARDNER MEMORIAL PRIZE FOR EXCELLENCE IN FRENCH. Awarded to a graduating senior who majored in French.

ALEXANDER HEARD AWARD. Presented annually to the outstanding senior political science major.

RICHARD J. LARSEN AWARD FOR ACHIEVEMENT IN UNDERGRADUATE MATHEMATICS. Established in 2005 to honor the commitment to undergraduate education of Richard J. Larsen, member of the faculty from 1970 to 2005. Presented each spring to the senior math major judged by the faculty to have excelled in all aspects of undergraduate mathematics.

AVERY LEISERSON AWARD. Presented for the best research paper or essay written by an undergraduate in a political science course.

MERRILL MOORE AWARD. Endowed in 1961 by Mrs. Merrill Moore, Squantum, Massachusetts, in memory of her husband. Presented to a graduating senior or a student entering the junior or senior class, selected by the Department of English on the basis of "literary promise and the psychological or practical usefulness of the award" to the student.

DANA W. NANCE PRIZE FOR EXCELLENCE IN A PREMEDICAL CURRICULUM. Endowed in 1985 by the family and friends of Dana W. Nance (B.A. 1925, M.D. 1929). Awarded annually to a student who has demonstrated the perseverance to succeed in a premedical curriculum and who embodies the attributes of a caring physician.

JUM C. NUNNALLY AWARD. Established in 1987 in memory of this professor of psychology from 1960 to 1982. Presented to a graduating senior in the honors program of the Department of Psychology for the best research project.

DONALD E. PEARSON AWARD. Presented annually to a graduating senior in chemistry adjudged the most distinguished in undergraduate research in chemistry.

PHI BETA KAPPA FRESHMAN SEMINAR AWARD. Awarded annually to students who have done outstanding creative work in freshman seminars.

AWARD FOR OUTSTANDING RESEARCH IN MOLECULAR BIOLOGY. Presented to a senior in molecular biology for outstanding research performed as part of the major program in molecular biology.

OUTSTANDING SENIOR IN CHEMISTRY AWARD. Presented annually to that graduating senior in chemistry who, in the opinion of the faculty of the Department of Chemistry, shows most promise of an outstanding career.

HENRY LEE SWINT PRIZE. Awarded since 1978 for the best essay in history.

STANLEY AND ANN T. TARBELL PRIZE IN ORGANIC CHEMISTRY. Awarded annually to a graduating senior who has excelled in organic chemistry by earning the highest grades in courses or performing outstanding research in organic chemistry.

UNDERWOOD MEMORIAL AWARD. Endowed in 1961 by the late Newton Underwood in memory of his father, Judge Emory Marvin Underwood, long-time member of the Board of Trust. The cash award is given to the most deserving and most promising graduating senior or graduate student in physics.

SUSAN FORD WILTSHIRE PRIZE. Cosponsored by the Gender and Sexuality Studies program and the Women's Faculty Organization, this award is given annually for the best undergraduate essay that deals with gender issues.

KATHARINE B. WOODWARD PRIZE. Awarded since 1943 and endowed in 1962 by Miss Katharine B. Woodward, Class of 1919, for excellence in Spanish studies.

MARGARET STONEWALL WOOLDRIDGE HAMBLET AWARD. Endowed in 1983 by Clement H. Hamblet in memory of his late wife, who began her art studies at Peabody College. The award is given to a graduating student of outstanding merit in studio art to enable the pursuit of his or her creative development through one year of extensive travel and further studies in studio art.

College of Arts and Science Courses

Explanation of Course Numbers and Symbols **1000-level courses** are introductory courses primarily taken by freshmen and sophomores.

2000- and higher-level courses are intermediate- or advanced-level courses which typically require some prerequisite. They are primarily intended for sophomores, juniors, and seniors.

Hours are semester hours—e.g., a three-hour course carries credit of three semester hours.

Bracketed figures indicate semester hours credit, e.g., [3].

First-Year Writing Seminars are numbered 1111.

W symbols used in course numbers designate courses in the College of Arts and Science that will meet the AXLE writing requirement.

The AXLE designation in parentheses in each course description indicates which AXLE requirement pertains. For example, (HCA) indicates credit for Humanities and the Creative Arts in AXLE. The designation (No AXLE credit) indicates the course does not satisfy an AXLE degree requirement.

The university reserves the right to change the arrangement or content of courses, to change the texts and other materials used, or to cancel any course on the basis of insufficient enrollment or for any other reason.

It is the responsibility of each student to avoid duplication, in whole or in part, of the content of any courses offered toward the degree. Such duplication may result in withdrawal of credit.

Blair School of Music

Music at Vanderbilt

[Facilities](#)

[The Blair Concert Series](#)

[Blair Academy at Vanderbilt](#)

The Blair School of Music focuses on the personal and professional education of highly talented young musicians who demonstrate an exceptional capacity and motivation to shape our increasingly diverse and complex global century—through music, with music, and in music.

Our unique “Blair Experience” builds on the very foundation of methods, repertoires, and ensembles shared by the world's most competitive schools of music and conservatories but goes well beyond that, immersing students in the transformative spaces of a world-class research university committed to inclusive excellence with distinction in areas ranging from theology to science, arts to engineering, humanities to business, and education to law. Graduates of the Blair School are recognized as superior artists and scholars distinguished by their global mindsets, broad interdisciplinary competencies, and unyielding commitments to advocacy, entrepreneurship, and education.

The Blair School has been an integral part of Nashville’s musical environment since its founding in 1964 by the Justin and Valere Potter Foundation through a bequest of Valere Blair Potter. In 1981 the school was merged with Vanderbilt following the university’s decision to develop an excellent program in music. Studies leading to the professional bachelor of music in performance were initiated in 1986.

The Bachelor of Music degree program includes majors in performance, composition, jazz studies, and integrated studies. The performance major is available in any orchestral instrument, piano, saxophone, euphonium, and voice. The major in composition emphasizes analytical skills as well as the development of students’ creativity. The jazz studies major offers a focus on American and non-Western music traditions while also developing the core fundamentals of Western music common to all Blair majors. The integrated studies major combines the study of composition or a performance area with an additional concentration in music and forms the basis for a five-year program in teacher education offered cooperatively with Peabody College. In the Bachelor of Musical Arts degree program, composers and performers complete an in-depth music study in addition to a field outside of music.

A non-professional 31-hour liberal arts music major makes it possible for students outside the Blair School to choose music as a second major. Students in other schools and colleges of the university also may pursue a minor in music, music composition, musicology/ethnomusicology, music technology, or music performance. And Blair offers a remarkable variety of electives for students who wish to enrich their studies with credit in music courses, ensembles, or performance instruction, or to select music as an extracurricular activity.

Blair School of Music is home to internationally known faculty soloists and ensembles, and Blair’s performers, composers, ethnomusicologists, and musicologists are among the most respected in their fields. Members of the faculty ensembles provide private performance instruction and coach chamber music ensembles and performance classes. The faculty’s dedication to teaching and a low student/faculty ratio provide students the personal attention that fosters maximum musical growth and understanding. The school is committed to its goal of developing students who are among the most articulate, culturally aware, and artistically sensitive of any graduates in the country.

Facilities

The Blair building incorporates innovative developments in acoustical design and engineering. It contains teaching studios and faculty offices, classrooms, rehearsal halls, practice rooms, library, administrative offices, technology and keyboard labs, and concert venues. The 272-seat Steve and Judy Turner Recital Hall is the locus for student recitals and concerts and master classes by faculty members and visiting artists held on a regular basis. It also houses the Dobson Organ Opus 92 (2014), designed in the tradition of eighteenth-century eastern German organs not unlike those Bach knew, with additions and accommodations for twenty-first century use. Opened in spring 2002, the 609-seat Ingram Hall garnered immediate acclaim for its superb acoustics, its visual beauty, and its enhancement of the school’s ability to host and produce orchestra, opera, and other major concert events.

The Anne Potter Wilson Music Library is a division of the Jean and Alexander Heard Libraries. The collection, begun in 1947, was moved from Peabody College to its new and permanent home at Blair in the summer of 1985. Named to honor Anne Potter Wilson by the Vanderbilt Board of Trust in 1987, the 12,000-square-foot library holds more than 116,000 books, scores, sound and video recordings, and subscriptions to journals and online music databases.

It is equipped with a seminar room, listening and viewing stations, computer workstations, and study facilities. A variety of equipment is available for check out including laptops, microphones, phone chargers, midi keyboards, headphones, and umbrellas. Music librarians and staff are available to assist users with music research and finding resources for performance, study, or instruction.

The Blair Concert Series

The Blair Concert Series offers a broad array of music performances to the university community and the region. National and international artists and ensembles, the Blair faculty, including resident ensembles and soloists, and student ensembles and performers are all featured. All student recitals are open to the public. More than 350 concerts are presented at the school each year. Ticket information can be found at Blair's website, blair.vanderbilt.edu.

A milestone in the Blair School's history was "The Blair Commissions: Music for the 21st Century," a project funded by the James Stephen Turner Family Charitable Foundation, which has commissioned several important works by renowned composers from 2005 through 2019. These include works by Susan Botti and Peter Schickele and four major works by Michael Hersch. Each composition received its premiere in Nashville, and all the works were then either recorded or performed in New York. The project has served two intertwined missions: to promote the composition of outstanding works by the world's leading composers and to invite attention to the excellent ensembles and faculty performers of Vanderbilt University.

Composers-in-residence who have visited the Blair School include Robert Beaser, William Bolcom, Susan Botti, George Crumb, Michael Daugherty, Lukas Foss, Gabriela Lena Frank, John Harbison, Michael Hersch, Karel Husa, Steven Mackey, Donald Martino, Cindy McTee, Jessie Montgomery, Kevin Puts, Christopher Rouse, Adam Schoenberg, Joseph Schwantner, Frank Ticheli, Michael Torke, and Joan Tower.

Blair Academy at Vanderbilt

Individual, group, class, and ensemble instruction for precollege and adult students (defined as students above high school age not receiving university credit) is offered through the Blair Academy at Vanderbilt. Course offerings are available at blair.vanderbilt.edu/blair-academy/.

[Music as a Second Major](#)

[Music Major \(Second Major\)](#)

The Blair School of Music welcomes all Vanderbilt students into its classes and studios. A large number of courses are designed specifically for non-majors. Many classes are held in Sarratt Cinema, Alumni Hall, and other central campus locations. Non-majors may also participate in any and all music major courses for which they are qualified.

A wide variety of music courses fulfill liberal arts core requirements for undergraduates in the College of Arts and Science, the School of Engineering, and Peabody College. Students in the School of Engineering can count up to 12 hours of MUSE, MUSO, COMP, MREP, MUTH, and performance courses, except MUSO 1001, towards liberal arts core requirements. How students in the College of Arts and Science and Peabody College may use music courses varies according to their specific degree and program requirements.

Ensembles

The Blair School of Music sponsors several major performing ensembles, including the Vanderbilt University Singers, Vanderbilt Chorale, Orchestra, Wind Symphony, Opera Theatre, and Blair Big Band. Other non-western and vernacular ensembles, such as the African Performing Ensemble and the Steel Drum/Pan Ensemble, are also available for credit. A large number of smaller ensembles and chamber music groups also exist, offering students a wide variety of experiences.

Auditions. Auditions for the major performing ensembles are held at the beginning of each semester. Audition information can be found on the Blair School of Music website. Assignment is at the discretion of the director. Students need the approval of the appropriate faculty chamber music coordinator before enrolling in chamber music; if participation has not been discussed with the coach, students may register tentatively for the “to be assigned” section of chamber music. Openings in ensemble are not guaranteed.

Credit. Students may register for course credit. Registration for zero hours may be possible with permission of the director and the associate dean.

Performance-based courses such as ensembles are not eligible for audit.

Performance

Performance instruction in individual or group settings is available for university credit for an additional fee. Private instruction is offered in all orchestral instruments and in piano, organ, guitar, saxophone, euphonium, steel drum/pan, and voice. Credit is flexible, but beginning students may register for only 1 credit hour. Students can earn either 1 or 2 credit hours each semester, depending on lesson length and number of required practice hours. Students in the School of Engineering can count up to 12 hours of performance courses towards liberal arts core requirements. For others, performance is elective credit. Group instruction is offered in piano, guitar, and percussion; groups have maximum of six students and earn 1 credit hour.

Group Performance Instruction: Non-Major

Group instruction is designed for beginning students with emphasis on basic technique, rhythm, tone, and musical interpretation. Groups are limited to six students.

Registration. New students must interview with the appropriate faculty member before finalizing registration. Instructions are given in the online registration system.

Fees. Music fees are in addition to tuition charges and are not refundable after the change period. The cost for group instruction is \$1,074 per semester for one 50-minute class weekly. (Fees, set annually by the Board of Trust, are subject to review and change without further notice.)

Individual Performance Instruction

Individual instruction is focused on the art and practice of an instrument or voice, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Blair offers collegiate-level performance instruction for non-majors at the 1100 level. 2100-, 2200-, 4100- and 4200-level courses are open only to B.Mus. and B.Mus.Arts students.

Registration. New students must interview with the appropriate faculty member before finalizing registration.

Information is available in YES. Enrollments are limited.

Credit. University students enrolled in individual instruction may earn 1 or 2 credit hours depending on lesson length and practice commitment.

- 30-minute or 45-minute lessons with 5 hours minimum weekly practice earn 1 credit
- 60-minute lessons with 10 hours minimum weekly practice earn 2 credit
- Beginners may not register for more than 1 hour of credit
- Performance Instruction courses are not eligible to audit, take pass/fail, or enroll in for zero credit

Fees. Music fees are charged in addition to regular tuition, and are not refundable after the change period.

Students receiving need-based financial aid may request that music fees be considered in their financial aid package. Students with a declared second major or minor in music will be charged approximately one-half the music performance instruction fee. For instrument courses numbered 1100, fees per semester are as follows:

	Elective Credit/Non-Blair Students	2nd majors and minors receive 50% discount
One 30-minute lesson weekly	\$1,311	\$655.50
One 45-minute lesson weekly	\$1,838	\$919
One 60-minute lesson weekly	\$2,304	\$1,152

Fees, set annually by the Board of Trust, are subject to review and change without further notice.

Music Minors

Students may elect one of five minors: music, music composition, musicology/ethnomusicology, music technology, or music performance. Formal admission to the music minor or performance minor is contingent upon a performance audition that meets departmental standards for the intermediate or advanced level of study. Following interviews with the appropriate department, students plan their studies with Blair advisers. Contact information and declaration paperwork are available online: blair.vanderbilt.edu. Students must complete all requirements for the music minors with standard grading basis (that is, not Pass/Fail).

**The music technology minor is not currently accepting applications. Students interested in applying for this minor in the future are encouraged to enroll in pre-requisite courses.*

Music Minor. 24 or 25 hours.

Music Theory. 6 or 7 hours.

MUTH 1200 and 1210 (6 hours); or MUTH 2100/2110 and MUTH 2200/2220 (7 hours)

Musicology/Ethnomusicology. 12 hours.

MUSL 2200W or 1200

One course chosen from: MUTH 3890, MUSL 1210, 1220, 1240, 3220-3240, and 3890

One course chosen from: MUSL 1100, 1105, 2110, 2120-01, 2150, 2610, 3220-3240, 3890, and 3892-01

One course chosen from: MUTH 3890 or any MUSL course

Performance. 4 hours.

Individual performance instruction in a single instrument for at least 4 semesters (any orchestral instrument, piano, organ, guitar, saxophone, euphonium, voice, or JAZZ 1100).

Students must meet minimum performance standards for admission to the program, earning a total of 4 hours. Declaration forms are available at blair.vanderbilt.edu/academics.

Ensemble. 2 hours (2 different semesters).

Participation for two semesters in an appropriate performing ensemble, after consultation with the minor adviser.

Musicology/Ethnomusicology Minor. 18 or 19 hours.

Music Theory. 6 or 7 hours.

MUTH 1200 and 1210; or MUTH 2100/2110 and MUTH 2200/2220

Musicology/Ethnomusicology. 12 hours.

MUSL 2100, MUSL 2200W*, MUSL 3100, and one course from MUSL 3220-3240 or 3890.

*Students who have completed MUSL 1200 must substitute another course for MUSL 2200W, selected from MUSL 1100, 1105, 1210, 1220, 1240, 1300, 1600, 1610, 1620, 1630, 1640, 1650, 1660, 1670, 2110, 2150, 2320, 2600, 2610, 3220-3240, 3160, or 3890.

Music Composition Minor. 26 hours.

Music Theory. 13 hours.

MUTH 2100, 2200, 2300, 2400; MUTH 2110, 2220

Musicology/Ethnomusicology. 6 hours.

MUSL 1200 or 2200W, 3100

Composition. 7 hours.

COMP 1100; COMP 1150 (4 semesters)

Formal admission into the music composition minor requires departmental approval; successful completion of COMP 1100 (Composition Workshop) is a pre-requisite to applying. Upon completion of COMP 1100, applicants may submit to the Composition Chair a portfolio of three completed works, with scores and recordings (MIDI is acceptable). The entire composition faculty will then evaluate the portfolio and make a final decision.

Music Technology Minor. 18 to 23 hours.

**The music technology minor is not currently accepting applications. Students interested in applying for this minor in the future are encouraged to enroll in pre-requisite courses.*

Music Theory and Technology, 10 or 11 hours.

MUTH 1200; MTEC 1340, 2342, 2344, 2346, 3800

Electives. 8-12 hours.

At least four courses to meet the minimum 8 hours, chose from MENT 1120, 3100, 3110; MUSL 2320, 2620; MTEC 1302, 2348, 2350; MUTH 1210, 2300, 3170, 3180, 3230; CMA 1400, 1500, 1600; HIST 1515; ME 4258.

Formal admission to the music technology minor requires departmental approval; Pre-requisites to applying include successful completion of MUTH 1200 (Survey of Music Theory), and either successful completion of MTEC 1340 (Technology for Musicians), or departmental approval to waive MTEC 1340 vi demonstration of equivalent skills. Upon meeting these requirements, applicants may submit a portfolio including three contrasting, completed tracks (mp3 format), DAW session screenshots, and a brief narrative description of the student's experience and musical aptitudes. Application portfolios can be submitted at any time throughout the year, but will only be evaluated after June 1 each year, with students being informed of the status of their acceptance by July 1.

Music Performance Minor. 25 or 26 hours.

Music Theory. 6 or 7 hours.

MUTH 1200 and 1210; or MUTH 2100/2110 and MUTH 2200/2220

Musicology/Ethnomusicology. 6 hours.

MUSL 2200W or 1200

One course chosen from MUSL 3220-3240 or 3890 (Jazz students: MUSL 1620)

Performance. 8-11 hours.

Individual instruction in a single instrument for at least 6 semesters (any orchestral instrument, piano, organ, guitar, saxophone, euphonium, or voice.) Jazz students earn 8 hours in 4 semesters of JAZZ 1100.

Students must meet minimum performance standards for admission to the program, earning a total of 8-11 hours. Repertoire information and declaration forms are available at blair.vanderbilt.edu/academics.

Ensemble. 2 hours (two different semesters).

Participation for two semesters in an appropriate performing ensemble, as assigned following audition. String, woodwind, brass, percussion, and harp students must audition for MUSE 1010, Instrumental Ensemble.

Students who are not placed in MUSE 1010 may participate in another appropriate ensemble, contingent upon permission of the ensemble instructor and the studio instructor. Guitar and voice students must audition for MUSE 1020, Vanderbilt University Singers. Keyboard students must participate as a pianist for one semester in MUSE 2300, 2310, 2320, 2330, 2210, 2230, or 2270; or in 1010, 1020, 1030, or 2120, contingent upon permission of the ensemble instructor and the piano instructor. Jazz students may choose MUSE 1310, 1320, or 1330.

Elective for Jazz students. 2-3 hours. One or two courses chosen from JAZZ 1150, 2310, 2320, 2330; MTEC 1340, 2342; MUTH 3120; MUSL 1105, 1600, 1630, 2110, 2600, 2610, 2620, 3160.

Music as a Second Major

Blair offers a non-professional liberal arts major in music that requires a minimum of 31 hours. Designed jointly by Blair and the College of Arts and Science, it is also available to Peabody and Engineering students as a second major. Formal admission to the second major is contingent upon a performance audition that meets departmental standards for the intermediate or advanced level of study. Following interviews with the appropriate performance department, students plan their studies with Blair adviser Professor Russell Platt, coordinator of the program. Contact information and declaration paperwork are available online: blair.vanderbilt.edu. Students must complete all requirements for the music as a second major with standard grading basis (that is, not Pass/Fail).

Music Major (Second Major). 31 hours.

Music Theory. 12 hours.

MUTH 2100/2110, MUTH 2200/2220, MUTH 2300/2330, and an Aural Skills Upper Division Course chosen from MUTH 2440, 2441, 2442, or 2443.

Musicology/Ethnomusicology. 9 hours.

MUSL 2100, 2200W*, 3100.

*Students who have completed MUSL 1200 must take an additional course instead of MUSL 2200W, selected from MUSL 3220-3240.

Individual Performance Instruction. 6 hours.

Six semesters of study in any orchestral instrument, piano, organ, guitar, saxophone, euphonium, voice, or jazz. Students must meet minimum performance standards for admission to the program, earning a total of 6 hours. Repertoire information and declaration forms are available in the Blair office and online at blair.vanderbilt.edu/academics.

Ensemble. 2 hours (two different semesters).

Participation for two semesters in an appropriate performing ensemble, as assigned following audition. String, woodwind, brass, percussion, and harp students must audition for MUSE 1010, Instrumental Ensemble.

Students who are not placed in MUSE 1010 may participate in another appropriate ensemble, contingent upon permission of the ensemble instructor and the studio instructor. Guitar and voice students must audition for MUSE 1020, Vanderbilt University Singers. Keyboard students must participate as a pianist for one semester in MUSE 2300, 2310, 2320, 2330, 2210, 2230, or 2270; or in 1010, 1020, 1030, or 2120, contingent upon permission of the ensemble instructor and the piano instructor. Jazz students must audition for MUSE 1310-1340.

Elective. 2-3 hours.

One course in music theory, musicology/ethnomusicology, or conducting, chosen from MUTH 2400, 3130, 3110, 3210, 3200, 3120, 3140, 3160, 3890; any MUSL; MCON 3000. Jazz students must enroll in either MUTH 3120 or MUSL 3238.

MELISSA K. ROSE, D.M.A., Dean, Blair School of Music

MICHAEL SLAYTON, D.M.A., Senior Associate Dean for Faculty Affairs

TUCKER BIDDLECOMBE, Ph.D., Associate Dean for Academic Affairs

BRIAN UTLEY, D.M.A., Assistant Dean for Academic Affairs

BRITTANY CHASE, Assistant Dean for Non-Degree Programs

ADDIE SULLIVAN, B.F.A., Associate Dean for Blair Development and Alumni Relations

MOLLY JEWELL, B.M., Director, Admissions

The Degree Programs

[Bachelor of Music](#)

[Bachelor of Musical Arts](#)

[Liberal Arts Core](#)

Bachelor of Music

The Bachelor of Music degree program includes five different majors: performance, composition, jazz studies, integrated studies, and integrated studies/teacher education. The performance major is available in any orchestral instrument, piano, saxophone, euphonium, and voice. The composition major emphasizes both the creation and analysis of music. The major in jazz studies combines performance, composition, improvisation, musicianship, analysis, music technology, entrepreneurship, and an emphasis on global music. Optional concentrations are available in collaborative arts, composition, ethnomusicology, jazz, multiple woodwinds, music and the mind, musicology, pedagogy, or music theory. The integrated studies major provides a solid foundation in the art of music and includes a required concentration in collaborative arts, composition, ethnomusicology, jazz, multiple woodwinds, musicology, pedagogy, music theory, or an individually designed area.

The integrated studies/teacher education program, a five-year curriculum jointly developed with Peabody College, is for students interested in earning the master of education degree and teacher licensure in addition to the bachelor of music degree. Students in this curriculum can earn the B.Mus. degree in four years and the M.Ed. and teacher licensure for instrumental/general or vocal/general music in the fifth year (June–May).

All bachelor of music degree candidates complete a program designed to ensure an intense, yet broadly-based, understanding of the discipline of music, focused on the skills and knowledge students will need to succeed as informed musicians of the twenty-first century. Each student must complete 126 credit hours, including 80 hours in music. The music core (44 credit hours minimum) includes music theory, aural skills, keyboard harmony, ethnomusicology/musicology, conducting, technology for musicians, pedagogy, and ensemble. Each major has additional specific requirements, including performance instruction and other music courses (to fulfill 80 hours).

Liberal arts core requirements (minimum of 30 hours) include English, the humanities, courses chosen from history or social science, mathematics or natural science, and academic electives. Students may take free electives to total 126 hours. Sample curriculum plans are in the *Blair Student Handbook* at blair.vanderbilt.edu/academics.

BRASS PERFORMANCE

MUSIC THEORY, AURAL SKILLS, AND KEYBOARD HARMONY. 19 hours

MUTH 2100, 2200, 2300, 2400

MUTH 2110, 2220, 2330, 2440

MUKH 1131, 1132, 1133, and 1134

MUSICOLOGY/ETHNOMUSICOLOGY. 12 hours

MUSL 2100, 2200W, one course chosen from 3220-3240, 3100

CONDUCTING. 2 hours

MCON 3000

TECHNOLOGY. 1 hour

MTEC 1340

ENSEMBLE. 10 hours minimum

MUSE 1010 (every semester in residence); MUSE 2210 (four semesters, 1/2 credit minimum each semester, taken both semesters of the first year, with two additional courses taken during career). MUSE 2280 may substitute for one semester of MUSE 2210 after completing two semesters of MUSE 2210. Assignment to ensembles is at the discretion of the directors. During study abroad, students may waive participation in an ensemble of choice.

INDIVIDUAL PERFORMANCE INSTRUCTION. 32 hours, 8 semesters (every semester in residence), including corresponding studio class seminar

TRPT, HORN, TROM, EUPH, or TUBA 2200; 4200

RECITAL ATTENDANCE. No credit

MUSO 1000 (every semester in residence except penultimate or final semester)

PERFORMANCE. MUSO 3970, 4970

OTHER MUSIC. MPED 3142, MREP 2110

LIBERAL ARTS. 30 hours (see full requirements below)

IMMERSION VANDERBILT.

FREE ELECTIVES. To complete 126 hours

COMPOSITION

MUSIC THEORY, AURAL SKILLS, AND KEYBOARD HARMONY. 19 hours

MUTH 2100, 2200, 2300, 2400

MUTH 2110, 2220, 2330, 2440

MUKH 1131, 1132, 1133, and 1134

MUSICOLOGY/ETHNOMUSICOLOGY. 12 hours

MUSL 2100, 2200W, one course chosen from 3220-3240, 3100

CONDUCTING. 2 hours

MCON 3000

TECHNOLOGY. 1 hour

MTEC 1340

ENSEMBLE. 8 hours minimum (every semester in residence)

Eight semesters any ensemble. Assignment to ensembles is at the discretion of the directors. During study abroad, students may waive participation in an ensemble of choice.

INDIVIDUAL PERFORMANCE INSTRUCTION. 6 hours, 6 semesters

3 semesters in any orchestral instrument, piano, organ, harpsichord, guitar, saxophone, euphonium, or voice (1100 level); 2 semesters chosen from any orchestral instrument, piano, organ, harpsichord, guitar, saxophone, euphonium, or voice or MUED 1010-1040; 1 semester chosen from any orchestral instrument, piano, organ, harpsichord, guitar, saxophone, euphonium, voice (1100 level), or JAZZ 1100.

RECITAL ATTENDANCE. No credit

MUSO 1000 (every semester in residence except penultimate or final semester)

COMPOSITION. COMP 2301-2304, 4301-4304 and corresponding studio class seminar

Students rotate instructors as assigned for COMP 2301-2304 to gain experience with 4 different members of the department. Students may select one or more instructors of choice for COMP 4301-4304.

OTHER MUSIC. MUTH 3110, MUTH 3210 or 3220, MUTH 3230, COMP 3978, 4970

MUSIC ELECTIVES. To complete minimum of 80 hours in music

LIBERAL ARTS. Must include one year of a foreign language, normally French, German, or Italian. Another language appropriate to the student's musical pursuits may be chosen with approval of composition/ theory department. Two (2) courses chosen from: 2000-level or higher art history, 2000-level or higher English, 2000-level or higher philosophy; a total of 33 hours, rather than 30, in liberal arts (see full requirements below)

IMMERSION VANDERBILT.

CONDUCTING. 2 hours

MCON 3000

TECHNOLOGY. 1 hour

MTEC 1340

ENSEMBLE. 8-10 hours (every semester in residence)

Auditions for major ensembles are required each semester until requirements are fulfilled. Assignment to ensembles is at the discretion of the directors. During study abroad, students may waive participation in an ensemble of choice.

Strings, woodwinds, brass, harp, percussion—(10 hours minimum) Eight semesters MUSE 1010 (including four semesters of MUSE 2210, 2230, or 2240, ½ credit minimum each semester, taken both semesters of the first year, with two additional courses taken during career. Double bass majors may choose MUSE 2270 instead of 2210, 2220, or 2240. MUSE 2280 may substitute for one required semester of MUSE 2210, 2220, 2230, or 2240 after completing two semesters of MUSE 2210, 2220, 2230, or 2240.

Piano—(8 hours) MUSE 2300 (one semester), 2310 (one semester), 2320 (one semester), conducted ensemble 1010, 1020, 1030, 2120, or other approved conducted choir (one semester), and choice of 1010, 1020, 1030, 1310, 2120,

2210, 2230, 2270, 2280, 2310, 2320, or 2330 (four semesters). Participation in 1010 or 1030 is contingent upon approval of ensemble conductor and piano instructor.

Voice—(8 hours) Eight semesters MUSE 1020 or 2120 as assigned (or 2330 if demonstrated schedule conflict exists); juniors or seniors cast in principal roles in MUSE 1030 (as defined by the voice faculty) may substitute MUSE 1030 for one semester only of MUSE 1020 or 2120.

Composition—(8 hours) Eight semesters of any ensemble

INDIVIDUAL PERFORMANCE or COMPOSITION (for composition students) INSTRUCTION. 2100 and 4100 level, 16 hours, 8 semesters (every semester in residence), including corresponding studio class seminar

RECITAL ATTENDANCE. No credit

MUSO 1000 (every semester in residence except penultimate or final semester)

REQUIRED CONCENTRATION IN MUSIC. 18-20 hours.

PERFORMANCE. Studio class seminar corresponding to individual performance instruction

OTHER MUSIC. 4 hours. MUSO 1201, 1400, 1410, 1420 (required for voice only); 4 hours of 1100-level performance instruction or MUED 1010- 1040 and 3 hours MUTH 3110 (required for composition only); MUSO 1130 (required for percussion only)

PEDAGOGY. 2 hours. MPED in the area of individual performance

MUSIC ELECTIVES. To complete a minimum of 80 hours in music

LIBERAL ARTS. 30 hours (see full requirements below)

IMMERSION VANDERBILT.

FREE ELECTIVES. To complete 126 hours

INTEGRATED STUDIES/TEACHER EDUCATION, INSTRUMENTAL/GENERAL

MUSIC THEORY, AURAL SKILLS, AND KEYBOARD HARMONY. 19 hours

MUTH 2100, 2200, 2300, 2400

MUTH 2110, 2220, 2330, 2440

MUKH 1131, 1132, 1133, and 1134

MUSICOLOGY/ETHNOMUSICOLOGY. 12 hours

MUSL 2100, 2200W, one course chosen from 3220-3240, 3100

CONDUCTING. 2 hours

MCON 3000

TECHNOLOGY. 1 hour

MTEC 1340

ENSEMBLE. 9 hours minimum (ensemble enrollment required every semester and every module in residence).

Six semesters conducted ensemble (chosen from MUSE 1010, 1020, or 2120) and two semesters small ensemble (recommended: MUSE 1030, 1200, 1230, 1232, 1320, 1330, 1340, 2210, 2270, 2280, 2300, 2320 and 2330) are required. Instrumental ensemble (MUSE 1010) and co-requisite chamber music (MUSE 2210) are required for instrumentalists both semesters of the first year. Instrumentalists must enroll in at least one semester of MUSE 1020 or 2120 and have experience in orchestra, wind ensemble, jazz ensemble (as appropriate), choir and chamber music. Pianists must be accepted in MUSE 1010, 1020, or 2120 by the beginning of the second semester. Assignment to ensembles is at the discretion of the directors. During study abroad, a student may waive participation in an ensemble of choice.

INDIVIDUAL PERFORMANCE or COMPOSITION INSTRUCTION. 2100 and 4100 level, 16 hours, 8 semesters (every semester in residence), including corresponding studio class seminar

RECITAL ATTENDANCE. No credit

MUSO 1000 (every semester in residence except penultimate or final semester)

COMPOSITION/THEORY. MUTH 3110

PERFORMANCE. Studio class seminar on primary instrument every semester. Secondary instrument(s) two semesters; Intro to Guitar GTR 1010. Senior Recital MUSO 4970. Composition majors only: Performance instruction in an instrument or voice, 8 semesters [8 hours]; composition majors must meet the performance department standards for instruction at the 2100 level and participation in required ensembles.

OTHER MUSIC. Instrumental Conducting MCON 3010.

Note: Conducting study must include two different professors.

MUSO 1130 (Percussion majors only)

PEDAGOGY. 2 hours. MPED in the area of individual performance

TEACHING. Class Instruments MUED 1010, 1020, 1030, 1040; Methods and Materials MUED 2010, 3010; Experiential Instruction in Music MUED 3880, 3881, 3882; One MUED seminar of choice MUED 2120-2150; Practica in Music Teaching MUED 3870, 3871, 3872.

LIBERAL ARTS. 30 hours

English/Writing: 6 hours, including MUSL 2200W and choice of AP/IB English credit, any ENGL, or any writing course (any W in the English language).

Humanities: 9 hours, including MUSL 2100 and 6 hours in humanities.

History and Social Science: 3 hours

Mathematics: 3 hours math, chosen from statistics (PSY-PC 2110) or calculus (MATH 1010, 1011, 1100, 1200, 1201, 1300, 1301).

Academic Electives: 9 hours, including EDUC 1220 and SPED 1210, which must be completed before fall of the junior year.

FREE ELECTIVES. To complete 126 hours

Bachelor of Musical Arts

The bachelor of musical arts degree gives excellent performers and composers the flexibility to combine in-depth

music study with a second focus in a field outside of music. The degree, which is available in any orchestral instrument, piano, saxophone, euphonium, voice, jazz studies, and composition, includes 63 credit hours in music; a specific field outside of music or an individually-designed area of interdisciplinary studies (minimum of 18 hours) is also required. In addition to performance or composition instruction (16 hours), the music core (44 credit hours minimum) includes music theory, aural skills, keyboard harmony, ethnomusicology/musicology, conducting, technology for musicians, pedagogy, and ensemble. Liberal arts core requirements (minimum of 30 hours) include English, the humanities, courses chosen from history or social science, mathematics or natural science, and academic electives. Students may take free electives to total 126 hours.

Through a dual B.Mus.Arts/MBA program, interested students in the musical arts degree have an opportunity to compress both the bachelor of musical arts at the Blair School of Music and the master of business administration at the Owen Graduate School of Management into ten semesters in residence. Application for this program is made early in the fall semester of the junior year. First-year students will be admitted to the B.Mus.Arts through the admissions process of the Blair School. Students must declare the concentration within music or the field outside of music of the B.Mus.Arts no later than the tenth day of the first semester of the junior year. Sample curriculum plans are in the *Blair Student Handbook* at blair.vanderbilt.edu/academics.

Bachelor of Musical Arts Degree Requirements

TECHNOLOGY. 1 hour

MTEC 1340

ENSEMBLE. 8-10 hours (every semester in residence)

Auditions for major ensembles are required each semester until requirements are fulfilled. Assignment to ensembles is at the discretion of the directors. During study abroad, students may waive participation in an ensemble of choice.

Strings, woodwinds, brass, harp, percussion—(10 hours minimum) Seven semesters MUSE 1010 while in residence; four semesters of MUSE 2210, 2220, or 2240, ½ credit minimum each semester, taken both semesters of the first year, with two additional courses taken during career; and one semester ensemble of choice. Double bass majors may choose MUSE 2270 instead of 2210, 2220, or 2240. MUSE 2280 may substitute for one required semester of MUSE 2210, 2220, or 2240 after completing two semesters of MUSE 2210, 2220, 2240. Double bass majors may substitute MUSE 2280 for one required semester of MUSE 2210, 2230, or 2270.

Piano—(8 hours) One semester chosen from MUSE 1010, 1020, 1030, 2120, or other approved conducted choir; one semester of 2300; three semesters of 2210, 2230, 2310, 2320, or 2330; three semesters ensemble of choice with adviser's approval.

Voice—(8 hours) Eight semesters MUSE 1020 or 2120 as assigned (or 2330 if demonstrated schedule conflict exists); juniors or seniors cast in principal roles in MUSE 1030 (as defined by the voice faculty) may substitute MUSE 1030 for one semester only of MUSE 1020 or 2120.

Composition—(8 hours) Eight any ensemble.

Jazz Studies - (8 hours) Five semesters chosen from MUSE 1310, MUSE 1320, or MUSE 1330; three semesters ensemble of choice with adviser's approval.

INDIVIDUAL PERFORMANCE or COMPOSITION (for composition students) INSTRUCTION. 16 hours, 8 semesters (every semester in residence)

RECITAL ATTENDANCE. No credit

MUSO 1000 (every semester in residence except penultimate or final semester)

PERFORMANCE. Studio class seminar on primary instrument every semester

PEDAGOGY. 2 hours. MPED in the area of individual performance; MUED 2140 for jazz studies.

OTHER MUSIC. 4 hours. MUSO 1201, 1400, 1410, 1420 (required for voice only); 4 hours of 1100-level performance instruction or MUED 1010-1040 and 3 hours MUTH 3110 (required for composition only); MUSO 1130 (required for percussion only); 3 hours from JAZZ 1210, 1220, 1230, 1150, or MUTH 3120 (required for jazz studies only); 2 hours of VOIC 1100, one in each of the first two semesters in residence (required for jazz studies voice only)

MUSIC ELECTIVES. To complete a minimum of 63 hours in music.

DISCRETE AREA OF COMPETENCE. Minimum of 18 hours in a specific field outside of music, such as a minor or major in another school, a pre-professional course of study, or a self-designed interdisciplinary area. Self-designed interdisciplinary areas and new concentrations with a significant number of courses from another Vanderbilt school/college may be developed in consultation with the appropriate department. Must be declared no later than the 10th day of the first semester of the junior year.

LIBERAL ARTS. 30 hours (see full requirements below)

IMMERSION VANDERBILT.

FREE ELECTIVES. To complete 126 hours

Liberal Arts Core

The liberal arts core affords music students the opportunity to develop a broad-based understanding of intellectual endeavors and methods in a variety of disciplines, to explore the interconnectedness of music, arts, and other humanistic pursuits, and to articulate their thinking in clear and effective language. The curriculum, which provides maximum flexibility for each student, requires a minimum of 30 hours (33 hours for composition majors), satisfied through required categories as noted below. Students electing a second major outside of music complete only the Blair liberal arts core; they are not expected to fulfill the core requirements (such as AXLE) of another Vanderbilt school or college. Hours earned toward the Blair liberal arts core may also be counted toward a second major or minor, if appropriate. Students admitted with a deficiency relative to high school credits must plan their liberal arts work to overcome the deficiency. 1001 courses do not count for liberal arts core credit.

English/writing (6 hours)

Students must complete writing course MUSL 2200W during the first year. A second English/writing course* of at least three credit hours, chosen from:

- Advanced Placement or International Baccalaureate credits in English/ Writing (consult the chapter on Admission for current policy)
- Writing courses in the English language in any discipline, designated by W in the course
- English: all courses
- Communication Studies: 1500

*Students with a score of 770 on the Evidence-Based Reading and Writing section of the SAT with a minimum score of 39 in Writing and Language, or with a score of 35 on the English portion of the ACT, may exempt the second English/writing course, substituting 3 hours of any academic elective. Students who do not present a score of 660 on the Evidence-Based Reading and Writing section of the SAT test (with a score of 27 in Reading and 28 in Writing and Language), or a score of 30 on the English portion of the ACT test, enrollment in ENGL 1100 in the first semester is strongly recommended.

Humanities (9 hours)

HUMANITIES REQUIREMENTS

MUSL 2100. Students should complete this required course during the first year.

Six additional hours of humanities electives (listed below)

For composition majors (B.Mus.), 15 hours minimum, including MUSL 2100: one year of French, German, or Italian; and 6 hours chosen from 2000-level or higher art history, 2000-level or higher English, and 2000-level or higher philosophy.

For voice performance majors (B.Mus.), 9 hours: MUSL 2100 and 6 hours (two semesters) chosen from French, German, and Italian.

HUMANITIES ELECTIVES

African American and Diaspora Studies: 1506 and all HCA-designated courses

Anthropology: All HCA-designated courses

Arabic: All courses

Aramaic and Classical Syriac: All courses

Asian Studies: 1201, 2100W, 2511, 2512, 2513W, 2607, 2608, 3151

Catalan: All courses

Chinese: All courses

Cinema and Media Arts: All courses except W courses

Classics: All, except SBS-designated courses

English: All courses

European Studies: All HCA-designated courses

French: All courses

Gender and Sexuality Studies: All HCA- and US-designated courses, 2239, 2248

German: All courses

Greek: All courses

Hebrew: All courses

Hindi-Urdu: All courses

History of Art: All courses (art studio courses excluded)
Humanities: All courses
Italian: All courses
Japanese: All courses
Jewish Studies: All HCA- and US-designated courses
Korean: All courses
Latin: All courses
Medicine, Health, and Society: All HCA-designated courses
Musicology/Ethnomusicology: 1300, 1610, 3155
Philosophy: All courses except 1003 and 3003
Portuguese: All courses
Religious Studies or Divinity School: All courses
Russian: All courses
Spanish: All courses
Theatre: All courses offered for AXLE credit
Tibetan: All courses
Ugaritic: All courses

History, Social Science (3 hours)

HISTORY

Classics: Only SBS designated courses
History: All courses
Musicology/Ethnomusicology: 2110, 2150, 2600

SOCIAL SCIENCE

African American and Diaspora Studies: All courses except 1506 and HCA-designated
American Studies: 2100, 3890
Anthropology: All courses except HCA designated
Asian Studies: All courses except HCA designated
Communication Studies: All AXLE courses except HCA designated
Economics: All courses offered for AXLE credit
European Studies: All courses except HCA designated
Gender and Sexuality Studies: All courses except HCA and US designated
Human and Organizational Development (Peabody): All 3-hour courses except 1115 and practica
Interdisciplinary Studies: 3001
Jewish Studies: All SBS-, INT-, and P-designated courses
Latin American Studies: All AXLE courses

Medicine, Health, and Society: All SBS-, INT-, and P-designated courses

Musicology/Ethnomusicology: 2110, 2150, 2600

Political Science: All courses

Psychology (A&S): All courses except MNS-designated

Psychology and Human Development (Peabody): All 3-hour courses from 1205-3800 inclusive

Public Policy Studies: All courses

Sociology: All courses

Mathematics, Natural Science (3 hours)

Students who score below 550 on the SAT Math Section or below 22 on ACT Math should take MATH 1010 or 1005. For integrated studies/teacher education majors, 3 hours statistics (PSY-PC 2110 [Peabody]) or calculus (MATH 1010, 1011, 1100, 1200, 1201, 1300, 1301).

MATHEMATICS

Computer Science: CS 2212

Mathematics: All courses

Philosophy: 1003 and 3003

Political Science: PSCI 2259

Psychology (Peabody): PSY-PC 2110

NATURAL SCIENCE

Astronomy: All MNS-designated courses, including accompanying labs

Biochemistry & Chemical Biology: All courses designated for AXLE credit, with accompanying labs

Biological Sciences: All AXLE courses, with corequisite labs

Chemistry: All AXLE courses, with corequisite labs

Earth and Environmental Sciences: All MNS-designated courses

Neuroscience: All MNS-designated courses

Physics: All MNS-designated courses, including accompanying labs

Psychology: All MNS-designated courses

Academic Electives (9 hours)

For composition majors (B.Mus.), 2-6 hours, to complete 33 hours in liberal arts.

For integrated studies/teacher education majors, a total of 9 hours, including specifically EDUC 1220 (3 hours) and SPED 1210 (3 hours). For voice performance majors (B.Mus.), 5-9 hours to total 30 hours in liberal arts.

Academic electives, drawn from courses earning 3 or more credits, may include:

- Any course listed in the Liberal Arts Core
- Non-music courses in American studies, business (BUSA), computer science, data science, engineering science, human and organizational development
- Any course in the Divinity School

Practicums and internships may not count as academic electives.

Free electives (sufficient to complete 126 hours)

Any course in any Vanderbilt school.

Note: MWEL courses and MUSO 1240 and 1241 count only as free electives for Blair majors.

Blair-Specific Regulations

Internships

The Career Center assists students interested in internship opportunities in the music industry and elsewhere; there are opportunities in many states of the U.S. and also abroad, both during the academic year and in the summer. A student serving as an intern may register for MENT 3880, 3881, or 3882 as a corollary if credit is desired. Students with summer internships that require an academic component must register for credit. A maximum of 6 hours of internship credit may be counted toward the degree. Students are responsible for finding a faculty sponsor; a written study plan must be approved by the faculty sponsor and the Blair associate dean no later than the tenth day of classes. Internship paperwork is available on the Quali workflow website at registrar.vanderbilt.edu/workflow.

Performance Instruction: B. Mus. and B. Mus. Arts Degrees

Fees. Performance instruction fees are waived for B.Mus. and B.Mus.Arts students. A one-time music technology fee is charged to each first-year student.

Elective credit. B.Mus. and B.Mus.Arts students taking a second instrument normally enroll in 1100-level performance instruction for 1 or 2 hours elective credit. Consent of the instructor is required. B.Mus. and B.Mus.Arts students who have declared a minor instrument also register for performance instruction at the 1100 level; consent of the instructor and notification of the Blair Office of Academic Services are required.

Composition Majors. Students register for performance instruction at the 1100 level. A minimum of 6 semesters of study totaling 6 credit hours is required.

Integrated Studies Majors, Integrated Studies/Teacher Education Majors, Jazz Studies Majors, and B.Mus.Arts students. First-year students and sophomores register for 2100-level performance instruction in their primary area. Juniors and seniors register for 4100-level performance instruction in their primary area. A minimum of 8 semesters totaling 16 credit hours required; performance instruction required every semester in residence.

Performance Majors. First-year students and sophomores register for 2200-level performance instruction in their primary area. Juniors and seniors register for 4200-level instruction in their primary area. A minimum of 8 semesters totaling 32 hours (instrumental performance majors) or 28 hours (vocal performance majors) required; performance instruction required every semester in residence.

Upper Divisional Hearing

Requirements for performance majors include an upper divisional hearing in the sophomore year to determine continuance in the performance degree program and permit subsequent enrollment in upper division study at the 4200 level. Students are required to perform a program of twenty to thirty minutes for a faculty committee convened by the studio instructor or by the department chair. The committee will normally consist of the student's studio teacher and at least two additional members of the department. Memorization is required as appropriate, and where called for, collaboration with piano is expected.

The student must consult with the studio instructor regarding appropriate repertoire. Instrumental selections must be chosen from the solo repertoire and should represent diverse historical periods. Percussionists must perform on keyboard percussion, timpani, and snare drum and/or multiple percussion. String repertoire must include solo Bach.

Pianists must perform a 30-minute memorized program of solo piano literature representing at least three style periods. Vocal repertoire must include a minimum of five songs of contrasting periods and styles, using three languages (Italian, English, and either French or German).

Failure to pass this hearing demonstrates a lack of the requisite skills to graduate in performance at the Blair School, necessitating transfer to another degree program. A student may petition the faculty once for a second hearing, with entirely different repertoire, to take place before the end of the first semester of the junior year

Pre-Recital Hearing

All students (excepting composition) giving required recitals and any student who wishes to give a recital in the Blair building must pass a hearing, held at least three weeks before the recital. After establishing a recital date, the student, with guidance from the studio instructor, will assemble a recital hearing committee, consisting of two additional faculty members, one of whom must be from outside the student's performing area. For integrated studies/teacher education students, the committee will normally consist of the studio instructor, a teacher education faculty member, and at least one additional faculty member. For non-required, non-credit recitals, the hearing committee may be from within the department. For any recital involving a student's second performing medium, the student must seek approval from the studio instructor and area coordinator of the secondary and primary performing areas; in addition, a full-time faculty member from the secondary performing area must be part of the hearing committee. The student must notify the recital hearing committee, in writing, of the hearing date, recital date, time, and place. Senior composition recitals are screened in advance at the department level.

For a required junior or senior recital, the repertoire will normally encompass three major style periods, as appropriate to the medium; at least one work in a contemporary idiom will be included in either the junior or senior recital. For teacher education students, a conducting component must be included on the required senior recital. For jazz studies students, an original composition or arrangement must be included on the required senior recital. A required senior recital must also include written or spoken program notes, visual media, or other audience engagement component, with the approval of the studio instructor. The hearing committee should hear all of the recital repertoire. Grading of the hearing is on a Pass/Fail basis, with written faculty comments. If a student fails the hearing, another must be scheduled. Only two recital hearings in one semester are permitted.

For students also choosing the senior recital to fulfill Immersion Vanderbilt, the recital program and audience engagement component should be a deeper, more intensive project that integrates classroom knowledge with experience. The student will work with the project's primary Immersion adviser (usually the studio teacher) to develop a plan relevant to the student's recital. While there are no specific requirements, examples may be found in the Blair Student Handbook. The student's Immersion adviser will ultimately decide if the plan fulfills the Immersion Vanderbilt project.

Recital and Recital Committee

For recitals given for credit, the recital committee is the same as the hearing committee whenever possible. The final grade is a composite of those of at least two committee members, including the studio instructor, with the studio instructor's grade valued at two thirds of the total. Copies of committee member's grades are kept by the instructor. Recitals not given for credit are not graded; they involve a hearing committee but not a recital committee.

Recital Attendance

Each semester in residence, students (except graduating seniors in their penultimate or final semester) are required to register for MUSO 1000 and attend weekly student recitals/convocations and a minimum of six Blair faculty or professional concerts or their community equivalents as described on the syllabus. Students must fulfill both aspects of the requirement to pass each semester. The course receives zero credit hours but is graded on a Pass/Fail basis and listed on students' transcripts. A temporary final grade will not be granted except in the case of documented medical emergency.

Students must register their attendance at each recital. Two absences from Friday afternoon recitals are permitted each semester. Under extraordinary circumstances, make-up assignments can be obtained from the recital

attendance coordinator with the permission of the associate dean. Students must plan and keep up with their concert attendance. Except for weekly student recitals, performances in which students are participants do not fulfill the attendance requirement for the performer. Deadline for completion of all work is listed on the course syllabus for MUSO 1000. The first failure would result in the loss of the senior penultimate or final semester exemption. Additional failure(s) would require students to enroll for additional semester(s) until the seven required semesters are passed.

Extracurricular Performance

Students must be in good standing and have the consent of their private instructors in order to participate in any extracurricular performance activities, including in-school collaboration, that are not required by a student's degree program or honor scholarship.

Additional Programs in the Blair School of Music

[Minor Areas and Concentrations](#)

[Teacher Education](#)

[Blair-to-Owen](#)

Minor Area and Concentration Requirements

Concentrations and the minor in a second instrument are open to bachelor of music and bachelor of musical arts degree students. Honors in Musicology and Ethnomusicology is open to all undergraduates. Deadline to declare a concentration or minor is the fifth day of the first semester of the senior year. For the integrated studies major, the deadline to declare a required concentration is the midpoint (on the last day students may withdraw from classes) of the fifth semester in residence.

CONCENTRATION IN COLLABORATIVE ARTS. 24 hours

Musicology/Ethnomusicology: MUSL 3220 or 3221

Performance: HRPS 1100 (1 hour), MUSO 4970 (1 hour)

Other Music: MUSO 1400, 1410, 1420; MREP 3310 or 3311, 3330; MUSO 3850 (2 hours in vocal coaching or chamber music literature)

Ensemble: One semester chosen from MUSE 1010, 1020, or 2120; one semester of MUSE 2300; one semester of MUSE 1030 (as apprentice pianist); one semester each of MUSE 2210, 2230, 2310, 2320, and 2330; and four

additional semesters of MUSE 2210, 2230, 2310, 2320, 2330, or other with adviser's approval

Liberal Arts: Must include one semester each in two different languages chosen from Italian, German (GER 1105 is recommended), or French. Students with previous study in one of these must study the other two.

CONCENTRATION IN COMPOSITION. 20 hours minimum

Prerequisite: COMP 1100; submission of portfolio of three representative works, with recordings; department approval. Composition: 4-6 hours over a minimum of 4 semesters in COMP 1150

Choice of four from MUTH 3110, 3120, 3130, 3140, 3170, 3200, 3210, 3220, 3222

Choice of two (6-7 hours) from ARTS, CMA, ENGL 1250W, ENGL 1290, HART 1105 or higher, THTR

CONCENTRATION IN ETHNOMUSICOLOGY. 20 hours minimum

Department approval required

Musicology/Ethnomusicology: Choice of MUSL 3000-level or above, except MUSL 3100, 9-12 hours

Composition/Theory: Choice of MUTH 3140, MUTH 3200, or 3210, 2-6 hours

Cognate Area or Foreign Language, 6-16 hours:

1. Cognate area in AADS, AMER, ANTH, CMA, EUS, GSS, HIST, LAS, PHIL, SOC, or other area with department approval, 6-9 hours, or
2. Foreign Language, 6-16 hours, 4 semesters:
 - Introductory-level competence, or one-year may be satisfied through placement exam, AP/IB credit, or for-credit course work. Students who test out of introductory-level competence need only 2 semesters (minimum 6 hours) of 2000-level or above, 6-8 hours, 2 semesters.
 - 2000-level or above language and/or culture courses, 6-8 hours, 2 semesters.

CONCENTRATION IN JAZZ. 20 hours minimum

Department approval required for admission into the concentration. B.Mus. and B.Mus.Arts students are eligible to audition for a faculty committee no earlier than the end of their first year.

Literature/History: MUSL 1620

Composition/Theory: MUTH 3120; JAZZ 1150

Other Course Work: JAZZ 1210, 1220, or 1230 (2 semesters, 2 hours); MUED 2140

Performance: JAZZ 1100 (minimum of 4 semesters/4 credit hours); MUSO 4972 (in addition to recital required for major) or MUSO 3850 Senior Project (1 hour)

Ensemble: MUSE 1310, 1320, or 1330 (minimum of 4 semesters/credit hours)

CONCENTRATION IN MULTIPLE WOODWINDS. 23 hours

Department audition, consisting of performances on both secondary instruments, required before the end of the second semester in residence. Not available to performance majors. Three-, four-, and five-instrument options are possible.

Composition/Theory: MUTH 3110

Performance: 1100-level study in at least two secondary instruments, 4 semesters and 8 credit hours for each instrument; MUSO 4970, with repertoire for both primary and secondary instruments; corequisite performance classes required when enrolled in applied study; each secondary instrument must be performed in a large ensemble for at least one semester (instead of primary instrument)

Other Music: MPED 3140 in primary instrument, recommended in secondary instrument(s); MREP 2140 in primary instrument

CONCENTRATION IN MUSIC AND THE MIND. 23 hours

This concentration satisfies the area of discrete competence for the bachelor of musical arts. By using free and

academic electives, this concentration could be completed in addition to a minor in neuroscience or psychology.

It is also available to B.Mus. students, but it will not satisfy the music hours requirement for integrated studies.

Liberal Arts: NSC 2201, PSY 1200, PSY 3750, PSY 3120, NSC 3269, PSY 3890, PSY-PC 3650 (PSY-PC 2110 recommended, NSC 3274 optional)

Aural Skills: MUTH 3450, MUTH 3460

CONCENTRATION IN MUSICOLOGY. 20 hours minimum

Department approval required

Musicology/Ethnomusicology: Choice of MUSL 3000-level or above, except MUSL 3100, 9-12 hours

Composition/Theory: Choice of MUTH 3140, MUTH 3200, or 3210, 3-6 hours

Cognate Area or Foreign Language, 6-16 hours:

- Cognate area in AADS, AMER, ANTH, CMA, EUS, GSS, HIST, LAS, PHIL, SOC, or other area with department approval, 6-9 hours, or
- Foreign Language, 6-16 hours, 4 semesters:
 - Introductory-level competence, or one-year May be satisfied through placement exam, AP/IB credit, or for-credit course work. Students who test out of introductory-level competence need only 2 semesters (minimum 6 hours) of 2000-level or above, 6-8 hours, 2 semesters.
 - 2000-level or above language and/or culture courses, 6-8 hours, 2 semesters

CONCENTRATION IN PEDAGOGY. 18-20 hours

Music Cognition course work: MUSO 3100 or MUSO 3850 (independent study in teaching Aural Skills, 2 hours)

Instrumental Literature: Choice of MREP 2110, 2120, 2121, 2130, 2140, 2141, 3310, 3311, 3330, or MUSO 3850 (in field, 1-2 hours, 1 semester)

Pedagogy course work: Choice of MPED 3110, 3120, 3121, 3125, 3127, 3128, 3129, 3130, 3140, 3142, 3144 or MUSO 3850 (in field, 2 hours), and Pedagogy Practicum MPED 3870 (2 hours)

Pedagogy Internship: MPED 3880 (2 semesters, 6 hours)

Senior Recital: MUSO 4970

Liberal Arts: Must include PSY-PC 1250 and 2600 (Peabody courses)

CONCENTRATION IN MUSIC THEORY. 18-20 hours

Departmental approval required for admission to this concentration.

Composition/Theory: MUTH 3200, MUTH 3210 or 3220, and minimum of 13-15 hours in COMP 1100 and/or any 3000-level MUTH courses

HONORS IN MUSICOLOGY AND ETHNOMUSICOLOGY. 9 hours

Departmental approval required for admission to this program; see regulations in the Honors section of the catalog.

Thesis: Departmental approval of a formal thesis prospectus, MUSL 4998-4999 (6 hours), and successful completion of an oral defense.

Course work: One course beyond the MUSL core chosen from MUSL 3220-3240, 3160, 2610, or 3890 (3 hours)

The MUSL credit hours of this program may double-count in the concentration in musicology or ethnomusicology.

MINOR INSTRUMENT. 10 hours

Ensemble: Participation on minor instrument (including voice) in two separate ensembles in addition to major instrument requirement, as assigned (2 hours)

Performance: Minimum of four semesters (8 hours) in a second performance area (any orchestral instrument, piano, organ, harpsichord, guitar, saxophone, euphonium, voice, or baroque instrument). Students must meet minimum performance standards, earning a total of 8 hours.

Consent of instructor and department chair required. NOTE: Composition majors may satisfy the primary major ensemble and performance instruction requirements with courses also used to fulfill the minor instrument requirements.

Teacher Education

The Blair School and Peabody College offer a program for students interested in teacher licensure. Students completing this program earn the bachelor of music (B.Mus.) majoring in the integrated studies/teacher education track for four years, and the master of education (M.Ed.) in the fifth year to complete professional education requirements. During the junior year, application is made to Peabody College. The M.Ed. work requires one calendar year, June–May. Students may elect to work toward licensure in either instrumental/general or vocal/general music, based on their interest and ability to perform at a level sufficient for placement in the appropriate performing ensemble. The curriculum includes a strong music performance emphasis; a solid foundation in musicology/ethnomusicology, theory, and the liberal arts; undergraduate and graduate courses in psychology and education; and practica (practical experience) four of the five years of study, with at least 15 weeks of student teaching in field placements. Practica constitute a wide variety of grade K-12 experiences, including public school, private school, and Blair Academy programs such as Suzuki strings, Blair Children's Chorus program, and the Nashville Youth Orchestra program. Students complete the same music core requirements as any other B.Mus. candidate. The liberal arts core is adapted to fulfill state licensure requirements.

Junior Mid-Program Review [Screening I]

All students admitted to this program at matriculation must be formally continued through a process called Junior Mid-Program Review. Criteria for this review are listed below. Students not approved can complete the general integrated studies major.

Faculty evaluation of a student's qualifications for continuation in a teacher education program includes academic, performance, and disposition factors such as the following:

1. Dependability (as evidenced by good attendance and academic performance in classes and practica)
2. Professional and ethical behavior (honesty, acceptance of responsibility, emotional maturity)
3. Attitude and interpersonal skills (including the ability to work with children and with peers)
4. Academic competence

Specific Criteria

1. A minimum cumulative grade point average of 2.500.
2. Successful completion (C- or better) of EDUC 1220 and SPED 1210
3. Successful completion (C- or better) of MUTH 2200, MUTH 2220, MUSL 2200W and MUED 3870
4. Successful completion (C- or better) of two additional Vanderbilt courses which count towards the Liberal Arts
5. Departmental interview

General Criteria

These criteria rest on the professional judgment of appropriate faculty members, who are polled following the student's application for Junior Mid-Program Review.

1. Endorsement by the appropriate faculty that the applicant has demonstrated the academic and musical qualifications expected of Vanderbilt teacher education
2. Endorsement by the appropriate faculty that the applicant has demonstrated the personal and character traits expected of Vanderbilt teacher education

Procedure for Junior Mid-Program Review [Screening I]

Students apply for continuation in the teacher education program [Screening I] through the Blair program director. Applications must be submitted in the fall semester of the junior year. Deadline for submitting applications for Junior Mid-Program Review [Screening I] is 1 October. A departmental interview is then held with each candidate to review the student's academic progress and disposition criteria of dependability, professional and ethical behavior, attitude, and interpersonal skills.

Fifth Year Curriculum

SUMMER		Semester hours
EDUC 6510	Principles of ELL Education	3
EDUC 6010	Psychological Foundations of Education (or an approved elective course)	3
EDUC 6310	Teaching in Secondary Schools	3
MUED 5000	Philosophical Foundations and Contemporary Issues in Music Education	3
FALL		
EDUC 6300	Social/Philosophical Aspects of Education	3
EDUC 6320	Practicum in Music Education	1
EDUC 7960	Independent Study in Music (may be taken in summer; requires approval of Blair associate dean)	2
or MUED 5100	Advanced Studies for the Wind Band Conductor	
MUED 5010/5020	Methods and Materials in Teaching Music, Instrumental or Vocal/Choral	3
MUED 5030	Methods and Materials in General Music, PreK through 12	3
SPRING		
EDUC 7974	Internship in Teaching: Music	6
EDUC 7975	Internship Seminar: Music	1
	(A capstone project is also required)	
	Total hours:	31

Admission to Student Teaching [Screening II]

The semester prior to the one in which a student plans to student teach, he/she must apply for student teaching (Screening II) and request student teaching placements. The student should be enrolled in any remaining required prerequisite courses. Applications will be processed in the Office of Teacher Licensure, and if eligible, forwarded to the appropriate faculty for review and vote. It is the student's responsibility to complete the application at the appropriate time.

The criteria that must be met for a student to be admitted into student teaching are as follows:

1. Specific Academic Criteria
 1. Formal admission to a teacher education program for initial licensure granted
 2. Approved program of studies and licensure audit forms on file
 3. Successful completion of all courses and field work required and prerequisite for student teaching
 4. Minimum cumulative grade point average of 3.0 (4.0 scale)
 5. Successful completion of standard first aid and CPR training (submit certificate copies prior to or with the Screening II application)
2. Specific Faculty Evaluative Criteria
 1. Dependability (as evidenced by good attendance in classes and practica and the completion of required assignments and procedures on time)
 2. Professional and ethical behavior (honesty, acceptance of responsibility, emotional maturity, etc.)
 3. Attitude and interpersonal skills (including the ability to work with children and with peers)
 4. Academic competence (It is possible for a student to meet minimum grade point requirements and pass all courses and still have specific academic weaknesses which might cause denial of screening applications.)

5. Teaching competence (as evidenced by successful completion of practica requirements). It is possible for a student to meet minimum grade point requirements and pass all courses and still have specific performance weaknesses which might cause denial of screening applications. Each Screening II application must be accompanied by additional documents, depending on the endorsement(s) being sought.

Department of Teaching and Learning Additional Documents

1. Professional resume
2. Parent Letter (only required for Secondary Education)
3. Copy of first aid and CPR cards to amanda.vandoorn@vanderbilt.edu

Special Education Additional Documents

1. Professional resume
2. Philosophy of Teaching Statement
3. Copy of first aid and CPR cards to amanda. vandoorn@vanderbilt.edu

Departmental faculty will consider all criteria for each individual students and will vote on a recommendation for each student. Students who are approved to student teach will receive notification of their student teaching placements no later than during the Student Teacher Orientation at the beginning of the student teaching semester.

All Vanderbilt teacher education programs are approved by the Council for the Accreditation of Educator Preparation (CAEP).

3+2 B.Mus.Arts/MBA Blair-to-Owen Program

The five-year dual-degree program between the Blair School of Music and the Owen Graduate School of Management allows a small cohort of particularly motivated students to overlap their undergraduate course work with work toward the MBA, facilitating the earning of both the undergraduate and graduate degrees in five years (ten semesters). By combining three and one-half years in Vanderbilt's Blair School of Music with one and one-half years of study in the Owen School, students may obtain both the bachelor of musical arts and the master of business administration in five years. The baccalaureate from the Blair School is awarded at the end of the fourth year, and the MBA from the Owen School after the fifth year. Students interested in pursuing this program must be enrolled in the musical arts degree.

Required course work includes the normal Blair course work for the musical arts degree, for a minimum of 63 credit hours in music. The liberal arts core will also follow the requirements for the major, but must include the following specific requirements:

- Calculus (1 semester)
- Statistics, e.g., ECON 1500: Economic Statistics
- ECON 1010: Principles of Macroeconomics
- ECON 1020: Principles of Microeconomics
- ECON 3012: Microeconomics

A curriculum plan, including recommended electives, is provided in the *Blair Student Handbook*.

Students must apply to the Owen School for admission to the five-year program during their junior year. Students should apply in Round 1 of the MBA application cycle (typically early October) of the junior year, and early application and a standardized test score (e.g., GMAT, GRE) are recommended. Acceptance into the five-year program is extremely competitive and requires advanced standing earned in undergraduate courses. Being deficient in full-time work experience, the 3+2 student must enhance their portfolio with an internship and outstanding academic performance, and also show a strong commitment to a rigorous business education. The Summer Business Institute (Accelerator), as administered by the Owen Graduate School of Management, is strongly recommended for 3+2 applicants prior to matriculating at Owen. The successful applicant will bring an accomplished academic record (normally a GPA of 3.3 or better), satisfactory internship or work experience, an ability to articulate his or her own preparedness for the work environment, and a strong endorsement from Vanderbilt faculty.

Students who are accepted to the 3+2 program will remain registered as B.Mus.Arts students through fall of senior year, and will register as Owen students in spring of senior year. Academically, students will take a full load of business courses both in fall and spring of senior year while completing the final B.Mus.Arts degree requirements (normally, lessons and ensembles). Students must complete a minimum of 62 credit hours at Owen over four semesters. Fifteen hours (normally in fall of the senior year) of Owen School courses approved by Blair may be counted toward completion of the undergraduate degree. Students with questions may contact Liz Scowden (liz.scowden@vanderbilt.edu) in the Owen Academic and Student Affairs Office. The completion of the B.Mus.Arts degree requirements prior to fall of the student's fifth year is required for continuation in the MBA program.

Tuition and Financial Aid

The scholarship or other financial aid commitment of the Blair School will not be continued automatically beyond the seventh semester for students enrolled in the dual-degree program. Eighth-semester financial aid is the student's responsibility. Students should notify the Owen School with their application if they are interested in being a candidate for an Owen scholarship during their MBA studies. Early application is recommended. *Need-based aid will still apply.*

Students pay tuition to the undergraduate school for the fall semester of their fourth year, after which all tuition is paid to Owen (and reflects graduate school tuition rates). The Blair School of Music will waive fees for the required performance instruction during spring of the fourth year to facilitate completion of the B.Mus.Arts requirements.

Honors in the Blair School of Music

[Founder's Medal](#)

[Academic Honors Designation](#)

[Honors Program in Musicology and Ethnomusicology](#)

[Dean's List](#)

[Pi Kappa Lambda](#)

[Awards and Prizes](#)

Founder's Medal

The Founder's Medal, signifying first honors, was endowed by Commodore Cornelius Vanderbilt as one of his gifts to the university. The recipient is named by the Dean after consideration of faculty recommendations as well as grade point averages of the year's highest-ranking graduates.

Academic Honors Designation

Honors, which are noted on diplomas and published in the *Commencement Program*, are earned as follows:

Summa Cum Laude. Students whose grade point average equals or exceeds that of the top 5 percent of the previous three years' graduating seniors.

Magna Cum Laude. Students whose grade point average equals or exceeds that of the next 8 percent of the previous three years' graduating seniors.

Cum Laude. Students whose grade point average equals or exceeds that of the next 12 percent of the previous three years' graduating seniors.

Honors Program in Musicology and Ethnomusicology

The honors program in musicology and ethnomusicology is designed to afford superior students the opportunity to pursue more intensive work within the field of musicology or ethnomusicology, culminating in the preparation of a senior honors thesis. The course of study includes seminar work as well as independent study and writing under the supervision of a thesis adviser. Students who want to do honors work should contact the chair of the musicology and

ethnomusicology department in the fall of their junior year. Departmental approval of a formal honors thesis prospectus must take place prior to registration for MUSL 4998 in spring of the junior year or fall of the senior year. Minimum requirements are a 3.0 GPA overall and 3.3 in musicology and ethnomusicology courses.

Students accepted into the program must take a total of 9 credit hours: MUSL 4998-4999, Senior Honors Thesis (6 hours), and one course (beyond the MUSL core) chosen from MUSL 2610, 3160, 3220-3240, or 3890 (3 hours). In addition, successful completion of the honors program requires an oral defense of the honors thesis before a faculty committee. This defense will occur at the end of the second semester of thesis enrollment. Those enrolled in the program who successfully complete its requirements with distinction may graduate with Honors or Highest Honors in musicology and ethnomusicology.

Dean's List

The Dean's List recognizes outstanding academic performance in a semester. Students are named to the Dean's List when they earn a grade point average of at least 3.500 while carrying 12 or more graded hours, with no temporary or missing grades in any course (credit or non-credit), and no grade of *F*.

Pi Kappa Lambda

Election to Pi Kappa Lambda National Music Honor Society signifies superior accomplishment in the field of music. Students elected to membership must be outstanding musically and scholastically and ranked in the highest 20 percent of the senior class or the highest 10 percent of the junior class. The Eta Iota chapter was installed at Vanderbilt on April 8, 1992. Professor Karen Ann Krieger serves as its president.

Awards and Prizes

Several awards are presented to students at the Blair School of Music. Announcement is made at the final student recital/convocation of the spring semester. Each carries a monetary stipend. Awards, which are published in the *Commencement Program*, are as follows:

ACHIEVEMENT IN TEACHING AWARD. The Achievement in Teaching Award is presented by the faculty to a senior who has demonstrated superior abilities in teaching. The recipient must intend to teach music professionally in an independent studio or a classroom, or at the collegiate level.

ANDREW SANG HAN MEMORIAL AWARD. Established in memory of Sang Han, a clarinet performance major at Blair from 2012 to 2015. Sang's dedication to excellence in all areas of performance, from small chamber ensembles to wind symphony and orchestra, as well as the care and consideration he showed his peers, served as an example to his friends and colleagues at the Blair School. Presented to a woodwind or brass student who demonstrates remarkable musicianship and leadership in all areas of ensemble playing.

THE BLAIR VOLUNTEER SERVICE THROUGH MUSIC AWARD. Established in 2009, the award recognizes a student who, using music in service to others, has performed with extraordinary effort and distinction, particularly at the W. O. Smith Community Music School.

CHRISTIAN TEAL AWARD. This award recognizes a current string student who embodies the collaborative spirit of Professor Chris Teal, who retired in 2015 as Joseph Joachim Professor of Violin after forty-two years at the Blair School.

DAVID RABIN PRIZE. Established in memory of David Rabin, M.D., a professor of medicine and professor of obstetrics and gynecology at Vanderbilt from 1975 to 1984, and awarded for excellence in musical performance to a student enrolled at the Blair School of Music.

ELLIOT AND AILSA NEWMAN PRIZE. Endowed by Mrs. Ailsa Mackay Newman, in memory of her husband, Elliott Voss Newman, M.D., and his love of the clarinet. Dr. Newman was the Werthan Professor of Experimental Medicine at Vanderbilt from 1952 until his death in 1973. This prize is awarded to a promising clarinet or woodwind student for excellence in performance.

EXCELLENCE IN PIANO PERFORMANCE AWARD. This award is given by Blair faculty member Amy Kane Jarman in memory of her mother, June Kane, a 1947 piano performance graduate of the University of Colorado Boulder, and lifelong musician.

JEAN KELLER HEARD PRIZE. Established in honor of violinist Jean Keller Heard and awarded for excellence in musical performance to a string student or students seeking the bachelor of music at the Blair School of Music.

JULIUS AND MAGDA LACHS AWARD. Funded by Vanderbilt's Centennial Professor of Philosophy, John Lachs, in memory of his mother, Magda, a passionate opera enthusiast, and his father, Julius Lachs. It is given to an outstanding voice or orchestra student who participated in the current year's Vanderbilt Opera Theatre production.

L. HOWARD "ZEKE" NICAR AWARD. Established in memory of L. Howard "Zeke" Nicar, the Blair School of Music's first assistant dean for admissions. This award is presented to an outstanding student, for excellence in performance, as selected by the woodwind or brass faculty.

MARGARET BRANSCOMB PRIZE. Established in memory of Margaret Branscomb, wife of Vanderbilt Chancellor Emeritus Harvie Branscomb, and presented to a first-year student judged by the faculty to have the personal and musical qualities which best exemplify the spirit and standards of Blair.

MARK WAIT AWARD. Awarded for academic excellence and exemplary citizenship to a Blair senior with a second major outside of music. The Wait Award was created by an anonymous donor in honor of Mark Wait's tenure as dean of the Blair School.

MARTIN WILLIAMS AWARD. Established in memory of Martin Williams, former director of the Smithsonian Institution's Jazz Program and an adjunct professor of jazz history at Blair. This award is presented to the student writing the most outstanding class paper during the academic year.

MICHELSON AWARD IN COLLABORATIVE ARTS. Established in honor of Laura Michelson, BMus'11, this award is presented to a singer, pianist, or voice/piano duo for exceptional performance in collaborative arts.

PRESSER AWARD. Established in memory of Theodore Presser, music publisher and philanthropist, and awarded to a rising senior judged by the Blair School of Music faculty to exemplify excellence both musically and academically.

RICHARD C. COOPER AWARD. This award is presented by the Pi Delta Chapter of Phi Mu Alpha to remember the outstanding contributions made by Chris Cooper to the student experience of music at Vanderbilt University.

SPIRIT OF BILLY ADAIR AWARD. The Spirit of Billy Adair award is given to a sophomore or junior who exhibits the qualities of leadership, mentorship, excellence, musicianship, and service within the jazz program at Blair.

STUDENT CITIZEN AWARD. The Student Citizen Award is given to the sophomore or junior judged by the entire

faculty to have the musical and personal qualities that best exemplify the spirit and standards of the school, especially by sharing their talent and training in music as a service to others. The award is established by Madeline Myers, B.Mus.'11, in memory of her father, James Agnew Myers.

SUE BREWER AWARD. Established in memory of Sue Brewer by the Songwriters Guild Foundation and awarded for excellence to a student majoring in composition.

UNDERGRADUATE COMPOSITION AWARD. The Undergraduate Composition Award is awarded by the composition faculty to a student of junior or senior status who has made an outstanding contribution to the Blair School's composition program through creative output, academic excellence, and personal dedication. Given in honor of Sean William Calhoun, BMus'14.

College of Connected Computing

The College of Connected Computing at Vanderbilt University was established to address the increasing importance of computing in various fields and to foster interdisciplinary collaboration. The university's first new college in 40 years, it aims to equip students to effectively utilize technology within their chosen fields by integrating computing with disciplines from across the university such as social sciences, law, and medicine. The college focuses on advancing research in areas like artificial intelligence, data science, and connected systems, ultimately contributing to innovation and addressing complex societal challenges. With programs in Computer Science, Data Science and Generative AI, the new, interdisciplinary college will advance breakthrough discoveries and strengthen computing education for every one of our students through a "computing for all" approach.

Students who elect to major in Computer Science as a primary major will be enrolled in the School of Engineering. A student from any college may elect Computer Science as a second major or participate in any of our minors.

The college will begin enrolling first-year students in the fall of 2027.

College of Connected Computing Minors

[Data Science Minor](#)

[Scientific Computing Minor](#)

Data Science Minor

DIRECTOR Charreau Bell

Data Science is an emerging interdisciplinary field whose goal is to extract knowledge and enable discovery from complex data using a fusion of computation, mathematics, statistics, and machine learning. Datasets can be as varied as maps of the universe, MRI images, human genomes, medical records, stock market transactions, educational data, historical texts, infrastructure systems, or website clickstream data. Over the coming decades, Data Science is expected to have significant impacts on basic and applied research in the sciences, social sciences, arts and humanities, and engineering as well as impact all sectors of the economy from health care to education, government, transportation, finance, manufacturing, construction, and urban planning. Data Science has the potential to improve individual and community health and education; develop smart communities that enable efficient circulation of people, goods, and services; enable informed decision making in public and private sectors; and enhance environmental sustainability and overall quality of life. Given the wide range of applications and

potential benefits, the powerful tools and techniques of Data Science must be used ethically and responsibly.

The faculty at Vanderbilt have created a unique trans-institutional undergraduate minor in Data Science that spans all four undergraduate colleges and is affiliated with the Vanderbilt Data Science Institute. Students in Data Science are introduced to the foundations of this interdisciplinary field, with coursework in computer programming, statistics, machine learning, and visualization, interwoven with ethical considerations of collecting, curating, analyzing, visualizing, and interpreting data. The minor in Data Science prepares students for advanced coursework in statistics and data analysis, scientific computing and simulation, machine learning and visualization, and high performance computing and big data. The minor strives to prepare students for unique immersion experiences in basic and applied research, for civic and professional engagement in the public and private sectors, and for international experiences in industry, government, or non-governmental organizations. The minor provides a solid foundation for future professions or graduate study in any field that collects, analyzes, models, or interprets data.

Minor Requirements:

1. Introduction to Data Science: DS 1000	3 hours
2. Computer Programming: One of DS 1100, CS 1100, CS or ECE 2201, or CS or ECE 2204	3 hours
3. Introduction to Statistics: One of DS 2100, BME 2400, BSCI 3270, CE 3300, ECON 1500 or 1510, MATH 2810 or 2821, PSY 2100, PSY-PC 2100, or SOC 2100	3 hours
4. Data Science Fundamentals: DS 3100	4 hours
5. Machine Learning: One of DS 3262, CS 3262, CS or ECE 4262, ECON 3750, or MATH 3670	3 hours
6. Elective: One course from the list of electives below or DS 3850	3 hours
Total:	19 hours

Electives in data science are courses with various combinations of computation, visualization, simulation, statistics, psychometrics, and/or machine learning aimed at understanding and explaining data in the physical, life, or social sciences, engineering, arts, or the humanities, or courses that examine the impact of data on society and its institutions. Students and faculty are encouraged to petition for new courses with data science content to be considered as electives for the minor.

Students electing the undergraduate minor in Data Science must follow academic regulations regarding minors in their home school, including but not limited to regulations regarding unique hours. Additional credit hours in Data Science that must be earned because of college-specific regulations regarding unique hours must be earned by taking additional courses chosen from the list of electives.

Courses Offered: [DS](#)

Scientific Computing Minor

DIRECTORS Robert E. Bodenheimer and Kalman Varga

Affiliated Faculty

PROFESSORS Ralf Bennartz (Earth and Environmental Sciences), Gautam Biswas (Electrical Engineering and Computer Science), Robert E. Bodenheimer Jr. (Computer Science), Mark N. Ellingham (Mathematics), David Furbish (Earth and Environmental Sciences), Guilherme Gualda (Earth and Environmental Sciences), Kelly Holley-Bockelman (Astronomy), Shane Hutson (Physics), Bennett Landman (Electrical and Computer Engineering), Gordon D. Logan (Psychology), Haoxiang Luo (Mechanical Engineering), Terry P. Lybrand (Chemistry and Pharmacology), Michael I. Miga (Biomedical Engineering), Mark Neamtu (Mathematics), Thomas J. Palmeri (Psychology and Neuroscience), Antonis Rokas (Biological Sciences), Jeffrey D. Schall (Psychology and Neuroscience), Larry Schumaker (Mathematics), Paul Sheldon (Physics), Kalman Varga (Physics), David A. Weintraub (Astronomy)

PROFESSOR OF THE PRACTICE Gerald H. Roth (Computer Science)

ASSOCIATE PROFESSORS Sean Polyn (Psychology and Neuroscience), Jennifer Trueblood (Psychology), Greg Walker (Mechanical Engineering), Steve Wernke (Anthropology)

ASSISTANT PROFESSOR William Holmes (Physics and Astronomy)

COURSES OFFERED: [SC](#)

Faculty in the School of Engineering and the College of Arts and Science offer an interdisciplinary minor in scientific computing to help natural and social scientists and engineers acquire the ever-increasing computational skills that such careers demand. The minor is administered by the School of Engineering. Students who complete this minor will have a toolkit that includes programming skills useful for simulating physical, biological, and social dynamics, as well as an understanding of how to take advantage of modern software tools to extract meaningful information from small and large datasets.

Computation is now an integral part of modern science and engineering. In science, computer simulation allows the study of natural phenomena impossible or intractable through experimental means. In engineering, computer simulation allows the analysis and synthesis of systems too expensive, dangerous, or complex to model and build directly. Astronomers studying the formation of massive black holes, neuroscientists studying neural networks for human memory, mechanical engineers studying the designs of turbines and compressors, and electrical engineers studying the reliability of electronics aboard spacecraft are united both in the computational challenges they face and the tools and techniques they use to solve these challenges.

Students in the program in scientific computing are taught techniques for understanding such complex physical, biological, and also social systems. Students are introduced to computational methods for simulating and analyzing models of complex systems, to scientific visualization and data mining techniques needed to detect structure in massively large multidimensional data sets, to high performance computing techniques for simulating models on computing clusters with hundreds or thousands of parallel, independent processors and for analyzing terabytes or more of data that may be distributed across a massive cloud or grid storage environment.

Scientific computing at Vanderbilt is supported by faculty and includes students from a wide range of scientific and engineering disciplines. While the content domain varies, these disciplines often require similar computational approaches, high-performance computing resources, and skills to simulate interactions, model real-life systems, and test competing hypotheses. Scientific computing embodies the computational tools and techniques for solving many of the grand challenges facing science and engineering today.

The minor in scientific computing prepares students for advanced coursework that combines computational approaches with a substantive area of science or engineering. It prepares students for independent study with a faculty member on a research project. It prepares students for advanced study in graduate school. It provides skills that will be attractive to many employers after graduation.

The minor in scientific computing is distinct from the minor in computer science. Scientific computing uses computation as a tool to solve scientific and engineering problems in research and application. It is more focused on simulation, numerical techniques, high performance computing, and higher-level methods than the minor in computer science, which is focused on the algorithms, systems, and technologies that enable such methods to be developed and employed.

The minor in scientific computing requires 15 credit hours, distributed as follows:

1. CS 1101 or 1103 or 1104	3 hours
2. CS 2204 or ECE 2204 (CS 2201 or ECE 2201 may be substituted for 2204 with the approval of a program director)	3 hours
3. Elective courses. Three hours must come from course list A (Mathematical, Quantitative, and Data Science Methods); three hours must come from course list B (Computational, Simulation, and Modeling Methods); and three hours can come from either course list A or B, or from independent study (SC 3850/3851) with a faculty member affiliated with the SC minor.	9 hours
Total:	15 hours

Engineering Education in a University Setting

[Facilities](#)

[Professional Registration and Accreditation](#)

[Employment of Graduates](#)

[Supporting Organizations](#)

Vanderbilt University School of Engineering is the largest and oldest private engineering school in the South. Classes offering engineering instruction began in 1879, and seven years later Engineering was made a separate unit with its own dean. The school's program emphasizes the relationship of the engineering profession to society and prepares engineers to be socially aware as well as technically competent.

The mission of the School of Engineering is threefold: to produce intellectual leaders, entrepreneurs, and innovators by recruiting the best students and providing them a top-notch education; to deliver scholarship of the highest caliber, published in the most visible venues, addressing important societal problems; and to be a leader in entrepreneurship and innovation, in Tennessee, the U.S., and globally.

The school strives to meet the undergraduate education portion of its mission by offering degree programs in fields of engineering relevant to the needs of society. An objective of these programs is to provide a technical education integrated with strong humanities, fine arts, and social sciences subject matter to provide the requisite foundation for lifelong learning. The availability of second majors and minors in subject areas in other schools and colleges of the university increases opportunities for engineering students to enhance their education by pursuing studies in the non-technical disciplines. Engineering students take close to 50 percent of their courses outside of the School of Engineering and associate daily with peers from other schools and colleges within the university.

Another objective is to prepare students who intend to enter engineering practice upon graduation and those who will continue their studies at the graduate level in engineering or in other professional fields. To this end, our programs emphasize mathematics and engineering sciences with significant exposure to engineering design and hands-on laboratory experiences.

A large fraction of the student body is destined for management positions early in their working careers. To meet these students' needs, the Engineering Management program offers a well-integrated minor.

Students at all levels have the opportunity to work with faculty in the generation of new knowledge. Those planning for graduate studies and research are especially encouraged to participate in individual topics and research courses to fulfill that desire. Engineering students also participate in summer research programs of the university and of the

school.

Facilities

The School of Engineering is housed in five main buildings with several satellite facilities. William W. Featheringill Hall houses a three-story atrium designed for student interaction and social events, more than fifty teaching and research laboratories with the latest equipment and computer resources, and project rooms. The Engineering and Science Building is an eight-story state-of-the-art building that houses the Wond'ry at the Innovation Pavilion, the Frist Center for Autism and Innovation, numerous research labs, interactive classrooms, clean rooms, and space for students to work, study, and socialize. Olin Hall, which is attached to the Engineering and Science building, houses Chemical and Biomolecular Engineering, Mechanical Engineering, and Materials Science, several classrooms, and research and teaching laboratories. School administrative offices and several classrooms are located on the ground floor of the Science and Engineering Building in Stevenson Center, which also houses the Biomedical Engineering department on the 8th and 9th floors. Jacobs Hall, which flanks Featheringill Hall, contains laboratories, offices, and classrooms serving the Civil and Environmental Engineering, and Electrical and Computer Engineering departments. Labs, offices, and meeting spaces for Computer Science are also housed at 17th & DeFord Bailey, a building that serves as a hub for Computer Science and Data Science. Several satellite facilities are also part of the Engineering School: the W. M. Keck Free-Electron Laser Center building, housing the labs and offices of the Biomedical Photonics Center; the Laboratory for Systems Integrity and Reliability (LASIR), an off-campus hangar-style facility dedicated to scaling up experiments to realistic and full size that houses a wind tunnel and military aircraft; the Vanderbilt Institute of Software Integrated Systems; and the Institute for Space and Defense Electronics.

In all its engineering programs, Vanderbilt recognizes the vital place of experimental and research laboratories in the learning experience. Laboratories are designed to provide the strongest personal contact between students and faculty members consistent with enrollment.

Well-equipped undergraduate laboratories are maintained by the Chemistry and Physics & Astronomy departments in the College of Arts and Science, which offers mathematics and basic science courses required of all engineering students. Graduate and undergraduate divisions of these departments maintain teaching and research facilities in the Stevenson Center for the Natural Sciences. Another supporting department, Biological Sciences, is housed in Medical Research Building III. Most classes in humanities and the social sciences are conducted in Buttrick, Calhoun, Furman, Garland, and Wilson halls.

Professional Registration and Accreditation

Legislation exists in the various states requiring registration of all engineers who contract with the public to perform professional work. Although many engineering positions do not require professional certification, Vanderbilt supports registration and encourages its graduates to take the Fundamentals of Engineering examination as soon as they become eligible.

Bachelor of engineering degrees in biomedical engineering, chemical engineering, civil engineering, electrical and computer engineering, and mechanical engineering are accredited as noted below. Students in these programs may take the Fundamentals of Engineering examination as seniors. In addition, proven professional experience is a requirement for registration. Some state boards may have additional requirements for licensure.

All programs leading to the Bachelor of Engineering degree and the program leading to the Bachelor of Science in computer science are accredited as follows:

The Bachelor of Engineering degree program in biomedical engineering is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org/>, under the General Criteria and the Program Criteria for Bioengineering and Biomedical and Similarly Named Engineering Programs.

The Bachelor of Engineering degree program in civil engineering is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org/>, under the General Criteria and the Program Criteria for Civil and Similarly Named Engineering Programs.

The Bachelor of Engineering degree program in chemical engineering is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org/>, under the General Criteria and the Program Criteria for Chemical, Biochemical, Biomolecular and Similarly Named Engineering Programs.

The Bachelor of Science program in computer science is accredited by the Computing Accreditation Commission of ABET, <https://www.abet.org/>, under the General Criteria and Program Criteria for Computer Science and Similarly Named Computing Programs. The accredited program in computer science is the primary major administered by the School of Engineering. Computer science added as a second major by students outside the School of Engineering is not an accredited program.

The Bachelor of Engineering degree program in electrical and computer engineering is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org/>, under the General Criteria and the Program Criteria for Electrical, Computer, Communications, Telecommunication(s) and Similarly Named Engineering Programs.

The Bachelor of Engineering degree program in mechanical engineering is accredited by the the Engineering Accreditation Commission of ABET, <https://www.abet.org/>, under the General Criteria and the Program Criteria for Mechanical and Similarly Named Engineering Programs.

Employment of Graduates

Of the recent Vanderbilt graduates with baccalaureate degrees in engineering, about 75 percent entered directly into professional practice. Twenty-five percent continued with graduate or professional education. Others pursued diverse careers or other interests. Additional information regarding the employment of engineering graduates is available on the School of Engineering's website and in the VU Career Center.

Supporting Organizations

Vanderbilt Engineering Council

The Engineering Council is a student organization whose main goal is facilitating community among undergraduate students in the School of Engineering by organizing activities, e.g., Engineering Week, de-stress events around final examinations, and many more. Additionally, the council acts as a student voice to school administration and faculty. Representatives of engineering student organizations apply to serve on the E-Council leadership team, and the current leadership board selects and trains the new members. While the council has no administrative power, it provides students with a voice in the decision- making process in the School of Engineering.

Professional Societies

The leading national engineering societies have chartered branches or student sections at Vanderbilt. These organizations are run locally by students with the help of a faculty adviser. Meetings are devoted to matters of a technical nature, including outside speakers, plant trips, and other subjects of interest to the membership.

Students are invited to attend meetings and join as they will find the work of the professional societies beneficial in orienting them in their careers.

The student professional societies are:

American Institute of Aeronautics and Astronautics (A.I.A.A.)	Institute for Electrical and Electronics Engineers (I.E.E.E.)
American Institute of Chemical Engineers (AICh.E)	National Society of Black Engineers (N.S.B.E.)
American Society of Civil Engineers (A.S.C.E.)	Society of Asian Scientists and Engineers (S.A.S.E.)
American Society of Mechanical Engineers (A.S.M.E)	Society of Hispanic Professional Engineers (S.H.P.E.)
Biomedical Engineering Society	Society of Automotive Engineers (S.A.E.)
Engineering World Health (E.W.H.)	Society of Women Engineers (S.W.E.)
Engineers Without Borders (E.W.B.)	Women in Computing

The student Honor Societies are:

Tau Beta Pi	Alpha Eta Mu Beta

Graduating seniors may join the Order of the Engineer, a society that recognizes the commitment of its members to the profession of engineering.

In addition to student chapters of national professional societies, the School of Engineering also hosts a number of additional student organizations.

Bachelor of engineering degree programs are offered in the areas of biomedical, chemical, civil, electrical and computer, environmental, and mechanical engineering. Many of these programs allow considerable flexibility—but students are required to include in their courses of study those bodies of knowledge fundamental to that discipline.

Bachelor of science degree programs are offered in computer science and engineering science. The latter interdisciplinary engineering discipline allows strong concentration in other areas of engineering or outside of the School of Engineering.

The school offers the master of engineering (M.Eng.), with emphasis on engineering design and practice, in most areas of study. The Graduate School, through departments of the School of Engineering, offers the research-oriented Ph.D. and M.S. degrees in eight major fields. Degree programs offered by the School of Engineering are shown below.

Undergraduate Degrees

Declaration of Major

Engineering students declare a major as part of the application process prior to admission. In their first year, engineering students are expected to take course work appropriate to the major they declared. Students wishing to change into a different major within the School of Engineering may do so after March 1st in their first year. Students wishing to change, add, or drop a major use the online process provided by the Office of the University Registrar. The same process is used for minors and a similar process for focus areas.

The First Year

Most courses normally scheduled for the first year are common to both the B.E. and B.S. degree programs. While the curriculum for the first year is generally the same for all students, there are important variations. For example, some major programs require a full year of introductory chemistry; others do not. Students should become familiar with requirements of those programs in which they have an interest and confer with their adviser at the time of enrollment and throughout the first year to plan a program of study that will keep options open as long as possible.

Specimen curricula for the engineering programs are given in the Courses of Study section. Requirements for the B.E. and B.S. degrees for the various programs vary in the minimum amount of hours and in specific course requirements in the basic sciences and in mathematics.

Included in the first year for all majors is the course Engineering Science 1401-1403 Introduction to Engineering, which introduces the student to design tools used in all areas of engineering.

Mathematics and Physics

Entering engineering students will be placed in the appropriate level mathematics course. Students having one full year or more of high school credit in analytic geometry and calculus may qualify for advanced placement in a regular sequence by scoring well on the Advanced Placement Examination.

Students with high mathematical ability and achievement as demonstrated by testing credit or credit by examination through the Department of Mathematics may begin in the next mathematics course for which they qualify (e.g., MATH 1301 or 2300). For more information, see the testing credit information under Advanced Credit in the Admissions section of this catalog and course descriptions under Mathematics in the Arts and Science section of this catalog. For majors requiring Math 2420 (Methods of Ordinary Differential Equations), students may select Math 2400 (Differential Equations with Linear Algebra) or Math 2610 (Ordinary Differential Equations) as a substitute.

First-year students with a test score of 5 on the Calculus-BC Advanced Placement examination and who wish to pursue the honors track of a second major in mathematics may take MATH 2500-2501, which will cover the material from MATH 2300 and 2600 but in a deeper and integrated fashion. Note that while linear algebra is required for some VUSE majors, no VUSE major specifically requires 2600. Students considering this option must discuss this with the Director of Undergraduate Studies in Mathematics and the School of Engineering Office of Academic Services.

Students with inadequate backgrounds in mathematics may be required to take Math 1005 (Pre-calculus Mathematics). Taking this course constitutes an additional requirement for graduation.

Math 1010-1011 (Probability and Statistical Inference) and Math 1100 (Survey of Calculus) cannot be credited toward a degree in the School of Engineering.

Students with greater interest in physics may enroll in Phys 1911, 1912, 1912L, and 2255L (Principles of Physics I and II and labs) as substitutes for Phys 1601, 1602, 1601L, and 1602L (General Physics I and II and labs), respectively. Students should consult with their Academic Adviser before taking this more advanced Physics sequence.

Pre-calculus courses Phys 1010, 1010L, 1020, 1020L, 2051, 2052, 2053, and 2054 cannot be credited toward a degree in the School of Engineering.

Liberal Arts Core

In order to provide the elements of a general education considered necessary for responsible practice as an educated engineer, the School of Engineering requires each student to complete a comprehensive math and science foundation as set by the requirements of their specific major and at least 18 hours in the Liberal Arts Core comprising:

1. At least 3 hours selected from courses classified in the AXLE Curriculum Course Distribution as Humanities and Creative Arts (HCA) or classified as Liberal Education - Humanities and Fine Arts (LE-HFA), with the exception of CMST 1500, 2100, 2110, and 2120, and
2. At least 3 hours selected from courses classified in the AXLE Curriculum Course Distribution as Social and Behavioral Sciences (SBS) or classified as Liberal Education - Social and Behavioral Sciences (LE-SBS).

The remaining hours are to be selected from:

1. Courses classified in the AXLE Curriculum Course Distribution as Humanities and Creative Arts (HCA), International Cultures (INT), History and Culture of the United States (US), Social and Behavioral Sciences (SBS), and Perspectives (P)
2. CS 1151, ENGM 2440, and ES 1151
3. ARA, CHEB, CHIN, FREN, GER, GRK, HEBR, HNUR, ITA, JAPN, KICH, KOR, LAT, RUSS, SNSK, and SPAN courses numbered 1101; CHIN and JAPN courses numbered 1011 and 1012; and ENGL and SPAN courses numbered 1100
4. AP Credit for AADS 2000 (earned from the AP African American Studies exam).
5. Peabody College courses in Psychology (PSY-PC) numbered 1205, 1207, 1250, 2200, 2250, 2300, 2400, 2500, 2550, 2600, and 3150, and in Human and Organizational Development (HOD) numbered 1250, 1300, 2100, 2260, 2400, 2500, 2700, and HODC 3232

6. All MUSO, COMP, MREP, MUTH, and performance courses in the Blair School of Music, except MUSO 1001
7. MS 1510

Completing the above requirements along with the necessary math and science foundation ensures that each School of Engineering student completes a coherent body of 47 or more credit hours of general education courses that incorporate a breadth of knowledge.

Immersion

Immersion Vanderbilt (vanderbilt.edu/immersion) allows students to pursue a multi-year path to be curious, to develop their passions and to learn by experience. To fulfill the university requirement of Immersion Vanderbilt, a student must participate in immersive experiences and then complete a culminating project that is based on one specific immersive experience as described in the Special Programs for Undergraduates section near the start of this catalog.

The experiential learning may focus on one or more areas of student interest. Most engineering students will take advantage of a four-year engineering design experience to satisfy the requirements of Immersion Vanderbilt. Each engineering major offers such a multi-year experience within its curriculum. Students whose plans include professional development may also pursue industrial internships. A research path can engage the student in discovery through research in engineering or other fields. While most engineering students will select an immersion experience associated with their major, students can pursue an Immersion plan outside their home program. For example, students interested in creative expression might develop a performance piece, exhibit, or artistic work, while those interested in international study may explore firsthand the culture, language, and history of other countries. Students interested in such immersion plans should consult the Office of Experiential Learning and Immersion (EL&IV).

The Immersion Vanderbilt process is composed of several phases. Senior design projects in the School of Engineering satisfy the final project requirement for Immersion Vanderbilt, with students presenting the results of their design project at the school's Design Day or Computer Science Immersion Showcase. For students completing other immersion projects, the Office of Experiential Learning and Immersion Vanderbilt coordinates a series of showcases open to the entire campus where students display their projects. Upon completion of the project, Office of Experiential Learning and Immersion Vanderbilt conveys that the requirements have been met by showing completion of the Immersion Vanderbilt graduation requirement on the student's degree audit.

Open Electives

Courses taken beyond specified courses and restricted (such as program, technical, and liberal arts) electives for the major may be taken as open electives.

Cross-Listed Courses

Cross-listed courses within the School of Engineering and the College of Connected Computing are considered equivalent for purposes of meeting degree requirements.

Officer Education

Course offerings in military science and naval science are described in the section on Special Programs for Undergraduates near the beginning of the catalog. All officer education courses designated as eligible for credit may be taken as open electives. In addition, some officer education courses in history and political science may be taken as part of the Liberal Arts Core while some officer education courses in engineering science may be taken as technical electives. AFROTC students may count 6 hours of the military courses as open electives.

Master of Engineering

The master of engineering (M.Eng.) is an advanced professional degree awarded by the School of Engineering and especially designed for engineering practitioners who may prefer to work while doing professional study. It is also suitable for individuals who apply directly from undergraduate school—but the thrust of the program is toward professional practice in engineering rather than research or teaching. The degree is offered in biomedical engineering, chemical engineering, civil engineering, cyber-physical systems, engineering in surgery and intervention, engineering management, environmental engineering, mechanical engineering, and risk, reliability,

and resilience engineering.

Students must complete 30 hours of approved course work. A maximum of 6 hours of graduate-level course work may be transferred from another institution, and a maximum period of seven years is allowed to complete the degree. An extensive, written design report shall be submitted on a project approved by the student's project adviser.

Regular admission to the Master of Engineering program normally requires graduation from an approved undergraduate program in engineering or a related scientific discipline, attainment of a B average in undergraduate courses applicable to the student's career goals, and recommendations containing favorable appraisals of professional promise and attitude. A period of successful work experience prior to application to the program will also be given consideration. For information about admissions, application procedures, and application deadlines for the Master of Engineering programs, please visit <https://engineering.vanderbilt.edu/academics/master-of-engineering-degree>.

Current undergraduates in the School of Engineering may be eligible to earn the Master of Engineering via the Integrated Bachelor and Master of Engineering program described in the next section of this catalog.

For international students who did not graduate from an institution in a country where English is the official language, proficiency in English must be shown by a minimum score of 89 on the TOEFL or 7 on the IELTS test.

Digital Learning Programs

The School of Engineering offers two degree programs online: an M.S. in Computer Science, and an M.Eng. in Engineering Management. Courses in these digital learning programs are only available to students enrolled in these online degree programs. For information about admissions, application procedures, and application deadlines for the School of Engineering Digital Learning programs, please visit the website engineeringonline.vanderbilt.edu.

Honors Programs

Honors programs allow selected undergraduate students to develop individually through independent study and research. Honors programs of each major are described in the Courses of Study section.

Requirements vary somewhat but, in general, to qualify for consideration a student should have (a) completed the

technical course requirements of the first two years, (b) attained a minimum grade average of 3.5 in all work taken for credit, and (c) shown evidence indicating a capacity for independent study and/or research. Formal admission is by election of the department concerned. Once admitted, candidates remain in the program only if they maintain a 3.5 or higher grade point average.

Accepted candidates normally begin honors study in the junior year, but exceptions may be made for outstanding seniors.

Successful candidates are awarded Honors in their major. This designation appears on their diplomas.

Study Abroad

Vanderbilt's Global Education Office offers approximately thirty programs that allow students to take engineering or computer science courses in English abroad, in locations ranging from Dublin to Sydney, Madrid to Hong Kong. There are no language prerequisites for these programs. These programs also allow students to take a range of liberal arts core, major core, and elective courses abroad. In no case, after matriculating at Vanderbilt, may a student participate in a Vanderbilt-approved study abroad program through a different university or through an external agency and then seek to transfer that credit into Vanderbilt. Financial aid can be used for study abroad during the academic year, and scholarships are available to support Vanderbilt-approved summer study abroad options. Students are encouraged to discuss with their academic advisers how best to incorporate study abroad into their four-year plans of study. All students who study abroad must register their travel in advance with Vanderbilt's international security provider.

Registration is completed on your behalf when enrolling in a program offered through the Global Education Office. Otherwise, information is available on the GlobalIVU website: vanderbilt.edu/global.

Teacher Education

Students who are interested in preparing for licensure as secondary school teachers should plan their programs in consultation with the associate dean in the School of Engineering and the Director of Secondary Education in the Department of Teaching and Learning at Peabody College. More specific information on professional education course requirements can be found under the Licensure for Teaching chapter in the Peabody College section of this catalog. Inquiries can also be made to the Office of Teacher Licensure at Peabody.

Second Major

It is possible for a student to combine an engineering field with a second area outside the School of Engineering. The student must obtain prior approval of each department and satisfy the requirements of each major, including the requirement regarding minimum grade point average. Students in the School of Engineering may use courses outside the School of Engineering for relevant second majors even if those courses also fulfill a degree requirement.

Certain double majors involving two programs within the School of Engineering have been approved by the faculty. The approved double majors are biomedical engineering/electrical and computer engineering, biomedical engineering/chemical engineering, and chemical/environmental engineering.

Both majors are indicated on the student's transcript. Only one degree is awarded, from the school in which the student is enrolled.

Minors

A minor consists of at least five courses of at least 3 credit hours each within a recognized area of knowledge. A minor offers students more than a casual introduction to an area, but less than a major. A minor is not a degree requirement, but students may elect to complete one or more. Courses may not be taken on a Pass/Fail basis. A minor for which all designated courses are completed with a grade point average of at least 2.000 will be entered on the transcript at the time of graduation.

When a minor is offered in a discipline that offers a major, only those courses that count toward the major may be counted toward the minor. Students should refer to the appropriate sections of this catalog for specific requirements. Minors are offered in computer science, data science, digital fabrication, electrical and computer engineering, energy and environmental systems, engineering management, environmental engineering, materials science and engineering, nanoscience and nanotechnology, quantum information science and engineering, scientific computing, and most disciplines of the College of Arts and Science, Blair School of Music, and Peabody College.

Students declare their intention to pursue a minor by completing the online Major/Minor Declaration/Change workflow process found here: <https://registrar.vanderbilt.edu/registration/forms.php>. Departments and programs usually assign advisers to students who declare minors in their areas. Students are responsible for knowing and satisfying all requirements for the minors they intend to complete.

Focus Areas

Focus areas provide guidance to students wishing to concentrate on a specialized topic within engineering. Focus areas are typically nine credit hours, and qualifying courses are listed in the catalog. Students can declare a maximum of three focus areas; however, a qualifying course cannot be applied to more than one focus area. Students interested in declaring a focus area must do so before the start of their final semester at Vanderbilt. Successful completion of a declared focus area will be designated on a student's transcript upon graduation.

The School of Engineering offers the following focus areas:

- Aerospace
- Biomolecular Engineering
- Engineering Communications
- Human Computer Interaction
- Materials Processing
- Microelectronics
- Nanotechnology
- Product Development
- Risk, Reliability and Resilience in Engineering
- Robotics
- Strategic and Technical Consulting
- Technology Entrepreneurship

Dual Degree Program with Fisk University

A coordinated dual degree program between the Vanderbilt University School of Engineering and Fisk University is especially designed to permit students to obtain an A.B. degree in biology, chemistry, computer science, physics, or mathematics from Fisk and a B.E. degree in engineering from Vanderbilt, generally within five years.

For the first three years, the student is enrolled at Fisk in a science or mathematics curriculum and, by cross-registration in the second and third years, takes introductory engineering courses at Vanderbilt. During the fourth and fifth years, the student is enrolled at Vanderbilt, following principally an engineering curriculum at Vanderbilt and completing necessary courses at Fisk. At the end of five years, the student should be able to satisfy the requirements for both bachelor's degrees.

Financial aid is available for qualified, deserving students. Additional information is available from the director of transfer admissions in the Office of Undergraduate Admissions.

Integrated Bachelor and Master of Engineering

On the basis of recommendations containing favorable appraisals of professional promise, undergraduate students in the School of Engineering who have completed at least 75 hours by the end of the second year with at least a 3.500 grade point average may be accepted into an integrated Bachelor of Engineering–Master of Engineering program. This program is currently available in chemical, civil, environmental, or mechanical engineering. This

program can also be completed with the Master of Engineering degree in Engineering in Surgery and Intervention (ESI) in combination with the bachelor's degree in biomedical, mechanical, electrical and computer engineering, or engineering science. The last two years of a student's program are planned as a unit.

With the approval of the student's adviser, the director of graduate studies in the student's major department, and the senior associate dean for undergraduate education, students apply through the senior associate dean for graduate education for admission to this integrated dual degree program. Upon admission to this program, a second "career" will be set up for the student which will allow the student to start taking graduate courses (course numbers > 5000) during the junior and senior years. These courses will be credited toward the master of engineering.

Note that no double counting of courses is allowed (i.e., the student must meet the degree requirements for each degree independent of the other degree). No more than 18 total credit hours between the two careers can be taken in a single semester. The student typically receives the bachelor's degree at the end of the fourth year and completes the master of engineering during the fifth year. Further information can be obtained from the director of graduate studies of the student's major department.

Accelerated Graduate Program in Engineering

Students who enter Vanderbilt with a significant number of credits, earned either through Advanced Placement or International Baccalaureate tests or in college courses taken during high school, may be eligible for the Accelerated Graduate Program in Engineering. Through this program, a student is able to earn both a bachelor's degree and a master of science in about the same time required for the bachelor's degree or slightly longer. To be eligible for the program, a student must complete 86 hours (senior standing) by the end of the sophomore year with at least a 3.500 grade point average. With the approval of the student's adviser, the director of graduate studies in the student's major department, and the senior associate dean for undergraduate education, students apply through the senior associate dean for graduate education for admission to this accelerated dual degree program. Upon admission to this program, a second "career" will be set up for the student which will allow the student to start taking graduate courses (course numbers > 5000) during the junior and senior years. These courses will be credited toward the master of science.

Note that no double counting of courses is allowed (i.e., the student must meet the degree requirements for each degree independent of the other degree). No more than 18 total credit hours between the two careers can be taken in a single semester. The student receives the bachelor's degree at the end of the fourth year and typically spends the summer finishing a master's thesis to complete the master of science. Further information can be obtained from the director of graduate studies of the student's major department.

Honors in the School of Engineering

[Founder's Medal](#)

[Latin Honors Designation](#)

[Dean's List](#)

[Honor Societies](#)

[Other Awards and Prizes](#)

Founder's Medal

The Founder's Medal, signifying first honors, was endowed by Commodore Cornelius Vanderbilt as one of his gifts to the university. The recipient is named by the dean after consideration of faculty recommendations and the grade point averages of the year's summa cum laude graduates.

Latin Honors Designation

Honors noted on diplomas and published in the Commencement Program are earned as follows:

Summa Cum Laude. Students whose grade point average equals or exceeds that of the top 5 percent of the previous three years' School of Engineering graduating seniors.

Magna Cum Laude. Students whose grade point average equals or exceeds that of the next 8 percent of the previous three years' School of Engineering graduating seniors.

Cum Laude. Students whose grade point average equals or exceeds that of the next 12 percent of the previous three years' School of Engineering graduating seniors.

Dean's List

The Dean's List recognizes outstanding academic performance in a semester. Students are named to the Dean's List when they earn a grade point average of at least 3.500 while carrying 12 or more graded hours, with no temporary or missing grades in any course (credit or non-credit) and no grade of *F*. Dean's List designations are posted to the Academic Record in YES.

Honor Societies

ALPHA ETA MU BETA, the National Biomedical Engineering Honor Society, was installed at Vanderbilt University in 1998 and re-established in 2019. AEMB was established in 1979 to recognize and encourage excellence in the field of biomedical engineering and bioengineering.

TAU BETA PI. The Tennessee Beta chapter of the Tau Beta Pi Association was installed at Vanderbilt University 7 December 1946. Members of Tau Beta Pi are selected from undergraduate students in the School of Engineering who have completed at least four semesters of required work, are in the upper eighth of their class scholastically, and have shown marked qualities of character and leadership; seniors in the upper fifth of their class scholastically are also eligible for election.

CHI EPSILON. The Vanderbilt chapter of Chi Epsilon, installed 18 March 1967, is restricted to undergraduate civil engineering students in the top third of their class. Election is based on grade point average, faculty recommendation, and exceptional achievements in extracurricular campus activities.

ETA KAPPA NU. The Epsilon Lambda chapter of the Eta Kappa Nu Association was established 22 April 1966. Undergraduate members are selected from the upper third of the class in electrical and computer engineering. Eta Kappa Nu recognizes leadership and scholastic accomplishment twice annually, selecting members also from the professional body of practicing engineers.

PI TAU SIGMA. The Delta Alpha chapter of Pi Tau Sigma was installed on the Vanderbilt campus 22 April 1971, for the purpose of recognizing scholastic achievement and professional promise in junior and senior mechanical engineering students. Students are elected to membership twice each year on the basis of academic excellence and recommendations from the faculty and chapter members.

SIGMA XI. The Vanderbilt chapter of the Society of the Sigma Xi recognizes accomplishment, devotion, and originality in scientific research. Associate members are elected annually from graduate-level students of the university.

HONOR SOCIETIES FOR FIRST-YEAR STUDENTS. First-year students who earn a grade point average of 3.5 or better for their first semester are eligible for membership in the Vanderbilt chapter of Phi Eta Sigma and Alpha Lambda Delta.

Other Awards and Prizes

DEAN'S AWARD FOR OUTSTANDING SERVICE. Awarded to the senior candidate in the School of Engineering who has shown remarkable leadership qualities and who has also made the greatest contribution in personal services to the

school.

DEAN'S AWARD FOR OUTSTANDING SCHOLARSHIP. Awarded to each member of the senior class who graduates summa cum laude.

PROGRAM AWARDS. The faculty associated with each of the departments of the school annually bestows a certificate and a prize to one member of the graduating class who is judged to have made the greatest progress in professional development during his or her undergraduate career.

AMERICAN INSTITUTE OF CHEMISTS AWARD. Awarded to an outstanding undergraduate student majoring in chemical engineering on the basis of a demonstrated record of leadership, ability, character, scholastic achievement, and potential for advancement of the chemical professions.

GREG A. ANDREWS MEMORIAL AWARD. Endowed in 1969 and awarded to the senior in civil engineering who has been judged by the faculty to have made the greatest progress in professional development and who plans to do graduate work in environmental and water resources engineering.

THOMAS G. ARNOLD PRIZE. Endowed in 1989 and awarded by the biomedical engineering faculty to the senior(s) who presents (present) the best design of a biomedical engineering system or performance of a research project in the application of engineering to a significant problem in biomedical science or clinical medicine.

WALTER CRILEY PAPER AWARD. Endowed in 1978 and awarded in electrical and computer engineering for the best paper on an advanced senior project in electrical engineering.

JAMES SPENSER DAVIS AWARD. Given annually by the student chapter of Eta Kappa Nu in memory of Mr. Davis, this award recognizes excellence in the undergraduate study of electronics.

ARTHUR J. DYER JR. MEMORIAL PRIZE. Endowed in 1938 and awarded in civil engineering to the member of the senior class doing the best work in structural engineering.

WALTER GILL KIRKPATRICK PRIZE IN CIVIL ENGINEERING. Endowed and awarded in the School of Engineering to the most deserving third-year undergraduate student in civil engineering.

WILLIAM A. MA AWARD. Awarded to an outstanding senior majoring in chemical engineering on the basis of a demonstrated record of leadership and scholastic achievement.

WILSON L. AND NELLIE PYLE MISER AWARD. Awarded to the senior engineering student who has been judged by the faculty of mathematics to have excelled in all aspects of mathematics during his or her undergraduate career.

STEIN STONE MEMORIAL AWARD. Endowed in 1948 and awarded in the School of Engineering to the member of the graduating senior class who has earned a letter in sports, preferably in football, and who is adjudged to have made the most satisfactory scholastic and extramural progress as an undergraduate.

ROBERT D. TANNER UNDERGRADUATE RESEARCH AWARD. Awarded to a senior who, in the judgment of the chemical engineering faculty, has conducted at Vanderbilt University the best undergraduate research project.

W. DENNIS THREADGILL AWARD. Awarded to a graduating chemical engineering senior for outstanding achievement in the undergraduate program in honor of a former faculty member and department chair.

Engineering Courses of Study

1000-1999: Lower-level introductory courses. Generally no prerequisite.

2000-2999: Intermediate undergraduate courses. May have prerequisite courses.

3000-4999: Upper-level undergraduate course. Usually have prerequisite courses.

5000+: Courses for graduate credit.

Bracketed numbers indicate semester hours credit, e.g., [3].

W symbols used in course numbers designate courses that meet departmental writing requirements.

Abbreviations

BME	Biomedical Engineering
CE	Civil Engineering
CHBE	Chemical and Biomolecular Engineering
CS	Computer Science
DF	Digital Fabrication
DS	Data Science
ECE	Electrical and Computer Engineering
ENGM	Engineering Management
ES	Engineering Science
ENVE	Environmental Engineering
ME	Mechanical Engineering
MSE	Materials Science and Engineering
NANO	Nanoscience and Nanotechnology
SC	Scientific Computing

The First Year

The first-year curriculum for all engineering disciplines is:

Specimen Curriculum

FALL SEMESTER		Semester hours
CHEM 1601, 1601L	General Chemistry and Laboratory	4
MATH 1300	Accelerated Single-Variable Calculus I	4
ES 1401-1403	Introduction to Engineering	3
	Elective (Liberal Arts Core Elective preferred)	3
ES 1115	First-year Engineering Seminar (optional)	1
VV 0700	Vanderbilt Visions	0
	Total	14-15

SPRING SEMESTER		Semester hours
Basic Science†	Basic Science Course with Laboratory (requirements depend upon major)	4
MATH 1301	Accelerated Single-Variable Calculus II	4
PHYS 1601, 1601L	General Physics I and Laboratory	4
CS 1100, 1101, 1103, or 1104*	Computer Science Course	3
ES 1001	Engineering iCommons Seminar (optional)	1
	Total	15-16

† Biomedical engineering, chemical engineering, and environmental engineering majors must take CHEM 1602 and 1602L; electrical and computer engineering, and mechanical engineering majors must take MSE 1500 and 1500L or CHEM 1602 and 1602L; civil engineering majors must take MSE 1500 and 1500L; and engineering science majors should consult their program's basic science and technical elective requirements for approved courses.

* Computer science majors must take CS 1101 or 1104. Electrical and computer engineering majors must take CS 1100 or 1101 or 1104. Civil engineering and environmental engineering majors must take CS 1100 or 1101 or 1103.

COURSES OFFERED: [BME](#)

The foundations of biomedical engineering are the same as those in other engineering disciplines: mathematics, physics, chemistry, and engineering principles. Biomedical engineering builds on these foundations to solve problems in biology and medicine over the widest range of scales-from the nanoscale and molecular levels to the whole body. Biomedical engineering provides a robust platform for employment in the medical device and instrumentation industries as well as careers in companies that specialize in the development and application of biologics, biomaterials, computation, implants and processes. Our graduates gain entry into nationally recognized graduate schools for continuing studies in biomedical engineering.

Biomedical engineering is also a rigorous path for admission to and success in medical school for those students willing and able to excel in mathematics, physics, chemistry, biology, physiology, and engineering.

The Department of Biomedical Engineering at Vanderbilt is unique among biomedical engineering programs in its immediate proximity to the world class Vanderbilt Medical Center, located on our compact campus. Our School of Medicine is among the top ten in funding from the National Institutes of Health and includes a National Cancer Institute- recognized Comprehensive Cancer Center, a major children's hospital and a Level I trauma center. This proximity and the strong relationships among faculty across multiple schools stimulate high impact research and provide unique educational and research opportunities for students.

Degree Programs. The Department of Biomedical Engineering offers courses of study leading to the B.E., M.S., M.Eng., and Ph.D. Vanderbilt biomedical engineering is a well-established program with undergraduate degrees granted continuously since 1965. Our undergraduate curriculum undergoes regular review and revision to ensure relevancy and to maintain full ABET accreditation. Students have complete flexibility in the selection of biomedical engineering, technical, and open electives. This allows students to design their own focus areas such as regenerative medicine and tissue engineering, wearables and point-of-care diagnostics, global health, surgery and engineering, robotics and prosthetics, lasers and medicine, medical imaging, biotechnology and nanomedicine, medical technology and entrepreneurship.

Facilities. The Department of Biomedical Engineering is located in Stevenson Center. Undergraduate instructional laboratories are equipped for study of biomedical processes, measurement methods and instrumentation. These facilities are equipped with embedded systems for instrumentation, design, and testing that mirror professional practice. Specialized facilities for biomedical imaging, biophotonics, cell and tissue culture, microfabrication, surgery and intervention, and nanoengineering are used both for faculty-led research and instructional purposes.

Undergraduate Honors Program. With approval of the Honors Program director, junior and senior students in biomedical engineering who have achieved a minimum grade point average of 3.5 may be accepted into the undergraduate Honors Program. Students in the program take at least 6 credit hours of 5000-level or above (graduate) biomedical engineering courses, which can be counted toward the 127-hour undergraduate degree requirements as biomedical engineering electives or which can be taken for graduate school credit. Students in the Honors Program must also complete a two-semester-long research project and present a research report; this is generally accomplished through the BME 3860 and 3861 Undergraduate Research elective courses. Honors students must make a grade point average of 3.0 in these classes and maintain an overall 3.5 GPA to be designated as an honors graduate. The diploma designation is Honors in Biomedical Engineering.

Curriculum Requirements

The B.E. in biomedical engineering requires a minimum of 127 hours, distributed as follows:

1. Mathematics (15 hours): MATH 1300, 1301, 2300, 2400.
2. Basic Science (20 hours): CHEM 1601, 1601L, 1602, 1602L; PHYS 1601, 1601L, 1602, 1602L; BSCI 1510, 1510L.
3. Engineering Fundamentals (6 hours): ES 1401, 1402, 1403; CS 1100 or 1101 or 1103 or 1104. (CS 1103 is strongly recommended except for students minoring in Computer Science).
4. Electrical Engineering (3 hours): ECE 2112.
5. Biomedical Engineering (38 hours): BME 2100, 2301, 2302, 2400, 2900W, 3000, 3301, 3301L, 3302, 3302L, 3400, 3500, 3900W, 4901W, 4950, 4951, 4959.
6. Biomedical Engineering electives (12 hours) comprising:
 1. BME courses numbered 2210 and higher (except BME 2860 and designated sections of 3890–3893) to include up to 6 hours total of BME 3860, 3861.
 2. Any one of the following: CHBE 4500, 4800, 4805, 4810, 4820, 4870; ECE 3214, 4353, 4354; ENVE 4610; ME 2220.

7. Technical electives (9 hours) comprising:

1. BME, CHBE, CE, CS, DF, DS, ECE, ENGM, ENVE, ME, MSE, NANO, and SC courses numbered 2000 or higher except CHBE 3300, CE 2200, DS 2100, 3850, 3851, ENGM 2160, 2440, 3100, 3350, 4800, ME 2171, and courses numbered 2860. Up to 3 hours of independent study courses in these subject areas may be taken as technical electives. Up to 6 hours of Undergraduate Research (3860, 3861), summed across all programs in these disciplines, may be counted as BME electives and/or technical electives.
 2. ES 3230, 3231, and 3232
 3. Courses numbered 2000 or higher in the College of Arts and Science listed in the mathematics and natural sciences (MNS) AXLE distribution category except MATH 2610, 2810, 2820, and 3000.
 4. BSCI 1511, 1511L; MHS 1500, 1600.
8. Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering.
9. Open electives (6 hours).

Undergraduates in biomedical engineering may apply the pass/fail option only to courses taken as liberal arts core or open electives, subject to school requirements for pass/fail.

Note: Certain mathematics and physics courses cannot be credited to a School of Engineering degree. Please see the [Degree Programs in Engineering/Mathematics and Physics](#) section of the catalog for more information.

Double Majors

- I. The double major in biomedical engineering and electrical and computer engineering requires a minimum of 129 semester hours. A specimen curriculum for the double major with electrical and computer engineering can be found on the biomedical engineering department's website. The requirements include those numbered 1, 2, and 8 for the B.E. in biomedical engineering and the following:
 - a. Engineering Fundamentals (6 hours): ES 1401, 1402, 1403; CS 1100, 1101, or 1104.
 - b. Biomedical Engineering Core (31 hours): BME 2100, 2301, 2302, 2400, 2900W, 3000, 3302, 3302L, 3500, 3900W, 4901W, 4950, 4951, 4959.
 - c. Biomedical Engineering Electives (3 hours): BME courses numbered 2210 and higher (except BME 2860, 3301, 3301L, 3400 and designated sections of 3890–3893).
 - d. Electrical Engineering Core (18 hours): ECE 2112, 2112L, 2123, 2123L, 2214, 3235, 3235L; ECE 2201 or 2204.
 - e. Electrical and Computer Engineering Electives (18 hours) selected as described by item 6 of the Curriculum Requirements in the Electrical and Computer Engineering section of the catalog, but totaling at least 18 hours. The courses must include:

- at least 9 hours in one and at least 6 hours in another of the Areas of Concentration listed under Electrical and Computer Engineering in the Undergraduate Catalog. BME 3302 and 3302L may be included toward satisfying the Area of Concentration requirement but cannot be counted as an Electrical and Computer Engineering elective.
 - at least one Design Domain Expertise course as designated in the catalog.
- II. The double major in biomedical and chemical engineering requires a minimum of 131 hours and is described in the chemical engineering section of the catalog under its curriculum requirements.

RESEARCH ASSISTANT PROFESSORS Karan Arora, Peifu Chang, Pavan Chaturvedi, Clinton M. Hasenour, Hyosung Kim, Bo Li, Hongjun Liu

ADJUNCT ASSISTANT PROFESSORS Bryan R. Beyer, Ashley P. Chapman

ADJUNCT INSTRUCTOR Ryan A. Kirkland

COURSES OFFERED: [CHBE](#)

Chemical engineers play key roles in the development and production of commodity chemicals, pharmaceuticals, and bioengineered materials, high strength composites and specialty polymers, semiconductors and microelectronic devices, and a wide range of ultrapure fine chemicals. Indeed, chemical engineering is essential for the operation of contemporary society. The solutions to many of the problems that we face today—e.g., energy, the environment, development of high-performance materials—will involve chemical engineers.

Vanderbilt's undergraduate program in chemical engineering prepares students to contribute to the solution of these and similar problems. Our graduates find meaningful careers in industry, in government laboratories, and as consultants. Some continue their education through graduate studies in chemical engineering, medicine, law, or business.

Mission. The mission of the Department of Chemical and Biomolecular Engineering is to educate those who will advance the knowledge base in chemical engineering, become practicing chemical engineers, and be leaders in the chemical and process industries, academia, and government; to conduct both basic and applied research in chemical engineering and related interdisciplinary areas; and to provide service to the chemical engineering profession, the School of Engineering, Vanderbilt University, the country, and the world.

Degree Programs. The Department of Chemical and Biomolecular Engineering offers the B.E. in chemical engineering and graduate study leading to the M.Eng., M.S., and Ph.D.

Undergraduate chemical engineering students acquire a solid background in mathematics, chemistry, biology, physics, and computing. The chemical engineering program has as its basis courses in transport phenomena, thermodynamics, separations, and kinetics. Other courses deal with the principles and techniques of chemical engineering analysis and design, along with economic analysis, process control, chemical process safety, bioprocessing, process simulation, and engineering ethics. Laboratory courses offer the student an opportunity to make fundamental measurements of momentum, heat, and mass transport and to gain hands-on experience with bench scale and small scale pilot-plant equipment, which can be computer controlled. Effective report writing and technical communication are principal skills gained in the laboratory and design courses. Many students carry out individual research projects.

A specimen curriculum for a chemical engineering major follows. This standard program includes electives that students, in consultation with their faculty advisers, select to pursue breadth or a minor or focus area with their chemical engineering major. Specimen curricula with emphases in specific areas are available on the department website. Double majors may be arranged in consultation with a faculty adviser.

Students are recommended to take the Fundamentals of Engineering Examination (FE) in their senior year. This is the first step in obtaining a license as a professional engineer.

Undergraduate Honors Program. The Honors Program in chemical engineering provides an opportunity for selected students to develop individually through independent study and research. General requirements are described in the Special Programs chapter. The chemical and biomolecular engineering department requires a minimum overall GPA of 3.5. Acceptance to the program is made by petition to the faculty during the junior year. Transfer students may be considered for admission after completing one semester at Vanderbilt. Candidates for honors choose their technical courses with the consent of a faculty honors adviser. Requirements include at least 6 hours of CHBE courses numbered 5000 or above, plus 6 hours of CHBE 3860 and 3861 taken in the junior and/or senior year under the direction of a faculty honors adviser. A formal written research report is submitted each semester CHBE 3860 or 3861 is taken with a final report and presentation given in the spring semester of the senior year to the CHBE faculty and students. The diploma designation is Honors in Chemical Engineering.

Facilities. The Chemical and Biomolecular Engineering department is located in Olin Hall. Undergraduate instructional laboratories are equipped for study of transport phenomena, unit operations, kinetics, and process control. Current research areas for which facilities are available include biochemical engineering and biotechnology; materials processing and characterization; colloid and surface science; molecular modeling; energy and the environment.

Curriculum Requirements

The B.E. in chemical engineering requires a minimum of 125 hours, distributed as follows:

1. Mathematics (14 hours): MATH 1300, 1301, 2300, 2420.
2. Basic Science (24 hours): CHEM 1601, 1601L, 1602, 1602L, 2221, 2221L, 2222, 2222L; PHYS 1601, 1601L, 1602, 1602L.
3. Engineering Fundamentals (6 hours): ES 1401, 1402, 1403; CS 1100 or 1101 or 1103 or 1104 (CS 1100 is recommended except for students minoring in Computer Science).
4. Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering.
5. Chemical and Biomolecular Engineering (42 hours): CHBE 2100, 2200, 2250, 2900W, 3200, 3250, 3300, 3350, 3600, 3900W, 4500, 4900W, 4950W, 4951W, 4959.
6. Chemical and Biomolecular Engineering electives: 6 hours selected from CHBE courses numbered 4200 or above and ENVE 4625.
7. Statistics (3 hours): One of DS 2100, BME 2400, CE 3300 or MATH 2810
8. Technical electives (6 hours). To be selected from: a) courses numbered 2000 or above in BME, CHBE, CE, CS, DF, ECE, ENVE, ME, MSE, NANO, and SC, except BME 2110, ME 2220 and any course in these disciplines numbered 2860; b) courses numbered 1510 or above in the College of Arts and Science listed in the mathematics and natural sciences (MNS) AXLE distribution category; c) ENGM 3000, 3010, 3300, 3650, 3700, 4500; and d) DS 3100. At least 3 hours must be selected from BSCI 2201, 2520; CHEM 3300, 3310; ENVE 4600 or CHBE courses numbered 4000 and above.
9. Open electives (6 hours).

Undergraduates in chemical engineering, including double majors with chemical engineering, may apply the pass/fail option only to courses taken as open electives, subject to the school requirements for pass/fail. No more than 6 total hours of courses numbered 2860 and courses numbered 3840 to 3885 inclusive may be applied toward degree requirements.

Note: Certain mathematics and physics courses cannot be credited to a School of Engineering degree. Please see the [Degree Programs in Engineering/Mathematics and Physics](#) section of the catalog for more information.

Dual Majors

- I. The double major in chemical engineering and biomedical engineering requires a minimum of 131 semester hours distributed as follows:
 - a. Mathematics (15 hours): MATH 1300, 1301, 2300, 2400.
 - b. Engineering Fundamentals (6 hours): ES 1401, 1403, 1403; CS 1100 or 1101 or 1103 or 1104.
 - c. Basic Science (28 hours): CHEM 1601, 1601L, 1602, 1602L, 2221, 2221L, 2222, 2222L; PHYS 1601, 1601L, 1602, 1602L; BSCI 1510, 1510L.
 - d. Chemical and Biomolecular Engineering (29 hours): CHBE 2100, 2200, 3200, 3250, 3300, 3350, 4900W, 4950W, 4951W, 4959.
 - e. Biomedical Engineering (29 hours): BME 2100, 2301, 2302, 2400, 2900W, 3301, 3301L, 3302, 3302L, 3400, 3500, 3900W, 4959.
 - f. Electrical Engineering (3 hours): ECE 2112.
 - g. CHBE/BME Elective: 3 hours selected from CHBE 4500 (recommended), 4800, 4805, 4810, 4820, 4825, and BME courses numbered 4000 and above except BME 6110. BME 3890 and CHBE 3890 may be substituted upon approval of the Directors of Undergraduate Studies for BME and CHBE.
 - h. Liberal Arts Core (18 hours): To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering.
- II. The major in chemical engineering and with a second major in chemistry requires a minimum of 130 semester hours. The requirements include those numbered 1, 2, 3, 4, and 6 for the B.E. in chemical engineering and the following:
 - a. Chemical and Biomolecular Engineering (39 hours): CHBE 2100, 2200, 2250, 2900W, 3200, 3250, 3300, 3350, 3600, 4500, 4900W, 4950W, 4951W, 4959.

- b. Science (23 hours): CHEM 2100, 2100L, 3010, 3315; 3 hours selected from CHEM courses numbered 3020 and above except 3320, 3600, 3841, 3842, 3860, 3902; either CHEM 4965 and 4966 or 6 hours selected from CHEM 3980, 4980, and 4999; BSCI 1510, BSCI 2520.
- III. The double major in chemical engineering and environmental engineering requires a minimum of 137 semester hours. The requirements include those numbered 1, 2, 3 and 5 for the B.E. in chemical engineering and the following:
- Environmental Engineering Core (24 hours): CE 2120, 3300, 3600, 3705; EES 1510; ENVE 3200, 3200L, 4600, 4625.
 - Environmental Engineering Electives (6 hours) comprising:
 - At least 3 hours selected from CE 4150, 4240, 4425, 4430; ENVE 4305, 4610,
 - At most 3 hours selected from CE 4300; EES 3310, 4550, 4650, 4750; ENVE 4615, 4620,
 - Chemical and Biomolecular Engineering electives: 3 hours selected from CHBE courses numbered 4000 or above (ChBE 4860 is recommended).
 - Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering. To include 6 hours of Global Perspective Electives selected from ANTH 2150, 2220W, 2224, 2225, 2400, 3130, 3345, 4154; ECON 2170; EES 3333; PHIL 3611; PSCI 3266; SOC 3311, 3312, 3314, 3315, 3316, 3317, 3318, 3319.

COURSES OFFERED: [CE](#)

Vanderbilt's Department of Civil and Environmental Engineering offers a broad-based education in civil and environmental engineering fundamentals, coupled with development of leadership, management, and communications skills to establish a foundation for lifelong learning and flexible career development. This goal requires going beyond technical competence in a balanced education to develop future leaders in the fields of consulting, industry, business, law, government, and research.

B.E. in civil engineering. Civil engineers must be able to face complex problems of modern society involving the development of physical facilities that serve the public while protecting the environment and preserving social values. Challenges facing civil and environmental engineers concern housing, urban transportation, pollution control, water resources development, industrial development, maintaining and advancing our nation's aging infrastructure, and exploring space. Addressing these challenges with today's limited resources requires innovative and original ideas from highly-skilled engineers.

Undergraduates majoring in civil engineering receive a strong background in mathematics, science, engineering science, and engineering design. The program also includes courses in economics, humanities, social sciences, resources management, and public policy. Students participate in design teams and laboratory studies as well as classroom activities. Use of various computer-based methods is integral to problem solving and design.

Vanderbilt's B.E. in civil engineering prepares students for entry-level positions in many specialty areas of civil engineering, as well as many other types of careers, such as business, construction, and law. Today, however, and even more so in the future, professional practice at a high level will require an advanced degree. We recommend that students seriously consider pursuing the M.S. or M. Eng. soon after obtaining the B.E.

B.E./M.Eng. Five Year Program. Students seeking advanced study in civil and environmental engineering may be interested in the combined B.E./M.Eng., enabling students to complete the B.E. in civil engineering and M.Eng. in civil engineering or environmental engineering in five years.

Construction Management Five Year Program. Students seeking advanced study in construction management may be interested in the combined B.E./M.Eng., enabling students to complete the B.E. in civil engineering and M.Eng. in civil engineering (construction management emphasis) in five years.

Undergraduate Honors Program. Recognized with the diploma designation Honors in Civil Engineering, exceptional students may be invited in their junior year to participate in the civil engineering Honors Program. Designed as a unique individualized educational experience, participants work closely with departmental faculty members to tailor a selection of courses that actively immerses them in a selected field of study. Experiences include enrollment in a 3 semester hour independent study course and participation in a summer research internship. Honors Program participants are especially well-prepared to enter graduate study, and they may count the independent study course towards their civil engineering technical electives.

Facilities. The civil engineering laboratory provides for static and dynamic testing of materials and structural components and assemblies. Testing facilities include capabilities of testing composites, metals, and concrete under static loads, fatigue, base acceleration (to simulate seismic events) and intermediate to high speed impacts (to simulate responses to blast events). Full soils testing facilities are available. Hydraulics facilities include several model flow systems to illustrate principles of fluid mechanics and hydrology. The transportation laboratory is computer-based, with emphasis on transportation systems and design, intelligent transportation systems, and geographic information systems. The environmental laboratories are fully supplied with modern instrumentation for chemical, physical, biological, and radiological analysis of soils, sediments, water, wastewater, air, and solid waste. They include equipment for the study of biological waste treatment, physical-chemical waste treatment, containment mass transfer, and state-of-the-art instrumentation. All are available for student use in courses, demonstrations, and research.

Curriculum Requirements

The B.E. in civil engineering requires a minimum of 125 hours, distributed as follows:

1. Mathematics (14 hours). Required courses: MATH 1300, 1301, 2300, 2420.
2. Basic science (16 hours). Required courses: CHEM 1601, 1601L; PHYS 1601, 1601L, 1602, 1602L; MSE 1500, 1500L.
3. Computing (3 hours). Required course: CS 1100 or 1101 or 1103.
4. Engineering Fundamentals (26 hours). Required courses: ES 1401, 1402, 1403; CE 2101, 2200, 2205, 2989, 3700, 3700L; ENGM 2160; ME 2190; MSE 2205.
5. Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering.
6. Open electives (6 hours).
7. Technical electives (3 hours). To be selected from: (a) courses in BME, CHBE, CE, ENVE, ECE, ME, MSE (except any course numbered 2860); (b) MSE (except MSE 3860, 3889, 3890) (c) ENGM 3000, 3010, 3200, 3650; (d) CHEM 1602 and above; (e) PHYS courses above 2000 (astronomy not accepted); (f) MATH 2410 or 2600, and courses 2811 and above (except 3000); (g) all CS courses 2000 and above (except 2860 4959); and (h) DS 3100, 3262. Students with an interest in Structural Engineering are encouraged to take MATH 2410 or 2600 as their technical elective.
8. Civil Engineering Core (27 hours). Required courses: CE 2120, 3100W, 3200, 3205, 3300, 3501, 3705, 4400, 4950, 4951, and 4959.
9. Civil Engineering Program Electives (6 hours). To be selected from: CE 3250, 4150, 4250; ENVE 4610, 4615, 4625, 4800; ENVE 3600.
10. Civil Engineering Design Electives (6 hours). To be selected from: CE 4150, 4200, 4210, 4240, 4250, 4425, 4430, 4500, 4505, 4510; ENVE 4305, 4610, 4625, 4710.

Students may use CE program electives, CE design electives, technical electives, and open electives to gain additional depth and expertise. Students with interests in structural engineering are recommended to take electives such as CE 3250, 4200, 4210, 4211, 4250, 4300, ENVE 4305, and ME 4259, 4275. Students interested in

environmental and infrastructure sustainability engineering are recommended to take electives such as CE 3600, 4100, 4150, 4240, 4300, ENVE 4305, 4600, 4605, 4610, 4615, 4620, 4700, 4705, 4707, 4710, 4715, 4716, and 4720. Specific courses selections should be discussed with their academic adviser. Students desiring advanced topic coverage should also consider 5000- level courses, with approval of their adviser.

Undergraduates in civil engineering may apply the pass/fail option only to courses taken as liberal arts core or open electives, subject to the school requirements for pass/fail.

Note: Certain mathematics and physics courses cannot be credited to a School of Engineering degree. Please see the [Degree Programs in Engineering/Mathematics and Physics](#) section of the catalog for more information.

*To be selected toward satisfying the following degree requirements: 6 hours of Program Electives, 3 hours of Technical Electives, and 6 hours of Open Electives.

Pre-Architecture Advising

Civil engineering students interested in pursuing architecture at the graduate level should include courses that emphasize a broad sense of art and architectural history, including courses in studio art. Before applying to graduate programs, students will need to develop a portfolio of creative work that generally includes drawing, prints, sculpture, photographs, and creative writing. Further information is available at: as.vanderbilt.edu/paa/.

COURSES OFFERED: [CS](#)

The program in computer science blends scientific and engineering principles, theoretical analysis, and actual computing experience to provide undergraduate students with a solid foundation in the discipline. Emphasis is on computing activities of both practical and intellectual interest, and on theoretical studies of efficient algorithms and the limits of computation. Computer facilities are available for class assignments, team projects, and individual studies.

Students are challenged to seek original insights throughout their study. Working in teams, participating in summer internships, supporting student professional organizations, and developing interdisciplinary projects are strongly encouraged.

The computer science major provides an excellent back- ground for medical studies, and the flexibility provided by its many open electives allows students to prepare for medical school while earning a degree in computer science with a normal load in four years. Interested students should discuss their plans with their computer science adviser in the fall of their first year.

In addition to the bachelor of science, the master of science and doctor of philosophy are also awarded in computer science. Computer Science majors in the School of Engineering are encouraged to consider a second major or minor to complement their CS studies. Popular second majors include Mathematics, Economics, HOD and Physics. The second major in Computer Science is accessible to students outside of the School of Engineering. Second major requirements can be found following the engineering specimen curriculum below.

Undergraduate Honors. Honors in Computer Science provides recognition for select undergraduates who have experienced advanced study in computer science. Students who have an overall GPA of 3.5 or better, a GPA of 3.5 or better in computer science classes, and six hours of any combination of undergraduate research (CS 3860, 3861, and 3862) and courses at or above the 6000-level will be granted honors in the computer science program. The diploma designation is Honors in Computer Science.

Curriculum Requirements

The B.S. in computer science requires a minimum of 120 hours, distributed as follows:

1. Mathematics (17-19 hours). Required components:
 - a. Calculus/Linear algebra (14-16 hours). A sequence selected from the following:
 - i. MATH 1300, 1301, 2300, and one of 2410 or 2600, or
 - ii. MATH 1300, 1301, 2500, 2501
 - b. Statistics/Probability (3 hours): MATH 2810, 2820, or 3640.
2. Science (12 hours). To be selected from the following list and include at least one laboratory course: BSCI 1100, 1100L, 1510, 1510L, 1511, 1511L, 2218, 2219; CHEM 1601, 1601L, 1602, 1602L; EES 1510, 1510L; MSE 1500, 1500L; PHYS 1601, 1601L, 1602, 1602L. Advanced Science Courses may be substituted by special permission. Recommended: CHEM 1601, 1601L; PHYS 1601, 1602.
3. Introduction to Engineering (3 hours): ES 1401, 1402, 1403.
4. Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering.
5. Computer Science Core (25 hours).
 - Software/Problem Solving: CS 1101 or 1104, and CS 2201 or ECE 2201, CS 3251 or ECE 3251, and CS 3270.
 - Hardware/Systems: CS or ECE 2281, CS or ECE 2281L, CS 3281.

- Foundations: CS 2212, 3250.

6. Computer Science Depth (15 hours). To be selected from computer science courses numbered 3000 or higher (except CS 3262); ECE 3258, 3265, 3274, 3452, 4260, 4262, 4277, 4278, 4285, 4353, 4354, 4375, 4467, 4475, 4484 and no more than two from MATH 3320, 3620, 4600, 4620. A maximum of 6 hours may come from CS 3860, 3861.
7. Computer Science Project (3 hours). To be selected from CS 3862, 3892, 4239, 4249, 4269, 4279, 4287, 4289, 4359.
8. Computer Science Seminar (1 hour). CS 4959.
9. Technical Electives (6 hours). To be selected from courses numbered 2000 or higher in BME, CHBE, CE, CS, DF, DS, ECE, ENGM, ENVE, ES, ME, MSE, NANO, and SC (except 2860 in any program, ENGM 2440, ENGM 4800, ES 2700, ES 3884, and CS courses numbered below 3000); or courses numbered 2000 or higher in the College of Arts and Science listed in the mathematics and natural science (MNS) AXLE distribution requirements.
10. Open Electives (18–20 hours).
11. Computers and Ethics (3 hours) CS 1151. May be used to satisfy three hours from the Liberal Arts Core (#4) or Open Electives (#10). May not be taken on a pass/fail grading basis by CS majors or minors.
12. Writing Component (3 hours). At least one “W”-designated course or 1111 course in the English Language must be included from the Liberal Arts Core (#4), Technical Electives (#9), or Open Electives (#10).

Undergraduates in computer science may apply the pass/fail option only to courses taken as open electives, technical electives, or part of the liberal arts core, subject to the school requirements for pass/fail.

Note: Certain mathematics and physics courses cannot be credited to a School of Engineering degree. Please see the [Degree Programs in Engineering/Mathematics and Physics](#) section of the catalog for more information.

Second Major in Computer Science for Non-Engineering Students

The second major in computer science for students enrolled outside the School of Engineering requires 40 hours

comprising items 5 and 7 of the curriculum requirements listed above as well as 12 hours of course work as described in item 6. The program name on the transcript is "Computer Science (Secondary Major)".

Courses taken toward the second major may not be taken pass/fail.

Electrical and computer engineering has been at the forefront of the information technology revolution, reshaping the way we live work, and connect. Breakthroughs in large-scale integrated circuits have led to increasingly powerful computers and sophisticated networks, transforming how engineers approach design and problem-solving across every industry.

The electrical and computer engineering curriculum offers a strong interdisciplinary foundation in mathematics, physics, and computer science, alongside core studies in circuit analysis, digital systems, and electronics. Students can tailor their education through dynamic areas of concentration such as photonics and nanomaterials, microelectronics, embedded and cyber-physical systems, robotics, signal and image processing, and medical technologies.

Graduates emerge well-prepared for impactful careers in industry, government, healthcare, law, or academia - with the skills to innovate, lead, and adapt in a rapidly evolving technological landscape.

Undergraduate Honors Program. With faculty approval, junior and senior students may be accepted into the Honors Program. To achieve honors status, the student must:

1. achieve and maintain a minimum GPA of 3.5.
2. complete 3 hours of undergraduate research (ECE 3860, 3861 or CS 3860, 3861) with final written report.
3. complete 6 hours of ECE program elective credit from the following list:
 - a. up to 3 additional hours of undergraduate research (ECE 3860, 3861 or CS 3860, 3861), or
 - b. Design Domain Expertise courses beyond the one course required by the program, or
 - c. 5000-level ECE or CS courses.

The diploma designation is Honors in Electrical and Computer Engineering.

Facilities. Electrical and computer engineering supports undergraduate laboratories emphasizing the principal areas of the disciplines: analog and digital electronics, microcomputers, microprocessors, microelectronics, and instrumentation. In addition, several specialized facilities are available for graduate research: The Vanderbilt Institute of Nanoscale Science and Engineering (VINSE), the Institute for Software Integrated Systems (ISIS), the Institute for Space and Defense Electronics (ISDE), the Vanderbilt Lab for Immersive AI Translation (VALIANT), and the Vanderbilt Institute for Surgery and Engineering (VISE).

The work in electrical and computer engineering is supported by a variety of computers and networks, including the high-performance computing facilities of the Advanced Computing Center for Research and Education. Vanderbilt is one of the founding partners of the Internet II initiative.

Curriculum Requirements

The B.E. in electrical and computer engineering requires a minimum of 122 hours, distributed as follows:

1. Mathematics (18 hours). Required courses: MATH 1300, 1301, 2300, 2400, 2810.
2. Basic Science (16 hours). Required courses: CHEM 1601, 1601L; PHYS 1601, 1601L, 1602, 1602L; MSE 1500, 1500L or CHEM 1602, 1602L.
3. Engineering Fundamentals (6 hours). Required courses: ES 1401, 1402, 1403, ES 2100W.
4. Culminating Design Experience (7 hours). Required courses: ECE 4950, 4951, 4959.
5. Electrical and Computer Engineering Core (21 hours). Required courses: CS 1100 or 1101 or 1104; ECE 2201 or 2204; ECE 2112, 2112L, 2123, 2123L, ECE 2214, 3235, 3235L.
6. Electrical and Computer Engineering Electives (21 hours). To comprise:
 - a. At least 15 hours selected from the Gateway courses and ECE and CS Depth courses listed below.
 - b. other courses listed in the Electrical and Computer Engineering Areas of Concentration below, or ECE or CS courses numbered above 3000 (including ECE 3860, 3861 and CS 3860, 3861).

Additional requirements for (a) and (b) include:

- at least 9 hours completed in one of the four Areas of Concentration listed below.
- at least 6 additional hours completed in a second distinct Area of Concentration listed below.
- at least one Design Domain Expertise course as designated below taken before ECE 4951.
- courses with associated labs require completion of both the lecture and lab portions to count as Electrical and Computer Engineering Electives.
- courses count in only one Area of Concentration; they cannot be double counted

7. Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering.

8. Technical electives (12 hours).

- a. (6-12 hours). At least 6 hours must be taken from this list of approved engineering technical electives: (excluding all courses numbered 2860); BME; CHBE (except 2150, 2900W); CE; CS (except 1000, 1101, 1103, 1104, 1151); DF 2100; DS 3100; ECE (above basic requirement in sections 5 and 6 above); ENGM 3010; ENVE; ES 3300; ME; MSE (except 1500, 1500L); NANO 3000; SC 3250, 3260
- b. (0-6 hours). Up to 6 hours may be taken from this list of optional technical electives: ENGM 2160, 2210, 3000, 3100, 3300, 3650, 4500; MSE 1500, 1500L (if CHEM 1602, 1602L is used for basic science requirement); Astronomy (except 1010, 1111, 2130); Biological Sciences (except 1111); Chemistry (except 1010, 1020, 1601, 1602, 1111); Earth and Environmental Sciences (except 1080, 1111, 2150); Mathematics 2410 and above; Neuroscience 2201, 3269, 4961; Physics above 2000; Psychology 2100, 3780

9. Open Elective (3 hours).

Note: Certain mathematics and physics courses cannot be credited to a School of Engineering degree. Please see the [Degree Programs in Engineering/Mathematics and Physics](#) section of the catalog for more information.

	PHYS 3640			ME 3204

†Gateway courses provide recommended background and/or prerequisites for the Area of Concentration Depth courses.

*Designates a Design Domain Expertise course.

Double majors have special curricula that require more than 122 hours and a different distribution of electives. See the ECE webpage or the ECE double major adviser for these curricula.

A double major in Biomedical Engineering and Electrical and Computer engineering is offered as a unitary BME-ECE

curriculum, which is described in the Biomedical Engineering section of the catalog under its curriculum requirements. It requires a minimum of 129 semester hours.

Undergraduates in electrical and computer engineering, including double majors in electrical and computer engineering, may apply the pass/fail option only to courses taken as open electives subject to the school requirements for pass/fail.

ASSOCIATE PROFESSORS OF THE PRACTICE Lynne Cooper, Courtney L. Johnson, Grayson McClain

ASSISTANT PROFESSOR OF THE PRACTICE Lina Deng

ADJOINT PROFESSORS OF THE PRACTICE John A. Bers, J. Caleb Clanton

The Division of Engineering Science and Management administers the engineering science major, the engineering management minor, and the first-year introduction to engineering course. The division oversees non-traditional engineering study and advises students on course selection to meet specific career goals that traditional engineering majors may not provide.

COURSES OFFERED: [ENGM](#), [ES](#)

Engineering Science Major (Bachelor of Science)

The engineering science major is flexible and interdisciplinary—offering students the opportunity to select a program of study to meet special interests or objectives. Many students choose a program of study in engineering management, communication of science and technology, various engineering concentrations, environmental science or materials science; however, students may develop unique plans of study to specialize in areas for which facilities and faculty competence exist but which are not covered within a single existing degree program at Vanderbilt. Engineering science graduates may establish careers in engineering or science, interface with engineers (e.g., in marketing and sales), or use their analytical and problem-solving skills to build future professional careers. Defined areas of concentration exist in engineering management, communication of science and technology, secondary education, and materials science and engineering. Individual programs have been developed for students interested in careers in engineering mathematics, environmental engineering, transportation engineering, teaching, technical communications, and other areas requiring nontraditional combinations of engineering courses. Because of the flexible nature of the engineering science programs of study, accreditation has not been sought for these programs of study, and engineering science majors will not qualify for engineering licensure in most states.

Engineering Management. Engineering management is an interdisciplinary program of study designed to give students the tools to manage technology development and innovation, to enhance manufacturing quality and productivity in a competitive international environment, and to implement these objectives successfully in an

organization. Engineering management links engineering, science, and the management disciplines. In addition to the core science and math courses required of all engineering students, topics of study include entrepreneurship, human resources management, finance in technology-based organizations, technology strategy, communications, and operations.

Communication of Science and Technology. Many careers that are attractive to graduates of the engineering science program require the communication of engineering and science to people who are not technically trained. The Communication of Science and Technology interdisciplinary program prepares engineering students for careers in areas such as technical consulting, high-technology marketing and sales, environmental law, and journalism. The program combines traditional engineering and science courses with communications and humanities courses in a flexible curriculum. Engineering science majors may select from a set of program electives identified by the faculty committee of the School of Engineering and the College of Arts and Science that supervises the program.

Minors. Students may also pursue a minor consisting of at least five courses of at least three credit hours within a recognized area of knowledge. Minors are offered in engineering management, materials science and engineering, computer engineering, electrical engineering, computer science, scientific computing, environmental engineering, energy and environmental systems, nanoscience and nanotechnology, and most disciplines within the College of Arts and Science. Students must declare their intention to pursue minors by completing forms available in the Office of Academic Services of the School of Engineering.

Curriculum Requirements

The B.S. in engineering science requires a minimum of 122 hours, distributed as follows:

1. Basic Science (16 hours). CHEM 1601, 1601L plus 12 hours from BSCI 1510, 1510L, 1511, 1511L; CHEM 1602, 1602L; PHYS 1601, 1601L, 1602, 1602L; or MSE 1500, 1500L with two courses in a single discipline.
2. Mathematics (14 hours). MATH 1300, 1301, 2300 and 3 hours from MATH courses numbered 2400 and above.
3. Engineering (44 hours).
 - a. Engineering Fundamentals (12 hours): CS 1100 or 1101 or 1103 or 1104 or DS 1100; ES 1401, 1402, 1403, 2100W; ENGM 3700.
 - b. Engineering Core (12 hours): To be selected from courses in any of the following disciplines: BME, CHBE, CE, CS, DF, DS, ECE, ENVE, MSE, ME, NANO, and SC (except BME 1015, 1016; CS 1000, 1151; DS 1000, 2100; and any course numbered 2860).
 - c. Engineering Electives (15 hours): To be selected from courses in any of the following disciplines: BME, CHBE, CE, CS, DF, DS, ECE, ENGM, ENVE, ES, MSE, ME, NANO, and SC, except BME 1015, 1016; CS 1000, 1151; DS 1000, 2100; ES 1115, 1151, 2700, 3884; ENGM 2440, 4800; and any courses numbered 2860.
 - d. Senior Capstone (5 hours): ES 4950, 4951, 4959.
4. Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering.
5. Open Electives (6 hours).
6. Program Concentration (24 hours). In consultation with the academic adviser, each student must identify a meaningful sequence of courses, not counting certain introductory-level courses, that directly contributes to meeting stated career goals. Program concentrations are approved by the academic adviser and the program director in advance and become part of the student's degree audit.

The preparation provided by the program concentration, together with a solid foundation in basic engineering courses, provides the engineering science student a strong and useful career base.

No more than 24 credit hours of business-related course work (BUS, BUSA, ENGM, FNEC, MGRL) may be applied to the ES degree program. Only one business-related minor (BUS, ENGM, FNEC, MGRL, HOD) may count to a student's academic program. No more than 6 credit hours of courses numbered 3840 to 3879 in any program may be applied to the ES degree program.

Undergraduates in engineering science may apply the pass/ fail option only to courses taken as liberal arts core or open electives, subject to the school requirements for pass/fail. UNIV courses are eligible for open elective credit only. Credit for the senior capstone sequence (5 hours) satisfies the Immersion Vanderbilt requirement.

Note: Certain mathematics and physics courses cannot be credited to a School of Engineering degree. Please see the [Degree Programs in Engineering/Mathematics and Physics](#) section of the catalog for more information.

COURSES OFFERED: [ENVE](#)

B.E. in environmental engineering. The curriculum includes analysis and design courses in environmental engineering. Vanderbilt's B.E. in environmental engineering prepares students for entry-level positions in many specialty areas of environmental engineering, as well as a variety of other careers, such as business, government, and law. The major will provide students with the tools necessary to develop effective solutions to solve emerging and existing issues such as water resources, quality, and treatment; aging infrastructures; climate change and carbon neutral innovations; energy and material resources; wastes and pollution; and other environmental challenges. Recognizing that environmental solutions cannot be realized without consideration of social, cultural,

economic, and political factors, students will be required to extend the breadth of their studies with courses in data science and global perspectives courses in social sciences, economics, political sciences, and the humanities. These will be in addition to foundational courses in the basic and applied sciences, mathematics, engineering, and advanced courses in fate, transport, and treatment of contaminants in the environment. The curriculum culminates with a senior design project in which students will have the opportunity to draw on and integrate the broad knowledge they have gained from the data science and global perspectives courses with the science and engineering knowledge they gained in the major. Due to the complex interdisciplinary nature of the field, many undergraduate students continue their environmental engineering education and earn either a professional (MEng) degree or a graduate (MS or PhD) degree.

Undergraduate Honors Program. The Honors Program in environmental engineering provides an opportunity for selected students to develop individually through independent study and research. The environmental engineering honors program requires a minimum overall GPA of 3.5. Acceptance to the program is made by petition to the faculty during the junior year. Transfer students may be considered for admission after completing one semester at Vanderbilt. Candidates for honors choose their technical courses with the consent of a faculty honors adviser. A three-credit hour independent study course and a summer research internship with a final report and presentation given in the spring semester of the senior year to the ENVE faculty and students are required. The independent study course may also be counted towards the environmental engineering technical electives. The diploma designation is Honors in Environmental Engineering.

Facilities: The environmental laboratories are fully supplied with modern instrumentation for chemical, physical, biological, and radiological analysis of soils, sediments, water, wastewater, air, and solid waste. They include equipment for the study of biological waste treatment, physical-chemical waste treatment, contaminant mass transfer, and state-of-the-art instrumentation. All are available for student use in courses, demonstrations, and research.

Undergraduates in environmental engineering may apply the pass/fail option only to courses taken as open or liberal arts core electives, subject to the school requirements for pass/fail.

A double major in Environmental Engineering and Chemical Engineering is offered as a unitary ChE-ENVE curriculum, which is described in the Chemical Engineering section of the catalog under its curriculum requirements. It requires a minimum of 137 semester hours. Undergraduates in the double major may apply the pass/fail option only to courses taken as open electives, subject to the school requirements for pass/fail.

Curriculum requirements

The B.E. in environmental engineering will require a minimum of 121 hours, distributed as follows:

1. Mathematics (14 hours). Required courses: MATH 1300, 1301, 2300, 2420.
2. Basic science (18 hours). Required courses: CHEM 1601, 1601L, 1602, 1602L; PHYS 1601, 1601L; BSCI 1510; EES 1510.
3. Computing (3 hours). To be selected from: CS 1100 (recommended), 1101 or 1103.
4. Engineering Fundamentals (16 hours). Required courses: ES 1401, 1402, 1403; CE 2200, 3700, 3700L; CHBE 2200 (preferred) or ME 2220, ME 2190.
5. Environmental Engineering Core (25 hours). Required courses: CE 2120, 3300, 3705; ENGM 3700; ENVE 3200, 3200L, 3600, 4605, 4950, 4951, and 4959.
6. Environmental Engineering Program Electives (6 hours). To be selected from: CE 4150, 4240, 4300, 4425, 4430; EES 3310, 4550, 4650, 4750; ENVE 3610, 4305, 4600, 4610, 4615, 4620, 4625, 4700, 4710, 4800.
7. Environmental Engineering Design Electives (6 hours). To be selected from: CE 4150, 4240, 4425, 4430; ENVE 4305, 4610, 4625, 4710.
8. Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed under Degree Programs in Engineering.
9. Global Perspective electives (6 hours). At least 6 hours of courses designated as Global Perspectives must be included in the Liberal Arts Core (#8) or Open Electives (#12). To be selected from ANTH 2150, 2220W, 2224, 2225, 2400, 3130, 3345, 4154; ECON 2170; EES 3333; PHIL 3611; PSCI 3266; SOC 3311, 3312, 3314, 3315, 3316, 3317, 3318, 3319.
10. Data science electives (6 hours). To be selected from: CE 4100, 4320, 4340; CS 2204, 3262, 4262, 4266; DS

3100, 3262; EES 4760; MATH 3620, 3670; ME 4263; SC 3250.

11. Technical electives (3 hours). To be selected from: a) MSE 1500; courses numbered 2000 or above in BME, CHBE, CE, CS, DF, ECE, ENVE, ME, MSE, and, ENGM 3000, 3010, 3200, and 3650, except any course numbered 2860; b) courses numbered 1500 or above in the College of Arts and Science listed in the mathematics and natural sciences (MNS) AXLE distribution category; and c) MATH 2410, 2600, and courses 2811 and above (except 3000).
12. Open electives (6 hours).

Note: Certain mathematics and physics courses cannot be credited to a School of Engineering degree. Please see the [Degree Programs in Engineering/Mathematics and Physics](#) section of the catalog for more information

COURSES OFFERED: [ME](#)

The vitality of our nation depends upon innovation in the design of new machines, devices to satisfy society's needs, engines to produce power efficiently, equipment to condition the environment of our buildings, and the systems to use and control these engineered products. Mechanical engineers are involved in solving problems by originating design concepts, developing products and processes of manufacture, and designing hardware and the systems needed to satisfy society's demands. Mechanical engineers work in virtually all industries.

The study of mechanical engineering requires a basic understanding of mathematics, chemistry, physics, and the engineering sciences. Mechanical engineering education emphasizes solid mechanics; dynamics of machines; aerodynamics; propulsion devices; material behavior; power producing and environmental conditioning processes; control of dynamics of machines; energy conversion; and the synthesis, development, evaluation, and optimization of designs of devices and systems.

Degree Programs. The Department of Mechanical Engineering offers the B.E., M.Eng., M.S., and Ph.D. in mechanical engineering.

The curriculum in mechanical engineering leading to a bachelor of engineering provides a broad-based engineering education with opportunities for the student to elect courses in areas of study related to any industry and, with careful planning of the elective courses, to achieve some specialization. The mechanical engineering program prepares an individual to become a practicing engineer who can participate fully in the engineering activities of design, building, operation, production, maintenance, safety, marketing, sales, research, and administration.

Undergraduate Honors Program. See the Special Programs chapter for general requirements of the professional Honors Program in mechanical engineering. Honors candidates choose their technical elective courses with the advice and consent of an honors adviser. Each candidate is expected to take 3 hours of ME 3860 in a single semester and at least 6 hours of graduate courses numbered 5000 or higher, including one course numbered 8000 or higher. A formal written honors thesis on the candidate's research must be approved by the honors adviser and the department chair. Honors candidates shall meet all Engineering School requirements in the nontechnical areas. The diploma designation is Honors in Mechanical Engineering.

Facilities. Undergraduate instructional laboratories are equipped for studies in heat and power, refrigeration and air-conditioning, fluid flow, heat transfer, design, controls, robotics, instrumentation, and biomechanics. Specialized facilities for robotic surgery, rehabilitation robotics, energy storage, medical microfluidics, thermal transport, combustion characterization, and photonics are used for both faculty-led research and instruction. The department also maintains various maker spaces including machine shops and design studios for fabrication of experimental equipment and for instruction.

Curriculum Requirements

The B.E. in mechanical engineering requires a minimum of 126 hours, distributed as follows:

1. Mathematics (17 hours). Required courses: MATH 1300, 1301, 2300, 2420. Required elective: MATH courses numbered 2410 and above, except MATH 3000.
2. Basic Science (16 hours). Required courses: CHEM 1601, 1601L; MSE 1500, 1500L (or CHEM 1602, 1602L); PHYS 1601, 1601L, 1602, 1602L.
3. Engineering Science (25 hours). Required courses: ES 1401, 1402, 1403; CE 2200, 2205; CS 1100 or 1101 or 1103 or 1104 or DS 1100; ECE 2112; ME 2190, 2220, 3224; MSE 2205.
4. Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering.
5. Open electives (6 hours).
6. ME core (26 hours). ME 2160, 2171, 3202, 3204, 3234, 3248, 4213, 4950, 4951, and 4959
7. Technical electives (9 hours). To be selected from the following approved courses. Courses selected from the College of Arts and Science must be designated a Mathematics and Natural Sciences (MNS) course in the AXLE curriculum.
 - a. Courses in BME, CHBE, CE, CS, DF, DS, ECE, ENGM, ENVE, ES, MSE, ME, NANO, and SC except BME 1016, CS 1000, 1151; DS 1000, 3850, 3851, 3891; ENGM 2440, 3350, 4800; ES 1511, 2700, 2900, 3884; and any course numbered 2860
 - b. Mathematics courses numbered 2420 or higher except MATH 3000
 - c. Chemistry courses numbered 2000 or higher
 - d. Physics courses numbered 2000 or higher
 - e. Astronomy courses
 - f. Biological Science courses
 - g. Earth and Environmental Science courses
 - h. Neuroscience courses

At least 3 hours of technical electives must be numbered 2000 or above.

8. Professional (ME) depth (a minimum of 9 hours). Each student must choose at least 9 hours of ME elective courses. No more than 6 hours of 3850 and 3860 combined can be credited toward ME depth electives.

No one-credit-hour ME course except 3841 can be used as a mechanical engineering elective. A maximum of three one-credit-hour ME courses may be used as technical electives. Additional ME one-credit-hour courses can be open electives. At least one "W"-designated course (3 hours) in the English language must be included on a graded basis.

Undergraduates in mechanical engineering may apply the pass/fail option only to non-departmental courses taken as open electives, technical electives, or part of the liberal arts core, subject to the school requirements for pass/fail.

Note: Certain mathematics and physics courses cannot be credited to a School of Engineering degree. Please see the [Degree Programs in Engineering/Mathematics and Physics](#) section of the catalog for more information.

[Digital Fabrication](#)

[Electrical and Computer Engineering](#)

[Energy and Environmental Systems](#)

[Engineering Management](#)

[Environmental Engineering](#)

[Materials Science and Engineering](#)

[Nanoscience and Nanotechnology](#)

[Quantum Information Science and Engineering](#)

A minor consists of at least five courses of at least 3 credit hours each within a recognized area of knowledge. A minor offers students more than a casual introduction to an area, but less than a major. A minor is not a degree requirement, but students may elect to complete one or more. Courses may not be taken on a Pass/Fail basis. A minor for which all designated courses are completed with a grade point average of at least 2.000 will be entered on the transcript at the time of graduation.

When a minor is offered in a discipline that offers a major, only those courses that count toward the major may be counted toward the minor. Students should refer to the appropriate sections of this catalog for specific requirements. Minors are offered in computer science, digital fabrication, electrical and computer engineering, energy and environmental systems, engineering management, environmental engineering, materials science and engineering, nanoscience and nanotechnology, quantum information science and engineering, scientific computing, and most disciplines of the College of Arts and Science, Blair School of Music, and Peabody College.

Students declare their intention to pursue a minor by completing the online Major/Minor Declaration/Change workflow process found here: <https://registrar.vanderbilt.edu/registration/forms.php>. Departments and programs assign advisers to students who declare minors in their areas. Students are responsible for knowing and satisfying all requirements for the minors they intend to complete.

DIRECTOR Aniruddha Gokhale

The program in computer science blends scientific and engineering principles, theoretical analysis, and actual computing experience to provide undergraduate students with a solid foundation in the discipline. Emphasis is on computing activities of both practical and intellectual interest, and on theoretical studies of efficient algorithms and the limits of computation. Computer facilities are available for class assignments, team projects, and individual studies.

The minor in computer science requires 15–16 hours of computer science courses as follows:

1. Programming: CS 1101 or 1104	3 hours
2. Discrete Structures: CS 2212	3 hours
3. Intermediate Computer Concepts: CS 2201 or ECE 2201	3 hours
4. CS 2281 (and 2281L) or ECE 2281 (and 2281L); or CS 3250; or CS 3251 or ECE 3251	3-4 hours
5. One additional CS course numbered 3000 or above (excluding CS 3262)	3 hours
Total:	15-16 hours

RESEARCH ASSOCIATE PROFESSORS Kevin C. Galloway (Mechanical Engineering), W. Timothy Holman (Electrical and Computer Engineering)

ASSISTANT PROFESSORS OF THE PRACTICE Romina Del Bosque (Biomedical Engineering), David C. Florian (Chemical and Biomolecular Engineering)

COURSES OFFERED: [DF](#)

Industry 4.0, or the fourth industrial revolution, is rapidly changing how companies manage their supply chains and manufacture their products. New digital and physical technologies, including advanced materials, additive manufacturing, and software packages that employ machine learning to optimize both the geometry and function of parts and processes, have reached a level performance that enables their widespread integration throughout manufacturing operations. Digital fabrication is the process of converting ideas to physical products through computer-driven design and manufacturing. Every aspect of the design process can be simulated, from materials selection to the toolpaths used to manipulate those materials. Consequently, digital fabrication technologies more efficient manufacturing of prototypes and commercial parts. This minor is intended for students who are interested in 3D printing, computer aided design (CAD), and product development.

The minor in Digital Fabrication prepares students for this area by providing both classroom and hands-on instruction in advanced technologies used to prototype physical devices through computer-controlled design and

manufacturing. Students will learn how to scale-up production of their prototypes through both traditional and additive-based manufacturing techniques. Students will gain experience through foundational courses for the minor and expand their application through electives often related to their major. The Vanderbilt makerspace ecosystem provides students in the minor with hands-on experiences that allow them to design, construct, and iterate prototype devices using in-house state-of-the-art equipment. This laboratory component enhances the competitiveness of students to both employers and graduate schools.

The minor in digital fabrication requires 15 credit hours, distributed as follows:

1. Programming: One of CS 1100, DS 1100, CS 1103, CS 1104, or CS 2201	3 hours
2. Prototyping Core: DF 2100, CHBE 4200	6 hours
3. Elective courses: To be selected from the following list of approved subjects, which may include no more than one (3 hour) ENGM course	6 hours
Total:	15 hours

School of Engineering:

BME 2210 Biomaterial Manipulation

BME 3500 Biomedical Materials: Structure-Property Relationships and Applications

BME 3750 Low Resource Bioengineering

BME 3800 3D Computer Drafting in Design

BME 4100 Lasers in Surgery and Medicine

BME 4250 Mobile Application Design for Healthcare

BME 4530 Synthetic Biology and Cell Design

CE 4211 Mechanics of Composite Materials

CE 4425 Building Information Modeling

CHBE 4840 Synthesis and Applications of 2D Nanomaterials

CHBE 4850 Semiconductor Materials Processing

CHBE 4870 Polymer Science and Engineering

CS 3258 or ECE 3258 Introduction to Computer Graphics

CS 3259 Computer Animation Design and Technology

CS 3270 Programming Languages

CS 3274 or ECE 3274 Modeling and Simulation

CS 4249 Projects in Virtual Reality Design

DF 3860 Undergraduate Research in Digital Fabrication

ECE 2123/2123L Digital Systems
ECE 2218/2218L Microcontrollers
ECE 4275 Microelectronic Systems

ECE 4377 FPGA Design
ECE 4385 VLSI Design
ENGM 3300 Technology Assessment and Forecasting
ENGM 3600 Technology-Based Entrepreneurship
ME 1151 Laboratory in Machining
ME 2160 Introduction to Mechanical Engineering Design
ME 3202 Machine Analysis and Design
ME 3273 How to Make (Almost) Anything and Make it Matter
ME 4251 Modern Manufacturing Processes

College of Arts and Science:

ANTH 3867 Digital Archaeology
ARTS 1400 Ceramics
ARTS 2400 Ceramics II
CHEM 3630 Macromolecular Chemistry: Polymers, Dendrimers, and Surface Modifications
CSET 3257 Virtual Reality Design
MHS 2240 Bionic Bodies, Disability Cultures
PHYS 2660 Experimental Nanoscale Fabrication and Characterization

Electrical and Computer Engineering Minor

DIRECTOR W. Timothy Holman

The electrical and computer engineering minor requires a minimum of 17 hours of courses, including the completion of all laboratory corequisites for courses selected for the minor, distributed as follows:

1. Programming: CS 1100, 1101, 1103 or 1104	3 hours
2. Digital Systems: (ECE 2123, 2123L or CS 2123, 2123L) or Computer Architecture: (ECE 2281, 2281L or CS 2281, 2281L)	4 hours
3. Circuits: ECE 2112, 2112L	4 hours
4. At least 6 additional hours of ECE courses numbered above 2000 (excluding ECE 3860, 3861)	6 hours
Total:	17 hours

COURSES OFFERED: [ECE](#)

Energy and Environmental Systems Minor

DIRECTOR Lori Troxel

The minor in energy and environmental systems is designed to provide students with a working knowledge of the fundamentals of energy systems and their impact on the environment. The future health and well-being of humanity hinge in large part on smart production and use of energy, water, and related resources, as these are central determinants of climate change, habitable space, and human and ecological health. This program examines the relationships among individual, institutional, and societal choices for energy production and use, and the impacts and benefits of these choices on the environment and health through climate, water quality, and natural resources. It requires a total of 15 semester hours of course work, some of which may be taken as electives associated with the student's major program. Five courses are required: two core courses and three elective courses taken from at least 2 areas: Area I: Energy Systems, Area II: Environmental Engineering, and Area III: Environmental Survey.

1. ENVE 4615 Environmental Assessments	3 hours
2. CE 4150 Energy Systems Engineering	3 hours
3. Three elective courses taken from at least 2 areas below	9 hours
Total:	15 hours

Area I: Energy Systems

ECE 4267 Power System Analysis

ME 3890 Special Topics: Nuclear Power

ME 4260 Energy Conversion I

ME 4264 Internal Combustion Engines

ME 4265 Direct Energy Conversion

Area II: Environmental Engineering

CE 3600 Environmental Engineering

CE 3705 Water Resources Engineering

ENVE 4305 Enterprise Risk Management

ENVE 4605 Environmental Thermodynamics, Kinetics, and Mass Transfer

ENVE 4620 Environmental Characterization and Analysis

ENVE 4710 Hydrology

ENVE 4800 Nuclear Environmental Engineering

ME 4262 – Environmental Control

Area III: Environmental Survey

ANTH 4154 Energy, Environment, and Culture

CE 4100 Geographic Information Systems

CE 4430 High Performance and Green Buildings

EES 1080 Earth and the Atmosphere

EES 2110 Introduction to Climate Change

PHIL 3611 Environmental Philosophy

SOC 3315 Human Ecology and Society

Engineering Management Minor

DIRECTOR Yiorgos Kostoulas

Affiliated Faculty

PROFESSORS OF THE PRACTICE David A. Berezov, Yiorgos Kostoulas, David A. Owens, Christopher J. Rowe

ASSOCIATE PROFESSORS OF THE PRACTICE Lynne Cooper, Courtney L. Johnson, Grayson McClain

ASSISTANT PROFESSOR OF THE PRACTICE Lina Deng

ADJOINT PROFESSORS OF THE PRACTICE: John A. Bers, J. Caleb Clanton

Engineering management is an interdisciplinary program of study designed to expose engineering students to the concepts and theories of the management of the engineering function, the critical elements of technology development and innovation, and the implementation of such ideas in manufacturing, engineering, and technology environments. Approximately two-thirds of all engineers spend a substantial portion of their professional careers as managers. In the complex, competitive world of technology-driven industry, skilled engineers who understand the essential principles of management and business have a competitive advantage.

The program in engineering management prepares students to work effectively in developing, implementing, and modifying technologies and systems. The ability to manage and administer large technical engineering and research projects and budgets will continue to challenge engineering management skills.

The engineering management minor is designed to provide a working knowledge of the fundamentals of management and innovation.

The minor program consists of 15 hours of course work, some of which may be taken as electives associated with the student's major program. Five courses are required: four core courses and the remaining course chosen from a list of electives.

1. ENGM 2210 Technology Strategy	3 hours
2. ENGM 2440 Applied Behavioral Science	3 hours
3. ENGM 3010 Systems Engineering	3 hours
4. ENGM 3700* Program and Project Management	3 hours
5. One course from the list below	3 hours
Total:	15 hours

The student must select one of the following courses:

ENGM 2160 Engineering Economy

ENGM 3100 Accounting and Finance for Engineers

ENGM 3200 Technology Marketing

ENGM 3300 Technology Assessment and Forecasting

ENGM 3350 Organizational Behavior

ENGM 3600 Technology-Based Entrepreneurship

ENGM 3650 Operations and Supply Chain Management

ENGM 4500 Product Development

CE 4300 Reliability and Risk Case Studies

ENVE 4305 Enterprise Risk Management

ES 2900 Engineering and Public Policy

*Students majoring in civil or electrical and computer engineering may substitute CE 4400 or ECE 4950 for ENGM 3700.

Environmental Engineering Minor

DIRECTOR Lori Troxel

A minor in environmental engineering is available to all non-civil and non-environmental engineering students. It requires a total of 15 hours of environmental engineering courses, comprising 6 hours of required courses and 9 hours of electives, chosen from the following list:

1. CE 3600 Environmental Engineering	3 hours
2. ENVE 4600 Environmental Chemistry	3 hours
3. Three elective courses from the list below	9 hours
Total:	15 hours

Elective Courses (9 hours)

CE 3705 Water Resources Engineering

CE 4100 Geographic Information Systems

ENVE 4305 Enterprise Risk Management

ENVE 4605 Environmental Thermodynamics, Kinetics, and Mass Transfer

ENVE 4610 Biological Processes in Environmental Systems

ENVE 4615 Environmental Assessments

ENVE 4620 Environmental Characterization and Analysis

ENVE 4625 Environmental Separations Processes

ENVE 4700 Energy and Water Resources

ENVE 4705 Physical Hydrology

ENVE 4710 Hydrology

ENVE 4715 Groundwater Hydrology

ENVE 4720 Surface Water Quality Modeling

ENVE 4800 Nuclear Environmental Engineering

Materials Science and Engineering Minor

DIRECTOR OF UNDERGRADUATE STUDIES Bridget R. Rogers

DIRECTOR OF GRADUATE STUDIES Joshua D. Caldwell

Affiliated Faculty

PROFESSORS Joshua D. Caldwell (Mechanical Engineering) David E. Cliffler (Chemistry), Craig L. Duvall (Biomedical Engineering), Philippe M. Fauchet (Electrical and Computer Engineering), Daniel M. Fleetwood (Electrical and Computer Engineering), Todd D. Giorgio (Biomedical Engineering), Scott A. Guelcher (Chemical and Biomolecular Engineering), Richard F. Haglund, Jr. (Physics), G. Laibinis (Chemical and Biomolecular Engineering), Deyu Li (Mechanical Engineering), Sandra J. Rosenthal (Chemistry), Florence Sanchez (Civil Engineering), Jason D. Valentine

(Mechanical Engineering), Sharon M. Weiss (Electrical and Computer Engineering)

ASSOCIATE PROFESSORS Leon Bellan (Mechanical Engineering), Janet E. MacDonald (Chemistry), Bridget R. Rogers (Chemical and Biomolecular Engineering), Greg Walker (Mechanical Engineering)

RESEARCH ASSOCIATE PROFESSOR Enxia Zhang (Electrical and Computer Engineering)

ASSISTANT PROFESSORS Piran Kidambi (Chemical and Biomolecular Engineering), Carlos Silvera Batista (Chemical and Biomolecular Engineering)

COURSES OFFERED: [MSE](#)

Materials have been key to the solutions to many societal problems. Many of the barriers to widespread incorporation of alternate and renewable energy, from higher-capacity, more robust, less expensive batteries for energy storage, to high efficiency/low cost solar devices, involve the need for new materials. Materials will play an ever-increasing role in health care. New medical devices, drug delivery systems, and synthetic biological tissue are just a few of the health-related applications in need of new materials for their success. In addition, materials challenges are front and center in the ever-evolving areas of electronic devices. Engineers and scientists with knowledge of materials science and engineering concepts are needed to address these and many more materials challenges.

Materials science and engineering is an interdisciplinary program with affiliated faculty from all engineering disciplines, as well as faculty from chemistry, and physics. Two undergraduate options involving materials science and engineering are available. Students pursuing a B.S. in engineering science may choose a program concentration in materials science and engineering. This option requires the student to take MSE 1500, 1500L, and 2500, and other materials science and engineering elective courses to complete their 24 hours of engineering program electives. Students pursuing a B.E. in an engineering discipline can earn a minor in materials science and engineering.

The minor in materials science and engineering provides the student with an understanding of engineering materials. It complements and adds to the student's major in one of the engineering disciplines, exposing the student to an interdisciplinary approach to problem solving. The minor program in materials science and engineering requires 16 hours of program courses, of which 7 hours are devoted to MSE 1500, 1500L and MSE 2500. No more than 10 hours below the 2500 level may be applied to the minor.

1. MSE 1500, 1500L Materials Science I and Laboratory	4 hours
2. MSE 2500 Materials Science II	3 hours
3. Three elective courses from the list below*	9 hours
Total:	16 hours

Electives

MSE 3860 Undergraduate Research

MSE 3889-3890 Special Topics

BME 2100 Biomechanics

BME 3500 Biomedical Materials: Structure, Property, and Applications
 BME 4200 Principles and Applications BioMicroElectro Mechanical Systems (BioMEMS)
 BME 4500 Nanobiotechnology
 CHBE 4200 Additive and Polymer-based Manufacturing
 CHBE 4825 Biomaterials for Drug Delivery
 CHBE 4840 Synthesis and Applications of 2D Nanomaterials
 CHBE 4850 Semiconductor Materials Processing
 CHBE 4860 Molecular Aspects of Chemical Engineering
 CHBE 4870 Polymer Science and Engineering
 CHBE 4880 Corrosion Science and Engineering
 CE 2205 Mechanics of Materials
 CE 3205 Structural Design
 CE 4200 Advanced Structural Steel Design
 CE 4210 Advanced Reinforced Concrete Design
 CE 4211 Mechanics of Composite Materials
 ECE 4283 Principles and Models of Semiconductor Devices
 ECE 4284 Integrated Circuit Technology and Fabrication
 ME 3202 Machine Analysis and Design
 ME 4251 Modern Manufacturing Processes
 ME 4275 Finite Element Analysis
 CHEM 3010 Inorganic Chemistry
 CHEM 3300 Physical Chemistry: Quantum Mechanics, Spectroscopy, and Kinetics
 CHEM 3630 Macromolecular Chemistry: Polymers, Dendrimers, and Surface Modification
 PHYS 2250W Introduction to Quantum Physics and Applications I
 PHYS 2290 Electricity, Magnetism, and Electrodynamics
 PHYS 3640 Physics of Condensed Matter

*Please contact the MSE Director of Undergraduate Studies with requests to accept courses not on this list for elective credit.

Nanoscience and Nanotechnology Minor

DIRECTORS Paul E. Laibinis, Sandra J. Rosenthal

Affiliated Faculty

PROFESSORS Joshua D. Caldwell (Mechanical Engineering), David E. Cliffler (Chemistry), Craig L. Duvall (Biomedical Engineering), Philippe M. Fauchet (Electrical and Computer Engineering), Daniel M. Fleetwood (Electrical Engineering), Todd D. Giorgio (Biomedical Engineering), Scott A. Guelcher (Chemical and Biomolecular Engineering), Richard F. Haglund, Jr. (Physics), Timothy P. Hanusa (Chemistry), Frederick R. Haselton (Biomedical Engineering), De-en Jiang (Chemical and Biomolecular Engineering), G. Kane Jennings (Chemical and Biomolecular Engineering),

Paul E. Laibinis (Chemical and Biomolecular Engineering), Deyu Li (Mechanical Engineering), Sokrates T. Pantelides (Physics), Sandra J. Rosenthal (Chemistry), Florence Sanchez (Civil and Environmental Engineering), Ronald D. Schrimpf (Electrical Engineering), Jason G. Valentine (Mechanical Engineering), Kalman Varga (Physics), Sharon M. Weiss (Electrical and Computer Engineering), John P. Wikswo, Jr. (Physics), John T. Wilson (Chemical and Biomolecular Engineering), David W. Wright (Chemistry)

ASSOCIATE PROFESSORS Leon Bellan (Mechanical Engineering), Ethan S. Lippman (Chemical and Biomolecular Engineering), Janet E. MacDonald (Chemistry), Justus C. Ndukaife (Electrical and Computer Engineering), Bridget R. Rogers (Chemical and Biomolecular Engineering), D. Greg Walker (Mechanical Engineering)

ASSISTANT PROFESSORS Lauren Buchanan (Chemistry), Xiaoguang Dong (Mechanical Engineering), Mona Ebrish (Electrical and Computer Engineering), Marjan Rafat (Chemical and Biomolecular Engineering), Carlos A. Silvera Batista (Chemical and Biomolecular Engineering), Mengshan Ye (Chemistry)

RESEARCH PROFESSORS Peter T. Cummings (Chemical and Biomolecular Engineering), James R. McBride (Chemistry), Clare M. McCabe (Chemical and Biomolecular Engineering)

RESEARCH ASSISTANT PROFESSOR Dmitry Koktysh (Chemistry)

COURSES OFFERED: [NANO](#)

Faculty in the School of Engineering and the College of Arts and Science offer an interdisciplinary minor in nanoscience and nanotechnology. The minor is administered by the School of Engineering.

Nanoscience and nanotechnology are based on the ability to synthesize, organize, characterize, and manipulate matter systematically at dimensions of ~ 1 to 100 nm, creating uniquely functional materials that differ in properties from those prepared by traditional approaches. At these length scales, materials can take on new properties that can be exploited in a wide range of applications such as for solar energy conversion, ultra-sensitive sensing, and new types of vaccines. These activities require the integration of expertise from various areas of science and engineering, often relying on methods of synthesis, fabrication, and characterization that are beyond those encountered in an individual course of study.

Students who minor in nanoscience and nanotechnology learn the principles and methods used in this rapidly growing field. Its core originates in the physical sciences by providing key approaches for describing the behavior of matter on the nanoscale. Synthetic approaches are used to manipulate matter systematically, for creating uniquely functional nanomaterials that can be inorganic, organic, biological, or a hybrid of these. With a third component of characterization, a process for designing systems to have particular properties as a result of their composition and nanoscale arrangement emerges. Students are introduced to these areas through foundational and elective courses for the minor that are specified below, the latter of which can be selected to fulfill the degree requirements for their major.

The minor in nanoscience and nanotechnology is supported by the Vanderbilt Institute of Nanoscale Science and Engineering (VINSE) that brings together faculty from the College of Arts and Science, the School of Engineering, and the Medical Center. A specialized laboratory facility maintained by VINSE provides students in the minor with capstone experiences that allow them to prepare and characterize a variety of nanostructured systems using in-house state-of-the-art instrumentation. This hands-on laboratory component enhances the attractiveness of students to both employers and graduate schools.

The minor in nanoscience and nanotechnology requires a total of 15 credit hours, distributed as follows:

1. NANO 3000	3 hours
2. one of CHEM 3610 or CHBE 4840 or NANO 2500	3 hours
3. Three elective courses from the list below*	9 hours
Total:	15 hours

Electives

BME 4200 Principles and Applications of BioMicro ElectroMechanical Systems (BioMEMS)

BME 4500 Nanobiotechnology

CHBE 4830 Molecular Simulation

CHBE 4840 Synthesis and Applications of 2D Nanomaterials

CHBE 4850 Semiconductor Materials Processing

CHBE 4860 Molecular Aspects of Chemical Engineering

CHBE 4870 Polymer Science and Engineering

CHBE 4880 Corrosion Science and Engineering

CHEM 2610 Introduction to Nanochemistry

CHEM 3300 Physical Chemistry: Quantum Mechanics, Spectroscopy, and Kinetics

CHEM 3630 Macromolecular Chemistry: Polymers, Dendrimers, and Surface Modification

CHEM 5610 Chemistry of Inorganic Materials

ECE 4283 Principles and Models of Semiconductor Devices

ECE 4284 Integrated Circuit Technology and Fabrication

ECE 4288 Optoelectronics

ECE 4385 VLSI Design

ECE 6306 Solid-State Effects and Devices I

IMS 5320 Nanoscale Science and Engineering

IMS 6310 Atomic Arrangements in Solids

ME 8320 Statistical Thermodynamics

ME 8323 Micro/Nanoelectromechanical Systems

ME 8365 Micro/Nanoscale Energy Transport

PHYS 2255 Modern Physics and the Quantum World

PHYS 2660 Experimental Nanoscale Fabrication and Characterization

PHYS 3640 Physics of Condensed Matter

of Engineering may also be counted toward fulfilling the minor.

Quantum Information Science and Engineering Minor

Faculty in the School of Engineering and the College of Arts and Science offer an interdisciplinary minor in Quantum Information Science and Engineering (QISE). The minor is administered by the College of Arts and Science. See the A&S section of the catalog for details.

School of Engineering Focus Areas

Focus areas provide guidance to students wishing to concentrate on a specialized topic within engineering. Focus areas are typically nine credit hours, and qualifying courses are listed in the catalog. Students can declare a maximum of three focus areas; however, a qualifying course cannot be applied to more than one focus area. Students interested in declaring a focus area must do so before the start of their final semester at Vanderbilt. Successful completion of a declared focus area will be designated on a student's transcript upon graduation.

Aerospace

FACULTY POINT OF CONTACT Amrutur Anilkumar

The aerospace industry touches many aspects of our lives including national defense, transportation, recreation, communication, and space exploration. This focus area provides students with a foundation in science and technology fundamental to the study of aerospace engineering.

Students must take ME 4267 – Aerospace Propulsion and at least two of the following courses for a total of no less than nine credit hours:

- ME 4261 - Airplane Aerodynamics
- ME 4263 – Computational Fluid Dynamics (CFD)
- ME 4226 - Gas Dynamics
- CE 3300 - Risk and Reliability
- ME 3890 – Special Topics: Combustion

Biomolecular Engineering

FACULTY POINT OF CONTACT Ethan Lippmann

Advances in areas of molecular biology allow an unprecedented purposeful manipulation of molecules of biological origin. These methods are providing new approaches for synthesizing chemicals and biologics, for directing biological processes, and for advancing medical treatments and diagnostics. Students in this focus area explore how engineering principles are integrated with biomolecular manipulation.

Student must take at least three courses and 9 credit hours from:

- ChBE 4500 Bioprocess Engineering
- ChBE 4800 The Molecular and Cellular Mechanome
- ChBE 4805 Biomolecular Engineering and Design
- ChBE 4810 Metabolic Engineering
- ChBE 4820 Immunoengineering
- ChBE 4825 Biomaterials for Drug Delivery
- BME 4340 Drug Delivery
- BME 4500 Nanobiotechnology
- BME 4530 Synthetic Biology and Cell Design
- BME 4550 Drug Development & Biotechnology: Pharmaceutical Engineering

Engineering Communications

FACULTY POINT OF CONTACT Yiorgos Kostoulas

Communication is an essential skill for every career path. In this collection of courses, students will learn how to communicate within and outside their fields and within project teams and organizations.

Students must take these three courses (9 credit hours):

- ES 2100W – Technical Communications
- ENGM 2440 – Applied Behavioral Science
- ENGM 3350 – Organizational Behavior

Human Computer Interaction (HCI)

FACULTY POINT OF CONTACT Graham Hemingway

HCI is valuable for creating technology that is not only functional but also user-friendly, accessible, and aligned with the diverse needs of users. This approach contributes to the success and sustainability of technological products and systems in a rapidly evolving digital landscape. Students who study HCI are well equipped for careers in user experience (UX) design, usability engineering, accessibility, product design and augmented and virtual reality.

Students must take at least three courses and 9 credit hours from:

- CS 3258 – Introduction to Computer Graphics
- CS 4376 – Foundations of Human Computer Interaction
- CS 4275 – Error Analysis in Safety Critical Systems
- CS 4247 – Data Visualization
- CS 4249 – Projects in Virtual Reality Design
- Special Topics if specified in the Class Note on YES.

Materials Processing

FACULTY POINT OF CONTACT Ethan Lippmann

Modern materials rely on processing strategies that yield products with required structural and compositional architectures and that allow economies of scale. This focus area provides students with a background on the methods used for preparing various types of materials, the factors that affect their properties, and the design principles for producing materials with targeted properties.

Students must take at least three courses and 9 credit hours from:

- ChBE 2100 Chemical Process Principles
- ChBE 4200 Additive and Polymer-based Manufacturing
- ChBE 4840 Synthesis and Applications of 2D Nanomaterials
- ChBE 4850 Semiconductor Materials Processing
- ChBE 4860 Molecular Aspects of Chemical Engineering
- ChBE 4870 Polymer Science and Engineering
- ChBE 4875 Colloid Science and Engineering
- ChBE 4880 Corrosion Science and Engineering

Microelectronics

FACULTY POINT OF CONTACT W. Timothy Holman

The field of microelectronics has enabled technological developments in areas such as computing, robotics, manufacturing, communications, transportation, power systems, and medical instrumentation. This focus area provides students with a foundation in the science and engineering behind the field of microelectronics.

Students must take three courses (at least 9 credit hours) selected from the following list:

- ECE 4267 – Power System Analysis
- ECE 4268 – Distributed Energy Systems
- ECE 4275 – Microelectronic Systems
- ECE 4283 – Semiconductor Devices
- ECE 4284 – IC Technology and Fabrication
- ECE 4287 – Engineering Reliability
- ECE 4289 – Spacecraft Systems
- ECE 4334 – RF & Microwave Design
- ECE 4335 – Fundamentals of Quantum Engineering
- ECE 4380 – Electronics II
- ECE 4385 – VLSI Design
- MSE 2500 – Materials Science II

Nanotechnology

FACULTY POINT OF CONTACT W. Timothy Holman

Nanotechnology sits at the intersection of various scientific disciplines, promising revolutionary advancements across medicine, materials science, electronics, and energy production. This focus area equips students with the knowledge and skills to contribute to cutting-edge innovations. Students interested in this area may, with appropriate additional courses, complete the related minor in Nanoscience and Nanotechnology.

Students must take three courses (at least 9 credit hours) selected from the following list:

- ECE 3891 – Special Topics: Nanoscale Innovation and Making
- ECE 3892 – Special Topics: Optical Tweezers in Biology and Medicine
- ECE 4283 – Semiconductor Devices
- ECE 4284 – IC Technology and Fabrication
- ECE 4288 – Optoelectronics
- ECE 4335 – Fundamentals of Quantum Engineering
- MSE 2500 – Materials Science II
- BME 4200 – Principles and Applications of BioMEMS
- BME 4500 – Nanobiotechnology
- CHBE 4840 – Synthesis and Applications of 2D Nanomaterials
- CHBE 4850 – Semiconductor Materials Processing
- CHBE 4875 – Colloid Science and Engineering

Product Development

FACULTY POINT OF CONTACT Yiorgos Kostoulas

In this focus area, students will learn key stages for product planning, development, and marketing.

Students must take these three courses (9 credit hours):

- ENGM 3200 – Technology Marketing
- ENGM 3300 – Technology Assessment and Forecasting
- ENGM 4500 – Product Development

Risk, Reliability and Resilience Engineering

FACULTY POINT OF CONTACT Hiba Baroud

Critical systems, processes and devices associated with built infrastructure and natural environment that support the social and economic well-being of society are subject to long-term and short-term risks of disruptive events. These events resulting from natural and man-made changes and hazards, or accidents during the lifetime of these systems, processes or devices. Civil infrastructure and environment must be able to not only withstand such events but also recover from them to an acceptable level of performance within a desired time frame. The focus area on risk, reliability and resilience is designed to develop understanding, expertise, and leadership in making informed decisions to respond to uncertainty and risk, in order to enhance quality, efficiency, safety, security and environmental protection.

Students must take at least 9 hours of coursework from the following:

- CE 3300 Risk, Reliability, and Resilience Engineering, MATH 2810 Probability and Statistics for Engineering, or MATH 2820 Introduction to Probability and Mathematical Statistics
- CE 4300 Reliability and Risk Case Studies
- CE 4320 Data Analytics for Engineers
- CE 4340 Risk and Decision Analysis
- ENVE 4305 Enterprise Risk Management
- BME, CE, ChBE, ECE, ENVE, ME, CS 3841 Directed Study or 3860, 3861, 3862 Undergraduate Research (3 hours maximum) with approved topic(s)

Robotics

FACULTY POINT OF CONTACT Nabil Simaan

We find robotic devices everywhere such as surgery, manufacturing, entertainment, and search and rescue. This focus area provides students with a foundation in science and technology fundamental to the study of robotic devices.

Students must take ME 4271 – Robotics and at least two of the following courses for a total of no less than nine credit hours:

- ME 4273 - Bio-inspired Robotics
- ME 4284 - Modeling and Simulation of Dynamic Systems
- ME 4236 - Linear Control Theory
- ME 4280 - Advanced Dynamics of Mechanical Systems

Strategic and Technical Consulting

FACULTY POINT OF CONTACT Yiorgos Kostoulas

In this focus area, students learn essential skills such as organizational leadership, finance, and technology strategy.

Students must take these three courses (9 credit hours):

- ENGM 2210 – Technology Strategy
- ENGM 3100 – Finance and Accounting for Engineering
- ENGM 3350 – Organizational Behavior

Technology Entrepreneurship

FACULTY POINT OF CONTACT Yiorgos Kostoulas

In this focus area, students will learn essential skills such as technology strategy, risk management, and venture capital funding.

Students must take these three courses (9 credit hours):

- ENGM 2210 – Technology Strategy
- ENGM 3600 – Technology-Based Entrepreneurship
- ENGM 3891 – Special Topics with approval by associated faculty (*will be included in the course description in YES*)

Education and Human Development at Vanderbilt

George Peabody College for Teachers, recognized for more than a century as one of the foremost independent colleges of teacher education, merged with Vanderbilt University in the summer of 1979 to become Vanderbilt University's Peabody College of education and human development. Since then, Peabody College has retained its heritage while achieving new stature as a place where world-class research is conducted and translated into teaching, practice, policy, and service. Peabody's mission is characterized by practice-oriented academic programs, a strong service ethic, groundbreaking research, and a pressing concern for addressing social problems in domestic and international contexts.

The college's faculty and students constitute a vibrant intellectual community answering pressing questions and expanding knowledge about PreK-12 and higher education, including special education; psychology, especially focused on families and children; the development of individuals and organizations; and educational administration, leadership, and policy. Peabody College understands the preparation of researchers, teachers, and leaders as among the most important things it does, and that building and sustaining an engaged academic community of learners is central to achieving its mission.

Peabody faculty and students engage in a broad spectrum of basic and applied research to generate new knowledge and translate that knowledge into practice. Current research findings inform classroom teaching at Peabody in every program. Moreover, Peabody faculty bring an interdisciplinary and entrepreneurial spirit to the research enterprise.

Working collaboratively, often through one of the college's research centers, faculty and students publish and present their findings, apply them in real-world settings, and help to shape public debate about the nature and future of education and human development.

The college is devoted to enhancing opportunity in an increasingly diverse society. More than 1,900 students are enrolled at Peabody, with more than one-third of them in post-baccalaureate graduate or professional degree programs.

All teacher education programs are accredited by the Council for the Accreditation of Education Preparation (CAEP). Counseling programs are accredited by the Council for the Accreditation of Counseling and Related Education Programs (CACREP).

Centers and Outreach Efforts

For more information about Peabody College's Centers and Outreach Efforts, please see here: <https://peabody.vanderbilt.edu/research/research-centers>.

Next Steps at Vanderbilt University

Next Steps at Vanderbilt is a four-year, nonresidential certification program for students with intellectual and developmental disabilities, providing individualized programs of study in the areas of education, social skills, and vocational training. Next steps is a comprehensive transition program designated by the U.S. Department of Education. This status recognizes the program's merits and allows eligible students to apply for federal financial aid for tuition assistance. Learn more here: <https://peabody.vanderbilt.edu/nextsteps>.

The Undergraduate Program

Peabody College offers the bachelor of science with majors in elementary education, secondary education, special education, cognitive studies, child development, child studies, and human and organizational development. These undergraduate programs are designed to prepare students for professional careers in their chosen fields. Programs for Peabody students include course work in a General Education Core, a professional core, a major area of specialization, and electives. Peabody also provides professional education courses for College of Arts and Science students who want to prepare for teacher licensure.

The bachelor of science is granted on the basis of 120 semester hours of college work with a final grade point average of 2.000, and completion of the General Education Core and the requirements of the major.

General Education Core Program

In pursuit of breadth of knowledge and understanding about the world in which they live, all undergraduates complete the requirements of the General Education Core program. This General Education Core component of all Peabody undergraduate majors is intended to provide students with a solid foundation in the arts and sciences. The core curriculum incorporates the study of human conditions that are universal. The General Education Core involves study in the following areas:

Mathematics. The study of mathematical concepts and procedures.

Social Sciences. The study of the past—both the United States and the more global human story.

Humanities/Fine Arts. The study of the human culture and creativity.

Science. The study of scientific process and interrelationships among the sciences.

Through the study of these universal subjects, concepts, and modes of thought, students gain a broad foundation transferable to their futures. They will continue to grow within society and the classroom and will look at problems from different perspectives while maintaining curiosity.

Courses identified to fulfill the General Education Core requirement for each undergraduate major can be viewed in Peabody's undergraduate handbook.

Courses used to satisfy these core requirements may also be counted toward the fulfillment of requirements in an academic major. Special topics courses are ordinarily not acceptable for meeting General Education Core requirements. These courses require prior approval as substitute courses. Independent study courses are not acceptable for meeting General Education Core requirements.

Transfer students may use credits from other colleges to fulfill Peabody's General Education Core requirements if the credits are equivalent to the courses offered at Vanderbilt. For transfer students, credits are evaluated when the student enrolls at Peabody in order to determine which transfer courses will substitute for Peabody's General Education Core requirements. Requirements still to be fulfilled will be noted at that time.

Licensure for Teaching

[Security Clearance](#)

[Degree Audits](#)

[Screening](#)

[Screening I \(Formal Admission to an Undergraduate Teacher Education Program\)](#)

[Screening II \(Admission to Student Teaching\)](#)

[Student Teaching](#)

[Application for Teacher Licensure and University Recommendation for Licensure](#)

[Accreditation](#)

Peabody offers programs leading to teacher licensure in the following areas: elementary (grades K-5), and secondary education (grades 6-12) with endorsement in English, math, biology, chemistry, physics, earth science, history, and political science. (Added endorsements are available also in economics, psychology, and sociology for those who will have a history endorsement.) An added endorsement program also is available in English as a Second Language (grades PreK-12). All of these programs are offered by the Department of Teaching and Learning.

Special education-interventionist (LD/BD for grades K-8 or 6-12) or comprehensive (multiple/severe for grades K-12) are offered by the Department of Special Education.

Vanderbilt's Blair School of Music and Peabody College offer a program for students interested in teacher licensure with endorsement in the following: *(1) instrumental/general music (grades K-12), or (2) vocal/general music (grades K-12)*. Blair students complete the first part of the program as part of the bachelor of music degree and apply during the senior year to continue into the master of education degree for a final year of professional education.

Students seeking licensure may enroll in Peabody College, the College of Arts and Science, or the Blair School of Music. In all cases, most of the liberal arts course work is taken in the College of Arts and Science, and the professional education course work is taken at Peabody College.

All students completing a teacher education program at Vanderbilt are strongly advised to apply for a license in Tennessee whether or not they plan to teach in this state. In addition, licensure is available by application in other states. The student is responsible for applying for Tennessee licensure through the Office of Teacher Licensure. Each state has its own application forms and procedures for licensure; information is available on the Office of Teacher Licensure website: peabody.vanderbilt.edu/teacher-licensure/.

Licensure requirements continue to undergo revision. Students must meet licensure requirements in effect at the time of their program completion, which may be different from requirements in effect at the time they entered the program. Each year, teacher education students should consult the current Vanderbilt *Undergraduate Catalog* or the Peabody *Undergraduate Handbook*. The website peabody.vanderbilt.edu/teacher-licensure/ provides additional information.

Security Clearance

As part of the Peabody background check process you are required to pass a fingerprint criminal background check by the beginning of your first semester. Visit <https://peabody.vanderbilt.edu/criminal-background-clearance> for detailed information.

Degree Audits

Electronic degree audits enable students and faculty advisers to track each student's progress in the degree program at Peabody. The departmental handbooks describe access to and use of online Peabody major degree audits to view program requirements recognized as "met" or "unmet" at any time in the student's program. The degree audit also denotes permissions for waivers or course substitutions. Degree audits are managed in the Peabody Office of Academic Services.

SCREENING

Students seeking teacher licensure must be approved by each department through which licensure is sought. Secondary licensure candidates should contact an adviser or the director of undergraduate studies in the appropriate Arts and Science department(s) to be informed of any specific departmental requirements or standards. There are two points in each teacher education program when undergraduates must complete applications for screenings by departmental faculty. Screening requirements continue to undergo revision and are subject to change. Students must meet screening requirements in effect at the time of their application, which may be different from requirements stated below. Screening reviews, described below, are important checkpoints that allow successful students to advance in the program. Attainment of 2.75 (4.0) cumulative grade point average and completion of required courses do not automatically qualify a student for continuation in the program.

Faculty evaluation of a student's qualifications for continuation in a teacher education program include academic, performance, and disposition factors such as the following:

1. Dependability (as evidenced by good attendance in classes and practica and the completion of required assignments and procedures on time)
2. Professional and ethical behavior (honesty, acceptance of responsibility, emotional maturity, etc.)
3. Attitude and interpersonal skills (including the ability to work with children and with peers)
4. Academic competence (It is possible for a student to meet minimum grade point requirements and pass all courses and still have specific academic weaknesses which might cause denial of screening applications)
5. Teaching competence (as evidenced by successful completion of practica requirements). It is possible for a student to meet minimum grade point requirements and pass all courses and still have specific performance weaknesses which might cause denial of screening applications.

These criteria rest on the professional judgment of faculty members. Whether a student meets them or not is determined by a vote of appropriate faculty. Undergraduate students seeking secondary education licensure must be approved by the Department of Teaching and Learning faculty and also by the faculty of College of Arts and Science department(s) for the Arts and Science major(s).

Screening deadlines are October 1 and April 1. Undergraduates must apply for Screening I during spring of the sophomore year. Screening II must be done in the fall of the senior year, restricting undergraduate student teaching to the spring of the senior year. Deadlines are firm; late applications will not be accepted. The Screening I and II application form should be submitted online no later than the deadline. (NOTE: Screening II applications require additional documents when submitted. See specific requirements with the application.)

Students will be notified of results of the faculty vote at the end of the screening semester. In instances where there is a negative decision, the student wishing to appeal must do so in writing to the chairperson(s) of the department(s) denying the application. If the initial decision is upheld and the student wishes to continue the appeal, a written petition should be filed with the Administrative Committee of Peabody College.

Screening I (Formal Admission to an Undergraduate Teacher Education Program)

Each student seeking teacher licensure must be formally admitted to the teacher education program(s) by completing an online application for Screening I review by the faculty of the department(s) in which endorsement(s) is/are sought. Candidates normally apply for Screening I during spring of the sophomore year or fall of the junior year, depending on their program area (candidates should consult their department handbook for timelines in their program area). Deadlines are April 1 in the spring and October 1 in the fall. Students who transfer more than 60 hours to Vanderbilt from another institution must apply for admission to the teacher education program by the screening deadline of their second semester at Vanderbilt.

An initial screening review by the faculty will occur soon after the Screening I deadline. If there are concerns noted, the student will be counseled. The final faculty review and decision will be done toward the end of the semester.

Criteria for Screening I (formal admission to teacher education) are:

- A. Specific Academic Criteria
 1. Test scores (SAT composite score of 780 or ACT 21, OR passing scores on the Praxis I Core Academic

- Skills for Educators) or university credit in reading, writing, and mathematics courses.
- 2. Minimum cumulative grade point average of 2.75 (4-point scale)
- 3. Successful completion of at least two of the required professional education courses as defined by the program area with a minimum grade of *C+*
- 4. Department interview

B. Specific Faculty Evaluative Criteria: The faculty will consider the disposition criteria of dependability, professional and ethical behavior, attitude and interpersonal skills, and teaching competence as itemized at the beginning of the Screening section.

Screening II (Admission to Student Teaching)

Admission to Student Teaching is not automatic when prerequisite course work and field experiences have been completed. All students must submit the online Screening II application by October 1 in the fall of the senior year. At the time of screening application, the student should be enrolled in any remaining prerequisite courses. **No course work may be taken during the semester of student teaching and seminar.**

After an initial review in the Office of Teacher Licensure, the Screening II application and other submitted materials will be considered by departmental faculty according to the following criteria for Screening II approval to student teach:

- A. Specific Academic Criteria
 - 1. Formal admission to a teacher education program granted (completion of Screening I)
 - 2. First semester senior standing (for student teaching in the spring of the senior year)
 - 3. Successful completion (*C+* or above) of all courses required and prerequisite to student teaching as defined by the program area
 - 4. Minimum cumulative grade point average of 2.75 (4.0 scale)
 - 5. Satisfactory performance (*C+* or above) in course work in areas in which teacher licensure is sought
 - 6. Successful completion of Standard First Aid and CPR training (attach certificate copies to the Screening II application)
- B. Specific Faculty Evaluative Criteria: The faculty will consider the disposition criteria of dependability, professional and ethical behavior, attitude and interpersonal skills, and teaching competence as itemized at the beginning of the Screening section.

Each Screening II application requires additional documents, depending on the program. A copy of first aid and CPR verification of training completed within the previous two years must be submitted to the Office of Teacher Licensure by the screening deadline. In addition, some programs have additional requirements that are prerequisite to Screening II application. Students should consult departmental handbooks. Screening II applicants who are approved to student teach will receive notification of their student teaching placements no later than during the Student Teacher Orientation at the beginning of the student teaching semester.

Students who have passed Screening II are assigned student teaching placements in the Nashville area.

Student Teaching

Vanderbilt students seeking teacher licensure must successfully complete a 15-week semester of full-time student teaching in Nashville area public schools and must be recommended for licensure by the supervisors of student teaching and departmental faculty. Student teaching may be done only in the spring semester. Prior to the start of student teaching, all prerequisite courses must have been completed, the cumulative GPA must be at least 2.75, and the appropriate departmental faculties must have voted to approve the candidate for student teaching during the previous semester as part of the Screening II application process. The Tennessee State Department of Education and Metropolitan Nashville Public Schools prohibit student teachers from taking courses during student teaching.

Application for Teacher Licensure and University Recommendation for Licensure

All students completing the teacher education program at Vanderbilt are strongly advised to apply for a license in Tennessee whether or not they plan to teach in this state. In addition, licensure is available in most other states. The student is responsible for applying for Tennessee licensure through the Office of Teacher Licensure. Each state has its own application forms and procedures for licensure; information is available on the Office of Teacher Licensure website.

To be licensed through Vanderbilt's teacher education program, a graduate must earn a positive licensure recommendation from the university. The university's decision to recommend a candidate is based upon the following:

1. Maintaining the grade point average required for admission to the teacher education program (2.75 on a 4.0 scale).
2. For Tennessee licensure, achieving the state minimum score on all required parts of the PRAXIS II Series and edTPA (scores must be sent to the Vanderbilt Office of Teacher Licensure-code R 1871, and the Tennessee Department of Education-code R 8190).*
3. Receiving a positive recommendation from the student's department as a result of the student teaching experience (Pass in student teaching does not guarantee a favorable recommendation).

*Testing requirements are changing almost annually; check instructions in the Office of Teacher Licensure or at ets.org/praxis/ before registering to take the exam.

Accreditation

Vanderbilt University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award baccalaureate, masters, and doctorate degrees. Degree-granting institutions also may offer credentials such as certificates and diplomas at approved degree levels. Questions about the accreditation of Vanderbilt University may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website (www.sacscoc.org).

Vanderbilt is accredited by the Council for the Accreditation of Education Preparation (CAEP) and its teacher licensure programs also are approved by the Tennessee Department of Education and the following specialty professional associations:

National Council for Teachers of English (NCTE)

Council for Exceptional Children (CEC)

Council for Accreditation of Counseling and Related Educational Programs (CACREP)

Association for Childhood Education International (ACEI)

American Speech-Language-Hearing Association (ASHA)

National Council for the Social Studies (NCSS)

National Council for Teachers of Mathematics (NCTM)

National Science Teachers Association (NSTA)

Accreditation Council for Education in Nutrition and Dietetics (ACEND)

Special Program in Peabody College

Peabody Scholars Program

First-year students who achieve academic distinction during their first semester at Vanderbilt are invited to apply to the Peabody Scholars Program. The Peabody Scholars Honors Program was established to offer particularly promising undergraduates at Peabody College opportunities for intellectual adventure, community service, and research. Emphasizing a theme of personal, professional, and civic creativity, the program is designed to foster students' potential by offering breadth through exposing students to a variety of academic and social experiences and depth by engaging in service-learning and independent research.

To graduate with honors through Peabody Scholars, scholars need to earn 24 points within the program. Scholars earn points from a series of required components as well as optional enrichment programming. All freshman Peabody Scholars participate in a 3-credit-hour Honors Seminar during the spring semester of their first year. In the sophomore year, scholars work together on a meaningful immersive service project in the local community. Each Peabody Scholar is offered a summer stipend (between sophomore and junior years) to support engagement in an individual service or intensive research project (either domestic or abroad). In the junior year, scholars engage in independent research projects with a faculty member. Senior scholars participate in both scholarly and cultural events. The Peabody Scholars Program also offers professional development, networking, and mentoring. The full list of current programming is available on the program website. In sum, the Peabody Scholars Program offers a rich array of enrichment experiences and opportunities.

Peabody freshmen may apply for the Peabody Scholars Program in the fall of their first semester at Vanderbilt. Selections will be made prior to the beginning of the spring semester. To be accepted into the program, students must have a first-semester GPA of 3.6. To remain in good standing in the program, students must maintain a minimum grade point average of 3.0. Further information on the Peabody Scholars Program may be obtained from Professor Megan Saylor in the Psychology and Human Development Department.

Interdisciplinary Majors

[Language and Literacy Studies](#)

[Mathematics and Science Studies](#)

[Natural Science Studies](#)

[Social Studies](#)

Peabody College, in conjunction with the College of Arts and Science, offers four interdisciplinary majors. These majors are to be taken as second majors only and are constructed around academic disciplines particularly appropriate for future teachers (except secondary), but are not limited to students entering teacher education. The interdisciplinary major consists of 36 hours of study and draws upon the academic resources of a number of departments throughout the University. Students follow the General Education Core requirements of their first major.

Language and Literacy Studies (36 hours)

COMMUNICATIONS.

6 hours from:

CMST 1500, Fundamentals of Public Speaking; CMST 1850 Interpersonal Communications

ENGLISH.

9 hours from:

ENGL 1230W, 1270W or 1260W and 1250W and 3210 and above

EDUCATION.

9 hours from:

ENED 2200 or 4963 (3 hours); ENED 2430, ENED 3310 (3 hours); SPED 2430 or PSY-PC 3150 (3 hours)

ADDITIONAL COURSES

12 hours from two areas:

ANTH 1601, Introduction to Language and Culture; ANTH 2601, Introduction to Linguistics; ANTH 2602, Anthropological Linguistics; ANTH 2603 Comparative Writing Systems; CMST 2800, Rhetoric of Civic Life; CMST 3000, Rhetoric of American Experience, 1640-1865; CMST 3001, Rhetoric of American Experience, 1865-1945; CMST 2900, Values of Modern Communication; CMST 3002, Rhetoric of the American Experience 1945-Present; CMST 2950, Rhetoric of Mass Media; PHIL1003, General Logic; PSCI 2242, Political Communication; THTR 1010, Fundamentals of Theatre

Mathematics and Science Studies (35-37 hours)

BIOLOGICAL SCIENCES.

4 hours from:

BSCI 1100 and 1100L, Biology Today; BSCI 1105, Human Biology; BSCI 1510 and 1510L, or BSCI 1511 and 1511L, Introduction to Biological Sciences; BSCI 1103, Green Earth, the Biodiversity and Evolution of Green Plants

CHEMISTRY.

4 hours from:

CHEM1010L and 1010, or CHEM 1020L and 1020, Introductory Chemistry; CHEM 1601 and 1601L, or CHEM 1602 and 1602L, General Chemistry

PHYSICS.

4 hours from:

PHYS 1010 and 1010L, Introductory Physics; PHYS 1601 and 1601L or 1602 and 1602L, General Physics

EARTH AND SPACE SCIENCES.

3-4 hours from:

ASTR 1010 and 1010L, Introductory Astronomy: Stars and Galaxies; EES 1510 and 1510L, The Dynamic Earth; EES 1030 and 1030L, Oceanography; EES 1080, Earth and Atmosphere; EES 1140, Ecology, Evolution, and Climate through Time

HISTORY/ PHILOSOPHY OF SCIENCE.

3 hours from:

ASTR 2130, Theories of the Universe; HIST 2800, Modern Medicine; PHIL 3616, Philosophy and the Natural Sciences

CALCULUS.

8-9 hours from:

MATH 1200, 1201, and 2200, Single-Variable Calculus I, II, and III; MATH 1300 and 1301, Accelerated Single-Variable Calculus I and II

PROBABILITY AND STATISTICS.

3 hours from:

MATH 2820 Introduction to Probability and Mathematics Statistics; MATH 3700, Discrete Mathematics; PSY-PC 2110 Introduction to Statistical Analysis

GEOMETRY.

3 hours from:

MATH 3200, Introduction to Topology; MATH 3210, Transformation Geometry; MATH 3310, Introduction to Mathematical Logic

ALGEBRA

3 hours from:

MATH 2410, Methods of Linear Algebra; MATH 2600, Linear Algebra; MATH 3300, Abstract Algebra

Natural Science Studies (35-36 hours)

BIOLOGICAL SCIENCES.

8 hours from:

BSCI 1100/1100L, Biology Today; BSCI 1105, Human Biology; BSCI 1510 and 1510L, and/or 1151 and 1151L, Introduction to Biological Sciences; BSCI 1103, Green Earth, the Biodiversity and Evolution of Green Plants

CHEMISTRY.

8 hours from:

CHEM 1010L and 1010 and/or 1020L/1020, Introductory Chemistry; CHEM 1601 and 1601L and/or 1602 and 1602L, General Chemistry

PHYSICS.

4 hours from:

PHYS 1010 and 1010L, Introductory Physics; PHYS 1601/1601L or 1602 and 1602L, General Physics

EARTH AND SPACE SCIENCES.

3-4 hours from:

ASTR 1010/1010L Introductory Astronomy: Stars and Galaxies; EES 1510 and 1510L, The Dynamic Earth; EES 1030 and 1030L, Oceanography; EES 1080 Earth and Atmosphere; EES 1140, Ecology, Evolution, and Climate through Time

HISTORY/ PHILOSOPHY OF SCIENCE.

3 hours from:

ASTR 2130, Theories of the Universe; HIST 2800, Modern Medicine; PHIL 3613, Philosophy and the Natural Sciences

ELECTIVES.

9 hours (3 additional courses) in:

Astronomy, Biological Sciences, Chemistry, Earth and Environmental Sciences, Physics, or History and Philosophy

Social Studies (36 hours)

Students selecting an interdisciplinary major in social studies will have seven options available to them. Each option requires 18 hours of study focused on a single social science discipline that is supplemented with 18 hours of course work drawn from studies within other social sciences. The seven options available to students include a focus on any of the following areas of study: Anthropology, Economics, American History, European History, American Politics, World Politics, or Sociology.

Anthropology

9 hours from:

ANTH 1101, Introduction to Anthropology; ANTH 1201 Introduction to Archaeology; ANTH 1301, Introduction to Biological Anthropology

9 hours in specified courses:

A Comparative Anthropology and Anthropological Theory Course (3 hours) An Archaeology and Physical Anthropology Course (3 hours)

An Ethnography, Ethnohistory, and Linguistics Course (3 hours)

Six courses (18 hours) drawn from at least three areas: Economics, History, Political Science, and Sociology

Economics

9 hours required from:

ECON 1010, Principles of Macroeconomics; ECON 1020, Principles of Microeconomics; ECON1500, Economic Statistics Additional 9 hours in Economics Courses

Six courses (18 hours) drawn from at least three areas: Anthropology, History, Political Science, and Sociology

United States History

6 hours from:

HIST 1390, America to 1776; HIST 1400, U.S. 1776-1877; HIST 1410, U.S. 1877-1945; HIST 1420, U.S. Post-1945

Additional four courses (12 hours) of United States History courses from:

HIST 1390-1440, 1660, 1690, 1720, 1730, 2580, 2590, 2610-2650, 2690-2722

Six courses (18 hours) drawn from at least three areas: Anthropology, Economics, Political Science, and Sociology

European History

6 hours from:

HIST 1350, History of Western Civilization to 1700; HIST 1360, History of Western Civilization since 1700

Additional four courses on European History from:

HIST 1600, 2130 2135, 2220-2410

Six courses (18 hours) drawn from at least three areas: Anthropology, Economics, Political Science, and Sociology

American Politics

3 hours from:

PSCI 1100, Intro. to American Government and Politics

Any five (15 hours) of the following PSCI courses: 2204, 2222, 2240-2246, 2248, 2251, 2255, 2256, 2259, 2262, 3247, 3249, 3250, 3252-3254,

3258, 3260, 4275

Six courses (18 hours) drawn from at least three areas: Anthropology, Economics, History, and Sociology

World Politics

3 hours from:

PSCI 1101, Introduction to Comparative Politics; PSCI 1102, Introduction to International Politics

Any five (15 hours) of the following PSCI courses: 2210, 2212-2216, 2218-2227, 2230-2234, 2236, 3211, 3217, 3228, 3229, 3235 Six courses (18 hours) drawn from at least three areas: Anthropology, Economics, History, Sociology

Sociology

6 hours from:

SOC 1010, Introduction to Sociology, or SOC 1020, Contemporary Social Problems (3 hours); SOC 3001, Sociological Perspectives (3 hours)

4 courses (12 hours) 3 hours from each of the following areas:

A sociology course drawn from the core area of Crime, Law, and Deviance

A sociology course drawn from the core area of Organizations, Politics, and Inequality A sociology course drawn from the core area of Family, Medicine, and Mental Health A sociology course drawn from the core area of Culture and Social Change

Six courses (18 hours) drawn from at least three areas: Anthropology, Economics, History, and Political Science

Human and Organizational Development

[Major in Human and Organizational Development](#)

[Curriculum](#)

[Honors Program](#)

CHAIR Nicole E. Allen

ASSOCIATE CHAIR Sarah Suiter

DIRECTOR OF GRADUATE STUDIES Brian D. Christens

DIRECTOR OF UNDERGRADUATE STUDIES Leigh Z. Gilchrist

Major in Human and Organizational Development

The Human and Organizational Development (HOD) major prepares students to address complex social problems in organizations and communities. The HOD curriculum challenges students to view human problems and their solutions in organizations and communities. The HOD curriculum challenges students to view human problems and their solutions as embedded in broader social ecological systems. HOD coursework draws on a range of disciplinary perspectives (e.g., psychology, organizational studies, sociology, political science, anthropology, geography, economics), and explores societal issues across distinct levels of analysis (e.g., individual, group, organization, community, policy, international). HOD coursework engages students through active learning approaches involving teams, simulations, case studies, field experiences, and interaction with academic researchers and professionals in the field. These experiences support the development of the following *HOD Core Competencies* that will help students succeed in people-oriented organizational roles:

1. *Written communication* - with emphasis on developing a clear, concise, expository style and mastering the practical forms used in professional situations.
2. *Oral presentation* - with emphasis on making informative and persuasive presentations with the effective use of technology and media.
3. *Analytic and critical thinking* - with emphasis on data-driven analysis, creativity, and systems thinking to recognize, define and work to solve personal, professional, organizational, and social problems.
4. *Interpersonal communication* - with emphasis on inquiry, advocacy, leadership, and conflict resolution skills.
5. *Collaborative work behaviors* - with emphasis on motivating others, managing talent, and teamwork.

HOD requirements consist of the Peabody General Education Core and HOD Major Requirements, plus the successful completion of an HOD capstone experience.

Peabody General Education Core

The General Education Core provides students with a strong liberal arts foundation. It is composed of required coursework from the areas of Humanities/Fine Arts, Mathematics, Science, and Social Science. Listings of all courses that may fulfill these areas are located online in the Peabody Undergraduate Handbook.

In addition, students must complete two writing intensive courses. See the "Writing Requirement" section of the general Peabody academic policy section of the Undergraduate Catalog.

HOD Major Requirements

Human and Organizational Development Professional Core (15 hours): The HOD Core introduces students to ecological systems thinking, theories of human, group, community, organizational, and policy development, and quantitative & qualitative approaches to research and problem solving. Professional core courses are designed to help students:

1. Understand the basic principles and typical patterns of human development across the life span and use this knowledge to understand their own behavior and the behavior of others;
2. Understand the principles of group dynamics and use this knowledge to provide leadership and facilitate decision making in small group and team settings;
3. Understand theories of organizations and apply them to the solution of organizational problems;
4. Understand the critical role that community contexts play in shaping individual, group, and organizational

well-being;

5. Apply quantitative and qualitative methods of systematic inquiry and analysis;
6. Understand public policy processes and the factors that influence policy making;
7. Understand the ethical dimensions of personal and organizational decisions and apply this understanding to analyze social issues and make professional and personal decisions;
8. Develop enhanced skills of synthesis including the ability to integrate ideas from various sources and to design innovative programs.
9. Understand and engage in practices and policies that ensure inclusion of diverse populations and perspectives.

The program design will endow you with the skills and knowledge needed to succeed in a people-oriented organizational role.

Human and Organizational Development Domains: Domain courses build on the foundational courses in the HOD Professional Core. Students will choose courses that will help them develop breadth and depth across levels of analysis in topic areas of interest. Students must complete two courses in each of the following three domains:

Individual/Interpersonal Domain: Courses in this domain delve deeper into personal and professional development and explore topics, including but not limited to, leadership, professional ethics, youth development, professional development, and mental health and well-being. Through these courses students will develop professional skills in data management, research, individual and team leadership, human-centered design, and interpersonal conflict resolution.

Organizational/Group Domain: Courses in this domain explore recent advances in organizational theory and innovative management strategies in for-profit, non-profit, and public sector organizations in the U.S. and international contexts. Course topics include, but are not limited to organizational effectiveness, organizational change management, and social entrepreneurship. Courses use case studies and practical application to prepare students to engage organizational challenges in an increasingly complex and dynamic world.

Community/Policy Domain: Courses in this domain invite students to critically examine the causes and consequences of complex social problems from a systems perspective and explore community- and policy-level approaches to change and intervention. Courses address a range of local and global topics and consider the diverse perspectives of marginalized communities. These topics include, but are not limited to educational equity, environmental justice and sustainability, violence prevention, and economic development, as well as poverty-related challenges such as fair and affordable housing, employment, health disparities, transportation, neighborhood safety, and resource provision.

Human and Organizational Development Capstone: (12 credit hours/Summer or 15 credit hours/Fall or Spring semesters): The Capstone is the immersive learning academic semester for junior and senior students in the Human and Organizational Development (HOD) major at Vanderbilt University. Successful completion of the HOD Capstone semester satisfies the Vanderbilt Immersion requirement. The Capstone is designed for students to apply the core HOD coursework and develop data-driven and research-grounded contributions to address human problems in organizations and communities. The HOD capstone requires 28 hours a week, at least 30% in person, fully in person preferred with the confirmed site and a weekly 3-hour seminar. The experience is possible in fall, spring or summer semesters. The HOD Capstone office has preexisting relationships with sites in Nashville, Chicago, New York City, San Francisco, Washington D.C. and London, England. However, students are not limited to these cities.

The HOD philosophy emphasizes the importance of connecting academic knowledge and theories to professional practice. HOD undergraduate core requirements offer an applied liberal arts education that will endow students with the skills and knowledge needed to succeed in organizations and communities. The capstone semester is designed to provide students the opportunity to synthesize the HOD coursework and learning experiences in an organizational context - which is central to the foundation of the applied learning experience and mission of our degree.

HOD majors (juniors and seniors) who have successfully completed the HOD 4949 Capstone Design requirements, approved for the HOD Capstone by the HOD Capstone Office, and completed the HOD core class prerequisites including HOD 1250, 1300, 2100, 2400 (not required for students who entered Summer 2023 or later), 2500, and 2700 are eligible to register for HOD 4950, 4951, 4952 and 4953.

Students enroll in a semester-long course, HOD 4949 in the ***fall to design a spring capstone and enroll in spring to design a summer or fall capstone. Note HOD 4949 Capstone Design is not offered in the summer.*** The capstone design semester is an opportunity for students to explore, develop and confirm a successful capstone experience. They partner with the HOD Capstone team for mentoring, coaching, connection events, and a variety of campus partners to confirm their capstone site. The capstone semester provides a variety of opportunities for students to integrate and apply earlier coursework in a civic/professional, research, international or creative partnership. Students design their capstone to align with their field of interest. They select opportunities that provide valuable applied work experiences, build professional development competencies, and help launch their post-graduation careers. During the HOD capstone semester, students enroll in four courses that accompany their capstone experience: HOD 4950 (P/F - 3 credit hours during summer; 6 hours during fall or spring) *Organizational Partnership*, HOD 4951 (3 hours) *Critical Reflexivity and Systems Thinking*, HOD 4952 (3 hours) *Mapping Future Development*, and HOD 4953 (3 hours) *Analysis and Contribution*. For additional information on the HOD Capstone visit our website [HERE](#).

Curriculum

Students take a minimum of 12 hours, distributed as follows:

General Education Core Requirements. Minimum of 31 hours

The General Education Core is composed of required coursework from the areas of Humanities/Fine Arts, Mathematics, Science, and Social Science. A listing of all courses that may fulfill these areas are located online in the Peabody Undergraduate Handbook.

Hours in required core areas are listed below. The same course may not count in more than one General Education Core area.

- Writing Requirements - 2 W courses
- English 1100
- Humanities/Fine Arts, 6 hours
- Math, (3 hours Statistics required), 6 hours
- Natural Science (one Lab Science required), 7 hours
- Social Science (3 hours Economics required), 9 hours

Writing Requirement

Before graduation, all students must successfully complete two writing courses. It is suggested that one of these courses be at the 1000-level and taken prior to the end of the student's fourth semester. Writing-intensive courses either have a "W" after the course number (A&S, Blair, or Engineering) or end with the digit "7" (Peabody). **ENGL 1220W, 1230W, and 1300W earned by testing credit such as AP or IB credit will NOT satisfy the Writing Requirement.**

Note: First Year Seminars (courses labeled 1111) offered through the College of Arts & Science and Blair School of Music may count as writing intensive courses. Peabody freshmen may only register for First Year Seminars during the first week of the fall and spring semesters if the courses are open.

English 1100 Requirement

English 1100 is required unless the students have satisfied one of the following:

1. SAT
 - a. Reading score of at least 27
 - b. Writing and Language score of at least 28
 - c. Evidence-Based Reading and Writing score of at least 660
2. ACT English test score of 30
3. AP/IB English test scores of 4 and 6 respectively

English 1100 counts for elective credit only toward the hours required for the B.S. Degree.

Academic credit is not awarded for SAT or ACT test scores.

Courses chosen to fulfill an area of the General Education Core can only be used to satisfy one requirement. A single course cannot be used to fulfill two requirement areas. The only exception is courses used to fulfill the Writing Requirement may also be used to satisfy the appropriate General Education Core area.

NOTE: Special topic courses are not ordinarily acceptable to meet general education core requirements. These courses require prior approval as substitute courses. Independent study courses are not acceptable to meet General Education Core requirements.

Major Requirements. 45-48 hours

Students take 15 hours of HOD Professional Core courses, 18 hours of Domain-level courses, and 12-15 hours of Capstone courses to fulfill requirements for the HOD major.

HOD Professional Core

HOD 1250. Applied Human Development [3]

HOD 1300. Small Group Behavior [3]

HOD 2100. Understanding Organizations [3]

HOD 2500. Systematic Inquiry [3]

HOD 2700. Public Policy [3]

HOD Domains. 18 hours

HOD majors will choose a total of 6 courses, two from each of the three domain areas.

Note that students may substitute up to a maximum two courses (including HOD 2501) across all Domains. Students cannot double count a course in both HOD and the Business minor.

Some domain courses listed below may not be offered every semester. Classes denoted with * are seminar or

special topic courses, not permanent.

Domain 1: Individual/Interpersonal, select two:

HOD 2051. Study Abroad/Transfer Coursework [3]
HOD 2260. Economics of Human Resources [3]
HOD 2400. Talent Management and Organizational Fit [3]
HOD 3200. Introduction to Data Science [3]
HOD 3300. Judgment and Analytical Reasoning [3]
HOD 4981. HOD Honors Seminar (with instructor permission) [3]
HODC 3232. Ethics for Human Development Professionals [3]
HODC 3650. CLD Seminar: Positive Youth Development [3]*
HODH 3211. Introduction to Counseling [3]
HODH 3650. HHS Seminar: The Self & Personal Development [3]*
HODH 3650. HHS Seminar: Alcohol, Drugs & Emerging Adulthood [3]*
HODH 3650. HHS Seminar: Sexualities, Health, & Society [3]
HODH 3650. HHS Seminar: Societal Norms & Health Behaviors [3]*
HODL 3204. Leadership Theory and Practice [3]
HODL 3254. Human Resource Management [3]
HODL 3284. Gender and Leadership [3]

Domain 2: Organizational/Group, select two:

HOD 2051. Study Abroad/Transfer Coursework [3]
HOD 3890. Special Topics in Human and Organizational Development [1-3]
HOD 4987. HOD Honors Seminar (with instructor permission) [3]
HODC 3262. Social Entrepreneurship: Principles and Application [3]
HODC 3650. CLD Seminar: Non-Profit Management [3]*
HODH 3650: HHS Seminar: Community Power & Public Health [3]
HODI 3220. International Organizations and Economic Development [3]
HODI 3240. Effectiveness in International For-Profit Organizations [3]
HODI 3890. Special Topics. ILD: Cognitive Bias, Cultural Competence, and Global Leadership [3]*
HODL 3224. Analyzing Organizational Effectiveness [3]
HODL 3234. Advanced Organizational Theory [3]
HODL 3264. Evidence-based Practice in Organizations [3]
HODL 3274. Managing Organizational Change [3]
HODL 3890. LOE Special Topic: Continuous Improvement in Organizations [3]*

Domain 3: Community/Policy, select two:

HOD 2051. Study Abroad/Transfer Coursework [3]

HOD 4987. HOD Honors Seminar (with instructor permission) [3]

HODC 3202. Community Development Theory [3]

HODC 3242. Environmental Politics and Justice [3]

HODC 3342. Introduction to Community Psychology [3]

HODC 3352. Philanthropy and Social Problem Solving [3]

HODC 3650. CLD Seminar: Building a Design Driven Culture [3]*

HODC 3650. CLD Seminar: Environmental Health: Water Justice [3]*

HODC 3650. CLD Seminar: Homelessness & What to Do About It [3]*

HODC 3650. CLD Seminar: Social Determinants of Health [3]*

HODC/H 3650. CLD/HHS Seminar: Food & Community Development [3]*

HODC/H 3650. CLD/HHS Seminar: Health Equity & Community Power [3]*

HODE 3205. Education Policy Analysis Methods [3]

HODE 3215. Education and Public Policy [3]

HODE 3225. Introduction to Public Finance of Education

HODH 3221. Health Service Delivery to Diverse Populations [3]

HODH 3650. HHS Seminar: Environmental Health [3]*

HODH 3650. HHS Seminar: Art, Community and Society [3]*

HODI 3200. Global Dimensions of Community Development [3]

HODI 3230. Education and Economic Development [3]

HODI 3260. Education in the Asia-Pacific Region: Development, Reform, and Innovation [3]

HODI 3270. Global Sustainable Development [3]

HOD Capstone. 12-15 hours

HOD 4949. Capstone Design [3]

HOD 4950. Capstone Partnership [3 in summer, 6 in Fall or Spring]

HOD 4951. Critical Reflex & Systems Thinking [3]

HOD 4952. Map Future Personal and Professional Development [3]

HOD 4953. Analysis and Contribution [3]

Honors Program

The HOD Honors Program is designed for highly motivated students who want to pursue intensive research. It offers outstanding undergraduate HOD majors an opportunity to become involved in research teams with professors and

graduate students. The program will help students develop skills in empirical research methods, writing, and presentation to provide a firm foundation for advanced graduate or professional training. The HOD Honors Programs requires a serious time commitment to a research project.

Application: Students may apply for the honors program at any time from the second semester of their sophomore year to the summer before their senior year. The application must be approved by the faculty member with whom the student will work, and will outline the nature of the research project, which will ordinarily be an extension of the faculty member's ongoing research. Students must have completed HOD 1250, HOD 1300, HOD 2100, HOD 2500, and a college statistics course and have an overall GPA of at least 3.6. This minimum GPA must be maintained to graduate with honors.

Applications will be evaluated by the HOD Honors Director, who will decide on admission, taking into consideration the numbers of applicants.

Requirements: Upon admission students will complete two (not necessarily back-to-back) semesters of honors seminar (for six total hours of credit), which satisfy one course in two HOD domains of the student's choosing, plus the writing course requirement. In the course, they will learn advanced research methods. In addition to the honors seminar, the student will work with the faculty sponsor on research for up to ten hours per week. Students must complete a pilot study (first semester) and an empirical (quantitative or qualitative) honors thesis (second semester) that is approved by two faculty readers, and orally present both pilot study and thesis. Although not required, honors projects may be coordinated with the HOD Capstone with permission of the instructor, the student's Honor's advisor, and HOD Capstone Director, and may be taken in the same semester as Capstone. Students are additionally encouraged to attend departmental colloquia and to take at least one graduate course in their area of interest.

Awards of departmental Honors in HOD will depend on successful completion of the course and the thesis. Highest Honors and Best HOD Honors Thesis may be awarded by vote of the Honors Committee.

Potential Peabody Second Majors

For students with a First Major in Human and Organizational Development (21 unique hours required for Peabody second majors)

Child Development (CD) (30 hours)

(See the CD major requirement pages for all required classes)

Courses that may be applied to both majors:

- HODC 3232 and HODC 3342 may be used for CD electives
- HOD 2500 may be used for the CD methods requirement
- PSY-PC or PSY courses used to satisfy the HOD General Education core social studies area as CD electives

Students may only apply nine hours from the courses used for the Human and Organizational Development major to fulfill the Child Development second major.

Child Studies (CST) (36 hours)

(See the CST major requirement pages for all required classes)

Courses that may be applied to both majors:

- HOD 2500 may satisfy the CST Research Methods requirement
- HODH 3221, HODC 3202 and/or HODC 3342 may be used to partially satisfy the Families, Community, & Diversity CST area or be used in the CST elective category

- HODC 3232 may also be used as a CST elective course.
- PSY-PC or PSY courses used to satisfy the H&OD General Education core social studies area may be used to partially satisfy CST Area categories or CST electives.

Students may only apply a maximum of **fifteen hours** from the courses used for the Human and Organizational Development major to fulfill the Child Studies second major.

Cognitive Studies (CGS) (33 hours)

(See the CGS major requirement pages for all required classes)

Courses that may be applied to both majors:

- Six hours of HOD 2500 and HODC 3222 may be used to satisfy CGS Methods of Inquiry
- PSY-PC or PSY courses used to satisfy the H&OD General Education core social studies area may be used to partially satisfy CGS Area categories or CGS electives.
- HODC 3232 and HODC 3342 may also be used as CGS elective courses.

Students may apply a maximum of **twelve hours** from the courses used for the Human and Organizational Development major to fulfill the Child Studies second major.

Note: Students who want to double-major in Human and Organizational Development and Early Childhood Education, Elementary Education or Special Education must take H&OD as their second major, due to state teacher licensure regulations.

Human and Organizational Studies

Human and Organizational Studies (HOS) is an alternative major that is available only to Human and Organizational Development (HOD) majors who, due to extenuating circumstances, are unable to complete the required HOD capstone internship after it is too late to complete a new first major. This alternative is initiated and approved by the director of the HOD Capstone Program and the Director of Undergraduate Studies for HOD. In lieu of the HOD Capstone, students complete 30 hours of upper-level approved HOD courses to meet the major's 45-hour degree requirement.

Students must complete the Human and Organizational Development general education core, the writing requirement, and earn a minimum of 120 hours and a 2.0 cumulative GPA.

CHAIR Megan Saylor

ASSOCIATE CHAIR Kristopher Preacher

DIRECTOR OF GRADUATE STUDIES David Cole

DIRECTOR OF UNDERGRADUATE STUDIES Leigh Scheer

Major in Child Development

The child development major is designed for students who wish to study children (infancy through adolescence) and the family, cultural, peer, school, and neighborhood contexts in which they live. The major is designed to provide a strong background in the social and behavioral sciences related to child development, a focused understanding of the scientific study of children and the contexts in which they develop, and opportunities for supervised and independent research on aspects of child development in ways that enable students to link theories and prior research to research design and data on children's development. The major is excellent preparation for graduate study in selected social science and professional fields (e.g., psychology, medicine, nursing, education, public policy) and offers an excellent complementary (or second) major for undergraduate students simultaneously pursuing a major in cognitive studies, elementary education, human and organizational development, or special education.

The child development curriculum is designed to ensure that students develop a background in the liberal arts and sciences; a clear understanding of the theories, major research findings, and research methods central to the field of child development; and an area of focus or expertise in child development. Development of background in the liberal arts and sciences occurs within the context of the General Education Core, composed of required and elective courses in communications, humanities, mathematics, natural sciences, and social sciences. A clear understanding of theory and research central to the field is developed through the major core courses. These include an overview of child development, courses focused on the domains of psychological processes central to human development (cognition; social and personality development), courses related to major epochs of child development (infancy and adolescence), and courses devoted to the major research methodologies in the field (experimental, observational, psychometric). Students select an area of concentration (major elective area) to complement the field as a whole.

Honors Program

The Honors Program in child development offers qualified majors the opportunity to conduct individual research projects in collaboration with faculty members. This research experience culminates in the writing and public presentation of a senior thesis. Students who major in child development are eligible to apply for the Honors Program at the end of their sophomore year if they have an overall grade point average of at least 3.2 and at least a 3.2 in child development courses.

Students who complete the program successfully and who have a final grade point average of at least 3.2 will receive Honors or Highest Honors in child development. The program should substantially aid those intending to do graduate work. More specific information concerning admission to and the requirements of the Honors Program is available from the director of the Honors Program, the director of undergraduate studies, or the department education coordinator.

Curriculum

Students take a minimum of 120 hours, distributed as follows:

General Education Core Requirements. Minimum 31 hours.

The General Education Core is composed of required course work from the areas of Humanities/Fine Arts, Mathematics, Science, and Social Science. Listings of all courses that may fulfill these areas are located online in the

A score of 5 on the AP Statistics exam will waive students from the Statistics General Education Core requirement (applied to all PSYHD majors). A score of 5 on the AP Statistics exam will serve as a pre-requisite in all places that PSY-PC 2110 currently serves as a pre-requisite.

Writing Requirement

See the "Writing Requirement" section of the general Peabody academic policy section of the Undergraduate Catalog.

NOTE: First-year Seminars (courses numbered 1111) offered through the College of Arts and Science and the Blair School of Music may count as writing intensive courses. Peabody freshmen may only register for First-year Seminars when open registration begins.

Major Requirements. 30 hours.

Students take a minimum of 30 hours in child development. The core consists of seven courses (21 hours) in developmental areas, epochs, and methods, and a minimum of three additional courses (9 hours) in an elective area of specialization.

Major Core. 21 hours.

PSY-PC 1250. Developmental Psychology

PSY-PC 2250. Cognitive Aspects of Human Development

or PSY-PC 2257 Cognitive Aspects of Human Development (Writing)

PSY-PC 2400. Social and Personality Development

PSY-PC 2120. Statistical Analysis One of the following two courses:

PSY-PC 2500. Infancy

PSY-PC 2550. Adolescent Development

Two of the following courses:

PSY-PC 2170. Experimental Methods, or

PSY-PC 2150. Principles of Experimental Design

PSY-PC 3722. Psychometric Methods

PSY-PC 3724. Psychometrics

PSY-PC 3220. Pediatric Research Design

PSY-PC 3860, 3980, 3981, 4998, 4999; PSY 3840, 3980, 4998, 4999. Directed Research or Honors Research (Only 3 hours of either Directed Research or Honors Research can be applied to this requirement.)

Major Elective Area. A minimum of 9 hours.

Any course in the Department of Psychology and Human Development (Peabody) or the Department of Psychology (A&S) that is not being used to meet another psychology requirement can be used as an elective (except, PSY 1200, PSY 2100, PSY-PC 1205/1207, PSY-PC 1250, 2110, 3870).

Additionally, the following courses may serve as electives. With the approval of the adviser, program director, or

director of undergraduate studies, other courses may also be used as part of the child development elective area.

EDUC 3120. Children in Families and Schools

EDUC 3140. Learning and Development in Early Childhood Education

ENED 2430. Fostering Language in Classrooms

ENED 2100. Literature and Drama for Young Children

ENED 2200. Exploring Literature for Children

HODC 3232. Ethics for Human Development Professionals

HODC 3342. Introduction to Community Psychology

NSC 2201. Neuroscience

NSC 3269. Developmental Neuroscience

PHIL 3617. Philosophy of Language

PSY-PC 3850.* Independent Study

PSY-PC 3860.* Directed Research

PSY-PC 3980 or Psychology 3980, 3981, 4998, 4999* Honors Research

SPED 2120. Family Interventions

SPED 2160. Cultural Diversity in American Education

SPED 2310. Managing Academic and Social Behavior

SPEDH 3348. Language and Learning

SPEDS 2430. Introduction to Language and Communication

NOTE: Research/experiential courses marked * above may be repeated freely for elective credit toward graduation. However, only a total of 6 hours from among these courses, in any combination, may be used as elective credit within the major.

Second Major or Electives. 50 hours (or less if additional hours are earned in the General Education Core, Major Core, or Major Elective Area).

Major in Child Studies

Peabody has long had great strength in the area of child studies. The 36-hour interdisciplinary major in child studies draws on courses from psychology, education, special education, and human and organizational development. The major is excellent pre-professional preparation for students interested in graduate school in psychology or education, in law (e.g., child and family advocacy), or in various health related areas (e.g., medicine, nursing) involving children. It is also appropriate for students who are interested in gaining a broader understanding of children and families in contemporary society. The major areas covered are: developmental psychology; learning; research methods; language and literacy; and families, community, and diversity.

Honors Program

The Honors Program in child studies offers qualified majors the opportunity to conduct individual research projects in collaboration with faculty members. This research experience culminates in the writing and public presentation of a senior thesis. Students who major in child studies are eligible to apply for the Honors Program at the end of their sophomore year if they have an overall grade point average of at least 3.2 and a 3.2 in child studies courses. Students who complete the program successfully and who have a final grade point average of at least 3.2 will receive Honors or Highest Honors in child studies. The program should substantially aid those intending to do graduate work. More specific information concerning admission to and the requirements of the Honors Program is available from the director of the Honors Program, the director of undergraduate studies, or the department

education coordinator.

Curriculum

Students take a minimum of 120 hours, distributed as follows*:

General Education Core Requirements. Minimum 40 hours.

The General Education Core is composed of required course work from the areas of Humanities/Fine Arts, Mathematics, Science, and Social Science. Listings of all courses that may fulfill these areas are located online in the Peabody Undergraduate Handbook.

*A score of 5 on the AP Statistics exam will waive students from the Statistics General Education Core requirement (applied to all PSYHD majors). A score of 5 on the AP Statistics exam will serve as a pre-requisite in all places that 2110 currently serves as a pre-requisite.

Writing Requirement

See the "Writing Requirement" section of the general Peabody academic policy section of the Undergraduate Catalog.

NOTE: First-year Seminars (courses numbered 1111) offered through the College of Arts and Science and the Blair School of Music may count as writing intensive courses. Peabody freshmen may only register for First-year Seminars when open registration begins.

PSY-PC 3850.* Independent Study

PSY-PC 3860.* Readings and Research for Undergraduates

PSY-PC 3980, 3981, 4998, 4999, or PSY 3980, 3981, 4998, 4999.* Honors Research

HOD 3232. Ethics for Human Development Professionals

HODC 3202. Community Development Theory

NOTE: Research/experiential courses marked * above may be repeated freely for elective credit toward graduation. However, only a total of 6 hours from among these courses, in any combination, may be used as elective credit within the major.

Major in Cognitive Studies

The cognitive studies major is designed for students who wish to become active inquirers into the processes by which people learn to think, solve problems, and reason. The major encourages the development of flexible reasoning and problem-solving skills that are useful in a wide variety of endeavors. The major is excellent preparation for graduate study in the social and behavioral sciences as well as for areas (such as medicine and law) that place importance on inquiry and clear thinking.

The curriculum is planned to ensure that students receive a strong background in both science and the liberal arts, with an emphasis on problem solving and complex decision making. The courses in the core curriculum focus on various aspects of human cognition, including communication, cognitive development, basic cognitive processes, applications of theories of knowledge, and sociocultural aspects of learning. Students are encouraged to consult their advisers about pursuing a second major or developing an area of concentration that is consistent with their career plans. The major also emphasizes an appreciation of the scientific method and the research process; numerous opportunities exist to pursue independent study in close collaboration with faculty members.

Leadership and success in our society will depend increasingly on one's ability to process complex information, solve difficult problems using systematic analysis, and facilitate the learning of others. The knowledge and experience gained by students in cognitive studies will allow them to be full participants in the society of learners

who represent the future.

Honors Program

The Honors Program in cognitive studies offers qualified majors the opportunity to conduct individual research projects in collaboration with faculty members. This research experience culminates in the writing and public presentation of a senior thesis. Students who major in cognitive studies are eligible to apply for the Honors Program at the end of their sophomore year if they have an overall grade point average of at least 3.2 and a 3.2 in cognitive studies courses. Students who complete the program successfully and who have a final grade point average of at least 3.2 will receive Honors or Highest Honors in cognitive studies. The program should substantially aid those intending to do graduate work. More specific information concerning admission to and the requirements of the Honors Program is available from the director of the Honors Program, the director of undergraduate studies, or the department education coordinator.

Curriculum

Students take a minimum of 120 hours, distributed as follows:

General Education Core Requirements. Minimum 31 hours.

The General Education Core is composed of required course work from the areas of Humanities/Fine Arts, Mathematics, Science, and Social Science. Listings of all courses that may fulfill these areas are located online in the Peabody Undergraduate Handbook.

A score of 5 on the AP Statistics exam will waive students from the Statistics General Education Core requirement (applied to all PSYHD majors). A score of 5 on the AP Statistics exam will serve as a pre-requisite in all places that 2110 currently serves as a pre-requisite.

Writing Requirement

See the "Writing Requirement" section of the general Peabody academic policy section of the Undergraduate Catalog.

NOTE: First-year Seminars (courses numbered 1111) offered through the College of Arts and Science and the Blair School of Music may count as writing intensive courses. Peabody freshmen may only register for First-year Seminars when open registration begins.

Major Requirements. 33 hours.

Students take a minimum of 33 hours in Cognitive Studies. The core consists of four courses (12 hours), a minimum five additional courses (15 hours) in the elective area, and two courses (6 hours) in the Methods of Inquiry area.

Major Core. 12 hours.

PSY-PC 1205 *or* 1207. Minds, Brains, Contexts, and Cultures

PSY-PC 2200. Psychology of Thinking *or* PSY-PC 3120. Cognitive Psychology

PSY-PC 3650. Advanced Topical Seminar

One of the following:

PSY-PC 2170. Experimental Methods *or* PSY 2150. Principles of Experimental Design

Methods of Inquiry. 6 hours.

May also be used to satisfy General Education Core requirements

ANTH 1301, 2211
CHEM 2100
CS 1100. Applied Programming and Problem Solving with Python
CS 1104 or 2212
EES 2250
EES 3250
HOD 2500
HODC 3222
PHIL 1003, 3003, 3616
PSY-PC 2120, 3722, 3724
PSY 3840
PSY 3980
PSY 3981
PSY-PC 3220. Pediatric Research Design
PSY-PC or PSY 3980, 3981, 4998, 4999 (Only 3 hours from any of these courses can be applied to this requirement)
SOC 3002
SPED 2310
SPEDH 3871/SPEDS 3871
DS 1000. Data Science: How Data Shape our World

Major Elective Area. 15 hours.

Any course in the Department of Psychology and Human Development (Peabody) or the Department of Psychology (A&S) that is not being used to meet another psychology requirement can be used as an elective (except PSY-PC 1250, 2110, 3870, PSY 1200, PSY 2100).

Additionally, the following courses may serve as electives. With the approval of the adviser, program director, or director of undergraduate studies, other courses may also be used as part of the cognitive studies elective area.

ANTH 1301. Biological Anthropology
ANTH 2601. Introduction to Linguistics
EDUC 3140. Learning and Development in Early Childhood Education
ENED 2430. Fostering Language in Classrooms
NSC 2201. Neuroscience
PHIL 3617. Philosophy of Language
PHIL 3630. Philosophy of Mind
PSY 3270/NSC 3270. Computational Neuroscience
PSY 4218. Computational Cognitive Modeling
PSY-PC 3850.* Independent Study

PSY-PC 3860, PSY 3840.* Directed Research

PSY-PC 3980, 3981, 4998, 4999, or PSY 3980, 3981, 4998, 4999.* Honors Research

SPEDH 3348. Language and Learning

SPEDS 2430. Introduction to Language and Communication

NOTE: Research/experiential courses marked * above may be repeated freely for elective credit toward graduation. However, only a total of 6 hours from among these courses, in any combination, may be used as elective credit within the major.

Major in Language Sciences

The Language Sciences Major emphasizes language theory and research in the behavioral sciences. A working knowledge of the basic processes involved in speaking, understanding, and reading will benefit students interested in the learning sciences. It is expected that students in this major will become knowledgeable both in the content knowledge yielded through scientific study of language structure and use, and in the scientific methods used to generate that knowledge.

Curriculum

Students take a minimum of 120 hours, distributed as follows:

General Education Core Requirements. Minimum 31 hours.

The General Education Core is composed of required course work from the areas of Humanities/Fine Arts, Mathematics, Science, and Social Science. Listings of all courses that may fulfill these areas are located online in the Peabody Undergraduate Handbook.

A score of 5 on the AP Statistics exam will waive students from the Statistics General Education Core requirement (applied to all PSYHD majors). A score of 5 on the AP Statistics exam will serve as a pre-requisite in all places that 2110 currently serves as a pre-requisite.

Writing Requirement

See the "Writing Requirement" section of the general Peabody academic policy section of the Undergraduate Catalog.

NOTE: First-year Seminars (courses numbered 1111) offered through the College of Arts and Science and the Blair School of Music may count as writing intensive courses. Peabody freshmen may only register for First-year Seminars when open registration begins.

Major Requirements. 33 hours.

Major Core (9 hours)

9 hours (3 of the following):

PSY-PC 3130. Introduction to Formal Linguistics

PSY-PC 3140. Psychology of Language

PSY-PC 3150. Language Development

PSY-PC 3190. Language and the Brain

Seminar (3 hours, 1 of the following)

PSY-PC 3650 Advanced Topical Seminar

Design (3 hours, 1 of the following)

PSY 2150 Principles of Experimental Design

PSY-PC 2170 Experimental Research Methods in Child Development

Methods (6 hours)

(note that students have many choices for a Methods course, these are some examples)

HOD 2500 Systematic Inquiry

PSY-PC 2170 Experimental Methods OR PSY 2150 Principles of Experimental Design

PSY-PC 3722 Psychometric Methods

PSY-PC 3724 Psychometrics

PSY-PC 3850/3860 OR PSY 3890/3891 (3 hours)

Electives (12 hours)

As with our other majors, we plan to list every class in PSY&HD and PSY except the intro courses (PSY 1200, PSY 2100, PSY-PC 1205/07, PSY-PC 1250, PSY-PC 2110 and PSY-PC 3870) as options for electives. In addition, given the focus of language for this major, we plan to go through the catalog and add courses from other departments with a language focus, including ANTH, SPED, T&L, SOC, etc. Some examples of elective courses that students might be interested in taking include:

PSY-PC 3160 Bilingualism

PSY-PC 3170 Cognitive Science of Reading

PSY-PC 3180 How We Talk

PSY-PC 3190 Language and the Brain

PSY-PC 3860 Directed Research

SPEDS 2430 Introduction to Language and Communication

SPEDH 3348 Language and Learning

PHIL 3617 Philosophy of Language

ANTH 1601 Introduction to Language and Communication

Special Education**Major in Special Education**

CHAIR Marcia Barnes

ASSOCIATE CHAIR Kimberly Paulsen

DIRECTOR OF GRADUATE STUDIES Robert M. Hodapp

DIRECTOR OF PROFESSIONAL STUDIES Alexandra Da Fonte

The undergraduate program in special education prepares students to work with persons with disabilities and leads to licensure in special education. Students pursue an interdisciplinary major in exceptional learning with emphasis in one of the two specialty areas: high-incidence disabilities (interventionist program K-8 and/or 6-12) or multiple and severe disabilities (comprehensive program). This major can be combined with other majors such as cognitive studies, child development, or majors in the College of Arts and Science. The program is field- oriented and problem centered, with most professional courses requiring direct involvement with individuals with disabilities. Beginning in the freshman year, students observe and work in a variety of educational settings in local schools and in classrooms off campus.

Vanderbilt students seeking teacher licensure must apply through the Office of Teacher Licensure at Vanderbilt and must meet licensure requirements in effect at the time of their graduation, which may be different from licensure requirements in effect at the time they entered the program. Each year, teacher licensure candidates should consult the current Vanderbilt *Undergraduate Catalog*, the *Undergraduate Guide to Teacher Licensure* published by the Vanderbilt Office of Teacher Licensure, and the *Undergraduate Handbook* published by the Office of Academic Services.

Honors Program

The Honors Program in Special Education offers qualified majors the opportunity to gain experience in conducting research in collaboration with a faculty mentor. This experience culminates in the writing and presentation of a senior project. Students who major in special education are eligible to apply for the Honors Program in the spring of their sophomore year if they have an overall grade point average of at least 3.5. Students who are accepted into the Honors Program, successfully complete the program, and maintain the required grade point averages, will graduate with Honors in Special Education. Specific information concerning admission to and the requirements of the Honors Program in Special Education is available from Professor Andrea Capizzi, director of undergraduate studies for the Department of Special Education. Students should be aware that participation in the Honors Program is quite time-intensive and represents a substantial commitment of effort across at least three semesters. Therefore, potential participants must carefully consider whether they are able to, and want to, devote the required time and energy to this program.

B.S. Degree Requirements

Specializations are available in high-incidence disabilities/interventionist (grades K-8/6-12 interventionist licensure), and severe disabilities (grades K-12 comprehensive licensure). Total hours will vary depending on the area of specialization.

Students take a minimum of 120 hours, distributed as follows:

General Education Core Requirements. Minimum 31 hours.

The General Education Core is composed of required course work from the areas of Humanities/Fine Arts, Mathematics, Science, and Social Science. Listings of all courses that may fulfill these areas are located online in the Peabody Undergraduate Handbook.

Writing Requirement

See the "Writing Requirement" section of the general Peabody academic policy section of the Undergraduate Catalog.

Specializations

The following courses are taken as part of the SPED Core.

EDUC 1227. Society, the School, and the Teacher

PSY-PC 2600. Educational Psychology

SPED 1210. Introduction to Exceptionality

The following courses are required in each area of specialization.

SPED 1175. Freshman Seminar

SPED 2317. Managing Academic and Social Behavior

SPED 4950. Student Teaching Seminar

SPED 4954 or 4951. Student Teaching

SEVERE DISABILITIES PROGRAM/COMPREHENSIVE CORE.

SPEDS 2120. Issues in Family Intervention

SPEDS 2430. Introduction to Language and Communication

SPEDS 2450. Augmentative and Alternative Communications

SPEDS 3300. Methods of Instruction for Students with Severe and Multiple Disabilities

SPEDS 3312. Procedures in Transition to Adult Life

SPEDH 3328. Teaching Mathematics to Students with Severe and Persistent Academic and Behavior Difficulties: K-8

SPEDS 3330. Characteristics of Students with Severe and Multiple Disabilities

SPEDS 3350. Access to General Education and Teaching Functional Academics

SPEDS 3661. Fieldwork in Special Education: Severe Disabilities

SPEDS 3667. Seminar in Severe Disabilities Fieldwork

SPEDS 3871. Field Work in Special Education: Autism, Intellectual, and Multiple Disabilities (9 hours)

ELECTIVES OR SECOND MAJOR.

Students in the Severe Incidence track will need 22 hours of elective credit or a second major to fulfill this requirement.

HIGH-INCIDENCE PROGRAM/INTERVENTIONIST CORE.

(Courses are specific to choice of K-8 or 6-12 licensure track.)

SPED 2160. Cultural Diversity in American Education*

SPEDH 3308. Understanding Students with Severe and Persistent Academic and Behavior Difficulties

SPEDH 3318. Assessment for Students with Severe and Persistent Academic and Behavior Difficulties

SPEDH 3328. Teaching Mathematics to Students with Severe and Persistent Academic and Behavior Difficulties: K-8

SPEDH 3338. Teaching Reading to Students with Severe and Persistent Academic and Behavior Difficulties

SPEDH 3348. Language and Learning*

SPEDH 3358. Advanced Reading Methods for Students with Severe and Persistent Academic and Behavior

Difficulties

SPEDH 3661. Fieldwork in Special Education: High Incidence Disabilities

SPEDH XXXX. Teaching Secondary Students with Severe and Persistent Academic and Behavior Difficulties

SPEDH 3378. Teaching High School Students with Severe and Persistent Academic and Behavior Difficulties

SPEDH 3388. Teaching Mathematics to Students with Severe and Persistent Academic and Behavior Difficulties 6-12

SPEDH 3871. Field Work in Special Education for Mild/Moderate Disabilities (9 hours)

ELECTIVES OR SECOND MAJOR

Students in the High Incidence track will need 25 hours of elective credit or a second major to fulfill this requirement.

Disability Studies

Disability studies is an alternative major that is available *only* to special education (SPED) majors who discover they are unable to complete required SPED pre-student teaching and/or student teaching capstone after it is too late to complete a different first major. This alternative is initiated by the director of undergraduate studies, with consultation with SPED track directors and the Teacher Preparation Committee. Students completing the disability studies degree do not choose a track.

Teaching and Learning

Majors in Early Childhood and Elementary Education, Secondary Education, Multilingual and Multicultural Studies, and Minor in Multilingual Learner Education

CHAIR Nicole Allen

ASSOCIATE CHAIR Heather Jo Johnson

DIRECTOR OF GRADUATE STUDIES Heidi Carlone

Elementary Education

The specialization in elementary education is field-oriented and designed to prepare students to teach children in grades K-5. Beginning in the freshman year, students observe and participate in local schools and experimental classrooms on campus. Most General Education Core courses are taken in the College of Arts and Science.

Students must combine a specialization in elementary education with a second major in the liberal arts, an interdisciplinary major, or another major offered by Peabody College or the College of Arts and Science. Course work beyond the standard 120-hour program may be required for some double majors.

Vanderbilt students seeking teacher licensure must apply through the Office of Teacher Licensure at Vanderbilt and must meet licensure requirements in effect at the time of their graduation, which may be different from licensure requirements in effect at the time they entered the program. Licensure requirements are currently undergoing change. Each year, teacher licensure candidates should consult the current Vanderbilt *Undergraduate Catalog*, the *Undergraduate Guide to Teacher Licensure* published by the Vanderbilt Office of Teacher Licensure, and the *Undergraduate Handbook* published by the Office of Undergraduate Academic Affairs.

B.S. Degree Requirements

Elementary Education (K-5 Licensure)

Students take a minimum of 120 hours, distributed as follows:

General Education Core Requirements. Minimum 31 hours.

The General Education Core is composed of required course work from the areas of Humanities/Fine Arts, Mathematics, Science, and Social Science. Listings of all courses that may fulfill these areas are located online in the Peabody Undergraduate Handbook.

Writing Requirement

See the "Writing Requirement" section of the general Peabody academic policy section of the Undergraduate Catalog.

NOTE: First-year Seminars (courses numbered 1111) offered through the College of Arts and Science and the Blair School of Music may count as writing intensive courses. Peabody freshmen may only register for First-year Seminars when open registration begins.

Foundation Courses (9 hours):

EDUC 1220/1227. Society, the School, and the Teacher

PSY-PC 2660. Educational Psychology

SPED 1210- Introduction to Exceptionality

Pedagogical Courses (20 hours):

EDUC 3212. Introduction to Reading Processes and Assessment

EDUC 3214. Theory and Methods of Reading Instruction in Elementary Schools

EDUC 3215. Language Arts in Elementary Schools

HMED 2250. Introduction to Arts Education

MTED 2200. Mathematics for Elementary Teachers

MTED 3250. Teaching Mathematics in Elementary Schools

SCED 3240. Teaching Science in Elementary Schools

SSED 3240. Teaching Social Studies in Elementary Schools

Practicum Experiences (9 hours)

EDUC 3216. Practicum in Teaching Elementary Reading and Language Arts

EDUC 3240. Practicum in Elementary Science and Social Studies

MTED 3251. Practicum in Elementary Mathematics

Student Teaching and Seminar (12 hours)

EDUC 4952. Student Teaching in Elementary School

EDUC 4962. Student Teaching Seminar: Elementary

An approved second major is required.

Secondary Education

The major in secondary education is designed to prepare the student to teach one or more subjects at the secondary level (grades 6–12). Students must complete General Education Core requirements, Professional Education requirements, and a primary area of emphasis in at least one endorsement field, which involves 31 to 40 hours of course work in the discipline and results in a major in that area as defined by the College of Arts and Science. Specific requirements for a second area of endorsement may be obtained from the Office of Teacher Licensure in the Peabody Administration Building. Students must take the appropriate methods course for each area of endorsement.

Vanderbilt students seeking teacher licensure must apply for licensure through the Peabody Office of Teacher Licensure and must meet licensure requirements in effect at the time they entered Vanderbilt. Licensure requirements are currently undergoing change. Each year, teacher licensure candidates should consult the current Vanderbilt *Undergraduate Catalog*, the *Undergraduate Guide to Teacher Licensure* published by the Vanderbilt Office of Teacher Licensure, and the *Undergraduate Handbook* published by the Office of Undergraduate Academic Affairs.

B.S. Degree Requirements

Secondary Education (6–12 Licensure)

Students take a minimum of 120 hours, distributed as follows:

General Education Core Requirements. Minimum 31 hours.

The General Education Core is composed of required course work from the areas of Humanities/Fine Arts, Mathematics, Science, and Social Science. Listings of all courses that may fulfill these areas are located online in the *Peabody Undergraduate Handbook*.

All Peabody College freshmen who have not earned a combined score of 660 on the evidence-based reading and writing component of the redesigned SAT with minimum scores of 27 on the reading component and 28 on the writing and language component, or ACT English test score of 30 or above, or AP or IB English scores above 4 and 6 respectively, are required to successfully complete English 1100 Before graduation, all Peabody students must successfully complete two writing courses. Writing-intensive courses either have a “W” after the course number (A&S courses) or end with the digit “7” (Peabody courses). ENGL 1220W, 1230W, and 1300W earned by testing credit such as AP or IB credit will not satisfy the Writing requirement.

NOTE: First-year Seminars (courses numbered 1111) offered through the College of Arts and Science and the Blair School of Music may count as writing intensive courses. Peabody freshmen may only register for First-year Seminars when open registration begins.

Major Foundations. 9 hours.

EDUC 1220 Society, School & Teacher, SPED 1210 Introduction to Exceptionality, PC-PSY 1250 or 2550 Developmental Psychology

Learning and Equity in Diverse Contexts Specialization

Learning and equity in diverse contexts is focused on the interaction of learning, design, and context in out-of-school settings, attracting students who are interested in learning in informal settings. This specialization is appropriate for students who envision themselves working and learning with students out of traditional classroom settings.

Note: Students may enroll in this specialization after matriculation to the university, but may not be admitted directly into this program. Educational Studies can serve as a student's first or second major, but must be a third major or minor if combined with a licensure program. Students must use the Change of Major/Minor Declaration/Change form to declare educational studies as their first, second, or third major.

LEARNING, DEVELOPMENT AND CONTEXT CORE (9 hours chosen from the following)

EDUC 3140. Learning and Development in Early Childhood Education

EDUC 2160. Cultural Diversity in American Education

EDUC 3120. Children in Families and Schools

EDUC 2920. Social & Philosophical Aspects of Education

FIELD WORK IN EDUCATIONAL STUDIES *(12 hours)*

EDUC 3861. Initial Fieldwork in Educational Studies [3]

EDUC 3862. Advanced Fieldwork in Educational Studies [3]

EDUC 4950. Capstone Fieldwork in Educational Studies [6]

PLUS ELECTIVE COURSES *(3 hours)*

EDUC 3180/3270. Managing Instructional Settings

ENED 2430. Fostering Language in Diverse Classrooms

ENED 3350. Literature, Popular Culture & New Media

HMED 2150/2250. Children's Development in the Arts

MTED 2200. Children's Mathematical Thinking and Learning

MTED 3320. Intro to Math Literacies

MTED 3360. Math Visualizations

PSY-PC 2600. Educational Psychology

PHIL 3603. Philosophy of Education

SCED 3320. Intro to Science Literacies

SSED 2200. Scientific and Historical Reasoning in Children

SSED 3260. Human Geography

SPED 3332. High Poverty Youth

Additional courses as approved by adviser and UAC

Elementary Education and Secondary Education Specializations

These are alternative education studies specializations that are available only to students with these first majors who discover they are unable to complete their major requirements pre-student teaching after it is too late to complete a different first major to graduate. These educational studies specializations are initiated by the director of undergraduate studies, in consultation with the student and the elementary or secondary education major advisers. Students must use the Change of Major/Minor Declaration/Change form to declare education studies as their first or second major.

Elementary Specializations *(25 hours)*

EDUC 3212. Introduction to Reading Processes and Assessment [3]

EDUC 3214. Reading in Elementary Schools [3]

EDUC 3215. Language Arts in Elementary Schools [3]

MTED 3250. Teaching Mathematics in Elementary Schools [2]

SSED 3240. Teaching Social Studies in Elementary Schools [2]

SCED 3250. Teaching Science in Elementary Schools [2]

HMED 2250. Introduction to Arts Education [2]

EDUC 3270. Managing Instructional Settings [2]

EDUC 3216. ELE Practicum: Language and Literacy [1]

EDUC 3240. ELE Practicum: Science and Social Studies [1]

MTED 3251. ELE Practicum: Mathematics and Science [1]

PSY-PC 2600. Educational Psychology [3]

Secondary Specialization (42 hours)

EDUC 3310. Teaching in Secondary Schools [3]

EDUC 3720. Foundations for Teaching Linguistically Diverse Students [3]

EDUC 3620. Foundations of Education [3]

SCED/MTED/SSSED 3370 [3] or ENED 3380. Teaching Methods in Secondary Schools [3]

ENED/SCED/MED/SSSED 3370. Teaching Methods in Secondary Schools [3]

EDUC 3871. Practicum in Secondary Education I [3]

EDUC 3280. Planning & Assessment Strategies [3]

ENED/SCED/MTED/SSSED 3371. Professional Year Practicum [3]

SCED 3400. Modeling in the Secondary Classroom [3]

MTED 3360. Computers, Teaching, and Mathematical Visualization [3]

SSSED 3260. Human Geography [3]

ENED 3357. Literature, Pop Culture, and New Media [3]

ENED 3310. Language Study in the Secondary Classroom [3]

Plus 3 hours of electives

Multilingual and Multicultural Studies (2nd major)

The interdisciplinary second major - Multilingual and Multicultural Studies - equips students with the knowledge and skills to communicate effectively across languages and cultures. Students select from one of two tracks: (1) Language, Culture, and Learning or (2) English as a Second Language (ESL) Teacher Licensure. This major prepares students to engage thoughtfully in diverse linguistic and cultural contexts, pursue the study of linguistics, and/or teach multilingual learners of English at the elementary, secondary, or postsecondary level.

Track 1: Language, Culture, and Learning

Education (9 credits)

- EDUC 3730: Foundations of Multilingual Education
- EDUC 3750: Educational Linguistics and Second Language Acquisition
- Writing and Culture requirement (3 credits - choose one of the following)
 - EDUC 1227: School, Society, and Teacher
 - EDUC 3537: Scholarly Writing and Thinking
 - EDUC 3547: Language Curriculum and Design

Linguistics (3 credits - choose one of the following)

- EDUC 3575: Multilingualism & Multimodality
- EDUC 3770: Language Variation and Socialization
- EDUC 3790: Qualitative Language Analysis
- ENED 2430: Fostering Language in Diverse Classrooms
- SPED 2430: Intro to Language and Communication

World/Foreign Language (12 credits)

- Take 12 credits of any World/Foreign Language available at Vanderbilt University.

Electives (9 credits)

- With advisor approval, take any courses that support your skill development in your study of language, culture, and/or learning.

If you are adding endorsement to teach English as a Second Language, you must take

- EDUC 3740: Methods of Educating Multilingual Learners
- EDUC 3742: Practicum: Multilingual Learners
- EDUC 3760: Assessment with Multilingual Learners

Track 2: English as a Second Language (ESL) Teacher Licensure

Initial ESL Licensure (18 credits)

- EDUC 3547: Language Curriculum Design
- EDUC 3730: Foundations of Multilingual Education
- EDUC 3740: Methods of Multilingual Learners
- EDUC 3742: Practicum: Multilingual Learners
- EDUC 3750: Educational Linguistics and Second Language Acquisition
- EDUC 3760: Assessment with Multilingual Learners

Teacher Licensure Preparation (18 credits)

- EDUC 3310: Classroom Ecologies (or advisor-approved alternative)
- SPED 1210: Introduction to Exceptionalities in Special Education
- EDML XXXX: Student Teaching (spring semester of senior year)
- EDML XXXX: Student Teaching Seminar

World/Foreign Language (6 credits)

- Demonstrate language proficiency equivalent in a World/Foreign Language that is equivalent to 6 university-level credits, potentially by taking a minimum of 6 credits of World/Foreign language available at Vanderbilt University.

Peabody Minors

Human and Organizational Development Minor

The HOD minor requires 15 unique hours that are not counted toward any other major minor. The minor in human and organizational development consists of 18 hours in the following courses:

Required Course. 3 hours.

HOD 1250. Applied Human Development

Choose Two Additional Courses. 6 hours.

HOD 1300. Small Group Behavior

HOD 2100. Understanding Organizations

HOD 2500. Systematic Inquiry

HOD 2700. Public Policy

Domain Courses. 9 hours.

Students will choose 3 HOD Domain level courses (9 hours) to count towards the HOD minor. *Only one approved substitution and/or HOD 2051 will be permitted within the Domain area of the minor. Minors can choose any three domain level courses.*

Psychology and Human Development minors:

Child Development

The minor in child development consists of 18 hours in the following courses:

PSY-PC 1250. Developmental Psychology

PSY-PC 2110. Introduction to Statistical Analysis (may be taken as part of the Liberal Education Core)

One of the following:

PSY-PC 2250. Cognitive Aspects of Human Development

PSY-PC 2400. Social and Personality Development

One of the following:

PSY-PC 2500. Infancy

PSY-PC 2550. Adolescent Development

One of the following:

PSY-PC 2170. Experimental Methods

PSY-PC 2150. Principles of Experimental Design

PSY-PC 3722. Psychometric Methods

PSY-PC 3220. Pediatric Research Design

One child development elective course

(Any of the courses above not taken to meet a minor requirement or any course listed as an elective for the child development major)

Child Psych and Mental Health

The minor in Child Psychology and Mental Health is offered through the Peabody Department of Psychology and Human Development. Its focus is on (a) the development of psychopathology, including depression, anxiety, and behavioral disorders, (b) evidence-based assessment and treatment of psychological disorders in children and adolescents, and (c) clinical science research methods. Given the centrality of emotional and behavioral functioning

in human life, knowledge of these areas of scholarship will be useful to students interested in the behavioral sciences and education in general and is particularly relevant for those interested in clinical research careers.

Required (Core) Courses. 6 credit hours.

PSY-PC 3200. Introduction to Clinical Psychology

AND

PSY-PC 2700. Abnormal Child Psychology

Elective Courses. 9 credit hours.

PSY-PC 2520. Infant and Early Childhood Mental Health

PSY-PC 3650. Developmental Disabilities

PSY-PC 3650. Clinical Interventions in Vulnerable Populations

PSY-PC 3650. Multiple Facets of Human Diversity

PSY-PC 3650. Coping with Stress

PSY-PC 3650. Developmental Disabilities

PSY-PC 3230. Play-Based Approaches to Family Stress and Coping

PSY-PC 3650. Grief and Loss

PSY-PC 3860. Directed Research (must involve work on a study or project related to clinical psychology; maximum 3 hours)

PSY 3625. Depression

PSY 3100. Abnormal Psychology

SPEDS 2120. Issues in Family Intervention

SPEDH 3308. Understanding Students with Severe and Persistent Academic and Behavior Difficulties

SPEDH 3318. Assessment for Students with Severe and Persistent Academic and Behavior Difficulties

*Important: There must be 15 unique hours for the minor that are not being used for any other major or minor.

Cognitive Studies

The minor in cognitive studies consists of 15 hours in the following courses:

Required Courses. 6 hours.

PSY-PC 1205 or PSY-PC 1207. Minds, Brains, Contexts, and Cultures

PSY-PC 2200. Psychology of Thinking or PSY 2220. Cognitive Psychology

Elective Courses. 9 hours.

ANTH 2601. Introduction to Linguistics

ENED 2430. Fostering Language in the Classroom

PSY 3270/NSC 3270. Computational Neuroscience

PSY-PC 1115 or PSY-PC 1157. First-Year Seminar

PSY-PC 2250. Cognitive Aspects of Human Development

PSY-PC 2300. Social and Emotional Context of Cognition

PSY-PC 2400. Social and Personality Development

PSY-PC 3150. Language Development

PSY-PC 3650. Advanced Topical Seminar (Intended for students beyond the first year. May be repeated if no duplication of content.)

PSY-PC 3775. Human Memory

PSY-PC 3635. Health Psychology

PSY-PC 3200. Introduction to Clinical Psychology

PSY-PC 3860, 3980, 3981, 4998, 4999. Directed Research/Honors Research (may not be repeated for minor credit)

SPEDS 2430. Introduction to Language and Communication

Language Sciences

The minor in Language Sciences is offered through the Department of Psychology and Human Development. The emphasis is on language theory and research in the behavioral sciences. A working knowledge of the basic processes involved in speaking, understanding, and reading will be beneficial to students interested in the learning sciences. Total of 15 credit hours. Program or track requirements.

Two of the following. 6 credit hours.

PSY-PC 3130. Introduction to Formal Linguistics

PSY-PC 3140. Psychology of Language

PSY-PC 3190. Language and the Brain

Three of the following. 9 credit hours.

ANTH 1601. Introduction to Language and Communication

PSY-PC 3150. Language Development

PSY-PC 3160. Bilingualism

PSY-PC 3170. Cognitive Science of Reading

PSY-PC 3180. How We Talk

PSY-PC 3190. Language and the Brain

PSY-PC 3860. Directed Research - Must work on a study or project related to language sciences

SPEDH 3348. Language and Learning

SPEDS 2430. Introduction to Language and Communication

PHIL 3617. Philosophy of Language

*You may also use the additional third class from the required courses for this credit

Quantitative Methods

Quantitative skills are highly valued in a variety of fields. Training provided by the quantitative methods minor can provide a competitive edge on the job market or for future graduate study. Many advances in quantitative methods used in the social sciences and education are not covered in standard undergraduate introductory statistics courses. This minor exposes students to more recent developments in quantitative methods with concrete applications to practice. The quantitative methods minor helps students become better consumers and producers of scientific research. Students will have the opportunity to learn from leading experts in the statistical analysis of social science data.

The quantitative methods minor is an 18-hour minor. The required courses serve as prerequisite courses for the electives. Following completion of these prerequisite courses (6 hours; required), the minor requires four additional courses (12 hours; electives). Any four courses offered by the Quantitative Methods program are applicable. At most, three hours of directed research/independent study can count toward the minor. Students with interest in directed research/independent study can contact individual quantitative methods faculty directly.

Required Courses. 6 hours.

PSY-PC 2110 or PSY 2100 or ECON 1500 or MATH 2810 or a 5 on AP Stat Exam

PSY-PC 2120. Statistical Analysis

Electives. (Choose 4):

PSY-PC 3722. Psychometric Methods

PSY-PC 3724. Psychometrics

PSY-PC 3727. Modern Robust Statistical Methods

PSY-PC 3730. Applied Latent Class and Mixture Modeling

PSY-PC 3732. Latent Growth Curve Modeling

PSY-PC 3735. Correlation and Regression

PSY-PC 3738. Introduction to Item Response Theory

PSY-PC 3743. Factor Analysis

PSY-PC 3746. Multivariate Statistics

PSY-PC 3749. Applied Nonparametric Statistics

PSY-PC 3850. Independent Study

Undergraduates may request to be enrolled in QM graduate courses not yet cross-listed as undergraduate courses by using a substitution form, with permission of instructor.

Special Education Minors

Minor in Special Education

The minor in special education provides students with an opportunity to develop familiarity and expertise in working with children who have learning and social behavior problems. The minor requires 15 hours (15 unique to the minor) as detailed below.

Required. 3 hours.

SPED 1210. Introduction to Exceptionality [3]

Electives. 12 hours.

SPED 2310/3871. Managing Academic and Social Behavior (fieldwork) [3/1]

SPEDH 3308. Understanding Students with Severe and Persistent Academic and Behavior Difficulties [3]

SPEDH 3328/3871. Teaching Math to Students with Academic and Behavior Difficulties (fieldwork) [3/1]

SPEDH 3338/3871. Teaching Reading to Students with Academic and Behavior Difficulties (fieldwork) [3/1]

SPEDH 3348. Language and Learning [3]

SPED 2160. Cultural Diversity in American Education [3]

SPEDS 2120. Family Intervention [3]

SPED 2340. Introduction to Language and Communication [3]

SPED 3330/3871. Characteristics of Severe and Multiple Disabilities (fieldwork) [3/1]

SPED 3312/3871. Procedures in Transition to Adult Life (fieldwork) [3/1]

SPEDS 3350. Access to General Education and Teaching Functional Academics [3]

ASL 2100. American Sign Language I [3]

ASL 2110. American Sign Language II [3]

SPEDV 3305. Medical & Educational Implications of Visual Impairments [3]

SPEDV 3315. Issues & Trends for Students with Visual Impairments [3]

*Most courses are taught in sequence and have prerequisite courses.

Minor in Instruction in Special Education

The minor in Instruction in Special Education is designed for general education teacher education majors (e.g., Elementary Education, Secondary Education) to prepare them for working with students with disabilities they will encounter in their general education teaching. To be eligible for this minor, students must be enrolled in a teacher education program through the Department of Teaching & Learning. The minor covers academic and behavioral pedagogy and intervention for students with a range of disabilities. The minor requires 19 hours (15 unique to the minor) as detailed below.

Required Courses. 19 hours.

SPED 1210. Intro to Exceptionality [3]

SPEDH 3308. Understanding Students with Severe and Persistent Diff. [3]

SPED 2310. Managing Academic and Social Behavior [3]*

SPEDH 3871. Field Work in Mild/Moderate [1]*

SPEDH 3328. Teaching Math to Students with Severe and Persistent Diff. [3]

SPEDH 3358. Advanced Reading Methods for Students with Severe and Persistent Diff. [3]

SPEDS 3358. Access to General Education and Teaching Functional Academics [3]

*Most courses are taught in sequence and have prerequisite courses.

Teaching and Learning Minors

Education Studies

Required Courses. 6 credit hours.

EDUC 1220 or EDUC 1127. Society, the School, and the Teacher

Honors in Peabody College

[Founder's Medal](#)

[Latin Honors Designation](#)

[Dean's List](#)

[Kappa Delta Pi](#)

[Honor Societies for Freshmen](#)

[Awards](#)

Founder's Medal

The Founder's Medal, signifying first honors, was endowed by Commodore Cornelius Vanderbilt as one of his gifts to the university. The recipient is named by the Dean after consideration of faculty recommendation and overall academic achievements, as well as grade point averages of the year's highest ranking summa cum laude graduates.

Latin Honors Designation

Honors, which are noted on diplomas and published in the Commencement Program, are earned as follows:

Summa Cum Laude. Students whose grade point average equals or exceeds that of the top 5 percent of the previous three years' graduating seniors.

Magna Cum Laude. Students whose grade point average equals or exceeds that of the next 8 percent of the previous three years' graduating seniors.

Cum Laude. Students whose grade point average equals or exceeds that of the next 12 percent of the previous three years' graduating seniors.

Dean's List

The Dean's List recognizes outstanding academic performance in a semester. Students are named to the Dean's List when they earn a grade point average of at least 3.500 while carrying 12 or more graded hours, with no temporary or missing grades in any course (credit or non-credit), and no grade of F.

Kappa Delta Pi

Kappa Delta Pi is an education honor society organized in 1911 at the University of Illinois to foster excellence in scholarship, high personal standards, improvement in teacher preparation, distinction in achievement, and contributions to education. Membership is limited to juniors and seniors with a grade point average of 3.500 or better, and graduate students with a grade point average of 3.750 or better. Candidates for membership must have completed at least 9 hours in education or psychology.

Honor Societies for Freshmen

Freshmen who earn grade point averages of 3.500 or better for their first semester are eligible for membership in the Vanderbilt chapters of Phi Eta Sigma and Alpha Lambda Delta.

Awards

ALGERNON SYDNEY SULLIVAN AWARD. Established in 1925 to recognize an undergraduate student that has demonstrated excellence of character and service to humanity.

THE PEABODY ALUMNI AWARD. Awarded by the Peabody Alumni Association to a member of the graduating class who has demonstrated outstanding qualities of scholarship and leadership.

THE WILLIS D. HAWLEY AWARD. Awarded by students of Peabody College to a senior who exemplifies Peabody's commitment of service to others.

DEAN'S AWARD FOR OUTSTANDING SCHOLARSHIP. Awarded to each *summa cum laude* graduate.

Human Organization and Development

SENIOR THESIS AWARD. Awarded to the graduating senior in the Human and Organizational Development Program who has submitted the most outstanding senior thesis. The winner is selected from a group of five finalists who make an oral presentation of their theses to a panel of five professors.

HUMAN AND ORGANIZATIONAL DEVELOPMENT AWARDS. Established in 1999 and presented to the graduating seniors who exemplify the highest levels of scholarship and leadership in the Human and Organizational Development Program. The awards are given in these areas: Community Service, Outstanding Community Development and Social Policy, Outstanding Health and Human Services, and Outstanding Leadership and Organizational Effectiveness.

HUMAN ORGANIZATION AND DEVELOPMENT CAPSTONE AWARD: Established in 2011 to recognize the human and organizational development senior whose overall capstone performance had the most significant impact within their host internship organization, as determined by nominating faculty, peers, and site supervisors.

Psychology and Human Development

PSYCHOLOGY AND HUMAN DEVELOPMENT UNDERGRADUATE HONORS AWARD. Awarded to the graduating senior who has successfully completed the Undergraduate Honors program in Cognitive Studies, or Child Development, or Child Studies and who has produced the best overall honor project.

EXCELLENCE IN CHILD DEVELOPMENT AWARD. Awarded to the graduating senior majoring in Child Development whose work in the opinion of the faculty of the Department of Psychology and Human Development exemplifies academic excellence.

EXCELLENCE IN CHILD STUDIES AWARD. Presented annually by the Department of Psychology and Human Development to the graduating senior who most clearly exemplifies the goals of the Child Studies Program.

EXCELLENCE IN COGNITIVE STUDIES AWARD. Presented annually by the Department of Psychology and Human Development to the graduating senior who most clearly exemplifies the goals of the Cognitive Studies Department.

Special Education

THE DEPARTMENT OF SPECIAL EDUCATION DISTINGUISHED ACADEMIC ACHIEVEMENT AWARD. Awarded annually to the graduating senior in the Department of Special Education who exemplifies the highest level of academic achievement.

THE DISTINGUISHED SERVICE IN SPECIAL EDUCATION AWARD. Presented annually to the graduating senior in the Department of Special Education who exemplifies the highest commitment to professional service in special education.

DISTINGUISHED TEACHER OF EXCELLENCE IN SPECIAL EDUCATION AWARD. Established in 1999. Awarded annually by the Department of Special Education to the graduating senior who has demonstrated the highest level of excellence in teaching in the area of special education.

DISTINGUISHED UNDERGRADUATE RESEARCH PROMISE AWARD IN SPECIAL EDUCATION. Presented annually to the graduating senior in special education, who has demonstrated exemplary academic scholarship and engagement in research.

Teaching and Learning

DOROTHY J. SKEEL AWARD FOR OUTSTANDING PROFESSIONAL PROMISE (ELEMENTARY/EARLY CHILDHOOD EDUCATION). Presented annually to the graduating senior in the Department of Teaching and Learning who has shown exceptional promise as a future teacher at the elementary school or early childhood level.

KEVIN LONGINOTTI AWARD. Awarded annually to a graduating senior in the Department of Teaching and Learning who shows exceptional promise as a future teacher at the secondary school level.

OUTSTANDING PROFESSIONAL PROMISE AWARD IN EARLY CHILDHOOD EDUCATION. Presented annually to a graduating senior who shows exceptional promise as a future teacher at the early childhood level.

UNDERGRADUATE AWARD FOR RESEARCH IN THE PRACTICE OF TEACHING AND LEARNING. Presented to a graduating senior who has, in or out of the classroom, integrated research and practice in the field of teaching and learning.

UNDERGRADUATE SERVICE IN DIVERSE CONTEXTS AWARD. Presented to a graduating senior who has demonstrated exemplary service out of the classroom in diverse settings.

DIRECTOR OF GRADUATE STUDIES Gilman W. Whiting

Professors, Emeriti: Houston Baker, Hector Myers

Professors: Michael Dyson, David Ikard, Tracy D. Sharpley-Whiting, Gilman W. Whiting

Associate Professors: Brandon Byrd, Tiffany Patterson

Assistant Professor: Matthew Joseph

Principal Senior Lecturer: Claudine Taaffe

Writer in Residence: Alice Randall

COURSES OFFERED: [AADS](#)

The concentration in African American and Diaspora Studies requires 36 credit hours of course work. Approved courses taken at Fisk University may be counted as electives in the program. The course of study in the African American and Diaspora Studies program is divided into three areas: Area of Study I, Gender and Sexuality; Area of Study II, Literature, Theory, and Visual Culture; and Area of Study III, Social Sciences. Courses that satisfy each area are listed under “Areas of Study and Electives” below.

Program of Concentration in African American and Diaspora Studies

Requirements for the major include at least 36 hours of credit as follows:

1. 3 credit hours from 1010, Introduction to African American and Diaspora Studies.
2. 6 credit hours from Area of Study I, Gender and Sexuality.
3. 6 credit hours from Area of Study II, Literature, Theory, and Visual Culture.
4. 6 credit hours from Area of Study III, Social Sciences.
5. 12 credit hours of electives chosen from Areas of Study I, II, and III, not used to satisfy requirements 2 through 4 above.
6. 3 credit hours in either 4978 (fall) or 4979 (spring), Senior Thesis in African American and Diaspora Studies.

At least 6 credit hours of the concentration must focus on the Americas (outside of the United States) and/or Africa. No more than 9 credit hours of course work may be taken at the 1000 level (excluding 1010).

Honors Program

The only route to honors in the major is writing a 3-credit hour Senior Honors Thesis in AADS 4998 (fall) or 4999 (spring) and passing an oral examination. Admission to the Honors Program requires a student have a grade point average of at least 3.5 in all AADS courses and a cumulative GPA of 3.3. A committee of three faculty members (two of whom must be involved in undergraduate teaching in the African American and Diaspora Studies program) will evaluate the thesis. Students pursuing the Senior Honors Thesis may apply to the program for nominal funding to assist with research projects. The chair of the student’s thesis committee and two readers must attend the oral examination. The oral defense will typically take place in the second semester of the student’s senior year.

Minor in African American and Diaspora Studies

Requirements for completion of the minor include at least 21 credit hours as follows:

1. 3 credit hours in 1010, Introduction to African American and Diaspora Studies.
2. 3 credit hours from Area of Study I, Gender and Sexuality.
3. 3 credit hours from Area of Study II, Literature, Theory, and Visual Culture.
4. 3 credit hours from Area of Study III, Social Sciences.
5. 9 credit hours of electives chosen from Areas of Study I, II, and III, not used to satisfy requirements 2 through 4 above.

At least 6 credit hours of the minor must focus on the Americas (outside of the United States) and/or Africa, and no more than 6 credit hours of the minor can be taken at the 1000 level (excluding 1010).

Areas of Study

Courses with an asterisk in the lists below fulfill the Africa and Americas outside of the United States portion of the major and minor. Approved courses offered at Fisk may count toward elective requirements.

Area of Study I, Gender and Sexuality

AADS: 1204* Diaspora Feminisms; 1404 Comparative Black Male Writers; 2104* Popular Culture and Black Sexual Politics; 2204* Black Women and the Politics of Blackness and Beauty; 2214 History & Myth: Black Women in the United States; 2294* Black Paris–Paris Noir: The African Diaspora and the City of Light; 2514* Insider/Outsider: Lesbian, Gay, Bisexual, Queer, and Trans Black Histories; 2654* Memoirs and Biographies; 3104W* Soul Food as Text in Text: An Examination of African American Foodways; 3204W* African American Children’s Literature; 3214* Black Masculinity: Social Imagery and Public Policy; 4104 Environmental History, Sustainability, and African American Foodways; 4264* Black Diaspora Women Writers.

Area of Study II, Literature, Theory, and Visual Culture

AADS: 1016* Race Matters; 1506* Reel to Real: Film Aesthetics and Representation; 1706* Capoeira; 1716* The African City; 1906* Curating Black Lives: Imagination, Art, and Global Social Change; 2106* African Diaspora: A Problem for Thought; 2166 Blacks in Country Music; 2306* Race, Mixed Race, and “Passing”; 2356* African Spirits in Exile: Diaspora Religions in the Americas; 3004 The Morrisonian Era: Toni Morrison and American Social Reality; 3006* James Baldwin: Five Ways of Looking at His Life, Writing and Place; 3106* GOAT: Life, Times, and Politics of Muhammad Ali; 3206 Mystery, Murder, and Mayhem in Black Detective Fiction; 3306 Black Detroit; 3556 The Political Economy of Racism; 4126* The Black Classics; 4256* Haiti: Freedom, Democracy; 4506* Slavery and Public Memory.

Area of Study III, Social Sciences

AADS: 1108* Making of the African Diaspora; 1408* Blacks in Latin America and the Caribbean; 1808* On Whiteness: Whiteness, Race, and Identity; 2168* Black Migrations in the African Diaspora; 2178* Global Africa; 3178* Colonialism and After; 3208W* Blacks in the Military; 3258 Black Issues in Education; 3278* Black Europe; 3458* Atlantic African Slave Trade; 4198* Global Anti-Blackness and Black Power; 4228W Black Girlhood: History, Performance, and Counter-Narratives; 4270 Research Methods; 4588* The Black Studies Movement.

Other Electives

Any course from the above three areas may serve as an elective if it is not already being used to satisfy an Area of Study requirement. Please consult the director of undergraduate studies for periodic updates about electives including courses that can be taken at Fisk as electives for AADS.

AFRICAN AMERICAN AND DIASPORA STUDIES: 1111* First Year Writing Seminar.

ANTHROPOLOGY: 2105* Race in the Americas; 2106* Culture and Power in Latin America. 2375 Making Racism Visible: Media and Civil Rights from MLK to Black Lives Matter.

ASIAN AMERICAN STUDIES: 3155* Blackness and the Asian Century.

ECONOMICS: 2150 Economic History of the United States.

ENGLISH: 3654/3654W African American Literature; 3658 Latino-American Literature; 3674* Caribbean Literature; 3742* Feminist Theory.

FRENCH: 3232* Introduction to Francophone Literature; 4023* The African Novel.

GENDER AND SEXUALITY STUDIES: 1150/1150W Sex and Gender in Everyday Life; 2240 Introduction to Women's Health; 2618 (formerly 3250/3250W) Contemporary Women's Movements.

HISTORY: 1269* Introduction to African Studies; 1270* Sub-Saharan Africa 1400–1800; 1270W History of Sub-Saharan Africa; 1280* Africa since 1800; 1281W* Making of African Cities; 1383* Slave Resistance in the Americas; 1395 The Underground Railroad; 1410 U.S. 1877–1945: Reconstruction through World War II; 1440 African American History since 1877; 2137* The Mandelas: Biography, Struggle, and Legacies; 2450* Reform, Crisis, and Independence in Latin America, 1700–1820; 2139* Technology, Nature, Power in Africa; 2490* Brazilian Civilization; 2570* Caribbean History 1492–1983; 2620 The Old South; 2630 The New South; 2684* The History of Black Power; 2686 Race, Rights, American Dream; 2689 "Women of Color": History, Theorizing and Organizing in the United States; 2690 The Civil Rights Movement; 2691 Barack Obama: Man and President; 2692W* Biographies of Struggle; 2749 American Intellectual History to 1865; 2752 African American Intellectual History Since 1776; 3040 Health and African American Experience; 3200* Poverty, Economy, Society in Sub-Saharan Africa.

HISTORY OF ART AND ARCHITECTURE: 1750W African American Arts; 4960* Advanced Seminar in History of Art.

JEWISH STUDIES: 2240W Black-Jewish Relations in Post-War American Literature and Culture.

MEDICINE, HEALTH AND SOCIETY: 1940 Racial and Ethnic Health Disparities; 3140 Afrofuturism and Cultural Criticisms of Medicine.

MUSIC: 1100* World Music; 1105* African Music; 1600 American Popular Music; 1620 Survey of Jazz; 1630 The Blues; 2150* Music, Identity, and Diversity.

PHILOSOPHY: 2665 Race and Racism.

POLITICAL SCIENCE: 2237* African Politics.

RELIGIOUS STUDIES: 1100 Introduction to African American Religious Traditions; 3119 Martin Luther King, Jr., and the Social Roles of Religion; 3142 Slave Thought and Culture in the American South.

SOCIOLOGY: 3207 Popular Culture Dynamics; 2701 (formerly 3701) Racial Domination, Racial Progress; 2351 (formerly 3304) Race, Gender, and Health; 2700 (formerly 3702) Racial and Ethnic Minorities in the United States; 2720 (formerly 3704) Race, Gender, and Sport; 3624 Prison Life; 3711* Women, Gender, and Globalization; 2710 (formerly 3722*) Gender in Society; 3723* Gender, Sexuality, and the Body.

SPANISH: 3835* Latino Immigration Experience*; 4750* Afro-Hispanic Literature.

Associate Professor of the Practice: Tiffany Saul

Principal Senior Lecturers: Mareike Sattler, Jacob J. Sauer

COURSES OFFERED: [ANTH](#), [KICH](#)

Anthropology is the study of human diversity in all times and places. It brings together perspectives from the sciences and humanities to illuminate different aspects of the human past, the human body, and contemporary social life. Global perspectives, fieldwork and experiential learning, and concerns with ethics, justice, and social well-being are hallmarks of anthropology.

Vanderbilt's program has a strong research focus on Latin America and historically marginalized groups, especially indigenous people and descendants of the African diaspora.

Students majoring in anthropology take courses in several subfields, each of which looks at humanity from a different perspective. Cultural anthropology examines the relationships, beliefs, values, and political-economic practices that shape individual behavior, community life, and power in modern societies. Archaeology studies societies through their material remains, enabling long-term perspectives on the human past as well as connections to present-day descendant communities. Linguistics explores relations between language and culture. Biological anthropology examines topics such as community health in the past and present, forensic science, genetics, evolution, human biology, and bioethics. Courses cluster around themes of cross-cultural health, biology, food, and medical systems; inequality, power, and social-political relations; material culture, human-environment relations, and spatial analysis; religion and politics; and worldviews, language, and cognition. Many courses are interdisciplinary in nature, with connections to programs such as Biology; Earth and Environmental Science; Medicine, Health, and Society; Human and Organizational Development; History; Classics and Mediterranean Studies; Sociology; Jewish Studies; African American and Diaspora Studies; Latin American Studies; Asian Studies, and others, and attracts students from all four Undergraduate colleges. Unless indicated otherwise in the course description, anthropology courses have no prerequisites and are open to all majors and non-majors.

Knowledge of the diversity of human histories and lifeways is vital to imagining alternative paths to a better society.

Anthropology develops this knowledge through experiential learning that challenges students to go beyond the familiar, to see, understand, create, and interact in new ways. This preparation is useful in all professional careers that involve understanding human behavior, working with people from different backgrounds, analyzing complex information, and thinking holistically about the conditions that shape people's lives.

Program of Concentration in Anthropology

The major in anthropology requires completion of at least 30 credit hours of course work, as follows:

1. *6 credit hours.* Two 1000-level surveys selected from the subfields of anthropology: 1101 (Cultural Anthropology), 1201 (Archaeology), 1301 (Biological Anthropology), 1601 (Linguistic Anthropology). A course in a third subfield is strongly recommended (in consultation with the adviser).
2. *3 credit hours.* A seminar on anthropological theory (2101 or 2102). The seminar may not be used to count toward theme credit below.
3. *3 credit hours.* A course on anthropological methods; this class may not count towards the theme requirement. Courses that satisfy the methods requirement include 2211, 2301 (formerly 3347), 2601, 2602, 2602W, 2603, 3120, 3125, 3142, 3150, 3260, 3260W, 3261, 3262, 3372, 3860W, 3865, 3866, 3867, 3868, 4152, 4160, 4373. Other anthropology courses, including those at the 5000- and 6000-level, can count in consultation with the adviser and instructor.
4. *12 credit hours.* Students take four upper-level courses from a predesigned theme or from a theme that they design in consultation with their adviser:
 - A. Environment, landscape, and place: 2108, 2109, 2113, 2114, 2117W, 2150, 2160, 2160W, 2170W, 2214, 2220, 2220W, 2221, 2222, 2223, 2224, 2225, 2226W, 2230, 2231, 2242, 2242W, 2275, 2370, 2380, 2381W, 2521 (formerly 2228W), 2620 (formerly 2227), 3121, 3122, 3136, 3138, 3200, 3240, 3250, 4154, 4155
 - B. Healing, medicine, and culture: 2113W, 2342, 2370, 2371, 2620 (formerly 2227), 3121, 3125, 3132, 3138, 3141, 3143, 3144, 3145, 3343, 3344, 3345, 3346, 3371, 3372, 3401W, 4201W, 4345, 4373
 - C. Social politics and power: 2105, 2106, 2108, 2109, 2110, 2116W, 2117W, 2120, 2122 (formerly 3134), 2130, 2150, 2170W, 2220, 2220W, 2223, 2225, 2226W, 2231, 2242, 2275, 2342, 2370, 2375, 2380, 2381W, 2385W, 2400, 2602W, 2800, 3050, 3121, 3122, 3125, 3130, 3132, 3133, 3135, 3136, 3138, 3140, 3144, 3145, 3161, 3162, 3202, 3241, 3232, 3243, 3250, 3343, 3345, 4152, 4153
 - D. Identity, ethnicity, gender: 2105, 2106, 2108, 2110, 2113W, 2114, 2117W, 2120, 2122 (formerly 3134), 2130, 2160W, 2170W, 2220W, 2229W, 2230, 2231, 2242W, 2275, 2370, 2375, 2380, 2381W, 2385W, 2400, 2602W, 3050, 3121, 3122, 3132, 3135, 3144, 3145, 3202, 3243W, 3241, 3250, 3343, 3346, 3401W, 4152, 4155, 4156, 4201W, 4345, 4373
 - E. Biocultural foundations in health, genetics, forensics, and ethics: 2105, 2110, 2117W, 2122 (formerly 3134), 2170W, 2220W, 2275W, 2301 (formerly 3347), 2342, 2370, 2371, 2375, 2380, 2400, 2521 (formerly 2228W), 2620 (formerly 2227), 3121, 3122, 3134, 3138, 3141, 3143, 3144, 3145, 3162, 3262, 3344, 3345, 3346, 3371, 3372, 3401W, 4156, 4201W, 4345, 4373
 - F. Language, cognition, and culture: 2160W, 2170W, 2380, 2385W, 2601, 2602, 2602W, 2603, 3140, 3145, 3150W, 3243W, 3620, 3622W, 4155, 4201W; KICH 1101, 1102, 2201, 2202
5. *3 credit hours.* One capstone experience in engaged anthropology. In consultation with their adviser, students may fulfill this requirement by taking a formal course (3125) or by completing an independent study, internship, or honors thesis, or by doing a special capstone project in any 2000-level or higher anthropology course with the approval of their adviser and the course instructor.
6. Minimum 3 credit hours of electives chosen from ANTH courses not already used to satisfy the requirements listed above, to total 30 credit hours toward the major.
7. With the approval of the student's major adviser, a maximum of 3 credit hours for a course taken in another department or program may be counted toward the major requirement. A variety of courses is possible, including but not limited to those listed below. In each case, the course must be relevant to the student's program and the student must receive the approval of the director of undergraduate studies: African American and Diaspora Studies 2178, 3178; Biological Sciences 2205; Classics 1020, 1150, 2180, 2200, 2210, 2250, 2260, 2270, 2300, 3030, 3100, 3110, 3310, 3710, 3730; History 1270, 2490; History of Art and Architecture 1330, 2210; Mathematics 1010, 1011; Medicine, Health, and Society 1930, 2130, 2240, 2250, 2420, 2430, 3010, 3020, 3110, 3140, 3150, 3210, 3212, 3220, 3250; Music Literature 1100, 1105, 2110; Religious Studies 4554; Sociology 2201 (formerly 3221), 2322 (formerly 3313), 3001, 3232, 3311, 3313, 3314; Spanish 3360.

Honors Program

The Honors Program in Anthropology allows exceptional undergraduate students to undertake independent research on a topic in consultation and mentorship with faculty members. This program is open to all Anthropology majors with junior standing who have a 3.3 GPA in all general University courses and Anthropology courses who are

approved for acceptance into the Honors Program by Department faculty. Completion of the program requires:

1. 3-6 credit hours in ANTH 4998 (Honors Research, select the section under your adviser's name), evaluated by the Honors Thesis Adviser, generally in the fall semester of the student's senior year. If the student plans to graduate in December, they may take 4998 in the spring semester.
2. 3-6 credit hours in ANTH 4999 (Honors Thesis), evaluated by Honors Thesis Adviser, generally in the spring semester of the student's senior year. If the student plans to graduate in December, they may take 4999 in the fall.
3. Submission of a written thesis, evaluated by the student's Honors Committee.
4. Oral presentation of the thesis (15-20 mins.), which includes invited guests and members of the department, evaluated by the student's Honors Committee.
5. Oral examination (defense) of the thesis, administered by the student's Honors Committee, usually after the public presentation.

The honors thesis hours are expected to be in excess of the 30 hours required for the Major in Anthropology and are typically done in the student's senior year. This timeline may be modified after consultation with the thesis adviser, Departmental Director of the Honors Program, and Faculty approval.

Students meeting these requirements receive Honors or High Honors in Anthropology, depending on the quality of their thesis, grades in anthropology courses, and examination results. Successful Departmental Honors students will receive a Vanderbilt diploma that records Honors or High Honors in Anthropology.

Minor in Anthropology

The minor in anthropology requires 18 credit hours of course work, as follows:

1. *3 credit hours*. One introductory course from one of the four subfields in Anthropology: 1101 (cultural anthropology), 1301 (biological anthropology), 1201 (archaeology), 1601 (linguistics).
2. *3 credit hours*. One methods or one theory course listed in the major; see above.
3. *12 credit hours*. Four courses from a theme in the major designed in consultation with the adviser; see above.

Arabic

SENIOR LECTURERS M. Issam Eido, Bushra Hamad

Note: Students may not earn credit for an introductory language course if they previously have earned credit for a higher-level course taught in that same language. In addition, students may not earn credit for an intermediate-level language course if they previously have earned credit for a higher-level course taught in that same language. Students who have earned Advanced Placement or International Baccalaureate credit in a foreign language will forfeit the test credit if they complete a lower-level course taught in that same language.

COURSES OFFERED: [ARTS](#)

Courses in art are offered in a variety of media, which provide wide-ranging methods and perspectives. Our courses emphasize creative and critical approaches to learning. The department of art offers a rigorous, socially minded, and research-driven curriculum. Students engage in an immersive laboratory of fearless experimentation and challenge the rapidly expanding role of art in our society. Through trans-disciplinary thinking and experimental methodologies, students utilize a range of artistic disciplines in a state-of-the-art facility. Equal emphasis is placed on both individual and collective exploration, where students are encouraged to develop relationships across the university and broader communities.

Many students will use the program in art as a foundation for careers in which creativity and visual studies are especially valued, as the basis for advanced training in professional schools (such as art, architecture, museum studies), and for employment in galleries, museums, commercial art, or design-related fields. An important goal of the department is to help students become readers of the rich visual environment in our culture throughout their lives, as well as to encourage creative approaches to learning in all disciplines.

The Department of Art offers several opportunities for extracurricular activities in the arts including a student-run art gallery, and Space 204 arts laboratory which hosts exhibitions and workshops throughout the year. Studio VU lecture series brings some of the most important artists working today to campus for lectures and one-on-one studio visits with students.

Since 1984 the Department of Art has supervised the Margaret Stonewall Wooldridge Hamblet Award given to an eligible senior art major. This prestigious award provides the means for travel and independent art activity for one year, culminating in a one-person exhibition at Vanderbilt. Our immersive program includes both junior and senior major trips to New York and other important art destinations.

Many other prizes are awarded in our department. The Allan P. Deloach Memorial Prize in Photography was established in 2000 in memory of Allan Deloach (B.A. 1963) by two of his colleagues at IBM. This cash award is open to any student who has taken a studio class in any discipline at Vanderbilt. Midsouth Ceramics awards are given to the top three ceramic projects in the annual open house, and the Plaza Artists Materials awards are given to four students each year. All competitions are judged by outside professional artists.

Program of Concentration in Art

The art major requires 30 credit hours and presents students the opportunity to explore their ideas conceptually, as well as to learn the technical skills involved in the creation of art. The program offers a wide range of classes and media. Our students are offered a strong grounding in traditional processes such as drawing, painting, ceramics, and sculpture, as well as the opportunity to explore contemporary processes involving video, performance, digital photographic, and new media, installation, and social interactive art practice. Our diverse faculty utilizes a wide range of teaching styles and aesthetic philosophies. We consider how ideas have been developed through the centuries as well as how specific techniques have been used to enrich the expression of an idea. In addition to modern art history offerings, art majors are encouraged to take courses in pre-Renaissance, non-Western art history, philosophy of aesthetics, and film. The Contemporary Art Maymester offers an opportunity to study contemporary art in a concentrated manner.

Requirements for the Program of Concentration in Art

Foundation Requirement (3 credit hours)

- ARTS 1101, 1102, or 1104

Studio Requirements (15 credit hours)

- Any **ARTS** courses with the exception of ARTS 1099 or ARTS 1800.

Within the 15 credit hours, students must take at least one 2000-level or higher ARTS course.

Related Requirement (6 credit hours), which must include one course (3 credit hours) of each of the following:

- ARTS 1800, Sources of Contemporary Art
- Any HART course or one course from the following: ARTS 1099; CMA 1600, 2300; PHIL 3014

The department highly recommends taking ARTS 1800, Sources of Contemporary Art course prior to the senior year.

Directed Study (6 credit hours)

- ARTS 3970, Directed Study: Senior Show and Contemporary Practices
- ARTS 3971, Independent Research: Senior Show

Majors are required to complete the Independent Research course, ARTS 3971, their senior year. This course is designed specifically to help prepare majors for their Senior Show and is typically taken in the second semester of the senior year. No other independent research/study course may be counted toward the major.

Honors Program in Art

The Honors Program in the Department of Art offers an opportunity to art majors to pursue their interest in art on a higher level. To be admitted to the Honors Program in Art, students must have:

- At least a 3.0 cumulative GPA.
- At least a 3.5 GPA in courses that count toward the major in art.
- Completed the sophomore year.

Students interested in pursuing the honors program should contact the director of undergraduate studies. Application materials must be submitted to the director of undergraduate studies in the applicant's junior year; applications may be submitted electronically. Applications must include ten digital images of recent work with written explanations for each image. Applicants will be notified in writing of the department's decision.

Each honors student shall have a committee consisting of one faculty member appointed by the department chair, the student's selected honors adviser, and the director of undergraduate studies.

Requirements for graduation with honors in art:

1. Successful completion of the requirements for the major in art,
2. During the senior year the student is required to register for ARTS 4998 (3 credit hours) in the first semester and 4999 (3 credit hours) in the second semester in order to complete a written thesis, expanding concepts explored in the senior exhibition.
3. Successful oral defense of the thesis and senior exhibition during the final semester of undergraduate study.
4. At least a final 3.30 cumulative GPA.
5. At least a final 3.5 GPA in courses that count toward the major in art.

Minor in Art

The minor in art requires 18 credit hours of course work, including the following:

- HART 1105 or ARTS 1800
- ARTS 1102 (Drawing and Composition I); and four other ARTS courses, with at least one at the 2000-or-higher level.

CHAIR Gerald Figal

DIRECTOR OF UNDERGRADUATE STUDIES Pengfei Li

Professors: Robert Campany, Gerald Figal

Associate Professor: Ben Tran

Assistant Professors: Mabel Gergan, Mark John Sanchez, Maya Singhal, We Jung Yi

Mellon Assistant Professor: Yucong Hao

Principal Senior Lecturers: Divya Chaudhry, Seok Bae Jang, Hideko Shimizu

Senior Lecturers: Heuijung Hur, Nozomi Imai, Bairam Khan, Pengfei Li, Asami Nakano, Qing Wei, Ji You Whang

Lecturer: Michelle Yu

Interdepartmental Faculty

PROFESSOR Yoshikuni Igarashi (History), Ruth Rogaski (History)

ASSOCIATE PROFESSORS Brett Benson (Political Science), Peter Lorge (History), Tracy Miller (History of Art and Architecture), Samira Sheikh (History), Lijun Song (Sociology and Medicine, Health, and Society), Anand V. Taneja

(Religious Studies)

ASSISTANT PROFESSORS Calynn Dowler (Religious Studies), Huan He (English) Bohyeong Kim (Communication Studies), Adeana McNicholl (Religious Studies), Isidora Miranda (Blair School of Music), Akshya Saxena (English)

MELLON ASSISTANT PROFESSOR Boyoung Chang (History of Art and Architecture)

SENIOR LECTURER Susan Dine (History of Art and Architecture)

NEH COLLABORATIVE HUMANITIES POSTDOC: Cody Black (Korean Ethnomusicology)

COURSES OFFERED: [ASAM](#), [ASIA](#), [CHIN](#), [HNUR](#), [JAPN](#), [KOR](#), [SNSK](#), [TBTN](#)

Note: Students may not earn credit for an introductory language course if they previously have earned credit for a higher-level course taught in that same language. In addition, students may not earn credit for an intermediate-level language course if they previously have earned credit for a higher-level course taught in that same language. Students who have earned Advanced Placement or International Baccalaureate credit in a foreign language will forfeit the test credit if they complete a lower-level course taught in that same language.

The Department of Asian Studies provides students with a foundation in the languages, cultures, and societies of Asia and the Asian diaspora necessary to pursue a career among a wide host of global companies, institutions, and agencies that do business in the United States and abroad with the many countries of Asia. Rich in diverse histories and cultures, present-day Asia and the Asian diaspora are at the center of the global future. A degree in Asian Studies equips its students with the linguistic competence and cultural knowledge to join in that global future, whether it be as a foreign press correspondent, investment banker, video game designer, translator/interpreter, educator, diplomat, tour operator, ad firm consultant, or traditional Chinese medicine practitioner. With the study of modern Asian languages at its core, the program embraces a wide variety of courses in the art, culture, economics, history, film and media, politics, religion, medicine, and sociology of East Asia, South Asia, Southeast Asia, Asian America, and Asian diasporic communities throughout the world. Through their teaching and research, faculty members promote a better understanding of multiple facets of life in Asia and the region's past and present relationship with the rest of the world.

Majors and minors are strongly encouraged to complete a study abroad program in Asia. Up to 6 credit hours of Asia-related courses from Vanderbilt-approved study abroad programs may be applied toward the major or minor upon approval of the department chair or director of undergraduate studies. Additional study abroad credit hours may be granted on a case-by-case basis at the discretion of the chair or DUS. Students should consult with the chair or DUS before applying to a study abroad program.

Program of Concentration in Asian Studies

The major in Asian studies requires a minimum of 36 credit hours of course work and is designed to ensure that graduates have both depth and breadth in their understanding of Asia.

For the major in Asian studies, students must formally declare an area of concentration at the time the major is declared (China, Japan, Korea, or South Asia) and complete at least 36 credit hours from the Asian Studies Course List (see below), according to these rules:

1. At least 3 credit hours in an Asian language taught in the Department of Asian Studies at the 3301 (Advanced I) level or above. Asian languages not offered by the Asian studies department require the approval of the department chair or the director of undergraduate studies.
2. At least 9 non-language credit hours of courses in area of concentration.
3. At least 6 non-language credit hours of courses eligible for Asian Perspectives.
4. No more than 18 credit hours of courses in any Asian language may be applied to the total 36 credit hours.

Advanced Placement credits in language do not count toward credit hours required for the major or minors, but can figure into the assessment of initial placement within a language track.

Program of Concentration in Asian American and Asian Diaspora Studies

For the major in Asian American & Asian Diaspora Studies, students must complete at least 36 credit hours from the Asian Studies Course List (see below), according to these rules:

1. At least 3 credit hours in an Asian language taught in the Department of Asian Studies at the 2202 (Intermediate II) level or above. Asian languages not offered by the Asian studies department require the approval of the department chair or the director of undergraduate studies.
2. At least 12 credit hours of Asian American & Asian Diaspora-eligible courses (code "AA" on Asian Studies course list, including ASAM 2101 or ASAM 2102.
3. At least 6 credit hours of courses eligible for Asian Perspectives.
4. No more than 18 credit hours of courses in any Asian language may be applied to the total 36 credit hours.

Advanced Placement credits in language do not count toward credit hours required for the majors or minors, but can figure into the assessment of initial placement within a language track.

Honors Program in Asian Studies

Students interested in the Honors Program in Asian Studies should consult with Asian Studies department chair or the director of undergraduate studies no later than the fall semester of their junior year to discuss qualifications and requirements. In addition to following the requirements set by the College of Arts and Science, the following must be satisfied:

1. All of the requirements for the major in Asian Studies or Asian American and Asian Diaspora Studies.
2. 3 credit hours of ASIA 3980 Juniors Honors Readings. If ASIA 3980 is not offered, this requirement may be substituted by an alternative course, with approval by the Asian Studies department chair or the director of undergraduate studies.
3. ASIA 4998 (3 credit hours) and 4999 (3 credit hours). Honors Research must be taken while in residence at Vanderbilt. The candidate will write an honors thesis while completing the two-semester Honors Research sequence. The honors thesis is a research paper or creative production on a topic defined by the student in consultation with a principal faculty adviser. At least two Asian Studies departmental or interdepartmental faculty, including the principal faculty advisor, serve as the candidate's Honors Committee. The committee assesses on-going progress on the thesis and administers the oral examination.

Note: 3980, 4998, and 4999 may count toward the 36 credit hours required for the major.

4. A minimum 3.30 cumulative grade point average with a minimum 3.50 grade point average in courses that count toward the major in Asian Studies upon completion of the Honors requirements.
5. An oral examination on the thesis typically scheduled within the two months prior to graduation.

Study abroad in a country relevant to the Honors Research project is strongly recommended, but not required.

Minor in Asian Studies

The minor in Asian Studies provides a broad knowledge of the languages, literatures, politics, histories, film and media, arts, and religions of China, Japan, Korea, and South Asia. Students cannot combine the Asian Studies minor with other minors within the Asian Studies Department.

For the minor in Asian Studies, students must complete at least 17 credit hours from the Asian Studies Course List (see below), according to these rules:

1. At least 4 credit hours in any Asian languages taught in the Asian Studies Department at the 2201 (Intermediate I) level or above
2. At least 6 credit hours of History Survey Courses
3. At least 3 credit hours of Humanities Courses
4. At least 3 credit hours of Social Sciences Courses
5. No more than 5 credit hours of any Asian language courses taught in the Asian Studies Department may be applied to the total 17 credit hours

Minor in Chinese Language and Culture

The minor in Chinese Language and Culture is anchored by a firm foundation in language study that is

complemented by electives in art, history, literature, film and media, politics, and religion. Students cannot combine the Chinese Language and Culture minor with other minors within the Asian Studies Department.

For the minor in Chinese Language and Culture, students must complete at least 18 total credit hours in China Concentration (CC) courses from the Asian Studies Course List (see below), according to these rules:

1. At least 3 credit hours in Chinese language at the 3301 (Advanced I) level or above
2. No more than 13 credit hours of Chinese language (CHIN) courses may be applied to the total 18 credit hours

Minor in Japanese Language and Culture

The minor in Japanese Language and Culture is anchored by a firm foundation in language study that is complemented by electives in art, history, literature, film and media, politics, and religion. Students cannot combine the Japanese Language and Culture minor with other minors within the Asian Studies Department.

For the minor in Japanese Language and Culture, students must complete at least 18 total credit hours in Japan Concentration (JC) courses from the Asian Studies Course List (see below), according to these rules:

1. At least 3 credit hours in Japanese language at the 3301 (Advanced I) level or above
2. No more than 13 credit hours of Japanese language (JAPN) courses may be applied to the total 18 credit hours

Minor in Korean Language and Culture

The minor in Korean Language and Culture is anchored by a firm foundation in language study that is complemented by electives in history, literature, film, and media. Students cannot combine the Korean language and culture minor with other minors within the Asian Studies Department.

For the minor in Korean Language and Culture, students must complete at least 18 total credit hours in Korean Concentration (KC) courses from the Asian Studies Course List (see below), according to these rules:

1. At least 3 credit hours in Korean language at the 3301 (Advanced I) level or above
2. No more than 13 credit hours of Korean language (KOR) courses may be applied to the total 18 credit hours

Minor in South Asian Language and Culture

The minor in South Asian Language and Culture is anchored by a firm foundation in language study that is complemented by electives in art, history, literature, film and media, politics, and religion. Students cannot combine the South Asian language and culture minor with other minors within the Asian Studies Department.

For the minor in South Asian language and culture, students must complete at least 18 total credit hours in South Asia Concentration (SA) from the Asian Studies Course List (see below), according to these rules:

1. At least 3 credit hours in a South Asian language (Hindi-Urdu or Sanskrit) at the 3301 (Advanced I) level or above
2. No more than 13 credit hours of South Asian language (HNUR or SNSK) courses may be applied to the total 18 credit hours

Minor in Asian American and Asian Diaspora Studies

The minor in Asian American & Asian Diaspora Studies provides a broad knowledge of the histories, cultures, societies, and languages of Asian American and global Asian diasporas. Students cannot combine the Asian American & Asian Diaspora Studies minor with other minors within the Asian Studies Department.

For the minor in Asian American & Asian Diaspora Studies, students must complete at least 17-18 credit hours from the Asian Studies Course List (see below), according to these rules:

1. 3 credit hours in either ASAM 2101 or ASAM 2012
2. At least 3 credit hours in any Asian languages taught in the Asian Studies Department at the 2201 (Intermediate I) level or above
3. At least 6 credit hours of Asian American & Asian Diaspora (AA) courses and either
4. 6 credit hours of courses eligible for Asian Perspectives, to total 18 credit hours (not double counting courses above), OR

Up to 5 credit hours of any Asian language courses taught in the Asian Studies Department may be applied to total 17 credit hours.

Asian Studies Course List

All courses on this list count toward the credit-hour requirements for the major and the minors within the Program in Asian Studies. Their eligibility for specific requirements within the major and minors is indicated by the following codes:

China Concentration = CC

Japan Concentration = JC

Korea Concentration = KC

South Asia Concentration = SA

Asian Perspectives = AP

Asian American/Asian Diaspora = AA

History Survey Course = HS

Humanities Course = HU

Social Science Course = SS

Any given course may be applied to only one category of requirement even if it may be eligible for more than one.

Courses marked with an * require approval from the Asian Studies chair or director of undergraduate studies.

Biochemistry and Chemical Biology

[Program of Concentration - BA](#)

[Program of Concentration - BS](#)

[Honors Program](#)

CO-DIRECTORS Lauren Parker Jackson, Lars Plate

Advisory Committee

PROFESSORS Brandt Eichman (Biological Sciences), Brian Bachmann (Chemistry), Doug Mitchell (Biochemistry and Chemistry)

ASSOCIATE PROFESSORS Lauren Parker Jackson (Biological Sciences), Lars Plate (Chemistry and Biological Sciences)

SENIOR LECTURER Keri A. Tallman (Chemistry)

COURSES OFFERED: [BCB](#)

The study of chemical processes within living systems is an interdisciplinary enterprise that spans the fields of chemistry, molecular and cellular biology, biophysics, and engineering. Chemical biology and biochemistry use chemical insight, techniques, and tools to study or manipulate biological systems. They are the cornerstones of medical technology and therapeutics. To provide students with training in modern principles at a chemistry-biology interface, Vanderbilt's interdisciplinary major in biochemistry and chemical biology incorporates expertise from multiple departments in the university. Students receive a broad background in the natural sciences (chemistry, biology, physics) and mathematics, followed by fundamental training in principles of biochemistry and chemical biology that involves both theoretical and laboratory course work. Students then pursue an area of emphasis in either biochemistry or chemical biology through upper-level elective courses. Students participate in independent research in laboratories of biochemistry and chemical biology faculty. Additional research experience is available in the Honors Program.

Program of Concentration-BA

For students who matriculated prior to Fall 2025.

The biochemistry and chemical biology major tracks share fundamental elements but have a distinct set of foundational courses, track-specific electives, and laboratory requirements. All students are required to complete a set of basic science and mathematics courses. The major consists of 32 credit hours beyond these basic science and mathematics courses. All students complete 12 credit hours of foundational courses, 14 credit hours of either biochemistry or chemical biology track, and 6 credit hours of general electives. For suggested paths of completion, see the [Program in Biochemistry and Chemical Biology website](#).

Required Math and Science Courses for Both Tracks

(30 credit hours)

Biological Sciences — BSCI 1510, 1511, 1510L, and either BSCI 1511L or 1512L

Chemistry — CHEM 2221 or 2211; CHEM 2222 or 2212; CHEM 2221L and CHEM 2222L

Mathematics — MATH 1200 or 1300 and MATH 1201 or 1301

Physics — PHYS 1501 or 1601; PHYS 1502 or 1602; PHYS 1601L and PHYS 1602L

Note: These credit hours do not count toward the major. AP credit may satisfy some of these requirements.

Foundational Courses for all Tracks (12 credit hours)

BCB 4965, BSCI 2520, CHEM 3710, CHEM 3320

Tracks

Biochemistry Track

Biochemistry Foundations (3 credit hours) - BSCI 4274, 4275, or 4285

Biochemistry Electives (9 credit hours) - BCB 2101, BCB 4320, BSCI 2201, BSCI 2210, CHEM 2100 and CHEM 2100L or BCB 2200 and BCB 2200L, CHEM 4720

Biochemistry Laboratory (2 credit hours) - BCB 3201

Chemical Biology Track

Chemical Biology Foundations (5 credit hours) - CHEM 2100 and 2100L or BCB 2200 and BCB 2200L, BCB 2101

Chemical Biology Electives (6 credit hours) - BCB 4320, BSCI 4274, 4275, or 4285, CHEM 4720

Chemical Biology Laboratory (3 credit hours) - BCB 3201, BCB 4966

General Electives (6 credit hours)

Electives may be chosen from any of the following:

BCB 2101, 2200, 3101, 3201 (limit 3 credit hours), 4320, 4966; BME 2100, 3000, 3500, 3890, 4400; BSCI 2201, 2210, 2250, 3230, 3240, 3245, 3252, 3256, 3270, 3272, 4226, 4265, 4266, 4274, 4275, 4285; CHEM 2100, 3020, 3300, 3630, 4230, 4720; CS (DS) 1100, 1101, 1103, 2204; NSC 2201, 3245, 3260, 3269, 3274, 3891, 4961

Courses taken to fulfill track requirements are not eligible for general elective credit.

Program of Concentration - BS

For students who matriculated Fall 2025 or later.

The biochemistry and chemical biology major consists of foundational courses, BCB major electives, and several laboratory requirements. All students are required to complete a set of basic science and mathematics courses. The major consists of 40 credit hours beyond these basic science and mathematics courses. All students complete 13 credit hours of foundational courses, 6 credit hours of laboratory requirements, 15 credit hours of BCB elective coursework, and 6 credit hours of general electives.

Required Math and Science Courses

(30 credit hours)

Biological Sciences — BSCI 1510, 1511, 1510L, and either BSCI 1511L or 1512L

Chemistry — CHEM 2221 or 2211, CHEM 2222 or 2212, CHEM 2221L and CHEM 2222L

Mathematics — MATH 1200 or 1300 and MATH 1201 or 1301

Physics — PHYS 1501, 1601 or 1911; PHYS 1502, 1602 or 1912; PHYS 1601L; and PHYS 1602L or 1912L

Note: These credit hours do not count toward the major. AP credit may satisfy some of these requirements.

Foundational Courses (13 credit hours)

BSCI 2520, CHEM 3710, CHEM 3320, BCB 2200 and 2200L

Laboratory Requirement (6 credit hours)

Laboratory Electives may be chosen from any of the following (6 credit hours) - BCB 3201 (limit 3 credit hours), BCB 4965, BCB 4966, BCB 4999

BCB Electives (15 credit hours)

BCB Electives may be chosen from any of the following (15 credit hours) - BSCI 2201, BSCI 2210, BSCI 2250, BSCI 4274, BSCI 4275, BSCI 4285, CHEM 4720, CHEM 4320

General Electives (6 credit hours)

General Electives may be chosen from any of the following (6 credit hours) - BCB 2101, 3101, 3201 (limit 3 credit hours), 4320, 4966; BME 2100, 3000, 3500, 3890, 4400; BSCI 2201, 2210, 2250, 3230, 3240, 3245, 3252, 3256, 3270, 3272, 4226, 4265, 4266, 4274, 4275, 4285; CHEM 2100, 3020, 3300, 3630, 4230, 4720; CS (DS) 1100, 1101, 1103, 2204; NSC 2201, 3245, 3260, 3269, 3274, 3891, 4961.

Courses taken to fulfill BCB elective requirements are not eligible for general elective credit.

Honors Program

Students may apply to the Honors Program if they hold a minimum cumulative GPA of 3.3 and a GPA of at least 3.4 in courses that count toward the major at the end of their junior year. The purpose of the Honors Program is to provide students with an intensive independent research experience in a host laboratory. Honors candidates must complete two semesters (3 credit hours each semester) of Honors Research (BCB 4999). The successful completion of one semester of BCB 4999 may substitute for the BCB 4965 course requirement. Upon entering the program at the end of the junior year, candidates assemble a committee of the major research adviser and two additional faculty members appropriate to the area of research. As part of the research course work, the candidate will write an honors thesis. At the end of the graduating semester, honors candidates must submit a written thesis and give an oral defense of their research.

DIRECTOR OF GRADUATE STUDIES Julian F. Hillyer

Professors, Emeriti: Burton Bogitsh, Robert Kral, Wallace LeSturgeon, David Nunnally, Terry Page, Charles Singleton, Gerald Stubbs, Robley Williams

Professors: Kendal Broadie, Kenneth Catania, Brandt Eichman, Katherine Friedman, Todd Graham, Julian Hillyer, Carl Johnson, Ege Kavalali, Douglas McMahon, James Patton, Antonis Rokas, Louise Rollins-Smith, Eric Skaar, Laurence Zwiebel

Associate Professor, Emeriti: Herbert Wiesmeyer

Associate Professors: Nicole Creanza, Larisa DeSantis, Kevin Ess, Daniel Funk, Lauren Jackson, Maria Luisa Jorge, Jared Nordman, Lars Plate, Ann Tate,

Assistant Professors: Megan Behringer, Gianni Castiglione, Amanda Lea, Maulik Patel, Marie Suver, Carlos Taboada, Alexandre Tiriach, Allison Walker

Associate Professor of the Practice: Cynthia Brame

Assistant Professors of the Practice: Hemant Badgandi, Paul Durst, Sabriya Rosemond

Principal Senior Lecturers: Ava Due-Goodwin, Mark Woelfle

Senior Lecturers: Amanda Benson, Brian Bill, Thomas Clements, Allison Leich Hilbun, James Pask

COURSES OFFERED: [BSCI](#)

The biological sciences encompass the study of living organisms and life processes at all levels: ecosystems, populations, individual organisms, tissues, cells, subcellular structures, and molecules. The Department of Biological Sciences offers courses that address all of these levels, with programs of study for undergraduates and for graduate students seeking the Ph.D. degree. For undergraduates, the department offers the BA degree (one major) and the BS degree (two majors) in addition to a minor.

The BA degree [Biological Sciences (BioSci) major] is designed for the student seeking a broad base in the biological sciences. It is a highly flexible, coursework-based major that allows students to specialize, if desired, in upper-level courses. This major is appropriate for students wishing to emphasize coursework over laboratory research and may be especially attractive for students seeking to combine a foundational knowledge in biology with other areas of study.

The BS is designed for students seeking a degree that integrates coursework with an emphasis on independent laboratory research. Students completing the BS degree engage for multiple semesters in faculty-led research projects for course credit. Two majors are available. Students completing the Molecular and Cellular Biology (MCB) major seek to develop an in-depth understanding of how living systems function at the molecular and cellular levels. The Integrative Biology (I-Bio) major is designed for students with an interest in the areas of biology that span genomics, ecology, evolutionary biology, comparative genomics, organismal biology, and conservation biology.

Honors tracks are available for the BA and BS degrees. Students completing Honors carry out a major honors research project, write, and defend an honors thesis.

The department also offers a minor in biological sciences for students majoring in other disciplines. Interested students should consult the director of undergraduate studies.

Students may declare only one of the majors offered by the Department of Biological Sciences; double or triple majors within the department are not permitted. Students declaring a major offered by the Department of Biological Sciences may not minor in Biological Sciences. It is strongly recommended that all students take one year of calculus or calculus/statistics, and one year of physics. Students are encouraged to work with their major advisers to choose upper-level courses appropriate to their chosen majors. Courses numbered below 1500 do not count toward the major or minor. Either BSCI 3229 or BSCI 3270, but not both, may count toward a major or minor.

Requirements for Biological Sciences BA degree

General requirements:

- Two semesters of general chemistry and lab (Chemistry 1601-1602 and 1601L-1602L) and two semesters of organic chemistry (Chemistry 2211/2221-2212/2222) and lab (2221L-2222L).
- BSCI 1509

Note: These 19 credit hours do not count toward the major. AP credit may satisfy some of these requirements.

30 credits from BSCI, including the following:

- BSCI 1510 (Molecules and Cells) and BSCI 1511 (Organisms and Ecosystems) plus 1510L and 1511L or 1512L
- 1 course numbered 2100-2199 (Ecology, Evolution, and Organismal Biology)
- 1 course numbered 2200-2599 (Molecular and Cellular Biology core)
- 1 additional 2000-level course
- Any 2 laboratory courses at the 2000-level (includes laboratory associated with 2119)
- 2 credit hours of 4965
- At least 3 credit hours (excluding 4965) at the 3000- or 4000-level
- Additional elective courses at the 2000-, 3000-, or 4000-level

Limitations:

- No more than 4 credit hours of 4965 may count toward the major
- A total of no more than 5 credit hours of directed readings or directed/independent research (3850, 3860, 3861, or 3961) may count toward the major. Students interested in doing research should consider the BS degree.

Requirements for the Molecular and Cellular Biology (MCB) BS degree

General requirements:

- Two semesters of general chemistry and lab (Chemistry 1601-1602 and 1601L-1602L) and two semesters of organic chemistry (Chemistry 2211/2221-2212/2222) and lab (2221L-2222L).
- BSCI 1509

Note: These 19 credit hours do not count toward the major. AP credit may satisfy some of these requirements.

30 credits from BSCI, including the following:

- BSCI 1510 (Molecules and Cells) and BSCI 1511 (Organisms and Ecosystems) plus 1510L and 1511L or 1512L
- BSCI 2201, BSCI 2210, and BSCI 2520
- Research/laboratory requirement (pick one of the two options below)
 - 6-11 credit hours of BSCI 3861 and 3961 plus 2201L or 2210L **OR**
 - a minimum of 12 credit hours of BSCI 3861, 3961 and/or 4999
- Elective courses at the 2000-, 3000-, or 4000-level
 - A minimum of 2 credit hours must be at the 4000-level (excluding 4999)
 - BSCI 2101 or BSCI 4101 (but not both) can be used to fulfill elective credits

Limitations:

- No more than 2 credit hours of 4965 may count toward the major
- A total of no more than 7 total credit hours of directed readings or directed/independent/Honors research (3850, 3860, 3861, 3961, or 4999) may count toward the major

Requirements for the Integrative Biology (I-Bio) BS degree

General requirements:

- Two semesters of general chemistry and lab (Chemistry 1601-1602 and 1601L-1602L) and two semesters of organic chemistry (Chemistry 2211/2221-2212/2222) and lab (2221L-2222L).
- BSCI 1509

Note: These 19 credit hours do not count toward the major. AP credit may satisfy some of these requirements.

30 credits from BSCI, including the following:

- BSCI 1510 (Molecules and Cells) and BSCI 1511 (Organisms and Ecosystems) plus 1510L and 1511L or 1512L
- BSCI 2105 plus two additional 2000-level courses
- Research/laboratory requirement (pick **one** of the two options below)
 - 6-11 credit hours of BSCI 3861 and 3961 plus one laboratory course at the 2000-level (includes laboratory associated with 2119) **OR**
 - a minimum of 12 credit hours of BSCI 3861, 3961, and/or 4999
- Elective courses at the 2000-, 3000-, or 4000-level
 - A minimum of 2 credit hours must be at the 4000-level (excluding 4999)

Limitations:

- No more than 2 credit hours of 4965 may count toward the major
- A total of no more than 7 total credit hours of directed readings or directed/independent/Honors research (3850, 3860, 3861, 3961, or 4999) may count toward the major

Requirements for Honors

Honors is available for students completing the BA or BS degrees, if additional requirements are met as described below. For entry into Honors, students must satisfy the conditions required by the College of Arts and Science for admission to departmental honors programs. Students must have an overall grade point average equal to or greater than 3.3, and a grade point average in courses required for the appropriate major equal to or greater than 3.4 at the time of entry. Applications must be approved by a majority vote of the faculty of the department. To receive honors or highest honors in biological sciences, a student in the departmental Honors Program must:

- Complete the requirements for the degree, achieving a minimum cumulative grade point average of 3.4 in all courses that count toward the major;
- Satisfactorily pursue a research project under the supervision of the adviser with a minimum of 8 credit hours of Honors Research (BSCI 4999) during the last two semesters and a total of 12 or more total credit hours of research.
- Give a progress report to the Honors Committee at the end of the first semester of research. This will consist of a short, written progress report to be distributed to the Honors Committee one week before an oral presentation and meeting with the committee. The meeting must be scheduled before the start of finals week;
- At the end of the second semester of Honors Research, prepare a thesis based on the research project, to be read and evaluated by the Honors Committee;
- Present the thesis orally before the Honors Committee and faculty in the Department of Biological Sciences.
- Details regarding the Honors thesis and oral defense are available here: <https://as.vanderbilt.edu/biological-sciences/honors-research/>

Minor in Biological Sciences

A minor in biological sciences requires a minimum of 18 hours including at least 9 credit hours earned in residence at Vanderbilt. Credit hours for the minor must include BSCI 1510 (Molecules and Cells) and BSCI 1511 (Organisms and Ecosystems) plus 1510L and 1511L or 1512L and two courses at the 2000-level. Note that BSCI 1509 (or AP/IB credit) is a pre-requisite for BSCI 1510 and BSCI 1511. No more than 2 credit hours of directed readings or directed/independent research (3850, 3860, 3861, or 3961) may be counted toward the minor.

COURSES OFFERED: [BME](#)

The foundations of biomedical engineering are the same as those in other engineering disciplines: mathematics, physics, chemistry, and engineering principles. Biomedical engineering builds on these foundations to solve

problems in biology and medicine over the widest range of scales—from the nanoscale and molecular levels to the whole body. Biomedical engineering provides a robust platform for employment in the medical device and instrumentation industries as well as careers in companies that specialize in the development and application of biologics, biomaterials, computation, implants and processes. Our graduates gain entry into nationally recognized graduate schools for continuing studies in biomedical engineering.

Biomedical engineering is also a rigorous path for admission to and success in medical school for those students willing and able to excel in mathematics, physics, chemistry, biology, physiology, and engineering.

The Department of Biomedical Engineering at Vanderbilt is unique among biomedical engineering programs in its immediate proximity to the world class Vanderbilt Medical Center, located on our compact campus. Our School of Medicine is among the top ten in funding from the National Institutes of Health and includes a National Cancer Institute- recognized Comprehensive Cancer Center, a major children's hospital and a Level I trauma center. This proximity and the strong relationships among faculty across multiple schools stimulate high impact research and provide unique educational and research opportunities for students.

Degree Programs. The Department of Biomedical Engineering offers courses of study leading to the B.E., M.S., M.Eng., and Ph.D. Vanderbilt biomedical engineering is a well-established program with undergraduate degrees granted continuously since 1965. Our undergraduate curriculum undergoes regular review and revision to ensure relevancy and to maintain full ABET accreditation. Students have complete flexibility in the selection of biomedical engineering, technical, and open electives. This allows students to design their own focus areas such as regenerative medicine and tissue engineering, wearables and point-of-care diagnostics, global health, surgery and engineering, robotics and prosthetics, lasers and medicine, medical imaging, biotechnology and nanomedicine, medical technology and entrepreneurship.

Facilities. The Department of Biomedical Engineering is located in Stevenson Center. Undergraduate instructional laboratories are equipped for study of biomedical processes, measurement methods and instrumentation. These facilities are equipped with embedded systems for instrumentation, design, and testing that mirror professional practice. Specialized facilities for biomedical imaging, biophotonics, cell and tissue culture, microfabrication, surgery and intervention, and nanoengineering are used both for faculty-led research and instructional purposes.

Undergraduate Honors Program. With approval of the Honors Program director, junior and senior students in biomedical engineering who have achieved a minimum grade point average of 3.5 may be accepted into the undergraduate Honors Program. Students in the program take at least 6 credit hours of 5000-level or above (graduate) biomedical engineering courses, which can be counted toward the 127-hour undergraduate degree requirements as biomedical engineering electives or which can be taken for graduate school credit. Students in the Honors Program must also complete a two-semester-long research project and present a research report; this is generally accomplished through the BME 3860 and 3861 Undergraduate Research elective courses. Honors students must make a grade point average of 3.0 in these classes and maintain an overall 3.5 GPA to be designated as an honors graduate. The diploma designation is Honors in Biomedical Engineering.

Curriculum Requirements

The B.E. in biomedical engineering requires a minimum of 127 hours, distributed as follows:

1. Mathematics (15 hours): MATH 1300, 1301, 2300, 2400.
2. Basic Science (20 hours): CHEM 1601, 1601L, 1602, 1602L; PHYS 1601, 1601L, 1602, 1602L; BSCI 1510, 1510L.
3. Engineering Fundamentals (6 hours): ES 1401, 1402, 1403; CS 1100 or 1101 or 1103 or 1104. (CS 1103 is strongly recommended except for students minoring in Computer Science).
4. Electrical Engineering (3 hours): ECE 2112.
5. Biomedical Engineering (38 hours): BME 2100, 2301, 2302, 2400, 2900W, 3000, 3301, 3301L, 3302, 3302L, 3400, 3500, 3900W, 4901W, 4950, 4951, 4959.
6. Biomedical Engineering electives (12 hours) comprising:

1. BME courses numbered 2210 and higher (except BME 2860 and designated sections of 3890–3893) to include up to 6 hours total of BME 3860, 3861.
2. Any one of the following: CHBE 4500, 4800, 4805, 4810, 4820, 4870; ECE 3214, 4353, 4354; ENVE 4610; ME 2220.
7. Technical electives (9 hours) comprising:
 1. BME, CHBE, CE, CS, DF, DS, ECE, ENGM, ENVE, ME, MSE, NANO, and SC courses numbered 2000 or higher except CHBE 3300, CE 2200, DS 2100, 3850, 3851, ENGM 2160, 2440, 3100, 3350, 4800, ME 2171, and courses numbered 2860. Up to 3 hours of independent study courses in these subject areas may be taken as technical electives. Up to 6 hours of Undergraduate Research (3860, 3861), summed across all programs in these disciplines, may be counted as BME electives and/or technical electives.
 2. ES 3230, 3231, and 3232
 3. Courses numbered 2000 or higher in the College of Arts and Science listed in the mathematics and natural sciences (MNS) AXLE distribution category except MATH 2610, 2810, 2820, and 3000.
 4. BSCI 1511, 1511L; MHS 1500, 1600.
8. Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering.
9. Open electives (6 hours).

Undergraduates in biomedical engineering may apply the pass/fail option only to courses taken as liberal arts core or open electives, subject to school requirements for pass/fail.

Note: Certain mathematics and physics courses cannot be credited to a School of Engineering degree. Please see the [Degree Programs in Engineering/Mathematics and Physics](#) section of the catalog for more information.

Double Majors

- I. The double major in biomedical engineering and electrical and computer engineering requires a minimum of 129 semester hours. A specimen curriculum for the double major with electrical and computer engineering can be found on the biomedical engineering department's website. The requirements include those numbered 1, 2, and 8 for the B.E. in biomedical engineering and the following:
 - a. Engineering Fundamentals (6 hours): ES 1401, 1402, 1403; CS 1100, 1101, or 1104.
 - b. Biomedical Engineering Core (31 hours): BME 2100, 2301, 2302, 2400, 2900W, 3000, 3302, 3302L, 3500, 3900W, 4901W, 4950, 4951, 4959.
 - c. Biomedical Engineering Electives (3 hours): BME courses numbered 2210 and higher (except BME 2860, 3301, 3301L, 3400 and designated sections of 3890–3893).
 - d. Electrical Engineering Core (18 hours): ECE 2112, 2112L, 2123, 2123L, 2214, 3235, 3235L; ECE 2201 or 2204.
 - e. Electrical and Computer Engineering Electives (18 hours) selected as described by item 6 of the Curriculum Requirements in the Electrical and Computer Engineering section of the catalog, but totaling at least 18 hours. The courses must include:

- at least 9 hours in one and at least 6 hours in another of the Areas of Concentration listed under Electrical and Computer Engineering in the Undergraduate Catalog. BME 3302 and 3302L may be included toward satisfying the Area of Concentration requirement but cannot be counted as an Electrical and Computer Engineering elective.
 - at least one Design Domain Expertise course as designated in the catalog.
- II. The double major in biomedical and chemical engineering requires a minimum of 131 hours and is described in the chemical engineering section of the catalog under its curriculum requirements.

Business Studies

DIRECTOR Joseph J. Rando

ASSOCIATE PROFESSORS OF THE PRACTICE Marcy Binkley, Willis J. Hulings, Jamie Leddin, Patrick R. Leddin, Joseph J. Rando, Garnett H. Slatton, Leonora Williamson

LECTURERS Jonathan Dyke, Stuart Garber, Gary McClure, Bob Spieth, Brad White

COURSES OFFERED: [BUS](#), [BUSA](#)

The College of Arts and Science offers select courses under the Business Studies Program to help students understand marketing, accounting, entrepreneurship, management, corporate strategy, negotiation, and analytics. These elective courses are offered by the Business Studies program. The program is directed by Joseph J. Rando, 215 Calhoun Hall, (615)-322-4021.

COURSES OFFERED: [CHBE](#)

Chemical engineers play key roles in the development and production of commodity chemicals, pharmaceuticals, and bioengineered materials, high strength composites and specialty polymers, semiconductors and microelectronic devices, and a wide range of ultrapure fine chemicals. Indeed, chemical engineering is essential for the operation of contemporary society. The solutions to many of the problems that we face today—e.g., energy, the environment, development of high-performance materials—will involve chemical engineers.

Vanderbilt's undergraduate program in chemical engineering prepares students to contribute to the solution of these and similar problems. Our graduates find meaningful careers in industry, in government laboratories, and as consultants. Some continue their education through graduate studies in chemical engineering, medicine, law, or business.

Mission. The mission of the Department of Chemical and Biomolecular Engineering is to educate those who will advance the knowledge base in chemical engineering, become practicing chemical engineers, and be leaders in the chemical and process industries, academia, and government; to conduct both basic and applied research in chemical engineering and related interdisciplinary areas; and to provide service to the chemical engineering profession, the School of Engineering, Vanderbilt University, the country, and the world.

Degree Programs. The Department of Chemical and Biomolecular Engineering offers the B.E. in chemical engineering and graduate study leading to the M.Eng., M.S., and Ph.D.

Undergraduate chemical engineering students acquire a solid background in mathematics, chemistry, biology, physics, and computing. The chemical engineering program has as its basis courses in transport phenomena, thermodynamics, separations, and kinetics. Other courses deal with the principles and techniques of chemical engineering analysis and design, along with economic analysis, process control, chemical process safety, bioprocessing, process simulation, and engineering ethics. Laboratory courses offer the student an opportunity to make fundamental measurements of momentum, heat, and mass transport and to gain hands-on experience with bench scale and small scale pilot-plant equipment, which can be computer controlled. Effective report writing and technical communication are principal skills gained in the laboratory and design courses. Many students carry out individual research projects.

A specimen curriculum for a chemical engineering major follows. This standard program includes electives that students, in consultation with their faculty advisers, select to pursue breadth or a minor or focus area with their chemical engineering major. Specimen curricula with emphases in specific areas are available on the department website. Double majors may be arranged in consultation with a faculty adviser.

Students are recommended to take the Fundamentals of Engineering Examination (FE) in their senior year. This is the first step in obtaining a license as a professional engineer.

Undergraduate Honors Program. The Honors Program in chemical engineering provides an opportunity for selected students to develop individually through independent study and research. General requirements are described in the Special Programs chapter. The chemical and biomolecular engineering department requires a minimum overall GPA of 3.5. Acceptance to the program is made by petition to the faculty during the junior year. Transfer students may be considered for admission after completing one semester at Vanderbilt. Candidates for honors choose their technical courses with the consent of a faculty honors adviser. Requirements include at least 6 hours of CHBE courses numbered 5000 or above, plus 6 hours of CHBE 3860 and 3861 taken in the junior and/or senior year under the direction of a faculty honors adviser. A formal written research report is submitted each semester CHBE 3860 or 3861 is taken with a final report and presentation given in the spring semester of the senior year to the CHBE faculty and students. The diploma designation is Honors in Chemical Engineering.

Facilities. The Chemical and Biomolecular Engineering department is located in Olin Hall. Undergraduate instructional laboratories are equipped for study of transport phenomena, unit operations, kinetics, and process control. Current research areas for which facilities are available include biochemical engineering and biotechnology; materials processing and characterization; colloid and surface science; molecular modeling; energy and the environment.

Curriculum Requirements

The B.E. in chemical engineering requires a minimum of 125 hours, distributed as follows:

1. Mathematics (14 hours): MATH 1300, 1301, 2300, 2420.
2. Basic Science (24 hours): CHEM 1601, 1601L, 1602, 1602L, 2221, 2221L, 2222, 2222L; PHYS 1601, 1601L, 1602, 1602L.
3. Engineering Fundamentals (6 hours): ES 1401, 1402, 1403; CS 1100 or 1101 or 1103 or 1104 (CS 1100 is recommended except for students minoring in Computer Science).
4. Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering.
5. Chemical and Biomolecular Engineering (42 hours): CHBE 2100, 2200, 2250, 2900W, 3200, 3250, 3300, 3350, 3600, 3900W, 4500, 4900W, 4950W, 4951W, 4959.
6. Chemical and Biomolecular Engineering electives: 6 hours selected from CHBE courses numbered 4200 or above and ENVE 4625.
7. Statistics (3 hours): One of DS 2100, BME 2400, CE 3300 or MATH 2810
8. Technical electives (6 hours). To be selected from: a) courses numbered 2000 or above in BME, CHBE, CE, CS, DF, ECE, ENVE, ME, MSE, NANO, and SC, except BME 2110, ME 2220 and any course in these disciplines numbered 2860; b) courses numbered 1510 or above in the College of Arts and Science listed in the mathematics and natural sciences (MNS) AXLE distribution category; c) ENGM 3000, 3010, 3300, 3650, 3700, 4500; and d) DS 3100. At least 3 hours must be selected from BSCI 2201, 2520; CHEM 3300, 3310; ENVE 4600 or CHBE courses numbered 4000 and above.
9. Open electives (6 hours).

Undergraduates in chemical engineering, including double majors with chemical engineering, may apply the pass/fail option only to courses taken as open electives, subject to the school requirements for pass/fail. No more than 6 total hours of courses numbered 2860 and courses numbered 3840 to 3885 inclusive may be applied toward degree requirements.

Note: Certain mathematics and physics courses cannot be credited to a School of Engineering degree. Please see the [Degree Programs in Engineering/Mathematics and Physics](#) section of the catalog for more information.

Dual Majors

- I. The double major in chemical engineering and biomedical engineering requires a minimum of 131 semester hours distributed as follows:
 - a. Mathematics (15 hours): MATH 1300, 1301, 2300, 2400.

- b. Engineering Fundamentals (6 hours): ES 1401, 1403, 1403; CS 1100 or 1101 or 1103 or 1104.
 - c. Basic Science (28 hours): CHEM 1601, 1601L, 1602, 1602L, 2221, 2221L, 2222, 2222L; PHYS 1601, 1601L, 1602, 1602L; BSCI 1510, 1510L.
 - d. Chemical and Biomolecular Engineering (29 hours): CHBE 2100, 2200, 3200, 3250, 3300, 3350, 4900W, 4950W, 4951W, 4959.
 - e. Biomedical Engineering (29 hours): BME 2100, 2301, 2302, 2400, 2900W, 3301, 3301L, 3302, 3302L, 3400, 3500, 3900W, 4959.
 - f. Electrical Engineering (3 hours): ECE 2112.
 - g. CHBE/BME Elective: 3 hours selected from CHBE 4500 (recommended), 4800, 4805, 4810, 4820, 4825, and BME courses numbered 4000 and above except BME 6110. BME 3890 and CHBE 3890 may be substituted upon approval of the Directors of Undergraduate Studies for BME and CHBE.
 - h. Liberal Arts Core (18 hours): To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering.
- II. The major in chemical engineering and with a second major in chemistry requires a minimum of 130 semester hours. The requirements include those numbered 1, 2, 3, 4, and 6 for the B.E. in chemical engineering and the following:
- a. Chemical and Biomolecular Engineering (39 hours): CHBE 2100, 2200, 2250, 2900W, 3200, 3250, 3300, 3350, 3600, 4500, 4900W, 4950W, 4951W, 4959.
 - b. Science (23 hours): CHEM 2100, 2100L, 3010, 3315; 3 hours selected from CHEM courses numbered 3020 and above except 3320, 3600, 3841, 3842, 3860, 3902; either CHEM 4965 and 4966 or 6 hours selected from CHEM 3980, 4980, and 4999; BSCI 1510, BSCI 2520.
- III. The double major in chemical engineering and environmental engineering requires a minimum of 137 semester hours. The requirements include those numbered 1, 2, 3 and 5 for the B.E. in chemical engineering and the following:
- a. Environmental Engineering Core (24 hours): CE 2120, 3300, 3600, 3705; EES 1510; ENVE 3200, 3200L, 4600, 4625.
 - b. Environmental Engineering Electives (6 hours) comprising:
 - 1. At least 3 hours selected from CE 4150, 4240, 4425, 4430; ENVE 4305, 4610,
 - 2. At most 3 hours selected from CE 4300; EES 3310, 4550, 4650, 4750; ENVE 4615, 4620,
 - c. Chemical and Biomolecular Engineering electives: 3 hours selected from CHBE courses numbered 4000 or above (ChBE 4860 is recommended).
 - d. Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering. To include 6 hours of Global Perspective Electives selected from ANTH 2150, 2220W, 2224, 2225, 2400, 3130, 3345, 4154; ECON 2170; EES 3333; PHIL 3611; PSCI 3266; SOC 3311, 3312, 3314, 3315, 3316, 3317, 3318, 3319.

Specimen Curriculum for Chemical Engineering

		Semester hours	
SOPHOMORE YEAR		FALL	SPRING
CHEM 2221, 2222	Organic Chemistry	3	3

DIRECTOR OF GRADUATE STUDIES David E. Cliffe

Professors, Emeriti: Darryl Bornhop, Robert Dilts, Thomas Harris, B. Hess, Charles Lukehart, Ned Porter, Joel Tellinghuisen

Professors: Brian Bachmann, David Cliffe, James Crowe, Timothy Hanusa, Jeffrey Johnston, John Kuriyan, Craig Lindsley, Lawrence Marnett, John McLean, Douglas Mitchell, Prasad Polavarapu, Carmelo Rizzo, Rena Robinson, Sandra Rosenthal, Michael Stone, Gary Sulikowski, Steven Townsend, David Wright

Associate Professors: Janet Macdonald, Lars Plate, Nathan Schley

Assistant Professors: Lauren Buchanan, Daria Kim, Andrea Locke, Alexander Schuppe, Allison Walker, Zhongyue Yang

Principal Senior Lecturers: Alissa Hare, Xiaohua Jiang, Adam List, Shawn Phillips, Craig Tainter, Tara Todd, Susan Verberne-Sutton

Senior Lecturers: Katherine Clements, Aaron Daniel, Chi-Li Ni, Keri Tallman

COURSES OFFERED: [CHEM](#)

The Department of Chemistry seeks to provide a sound education in the fundamentals of modern chemistry as well as exposure to cutting-edge research and contemporary instrumentation in the field. This is accomplished by providing students with a solid background in the disciplines of organic, analytical, inorganic, biological, and physical chemistry. The foundational courses in these areas, which are supported by a variety of practical experimental experiences in the laboratory, provide students with the skills needed to think critically about chemistry. After these foundational courses, students delve deeper into an area of their choice. Recognizing the importance of research, which integrates and makes sense of our collective body of knowledge, we encourage students to participate in undergraduate research. We offer two degree paths: a B.S. degree for students whose primary major is chemistry and a B.A. degree designed to facilitate a second major in chemistry for students majoring in another chemistry-related field. Both paths towards a chemistry major at Vanderbilt University meets the guidelines for the American Chemical Society approved program of study in chemistry.

Program of Concentration in Chemistry

The B.S. and B.A. degree paths require the same foundational courses, allowing students the flexibility to change paths up until their senior year. The chemistry program is organized into four parts. The first part is a general chemistry course sequence to serve as an entry point into the major, as well as non-chemistry coursework in math, physics, and biology. The second part consists of foundation courses in the five major disciplines of chemistry: analytical, biochemistry, inorganic, organic, and physical. The third part of the chemistry major consists of completing laboratories associated with foundation courses and an advanced laboratory experience, whether through the capstone lab or through an honors research project. The fourth part of the major consists of completing

advanced, in-depth chemistry electives. These in-depth courses build upon the content of foundation courses or integrate concepts from these foundational disciplines. B.S. majors must take all electives within the chemistry department, while B.A. majors may substitute up to 6 credit hours of approved, chemistry-related coursework from their primary major.

Prerequisite Courses for a Major in Chemistry

(27 credit hours, AP credit may satisfy some of these requirements. Note: these credit hours do not count toward the major.)

Topics	Course Numbers
General Chemistry I/II plus lab	CHEM 1601+1601L and CHEM 1602+1602L OR AP credit
Calculus I/II, with at least 3 credit hours of math taken during undergraduate	MATH 1300 and MATH 1301 OR AP credit + 3 credit hours of college-level math (recommended: MATH 2300, MATH 2500, OR MATH 2820)
Physics I/II plus lab	PHYS 1601+1601L and PHYS 1602+1602L OR PHYS 1911 and PHYS 1912+1912L
Introductory Biology	BSCI 1510

Required Chemistry Courses for B.S. and B.A. degree paths (40 credit hours)

	B.S.		B.A.	
Topics	Course Numbers	Hours	Course Numbers	Hours

In-Depth electives**	Three courses within the chemistry department	9	Four courses, at least two within the chemistry department	12

*See the "Honors Program" section below for more information on additional requirements for honors research.

** See "In-Depth Chemistry Courses" section below for more information on the elective requirements for the B.S. and B.A. degree paths.

In-Depth Chemistry Courses

In-depth chemistry electives are designed to build upon foundational coursework and integrate concepts in order to explore advanced topics in chemistry, such as chemical biology, materials science, drug design, or instrumentation and spectroscopy. Students should consult with their major adviser to determine which courses best fit their individualized interests and career goals. Eligible chemistry electives and other recommended courses can be found in the chemistry major handbook on the chemistry department homepage. Qualified seniors interested in graduate (5000-level) courses must obtain approval from the course instructor, their adviser, and the director of graduate studies in chemistry. Further details are found in the Academic Policies for the College of Arts and Science.

Students pursuing the B.S. degree path must take at least 6 credit hours of advanced, in-depth coursework at the 4000-level or higher. 3 credit hours may be at the 3000-level, including introductory chemistry research (CHEM 3860).

Students pursuing the B.A. degree path must take at least 6 credit hours of in-depth coursework at the 3000-level or higher within the chemistry department (excluding CHEM 3860). Up to 6 credit hours of chemistry-related coursework, at the 3000-level or higher and as appropriate for a double major, may be taken outside of the

chemistry department and may include up to 3 credit hours of CHEM 3860. Appropriate chemistry-related electives include:

CHBE 3200, CHBE 3250, CSET 3200W, CSET 3240W, CSET 3410, SCED 3320, SCED 3400, EES 3280, ENVE 4600, MATH 3120, MATH3620, MHS 3120, NSC 3245, PSY 3630

Minor in Chemistry

The minor in chemistry requires 18 credit hours of course work taken within the chemistry department, including 4 credit hours from 1602 and 1602L or AP credit, and 14 credit hours selected from any of the courses acceptable for the major in chemistry. CHEM 3860 may not be counted towards the minor.

Honors Program

Students with an overall GPA of at least 3.3 and a GPA of at least 3.4 in chemistry courses at the start of their junior year wishing to do honors will register for the honors research courses (CHEM 3980, 4980, 4999) beginning spring semester junior year. The CHEM 4965 and 4966 requirements are waived in lieu of the CHEM 3980, 4980, and 4999 registrations. Honors candidates must present a thesis on the research done under CHEM 3980, 4980, and 4999 and pass an oral examination. Additional information may be found in the chapter on Special Programs in the College.

Licensure for Teaching

Candidates for teacher licensure in chemistry at the secondary level should refer to the chapter on Licensure for Teaching in the Peabody College section of this catalog. One semester of the CHEM 4965–4966 sequence will be considered fulfilled by completing the Peabody student teaching requirements.

Introductory Courses

Introductory chemistry is offered in two different sequences, each with its own laboratory. Only one set of these courses may be taken for credit.

1. Chemistry 1010, 1010L. Intended for liberal arts students who are not planning to take any additional chemistry courses. It treats chemistry in a nonmathematical fashion, with some historical and philosophical features. Not for science and engineering students.
2. *Chemistry 1601–1602*. Designed for engineering, science, and premedical students. This course, which must be taken simultaneously with 1601L–1602L, serves as preparation for students intending to major in chemistry, biology, physics, or earth and environmental sciences. It is a more rigorous, mathematical approach to chemistry and a prerequisite for organic and other chemistry courses. It is not intended for liberal arts students taking a science course only to fulfill College Core requirements.

LECTURER Phillip Collins

COURSES OFFERED: [CE](#)

Vanderbilt's Department of Civil and Environmental Engineering offers a broad-based education in civil and environmental engineering fundamentals, coupled with development of leadership, management, and communications skills to establish a foundation for lifelong learning and flexible career development. This goal requires going beyond technical competence in a balanced education to develop future leaders in the fields of consulting, industry, business, law, government, and research.

B.E. in civil engineering. Civil engineers must be able to face complex problems of modern society involving the development of physical facilities that serve the public while protecting the environment and preserving social values. Challenges facing civil and environmental engineers concern housing, urban transportation, pollution control, water resources development, industrial development, maintaining and advancing our nation's aging infrastructure, and exploring space. Addressing these challenges with today's limited resources requires innovative and original ideas from highly-skilled engineers.

Undergraduates majoring in civil engineering receive a strong background in mathematics, science, engineering science, and engineering design. The program also includes courses in economics, humanities, social sciences, resources management, and public policy. Students participate in design teams and laboratory studies as well as classroom activities. Use of various computer-based methods is integral to problem solving and design.

Vanderbilt's B.E. in civil engineering prepares students for entry-level positions in many specialty areas of civil engineering, as well as many other types of careers, such as business, construction, and law. Today, however, and

even more so in the future, professional practice at a high level will require an advanced degree. We recommend that students seriously consider pursuing the M.S. or M. Eng. soon after obtaining the B.E.

B.E./M.Eng. Five Year Program. Students seeking advanced study in civil and environmental engineering may be interested in the combined B.E./M.Eng., enabling students to complete the B.E. in civil engineering and M.Eng. in civil engineering or environmental engineering in five years.

Construction Management Five Year Program. Students seeking advanced study in construction management may be interested in the combined B.E./M.Eng., enabling students to complete the B.E. in civil engineering and M.Eng. in civil engineering (construction management emphasis) in five years.

Undergraduate Honors Program. Recognized with the diploma designation Honors in Civil Engineering, exceptional students may be invited in their junior year to participate in the civil engineering Honors Program. Designed as a unique individualized educational experience, participants work closely with departmental faculty members to tailor a selection of courses that actively immerses them in a selected field of study. Experiences include enrollment in a 3 semester hour independent study course and participation in a summer research internship. Honors Program participants are especially well-prepared to enter graduate study, and they may count the independent study course towards their civil engineering technical electives.

Facilities. The civil engineering laboratory provides for static and dynamic testing of materials and structural components and assemblies. Testing facilities include capabilities of testing composites, metals, and concrete under static loads, fatigue, base acceleration (to simulate seismic events) and intermediate to high speed impacts (to simulate responses to blast events). Full soils testing facilities are available. Hydraulics facilities include several model flow systems to illustrate principles of fluid mechanics and hydrology. The transportation laboratory is computer-based, with emphasis on transportation systems and design, intelligent transportation systems, and geographic information systems. The environmental laboratories are fully supplied with modern instrumentation for chemical, physical, biological, and radiological analysis of soils, sediments, water, wastewater, air, and solid waste. They include equipment for the study of biological waste treatment, physical-chemical waste treatment, containment mass transfer, and state-of-the-art instrumentation. All are available for student use in courses, demonstrations, and research.

Curriculum Requirements

The B.E. in civil engineering requires a minimum of 125 hours, distributed as follows:

1. Mathematics (14 hours). Required courses: MATH 1300, 1301, 2300, 2420.
2. Basic science (16 hours). Required courses: CHEM 1601, 1601L; PHYS 1601, 1601L, 1602, 1602L; MSE 1500, 1500L.
3. Computing (3 hours). Required course: CS 1100 or 1101 or 1103.
4. Engineering Fundamentals (26 hours). Required courses: ES 1401, 1402, 1403; CE 2101, 2200, 2205, 2989, 3700, 3700L; ENGM 2160; ME 2190; MSE 2205.
5. Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering.
6. Open electives (6 hours).
7. Technical electives (3 hours). To be selected from: (a) courses in BME, CHBE, CE, ENVE, ECE, ME, MSE (except any course numbered 2860); (b) MSE (except MSE 3860, 3889, 3890) (c) ENGM 3000, 3010, 3200, 3650; (d) CHEM 1602 and above; (e) PHYS courses above 2000 (astronomy not accepted); (f) MATH 2410 or 2600, and courses 2811 and above (except 3000); (g) all CS courses 2000 and above (except 2860 4959); and (h) DS 3100, 3262. Students with an interest in Structural Engineering are encouraged to take MATH 2410 or 2600 as their technical elective.
8. Civil Engineering Core (27 hours). Required courses: CE 2120, 3100W, 3200, 3205, 3300, 3501, 3705, 4400, 4950, 4951, and 4959.
9. Civil Engineering Program Electives (6 hours). To be selected from: CE 3250, 4150, 4250; ENVE 4610, 4615, 4625, 4800; ENVE 3600.
10. Civil Engineering Design Electives (6 hours). To be selected from: CE 4150, 4200, 4210, 4240, 4250, 4425, 4430, 4500, 4505, 4510; ENVE 4305, 4610, 4625, 4710.

Students may use CE program electives, CE design electives, technical electives, and open electives to gain

additional depth and expertise. Students with interests in structural engineering are recommended to take electives such as CE 3250, 4200, 4210, 4211, 4250, 4300, ENVE 4305, and ME 4259, 4275. Students interested in environmental and infrastructure sustainability engineering are recommended to take electives such as CE 3600, 4100, 4150, 4240, 4300, ENVE 4305, 4600, 4605, 4610, 4615, 4620, 4700, 4705, 4707, 4710, 4715, 4716, and 4720. Specific courses selections should be discussed with their academic adviser. Students desiring advanced topic coverage should also consider 5000- level courses, with approval of their adviser.

Undergraduates in civil engineering may apply the pass/fail option only to courses taken as liberal arts core or open electives, subject to the school requirements for pass/fail.

Note: Certain mathematics and physics courses cannot be credited to a School of Engineering degree. Please see the [Degree Programs in Engineering/Mathematics and Physics](#) section of the catalog for more information.

Specimen Curriculum for Civil Engineering

		Semester hours	
SOPHOMORE YEAR		FALL	SPRING
MATH 2300	Multivariable Calculus	3	–

*To be selected toward satisfying the following degree requirements: 6 hours of Program Electives, 3 hours of Technical Electives, and 6 hours of Open Electives.

Pre-Architecture Advising

Civil engineering students interested in pursuing architecture at the graduate level should include courses that emphasize a broad sense of art and architectural history, including courses in studio art. Before applying to graduate programs, students will need to develop a portfolio of creative work that generally includes drawing, prints, sculpture, photographs, and creative writing. Further information is available at: as.vanderbilt.edu/paa/.

Cinema and Media Arts

[Program of Concentration in Cinema and Media Arts](#)

[Honors Program](#)

[Minor in Cinema and Media Arts](#)

CHAIR Claire Sisco King

ASSOCIATE CHAIR Jonathan Waters

DIRECTOR OF UNDERGRADUATE STUDIES Mariah Kramer

Professors: Jennifer Fay, Lutz Koepnick, Jay Clayton, Claire Sisco King, Lynn Ramey

Associate Professors: Jonathan Rattner, Andrea Mirabile

Assistant Professors: Sasha Crawford-Holland, Ole Molvig

Principal Senior Lecturer: Jonathan Waters

Senior Lecturer: Mariah Kramer

Writer in Residence: Krista Knight

COURSES OFFERED: [CMA](#)

Cinema and Media Arts offers an interdisciplinary major and minor that combine the practice of filmmaking with the study of film and media theory and history. Emphasizing cinema as both a modern aesthetic form and a hands-on cultural practice, the program trains students for careers in film and media production, communications, academic media studies, and community and social relations. The program encourages new ways of thinking, looking, and making in keeping with the ever-changing world of modern media. The primary curriculum is composed of film and media theory, history, and filmmaking. The major concludes with a capstone senior seminar.

Program of Concentration in Cinema and Media Arts

The CMA major consists of 33 credit hours, balanced between production and studies courses. This structure provides a broad foundation of knowledge and skills as students consider their career options. The requirements are as follows:

FOUNDATIONS (6 credit hours)

1500: Fundamentals of Film and Video Production

1600: Introduction to Film and Media Studies

PRIMARY REQUIREMENTS (12 credit hours): Students must take two courses from among the following: 2240, 2250, 2260, 2270, and 2290; and two courses from among the following: 2300, 2301, 2302, 2370, and 2400.

2240: Narrative Filmmaking

2250: 16mm Filmmaking

2260: Digital Production Workshop

2270: Documentary Filmmaking

2290: Alternate Media Modes

2300: Film and Media Theory

2301: Race in Film and Media

2302: Global Queer Cinema

2370: Film and Media Aesthetics

2400: History of World Cinema

ELECTIVES (12 credit hours): Students must take four additional CMA courses or cross-listed courses, including ones in the Primary category (that are not being used to satisfy the Primary Category requirement) and Special Topics courses.

SENIOR SEMINAR (3 credit hours): All seniors must take either 4961 or 4962.

Honors Program

The Honors Program in Cinema and Media Arts offers excellent students the opportunity to undertake a high-level independent research and/or creative project during their senior year. Projects must be rigorous and demonstrate a student's ability to sustain an argument, an aesthetic principle, or a narrative arc in a substantial form. For admission to the Honors Program, students must have and maintain until graduation a cumulative grade point average of 3.3 and a grade point average of 3.5 in courses counting toward the major. The student must submit an application to the program director outlining the thesis topic. In addition to completing the major requirements listed above, during the senior year the student is required to register for Cinema and Media Arts 4998 (3 credit hours) and 4999 (3 credit hours) in order to complete the thesis. An oral examination on the thesis and its area is to be completed during the final semester of undergraduate study.

Minor in Cinema and Media Arts

The minor consists of 18 credit hours balanced between production and studies courses. The requirements are as follows:

FOUNDATIONS (6 credit hours)

1500: Fundamentals of Film and Video Production

1600: Introduction to Film and Media Studies

PRIMARY REQUIREMENTS (6 credit hours): Students must take one course from among the following 2240, 2250, 2260, 2270, and 2290; and one course from among the following: 2300, 2301, 2302, 2370, and 2400.

2240: Narrative Filmmaking
2250: 16mm Filmmaking
2260: Digital Production Workshop
2270: Documentary Filmmaking
2290: Alternate Media Modes

2300: Film and Media Theory
2301: Race in Film and Media
2302: Global Queer Cinema
2370: Film and Media Aesthetics
2400: History of World Cinema

ELECTIVES (6 credit hours): Students must take two additional CMA courses or cross-listed courses, including ones in the Primary category (that are not being used to satisfy the Primary Category requirement) and Special Topics courses.

Classical and Mediterranean Studies

[Program of Concentration in Classical and Mediterranean Studies](#)

[Honors Program](#)

[Minor in Mediterranean Archaeology](#)

[Minor in Mediterranean Studies](#)

[Approved List of Courses](#)

CHAIR Kevin Murphy

DIRECTOR OF UNDERGRADUATE STUDIES Daniel Solomon

Professors, Emeriti: Robert Drews, Susan Wiltshire

Professors: William P. Caferro, Phillip Ackerman-Lieberman

Associate Professors: Jelena Bogdanovic, Ari Bryen, Kathy Gaca, David Michelson, Joseph Rife

Assistant Professor: James Zainaldin

Principal Senior Lecturer: Daniel Solomon

Senior Lecturers: Jason Harris, Isabella Reinhardt, Chiara Sulprizio

COURSES OFFERED: [ARAM](#), [CLAS](#), [CHEB](#), [GRK](#), [LAT](#)

The Department of Classical and Mediterranean Studies offers students an interdisciplinary perspective on the culture and history of a region at the crossroads of human civilization since antiquity. The study of the Mediterranean world examines the influential achievements and legacy of the Greeks and Romans alongside the

emergence and spread of Judaism, Christianity, and Islam to the East. It also explores the premodern to modern development of southern Europe, North Africa, and western Asia, which have variously responded to the ancient and medieval past. The program offers courses in the history, religion, philosophy, art, literature, society, and culture of the Mediterranean world. In teaching and research, the faculty promote the integrated study of past and present through both written and material sources—textual, artifactual, visual, spatial—and they embrace analytical techniques in the digital humanities. Students thus have the opportunity to learn several ancient and medieval languages of Europe and the Middle East and to pursue experiential learning overseas, from intensive modern language study to archaeological fieldwork to the investigation of evolving cultural and natural landscapes.

Majors in classical and Mediterranean studies are introduced to the distinctive geography and history of the region but choose their courses in one of three tracks. These tracks have shared content but offer different viewpoints and training. Majors who expect to apply for graduate study should work closely with an adviser to devise an appropriate curriculum.

Students who pursue Classical and Near Eastern Languages and Cultures investigate one or more ancient to medieval cultural tradition(s) in the Greco-Roman and Near Eastern spheres through the study of original texts and their historical setting, such as Greek tragedy, Latin oratory, Hebrew scripture, the Qur'an, or early French romance.

Students who pursue Mediterranean Archaeology explore human diversity and experience from Classical Antiquity to the Middle Ages through the study of material and visual culture. They too learn to read textual sources while acquiring the skills of archaeological and art-historical research.

Students who pursue Mediterranean Studies, the most flexible track for a broad range of interests, can choose to engage with a variety of ancient, medieval, or modern topics through focused or comparative study.

The Department of Classical and Mediterranean Studies also offers a minor in Mediterranean Archaeology and a minor in Mediterranean Studies. A student cannot earn more than one minor in the program.

The Honors Program requires the production of a thesis representing advanced, original, and substantial research.

Students are strongly recommended to pursue study abroad in the Mediterranean or an adjacent region. The department has long supported the Intercollegiate Center for Classical Studies, the American Academy in Rome, and the American School of Classical Studies in Athens. Many different international experiences are possible through Vanderbilt-approved semester programs, Maymesters, research projects, and summer study, for example, in Italy, Greece, and Israel. Students are encouraged to participate in local and regional conferences, where they can share the results of collaborative or independent work. Those concentrating on Greek and/or Latin language who qualify academically are invited to join Eta Sigma Phi, the national classics honor society.

Program of Concentration in Classical and Mediterranean Studies

Students majoring in Classical and Mediterranean Studies must take ten courses, including one foundation course (CLAS 1010). The major is arranged into three tracks and an honors track. Students must formally declare a track 1–3 at the time the major is declared. A score of 4 or 5 on the AP Latin exam earns 3 hours of credit for Latin 2202, which may be applied toward any of the major tracks. Any course for which a student has earned credit will count for one and only one of the requirements or sub-requirements for any of the major tracks or minors.

Track 1: Classical and Near Eastern Languages and Cultures

30–34 total credit hours including:

1. One foundation course: CLAS 1010 (3 credit hours);
2. Language/Literature: Five courses from Course List A (15 credit hours, or 19 credit hours if including ARA 1101– 1102);
3. Culture: Four courses from Course Lists B–D numbered 2060 or above (12 credit hours).

Latin courses at the 1000 level do not count toward this major track. Students who fulfill their language/literature requirement (#2 above) by completing courses in one language must, in consultation with the director of undergraduate studies, earn credit for at least one course in a different cultural tradition (e.g., Greek, Roman, Jewish, Christian, Islamic) or period (e.g., ancient, medieval).

Track 2: Mediterranean Archaeology

30–34 total credit hours including:

1. Two foundation courses: CLAS 1010 and 1020 (6 credit hours);
2. Language/Literature: Two courses from Course List A (6 credit hours, or 10 if including ARA 1101–1102);
3. Method and Theory: One course from Course List E (3 credit hours);
4. Three courses in the history and in the art, architecture, and archaeology of the ancient to medieval Mediterranean world, including one from Course List B, one from Course List C, and one from Course List B or C (9 credit hours);
5. Electives: Two courses from Course Lists A–E or from the following (6 credit hours):

ANTHROPOLOGY: 1101, Introduction to Anthropology; 1201, Introduction to Archaeology; 1301, Introduction to Biological Anthropology; 1601, Introduction to Language and Culture; 2211, Archaeology; 2220, Human Landscapes; 2370, Death and the Body; 2620 (formerly 2227), Food in the Ancient World; 3160, Anthropologies and Archaeologies of Community; 3161, Colonial Encounter in the Americas; 3200, Ancient Cities; 3202, The Collapse of Civilizations.

With the permission of the director of undergraduate studies, students may fulfill the method and theory requirement (#3 above) by completing a program of practical archaeology (e.g., CLAS 3700, 3710, 3720, 3730, ANTH 3866, participation in an excavation or field survey, an internship in conservation or curation). No more than 15 credit hours of courses numbered below 2050 may count toward this major track.

Track 3: Mediterranean Studies

30 total credit hours including:

1. One foundation course: CLAS 1010 (3 credit hours)
2. Historical basis: Four courses from Course Lists A–D (12 credit hours);
3. Comparative perspectives: Five courses from Course Lists A–F (15 credit hours).

Students may apply up to three semesters of one Mediterranean language toward the historical basis requirement of this major track, including either an ancient to medieval language in Course List A or Catalan, French, Italian, Portuguese, or Spanish. French, Italian, Latin, and Spanish courses at the 1000 level do not count toward the major. No more than 12 credit hours of courses numbered below 2050 may count toward this major track.

Honors Program

The Honors Program in Classical and Mediterranean Studies offers students a more intensive concentration in their main field.

Candidates should signal their interest to the director of undergraduate studies by the beginning of the second semester of the junior year.

Admission requirements are:

1. A cumulative GPA of 3.3, and a GPA of 3.5 in courses that count toward the major.
2. Approval by the faculty of a 2–3 page thesis proposal, due by the middle of the second semester of the junior year.

In addition to maintaining the stated GPA throughout the senior year, Honors students must complete CLAS 4998 and 4999 for 3 credit hours each in addition to the 30–34 credit hours required by the major, culminating in a written thesis that is defended orally. A committee of three faculty members (two of whom must hold sole or joint appointments in the Program in Classical and Mediterranean Studies) will evaluate the thesis and the oral defense.

Minor in Mediterranean Archaeology

Students are required to complete CLAS 1010, 1020, and 12 additional credit hours in courses that count toward Track 2 of the concentration, of which at least 9 credit hours must be from courses numbered 2060 or above.

Minor in Mediterranean Studies

Students are required to complete CLAS 1010 and 15 additional credit hours in courses that count toward Track 3 of the concentration, of which at least 9 credit hours must be from courses numbered 2060 or above.

Approved List of Courses

A: Ancient to Medieval Mediterranean Languages and Literatures

CLASSICAL HEBREW: 1101, Beginning Classical Hebrew I; 1102, Beginning Classical Hebrew II; 2200, Intermediate Classical Hebrew; 3010, Historical Hebrew Grammar; 3020, Classical Hebrew Poetry; 3030, West Semitic Inscriptions.

GREEK: 1101, Beginning Greek I; 1102, Beginning Greek II; 2201, Intermediate Greek I: Classical and Koiné Greek; 2202, Intermediate Greek II: Homer's *Iliad*; 3010, The Greek Orators; 3020, The Greek Historians; 3040, Readings in Plato and Aristotle; 3100, The Greek Tragedians; 3110, Greek Lyric Poetry; 3200, Early Christian Writers; 3850, Independent Study; 3890, Special Topics in Greek Literature.

LATIN: 1101, Beginning Latin I; 1102, Beginning Latin II; 1103, Intensive Elementary Latin; 2201, Intermediate Latin I; 2202, Intermediate Latin II; 3010, The Writings of Caesar; 3020, Cicero and the Humanistic Tradition; 3030, Latin Letters; 3040, The Roman Historians; 3050, Suetonius; 3060, Tacitus; 3070, Sallust; 3100, Roman Comedy; 3110, Catullus; 3120, Lucretius: *De Rerum Natura*; 3130, Vergil: *The Aeneid*; 3140, The Lyric Poetry of Horace; 3150, Latin Elegy; 3160, Ovid; 3170, Roman Satire; 3180, Neronian Writers; 3200, Early Christian Writers; 3300, Ancient Conspiracy - Theory and Practice; 3850, Independent Study; 3890, Special Topics in Latin Literature.

ARABIC: ARA 1101, Elementary Arabic I; 1102, Elementary Arabic II; 2201, Intermediate Arabic I; 3301, Arabic of the Qur'an and Other Classical Texts; RLST 4593, Advanced Readings in Islamic Tradition.

UGARITIC: CHEB 2300, Ugaritic.

ARAMAIC AND CLASSICAL SYRIAC: ARAM 2400, Introduction to Classical Syriac; 2500, Egyptian Aramaic; CHEB 3030, West Semitic Inscriptions.

AKKADIAN: CLAS 3300, Elementary Akkadian I; 3301, Elementary Akkadian II.

MEDIEVAL TO RENAISSANCE ITALIAN: ITAL 3100, Literature from the Middle Ages to the Renaissance; 3242, Dante in Historical Context.

OLD SPANISH: SPAN 4400, Origins of Spanish Literature.

B: Ancient to Medieval Mediterranean History

CLASSICAL AND MEDITERRANEAN STUDIES: 2100, History of the Ancient Near East; 2110, History of Greece to Alexander the Great; 2120, Greece and the Near East from Alexander to Constantine; 2150, History of the Roman Republic; 2160, History of the Roman Empire; 2180, The Mediterranean World from Late Antiquity to the Middle Ages.

HISTORY: 1190, A History of Islam; 1350, Western Civilization to 1700; 1600, European Economic History 1000–1700; 2220, Medieval and

Renaissance Italy, 1000–1700; 2230, Medieval Europe, 1000–1350.

C: Ancient to Medieval Mediterranean Art, Architecture, and Archaeology

CLASSICAL AND MEDITERRANEAN STUDIES: 1020, Introduction to Mediterranean Archaeology; 2200, Archaic and Classical Greek Art and Architecture, 1000 to 400 B.C.E.; 2210, Late Classical Greek and Hellenistic Art and Architecture; 2220, Cities of the Ancient Mediterranean World; 2250, Roman Art and Architecture; 2260, The Art of Pagans, Christians, and Jews; 2270, Early Christian and Byzantine Art; 3200, The Greek City; 3210, Religions of the Ancient Mediterranean; 3220, The Trojan War in History, Art, and Literature; 3230, Alexander the Great; 3240, Greek Culture in the Roman World; 3881, Internship Readings and Research.

HISTORY OF ART AND ARCHITECTURE: 1100, History of Western Art; 1121, History of Western Architecture; 1285W, Introduction to Medieval Art; 2180, Islamic Art and Architecture; 2200, Cities of the Ancient Mediterranean World; 2210, Art and Architecture of Ancient Egypt; 2220, Greek Art and Architecture; 2254W Pompeii: Life and Death of a Roman City; 2270, Early Christian and Byzantine Art; 2275, The Cross and the Crescent: Byzantine-Islamic Confluences in Art; 2285, Medieval Art; 2290, Gothic Paris; 2310, Italian Art to 1500; 2320 or 2320W, Italian Renaissance Workshop; 2325, Great Masters of the Italian Renaissance; 2323 Early Renaissance Florence; 2340W, The Art of Venice; 2342W, Venice: Between Land and Sea; 2360, Northern Renaissance Art; 3224, Greek Sculpture; 3226, Greek Vases and Society; 3228W, Gender and Sexuality in Greek Art; 3240W, Ancient Landscapes; 3252, Cities of the Roman East; 3256W, Roman Architecture and Power; 3272, Portraits in Late Antiquity; 3274, Art and Empire from Constantine to Justinian; 3320 or 3320W, Early Renaissance Florence; 3332, Raphael and the Renaissance; 3334 or 3334W, Michelangelo's Life and Works; 3825W Meaning and Form in Architecture.

D: Ancient to Medieval Mediterranean Studies

CLASSICAL AND MEDITERRANEAN STUDIES: 1111, First-Year Writing Seminar; 1120, Greek Civilization; 1130, The Greek Myths; 1150, Roman Civilization; 1200W, Classics and Contemporary Culture; 2300, Ancient Science; 3000, Classical Tradition in America; 3010, The Ancient Origins of Religious Conflict in the Middle East; 3030, Death, Disease, and Health in the Ancient World; 3100, Women, Sexuality, and Family in Ancient Greece and Rome; 3110, Warfare in the Ancient Mediterranean; 3120, Humor, Ancient to Modern; 3140 Sport & Competition Ancient Mediterranean; 3150, Roman Law; 3160, Roman Law and Society; 3190 or 3190W, Augustan Rome; 3250 or 3250W, Jews and Greeks; 3260, Plato: Knowledge, Reality, Goodness; 3310, Culture of the Ancient Near East; 3320, The Armana Age; 3333, Pandemics and Society in Historical Perspective; 3350, History of Ancient and Medieval Christianity; 3360, Early Christian Poetry; 3370, The History of Syriac Christianity; 3380, Desert Spirituality in Early Christianity; 3700, Uncovering Greek Religion; 3710, Maymester in Greece; 3720, Maymester in Rome; 3730, Maymester in Israel; 3850, Independent Study; 3881, Internship Readings and Research; 3890, Special Topics.

ENGLISH: 2318 or 2318W, World Literature, Classical; 3348 or 3348W, Milton.

HISTORY: 1345, The World of Rome; 2155, Muhammad and Early Islam; 2160, Medicine in Islam; 2161 The Roman Law of Delicts; 2170, Islam and the Crusades; 2180, Islamic Narratives, Narratives of Islam; 2190, The Last Empire of Islam; 2237, Democracy and Dictatorship: Ancient Politics; 2238, Crime and Criminal Law in Western Antiquity; 2240, Sex Law; 3210, Muslims, Christians, and Jews in Medieval Spain; 3215, The Other 1492; 3310W, Bible in the Greek World.

ITALIAN: 3240, Dante's Divine Comedy; 3242, Dante in Historical Context; 3340, Famous Women from Antiquity to Renaissance; 3803, Maymester in Sicily.

JEWISH STUDIES: 1200, Classical Judaism: Jews in Antiquity; 1220, Jews in the Medieval World; 2150, Issues in Rabbinic Literature; 2620, Jews in Egypt; 3892, Topics in Ancient and Medieval Jewish History.

PHILOSOPHY: 2100, Ancient Philosophy; 2101, Hellenistic and Late Ancient Philosophy; 2102, Medieval Philosophy; 3005, Jewish Philosophy; 3006, Islamic Philosophy.

POLITICAL SCIENCE: 2202, Ancient Political Thought.

RELIGIOUS STUDIES: 1500, Introduction to Islam; 3225, Sexuality in the Hebrew Bible and the Ancient Near East; 3350, Christian-Jewish Relations in Medieval and Early Modern Europe; 3926, Ancient Goddesses; 4551 or 4551W, Mysticism in Islam; 4938, Marriage in the Ancient Near East and the Hebrew Bible.

Archaeological and Art-Historical Method and Theory

ANTHROPOLOGY: 2603, Comparative Writing Systems; 3260, Ceramic Analysis in Archaeology; 3261, Geographic Information Systems and Remote Sensing; 3262, Ethics in Anthropology, Archaeology, and Development; 3344, Genetic Anthropology Lab Techniques; 3372, Human Osteology; 3866, Archaeological Excavation; 3901, Problems in Anthropological Theory; 4345, Human Evolutionary Genetics.

CLASSICAL AND MEDITERRANEAN STUDIES: 3600, Seminar in Digital Humanities.

EARTH AND ENVIRONMENTAL SCIENCES: 1030, Oceanography; 1510, The Dynamic Earth: Introduction to Geological Sciences; 2510, Earth Systems through Time.

HISTORY OF ART AND ARCHITECTURE: 3810 or 3810W, Exhibiting Historical Art.

The Modern Mediterranean World

HISTORY: 1200, The Arab Spring; 3190, Religion, Culture, and Commerce: The World Perspective.

HISTORY OF ART AND ARCHITECTURE: 2780, History of Western Urbanism; 2782, Storied Places: History of Landscape Design.

JEWISH STUDIES: 2600, Muslims and Jews.

RELIGIOUS STUDIES: 2552 (formerly 4552), Islam in the Modern World.

Climate and Environmental Studies

[Program of Concentration in Climate Studies](#)

[Honors Program in Climate Studies](#)

[Minor in Environmental and Sustainability Studies](#)

COURSES OFFERED: [ENVS](#)

Human beings and their societies necessarily interact with and alter the Earth's natural environment. Climate and Environmental Studies (CES) is home to two interdisciplinary undergraduate programs. Both the Climate Studies major (CLIM) and the Environmental and Sustainability Studies (ESS) minor allow the student to examine human interaction with the environment by concentrating on methods in the natural sciences, humanities and social sciences with some experience in the other areas of study as well as environmental engineering and social engagement. The major, in particular, is designed to provide students with a strong foundation in the full range of disciplinary perspectives across the humanities, natural sciences and social sciences.

Program of Concentration (I) in Climate Studies

The major requires 30 credit hours. Some of the courses require prerequisites, and students are responsible for meeting those prerequisites if they choose to satisfy the major with those classes.

1. Climate Studies introduction: ENVS 1101
2. Climate science foundation: EES 2110 or EES 3310
3. Humanities foundation course. One course in the humanities with climate-related focus: ASIA 2308, CSET 3320W, ENGL 3731, HART 3233, HIST 1530, RLST 2473 (formerly 3472)
4. Social sciences foundation course. One course in the social sciences with climate-related focus: ANTH 1111, 2114, 2225; ECON 4050 Topics in Econometrics, when offered as Environmental Econ and Policy; PSCI 3266; SOC 2323 (formerly 3319), 3311, 3317
5. Natural sciences foundation course. One course in the natural sciences with a climate-related focus: EES 1081, 2510, 3333, 4440, 4650, 4680, 4750
6. Methods and practices courses. Two courses from the following: ANTH 2400, 3120, 3125, 3261; BME 2400; CE 3300; CMST 1501, 3800; CSET 2100, 3257; CS 1000; 2204, DHUM 1100, 1200; DS 1000, 1100, 2100, 3100; ECON 1500, 1510, 3035; HART 1740W, 2815; HIST 1515; HODC 3222; MATH 1010, 1100, 1201, 1301, 2810, 2821; PSY 2100, PSY-PC 2120; SOC 2100, 2102 (formerly 3002)
7. Specialization electives: 9 credit hours. See the director of undergraduate studies for recommended concentration clusters. The nine additional credit hours may come from any of the courses listed above for #3, 4, and 5. They may also include the following additional courses: ANTH 2109, 2150, 2220W, 3138, 3202, 3333W, 4154; ASIA 2306, 2309W; BSCI 1511, 2238, 3231, 3233, EES 2150, 2309W, 2580, 3220, 3280, 3330, 4233, 4300, 4480; ECON 2170; ENVE 3610, 4305; ENVS 4101, 4101W; CE 2120, 3300, 4300; CSET 3240W, 3890; ENGL 2330W; 3240; HART 1740W, 2200, 3240W; HODC 3650, HODH 3650; HODI 3270; SOC 1030, 2323 (formerly 3319), 2370 (formerly 3321), 3312, 3314, 3316, 3318; PSCI 3253, 3264W, 3265; UNIV 3315/5315

Program II: Honors Program in Climate Studies

The Honors Track offers majors in Climate Studies the opportunity to pursue intensive work through an independent research project. Students interested in pursuing the Honors Track should contact the director of undergraduate studies for more information. To be considered for the Honors Track in Climate Studies, a student must have a minimum cumulative GPA of 3.4 and a minimum GPA of 3.6 for courses that count toward the major. Students should express interest to the director of undergraduate studies before March 1 of their junior year. Students who are recommended for the program by the director of undergraduate studies will typically begin the program by taking ENVS 4101W during the fall term of the senior year.

The Honors Track requires the following:

1. Successful completion of requirements 1-7 in Program I, for a total of 30 credit hours. Requirements 1, 2, and 6 must be completed prior to beginning the honors courses.

2. Successful completion of at least two semesters of honors coursework (6 credit hours) for the Honors Track. Students take ENVS 4101W or ENVS 4981 (Honors Research) during the first semester of their senior year, when they develop the literature review and research plan. The first semester of honors coursework counts as part of requirement 7 of Program I and can be used to fulfill the requirements for Program I should students not go on to finish honors during the second semester of honors coursework. After completing the first semester of honors coursework, students then take a minimum of 3 and maximum of 6 credit hours of 4981 (Honors Research) during the second semester, which is in addition to the 30 credits required to complete the standard major. Thus students must take a minimum of 6 credit hours of honors coursework and may take up to 9 credit hours.

3. In order to earn honors in Climate Studies, students must successfully complete, defend, and perform requested revisions on the honors thesis before deadlines for graduation. Successful defense of the completed thesis is through an oral presentation and examination by the thesis adviser and a designated faculty reader near the end of the student's final semester. Revisions must be completed and the thesis submitted no later than the last day of undergraduate classes.

4. Students meeting these requirements receive honors or highest honors in Climate Studies, depending on the quality of the thesis and performance on the defense. Successful candidates will be recognized in the commencement program and receive a Vanderbilt diploma that records honors or highest honors in Climate Studies.

Comprehensive Exam

In order to graduate with a climate studies major, students must take a comprehensive exam during their senior year. The exam is not graded, and no grade will appear on the student's transcript. The purpose of the exam is to test the extent to which climate studies majors are retaining foundational aspects of the climate & environmental studies curriculum.

Minor in Environmental and Sustainability Studies

Students who want to minor in environmental and sustainability studies must take a minimum of six courses (18 credit hours total) chosen from the courses listed below; additional relevant courses may be counted with approval of the director of the program. Courses must be distributed as follows: (A) one Natural Science- and Technology-Intensive course; (B) one Humanities course; (C) one Social-Behavioral Sciences and Policy-Intensive course; (D) two additional courses from B and/or C; and (E) a capstone course. No more than two courses may be at the 1000 level. In addition, no more than 3 credit hours may be counted simultaneously toward both the environmental and sustainability studies minor and any other major or minor. Topics courses may count toward the minor with approval of the director.

- A. *Natural Science- and Technology-Intensive Courses:* BSCI 1103, BSCI 2238, BSCI 2238L, BSCI 3233, EES 1030, EES 1070, EES 1080, EES 1081, EES 1111*, EES 1140, EES 1510, EES 1510L, EES 2110, EES 2150, EES 2510, EES 3220, EES 3220W, EES 3310, EES 3333, EES 4300, EES 4650, EES 4680, EES 4750, EES 4760, EES 4820, ENVE 3610, ENVE 4615, ENVE 4700, ES 1115*
- B. *Humanities Courses:* AMER 1111*, AMER 4000*, AMER 4100*, CSET 3320W, ENGL 2316/2316W*, ENGL 2330, ENGL 3720/3720W*, ENGL 3730, ENGL 3731, ENGL 3898/3898W*, GSS (formerly WGS) 2268, GSS (formerly WGS) 2270, HART 2150, HART 2662, HART 3240W, HART 2782, HART 3790, HIST 1520, HIST 1525, HIST 1530, HIST 2108, HIST 2108W, HIST 2139, HIST 2413, HIST 2413W, PHIL 1111*, PHIL 3611, PHIL 3612, RLST 2472, RLST 2473 (formerly 3472), RLST 2921 (formerly 3921)
- C. *Social-Behavioral Sciences and Policy Intensive Courses:* ANTH 1111*, ANTH 2109, ANTH 2114, ANTH 2150, ANTH 2220, ANTH 2220W, ANTH 2225, ANTH 2227, ANTH 3138, ANTH 3261, ANTH 4154, ECON 2170, GSS (formerly WGS) 1111*, HOD 3270, PSCI 3266, PSY 1111*, SOC 1020/1020W*, SOC 1030, SOC 1111*, SOC 2320 (formerly 3315), SOC 2321 (formerly 3312), SOC 2322 (formerly 3313), SOC 2323 (formerly 3319) SOC 2325 (formerly 3316), SOC 2370 (formerly 3321), SOC 3311, SOC 3314, SOC 3317, SOC 3318

- D. Two additional courses from lists B and/or C above.
- E. *Capstone: ENVS 4101 or ENVS 4101W, for minors only*

*Special topic and First-Year Writing Seminar sections require the approval of the director of the environmental and sustainability studies minor to count in the minor.

ADJUNCT PROFESSORS Tim Darrah, Art Sedighi, Jason Slagle

ASSOCIATE PROFESSORS Hiba Baroud, Catie Chang, You Chen, Abhishek Dubey, Dario Englot, Ivelin S. Georgiev, Taylor T. Johnson, Thomas Lasko, Ipek Oguz, Thilo Womesdorf, Zhijun Yin

ASSOCIATE PROFESSOR EMERITUS Jeremy P. Spinrad

ASSOCIATE PROFESSORS OF THE PRACTICE Daniel Arena, Vikash Singh, Robert Tairas, Dana Zhang

ADJUNCT ASSOCIATE PROFESSOR Daniel Balasubramanian

ASSISTANT PROFESSORS Golnaz Arastoopour-Irgens, Thomas Beckers, Matthew Berger, Tyler Derr, Yayun Du, Daniel Fabbri, Yu Huang, Yuanhai Huo, David Hyde, Soheil Kolouri, Vishesh Kumar, Forrest Laine, Kevin Leach, Siru Liu, Meivi Ma, Daniel Moyer, Jack H. Noble, Carlos Oliver, Mika Rubinov, Bryan Ward, Stephanie Wankowicz, Wei-Qi Wei, James Weimer, Jie Ying Wu, Maizie Zhou

RESEARCH ASSISTANT PROFESSOR Hao Li

ASSISTANT PROFESSORS OF THE PRACTICE Gina Bai, Charreau Bell, Josh Bond, Shervin Hajiamini, Md. Kamrul Hasan, Mohammad Kavousi, Yingxiao (Helen) Kong

ADJUNCT ASSISTANT PROFESSORS Csaba Biegl, Ronald Hedgecock, Ayan Mukhopadhyay, Darren Pulsipher, Marcus Quinones-Grueiro, Jose Talusan, Hamilton Turner

LECTURERS Sweta Mahaju, Gayathri Narasimham, Peter Volgeysi

COURSES OFFERED: [CS](#)

The program in computer science blends scientific and engineering principles, theoretical analysis, and actual computing experience to provide undergraduate students with a solid foundation in the discipline. Emphasis is on computing activities of both practical and intellectual interest, and on theoretical studies of efficient algorithms and the limits of computation. Computer facilities are available for class assignments, team projects, and individual studies.

Students are challenged to seek original insights throughout their study. Working in teams, participating in summer internships, supporting student professional organizations, and developing interdisciplinary projects are strongly encouraged.

The computer science major provides an excellent back- ground for medical studies, and the flexibility provided by its many open electives allows students to prepare for medical school while earning a degree in computer science with a normal load in four years. Interested students should discuss their plans with their computer science adviser in the fall of their first year.

In addition to the bachelor of science, the master of science and doctor of philosophy are also awarded in computer science. Computer Science majors in the School of Engineering are encouraged to consider a second major or minor to complement their CS studies. Popular second majors include Mathematics, Economics, HOD and Physics. The second major in Computer Science is accessible to students outside of the School of Engineering. Second major requirements can be found following the engineering specimen curriculum below.

Undergraduate Honors. Honors in Computer Science provides recognition for select undergraduates who have experienced advanced study in computer science. Students who have an overall GPA of 3.5 or better, a GPA of 3.5 or better in computer science classes, and six hours of any combination of undergraduate research (CS 3860, 3861, and 3862) and courses at or above the 6000-level will be granted honors in the computer science program. The diploma designation is Honors in Computer Science.

Curriculum Requirements

The B.S. in computer science requires a minimum of 120 hours, distributed as follows:

1. Mathematics (17-19 hours). Required components:
 - a. Calculus/Linear algebra (14-16 hours). A sequence selected from the following:
 - i. MATH 1300, 1301, 2300, and one of 2410 or 2600, or
 - ii. MATH 1300, 1301, 2500, 2501
 - b. Statistics/Probability (3 hours): MATH 2810, 2820, or 3640.
2. Science (12 hours). To be selected from the following list and include at least one laboratory course: BSCI 1100, 1100L, 1510, 1510L, 1511, 1511L, 2218, 2219; CHEM 1601, 1601L, 1602, 1602L; EES 1510, 1510L; MSE 1500, 1500L; PHYS 1601, 1601L, 1602, 1602L. Advanced Science Courses may be substituted by special permission. Recommended: CHEM 1601, 1601L; PHYS 1601, 1602.
3. Introduction to Engineering (3 hours): ES 1401, 1402, 1403.
4. Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering.
5. Computer Science Core (25 hours).
 - Software/Problem Solving: CS 1101 or 1104, and CS 2201 or ECE 2201, CS 3251 or ECE 3251, and CS 3270.
 - Hardware/Systems: CS or ECE 2281, CS or ECE 2281L, CS 3281.
 - Foundations: CS 2212, 3250.
6. Computer Science Depth (15 hours). To be selected from computer science courses numbered 3000 or higher

(except CS 3262); ECE 3258, 3265, 3274, 3452, 4260, 4262, 4277, 4278, 4285, 4353, 4354, 4375, 4467, 4475, 4484 and no more than two from MATH 3320, 3620, 4600, 4620. A maximum of 6 hours may come from CS 3860, 3861.

7. Computer Science Project (3 hours). To be selected from CS 3862, 3892, 4239, 4249, 4269, 4279, 4287, 4289, 4359.
8. Computer Science Seminar (1 hour). CS 4959.
9. Technical Electives (6 hours). To be selected from courses numbered 2000 or higher in BME, CHBE, CE, CS, DF, DS, ECE, ENGM, ENVE, ES, ME, MSE, NANO, and SC (except 2860 in any program, ENGM 2440, ENGM 4800, ES 2700, ES 3884, and CS courses numbered below 3000); or courses numbered 2000 or higher in the College of Arts and Science listed in the mathematics and natural science (MNS) AXLE distribution requirements.
10. Open Electives (18–20 hours).
11. Computers and Ethics (3 hours) CS 1151. May be used to satisfy three hours from the Liberal Arts Core (#4) or Open Electives (#10). May not be taken on a pass/fail grading basis by CS majors or minors.
12. Writing Component (3 hours). At least one “W”-designated course or 1111 course in the English Language must be included from the Liberal Arts Core (#4), Technical Electives (#9), or Open Electives (#10).

Undergraduates in computer science may apply the pass/fail option only to courses taken as open electives, technical electives, or part of the liberal arts core, subject to the school requirements for pass/fail.

Note: Certain mathematics and physics courses cannot be credited to a School of Engineering degree. Please see the [Degree Programs in Engineering/Mathematics and Physics](#) section of the catalog for more information.

Specimen Curriculum for Computer Science

Semester hours

FIRST YEAR

		FALL	SPRING
CHEM 1601, 1601L	General Chemistry and Laboratory	4	–
PHYS 1601, 1601L	General Physics I and Laboratory	–	4
MATH 1300	Accelerated Single-Variable Calculus I	4	–
MATH 1301	Accelerated Single-Variable Calculus II	–	4

Second Major in Computer Science for Non-Engineering Students

The second major in computer science for students enrolled outside the School of Engineering requires 40 hours comprising items 5 and 7 of the curriculum requirements listed above as well as 12 hours of course work as

described in item 6. The program name on the transcript is "Computer Science (Secondary Major)".

Courses taken toward the second major may not be taken pass/fail.

Communication of Science and Technology

[Program of Concentration in Communication of Science and Technology](#)

[Honors Program](#)

[Minor in Communication of Science and Technology](#)

INTERIM DIRECTOR David Wright

DIRECTOR OF UNDERGRADUATE STUDIES Michelle (Shellie) Richards

Professor, Emeriti: David Weintraub

Professor: Bonnie Dow

Assistant Professors: Karan Jani, Alexander Morales

Assistant Professor of the Practice: Paul Durst

Senior Lecturers: Dusan Danilovic, Ashleigh Maxcey

Writers in Residence: Amanda Little, Stephen K. Ornes

COURSES OFFERED: [CSET](#)

The Program in Communication of Science and Technology (CSET) sits at the intersection of the sciences and the humanities, and it builds on the vast amount of effort at Vanderbilt devoted to interdisciplinary work that spans the natural sciences, engineering, the social sciences, and the humanities. CSET draws on both the scientific communities (natural sciences, social sciences, engineering, medicine) and the creative communities (public speaking, writing, digital media production) across multiple colleges at Vanderbilt.

CSET is designed for students who have an interest in science and technology and also are interested in communicating science and technology to both peer-professional audiences and to the larger world. CSET is ideal as a second major for students pursuing a first major in one of the natural sciences, any of several of the social sciences, engineering, the Science, Medicine and Technology concentration in History, and the Creative Writing track in English. In the twenty-first century scientists must be able to communicate their work and their ideas to their professional peers, to nonspecialists who review grant proposals, and to lay audiences who ultimately fund, support, and benefit from the discoveries made in laboratories around the world. In return, the scientific community needs support from professional writers, journalists, technical writing specialists, public speakers, film and video writers and producers, and bloggers in communicating modern science, technology, and medicine to lay audiences.

Program of Concentration in Communication of Science and Technology

Track 1: Standard track [at least 42 credit hours]

1. Core [9 credit hours]
 - a. CSET 1500: Communicating Science [3]
 - b. CSET 2100: Science Communication Tools and Techniques [3]
 - c. CSET 2500: Science for Everyone
2. Telling Scientific Stories: [6 credit hours, of which at least credit hours must be from category a.]

- a. Writing Skills
 - i. blogging (CSET 3215W, ENGL 3215, ENGL 3215W)
 - ii. technical writing (CSET 3090, 3200W, BME 4951, CE 4950, ChBE 4951W, CHEM 3135W, ENGM 2210, ME 4951, ES 2100W, PSCI 2256, 3266)
 - iii. investigative journalism (CSET 3320W, ENGL 3896, 3896W)
 - iv. science writing (ANTH 3150W, CSET 3240W, 3241W, 3281W, 3320W, ENVS 4101W, ENGL 3440W, 3720, 3720W, 3730, 3730W)
 - v. climate studies writing (ENVS 4101W, SOC 3318)
 - vi. non-fiction writing (ENGL 3210, 3220)
 - vii. fiction writing (ENGL 3210, 3220)
 - viii. science fiction writing (ENGL 3728, 3728W, RUSS 2273W)
 - ix. script writing (CMA 2500W, 2510W, 2600W, THTR 2311W, 3311)
 - x. history of science writing (All three-credit-hour courses approved for Program G. Science, Medicine, and Technology in History)
 - xi. science-related philosophy (PHIL 3601, 3604, 3608, 3611, 3612, 3616, 3657)
 - xii. science-related religious studies (RLST 2473 [formerly 3472], 2811, 2921 [formerly 3921], 3941)
 - xiii. HONS 1830W and 1850W courses
 - xiv. Other: CMST 3250W, EES 2309W
 - xv. CSET 3891 (Special topics in Writing Skills)
- b. Science and Narrative
 - i. virtual reality (CSET 3257, CS 4249, CMA 1820W, 3257),
 - ii. podcasting (CSET 2200),
 - iii. telling stories with data (CSET 3410),
 - iv. film making (CMA 1500, 2240, 2250, 2260, 2270, 3891),
 - v. graphic design & digital animation (ARTS 1505),
 - vi. interviewing (CSET 2300),
 - vii. CSET 3892 (Special topics in Science and Narrative).

3. Bridging the Sciences and Humanities [9 credit hours]

Any three courses from the approved list, found below, of which at least one course must be from the CSET offerings. These courses bridge the sciences and the humanities and include but are not limited to courses covering the history of science, the history of medicine, climate studies, MHS, the philosophy of science, and ethics and science.

4. Natural Science and/or Engineering Depth [15 credit hours]

A combination of any five three-credit-hour courses that are identified as MNS courses (if in A&S) or School of Engineering courses. Students may count any one statistics course toward this requirement from the following list: BME 2400, 3400, BSCI 3270, CE 3300, ChBE 3900W, ECON 1500, 1501, MATH 1011, 2810, 2820, PSY 2100, PSY-PC 2110, 2120, SOC 2100. Students may count any one three-credit-hour Data Science course toward this requirement. Students may count the three one-credit hour courses ES 1401, 1402, and 1403 as equivalent to a single three-credit hour course if they earn credit for all three courses. Except for the listed statistics courses, MATH and PHIL courses identified as MNS for purposes of AXLE do not count toward this requirement. CSET 2500 counts toward the CSET Core and not this requirement. One-credit laboratory classes, alone or in combination, do not count for this requirement.

5. Electives [3 credit hours] chosen from any or any combination of:

- a. Directed Study (CSET 3840)
- b. Project in Science Writing and Communicating (CSET 3841)
- c. Internships (CSET 3880, 3881)
- d. Research (research hours can include appropriate credit hours from another department or program; these hours must be approved by the student's CSET adviser)
- e. Honors in CSET (CSET 4998)
- f. Qualifying Telling Scientific Stories or Bridging the Sciences and Humanities or Natural Science and/or Engineering Depth courses
- g. One additional 2100-level or higher W course from any department or program in A&S.

Additional notes:

- Students in the College of Arts and Science must count at least 24 credit hours for CSET that are not also used to fulfill any program requirements for any other major or minor in the College of Arts and Science.
- A course can only be used once to fulfill a single CSET requirement, even if it is eligible under more than one CSET requirement (e.g. ENGM 2210 can count for requirement #4 or #7, but not both).

- A student may count no more than 3 total credit hours toward any and all requirements of the CSET major from courses in the following list: BME 4951, ChBE 4951W, CE 4950, CE 4951, ENGM 2210, and ES 2100W.

Track 2. CSET plus an approved STEM major* or minor**

At least 27 credit hours, with verification of 15 additional hours of Natural Sciences or Engineering classes.

Any student with an approved STEM major or registered in the School of Engineering must complete requirements 1, 2, 3, and 5 of the Standard Track.

Requirement 4 of the Standard Track will be waived by the URO upon verification of completion of 15 additional credit hours of courses that fulfill this requirement and also count toward the student's natural science major or degree program in the School of Engineering.

* Approved STEM majors include Anthropology; Biochemistry & Chemical Biology; Biological Sciences; Chemistry; Earth & Environmental Sciences; Ecology, Evolution & Organismal Biology; Environmental Sociology; Molecular & Cellular Biology; Neuroscience; Physics; Psychology; Cognitive Studies (Peabody College); or any major offered by the School of Engineering. Additional natural or social science majors may be added at any time, upon recommendation of the CSET Steering Committee.

** Approved STEM minors include Anthropology; Astronomy; Biological Sciences; Chemistry; Earth & Environmental Sciences; Environmental Sociology; Neuroscience; Physics; Psychology; Cognitive Studies (Peabody College); Engineering Management, Materials Science and Engineering, Computer Science, Computer Engineering, Digital Fabrication, Electrical and Computer Engineering, Environmental Engineering, Energy and Environmental Systems, Nanoscience and Nanotechnology, Scientific Computing.

Track 3: CSET plus Program G History [at least 27 credit hours]

Any student with a verified major in the history of science (Program G History) must complete requirements 1, 4, and 5 of the Standard Track.

Requirements 2 and 3 of the Standard Track will be waived by the URO upon verification of completion of 15 additional credit hours of courses that fulfill these requirements and that also count toward the student's Program G History major.

Track 4: CSET plus MHS [at least 30 credit hours]

Any student with a major in MHS must complete requirements 1, 2, and 4 of the Standard Track.

Requirements 3 and 5 of the Standard Track will be waived by the URO upon verification of completion of 12 additional credit hours of courses that fulfill these requirements and that also count toward the student's MHS major.

Track 5: CSET plus an approved major in the Humanities or Social Sciences^ [at least 33 credit hours]

Any student with an approved major in the humanities or social sciences must complete requirements 1, 3, and 4 of the Standard Track.

Requirements 2 and 5 of the Standard Track will be waived by the URO upon verification of completion of 9 additional credit hours of courses that fulfill these requirements and that also count toward the student's approved humanities or social science major.

^Approved humanities and social science majors include Cinema and Media Arts, Climate Studies, English, History, Philosophy, Political Science, and Religious Studies. Additional humanities and social science majors offered and approved by the faculty in the College of Arts & Science may be added at any time, upon recommendation of the CSET Steering Committee.

Approved Courses:

List of Courses approved for the Bridging the Sciences and Humanities requirement:

These courses bridge the sciences and the humanities and include but are not limited to courses covering the history of science, the history of medicine, climate studies, MHS, the philosophy of science, and ethics and science.

- ANTH 2109, Food Politics in America; 2113W, Food, Identity, and Culture; 2114, Above and Below the Surface: The Caribbean between Climate Change and Tourism; 2160 or 2160W, Creating Community; 2220W, Human Landscapes; 2242 or 2242W, The Archaeology of Ancient Maya Civilization; 2301 (formerly 3347), Bioethics in Anthropology; 3141, Anthropology of Healing; 3143, Medical Anthropology; 3150W, Cognitive Anthropology; 3243 or 3243W, Ancient Maya Gods and Rulers; 3343, Biology and Culture of Race; 3345, Genetics in Society; 3622W, Classic Maya Language and Hieroglyphs; 4373, Health and Disease in Ancient Populations.
- ASIA 2630, Chinese Medicine.
- ASTR 2130, The Trial of Galileo and Its Background.
- CLAS 3030, Death, Disease, and Health in the Ancient World; 3730: The Roman to Medieval Near East: Caesarea Excavations, Israel.
- CMST 2800, Rhetoric and Civic Life; 2850, Science, Rhetoric, and Public Controversy; 3250W, Ethics in Science and Technology Communication; 3730 or 3730W, Communication, Culture, and Consciousness; 3740, Rhetoric of Medicine and Health; 3750, Rhetoric of the Body.
- CS 1151, Computers and Ethics.
- CSET 2130, Trial of Galileo and its Background; 2850, Science, Rhetoric, and Public Controversy; 3090, Making Science Policy; 3240W, Pop Science: The Art and Impact of Popular Science Writing; 3241W, Ethical Questions in Communication at First Contact; 3250W, Ethics in Science and Technology Communication; 3261, Immigrant Scientists; 3281W, Scientists and the State; 3320W, Environmental Journalism; 3410, Telling Stories with Data; 3983: Special Topics in Bridging the Sciences and Humanities.
- EES 2114: Above and Below the Surface: The Caribbean between Climate Change and Tourism; 2150, Science, Risk, and Policy; 2309W, Mountains to the Sea: Perspectives on Society, Politics, and the Environment, 3333: Climate and Society: Drowning Cities.
- ECON 2170, Environmental Economics; 2350, Health Care Policy.
- ENGL 3720 or 3720W, Science Fiction; 3730 or 3730W, Literature and the Environment; 3896 or 3896W, Special Topics in Investigative Writing in America.
- ENVS: all three-credit-hour courses.
- GSS 2240, Introduction to Women's Health; 2268, Gender, Race, Justice, and the Environment; 2270, Ecofeminism: Theory, Politics, and Action.
- HART 2815, Digital Heritage: Methods and Practice; 3233, Climate and Society: Drowning Cities.
- HUM 1610: AI and Society
- All three-credit-hour courses approved for Program G. Science, Medicine, and Technology in History,
- MATH 3000, History of Mathematics.
- MHS: All 1900-level or higher, three-credit-hour courses.
- PHIL 3601, Metaphysics; 3604, Gender and Sexuality; 3605, Contemporary Ethical Theory; 3606, Moral Problems; 3606W, Moral Problems; 3608, Ethics and Medicine; 3611, Environmental Philosophy; 3612, Ethics and Animals; 3616, Philosophy and the Natural Sciences.
- PSCI 2255, Public Policy Problems; 2256, Politics of Public Policy; 3253, Ethics and Public Policy; 3266, Climate Change Justice; 3268, American Health Policy.
- PSY 3605, Industrial and Organizational Psychology; 3635, Health Psychology; 3705, Human Sexuality.
- RLST 2473 (formerly 3472), Religion and Climate Change; 2811, Natural Science and the Religious Life; 2921 (formerly 3921), Ethics and Ecology; 3941, Religion, Science, and Evolution.
- RUSS 2273, Russian Science Fiction; RUSS 2273W, Russian Science Fiction.

- SCED: All three-credit-hour courses.
- PPS: All three-credit-hour courses approved for the Environmental, Resource, and Energy Policy Concentration in Public Policy Studies.
- PPS: All three-credit-hour courses approved for the Science, Technology, and Innovation Policy in Public Policy Studies.
- SOC: All three-credit-hour courses approved for the Environmental Sociology Core in Sociology.

Honors Program

Honors in CSET is a selective program of individual undergraduate work, supervised by a faculty adviser. Honors candidates propose, construct, and complete a project (written, visual, aural, digital, or a combination) that demonstrates the ability to communicate science, in depth, to a nonexpert audience.

Requirements for Admission to Honors in CSET

To be admitted to the Honors Program in CSET, a student must

- be a CSET major;
- have completed at least 21 credit hours of work that counts toward the CSET major;
- have a cumulative GPA of at least 3.0;
- have a GPA of at least 3.40 in all courses that count toward the CSET major.
- secure a faculty adviser and submit a proposal of the planned Honors project to the Director.

Requirements for Completion of Honors in CSET

To earn Honors or Highest Honors in CSET, a student must

- complete the requirements of the CSET major;
- complete at least 6 credit hours of work in any combination of CSET 3840, 3841, and 4998, of which at least 3 credit hours must be in CSET 4998;
- present a written and oral defense of the CSET 4998 project before a faculty examination committee;
- have a cumulative GPA of at least 3.0;
- have a GPA of at least 3.40 in all courses that count toward the CSET major.

Course of Study for Honors in CSET

Interested students may apply in the fall or spring of their junior year or the fall of the senior year. The application includes a one- to two-page proposal of the planned Honors project and the signature of the faculty member who will be the project adviser. The faculty adviser does not need to be a member of the CSET faculty.

An Honors candidate must pass an oral examination of the Honors project no later than the final week of classes in the student's final semester. The examination committee is composed of the Honors project supervisor and two additional faculty members; at least one member of the examination committee must be a faculty member affiliated with the CSET program. The oral examination is public and should take approximately one hour, including time for questions from members of the committee. The faculty examination committee will determine by majority vote whether the student has earned Honors and whether said student should receive Honors or, for exceptional achievement, Highest Honors. Highest Honors is reserved for students whose projects are of dissemination quality and whose oral examinations are completed at the highest level.

Minor in Communication of Science and Technology

The minor in Communication of Science and Technology consists of six courses, totaling a minimum of 18 credit hours, distributed as follows:

1. CSET Core (requirement #1 of the Standard Track);
2. One Telling Scientific Stories course (as defined in requirement #2 of the Standard Track);
3. One Bridging the Sciences and Humanities course (as defined in requirement #3 of the Standard Track);
4. One three-credit-hour natural science course (as defined in requirement #4 of the Standard Track)

Additional notes for the minor in CSET:

- Students in the College of Arts and Science must count at least 15 credit hours for the minor in CSET that are not also used to fulfill any program requirements for any other major or minor in the College of Arts and

Science.

- A course can be used only once to fulfill a single CSET requirement, even if it is eligible under more than one CSET requirement.
- Requirement #4 cannot be fulfilled with an engineering course.

Communication Studies

[Program of Concentration in Communication Studies](#)

[Minor in Communication Studies](#)

CHAIR Jeffrey A. Bennett

DIRECTOR OF UNDERGRADUATE STUDIES Isaac West

Professor, Emeriti: Kassian Kovalcheck

Professors: Jeffrey Bennett, Bonnie Dow, John Sloop, Paul Stob

Associate Professors: Claire King, Isaac West

Assistant Professors: Sasha Crawford-Holland, Bohyeong Kim

Principal Senior Lecturers: Mary Sandoz, Courtney Travers

Senior Lecturers: Neil Butt, John Koch, Dustin Wood

COURSES OFFERED: [CMST](#)

The Department of Communication Studies offers a major and a minor that include courses in the following areas: historical and theoretical foundations of communication study, argumentation and oral advocacy, the historical and critical study of public discourse and deliberation, and the analysis of media and culture.

The Vanderbilt University Debate Team participates in international, national, and regional competitions.

Program of Concentration in Communication Studies

Communication studies explores purposive human communication. The Department of Communication Studies is particularly devoted to an understanding of public discourse in the broadest sense, with an emphasis on the role of persuasion in civil society. To that end the subjects of study range from political discourse to commercial advertisement, from the history of rhetoric to the impact of mass media, from criticism of public oratory to issues of freedom of speech. The department offers courses involving practice, criticism, and theoretical analysis.

Education in these areas has traditionally produced citizen advocates who enter public life in business, law, journalism, and communication.

A major in communication studies requires 30 credit hours of course work. The requirements and options for the major are as follows:

1. Two courses (6 credit hours) in Foundations: 1002 and 1500.
2. One course (3 credit hours) in Argumentation and Advocacy: 2100, 2110, 2120.
3. Three courses (9 credit hours) in Public Discourse and Deliberation: 2750, 2800, 2850, 3000, 3100, 3110, 3120, 3140, 3150, 3200, 3600, 3700; one of which must be 2800, 3000, or 3600.
4. Three courses (9 credit hours) in Culture, Theory, and Critique: 2432, 2950, 3620, 3620W, 3710, 3720, 3730, 3730W, 3740, 3750, 3760, 3800; one of which must be 2950, 3620/3620W, or 3730/3730W.
5. One elective course (3 credit hours), selected from the courses listed in requirements 2 through 4, which has not been counted toward those requirements.

1111, 3840, 3850, 3890, 4940, and 4941 may be counted toward the major in the category corresponding to the

topic of the course, with the permission of the director of undergraduate studies.

Minor in Communication Studies

A minor in communication studies requires completion of 18 credit hours from the following requirements and options:

1. Two courses (6 credit hours) in Foundations: 1002 and 1500.
2. One course (3 credit hours) in Argumentation and Advocacy: 2100, 2110, 2120.
3. Three courses (9 credit hours) from requirements 3 and 4 in the major.

1111, 3840, 3850, 3890, 4940, and 4941 may not be counted toward the minor.

ASSISTANT PROFESSOR Victoria Hensley

SENIOR LECTURERS Alexander Jacobs, Mario Rewers

COURSES OFFERED: [CAL](#)

The Program in Culture, Advocacy, and Leadership prepares students for careers in civic engagement and public leadership, giving them the knowledge, values, and skills they need to shape people, communities, and society for the better.

- Culture signals our existing emphasis on American histories and cultures in the broadest and hemispheric senses of the terms-not just relative to the U.S. but to the Caribbean, the borderlands between nations, the Americas writ large, and more.
- Advocacy signals our existing emphasis on public-facing, community-engaged scholarship and on helping students find their voice and values for changing the world.
- Leadership signals our interest in giving students the ideas, experiences, and skills they can draw upon to bring people together in their engagement efforts.

Program of Concentration in Culture, Advocacy, & Leadership (30 credit hours)

CORE Part I (4 courses)

- CAL 1002: Fundamentals of Culture, Advocacy, & Leadership
- CAL 1800: Speaking, Leading, Engaging
- CAL 2300: Responsible Advocacy in a Complicated World
- CAL 2800: Global Perspectives on American Cultures

Area Focus (4 courses)

- Four courses inside or outside of CAL relevant to the student's interests, passions, career goals, etc. The courses will be chosen in conjunction with the student's advisor and in anticipation of CORE Part II.

CORE Part II (2 courses)

- CAL 4000: Experience & Engagement (Practicum/Internship)
This course requires students to undertake an experiential project in conjunction with a group or community around a particular issue, problem, or idea. (Examples include interning with Thistle Farms, creating a documentary of life after prison, producing a podcast about the effects of climate change in Middle Tennessee, volunteering with a veterans organization, volunteering with an arts organization, assisting community groups in North Nashville around issues of justice and social change, and more.)
- CAL 4500: American Futures
This course will bring students together after their experiential project to discuss their findings and lessons, to revise their project for a general audience, and to present their work in a public-facing symposium at the end of the semester.

Minor in Culture, Advocacy, & Leadership (15 credit hours)

CORE Part I (4 courses)

- CAL 1002: Fundamentals of Culture, Advocacy, & Leadership
- CAL 1800: Speaking, Leading, Creating
- CAL 2300: Responsible Advocacy in a Complicated World
- CAL 2800: Global Perspectives on American Cultures

Area Focus (1 course)

- One course inside or outside of CAL relevant to the student's interests, passions, career goals, etc.

Minor in Sports and Society (15 credit hours)

The minor in Sports and Society is an interdisciplinary minor consisting of five courses, totaling a minimum of 15 credit hours, distributed as follows:

1. Culture, Advocacy and Leadership 2100 or ANTH 2120 Sports, Culture and Society (3 hours)
2. Four other approved courses from the following list:

- ECON 2180 - Sports Economics
- CLAS 3140 - Sport & Competition in the Ancient Mediterranean
- CMST 2432 or GER 2432 - Soccer: Media, Art, and Society
- CMST 2750 - Communication, Sports, and Society
- HIST 1469 - Fútbol-Soccer: Latinx, Gender, and Belonging
- MUSL 1340 - Music, Sports, and Society
- PSY 3560 - Sports Psychology
- PHIL 2661 - Philosophy of Sport
- SOC 2230/2230W (formerly 3224) - Sociology Through Baseball

Some of the courses require prerequisites, and students are responsible for meeting those prerequisites if they choose to satisfy the major with those classes. Other courses, as appropriate, may be eligible.

A student who is doing a 3 credit-hour internship with a sports organization or an immersion project dealing with Sports and Society broadly or an Independent Study dealing with Sports and Society broadly can petition to count 3 hours toward the minor in place of one of the courses above. A student may utilize one 3-hour internship readings/research course or 3 hours of independent study toward the minor: there may only be one replacement for a course from category two above. The replacement should be approved in advance by the Director of the Sports and Society. Students are encouraged to pursue internships and projects that will bolster involvement with public-facing work and research (e.g., podcasts, work with local sports franchises).

Honors Program

The Honors Program in Culture, Advocacy, and Leadership offers superior students a more intensive concentration

within their major field. The program requires:

1. Completion of the requirements of the major.
2. A 3.3 cumulative grade point average.
3. A 3.5 cumulative grade point average in American Studies.
4. 6 credit hours in the fall and spring semesters of the senior year in CAL 4998/4999 devoted to a major research project leading to an honors thesis. 4999 counts as the Senior Project (4960), and 4998 counts as elective credit for the requirements of the major.
5. An Honors thesis to be completed by the spring of the senior year.
6. Successful completion of an oral examination on the topic of the thesis.

Exceptional achievement on the thesis will earn highest honors. Applications are accepted in March of the junior year. Additional information is available from the director of the Culture, Advocacy, and Leadership program.

Approved List of Courses

INTERDISCIPLINARY PROGRAMS

AFRICAN AMERICAN AND DIASPORA STUDIES: 1010, Introduction to African American and Diaspora Studies; 1016, Race Matters; 3104W, Soul Food as Text in Text: An Examination of African American Foodways; 3206, Mystery, Murder, and Mayhem in Black Detective Fiction; 3214, Black Masculinity: Social Imagery and Public Policy; 3258, Black Issues in Education.

AMERICAN STUDIES: 1111, First-Year Writing Seminar; 2100, Sport, Culture, and Society; 2500, American Cultures; 2700, Religion, Politics, and American Culture; 3851, Independent Readings and Research; 3852, Independent Readings and Research; 3881, Internship Readings and Research; 3890, Topics in American Studies; 4100, Undergraduate Seminar in American Studies; 4998, Senior Honors Research; 4999, Senior Honors Thesis.

CINEMA AND MEDIA ARTS: 1600, Introduction to Film and Media Studies.

GENDER AND SEXUALITY STUDIES: 2243, Sociologies of Men and Masculinity; 2248, Humor and Cultural Critique in Fannie Flagg's Novels; 2249, Women and Humor in the Age of Television; 2259/2259W, Reading and Writing Lives; 2268, Gender, Race, Justice, and the Environment; 2618 (formerly 3250/3250W), Contemporary Women's Movements; 3246W, Women's Rights, Women's Wrongs; 3271, Feminist Legal Theory; 3891, Special Topics: Topics in Gender, Culture, and Representation; 3893, Selected Topics (when an American topic is offered).

JEWISH STUDIES: 2280/2280W, Jewish Humor; 2400, American Jewish Life; 2420W, American Jewish Music; 2560, Social Movements in Modern Jewish Life; 3830, Contemporary Jewish Issues.

LATIN AMERICAN STUDIES: 2601, Latin America, Latinos, and the United States.

MEDICINE, HEALTH, AND SOCIETY: 1930, Fundamental Issues in Medicine, Health, and Society; 3020, U.S. Public Health Ethics and Policy; 3150, Death and Dying in America; 3890, Special Topics.

ELECTIVES

ANTHROPOLOGY: 2105, Race in the Americas.

ART: 1099, Maymester Contemporary Art Blitz (when U.S. city/art).

CLASSICAL STUDIES: 3000, Classical Tradition in America.

COMMUNICATION STUDIES: 2800, Rhetoric and Civic Life; 2950, Rhetoric of Mass Media; 3000, Rhetoric of the American Experience, 1640– 1865; 3001, Rhetoric of the American Experience, 1865–1945; 3002, Rhetoric of the American Experience, 1945–Present; 3100, Rhetoric of Social Movements; 3110, Women, Rhetoric, and Social Change; 3700, Politics and Mass Media; 3720, Communicating Gender; 3890, Selected Topics in Communication Studies; 4940–4941, Seminars in Selected Topics.

ECONOMICS: 2100, Labor Economics; 2150, Economic History of the United States; 2890, Special Topics; 3100, Wages, Employment, and Labor Markets; 3150, Topics in the Economic History of the U.S.

ENGLISH: 2316, 2316W, Representative American Writers; 2320, Southern Literature; 3620, Nineteenth-Century American Literature; 3622, Nineteenth-Century American Women Writers; 3624W, Literature of the American Civil War; 3640, Modern British and American Poetry: Yeats to Auden; 3642, Film and Modernism; 3644, Jewish American Literature; 3644–3645, Twentieth-Century American Novel; 3646, Poetry since World War II; 3650, 3650W, Ethnic American Literature; 3654, 3654W, African American Literature; 3658, Latino-American Literature; 3662, 3662W, Asian American Literature; 3674, Caribbean Literature; 3680–3681, Twentieth-Century Drama; 3692, Desire in America: Literature, Cinema, and History; 3694, America on Film: Art and Ideology; 3695, America on Film: Performance and Culture; 3710–3711, Literature and Intellectual History (when an American topic is offered); 3746, Workshop in English and History; 3890, 3890W, Movements in Literature (when an American topic is offered); 3892, 3892W, Problems in Literature (when an American topic is offered); 3894, 3894W, Major Figures in Literature; 3896, Special Topics in Investigative Writing in America; 3898, 3898W, Special Topics in English and American Literature (when an American topic is offered); 3899, Special Topics in Film.

HISTORY: 1390, America to 1776: Discovery to Revolution; 1400, U.S. 1776–1877: Revolution to Civil War and Reconstruction; 1410, U.S. 1877– 1945: Reconstruction through World War II; 1420, U.S. Post-1945: Cold War to the Present; 1427W, America in the Seventies; 1430W, American Indians and the Environment; 1440, African American History since 1877; 1660, American Enterprise; 1690, Sea Power in History; 1730, The U.S. and

the Cold War; 1740, The U.S. and the Vietnam War; 2535, Latin America and the United States; 2580, American Indian History before 1850; 2590, American Indian History since 1850; 2610, The Founding Generation; 2620, The Old South; 2630, The New South; 2640, Appalachia; 2662, American Slavery; 2690, The Civil Rights Movement; 2691, Barack Obama: Man and President; 2700, The U.S. and the World; 2710, The U.S. as a World Power; 2721, Globalizing American History, 1877–1929; 2730, American Masculinities; 2749, American Intellectual History to 1865; 2750, American Intellectual History since 1865; 2800, Modern Medicine; 2810, Women, Health, and Sexuality; 2840, Sexuality and Gender in the Western Tradition since 1700; 3010, Pornography and Prostitution in History; 3040, Health and the African American Experience; 3140, History of New Orleans; 3170, The Federalist Papers; 3746, Workshop in English and History; 3890, Selected Topics in History (when an American topic is offered); 4960, Majors Seminar (when an American topic is offered).

HISTORY OF ART AND ARCHITECTURE: 2660, American Art to 1865; 2720, Modern Architecture; 2760, Early American Modernism, 1865– 1945; 2765, Art since 1945; 3735, History of Photography; 4960, Advanced Seminar (when an American topic is offered).

MUSIC LITERATURE AND HISTORY: 1600, American Popular Music; 1610, Musical Theatre in America: A Cultural History; 1620, Survey of Jazz; 1630, The Blues; 1640, Country Music; 1650, History of Rock Music; 2150, Music, Identity, and Diversity; 2320, Exploring the Film Soundtrack; 2600, American Music; 2610, Music of the South.

OTHER MUSIC COURSES: 1300, Music and the Fall of Segregation.

PHILOSOPHY: 2104, Nineteenth-Century Philosophy; 2110, Contemporary Philosophy; 3008, American Philosophy; 3603, Philosophy of Education; 3623, Modern Philosophies of Law.

POLITICAL SCIENCE: 1100, Introduction to American Government and Politics; 1150, U.S. Elections; 2222, American Foreign Policy; 2240, Political Parties; 2243, Political Campaigns and the Electoral Process; 2245, The American Presidency; 2255, Public Policy Problems; 2262, The Judicial Process; 2263, Religion and Politics; 2265, Constitutional Law: Powers and Structures of Government; 2266, Constitutional Law: Civil Liberties and Rights; 3241, American Public Opinion and Voting Behavior; 3244, The Legislative Process; 3247, American Political Culture; 3249, American Political Thought; 3250, Group Conflict and Cooperation in U.S. Politics; 3260, Introduction to American Law; 3272W, The War in Iraq, 2003–2011; 3891, Topics in Contemporary Politics; 3893, Selected Topics of American Government; 3897, Selected Topics (when an American topic is offered).

RELIGIOUS STUDIES: 1100, Introduction to African American Religious Traditions; 1190W, Introduction to Southern Religion and Culture; 3119, Martin Luther King, Jr., and the Social Roles of Religion; 3142, Slave Thought and Culture in the American South; 3304W, Evangelical Protestantism and the Culture Wars.

COURSES OFFERED: [EES](#)

The Earth and environmental sciences are aimed at understanding Earth's governing processes—how they operate and interact—as well as interpreting Earth's dynamic history—its age and origin as recorded in rocks and the landscape—and finally, at understanding how geological processes affect modern environmental and ecological systems, including humans. Among the natural sciences, ours is the quintessential interdisciplinary science, providing vital perspective on how Earth's physical and geochemical template simultaneously sustains and threatens life, and influences human interactions with Earth.

Students majoring in EES take a foundational set of science courses with lab, computational, and field components, then design an academic plan that allows them to develop expertise in an area of interest within EES. The comparatively small size of the faculty and student body allows many opportunities for faculty-student interaction. Students use the major as preparation for graduate study, for careers in environmental and climate science, geology, and natural resource and energy management, and for related fields such as land use planning, teaching, conservation, business, law, or engineering.

Research programs in the department, which in many cases involve students, employ field, analytical, and experimental methods. A wide variety of Earth processes are investigated, ranging from the migration of fluids and generation of magmas in the Earth's crust, to the movement of mass and energy across land, ocean, and atmosphere, to the evolution of life and ecosystems, to the impacts of humans on the environment. Study areas, in addition to Tennessee, include the southwestern United States, the Pacific northwest, Florida, Colorado, Antarctica, South Asia, Brazil, Peru, Italy, Greenland, Namibia, the Bahamas, Australia, and New Zealand.

Program of Concentration in Earth and Environmental Sciences

The Department of Earth and Environmental Sciences offers both B.A. and B.S. degree options to support the preparation of future scientists and students aimed at science-related pursuits. Both degree options provide a solid grounding in the integrated Earth and environmental sciences while allowing flexibility in the particular focus and support communication, quantitative, and computational skills.

B.A. DEGREE OPTION

The B.A. degree in EES is designed for students who aim to build a strong, integrated earth and environmental science foundation to inform discussions and work in policy, education, law, advocacy, community engagement, conservation, finance, etc. but do not aim to work as practicing scientists. This pathway pairs well with programs in Climate and Environmental Studies, Environmental Sociology, Communication of Science and Technology, Secondary Education, and other non-STEM majors that, together, will prepare students for the interdisciplinary nature of addressing the Earth and environmental challenges of our future.

The B.A. degree option is organized into six parts, beginning with two of three introductory courses that serve as entry points. The second part involves a core course that provides all EES majors with a common background in ways of thinking in Earth and environmental sciences. This course must be completed before students may enroll in more advanced EES courses. As Earth and Environmental sciences employ techniques and foundational knowledge from all other STEM fields, part 3 of the major requires to build skills in supporting STEM fields through three classes: one in scientific computing, one in statistics, and one additional supporting science elective. The fourth part of the

major defines an EES focus for the student through both experiential and seminar-style EES courses. The fifth component addresses science communication skills with one course. The sixth component of the major is a 1 credit hour seminar that serves as a capstone for senior students. In addition to the major, qualified students may elect to participate in the Honors Program designed for highly motivated students who want to pursue research as undergraduates. Opportunities for research are also available to other students outside of the Honors Program.

At least 36 credit hours toward the major are required as follows:

1. EES Foundations (3+1 credit hours each): Two introductory courses, one with lab, from 1510/1510L, 1030/1030L, and/or 1081/1081L	7
2. EES Base (4 credit hours): 2510 Required as prerequisite for nearly all upper level EES courses	4
3. STEM Foundation (3 credit hours each): One course in scientific computing: CS 1101 or DS 1101 One course in statistics: MATH 1011, DS 2100, BSCI 3270, ECON 1500 or 1510, MATH 218, 2820, or 2821, SOC 2100 One additional supporting science: any additional course from CHEM, PHYS, ASTR, BSCI, MATH, CS, DS excluding courses numbered 1111 and excluding BSCI 1400. Other courses from the School of Engineering may be considered, with permission of the DUS	9
4. EES Focus (1-4 credit hours each): At least five classes and at least 15 hours, chosen from any EES course numbered 2050 or above 3000. Must include at least two courses at the 4000 level. At least eight hours in this category must be experiential, from the following: lab courses (EES 3220, 3260, 3280, 3310, 3330, 3340), field based courses (EES 3865, 3-4 credit hours or 1 credit hour attached to another regular EES course with permission), EES 3875, or can include up to three credit hours of research or internships (EES 3841, 3842, 3880, 3881, 4998, 4999)	15-17
5. Earth Science Communication (0-3 credit hours): Any CSET course, any writing-intensive (W) course from EES, CHEM, PHYS, BSCI, or one course from the following: EES 3875, 4233, 4680, 4996+4997, SCED 2330	0-3
6. Senior Seminar: 4901 ~~This requirement can be satisfied by courses already counting in other categories~~	1
Total hours:	36-41

B.S. DEGREE OPTION

The B.S. degree in EES is designed to prepare students for careers as earth and environmental scientists, including entering the science workforce after graduation and/or pursuing postgraduate academic work.

Given the broad and interdisciplinary nature of EES, it is important that students design an academic plan in consultation with their adviser and referencing the EES Disciplinary Pathway documents, to ensure appropriate preparation for their area of interest. Preparing to be competitive for graduate programs may include additional coursework beyond the major requirements, particularly advanced math, computing, chemistry, biosciences, or physics, depending on disciplinary interest. Students on this pathway are encouraged to pursue research, particularly if aimed at post-graduate academic work.

Note that prerequisite STEM courses (CHEM 1601, PHYS 1501/1601, MATH 1100/1201/1301) may be taken on an ungraded basis for students above the freshman level, but working knowledge of the course content will be required in upper-level EES and other STEM courses.

Students who are interested in pursuing minors and/or double majors in other STEM fields should discuss options for this with the DUS, as some coursework in other departments may replace EES coursework if part of an intentionally designed plan made in consultation with the adviser and DUS.

The B.S. degree option is organized into six parts, beginning with one of three introductory courses that serve as an entry point. The second part involves three courses that provide background in methods and ways of thinking in Earth and environmental sciences. At least one EES base course must be completed before students may enroll in the more advanced focus courses of part four. Specific introductory courses may be prerequisite for related upper-level electives, and so students are encouraged to take these early in their academic career. As Earth and Environmental sciences employ techniques and knowledge from all other STEM fields, courses in part 2 and part 4 of the major have outside STEM courses as prerequisites and part 3 of the major requires students to build additional skills in supporting STEM fields through two more STEM electives, one of which must be quantitative or computational. The fourth part of the major defines an EES focus for the student through both experiential and seminar-style EES courses. The fifth component addresses science communication skills with one course. The sixth component of the major is a 1 credit hour seminar that serves as a capstone for senior students. B.S. students are strongly encouraged to pursue research. Highly motivated and successful students may elect to participate in the EES Honors Program.

At least 37 credit hours toward the major are required as follows:

1. EES Foundation Courses (3+1 credit hours each): One introductory course with lab: 1510/1510L, 1030/1030L, and/or 1081/1081L	4
2. EES Base (4 credit hours): 2510, 2550, and one course in physical dynamics from the following list: EES 2580, 4420, 4550, 4650 Note that all EES physical dynamic focused courses have MATH 1100/1201/1301 and PHYS 1501/1601/1911 as pre-requisite, and that CHEM 1601 is co-requisite for EES 2550 Required as prerequisite for nearly all upper level EES courses	4
3. STEM Electives (3 credit hours each): Two courses from the following: CHEM 1602 or higher, PHYS 1502/1602, 1912 or higher, MATH 2300 or higher, BSCI 1510 or higher, ASTR 2110 or higher, CS 1101 or higher, DS 1101 or higher. One of these must be quantitative or computational, so from MATH, CS, DS, or an introduction to statistics (BSCI 3270). Other courses from the School of Engineering may be considered, with permission from the DUS.	9
4. EES Focus (1-4 credit hours each): At least five classes and at least 15 hours, chosen from any EES course numbered 2050 or above 3000. Must include at least two courses at the 4000 level. At least eight hours in this category must be experiential, from the following: lab courses (EES 3220, 3260, 3280, 3310, 3330, 3340), field-based courses (EES 3865, 3-4 credit hours, or 1 credit hour attached to another regular EES course with permission), EES 3875, or can include up to three credit hours of research or internships (EES 3841, 3842, 3880, 3881, 4998, 4999)	15-17
5. Earth Science Communication (0-3 credit hours): Any CSET course, any writing-intensive (W) course from EES, CHEM, PHYS, BSCI, or one course from the following: EES 3875, 4233, 4680, 4996+4997, SCED 2330 This requirement can be satisfied by courses already counting in other categories.	0-3
6. Senior Seminar: 4961	1
Total hours:	37-42

Designing EES Area of Focus

In-depth Earth and Environmental Sciences courses can be chosen to define a focus area for either degree option in EES. Students should consult with their major adviser and follow guidance documents on the EES website to help choose a focus area and associated course options. All parts of the Earth and its environments are interconnected, and the integrated Earth and Environmental Science major allows students to create a comprehensive understanding of the cycling of energy and materials through Earth's four spheres (lithosphere, hydrosphere, atmosphere, and biosphere) while also developing some more specific expertise through a focus.

Honors in Earth and Environmental Sciences

The EES Honors Program is available to both B.A. and B.S. degree students and provides research experience and mentoring in preparation for a career or graduate studies in Earth and environmental sciences. Interested students should apply to the undergraduate adviser for entry into the Honors Program fall semester, junior year. A grade point average of 3.3 or higher both cumulatively and in courses that count toward the EES major is required for admission to the Honors Program.

Working closely with a faculty adviser, students in the Honors Program complete a research project of interest to both the student and faculty member during the junior and senior years. In order to graduate with honors in EES, a

student must: (1) maintain a 3.3 grade point average both in the EES major and cumulatively; (2) complete the required courses for the EES major; (3) complete Senior Honors Seminar (4996, 4997) and Senior Honors Research (4998, 4999); (4) satisfactorily present the results of his/her research in written form as a senior thesis to two members of the faculty and orally to students and faculty of the department.

Minor in Earth and Environmental Sciences

The minor in EES provides students with a broad background in Earth processes, systems, and history, and an introduction to environmental issues. This background is highly relevant to many different fields of endeavor. The minor does not fully prepare students for graduate studies or employment as Earth or environmental scientists, though it could do so paired with another relevant STEM major. Students should consult with the director of undergraduate studies about how the minor in EES fits with their career or graduate school interests.

The minor consists of at least five courses (at least 17 credit hours; EES 1510/1510L, 1030/1030L, and EES 1081/1081L each count as one course). Students are encouraged to choose courses based on their interests and career plans and to discuss course selection with the director of undergraduate studies. No more than two 1000-level courses count toward the minor. Two courses with labs are required; one must be numbered above 2000. No credit toward the minor is given for EES 3841-3842 or 3851-3852.

Licensure for Teaching

EES majors may choose a second major in science education which includes teaching licensure, a prudent choice if interested in teaching. Peabody offers a fifth-year master's program for science majors interested in teaching. Upon graduating with a B.A. or B.S. in EES, students in the fifth-year program would spend the next summer and academic year earning their M.Ed. and teaching licensure.

Students seeking teacher certification in science disciplines at the secondary level should refer to the chapter on Certification for Teaching in the Peabody College section of the Undergraduate Catalog. Please contact Professor Heather Johnson, coordinator of science secondary education, at heather.j.johnson@vanderbilt.edu for more information.

Senior Lecturers: Amy Crockett, Kent Dolezal, Abdoul Karim Nchare Fogam, Adugna Olani, John Stromme

COURSES OFFERED: [ECON](#)

The Department of Economics offers an undergraduate major and minor in economics. Qualified economics majors may also elect to take graduate courses or participate in honors work.

The department participates with the Department of History in a concentration in economics and history. Other economics-related minors are discussed under the Undergraduate Business Minor.

Economics 1010 and 1020 are prerequisites to all courses numbered above 2000, except Economics 2220 which only requires Economics 1010.

Program of Concentration in Economics

The requirements for the major include completion of at least 33 credit hours in economics courses, including 1010, 1020, 1500 or 1510 (or Math 2820L with Math 2810 or Math 2820), 3012, 3022, and 3032 or 3035. At least 9 credit hours must be in courses numbered above 3035. At least 15 credit hours that count toward the economics major must be taken at Vanderbilt. Undergraduate Business Minor (BUSA) elective courses do not count toward the economics major.

Economics 1111 may be counted as an elective. No more than 3 credit hours of independent study may be included in the minimum 33 credit hours required for the major.

Mathematics Prerequisite

MATH 1201 (or MATH 1301) is a prerequisite for Economics courses numbered 3000 and above.

Minor in Economics

The minor in economics requires 21 credit hours, including 1010, 1020, 1500 or 1510 (or Math 2820L with Math 2810 or Math 2820), 3012, and 9 credit hours of electives. At least one elective must be numbered above 3015.

Students who complete either Economics 3032 or 3035 with Math 2820L and Math 2810 or Math 2820 as a prerequisite need not take Economics 1500 or 1510. Undergraduate Business Minor (BUSA) elective courses do not count toward the economics minor.

Honors Program

An honors program is available in economics. This program is designed for highly motivated students interested in doing independent research. Students who meet the College of Arts and Science's requirements for honors candidacy as set forth elsewhere in this catalog should consult the director of undergraduate studies no later than

the fall term of their junior year. Honors candidates must complete 36 credit hours in economics, including the 18 credit hours of courses required of all economics majors. Honors candidates should complete 3032 or 3035 before senior year. In addition, the Honors Program requires completion of (1) Economics 3698 Junior Honors Research (1 credit hour), (2) Economics 4998 and 4999 Senior Thesis (6 credit hours), culminating in a written thesis, (3) Economics 4981–4982 Honors Seminar (2 credit hours), (4) 9 credit hours of electives including at least 6 credit hours in Economics courses above 3035. Honors candidates are required to write a senior thesis and to defend it in an oral examination. On satisfactory completion of this program, a student will graduate with honors or with highest honors in economics.

Program of Concentration in Economics and History

This is an interdisciplinary program split between Economics and History that provides a more focused program of study while requiring fewer credit hours than a double major in the two fields. The program consists of 45 credit hours of course work of which 9 credit hours are from courses listed under the economic history concentration and the remaining 36 credit hours are evenly divided between Economics and History. Students are expected to observe course-specific requirements in each department. The details are spelled out below under Economics and History.

Licensure for Teaching

Candidates for teacher licensure in economics at the secondary level should refer to the chapter on Licensure for Teaching in the Peabody College section of this catalog.

Economics and History

The joint major in economics and history makes an important contribution to liberal education at Vanderbilt by helping students understand the origins and organization of modern society. It also provides a unique preparation for careers in business, the professions, and other fields by combining all the analytical tools of the regular economics major with history's emphasis on clear and effective writing and on developing skills in gathering, assessing, and synthesizing information. The program consists of 45 credit hours of course work: 9 credit hours in an economic history concentration, and an additional 18 credit hours in economics and 18 in history.

Note: One semester of calculus is a prerequisite for ECON 1500 and 1510. MATH 1201 (or MATH 1301) is a prerequisite for Economics courses numbered 3000 and above.

Course work for the major is distributed as follows:

Economic History Concentration (9 credit hours)

Three of the following courses, one of which must be an economics course above 3000:

HIST 1039, 1162, 1600, 1605, 1640, 1660, 1665, 2106, 2107, 2138, 2150, 2205, 2255, 2544, 2660, 2700, 2710, 3100, 3110, 3190, 3200, ECON 2150, 3150, 3160, RUSS 2810.

Note: ECON 3012 is a prerequisite for ECON 3150, and 3160.

Economics (18 credit hours)

ECON 1010, 1020, 1500 or 1510, 3012, 3022; one ECON course above 3022 not included in the economic history concentration.

Note: The following course sequences may be substituted for ECON 1500 or 1510: Option 1: MATH 2810, 2820L, and

either ECON 3032 or 3035.

Option 2: MATH 2820, 2820L, and either ECON 3032 or 3035. In these cases, ECON 3032 or 3035 will also count as an elective.

History (18 credit hours)

No more than 3 credit hours of AP or IB credit in history courses may count toward this total.

1. History 3000W or 3980W; must be taken by the end of the junior year. 3980W is limited to second-semester juniors who have been admitted to the Honors Program. Students entering the Honors Program who have already earned credit for 3000W will receive elective credit for that course.
2. History 4960 (prerequisite: History 3000W), or History 4980–4981 (available only to students in the Honors Program). *Note:* At the discretion of the director of honors and the director of undergraduate studies in history, a student who has earned credit for 4980 but does not take 4981 may be considered to have fulfilled the capstone requirement for the major.
3. Four other history courses. Electives may include any courses, not used to satisfy any of the above requirements, offered by the Department of History, including any courses listed for the history major.

Honors Program (9 more credit hours)

Students apply to the Honors Program in History in the first semester of the junior year.

54 credit hours: students will take the four-course honors sequence, HIST 3980W, 4980–4981, 4999. Because HIST 4980–4981 satisfies the capstone requirement, honors students will not be required to take HIST 4960, though they may enroll for 4960 as an elective. Students will write an interdisciplinary thesis under the direction of an adviser from each department.

COURSES OFFERED: [ECE](#)

Electrical and computer engineering has been at the forefront of the information technology revolution, reshaping the way we live work, and connect. Breakthroughs in large-scale integrated circuits have led to increasingly powerful computers and sophisticated networks, transforming how engineers approach design and problem-solving across every industry.

The electrical and computer engineering curriculum offers a strong interdisciplinary foundation in mathematics, physics, and computer science, alongside core studies in circuit analysis, digital systems, and electronics. Students can tailor their education through dynamic areas of concentration such as photonics and nanomaterials, microelectronics, embedded and cyber-physical systems, robotics, signal and image processing, and medical technologies.

Graduates emerge well-prepared for impactful careers in industry, government, healthcare, law, or academia - with the skills to innovate, lead, and adapt in a rapidly evolving technological landscape.

Undergraduate Honors Program. With faculty approval, junior and senior students may be accepted into the Honors Program. To achieve honors status, the student must:

1. achieve and maintain a minimum GPA of 3.5.
2. complete 3 hours of undergraduate research (ECE 3860, 3861 or CS 3860, 3861) with final written report.
3. complete 6 hours of ECE program elective credit from the following list:
 - a. up to 3 additional hours of undergraduate research (ECE 3860, 3861 or CS 3860, 3861), or
 - b. Design Domain Expertise courses beyond the one course required by the program, or
 - c. 5000-level ECE or CS courses.

The diploma designation is Honors in Electrical and Computer Engineering.

Facilities. Electrical and computer engineering supports undergraduate laboratories emphasizing the principal areas of the disciplines: analog and digital electronics, microcomputers, microprocessors, microelectronics, and instrumentation. In addition, several specialized facilities are available for graduate research: The Vanderbilt Institute of Nanoscale Science and Engineering (VINSE), the Institute for Software Integrated Systems (ISIS), the Institute for Space and Defense Electronics (ISDE), the Vanderbilt Lab for Immersive AI Translation (VALIANT), and the Vanderbilt Institute for Surgery and Engineering (VISE).

The work in electrical and computer engineering is supported by a variety of computers and networks, including the high-performance computing facilities of the Advanced Computing Center for Research and Education. Vanderbilt is one of the founding partners of the Internet II initiative.

Curriculum Requirements

The B.E. in electrical and computer engineering requires a minimum of 122 hours, distributed as follows:

1. Mathematics (18 hours). Required courses: MATH 1300, 1301, 2300, 2400, 2810.
2. Basic Science (16 hours). Required courses: CHEM 1601, 1601L; PHYS 1601, 1601L, 1602, 1602L; MSE 1500, 1500L or CHEM 1602, 1602L.
3. Engineering Fundamentals (6 hours). Required courses: ES 1401, 1402, 1403, ES 2100W.
4. Culminating Design Experience (7 hours). Required courses: ECE 4950, 4951, 4959.
5. Electrical and Computer Engineering Core (21 hours). Required courses: CS 1100 or 1101 or 1104; ECE 2201 or 2204; ECE 2112, 2112L, 2123, 2123L, ECE 2214, 3235, 3235L.
6. Electrical and Computer Engineering Electives (21 hours). To comprise:
 - a. At least 15 hours selected from the Gateway courses and ECE and CS Depth courses listed below.
 - b. other courses listed in the Electrical and Computer Engineering Areas of Concentration below, or ECE or CS courses numbered above 3000 (including ECE 3860, 3861 and CS 3860, 3861).

Additional requirements for (a) and (b) include:

- at least 9 hours completed in one of the four Areas of Concentration listed below.
- at least 6 additional hours completed in a second distinct Area of Concentration listed below.
- at least one Design Domain Expertise course as designated below taken before ECE 4951.
- courses with associated labs require completion of both the lecture and lab portions to count as Electrical and Computer Engineering Electives.
- courses count in only one Area of Concentration; they cannot be double counted

7. Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering.

8. Technical electives (12 hours).

- a. (6-12 hours). At least 6 hours must be taken from this list of approved engineering technical electives: (excluding all courses numbered 2860); BME; CHBE (except 2150, 2900W); CE; CS (except 1000, 1101, 1103, 1104, 1151); DF 2100; DS 3100; ECE (above basic requirement in sections 5 and 6 above); ENGM 3010; ENVE; ES 3300; ME; MSE (except 1500, 1500L); NANO 3000; SC 3250, 3260
- b. (0-6 hours). Up to 6 hours may be taken from this list of optional technical electives: ENGM 2160, 2210, 3000, 3100, 3300, 3650, 4500; MSE 1500, 1500L (if CHEM 1602, 1602L is used for basic science requirement); Astronomy (except 1010, 1111, 2130); Biological Sciences (except 1111); Chemistry (except 1010, 1020, 1601, 1602, 1111); Earth and Environmental Sciences (except 1080, 1111, 2150); Mathematics 2410 and above; Neuroscience 2201, 3269, 4961; Physics above 2000; Psychology 2100,

9. Open Elective (3 hours).

Note: Certain mathematics and physics courses cannot be credited to a School of Engineering degree. Please see the [Degree Programs in Engineering/Mathematics and Physics](#) section of the catalog for more information.

Electrical and Computer Engineering Areas of Concentration

	Photonics & Nanomaterials	Microelectronics	Embedded Computing & Cyber-Physical Systems	Signal, Image, Data, and Medical Systems
Gateway Courses†	ECE 3233	ECE 3233	CS or ECE 2218/2218L	ECE 4356*

	ME 4265		CS 4279*	BME 4400
	NANO 3000		CS 4288*	BME 4420
	PHYS 2210		ME 4271	ME 3204
	PHYS 2660			
	PHYS 3640			

†Gateway courses provide recommended background and/or prerequisites for the Area of Concentration Depth courses.

*Designates a Design Domain Expertise course.

Double majors have special curricula that require more than 122 hours and a different distribution of electives. See the ECE webpage or the ECE double major adviser for these curricula.

A double major in Biomedical Engineering and Electrical and Computer engineering is offered as a unitary BME-ECE curriculum, which is described in the Biomedical Engineering section of the catalog under its curriculum requirements. It requires a minimum of 129 semester hours.

Undergraduates in electrical and computer engineering, including double majors in electrical and computer engineering, may apply the pass/fail option only to courses taken as open electives subject to the school requirements for pass/fail.

Specimen Curriculum for Electrical and Computer Engineering

		Semester hours	
		FALL	SPRING
SOPHOMORE YEAR			
MATH 2300	Multivariable Calculus	3	–
MATH 2400	Differential Equations with Linear Algebra	–	4
PHYS 1602, 1602L	General Physics II and Laboratory	4	–
CS or ECE 2201 or 2204	Program Design and Data Structures	3	–
ECE 2112, 2112L	Circuits and Laboratory	4	–
CS or ECE 2123, 2123L	Digital Systems and Laboratory	–	4

[Communication of Science and Technology](#)

[Minors](#)

[Curriculum Requirements](#)

DIRECTOR Yiorgos Kostoulas

PROFESSORS OF THE PRACTICE David A. Berezov, Yiorgos Kostoulas, David A. Owens, Christopher J. Rowe

ASSOCIATE PROFESSORS OF THE PRACTICE Lynne Cooper, Courtney L. Johnson, Grayson McClain

ASSISTANT PROFESSOR OF THE PRACTICE Lina Deng

ADJOINT PROFESSORS OF THE PRACTICE John A. Bers, J. Caleb Clanton

The Division of Engineering Science and Management administers the engineering science major, the engineering management minor, and the first-year introduction to engineering course. The division oversees non-traditional engineering study and advises students on course selection to meet specific career goals that traditional engineering majors may not provide.

COURSES OFFERED: [ENGM](#), [ES](#)

Engineering Science Major (Bachelor of Science)

The engineering science major is flexible and interdisciplinary—offering students the opportunity to select a program of study to meet special interests or objectives. Many students choose a program of study in engineering management, communication of science and technology, various engineering concentrations, environmental science or materials science; however, students may develop unique plans of study to specialize in areas for which facilities and faculty competence exist but which are not covered within a single existing degree program at Vanderbilt. Engineering science graduates may establish careers in engineering or science, interface with engineers (e.g., in marketing and sales), or use their analytical and problem-solving skills to build future professional careers. Defined areas of concentration exist in engineering management, communication of science and technology, secondary education, and materials science and engineering. Individual programs have been developed for students interested in careers in engineering mathematics, environmental engineering, transportation engineering, teaching, technical communications, and other areas requiring nontraditional combinations of engineering courses. Because of the flexible nature of the engineering science programs of study, accreditation has not been sought for these programs of study, and engineering science majors will not qualify for engineering licensure in most states.

Engineering Management. Engineering management is an interdisciplinary program of study designed to give students the tools to manage technology development and innovation, to enhance manufacturing quality and productivity in a competitive international environment, and to implement these objectives successfully in an

organization. Engineering management links engineering, science, and the management disciplines. In addition to the core science and math courses required of all engineering students, topics of study include entrepreneurship, human resources management, finance in technology-based organizations, technology strategy, communications, and operations.

Communication of Science and Technology. Many careers that are attractive to graduates of the engineering science program require the communication of engineering and science to people who are not technically trained. The Communication of Science and Technology interdisciplinary program prepares engineering students for careers in areas such as technical consulting, high-technology marketing and sales, environmental law, and journalism. The program combines traditional engineering and science courses with communications and humanities courses in a flexible curriculum. Engineering science majors may select from a set of program electives identified by the faculty committee of the School of Engineering and the College of Arts and Science that supervises the program.

Minors. Students may also pursue a minor consisting of at least five courses of at least three credit hours within a recognized area of knowledge. Minors are offered in engineering management, materials science and engineering, computer engineering, electrical engineering, computer science, scientific computing, environmental engineering, energy and environmental systems, nanoscience and nanotechnology, and most disciplines within the College of Arts and Science. Students must declare their intention to pursue minors by completing forms available in the Office of Academic Services of the School of Engineering.

Curriculum Requirements

The B.S. in engineering science requires a minimum of 122 hours, distributed as follows:

1. Basic Science (16 hours). CHEM 1601, 1601L plus 12 hours from BSCI 1510, 1510L, 1511, 1511L; CHEM 1602, 1602L; PHYS 1601, 1601L, 1602, 1602L; or MSE 1500, 1500L with two courses in a single discipline.
2. Mathematics (14 hours). MATH 1300, 1301, 2300 and 3 hours from MATH courses numbered 2400 and above.
3. Engineering (44 hours).
 - a. Engineering Fundamentals (12 hours): CS 1100 or 1101 or 1103 or 1104 or DS 1100; ES 1401, 1402, 1403, 2100W; ENGM 3700.
 - b. Engineering Core (12 hours): To be selected from courses in any of the following disciplines: BME, CHBE, CE, CS, DF, DS, ECE, ENVE, MSE, ME, NANO, and SC (except BME 1015, 1016; CS 1000, 1151; DS 1000, 2100; and any course numbered 2860).
 - c. Engineering Electives (15 hours): To be selected from courses in any of the following disciplines: BME, CHBE, CE, CS, DF, DS, ECE, ENGM, ENVE, ES, MSE, ME, NANO, and SC, except BME 1015, 1016; CS 1000, 1151; DS 1000, 2100; ES 1115, 1151, 2700, 3884; ENGM 2440, 4800; and any courses numbered 2860.
 - d. Senior Capstone (5 hours): ES 4950, 4951, 4959.
4. Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering.
5. Open Electives (6 hours).
6. Program Concentration (24 hours). In consultation with the academic adviser, each student must identify a meaningful sequence of courses, not counting certain introductory-level courses, that directly contributes to meeting stated career goals. Program concentrations are approved by the academic adviser and the program director in advance and become part of the student's degree audit.

The preparation provided by the program concentration, together with a solid foundation in basic engineering courses, provides the engineering science student a strong and useful career base.

No more than 24 credit hours of business-related course work (BUS, BUSA, ENGM, FNEC, MGRL) may be applied to the ES degree program. Only one business-related minor (BUS, ENGM, FNEC, MGRL, HOD) may count to a student's academic program. No more than 6 credit hours of courses numbered 3840 to 3879 in any program may be applied to the ES degree program.

Undergraduates in engineering science may apply the pass/ fail option only to courses taken as liberal arts core or open electives, subject to the school requirements for pass/fail. UNIV courses are eligible for open elective credit only. Credit for the senior capstone sequence (5 hours) satisfies the Immersion Vanderbilt requirement.

Note: Certain mathematics and physics courses cannot be credited to a School of Engineering degree. Please see the [Degree Programs in Engineering/Mathematics and Physics](#) section of the catalog for more information.

Senior Lecturers: Pavneet Aulakh, Jordan Ivie, Jeong Oh Kim, Judith Klass

Writer in Residence: Amanda Little, Sheba Karim

COURSES OFFERED: [ENGL](#)

The Department of English offers three distinct programs that allow students to individualize their studies while acquiring the breadth of knowledge and skills of the traditional English major. The curriculum provides courses in British, American, and global literature, film, digital media, Anglophone literatures of other countries, literary theory, and expository as well as creative writing. These diverse courses reflect the interests of students and faculty and the expanding range of English literary study. Students use the concentration in English as a foundation for careers including education, law, business, and government as well as public relations and the media industry-anywhere that analytic, reading, and writing skills are valued-and as preparation for postgraduate work in literature. The department also regards helps students become lifelong readers of literature and culture.

Programs in England, Scotland, Australia, and around the world offer opportunities for study and travel that enrich a student's education. The Vanderbilt Visiting Writers series annually sponsors public lectures, readings, and other occasions where English majors hear and meet celebrated poets, novelists, and critics. Many majors write for and

serve on the editorial boards of campus publications including the *Hustler*, the *Vanderbilt Review*, a distinguished collection of creative writing, *Vanderbilt Lives*, an annual publication of creative non-fiction by Vanderbilt Undergraduates, and *Spitfire*, a creative journal that welcomes genre fiction and is edited by English majors. An English major listserv alerts students to employment opportunities, internships, and study abroad programs in addition to those offered through Vanderbilt University.

Programs of Concentration

Literary Studies

Creative Writing

Specialized Critical Studies

Program I: Literary Studies (30 credit hours)

Students pursue a broad range of interests through a flexible approach to the study of literature. 30 total credit hours including:

1. 6 credit hours in History (literature before 1800)
2. 6 credit hours of Diverse Perspectives (ethnic American or Anglophone literature)
3. 18 additional credit hours of electives in English, chosen from the courses that count toward the major

A course cannot be used to satisfy more than one requirement in the major.

Courses that fulfill the requirements in "History" and "Diverse Perspective" are described below under General Requirements and Advice for Majors and Minors in All Programs.

Program II: Creative Writing (30 credit hours)

Students develop their creative writing while acquiring an overview of English literature. 30 total credit hours including:

1. 12 credit hours of 3000-level creative writing workshops in at least two different genres (from among: Nonfiction 3210, 3220; Fiction 3230, 3240; Poetry 3250, 3260). Admission to these courses is by consent of instructor or based on prior coursework.
2. 3 credit hours in History (literature before 1800)
3. 3 credit hours in Diverse Perspectives (ethnic American or Anglophone literature)
4. 12 credit hours from courses that count toward the English major, which may include one additional creative writing workshop (beyond the four required in number 1, above) or one course in another discipline (with approval of the Director of Undergraduate Studies)

A course cannot be used to satisfy more than one requirement in the major.

Courses that fulfill the requirements for "History" and "Diverse Perspectives" are described below under General Requirements and Advice for Majors and Minors in All Programs.

Program III: Specialized Critical Studies (30 credit hours)

Students design their own specialized course of study with a descriptive name and develop a contract of courses for it.

30 total credit hours including:

1. 12 credit hours of course work concentrated in a particular period (e.g., nineteenth-century American), genre, or movement (e.g., the novel), an aspect of intellectual history (e.g., law and literature, literary theory), or other area of special interest. Up to 9 credit hours may be taken in courses from other departments relevant to the concentration. In consultation with a major adviser, each student selects specific courses, which are listed in a contract that is filed after the student has formally declared the major.
2. 6 credit hours in History (literature before 1800)
3. 6 credit hours in Diverse Perspectives (ethnic American or Anglophone literature)

4. 6 credit hours from any of the courses that count toward the English major.

A course cannot be used to satisfy more than one requirement in the major, except that courses in the Specialization may also count toward either "History" or "Diverse Perspective", provided the student completes 30 distinct credit hours within the major.

Courses that fulfill the requirements for "History" and "Diverse Perspective" are described below under General Requirements and Advice for Majors and Minors in All Programs.

Minor in English: Literature

At least 18 credit hours of course work in English are required. These courses must include 3 credit hours from History (literature before 1800) and 3 credit hours of Diverse Perspectives (ethnic American or Anglophone literature). A course cannot be used to satisfy more than one requirement in the minor.

Minor in English: Creative Writing

At least 18 credit hours of course work in English are required. These courses must include three upper-level workshops (9 credit hours) in any genres (3210, 3220, 3230, 3240, 3250, or 3260).

General Requirements and Advice for Majors and Minors in All Programs

All courses numbered 2050 and above (except 4999) count toward the major.

Additionally, students may elect to count one of the following 1000-level courses toward their major: 1111, 1210W, 1220W, 1230W, 1250W, 1260W, 1270W, 1272W, 1275W, 1280, 1290. English 3890, 3890W, 3892, 3892W, 3894, 3894W, and 3898 may be repeated for credit when the topics are different. The survey courses (with or without the W designation), 2310, 2311, 2316, 2316W, 2318, 2318W, 2319, and 2319W are recommended for sophomores to provide a background for advanced courses. In addition, all 2000-level courses are tagged for CORE Curriculum requirements as well as counting toward the major.

Note: A course cannot be used to satisfy more than one requirement within the major but can count both within the major and for CORE Curriculum tagging requirements.

Courses that fulfill the **History requirement** (literature before 1800) include the following, with or without W designations: 2242, 2246, 2310, 2318, 2318W, 3310, 3312, 3314, 3316, 3318, 3330, 3332, 3335, 3336, 3337, 3340, 3343, 3346, 3348, 3360, 3361, 3364, 3370, as well as additional courses identified each semester that concentrate on literature before 1800.

Courses that fulfill the **Diverse Perspectives requirement** (ethnic American or Anglophone literature) include the following, with or without W designations: 2253, 2264, 2282, 3343, 3650, 3650W, 3654, 3658, 3662, 3664, 3670, 3674, 3678, and appropriate courses from other departments, including CORE 2500, as approved by the Director of Undergraduate Studies.

Courses that fulfill the **Program II creative writing workshop requirement** include 3210, 3220, 3230, 3240, 3250, 3260.

In addition, suitable sections of 3890, 3892, 3894, 3746, and 3898, as well as other courses may fulfill the categories listed above. Detailed course descriptions appear on the Department of English website for the upcoming semester (as well as prior semesters). Majors consult with their advisers during registration to identify what specific requirements the courses offered in that semester can fulfill. One course from another department, appropriate to the student's course of study, may be counted toward the requirements of any program with permission of the Director of Undergraduate Studies; for Program III, this course may be in addition to the 9 credit hours already

allowed from other departments.

Honors Program

To graduate with honors in English, students must (a) complete all the requirements of the English major, with at least 6 credit hours in honors sections (an appropriate graduate seminar or seminar in a study abroad program may be substituted for one honors seminar); (b) 3 credit hours of 4998; (c) maintain at least a 3.4 grade point average overall and 3.6 in the major; (d) be admitted to the Honors Program in the spring of the junior year; (e) write a thesis (4999) and pass an oral examination about its subject in the spring of the senior year. For secondary education double-majors, EDUC 9700 can be substituted for 4999 with the consent of the Director of Undergraduate Studies.

To comply with all requirements, every honors student will complete 33 credit hours. Exceptional achievement on the thesis will earn high honors. Majors who wish to apply to the Honors Program must be within 6 credit hours of completing their General Education requirements (AXLE or CORE), must have made reasonable progress toward the major, and must have at least a 3.4 grade point average overall and 3.6 in the major. Applications are accepted in April of the junior year. Additional information is available from the Director of Undergraduate Studies. Students need not be enrolled in the Honors Program to take honors sections. Honors sections are seminars open to any student beyond the freshman year who has completed the sophomore writing requirement of AXLE or has taken three A-tagged courses in CORE and has earned at least a 3.4 grade point average. Students are encouraged to enroll in honors sections prior to applying to the program.

Licensure for Teaching

Candidates for teacher licensure in English at the secondary level should refer to the chapter on Licensure for Teaching in the Peabody College section of this catalog.

COURSES OFFERED: [ENVE](#)

B.E. in environmental engineering. The curriculum includes analysis and design courses in environmental engineering. Vanderbilt's B.E. in environmental engineering prepares students for entry-level positions in many specialty areas of environmental engineering, as well as a variety of other careers, such as business, government, and law. The major will provide students with the tools necessary to develop effective solutions to solve emerging and existing issues such as water resources, quality, and treatment; aging infrastructures; climate change and carbon neutral innovations; energy and material resources; wastes and pollution; and other environmental challenges. Recognizing that environmental solutions cannot be realized without consideration of social, cultural, economic, and political factors, students will be required to extend the breadth of their studies with courses in data science and global perspectives courses in social sciences, economics, political sciences, and the humanities. These will be in addition to foundational courses in the basic and applied sciences, mathematics, engineering, and advanced courses in fate, transport, and treatment of contaminants in the environment. The curriculum culminates with a senior design project in which students will have the opportunity to draw on and integrate the broad knowledge they have gained from the data science and global perspectives courses with the science and engineering knowledge they gained in the major. Due to the complex interdisciplinary nature of the field, many undergraduate students continue their environmental engineering education and earn either a professional (MEng) degree or a graduate (MS or PhD) degree.

Undergraduate Honors Program. The Honors Program in environmental engineering provides an opportunity for selected students to develop individually through independent study and research. The environmental engineering honors program requires a minimum overall GPA of 3.5. Acceptance to the program is made by petition to the faculty during the junior year. Transfer students may be considered for admission after completing one semester at Vanderbilt. Candidates for honors choose their technical courses with the consent of a faculty honors adviser. A three-credit hour independent study course and a summer research internship with a final report and presentation given in the spring semester of the senior year to the ENVE faculty and students are required. The independent study course may also be counted towards the environmental engineering technical electives. The diploma designation is Honors in Environmental Engineering.

Facilities: The environmental laboratories are fully supplied with modern instrumentation for chemical, physical, biological, and radiological analysis of soils, sediments, water, wastewater, air, and solid waste. They include equipment for the study of biological waste treatment, physical-chemical waste treatment, contaminant mass transfer, and state-of-the-art instrumentation. All are available for student use in courses, demonstrations, and research.

Undergraduates in environmental engineering may apply the pass/fail option only to courses taken as open or liberal arts core electives, subject to the school requirements for pass/fail.

A double major in Environmental Engineering and Chemical Engineering is offered as a unitary ChE-ENVE curriculum, which is described in the Chemical Engineering section of the catalog under its curriculum requirements. It requires a minimum of 137 semester hours. Undergraduates in the double major may apply the pass/fail option only to courses taken as open electives, subject to the school requirements for pass/fail.

Curriculum requirements

The B.E. in environmental engineering will require a minimum of 121 hours, distributed as follows:

1. Mathematics (14 hours). Required courses: MATH 1300, 1301, 2300, 2420.
2. Basic science (18 hours). Required courses: CHEM 1601, 1601L, 1602, 1602L; PHYS 1601, 1601L; BSCI 1510; EES 1510.
3. Computing (3 hours). To be selected from: CS 1100 (recommended), 1101 or 1103.
4. Engineering Fundamentals (16 hours). Required courses: ES 1401, 1402, 1403; CE 2200, 3700, 3700L; CHBE 2200 (preferred) or ME 2220, ME 2190.
5. Environmental Engineering Core (25 hours). Required courses: CE 2120, 3300, 3705; ENGM 3700; ENVE 3200, 3200L, 3600, 4605, 4950, 4951, and 4959.
6. Environmental Engineering Program Electives (6 hours). To be selected from: CE 4150, 4240, 4300, 4425, 4430; EES 3310, 4550, 4650, 4750; ENVE 3610, 4305, 4600, 4610, 4615, 4620, 4625, 4700, 4710, 4800.
7. Environmental Engineering Design Electives (6 hours). To be selected from: CE 4150, 4240, 4425, 4430; ENVE 4305, 4610, 4625, 4710.
8. Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed under Degree Programs in Engineering.
9. Global Perspective electives (6 hours). At least 6 hours of courses designated as Global Perspectives must be included in the Liberal Arts Core (#8) or Open Electives (#12). To be selected from ANTH 2150, 2220W, 2224, 2225, 2400, 3130, 3345, 4154; ECON 2170; EES 3333; PHIL 3611; PSCI 3266; SOC 3311, 3312, 3314, 3315, 3316, 3317, 3318, 3319.
10. Data science electives (6 hours). To be selected from: CE 4100, 4320, 4340; CS 2204, 3262, 4262, 4266; DS 3100, 3262; EES 4760; MATH 3620, 3670; ME 4263; SC 3250.
11. Technical electives (3 hours). To be selected from: a) MSE 1500; courses numbered 2000 or above in BME, CHBE, CE, CS, DF, ECE, ENVE, ME, MSE, and, ENGM 3000, 3010, 3200, and 3650, except any course numbered 2860; b) courses numbered 1500 or above in the College of Arts and Science listed in the mathematics and natural sciences (MNS) AXLE distribution category; and c) MATH 2410, 2600, and courses 2811 and above (except 3000).
12. Open electives (6 hours).

Note: Certain mathematics and physics courses cannot be credited to a School of Engineering degree. Please see the [Degree Programs in Engineering/Mathematics and Physics](#) section of the catalog for more information

European Studies

[Program of Concentration in European Studies](#)

[Honors Program](#)

[The Minor in European Studies](#)

DIRECTOR Meike G. Werner

PROFESSORS Robert Barsky, Michael Bess, Ari Joskowicz, Meike G. Werner, Christoph Zeller

ASSOCIATE PROFESSORS Letizia Modena, Michelle Murray

VISITING ASSOCIATE PROFESSOR Alexander Schmidt

COURSES OFFERED: [EUS](#)

Designed for students with an interest in European culture, politics, and society, the Program in European Studies (EUS) offers a range of survey and in-depth courses that shed a light on the European project, its global impact, and its challenges. A combination of required courses enables students to analyze Europe's past as well as its many contemporary facets. EUS elective courses broaden the understanding of Europe's diverse cultural tradition and political developments and lay the foundation for careers in international law, geo-politics, cultural administration, and other professions that deal with international affairs.

The Program in European Studies sponsors events and workshops, including a visiting lecture series, international symposia, and informal faculty-student luncheon seminars, in conjunction with the Max Kade Center for European and German Studies.

EUS offers an immersive encounter with different cultures. Students majoring in EUS fulfill specific language requirements and many choose to study one or two semesters in a European country at pre-approved programs.

Program of Concentration in European Studies (27-30 credit hours)

Students with an interest in European culture, politics, and societies choose from a set of overview courses to deepen their understanding of historical and contemporary European topics, select *up to* five additional electives in EUS, and fulfill language requirements to ascertain their training in intercultural literacy. The major prepares for careers in international law, politics, and diplomacy as well as in cultural administration with the visit of advanced studies or Ph.D. programs. Most EUS majors participate in approved study abroad programs in Europe. Active participation is expected in events and activities, such as guest lectures, symposia, and luncheons, organized by EUS in conjunction with the Max Kade Center for European and German Studies.

Required Courses (9 credit hours)

- EUS 2201, European Society and Culture or EUS 2203, The Idea of Europe (3 credit hours)
- EUS 2202, European Politics
- EUS 2204, European Cultural History

Foreign Language Requirement (6 credit hours)

The foreign language requirement is to be satisfied in one of the following ways:

- 6 credit hours of course work at the intermediate level in one European language;
- course work through the beginner level in two European languages;
- demonstration of proficiency equivalent to either of the preceding options; or
- participation in one of the Vanderbilt intensive-language programs in Europe (students participating in

Vanderbilt's predominantly English-language program in Europe must complete course work through the intermediate level in one European language, or demonstrate equivalent proficiency).

European languages recognized for the major include Albanian, Bulgarian, Czech, Croatian/Bosnian/Serbian, Danish, Finnish, French, German, Greek, Hungarian, Ladino (Judeo-Spanish), Italian, Norwegian, Polish, Portuguese, Romani, Romanian, Russian, Slovak, Spanish, Swedish, Turkish, Ukrainian and Yiddish. Other languages may be approved by the major adviser.

Independent Study (3 credit hours)

Students will complete EUS 3850, Independent Readings and Research supervised by a professor in EUS or outside the program with expertise in the field; normally completed in the junior or senior year.

Electives (12 credit hours)

Students choose four courses in EUS (usually above EUS 2204; an additional one of the required courses may count as one elective). No more than two courses may be substituted by courses taken outside of EUS either from individually approved courses or courses taken abroad with the approval of the DUS. Students majoring in EUS are advised to select courses from the social sciences and humanities that complement their areas of special interest and thematic focus.

Other Issues Relating to the Major

Normally, no more than 6 credit hours of work in 1000-level courses may be counted toward the major. However, students who have fulfilled their language requirements by demonstrating equivalent proficiency or through participation in a Vanderbilt approved study program in Europe may count up to two 1000- and/or 2000-level language courses in a European language toward their major.

Students seeking a second major may count a maximum of 6 credit hours of course work to meet requirements in both majors.

Honors Program

The Program in European Studies offers qualified majors the option of completing a portion of their major requirements in an Honors Program. Students engage in interdisciplinary reading, consultations with faculty, and research on the overarching theme of their program of concentration. To be admitted to the program students must have attained a minimum cumulative grade point average of 3.300 and a minimum grade point average of 3.300 in all courses that count toward the EUS major; identify an adviser for the honors thesis; submit a detailed description of their proposed program of study for approval by the director of EUS; complete 3 credit hours of independent research (normally EUS 3850); complete 3 credit hours of credit in EUS 4998, Independent Readings and Research, that involves researching and writing a senior honors thesis of approximately fifty pages; successfully defend the honors thesis before a committee normally consisting of the adviser, the director of EUS, and another faculty member. Information concerning the Honors Program is available from the director of EUS. College regulations governing honors programs may be found in this catalog under Honors Programs, Special Programs for Arts and Science.

The Minor in European Studies

The EUS minor is a good complement to a major in anthropology, economics, history, literary studies, philosophy, and political science. It consists of a minimum of 18 credit hours of course work and requires students to take three of the EUS required courses and three electives from the EUS catalog. One of the major electives may be replaced by a course from another department or program with the prior approval of the director of EUS. A background in a modern foreign language is highly recommended.

Required courses (9 credit hours)

- EUS 2201, European Society and Culture, or EUS 2203, The Idea of Europe

- EUS 2202, European Politics
- EUS 2204, European Cultural History

Electives (9 credit hours)

Three courses from the EUS catalog (usually above EUS 2204; an additional one of the required courses may count as one elective). One course can be replaced by a course from another department or program with the prior approval of the director of EUS.

CHAIR Lynn Ramey

DIRECTOR OF UNDERGRADUATE STUDIES IN FRENCH Raissa Rexer

DIRECTOR OF UNDERGRADUATE STUDIES IN ITALIAN Elsa Filosa

DIRECTOR OF GRADUATE STUDIES Paul Miller

Professors, Emeriti: Virginia Scott, Patricia Ward

Professors: Robert Barsky, William Franke, Lynn Ramey, Tracy Sharpley-Whiting, Holly Tucker

Associate Professors: Nathalie Debrauwere-Miller, Paul Miller, Andrea Mirabile, Letizia Modena, Anthere Nzabatsinda

Assistant Professor: Raissa Rexer

Assistant Professors of the Practice: Elsa Filosa, Alexis Finet

Principal Senior Lecturers: Nathalie Dieu-Porter, Susan Kevra

Senior Lecturer, Emeriti: Tracy Barrett

Senior Lecturers: Lisa Blomquist, Anna Marra, Honorine Rouiller

COURSES OFFERED: [CREO](#), [FREN](#), [ITAL](#)

The Department of French and Italian offers a wide range of courses in the language, culture, and literatures of Italy, France, and other Francophone communities. Most language, literature, and culture courses are taught in French or Italian. Students may use courses in both French and Italian to satisfy some requirements of AXLE.

The department offers a program of concentration in French as well as two interdisciplinary programs: a

concentration in French and European studies and a concentration in Italian and European studies. Qualified French majors may also participate in the Honors Program in French. Minors in French and Italian are offered. On the graduate level, the department offers a doctoral program in French.

Many students participate in French or Italian study abroad programs. The department offers Maymester programs in France and Italy. On-campus activities include films, symposia, concerts, and lectures by visiting professors. The department has chapters of national honor societies for both French and Italian students.

Program of Concentration in French

Students who choose to major in French are expected to achieve advanced proficiency in oral and written French and to demonstrate a general understanding of the history of French and Francophone literatures and cultures. No more than 6 credit hours of AP or IB credit may count toward the 30 credit hours required for the major (3 credit hours for 2501W and 3 credit hours of “no equivalent” credit). All majors are strongly urged to spend a semester or a year studying abroad. Majors should consult their advisers about their choice of major courses each semester.

Course work for the major is distributed as follows:

Required courses (9 credit hours): 2501W, 3101, 3102

Two courses from Communications (6 credit hours): 2611, 2614, 2891, 3111, 3112, 3113, 3892

Five courses from Literatures and Cultures (15 credit hours): 3185W, 3222, 3224, 3230, 3232, 3233, 3234, 3332, 3620, 3621, 3622, 3634, 3730, 3881, 3891, 4023, 4025, 4027, 4029, 4222, 4232, 4233, 4234, 4320, 4430, 4432; AADS 2294.

Honors Program in French

In addition to requirements set by the College of Arts and Science, the following requirements must be met:

1. All the requirements for the 30-credit-hour major in French.
2. One graduate-level French course during the senior year for at least 3 credit hours; this course may substitute for one 3000- or 4000-level course required for the major.
3. Earn a 3.5 grade point average in courses that count toward the French major.
4. Six credit hours of thesis credit under French 4998 and 4999 (Senior Honors Thesis), culminating in a written thesis.
5. An oral examination on the thesis and its area in the last semester of the senior year.

A three-member Honors Committee will administer the program. Students must submit the name of the faculty adviser and the proposed thesis topic to this committee for approval during the second semester of the junior year. The committee will set guidelines for the thesis topic proposal, publish deadlines each year, and administer the oral examination.

Program of Concentration in French and European Studies

Students may elect this interdisciplinary major, which requires a minimum of 30 credit hours of course work. A semester of study at a French study abroad program is strongly encouraged. Course work for the joint major is distributed as follows:

French (24 credit hours)

French Language, Literature, and Culture (9 credit hours): 2501W, 3101, 3102 Communications (3 credit hours): 2611, 2614, 2891, 3111, 3112, 3113, or 3892

Literatures and Cultures (6 credit hours): 3185W, 3224, 3230, 3232, 3234, 3620, 3621, 3622, 3634, 3730, 3881, 3891, 4023, 4027, 4029, 4222, 4232, 4234, 4320, 4430, 4432.

European Studies (12 credit hours)

European Studies core courses (3 credit hours): EUS 2201, 2203

Courses in EUS or alternative topical courses as approved by major adviser (6 credit hours)

Minor in French

The minor in French requires 18 credit hours of 2000- or higher-level course work, including 2501W, 3101, and 3102. All minors are expected to consult their advisers about their choice of courses. No course taught in English may count toward the minor. Students are encouraged to participate in a French study abroad program.

Minor in Italian Studies

Students who minor in Italian studies are expected to achieve intermediate proficiency in oral and written Italian, to demonstrate a general understanding of the history of Italian literatures and cultures, and to develop an awareness of the ways Italian studies intersects with other disciplines. The minor in Italian studies requires 15 credit hours of course work, including:

Required courses (6 credit hours):

ITALIAN: 2203, Intermediate Italian (prerequisite ITA 1102; ITA 1103, or equivalent); either 2501W, Grammar and Composition (prerequisite ITA 2203 or equivalent), or 2614, Conversation (prerequisite ITA 2203 or equivalent). ITA 1101, 1102, 1103 do not count toward the minor.

Elective courses (9 credit hours). Only 3 of these elective credit hours may be selected from courses in subject areas other than Italian, such as Classical Studies, History, History of Art and Architecture, Music Literature, and History:

ITALIAN: 2501W, Grammar and Composition (if not used as a required course); 2614, Conversation (if not used as a required course); 3000, Introduction to Italian Literature; 3041, Italian Civilization; 3100, Literature from the Middle Ages to the Renaissance; 3240, Dante's *Divine Comedy*; 3340, *Famous Women* by Boccaccio; 3500, Baroque, Illuminismo, and Romanticism in Italy; 3600, Twentieth-Century Literature: Beauty and Chaos; 3640, Classic Italian Cinema; 3641, Contemporary Italian Cinema; 3701, City Fictions; 3702, Topics in Contemporary Italian Civilization; 3703, The Cultural and Linguistic Worlds of Italy; 3740, Gangsters, Lovers, Madonnas, and Mistresses; 3802, Contemporary Italian Society and Culture; 3890, Special Topics in Italian Literature.

CLASSICAL STUDIES: LAT 3100, Roman Comedy; LAT 3110, Catullus; LAT 3120, Lucretius: *De Rerum Natura*; LAT 3130, Vergil: *The Aeneid*;

LAT 3160, Ovid.

HISTORY: 2220, Medieval and Renaissance Italy, 1000–1700.

HISTORY OF ART AND ARCHITECTURE: 2310, Italian Art to 1500; 2330, Italian Renaissance Art after 1500; 3320, 3320W, Early Renaissance Florence; 3332, Raphael and the Renaissance; 3334, 3334W, Michelangelo's Life and Works.

MUSIC LITERATURE: 3220, Opera in the 17th and 18th Centuries; 3221, Opera in the 19th Century.

Other Italy-related courses not listed here—such as those in study abroad programs—may be approved towards the

minor upon approval by the director of undergraduate studies in Italian. Students are encouraged to participate in study abroad programs in Italy.

Program of Concentration in Italian and European Studies

The joint major in Italian and European Studies acknowledges the cultural, political, and strategic importance of Italy within the community of European nations. It requires 30 credit hours of course work; a semester of study in Italy is recommended. Prospective majors should consult with the director of undergraduate studies in Italian and with the director of the European Studies program. Course work for the joint major is distributed as follows:

Italian (18 credit hours)

Italian language and literature — 12 credit hours from the following courses: ITA 2501W, 3000, 3041, 3240, or appropriate substitute in consultation with the adviser in Italian

Electives in Italian Studies (6 credit hours): ITA 2614, 3100, 3600, 3702, or 3640 or any other course approved by the major adviser in Italian

European Studies (12 credit hours)

European Studies core courses (3 credit hours): EUS 2201, 2203, and 4960

EUS thesis seminar (EUS 4960 Senior Tutorial) or equivalent course in Italian (3 credit hours)

Courses in EUS or alternative topical courses as approved by major adviser (6 credit hours)

Licensure for Teaching

Candidates for teacher licensure in French at the secondary level should refer to the chapter on Licensure for Teaching in the Peabody College section of this catalog.

French

Students who have not studied French in high school should begin their studies at Vanderbilt in French 1101. Students with high school French on their records must present a College Board achievement test score in French to be placed correctly. Students should consult their advisers or the Department of French and Italian for advice on placement.

Note: Students may not earn credit for an introductory language course if they previously have earned credit for a higher-level course taught in that same language. In addition, students may not earn credit for an intermediate-level language course if they previously have earned credit for a higher-level course taught in that same language.

Students who have earned Advanced Placement or International Baccalaureate credit in a foreign language will forfeit the test credit if they complete a lower-level course taught in that same language.

Italian

Students with high school Italian on their records should consult the director of undergraduate studies in Italian for advice on placement. Students who have not studied Italian in high school should begin their studies at Vanderbilt in Italian 1101.

Note: Students may not earn credit for an introductory language course if they previously have earned credit for a higher-level course taught in that same language. In addition, students may not earn credit for an intermediate-level language course if they previously have earned credit for a higher-level course taught in that same language.

Students who have earned Advanced Placement or International Baccalaureate credit in a foreign language will forfeit the test credit if they complete a lower-level course taught in that same language.

Gender and Sexuality Studies

[Program of Concentration in Gender and Sexuality Studies](#)

[Honors Program](#)

[Minor in Gender and Sexuality Studies](#)

CHAIR, ACTING Christin Essin

DIRECTOR OF UNDERGRADUATE STUDIES Elizabeth R. Covington

DIRECTOR OF GRADUATE STUDIES Katherine Crawford

Professors: Brooke Ackerly, Ellen Armour, Katherine Crawford, Dana Nelson, Kathryn Schwarz

Associate Professors: Laura Carpenter, Shatema Threadcraft

Assistant Professors: Rebecca J. Epstein-Levi, Julie Gamble

Principal Senior Lecturer: Stacy Simpican

Senior Lecturers: Kristen Navarro, Kristin Rose, Danyelle Valentine

COURSES OFFERED: [GSS](#)

The Department of Gender and Sexuality Studies offers an interdisciplinary curriculum that examines the formation of gender and its intersections with other relations of power, such as sexuality, race, ability, class, nationality, religion, locality and age. The department encourages students to develop new theoretical approaches and to transform the analytical tools of many fields of study. Our courses and instructors pay particular attention to how lives are impacted by systemic inequalities. The goal of our scholarship, teaching, and activism is to make gender and sexuality central rather than peripheral terms of analysis. Our curriculum compels us to recognize the problems and possibilities of our current world and also empowers us to affect change. The Department of Gender and Sexuality Studies offers a major and a minor, and a graduate certificate, which provide a foundation for students who plan to enter professional schools in law, medicine, business, the humanities, and the social sciences.

Program of Concentration in Gender and Sexuality Studies

The interdisciplinary major in gender and sexuality studies consists of 30–36 credit hours of course work, distributed at the Introductory, Intermediate, and Advanced levels, as follows:

Introductory-Level Courses (3 credit hours)

Students must take either GSS 1150/1150W (Sex and Gender in Everyday Life) for 3 credit hours or GSS 1160/1160W (Sex and Society), also for 3 credit hours.

Intermediate-Level Courses (24 credit hours)

With the exception of GSS 4960, GSS 1272 and above are intermediate-level courses. GSS 1111 (First-Year Writing Seminar) also counts as an intermediate-level course. Of the required 24 intermediate-level credit hours, students must earn credit for at least one course in each of the following areas: international/global feminism; history/social movements; and sex/sexuality and society. Courses that meet these requirements are listed below. Students may earn up to 6 credit hours for internship training, independent research, and readings: GSS 3881, GSS 3882, or GSS

3883.

Advanced-Level Course (3 credit hours)

Students must earn credit for GSS 4960 (Senior Seminar), generally taken in the second semester of the student's final year.

Honors Program

The Honors Program in Gender and Sexuality Studies requires 36 credit hours of course work and is designed to afford exceptional students the opportunity to undertake independent research on a topic in feminist and/or gender scholarship in consultation with faculty members. The program is open to all gender and sexuality studies majors with junior standing who have completed at least 24 credit hours of the major and who have earned a 3.3 cumulative grade point average and a 3.3 grade point average in courses counting toward the gender and sexuality studies major. Students must be approved for acceptance into the Honors Program by the department chair. To graduate with honors in gender and sexuality studies, students must:

- Complete 36 credit hours of course work;
- Complete the required courses for the major (described above);
- Submit for approval a short description of the Honors project/thesis to the Chair of Gender and Sexuality Studies no later than second semester of the junior year;
- Complete 6 credit hours of independent research, 4998 and 4999 (Honors Research and Project), typically during the senior year under supervision of the project adviser. These 6 credit hours count as electives in the 36 credit hours of course work for Honors majors;
- Complete an honors project by the second semester of the senior year; and
- Pass an oral examination on the topic of the Honors project/thesis.

Information concerning the Honors Program is available from the Chair of the Gender and Sexuality Studies program. College regulations governing honors may be found in this catalog under Honors Programs.

Minor in Gender and Sexuality Studies

The minor in gender and sexuality studies consists of 18 credit hours of course work, distributed as follows:

Introductory-Level Courses (3 credit hours)

Students must take either 1150/1150W (Sex and Gender in Everyday Life) for 3 credit hours or 1160/1160W (Sex and Society), also 3 credit hours.

Intermediate-Level Courses (12 credit hours)

Of the required 12 intermediate-level credit hours, students must earn credit for at least one course in each of the following areas: international/global feminism; history/social movements; and sex/sexuality and society. Courses that meet these requirements are listed below.

Advanced-Level Course (3 credit hours)

Students must earn credit for GSS 4960 (Senior Seminar), generally taken in the second semester of the student's final year.

Courses approved to fulfill the international/global feminism(s) requirement:

ASIA 2609W (Writing and Gender in Traditional China)

ENGL 3658 (Latino-American Literature)

ENGL 3670W (Colonial and Postcolonial Literature)

ENGL 3742 (Feminist Theory)
FREN 3223 (The *Querelles des femmes*) [in French]
FREN 4320 (French Feminist Thought) [in French]
GSS 2271 (Gender, Space, and Climate Imaginaries)
GSS 3201 (Women and Gender in Transnational Context)
GSS 3281 (Globalization and Policy Making)
GSS 3610 (Womanism in Global Context)
ITA 3340 (*Famous Women* by Boccaccio)
PHIL 3007 (French Feminism)
PSCI 3264W (Global Feminisms)
SOC 3711 (Women, Gender, and Globalization)
SPAN 2990 (Images of the Feminine in Spanish Cinema)

Courses approved to fulfill the history/social movements requirement:

AADS 2214 (History and Myth: Black Women in the U.S.)
CMST 3110 (Women, Rhetoric, and Social Change)
ENGL 3622 (Nineteenth-Century Women Writers)
GSS 2618, formerly 3250/W (Contemporary Women's Movements)
GSS 3246/W (Women's Rights, Women's Wrongs)
HIST 2835 (Sexuality and Gender to 1700)
HIST 2840 (Sexuality and Gender since 1700)
HIST 2855 (Women and Gender in the U.S. to 1865)
HIST 2860 (Women and Gender in the U.S. since 1865)
ITA 3740 (Gangsters, Lovers, Madonnas, and Mistresses)
RLST 2930, formerly 3930 (Women and Religion)
RLST 3926 (Ancient Goddesses)
SOC 2710, formerly 3722 (Gender and Society)

Courses approved to fulfill the sex, sexuality, and society requirement:

AADS 2104 (Popular Culture and Black Sexual Politics)
ANTH 3145 (Sexuality, Gender, and Culture)
CLAS 3100 (Women, Sexuality, and the Family in Ancient Greece and Rome)
CMST 3720 (Communicating Gender)
FREN 4322 (Adultery and Transgressions in Literature) [in French]
GSS 2252 (Sex and Scandals in Literature)
GSS 2256 (Literary Lesbians)

GSS 2612 (LGBT Studies)

GSS 2613 (Compulsory Couplehood)

GSS 2614 (Cowboys, Gangsters, and Drag Kings: Introduction to Critical Masculinity)

GSS 2615 (Transgender Lives in Literature and Film)

HART 3228W (Gender and Sexuality in Greek Art)

HIST 2240 (Sex Law)

HIST 2810 (Women, Health, and Sexuality)

LAS 4550 (Gender, Sexuality and Family in Latin America)

PHIL 3604 (Gender and Sexuality)

RLST 1820 (Religion, Sexuality, Power)

RLST 3225 (Sexuality in the Hebrew Bible and Ancient Near East)

SOC 3723 (Gender, Sexuality, and the Body)

DIRECTOR OF UNDERGRADUATE STUDIES IN GERMAN Silke Schade

DIRECTOR OF UNDERGRADUATE STUDIES IN RUSSIAN Denis Zhernokleyev

DIRECTOR OF GRADUATE STUDIES Meike G. Werner

Professors, Emeriti: Barbara Hahn, Francis Wcislo

Professors: Celia Applegate, Jennifer Fay, Emily Greble, Joel Harrington, Ari Joskowicz, Shaul Kelner, Lutz Koepnick, Allison Schachter, Helmut Smith, Meike Werner, Christoph Zeller

Associate Professors: James McFarland, Karen Ng

Assistant Professors: Abigail Holekamp

Assistant Professors of the Practice: Albina Khabibulina, Silke Schade

Senior Lecturers: David Johnson, Juntao Li, Claire Scott, Denis Zhernokleyev

COURSES OFFERED: [GER](#), [RUSS](#)

German, Russian and East European Studies takes students beyond the headlines to gain in-depth understanding of some of the world's most influential nations and cultures. The department's interdisciplinary curriculum provides a wide range of intellectual experiences, whether your primary interest is in literature, film, visual culture, music, history, thought, or politics. For students who want to engage with German, Russian, or East European culture in a more substantive way, the department offers programs of concentration in German Studies and in Russian Studies.

The department sponsors lectures on topics related to German, Russian and East European society and culture, films, and symposia. Students can also expect a wide variety of extra-curricular and social activities such as Kaffeestunde, Language Tables, Boardgame Night, Halloween Party, Ice Cream Social, Matryoshka Painting, and more. German Studies majors with sufficient academic qualifications are invited to join Delta Phi Alpha, the national German honor society. Russian Studies majors with sufficient qualifications are invited to join Dobro Slovo, the national Slavic honor society.

Students majoring in German Studies are encouraged to enroll in study abroad programs in Bremen (one semester), Freiburg (two semesters), Berlin (one semester), and Vienna (one semester). Non-credit summer language programs and study abroad programs are offered in Berlin and Vienna. Travel grants are available on a competitive basis for internships, language courses, and research projects abroad. For further information, please visit as.vanderbilt.edu/grees.

The Russian and East European Studies program is strongly committed to undergraduate training in the Russian language and cultures and histories of the broader region. Students have several opportunities to study abroad, including summer-, semester- and year-long programs in Tallin, Estonia, where they can study Russian language and literature or choose from a wide range of courses in English in fields such as media, digital technologies, education, law, sociology, and health sciences. The program also periodically offers spring break trips to Latvia with a focus on cultural and historical exploration. For further information, please visit as.vanderbilt.edu/grees.

Program of Concentration in German Studies

A major in German Studies offers deep engagement with the language, history, and culture of Germany and other German-speaking societies. Students majoring in German Studies gain advanced proficiency in speaking and writing German, a detailed understanding of the complex and often haunting history of modern Germany, and rich insights into the unique work of German writers, filmmakers, artists, musicians, and thinkers. Students are required to complete a total of 30 credit hours of course work beyond GER 1102, including the following:

<i>Primary courses:</i> <i>6 credit hours in 2440, 2441, or 2443</i>	6
<i>Beginning and intermediate German language in context:</i> <i>up to 9 credit hours of 1102, 2201, 2202</i>	up to 9
<i>Advanced German language in context:</i> <i>at least 6 credit hours in 3201, 3202W, 3211</i>	at least 6
<i>Electives in German culture and history taught in German:</i> <i>at least 6 credit hours of any course in German between 4551-4557</i>	at least 6
<i>Electives in German culture and history taught in English:</i> <i>up to 12 credit hours of courses taught in English above 2443</i>	up to 12
Total credit hours:	30

Students are permitted to count a maximum of 6 credit hours of instruction in courses outside the GER subject area toward the major, with the approval of the director of undergraduate studies in German; such course work will count toward the 6 credit hour total for elective courses in German culture and history taught in English. Up to 6 credit hours earned through AP exams or transferred from other institutions may count toward the major. Up to 6 credit hours transferred per semester of study abroad may count toward the major.

German Language Proficiency

In addition, students majoring in German will be assessed for language proficiency during their senior year and will be required to submit a paper written for one of their courses due the semester prior to graduation. The director of undergraduate studies in German should be consulted for details on these learning outcome assessments.

Honors Program in German Studies

Candidates for honors in German who meet College of Arts and Science and departmental requirements must complete all requirements for the concentration in German. In addition, students

- must study a minimum of one semester at a German-speaking university (or gain the equivalent experience);
- complete 3 credit hours beyond the basic course requirements, in the form of a course taught in German above GER 4550;
- maintain at least a 3.0 cumulative GPA in courses that count toward the German major and a 3.30 cumulative GPA;
- complete 3 credit hours of 4999. Write an honors thesis and pass an oral examination during their final semester.

Minor in German Studies

A minor in German documents a student's basic competence in the German language as well as familiarity with German-speaking culture. Students can fulfill the requirements of a minor concentration in German by taking GER 2440, 2441, or 2443 and 15 credit hours in the GER subject area, of which 6 credit hours must be earned in courses taught in the German language, for a total of 18 credit hours.

Study Abroad

Students majoring in German Studies are strongly encouraged to complete an immersive German-language experience in a German-speaking country. Students majoring in German Studies are encouraged to enroll in study abroad programs in Bremen (one semester), Freiburg (two semesters), Berlin (one semester), or Vienna (one semester). Non-credit summer language programs and study abroad programs are offered in Berlin and Vienna. Travel grants are available on a competitive basis for internships, language courses, and research projects abroad. Further information is available through the director of undergraduate studies and Vanderbilt Study Abroad.

Program of Concentration in Russian Studies

A major in Russian Studies entails deep and sustained engagement with the language, history, and culture of Russia and Russian speaking communities around the world. As one of the most dynamic actors on the world stage, Russian culture has been at the forefront of the history of literature, film, and visual arts, has produced some of the world's deepest aesthetic engagements with the human condition, and has been at the vanguard of politics both repressive and progressive. Students are required to complete a minimum of 30 credit hours of course work. AP and IB exam credit will not count toward credit hours required for the concentration, but placement exams will be offered for RUSS 1101 and/or 1102. A maximum of 6 credit hours toward the language or elective requirements may be earned from Vanderbilt-approved courses taken from other U.S. institutions or through study abroad programs.

Primary course

- RUSS 1500 (3 credit hours)

Language courses in Russian

- RUSS 1102 [prerequisite 1101] (4 credit hours)
- RUSS 2201-2202 (8 credit hours)
- Two courses in Russian above RUSS 3000 (6 credit hours)

Elective courses 9 credit hours minimum

The 9 credit hours of elective credit may be earned from RUSS courses in Russian above 3000, or in English-language courses with the RUSS subject code (see the list of qualifying courses below). Students concentrating in Russian will be expected to take an assessment exam prior to graduation.

Study Abroad

Students majoring in Russian studies are strongly encouraged to complete an immersive Russian-language experience in a Russian-speaking country. Further information is available through the director of undergraduate studies and Vanderbilt Study Abroad.

Honors Program

Majors with a cumulative GPA of 3.30 or higher may apply to the Honors Program prior to registration of second semester junior year. They will submit a 6 credit hour program of study that couples a RUSS-designated course above 2202 in the first semester senior year with RUSS 4999, Senior Honors Thesis, in the second semester of the senior year. This program must have the approval of the departmental faculty member who will serve as the senior thesis adviser. The senior thesis is defended in the second semester of the senior year before a faculty committee, which may award Honors or High Honors in Russian to the baccalaureate degree.

Minor in Russian Studies

Requirements for a minor in Russian studies include a minimum of 17 credit hours of course work. Required courses are RUSS 1101-1102 and one English-language course with the RUSS subject code (3 credit hours; see the list of qualifying courses below). The remaining 6 credit hours may be earned either from Russian- and English-language courses with the RUSS subject code (see the list of qualifying courses below) or from other relevant courses with approval of the director of undergraduate studies. A maximum of 6 credit hours toward the Russian minor may be earned from Vanderbilt-approved courses taken from other U.S. institutions or through study abroad programs. AP and IB exam credit will not count toward credit hours required for the minor, but placement exams will be offered for RUSS 1101 and/or 1102.

Russian- and English-language courses with the RUSS subject code that qualify for the elective credit hours required for the concentration and minor in Russian:

1874, 1910W, 1911W, 2201-2202 [minor only], 2210, 2230, 2273, 2434, 2435, 2438, 2485, 2537, 2639, 2745, 2800, 2810, 2910, all 3000-level courses, and 4999.

Licensure for Teaching

Candidates for teacher licensure in German at the secondary level should refer to the chapter on Licensure for Teaching in the Peabody College section of this catalog.

German

Students with some experience in German should consult the department for placement.

Note: Students may not earn credit for an introductory language course if they previously have earned credit for a higher-level course taught in that same language. In addition, students may not earn credit for an intermediate-level language course if they previously have earned credit for a higher-level course taught in that same language.

Students who have earned Advanced Placement or International Baccalaureate credit in a foreign language will forfeit the test credit if they complete a lower-level course taught in that same language.

Russian

Note: Students may not earn credit for an introductory language course if they previously have earned credit for a higher-level course taught in that same language. In addition, students may not earn credit for an intermediate-level language course if they previously have earned credit for a higher-level course taught in that same language.

Students who have earned Advanced Placement or International Baccalaureate credit in a foreign language will forfeit the test credit if they complete a lower-level course taught in that same language.

Assistant Professors: Samuel Dolbee, Samuel Finkelman, Ole Molvig, William Robinson, Mark Sanchez, Arianne Sedef Urus

Senior Lecturer: Jacob Betz

COURSES OFFERED: [HIST](#)

The study of history offers a strong foundation for a liberal arts education and a powerful means of understanding the contemporary world. The historian's skills of gathering, assessing, and synthesizing evidence have wide application in many careers, including business and the professions.

The Department of History offers a major and minor in History; a major in Law, History, and Society; and, in cooperation with the Department of Economics, a joint major in Economics and History (described separately in this catalog).

More than one hundred courses in the Department of History are available to Vanderbilt undergraduates. Some focus on a particular historical period, others on a particular region of the world, and still others on topics that cross traditional, chronological, and geographical boundaries. The department is committed to the principle that in a changing world, the way we learn about the past must also change. Our faculty offer innovative courses in topics such as digital research methods, new media, and artificial intelligence, coupled with time-honored traditional approaches such as research in historical archives.

Unless indicated otherwise in the course description, history courses have no prerequisite. Except for History 3980, 4960, 4980–4981, and 4999, courses numbered below 5000 are open to all majors and nonmajors. History 4960 is limited to seniors and juniors who have previously taken History 3000W. History 3980, 4980–4981, and 4999 are limited to students who have been admitted to the History Honors Program.

Program of Concentration in History

The major program requires a minimum of 30 credit hours; no more than 3 credit hours of AP or IB credit may count toward this total. AP and IB credit will count as electives only.

Course work is distributed as follows:

1. History Workshop, 3000W or Junior Honors Seminar 3980W (3 credit hours)

Note: 3000W or 3980W is a prerequisite for the 4960 capstone course. 3980W is limited to second-semester juniors who have been admitted to the Honors Program. Students entering the Honors Program who have already taken 3000W will receive elective credit for that course.

2. Five courses in one of the following concentrations (15 credit hours):

- A. Asia
- B. Latin America
- C. Europe
- D. Early America and the United States
- E. Middle East and Africa
- F. Global and Transnational
- G. Science, Medicine, and Technology
- H. Comparative History/Special Topics

See below for a list of courses that count for Concentrations A, B, C, D, E, F, and G. Students choosing concentration H must have the approval of their adviser and the Director of Undergraduate Studies for a specific program of study. First-Year Writing Seminars (1111) in history may be used to satisfy the relevant program concentration with approval of the Director of Undergraduate Studies.

Program A. Asia

1039, 1050, 1060, 1061, 1070, 1160, 1161, 1162, 1190, 1740, 1881, 1882W, 2100, 2101, 2105, 2106, 2107, 2108, 2108W, 2110, 2111, 2112, 2114, 2115, 2119, 2120, 2140, 2150, 2160, 2180, 2658, 2723, 3090, 3110, 3111, 3112W, 3113, 3190, 3220, 3220W, 3230, 3333, and, as appropriate, 3850, 3882, 3883, 3890, 4960, 4980, 4981, 4999; ASIA 2411, 2413, 2511, 2630; ASAM 2104; MHS 2310.

Program B. Latin America

1039, 1368, 1370, 1375, 1378, 1379W, 1380, 1383, 1384, 1385W, 1469, 2102, 2450, 2457, 2470, 2480, 2490, 2510, 2530, 2535, 2540, 2542, 2544, 2560W, 2570, 2845, 3100, 3230, 3280, and, as appropriate, 3850, 3882, 3883, 3890, 4960, 4980, 4981, 4999; AADS 4256; JS 2555.

Program C. Europe

1039, 1040W, 1320, 1333, 1345, 1350, 1351W, 1355W, 1360, 1470, 1480, 1490W, 1500, 1510, 1510L, 1520, 1545, 1580, 1582W, 1584W, 1586W, 1589, 1600, 1605, 1700, 1760, 2130, 2135, 2136, 2140, 2160, 2161, 2162, 2163, 2164, 2170, 2190, 2205, 2210, 2220, 2230, 2237, 2238, 2240, 2250, 2255, 2260, 2270, 2280, 2290, 2293, 2294, 2300, 2310, 2340, 2380, 2382, 2383, 2385, 2410, 2450, 2595W, 2658, 2660, 2720, 2760, 2760W, 2800, 2835, 2840, 2995, 3010, 3050, 3070W, 3100, 3110, 3120, 3150, 3180, 3190, 3210, 3230, 3240, 3240W, 3260, 3270, 3275, 3290, 3310W, 3333 and, as appropriate, 3850, 3882, 3883, 3890, 4960, 4980, 4981, 4999; CLAS 2100, 2110, 2120, 2150, 2160, 2180, 2300, 3110; ECON 3160; EUS 2201, 2208, 2220; GER 2440, 2556, 2563, 2570; JS 1111.09, 1220, 2450, 2470, 2470W, 2570, 2995, 3100; PHIL 2100; RLST 2250W, 3316, 3350, 4371; RUSS 2800, 2810, 2820, 2910, 2915.

Program D. Early America and the United States

1039, 1250W, 1320, 1353, 1375, 1383, 1385W, 1390, 1395, 1400, 1405, 1410, 1420, 1422W, 1425W, 1427, 1427W, 1430W, 1431, 1438, 1440, 1469, 1480, 1500, 1520, 1545, 1550, 1551, 1605, 1610, 1640, 1650, 1660, 1665, 1667, 1669, 1690, 1691, 1693, 1699, 1710W, 1725W, 1730, 1735W, 1740, 1770, 1780W, 2111, 2119, 2239, 2240, 2530, 2535, 2542, 2560W, 2580, 2590, 2595W, 2600, 2610, 2620, 2630, 2640, 2650W, 2655, 2660, 2662, 2684, 2685, 2686, 2689, 2690, 2691, 2692W, 2700, 2710, 2720, 2721, 2722, 2723, 2725, 2730, 2735, 2740, 2749, 2750, 2752, 2760, 2760W, 2761, 2780, 2800, 2810, 2840, 2845, 2855, 2860, 2900, 2995, 3010, 3040, 3045W, 3050, 3070W, 3100, 3140, 3170, 3190, 3230, 3240W, 3285, 3333 and, as appropriate, 3850, 3882, 3883, 3890, 4960, 4980, 4981,

4999; AADS 2214; AMER 2700; ASAM 2104; CAL 2175; ECON 2150, 3150; JS 2470, 2470W, 2540, 2560; MHS 2110.

Program E. Middle East and Africa

1039, 1161, 1190, 1200, 1250W, 1269, 1270, 1270W, 1271W, 1280, 1281W, 1725W, 2137, 2138, 2139, 2140, 2141, 2154, 2155, 2160, 2170, 2180, 2190, 2413, 2413W, 2660, 2770, 3150, 3190, 3200, 3209, 3210, 3230, and, as appropriate, 3850, 3882, 3883, 3890, 4960, 4980, 4981, 4999; AADS 2106; CLAS 2180, 3010; JS 1111.09, 1200, 1220, 2540, 2600, 2610, 2620, 3210; RLST 4371.

Program F. Global and Transnational

1039, 1040W, 1162, 1190, 1270, 1270W, 1271W, 1280, 1345, 1353, 1368, 1370, 1378, 1379W, 1380, 1383, 1385W, 1469, 1470, 1520, 1522, 1525, 1530, 1545, 1600, 1605, 1610, 1665, 1691, 1700, 1725W, 1740, 1760, 2106, 2110, 2137, 2138, 2139, 2140, 2141, 2150, 2160, 2170, 2180, 2190, 2238, 2240, 2294, 2413, 2413W, 2450, 2457, 2480, 2490, 2530, 2535, 2540, 2542, 2544, 2570, 2595W, 2658, 2660, 2700, 2710, 2721, 2722, 2723, 2725, 2735, 2740, 2760, 2760W, 2775, 2790, 2835, 2840, 2845, 2900, 2995, 3010, 3100, 3110, 3112W, 3120, 3150, 3190, 3200, 3209, 3215, 3220W, 3230, 3240W, 3296, 3297, 3333, and, as appropriate, 3850, 3882, 3883, 3890, 4960, 4980, 4981, 4999; ASIA 2413, 2630, 3155, 3210W, 3630; ASAM 2104; CLAS 2120, 2180, 3010, 3110; JS 1200, 1220, 1240, 2450, 2540, 2845, 3000, 3100; EUS 2220; MHS 2110; RLST 3306, 4371; RUSS 2810, 2820, 2910, 2915.

Program G. Science, Medicine, and Technology

1354, 1355W, 1385W, 1470, 1480, 1490W, 1500, 1510, 1510L, 1515, 1518, 1520, 1522, 1525, 1530, 1780W, 2108, 2108W, 2112, 2139, 2160, 2413W, 2780, 2790, 2800, 2810, 3040, 3045W, 3050, 3070W, 3110, 3113, 3333 and, as appropriate, 3850, 3882, 3883, 3890, 4960, 4980, 4981, 4999; ANTH 4373; ASIA 2630, 3630; ASTR 2130; CLAS 2300, ENGL 3720 or 3720W; MATH 3000; MHS 2110, 2310, 2320, 2430; and other courses, as appropriate, with approval of the Director of Undergraduate Studies.

Note: no more than 6 credit hours may be from courses outside the Department of History

3. Capstone course (3–6 credit hours)

One of the following, to be taken in the junior or senior year; all of the options will require the student to write a major paper. Any capstone course within the student's area of concentration will count toward the five-course requirement for that concentration.

Option 1: 3883, Internship Research (3 credit hours). Must be taken in conjunction with 3880 (Internship Training). Prerequisite: 3000W. *Note:* a student may take 3883 as an elective before completing 3000W but in this case 3883 will not count as a capstone course.

Option 2: 4960, Majors Seminar (3 credit hours). Prerequisite: 3000W.

Option 3: 4980–4981, Senior Honors Seminar (6 credit hours). Limited to seniors in the History Honors Program. *Note:* At the discretion of the Director of Honors and the Director of Undergraduate Studies, a student who has taken 4980 but does not take 4981 may be considered to have fulfilled the capstone requirement for the major.

4. Electives (6–12 credit hours, depending on the nature of the capstone course)

Program of Concentration in Law, History, and Society

As a human institution self-consciously aware of its past, “The Law” raises a complex set of issues that can be addressed historically. Legislation and jurisprudence, for example, allow historians a privileged perspective into how societies sought to define themselves, their values, and their membership. Constitutions provide maps of political power, and serve as sites of struggle over goods both real and symbolic. Records of legal practice are often well preserved, allowing access to the voices and actions of people who are usually left out of systems of political organization.

This major approaches law from both a historical and an interdisciplinary perspective. Emphasis will be placed on close reading of legal documents, research in legal archives, and analytical writing. Students will be encouraged to develop reading programs and research topics that stretch across national and chronological boundaries, and to think comparatively. Students may not major both in History and in Law, History, and Society. Students majoring in Law, History, and Society may apply to receive honors through the History Honors Program.

The major program requires a minimum of 30 credit hours in history. No more than 3 credit hours of AP or IB credit may count toward this total. AP and IB credit will count as electives only.

Course work is distributed as follows:

1. History Workshop. 3000W or 3980W (3 credit hours)

Note: 3000W is a prerequisite for the 4960 capstone course. 3980W is limited to second-semester juniors who have been admitted to the Honors Program. Students entering the Honors Program who have already taken 3000W will receive elective credit for that course.

2. Law, History, and Society: Five courses from the following:

1040W, 1061, 1271W, 1345, 1352, 1379W, 1383, 1384, 1385W, 1430W, 1540, 1550, 1551, 1580, 1667, 2141, 2151, 2152, 2155, 2161, 2162, 2163, 2164, 2190, 2237, 2238, 2239, 2240, 2290, 2293, 2310, 2450, 2457, 2610, 2650W, 2658, 2662, 2690, 2691, 2692W, 2750, 2760, 2760W, 2761, 2762, 2763, 2770, 2855, 2860, 3100, 3170, 3209, 3290, 3296, 3297, and as appropriate, 3850, 3882, 3883, 3890, 4960, 4980, 4981, 4999; CAL (formerly AMER) 2700; CLAS 3150, 3160; CMST 3150; ENGL 3734; EUS 2202, FREN 4232; JS 2150; LAS 3500; MHS 2320; PHIL 3623, 3610; PSCI 1103, 1150, 2208, 2226, 2251, 2262, 2265, 2266, 3260, 2245, 3893; SOC 3605, 3611, 3613, 3621; and other courses, as appropriate, with approval of the Director of Undergraduate Studies of Law, History, and Society.

Note: No more than 6 credit hours may be from courses outside the Department of History.

First-Year Writing Seminars (1111) in history may be used to satisfy the relevant program concentration with approval of the Director of Undergraduate Studies of Law, History, and Society.

3. Capstone course (3–6 credit hours)

One of the following, to be taken in the junior or senior year; all of the options will require the student to write a major paper, the topic of which must be approved by the Director of Undergraduate Studies of Law, History, and Society. Any capstone course on a topic concerning law, history, and society will count toward the five-course requirement for the program concentration.

Option 1: 3883, Internship Research (3 credit hours).

Must be taken in conjunction with 3880 (internship training). Prerequisite: 3000W. Note: a student may take 3883 as an elective before completing 3000W but in this case 3883 will not count as a capstone course.

Option 2: 4960, Majors Seminar (3 credit hours).

Prerequisite: 3000W.

Option 3: 4980–4981, Senior Honors Seminar (6 credit hours).

Limited to seniors enrolled in the History Honors Program. *Note:* At the discretion of the Director of Honors and the Director of Undergraduate Studies in Law, History, and Society, a student who has taken 4980 but does not take 4981 may be considered to have fulfilled the capstone requirement for the major.

4. Electives (6–12 credit hours in history, depending on the nature of the capstone course)

Electives may include any courses, not used to satisfy any of the above requirements, offered by the Department of History or listed above in major requirement #2.

Honors Program

The Honors Program in History is a three-semester program of study. It offers superior undergraduate history majors a program of advanced reading, research, and writing. The Honors Program combines seminar work and independent study under the supervision of a thesis adviser. This structure provides participants an introduction to historical research and writing, as well as the opportunity to study defined areas of history and significant historical problems that accord with their own interests. The final objectives of the Honors Program are successful authorship of the honors thesis and graduation with honors or highest honors in the major.

Students apply to the Honors Program in the first semester of the junior year. Students meeting college and departmental requirements will enroll for a total of 12 credit hours: History 3980W, Junior Honors Seminar in History (3 credit hours); History 4980–4981 Senior Honors Research Seminar (6 credit hours); and 4999, Senior Honors Thesis (3 credit hours). In addition, the Honors Program requires an oral defense of the honors thesis before a faculty committee at the end of the third semester.

Program of Concentration in Economics and History

This is an interdisciplinary program split between economics and history that provides a more focused program of study while requiring fewer credit hours than a double major in the two fields. See the Economics and History section of this catalog for details.

Licensure for Teaching

Candidates for teacher licensure in history at the secondary level should refer to the chapter on Licensure for Teaching in the Peabody College section of this catalog.

Minor in History

The minor in history requires a minimum of 18 credit hours in courses that are offered by the Department of History or that are listed above in programs A–G of the history major, among which no more than two courses may be outside the Department of History. At least 9 credit hours must be taken at the 2000 level or higher. Students must

complete 3000W. No more than 3 credit hours of AP or IB credit may count toward this total.

CHAIR Kevin D. Murphy

DIRECTOR OF UNDERGRADUATE STUDIES Sheri Shaneyfelt

DIRECTOR OF GRADUATE STUDIES Sheri Shaneyfelt

Professors, Emeriti: Leonard Folgarait, Vivien Green Fryd, Ljubica Popovich

Professors: Kevin Murphy, David Price

Associate Professors: Jelena Bogdanovic, Tracy G. Miller, Elizabeth J. Moodey, Betsey A. Robinson, Rebecca K. VanDiver

Assistant Professor: Matthew Worsnick

Assistant Professor of the Practice: Sheri Shaneyfelt

Senior Lecturers: Jack Crawford, Susan Dine

COURSES OFFERED: [HART](#)

The Department of History of Art and Architecture treats critically the major fields in world art, from ancient to contemporary, and connects the arts to the other humanities. Many students will use the program in history of art and architecture as a foundation for careers in which analytical reading and writing skills gained in the major are especially valued: as the basis for advanced training in professional schools (such as architecture, law, medicine, journalism, and business), for postgraduate work in history of art or architecture, and for employment in galleries, museums, or design-related fields. The department helps students become readers of visual images and material culture throughout their lives, and encourages visual approaches to learning. In addition, the department provides practical experience in research, writing, and exhibition organization that are key to pursuing museum and gallery careers, as well as courses in museum studies.

Majors in history of art and architecture participate in the activities of the Vanderbilt History of Art Society, the student architecture group, and work closely with departmental advisers. The History of Art Society and the department sponsor events such as panels, lectures, debates, and other programs where majors meet and engage in discussions with historians of art and museum curators.

The Department of History of Art and Architecture offers a major and minor in history of art, a major and minor in architecture and the built environment., and a minor in museum studies.

Program of Concentration in History of Art

The history of art major requires 30 credit hours and gives students the opportunity to study art and visual culture across a wide range of historical periods, from ancient to contemporary. The program is designed to allow for concentration in particular periods and areas of interest. By requiring courses in both the lecture and seminar format, the program aims to provide a basis of comprehensive knowledge and challenging opportunities for more specialized instruction.

Students should consider related offerings in cognate disciplines in the humanities and social sciences. Those planning graduate work in history of art should pursue advanced studies—which may include honors—and take advanced courses in other departments offering complementary course work. Advanced language studies are strongly recommended, as graduate programs expect reading facility in one language for the M.A. and two for the Ph.D., with French and German the most commonly required. Non-European languages should be considered for those primarily interested in global traditions.

Course work is distributed as follows:

- A 1000-level course (3 credit hours): Students must complete one 1000-level survey course in history of art or architecture selected from HART 1100, 1105, 1120, 1121, 1122, 1200, 1205, 1220, 1300, 1400, or 1600. This course is not a prerequisite for further history of art course work but must be taken at Vanderbilt; AP credit will not be accepted.
- Area requirements (15 credit hours)—five history of art courses at the 2000 level or above, one each from the following areas:
 - Ancient: HART 2200, 2210, 2220, 2230, 2250, 2254W, 2260, 3224, 3226, 3228W, 3240W, 3252, 3256W; CLAS 2250, 3200, 3700, 3710, 3720, 3730
 - Medieval: HART 2270, 2275, 2285, 2288, 2290, 3364W
 - Renaissance/Baroque: HART 2310, 2320W, 2323, 2325, 2330, 2362, 2390, 3332, 3334, 3334W
 - Modern: HART 2600, 2620, 2622, 2625, 2650, 2660, 2662, 2665, 2710, 2720, 2722, 2737, 2740, 2750, 2755, 2760, 2765, 2772, 2781, 2783, 3605W, 3712W, 3718W, 3725W, 3735, 3740, 3757W, 3765W, 3766W, 3767W
 - Global: HART 2100, 2105W, 2110, 2112W, 2120, 2130, 2150, 2151, 2155W, 2160, 2165, 2170, 2175, 2180, 2192, 2779, 3140, 3164W, 3173W, 3174
- Electives (6 credit hours)—two upper-level courses in history of art (HART 2100 to 3850 and 3890; CLAS 2250, 3200, 3700, 3710, 3720, 3730) in addition to the area requirements.
- Advanced Seminars (6 credit hours)— any HART 3000-level writing class, 4960

Program of Concentration in Architecture and the Built Environment

The track in architecture and the built environment requires 30 credit hours and promotes interdisciplinary and trans-institutional study. It enables students to develop breadth and expertise in the history and theory of architecture, landscape architecture, and constructed environments; design studies; and theoretical and historical approaches to analyzing urban scale and city planning. Students can build a foundation for graduate work in these fields as well as for spatially related specializations in cognate disciplines such as anthropology, political science, public policy, sociology, demography, public health, environmental studies, civil engineering, computer science, and geography and geographic information systems.

Course work is distributed as follows:

1. A 1000-level course (3 credit hours): Students must complete one 1000-level survey course in history of art or architecture selected from HART 1100, 1105, 1120, 1121, 1122, 1200, 1205, 1210W, 1220, 1300, 1330W, 1400, 1740W, or CLAS 1020. This course is not a prerequisite for further history of art course work but must be taken at Vanderbilt; AP credit will not be accepted.
2. Three courses (9 credit hours) in architectural, design, landscape, or urban history selected from HART 2100, 2105W, 2110, 2112W, 2120, 2130, 2150, 2151, 2155W, 2160, 2175, 2180, 2200, 2210, 2220, 2225, 2230, 2250, 2254W, 2270, 2275, 2285, 2290, 2325, 2330, 2650, 2662, 2665, 2720, 2722, 2740, 2779, 2780, 2781, 2782, 2783, 2815, 2815W, 2820, 3140, 3174, 3252, 3790; and CLAS 2250, 3200.
3. One advanced seminar in architectural history (3 credit hours) selected from HART 3164W, 3240W, 3256W, 3725W, 3757W, 3765W, 3766W, 3825W or 3810W (when the course topic concerns architecture and the built environment, landscape architecture, design studies, or urban planning).
4. Five electives (15 credit hours): Electives may include any HART courses listed above in major requirements 1-3 not used to satisfy any of those requirements, or courses chosen from the list below. A maximum of two

electives may be taken from any one department (with the exception of History of Art and Architecture), and a maximum of two electives may be taken at the 1000 level. (Non-equivalent courses taken in study-abroad programs will likely count in this category).

Students will work with the Director of Undergraduate Studies and departmental advisers to design a program of study that addresses their academic interests and career goals. Students interested in graduate programs in architecture and design should review elective selections with the pre-architecture adviser.

AFRICAN AMERICAN AND DIASPORA STUDIES: 1016, Race Matters; 1716, The African City: Urban Landscapes on the Page, Screen, and Canvas; 2294, Black Paris-Paris Noir: The African Diaspora and the City of Light; 4506, Slavery and Public Memory

ANTHROPOLOGY: 2101, Theories of Culture; 2110, Gender and Cultural Politics; 2130, Global Infrastructure and Everyday Life; 2150, Urban Ecology; 2214, Art and Architecture in the Ancient Americas; 2220W, Human Landscapes; 2225, Climate Change, Collapse, and Sustainability in History; 2229W, Contested Ground: Sacred Sites; 2231, Ancient Andean Civilizations; 3161, Colonial Encounters in the Americas; 3200, Ancient Cities; 3202, The Collapse of Civilizations; 3261, Introduction to Geographic Information Systems and Remote Sensing; 3867, Digital Archaeology; 4154, Environmental Anthropology

ART STUDIO: 1101, Introduction to Studio Art; 1102, Drawing and Composition I; 1200, Photography I; 1201, Alternative Photography; 1202, Digital Imaging I; 1300, Painting; 1400, Ceramics; 1401, Sculptural Ceramics; 1500, Sculpture; 1501, Assemblage; 1502, Installation Art; 1503, Text and Image; 1505, Graphic Design; 1600, Printmaking: Etching and Relief; 1601, Printmaking: Screen and Lithography; 1700, Video Art; 1702, Portable Media I; 1900, Social Collective Art Practice; 2100, Drawing and Composition II; 2102, Drawing: Color Media I; 2200, Photography II; 2202, Digital Imaging II; 2300, Painting II; 2400, Ceramics II; 2401, Concept and Clay: Composite Forms; 2500, Sculpture II; 2600, Printmaking II; 2700, Video Art II; 2702, Portable Media II; 3100, Drawing and Composition III; 3102, Drawing: Color Media II; 3200, Photography III; 3300, Painting III; 3600, Printmaking III

ASIAN STUDIES: 2100W, Fashioning the Self: Coming of Age and Asian Modernities

BIOLOGICAL SCIENCES: 1103/1103L, Green Earth: The Biodiversity and Evolution of Plants; 2238/2238L, Ecology; 3233, Conservation Biology

CHEMICAL AND BIOMOLECULAR ENGINEERING: Digital Fabrication 2100; Rapid Prototyping

CINEMA AND MEDIA ARTS: 1600, Introduction to Film and Media Studies; 2400, History of World Cinema; 3257 Virtual Reality Design

CIVIL ENGINEERING: 2101, Civil and Environmental Engineering Information Systems; 2120, Sustainable Design Civil Engineering; 2200, Statics; 2205, Mechanics of Materials; 3200, Structural Analysis; 3205, Structural Design; 3501, Transportation Systems Engineering; 3600, Environmental Engineering; 4100, Geographic Information Systems (GIS); 4205, Intelligent Transportation Systems; 4320, Data Analytics for Engineers; 4415, Construction Materials and Methods; 4425, Building Information Modeling; 4430, High Performance and Green Buildings; 4505, Urban Transportation Planning; 4950, Civil Engineering Design I; 4951, Civil Engineering Design II

CLASSICAL AND MEDITERRANEAN STUDIES: 2250, Roman Art and Architecture; 3190/3190W, Augustan Rome; 3200, The Greek City; 3700, Cults, Festivals, and Sanctuaries; 3710, Archaeology, History, and Culture in Greece: Kenchreai Field School; 3720, History and Art of Ancient Rome; 3730, The Roman to Medieval Near East: Caesarea Excavations, Israel

COMMUNICATION STUDIES: 2800, Rhetoric and Civic Life; 2950, Media and Visual Culture; 3100, Rhetoric of Social Movements; 3700, Political Communication

COMPUTER SCIENCE: 1000, The Beauty and Joy of Computing; 1101, Programming and Problem Solving; CS 1103 Introductory Programming for Engineers and Scientists; CS 1104 Programming and Problem Solving in Python; 1151, Computers and Ethics

CULTURE, ADVOCACY AND LEADERSHIP: 3200, Global Perspectives on the U.S.

EARTH AND ENVIRONMENTAL SCIENCES: 1510/1510L, The Dynamic Earth: Introduction to Geological Sciences; 2110, Global Climate Change; 2150, Science, Risk, and Policy; 4750, Sustainability: An Environmental Science Perspective; 4760, Agent- and Individual-Based Computational Modeling

ECONOMICS: 1010, Principles of Macroeconomics; 1020, Principles of Microeconomics; 2170, Environmental Economics; 2340, Plunder and Pillage: The Economics of Warfare and Conflict; 3170, Environmental and Natural Resource Economics; 3230, Urban Economics

ENGINEERING SCIENCE: 2700, Engineering Career Development; 2900, Engineering and Public Policy

ENGLISH: 3692, Desire in America: Literature, Cinema, and History; 3694, America on Film: Art and Ideology; 3695, America on Film: Performance and Culture; 3730, Literature and the Environment

ENVIRONMENTAL ENGINEERING: 3610, Sustainable Development; 4615, Environmental Assessments; 4700, Energy and Water Resources

EUROPEAN STUDIES: 2201, European Society and Culture; 2203, The Idea of Europe; 2800, Pursuing Utopia: Social Justice and Romanticism in the Alps; 2260, European Cities

FRENCH: 3634, Parisian Geographies: Paris in 19th and 20th Century Art and Literature

GENDER AND SEXUALITY STUDIES: 1160, Sex and Society; 1273, Gender and the City; 2268, Gender, Race, Justice, and the Environment; 3308, Gender, Race, and Urban Mobilities

HISTORY: 1039, Global History 1453 to Present; 1281/1281W, The Making of African Cities: Histories of Globalization and Migration; 1355W, Innovation and Renovation in Renaissance Europe; 1368, Rio de Janeiro: Culture and Citizenship in the Marvelous City; 1430W, North American Indians and the Environment; 1510/1510L, The Scientific Revolution/Digital History Lab; 1586W, Nazi Germany, the Holocaust, and Digital Humanities; 2220, Medieval and Renaissance Italy, 1000-1700; 2413/2413W, Global History of Waste; 2655, Historic Black Nashville; 2686, Race, Rights, and the American Dream; 2780, Superhuman Civilization; 3050, Innovation; 3140, History of New Orleans; 3150, Cities of Europe and the Middle East; 3180, Making of Modern Paris

HISTORY OF ART AND ARCHITECTURE: 1111.09, Seven Wonders of the Ancient World; 1111.11, Sacred Geographies of China; 1111.12, Pompeii: Life and Death of a Roman City; 1111.17, New York City Architecture, 1111.19, Art and

the Environment 1400-1800; 1111.20, Art, Race and Urban Space

HUMAN AND ORGANIZATIONAL DEVELOPMENT : 3200, Global Dimensions of Community Development; 3202, Community Development Theory; 3212, Community Development Organizations and Policies; 3242, Environmental Politics and Justice; 3270, Global Sustainable Development; 342, Introduction to Community Psychology

ITALIAN: 3642, Italian Visual Culture; 3701, City Fictions

JEWISH STUDIES: 2450, The Jewish Diaspora; 2520, Zionism: Politics, Religion, and Ethnicity; 3730, The Roman to Medieval Near East: Caesarea Excavations, Israel

MATERIALS SCIENCE AND ENGINEERING: 1500, 1500L, Materials Science I and Laboratory

MATHEMATICS: 1100, Survey of Calculus; 1200, Single-Variable Calculus I; 1201, Single-Variable Calculus II; 1300, Accelerated Single-Variable Calculus I; 1301, Accelerated Single-Variable Calculus II; 2300, Multivariable Calculus; 2310, Multivariable Calculus with Matrix Algebra; 2400, Differential Equations with Linear Algebra

MECHANICAL ENGINEERING: 2160, Introduction to Mechanical Engineering Design; 3248, Heat Transfer; 4258, Engineering Acoustics; 4259, Engineering Vibrations; 4262, Environmental Control

MEDICINE, HEALTH, AND SOCIETY: 1950, Theories of the Body; 2240, Bionic Bodies, Disability Cultures; 3040, Designing Healthy Publics; 3120, Medicine, Technology, and Society

MUSIC LITERATURE: 1660, Music and Tourism: Music City Museum and Memorabilia; 2350, The Music and Culture of Venice; 3230, Music and the Construction of National Identity

NEUROSCIENCE: 2201, Neuroscience

Honors Program

The honors program in history of art and architecture allows exceptional undergraduate students to undertake independent research on a topic in art or architectural history in consultation with faculty members. The program is open to all history of art and architecture majors with junior standing who have earned a 3.30 grade point average in all university courses and a 3.30 grade point average in history of art courses. They must also be approved for acceptance into the honors program by the department faculty. Completion of the program requires 9 credit hours of study: HART 3850, Independent Research (the second semester of the junior year, unless studying abroad, in which case one is expected to enroll in this class the first semester of the junior year); HART 4998, Honors Research (first semester of the senior year); and HART 4999, Honors Thesis (second semester of the senior year); submission of an honors thesis; and successful completion of an oral defense of the thesis. These independent research credit hours are in addition to the 30 credit hours required for the major in history of art or architecture and the built environment. Students meeting these requirements receive honors or highest honors in history of art or architecture and the built environment, depending on the quality of the thesis, grades in history of art and architecture courses, and defense results. Successful departmental honors students will receive a Vanderbilt diploma that records honors or highest honors in history of art or architecture and the built environment.

Minor in History of Art

The minor in history of art requires 18 credit hours of course work, including the following:

Two 1000-level courses from 1100, 1105, 1120, 1121, 1122, 1200, 1205, 1220, 1300, 1400, 1600, or CLAS 1020, plus any four upper-level

history of art courses (HART 2100 to 3850 and 3890, 4960), and classes designated CLAS 2250, 3200, 3700, 3710, 3720, 3730.

Minor in Architecture and the Built Environment

The minor in architecture and the built environment requires 18 credit hours of course work, distributed as follows:

1. A 1000-level course (3 credit hours): Students must complete one 1000-level survey course in history of art or architecture selected from HART 1100, 1105, 1120, 1121, 1122, 1200, 1205, 1210W, 1220, 1300, 1330W, 1400, 1740W, or CLAS 1020.

2. Three courses (9 credit hours) in architectural, design, landscape, or urban history selected from HART 2100, 2105W, 2110, 2112W, 2120, 2130, 2150, 2151, 2155W, 2160, 2175, 2180, 2200, 2210, 2220, 2225, 2230, 2250, 2254W, 2270, 2275, 2779, 27831, 2782, 2783, 2285, 2290, 2325, 2330, 2650, 2662, 2665, 2720, 2722, 2740, 2780, 2781, 2782, 2815, 2820, 3140, 3174, 3252, 3790; and CLAS 2250, 3200.
3. Two electives (6 credit hours): Electives may include any HART courses listed above in minor requirements 1-2 not used to satisfy either of those requirements or courses chosen from the Electives list for the architecture and the built environment major. No more than one elective course may be taken at the 1000 level.

Minor in Museum Studies

The minor in museum studies requires 18 credit hours of course work, distributed as follows:

1. HART 2805 Introduction to Museum Studies (3 credit hours)
2. HART 2808W Contemporary Issues in Museums (3 credit hours)
3. HART 3880 Internship Training and HART 3883 Internship Research or CLAS 3880 Internship Training and CLAS 3881 Internship Readings (combined minimum of 3 credit hours) or an approved HART seminar course, or an approved HART 3850 Independent Research course related to Museum Studies (3 credit hours)
4. Three electives (9 credit hours): three additional courses selected from ANTH 3136 Global Cultural Heritage, ANTH 3260 Crafting Pottery in the Ancient World, ANTH 3867 Digital Archaeology, HART 1300 Monuments and Masterpieces, HART 1400 U.S. Icons and Monuments, HART 2665 Vanderbilts as Patrons, HART 2772 Contemporary Art Exhibitions, HART 2810W Museum Exhibition, HART 2815W Digital Heritage: Methods and Practice, HART 3810W Exhibiting Historical Art, HOD 2700 Public Policy, MUSL 1660 Music and Tourism: Music City Museum & Memorabilia, PPS 2200 Social Contexts Public Policy, PSCI 2253 Public Administration, or PSCI 3253 Ethics and Public Policy.

Honors

Applicable to students who matriculated prior to Fall 2025.

COURSES OFFERED: [HONS](#)

Courses designated “Honors” are parts of a special honors program in liberal education called the College Scholars program. They may be taken only by students who have been appointed College Scholars by the dean of the College of Arts and Science.

Honors seminars offered in the College Scholars program provide an especially interesting and challenging way for College Scholars to complete certain parts of the program for Achieving Excellence in Liberal Education (AXLE).

They are designed to cover topics through the intensive analysis afforded by the seminar setting and format. An honors seminar will satisfy the requirement for a first-year writing seminar. Honors 1810W, 1820W, 1830W, 1840W, 1850W, and 1860W count toward the AXLE requirements identified by the seminars’ titles. Honors 1810W are Humanities and the Creative Arts (HCA) courses; Honors 1820W are Perspectives (P) courses; Honors 1830W are Social and Behavioral Sciences (SBS) courses; Honors 1840W are History and Culture of the United States (US) courses; Honors 1850W are Mathematics and Natural Sciences (MNS) courses; Honors 1860W are International Cultures (INT) courses.

In addition to regular credit hours and grade points, honors seminars carry honors points toward graduation with the designation “Honors in the College of Arts and Science.” College Scholars must earn fifteen honors points to receive that designation (they are not required to earn this designation but may take as many honors seminars as they wish).

They may earn up to thirteen of the required fifteen points in honors seminars: three points each for any HONS seminar taken. Single honors points may be earned (a) in departmental honors sections of regular courses, (b) in independent project approved by the associate dean for honors programs, and (c) in a regular course in which an enriched curriculum approved by the Committee on the Honors Program is pursued. Honors points are only earned for courses in which the student earns the grade *B* or better.

Jewish Studies

[Honors Program](#)

[Minor in Jewish Studies](#)

CHAIR Ari Joskowicz

DIRECTOR OF UNDERGRADUATE STUDIES: Adam Meyer

Professors, Emeriti: Amy-Jill Levine, David Wasserstein

Professors: Phillip Ackerman-Lieberman, Robert Barsky, Emily Greble, Ari Joskowicz, David Price, Allison Schachter

Associate Professors: Julia Cohen, Nathalie Debrauwere Miller, Shaul Kelner, Adam Meyer, Paul Miller

Assistant Professors: Emanuele Costa, Rebecca J. Epstein-Levi, Samuel Finkelstein, Simone Stirner

Senior Lecturer: Judith Klass

COURSES OFFERED: [HEBR](#), [JS](#)

Jewish Studies at Vanderbilt offers an interdisciplinary academic program that facilitates the critical study of Jewish history, religion, language, philosophy, politics, culture, society, music, art, and literature across continents and over three millennia. Integral to understanding crucial moments in the formation of Christianity and Islam as well as distinct episodes in the cultures of the modern Middle East, Europe, and America, the program accesses the resources of the entire university to explore Judaism, its evolution and expression from biblical times to the present. This interdisciplinary program reflects Vanderbilt's commitment to advancing the understanding of diverse cultures and traditions. Students of all backgrounds will find in Jewish Studies at Vanderbilt a wide array of material and methodologies, presented by scholars from history, anthropology, sociology, religious studies, philosophy, literature, and history of art. Students may focus on several areas of concentration and tailor the major to their academic and career interests. They also have access to courses offered by the schools of divinity, education, and music; they have access to the Zimmerman Judaica collection as well as the opportunity to study abroad, pursue internships locally or nationally, and do research in archives overseas. The interdisciplinary nature of Jewish Studies offers excellent preparation for graduate studies and provides an outstanding academic foundation for a variety of rewarding career paths. Visit as.vanderbilt.edu/jewishstudies for more details.

Program of Concentration in Jewish Studies

The major in Jewish studies requires a minimum of 30 credit hours.

1. *Introductory course, 3 credit hours.* JS 1002 or 1002W, Introduction to Jewish Studies, JS 1010: Introduction to Judaism, or JS 1040: Introduction to Modern Jewish History.
2. *Language, 6 credit hours.* A year of modern Hebrew (Hebrew 2201–2202, Intermediate Hebrew) or biblical Hebrew (REL 5120, Intermediate Hebrew). *Proficiency at the level of intermediate Hebrew can be demonstrated through testing. If this option is exercised, students will take an additional 6 credit hours of electives toward the major. *In place of biblical or modern Hebrew, interested students may substitute one of the following languages of the Jewish people: Rabbinic Hebrew, Aramaic, Yiddish, Ladino, or Judaeo-Arabic. For languages not presently taught at Vanderbilt, proficiency at the intermediate level may be demonstrated through an exam administered by a designated member of the Jewish Studies faculty. If this option is exercised, students will take an additional 6 credit hours of electives toward the major.
3. *Electives (minimum of 21 credit hours)*—Any of the courses listed below that are not used to fulfill another requirement towards the major may be counted as an elective with the exception of JS 3880, which cannot count toward the major because it must be taken Pass/Fail. In addition to courses drawn from Arts and Science departments and the professional schools, nontraditional course work may also be selected, including archaeology at Tel Megiddo (Israel), service learning, and internships. Study abroad is encouraged and can be fulfilled with CET Jewish Studies in Prague and at the Hebrew University of Jerusalem.

Honors Program

The Honors Program in Jewish Studies offers superior students a more intensive concentration within their major field. Admission to the program requires:

1. A 3.3 cumulative grade point average.
2. A 3.3 cumulative grade point average in Jewish Studies.
3. Completion of the junior year.

Requirements for graduation with honors in Jewish Studies are:

1. 6 credit hours in Honors sections (JS 4980–4981), including completion of thesis—these credit hours may count as elective credit toward the major. Honors thesis is to be completed by mid-spring of the senior year.
2. Successful completion of an honors oral examination on the topic of the thesis.

Minor in Jewish Studies

The minor in Jewish studies provides a basic understanding of Jewish history and culture across continents and the past three millennia. The minor requires a minimum of 18 credit hours.

1. *Introductory course, 3 credit hours.* JS 1002 or 1002W, Introduction to Jewish Studies, JS 1010: Introduction to

Judaism, or JS 1040: Introduction to Modern Jewish History.

2. *Electives (minimum of 15 credit hours).* Any of the courses listed below that are not used to fulfill another requirement toward the minor may be counted as an elective. Special Topics courses or First-Year Writing Seminar courses dealing with topics related to Jewish studies may be counted with the approval of the program director.

LANGUAGE:

Jewish Studies: 4301, Jewish Language and Paleography.

Hebrew (Modern Hebrew): 1101–1102, Elementary Hebrew; 2201–2202, Intermediate Hebrew; 2301, Advanced Hebrew Grammar; 2302W, Advanced Hebrew Composition; 3851–3852; Independent Study in Modern Hebrew.

ELECTIVES:

Jewish Studies: 1002 or 1002W, Introduction to Jewish Studies; 1010, Introduction to Judaism, or 1040, Introduction to Modern Jewish History; 1111.01, In a Pluralistic Age: Jews, Christians, and Muslims in Spain; 1111.02, Music and Identity in Jewish Traditions; 1111.03, Radical Jews from Karl Marx to Noam Chomsky; 1111.04, Civil Rights and Civil Wrongs: Black-Jewish Relations in the 1950s and 1960s; 1111.05, Gender, Sexuality, and Desire in Jewish Literature; 1111.06, Reading across the Boundaries: Arab and Israeli Literature and Culture; 1111.07, From Einstein to Chomsky: Revolutionary Sciences in Jewish America; 1111.09, Jews and Muslims: A Modern History; 1111.10, Jewish Response to Catastrophe; 1200, Classical Judaism: Jews in Antiquity; 1210W, The Bible as Literature/The Bible and Literature; 1220, Jews in the Medieval World; 2100, The New Testament in Its Jewish Contexts; 2110 (formerly 3100), The Holocaust; 2150, Issues in Rabbinic Literature; 2210W, Hebrew Literature in Translation; 2220, Israeli Culture Through Film; 2230W, American Southern Jews in Life and Literature; 2240W, Black-Jewish Relations in Post-War American Literature and Culture; 2250W, Witnesses Who Were Not There: Literature of the Children of Holocaust Survivors; 2260, Coming of Age in Jewish Literature and Film; 2260W, Coming of Age in Jewish Literature and Film; 2270, Jewish Storytelling; 2270W, Jewish Storytelling; 2280, Jewish Humor; 2280W, Jewish Humor; 2285 (formerly 1111.12), Jews and Hollywood; 2290W, Imagining the Alien: Jewish Science Fiction; 2300, Modern Jewish Thought; 2320, Freud and Jewish Identity; 2330, Is G-d Guilty? The Problem of Evil in Judaism; 2340, Jewish Philosophy after Auschwitz; 2400, American Jewish Life; 2420W, American Jewish Music; 2450, The Jewish Diaspora; 2500, Modern Israel; 2520, Zionism: Politics, Religion, and Ethnicity; 2540, Power and Diplomacy in the Modern Middle East; 2560, Social Movements in Modern Jewish Life; 2570 (formerly 1111.13), Soviet Antisemitism and Jewish Resistance; 2600, Islam and the Jews; 2620, Jews in Egypt; 2640, Jews and Greeks; 2700W, Judaism and Medicine; 3000, Major Themes in Jewish Studies; 3210, Reading across Boundaries: Jewish and Non-Jewish Texts; 3400W, Jerusalem; 3830, Contemporary Jewish Issues; 3883, Internship Research; 3890, Special Topics; 3892, Topics in Ancient and Medieval Jewish History; 3894, Topics in Modern Jewish History; 4301, Jewish Language and Paleography; 4960, Senior Seminar; 4970, Senior Project in Jewish Studies.

Anthropology: 3140, Myth, Ritual, Belief: The Anthropology of Religion.

Classics: 2100, History of the Ancient Near East; 2120, Greece and the Near East from Alexander to Theodosius; 2160, History of Roman Empire; 3010, The Ancient Origins of Religious Conflict in the Middle East.

English: 3370, The Bible in Literature; 3664, Jewish American Literature.

European Studies: 2208, Conspiracy Theories and Rumors in European and U.S. History.

French: 4430, Jews and Arab Muslims in France.

German: 1111, Representing the Holocaust; 2443, German Cinema: Vampires, Victims, and Vamps; 2445, Nazi Cinema: The Manipulation of Mass Culture; 3344, Women at the Margins: German Jewish Women Writers; 4574, Who

Am I? German Autobiographies.

History: 1111.18, The Life, Science, and Times of Albert Einstein; 1190, A History of Islam; 1200, The Arab Spring; 2155, Muhammad and Early Islam; 2160, Medicine in Islam; 2170, Islam and the Crusades; 2190, Last Empire of Islam; 2280, Europe, 1900–1945; 2290, Europe since 1945; 2300, Twentieth-Century Germany; 2720, World War II; 3150, Cities of Europe and the Middle East; 3190, Religion, Culture, and Commerce: The World Economy in Historical Perspective; 3210, Muslims, Christians, and Jews in Medieval Spain.

History of Art and Architecture: 2260, The Art of Pagans, Christians, and Jews; 2765, Art since 1945.

Music Literature: 2150, Music, Identity, and Diversity; 2310, The Bible and Music.

Philosophy: 2101, Hellenistic and Late Ancient Philosophy; 2102, Medieval Philosophy; 2103, Modern Philosophy; 2109, Twentieth-Century Continental Philosophy; 3005, Jewish Philosophy; 3006, Islamic Philosophy; 3011, Critical Theory; 3607, Philosophy of Religion; 3657, Humanity, Evolution, and God.

Political Science: 2230, Middle East Politics; 2263, Religion and Politics; 3235, Political Islam.

Religion: 6511, Book of Genesis.

Religious Studies: 1111, First-Year Writing Seminar; 1200, Introduction to Judaism; 1208, Themes in the Hebrew Bible; 1500, Introduction to Islam; HUM1610, The Golden Age of Islam; 2210W, Constructions of Jewish Identity in the Modern World; 2220, Jewish Ethics; 2940, Great Books of Literature and Religion; 3225, Sexuality in the Hebrew Bible and the Ancient Near East; 3229, The Holocaust: Its Meanings and Implications; 3270, Jewish Theories of Religion; 3926, Ancient Goddesses; 3930, Women and Religion; 3940, The Nature of Evil; 3941, Religion, Science, and Evolution; 4552, Islam in the Modern World; 4834, Post-Freudian Theories and Religion; 4837, Psychology of Religious Myth and Ritual; 4938, Marriage in the Ancient Near East and the Hebrew Bible; 4939, Religious Autobiography.

Russian: 2434, The Russian Cinema.

Sociology: 2203 (formerly 3222), Sociology of Religion; 2700 (formerly 3702), Racial and Ethnic Minorities in the United States; 3204, Tourism, Culture, and Place.

[Minor in Caribbean Studies](#)

[Minor in Brazilian Studies](#)

[Honors Program](#)

DIRECTOR Celso Castilho

EXECUTIVE DIRECTOR Avery Dickins de Girón

ASSISTANT DIRECTOR Gretchen Selcke

ASSISTANT PROFESSOR OF THE PRACTICE Jesús Ruíz

COURSES OFFERED: [LACX](#)

The Center for Latin American, Caribbean, and Latinx Studies offers a major in Latin American, Caribbean, and Latinx Studies, and offers the choice of three minors among Latin American and Latinx Studies, Caribbean Studies, or Brazilian Studies. A major in Latin American, Caribbean, and Latinx Studies explores the diversity of histories, languages, and cultures of Latin America and the Caribbean from an interdisciplinary perspective as well as the Latinx experiences, mainly in the United States, as they intersect with other national and geographic boundaries across academic disciplines.

Program of Concentration in Latin American, Caribbean, and Latinx Studies

The interdisciplinary major in LACX consists of thirty-six (36) credit hours. The specific requirements are as follows:

- LACX 1201, Introduction to Latin American, Caribbean, and Latinx Studies - (3 hours).
- LACX 4961, LACX Seminar, which is usually taken in the senior year - (3 hours).
- Area of concentration in History; Language, Literature, and Art History; or Social Sciences - (12 hours).
- Complete 12 additional hours of coursework from any category or categories: History; Language, Literature, and Art History; or Social Sciences (12 hours).
- Electives of any additional course with Latin American, Caribbean, or Latinx content - (6 hours).

Undergraduate students majoring in LACX must also demonstrate advanced language competence in Spanish or Portuguese. This requirement may be satisfied by completing Spanish 3303, Portuguese 3303 or any course with a higher number taught in either language. Students are expected to acquire intermediate knowledge of another Latin American language may be satisfied successfully completing Spanish 2203, Portuguese 2203, Haitian Creole 2202, or K'iche' Maya 2202. Language courses can count toward the distribution requirements of the major.

In addition, students must demonstrate their level of language proficiency at the beginning of the second semester of their senior year by way of an Oral Proficiency Interview (OPI) conducted by a faculty member in that language. This is part of an evaluation of the Center (and not of the individual student) and the results will not affect fulfillment of student requirements for graduation. Students will be evaluated for proficiency in both their primary and secondary languages.

Minor in Latin American and Latinx Studies

Students pursuing the interdisciplinary minor must complete fifteen (15) credit hours. The specific requirements are as follows:

- LACX 2201, Introduction to Latin American, Caribbean, and Latinx Studies - (3 hours).
- In addition, students must demonstrate intermediate knowledge of one Latin American language by successfully completing Spanish 2203, Portuguese 2203, Haitian Creole 2202, or K'iche' Maya 2202.
- Courses taken to satisfy the language requirement may not be counted toward the 15 hours of coursework. A language evaluation can be used to demonstrate proficiency.

Minor in Caribbean Studies

Students pursuing the interdisciplinary minor must complete fifteen (15) credit hours. The specific requirements are as follows:

- LACX 1202: Introduction to Caribbean Studies: The Origins of the Modern World - (3 hours)
- Spanish 2203, Portuguese 2203, or Haitian Creole 2202 - (3 hours)
- Distribution Requirements (9 hours - one course in each area): Area I: Caribbean Language and Literature (Haitian Creole, French, or Spanish); Area II: Caribbean Society, History, and Cultures; Area III: The Caribbean in Regional and Global Context

Proficiency at the intermediate level in a Caribbean language can also be demonstrated through testing. If this option is exercised, students must take 3 credit hours of coursework approved by the Director of Undergraduate Studies in lieu of the 3 credit hours of coursework. Other elective courses, including special topics courses, may be counted toward the minor with the approval of the Director of Undergraduate Studies.

Minor in Brazilian Studies

Students pursuing the interdisciplinary minor must complete fifteen (15) credit hours. The specific requirements are as follows:

- LACX 2101: Brazil, Past, Present, and Future; or HIST 2101 Introduction to Brazil - (3 hours).
- Portuguese 2203, Intermediate Portuguese - (3 hours).
- Distribution Requirements (9 hours - one course in each area): Area I: Portuguese Language and Literature; Area II: Brazilian Society, History, and Cultures; Area III: Brazil in Regional and Global Context.

Proficiency at the intermediate level in Portuguese can also be demonstrated through testing. If this option is exercised, students must take 3 credit hours of coursework approved by the Director of Undergraduate Studies in lieu of the 3 credit hours of PORT 2203. Other elective courses, including special topics courses, may be counted toward the minor with the approval of the Director of Undergraduate Studies.

Honors Program

An honors program is available, acceptance into which must be approved by the director of undergraduate studies. Students must have a minimum 3.3 cumulative GPA and a 3.3 GPA in courses that count toward the Latin American studies major to be accepted into the program. The Honors Program requires: completion of 6 credit hours in LAS 3851 and 3852; the writing of an honors thesis; and passing an oral honors examination. Interested students should consult their academic adviser during their junior year.

Latino and Latina Studies

[Program of Concentration in Latino and Latina Studies](#)

[Minor in Latino and Latina Studies](#)

EXECUTIVE DIRECTOR Avery Dickins de Girón

INTERIM DIRECTOR Edward Wright-Rios

ASSISTANT DIRECTOR Gretchen Selcke

Assistant Professor: Lomeli, Hilario

Assistant Professor of the Practice: Ruiz, Jesus

Principal Senior Lecturer: Selcke, Gretchen

COURSES OFFERED: [LATS](#)

Latino and Latina Studies focuses on cultural production and political and socioeconomic experiences of people inculcated with the US experience, self-identifying as Latinx and communicating primarily in English and sometimes in Spanish. The LATS major and minor will examine this enduring and dynamic population that crosses and re-crosses borders constructed by geography, linguistics, class, race, and gender. This program of study is designed to accommodate a range of voices and multiple manifestations of Latinx identity and cultural expression in historical and contemporary contexts to fill in this vital but often overlooked component of our national identity and discourse.

Students pursuing a LATS major or minor are expected to obtain language competence in Spanish before completing the program, though they do not need to meet this requirement when declaring the major or minor.

Students may satisfy this requirement by completing SPAN 3303, or any other course with a higher number taught in Spanish.

Program of Concentration in Latino and Latina Studies

The interdisciplinary major in Latino and Latina studies consists of thirty-six (36) credit hours. The specific requirements are as follows:

1. LATS 2201, Introduction to Latino and Latina Studies (3 credit hours)
 2. SPAN 3303, Introduction to Spanish and Spanish American Literature (3 credit hours)
- SPAN 3303 requires up to 19 prerequisite credit hours of Spanish language instruction through SPAN 3302, depending on departmental placement.
3. ENGL 3658, Latino-American Literature (3 credit hours)
 4. LATS 4961, Latino and Latina Studies Capstone, which is usually taken in the senior year (3 credit hours)
 5. Eight elective courses (24 credit hours) with at least two courses from Group A (Latino and Latina Culture) and two courses from Group B (Historical Context), that have not already been applied to satisfy above requirements.

Minor in Latino and Latina Studies

Students pursuing the interdisciplinary minor must complete eighteen (18) credit hours. The specific requirements areas follows:

1. LATS 2201, Introduction to Latino and Latina Studies (3 credit hours)
 2. SPAN 3303 or ENGL 3658 (3 credit hours)
- If both courses are taken, only one may be applied as elective credit.
3. LATS 4961, Latino and Latina Studies Capstone (3 credit hours)
 4. Three other courses (9 credit hours), with at least one course from Group A (Latino and Latina Culture) and one course from Group B (Historical Context), that have not already been applied to satisfy above requirements.

Approved List of Courses

Category A: Latino and Latina Culture

AFRICAN AMERICAN AND DIASPORA STUDIES: 1706, Capoeira: Afro-Brazilian Race, Culture, and Expression; 2148, Blacks in Latin America and the Caribbean.

ENGLISH: 1111-19 FYWS, Growing Up Latino and Latina; 1210-08 Prose Fiction, "Estamos Aquí:" Belonging in Contemporary Latinx Fiction; 1220-01 Drama, Forms and Techniques: Latinx Plays and Performance; 3658, Latino-American Literature.

HISTORY: 2725, Race, Power, and Modernity; 2540, Race and Nation in Latin America; 3280, Popular Cultures in

Modern Latin America.

HUMAN AND ORGANIZATIONAL DEVELOPMENT: 3221, Health Service Delivery to Diverse Populations.

LATINO AND LATINA STUDIES: 3831, Latino and Latina Business and Entrepreneurship; 3880 and 3881, Latino and Latina Studies Internship Training and Internship Readings and Research; 3850, Independent Study.

LATIN AMERICAN STUDIES: 2601, Latin America, Latinos, and the United States.

SOCIOLOGY: 3702, Racial and Ethnic Minorities in the United States; 3322, Immigration in America.

SPANISH: 2995, Contemporary Latin American Prose Fiction in English Translation; 3302, Spanish for Oral Communication Through Cultural Topics; 3303, Introduction to Spanish and Spanish American Literature; 3345, Spanish for Business and Economics; 3375, Film and Culture in Latin America; 3830, Spanish for the Medical Profession; 3835, Latino Immigration Experience; 3893-01, Special Topics in Hispanic Literature—Latinx US Literature; 3893-02, Special Topics in Hispanic Literature—Contemporary Mexican Literature and Culture; 4350, Communicating Across Cultures; 4450, The Contemporary Novel; 4720, Literary Genres and National Identities in Latin America; 4725, Jungle Narratives in Latin America; 4730, Modern Latin American Poetry; 4750, Afro-Hispanic Literature; 4755, Latina and Latin American Women Writers; 4765, Latina American Fiestas: Mexico, The Andes, and the Caribbean; 4810, Images of the City.

Category B: Historical Context

AFRICAN AMERICAN AND DIASPORA STUDIES: 2356, African Spirits in Exile: Diaspora Religions in the Americas; 3248, Atlantic African Slave Trade; 3178, Colonialism and After.

ANTHROPOLOGY: 1111 FYWS, Conquest of Mexico; 2106, Culture and Power in Latin America; 2108, Indigenous Peoples of Lowland South America; 2214, Art and Architecture in the Ancient Americas; 2220/2220W, Human Landscapes; 2230, South American Archaeology; 2231, Ancient Andean Civilizations; 2242/2242W, The Archaeology of the Ancient Maya Civilization; 2160/2160, Creating Community; 2371, Reading the Bones: Bioarchaeology and Forensic Studies in the Peruvian Andes; 3130, Andean Culture and Society; 3161, Colonial Encounters in the Americas; 3162, Material Culture of New World Slavery; 3202, The Collapse of Civilizations; 3240, Ancient Mesoamerican Civilizations; 3241, The Aztecs; 3243/3243W, Ancient Maya Gods and Rulers; 3250, The Inca Empire; 3622/3622W, Classic Maya Language and Hieroglyphs.

ENGLISH: 3654, African American Literature; 3674, Caribbean Literature.

HISTORY: 1111 FYWS, Destruction of the Indies; 1370, Colonial Latin America; 1378, Social Movements in Latin America; 1379W, The Inquisition in the New World: Law, Deviance, and Heresy in Colonial Mexico; 1380, Modern Latin America; 1383, Slave Resistance in the Americas; 1385W, Disease and Disorder in the Atlantic World; 2450, Reform, Crisis, and Independence in Latin America, 1700–1820; 2457, Drug Trafficking and Society in Latin America; 2470, Revolutionary Mexico; 2480, Central America; 2490, Brazilian Civilization; 2510, Reform and Revolution in Latin America; 2530, African Religions in the Americas; 2535, Latin America and the United States; 2542, Cuba and the United States; 2544, Panama: Global Crossroads; 2570, Caribbean History, 1492–1983; 2570, Immigration, the United States, and the World; 2580, American Indian History before 1850; 2590, American Indian History since 1850; 2845, Race, Gender, and Slave Emancipation.

LATIN AMERICAN STUDIES: 2101, Introduction to Latin America; 2301, Music of Protest and Social Change in Latin America; 3891, Special Topics in Latin American Studies; 4550, Gender, Sexuality, and Family in Latin America.

MUSIC LITERATURE: 2110, Music in Latin America and the Caribbean.

PORTUGUESE: 2900, Brazilian Civilization through English Language Material.

SOCIOLOGY: 3231, Contemporary Latin America; 3602, Change and Social Movements in the Sixties.

SPANISH: 3320, Introduction to Hispanic Cultural Studies; 3330, Cultural Studies in the Andes; 3365, Film and Recent Cultural Trends in Spain; 3892, Special Topics in Spanish Language and Linguistics; 4450, The Contemporary Novel; 4465, The Theory and Practice of Drama; 4740, Spanish-American Literature of the Boom Era; 4741, Spanish-American Literature of the Post-Boom Era; 4760, Literature and Medicine.

Category C: Critical Perspectives

AFRICAN AMERICAN AND DIASPORA STUDIES: 1010, Introduction to African American and Diaspora Studies.

ANTHROPOLOGY: 2105, Race in the Americas; 3134, Human Rights of Indigenous Peoples.

ECONOMICS: 2100, Labor Economics; 2220 Latin American Development.

ENGLISH: 3742, Feminist Theory.

PHILOSOPHY: 3617, Philosophy of Language.

POLITICAL SCIENCE: 2208, Law, Politics, and Justice; 2219, Politics of Mexico; 2251, The Politics of U.S. and Global Immigration; 3217, Latin American Politics; 3228, International Politics of Latin America; 3264W, Global Feminisms.

SOCIOLOGY: 3312, Environment and Development; 3232, Contemporary Mexican Society; 3314, Environmental Inequality and Justice; 3612, Class, Status, and Power; 3701, Racial Domination, Racial Progress; 3704, Race, Gender, and Sport.

WOMEN'S AND GENDER STUDIES: 1150/1150W, Sex and Gender in Everyday Life; 3201, Women and Gender in Transnational Context.

Professors, Emeriti: John Ahner, Philip Crooke, Paul Edelman, Richard Goldberg, Matthew Gould, Robert

Hemminger, C. Hughes, Ettore Infante, Gennadi Kasparov, Richard Larsen, Ralph McKenzie, Michael Mihalik, Alexander Olshanskiy, Michael Plummer, John Ratcliffe, Eric Schechter, Constantine Tsinakis, Daoxing Xia

Professors: Akram Aldroubi, Dietmar Bisch, Mark Ellingham, Douglas Hardin, Dan Margalit, Marian Neamtu, Denis Osin, Jesse Peterson, Edward Saff, Larry Schumaker, Gieri Simonett, Jared Speck, Glenn Webb, Dechao Zheng

Associate Professor, Emeriti: Steven Tschantz

Associate Professors: Anna Marie Bohmann, Marcelo Disconzi, Spencer Dowdall, Ioana Suvaina

Assistant Professors: Madeline Brandt, Alexandru Lupsasca, Jean-Francois Paquet, Larry Rolan

Principal Senior Lecturer, Retired: Pamela Pigg

Principal Senior Lecturers: John Rafter, Lori Rafter

Senior Lecturer, Emerita: Jo Ann Staples

Senior Lecturers: Henry Yi-Wei Chan, Michael Griffin, Jacob Haley, Blane Hollingsworth, Shitu Fawaz Jimoh, Alice Mark, Sean McAfee, Taylor Rhoads, Sam Sehayek, Li Ying, Yuegiao Zhang

COURSES OFFERED: [MATH](#)

The Department of Mathematics offers an undergraduate major with a high degree of flexibility. A solid background in mathematics provides an excellent foundation for any quantitative discipline as well as many professions—many students go on to professional studies in law, medicine, or business.

Program of Concentration

Four tracks are available.

Program I (Standard Track) is intended for most mathematics majors in the College of Arts and Science, Blair School of Music, and Peabody College.

Program II (Applied Track) is intended for students in the School of Engineering who elect a second major in mathematics but is also available for other students.

Program III (Bachelor of Science Track) is intended for students who would like to specialize in a specific field of mathematics (pure mathematics, applied mathematics, and statistics)

Program IV (Honors Track) is intended for highly qualified students who either are preparing for graduate studies in mathematics or plan to graduate with departmental honors. Students who complete this program and, in addition, complete a senior thesis will graduate with departmental honors.

Requirements for the four tracks are summarized below.

Program I (Standard Track)

At least 32 credit hours in mathematics including at least 15 credit hours taken at Vanderbilt, as follows.

1. A calculus sequence: 1300-1301-2300, 1300-1301-2310, or 1300-1301-2500-2501.
2. Linear algebra and differential equations: 2600 or 2500-2501, and 2610.
3. At least 15 additional credit hours from 2800 or above.
4. The remainder of the credit hours must be chosen from 2800 or above.

Program II (Applied Track)

The Applied Track requires at least 29 hours in mathematics including at least 15 credit hours taken at Vanderbilt. Additionally, 6 credit hours in advanced, mathematically-based science or engineering courses outside of the department are required, as follows.

1. A calculus sequence as in Program I.
2. Linear algebra and differential equations—one of the following:
 - a. one of 2410, 2600, or 2500–2501, and one of 2420 or 2610; or
 - b. 2400 and either 2600 or 2500–2501.
3. At least 12 additional credit hours from 2800 or above, excluding 3000.
4. The remainder of the credit hours in mathematics must be chosen from 2800 or above.
5. At least 6 credit hours of advanced, mathematically based science or engineering courses approved by the director of undergraduate studies. This requirement is automatically fulfilled by students who complete a physics major or a major in the School of Engineering.

Program III (Bachelor of Science Track)

At least 35 credit hours in mathematics including at least 15 credit hours taken at Vanderbilt, as follows.

1. A calculus sequence as in Program I.
2. Linear algebra and differential equations as in Program I.
3. At least 18 additional credit hours from 2800 or above, including three courses taken from one of the following lists:
 - a. Option 1 (Pure Mathematics): 3100, 3110, 3200, 3230, 3300, 3310, 3700, 3800
 - b. Option 2 (Applied Mathematics): 3100, 3120, 3130, 3620, 3630, 4620, 4630
 - c. Option 3 (Statistics): 2820, 2821, 3640, 3641, 3670, 4650
4. The remainder of the credit hours in mathematics must be chosen from 2800 or above.

Program IV (Honors Track)

At least 38 credit hours in mathematics including at least 15 credit hours taken at Vanderbilt, as follows.

1. A calculus sequence as in Program I.
2. Linear algebra and differential equations as in Program I.
3. At least 21 additional credit hours of advanced course work,
 - a. including four courses taken from the following three categories, at least one from each category:
 1. Algebra: 3300, 4300, 4301.
 2. Analysis: 3100, 3110, 6100, 6101.
 3. Topology and Geometry: 3200, 3230, 4200, 4201, 4220, 6210.
 4. The remainder of the 21 credit hours must be chosen from 2800 or above, excluding 4999.
4. The remainder of the credit hours must be chosen from 2800 or above.

Students who complete Program IV and, in addition, fulfill the Honors requirements listed below, will graduate with departmental honors.

Honors Program

The Honors Program in Mathematics is designed to afford superior students the opportunity to pursue more intensive work within their major field. The program requires:

1. Completion of all the requirements of Program IV (Honors Track).
2. Graduate with a minimum grade point average of 3.6 in courses that count toward the mathematics
3. Completion of a senior thesis, typically in the second semester of the senior year. With approval of the director of undergraduate studies, the thesis may be based on research initiated or completed at another academic institution, such as during a summer REU
4. Oral examination on the senior thesis. A committee of at least three faculty members—at least two from the Department of Mathematics, one being the thesis adviser—shall evaluate the thesis and the oral examination. Exceptional achievement on the thesis will earn highest

Interested students may apply to the director of undergraduate studies for admission to the Honors Program in their junior year or the first semester of their senior year. Applicants must meet college requirements for entry to the Honors Program and must maintain a minimum grade point average of 3.6 in courses that count toward the mathematics major.

The application includes a one- to two-page proposal of the planned thesis and the signature of the faculty member who will be the thesis adviser.

The thesis must be submitted no later than two weeks before the end of classes in the semester of graduation. The oral examination will take place by the last day of classes in the semester of graduation. Highest honors will be awarded for a thesis that contains original high-quality research results in combination with an oral defense at the highest quality level.

Students may sign up for Math 4999 during one semester of their senior year. Math 4999 will not count toward the 21 credit hours requirement in Program III.

Please consult the director of undergraduate studies for details.

Minor in Mathematics

The minor in mathematics requires at least 15 credit hours in mathematics, including:

1. Completion of a calculus sequence: 2300, or 2500–2501.
2. Linear algebra and differential equations: as in the Program II major.
3. At least 6 credit hours not used to satisfy item 2 from 2800 or above.

Completion of a single-variable calculus sequence (1300–1301) is a prerequisite for the minor, but does not count toward the credit hours of the minor.

Licensure for Teaching

Students planning to teach in secondary school should contact the director of secondary education programs in the Department of Teaching and Learning at Peabody College for course recommendations and refer to the chapter on Licensure for Teaching in the Peabody College section of this catalog.

Calculus

Several calculus sequences are available: 1100; 1200–1201; 1300–1301–2300.

The courses in these sequences cover similar material, but at different rates, and therefore overlap in content and credit. Students should not switch from one to another without approval of the department. Such switching may result in loss of credit. Students intending to take mathematics classes beyond one year of calculus are advised to enroll in the 1300–1301–2300 sequence.

First-year students with test scores of 5 on the Calculus BC advanced placement examination, thereby earning AP credit for 1300–1301, may choose to enroll in the 2500–2501 sequence. The combination of 2500–2501 is a blend of multivariable calculus and linear algebra, with an emphasis on rigorous proofs.

COURSES OFFERED: [ME](#)

The vitality of our nation depends upon innovation in the design of new machines, devices to satisfy society's needs, engines to produce power efficiently, equipment to condition the environment of our buildings, and the systems to use and control these engineered products. Mechanical engineers are involved in solving problems by originating design concepts, developing products and processes of manufacture, and designing hardware and the systems needed to satisfy society's demands. Mechanical engineers work in virtually all industries.

The study of mechanical engineering requires a basic understanding of mathematics, chemistry, physics, and the engineering sciences. Mechanical engineering education emphasizes solid mechanics; dynamics of machines; aerodynamics; propulsion devices; material behavior; power producing and environmental conditioning processes; control of dynamics of machines; energy conversion; and the synthesis, development, evaluation, and optimization of designs of devices and systems.

Degree Programs. The Department of Mechanical Engineering offers the B.E., M.Eng., M.S., and Ph.D. in mechanical engineering.

The curriculum in mechanical engineering leading to a bachelor of engineering provides a broad-based engineering education with opportunities for the student to elect courses in areas of study related to any industry and, with careful planning of the elective courses, to achieve some specialization. The mechanical engineering program prepares an individual to become a practicing engineer who can participate fully in the engineering activities of design, building, operation, production, maintenance, safety, marketing, sales, research, and administration.

Undergraduate Honors Program. See the Special Programs chapter for general requirements of the professional

Honors Program in mechanical engineering. Honors candidates choose their technical elective courses with the advice and consent of an honors adviser. Each candidate is expected to take 3 hours of ME 3860 in a single semester and at least 6 hours of graduate courses numbered 5000 or higher, including one course numbered 8000 or higher. A formal written honors thesis on the candidate's research must be approved by the honors adviser and the department chair. Honors candidates shall meet all Engineering School requirements in the nontechnical areas. The diploma designation is Honors in Mechanical Engineering.

Facilities. Undergraduate instructional laboratories are equipped for studies in heat and power, refrigeration and air-conditioning, fluid flow, heat transfer, design, controls, robotics, instrumentation, and biomechanics. Specialized facilities for robotic surgery, rehabilitation robotics, energy storage, medical microfluidics, thermal transport, combustion characterization, and photonics are used for both faculty-led research and instruction. The department also maintains various maker spaces including machine shops and design studios for fabrication of experimental equipment and for instruction.

Curriculum Requirements

The B.E. in mechanical engineering requires a minimum of 126 hours, distributed as follows:

1. Mathematics (17 hours). Required courses: MATH 1300, 1301, 2300, 2420. Required elective: MATH courses numbered 2410 and above, except MATH 3000.
2. Basic Science (16 hours). Required courses: CHEM 1601, 1601L; MSE 1500, 1500L (or CHEM 1602, 1602L); PHYS 1601, 1601L, 1602, 1602L.
3. Engineering Science (25 hours). Required courses: ES 1401, 1402, 1403; CE 2200, 2205; CS 1100 or 1101 or 1103 or 1104 or DS 1100; ECE 2112; ME 2190, 2220, 3224; MSE 2205.
4. Liberal Arts Core (18 hours). To be selected to fulfill the Liberal Arts Core requirements listed in the Degree Programs in Engineering.
5. Open electives (6 hours).
6. ME core (26 hours). ME 2160, 2171, 3202, 3204, 3234, 3248, 4213, 4950, 4951, and 4959
7. Technical electives (9 hours). To be selected from the following approved courses. Courses selected from the College of Arts and Science must be designated a Mathematics and Natural Sciences (MNS) course in the AXLE curriculum.
 - a. Courses in BME, CHBE, CE, CS, DF, DS, ECE, ENGM, ENVE, ES, MSE, ME, NANO, and SC except BME 1016, CS 1000, 1151; DS 1000, 3850, 3851, 3891; ENGM 2440, 3350, 4800; ES 1511, 2700, 2900, 3884; and any course numbered 2860
 - b. Mathematics courses numbered 2420 or higher except MATH 3000
 - c. Chemistry courses numbered 2000 or higher
 - d. Physics courses numbered 2000 or higher
 - e. Astronomy courses
 - f. Biological Science courses
 - g. Earth and Environmental Science courses
 - h. Neuroscience courses

At least 3 hours of technical electives must be numbered 2000 or above.

8. Professional (ME) depth (a minimum of 9 hours). Each student must choose at least 9 hours of ME elective courses. No more than 6 hours of 3850 and 3860 combined can be credited toward ME depth electives.

No one-credit-hour ME course except 3841 can be used as a mechanical engineering elective. A maximum of three one-credit-hour ME courses may be used as technical electives. Additional ME one-credit-hour courses can be open electives. At least one "W"-designated course (3 hours) in the English language must be included on a graded basis.

Undergraduates in mechanical engineering may apply the pass/fail option only to non-departmental courses taken as open electives, technical electives, or part of the liberal arts core, subject to the school requirements for pass/fail.

Note: Certain mathematics and physics courses cannot be credited to a School of Engineering degree. Please see the [Degree Programs in Engineering/Mathematics and Physics](#) section of the catalog for more information.

Writers in Residence: Fatima Kola, Odie Lindsey, Caroline Williams

COURSES OFFERED: [MHS](#)

The Program in Medicine, Health, and Society offers an interdisciplinary major (36 credit hours) and minor (18 credit hours) for students interested in studying health-related beliefs and practices in their social and cultural contexts. As part of the requirements of the major, students must declare and complete 12 credit hours in one of the six concentrations in Medicine, Health, and Society: health in global context; health behaviors and health sciences; health policy and economics; inequality, intersectionality, and health justice; health in the arts and humanities; or specialized health studies (a self-designated concentration). An honors program is available. MHS draws on a variety of fields in the social sciences and humanities—anthropology, economics, history, literature and creative writing, science and technology studies, public policy studies, philosophy/ethics, psychology, sociology, and religious studies. Many MHS faculty also have training in professional fields like medicine, law, nursing, social work, and public health. The major will be of particular interest to students preparing for careers in health-related professions

as well as to students interested in examining an important part of human experience from multiple perspectives and developing a critical understanding of contemporary society. Visit as.vanderbilt.edu/medicine-health-society for more details.

The program is directed by Jonathan M. Metzl, Frederick B. Rentschler II Professor of Sociology and Medicine, Health, and Society.

Program of Concentration in Medicine, Health, and Society

The major requires a minimum of 36 credit hours of course work, distributed as follows:

Note: No more than 21 credit hours may be in courses designated MHS. Other than MHS, no more than 12 credit hours may be in the same subject area; A&S Psychology and Peabody Psychology are considered the same subject area for purposes of the major/minor.

1. Foundations — Students must complete one section of MHS 2100 Foundations of MHS (3 credit hours): Individual sections of MHS 2100 are specialized to reflect faculty expertise. MHS 2100 cannot be repeated.

Note: the following courses when offered prior to Fall 2025 may also satisfy the requirement:

MHS 1920, Politics of Health

MHS 1930, Social Dimensions of Health and Illness

MHS 1940, Racial and Ethnic Disparities

MHS 1950, Theories of the Body

MHS 1960, Health Humanities

MHS 2110, American Medicine in the World

MHS 2800, Foundations of Population Health Theory and Practice

2. Concentration — Students must complete four courses not used to satisfy the foundation course requirement or the elective requirements in one of the following six concentrations (12 credit hours). Students must declare one of the following concentrations when they declare the major.

Note: Courses must be from at least two subject areas.

1. Health in global context
2. Health policy and economics
3. Health behaviors and health sciences
4. Inequality, intersectionality, and health justice
5. Health in the Arts and Humanities
6. Specialized health studies

See below for a list of courses within and outside MHS that count for Concentrations A, B, C, D, and E. Students choosing concentration F must propose a set of four courses (12 credit hours) that form a coherent program of study related to the social and humanistic study of health and receive approval from the director of undergraduate studies.

3. Electives — Seven courses not used to satisfy the foundations course or concentration requirements chosen from the list of approved courses within and outside MHS (21 credit hours).

4. Advanced hours in MHS — Courses used to satisfy the concentration requirement or electives requirement must include at least 6 credit hours from MHS-numbered courses at or above the 2000 level. MHS 3830, 3831, 3850, 3880, 3881, 4998, and 4999 are ineligible for this requirement. CORE 2500 courses count when appropriate.

To graduate with a major in MHS, students must take a written exam in the second semester of their senior year. (Students who are away during the second semester of their senior year because they are studying abroad or graduating early should schedule the exam during the first semester.) The exam is not graded and no grade will appear on the student's transcript. The purpose of the exam is to ascertain the extent to which MHS majors demonstrate knowledge of the MHS curriculum.

Honors Program

The Honors Program in Medicine, Health, and Society offers superior students a more intensive concentration within their major field. Admission to the program requires:

1. *A 3.3 cumulative grade point average.*
2. *A 3.3 cumulative grade point average in courses that count toward the Medicine, Health, and Society major.*
3. *An application that (a) describes the proposed topic; (b) identifies the faculty member who will serve as the thesis adviser; and (c) includes a letter of recommendation from the proposed thesis adviser.*

Completion of the program requires:

1. Two semesters, 3 credit hours each semester of the senior year in MHS 4998/4999. Enrollment in 4999 requires successful completion of 4998.
2. An honors thesis of approximately 50 pages that reflects an interdisciplinary social scientific or humanities perspective, submitted no later than two weeks before the first day of final exams in the second semester of the senior year, and approved by a committee of at least two faculty members (one of whom must have their primary appointment in Medicine, Health, and Society).
3. Successful completion of an oral examination focusing on the topic of the thesis.

Minor in Medicine, Health, and Society

The minor consists of a minimum of 18 credit hours of course work, distributed as follows:

Note: No more than 9 credit hours may be in the same subject area; A&S Psychology and Peabody Psychology are considered the same subject area for purposes of the major/minor.

1. Foundations Course — Students must complete MHS 2100 Foundations of MHS (3 credit hours). MHS 1920, 1930, 1940, 1950, 1960, 2110, or 2800 may satisfy this requirement when taken prior to Fall 2025.
2. Concentration — Students must complete three courses in one of the following five concentrations (9 credit hours). Students must declare one of the following concentrations when they declare the minor.
 - Health in global context
 - Health policy and economics
 - Health behaviors and health sciences
 - Inequality, intersectionality, and health justice
 - Health in the arts and humanities
3. Electives — Two additional courses, excluding select pre-med science courses (marked with an asterisk below), chosen from the list of approved courses (6 credit hours).
4. Advanced hours in MHS — Courses used to satisfy the concentration requirement or electives requirement must include at least 3 credit hours from MHS-numbered courses at or above the 2000 level.

Approved Courses

Please consult the director of undergraduate studies for approval of “as appropriate” courses in concentration areas.

Exploratory Core CORE 2500 may be appropriate in some instances.

CONCENTRATION A: Health in Global Context

ANTHROPOLOGY: 1111, First-Year Writing Seminar (as appropriate); 2113W, Food, Identity, and Culture; 2511, Culture and Climate Change; 3122, The Anthropology of Globalization; 3138 Global Food Politics; 3141, Anthropology of Healing; 3143, Medical Anthropology; 3348, Forensic Science, Genocide, and Human Rights; 3401W, Evolutionary Biology of Womxn.

ASIAN STUDIES: 2630, Chinese Medicine; 2206, War and the Environment in Southeast Asia; 3630, Traditional Chinese Medicine: Encounters with Science.

BIOLOGICAL SCIENCES: 1111, First-Year Writing Seminar (as appropriate); 3965, Undergraduate Seminar (as appropriate).

CLASSICAL STUDIES: 3333: Pandemics and Society in Historical Perspective.

COMMUNICATION OF SCIENCE AND TECHNOLOGY: 2550, Genetic Breakthroughs: The Promise.

CORE 2500 (as appropriate)

CULTURE, ADVOCACY & LEADERSHIP: 2800, Global Perspectives on American Culture.

FRENCH: 3112, Medical French in Intercultural Contexts.

GENDER AND SEXUALITY STUDIES: 1111, First-Year Writing Seminar (as appropriate); 2267, Seminar on Gender and Violence; 2270, Ecofeminism: Theory, Politics, and Action; 2610, Womanism in Global Context; 3201, Women and Gender in Transnational Context; 3301, Reproductive Justice in Transnational Contexts; 3305, Gender and Sexuality in Times of Pandemic.

HISTORY: 1111, First-Year Writing Seminar (as appropriate); 2160, Medicine in Islam; 2413, Global History of Waste.

HUMAN AND ORGANIZATIONAL DEVELOPMENT: 3200, Global Dimensions of Community Development; 3231, Introduction to Health Services.

INTERDISCIPLINARY STUDIES: 3831, Global Citizenship and Service; 3832, Global Community Service; 3833, Seminar in Global Citizenship and Service (as appropriate).

LATIN AMERICAN STUDIES: 2102, Brazil: Past, Present, and Future.

MEDICINE, HEALTH, AND SOCIETY: 2100, Intro to Data Visualization; 2310, Chinese Society and Medicine; 2410, HIV/AIDS in the Global Community; 2420, Economic Demography and Global Health; 2610, Global Health Crises; 2800, Foundations of Population Health, Theory, and Practice; 3000, Undergraduate Seminar (as appropriate); 3010,

Global Health Principles and Practice; 3045, Epidemics & Society; 3110, Global Health and Social Justice; 3310, Healthcare Systems Comparisons; 3890, Special Topics (as appropriate); 4010, Psychiatry, Culture, and Globalization.

MUSICOLOGY AND ETHNOMUSICOLOGY: 3235, Music, Pandemics and History.

POLITICAL SCIENCE: 1111, First-Year Writing Seminar (as appropriate); 2215, Change in Developing Countries; 2236, The Politics of Global Inequality; 3893, Selected Topics in American Government (as appropriate); 3894, Selected Topics in Comparative Politics (as appropriate).

PUBLIC POLICY STUDIES: 3200, Research Methods for Public Policy Analysis.

RELIGIOUS STUDIES: 3010, Mindfulness, Religion, and Healing.

SOCIOLOGY: 1111, First-Year Writing Seminar (as appropriate); 3313 Sociology of Health and Environmental Science; 3314, Environmental Inequality and Justice; 3321, Population and Society; 3711, Women, Gender, and Globalization

SPANISH 3830: Spanish Health and Society.

CONCENTRATION B: Health Policy and Economics

ANTHROPOLOGY: 1111, First-Year Writing Seminar (as appropriate); 2109, Food Politics in America; 2372, Forensic Anthropology; 3144, Politics of Reproductive Health; 3401W, Evolutionary Biology of Womxn; 3890, Special Topics (as appropriate).

ASIAN STUDIES: 2206, War and the Environment in Southeast Asia.

BUSINESS (ARTS & SCIENCE): 2180, Introduction to the US Healthcare Industry.

CORE: 2500 (as appropriate).

ECONOMICS: 1010, Principles of Macroeconomics; 1020, Principles of Microeconomics; 1111, First-Year Writing Seminar (as appropriate); 1500, Economic Statistics; 1510, Intensive Economic Statistics; 2350, Health Care Policy; 3032, Applied Econometrics; 3035, Econometric Methods; 3350, Economics of Health.

GENDER AND SEXUALITY STUDIES: 1111, First-Year Writing Seminar (as appropriate); 3301, Reproductive Justice in Transnational Contexts.

HISTORY: 1111, First-Year Writing Seminar (as appropriate); 2780, Superhuman Civilization; 2800, Modern Medicine.

LATIN AMERICAN STUDIES: 2102, Brazil: Past, Present, and Future.

MEDICINE, HEALTH, AND SOCIETY: 1920, Politics of Health; 2100, Intro to Data Visualization; 2120, Health Social Movements; 2140, Health Care in the United States: Policy and Politics; 2220, Vaccines/Public Health Policy; 2260, LGBTQ Health Disparities; 2320, Medicine, Law, and Society; 2420, Economic Demography and Global Health; 2520, Autism in Context; 2530, Guns in America; 2920, Medicine on Trial; 3000, Undergraduate Seminar (as appropriate); 3060, Mental Health in Adolescence; 3075, Mental Health Policy; 3120, Medicine, Science, and Technology; 3260, Health Politics of Data, Surveillance and Security; 3320, Introduction to U.S. Health Care Policy; 3890, Special Topics (as appropriate).

PHILOSOPHY: 1008, 1008W, Introduction to Medical Ethics; 1111, First-Year Writing Seminar (as appropriate); 3608, Ethics and Medicine; 3635, Ethics and Mental Health.

POLITICAL SCIENCE: 1111, First-Year Writing Seminar (as appropriate); 1150, Elections; 2236, The Politics of Global Inequality; 2270, Conducting Political Research; 3893, Selected Topics in American Government (as appropriate); 3894, Selected Topics in Comparative Politics (as appropriate).

PUBLIC POLICY STUDIES: 3200, Research Methods for Public Policy Analysis; 3250, Advanced Quantitative Methods for Public Policy.

SOCIOLOGY: 1111, First-Year Writing Seminar (as appropriate); 3302, Poverty, Health, and Politics; 3306, Gender and Medical Work; 3314, Environmental Inequality and Justice; 4961, Seminars in Selected Topics (as appropriate).

UNIVERSITY: 3325, Health Policy Analysis and Advocacy.

CONCENTRATION C: Health Behavior and Health Sciences

ANTHROPOLOGY: 1111, First-Year Writing Seminar (as appropriate); 2227, Food in the Ancient World; 2342, Biology of Inequality; 3141, Anthropology of Healing; 3143, Medical Anthropology; 3344, Genetic Anthropology Lab Techniques; 3345, Genetics in Society; 3346, Human Adaptation and Disease; 3890, Special Topics (as appropriate); 4345, Human Evolutionary Genetics.

BIOLOGICAL SCIENCES: 1105, Human Biology; 1111, First-Year Writing Seminar (as appropriate); 2210 Principles of Genetics; 3243 Principles of Human Disease; 3245, Biology of Cancer; 3254, Neurobiology of Behavior; 3270, Statistical Methods in Biology; 3965, Undergraduate Seminar (as appropriate).

BIOMEDICAL ENGINEERING: 2400, Quantitative Methods I: Statistical Analysis; 3200, Analysis of Biomedical Data.

CORE: 2500 (as appropriate).

ECONOMICS: 2350, Health Care Policy; 3350, Economics of Health.

GENDER AND SEXUALITY STUDIES: 1111, First-Year Writing Seminar (as appropriate); 2240, Introduction to

Women's Health.

HUMAN AND ORGANIZATIONAL DEVELOPMENT: HEALTH AND HUMAN SERVICES (PEABODY): 3221, Health Service Delivery to Diverse Populations.

MEDICINE, HEALTH, AND SOCIETY: 1930, Social Dimensions of Health and Illness; 2100, Intro to Data Visualization; 2120, Health Social Movements; 2210, Examining Care and Caregiving; 2220, Vaccines/Public Health Policy; 2260, LGBTQ Health Disparities; 2270, Racial and Ethnic Health Disparities; 2430, Social Capital and Health; 2700, Trauma, Violence, and Health; 2800, Foundations of Population Health, Theory, and Practice; 2950, Healing Animals; 2375, Families in Turbulent Times; 3000, Undergraduate Seminar (as appropriate); 3030, Community Health Research; 3075, Mental Health Policy; 3450, Mental Illness Narratives; 3890, Special Topics (as appropriate).

NEUROSCIENCE: 2201, Neuroscience; 3235, Biological Basis of Mental Disorders.

PHILOSOPHY: 1008, 1008W, Introduction to Medical Ethics; 1111, First-Year Writing Seminar (as appropriate); 3608, Ethics and Medicine; 3635 Ethics and Mental Health.

PSYCHOLOGY: 1111, First-Year Writing Seminar (as appropriate); 1200, General Psychology; 2100, Quantitative Methods; 2150, Principles of Experimental Design; 3100, Abnormal Psychology; 3620, Schizophrenia; 3625, Depression; 3635, Health Psychology; 3705, Human Sexuality; 3750, Perception; 3760, Mind and Brain; 3785, Brain Damage and Cognition; PSY-PC-1250, Developmental Psychology; PSY-PC 2102, Statistical Analysis; PSY-PC 2110, Introduction to Statistical Analysis; PSY-PC 2250, Cognitive Aspects of Human Development; PSY-PC 2300, Social and Emotional Context of Cognition; PSY-PC-2550, Adolescent Development; PSY-PC 3650, Advanced Topical Seminar (approval dependent upon topic).

PUBLIC POLICY STUDIES: 3250, Advanced Quantitative Methods for Public Policy.

RELIGIOUS STUDIES: 4834, Post-Freudian Theories and Religion.

SOCIOLOGY: 1010, 1010W, Introduction to Sociology; 1020, 1020W, Contemporary Social Issues; 1111, First-Year Writing Seminar (as appropriate); 2100, Statistics for Social Scientists; 3001, Sociological Perspectives; 3002, Introduction to Social Research; 3003, Research Practicum; 3301, Society and Medicine; 3303, Social Dynamics of Mental Health; 3304, Race, Gender, and Health; 4961, Seminars in Selected Topics (as appropriate). **Only one of SOC 1010 or 1020 may be counted towards the major or minor.*

CONCENTRATION D: Inequality, Intersectionality, and Health Justice

AFRICAN AMERICAN AND DIASPORA STUDIES: 1016, Race Matters; 1111, First-Year Writing Seminar (as appropriate); 3214, Black Masculinity: Social Imagery and Public Policy; 4108, Medical Apartheid.

ANTHROPOLOGY: 1111, First-Year Writing Seminar (as appropriate); 2213W, Food, Identity, and Culture; 2342, Biology of Inequality; 2511, Culture and Climate Change; 3120, Sociocultural Field Methods (as appropriate); 3144, Politics of Reproductive Health; 3343, Biology and Culture of Race; 3345, Genetics in Society; 3348, Forensic Science, Genocide, and Human Rights; 3890, Special Topics (as appropriate); 4345, Human Evolutionary Genetics.

COMMUNICATION OF SCIENCE AND TECHNOLOGY: 2550, Genetic Breakthroughs: The Promise.

CORE: 2500 (as appropriate)

GENDER AND SEXUALITY STUDIES: 1111, First-Year Writing Seminar (as appropriate); 2268, Gender, Race, Justice, and the Environment; 2270, Ecofeminism: Theory, Politics, and Action; 2610, Womanism in Global Context; 3030, Feminist Disability Studies; 3305, Gender and Sexuality in Times of Pandemic.

HISTORY: 1111, First-Year Writing Seminar (as appropriate); 1525, Global History of Pests; 2413, Global History of Waste; 2780, Superhuman Civilization; 3040, Health and the African American Experience.

HUMAN AND ORGANIZATIONAL DEVELOPMENT: HEALTH AND HUMAN SERVICES (PEABODY): 3221, Health Service Delivery to Diverse Populations.

ITALIAN: 3705, Italian Food Studies: History, Culture, and Identity.

MEDICINE, HEALTH, AND SOCIETY: 2140, Health Care in the United States: Policy and Politics; 2155, Hysterical: Insanity, Impropriety, and Gender; 2210, Examining Care and Caregiving; 2230, Masculinity and Men's Health; 2270, Racial and Ethnic Health Disparities; 2310, Chinese Society and Medicine; 2240, Bionic Bodies, Disability Cultures; 2260, LGBTQ Health Disparities; 2375, Families in Turbulent Times; 2530, Guns in America; 2430, Social Capital and Health; 2610 Global Health Crises; 2700, Trauma, Violence, and Health; 2800, Foundations in Public Health, Theory, and Practice; 2940, Race, Citizenship, and Health; 2960, Lit, Bioethics, Anthropocene; 3000, Undergraduate Seminar (as appropriate); 3030, Community Health Research; 3040, Designing Healthy Publics; 3050W, Medicine and Literature; 3070W, Creative Writing as a Clinical Instrument; 3080, Clinical Ethics in Practice; 3260, Health Politics of Data, Surveillance and Security; 3320, Introduction to U.S. Health Care Policy; 3890, Special Topics (as appropriate); 4010, Psychiatry, Culture, and Globalization.

SOCIOLOGY: 1111, First-Year Writing Seminar (as appropriate); 3001, Sociological Perspectives; 3301, Society and Medicine; 3302, Poverty, Health, and Politics; 3304, Race, Gender, and Health; 3306, Gender and Medical Work; 3321, Population and Society; 3723, Gender, Sexuality, and the Body; 4961, Seminars in Selected Topics (as appropriate).

SPANISH: 3830, Spanish, Health and Society.

CONCENTRATION E: Medicine, Humanities, and Arts

ANTHROPOLOGY: 1111, First-Year Writing Seminar (as appropriate); 2370, Death and the Body; 3141, Anthropology of Healing; 3142, Medicine, Culture, and the Body; 3143, Medical Anthropology; 3345, Genetics in Society.

ASIAN STUDIES: 2630, Chinese Medicine.

COMMUNICATION STUDIES: 3750, Rhetoric of the Body.

CORE: 2500 (as appropriate)

ENGLISH: 1111, First-Year Writing Seminar (as appropriate); 3720, 3720W, Literature, Science, and Technology (as appropriate); 3730, Literature and the Environment: Contemporary Climate Fiction; 3891, Special Topics in Creative Writing (as appropriate).

GENDER AND SEXUALITY STUDIES: 1111, First-Year Writing Seminar (as appropriate); 2267, Seminar on Gender and Violence; 2612, Lesbian, Gay, Bisexual, and Transgender Studies; 3030, Feminist Disability Studies.

HISTORY: 1111, First-Year Writing Seminar (as appropriate); 1525, Global History of Pests; 2160, Medicine in Islam; 2413, Global History of Waste; 2800, Modern Medicine; 2810, Women, Health, and Sexuality; 2835, Sexuality and Gender in the Western Tradition to 1700; 2840, Sexuality and Gender in the Western Tradition since 1700; 3040, Health and the African American Experience.

HISTORY OF ART AND ARCHITECTURE: 3140, Healing and Art in East Asia.

ITALIAN: 3705, Italian Food Studies: History, Culture, and Identity.

JEWISH STUDIES: 2710W, Jewish Sexual Ethics.

MUSICOLOGY/ETHNOMUSICOLOGY: 3235, Music, Pandemics, and History.

MEDICINE, HEALTH, AND SOCIETY: 1111, First-Year Writing Seminar: Medicine, Health, and the Body; 2155, Hysterical: Insanity, Impropriety, and Gender; 2230, Masculinity and Men's Health; 2250, War and the Body; 2350, Italian Representations of Wellness and Illness; 2530, Guns in America; 2960, Lit, Bioethics, Anthropocene; 2950, Healing Animals; 3000, Undergraduate Seminar (as appropriate); 3050W, Medicine and Literature; 3080, Clinical Ethics in Practice; 3120, Medicine, Science, and Technology; 3150, Death and Dying in America; 3250, Perspectives on Trauma; 3260, Health Politics of Data, Surveillance and Security; 3450, Medical Illness Narratives; 3890, Special Topics (as appropriate); 4050, Narrative and Medicine: Stories of Illness and the Doctor-Patient Relationship.

PHILOSOPHY: 1008, 1008W, Introduction to Medical Ethics; 1111, First-Year Writing Seminar (as appropriate); 3606, 3606W, Moral Problems; 3608, Ethics and Medicine; 3630, Philosophy of Mind 3635, Ethics and Mental Health.

RELIGIOUS STUDIES: 3941, Religion, Science, and Evolution: Psychology of Religious Myth and Ritual; 4834, Post-Freudian Theories and Religion.

SOCIOLOGY: 1111, First-Year Writing Seminar (as appropriate).

SPANISH: 4760, Literature and Medicine.

OTHER ELECTIVES

In addition to the electives listed below, any course from the above concentration areas may serve as an elective if it is not already being used to satisfy a concentration requirement. No more than 12 hours of select science courses (marked with an asterisk in the list below) may be used to satisfy the major. Courses with an asterisk may not be

used to satisfy the minor. (Please consult the director of undergraduate studies for approval of “as appropriate” courses for electives.)

ANTHROPOLOGY: 1111, First-Year Writing Seminar (as appropriate); 1301, Introduction to Biological Anthropology; 3372, Human Osteology; 4373, Health and Disease in Ancient Populations.

BIOLOGICAL SCIENCES: 1110, Introduction to Microbiology; *1510, Introduction to Biological Sciences; *1511, Organisms and Ecosystems; *2101, Anatomy and Physiology; *2520, Biochemistry.

CHEMISTRY: *2221-2222, Organic Chemistry; *2211-2212, Organic Chemistry for Advanced Placement Students.

HUMAN AND ORGANIZATIONAL DEVELOPMENT, INTERNATIONAL LEADERSHIP AND DEVELOPMENT (PEABODY): 3342, Introduction to Community Psychology (same as PSY-PC).

MATHEMATICS: 1010, Probability and Statistical Inference; 1011, Probability and Statistical Inference; 2810, Probability and Statistics for Engineering; 2820, Introduction to Probability and Mathematical Statistics.

MEDICINE, HEALTH, AND SOCIETY: 1001, Commons Seminar; *1600, Introduction to Nutrition and Health for a Changing World; 3831, Service Learning Research and Readings (Note: 3831, Service Learning Research and Readings, must be taken concurrently with 3830); 3850, Independent Study; 3881, Internship Readings and Research (Note: 3881, Internship Readings and Research, must be taken concurrently with 3880).

PHILOSOPHY: 1111, First-Year Writing Seminar (as appropriate).

PSYCHOLOGY: 1111, First-Year Writing Seminar (as appropriate); 3600, Personality; 3610, Introduction to Clinical Psychology OR PSY-PC- 3200, Introduction to Clinical Psychology; 3615, Emotion; PSY-PC-1205, PSY-PC-1207, Minds, Brains, Cultures, and Contexts; PSY-PC-2400, Social and Personality Development; PSY-PC-2500, Infancy; PSY-PC-2550, PSY-PC-3650, Advanced Topical Seminar (as appropriate).

SOCIOLOGY: 4961, Seminars in Selected Topics (as appropriate).

Nanoscience and Nanotechnology

[Nanoscience and Nanotechnology Minor](#)

DIRECTORS Paul E. Laibinis, Sandra J. Rosenthal

COURSES OFFERED: [NANO](#)

Faculty in the School of Engineering and the College of Arts and Science offer an interdisciplinary minor in nanoscience and nanotechnology. The minor is administered by the School of Engineering.

Nanoscience and nanotechnology are based on the ability to synthesize, organize, characterize, and manipulate matter systematically at dimensions of ~1 to 100 nm, creating uniquely functional materials that differ in properties from those prepared by traditional approaches. At these length scales, materials can take on new properties that can be exploited in a wide range of applications such as for solar energy conversion, ultra-sensitive sensing, and new types of vaccines. These activities require the integration of expertise from various areas of science and engineering, often relying on methods of synthesis, fabrication, and characterization that are beyond those encountered in an individual course of study.

Students who minor in nanoscience and nanotechnology learn the principles and methods used in this rapidly growing field. Its core originates in the physical sciences by providing key approaches for describing the behavior of matter on the nanoscale. Synthetic approaches are used to manipulate matter systematically, for creating uniquely functional nanomaterials that can be inorganic, organic, biological, or a hybrid of these. With a third component of characterization, a process for designing systems to have particular properties as a result of their composition and nanoscale arrangement emerges. Students are introduced to these areas through foundational and elective courses for the minor that are specified below, the latter of which can be selected to fulfill the degree requirements for their major.

The minor in nanoscience and nanotechnology is supported by the Vanderbilt Institute of Nanoscale Science and Engineering (VINSE) that brings together faculty from the College of Arts and Science, the School of Engineering, and the Medical Center. A specialized laboratory facility maintained by VINSE provides students in the minor with capstone experiences that allow them to prepare and characterize a variety of nanostructured systems using in-house state-of-the-art instrumentation. This hands-on laboratory component enhances the attractiveness of students to both employers and graduate schools.

Nanoscience and Nanotechnology Minor

The minor in nanoscience and nanotechnology requires a total of 15 credit hours, distributed as follows:

1. Nano Core (9 hours). NANO 3000, PHYS 2660, and either CHEM 2610 or CHBE 4840.
2. Elective courses. 6 hours selected from the following list of approved subjects:

BME 4200	Principles and Applications of BioMicro ElectroMechanical Systems (BioMEMS)
BME 4500	Nanobiotechnology
CHBE 4830	Molecular Simulation
CHBE 4840	Synthesis and Applications of 2D Nanomaterials
CHBE 4850	Semiconductor Materials Processing
CHBE 4860	Molecular Aspects of Chemical Engineering
CHBE 4870	Polymer Science and Engineering
CHBE 4880	Corrosion Science and Engineering
CHEM 2610	Introduction to Nanochemistry
CHEM 3300	Physical Chemistry: Quantum Mechanics, Spectroscopy, and Kinetics
CHEM 3610	Introduction to Nanochemistry
CHEM 3630	Macromolecular Chemistry: Polymers, Dendrimers, and Surface Modification
CHEM 5610	Chemistry of Inorganic Materials
ECE 4283	Principles and Models of Semiconductor Devices
ECE 4284	Integrated Circuit Technology and Fabrication
ECE 4288	Optoelectronics
ECE 4385	VLSI Design
ECE 6306	Solid-State Effects and Devices I
IMS 5320	Nanoscale Science and Engineering
IMS 6310	Atomic Arrangements in Solids
ME 8320	Statistical Thermodynamics
ME 8323	Micro/Nanoelectromechanical Systems
ME 8365	Micro/Nanoscale Energy Transport
PHYS 2255	Modern Physics and the Quantum World
PHYS 2660	Experimental Nanoscale Fabrication and Characterization
PHYS 3640	Physics of Condensed Matter

Courses taken to satisfy relevant degree requirements for majors in the College of Arts and Science and the School of Engineering may also be counted toward fulfilling the minor.

Neuroscience

[Program of Concentration](#)

[Honors Program](#)

[Minor in Neuroscience](#)

DIRECTOR Douglas McMahon

DIRECTOR OF UNDERGRADUATE STUDIES Meredyth Wegener

Professor: Christos Constantinidis

Associate Professor of the Practice: Elizabeth Catania

Senior Lecturers: Amanda Avona, Meredyth Wegener

COURSES OFFERED: [NSC](#)

The study of the nervous system is an interdisciplinary enterprise that draws upon a variety of scientific disciplines ranging from molecular biology and biophysics to computational science and engineering to the study of behavior and cognition. To meet the challenge of providing training for entry into this exciting and growing field, Vanderbilt offers an interdisciplinary program of concentration in neuroscience that utilizes expertise from several departments within the university. The program consists of three components. The first provides for a broad foundation in the basic sciences and mathematics. Second, the program provides for exposure to each of the general areas of neuroscience including courses in cellular/molecular, systems, and integrative/cognitive neuroscience. This course work is supplemented with exposure to the laboratory techniques utilized in neuroscience research. Finally, the program allows students to pursue more work in the specific sub-disciplines of neuroscience and in areas of inquiry related to neuroscience through elective courses. Students are especially encouraged to participate in research in the laboratories of neuroscience faculty under the auspices of the undergraduate research courses. More extensive research experience is available through the Honors Program in Neuroscience. For additional information, see as.vanderbilt.edu/neuroscience.

Program of Concentration

The neuroscience major consists of 38 credit hours of course work that includes 8 credit hours of organic chemistry and 30 credit hours of neuroscience and related courses distributed among specific disciplines associated with the study of neuroscience. Students majoring in neuroscience are additionally required to complete introductory courses in mathematics, statistics or computer science, biology and physics that provide the broad scientific background necessary to the study of neuroscience. The areas and associated course options are listed below. Excluding research credit (3861, 3862, 3863, 3864, and 4999), the neuroscience and related courses must be drawn from at least two departments or programs.

Students seeking a second major within the College of Arts and Science may count a maximum of 6 credit hours of 2000-or-higher-level course work to meet the requirements of both majors.

Required Math and Science Courses

Biological Sciences (8 credit hours)

BSCI 1510, 1511, 1510L, and either 1511L or 1512L.

Chemistry (8 credit hours)

CHEM 2211 or 2221; CHEM 2212 or 2222; and CHEM 2221L and 2222L.

Mathematics, Statistics, Computer Science (6–8 credit hours)

MATH 1100, 1200, or 1300; and one of MATH 1201, 1301, BSCI 3270, PSY 2100, PSY-PC 2110, CS 1101, 1103, or 1104.

Physics (8 credit hours)

PHYS 1501, 1601 or 2051; PHYS 1502, 1602 or 2053; PHYS 1501L, 1601L or 2052; and PHYS 1502L, 1602L, or 2054.

Neuroscience Courses

Introduction to Neuroscience (3 credit hours)

NSC 1400 (formerly 2201).

Cellular and Molecular Neuroscience (6 credit hours)

BSCI 3252, 3256; NSC 2235 (formerly 3235), 2260 (formerly 3260), 2269 (formerly 3269), 3240, 3245, 3250, 3251,

3891.

Systems, Integrative, and Cognitive Neuroscience (6 credit hours)

BSCI 3230, 3254, 3271; NSC 3270, 3274, 3275, 3892, 4961, 4969; PSY 2220, 2230, 3620, 3700, 3715, 3730, 3760, 3765, 3775, 3780, 3785, 3892, 4720; PSY-PC 3190.

Neuroscience Laboratory (6 credit hours)

NSC 3861, 3862.

Neuroscience Electives (6 credit hours)

Two additional courses from the Cellular and Molecular Neuroscience and/or Systems, Integrative, and Cognitive Neuroscience courses listed above. NSC 3863 or NSC 4999 may be used to count for one elective course.

Related Course Electives

(3 credit hours; one course not used to satisfy the Required Math and Science course requirement above.)

BSCI 2201, 2201L, 2210, 2210L, 2520, 3270, 4265; BME 3100, 3101; CHEM 2100, 3310, 3710, 4720; CS 1101 or 1103 or 1104; MATH 2300, 2400 or 2420; PHIL 3616, 3630; PSY 2100, 2200, 3600, 3625, 3705, 3715, 3810.

Honors Program

Superior students with a strong interest in research are encouraged to consider the Honors Program in Neuroscience. Normally a student will apply to enter the Honors Program in the second semester of the junior year and assemble an Honors Committee that will consist of the research mentor and at least two other appropriate members of the faculty. Entrance into and satisfactory completion of the Honors Program requires that students maintain a cumulative grade point average of 3.3 and a grade point average of 3.3 in courses counting toward the neuroscience major. Honors candidates must meet all the normal requirements for the neuroscience major, but are expected to complete at least 6 hours of advanced research course work (from NSC 3863, 3864 and 4999). Three of these research-credit hours may count toward neuroscience elective course work. As part of this research course work, the candidate will be expected to write an honors thesis, present the thesis during the final semester in residence, and satisfactorily pass an oral examination by the student's Honors Committee. Students interested in becoming honors candidates should consult with the director of honors. For more information on the Honors Program, please see as.vanderbilt.edu/neuroscience/the-honors-program.

Minor in Neuroscience

This program provides a foundation of knowledge in neuroscience that is appropriate for students majoring in a related discipline or who have a general interest in the nervous system. As prerequisites, students are required to complete CHEM 1601 and 1601L, BSCI 1510 -1511, 1510L, and either 1511L or 1512L. The minor program consists of 18 credit hours of course work distributed as follows:

NSC 1400 (formerly 2201).

3 credit hours in Statistics/Computer Science: BSCI 3270, PSY 2100, PSY-PC 2110, CS 1101, 1103, or 1104.

6 credit hours chosen from the courses listed as "Cellular and Molecular Neuroscience."

6 credit hours chosen from the courses listed as "Systems, Integrative and Cognitive Neuroscience."

The chosen courses counting towards the 18 credit hours must come from at least 3 different departments or programs (e.g. NSC, PSY, and BSCI).

Research courses (NSC 3860, 3861, 3862, 3863, 3864, and 4999) do not count towards the minor.

Philosophy

[Program of Concentration in Philosophy](#)

[Honors Program](#)

[Minor in Philosophy](#)

CHAIR Julian Wuerth

DIRECTOR OF UNDERGRADUATE STUDIES Matthew Congdon

DIRECTOR OF GRADUATE STUDIES Karen Ng

Professors, Emeriti: Idit Dobbs-Weinstein, Robert Ehman, Marilyn Friedman, Larry May, Kelly Oliver, Lucius Outlaw, Charles Scott, Henry Teloh, Jeffrey Tlumak

Professors: Lenn Goodman, Michael Hodges, Robert Talisse

Associate Professors: Scott Aikin, Karen Ng, Julian Wuerth

Assistant Professors: Jacob Barrett, Matthew Congdon, Emanuele Costa, Diana Heney, Sarah Raskoff, David Throstad

Associate Professor of the Practice: Kristin Boyce

Senior Lecturer, Emeriti: Russell McIntire

Senior Lecturers: Andrew Sucre, Brandon Underwood

COURSES OFFERED: [PHIL](#)

The Department of Philosophy at Vanderbilt offers a wide range of courses relating philosophy to various dimensions of human concern.

The department emphasizes three broad areas of scholarly and teaching excellence: ethics, social and political philosophy, and the history of philosophy.

Program of Concentration in Philosophy

The program of concentration should be tailored to the needs and interests of the student. The following distribution of courses is required as part of the major. Logic: 1003 or 3003 (at least 3 credit hours); Ethics: 1005, 3605, 3606, or 3606W (at least 3 credit hours); History of Philosophy: 2100, 2101, 2102, 2103, or 2104 (at least 6 credit hours). Any alterations must be approved by the director of undergraduate studies. We encourage all majors to work closely with their advisers to select courses that form a coherent whole. The student must take at least 30 credit hours in the major field of which at least 21 credit hours must be in courses beyond the 1000 level.

Honors Program

The Honors Program offers opportunities for advanced study in philosophy, including independent research projects and/or enrollment in certain graduate seminars (with permission of the instructor). To be admitted to the program, the student must: (a) be a major in philosophy; (b) have a grade point average of 3.3 in all courses; (c) have a 3.5 grade point average in philosophy courses; and (d) develop a written proposal for advanced study in consultation

with a philosophy faculty sponsor. Students who satisfy these requirements should meet with the director of undergraduate studies to review their programs, whereupon the director may nominate the students for honors work. Honors work typically begins in the junior year or in the first semester of the senior year; students in the program must complete at least 3 credit hours of Philosophy 3999. Students who successfully complete the program while maintaining the grade point averages of 3.3 generally, and 3.5 in the major, will receive honors in philosophy; students who do especially distinguished work will receive highest honors.

Minor in Philosophy

The minor in philosophy consists of 18 credit hours, including at least 12 credit hours in courses beyond the 1000 level. The minor program will be constructed so as to provide a broad grounding in philosophy and to complement the student's other studies. Each program must be approved by the director of undergraduate studies.

Note: 1002 or 1002W or 1005 or 1111 are ordinarily taken prior to all other philosophy courses, except 1003 and 3003 (logic courses), 3616 (philosophy of science), and 3013 (aesthetics).

Associate Professors: Steven Csorna, Alfredo Gurrola, Jason Valentine, Junzhong Xu

Assistant Professors: Yi Chen, John Eley, Karan Jani, Raghav Kunnawalkam Elayavalli, Alexandru Lupsasca, Mallory Molina, Jean-Francois Paquet, Jessie Runnoe, Stephen Taylor, Adam Yock

Principal Senior Lecturers: Sourish Dutta, Erika Grundstrom, Momchil Velkovsky

Senior Lecturers: Amal al-Wahish, Dusan Danilovic, Brenda Fabela Enriquez, Katherine Shepard

Adjoint Professors: Sakir Ayik, Arnold Burger, William Hofmeister

Adjoint Assistant Professors: Emmanuel Rowe, Susan Stewart

COURSES OFFERED: [ASTR](#), [PHYS](#)

As fundamental sciences, physics and astronomy continue to be driving intellectual forces in expanding our understanding of the universe, in discovering the scientific basis for new technologies, and in applying these technologies to research. In keeping with this crucial role, the Department of Physics and Astronomy offers courses dealing with both the cultural and intellectual aspects of the disciplines, a broadly based major program flexible enough to serve as preparation for graduate study in physics, applied physics, medical physics, astronomy or astrophysics, professional study in another area, or technical employment, and minor programs for students desiring to combine physics or astronomy with other majors. An honors program is available for qualified departmental majors.

A distinguishing feature of the Vanderbilt undergraduate curriculum is the close coupling between teaching and research. At Vanderbilt, active research groups are studying the physics of elementary particles; nuclear structure and heavy-ion reactions; nonlinear interactions of lasers with materials at ultrafast time scales; the behavior of electrons, atoms, molecules, and photons near surfaces; the electric and magnetic properties of living systems; the structure and dynamics of biopolymers; young stars; and cosmology. All professors are engaged in research, and undergraduate students can participate in this research informally or through independent study or summer work.

The Society of Physics Students arranges informal discussions.

Program of Concentration in Physics

The Physics Department offers both a B.A. and a B.S. degree. Both degrees provide a thorough grounding in the core areas of physics. The B.A. degree provides maximum flexibility and is suitable either as preparation for careers in science and engineering or as a springboard for applying technical knowledge in such fields as business, medicine, law, public policy, and education. The B.S. degree is designed for students seeking a more rigorous knowledge of the subject and is most suitable for students hoping to pursue a graduate degree in physics, astronomy, or a related field. The B.A. in the Department of Physics and Astronomy consists of 31–32 credit hours of course work, and the B.S. consists of 40–41 credit hours, distributed as below. Students considering majoring in physics are strongly encouraged to consult with the director of undergraduate studies before registering for classes.

B.A. in Physics:

1. Core courses covering the major subdisciplines of physics — Students must complete four of the following (12 credit hours): Modern Physics and the Quantum World (2255); Classical Mechanics (2275); Electricity, Magnetism, and Electrodynamics I (2290); Statistical Physics (3200); Quantum Mechanics I (3651).
2. Laboratory work — Students may not use AP credit to satisfy any portion of the laboratory sequence requirement (3–4 credit hours): a. Laboratory Principles I (1912L), Laboratory Principles II (2255L), and Introduction to Experimental Research (2953L); or b. 1501L or 1601L, 1502L or 1602L, 2255L, and 2953L if the student has entered the major by taking the Page 468 of 1443 introductory physics course sequence 1501 or 1601, 1501L or 1601L, 1502 or 1602, and 1502L or 1602L. Students considering majoring in physics

who begin in 1501 or 1601 and 1501L or 1601L in the fall semester are encouraged to take the combination 1502 + 1912L or 1602 + 1912L in the spring semester.

3. Electives (9 credit hours) — Pedagogical course work in physics and/or astronomy; research hours (3850, 3851, 4998) do not count toward this requirement. The course electives may be taken from any 2000-level or higher PHYS or ASTR courses not used to satisfy any other requirement of the major. Other courses may count as electives, such as courses offered by the engineering school (or other departments and schools) that are particularly relevant, such as a course in environmental studies, health physics, optics, or materials science. Such exceptions must be approved by the director of undergraduate studies.
4. Capstone (7 credit hours) — Computational Physics (3790), 3 credit hours of research (3850, 3851, or 4998) taken across one or more semesters, and the Seminar in Presenting Physics Research (3600). Physics-related research done in other departments and programs, supervised by Vanderbilt faculty and pre-approved by the director of undergraduate studies, is also permitted in satisfaction of the research requirement.

B.S. in Physics

1. Core courses covering the major subdisciplines of physics — Students must complete six of the following (18 credit hours): Modern Physics and the Quantum World (2255); Classical Mechanics (2275); Electricity, Magnetism, and Electrodynamics I (2290); Electricity, Magnetism, and Electrodynamics II (2290); Statistical Physics (3200); Quantum Mechanics I (3651); Quantum Mechanics II (3651); Mathematical Methods for Physicists (4005).
2. Laboratory work — Students may not use AP credit to satisfy any portion of the laboratory sequence requirement (3–4 credit hours): a. Laboratory Principles I (1912L), Laboratory Principles II (2255L), and Introduction to Experimental Research (2953L); or b. 1501L or 1601L, 1502L or 1602L, 2255L, and 2953L if the student has entered the major by taking the Page 468 of 1443 introductory physics course sequence 1501 or 1601, 1501L or 1601L, 1502 or 1602, and 1502L or 1602L. Students considering majoring in physics who begin in 1501 or 1601 and 1501L or 1601L in the fall semester are encouraged to take the combination 1502 + 1912L or 1602 + 1912L in the spring semester.
3. Electives (9 credit hours) — Pedagogical course work in physics and/or astronomy; research hours (3850, 3851, 4998) do not count toward this requirement. The course electives may be taken from any 2000-level or higher PHYS or ASTR courses not used to satisfy any other requirement of the major. Other courses may count as electives, such as courses offered by the engineering school (or other departments and schools) that are particularly relevant, such as a course in environmental studies, health physics, optics, or materials science. Such exceptions must be approved by the director of undergraduate studies.
4. Capstone (10 credit hours) — Computational Physics (3790), 6 credit hours of research (3850, 3851, or 4998) taken across two or more semesters, and the Seminar in Presenting Physics Research (3600). Physics-related research done in other departments and programs, supervised by Vanderbilt faculty and pre-approved by the director of undergraduate studies, is also permitted in satisfaction of the research requirement.

Licensure for Teaching

Candidates for teacher licensure in physics at the secondary level may qualify by taking the basic physics major together with the requisite education courses described in the chapter on Licensure for Teaching in the Peabody College section of this catalog.

Honors Program

The Honors Program in the Department of Physics and Astronomy is designed to allow a student to engage in advanced research under the guidance of a faculty member, usually in an area related to an ongoing research program in the department. A student majoring in physics interested in Honors (Honors in Physics or Honors in Astronomy) will work with a faculty mentor to develop an appropriate research project that will be conducted under the guidance of that faculty member. The Honors project must have a substantial grounding in physics or astronomy, but may be conducted under the direct supervision of any faculty member in any department at Vanderbilt. To be admitted to the Honors Program, a student must submit a two-page research proposal describing the plans for their Honors project, which must be approved by the director of the departmental Honors Program. In addition, a student must have completed 2953L, either 2255 or 3651, and meet the minimum GPA requirements for honors programs of the College of Arts and Science.

To graduate with honors, a student must

- Have at least a 3.00 cumulative GPA and a 3.300 GPA in courses that count toward the major.
- Earn a minimum of 6 credit hours in research classes (3850, 3851, 4998), leading to an honors thesis, with at least 2 of these credit hours earned in A student who earns credit for 3852 may satisfy this portion of the

requirement with 3 credit hours of research earned at Vanderbilt, including at least 2 of these credit hours in 4998.

- Write a senior thesis of high merit, as evaluated by the student's Honors Examination Committee; the thesis may be submitted either in the fall or spring semester of the senior year.
- Demonstrate high attainment on an oral honors examination in which they present and defend their work to the student's Honors Examination Committee; the oral examination may take place either in the fall or spring semester of the senior year.

Departmental Minors

The physics and astronomy minors are suitable for students who wish to supplement a related discipline or simply have a general interest in the field. Research is not a requirement for either minor.

Minor in Physics

The minor requires a minimum of 19 credit hours of course work, distributed as follows:

Any first-semester physics class (1501, 1601, 1911, 2051)	3-4
Any first-semester physics laboratory (1501L, 1601L, 1912L, 2052)	1
Any second-semester physics class (1502, 1602, 1912, 2053)	3-4
Any second-semester physics laboratory (1502L, 1602L, 2255L, 2054)	1
PHYS 2255 or 3651	3
6 credit hours of electives. These may be selected from any 2000-level or higher-level PHYS courses not used to satisfy the above requirements or from 3 credit hour non-PHYS courses, the latter if approved by the director of undergraduate studies, and may include up to 3 credit hours of research (3850, 3851, 4998).	6
Total credit hours:	17-19

Minor in Astronomy

The minor requires a minimum of 16 credit hours of course work, distributed as follows:

ASTR 1010 and either 1010L or 1020L; or 1210	4
ASTR 2110	3
ASTR 3000	3
Two other astronomy courses, one of which may be a 3 credit hour one-semester research project (3850, 3851, 4998). Note that only physics majors pursuing honors in astronomy are eligible to enroll in 4998.	6
Total credit hours:	16

Introductory Courses - Physics

1001, 1010, 1020, 1010L, 1111, 1501, 1501L, 1502, 1502L, 1601, 1601L, 1602, 1602L, 1911, 1912, 1912L, 2255L

Introductory, calculus-based physics is offered at several different levels, each with the appropriate laboratory. Only one of 1501/1601/1911 and one of 1502/1602/1912 may be taken for credit. Physics 1501-1502/1601L-1602L is intended for students in the health sciences. Physics 1601-1602/1601L-1602L is intended for students in engineering. Physics 1911-1912 and the labs 1912L-2255L are intended for students planning to major in physics or pursue research-oriented careers in science, engineering, or mathematics; however, students may major in physics after starting in any of these three introductory physics sequences. Prospective majors are strongly advised to begin their study of physics in the fall semester of their freshman year whenever possible, although with careful planning it is possible to complete the physics major with a later start. Physics 1010 /1020 is intended for students without strong backgrounds in mathematics or science who have a general interest in the subject. 1010/1020 is not recommended as preparation for further study in a natural science, is not appropriate for engineering, premedical, or pre-dental students, and does not count toward the physics major or minor.

Intermediate Courses - Physics

2210, 2255, 2275, 2290, 2660, 2953L, 3122, 3200, 3600

The intermediate-level courses cover the major subdisciplines of classical and modern physics.

Advanced Courses - Physics

2291, 3640, 3651, 3652, 3660, 3790, 3850, 3851, 3890, 4111, 4998

These courses are intended for physics majors in their junior and senior year and provide material supporting independent study or honors projects in physics.

Medical and Health Physics Courses

3125, 3645

Physics Education Courses

3820

Introductory Courses - Astronomy

1001, 1010, 1010L, 1020L, 1111, 1210

Intermediate Courses - Astronomy

2110, 2130, 2150, 3000

Advanced Courses - Astronomy

3600, 3700, 3800, 3850, 3851, 3900, 4998

Political Economy

THE Political Economy (PECN) minor is a program that is jointly situated between the Departments of Economics and Political Science that provides students with the opportunity to engage with the economic analysis of political institutions and behavior, as well as the analysis of the political consequences of economic decisions, policies, and outcomes. Students who minor in Political Economy will acquire a common foundation in tools of microeconomic theory and game theory, and they will take substantive and methodological coursework to build on these common analytical foundations to develop expertise in a broad range of topics in political science, economics, and public policy.

Minor in Political Economy

This interdisciplinary minor requires 18 credit hours divided into two parts: 6 credit hours of required core courses and 12 credit hours of elective courses, where at least three credit hours of elective courses have to be completed in Political Science and Economics.

Prerequisites

Students declaring a minor in Political Economy are required to complete either Economics 3012 or Political Science 2259.

1. *Core Courses (6 credit hours)*
2. Economics 4230/Political Science 3400, Political Economy of Elections
3. Economics 4240, Political Science 3401, Political Economy of Institutions and Development
4. *Electives (12 credit hours)*

Students are required to complete at least four electives from the following list of courses, where at least one course must be taken in each of the Departments of Economics and Political Science: ECON 2890, ECON 3032, ECON 3035, ECON 3110, ECON 3200, ECON 4220, ECON 4260, ECON 4540, PSCI 2211, PSCI 2221, PSCI 2225, PSCI 2226, PSCI 2228W, PSCI 2259, PSCI 2274, PSCI 2300, PSCI 3252, PSCI 3259.

Student Advising

Students who declare a minor in Political Economy will be advised by one of the affiliated faculty, where the assignment of advisor will depend on whether the student took the required prerequisite for the minor in the Economics department or the Political Science department. If a student completes her prerequisite by completing Economics 3012, she will be advised by an affiliated faculty member in the Economics Department, and if she completes her prerequisite by taking Political Science 2259, she will be advised by an affiliated faculty member in the Political Science Department.

CHAIR John Sides

DIRECTOR OF UNDERGRADUATE STUDIES Jonathan Hiskey

DIRECTOR OF GRADUATE STUDIES Sharece Thrower

Professors, Emeriti: William Booth, Bruce Oppenheimer, Richard Pride, James Ray, Nicholas Zeppos

Professors: Brooke Ackerly, Larry Bartels, Joshua Clinton, Daniel Diermeier, John Geer, Carolyn Heinrich, Jonathan Hiskey, Cindy Kam, David Lewis, Noam Lupu, Edward Rubin, John Sides, Wendy Tam Cho, Jessica Trounstone, Alan Wiseman, Elizabeth Zechmeister

Associate Professors: Brett Benson, Katherine Carroll, Andrew Coe, Cassy Dorff, Brenton Kenkel, Jennifer Larson, Emily Ritter, Bradley Smith, Sharece Thrower

Assistant Professors: Abhit Bhandari, Peter Bils, James Bisbee, John Dearborn, J. Andres Gannon, Federica Izzo, Jorge Mangonnet, Nina McMurry, Leah Rosenstiel, Peter Schram, Georgiy Syunyaev, Erin York

Principal Senior Lecturer: Carrie Russell

COURSES OFFERED: [PSCI](#)

The Department of Political Science is oriented toward both teaching and research and has multiple missions. First, it offers a balanced curriculum for undergraduates and graduate students to study the art and science of politics. Second, it offers training for students preparing to become professionals in political science and other fields. Third, it exists as a research faculty seeking new knowledge about government and politics.

Many members of the faculty have national and international reputations in their fields of scholarship. These research and teaching interests vary widely, from political leadership to the comparison of new and old democratic governments, issues of political economy, and ethical questions about politics.

Political science majors may participate in independent study, directed study, selected topics seminars, first-year seminars, the Honors Program, and internships. Average class size is close to thirty—small classes make personal contact with the faculty relatively easy. Students participate in the governance of the department through the Undergraduate Political Science Association, and may qualify for membership in Pi Sigma Alpha, the national political science honorary society.

Program of Concentration in Political Science

Students majoring in political science are required to complete a minimum of 30 credit hours of work, distributed as follows:

Major Concentration	Hours
<i>Political Science Foundation</i>	
1100, 1101, 1102, 1103, 1104, or 1150	6
<i>Political Science Subfields</i>	12 (3 hours from 4 different subfields)
<i>*American Government and Politics subfield</i> (2204W, 2222, 2232, 2234, 2235, 2240, 2240W, 2241, 2242W, 2243, 2244, 2245, 2253, 2255, 2256, 2257, 2259, 2260, 2262, 2265, 2266, 2267, 2269, 2270, 3150, 3241, 3242, 3243, 3244, 3246, 3247, 3249, 3250, 3252, 3253, 3254, 3260, 3262, 3268, 3700W, 3701, 3893, 4444)	
<i>*Comparative Politics subfields</i> (2210, 2212W, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2223, 2224W, 2228W, 2230, 2231, 2232, 2236, 2237, 2238, 2239, 2246W, 2249, 2252, 2554W, 2270, 2278, 2400W, 2405W, 3211, 3217, 3218, 3219, 3220, 3227, 3228, 3235, 3272, 3272W, 3273, 3273W, 3274, 3400, 3401, 3894, 4238)	
<i>*International Relations subfield</i> (2170, 2171, 2211, 2220, 2221, 2222, 2223, 2225, 2226, 2227, 2234, 2236, 2263, 2270, 2273, 2274, 2275, 2405W, 3211, 3227, 3228, 3229, 3270, 3272, 3272W, 3273, 3273W, 3275, 3895, 4277)	
<i>*Political Theory subfield</i> (2201, 2202, 2203, 2204W, 2205, 2207, 2207W, 2208, 2209, 2263, 3206, 3246, 3253, 3258, 3264W, 3265, 3266, 3271, 3333, 3896, 4257, 4444; PHIL 3610, 3620)	
<i>*Research Methods subfield</i> (2170, 2171, 2259, 2270, 2279, 2300, 2301, 2310, 2321, 3156, 3205, 3400, 3401, 3273, 3273W)	
<i>Electives</i> (Any 2000, 3000, or 4000-level course listed above; 2270, 2279, 2300, 2130, 3891, 3897; one additional 1100-level course; up to 6 credit hours of 3841, 3842, 3851, 3852, 3880, 3882, 3882, 3883, 4998, 4999 combined)	12
Minimum 30 credit hours total	

In order to graduate with a political science major, students must take a brief exam within the major concentration in which they are most interested during their senior year. Students are to take this exam online in the fall or spring of their senior year. The exam is not graded, and no grade will appear on the student's transcript. The purpose of the exam is to ascertain the extent to which political science majors are retaining fundamental aspects of the political science curriculum.

Students desiring an emphasis on African American politics within their program of concentration should consider courses in the following group: 2240, 2255, 2265, 2266. They may also choose to elect the following courses at Fisk University: Political Science 245 (Afro-American Political Thought), 254 (Politics in the Black Community), and 406 (African Political Systems).

Graduate Courses. Qualified undergraduates may enroll in graduate courses with the consent of their adviser, the course instructor, and the Graduate School. To enroll in graduate courses, undergraduate applicants need to comply with rules provided under the heading Undergraduate Enrollment in Graduate Courses in this catalog.

Honors Program

To enter the Honors Program, students should have completed all but 6 credit hours of the AXLE requirements, and have a minimum overall GPA of 3.6. They should also have a minimum GPA of 3.6 in all the political science courses they have taken up to the point at which they enter the Honors Program. They must have exhibited to the

department additional evidence of an ability to do independent work. Finally, they must be nominated by the director of the undergraduate studies program.

In addition to requirements set by the College of Arts and Science, the following requirements must be met in order for honors in political science to be awarded:

1. 30 credit hours in political science, as well as all of the requirements for political science majors.
2. 3.6 grade point average in all political science courses, and a 3.6 average in courses that count toward honors in political science.
3. Completion of an honors thesis under the direction of a faculty adviser. Students will enroll in Senior Honors Research (4998) during the fall semester and the thesis capstone course (3897) in the spring semester of the academic year in which they work on the honors thesis (at least 3 credit hours each).
4. An oral defense of the honors thesis in the last semester of their thesis year.

Students in the Honors Program are encouraged to take PSCI 2270 before they enter or during their first semester in the Honors Program.

Students will complete the thesis under the direction of a faculty adviser. More information and instructions for applying to the Honors Program can be found on the Political Science webpage. The student will complete the oral defense in the department, after which it will also be determined whether the student will receive honors or highest honors. *Successful candidates are awarded honors or highest honors in their field and this designation appears in the Commencement program and on their diplomas.*

Minors in Political Science

The Department of Political Science offers five minor concentrations, which are detailed below. 15 of the 18 credit hours must be used exclusively for the minor.

Minor Concentration	Hours
<i>American Politics</i> 1100 or 1150	3
Any five of the following: 2204W, 2222, 2232, 2234, 2240, 2240W, 2241, 2242W, 2243, 2244, 2245, 2253, 2255, 2256, 2257, 2259, 2260, 2262, 2265, 2266, 2267, 2269, 2270, 3150, 3241, 3243, 3244, 3246, 3247, 3249, 3250, 3252, 3253, 3254, 3260, 3262, 3268, 3700W, 3701, 3893, 4444	15
<i>Political Economy (offered jointly with the Department of Economics)</i> PSCI 3400/ECON 4230 PSCI 3401/ECON 4240	6

Any four of the following: PSCI 2211, 2221, 2225, 2226, 2274, 2228W, 2259, 2300, 3252, 3259 ECON 2890, 3110, 3200, 3032/3035, 4220, 4260, 4540 Of the 4 elective classes, at least one has to be taken from a course offered by the Department of Political Science, and at least one course has to be taken from a course offered by the Department of Economics.	12
<i>Political Theory</i> 1103	3
Any five of the following: 2201, 2202, 2203, 2204W, 2205, 2207, 2207W, 2208, 2209, 2263, 3206, 3253, 3258, 3264W, 3265, 3266, 3270, 3271, 3333, 3896, 4257, 4444; PHIL 3610	15
<i>World Politics</i> A student may stress comparative politics or international relations or may mix the two in this minor. 1101 or 1102	3
Any five of the following: 2170, 2171, 2210, 2211, 2212W, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224W, 2225, 2226, 2228W, 2230, 2231, 2236, 2237, 2238, 2239, 2246W, 2249, 2251, 2252, 2254W, 2263, 2270, 2273, 2274, 2275, 2278, 2400W, 2405W, 3211, 3217, 3218, 3219, 3228, 3229, 3235, 3272W, 3273, 3273W, 3274, 3475, 3400, 3894, 3895, 4238, 4277	15
<i>National Security</i> 1102 or 2234	3
Two courses from any one of the following groups: • Data Science ◦ PSCI 1104 Introduction to Quantitative Political Science ◦ All Data Science courses • Formal Theory ◦ PSCI 2259 Political Strategy and Game Theory ◦ PSCI 3229 Strategy and International Politics • Computer Science ◦ Option 1: CS/DS 1100 Applied Programming and Problem Solving with Python and CS 2204 Program Design and Data Structures for Scientific Computing ◦ Option 2: CS 1101 Programming and Problem Solving and CS 2201 Program Design and Data Structures	6

Electives: Any three of the following • PSCI 2211 Terrorism and Intrastate Conflict • PSCI 2219 Crisis Diplomacy • PSCI 2221 Causes of War • PSCI 2225 American Foreign Policy • PSCI 2227 War and State Development • PSCI 2235 The United States Military • PSCI 2246 Civil Conflict and Civilians • PSCI 2273 Conflict Management • PSCI 2274 Nature of War • PSCI 2275 Politics and Strategy of Weapons of Mass Destruction • PSCI 2400 Political Economy of Corruption • PSCI 3272 The War in Iraq • PSCI 3275 National Security • PSCI 4277 Future of Warfare • PSCI 2170/2171 ROCCA lab • HIST 1690 Sea Power in History • HIST 1691 Evolution of Warfare • HIST 1730 The U.S. and the Cold War • HIST 1735W United States Intelligence Community, 1940 to the Present • HIST 1740 The U.S. and the Vietnam War • HIST 1702 History of Strategic Thought • HIST 1700 Western Military History to 1815 • HIST 2110 Crisis Simulation in East Asia • HIST 2111 China and the US: Intertwined Histories • HIST 2457 Drug Trafficking and Society in Latin America • HIST 2710 The U.S. as a World Power • HIST 2720 World War II • HIST 2723 The Pacific War • ANTH 3133 Political Anthropology: States and their Secrets • ANTH 3261 Introduction to Geographic Information Systems and Remote Sensing • ANTH 3371 Social and Health Consequences of Pandemics • MHS 2250 War and the Body	9

Licensure for Teaching

Candidates for teacher licensure in political science at the secondary level should refer to the chapter on Licensure for Teaching in the Peabody College section of this catalog.

VICE CHAIR Isabel Gauthier

DIRECTOR OF UNDERGRADUATE STUDIES Adriane E. Seiffert

DIRECTOR OF GRADUATE STUDIES René Marois

DIRECTOR OF CLINICAL TRAINING Bunmi O. Olatunji

Professors, Emeriti: Randolph Blake, Thomas Burish, William Caul, Keith Clayton, Ford Ebner, Jeffery Franks, Joseph Lappin, Richard McCarty, Richard Odom, William Smith, Andrew Tomarken

Professors: Robert Bodenheimer, David Calkins, Li Min Chen, Bruce Compas, Christos Constantinidis, Blythe Corbett, Laurie Cutting, Isabel Gauthier, Troy Hackett, Stephan Heckers, Steven Hollon, Angela Jefferson, Jon Kaas, Gordon Logan, ReneMarois, Timothy McNamara, Lisa Monteggia, Bunmi Olatunji, Thomas Palmeri, Sohee Park, C. Cybele Raver, Sandra Simmons, Frank Tong, Mark Wallace, Duane Watson, Thilo Womelsdorf, Geoffrey Woodman

Associate Professors: Jo-Anne Bachorowski, Carissa Cascio, Reyna Gordon, Suzana Herculano, Kari Hoffman, Alexander Maier, Sean Polyn, Ramnarayan Ramachandran, David Schlundt

Assistant Professors: André Bastos, Antonia Kaczurkin, Miriam Lense, Mikail Rubinov, Jonathan Schaefer, Ashley Watts

Principal Senior Lecturer, Retired: Leslie Smith

Principal Senior Lecturer: Adriane Seiffert

Senior Lecturers: Ashleigh Maxcey, Elisabeth Sandberg, Meredyth Wegener

Adjoint Professors: Jeffrey Schall, Jennifer Trueblood, David Zald

Adjoint Assistant Professor: Jacob Westerberg

COURSES OFFERED: [PSY](#)

Psychology is the scientific study of brain, behavior, and cognitive processes. At Vanderbilt, the undergraduate program introduces students to the major areas of contemporary psychology: clinical science, human cognition and cognitive neuroscience, developmental psychology, neuroscience, and social psychology. Clinical science studies human personality, emotion, abnormal behavior, and therapeutic treatments. Human cognition and cognitive neuroscience are the study of processes such as learning, remembering, perceiving objects and events, and neural mechanisms underlying these processes. Developmental psychology examines human development from conception through adulthood, including cognitive, emotional, physical, and social aspects. Neuroscience studies the structure and function of the brain and how nerve cells process sensory information, mediate decisions, and control motor actions. Social psychology examines interpersonal and intergroup relations and the influence of social conditions on cognitive, emotional, and behavioral processes.

The Department of Psychology offers a general program of study for students who desire a broad background in contemporary psychology, as well as an honors program. The department offers a wide variety of opportunities for undergraduates to gain research experience through active participation in faculty research projects. Such research experience is considered a fundamental aspect of education in psychological science.

Programs of Concentration in Psychology

General Program

PSY 1200

PSY 2100 or PSY-PC 2110 (Peabody)

PSY 2150

4 Distribution Courses*

5 Psychology Electives**

Total credit hours: 36

Honors Program

PSY 1200

PSY 2100 or PSY-PC 2110 (Peabody)

PSY 2150

4 Distribution Courses*

2 or all 3 of PSY 3980, 3981, and 4998

PSY 4999

3 Psychology Electives

Students who only take two semesters of PSY 3980, 3981, and 4998 will need to take an additional elective course to fulfill their 42 credit hours.

Total credit hours: 42

Honors Program

The Honors Program offers qualified majors the opportunity to conduct research projects in collaboration with faculty members. This research culminates in the writing and public presentation of a senior thesis.

The Honors Program offers unusual opportunities for interested and qualified students, including special seminars and individual research projects. The program should substantially aid those intending to do graduate work.

The program requires three or four semesters of honors research and participation in the Honors Seminars, which are PSY 3980, 3981, 4998, and 4999. (Students must have at least 9 credit hours total, with mandatory enrollment in PSY 4999). Students may enroll in the three-semester options of the Honors Program—provided they can complete the research project by extra work during three regular semesters and/or a summer, and provided this arrangement is acceptable to the faculty mentor and to the director of the Honors Program. Students who take the three-semester option will need to take an additional PSY elective course to fulfill their 42 credit hours.

Students who are majoring in psychology should apply to the Honors Program at the end of their sophomore year.

Applicants are required to have a cumulative grade point average of at least 3.3, both overall and in all courses that count toward the psychology major. Students must also find a faculty mentor who is willing to sponsor them in the program. Students who intend to apply the three-semester option should identify a faculty mentor and obtain permission for the option at the end of their sophomore year, but are not required to apply to the program until the end of the first term of their junior year. Students who complete the program successfully and have a final cumulative and major grade point average of 3.3 or higher will receive honors or highest honors in psychology.

***Distribution Courses**

(at least 4 of the following 6 courses are required)

The following courses provide grounding in core content areas of psychological science.

PSY 2200: Abnormal Psychology (formerly PSY 3100)

PSY 2210: Social Psychology (formerly PSY 3110)

PSY 2220: Cognitive Psychology (formerly PSY 3120)

PSY 2230: Sensation & Perception (formerly PSY 3750: Perception)

NSC 1400: Neuroscience (formerly NSC 2201)

PSY-PC 1250: Developmental Psychology (Peabody)

**** Electives**

Any course in the Department of Psychology (A&S) or the Department of Psychology and Human Development (Peabody) that is not being used to meet another psychology requirement can be used as an elective, unless otherwise stated in the course catalog.

Comprehensive Exam

In order to graduate with a psychology major, students must take a comprehensive exam during their senior year. Students are expected to take the comprehensive exam at the beginning of their last semester, typically spring semester of their senior year. The exam is not graded, and no grade will appear on the student's transcript. The purpose of the exam is to assess the extent to which psychology majors are retaining core aspects of the psychology curriculum.

Minor in Psychology

The minor in psychology is intended for those students who want to gain an overview of the science of psychology and its methodological foundations, and to sample more advanced work in the areas of specialization within psychology at Vanderbilt.

Students are required to complete 18 credit hours of course work inside the department, distributed as follows:

PSY 1200

PSY 2100 or PSY-PC 2110 (Peabody)

PSY 2150

2 courses from the list of Distribution Courses specified for the major

1 Psychology Elective as defined in the psychology major

Total credit hours: 18

Independent/Directed Study courses (3850 and 3840/3860) may not be counted as the elective course for minors.

1200 (or 1111, sections 1, 2, and 3) is prerequisite for all other psychology courses except 1111. PSY 1111 – 01, 02, 03 – General Psychology, First-Year Writing Seminar – covers the same material as PSY 1200 and also serves as the introductory prerequisite for all 2000-level courses in psychology. Credit cannot be earned for both PSY 1200 and PSY 1111 – 01, 02, or 03. PSY 1111– sections 4 and higher – are First-Year Writing Seminars on special topics in psychology. PSY1111 – sections 4 and higher – do not replace PSY 1200 as a prerequisite for all 2000-level courses in psychology and may be taken in conjunction with PSY 1200.

Note: NSC courses 1400 (formerly 2201) (Neuroscience), 2325 (formerly 3235) (Biological Basis of Mental Disorders), 2269 (formerly 3269) (Developmental Neuroscience), 3270 (Computational Neuroscience), 3272 (Structure and Function of the Cerebral Cortex), and 3274 (Neuroanatomy) count as courses in the Department of Psychology (A&S). See the Neuroscience course listings for descriptions of these classes.

Public Policy Studies

[Program of Concentration in Public Policy Studies](#)

[Honors Track](#)

DIRECTOR Gilbert Gonzales (Medicine, Health, and Society)

ASSOCIATE DIRECTOR Katherine Carroll (Political Science)

Associate Professor: Analisa Packham

Assistant Professors: Kirsty Clark, Katherine Wen

Senior Lecturer: Mario Rewers

COURSES OFFERED: [PPS](#)

Program of Concentration in Public Policy Studies

The public policy studies major has two components: the foundation curriculum and areas of concentration, and an optional honors program for those who qualify. Students are also required to complete several prerequisites to prepare them for the major. Students may not double count any single course for both a required part of the foundation and for an elective.

The PPS foundation is interdisciplinary and includes rigorous course work drawn from political science, economics, sociology, anthropology, and history. This provides all PPS students training in the politics, economics, methods, social contexts, history, and ethics of public policy.

In addition to developing skills in the foundation curriculum, PPS students receive focused instruction within areas of concentration. The boundaries of these areas are not mutually exclusive, and together they span a wide range of policy concerns and disciplinary perspectives. Among the five elective courses, students must take three courses in a single area of concentration. It is also recommended that students choose electives from at least two disciplines.

Students pursuing the “economic policy” concentration must take at least two upper-level electives in economics from the list (numbered above 3000).

Prerequisites

PPS majors must have earned credit for MATH 1201 or 1301, or higher; basic statistics (ECON 1500 or 1510 or both MATH 2820L and either 2810 or 2820); and introductory courses in political science and economics (PSCI 1100, ECON 1010, and ECON 1020).

Foundation Curriculum (5 courses, 15 credit hours)

PSCI 2256 or PPS 2100	3 credit hours
ECON 3010, 3012, 3020, or 3022	3 credit hours
ECON 3032, 3035, 3050; SOC 2002 (formerly 3002); or HOD 2500	3 credit hours
PPS 2200 and 2250	6 credit hours

If a student cannot take both 2200 and 2250, they may, with prior approval from the director or associate director of Public Policy Studies, substitute one course from ANTH 2121 (formerly 3133), 3122, 4152; HIST 2722; PSCI 3253; SOC 2320 (formerly 3315), 2601 (formerly 3614), 2604 (formerly 3604), 3605, 3613.

Electives and Areas of Concentration (5 courses, 15 credit hours)

The area of concentration is intended to allow students to go more deeply into one area of public policy (for example: health policy, STEM policy, education policy, criminal justice policy). Each student is free to choose and design his or her own area of concentration with the advice and approval of the program director. Classes should generally be upper-level and should represent at least two disciplines.

General Electives

The following courses may count as PPS general electives, but they do not count toward the three electives (9 credit hours) that must be taken within a single area of concentration: PSCI 2240, 2241, 2245, 2253, 2255, 3241, 3244; PPS 3100, 3160.

Areas of Concentration

Advanced Quantitative Methods for Public Policy

PPS 3200, 3250; ANTH 3261; ECON 4050; HOD 3200; PSCI 2300

Economic Policy

ECON 2150, 3150, 3200, 3230, 3250, 3700, 4110, 4210, 4510/4510W, 4530/4530W; HIST 1640, 1660; HODE 3225; PSCI 2223, 3252

Social Policy

AADS 3258; ANTH 2385W, 2400, 3138, 3144, 3371; ECON 3100, 3110, 3210, 3350; HIST 1440, 1665, 2690, 2740, 2810, 3040, 3045W; MHS 2110, 3020, 3220, 3030, 3320; SOC 2202 (formerly 3223), 2351 (formerly 3304), 2652 (formerly 3622) 3611, 3616, 3621, 3701, 3711; UNIV 3320, 3325

International and Foreign Policy

AMER 3200; ECON 2220, 3600, 3610, 3650, 4520; GSS 3201, 3281; HIST 1725W, 1730, 1740, 2111, 2457, 2535, 2542, 2544, 2700, 2710, 2721, 2722, 2735, 2740; JS 2540; MHS 2410, 2420, 3110; PSCI 2220, 2211, 2221, 2225, 2226, 2234, 2251, 3229, 3272W, 3275

Science, Technology, and Innovation Policy

ANTH 2400; CSET 2850; CMST 2850, 2950; CSET 3090, 3100; ECON 3270; HIST 1500, 1590, 2780, 3050, 3070W; MHS 3120; PHIL 1008, 3608; SOC 3206

Honors Track (2 additional courses, 6 additional hours)

Students who have a GPA of 3.30 or higher for all previous courses taken for credit and a GPA of 3.50 for all courses counting toward the PPS major may apply for the honors track in PPS. Students normally apply for the honors track during the second semester of their junior year. By the end of the junior year, students interested in pursuing honors should have completed all of the required foundation courses in the PPS major. The PPS program director may make exceptions.

Those accepted into the honors track enroll in PPS 4980 and 4999 (3 credit hours each) during the fall or spring semesters of their senior year. In addition to the honors seminar, each honors student has a faculty adviser to provide guidance on the research project and to chair the thesis committee. Successful completion of the honors program entails both the production of an original written thesis and an oral defense of the thesis project. The thesis committee evaluates both the written thesis and oral defense.

Quantum Information Science and Engineering

DIRECTORS Kalman Varga and Daniel Fleetwood

Affiliated Faculty

PROFESSORS Daniel M. Fleetwood (Electrical and Computer Engineering), Richard F. Haglund, Jr. (Physics), Timothy P. Hanusa (Chemistry), Sokrates T. Pantelides (Physics), Kalman Varga (Physics), Sharon M. Weiss (Electrical and Computer Engineering), Shane Hutson (Physics), Dietmar Bisch (Mathematics), Xenofon Koutsoukos (Computer Science), Michael Stone (Chemistry), Philippe M. Fauchet (Electrical and Computer Engineering), Deyu Li (Mechanical Engineering)

ASSOCIATE PROFESSORS Alfredo Gurolla (Physics) Jason G. Valentine (Mechanical Engineering), Joshua Caldwell (Mechanical Engineering)

ASSISTANT PROFESSORS Raghav Kunnawalkam Elayavalli (Physics), Lauran Buchanan

(Chemistry), Justus C. Ndukaife (Electrical and Computer Engineering), Piran Kidambi (Chemical and Biomolecular Engineering), David Hyde (Computer Science)

Faculty in the School of Engineering and the College of Arts and Science offer an interdisciplinary minor in Quantum Information Science and Engineering. The minor is administered by the College of Arts and Science.

Quantum technology is an emerging field that has the potential to revolutionize many areas of science and technology, from computing to sensing to communication. Quantum mechanics has played an important role in many areas of engineering for decades now, fueling an increasing number of fundamental breakthroughs, as available devices become smaller and individual particles can be precisely controlled in the lab. Newly observed phenomena are often best explained using quantum theory, facilitating new technologies, computational platforms and applications. A broad view of the diverse aspects of the field is provided: quantum physics, communication, quantum computation, simulation of physical systems, physics of qubit platforms, hardware technologies.

This interdisciplinary program will give undergraduates from chemistry, computer science, electrical engineering, mathematics, materials science and physics an introduction to the core concepts underlying quantum computing, communication and sensing. Students will gain experience with quantum hardware and theory that prepares them for careers in the rapidly evolving quantum engineering industries.

Quantum Information Science and Engineering Minor

The minor in quantum information science and engineering requires a total of 15 credit hours, distributed as follows:

QISE core (three courses / 9 credit hours to be selected from the following four options):

- CS 3891, when the topic is Quantum computing,
- ECE 4335 Fundamentals of Quantum Engineering
- PHYS 2255 Modern Physics and the Quantum World **OR** PHYS 3651 Quantum Mechanics I
- PHYS 2300 Quantum Computation

Elective courses (6 credit hours) selected from the following:

- CHEM 3300 Physical Chemistry: Quantum Mechanics, Spectroscopy, and Kinetics
- CS 3250 Algorithms
- ECE 4283 Principles and Models of Semiconductor Devices
- ECE 4288 Optoelectronics
- Math 3320 Error-correcting codes and Cryptography
- PHYS 2210 Modern Optics
- PHYS 3640 Physics of Condensed Matter
- PHYS 3652 Quantum Mechanics 2

With director's permission, and under the policies governing undergraduate registration in graduate courses, CHEM

5320 Quantum Chemistry may serve as an elective.

Courses taken to satisfy relevant degree requirements for majors in the College of Arts and Science and the School of Engineering may also be counted toward fulfilling the minor.

Religious Studies

[Program of Concentration in Religious Studies](#)

[Honors in Religious Studies](#)

[Minor in Religious Studies](#)

[Minor in Islamic Studies](#)

[Minor in Arabic Language](#)

CHAIR Richard McGregor

DIRECTOR OF UNDERGRADUATE STUDIES IN RELIGIOUS STUDIES Issam Eido

DIRECTOR OF UNDERGRADUATE STUDIES IN ISLAMIC STUDIES Issam Eido

DIRECTOR OF UNDERGRADUATE STUDIES IN ARABIC Issam Eido

DIRECTOR OF GRADUATE STUDIES James Byrd (Divinity)

CHAIR, GRADUATE DEPARTMENT OF RELIGION James Hudnut-Beumler (Divinity)

Professors, Emeriti: Lewis Baldwin, Volney Gay, Charles Hambrick, Daniel Patte, Tony Stewart

Professors: Clifford Anderson, Richard McGregor, David Price

Assistant Professors: Calynn Dowler, Adeana McNicholl

Assistant Professor of the Practice: Issam Eido

Senior Lecturer: Bushra Hamad

COURSES OFFERED: [ARA](#), [RLST](#)

Religious Studies is the critical, academic investigation of diverse spiritual traditions. Religion has always been active in human affairs for good and for ill, encompassing histories, literatures, politics, cosmologies, and medicines. Understanding the diversity of religious traditions on their own terms is vital for accuracy in approaching the world's many challenges. The faculty of Vanderbilt's Religious Studies Department and our many affiliated faculty across the university provide expertise and research in a variety of religious traditions. In addition to our expertise in specific religious cultures, texts, practices, rituals, and histories, we also share research interests and teaching focus on the religious dimensions of race and caste, colonialism, gender and sexuality, health and healing, and the climate crisis.

Students majoring in religious studies gain a deep knowledge of a single tradition, region, or theme and a broad understanding of religions around the world. Successful students develop a highly portable analytical skill set that equips them to pursue graduate degrees in religion or cognate disciplines, as well as professional degrees and careers in fields such as law, diplomacy, medicine, and business. It also provides an excellent second major for a variety of disciplines that address the human condition including neuroscience; sociology; history; medicine, health, and society; and others. Majors will gain the ability to reason intelligently about one of the most difficult and

sensitive topics in any society. By virtue of the variety of religious cultures studied, the training will deepen students' mutual understanding and sensitivity to prepare them to become truly responsible global citizens.

The department offers a major (31 credit hours), an Honors Program, a minor (18 credit hours) in religious studies, a minor (20 credit hours) in Islamic studies, and a minor in Arabic language (18 credit hours). A student may pursue both the minor in Islamic studies and the minor in Arabic language.

Program of Concentration in Religious Studies

31 credit hours. The program of concentration in religious studies seeks to introduce students to the rich diversity of religious traditions in the world through training in two tracks. The first track is that of **Traditions**, which focuses on the history, beliefs, and practices of specific religious traditions. The second track - **Themes, Theory, and Writing** - develops the student's depth, interest, and analytical capacities in the study of religion.

Traditions (15 credit hours): satisfied by taking RLST 1010 "Encountering Religious Diversity" and 12 elective credit hours.

Themes, Theory, and Writing (15 credit hours): satisfied by taking RLST 2112 "Approaches to Religion" and 12 elective credit hours.

With the approval of their major/minor adviser, the student will identify two themes under which their **Themes, Theory, and Writing** courses fall. Various combinations will be possible. The themes are as follows:

- Media (Art/Poetics, Film, Communication)
- Body (materiality, mind, health/healing, race)
- Space (space/place, environment, climate, geography/topography)
- Public Life (politics, economy, community, post-colonialism)
- Experience (psychological, mystical, devotional)
- Ethics (historical, comparative, applied)

Majors Colloquium (1 credit hour): RLST 4970: required of all majors.

Six hours of foreign language instruction may be counted toward the **Traditions** component.

Courses on the **Tradition** track include:

- Buddhist Traditions: RLST 2644, 3669, 3670W,
- Christian Traditions: RLST 1309, 2310, 2315, 3304, 3306, 3312, 3316, 3380,
- Hindu Traditions: RLST 2664,
- Indigenous Traditions: RLST 3178, 4100,
- Islamic Traditions: RLST 1500, 2461, 3561, 4551W, 4552, 4554W, 4593,
- Jewish Traditions: RLST 1200, 1208, 2210,
- The Americas: RLST 1190, 3142,
- East Asia: RLST 3747, 3749, 3753,

Courses on the **Themes, Theory, and Writing** track include

- Religion in the literary and visual arts: RLST 2229, 2250, 2881, 2940, 3775, 4665, 4774, 4836, 4837, 4939
- Religion, science, and psychology: RLST 2472, 2811, 3010, 3472, 3941, 4834, 4835,
- Religion across boundaries and borders: RLST 1330W, 1637, 1700, 1710, 2134, 2471, 3350, 3650, 4371, 4562, 4666,
- Religion, race, and gender: RLST 1100, 3129, 3225, 3270, 3900, 3926, 3930,
- Ethics, politics, and community: RLST 1820, 2220, 2234, 3007, 3079, 3119, 3229, 3313, 3921, 3940, 4938

Honors in Religious Studies

The honors thesis provides an opportunity for highly motivated and exceptionally capable students to engage in independent work on a topic in religious studies. Honors theses require original research with primary sources and extensive use of relevant secondary scholarship, both with regard to the narrowly defined topic of the thesis and on the larger theoretical and methodological issues in the academic study of religion. 3.3 GPA in courses toward the major and cumulative 3.3 GPA are required for entry and must be maintained for completion of honors. Students work closely with faculty members in designing, researching, and writing a thesis beginning in the second semester of their junior year in order to present the thesis at the end of the second semester of their senior year, culminating in a final oral examination on the thesis.

Students enroll in 6 credit hours: RLST 4998 and RLST 4999 "Seniors Honors Thesis."

RLST 4998 and RLST 4999 count as 6 of the 24 elective credit hours toward the major.

Minor in Religious Studies

Focusing on training in two tracks: the first track is that of **Traditions**, which focuses on the history, beliefs, and practices of specific religious traditions. The second track - **Themes, Theory, and Writing** - develops the student's depth, interest, and analytical capacities in the study of religion.

Traditions (9 credit hours): satisfied by taking RLST 1010 "Encountering Religious Diversity" and 6 elective credit hours.

Themes, Theory, and Writing (9 credit hours): satisfied by taking RLST 2112W "Approaches to Religion" and 6 elective credit hours.

Minor in Islamic Studies

17 credit hours. The following are required courses:

- RLST 1500: Introduction to Islam [3] or HIST 1190: A History of Islam [3]
- RLST 4554: The Qur'an and Its Interpreters [3]
- ARA 1102: Elementary Arabic [3]

Students may substitute two semesters of Persian, Hindu/Urdu, or Persian to satisfy the third requirement.

Up to 8 credit hours of Arabic language may count toward the minor; however, ARA 1101 does not count toward the minor. Remaining credit hours may be taken from the following:

ARABIC: 1102, Elementary Arabic; 2201-2202, Intermediate Arabic; 3101-3102, Advanced Arabic; 3201, Media Arabic; 3301, Arabic of the Qur'an and Other Classical Texts.

CINEMA AND MEDIA ARTS: 3892, Cinema and Islam.

CLASSICAL AND MEDITERRANEAN STUDIES: 2180, Mediterranean World from Late Antiquity to the Middle Ages; 3010, The Ancient Origins of Religious Conflict in the Middle East.

HISTORY: 1111, First-Year Writing Seminar (when related to Islamic history or culture as determined by the director of undergraduate studies); 1160, Modern South Asia; 1190, A History of Islam; 1200, The Arab Spring; 1270, Sub-Saharan Africa: 1400-1800; 1280, Africa since 1800: The Revolutionary Years; 2140, The Mughal World; 2150, India and the Indian Ocean; 2155, Muhammad and Early Islam; 2160 Medicine in Islam; 2170, Islam and the Crusades; 2180, Islamic Narratives: Narratives of Islam; 2190, Last Empire of Islam; 2293, Muslims in Modern Europe; 2530, African Religions in the Americas; 3150, Cities of Europe and the Middle East; 3209, Sex, Marriage, and the Body in

Islamic Law; 3210, Muslims, Christians, and Jews in Medieval Spain; 3220W Images of India.

HINDI/URDU: 1101-1102 Elementary Hindi-Urdu; 2201-2202 Intermediate Hindi-Urdu.

HISTORY OF ART AND ARCHITECTURE: 1220, History of Asian Art and Architecture, 2180, Art and Architecture of the Islamic World.

JEWISH STUDIES: 2540, Power and Diplomacy in Modern Middle East; 2600, Islam and the Jews.

PERSISAN: 1101-1102, Elementary Persian

PHILOSOPHY: 2102, Medieval Philosophy; 3006, Islamic Philosophy.

POLITICAL SCIENCE: 1111, First-Year Writing Seminar (when related to Islamic history or culture as determined by the director of undergraduate studies); 2203, Middle East Politics; 3235, Political Islam; 3272W, The War in Iraq 2002-2011; 3896, Selected Topics (when related to Islamic politics or culture as determined by the director of undergraduate studies).

RELIGIOUS STUDIES: 1111, First-Year Writing Seminar (when related to Islamic religion or culture as determined by the director of undergraduate studies); 1500, Introduction to Islam; 2461, Islam in Africa; 2471, Religion in Africa; 4551, Islamic Mysticism; 4552, Islam in the Modern World; 4554, The Qur'an and Its Interpreters; 4562, Culture, Religion, and Politics of the Arab World; 4666, Devotional Traditions of South Asia: Hindu, Muslim, Sikh; 4592, Advanced Seminar in Arabic; 4593, Advanced Seminar in Islamic Tradition.

TURKISH: 1101-1102, Elementary Turkish; 2201-2202, Intermediate Turkish

Minor in Arabic Language

15 credit hours. Students complete a minimum of 15 credit hours from the list below, following one of two tracks.

Track A "Foundations and Literature": 6 credit hours from category I, Grammar and Constructions and 9 credit hours from category II, Literature and Culture.

Track B "Full Proficiency": 12 credit hours from category I, Grammar and Constructions, and 3 credit hours from category II, Literature and Culture. No credit hours will be counted for Arabic 1101.

CATEGORY I, Grammar and Constructions: ARA 1102, Elementary Arabic II; ARA 2201, Intermediate Arabic I; 2202, Intermediate Arabic II; ARA 3101, Advanced Arabic I; 3102, Advanced Arabic II.

CATEGORY II, Literature and Culture: ARA 3201, Media Arabic; ARA 3301, Arabic of the Qur'an and Other Classical Texts; ARA 3401, Medical Arabic and Health Care in the US and Arab World; RLST 4592, Reading Seminar in Arabic Literature; RLST 4593, Reading Seminar in Islamic Tradition.

Arabic

Note: Students may not earn credit for an introductory Arabic course if they previously have earned credit for a higher-level course taught in that same language. In addition, students may not earn credit for an intermediate-level Arabic course if they previously have earned credit for a higher-level course taught in that same language.

Students who have earned Advanced Placement or International Baccalaureate credit in a foreign language will forfeit the test credit if they complete a lower-level course taught in that same language.

If a student is pursuing the minor in Islamic Studies and the minor in Arabic language, ARA 1102 can be the only Arabic course that counts toward the minor in Islamic Studies.

Scientific Computing

DIRECTORS Robert E. Bodenheimer (Computer Science), Kalman Varga (Physics and Astronomy)

COURSES OFFERED: [SC](#)

The College of Arts and Science and the School of Engineering offer an interdisciplinary minor in scientific computing to help students in the physical, biological, and social sciences as well as engineering acquire the ever-increasing computational skills that such careers demand. Students who complete this minor will have a toolkit that includes programming skills useful for simulating physical, biological, and social dynamics as well as an understanding of how to take advantage of modern software tools to extract meaningful information from small and large data sets.

Computation is now an integral part of modern science. Computer simulation allows the study of natural phenomena impossible or intractable through experimental means. Astronomers studying the formation of massive black holes, neuroscientists studying brain networks for human memory, economists studying effects of regulation on market dynamics, and biochemists studying the three-dimensional structure of proteins are united in many of the computational challenges they face and the tools and techniques they use to solve these challenges.

Students pursuing the scientific computing minor are taught techniques for understanding such complex physical, biological, and social systems. Students are introduced to computational methods for simulating and analyzing models of complex systems, to scientific visualization and data mining techniques needed to detect structure in massively large multidimensional data sets, to high-performance computing techniques for simulating models on computing clusters with hundreds or thousands of parallel, independent processors and for analyzing terabytes or more of data that may be distributed across a massive cloud or grid storage environment.

The scientific computing minor at Vanderbilt is supported by faculty and includes students from a wide range of scientific and engineering disciplines. While the content domain varies, these disciplines often require similar computational approaches, high-performance computing resources, and skills to simulate interactions, model real-life systems, and test competing hypotheses. Scientific computing embodies the computational tools and techniques for solving many of the grand challenges facing science and engineering today.

The minor in scientific computing prepares students for advanced course work that combines computational approaches with a substantive area of science or engineering. It prepares students for directed or independent study with a faculty member on a research project. It prepares students for advanced study in graduate school. It provides skills that will be attractive to many employers after graduation.

The minor in scientific computing is distinct from the minor in computer science. Scientific computing uses computation as a tool to solve scientific and engineering problems in research and application. It is more focused on simulation, numerical techniques, high performance computing, and higher-level methods than the minor in computer science, which is focused on the algorithms, systems, and technologies that enable such methods to be developed and employed.

Details of the minor requirements are available at vanderbilt.edu/scientific_computing.

CHAIR Holly McCammon

DIRECTOR OF UNDERGRADUATE STUDIES Laurie Woods

DIRECTOR OF GRADUATE STUDIES Jennifer Davis

Professors, Emeriti: George Becker, Karen Campbell, Walter Gove, Gary Jensen, Ronnie Steinberg

Professors: Andre Christie-Mizell, Daniel Cornfield, Jennifer Davis, David Hess, Larry Isaac, Holly McCammon, Jonathan Metzl, Velma Murry

Associate Professors: Laura Carpenter, Brianna Castro, Shaul Kelner, Richard Lloyd, Joshua Murray, Mariano Sana, Lijun Song

Assistant Professors: Lucie Kalousova, Bianca Manago, Lawrence Stacey, Rachel Donnelly, Alexandre Frenette

Associate Professor of the Practice: Zdravka Tzankova

Senior Lecturer: Laurie Woods

Lecturer: Whitney Frierson

COURSES OFFERED: [SOC](#)

Sociology, the study of social consensus, conflict, and change, offers students a rich and systematic understanding of society and the meaning of social interaction. The department's courses cover a wide range of sociological themes including arts, culture, and religion; cities, states, and political economy; deviant behavior and crime; environment and population; gender and sexuality; health and the life course; race, ethnicity, and immigration; social movements, politics, and power; and work, labor, and occupations. Undergraduate courses in sociology prepare students for graduate work or provide further preparation for a career in law, medicine, business, research, education, the clergy, nursing, social work, or civil service. Two major programs are available, sociology and environmental sociology. Students may declare only one of the majors offered by the Department of Sociology; double majors within the department are not permitted.

Program of Concentration in Sociology

Students majoring in sociology are required to complete 33 credit hours of work in sociology (36 credit hours for students in the Honors Research Track). The major consists of five types of courses as listed below: introduction, theory, research skills, thematic areas, and electives.

Course work for the major is distributed as follows:

Program I (Standard Track)

A total of 33 credit hours as follows:

1. <i>Introduction:</i> Sociology 1010, 1010W, 1011, 1020, or 1020W	3

2. <i>Theory</i> : Sociology 3001	3
3. <i>Research Skills</i> : Sociology 2002/formerly 3002 (or HOD 2500 for students who double major in sociology and HOD)	3
4. <i>Thematic Areas</i> : Students must take at least one course in three of the four areas listed below. A course cannot be used to satisfy more than one requirement in the major. <i>Arts and Culture, Institutions and Organizations</i> : Sociology 2210 formerly 3201, 2211 formerly 3202, 2212 formerly 3203, 3204, 2205 formerly 3205, 2213 formerly 3213, 3221, 3222, 3223, 2230 formerly 3224, 2230W formerly 3224W, 3231, 3232, 2290 formerly 3233, 3242, 3615 <i>Health, Environment, Population, and Migration</i> : Sociology 2321, 2350 formerly 3301, 3302, 3303, 2351 formerly 3304, 3306, 3311, 2321 formerly 3312, 2322 formerly 3313, 3314, 2320 formerly 3315, 2325 formerly 3316, 3317, 3318, 2323 formerly 3319, 3321, 3322; Environmental and Sustainability Studies 4101, 4101W; Medicine, Health, and Society 2310, 2430 <i>Politics, Law, and Conflict</i> : Sociology 2650, 2651, 2652, 2653, 2655, 3233, 3601, 3602, 3603, 3604, 3605, 3611, 3612, 3613, 3614, 3615, 3616, 3621, 3622; Jewish Studies 2560 <i>Race, Ethnicity, and Gender</i> : Sociology 3236, 2600 formerly 3601, 3616, 2710 formerly 3701, 2700 formerly 3702, 2702 formerly 3703, 2720 formerly 3704, 3711, 3722, 3723, 3724; Jewish Studies 2400, 2450	9
5. <i>Electives</i> Any 5 sociology courses not used to satisfy the above requirements. SOC 2100 or its equivalent may be counted toward the electives. (Equivalent courses are ECON 1500 or 1510 or MATH 1011 or 2820. Students who double major in sociology and psychology or in sociology and the Peabody majors of human and organizational development, child development, cognitive studies, or child studies may also choose from PSY 2100 or PSY-PC 2110.) Electives may also include only one of the following 1000-level sociology courses: Sociology 1030, 1041, 1041W, or 1111. No other 1000-level sociology course may be counted toward the electives requirement of the major except by permission of the director of undergraduate studies. The Department of Sociology advises students to group their elective sociology courses in a cluster of advanced concentration electives to be selected with the student's adviser.	15

Program II (Honors Research Track)

A total of 36 credit hours as follows:

The Honors Research Track offers superior majors in sociology the opportunity to pursue intensive work through an independent research project. Students interested in pursuing the Honors Research Track in Sociology should contact the director of undergraduate studies for more information. To be considered for the Honors Research Track in Sociology, a student must have a minimum cumulative GPA of 3.3 and a minimum GPA of 3.3 for courses that count toward the sociology major. Students who are recommended for the program by the director of undergraduate studies will typically begin the program in the first semester of their junior or senior year.

The Honors Research Track in Sociology requires:

- Successful completion of requirements 1–4 in Program I, for a total of 18 credit
- Successful completion of the statistics requirement: SOC 2100 or its equivalent (defined in requirement 5 of Program I).
- Completion of 12 credit hours of elective courses. The statistics requirement is counted toward the Electives may include only one of the following 1000-level sociology courses: Sociology 1041, 1041W, or 1111. No other 1000-level sociology course may be counted toward the electives requirement of the major except by permission of the director of undergraduate studies. If students take more than 6 credit hours of SOC 4981, the additional credit hours (7–12) are counted toward the elective courses.
- Successful completion of at least two semesters of SOC 4981 (Honors Research). The first semester of 4981 (Honors Research) is a 3 credit hour seminar in which students develop the literature review and research plan for the honors thesis. In the second semester of 4981 (Honors Research), also for 3 credit hours, students must complete the research and data collection, data analysis, and initial write-up of results of the thesis. Students may elect to take a third or fourth semester of 4981 during their senior year, when they may, for example, work on revisions of the project and/or on publication. Students who begin the Honors Track in their senior year may also take more than 6 credit hours of 4981, up to a maximum of 12 credit hours.
- Successful defense of the completed thesis through an oral defense attended by the chair and reader of the thesis; this oral defense typically takes place during the second semester of the student's senior year. In order to earn honors in sociology, students must successfully complete and defend an honors thesis before graduation.

Comprehensive Exam

In order to graduate with a sociology major, students must take a comprehensive exam during their senior year. The exam is not graded, and no grade will appear on the student's transcript. The purpose of the exam is to test the extent to which sociology majors are retaining thematic aspects of the sociology curriculum.

Program of Concentration in Environmental Sociology

Environmental sociology is the study of the relationship between modern societies and the environment at a variety of scales, from households to global relations. It includes issues such as public understanding of environmental issues, the environment and inequality, environmental social movements and social change, and analysis of environmental reform and adaptation. Environmental sociology is different from environmental science, which is based in the natural sciences, and environmental studies, which includes courses from a wide range of disciplines, including engineering and the humanities. The department's program in environmental sociology includes a solid introduction to sociology and sociological methods as well as foundation requirements in environmental science. The program prepares students for careers in government, the law, management, research and teaching, and the nonprofit sector.

Students majoring in environmental sociology are required to complete 33 credit hours of course work. The major consists of four types of courses: foundation social science courses, foundation environmental science courses, research skills, and environmental sociology courses.

Program I (Standard Track)

A total of at least 33 credit hours as follows:

1. <i>Foundation Courses in Sociology</i> SOC 1020 or 1020W or 1030, SOC 3001	6 credit hours
2. <i>Foundation Courses in Environmental Sciences</i> Two courses from EES 1510, 1030, 1070, 1080, 1140, 1111*, 2150, 2510*, 3310*, 3220*, 3310*, 4680*, 4750*, 4820*,* at least one of which must address climate-related issues (EES 1080, 1140, 2110*, 2150, 2510*, 3310*, 4650*, 4680*, 4820*, or another EES course as approved by the director of undergraduate studies of Environmental Sociology). <i>*Requires prerequisites.</i> <i>**1111s require permission of the director of Environmental Sociology.</i>	at least 6 credit hours
3. <i>Research Skills</i> SOC 2100 (or other statistics course approved by the director of undergraduate studies of Environmental Sociology) followed by or concurrent with SOC 2002 formerly 3002; or HOD 2500 for those majoring in HOD.	6 credit hours
4. <i>Environmental Sociology</i> 15 credit hours selected from the following: SOC 3311, 2321 formerly 3312, 2322 formerly 3313, 3314, 2320 formerly 3315, 2325 formerly 3316, 3317, 3318, 2322 formerly 3319, 2370 formerly 3321, 2604 formerly 3604, 3605, 3881*, 4961*,* ENVS 4101, ENVS 4101W <i>*As approved by the director of undergraduate studies of Environmental Sociology</i>	15 credit hours

Program II (Honors Research Track in Environmental Sociology)

A total of at least 36 credit hours as follows:

The Honors Research Track offers superior majors in environmental sociology the opportunity to pursue intensive work through an independent research project. Students interested in pursuing the Honors Research Track in Environmental Sociology should contact the director of undergraduate studies of Sociology for more information. To be considered for the Honors Research Track in Environmental Sociology, a student must have a minimum cumulative GPA of 3.3 and a minimum GPA of 3.3 for courses that count toward the environmental sociology major. Students who are recommended for the program by the director of undergraduate studies of Sociology will typically begin the program in the first semester of their junior or senior year.

The Honors Research Track in Environmental Sociology requires:

1. Successful completion of requirements 1 through 3 in the Standard Track.
2. At least 12 credit hours from requirement 4 in the Standard Track.
3. Successful completion of at least two semesters of SOC 4981 (Honors Research). The first semester of 4981 (Honors Research) is a 3 credit hour seminar in which students develop the literature review and research plan for the honors thesis. In the second semester of 4981 (Honors Research), also for 3 credit hours, students must complete the research and data collection, data analysis, and initial write-up of results of the thesis.

Students may elect to take a third or fourth semester of 4981 during their senior year, when they may, for example, work on revisions of the project and/or on publication. Students who begin the Honors Program in their senior year may also take more than 6 credit hours of 4981, up to a maximum of 12 credit hours.

4. Successful defense of the completed thesis through an oral defense attended by the chair and reader of the thesis; this oral defense typically takes place during the second semester of the student's senior year. To earn honors in environmental sociology, students must successfully complete and defend an honors thesis before graduation.

Comprehensive Exam

In order to graduate with an environmental sociology major, students must take a comprehensive exam during their senior year. The exam is not graded, and no grade will appear on the student's transcript. The purpose of the exam is to test the extent to which majors are retaining thematic aspects of the environmental sociology curriculum.

Minor in Sociology

The minor in sociology is intended for those students who want to gain an overview of the discipline and to sample some of the special lines of study in it.

Students are required to complete 18 credit hours of course work inside the department, distributed as follows:

1. Sociology 1010, 1010W, or 1020, 1020W	3
2. Sociology 3001	3
3. Four courses, including at least one from three of the four areas listed in above major	12
Total credit hours:	
	18

Licensure for Teaching

Candidates for teacher licensure in sociology at the secondary level should refer to the chapter on Licensure for Teaching in the Peabody College section of this catalog.

CHAIR N. Michelle Murray

DIRECTOR OF UNDERGRADUATE STUDIES María Paz Pintané

Professors, Emeriti: Susan Berk-Seligson, Victoria Burrus, Edward Friedman, Cathy Jade

Professors: Earl Fitz, Ruth Hill, Christina Karageorgou-Bastea, William Luis, Emanuelle Oliveira, Philip Rasico, Benigno Trigo, Andres Zamora

Associate Professors: Jose Cardenas Bunsen, Luis Lopez Gonzalez, N. Michelle Murray

Assistant Professor: Anna Castillo

Associate Professor of the Practice: Chalene Helmuth

Assistant Professor of the Practice: Maria Pintane

Principal Senior Lecturer, Retired: Elena Olazagasti-Segovia, Victoria Gardner

Principal Senior Lecturers: Lorraine Catanzaro, Sarah Delassus, Herald Falconi, Alicia Lorenzo-Garcia, Clint Hendrix, Benjamin Legg, Patrick Murphy, Amarilis Ortiz, Carolina Palacios

Senior Lecturer, Retired: Raquel Rincon

Senior Lecturers: Jose Aznar, Cynthia Wasick, Steven Wenz

COURSES OFFERED: [CTLN](#), [PORT](#), [SPAN](#)

The Department of Spanish and Portuguese offers a wide range of courses in the language, culture, and literature of Spain and Spanish America and is well known for its program in Portuguese and Brazilian studies. Intensive Elementary Catalan is also offered.

The department offers programs of concentration in both Spanish and Spanish and Portuguese. Majors take courses in language, literature, linguistics, and culture. Minors in Spanish, Spanish for the Professions, and in Portuguese are also offered.

The department serves majors from the Center for Latin American Studies and the Max Kade Center for European and German Studies.

Many students participate in Vanderbilt programs in Seville, Barcelona, Madrid, and Palma de Mallorca in Spain; Argentina, Chile, and Brazil in South America; and Cuba and the Dominican Republic in the Caribbean. Maymesters in Spain and Peru are also offered. Activities organized by the department include lectures, films, symposia, and Brazil Week. The department has a chapter of the national honor society Sigma Delta Pi for students of Spanish.

Note for all programs: An AP score of 5 on the Spanish literature test, with a departmental placement score of 460 or greater, may substitute for SPAN 3301W. An AP score of 5 on the Spanish language test, with a departmental placement test of 460 or greater, may substitute for Spanish 3302. A student who earns an AP score of 5 on both tests and receives a departmental placement score of 460 or greater may choose only one substitution.

Program of Concentration in Spanish

The major requires 30 credit hours in Spanish courses numbered 3301W and above. The distribution requirements are as follows:

1. *Foundation courses:* 3301W or 3310W; 3302, and 3303. A more advanced composition course may be substituted for 3301W. A more advanced conversation course may be substituted for 3302. See note above for AP test scores that, paired with a proctored departmental placement score, may substitute for *one* of these courses.
2. *Literature:* 9 credit hours from courses numbered 3835 or 3893 or 4400–4980.
3. *Linguistics:* 3 credit hours from courses numbered 3892 or 4300–4360.

4. *Electives*: 9 credit hours from courses numbered 3320–3835 or 3891–4980. Students may substitute 3 credit hours of a language course in either Portuguese (1103 or higher) or Catalan (1103 or higher) as one elective.

All courses that count towards the major must be taken in Spanish and taken for a letter grade. The foundation courses 3301W or 3310W and 3303 must be taken on the Vanderbilt campus. (This requirement does not apply to students who transfer to Vanderbilt from other U.S. institutions and have completed equivalent courses at their previous institution.) Students must take Spanish 3301W or 3310W, 3302, and 3303 in order to participate in most study abroad programs. Students may count toward the major up to 12 credit hours of pre-approved course work from Vanderbilt study abroad programs in Spain or Latin America. Of the total number of credit hours taken abroad, no more than 6 credit hours may count toward the same distribution requirement area. A Maymester abroad course taught by a professor with an appointment in the Department of Spanish and Portuguese does not count against the 12 credit hour limit. Students may count toward elective credit up to 3 credit hours of supervised Independent Study, pre-approved by the director of undergraduate studies, in Vanderbilt study abroad programs in Spain or Latin America; such independent study counts toward the maximum limit of 12 credit hours. Students may count towards the major PORT 1103 or CTLN 1103.

Honors Program in Spanish

Candidates for honors in Spanish who meet college and departmental requirements must complete 36 credit hours in Spanish courses numbered 3301W and above. Students satisfy the requirements of the 30-credit-hour major in Spanish, in which one of the required literature courses is either the undergraduate seminar, Spanish 4980 (3 credit hours), which may be taken during either the junior or senior year. If Spanish 4980 is not available, it may, with permission of the adviser to the Honors Program, be substituted by an “enriched” undergraduate literature course in which the instructor assigns outside research and a second or longer term paper.

The remaining 6 credit hours of the honors program consist of a senior honors thesis, which is completed during the senior year as independent study (Spanish 4998–4999) under the direction of a faculty adviser. Candidates must submit a proposal for the thesis to their prospective faculty adviser no later than the second semester of their junior year. The completed thesis must be submitted within the second semester of the senior year (deadlines are available from the department). An oral examination on the thesis and the general area of research, administered by a committee of the department, will follow.

Minor in Spanish

The minor in Spanish requires a minimum of 18 credit hours. The specific requirements are as follows:

1. 3301W or 3310W (A more advanced composition course may be substituted)	3
2. 3302 (A more advanced conversation course may be substituted)	3
3. 3303	3
4. 3 credit hours of advanced Spanish literature chosen from courses numbered from 3835 or 3893 or 4400–4980	3
5. 6 credit hours of electives chosen from courses numbered 3320–3835, 3891–4980	6
Total credit hours:	
	18

All courses that count toward the minor must be taken in Spanish and taken for a letter grade. The foundation courses 3301W or 3310W, and 3303 must be taken on the Vanderbilt campus. (This requirement does not apply to students who transfer to Vanderbilt from other U.S. institutions and have completed equivalent courses at their previous institution.) Students must take Spanish 3301W or 3310W, 3302, and 3303 in order to participate in most study abroad programs. Students may count toward the minor up to 6 credit hours of pre-approved course work from Vanderbilt study abroad programs in Spain or Latin America. A Maymester abroad course taught by a professor with an appointment in the Department of Spanish and Portuguese does not count against this limit. Students may transfer up to 3 credit hours of pre-approved course work from non-Vanderbilt study abroad programs.

Minor in Spanish for the Professions -- 18 credits

FOUNDATION COURSES (9 credits/3 courses) taken from
SPAN 3290 Introduction to Spanish for the Professions or
SPAN 3301W Intermediate Spanish Writing or

SPAN 3310W Spanish for Heritage Speakers

AND

SPAN 3302 Spanish for Oral Communication

AND

SPAN 3303 Introduction to Spanish and Spanish American Literature or
SPAN 3304 Current and Contemporary Issues

PROFESSIONAL COURSES (6 credits/2 courses) taken from

SPAN 3335 Mercado Maravillas: Foods of Spain and Hispanic America in Today's Global Marketplace

SPAN 3345 Spanish in Business and the Global Economy

SPAN 3830 Spanish, Health and Society

SPAN 3350 Spanish for the Legal Profession

SPAN 3860 Emprendimiento: Global Supply Chain and Entrepreneurship in the Spanish Speaking World

SPAN 3891 Special Topics Course for the Professions

SPAN 3395 Sustainability and Society in the Hispanic World Across the Professions

SPAN 4310 Translation and Interpretation

ELECTIVE (3 credits/1 course) taken from

SPAN 3303 or 3304, if not taken as a foundation course; or any SPAN course above 3304;

Approved Study Abroad course or approved Maymester Abroad course (3325, 3330); or

Approved Internship SPAN 3881

The minor in Spanish for the Professions requires a minimum of 18 credit hours. All courses that count toward the minor must be taken in Spanish and taken for a letter grade. The foundation courses 3290 or 3301W or 3310W; 3302; and 3303 or 3304 must be taken at Vanderbilt. (This requirement does not apply to students who transfer to Vanderbilt from other U.S. institutions and have completed equivalent courses at their previous institution.) Students must take Spanish 3290 or 3301W or 3310W; 3302; and 3303 or 3304 in order to participate in most study abroad programs. Students may count up to 6 credit hours of pre-approved course work from Vanderbilt study abroad programs in Spain or Latin America, or a Maymester abroad course taught by a professor with an appointment in the Department of Spanish and Portuguese.

Minor in Portuguese

The minor in Portuguese consists of a minimum of 15 credit hours. The specific requirements are as follows:

1. <i>Portuguese 2203 (Intermediate Portuguese; a more advanced language course may, subject to approval by the department, be substituted)</i>	3
2. <i>One of the following two courses: Portuguese 3301 (Portuguese Composition and Conversation) or Portuguese 3302 (Brazilian Pop Culture)</i>	3
3. <i>Portuguese 3303 (Introduction to Luso-Brazilian Literature)</i>	3
4. <i>At least one of the following two courses: Portuguese 4420 (Brazilian Literature through the Nineteenth Century) or Portuguese 4425 (Modern Brazilian Literature)</i>	3
5. <i>At least 3 additional credit hours selected from among the courses listed below (or a graduate course numbered 7000-9520 for qualified seniors; procedures may be found in the Academic Regulations section of the Undergraduate Catalog).</i> Portuguese 2205 (Portuguese and Global Health), 2995 (Literatures and Cultures of Lusophone Africa), 4350 (Brazilian Culture through Native Material), 4420 (Brazilian Literature through the Nineteenth Century), 4425 (Modern Brazilian Literature), 3892 (Special Topics in Portuguese Language, Literature, and Civilization)	3
Total credit hours:	
15	

Program of Concentration in Spanish and Portuguese

This major focuses on the two dominant languages (Spanish and Portuguese) of the Iberian Peninsula and Latin America and their literatures and cultures. The basic requirement for this major is a minimum of 33 credit hours in Spanish and Portuguese. The distribution is as follows:

1. Foundation courses in Spanish 3301W or 3310W, 3302, and 3303; Portuguese 2203, 3301 (or 3302), and 3303.
2. At least two Spanish courses numbered between 3320-3330, 3355-3385, 4400-4980 or 3835, 3891 or 3893.
3. At least two of the following Portuguese courses: 2205, 2995, 3892, 4350, 4420, 4425, 7070, 7071, and 9520.
4. One additional elective to be chosen from the courses listed under area 2 and 3 above.

A student who studies abroad may be able to substitute similar culture or literature courses with the permission of the director of undergraduate studies.

Teacher Licensure

Candidates for teacher licensure in Spanish at the secondary level should refer to the chapter on Licensure for Teaching in the Peabody College section of this catalog.

Catalan

Note: Students may not earn credit for an introductory language course if they previously have earned credit for a higher-level course taught in that same language. In addition, students may not earn credit for an intermediate-level language course if they previously have earned credit for a higher-level course taught in that same language.

Students who have earned Advanced Placement or International Baccalaureate credit in a foreign language will forfeit the test credit if they complete a lower-level course taught in that same language.

Portuguese

Note: Students may not earn credit for an introductory language course if they previously have earned credit for a higher-level course taught in that same language. In addition, students may not earn credit for an intermediate-level language course if they previously have earned credit for a higher-level course taught in that same language.

Students who have earned Advanced Placement or International Baccalaureate credit in a foreign language will forfeit the test credit if they complete a lower-level course taught in that same language.

Spanish

Entering students should consult their advisers or the director of undergraduate studies at the Department of Spanish and Portuguese for advice on placement. Students who have not studied Spanish should begin their studies at Vanderbilt in Spanish 1100. Students with middle-school or high-school Spanish on their records must present a department placement test score in Spanish to be placed correctly. (See department website for more details.)

Note: Students may not earn credit for an introductory language course if they previously have earned credit for a higher-level course taught in that same language. In addition, students may not earn credit for an intermediate-level language course if they previously have earned credit for a higher-level course taught in that same language.

Students who have earned Advanced Placement or International Baccalaureate credit in a foreign language will forfeit the test credit if they complete a lower-level course taught in that same language. Exception: Students who take Spanish 3301W do not forfeit credit for Spanish 3302.

INTERIM CHAIR Claire Sisco King

DIRECTOR OF UNDERGRADUATE STUDIES Elizabeth Haynes

Professors, Emeriti: Jon Hallquist, Terry Hallquist, Phillip N. Franck

Professors: Elizabeth Essin, Mary Leah Lowe

Assistant Professors: Elizabeth Cizmar, Kristyl Tift

Assistant Professors of the Practice: Hannah Chalman, Elizabeth Haynes

Writer in Residence: Krista Knight

COURSES OFFERED: [THTR](#)

Vanderbilt's Department of Theatre offers a vital center of innovative scholarship, teaching, creative expression, and exploration. The study of theatre introduces students to a major form of literature and performing arts, thereby developing a familiarity with one of the greatest cultural heritages and an understanding of human behavior and civilization as it is reflected through the ages. Theatre uniquely shapes perceptions about life into an active experience. Because this process encourages critical thought and discussion, the department provides a singular and important aspect of a liberal arts education through its production season and course work. Viewed as a practical extension of the department's curriculum, plays are produced in Neely Auditorium, a laboratory where students learn to form creative expressions as well as to evaluate and to critique them.

On one level, the Department of Theatre helps the general liberal arts student develop reasoned standards of

criticism and an understanding of the intimate correlation between the theatre and the society which it reflects, preparing Vanderbilt graduates for successful careers in theatre as well as other fields of interest. For its majors and minors, the department provides a more detailed and specialized study of the major components of theatrical endeavor, allowing opportunities for the practical application of course work in the productions staged at the theatre. In many cases, the department helps to prepare students with professional aspirations as either artists or teachers in their specialized area of interest.

Work in the productions at Vanderbilt reflects the instruction that occurs in the classroom at Neely Auditorium. Because the academic endeavors require hands-on, project-oriented teaching, students can expect small-to-medium class enrollments and numerous opportunities for exposure to faculty instruction outside of the classroom. The department's curriculum includes courses in acting, directing, design, technology, dramatic literature, theatre history and criticism, and playwriting. The Department of Theatre frequently offers a Maymester program of study of theatre in London and the U.K. Students can either major or minor in theatre at Vanderbilt. The major consists of a minimum of 30 credit hours that include courses in Acting, Direction for Production, Theatre and Performance Studies, Theatre Design and Technical Production, and Writing for the Stage. For the minor, students select one of four tracks and complete a minimum of 18 credit hours of course work.

Students may also learn about theatre by studying with Coe Artists, distinguished guest-artist professionals brought to campus each year to benefit majors, minors, and those with a serious interest in theatre. Weeklong master classes are taught by playwrights, actors, designers, and directors from the professional world of theatre, television, and film. Previous Coe Artists have included such celebrated artists as Tim Miller, Sojourn Theatre, Katie Pearl, Lisa D'Amour, and Shawn Hall. Theatre also brings professional directors and designers as Coe Artists to campus to work within the department's production season.

Students have the opportunity to participate in a variety of theatrical experiences working with professional guests, as well as hear professional artists speak as guest lecturers.

Theatre majors and minors from Vanderbilt have entered a wide variety of professions and post-graduate opportunities after they graduate. Those seeking employment in the fields of theatre, film, radio, or television have secured positions at appropriate graduate schools or internships with professional companies immediately following their study at Vanderbilt. Many distinguished professional theatre companies across the nation, television networks in New York, and the film industry in Los Angeles include Vanderbilt University Theatre alumni as writers, actors, designers, technicians, dramaturgs, and stage managers. In addition, many Vanderbilt theatre students have secured teaching assignments at either the college/university level (once they have completed appropriate post-graduate education) or the elementary/secondary education level. Theatre also prepares students for success in other professions including medicine, law, education, policy, engineering, and business to name a few.

The study and practice of theatre offers individuals opportunities to participate through a variety of means: to collaborate with all other members of a production team; to express elements of abstract thought in both oral and written form; and to develop the critical ability to assess and analyze aesthetic choices.

Program of Concentration in Theatre

Students majoring in theatre are required to take a minimum of 30 credit hours in courses concerned with theatre and performance studies and theatre production practices. Courses are divided into the following categories:

- Theatre and performance studies (6 credit hours)
 - THTR: 1010W, 2201, 2202W, 2204, 2206W, 2711, 2781, 3207, 3281, 3282, 3851, 3892
- Writing for the stage (3 credit hours)
 - THTR: 1010W, 2311W, 2202W, 2206W, 3207, 3311, 3311W, 4612, CMA 2500W
- Acting and directing for production (6 credit hours)
 - THTR: 1611, 2651, 3207, 3611, 3612, 4611, 4612
- Theatre design and technical production (6 credit hours)
 - THTR: 1111, 1711, 1712, 2711, 2781, 3721, 3741, 3761, 3781, 3851, 3891
- Production practicum (3 credit hours)
 - THTR: 1101, 1701

- Individual focus (6 credit hours)

Honors Program

The Honors Program in Theatre is designed to afford superior students the opportunity to pursue more intensive work within their major field. Admission requirements are: (1) completion of junior year; (2) completion of at least 21 credit hours of the theatre major; (3) 3.3 minimum cumulative GPA and a 3.5 minimum GPA in courses counting toward the major. Candidates who successfully complete the following requirements may graduate with honors or highest honors: (1) maintain the aforementioned GPA throughout the senior year; (2) complete all requirements of the theatre major; (3) complete 6 credit hours of independent research 4998–4999 (Honors Research and Thesis) normally taken during the senior year; (4) write an honors thesis to be completed by the second semester of the senior year; (5) successfully complete an honors oral examination on the topic of the thesis.

Minor in Theatre

A minor in theatre requires a minimum of 18 credit hours of courses in the department. Minors will select a minor emphasis in one of the following categories. They will take 12 credit hours from four courses in their selected category and fill the remaining six credit hours from two course from other minor categories or one course from another category and three practicum credit hours. The categories are below.

Theatre and Performance Studies - THTR: 1010W, 2201, 2202W, 2204, 2206W, 2711, 2781, 3207, 3281, 3282, 3851, 3892

Acting and Direction for Production - THTR: 1611, 2651, 3207, 3611, 3612, 4611, 4612

Theatre Design and Technical Production - THTR: 1111, 1711, 1712, 2711, 2781, 3721, 3741, 3761, 3781, 3851, 3891

Writing for the Stage and Performance - THTR: 1010W, 2202W, 2206W, 2207 (formerly 3207), 2311W, 3311, 3311W, 4612, CMA 2500W

Practicum - THTR: 1101, 1701

Campus Resources

Life at Vanderbilt

Accommodations for Students with Disabilities

Student Access provides accommodations to students with disability-related limitations. Common accommodations include, but are not limited to, extended time for testing, arranging communication access, audio textbooks, physical adaptations, supplemental notes, and reading services. Students may also request accommodations related to housing, dining, and transportation. Accommodations are determined on an individual, case-by-case basis. Specific concerns pertaining to student accommodations or access on campus should be directed to the Office for Student Access (studentaccess@vanderbilt.edu) or by calling (615) 343-9727. For additional information please visit the Student Access website: vanderbilt.edu/student-access.

Nondiscrimination, Anti-Harassment, Anti-Retaliation, and Sexual Misconduct

The Title IX Office (vanderbilt.edu/title-ix) and the Equal Opportunity and Access Office (vanderbilt.edu/ea) investigate allegations of prohibited discrimination, discriminatory harassment, and retaliation involving members of the Vanderbilt community. This includes allegations of sexual misconduct and other forms of power-based personal violence.

Reports of discrimination, discriminatory harassment, and retaliation based on sex, parental status, or other protected status are addressed by Vanderbilt's Title IX Office. Allegations of such conduct should be directed to the Title IX Office at (615) 343-9004.

If you believe a member of the Vanderbilt community has engaged in prohibited discrimination, discriminatory harassment, or retaliation, based on an individual's protected identity such as race, color, national or ethnic origin, religion, age, disability, military service, veteran status, genetic information or any other classification protected by law, other than sex please contact the Equal Opportunity and Access Office at (615) 343-9336.

If the offense is criminal in nature, please file a report with Vanderbilt University Police Department.

The Title IX Office also facilitates the provision of supportive measures and other accommodations for students affected by sexual misconduct and power-based personal violence. Some examples of these supportive measures are mutual no contact directives, adjusted course schedules, and housing adjustments.

Specific concerns pertaining to prohibited discrimination, harassment, or retaliation should be directed to the Equal Opportunity and Access Office at (615) 343-9336. Allegations of sex discrimination, sexual misconduct and other forms of power-based personal violence, should be directed to the Title IX Office at (615) 343-9004.

Official University Communications

Certain federal statutes require that information be delivered to each student. Vanderbilt delivers much of this information via email. Official electronic notifications, including those required by statutes, those required by university policy, and instructions from university officials, will be sent to students' Vanderbilt email addresses: user.name@vanderbilt.edu. Students are required to be familiar with the contents of official university notifications, and to respond to instructions and other official correspondence requiring a response. Some messages will include links to the YES Message Center, which is a secure channel for official communication of a confidential nature. However, students should not wait to receive such a message, and should check YES frequently to remain current on official, confidential communications.

The university makes every effort to avoid inundating students with nonessential email (often called "spam"), and maintains separate lists from which students may unsubscribe for announcements of general interest.

Directory information should be kept current. Students may report address changes, emergency contact information, and missing person contact information via the web by logging in to YES (Your Enrollment Services) <https://yes.vanderbilt.edu> and clicking on the Personal Information link.

Student Records (Family Educational Rights and Privacy Act)

Vanderbilt University is subject to the provisions of federal law known as the Family Educational Rights and Privacy Act (also referred to as FERPA). This act affords matriculated students certain rights with respect to their educational records. These rights include:

1. The right to inspect and review their education records within 45 days of the day the University receives a request for access. Students should submit to the Office of the University Registrar written requests that identify the record(s) they wish to inspect. The Office of the University Registrar will make arrangements for access and notify the student of the time and place where the records may be inspected. If the Office of the University Registrar does not maintain the records, the student will be directed to the University official to whom the request should be addressed.
2. The right to request the amendment of any part of their education records that a student believes is inaccurate or misleading. Students who wish to request an amendment to their educational record should write the University official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. If the University decides not to amend the record as requested by the student, the student will be notified of the decision and advised of his or her right to a hearing.
3. The right to consent to disclosures of personally identifiable information contained in the student's education records to third parties, except in situations that FERPA allows disclosure without the student's consent. These exceptions include:
 - Disclosure to school officials with legitimate educational interests. A "school official" is a person employed by the University in an administrative, supervisory, academic or research, or support-staff position (including University law enforcement personnel and health staff); contractors, consultants, and other outside service providers with whom the University has contracted; a member of the Board of Trust; or a student serving on an official University committee, such as the Honor Council, Student Conduct Council, or a grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.
 - Disclosure to parents if the student is a dependent for tax purposes
 - Disclosure to appropriate individuals (e.g., parents/guardians, spouses, housing staff, health care personnel, police, etc.) where disclosure is in connection with a health or safety emergency and knowledge of such information is necessary to protect the health or safety of the student or other individuals.
 - Disclosure to a parent or legal guardian of a student, information regarding the student's violation of any federal, state, or local law, or of any rule or policy of the institution, governing the use or possession of alcohol or a controlled substance if the University has determined that the student has committed a disciplinary violation with respect to the use or possession and the student is under the age of 21 at the time of the disclosure to the parent/guardian.
 - Disclosure to various authorized representatives of government entities (such as, compliance with Student and Exchange Visitors Information System [SEVIS], Solomon Amendment, etc.).

FERPA provides the university the ability to designate certain student information as "directory information." Directory information may be made available to any person without the student's consent unless the student gives notice as provided for, below. Vanderbilt has designated the following as directory information: the student's name, address, telephone number, email address, student ID photos, major field of study, school, classification, participation in officially recognized activities and sports, weights and heights of members of athletic teams, dates of attendance, degrees and awards received, the most recent previous educational agency or institution attended by the student, and other information that would not generally be considered harmful or an invasion of privacy if disclosed. Any student who does not wish disclosure of directory information should notify the Office of the University Registrar in writing. No element of directory information as defined above is released for students who request nondisclosure except as required by statute.

The request for nondisclosure does not apply to class rosters in online class management applications, or to residential rosters—or rosters of groups a student may join voluntarily—in online, co-curricular engagement applications, or rosters of other information on the websites of student organizations that a student may join. Neither class rosters in online class management applications, nor residential rosters in online co-curricular

engagement applications, are available to the public.

As of January 3, 2012, the U.S. Department of Education's FERPA regulations expand the circumstances under which students' education records and personally identifiable information (PII) contained in such records—including Social Security Numbers, grades, or other private information—may be accessed without consent. First, the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or state and local education authorities ("Federal and State Authorities") may allow access to student records and PII without consent to any third party designated by a Federal or State Authority to evaluate a federal- or state-supported education program. The evaluation may relate to any program that is "principally engaged in the provision of education," such as early childhood education and job training, as well as any program that is administered by an education agency or institution.

Second, Federal and State Authorities may allow access to education records and PII without consent, to researchers performing certain types of studies, in certain cases even when the University objects to or does not request such research. Federal and State Authorities must obtain certain use-restriction and data security promises from the third parties that they authorize to receive PII, but the Authorities need not maintain direct control over the third parties.

In addition, in connection with Statewide Longitudinal Data Systems, State Authorities may collect, compile, permanently retain, and share without student consent, PII from education records, and may track student participation in education and other programs by linking such PII to other personal information that they obtain from other Federal or State data sources, including workforce development, unemployment insurance, child welfare, juvenile justice, military service, and migrant student records systems.

If a student believes the university has failed to comply with FERPA, he or she may file a complaint using the Student Complaint and Grievance Procedures as outlined in the *Student Handbook*. If dissatisfied with the outcome of this procedure, students may file a written complaint with the Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue SW, Washington, DC 20202-5920.

Questions about the application of the provisions of the Family Educational Rights and Privacy Act should be directed to the Office of the University Registrar or to the Office of General Counsel.

The Vanderbilt Honor Code and the Honor System

Vanderbilt University takes pride in its honor code and its student-run honor system.

The statement of the honor code is shared by all ten schools of the university:

Vanderbilt University students pursue all academic endeavors with integrity. They conduct themselves honorably, professionally, and respectfully in all realms of their studies in order to promote and secure an atmosphere of dignity and trust. The keystone of the honor system is self-regulation, which requires cooperation and support from each member of the University community.

The Honor System is a time-honored tradition that began with the first final exams at Vanderbilt in 1875. Students established the system and continue to manage it today. It rests on the presumption that all work submitted as part of course requirements or to gain an advantage in a course is produced by the student, without aid from unauthorized means as prescribed by the instructor or prohibited in the Student Handbook. Cheating, plagiarizing, or otherwise falsifying results of study are specifically prohibited. The system applies not only to examinations but also to written work and computer programs submitted to instructors. Detailed descriptions of Honor System violations and Undergraduate Honor Council procedures are published in the *Student Handbook*, available on the web at vanderbilt.edu/student_handbook.

Responsibility for the preservation of the system falls on the individual student who, by registration, acknowledges the authority of the Undergraduate Honor Council. Students are expected to demand of themselves and their fellow students complete respect for the Honor Code. Ignorance of the regulations is not a defense for abuse of regulations. All incoming students attend a mandatory signing ceremony and educational program on the Honor System at the beginning of the fall semester, in addition to completing an online module. Additional information about the Honor System is available on the web at studentorg.vanderbilt.edu/honorcouncil/.

VA Compliance Statement

Any covered individual will be able to attend or participate in the course of education during the period beginning on the date on which the individual provides to the educational institution a certificate of eligibility for entitlement to educational assistance under chapter 31 or 33 (a “certificate of eligibility” can also include a “Statement of Benefits” obtained from the Department of Veterans Affairs’ (VA) website – eBenefits, or a VAF 28-1905 form for chapter 31 authorization purposes) and ending on the earlier of the following dates:

1. The date on which payment from VA is made to the institution.
2. 90 days after the date the institution certified tuition and fees following the receipt of the certificate of eligibility.

Vanderbilt University will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual’s inability to meet his or her financial obligations to the institution due to the delayed disbursement funding from VA under chapter 31 or 33.

Vanderbilt University

Accreditation

Vanderbilt University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award baccalaureate, masters, and doctorate degrees. Vanderbilt University also may offer credentials such as certificates and diplomas at approved degree levels. Questions about the accreditation of Vanderbilt University may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC’s website (www.sacscoc.org).

Commencement

The university holds its annual Commencement ceremony following the spring semester. Degree candidates must have completed successfully all curriculum requirements and have passed all prescribed examinations by the published deadlines to be allowed to participate in the ceremony. A student completing degree requirements in the summer or fall semester will be invited to participate in Commencement the following May; however, the semester in which the degree was actually earned will be the one recorded on the diploma and the student’s permanent record. Financially clear students unable to participate in the graduation ceremony will receive their diplomas by mail.

Please refer to the Commencement webpage at vanderbilt.edu/commencement for complete information on the May ceremony.

Modification Policy and Nondiscrimination Statement

The university reserves the right, through its established procedures, to modify the requirements for admission and graduation and to change other rules, regulations, and provisions, including those stated in this bulletin and other publications, and to refuse admission to any student, or to require the withdrawal of a student if it is determined to be in the interest of the student or the university. All students, full time or part time, who are enrolled in Vanderbilt courses are subject to the same policies.

Policies concerning noncurricular matters and concerning withdrawal for medical or emotional reasons can be found in the Student Handbook, which is on the Vanderbilt website at vanderbilt.edu/student_handbook.

NONDISCRIMINATION STATEMENT

In compliance with applicable federal, state, and local non-discrimination laws and regulations, including but not limited to Title VI of the Civil Rights Act of 1964, the Title VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, the Americans with Disabilities Act, the Americans with Disabilities Act Amendment Act, the Age Discrimination in Employment Act, the Older Workers Benefit Protection Act, the Uniformed Services Employment and Reemployment Rights Act, the Vietnam Veterans' Readjustment Assistance Act, the Tennessee Human Rights Act, the Tennessee Disability Act, and the Genetic Information Nondiscrimination Act, Vanderbilt University does not discriminate on the basis of race, sex, sexual orientation, gender identity, gender expression, religion, color, national or ethnic origin, age, disability, active military service or protected veteran status, or genetic information in its programs and activities. Requests for information, inquiries or complaints should be directed to these offices: Office of Equal Opportunity and Access, eoaa@vanderbilt.edu, telephone (615) 343-9336, 2100 West End Avenue, Suite 700 Nashville, TN 37203; Title IX Office, Title IX Coordinator, titleix@vanderbilt.edu, telephone (615) 343-9004, 2100 West End Ave, Suite 700, Nashville TN 37203; Student Access Office, studentaccess@vanderbilt.edu, telephone (615) 343-9727, Sarratt Building, Ste. 216, 2301 Vanderbilt Place Nashville, TN 37240.

Obtaining Information about the University

Notice to current and prospective students:

In compliance with applicable state and federal law, the following information about Vanderbilt University is available:

Institutional information about Vanderbilt University, including accreditation, academic programs, faculty, tuition, and other costs, is available in the catalogs of the colleges and schools on the Vanderbilt University website at vanderbilt.edu/catalogs.

Information about financial aid for students at Vanderbilt University, including federal and other forms of financial aid for students, is available from the Office of Student Financial Aid and Scholarships on the Vanderbilt University website at vanderbilt.edu/financialaid. The Office of Student Financial Aid and Scholarships is located at 2309 West End Avenue, Nashville, Tennessee 37240-7810, (615) 322-3591 or (800) 288-0204.

Information about graduation rates for students at Vanderbilt University is available on the Vanderbilt University website at vanderbilt.edu/faculty-affairs/oapraa/student-achievement. Paper copies of information about graduation rates may be obtained by writing the Office of the University Registrar, Vanderbilt University, PMB 407701, 110 21st Avenue South, Suite 110, Nashville, Tennessee 37240-7701 or by calling (615) 322-7701.

The Vanderbilt University Annual Security Report on university-wide security and safety, including related policies, procedures, and crime statistics, is available from the Vanderbilt University Police Department on the [Public Safety website](#). A paper copy of the report may be obtained by writing the Vanderbilt University Police Department, 2800 Vanderbilt Place, Nashville, Tennessee 37212, or by calling (615) 343-9750. For more information, see the "Vanderbilt University Police Department" section of this catalog.

A copy of the annual Equity in Athletics Disclosure Act Report on the Vanderbilt University athletic program participation rates and financial support data may be obtained by writing the Vanderbilt University Office of Athletic Compliance, 2601 Jess Neely Drive, P.O. Box 120158, Nashville, Tennessee 37212 or by calling (615) 322-7992.

Information about your rights with respect to the privacy of your educational records under the Family Educational Rights and Privacy Act is available from the Office of the University Registrar on the Vanderbilt University website at registrar.vanderbilt.edu/ferpa. Paper copies of this information about educational records may be obtained by writing the Office of the University Registrar, Vanderbilt University, PMB 407701, 110 21st Avenue South, Suite 110, Nashville, Tennessee 37240-7701, or by calling (615) 322-7701. For more information, see the "Student Records (Family Educational Rights and Privacy Act)" section of this catalog.

The University

Vanderbilt University was founded in 1873 to bring unity to a nation still reeling from the Civil War. Commodore Cornelius Vanderbilt gave the founding gift to endow and build a university that would "contribute...to strengthening the ties which should exist between all geographical sections of our common country". That collaborative spirit and sense of shared purpose guide Vanderbilt University more than 150 years later in its work to advance knowledge and the common good.

Vanderbilt is one of few independent universities that have both a quality undergraduate program and a full range of graduate and professional programs. It has a strong faculty of more than 1,500 full-time members and a student body of more than 13,000 who bring a wide range of backgrounds, experiences and viewpoints. The 340-acre campus, about a mile and a half from downtown Nashville, combines the advantages of an urban location with an inspiring parklike setting energized by Vanderbilt's collaborative community. The university's motto, *Crescere aude*, Latin for "dare to grow", embodies Vanderbilt's spirit of innovation, discovery and transformation.

The schools of the university offer the following degrees:

College of Arts and Science. Bachelor of Arts, Bachelor of Science.

Blair School of Music. Bachelor of Music, Bachelor of Musical Arts.

Divinity School. Master of Divinity, Master of Theological Studies, Master of Theology, Doctor of Ministry.

School of Engineering. Bachelor of Engineering, Bachelor of Science, Master of Engineering.

Graduate School. Master of Arts, Master of Fine Arts, Master of Liberal Arts and Science, Master of Science, Doctor of Philosophy.

Law School. Master of Laws, Master of Legal Studies, Doctor of Jurisprudence.

School of Medicine. Master of Education of the Deaf, Master of Genetic Counseling, Master of Imaging Science, Master of Public Health, Master of Science in Clinical Investigation, Master of Science in Medical Physics, Master of Science (Applied Clinical Informatics, Speech-Language Pathology), Doctor of Audiology, Doctor of Medical Physics, Doctor of Medicine.

School of Nursing. Master of Nursing, Master of Science in Nursing, Doctor of Nursing Practice.

Owen Graduate School of Management. Master of Accountancy, Master of Business Administration, Master of Management in Health Care, Master of Marketing, Master of Science in Finance.

Peabody College. Bachelor of Science, Master of Education, Master of Public Policy, Doctor of Education.

No honorary degrees are conferred.

Vanderbilt University Administration

Courses by Subject Areas

A&S College Core

CORE1010 - Being Human **Course Description**

This course invites you to launch your undergraduate career with some of the biggest questions humans have asked: Who are we, and why are we here? To begin, we will ask: why are we here at Vanderbilt, and what is the purpose of a college education? We will then examine the varied ways that people in different times, places, and circumstances have contemplated the meaning of humanity-raising questions about social flourishing and responsibility; about solidarity, hierarchy, and difference; and about the very boundaries of "the human." Incoming Arts and Science first-year students will continue with CORE 1020 in the spring. Limited to incoming first-year students only. Offered on a graded basis only. [4] (HCA) (CORE A, C, E)

CORE1020 - Science, Technology, Values **Course Description**

Living and flourishing in a scientific, technological civilization, ranging from ancient considerations of science to modern global era. Survey of perspectives from natural sciences, social sciences, and humanities. Prerequisite: CORE 1010. [4] (CORE A, B, D)

CORE2500 - Exploratory Core **Course Description**

Topics vary. Courses in this series explore big questions and complex problems from a variety of disciplinary perspectives. As part of the new A&S College Core, Exploratory Core courses are designed for the second year, are broad in topic, and help students discover paths to new interests and more specialized study. Not open to freshmen. [3]

African American Diaspora Studies

AADS1001 - Commons iSeminar **Course Description**

Topics vary. Open only to first-year students. General Elective credit only. [1] (No AXLE Credit)

AADS1010 - Introduction to African American and Diaspora Studies **Course Description**

Foundations of African American culture from ancient African history and through contemporary issues in the African American experience and the larger diaspora. The characteristics, developments, and dynamics of diaspora culture in the Americas, with a particular focus on the United States. [3] (P)

AADS1016 - Race Matters **Course Description**

Race and racism in the United States and their impact on democratic practices. General intellectual and cultural manifestations of the significance of race and how it influences democratic reform: racial preferences, the prison industrial complex, national security, HIV/AIDS, and elections. [3] (US) (CORE B, C) (LE HFA)

AADS1108 - Making of the African Diaspora**Course Description**

1790 to the mid-twentieth century. Slave politics and abolition, the meaning of freedom after emancipation, and black workers' struggle for democracy and citizenship. Resistance to empire and colonialism. Migration, race and color ideology, religion, and culture. [3] (P)

AADS1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

AADS1204 - Diaspora Feminisms**Course Description**

Introduction to feminism in multiple diasporic places and communities. Comparison of black feminisms across time and space. [3] (INT)

AADS1404 - Comparative Black Male Writers**Course Description**

Diasporic black male fiction and poetry writers. Themes of sexuality and sexual identity, exile, home, violence, color, and class. [3] (HCA)

AADS1506 - Reel to Real: Film Aesthetics and Representation**Course Description**

Oppositional cinematic practices of black filmmakers. Hollywood representations of blacks. The theoretical language of film criticism, styles, genres, periods. [3] (P)

AADS1706 - Capoeira: Afro-Brazilian Race, Culture, and Expression**Course Description**

Origins of an Afro-Brazilian martial art form. Influence on Brazilian and world culture in the areas of religion, dance, and music. Development as a social protest movement. Intersections of race, gender, class, power, and national identity. [3] (INT)

AADS1716 - The African City: Urban Landscapes on the Page, Screen, and Canvas**Course Description**

Study of African cities north and south of the Sahara through literature, visual and popular cultures, and history. Impact of colonial and postcolonial practices and policies on urban landscapes, urban relationships, and resources. Gendered experiences of the city in fiction, non-fiction, music, art, and film. [3] INT

AADS1808 - On Whiteness: Whiteness Studies, Race, and Identity**Course Description**

Key theoretical and political approaches around the issues of whiteness studies, race, and identity. Application of these approaches (and the theories and concepts upon which they are premised) across a broad cultural, historical, and political landscape. [3] (CORE A)

AADS1906 - Curating Black Lives: Imagination, Art, and Global Social Change**Course Description**

Visual arts, social change, and black social movements. Aesthetics, value, and social impact of art and social change efforts. Role of the arts in shaping collective black identity and historical memory of national and global social movements. [3] (INT) (CORE A) (LE HFA)

AADS2104 - Popular Culture and Black Sexual Politics**Course Description**

Constructed images of black masculinity, femininity, and sexuality in popular culture. Social political hierarchies in society at-large. [3] (HCA)

AADS2106 - African Diaspora: A Problem for Thought**Course Description**

Beginning with the slave trade in Europe to the formation of slave colonies in the Americas. Meaning of diaspora for African subjects in the 18th-19th centuries, and challenges to racism and colonialism in the African Diaspora in the 20th century. [3] (P)

AADS2148 - Blacks in Latin America and the Caribbean**Course Description**

Distinctive cultural forms and patterns in the Caribbean basin and Latin America from the sixteenth century to the present. Diverse origins of culture. Slave society's impact on cultural production. [3] (INT)

AADS2166 - African American Influences on Country Music**Course Description**

African and African American aesthetics, instruments, and people. Southern rural folk music in the United States. [3] (US)

AADS2168 - Black Migrations in the African Diaspora**Course Description**

The impact of migration in a post-civil rights and post-colonial world. Political tensions, identity politics, and solidarity. Comparative anthropological and sociological narratives on race, culture, and ethnicity. Countries and regions include Democratic Republic of Congo, France, Ghana, Liberia, Tanzania, parts of Asia, and the U.S. [3] (INT)

AADS2178 - Global Africa**Course Description**

The globalization of Africa within the context of Arab and European expansion. Historical flashpoints and contemporary events. The invention of Africa in literary and political discourses. The geopolitics of aid and development. Africa's relationship with the African diaspora, including modern migrations and debates on the racial and geographic divide between Arab regions north and south of the Sahara. [3] (INT)

AADS2204 - Black Women and the Politics of Blackness and Beauty**Course Description**

Competing and contested meanings of beauty and race in the post-black society. The role of traditional and new media in self-expressions and self-understandings of color, body image, hair, and relationships. [3] (HCA)

AADS2214 - History and Myth: Black Women in the United States**Course Description**

Complexities of being black and female in the history of the United States. Interrogation of racism, class, sexuality, and sexism. Black women's multifaceted, diverse community roles. [3] (HCA)

AADS2294 - Black Paris - Paris Noir: The African Diaspora and the City of Light**Course Description**

The lived experiences, tensions, belonging, and representations of people of African descent who self-identify and are identified as Black or Noir in Paris, France, from the interwar years to the present. Diversity, intergroup relations, and race beyond the United States. Not open to students who have earned credit for AADS 1111 Section 05 without permission. Total credit for this course and AADS 1111 Section 05 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (INT)

AADS2294W - Black Paris**Course Description**

Experiences, tensions, belonging, and representations of people of African descent who self-identify and are identified as Black or Noir in Paris, France; from the interwar years to the present. Diversity and intergroup relations. Not open to students who have earned credit for AADS 1111 Section 05. [3] (INT)

AADS2306 - Race, Mixed Race, and "Passing."**Course Description**

Social, legal constructions and live experiences of race. Phenomenon of "passing" and category of "mixed race" in fiction, film, and land-mark court cases. [3] (HCA)

AADS2308 - Critical Race Theory: Race, Racism and Narratives in Education**Course Description**

Foundations, methodologies, and policy-analysis methods of Critical Race Theory as tool of educational practices and policies. [3] (SBS)

AADS2356 - African Spirits in Exile: Diaspora Religions in the Americas**Course Description**

Use of anthropology, folklore, history, and literature to examine the history of Haitian Vodun, Cuban Santería, Brazilian Candomblé, New Orleans Voodoo, and Trinidadian Orisha worship. Comparisons with Black Christian traditions and supernatural beliefs beyond organized religion. [3] (P)

AADS2514 - Insider/Outsider: Lesbian, Gay, Bisexual, and Trans Black Histories**Course Description**

History, culture and politics of Black lesbian, gay, bisexual, transgender, and queer (LGBTQ) communities during the 20th and 21st centuries. [3] (P)

AADS2654 - Memoirs and Biographies**Course Description**

Biographies and autobiographies as lenses for the study of historical trends and events; development of gender, sexual, and racial identities in subjects. [3] (US)

AADS3004 - The Morrisonian Era: Toni Morrison and American Social Reality**Course Description**

Fiction, anthologies, and essays of Toni Morrison. Intersections of race, gender, and class as touchstones in American social reality and Morrison's body of ideas and subsequent works. [3] (HCA)

AADS3006 - James Baldwin: Five Ways of Looking at His Life**Course Description**

The author through literature, art, film, politics, and place. Five places critical in his artistic evolution: Harlem and Greenwich Village, New York; Paris and St. Paul-de-Vence, France; and Turkey. Film recreations of his life and writings. [3] (INT)

AADS3016 - GOAT: Life, Times, and Politics of Muhammad Ali**Course Description**

"The Greatest Of All Time" (GOAT)--Muhammad Ali--and his impact on U.S. sports history, U.S. political culture, global black freedom struggles, and engagement with the Nation of Islam. Offered on a graded basis only. [3] (US)

AADS3104W - Soul Food as Text in Text: An Examination of African American Foodways**Course Description**

Distinctions between Southern food and soul food. Soul food as performance and projection of gender and racial identity. Cookbooks as literary artifacts. Soul food in American popular culture, and in African American, Southern, and women's writing. Soul food and community formation. [3] (HCA)

AADS3178 - Colonialism and Its Afterlives**Course Description**

African and Caribbean cultures of colonialism. Forms of decolonization and the predicament of neocolonialism from the emergence of capitalism to the present. The historical and anthropological projects of empire and race-making. Causes and strategies of expansion. Forms of representation and knowledge production. Discourses around intimacy, illness and hygiene. Practices of coercion and violence. [3] (INT)

AADS3204W - African American Children's Literature**Course Description**

From the seventeenth century to the present. Oral and written; fiction and non-fiction. Major works, writers, and genres. [3] (HCA)

AADS3206 - Mystery, Murder, and Mayhem in Black Detective Fiction**Course Description**

Detective fiction in America, beginning with Edgar Allan Poe, the founder of the genre in the American literary tradition, and continuing on with such black writers as Chester Himes, Walter Mosley, Paula Wood, and Pamela Thomas-Graham. [3] (HCA)

AADS3208W - Blacks in the Military**Course Description**

Black participation in American and other wars, from the Revolutionary and Civil wars to ongoing global conflicts. Issues of democracy and freedom. Thematic explorations through film. [3] (P)

AADS3214 - Black Masculinity: Social Imagery and Public Policy**Course Description**

Historical and contemporary debates, perceptions, and attitudes. Public policy debates surrounding disparate incarceration rates and sentencing, policing, racial profiling. Social imagery, "down low" homosexuality, criminality, hypersexuality, and athleticism. [3] (SBS)

AADS3248 - Atlantic African Slave Trade**Course Description**

Cultural, economic, and social aspects of the African slave trade into the Americas from the 16th to 19th centuries. Transformation of the slave trade as a result of abolition and suppression. [3] (SBS)

AADS3258 - Black Issues in Education**Course Description**

Race, ethnicity, gender, class and their relationships to both the broader roles of schooling and education in American society. Historical foundation of education for African Americans, educational and socioeconomic inequality, family structures, and social policy initiatives. [3] (SBS)

AADS3278 - Black Europe**Course Description**

History and politics of the African Diaspora in Europe. Focus on Britain, France, Germany, the Netherlands, and Scandinavia. European Union debates about social exclusion; race in the European context. [3] (INT)

AADS3278W - Black Europe**Course Description**

History and politics of African Diaspora in Britain, France, Germany, the Netherlands, and Scandinavia. European Union debates about social exclusion and race. [3] (INT)

AADS3306 - Black Detroit**Course Description**

From 1800 to present. Theory and practice of the Black Metropolis focusing on Detroit, Michigan, as a location of African-American community, commerce, and creativity. [3] (HCA)

AADS3336 - Literatures of Protest**Course Description**

Study of Black protest through various literary and performative genres, novels, opinion-editorials, poetry, sermons, songs, from 18th century onwards. Exploration of the Black Jeremiad tradition in sermons and texts. [3] (HCA)

AADS3556 - The Political Economy of Racism: Erasures, Slavery, Eviction, and Fables of Whiteness**Course Description**

Decoding racism in US legislation, novels, historical and political texts, sociological studies, and films. [3] (US)

AADS3611 - Jazz Acting**Course Description**

Actor training with an emphasis on Afrocentric methods such as improvisation and ensemble performance. Offered on a graded basis only. Prerequisite: THTR 1611. [3] (HCA)

AADS3850 - Independent Study**Course Description**

May be repeated for a total of 6 credits, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for all semesters of AADS 3850] (No AXLE credit)

AADS3880 - Internship Training**Course Description**

Graded on a Pass/Fail basis only and must be taken concurrently with 3881. These hours may not be included in the minimum number of hours required for the African American and Diaspora studies major. Under faculty supervision, students from any discipline can gain experience in a broad range of public and private institutions on issues relative to the black experience. A minimum of 3 hours of background reading and research will be completed in AADS 3881 concurrently with and regardless of the numbers of hours taken in internship training in 3880. Normally a 2.90 grade point average, 6 hours of prior work in AADS, and prior approval by the director of Undergraduate Studies in African American and Diaspora Studies of the student's plan are required. A research paper and report must be submitted at the end of the semester during which the internship training is completed. Corequisite: 3881. [Variable credit: 1-9] (No AXLE credit)

AADS3881 - Internship Readings and Research**Course Description**

Readings conducted under the supervision of a member of the African American and Diaspora Studies program and a substantial research paper are required. Under faculty supervision, students from any discipline can gain experience in a broad range of public and private institutions on issues relative to the black experience. A minimum of 3 hours of background reading and research will be completed in AADS 3881 concurrently with and regardless of the numbers of hours taken in internship training in 3880. Normally a 2.90 grade point average, 6 hours of prior work in AADS, and prior approval by the director of Undergraduate Studies in African American and Diaspora Studies of the student's plan are required. A research paper and report must be submitted at the end of the semester during which the internship training is completed. Corequisite: 3880. [Variable credit: 3-6] (No AXLE credit)

AADS3890 - Special Topics**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

AADS4104 - Environmental History, Sustainability, and African American Foodways**Course Description**

Advanced treatment of African-American foodways. African-American environmental history. Effects of Seventh-Day Adventist and Black Muslim religious practices on African-American foodways. Creative writing of poet Kevin Young. [3] (HCA)

AADS4108 - Medical Apartheid: Race, Gender and Health**Course Description**

Slavery and the evolution of the fields of gynecology and obstetrics; enslaved black women's agency. Disparities in maternal health and maternal mortality rates, social determinants of health, structural racism, and risk factors. Scientific racism, consent, and implicit bias. [3] (SBS)

AADS4126 - The Black Classics**Course Description**

Key texts and writers of the African Diaspora, from medieval Africa to the present. Fiction and non-fiction across the disciplines of anthropology, education, history, law, literature, politics, religion, and sociology. [3] (HCA)

AADS4198 - Global Anti-Blackness and Black Power**Course Description**

The relationship and relevance of Black Power to anti-blackness in the United States and globally. The systemic marginalization and exclusion of blacks in public life. Their resilience against and resistance to those efforts. [3] (INT)

AADS4228W - Black Girlhood: History, Performance and Counter-Narratives**Course Description**

Historical and current social, political, and cultural constructions of black girlhood in the United States. Performances in which black girls engage to deconstruct and interrupt these constructions via scholarly works, poetry, film, photography, and novels. [3] (SBS)

AADS4256 - Haiti: Freedom and Democracy**Course Description**

The Saint-Domingue Revolution from 1791 to 1803 and the development of Haiti from 1804 to the present. Haiti in global context; the revolution as a key moment in the Age of Revolution and the formation of the Black International. Historical monographs, novels, poetry, visual culture, and music. [3] (INT)

AADS4264 - Black Diaspora Women Writers**Course Description**

Comparative fiction by women from Francophone and Anglophone Africa, the Caribbean, and the United States. Novels of awakening (bildungsroman), themes of exile, home and alienation, identity as well as sexuality, class and color, slavery and colonialism. [3] (HCA)

AADS4270 - Research Methods**Course Description**

Collection, management, analysis and interpretation of data for research. Introduction to qualitative computer software programs. [3] (SBS)

AADS4506 - Slavery and Public Memory**Course Description**

Systems of African enslavement in the Americas as a subject of debate among popular and academic audiences. Memoirs, oral history, genealogy, literature, film, and other creative production. Public commemoration and tourist-related slavery observances around the diaspora. [3] (SBS)

AADS4588 - The Black Studies Movement**Course Description**

(Offered as 4580 prior to Fall 2020) Black Studies and student movements of the 1960s and early 1970s. Intellectual traditions, precedents, and political ideologies of movements. Issues that sparked the call for Black Studies at different college campuses and public school systems. Not open to students who have completed 4580. [3] (SBS)

AADS4851 - Special Topics in Humanities**Course Description**

Topics Vary. Literary, philosophical, and cultural texts. May be repeated for credit if there is no duplication in topic. [3] (HCA)

AADS4852 - Special Topics in Social Sciences**Course Description**

Topics Vary. Diverse range of social and political questions, issues, and problems. May be repeated for credit if there is no duplication in topic. [3] (SBS)

AADS4979 - Senior Thesis in African American and Diaspora Studies**Course Description**

Senior Thesis in African American and Diaspora Studies. Supervised readings and independent research to produce an interdisciplinary research paper; topic to be selected in conjunction with a faculty member of African American and Diaspora Studies. Open only to seniors. [3] (No AXLE credit)

AADS4999 - Senior Honors Thesis**Course Description**

Supervised readings and independent research for honors thesis under supervision of the adviser and another faculty member. Open only to seniors in the Honors Program. [3] (No AXLE credit)

American Sign Language

ASL2100 - American Sign Language I**Course Description**

This introductory course includes basic communication skills of American Sign Language and "contact" language (e.g., nonmanual markers, fingerspelling, numbers, basic vocabulary, classifiers), the sign system continuum, culture implications, and media resources available. [3]

ASL2110 - American Sign Language II**Course Description**

This is an intermediate course in American Sign Language that includes an in-depth look at the linguistics of ASL (e.g., morphology, syntax, phonology, and semantics) and current readings and research in the field. [3]

Anthropology

ANTH1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

ANTH1101 - Introduction to Cultural Anthropology**Course Description**

The study of diverse cultures in the contemporary world. The ways in which cultures have developed and changed. Intended for students with a general interest in the field of anthropology. [3] (SBS) (CORE C, E) (LE SBS)

ANTH1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

ANTH1130W - America through the Lens of Disney**Course Description**

Concepts of gender, family, race, and class through a combination of texts and animated films produced by the Walt Disney Company. Impact on contemporary American cultural values. No credit for students who have earned credit for 1111 section 07. [3] (P)

ANTH1201 - Introduction to Archaeology**Course Description**

Archaeological interpretation of global human history from early settled villages through the rise of the first civilizations. Archaeological methods and analysis, interpretive controversies, and cultural heritage. Environment, technology, religion, and human diversity in past cultural transformations. Rise of early cities and states. Repeat credit for students who earned credit for 1201W. [3] (SBS) (CORE C) (LE SBS)

ANTH1201W - Introduction to Archaeology**Course Description**

Archaeological interpretation of global human history from early settled villages through the rise of the first civilizations. Archaeological methods and analysis, interpretive controversies, and cultural heritage. Environment, technology, religion, and human diversity in past cultural transformations. Rise of early cities and states. Repeat credit for students who earned credit for 1201. [3] (SBS) (CORE A, C) (LE SBS)

ANTH1301 - Introduction to Biological Anthropology**Course Description**

Natural selection and evolution of primates and humans. Theories on early human lifeways and behavior. Bioarchaeological and bioanthropological studies of past and present human health and disease. Evaluation of fossil, skeletal, molecular, and artifactual evidence in reconstructing the past. [3] (MNS) (CORE B, C) (LE SBS)

ANTH1601 - Introduction to Language and Culture**Course Description**

The interrelationship between language and culture. Language and thought, language ideologies, discourse, and linguistic and social identities. Culture and language change. [3] (SBS)

ANTH2101 - Theories of Culture**Course Description**

Survey of the views of anthropological thinkers, from the late nineteenth century to the present, about the basic attributes of humankind and human culture. Comparison of different ideas of how people create culture and in turn are molded by culture. Repeat credit for students who have earned credit for 3900. [3] (SBS)

ANTH2102 - Problems in Anthropological Theory**Course Description**

Seminar in anthropological theory: cultural evolution, cultural history, ethnic relations, cultural ecology, archaeological method and theory, social structure, political organizations, and religious institutions. Repeat credit for students who have earned credit for 3901. [3] (SBS)

ANTH2105 - Race in the Americas**Course Description**

Origins of the concept of race. Comparison of past and present racial ideologies and practices in the United States, Latin America, and the Caribbean. The intersection of race with gender, ethnicity, class, nationalism, and colonialism. [3] (P)

ANTH2106 - Culture and Power in Latin America**Course Description**

Survey of native cultures and Spanish and Portuguese heritage. Fundamental traditions, including marriage and the family, the relationship between men and women, racial and ethnic identity, social class, and religion. Peasant communities and contemporary urban life. [3] (INT)

ANTH2108 - Indigenous Peoples of Lowland South America**Course Description**

Native societies of Amazonia, the Orinoco basin, and other forest, savanna, and coastal regions of South America. Ecology, cosmology, social organization, and political relations in historical and contemporary populations. Government policies, human rights, environmentalism, sustainable development, and indigenous activism and advocacy. [3] (SBS)

ANTH2109 - Food Politics in America**Course Description**

The cultural, social, political, and economic contexts of the contemporary food system. Issues of health and nutrition. Land use, ecological relations, food chains, and links to climate change. Ethics of food production, distribution, and consumption. Agricultural policy, immigration, work conditions, animal welfare, and local economies. Roles of citizens and consumers. Rise of movements seeking sustainable alternatives. [3] (US)

ANTH2110 - Gender and Cultural Politics**Course Description**

Cross-cultural comparison of women's roles and status in western and non-Western societies. Role of myths, symbols, and rituals in the formation of gender identities and the politics of sexual cooperation, conflict, and inequality. Case studies from Africa, the Middle East, Europe, North and South America, Asia, and Melanesia. Serves as repeat credit for ANTH 3145. [3] (P)

ANTH2113W - Food, Identity, and Culture**Course Description**

Food in Western and non-Western cultures. Food, power, and the making of social beings. Taboos, cultural preferences, and sensory perceptions. Role of eating in social categories, boundaries, and the creation of self and other. Food fashion, globalization, and food in the media.[3] (INT)

ANTH2114 - Above and Below the Surface: The Caribbean between Climate Change and Tourism
Course Description

Caribbean islands, history, tourism, and ecology. Human-environment interactions. Under water and above water ecologies; Scuba diving and environmental research. Development of interdisciplinary critical thought. Applied research. [3] (INT)

ANTH2115 - Eating the Nation: Gastro-nationalism, neoliberal production, and identity politics in Spain
Course Description

Politics of food, race, and identity in Spain. History of nationalism in Spain and Basque and Catalán separatism. Spanish national cuisine; local food politics as articulations of independence movements. Food ways with respect to production, delivery, and consumption: regional processes, race, and migration. [3] (SBS)

ANTH2116W - Coffee: Biology, Culture, and Political Economy
Course Description

Coffee from bean to cup. Plant biology and pharmacology, agricultural and economic dimensions, and taste and quality. Social and cultural implications of coffee trade and marketing, coffee shop cultures over time, and commodification and decommodification. [3] (SBS)

ANTH2117W - Borders and Territories: The Making of Land and People
Course Description

Migration, migrants, and the nature and making of borders, from inner cities to international and national borders. International migration and global capitalism. Border conflicts, nationalism, and territories. [3] (INT)

ANTH2118 - Revolutionary Cities: Urban Uprisings in Paris and Barcelona
Course Description

Paris in French Revolution, 1871 Paris Commune, and May 1968. Barcelona in Catalan nationalism, Spanish Revolution. Political ideologies of revolution, theories of power, forms of self-organization, and protest tactics. Role of art, collective gatherings, and performance in revolution. Legacies of revolution in contemporary politics, social movements, and urban uprisings. Offered on a graded basis only. [3] (SBS)

ANTH2120 - Sports, Culture, and Society
Course Description

Multifaceted role of sports in culture and society, past and present. Cross-cultural perspectives on U.S. sports and related practices. [3] (SBS) (CORE B, C) (LE SBS)

ANTH2121 - Political Anthropology: States and Their Secrets
Course Description

Development, workings, and techniques of the ancient and modern state. Bureaucracy, state secrecy, diplomacy, organization of warfare, surveillance. Anthropological theories of power, state formation, nationalism, authority, influence, and coercion. Case studies of atrocities, disclosure of secrets, and whistleblowing. Ethics and responsibility in complex power structures. [3] (SBS) (CORE A, E) (LE SBS)

ANTH2122 - Human Rights of Indigenous Peoples
Course Description

Major concepts and legal frameworks for indigenous self-governance, cultural rights, and environmental stewardship. Local and transnational indigenous rights movements. [3] (P) (CORE C, E) (LE SBS)

ANTH2130 - Global Infrastructure and Everyday Life**Course Description**

Relations between infrastructure and society around the world, past and present. Analysis of large technical systems as sites of cultural meaning, political struggle, and everyday social interaction. Water, energy, communication, and transportation networks in Africa, Asia, and the Americas, with an emphasis on Latin America. Offered on a graded basis only. [3] (INT)

ANTH2150 - Urban Ecology**Course Description**

Environmental conditions and consequences of human and non-human life processes in cities through history. Transformations of landscapes, food systems, social inequality, and built environments. Origins of cities, gentrification, urban planning, green activism, and environmental justice. Long-term perspectives on climate change, political ecology, environmental history, green politics, and prospects for sustainability. [3] (SBS)

ANTH2160 - Creating Community**Course Description**

Creation, maintenance, and transformation of communities through time. Community as a village or settlement, and as an "imagined" or virtual aspect of social identity. Behaviorist, interactionist, discursive, and identity-oriented anthropological approaches to community. Community organization and the built environment. Ancient and modern case studies. [3] (CORE B) (LE SBS)

ANTH2160W - Creating Community**Course Description**

Creation, maintenance, and transformation of communities through time. Community as a village or settlement, and as an "imagined" or virtual aspect of social identity. Behaviorist, interactionist, discursive, and identity-oriented anthropological approaches to community. Community organization and the built environment. Ancient and modern case studies. Serves as repeat credit for either 2160 or 3160 Anthropologies and Archaeologies of Community. [3] (SBS)

ANTH2170W - Contemporary Indigenous Cultures in Global Context**Course Description**

Present-day global indigenous identities. Historical processes of colonialism, displacement, marginalization, and forced assimilation. Indigenous resistance and agency, indigenous social media, experiences of urban indigenities, indigenous queer studies. Writing cyber-ethnography of influencers on social media platforms. [3] (INT)

ANTH2172 - Welcome to the Jungle: Amazonia Past Present and Future**Course Description**

Amazonia as focus of international curiosity and colonial exploitation for centuries. Brazil, Peru, Bolivia, Ecuador, Colombia, Venezuela, Guyana, Suriname, and French Guiana. Biodiversity of ecosystems. Indigenous communities, languages, cultures, and histories that challenge the idea of pristine forest. Serves as repeat credit for ANTH 3890 section 02 offered Fall 2024. [3] (CORE C)

ANTH2211 - Archaeology**Course Description**

An introduction to the methods used by archaeologists to study the nature and development of prehistoric societies. Approaches to survey, excavation, analysis, and interpretation are explored through lectures, case studies, and problem assignments. [3] (SBS)

ANTH2214 - Art and Architecture of the Ancient Americas**Course Description**

Visual arts and built environments of indigenous South America, North America, and the Caribbean prior to European contact. Sacred, cultural, and historical influences on architecture and iconography. [3] (INT) (CORE C) (LE SBS)

ANTH2220 - Human Landscapes**Course Description**

Human-environment interactions in the formation of landscapes and settlement systems. Uses of archaeology, cultural anthropology, and cross-cultural comparison to understand social space, sacred landscapes, urban plans, and historical ecology. Methods of interpretation through quantitative, social, and symbolic analysis. Repeat credit for students who earned credit for 2220W. [3] (SBS)

ANTH2220W - Human Landscapes**Course Description**

Human-environment interactions in the formation of landscapes and settlement systems. Uses of archaeology, cultural anthropology, and cross-cultural comparison to understand social space, sacred landscapes, urban plans, and historical ecology. Methods of interpretation through quantitative, social, and symbolic analysis. Repeat credit for students who earned credit for 2220. [3] (SBS) (CORE A, C) (LE SBS)

ANTH2221 - Old World Archaeology**Course Description**

Ancient Cultures of the Old World. Archaeology of the Near East, Africa, Asia, and Oceania. The origins of the great civilizations of Egypt and Mesopotamia. The beginnings of cities, agriculture, trade, and empires in light of recent archaeological discoveries. [3] (INT)

ANTH2222 - North American Archaeology**Course Description**

The origins of native North American culture. Migration from Asia, early hunters and gatherers, and the extinction of ancient fauna. Evolution of social complexity, ecological adaptations, and prehistoric interaction as seen in the archaeological record of the continent. [3] (US) (CORE C, E) (LE SBS)

ANTH2223 - Native North Americans**Course Description**

Indian societies of North America; their archaeological origins, development, and changing adaptation to white society. [3] (US)

ANTH2224 - Cultural Resource Management; Applied Archaeology in the United States**Course Description**

History, legislation, methods, and stakeholders involved in Cultural Resource Management (CRM). Archaeological and historic preservation research under federal, state, and local laws. Knowledge and skills needed for a career in CRM. Archaeological fieldwork and field trips to local archaeological sites. Suitable for Immersion projects. Prerequisite: 1201. [3] (SBS)

ANTH2225 - Climate Change, Collapse, and Sustainability in History

Course Description

The Holocene until 1600 AD. Archaeological perspectives on human society and relation to the environment over time. Historical ecology, anthropogenic climate change, domestication, colonial ecosystems, environmental justice. Case studies of cultures and peoples: Maya, Easter Island, Andes, Norse, American Southwest. Application of ancient innovations to address present concerns. [3] (P)

ANTH2226W - Modern-World Archaeology

Course Description

Historical archaeology, investigation of the post-1500 world, origins of modernity, and global networks. Colonialism, capitalism, racialization, and Eurocentrism. Social inequality. Structural history, network theory, world-systems analysis, dialectical thinking, epochal structures, microhistory, material culture, and socio-spatial analysis. [3] (SBS)

ANTH2229W - Contested Ground: Sacred Sites Across the Ancient World

Course Description

Sacred places and structures from the Paleolithic to the medieval period. Comparisons of religious sites worldwide. Cultural heritage and the historical and contemporary politics of ancient religious sites. [3] (P)

ANTH2230 - South American Archaeology

Course Description

From 12,000 years ago to the present. Archaeology, ethnohistory, and ethnography. [3] (SBS)

ANTH2231 - Ancient Andean Civilizations

Course Description

Introduction to the archaeology and peoples of ancient South America. Early hunters and gatherers, origins of agriculture and urbanism, and the rise and fall of the Huari and Inca empires. [3] (INT) (CORE A, C) (LE SBS)

ANTH2242 - Rise and Fall of Maya Civilization

Course Description

Archaeological, historical, and ecological evidence on the rise, florescence, and enigmatic collapse of one of the most complex of tropical forest civilizations. Case study in ecological adaptation, sustainability, and climate change. Controversies about its ultimate collapse. Comparative economic and social theory. Repeat credit for students who have earned credit for 2242W. [3] (INT) (CORE C) (LE SBS)

ANTH2242W - Rise and Fall of Maya Civilization

Course Description

Archaeological, historical, and ecological evidence on the rise, florescence, and enigmatic collapse of one of the most complex of tropical forest civilizations. Case study in ecological adaptation, sustainability, and climate change. Controversies about its ultimate collapse. Comparative economic and social theory. Repeat credit for students who have earned credit for 2242. [3] (INT)

ANTH2250 - Contemporary Middle East and Kurdistan

Course Description

From Ottoman and Safavid empires to Syria, Turkey, Iran, and Iraq. Kurds, Kurdish history, and the Middle East. Nationalism, Kurdish ethnicity, and uprisings; Kurdish politics across four nation-states. Kurdish community in Nashville. [3] (INT)

ANTH2262 - Pseudoarchaeology: Myths, Mysteries, and Make Believe in Popular Culture**Course Description**

Did Atlantis exist? Who built the Pyramids? Who were the first people in America? Speculations presented in books, movies, and television programs based on spurious archaeological evidence. How archaeologists create evidence-based arguments; critique of popular media. Serves as repeat credit for ANTH 1111 section 10. [3] (SBS)

ANTH2270W - Ethics in Anthropology, Archaeology, and Development**Course Description**

(Formerly listed as ANTH 3262) Ethical perspectives on contemporary problems of archaeological and anthropological research, interaction, and interpretation of past and present non-Western societies. [3] (P)

ANTH2275 - Untimely People and Matters**Course Description**

Time's effects on people and societies. Culturally constituted temporalities; notions of embodiment and alterity. Study of social change; process of innovation through invention and adaptation. Othering non-Western societies as traditional and unchanging. [3] (HCA)

ANTH2275W - Untimely People and Matters**Course Description**

Time's effects on people and societies. Culturally constituted temporalities; notions of embodiment and alterity. Study of social change; process of innovation through invention and adaptation. Othering non-Western societies as traditional and unchanging. [3] (HCA)

ANTH2301 - Bioethics in Anthropology**Course Description**

Humans as study subjects in research. Human complexities and experimentation; eugenics; and ethical, legal, and social issues of research. [3] (SBS) (CORE E) (LE SBS)

ANTH2342 - Biology of Inequality**Course Description**

Biological and health consequences of racial and social inequalities. Psychosocial stress and measurement of its health impact. Effects on disease and precursors to disease. Measures of molecular biology, such as epigenetics and gene expression. Biomarkers of inflammation, cardiometabolic health, and immune function. [3] (SBS)

ANTH2370 - Death and the Body**Course Description**

Cross-cultural study of death rituals. Mortuary archaeology and anthropology of death and the body. Biological and social perspectives on the corpse and living body, and their treatment in ritual and everyday life. The body as biological specimen and social artifact. Nature of beauty, body modification, and adornment. [3] (SBS)

ANTH2371 - Reading the Bones: Bioarchaeology and Forensic Studies in the Peruvian Andes**Course Description**

Maymester: Two weeks on campus followed by field and lab work in rural Peru. Analysis of archaeological mummies and skeletons. Bioarchaeology and forensics. Archaeological site visits and museum tours in Lima and Arequipa. [3] (INT)

ANTH2372 - Forensic Anthropology

Course Description

History, basis in science, and techniques of forensic anthropology to determine general identification and specific identification from physical and skeletal remains. Estimation of age, biological sex, ancestry, and analysis of trauma for medicolegal purposes. Serves as repeat credit for ANTH 3890-01 offered Spring 2024, 3890-05 offered Spring 2023, 3890-01 offered Spring 2022. [3]

ANTH2375 - Making Racism Visible: Media and Civil Rights from MLK to Black Lives Matter

Course Description

African American, American Indian, and intersectional racial justice movements from 1950 to present. Role of mass media, documentary film, and social media in political struggles for racial justice in the United States. [3] (P)

ANTH2380 - Biocultural Perspectives of Afrofuturism

Course Description

Intersections between biological anthropology and Afrofuturism; imagining broadly what it means to be human. The Afrofuturism genre; biological anthropological themes such as human evolution, human diversity, and identity to examine biocultural aspects of the human experience. Scientific articles, science fiction, visual art, and music. Critical perspectives on the intersections of biology, culture, and technology. Serves as repeat credit for ANTH 3890-02 offered Fall 2023. [3] (CORE A) (LE SBS)

ANTH2380W - Latinx/AfroLatinx Ethnographies: The (Un)Making of Latinidades

Course Description

Social histories and contemporary lives of groups often attributed Latinidad through ethnographic texts. Issues of Whiteness, anti-Blackness and anti-Indigeneity with(in) Latinidad. History of "Black and Latino" solidarity. Nation, diaspora, citizenship, race, ethnicity, culture. Afro-Latinidad(es), New Afro-Latinx Movement. Rise of social movements seeking political and social alternatives. Serves as repeat credit for ANTH 3890, section 03 in spring 2023. [3](P)

ANTH2381W - The Clothes We Wear: Textiles, Clothing and Fashion in a Global World

Course Description

Introduction to an anthropology of textiles, dress, and fashion. Material culture; textile production and consumption in the global world. [3] (INT)

ANTH2385W - (Re)Imagining Education: Ethnography of Schools and Schooling

Course Description

Role of schools and schooling in (re)producing and resisting educational inequities. Ethnography, ethnographic methods, participant observation. Schools and the (re)production of categories of race, ethnicity, gender, class. Rise of movements to (re)imagine school/schooling. Serves as repeat credit for ANTH 3890, section 04 in Spring 2023. [3] (P)

ANTH2400 - Public Health, Language, Media, and Risk Management

Course Description

Role of language in the politics and ethics of expert, government, and community stakeholder responses to epidemics, environmental pollution, and natural disasters. Theory and case studies of communication in U.S. and global crises. Uses of science, narrative, and metaphor in formation of health policy and health inequalities based in race, ethnicity, sexuality, and geographic marginalization. [3] (P)

ANTH2401 - Infodemics: Misinformation and Public Health

Course Description

Public health and social implications of "infodemics"; scientific study of misinformation as form of language and communication in culture and social life; foundations of critical linguistic anthropological perspectives; data-driven and ethnographically constituted analyses of relationships between language, communication, culture, and misinformation. Serves as repeat credit for ANTH 3890-04 offered Fall 2023. [3] (CORE E) (LE: SBS)

ANTH2511 - Culture and Climate Change

Course Description

Cultural values and cultural politics in public attitudes and debates over climate change. Media coverage of scientific research on climate, how journalists, interest groups, and other writers represent climate change, climate science, and competing perspectives. Serves as repeat credit for ANTH 1111 section 15. [3] (INT)

ANTH2521 - The Green Planet: Plants in Human History

Course Description

Plants and the political economy, colonialism, and history of science, including history of archaeological theory. Environmental reconstruction, archaeological methods for reconstructing human-plant interaction. Introduction to botany: taxonomy, systematics, evolution. Introduction to paleobotany: food processing, diet, microbotany. Naturalism, equilibrium, and archaeological theory. Human-plant interaction in the ancient world; future farming. Offered on a graded basis only. [3] (P) (CORE A, B) (LE SBS)

ANTH2601 - Introduction to Linguistics

Course Description

Systematic study and analysis of human language. Formation of language sounds, sound systems, the structure of words, the structure of sentences, meaning, language change. Data from diverse languages of the world. [3] (SBS)

ANTH2602 - The Social life of Language

Course Description

Study of language in cultural social contexts; methods of linguistic inquiry; linguistic analysis as tool for ethnographic investigation. Language in global and local contexts. Serves as repeat credit for students who completed 2602W. [3] (SBS)

ANTH2602W - The Social life of Language

Course Description

Study of language in cultural social contexts; methods of linguistic inquiry; linguistic analysis as tool for ethnographic investigation. Language in global and local contexts. Serves as repeat credit for students who completed 2602. [3] (SBS)

ANTH2603 - Comparative Writing Systems

Course Description

The origins, development, and social uses of writing in the ancient Middle East, Mediterranean, and Mesoamerica. Decipherments of hieroglyphic systems. Literacy, historiography, and cross-cultural translation. [3] (HCA)

ANTH2620 - Food in the Ancient World**Course Description**

Development of agriculture from around 8,000 BCE to the contact between Old and New Worlds in 1492. Role of foodways in human societies and impact on historical and environmental change. Integration of foodways with social and cultural systems such as gender, identity, ideology, and trade. Elements of historical cuisines, including cooking techniques, meat, and alcohol. Excursions to local sites of agricultural, archaeological, and food-related relevance. [3] (SBS) (CORE C) (LE SBS)

ANTH2800 - Theatre and Social Change: Theatre as Applied Activism**Course Description**

Role of theatre in social justice and social change movements, including Playback Theatre and Theatre of the Oppressed. Conducting improv theatre in class or in collaboration with a local / campus organization. Not open to students who have earned credit for 3890 section 05 offered spring 2020. [3] (HCA)

ANTH3050 - Artificial Intelligence and Material Culture**Course Description**

Applying artificial intelligence to archaeology. Statistics, machine learning, and deep learning. Hands-on examples from archaeological excavations as well as laboratory studies. [3] (HCA)

ANTH3120 - Sociocultural Field Methods**Course Description**

Research design and proposal writing, access to data, ethical issues, sampling techniques, interviewing questionnaire design and question writing, data analysis. [3] (SBS)

ANTH3121 - Global Wealth and Poverty**Course Description**

The production of inequality. How wealth is accumulated, lost, exchanged, and displayed; how poverty is created, endured, and overcome. Explanations in terms of luck, hard work, immorality, occult forces, and public policies. Case studies. [3] (P)

ANTH3122 - The Anthropology of Globalization**Course Description**

Perspectives on globalization based on ethnographic case studies. The impact of new technologies on native cultures; different cultural meanings of global commodities; creation of new diaspora cultures; effects of neoliberal reforms on local economies; ethnic movements and terror networks. [3] (INT)

ANTH3125 - Public Scholarship Practicum in Community Research**Course Description**

Theory and methods for publicizing research to policy makers, organizations, and the public. Uses of media. Communicating research in civil rights; environmentalism; and advocacy on gender, sexuality, health, and religion. Translating original scholarship into pieces for newspapers, blogs, websites, video resources, and public presentations. Prior research experience is expected. Consent of instructor is required. [3] (No AXLE credit)

ANTH3130 - Andean Culture and Society**Course Description**

Historical and archaeological background, languages, economy, environment, and cultural adaptation of Andean peoples. Spanish and native American heritage. Religion, family structure, political organization, contemporary social issues, and economic background. Urban and rural traditions, social movements, and change. [3] (SBS)

ANTH3132 - Social Movements**Course Description**

Collective action, past and present. Class- and identity-based movements, transnational activism, and networks. The early U.S. labor movement; 1960s gay, women's and civil rights movements. Global struggles for social justice. [3] (INT)

ANTH3135 - Development, Social Enterprise, Social Justice**Course Description**

Theories of economic and human development. Multidimensional approaches to poverty and well-being. Roles of inequality, discrimination, and social justice. Practical focus on social entrepreneurship in international context. [3] (P)

ANTH3136 - Cultural Heritage in Context: The Future of the Past**Course Description**

Historical and archaeological views on heritage and heritage management. Ownership of the past, indigenous voices, and "world heritage." Ramifications of national and international heritage legislation. Economic development, tourism, and cultural practice; effects of climate change and disaster on heritage sites. [3] (INT)

ANTH3138 - Global Food Politics**Course Description**

Ecological, political, economic, and cultural dynamics in the world food system. Historical and contemporary agricultural methods. Energy, land use, and climate change. Public health and nutrition. Hunger, food scarcity, and biotechnologies. Commodity chains and labor conditions. Movements for food security, food sovereignty, fair trade, and consumer information. [3] (INT)

ANTH3140 - Myth, Ritual, Belief: The Anthropology of Religion**Course Description**

Cross-cultural survey of religious and ritual beliefs in light of theories of religion. Topics include sacrifice, myth, witchcraft, divination, religious change, and millenarian movements. [3] (HCA)

ANTH3141 - Anthropology of Healing**Course Description**

Ritual, symbols, belief, and emotion in health, illness, and therapeutic processes. Practices and politics of healing in western and non-western societies, including shamanism, faith healing, ecstatic religious experience, alternative medicine, and biomedicine. Mind-body interactions, medical pluralism, relations between patients and healers, and implications for improving medical care. [3] (P)

ANTH3143 - Medical Anthropology**Course Description**

Biocultural aspects of human adaptations to health, disease, and nutrition. Non-Western medical and psychiatric systems. Effects of cultures on the interpretation, diagnosis, and treatment of illness. Case studies from Africa, Oceania, Latin America, and the contemporary United States. [3] (SBS)

ANTH3144 - Politics of Reproductive Health**Course Description**

Reproductive health politics, with focus on the United States. Role of broader social, economic, and cultural concerns in diverse positions and public debates. How sexuality, race, class, gender, and disability shape experiences of conception, pregnancy, childbirth, kinship, and new medical technologies. [3] (P)

ANTH3145 - Sexuality, Gender, and Culture**Course Description**

Theories and case studies of sexuality and gender in Western and non-Western societies. Cross-cultural perspectives on how class, race, ethnicity, culture, and power influence sexual norms and gender roles. Performativity; masculinity and femininity; kinship; religion and sexuality. Serves as repeat credit for ANTH 2110. [3] (P)

ANTH3150 - Cognitive Anthropology**Course Description**

Methods and approaches in linguistics and cognitive sciences. Exploration of culture and thought, and how culture affects our ways of reasoning, thinking, and behavior. Repeat credit for students who completed 3150W. [3] (SBS)

ANTH3150W - Cognitive Anthropology**Course Description**

Methods and approaches in linguistics and cognitive sciences. Exploration of culture and thought, and how culture affects our ways of reasoning, thinking, and behavior. Repeat credit for students who completed 3150. [3] (SBS)

ANTH3161 - Colonial Encounters in the Americas**Course Description**

Theoretical discussion of colonialism as a sociocultural process. Comparative colonialism in pre- and post-Hispanic contexts. Methodological consideration of archaeological and archival analyses and their complementary epistemological statuses. Pan-American case studies. [3] (SBS)

ANTH3162 - Material Culture of New World Slavery**Course Description**

Enslaved Africans' lives in the New World from an archaeological perspective. Housing, artifacts, health, religion, and resistance in North America, South America, and the Caribbean. Serves as repeat credit for students who earned credit for ANTH 3890-01 in Fall 2014. [3] (SBS)

ANTH3200 - Ancient Cities**Course Description**

Comparative examination of early cities in the Old World and pre-Columbian America. Analysis of social and economic processes supporting preindustrial urbanism. Role of geography, ideology, trade, and settlement systems in the rise of early urban societies. [3] (SBS)

ANTH3202 - The Collapse of Civilizations**Course Description**

Causes of the decline or collapse of complex societies. Old World and New World examples. Historical, anthropological, and paleoecological theories and controversies. [3] (P)

ANTH3240 - Ancient Mesoamerican Civilizations**Course Description**

Development of pre-Hispanic civilization in Mesoamerica from the beginnings of village life to the rise of the great states and empires: Olmec, Maya, Toltec, and Aztec civilizations. [3] (INT)

ANTH3241 - The Aztecs**Course Description**

Origins of the Aztec peoples of central Mexico and their culture; history and structure of the Aztec empire; pre-Columbian social, political, and economic organization; warfare and religion; the Spanish conquest; colonial society in central Mexico; ethno-graphic study of modern descendants of the Aztecs. [3] (INT)

ANTH3243 - Ancient Maya Gods and Rulers**Course Description**

Politics and religion in Classic Maya culture, 100-1000 C.E. Sources and symbols of power, ritual life, and metaphysical underpinnings of hierarchy and cosmology. Relationships among ideology, religion, and politics. Repeat credit for students who have earned credit for 3243W. [3] (SBS)

ANTH3243W - Ancient Maya Gods and Rulers**Course Description**

Politics and religion in Classic Maya culture, 100-1000 C.E. Sources and symbols of power, ritual life, and metaphysical underpinnings of hierarchy and cosmology. Relationships among ideology, religion, and politics. Repeat credit for students who have earned credit for 3243. [3] (SBS)

ANTH3250 - The Inca Empire**Course Description**

The rise and fall of the Inca state in the Southern American Andes. Inca society, agriculture, economy, warfare, ancestor worship, mummies, and royal wealth. Imperial expansion, the role of the feasting in Inca politics, and place of ecology in Inca religion. Destruction of the empire during the Spanish conquest; persistence of pre-Columbian culture among Inca descendants in Peru and Bolivia. [3] (INT)

ANTH3260 - Crafting Pottery in the Ancient World**Course Description**

Pottery as craft or locally-grounded knowledge of making. Phenomenological issues of perception, objectification, and embodiment. Practice-based versus formal textbook learning. Hands-on experience making and studying ceramic vessels. Qualitative and quantitative analysis of ceramic forms, fabrics, and decorations. Repeat credit for students who have earned credit for 3260W. [3] (HCA)

ANTH3260W - Crafting Pottery in the Ancient World**Course Description**

Pottery as craft or locally-grounded knowledge of making. Phenomenological issues of perception, objectification, and embodiment. Practice-based versus formal textbook learning. Hands-on experience making and studying ceramic vessels. Qualitative and quantitative analysis of ceramic forms, fabrics, and decorations. Repeat credit for students who have earned credit for 3260. [3] (HCA)

ANTH3261 - Introduction to Geographic Information Systems and Remote Sensing

Course Description

Computerized graphics and statistical procedures to recognize and analyze spatial patterning. Spatial data-collection, storage and retrieval; spatial analysis and graphic output of map features. Integration of satellite imagery with data from other sources through hands-on experience. Assumes basic knowledge of computer hardware and software. [3] (MNS)

ANTH3270 - Underwater and Maritime Archaeology

Course Description

History, theory, and methodology in underwater, marine, and nautical archaeology. Technologies for survey, excavation, and analysis. Cultures past and present, impacts of climate change, and connections to marine resources in the present. [3] (INT)

ANTH3272 - Ancient Pets, Predators, Food: Archeology of Animals

Course Description

Zooarchaeological methods for the study of the human past. Identifying animal bone remains from archaeological sites to reveal the diversity of human-animal interactions, the role of animals in society, and anthropic processes such as domestication. Introduction to Archaeology is recommended. May be offered with integrated laboratory for additional credit hour. [3-4]

ANTH3333 - Topics

Course Description

Topics vary by section and instructor. May be repeated for credit; students may register for more than one section of this course in the same semester. [3]

ANTH3333W - Topics

Course Description

Topics vary by section and instructor. [3]

ANTH3343 - Biology and Culture of Race

Course Description

Biological and cultural perspectives on race in the United States and internationally. Patterns of human genetic variation. Biomedical use of racial categories. Social and cultural construction of race. Racism and racial discrimination. Racial disparities in health. [3] (P)

ANTH3344 - Genetic Anthropology Lab Techniques

Course Description

Applications of molecular anthropology techniques. DNA data analysis. Genetic methods and findings. DNA comparisons between world populations. Studies of ancient DNA. [3] (MNS)

ANTH3345 - Genetics in Society

Course Description

Influence of modern genetic technologies in everyday life. Social meanings of scientific data. Genetics of identity. Personalized genetic medicine and consumer-driven genetic testing. Genetics of food production. Assisted reproductive technologies. Revolutionary societal impacts of science. Offered on a graded basis only. [3] (P)

ANTH3346 - Human Adaptation and Disease**Course Description**

Evolutionary perspectives on biological and cultural adaptations to physical and pathogen environments. Human variation, human evolutionary ecology, epidemiology, and evolution of disease. Specific focus on epidemiological transitions. Offered on a graded basis only. Serves as repeat credit for ANTH 3890-02 in Fall 2016. [3] (MNS)

ANTH3348 - Forensic Science, Genocide, and Human Rights**Course Description**

Practical, ethical, and theoretical implications of scientific work in the human rights arena through anthropological lens. Case studies illustrate complexities of scientific work in aftermath of atrocity. Tensions between evidentiary procedures and community needs, inequality in access, local versus outside expertise, and ethics. Serves as repeat credit for ANTH 3890-01 offered Fall 2023 and Fall 2022. [3]

ANTH3371 - Social and Health Consequences of Pandemics**Course Description**

Origins, spread, mortality, and the biological and social consequences. The epidemic of bubonic plague in the 1300s, known as the European Black Death. The devastation of indigenous New World populations by European diseases after 1492. Social and medical responses. Implications for modern societies. [3] (SBS)

ANTH3372 - Human Osteology**Course Description**

Anatomy of the human skeleton. Determination of age, sex, stature, and biological affinity from bones and dentition. Analysis of archaeological skeletal remains for diagnosis of disease and identification of cultural practices. Use of human remains in criminal investigation. [3] (MNS)

ANTH3401W - Evolutionary Biology of Women (Womxn)**Course Description**

Female and womxn's reproductive biology from an evolutionary and biocultural perspective. Life history phases including puberty, pregnancy, birth, lactation, and menopause. Evolutionary theory and human behavioral ecology. How environmental and cultural factors shape biological expression and experiences. [3] (MNS)

ANTH3620 - Maya Language and Literature**Course Description**

Introduction to a contemporary Maya language. Linguistic analysis and cultural concepts. By permission of instructor. May be repeated for the study of different Maya languages for a total of 6 credits. Repeat credit for students who completed 3620W. [1-6; maximum of 6 credits total for all semesters of ANTH 221] (No AXLE credit)

ANTH3622 - Classic Maya Language and Hieroglyphs**Course Description**

Linguistic analysis of Classic Maya hieroglyphs, 100-1000 C.E. Methods of decipherment reading and interpreting an ancient script. Role of socioeconomic status in literacy. Repeat credit for students who completed 3622W. [3] (SBS)

ANTH3622W - Classic Maya Language and Hieroglyphs**Course Description**

Linguistic analysis of Classic Maya hieroglyphs, 100-1000 C.E. Methods of decipherment reading and interpreting an ancient script. Role of socioeconomic status in literacy. Repeat credit for students who completed 3622. [3] (SBS)

ANTH3850 - Independent Research**Course Description**

Readings on selected topics (of the student's choice) and the preparation of reports. [1-3] (No AXLE credit)

ANTH3851 - Independent Research**Course Description**

Readings on selected topics (of the student's choice) and the preparation of reports. [1-3] (No AXLE credit)

ANTH3860W - Research Design**Course Description**

Practical and theoretical knowledge required for embarking on an independent research project. Methodological approaches; scientific writing skills. Serves as repeat credit for ANTH 3890, section 01 in Spring 2023. [3] (SBS)

ANTH3865 - Field Research**Course Description**

Directed field research on topics of the student's choice. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [1-6] (No AXLE credit)

ANTH3866 - Archaeological Excavation**Course Description**

Excavation techniques and field recording methods through participation in an archaeological dig. Excavation unit layout, digging techniques, feature and artifact identification. Mapping and field instrumentation. Data registry, statistical analysis, artifact curation, and conservation. Stratigraphy, relative and absolute dating, sampling strategies and techniques, data management. Research design and archaeological ethics. [4] (MNS)

ANTH3867 - Digital Archaeology: Analysis and Curation of Material Culture**Course Description**

Laboratory analysis of archaeological artifacts using digital methods. Three dimensional modeling of artifacts, digital photography, artifact technical diagramming. Virtual Reality and other representational frameworks. PXRF compositional analysis. Artifact cleaning, labeling, and preservation techniques. Assemblage curation and integration with databases. Preparation of artifacts for exhibition. Ethics of curation, representation, repatriation. Offered on a graded basis only. [3] (MNS)

ANTH3868 - Introduction to Archaeological Science**Course Description**

Study of the human past applying methods from geography, physics, earth sciences, and biological sciences. Integrated interdisciplinary approaches and hands-on learning to conduct scientific projects with STEM research, conceptualize research questions, and implement a variety of research methods and techniques. Oriented to students from Social Sciences and Humanities. [3] (MNS)

ANTH3880 - Internship Training**Course Description**

Offered on a Pass/Fail basis only and must be taken concurrently with 3881. Hours of 3880 will not count toward the Anthropology major or minor. Students from any discipline can gain experience working with a local, national, or international organization in developing a project to broaden their understanding of anthropological issues. Hours for background readings and research will be completed in ANTH 3881 concurrently with and regardless of the numbers of hours taken in internship training in 3880. Normally a 2.90 grade point average, 6 hours of prior work in ANTH, and prior approval of the student's plan by the director of undergraduate studies in Anthropology are required. A research paper and report must be submitted at the end of the semester during which the internship training is completed. Corequisite: 3881. [Variable credit: 1-9] (No AXLE credit)

ANTH3881 - Internship Readings and Research**Course Description**

Readings and research conducted under the supervision of a member of the Anthropology department and a substantial research paper are required. Students from any discipline can gain experience working with a local, national, or international organization in developing a project to broaden their understanding of anthropological issues. Hours for background readings and research will be completed in ANTH 3881 concurrently with and regardless of the numbers of hours taken in internship training in 3880. Normally a 2.90 grade point average, 6 hours of prior work in ANTH, and prior approval of the student's plan by the director of undergraduate studies in Anthropology are required. A research paper and report must be submitted at the end of the semester during which the internship training is completed. Corequisite: 3880. [Variable credit: 1-6] (No AXLE credit)

ANTH3890 - Special Topics**Course Description**

Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

ANTH4120 - The Archaeology of Agriculture: A Technological Approach**Course Description**

Agricultural technologies and their impacts on socio-environmental transformations through time in the Andes and elsewhere. Theories of technology emergence and innovation, path dependence, actor network theory, resilience, and antifragility models. Classic works on agriculture, smallholder farmers, intensification, and landscape capital. Interdisciplinary approaches and policy perspectives on farming, ecosystem services, and agroecosystems. [3] (INT)

ANTH4152 - Activism and Social Change: Theory, Experience, and Practice**Course Description**

Introduction to theory and ethics of social activism and advocacy. Roles of academics and scholars. Theories of political organizing and mobilization. Application of anthropological research methods. Case studies in local, national, and global social issues, processes of civic mobilization, and social change. [3] (SBS)

ANTH4153 - Economic Anthropology**Course Description**

Modern and postmodern cultural organization of Western and non-Western economies. Crosscultural comparison of concepts of self-interest and rationality. Relation of the growth of post-industrial (service and information) economies to economic strategies of ethnic groups. Survey of indigenous alternatives to development. Theoretical issues grounded in case studies from our own and other cultures. [3] (SBS)

ANTH4154 - Environmental Anthropology**Course Description**

The relationship between human beings and the environments that sustain them. Global diversity of human ecological adaptations. Hunter-gatherers, pastoral nomads, slash-and-burn agriculturalists, and irrigation agriculturalists. Human impact on the environment. Theories of human ecological interaction. [3] (SBS)

ANTH4155 - Realities and Worldviews: Why Culture Matters**Course Description**

Worldviews and constructed realities that influence human behavior. Stereotyping and conflict as triggered by ontological misunderstandings. Western ontology, science, and understanding the Other. Interaction of worldviews and human behavior such as in resource management and public health. Offered on a graded basis only. [3] (SBS)

ANTH4156 - Racial Experience and Politics**Course Description**

Politics in liberal democracies. Intellectual history and theory of racial experience; ethnographic studies of peoples' experience of race in everyday life; global and cross-cultural perspectives on processes of racialization. [3] (P)

ANTH4160 - Research Methods Workshop**Course Description**

Issues, methodologies, traditions, approaches, and problems in the discipline. Limited to juniors and seniors with preference given to majors and minors. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (HCA)

ANTH4201W - Origins of Social Inequality**Course Description**

Global and archaeological perspective on how human beings have understood social differences over time. Contributing factors to the emergence of inequality. [3] (P)

ANTH4345 - Human Evolutionary Genetics**Course Description**

Core issues in human evolution and population genetics. Molecular evidence for the origin of modern humans, reconstruction of human migrations, race, and detection of admixture between populations. Implications for human disease. Offered on a graded basis only. Prerequisite or corequisite: BSCI 1100, BSCI 1105, or BSCI 1510. [3] (MNS)

ANTH4373 - Health and Disease in Ancient Populations**Course Description**

Paleopathology of mummies and skeletons. Skeletal evidence for violence and warfare. Gender and social status differences in diet, disease, and activity patterns to reconstruct ancient social organization. Biological relationships among ancient and modern populations. Ethics and federal law in the study of human remains. Laboratory analysis of skeletons. [3] (MNS)

ANTH4998 - Honors Research**Course Description**

Research to be done in consultation with a member of the faculty in anthropology. Open only to those beginning honors work in anthropology. May be repeated for a total of 6 credits. [1-6; maximum of 6 credits total for all semesters of 4998] (No AXLE credit)

ANTH4999 - Honors Thesis**Course Description**

Open only to seniors in the departmental honors program. Students completing this course with distinction, including a thesis and final examination, will earn honors in anthropology. Prerequisite: 4998. May be repeated for a total of 6 credits if there is no duplication in topic. [1-6; maximum of 6 credits total for all semesters of 4999] (No AXLE credit)

Arabic

ARA1101 - Elementary Arabic**Course Description**

Development of reading, listening, speaking, and writing skills. No credit for students who have earned credit for a more advanced Arabic language course. [5] (No AXLE credit)

ARA1102 - Elementary Arabic**Course Description**

Continuation of 1101. Development of reading, listening, speaking, and writing skills. No credit for students who have earned credit for a more advanced Arabic language course. Prerequisite: 1101. [5] (INT) (CORE LA)

ARA2201 - Intermediate Arabic**Course Description**

Practice and development of language skills at the intermediate-advanced level. Intensive work in spoken Arabic with emphasis on vocabulary acquisition, reading comprehension, and writing skills. Advanced grammar, modern Arabic word formation, verb aspect usage, and structure of complex sentences. No credit for students who have earned credit for a more advanced Arabic language course. Prerequisite: 1102. [3] (INT) (CORE LA)

ARA2202 - Intermediate Arabic**Course Description**

Continuation of 2201. Practice and development of language skills at the intermediate-advanced level. Intensive work in spoken Arabic with emphasis on vocabulary acquisition, reading comprehension, and writing skills. Advanced grammar, modern Arabic word formation, verb aspect usage, and structure of complex sentences. No credit for students who have earned credit for a more advanced Arabic language course. Prerequisite: 2201. [3] (INT) (CORE LA)

ARA3101 - Advanced Arabic**Course Description**

Further development of listening, reading, speaking, and writing skills in the Arabic language. Emphasis on grammar and literary techniques. Offered on a graded basis only. No credit for students who have earned credit for a more advanced Arabic language course. Prerequisite: 2202. [3] (INT) (CORE LA)

ARA3102 - Advanced Arabic**Course Description**

Continuation of 3101. Further development of listening, reading, speaking, and writing skills in the Arabic language. Emphasis on grammar and literary techniques. Offered on a graded basis only. No credit for students who have earned credit for a more advanced Arabic language course. Prerequisite: 3101. [3] (INT) (CORE LA)

ARA3210 - Media Arabic**Course Description**

Listening to, discussing, simulating, and analyzing Arabic media materials. Coverage of current and historical events, such as TV broadcasts, headline news, documentaries, and public discussions on political, religious, and cultural issues. Offered on a graded basis only. Prerequisite: 3102. [3] (HCA) (CORE LA)

ARA3211 - Advanced Seminar in Arabic**Course Description**

Analysis of style and forms. Poetry, novels, popular literature, and historical chronicles. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: 3102. [3] (HCA)

ARA3310 - Arabic of the Qur'an and Other Classical Texts**Course Description**

Syntactical and morphological features of Classical Arabic. Differences and similarities with Modern Standard Arabic in vocabulary usage, semantic extensions, and context. Vocabulary borrowing. Texts drawn from the Qur'an, Hadith, and Sira (biographical) literature. [3] (HCA) (CORE LA)

ARA3401 - Medical Arabic and Health Care in US and Arab World**Course Description**

Navigation of the health care system for Arabic-speaking patients in the US. Translators, government programs, non-profits, and international organizations. Chronic diseases, symptoms, diagnostic tests, and results. Traditional, alternative, and folkloric medicine in the Arab world. Body image and health, gender roles, and life-stage changes. Offered on a graded basis only. Prerequisite: ARA 1102. [3] (INT)

ARA3402 - Arabic in Medicine and Healing**Course Description**

Vocabulary of wellness, healing, disease, and illness. Scientific and traditional models of human and environmental distress and well-being. Cultural, religious, literary media on healing, recovery, and community progress. International and local proposals for development in Arab world. Offered on a graded basis only. Prerequisite: ARA 1102. [3]

Aramaic and Syriac

ARAM2400 - Introduction to Classical Syriac**Course Description**

Script and basic grammar. Historical context of language as Aramaic dialect. Simple readings from Syriac translations of Christian and Jewish scripture. [3] (INT) (CORE LA)

ARAM2500 - Egyptian Aramaic
Course Description

Reading 5th century BCE texts from the Jewish community at Elephantine. Papyri and ostraca. Historical, linguistic, and cultural context. Relationship to Biblical tradition. [3] (INT) (CORE LA)

Art Studio

ARTS1001 - Commons iSeminar
Course Description

Topics vary. General Elective credit only. [1] (No AXLE Credit)

ARTS1099 - Maymester Contemporary Art Blitz
Course Description

Intensive review of contemporary art through excursions to museums, galleries, and artists' studios. Insights from curators, dealers, and films. Cities vary each year. May be repeated for credit more than once if there is no duplication in topic. [3] (HCA)

ARTS1101 - Introduction to Studio Art
Course Description

Processes, fundamental elements, and principles of art. Drawing, painting, printmaking, sculpture, photography, installation, and time-based art. [3] (HCA) (CORE A)

ARTS1102 - Drawing and Composition I
Course Description

Introduction to drawing: visual problems related to observation, idea formation, composition, media, and various forms of expression. Figure and landscape may be included. [3] (HCA) (CORE A, B)

ARTS1103 - Drawing From Life
Course Description

Methods used to depict the form and structure of naturalistic subjects, including the human figure. Gesture, sighting & measuring, contour drawing, and value. Metaphorical and narrative use of life forms and the human figure in art. [3] (HCA)

ARTS1104 - Intro to Lens-Based Art
Course Description

Traditional and non-traditional uses of lens-based processes in art and science. Photography, cinematography, macro-vision, micro-vision, visualizing dreams, underwater photography, mapping, and augmented reality. Exploration of photographic representation, time, memory, archives, agency of images. Political and historical contexts. [3] (HCA) (CORE A, C) (LE HFA)

ARTS1105 - Drawing Out of Bounds
Course Description

Composition, connection, and experimentation outside the classroom. Best practices for creating mobile studios for observational examination. History of art-making in "plein air." Nontraditional strategies for exhibiting artwork. [3] (HCA)

ARTS1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

ARTS1200 - Photography I: The Analog Moment**Course Description**

Aesthetics and techniques of the black-and-white medium. Image taking, making, and production of meaning. Camera use, film exposure, image quality, and darkroom practices. Basic history of photography and grounding the ways of seeing. The eye as a viewfinder. [3] (HCA) (CORE A, C) (LE HFA)

ARTS1201 - Elusive Image: Between Analog and Digital Photography**Course Description**

Hybrid analog to digital class. Essential photography skills from camera obscura, analog and digital SLR, to portable device. Basic darkroom and digital workflow printing skills. Photographic obsolescence in the digital era and archeology of media. Historical and contemporary photography practices which define the condition of the medium. [3] (HCA)

ARTS1202 - Photography in Digital Culture**Course Description**

Digital photography in today's media landscape. Ubiquitous proliferation of images in public sphere. From image taking to active consuming of images. Digital software. Portfolio and photographic essay building. History of digital media, sequencing, editing, digital output, and social media platforms. [3] (HCA) (CORE A, C) (LE HFA)

ARTS1300 - Painting**Course Description**

Technical and conceptual aspects of painting. Individual instruction based on ability and experience. Offered on a graded basis only. Prerequisite: 1101, 1102 or 1103. [3] (HCA) (CORE A)

ARTS1400 - Ceramics**Course Description**

Introduction to ceramic design and preparation of clay objects. Hand-building, wheel-throwing, ceramic sculpture, surface enrichment, glazing, and kiln-firing. [3] (HCA)

ARTS1401 - Sculptural Ceramics**Course Description**

Hand-building techniques in clay, such as pinch, coil, and slab. Abstract and figurative vessels and forms. Formal, conceptual, and aesthetic aspects of production. Creativity and problem-solving. Glazing and use of electric kilns. Offered on a graded basis only. [3] (HCA)

ARTS1500 - Sculpture**Course Description**

Changing concepts, materials, and processes in sculpture. Individual instruction based on ability and experience. [3] (HCA) (CORE A)

ARTS1501 - Assemblage**Course Description**

Additive processes in sculpture. Problems involving found objects, kinetic/time-based ideas, and site-specific installations. [3] (HCA)

ARTS1502 - Installation Art**Course Description**

Historical survey from 1900 to present; studio practice; formal and conceptual issues. [3] (HCA)

ARTS1503 - Text and Image**Course Description**

Intersection of art and writing. History, theory, and practice. Zines, posters, photography, new media, and artists' books. [3] (HCA)

ARTS1504 - Artists' Books**Course Description**

Seminar with studio. History of the artist's book in 20th century artistic movements. The book as an artifact of material culture. Production of experimental book forms including sculptural and time-based. Current uses of the book form as metaphor in contemporary art: Anselm Kiefer, Ann Hamilton, Kiki Smith, William Kentridge, Sophie Calle, Dieter Rot. [3] (HCA)

ARTS1505 - Graphic Design: Form**Course Description**

Design studio investigating the creation of visual messages across print and digital media. Core skills of visual communication – abstraction and composition – through an understanding of visual perception. Experimentation across digital technologies and analog ways of making. [3] (HCA)

ARTS1506 - Mixed Media and Textiles**Course Description**

2D and 3D work from unconventional and found materials. Materials as expressive tools for creative problem solving. Serves as repeat credit for students who earned credit for ARTS 3891 section 01 offered Fall 2023 or Fall 2022. [3] (HCA)

ARTS1515 - Graphic Design: Typography**Course Description**

Design studio investigating the visual form, material, and distribution of language. Core skills of typographic expression – hierarchy, legibility, and reproducibility – through an understanding of the history of print and digital publication methods. Experimenting across digital technologies and analog ways of making. [3] (HCA)

ARTS1600 - Printmaking: Etching and Relief**Course Description**

Introduction to printmaking. Focus on relief printing and etching on copper. Traditional and experimental approaches. [3] (HCA)

ARTS1601 - Printmaking: Screen and Lithography**Course Description**

Introduction to printmaking media, focus on screen printing and lithography. Traditional and experimental approaches. [3] (HCA) (CORE A, B)

ARTS1700 - Video Art**Course Description**

Video as an art form. Group and individual productions. Viewing and discussion. Project analysis and critique. Relationship to such traditional media as photography and film. [3] (HCA) (CORE A, C) (LE HFA)

ARTS1701 - Performance Art**Course Description**

History, theory, and practice of performance. Vocal studies and conceptual music, personal narrative, performance as a response to the cult-of-celebrity, body art, and performance with new technologies. Collaborative and solo performance projects. [3] (HCA) (CORE A) (LE HFA)

ARTS1702 - Portable Media I**Course Description**

Creative potential of inexpensive, portable digital media devices. Establishment of a rapid rhythm of practice and experimentation to build an inventory of ideas, methods, and techniques. Historic and contemporary developments in narrative and non-narrative digital video production. [3] (HCA)

ARTS1704 - Digital Animation I**Course Description**

Animation with computers. Traditional and experimental animations; interactive web-based projects. [3] (HCA)

ARTS1800 - Sources of Contemporary Art**Course Description**

Contemporary studio art practice, issues, and theories. Visual and conceptual influences on living artists; idea formation. Students must participate in artist-in-residence projects. [3] (HCA)

ARTS1810 - Creative Coding for Visual Arts**Course Description**

Art-making through computer programming. Creating visual artworks using code. Through hands-on exercises and contemporary art examples, students develop digital literacy while exploring new forms of artistic expression. No prior programming experience required. [3] (HCA)

ARTS1820 - Physical Computing in Art**Course Description**

Intersection of art, technology, and human interaction through physical computing. Creating interactive art installations by combining hardware sensors, microcontrollers, and creative programming with artistic expression. Hands-on experimentation and creative problem-solving while building technical skills in electronics and programming. [3] (HCA)

ARTS1830 - Immersive Art thru Augmented Reality

Course Description

Narrative construction through digital media and immersive technologies in contemporary art practice. Developing technical proficiency in spatial augmented reality and interactive media platforms while creating multi-sensory narrative experiences. Integration of traditional storytelling methods with emerging technologies in art production. [3] (HCA)

ARTS1840 - Sound Art

Course Description

Theoretical and practical aspects of sound art through soundscape ecology and experimental music. Field recording, AI music generation, and digital audio workstations. Creating soundwalks, sound design, and sound installations at the intersection of environmental sound and technological innovation. Serves as repeat credit for ARTS 3891, section 03 in Fall 2024. [3] (HCA)

ARTS1900 - Socially Engaged Art Practice

Course Description

History, theory, and practice of making socially engaged art. Combined seminar and studio. Pressing issues engaging local communities. Collaborative and individual projects. [3] (HCA)

ARTS2100 - Drawing and Composition II

Course Description

Prerequisite: 1102. [3] (HCA)

ARTS2101 - Life Drawing I

Course Description

Methods used to depict form and structures of the human figure. Gesture, sighting and measuring, contour drawing, and value. Planar and anatomical analysis. Metaphorical and narrative use of the human figure in art. Prerequisite: 1102. [3] (HCA)

ARTS2102 - Drawing: Color Media I

Course Description

Drawing on paper with wet and dry color media. Traditional and experimental approaches. Prerequisite: 1101, 1102, 1103, or 1600 [3] (HCA)

ARTS2103 - Experimental Drawing

Course Description

Non-traditional approaches to drawing materials and methods. Drawings as installations, animations, and murals. Prerequisite: 1102. [3] (HCA)

ARTS2104 - Drawing from Life II

Course Description

Methods used to depict form and structure of naturalistic subjects, including the human figure. Gesture, sighting and measuring, contour drawing, and value. Metaphorical and narrative use of life forms and the human figure in art. Prerequisite: 1103. [3] (HCA)

ARTS2200 - Photography Workshop: Research and Form

Course Description

Interdisciplinary photography research. Development of image context and research methods. Community engagement. Collaborative project development and presentation. Lighting and tableaux photography. Activist, performative, and sculptural form of photography. Medium and large format. Photographic book. Special emphasis on diversity, inclusivity and perspectives. Prerequisite: 1200, 1201, 1202, or 1101. [3] (HCA)

ARTS2201 - Photography III: Image and Memory in Archive and Context

Course Description

Public and personal photographic and cinematic archives. Translation of archival objects and their material properties into exhibition objects through class discussions and site explorations. Creative writing and community engagement component. Prerequisite: 1200, 1201, 1202, or 1101. [3] (HCA)

ARTS2202 - Lives of Images: Narratives and Representation

Course Description

Expanded photographic field. Image in its multiple forms and across platforms, from everyday life and personal to public. Analog to digital translation. New documentary and fictional narratives. Ways of seeing through the lens of gender, race, and class. Creative writing component. Image tableaux and lighting workshops. Prerequisite: 1101, 1200, 1201, or 1202. [3] (HCA)

ARTS2300 - Painting II

Course Description

Prerequisite: 1300. [3] (HCA)

ARTS2400 - Ceramics II

Course Description

Development of ceramic design, both traditional and contemporary, functional and sculptural. Projects develop technical and aesthetic goals. Instruction includes demonstrations, slide presentations, field trips, guest artists, reports. Demonstrations include advanced throwing, complex constructions, glaze development with applications, and kiln-firing. Prerequisite: 1400. [3] (HCA)

ARTS2401 - Concept and Clay: Composite Forms

Course Description

Technical ability in handling clay and conceptual and interpretive elements in functional and/or sculptural forms. Individual solutions in form and surface. Prerequisite: 1400 or 1401. [3] (HCA)

ARTS2500 - Sculpture II

Course Description

Prerequisite: 1500, 1501, or 1502. [3] (HCA)

ARTS2502 - Advanced Installation Art

Course Description

Techniques, processes, and placement. Conceptual and historical practices. Prerequisite: 1502. [3] (HCA)

ARTS2505 - Graphic Design: Systems & Structures

Course Description

Advanced design studio investigating design principles of organization across a range of scales. Deepening design skills through projects including information architecture, the creation of typographic systems, and exhibition display strategies. Design as a means for transformation. Prerequisite: 1505 or 1515. [3] (HCA)

ARTS2515 - Graphic Design: Practicum

Course Description

A design studio focused on the collaborative creation of real-world projects. Students gain experience taking a project from concept to implementation. Orientation to working in a design studio context. Prerequisite: ARTS 1505 or ARTS 1515. [3] (HCA)

ARTS2600 - Printmaking II

Course Description

Advanced study in traditional and experimental printmaking processes. Prerequisite: 1600 or 1601. [3] (HCA)

ARTS2700 - Video Art II

Course Description

Viewing, discussion, analysis and critiques. Relationship to photography, film, and performance. Group and individual productions. Prerequisite: 1700. [3] (HCA) (CORE A, C) (LE HFA)

ARTS2701 - Performance Art II

Course Description

History, theory, and practice. Vocal studies, conceptual music, personal narrative, performance as a response to the cult-of-celebrity, body art and performance with new technologies. Collaborative and individual performance projects. Prerequisite: 1701. [3] (HCA)

ARTS2702 - Portable Media II

Course Description

Advanced exploration in use of portable digital media devices. Variety of methods for conceptualizing and making projects; enhanced art making skills. Prerequisite: 1700, 1701, or 1702. [3] (HCA)

ARTS2800 - Advanced Digital Art

Course Description

Contemporary art practices with emerging technologies; sophisticated projects that integrate multiple digital platforms such as artificial intelligence, data visualization or sonification, extended reality, and/or brain-computer interfaces; the creation of technically ambitious works that engage with current theoretical discourses in the latest digital art. Prerequisite: either ARTS 1810, 1820, 1830, or 1840. [3] (HCA)

ARTS3100 - Drawing and Composition III

Course Description

Prerequisite: 1102 and 2100. [3] (HCA)

ARTS3101 - Life Drawing II

Course Description

Prerequisite: 2101. [3] (HCA)

ARTS3102 - Drawing: Color Media II
Course Description

Prerequisite: 2102. [3] (HCA)

ARTS3300 - Painting III
Course Description

Prerequisite: 2300. [3] (HCA)

ARTS3333 - Engine for Art, Democracy, and Justice
Course Description

Visual representation and multiple arts forms as focus for developing new knowledge and new practices in a forum for diverse approaches and inclusive discussion of experiments in cultural interconnections, historical entanglements, and the consequences of geographies, histories, and politics. Historical legacies and progress toward more just and democratic futures. Critical analysis and experiential projects. Expansion of the so-called South, its relations and interdependence with other geographies. Models of innovative Art practices. [3] (HCA)

ARTS3600 - Printmaking III
Course Description

Advanced study in traditional and experimental printmaking processes. Prerequisite: 2600. [3] (HCA)

ARTS3851 - Independent Research
Course Description

Supervised work beyond regular offerings in the curriculum. Students may only register with consent of instructor involved and with written approval of the director of undergraduate studies. May be repeated for a total of 6 credits if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for all semesters of ARTS 3851] (No AXLE credit)

ARTS3891 - Selected Topics
Course Description

May be repeated for a total of 9 credits if there is no duplication in topic. Students may enroll in more than one section of this course per semester. [3; maximum of 9 credits total for all semesters of ARTS 3891] (HCA)

ARTS3970 - Directed Study: Senior Show and Contemporary Practices
Course Description

Theoretical and practical concerns including professional practices for artists. Students visit exhibitions and discuss contemporary art with directed readings and lectures, participate in critiques, and exhibit their work. Seniors with a concentration in art only. [3] (HCA)

ARTS3971 - Independent Research: Senior Show
Course Description

Research conducted under faculty supervision specifically in preparation for the Senior Show. Open only to senior majors in their final term. [3] (No AXLE credit)

ARTS4998 - Senior Honors Research**Course Description**

Research conducted in consultation with a faculty member in Art. Offered on a graded basis only. Open only to honors majors. [3] (No AXLE credit)

ARTS4999 - Senior Honors Thesis**Course Description**

Research conducted in consultation with a faculty member in Art. Offered on a graded basis only. Open only to senior honors majors. [3] (No AXLE credit)

Asian Studies

ASIA1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

ASIA1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

ASIA1201 - Writing Southeast Asia**Course Description**

Literary representations, including novels and personal memoirs, of the history of Southeast Asia. Colonial and postcolonial periods. Representations of pluralistic cultures, diverse languages, religions, and indigenous and national identities. Indonesia, Myanmar, Philippines, Thailand, and Vietnam. All texts in English translation. [3] (HCA)

ASIA1480 - Discover Korea**Course Description**

Economic transformation and rise of Korean popular culture. South Korea and US security. Korean language education via cultural and business excursions. Offered on a graded basis only. Maymester in Seoul. [3] (INT)

ASIA1520 - Navigating Japan**Course Description**

Japan's vibrant culture, society, and language. Aspects of Japanese culture, expectations, history, business etiquette and social protocols. Japan as destination for global travelers. Essential survival language skills. This course is restricted to students with little to no previous experience in Japanese language and who have not taken JAPN 1102 or above. [3] (INT)

ASIA1680 - Inside China**Course Description**

First-hand experience of China's dynamic society and expanding economy. Guided exploration of famous historical sites and contemporary institutions such as hospitals, businesses, factories, and art galleries in Beijing and Shanghai. Interviews with individuals from many different walks of life, including physicians, entrepreneurs, migrant workers, and college students. No knowledge of Chinese is required. Offered on a graded basis only. [3] (INT) (CORE C)

ASIA1682 - Chinese Culture through Tai Chi & Qi Gong**Course Description**

Chinese culture through physical and spiritual practice of Tai Chi (Yang Style short form) and (Ba Duan Jin) Qi Gong. Concepts of traditional Chinese culture, such as the "unity of man and nature," and the complementary forces of yin and yang. [1] (No AXLE credit)

ASIA1688 - Exploring Chinese Calligraphy in China**Course Description**

Practice of Chinese calligraphy in different scripts, aesthetic principles of appreciating calligraphy, development of the Chinese writing system, master calligraphers and their masterpieces, relation between calligraphy and other art forms of China, exploration of Chinese calligraphy in museums and historical sites. Maymester in China, taught in English. Offered on a graded basis only. [3] (HCA)

ASIA1720 - Encountering China: Its Culture and Language**Course Description**

China's society and culture through interactive lectures, discussions, and cultural activities; basic daily-life communication skills. This course is restricted to students with little to no previous experience in Chinese language and who have not taken CHIN 1102 or above. Offered on a graded basis only. [3] (INT)

ASIA1780 - Health and Well-Being at the Margins of Indian Society**Course Description**

Maymester in India. Holistic medicine. Marginalized communities. Treatments and social services. NGO work. [3] (INT)

ASIA1781 - Sacred Space in India**Course Description**

Observation of sacred landscapes and architecture in India; examination of religious diversity, communal harmonies and tensions, expressed through the syncretic structures and the demarcation of territory. [3] (INT)

ASIA1782 - Balinese Religion and Culture**Course Description**

Hindu traditions applied in domains of ordinary life, including festivals, wellness, environmental practices, and engagement with other religious communities. Language lessons in survival Bahasa Indonesian. Maymester abroad in Bali. [3] (INT)

ASIA1881W - The Body in Modern Japanese Culture**Course Description**

1890s to present. Cultural and social meanings of the body in Japanese history. Fiction and film. Gender, sexuality, illness, the senses, war, and violence. [3] (INT)

ASIA2100W - Fashioning the Self: Coming of Age and Asian Modernities**Course Description**

The coming-of-age novel (Bildungsroman) as a literary form in twentieth-century Asia. Travails of modernity and colonialism; the effects of crossing national, racial, and cultural boundaries; the experiences of traveling to urban centers, foreign countries, and ancestral lands. Texts from China, Indonesia, Japan, Philippines, and Vietnam. Taught in English. [3] (INT)

ASIA2206 - War and the Environment in Southeast Asia**Course Description**

Southeast Asia's economic rise in the 21st century in relationship to the region's past wars and environmental damage. Imperialism, rubber plantations, waste, trauma, postwar aesthetics, war technology. Course materials in English. [3] (HCA) (CORE C, E) (LE HFA)

ASIA2210W - Hollywood Hanoi**Course Description**

Cultural narratives of the Vietnam War, including novels and films. War and representation. International, minority, and antiwar perspectives on the violence and aftermath. Muhammad Ali, Werner Herzog, Jean Genet, Graham Greene, and Dinh Linh. All texts in English translation. Not open to students who have earned credit for ASIA 1111 Section 04 without permission. Total credit for this course and ASIA 1111 Section 04 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (INT)

ASIA2214W - Food of SE Asia and the Diaspora**Course Description**

Pad Thai, pho, Sriracha, Spam. History and complexities of Southeast Asia through food, ingredients, and history of spices. Identity, migration, authenticity, appropriation, colonialism, and globalization. Food as historical process, politics, and environmental transformation. Course materials in English. [3] (INT) (CORE C) (LE HFA)

ASIA2220 - Violence and Media in Southeast Asia**Course Description**

Cold War era to contemporary. State dictatorships and police repression. The Cambodian Genocide; Indonesian mass killings; the aerial blitzkriegs of Vietnam, Laos and Cambodia; state and authoritarian violence in Thailand, Malaysia, and the Philippines. Representations of violence in the media. [3] (INT) (CORE C) (LE HFA)

ASIA2230 - Sound, Performance, and the Asian City**Course Description**

Listening for the sonic landscape of Asian cities from the early 20th century to the present. Urbanization, translocal popular musics, noise, music as protest, sound technologies, tourism. Historical and ethnographic perspectives on music, place, and identity. Offered on a graded basis only. [3] (INT)

ASIA2301 - Science and Society in South Asia**Course Description**

History of science in South Asia from the premodern through the postcolonial. Classical Sanskrit, Arabic and Persian scholarly traditions. Science in a global context. Early modern scientific connections. The place of science in empire and the new roles of science in the postcolonial nation state. [3] (INT)

ASIA2302 - Popular Culture of South Asia**Course Description**

Film, sport, music, clothing, and other contemporary popular culture artifacts. [3] (INT) (CORE C) (LE HFA)

ASIA2303 - Classical South Asia in the Modern World**Course Description**

Transmission, reception, and interpretation of classical South Asian cultural artifacts, such as yoga, meditation, kama sutra, ayurveda, and religious stories. Critical reflections on authenticity, adaptation, medium, and audience. [3] (HCA)

ASIA2304 - The Bhagavad Gita**Course Description**

Classical Sanskrit text (in translation), historical and literary context, reception and translation. Critical concepts in South Asian religious history and methods in approaching complex primary sources. [3] (HCA).

ASIA2305 - Indigenous Futures: Environment, Art, and Activism**Course Description**

Political and environmental struggles; relationship with the modern nation-state; colonial projects and Indigenous resistance in Asia; definitions and theoretical discussions on indigeneity and decolonization; comparative discussion with North America, Arctic, Amazonia, and Australia/New Zealand; Indigenous visions and desires for the future. [3] (INT)

ASIA2306 - Environmental Justice in Asia**Course Description**

Interdisciplinary view of environmental justice issues across Asia. How colonialism and imperialism shape contemporary environmental and societal inequities; climate change adaptation policies and institutions and their Asian critiques; climate justice and its intersections with race, caste, indigeneity, gender, and class. [3] (INT) (CORE B, E) (LE HFA)

ASIA2307 - Transnational South Asia**Course Description**

Transnational processes in contemporary South Asian identity. Anti-caste and Indigenous/Tribal social movements in India; Indian Ocean histories; South Asian diasporic practices in the US; comparative histories of race and caste; contemporary nationalism and religious identity. [3] (INT) (CORE C, E) (LE HFA)

ASIA2308 - Narratives of Disaster and Apocalypse**Course Description**

Disaster and apocalyptic scenarios in popular culture as revelations of political and cultural anxieties. Role of humanity in producing ecological crisis in the Anthropocene. Not open to students who completed 3333-01 offered spring 2021. [3] (HCA)

ASIA2309W - Mountains to the Sea: Perspectives on Society, Politics, and the Environment**Course Description**

How physical environments shape politics, religion, economy, cultural practices and infrastructure. Climate, soils, natural hazards, transportation, water, food, and mineral resources. Contestation over climate change and pollution. [3] (INT)

ASIA2411 - Cultural History of Korea**Course Description**

Korean culture from antiquity to the present through diverse media. Origins of Korean traditions, popular beliefs, and systems of thought. Korea's transformation through encounters with the West, struggle under Japanese colonial rule, and the Korean War. Contemporary economic development, democracy movement, relations with North Korea and the United States, and sociocultural diversification in the age of globalization. [3] (INT) (CORE C) (LE HFA)

ASIA2412 - Global Korean Cinema**Course Description**

From the colonial period to the Korean Wave in the new millennium. Film criticism, transnational and national contexts of film production, aesthetics of auteurs and genres, and local and global receptions of Korean cinema. [3] (INT) (CORE C) (LE HFA)

ASIA2413 - History of Modern Korea**Course Description**

Early twentieth century to present. Critical approaches and debates. Colonial experience and national building. Wars and migration; crisis and everyday life on the Korean Peninsula. Neoliberal globalization and its critiques, and efforts for reconciliation and peace in the Asia-Pacific region. [3] (INT)

ASIA2414 - Food and Family in Korean Pop Culture**Course Description**

Food as embodiment of individual, family, and collective identities in Korea and the Korean diaspora. Class, gender, ethnicity, and body politics through literature, film, TV dramas, webtoons, and pop music. Repeat credit for students who have earned credit for ASIA 3892-01 in Fall 2018. Not open to students who have earned credit for ASIA 3892-01 in Fall 2018 without permission. [3] (INT) (CORE C) (LE HFA)

ASIA2415W - Blood, Sweat, and Tears in Korean Literature**Course Description**

Critical overview of Korean literature through thematic lenses. Culturally informed readings of old love songs, medieval hero fantasies, modern poems, subversive novels, contemporary K-pop, and webtoons. Violence, modernity, affect, language, genres, media, diaspora, translation, and globalization. Taught in English. [3] (INT) (CORE C) (LE HFA)

ASIA2416 - The Korean War through Film and Fiction**Course Description**

America's "forgotten war" in Korea through diverse media: films made in the US, North Korea, and South Korea; novels and comics produced by war survivors and their descendants around the globe. [3] (INT)

ASIA2417 - K-Pop: A Global Industry**Course Description**

Histories of idol production and entertainment companies; global fandom and circulation across media platforms; regional and transnational flows of popular music, technology, and labor; cultural debates on coloniality, globalization, mediation, and nationalism shaping how K-Pop represents Korea to the world; constructions of "Korean popular music" within Korea. [3] (CORE: C)

ASIA2511 - Popular Culture in Modern Japan**Course Description**

Popular culture in Japan from 1900 to the present. The rise of mass culture and media, song, sports, food, fashion, and popular film genres. [3] (INT)

ASIA2512 - Explorations of Japanese Animation**Course Description**

Historical contexts, production techniques, visual style, narrative forms, and interpretive analyses of feature-length Japanese animated films by auteur directors from the 1980s to the present, featuring Hayao Miyazaki and three others on a rotating basis from among Satoshi Kon, Mamoru Oshii, Mamoru Hosoda, Makoto Shinkai, Hideaki Anno, and Isao Takahata. [3] (INT)

ASIA2513W - Media Monsters in Contemporary Japan**Course Description**

The supernatural and the monstrous as represented in the context of mass media and consumerism in contemporary Japan. Live-action J-horror films, popular fiction, Manga, animated films, and television series. [3] (HCA)

ASIA2514W - Contemporary Japan through Film and Fiction**Course Description**

Japanese social and cultural issues in literature and film since the 1980s: impact of post-bubble economy on family life; socio-economic marginality; gender inequality; generational conflict; aging; natural and human-made disasters. [3] (HCA) (CORE C) (LE HFA)

ASIA2560 - Current Japan-U.S. Relations**Course Description**

Similarities and differences in theory and practice in the United States and Japan on public policy issues such as trade, defense, environment, education, medical care, and racial prejudice. [3] (INT)

ASIA2605 - Romancing the Nation in Modern Chinese Literature**Course Description**

From the fourteenth century to the present. Fiction, drama, and poetry. Family relations and nation-state in romantic writings. Knowledge of Chinese is not required. [3] (HCA)

ASIA2606 - Martial Tradition in Chinese Literature**Course Description**

From eleventh century BCE to modern period. War, banditry, revenge, cannibalism, female knight-errant. All genres of literature, supplemented by visual material, theater, and film. Knowledge of Chinese is not required. [3] (HCA)

ASIA2607 - Self and Society in Pre-modern Chinese Literature**Course Description**

From the seventeenth-century BCE to the seventeenth-century CE. Poetry, prose, fiction, and drama. Self, society, religion, gender, and print culture. Offered on a graded basis only. Serves as repeat credit for ASIA 3891 section 01 in Fall 2015. Knowledge of Chinese is not required. [3] (HCA)

ASIA2608 - Chinese Drama: 13th to 20th Centuries**Course Description**

Traditional and modern Chinese drama. Text, image, and performance. Gender, religious thinking, commerce, and censorship. Offered on a graded basis only. Knowledge of Chinese not required. [3] (HCA)

ASIA2609W - Writing and Gender in Traditional China**Course Description**

Pre-modern China: 1st century CE to 20th century CE. Women writers, women in family and society, gender relations, cross-dressing, and foot-binding. Poetry, prose, drama, fiction, and visual materials. Offered on a graded basis only. [3] (HCA)

ASIA2610 - Overseas Encounters: Reading the World through Students Abroad**Course Description**

History of studying overseas and international students with focus on US and Asia. Literary materials from Asian and other traditions. Difficulties encountered in global context. National identities, religions, languages, home, loneliness, romantic relations. Studying and living in a foreign country. Identifying struggles and coping strategies. Serves as repeat credit for ASIA 3333, section 02 in Spring 2021. [3] (INT)

ASIA2612 - Sound and Media in Global China**Course Description**

Sonic expressions in Chinese and Chinese diasporic culture. Late 19th century to present. Cinema, digital media, popular music, and literature. Intersections with gender, identity, and technology. History of sound-based artworks. Media technology developments. [3] (HCA)

ASIA2620 - Chinese Culture Through Calligraphy**Course Description**

Techniques of writing Chinese scripts using brush pen; aesthetic principles of appreciation; history and development of Chinese characters; master calligraphers and their masterpieces; relation between calligraphy and other art forms of China. [3] (HCA)

ASIA2630 - Traditional Chinese Medicine: Theories and Practices**Course Description**

Historical encounters and divergences between medicine in China and in the West. Chinese medical classics, including the Inner Canon of the Yellow Emperor and early herbal manuals. The creation of Traditional Chinese Medicine in the People's Republic of China and the emergence of Chinese medicine as alternative medicine in the U.S. Serves as repeat credit for HIST 2112. [3] (P) (CORE B, C) (LE HFA)

ASIA2640 - Understanding Chinese: A Linguistic Introduction**Course Description**

Basic concepts of linguistics, analyses of Chinese at different linguistic levels, sound system, word formation, sentence structures, uses in contexts. Taught in English. Knowledge of Chinese is preferred, but not required. [3] (HCA)

ASIA2650 - Translating Sunzi (Sun Tzu) The Art of War**Course Description**

Commentaries on Sunzi and related Chinese military texts from Classical and Literary Chinese into English. Advanced study of Classical and Literary Chinese. Advanced study of military thought. Prerequisite: CHIN 4405. [3] (INT)

ASIA2710 - Embodied Harmony and Balance: Tai Chi, Ikebana, and Cultural Connections**Course Description**

Tai Chi and Ikebana traditions. Designed for all disciplines. Physical, spiritual, and artistic practices in Chinese and Japanese cultures. Nuanced understanding of harmony across diverse cultures. [3] (INT)

ASIA3151 - The Third World and Literature**Course Description**

The history of cultural and political concepts of the Third World from 1955 to the present. Contemporary literary and cultural debates regarding models of transnationalism and processes of globalization. National literatures and cultures foundational to the Third World model. The relationship between the genre of the novel and the formation of national communities. [3] (INT)

ASIA3155 - Blackness and the Asian Century**Course Description**

The solidarity movement between Africa and Asia from the turn of twentieth century into the current "Asian Century." Ongoing relevance of the color-line concept; racialized logics, processes of globalization, and the international division of labor. [3] (INT)

ASIA3210W - The Philippines and the World**Course Description**

Transnational history. Nation-state formation, empire, religion, gender, authoritarianism, labor and migration, the environment, and globalization. History of the Philippines and its diasporas as entry point for broader global histories. Offered on a graded basis only. [3] (INT)

ASIA3211 - Gambling in Asia and its Diasporas**Course Description**

Study of the rise of casino capitalism within Asia and its diasporas. Discussion of gambling labor, casinos and national sovereignty, and speculative economies. Exploration of the connection between risk, labor, migration, capitalism, race, and gender. Offered on a graded basis only. [3] (INT)

ASIA3333 - Special Offerings**Course Description**

Topics vary. [3]

ASIA3363 - Field Investigations**Course Description**

Site specific practicum in Asian Studies. Content varies according to location and disciplinary focus. May be repeated for credit more than once if there is no duplication in topic. Course requires travel to investigation site. [3] (INT)

ASIA3630 - Traditional Chinese Medicine: Encounters with Science**Course Description**

Competition and dialogue between Chinese and Western medicine. Historical debates about anatomy and the reality of the body. Efforts to "scientize" Chinese medicine. Current integration of Chinese and biomedical practice in the US, use of biomedical standards to evaluate Chinese medicine's efficacy, critical evaluation of current scientific literature. Prerequisite: 2630. Serves as repeat credit for HIST 3113. [3] (P)

ASIA3633 - Self-Cultivation in Ancient China**Course Description**

300 BCE to 500 CE. Methods, goals, and contexts of self-cultivation in antiquity. Breathing exercises, meditation, visualization, sexual arts, sacrifice, alchemy, and other practices in their religious, cultural, and social contexts. [3] (INT)

ASIA3851 - Independent Study**Course Description**

Designed primarily for majors who want to study Asian topics not regularly offered in the curriculum. Must have consent of instructor. May be repeated for credit more than once, but students may earn only up to 3 credits per semester of enrollment. [1-3] (No AXLE credit)

ASIA3852 - Independent Study**Course Description**

Designed primarily for majors who want to study Asian topics not regularly offered in the curriculum. Must have consent of instructor. May be repeated for credit more than once, but students may earn only up to 3 credits per semester of enrollment. [1-3] (No AXLE credit)

ASIA3880 - Internship Training**Course Description**

Under faculty supervision, students from any discipline can gain experience in a broad range of public and private agencies, institutions, and programs in projects related to Asian Studies. Must be taken on a pass/fail basis and in conjunction with 3883, Internship Research. Corequisite: 3883. [1-6] (No AXLE credit)

ASIA3883 - Internship Research**Course Description**

Under faculty supervision, students gain experience in any of a variety of settings, such as community, municipal, or government agencies. Must be taken on a graded basis and concurrently with 3880. Corequisite: 3880. [1-6] (No AXLE credit)

ASIA3891 - Special Topics**Course Description**

Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3] (No AXLE credit)

ASIA3892 - Special Topics**Course Description**

Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3] (No AXLE credit)

ASIA3980 - Junior Honors Readings**Course Description**

May be repeated for credit more than once. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

ASIA4998 - Honors Research**Course Description**

Research conducted in consultation with a member of the faculty or affiliated faculty of the program. Open only to senior honors majors. [3] (No AXLE credit)

ASIA4999 - Honors Research**Course Description**

Research conducted in consultation with a member of the faculty or affiliated faculty of the program. Open only to senior honors majors. Prerequisite: 4998. [1-3] (No AXLE credit)

Asian-American Studies

ASAM1111 - First Year Writing Seminar**Course Description**

Topic varies by section. [3]

ASAM2101 - Asian American History until 1924**Course Description**

The Manila Galleon Trade until the Johnson-Reed Act of 1924. Labor, race, and gender at the root of Asian American history. Settler colonialism, labor migration, and Asian exclusion. Offered on a graded basis only. [3] (US) (CORE C) (LE HFA)

ASAM2102 - Asian American History: From 1924 to the Present**Course Description**

The Johnson-Reed Act of 1924 until the present day. Labor, empire, and migration in Asian America. Japanese incarceration, social movements in the 1960s, the model minority myth, and Asian Americans in popular culture today. Offered on a graded basis only. [3] (US) (CORE C) (LE HFA)

ASAM2103 - Sports and Asian America**Course Description**

Asian American history through the lens of sports. Examination of how race, class, gender, sexuality, and nation inform historical and contemporary experiences. Study of sporting participation, spectatorship, and how everyday practices inform us about broader social realities. Offered on a graded basis only. Serves as repeat credit for ASAM 1111, section 01 in Spring 2024 and Fall 2024. [3] (US)

ASAM2104 - Cold War Asian America**Course Description**

How the Cold War (1945-1989) helped shape Asian America. Transnational approach to the history of U.S. intervention in Asia in conjunction with Asian American experiences and popular culture of the period. Offered on a graded basis only. [3] (US) (CORE C, E) (LE HFA)

ASAM2106 - Sociology of Asian America**Course Description**

Sociological and interdisciplinary study of Asian Americans and social, cultural, and political meanings of "Asian America." Emphasis on race, ethnicity, gender, and class. Serves as repeat credit for ASIA 3891, section 03 and SOC 4961, section 01 in Fall 2021. [3] (HCA)

ASAM2107 - Social Movements in Asia and Asian America**Course Description**

Asian and Asian American social movements in transnational, comparative-historical, and intersectional contexts. [3] (HCA) (CORE B, E) (LE: HFA)

ASAM3101 - Southeast Asian Americans**Course Description**

Southeast Asians in the United States, ranging from pensionados in the early 20th century to refugees after U.S. wars in Southeast Asia. U.S. empire in Southeast Asia, the complexities of historical memory, and Southeast Asian American cultural production. Offered on a graded basis only. [3] (US)

ASAM3103W - Southeast Asia and the World**Course Description**

Southeast Asia in global context; local and diasporic histories of labor, migration, empire, and gender. Offered on a graded basis only. [3] (INT)

ASAM3104W - Dictatorship and Dissent in Transnational Asia**Course Description**

Histories of anti-authoritarian protest in Asia. Local and transnational mobilizations. Offered on a graded basis only. [3] (HCA)

ASAM3105 - Migration and Labor in Asian America**Course Description**

Asian American migration and labor throughout the 19th and 20th century United States. Race, gender, and empire as basis for understanding work and mobility. Labor organizing, immigration discourse, and the history, present, and future of work. Offered on a graded basis only. [3] (US)

ASAM3106 - Race and the Environment in Asian America and the Pacific**Course Description**

Interdisciplinary study of environmental inequality with focus on Asian Americans, Native Hawaiians, and Pacific Islanders. Transnational, comparative-historical, and intersectional contexts. [3] (HCA)

ASAM3107 - Science, Technology, and the Body in Global Asia**Course Description**

Social, cultural, and political dimensions of science, technology, and the body. [3] (HCA)

Astronomy

ASTR1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

ASTR1010 - IntroAstronomy: Stars and Galaxies (with Lab)**Course Description**

Observed and physical properties of stars. Supernovae, neutron stars, and black holes. Our Milky Way galaxy and other galaxies. Cosmology, dark matter, dark energy, and the Big Bang. Serves as repeat credit for ASTR 1015. Corequisite: 1010L or 1020L. [3] (MNS) (LE MNS)

ASTR1010L - Introductory Nighttime Astronomy Laboratory**Course Description**

Motion of the celestial sphere and apparent and real motions of celestial bodies as viewed from inside the Milky Way. Observations of meteor showers, comets, and artificial satellites. Telescopic observations of astronomical objects. Stellar spectra. Laboratory ordinarily accompanied by 1010 or 3000. Satisfies the AXLE lab course requirement when completed with 1010 or 3000. Satisfies College Core Inquiry Lab when completed with 1010. [1] (No AXLE credit) (CORE: LB)

ASTR1015 - Introductory Astronomy: Stars and Galaxies (Lecture Only)**Course Description**

Observed and physical properties of stars. Supernovae, neutron stars, and black holes. Our Milky Way galaxy and other galaxies. Cosmology, dark matter, dark energy, and the Big Bang. Serves as repeat credit for ASTR 1010. [3] (MNS) (CORE B) (LE MNS)

ASTR1020L - Introductory Daytime Astronomy Laboratory**Course Description**

Phases of the Moon, colors of stars, shapes and motions of galaxies, properties of exoplanets, and ages of star clusters. Telescopic observations of the Sun. Laboratory ordinarily accompanied by 1010 or 3000. Satisfies the AXLE lab course requirement when completed with 1010 or 3000. Satisfies College Core Inquiry Lab when completed with 1010. Serves as repeat credit for ASTR 1010L. [1] (No AXLE credit) (CORE: LB)

ASTR1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)]

ASTR1210 - Introduction to Observational Astronomy**Course Description**

Telescopic and naked eye observations. Light, optics, telescopes, and CCD cameras. Motions of the sky. Kepler's laws. Phases and topography of the Moon. Distances, temperatures, and brightnesses of stars. Star clusters. Dark matter. Taught entirely at Dyer Observatory using 24-inch telescope. Satisfies the AXLE lab course requirement. Not open to students who have earned credit for ASTR 1010, 1010L, or 1020L, without permission. Total credit for this course and ASTR 1010, 1010L, or 1020L, will not exceed 4 hours. Credit reduced from second course taken (or test or transfer credit) as appropriate. [4] (MNS)

ASTR2110 - The Solar System**Course Description**

The sky, orbits, and gravity. Ancient astronomy. Seasons, the calendar, phases and motions of the moon, tides, and eclipses. Terrestrial planets, giant planets and their moons and rings, asteroids, comets, meteorites, and the sun. Habitable zones for planets and moons, extremophiles, and the possibility of life on other worlds. [3] (MNS) (CORE B, D) (LE MNS)

ASTR2130 - The Trial of Galileo and its Background

Course Description

The interdependence of cosmological theories and religious teachings from the eighth century BCE to the end of the seventeenth century. Examines scientific works and religious texts, including those of Aristotle, Thomas Aquinas, Copernicus, Luther, Galileo, and Newton. [3] (P)

ASTR2150 - Celestial Navigation and Celestial Dynamics

Course Description

Sources of motion of Earth, including orbital motion, rotation, precession, and nutation. Planetary transits and eclipses. Apparent and real motions of stars. Celestial coordinate systems. Sextant observations and celestial navigation. Serves as repeat credit for ASTR 3890 in Summer 2017. [3] (MNS)

ASTR2190 - Black Holes in Our Universe

Course Description

Introductory astrophysics course on black holes. Topics will include (i) Historical Developments; (ii) Astrophysical Origins; (iii) Gravitational-wave Discoveries. Offered on a graded basis only. Serves as repeat credit for students who earned credit for ASTR-3890-01 offered Spring 2023. Prerequisite: ASTR 1010. [3] (MNS) (CORE B) (LE MNS)

ASTR3000 - Principles of Astrophysics

Course Description

Tools and methods of astrophysics, including light and telescopes. Cosmology, the Big Bang, and the origin and evolution of matter. Galaxies, star formation, and the physics of stars, including nucleosynthesis and stellar death. Techniques for discovering and measuring properties of exoplanets. Prerequisite: either PHYS 1501, 1601, or 1911; and either MATH 1100, 1200, or 1300. [3] (MNS)

ASTR3300 - Extrasolar Planets

Course Description

Modern knowledge of Extrasolar planets (exoplanets), discovery methods, benchmark exoplanets and exoplanetary systems. Characterization of exoplanet demographics, composition and atmospheres. Exoplanet science as driven by a revolution in the obtainable precision of traditional astronomical measurements, which have in turn been enabled by new technologies and algorithms. Exoplanets with potential for liquid surface water in our Galaxy. [3] (MNS)

ASTR3600 - Stellar Astrophysics

Course Description

Physics of stellar structure and evolution, including nuclear energy generation, equations of state, and heat transfer by radiation and convection. Numerical stellar models. Observational aspects of stellar astrophysics. Prerequisite: either MATH 2400, 2420, or 2610; either PHYS 2255 or 3651; 3200; and either CS 1101, 1103, or 1104. [3] (MNS)

ASTR3700 - Galactic Astrophysics

Course Description

Interstellar matter and gaseous nebulae, the structure and evolution of normal galaxies, active galactic nuclei and quasars, and observational cosmology. No credit for students who have earned credit for 8040. Prerequisite: MATH 2400, 2420, or 2610; and either PHYS 2255 or 3651. Corequisite: CS 1101, 1103, or 1104. [3] (MNS)

ASTR3800 - Structure Formation in the Universe

Course Description

Observational and theoretical aspects of extragalactic astronomy. Measurements of galaxies and of the large-scale structure of the universe from galaxy surveys. Expansion history of universe; roles of dark matter and energy. Growth of density fluctuations in universe due to gravity. Cosmological N-body simulations and formation of dark matter halos. Physics of galaxy formation. Experimental probes of dark matter and energy. Prerequisite: One of PHYS 1501, 1601, or 1911; and one of PHYS 1502, 1602, or 1902; and one of MATH 2400, 2420, or 2610; and one of CS 1101, 1103, or 1104. [3] (MNS)

ASTR3850 - Undergraduate Research

Course Description

Research and scholarly investigation or directed readings in astronomy under close supervision of sponsoring faculty member. Enrollment by arrangement with sponsoring faculty member and approval of director of undergraduate studies. May be repeated for credit, for a total of no more than 10 total credit hours and for no more than 5 credit hours per semester. [1-5] (No AXLE credit)

ASTR3890 - Selected Topics

Course Description

[1-3] (No AXLE Credit)

ASTR3900 - Gravitational Astrophysics: General Relativity and Cosmology

Course Description

Introduction to Einstein's theory describing gravity as curvature of four-dimensional spacetime. Special relativity, differential geometry, tensor analysis, spacetime curvature, the Einstein Field Equations, the Schwarzschild Metric for stars and black holes, production and detection of Gravitational Waves, and the Friedmann-Robertson-Walker metric for cosmology. Prerequisite: PHYS 2275 and 2290. [3] (MNS)

ASTR3960 - Observational Methods in Astronomy

Course Description

Observational tools of the professional astronomer. Observation planning including: telescope and instrument selection, conducting observations, calculation of expected signal-to-noise ratio, data reduction, and extraction of photometric and spectroscopic measurements. Prerequisite: ASTR 3000. [3]

ASTR3970 - Astrostatistics

Course Description

Astrophysical data analysis through cutting-edge data science, statistics, and artificial intelligence techniques. Probability theory; comparison of frequentist and Bayesian inference. Strategies for data exploration, visualization, density estimation, and classification. Standard approaches to regression, parameter estimation, and model selection (e.g. with Markov chain Monte Carlo). Time-series analysis and deep-learning techniques. Python, Jupyter notebooks, Github, and version control for computational workflow. Prerequisite: ASTR 3000. [3] (MNS)

ASTR3980 - Big Data in Astronomical Surveys

Course Description

Manipulation and analysis of catalog-level data from large astronomical surveys. Survey observations, cross-matching catalogs, statistical analysis, version control. Development of code and best practices. Prerequisite: ASTR 3000. [3] (MNS)

ASTR4998 - Honors Research and Senior Thesis

Course Description

Independent experimental or theoretical investigations of basic problems in astronomy and astrophysics under faculty supervision, culminating in a written thesis submitted to and an oral defense presented to a departmental faculty examination committee. Required for departmental honors in Astronomy. Enrollment by arrangement with sponsoring faculty member and approval of director of undergraduate studies. May be repeated for a total of 10 credits, but students may earn only up to 6 credits per semester of enrollment. Prerequisite: major in Physics, junior or senior standing. [1-6] (No AXLE credit)

Baroque Performance

BRQ1100 - Baroque Strings

Course Description

Individual practice focused on the art and practice of Baroque violin, viola, cello, or bass, with emphasis on tone quality, technique, rhythm, interpretation, and literature. [1-2]

Biochemistry & Chemical Biology

BCB2101 - Chemical Biology Focus

Course Description

Roles of proteins, lipids, nucleic acids, and carbohydrates in human disease. Experimental techniques. Prerequisite: CHEM 2221 and BSCI 1510. [1] (No AXLE credit)

BCB2200 - Bioanalytical Chemistry

Course Description

Methods and principles of modern analytical biochemical techniques with emphasis on separation, identification, quantification, and characterization of biological molecules. This course is not eligible for the chemistry major; it is eligible for the BCB major. Corequisite: BCB 2200L. Prerequisite or corequisite: PHYS 1501, 1601, or 1901, BSCI 2520. Prerequisite: MATH 1201 or 1301. [3] (MNS)

BCB2200L - Bioanalytical Chemistry Laboratory

Course Description

Laboratory to accompany BCB 2200. One 3.5-hour laboratory per week. Satisfies the AXLE lab course requirement when completed with BCB 2200. Corequisite: BCB 2200. [1] (No AXLE credit)

BCB3101 - Special Topics in Chemical Biology

Course Description

May be repeated for credit more than once if there is no duplication in topic. Prerequisite: CHEM 3710. [3] (MNS)

BCB3201 - Independent Laboratory Research

Course Description

Student research under the supervision of faculty associated with the Biochemistry and Chemical Biology major. Enrollment through course coordinator (after arrangement with faculty) before the end of the previous semester. Prerequisite: BSCI 1510 and CHEM 1602, consent of Biochemistry and Chemical Biology Director of Undergraduate Studies, 3.0 cumulative grade point average. May be repeated for credit more than once, but students may earn only up to 6 credits per semester of enrollment. [2-6] (No AXLE credit)

BCB3880 - Internship Training**Course Description**

Under faculty supervision, students from any discipline can gain scientific research experience in a broad range of public or private institutions or government laboratories. Credit hours are based upon actual work performed at the internship site. A minimum of 1 credit hour in background readings and research must be completed in BCB 3881 concurrently with, and regardless of, the number of hours earned in BCB 3880. A substantial research paper must be submitted at the end of the semester during which the internship is completed. These credit hours may NOT count toward the minimum credit hours required for the biochemistry & chemical biology major. Normally a 3.0 grade point average, 6 hours of prior coursework in BCB major, and prior approval of a specific plan of work by the director of undergraduate studies in Biochemistry & Chemical Biology are required. Offered on a Pass/ Fail basis only and must be taken concurrently with 3881. Corequisite: 3881. Variable credit. [1-9] (No AXLE credit)

BCB3881 - Internship Readings and Research**Course Description**

Under faculty supervision, students from any discipline can gain scientific research experience in a broad range of public or private institutions or government laboratories. Credit hours are based upon readings or research supervised by BCB faculty to lend some intellectual foundation to the internship experience. A minimum of 1 credit hour in background readings and research must be completed in BCB 3881 concurrently with, and regardless of, the number of credit hours earned in BCB 3880. A substantial research paper must be submitted at the end of the semester during which the internship is completed. These credit hours may not count toward the minimum credit hours required for the Biochemistry & Chemical Biology major. Normally a 3.0 grade point average, 6 hours of prior coursework in BCB, and prior approval of a specific plan of work by the director of undergraduate studies in Biochemistry & Chemical Biology are required. Offered on a graded basis only and must be taken concurrently with 3880. Corequisite: 3880. Variable credit. [1-6] (No AXLE credit)

BCB4320 - Advanced Chemical Biology**Course Description**

(Also listed as CPBP 8320 Foundations in Chemical Biology) Overviews and in-depth case studies on the breadth of chemical biology. Importance of chemical biology in advancing biological sciences. Offered on a graded basis only. Prerequisite: CHEM 3710 [3] (MNS)

BCB4965 - Advanced Integrated Laboratory**Course Description**

Chemical and biomolecular analysis, separation, and spectroscopy. Chemical synthesis. Experimental design, computational methods. Offered on a graded basis only. Limited to BCB senior majors. Prerequisite or Co-requisite: BSCI 2520 and CHEM 3710. [3] (MNS)

BCB4966 - Advanced Integrated Laboratory**Course Description**

Continuation of 4965. Directed research. Offered on a graded basis only. Limited to senior BCB majors. Prerequisite: 4965. [3] (MNS)

BCB4999 - Honors Research**Course Description**

Original supervised research. Consent of DUS required. Only open to BCB majors. May be repeated for credit. Prerequisite: 3201. [3-6] (No AXLE credit)

BSCI1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

BSCI1100 - Biology Today**Course Description**

Broad coverage of the biological sciences presenting evolution as the unifying concept. Particular emphasis on basic biological processes in cells and the relationships/interactions between organisms and their environment. Topics include cell structure and function, genetics and inheritance, evolution and diversity, populations, communities and ecosystems, and topics related to biology and society. Not intended for students planning to major in biological sciences. Not open to students who have earned credit for BSCI 1509, 1510 or 1511 without permission. [3] (MNS)

BSCI1100L - Biology Today Laboratory**Course Description**

Laboratory investigations of the genetics, physiology, and ecology of plants and animals. One three-hour laboratory per week to accompany 1100 or 1509. Not open to students who have earned credit for BSCI 1510L, 1511L, or 1512L without permission. Satisfies the AXLE lab course requirement when completed with 1100 or 1509. Co- or pre-requisite: 1100 or 1509. [1] (No AXLE credit)

BSCI1103 - Green Earth: The Biodiversity and Evolution of Plants**Course Description**

Evolution of biodiversity from the Cambrian period through today. Theories and challenges of its conservation. Case studies drawn from Hawaii, Madagascar and Australia. Not intended for students planning to major in biological sciences. Not open to students who have earned credit for BSCI 1509, 1510 or 1511 without permission. [3] (MNS) (CORE B, D) (LE MNS)

BSCI1103L - Green Earth Laboratory: The Biodiversity and Evolution of Land Plants**Course Description**

Laboratory to accompany BSCI 1103. Not open to students who have earned credit for 1510L, 1511L, or 1512L without permission. Prerequisite or corequisite: 1103. Satisfies the AXLE lab course requirement when completed with 1103. [1]

BSCI1105 - Human Biology**Course Description**

Recent advances in genetics, reproduction, and biotechnology. Social, legal, and ethical implications. Not intended for students majoring in Biological Sciences. Not open to students who have earned credit for BSCI 1509, 1510 or 1511 without permission. [3] (MNS) (CORE B, E) (LE MNS)

BSCI1105L - Human Biology Laboratory**Course Description**

Laboratory to accompany BSCI 1105. Satisfies the AXLE lab requirement when completed with 1105. Not intended for students majoring in Biological Sciences. Not open to students who have earned credit for BSCI 1510L, 1511L or 1512L without permission. Prerequisite or corequisite: BSCI 1105. [1] (No AXLE credit)

BSCI1110 - Introduction to Microbiology**Course Description**

Structure, metabolism, genetics, and ecology of microorganisms. Emphasis will be on the impacts microorganisms have on human health and society. Not intended for students majoring in Biological Sciences. Not open to students who have earned credit for BSCI 2150 (prior to 2025 Fall) or BSCI 2250 (2025 Fall forward). [3] (MNS)(CORE B, D) (LE MNS)

BSCI1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

BSCI1400 - Science Education Pedagogy Seminar**Course Description**

This pedagogy seminar accompanies a core course in the College of Arts & Sciences and examines the process of teaching and learning of that course content. Students enrolled in the core course lecture may elect to participate in this accompanying pedagogy seminar. This optional seminar will be team-taught by the core course instructor and an education faculty member. [2]

BSCI1509 - Biological Systems**Course Description**

Central concepts in biology (information flow, evolution, structure and function, homeostasis, emergent properties) contextualized in biological systems at a variety of scales. Development of skills in data visualization and interpretation, experimental design, scientific reasoning, and communication. Prerequisite or corequisite: CHEM 1601. [3] (MNS)

BSCI1510 - Molecules and Cells**Course Description**

Macromolecular structure and function. Cell structure, reproduction, metabolism, and energy production. Genomes, replication, gene structure, RNA, and protein synthesis. For students intending further study in the life sciences or for science and engineering students. Prerequisite or corequisite: CHEM 1601. Prerequisite: BSCI 1509 (BSCI 1509 waived for students in the School of Engineering). [3] (MNS)

BSCI1510L - Biological Sciences Laboratory**Course Description**

Laboratory to accompany 1510. One three-hour laboratory per week. Satisfies the AXLE lab course requirement when completed with 1510. Prerequisite or corequisite: 1510. [1] (No AXLE credit)

BSCI1511 - Organisms and Ecosystems**Course Description**

An integrative approach to the science of life for science and engineering students. Cell communication. Physiology, organ function and development. Mendelian and population genetics. Evolution, ecology, and speciation. Populations, ecosystems, and conservation biology. Prerequisites: BSCI 1509 (BSCI 1509 waived for students in the School of Engineering) and CHEM 1601. [3] (MNS)

BSCI1511L - Biological Sciences Laboratory**Course Description**

Laboratory to accompany 1511. One three-hour laboratory per week. Satisfies the AXLE lab course requirement when completed with 1511. Prerequisite or corequisite: 1511. [1] (No AXLE credit)

BSCI1512L - Biological Sciences Laboratory**Course Description**

Alternative to 1511L. Directed research projects with emphasis on experimental design and analysis. Satisfies the AXLE lab course requirement when completed with 1511. Offered on a graded basis only. Prerequisite or corequisite: 1511. [2] (No AXLE credit)

BSCI2101 - Human Anatomy and Physiology I**Course Description**

(Previously listed as MHS 3101, NURS 3101) Structure and function of the human organism. Integration of the gross anatomical structures and organ systems with microscopic structure, physiological function, and homeostatic mechanisms. Clinical relevance of selected topics. Not open to students who have completed NURS 3101 or MHS 3101. Prerequisite: 1511. [4] (MNS)

BSCI2105 - Evolution**Course Description**

(Formerly offered as 2205) Evolutionary theory, with emphasis on evolutionary mechanisms. Microevolutionary processes of adaptation and speciation and macro-evolutionary patterns. Evidence from genetics, ecology, molecular biology, and paleontology in the historical context of the neo-Darwinian synthesis. Prerequisites: BSCI 1510 and 1511. [3] (MNS)

BSCI2118 - Introduction to Plant Biology**Course Description**

(Formerly offered as 2218) Diversity of plants within the framework of their evolution and environmental adaptations. Biomes from the tropical rain forest to the Vanderbilt arboretum. Prerequisites: BSCI 1510 and 1511. [3] (MNS)

BSCI2118L - Plant Biology Lab**Course Description**

(Formerly offered as 2218L) Laboratory to accompany 2118. One three-hour laboratory per week. Pre- or co-requisite: BSCI 2118 or 2218. [1]

BSCI2119 - Introduction to Zoology**Course Description**

(Formerly offered as 2219) A structural and functional study of the major animal groups. The problems presented to animals by their environments, and the anatomical and physiological mechanisms by which they adapt. Three lectures and one laboratory period per week. Prerequisites: BSCI 1510 and 1511. [4] (MNS)

BSCI2138 - Ecology**Course Description**

(Formerly offered as 2238) Population biology, evolutionary ecology, community structure, with emphasis on species interactions, including competition, predation, and symbiosis. Prerequisites: BSCI 1510 and 1511. [3] (MNS)

BSCI2138L - Ecology Lab**Course Description**

(Formerly offered as 2238L) One three-hour laboratory and discussion period or field trip per week. Satisfies the AXLE lab course requirement when completed with 2138 or 2238. Prerequisite or corequisite: 2138 or 2238. [1] (No AXLE credit)

BSCI2201 - Introduction to Cell Biology**Course Description**

Structure and function of cells, subcellular organelles, and macromolecules. Fundamentals of organelle function, membrane transport, energy production and utilization, cell motility, cell division, intracellular transport and mechanisms of signal transduction. Prerequisites: 1510 and 1511. [3] (MNS)

BSCI2201L - Cell Biology Laboratory**Course Description**

One three-hour laboratory and discussion period per week. Satisfies the AXLE lab course requirement when completed with 2201. Prerequisite or corequisite: 2201. [1] (No AXLE credit)

BSCI2210 - Principles of Genetics**Course Description**

Basic principles and mechanisms of inheritance discussed and related to other biological phenomena and problems. Prerequisites: BSCI 1510 and 1511. [3] (MNS)

BSCI2210L - Genetics Laboratory**Course Description**

One three-hour laboratory and discussion period per week. Satisfies the AXLE lab course requirement when completed with 2210. Prerequisite or corequisite: 2210. [1] (No AXLE credit)

BSCI2250 - General Microbiology**Course Description**

(Formerly offered as 2150) Genetics, cell biology, physiology, and diversity of microorganisms; their role in research and impact on human health and the environment. Prerequisites: 1510 and 1511. No credit for students who have earned credit for BSCI 3234 or 2150. [3] (MNS)

BSCI2250L - General Microbiology Lab**Course Description**

(Formerly offered as 2150L) Laboratory to accompany Introduction to Microbiology (1110) or General Microbiology (2250). Two laboratory sessions per week. Satisfies the AXLE lab course requirement when completed with 1110 or 2250 or 2150. Prerequisite or corequisite: BSCI 1110 or 2250 or 2150 or 3234. [1]

BSCI2520 - Biochemistry**Course Description**

Structures and mechanisms of action of biological molecules, proteins, nucleic acids, lipids, and polysaccharides. Enzymology. Carbohydrate metabolism. Prerequisites: Either BSCI 1510 or CHBE 2150; and either CHEM 2211 or 2221. [3] (MNS)

BSCI3228 - Biodiversity: Great Barrier Reef and Rainforests of Australia

Course Description

May session; two weeks on campus followed by two weeks in Australia. Origins, threats to, and conservation of, populations and species. [3] (MNS)

BSCI3229 - Instruction in Scientific Rigor and Reproducibility

Course Description

Fundamentals of proficient research: methodical experimental design, analytical assessment of literature, proper interpretation of data, model development, use of 'MATLAB' for analysis. Covers implicit bias, scientific transparency, data and material sharing, sample blinding, randomization, criteria for sample exclusion, plagiarism, conflicts of interest, and statistical methods. Prerequisites: BSCI 1510 and 1511. [3] (MNS)

BSCI3230 - Biological Clocks

Course Description

Study of innate mechanisms for measurement of time in living organisms. Emphasis on the functional significance and physiological basis of biological clocks in animals and humans. Topics include circadian rhythms, time-compensated celestial navigation, photoperiodism, and the role of biological clocks in human behavior. Prerequisites: 1510 and 1511. [3] (MNS)

BSCI3231 - Paleobiology

Course Description

Macroevolutionary processes as observed through the fossil record. Inference of evolutionary relationships, physiology, reproduction, behavior, and ecology. Fundamentals of paleobiology, paleoecology, paleoclimates, macroecology, biogeography, geology, geochemistry, anthropology, and conservation paleobiology. Effects of climate change and human impacts, in deep-time. Prerequisites: 1510 and 1511. [3] (MNS)

BSCI3232 - Biodiversity, Climate Change and Our Health

Course Description

Impacts of climate change on biological and ecological systems from the Paleozoic era to today. Inter-play of earth's systems, climate, and biological innovations. Effects on our natural resources, and consequences for our health. Prerequisites: 1510 and 1511. [3] (MNS)

BSCI3233 - Conservation Biology

Course Description

Ecological, evolutionary, social, and economic aspects of biodiversity loss and ecosystem disruption due to human activities. Climate change, habitat fragmentation, species overexploitation, and invasive species. Sustainable development, habitat restoration, and species reintroduction. Prerequisites: 1510 and 1511. [3] (MNS)

BSCI3236 - Parasitology

Course Description

Biology and epidemiology of eukaryotic parasites of medical and veterinary significance. Diagnosis, treatment, and control of parasitic protists, platyhelminthes, nematodes, and arthropods. Impact on global health. Prerequisites: 1510 and 1511. [3] (MNS)

BSCI3240 - Molecular Evolution and Disease

Course Description

Molecular evolution of adaptation and disease. Molecular mechanisms of human disease approached through analysis of evolutionary adaptation in extremophile animals. Comparative analysis of multiple protein systems that facilitate adaptation in some species but are implicated in human conditions such as cancer, visual impairment, and aging. Serves as repeat credit for BSCI 3890 section 02 in Spring 2024. No credit for students who have earned credit for BSCI 5240. Prerequisite: BSCI 1510 and 1511. [3] (MNS)

BSCI3242 - Evolutionary Medicine

Course Description

Application of evolutionary principles to biomedical issues to understand and improve human health. Aging, antibiotic resistance, defenses, cardiovascular disease, and cancer. Interdisciplinary evidence from anthropology, genetics, ecology, immunology, and molecular biology. Prerequisite: 1510 or 1511. Serves as repeat credit for BSCI 3965, section 03 in Fall 2023 and BSCI 3965, section 02 in Fall 2024. [3] (MNS)

BSCI3245 - Biology of Cancer

Course Description

Application of cell biology, molecular biology, and genetics to the study of cancer. Tumorigenesis; cellular oncogenes; growth factor signaling; tumor suppressor genes; apoptosis; metastasis and invasion. Prerequisites: 1510 and 1511. [3] (MNS)

BSCI3252 - Cellular Neurobiology

Course Description

Structure and function of nerve cells. Emphasis on electrical excitability, synaptic transmission, and sensory transduction. Cellular mechanisms underlying simple behaviors, sensory information processing, and learning and memory. Prerequisites: 1510 and 1511. [3] (MNS)

BSCI3254 - Neurobiology of Behavior

Course Description

Nerve cell interactions in neuronal networks of the central nervous system of animals and their impact for regulating behavior. Sensory systems, sensory-motor integration, central processing of information, neuronal-hormonal interactions; and brain anatomy and organization in invertebrates and vertebrates. Prerequisite: BSCI 1511 or NSC 2201. [3] (MNS)

BSCI3256 - Molecules of the Brain

Course Description

Molecules of neural wiring, involving cell identity, pathfinding, synaptogenesis. Molecules of nerve cell communication, with relationship to drugs of addiction and abuse. Molecules of nervous system plasticity, and the mechanistic bases of learning and memory. Relation of these mechanisms to causes of human neurological diseases. Prerequisites: 1510 and 1511. [3] (MNS)

BSCI3260 - Vertebrate Biology

Course Description

Comprehensive overview of the vertebrates. Morphology, physiology and behaviors; adaptations to specific environments, and the ecology, distribution and conservation of select groups. Key transformations leading to vertebrate diversity. Evolutionary history and relationships. Prerequisite: BSCI 1510 and 1511. [3] (MNS)

BSCI3270 - Statistical Methods in Biology

Course Description

An introduction to statistical methods used in the analysis of biological experiments, including the application of computer software packages. Emphasis on testing of hypotheses and experimental design. Topics include descriptive statistics, analysis of variance, regression, correlation, contingency analysis, and the testing of methods for sampling natural populations. Prerequisites: 1510 and 1511. [3] (MNS)

BSCI3271 - Programming for Biologists

Course Description

Hands-on analysis of rich biological datasets using MATLAB. Development of programming skills applied to diverse research and analysis contexts within biology. Appropriate for beginner and advanced programmers. Serves as repeat credit for students who earned credit for BSCI 3890 section 03 offered Fall 2023 or BSCI 3890 section 04 offered Spring 2024. Prerequisite: 1510 and 1511. [3] (MNS)

BSCI3272 - Genome Science

Course Description

Aims and importance of the science. Retrieval of genome data from public databases; experimental and computational methods used in analysis of genome data and their annotation. Functional aspects of genomics, transcriptomics, and proteomics; use of phylogenetics and population genomics to infer evolutionary relationships and mechanisms of genome evolution. Prerequisites: BSCI 1510 and 1511. [3] (MNS)

BSCI3333 - Special Offering

Course Description

Topics vary by section and instructor. May be repeated for credit; students may register for more than one section of this course in the same semester. Not eligible toward the major or minor. [3] (MNS)

BSCI3820 - Paleoecological Methods

Course Description

(Formerly listed as 4820) Tools used to interpret past environments and climates, including plant microfossils, pollen and phytoliths, vertebrate morphology, and dental microwear and mesowear. Geochemical tools such as stable isotopes and rare earth elements. Integrating methods for paleontological and anthropological studies, including the use of databases and meta-analyses. Readings from primary sources. Prerequisite: BSCI 1511 or EES 1030 or EES 1081 or EES 1510. Serves as repeat credit for EES 4820. [3] (MNS)

BSCI3850 - Independent Reading

Course Description

Reading and discussion of research papers with a member of the Biological Sciences faculty. Registration requires approval by faculty mentor. Prerequisite: BSCI 1510 and 1511. May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1; maximum of 2 credits total for all semesters of BSCI 3850] (No AXLE credit)

BSCI3860 - Introduction to Research

Course Description

Work in the laboratory of a member of the Biological Sciences faculty. Term paper required. Consent of course coordinator and enrollment by arrangement before the end of the previous semester is required. Prerequisite: 1510. Prerequisite or corequisite: 1511. [1] (No AXLE credit)

BSCI3861 - Directed Laboratory Research**Course Description**

Directed student research on a project conceived by a member of the Biological Sciences faculty. Enrollment by arrangement before the end of the previous semester. May be taken only once, and participants ordinarily expected to have overall grade point average of B or better. Offered on a graded basis only. Prerequisite: 1511, one intermediate BSCI course appropriate to the major or 3860, and consent of Biological Sciences 3861 coordinator. [2-4] (No AXLE credit)

BSCI3865 - Field Investigations**Course Description**

Content varies according to location and disciplinary focus. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3] (MNS)

BSCI3890 - Special Topics in Biological Sciences**Course Description**

Topics vary. May be repeated for credit more than once by permission of the director of undergraduate studies. Students may enroll in more than one section of this course each semester. Prerequisites: BSCI 1510 and 1511. [3] (MNS)

BSCI3961 - Independent Laboratory Research**Course Description**

Original student research on a defined problem in Biological Sciences and under the supervision of Biological Sciences faculty. Some independence in the design and execution of the problem. Enrollment by arrangement before the end of the previous semester. Prerequisite: 3861, consent of Biological Sciences 3961 coordinator, cumulative grade point average of B. May be repeated for credit more than once, but students may earn only up to 6 credits per semester of enrollment. [2-6] (No AXLE credit)

BSCI4101 - Human Anatomy and Physiology II**Course Description**

(Formerly listed as 3101; previously listed as MHS 3102, NURS 3102) Continuation of 2101. Structure and function of the human organism. Integration of the gross anatomical structures and organ systems with microscopic structure, physiological function, and homeostatic mechanisms. Clinical relevance of selected topics. Not open to students who have completed BSCI 3101, NURS 3102 or MHS 3102. Prerequisite: 2101. [4] (MNS)

BSCI4226 - Immunology**Course Description**

(Formerly listed as 3226) The molecular and cellular basis of immunity. Emphasis on molecular structure, the genetic origin of diversity in B-cell and T-cell receptors, antigen presentation, and the cellular interactions leading to the immune response. Tolerance, tumor and transplantation immunity, autoimmune and immunodeficiency diseases, and allergy. Prerequisite: 2201 or 2210. [3] (MNS)

BSCI4234 - Microbial Ecology and Evolution**Course Description**

(Formerly offered as 3234) Microorganisms, including bacteria, archaea, eukaryotes, viruses, and their mobile genetic elements. Origins, universality, and diversity of microbial life. Modes of genome evolution, symbioses between microbes and hosts, biotechnology, applications, and human microbiome. Prerequisite: 2150 or 2250. [3] (MNS)

BSCI4239 - Evolution of Behavior

Course Description

(Formerly listed as 3239) Theoretical and empirical research on the evolution of behavior. Evolutionary approaches to the study of animal behavior, including the role of behavior in foraging, competition, predator-prey interactions, and sociality. Behavioral adaptations and their roles in sexual selection, mating systems, and animal communication. Prerequisite: BSCI 2105 or 2205. [3] (MNS)

BSCI4243 - Principles of Human Disease

Course Description

Current understanding of diseases. Genetic, molecular, and cellular biological basis of disease. Connection between basic sciences and disease insights. Focus on obesity, aging, cancer, neurodegeneration, infections, and biomedical technology. Prerequisite: 2201 or 2210 or 2520. [3] (MNS)

BSCI4247 - Molecular Evolution

Course Description

(Formerly listed as 3247) The theory of evolution at the molecular level. The evolution of DNA and RNA sequences, proteins, and genome structures will be studied using models from population genetics and comparative approaches. Molecular clocks, the evolution of gene regulation and globin genes, molecular phylogeny, and human evolution. Prerequisite: either 2105 or 2205, and 2210. [3] (MNS)

BSCI4258 - Vertebrate Physiology

Course Description

(Formerly listed as 3258) Fundamental mechanisms of the major vertebrate physiological systems with an emphasis on humans. Special physiological adaptations of vertebrates to their environment (respiration of aquatic animals, birds, and deep diving mammals; salt balance in fresh and saltwater environments; altitude adaptation). Prerequisite: 2201 or 2520. [3] (MNS)

BSCI4265 - Biochemistry II

Course Description

Mechanisms and interactions of biological molecules involved in maintenance of genetic information and cellular homeostasis. Prerequisite: 2520. [3] (MNS)

BSCI4266 - Advanced Molecular Genetics

Course Description

Principles of classical and molecular genetic analysis: mutation and recombination, mapping, and the application of genetic methodology to the study of complex systems. Special emphasis on modern genomic approaches. Prerequisite: 2210. [3] (MNS)

BSCI4268 - Ecology and Evolution of Infectious Diseases

Course Description

Principles of infectious disease ecology, epidemiology, and evolution. Host-parasite coevolution, parasite ecology, and the evolution of resistance, tolerance, and pathogen virulence in humans, other animals, and plants. Experimental and mathematical approaches. Serves as repeat credit for students who have earned credit for BSCI 3890-04 offered fall 2023 or fall 2022. Pre- or co-requisite: 2105 or 2205 or 2138 or 2238. [3] (MNS)

BSCI4274 - Proteins**Course Description**

Molecular structures and biological functions of proteins. Underlying chemical and physical properties. Structural motifs and topology; folding and dynamics; enzyme catalysis; protein-DNA interactions. Structure-based drug design; protein symmetry; supramolecular protein machines. Chemical and spectroscopic methods to probe protein structure and behavior in solution. Prerequisite: 2520. [3] (MNS)

BSCI4275 - Molecular Biology**Course Description**

Mechanisms underlying the maintenance and expression of our genomes. DNA replication, DNA repair, transcription, and RNA metabolism. Students who have completed 4265 require instructor approval to register. Prerequisite: 2520. [3] (MNS)

BSCI4285 - Membrane Biochemistry**Course Description**

Molecular mechanisms and interactions of biological molecules in membrane biochemistry and maintenance of cellular homeostasis. Membrane transport and trafficking; lipids; signaling; protein translocation and quality control. Students who have completed 4265 require instructor approval to register. Prerequisite: 2520. [3] (MNS)

BSCI4890 - Advanced Topics in Biological Sciences**Course Description**

Topics vary; students are expected to have completed one or more intermediate courses in Biological Sciences (prerequisites will vary by topic). May be taken more than once if there is no duplication in topic; students may enroll in more than one section each semester. Offered on a graded basis only. [3] (MNS)

BSCI4965 - Advanced Undergraduate Seminar**Course Description**

Discussions and papers based on readings in research journals. Topics vary. Prerequisite: completion of at least two BSCI courses at the 2000 level. May be repeated for credit more than once if there is no duplication in topic. Check major requirements for restrictions on total credits. Students may enroll in more than one section of this course each semester. [2] (No AXLE credit)

BSCI4999 - Honors Research**Course Description**

Open only to majors in the Honors Program. May be repeated for credit more than once, but students may earn only up to 6 credits per semester of enrollment. [2-6] (No AXLE credit)

Biomedical Engineering

BME1015 - Innovations in Biomedical Engineering**Course Description**

Review of areas within the field of BME. Topics include current research and industry trends in imaging, regenerative medicine, biophotonics, medical devices, technology and entrepreneurship, and low resource engineering. Open only to first-year and transfer students. Students in the School of Engineering receive open elective credit for BME 1015. SPRING. [1]

BME1016 - BME Industry Professional Connections

Course Description

A practical course designed to help students connect with BME companies through industry speakers and possible off-campus company visits. Interviewing, networking, company research techniques, resumes, cover letters. Students in the School of Engineering receive open elective credit for BME 1016. FALL. [1]

BME2100 - Biomechanics

Course Description

Structure and mechanics of the musculoskeletal system and the properties and strength of biological materials. Application of Newtonian mechanics, statics, and strength of materials to bone, muscle, tendon, other biological material, and medical devices. Credit offered for only one of BME 2100 or CE 2200. Prerequisite: PHYS 1601, MATH 1301, CS 1101 or 1103 or 1104. [3]

BME2110 - Technical Topics

Course Description

Technical courses on topics of special current interest. FALL, SPRING. [1-3]

BME2210 - Biomaterial Manipulation

Course Description

Design and characterization of biomaterials. Assessment of tissue engineering scaffolds and nanoparticles. Manipulation of cell growth and expression. Application of mechanics and materials principles to medical and consumer products. Laboratory exercises in tissue culture, microscopy, mechanical testing, biochemical assays, and computer modeling. Prerequisite: BME 2100, BSCI 1510/1510L. Corequisite: BME 2200. SPRING. [3]

BME2301 - Systems Physiology I

Course Description

(Previously BME 2001) Quantitative physiology from the engineering point of view. Descriptive physiology of several organ systems (nervous, musculoskeletal, cardiovascular, blood). Mathematical modeling and computer simulation of organ systems and physiologic control mechanisms. No credit for students who have earned credit for BME 3100. Prerequisite: CS 1101 or 1103 or 1104. Corequisite: BSCI 1510, PHYS 1602. [3]

BME2302 - Systems Physiology II

Course Description

(Previously BME 2002) Quantitative physiology from the engineering point of view. Descriptive physiology of several organ systems (immune, endocrine, respiratory, renal, gastrointestinal, reproductive). Mathematical modeling and computer simulation of organ systems and physiologic control mechanisms. No credit for students who have earned credit for BME 3101. Prerequisite: CS 1101 or 1103 or 1104; PHYS 1601. Corequisite: BSCI 1510, PHYS 1602. [3]

BME2400 - Quantitative Methods I: Statistical Analysis

Course Description

Application of modern computing methods to the parametric and nonparametric statistical analysis of biomedical data. Probability, sampling, estimation, analysis of variance, single and multivariable regression, and the principles of hypothesis testing, experimental design and clinical trials are emphasized. No credit for students who have earned credit for BME 3200. Prerequisite: MATH 2300. Corequisite: CS 1101 or 1103 or 1104. [3]

BME2860 - Introduction to Undergraduate Research

Course Description

Introduction to Undergraduate Research. Introduction to research, either experimental or theoretical in nature or a combination of both, under the supervision of a biomedical engineering faculty member or another faculty member approved by the course director. Students in the School of Engineering may only receive open elective credit for BME 2860. Prerequisites: Consent of course director (see BME undergraduate website for registration details). FALL, SPRING. [1-3]

BME2900W - Biomedical Engineering Lab I

Course Description

Introductory laboratory with guided reports. Experiment topics may cover systems physiology, biomechanics, and biomaterials. Emphasis on methods, instrumentation, and equipment used in biomedical engineering. One three-hour laboratory per week. No credit for students who have earned credit for BME 4900W. Prerequisite: CS 1101 or 1103 or 1104. Corequisite: BME 2301. [1]

BME3000 - Physiological Transport Phenomena

Course Description

Mechanics of fluids, heat transfer, and mass transfer in living systems. Basic theories of transport phenomena, applications to mammalian and cellular physiology and the design of medical devices. Prerequisite: BME 2100; MATH 2400 or 2420. [3]

BME3301 - Biomedical Instrumentation I

Course Description

Electronic circuits for measuring and processing physiological signals, analog front-end design, analog-to-digital conversion and digital signal processing. Three lecture hours per week. No credit for students who have earned credit for BME 3300. Prerequisite: ECE 2112. Corequisites: BME 3301L and 3400. [3]

BME3301L - Biomedical Instrumentation Laboratory I

Course Description

Laboratory exercises to accompany BME 3301. Construction, verification, and validation of biomedical instruments, including electronic circuits for measuring and processing physiological signals, analysis of clinically relevant biosensors. No credit for students who have earned credit for BME 3300 or 3301 (2024 or prior). Prerequisite: ECE 2112. Corequisite: BME 3301 and 3400. [1]

BME3302 - Biomedical Instrumentation II

Course Description

Systems-level approach to the design of devices that monitor clinically-relevant physiological functions and variables, driven by the needs of specific pathophysiological conditions. Three lecture hours per week. No credit for students who have earned credit for BME 3300. Prerequisite: BME 3301 (2024 or prior), or both 3301 and 3301L, or both ECE 2213 and 2213L, or both ECE 2214 and ECE 2112L. Corequisite: BME 3302L. [3]

BME3302L - Biomedical Instrumentation Laboratory II

Course Description

Laboratory exercises to accompany BME 3302. Instrumentation design and integration of multiple modalities into an instrumentation platform with applications to clinically-relevant physiological functions and variables. No credit for students who have earned credit for BME 3300 or 3302 (2024 or prior). Prerequisite: BME 3301 (2024 or prior), or both 3301 and 3301L, or both ECE 2213 and 2213L, or both ECE 2214 and ECE 2112L. Co-requisite: BME 3302. [1]

BME3400 - Quantitative Methods II: Signals and Numerical Analysis

Course Description

Quantitative analysis and computational methods for biomedical engineering applications. Signal and image processing, numerical analysis, and linear and nonlinear models. No credit for students who have earned credit for BME 3300. Prerequisite: CS 1101 or 1103 or 1104; MATH 2400. Corequisite: BME 2400. [3]

BME3500 - Biomedical Materials: Structure-Property Relationships and Applications

Course Description

Structure-property relationships in both natural and synthetic, hard and soft materials. Bio-inspired materials design, the role of self-assembly in achieving highly ordered structures, material design and properties for emerging biomedical applications, factors influencing biocompatibility, performance of biomaterials in both soft and hard tissues, and biological response to implants. No credit for students who have earned credit for BME 2200. Prerequisite: CHEM 1602, PHYS 1601. [3]

BME3700 - Bioengineering Failure - Mechanisms and Ramifications

Course Description

Mechanisms of failure for drugs and devices analyzed through case studies. Bioengineering practice through the lens of FDA approval, ethics, and decision theory. Students will create a biotechnology case study for presentation to the class for assessment. Prerequisite: BME 2100, BME 3000. SPRING. [3].

BME3750 - Low Resource Bioengineering

Course Description

Needs associated with low-resource settings, particularly regarding global health. Application of engineering skills to design solutions to meet current needs. Includes a SOLIDWORKS project. FALL. [3]

BME3800 - 3D Computer Drafting in BME Design

Course Description

Development of 3D visualization skills to transform ideas into parts, engineering drawings, and assemblies in SOLIDWORKS. Projects emphasize applications in biomedical engineering. Lectures include interactive in-class activities. [3]

BME3860 - Undergraduate Research

Course Description

Independent research, either experimental or theoretical in nature or a combination of both, under the supervision of a biomedical engineering faculty member or another faculty member approved by the course director. The class meets one hour per week to discuss research design, responsible conduct of research, laboratory documentation, literature review, and scientific writing. Prerequisite: Junior standing, consent of course director (see BME undergraduate website for registration details). [2-3; maximum of 6 hours total for all semesters of BME 3860 and 3861]

BME3861 - Undergraduate Research

Course Description

A continuation of the research in 3860 or research in a different area of biomedical engineering. Prerequisite: Consent of course director. [1-3 each semester; maximum of 6 hours total for all semesters of BME 3860 and 3861.]

BME3890 - Special Topics
Course Description

[3]

BME3891 - Special Topics
Course Description

[3]

BME3892 - Special Topics
Course Description

[3]

BME3893 - Special Topics
Course Description

[3]

BME3900W - Biomedical Engineering Lab II
Course Description

Intermediate laboratory with oral and written reports. Experiment topics may include thermodynamics, biological transport, signal analysis, biological control, and biological imaging. Emphasis on data analysis and communication. One three-hour laboratory per week. No credit for students who have earned credit for BME 4900W. Prerequisite: BME 2900W. Corequisite: BME 2100, BME 2302. [1]

BME4030 - Cell Mechanics and Mechanobiology
Course Description

Quantitative understanding of the way cells detect, modify, and respond to physical aspects of the cell environment. Foundational principles of cell mechanics. State-of-the-art experimental practices of cell mechanics and mechanobiology. Prerequisite: BME 2100, BME 3000. SPRING. [3]

BME4100 - Lasers in Surgery and Medicine
Course Description

Fundamentals of lasers, light-tissue interaction, problem-based design of optical instrumentation. Applications in laser surgery, disease detection, and surgical guidance. Includes hands-on experiences. Prerequisite: PHYS 1602. FALL. [3]

BME4200 - Principles and Applications of BioMicroElectroMechanical Systems (BioMEMS)
Course Description

The principles, design, fabrication and application of micro- and nano-devices to instrument and control biological molecules, living cells, and small organisms, with a strong emphasis on development of microfabricated systems and micro- and nano-biosensors. Students will lead discussions from the research literature. Graduate students will prepare a research proposal or fabricate a functioning BioMEMS device. FALL. [3]

BME4250 - Mobile Application Design for Healthcare

Course Description

Development of mobile platform applications for healthcare. Motivation and role of telemedicine in US and global healthcare systems. Covers UX / UI design principles for mobile application development. Includes a team-based, structured project. Prerequisite: CS 1101, 1103, or 1104; junior standing. FALL of alternating years. [3]

BME4320 - Engineering Approaches to Cancer

Course Description

Basic concepts of cancer including somatic evolution, models of tumorigenesis, growth dynamics, drug resistance, and evolutionary dynamics. Computational methods will be used to model and predict these behaviors, and classic and current scientific literature will be discussed, and used to help define group projects. Course project includes a mid-semester group presentation, progress reports, and a final report. Corequisite: BME 3000. FALL. [3]

BME4340 - Drug Delivery

Course Description

Advanced course on the design, synthesis, characterization, testing, and disease treatment application of drug delivery systems. Focus on synthetic biomaterials, especially polymeric materials. A final written project is required. Prerequisite: BME 3500. [3]

BME4400 - Foundations of Medical Imaging

Course Description

Physics and engineering of image formation by different modalities used for medical applications. Concepts common to different imaging modalities and limits of physical phenomena. Mathematical concepts of image formation and analysis; techniques for recording images using X-rays (including CT), ultrasound, magnetic resonance, and radioisotopes (including SPECT and PET). Methods of evaluating image quality. Prerequisite: CS 1100 or 1101 or 1103 or 1104; PHYS 1602; MATH 2400. SPRING. [3]

BME4420 - Quantitative and Functional Imaging

Course Description

Quantitative analysis of non-invasive imaging techniques to assess the structure and function of tissues in the body. Applications of computed tomography, positron emission tomography, ultrasound, and magnetic resonance imaging to tissue characterization. Measurement of lesion volume, cardiac output, organ perfusion, brain function, and receptor density. Prerequisite: CS 1101 or 1103 or 1104; PHYS 1602; MATH 2400. FALL [3]

BME4430 - Medical Imaging Instrumentation

Course Description

Laboratory course on medical imaging transducers, electronics and systems design. Functioning tabletop optical computed tomography, ultrasound and magnetic resonance systems are built and characterized. Corequisite: BME 3302. SPRING. [3]

BME4460 - Ultrasound Imaging

Course Description

Physics and engineering of ultrasonic imaging. Principles of bioacoustics and mechanical wave phenomena, ultrasonic image formation including both B-Mode and Doppler. Mathematical aspects of image formation and analysis including linear systems and Fourier analysis. Prerequisite: BME 2400 or 3400. FALL. [3].

BME4500 - Nanobiotechnology

Course Description

Synthesis and characterization of nanostructured materials for use in living systems. Clinical applications of nanoscale biosensors. Methods for single molecule detection in biological specimens. Quantitative structure/function assessment of nanostructures in living systems. Prerequisite: BSCI 1510; BME 3000 or CHBE 3300 or ME 3224. SPRING. [3]

BME4530 - Synthetic Biology and Cell Design

Course Description

Principles used to interrogate and encode cell behaviors. Exploration of modules from diverse domains of life that can be assembled for bioengineering applications, including adoptive cell therapy and regenerative medicine. Prerequisite: BSCI 1510 or ChBE 2150. SPRING. [3]

BME4550 - Drug Development & Biotechnology: Pharmaceutical Engineering

Course Description

Biology and bioengineering as a basis for successfully launching new high-tech bioventures. Overview of biotechnology in modern drug discovery and development, with treatment of business aspects of pharmaceutical innovation. Prerequisite: BME 2301, BME 2302, BME 2400. SPRING. [3].

BME4901W - Biomedical Engineering Lab III

Course Description

Advanced laboratory with comprehensive written reports. Students design experiments building on laboratory exercises conducted in BME 2900W and 3900W. Emphasis on experimental design, use of controls, and interpretation of data. One three-hour laboratory per week. No credit for students who have earned credit for BME 4900W. Prerequisite: BME 2400, 3900W. [1] (Not offered until 2021-2022.)

BME4950 - Design of Biomedical Engineering Devices and Systems I

Course Description

Integration of the engineering and life science backgrounds of senior biomedical engineering students through the presentation of design principles for medical devices and systems. Design principles and case examples for biomedical electronics, mechanical, chemical, and computing systems are presented. A full-semester design project is required. Evaluation is conducted through periodic oral and written presentations, and through a final written and poster report. Corequisite: BME 3302. [2]

BME4951 - Design of Biomedical Engineering Devices and Systems II

Course Description

Integration of the engineering and life science backgrounds of senior biomedical engineering students through the presentation of design principles for medical devices and systems. Design principles and case examples for biomedical electronics, mechanical, chemical, and computing systems are presented. A full-semester design project is required. Evaluation is conducted through periodic oral and written presentations, and through a final written and poster report. Prerequisite: BME 4950. [3]

BME4959 - Senior Engineering Design Seminar

Course Description

Elements of professional engineering practice. Professionalism, licensing, ethics and ethical issues, intellectual property, contracts, liability, risk, reliability and safety, interdisciplinary teams and team tools, codes, standards, professional organizations, careers, entrepreneurship, human factors, and industrial design. Prerequisite: senior standing. Corequisite: BME 4950 or CHBE 4950W. FALL. [1]

Business

BUS1100 - Essentials of Financial Reporting

Course Description

(Previously BUS 2100) Emphasis on mandated corporate disclosure. Economic concepts that guide the development and use of accounting conventions as well as the institutional context that disciplines producers and users. Not open to students who have earned credit for FNEC 1600 without permission, as students will forfeit credit hours. Serves as repeat credit for FNEC 1600. Prerequisite: ECON 1020. [1.5]

BUS1300 - Principles of Finance

Course Description

(Previously BUS 2300) Emphasis on asset valuation. Stock and bond valuation, capital budgeting, cost of capital, market efficiency, and company valuation. Not open to students who have earned credit for FNEC 2700 without permission, as students will forfeit credit hours. Serves as repeat credit for FNEC 2700. Prerequisite: BUS 1100 (Previously BUS 2100), ECON 1020, and one of BME 3200, ECON 1500, ECON 1510, MATH 1010, MATH 1011, MATH 2810, MATH 2820, MATH 2821, PSY 2100, PSY-PC 2110, or SOC 2100. [1.5]

BUS1350 - Language of Business: Accounting and Finance Principles and Practice

Course Description

Mandated corporate disclosures, accounting conventions and rules, understanding elements of financial statements, asset valuation, capital budgeting, cost of capital, market efficiency, and company valuation. Prerequisite: Complete one of the following classes: Econ 1500, Econ 1510, Math 1010, Math 1011, Math 2810, Math 2820, Math 2821, PSY 2100, PSY-PC 2110, SOC 2100, BME 2400. Not open to students who have earned credit for BUS 1100 or 1300 without permission, as students will forfeit credit hours. [3]

BUS1400 - Organizational Behavior

Course Description

(Previously BUS 2400) Accomplishing goals by effectively working for, with, and through others. The units of analysis explored are individuals, teams, and organizations. Not open to HOD or HOS majors, or to students who have earned credit for HOD 2100 without permission, as students will forfeit credit hours. Serves as repeat credit for HOD 2100. [1.5]

BUS1600 - Principles of Marketing

Course Description

(Previously BUS 2600) Success in business is driven by providing goods and services that consumers need and want. This course covers how to achieve such success through analyses of companies, customers, and competitors, and making the right decisions regarding what products to offer, and how to price, promote, and distribute them. Course content spans a wide variety of settings including consumer goods, hi-tech, and service firms, and puts a particular emphasis on digital marketing opportunities and the evolving role of social media. Not open to students who have earned credit for MGRL 1200 without permission, as students will forfeit credit hours. Serves as repeat credit for MGRL 1200. [1.5]

BUS1700 - Managing Operations

Course Description

(Previously BUS 2700) Provides an overview of operations in both service and manufacturing organizations. Process analysis, queuing, inventory management, quality management, lean operations, and optimization. Prerequisite: one of BME 3200, ECON 1500, ECON 1510, MATH 1010, MATH 1011, MATH 2810, MATH 2820, MATH 2821, PSY 2100, PSY-PC 2110, or SOC 2100. [1.5]

BUS2110 - Business Sustainability Disclosure, Reporting, & Analysis

Course Description

This course provides a critical analysis of current practices in business sustainability disclosure, reporting and analysis. Topics covered include disclosure & reporting practices, regulatory requirements, reporting frameworks, reporting standards, rating agencies, investment products, activist investing, and NGOs. The course also provides guidance for synthesizing information from corporate sustainability disclosures into traditional financial and valuation analyses. The class format combines lectures, interactive discussions, cases studies and project presentations. [1.5]

BUS2210 - Consumer Behavior

Course Description

At its basic premise, marketing is an attempt to influence consumers toward a purchasing act (and oftentimes a non-act). This course seeks to provide insights into consumer pedagogies (e.g., psychology, sociology, social psychology) used in developing effective marketing strategies. In addition to learning how a deeper appreciation of consumer behavior analysis can inform the design of effective marketing, you will also gain a better understanding of yourself as a participant in marketing influence. Assignments include readings, cases, written case reports, and group projects. Prerequisite: BUS 1600. [1.5]

BUS2220 - Digital Marketing Strategy

Course Description

This course covers how to market a brand via the 7 main digital marketing platforms. Topics include understanding the customer experience, selecting and building a digital platform, creating a content strategy, digital marketing vehicles, and assessing performance. Assignments include readings and individual assignments, as well as group work where teams develop and present digital marketing strategies. Students will also earn marketing certifications in HubSpot as part of this course. Prerequisite: BUS 1600. [1.5]

BUS2230 - Cases in Chaos: Fame, Shame, and Make-or-Break Marketing

Course Description

This course will help you build and defend a great business. A strong business leader has to make smart, strategic marketing decisions, create and present a plan to get people on board, and then execute. You will learn about these steps in the course, as we review a range of topics including marketing fundamentals, new business strategy, established business strategy, brand portfolio strategy, and more. In doing so, we will build on the Marketing Principles course, in addition to introducing new concepts. The course is a challenging course. In particular, the casework and team-based online simulation requires substantial time commitment. However, it will prove to be a valuable learning experience; the material will help you analyze and understand businesses, develop and gain support for your marketing strategies, and ultimately deliver strong results. [1.5]

BUS2310 - Introduction to Entrepreneurship

Course Description

This course addresses the unique entrepreneurial experience of conceiving, evaluating, creating, managing, and potentially selling a business. The goal is to provide a comprehensive background with practical application of important concepts applicable to entrepreneurial environment. In addition to creative aspects, key business areas of finance, accounting, marketing and management will be addressed from an entrepreneurial perspective. The course relies on classroom discussion, participation, guest speakers, and case analysis. Students will need to draw upon their business education and experience, and apply it to the task of launching a new venture. Students are expected to interact with the business community and actively participate in classroom discussions and exercises. [1.5]

BUS2320 - Innovation Strategy

Course Description

What makes some organizations more innovative than others? In this course, students will learn how to improve an organization's innovation capabilities. Major themes include how to foster innovation within the firm, how to commercialize innovative ideas through new products and services, how to protect innovation from competitors, and how to overcome common barriers to innovation. Students will also improve their own innovation abilities through a project in which they pitch a new product or service. Note that while we will discuss examples of technical innovation, this is not a tech course; rather, this course is about how to create an effective strategy for innovation in a wide range of organizations. [1.5]

BUS2330 - Launching the Venture

Course Description

This course is designed to provide undergraduate students with hands-on experience in new venture creation and development. Students will learn entrepreneurial skills including opportunity recognition, business model development, market validation and basic financial modeling. The focus will be on taking an idea from concept to execution while developing a compelling value proposition for an early-stage startup that can attract potential investors. Students will form venture teams and collaborate to create a comprehensive business plan and pitch presentation, which will be delivered to a panel of Vanderbilt alumni entrepreneurs and investors during the final session of the course, "The Shipyard". You will have a chance to ideate, test, and develop materials for an early-stage venture by incorporating materials learned in the course. Be prepared to engage actively, conduct market research, and test your ideas outside the classroom. The course will incorporate a mix of case studies, articles, and guest speakers. Prerequisite: BUSA 2300 [1.5]

BUS2340 - Taking the Leap - The Entrepreneurial Mindset

Course Description

This course primarily is a speaker series built upon in-class conversations with leading entrepreneurs, thought leaders, creative talent, and outliers to gain a deeper understanding of the mindset, leadership philosophies, and attributes of successful entrepreneurs and high achievers. Examining various frameworks and perspectives, students will be able to shape and define their core values, philosophies, leadership styles, as well as better understand and identify opportunities that resonate for them. This course is designed for students who aspire to become entrepreneurs or organizational leaders, whether launching directly from school or aspiring to lead an organization later in their careers. [1.5]

BUS2630 - Sports Analytics

Course Description

Sports Analytics uses data and quantitative methods to measure performance and make decisions to gain advantage in the competitive sports arena. Pre-requisite courses have exposed students to powerful quantitative methods such as linear regression and constrained optimization. These quantitative methods can give operations a competitive advantage. In this course, students gain further experience in applying quantitative methods to problems in the context of sports. Typical questions in sports analytics include: How to predict future performance of players or teams? How to rank players or teams? Which decision is more likely to lead to a win? We will cover several sports, but to be able to 'go deep' we will focus significantly on baseball, football, and soccer. In class, we will analyze real sports data with powerful quantitative methods. As a result, the course will sharpen students' analytics skills. These skills are equally useful in many areas of business. Pre-requisites: One of BUS 1700, ECON 3012, or instructor consent, AND One of ECON 1500, ECON 1510, MATH 1011, MATH 2810, MATH 2820, PSY 2100, PSY-PC 2110, or SOC 2100. [1.5]

BUS2640 - Business of Sports

Course Description

This course offers a broad overview of the dynamic, complex, and vast world of sports business. Students will explore the economic, financial, legal, and social factors that shape the industry, from professional leagues and franchises to athletes' rights and other emerging trends. Through interactive lectures, case studies, guest speakers, and real-world simulations, you will gain insight into the diverse business operations that fuel the global sports phenomenon. [1.5]

BUS2710 - Business Finance**Course Description**

Strategic financial decisions. Payout policy, equity and debt financing, credit risk, leasing, financial analysis and planning, option pricing theory, and applications. Prerequisite: BUS 1300. Serves as repeat credit for BUSA 2705. [1.5]

BUS2720 - Introduction to Real Estate**Course Description**

Legal concepts of real estate, including property rights, encumbrances, easements, and title. Forms of real estate finance, mortgage loans, and other debt vehicles. Valuation of income-producing properties, cap rates, market conditions, and risk assessment. Prerequisite: BUS 1300 [1.5]

BUS2730 - Financial Modeling**Course Description**

Capital structures, leveraged buyout models, cash flow, intrinsic and forecast risk, value creation, funds flow from firm to investors. Prerequisite: BUS 1300 [1.5]

BUS2740 - Real Estate Finance and Development**Course Description**

Real Estate Finance and Development builds on what the students will have learned in Introduction to Real Estate (Prerequisite). Students will be exposed to actual commercial real estate transactions and have the opportunity to hone their skills in due-diligence, financial underwriting and investment decision making. The course will be a combination of lecture and case studies capped with a semester long team project to produce an actual "pitch book" for a potential commercial development. Prerequisite: BUS 2720 [1.5].

BUS2750 - Private Capital Markets**Course Description**

Private equity, venture capital, investment process, private credit, and other forms of alternative capital. Serves as repeat credit for BUSA 3891 section 02 Special Topics: Private Capital Markets in Fall 2023. Prerequisite: BUS 1300 [1.5] (SBS)

BUS3720 - Case Problems in Finance**Course Description**

Management of current assets, tradeoff between risk and return, investment in capital assets, project evaluation and financing, optimal capital structure. Prerequisite: BUS 1300. [1.5]

Business-Arts&Science

BUSA1001 - Commons iSeminar**Course Description**

(Previously MGRL 1001) Topics vary. General Elective credit only. [1] (No AXLE credit)

BUSA1100W - Fundamentals of Management

Course Description

(Previously MGRL 1100W) Principles and practices of business in all areas of organization, finance, marketing, human resources, technology, and operations. Does not count as an elective in the undergraduate business minor. Serves as repeat credit for students who have earned credit for 1100. [3] (SBS)

BUSA2150 - Leading Business Through Crisis

Course Description

Responses of business leaders respond in times of crisis (e.g., climate change, global pandemic, product recall, etc.). Awareness, risk assessment, business continuity, adverse events, adaptation, reputation management, and resilience. How individual and organizational perspective, purpose, priorities, plans, and performance shape leadership choices and outcomes. Serves as repeat credit for MGRL 3333, section 01 Spring 2021. [3] (SBS)

BUSA2160 - Corporate Social Responsibility

Course Description

Roles and responsibilities of business in society. Stakeholder theory, governance, intersection of strategy and operations, and "ESG" (environmental/ social governance) from company and investor perspectives globally. Focus on diversity/inclusion and climate change/sustainability. [3] (SBS) (CORE E) (LE SBS)

BUSA2180 - Introduction into the U.S. Healthcare Industry

Course Description

Overview of major industry segments, players, and current trends. Healthcare Value Chain, Cost vs. Quality, Payers (Commercial Insurance, Medicare, Medicaid), Universal Healthcare, Regulations, Health Systems, Providers, Outpatient, Pharmaceutical, BioTech, Healthcare IT and Medical Tech. Serves as repeat credit for students who earned credit for BUSA 3891-01 offered Fall 2024. [3]

BUSA2200 - Data Analysis and Presentation

Course Description

(Previously MGRL 2200) Collection, structure, and analysis of data. Quantitative problem solving using spreadsheets. Design strategy and principles for communication of results. Prerequisite: One of BME 3200, ECON 1500, ECON 1510, MATH 1011, MATH 2810, MATH 2820, MATH 2821, PSY 2100, PSY-PC 2110, or SOC 2100. [3] (SBS) (CORE B, D) (LE SBS)

BUSA2205 - Business Development

Course Description

Case studies of processes, techniques, and theories of business development, including sales methodologies, data and analytics, motivation and compensation, sales strategy, and sales execution. Serves as repeat credit for students who completed BUSA 3891 offered spring 2023. [3] (SBS)

BUSA2210 - Digital and Social Media Marketing

Course Description

Processes, techniques, and theories of digital marketing with a digital marketing simulation and specialty certifications. Digital strategy, content marketing and design, analytics, digital advertising, digital channels and platforms, search engine optimization (SEO) and search engine marketing (SEM), social media marketing, email marketing and online reputation management. Serves as repeat credit for students who have earned credit for BUSA 3891-02 offered Spring 2024. [3]

BUSA2300 - Entrepreneurship: The Business Planning Process

Course Description

(Previously MGRL 2300) Lean methods for developing a new venture; processes of ideation and innovation; business model validation, fundamentals of new venture funding, and principles of small business operation. [3] (SBS) (CORE A, B) (LE SBS)

BUSA2335 - Understanding the Family Business

Course Description

The key principles of family-owned business through readings, case studies, guest speakers and experiential presentation. The role and scope of family businesses, ownership and governance structures, rights and responsibilities of family members and non-family members, navigating conflict, and succession planning and business transfer/exit. [3] (SBS)

BUSA2600 - Managerial Accounting & Finance

Course Description

Selected topics in managerial accounting and finance. Prerequisite: BUS 1100 (Previously BUS 2100). [3] (SBS) (CORE D) (LE SBS)

BUSA2700 - Consumer Finance

Course Description

Financial decision-making. Saving, borrowing, spending, and investing strategies given interest rates, inflation, transaction costs, management fees, and taxes. Financial institution assessment and pricing of risk given monetary and fiscal policies, credit scoring models, regulation, adverse selection, moral hazard, and actuarial tables. Emotional and behavioral biases in finance. No credit for students who completed FNEC 3333 or BUSA 3334. [3] (SBS)

BUSA2705 - Corporate Finance

Course Description

(Previously FNEC 2705) Strategic financial decisions. Corporate financial theory, cost of capital and capital budgeting, discounted cash flow valuation, and financial multiples. Payout policy, equity and debt financing, option pricing theory, and applications. Prerequisite: BUS 1300 (Previously BUS 2300). [3] (SBS)

BUSA3105 - Negotiation

Course Description

(Previously MGRL 3105) Contemporary challenges in leading change in organizations and building effective management teams. The context and dynamics of negotiation; components, structure, and management of negotiations; and varying requirements across the spectrum of negotiation types. [3] (SBS)

BUSA3110 - Business Management

Course Description

(Previously MGRL 3110) Seminar. Analysis of cases representing strategic decisions in operations, resource management, competitive balance, and product and service offerings. Prerequisite: BUS 1100 and BUS 1600 (Previously BUS 2100 and BUS 2600), or BUSA 3255 (Previously MGRL 3255). [3] (SBS)

BUSA3200 - Applied Marketing**Course Description**

Case study of processes, techniques, and theories of marketing, including branding, advertising, interactive media, sales promotion, and marketing research. Offered on a graded basis only. Prerequisite: BUS 1600. [3] (SBS)

BUSA3255 - Corporate Strategy**Course Description**

(Previously MGRL 3255) Elective intended for business minor. Relationship between organizational structure and strategy. Decision structures to achieve performance objectives. Analysis of team, competitor, and market issues and dynamics. Prerequisite: BUS 1100 (Previously BUS 2100). [3] (SBS)

BUSA3300 - Entrepreneurial Challenge**Course Description**

(Previously MGRL 3300) Simulation of the entrepreneurial experience from idea generation to funding. Development of a complete business plan, including financial projections, and competition for funding from investors. Offered on a graded basis only. Prerequisite: BUSA 2300 (Previously MGRL 2300). [3] (SBS)

BUSA3333 - Leading Business In Times of Crisis**Course Description**

(Previously MGRL 3333) Events that threaten an organization's survival. How organizational purpose, effective communication, and solid planning and execution informs and improves a leader's response. C-level executives who have guided their organizations through major disruptions. Leadership skills to anticipate threats, to cope with adverse events, and to adapt to changing conditions. [3] (SBS)

BUSA3334 - Consumer Finance**Course Description**

(Previously FNEC 3333) Money management. Earning, saving, investing, spending, and borrowing. Budgetary obligations and planning for retirement. Developments in consumer finance, pros and cons to the consumer. Institutions, payment mechanisms, asset classes, optimal asset allocation, and retirement objectives. [3] (SBS)

BUSA3605 - Financial Reporting and Analysis**Course Description**

(Previously FNEC 3605) Selected topics in accounting and financial reporting. Cash flow statements, income taxes, long-term debt, and leases. Investments, derivative securities, contingencies, stockholders' equity, and purchase accounting. Prerequisite: BUS 1100 (Previously BUS 2100). [3] (SBS)

BUSA3700 - Investment Analysis**Course Description**

(Previously FNEC 3700) Investment principles and practices. Security analysis and valuation. Portfolio theory. Current issues in the financial sector. Stock market simulation. Prerequisite: BUS 1300 (Previously BUS 2300). [3] (SBS)

BUSA3705 - Financial Management**Course Description**

(Previously FNEC 3705) Analysis of cases representing capital budgeting, forecasting cash flow, risk assessment, capital structure, and mergers and acquisitions. Seminar. Prerequisite: BUS 1300 (Previously BUS 2300). [3] (SBS)

BUSA3710 - Corporate Valuation**Course Description**

(Previously FNEC 3710) Intrinsic, relative, and contingent valuation methodologies. Theoretical and market basis for investment. Valuation project. Prerequisite: BUS 1300 (Previously BUS 2300). [3] (SBS)

BUSA3841 - Directed Study**Course Description**

(Previously MGRL 3841) Directed readings and related field research toward a scholarly project conceived and executed under the supervision of a faculty member. Limited to juniors and seniors; may not be repeated. [3] (No AXLE credit)

BUSA3851 - Independent Study in Business**Course Description**

(Previously MGRL 3851) A program of independent reading in consultation with an adviser. Written permission of an instructor and the program director required. [Variable credit: 1-3; may not be repeated] (No AXLE credit)

BUSA3891 - Special Topics**Course Description**

Business and management issues. May be repeated for credit if there is no duplication in topic. Does not count as an elective in the undergraduate business minor.. [3] (No AXLE credit)

Career Development

CAR2300 - Career Development: Life Beyond VU**Course Description**

Application of career theory, self-assessment, and practical exercises and experiences to enhance the career development of Arts & Science students. Focus on connecting majors with the world of work, exploring career options, and improving written and oral communications related to the workplace. Designed especially for sophomores and juniors. [1.5] (No AXLE credit)

Catalan

CTLN1103 - Intensive Elementary Catalan**Course Description**

Romance tongue of northeastern Spain, Andorra, and southwestern France. Emphasis on oral communication, grammar, reading, and culture. Prior study of another Romance language through the intermediate level is expected. No credit for students who have earned credit for a higher level Catalan language course. [3] (INT)

Chemical and Biomolecular Engineering

CHBE2100 - Chemical Process Principles**Course Description**

A foundation for advanced work in chemical engineering. Process problems of a chemical and physico-chemical nature. Emphasis on stoichiometry, material balances, and energy balances required for design computation. Prerequisite: MATH 1301. Corequisite: CHEM 1602. FALL, SPRING. [3]

CHBE2150 - Molecular and Cell Biology for Engineers**Course Description**

Basic molecular and cellular biology principles and concepts. Application of engineering principles to further the understanding of biological systems. Protein structure and function, transcription, translation, post-translational processing, cellular organization, molecular transport and trafficking, and cellular models. Not open to students who have earned credit for BSCI 1510 without permission. Total credit for this course and BSCI 1100 or BSCI 1510 will not exceed 3 credit hours. Credit reduced from second course taken (or from test or transfer credit as appropriate). Prerequisite: CHEM 1602. FALL. [3]

CHBE2200 - Chemical Engineering Thermodynamics**Course Description**

Application of the laws of thermodynamics to chemical engineering systems. Entropy balances and analysis of thermodynamic cycles. Methods of estimating thermodynamic properties of pure fluids and mixtures, including equations of state, to provide background for chemical process design and simulation. Corequisite: MATH 2300. FALL, SPRING. [3]

CHBE2250 - Modeling and Simulation in Chemical Engineering**Course Description**

Development of chemical engineering process models and their numerical solutions. The models include solution of linear and non-linear equations, eigenvalue problems, differentiation, and integration, ordinary differential equations, linear and nonlinear regression. Chemical process simulation using commercial simulators is introduced. Prerequisite: CHBE 2100. Corequisite: CHBE 2200. SPRING. [3]

CHBE2860 - Introduction to Undergraduate Research**Course Description**

Introduction to research under the direction of a ChBE faculty member. Students in the School of Engineering may only receive open elective credit for CHBE 2860. FALL, SPRING. [1-3]

CHBE2900W - Technical Communications for Chemical Engineers**Course Description**

Preparation for academic and professional communication tasks. Principles of effective communication, information design, and audience awareness. Development of written reports, oral presentations, posters, visuals, emails, letters, and memos for communicating technical details. Corequisite: CHBE 2200. SPRING [1]

CHBE3200 - Separation Processes**Course Description**

Thermodynamic principles and calculations of multi-phase multi-component equilibria. Theory, design, and simulation of chemical separations by distillation, absorption, adsorption, extraction, and membrane-based processes. Prerequisite: CHBE 2100, CHBE 2200. FALL. [3]

CHBE3250 - Chemical Reaction Engineering**Course Description**

Thermodynamic basis of chemical equilibrium. Analysis of chemical kinetic data and application to the design of chemical reactors. Batch, semibatch, and flow reactors are considered in both steady-state and transient operation. Brief treatments of catalysis and physical and chemical adsorption. Prerequisite: CHBE 2200. SPRING. [3]

CHBE3300 - Transport I**Course Description**

Principles of momentum and energy transport (fluid mechanics) and their application to the analysis and design of chemical and biological engineering systems. Prerequisite: PHYS 1601, MATH 2420. FALL. [3]

CHBE3350 - Transport II**Course Description**

Design and analysis of heat exchanger networks. Principles of mass transfer and their application to the analysis of chemical and biological engineering systems. Prerequisite: CHBE 3300. SPRING. [3]

CHBE3600 - Chemical Process Control**Course Description**

Design of control systems for chemical processes. Principles of process dynamics and control of single and multivariable systems. Frequency and stability analyses and their effect on controller design. Prerequisite: CHBE 2250; MATH 2400 or 2420. FALL. [3]

CHBE3860 - Undergraduate Research**Course Description**

Opportunities for individual students to do research under the guidance of a faculty member. Requires faculty sponsorship of the project. [1-3 each semester]

CHBE3861 - Undergraduate Research**Course Description**

Opportunities for individual students to do research under the guidance of a faculty member. Requires faculty sponsorship of the project. [1-3 each semester]

CHBE3890 - Special Topics**Course Description**

[Variable credit: 0-3 each semester]

CHBE3900W - Chemical Engineering Laboratory I**Course Description**

Laboratory experiments in momentum, energy and mass transport, focusing on chemical engineering fundamentals, instrumentation, and unit operations. Statistical treatment of data, error analysis, and experimental design. Written reports, oral presentations, and laboratory safety are emphasized. One 5-hour laboratory per week. Prerequisite: CHBE 2900W, and one of BME 2400, CE 3300, DS 2100, or MATH 2810. Corequisite: CHBE 3350. SPRING. [3]

CHBE4200 - Additive and Polymer-based Manufacturing

Course Description

Scaling up prototypes through industrial processes. Operating principles of advanced forms of 3D printing (stereolithography and powder bed fusion). How properties of polymeric, ceramic, and metallic materials inform the 3D printing process and certification of printed parts. Computer-aided modeling of manufactured parts with a focus on minimizing anisotropic properties and dimensional instability. Fundamentals of polymer melt flow and simulation in mold cavities to optimize part fabrication. Students design a prototype injection mold and iterate on their design using flow simulation software and 3D printing. Prerequisite: DF 2100. FALL, SPRING. [3].

CHBE4500 - Bioprocess Engineering

Course Description

Application of cellular and molecular biology to process engineering to describe the manufacture of products derived from cell cultures. Basic molecular and cellular biology principles and concepts. Design and scale-up of bioreactors and separation equipment. Metabolic and protein engineering utilizing genetically engineered organisms. Corequisite: CHBE 3350 or BME 3000. SPRING. [3]

CHBE4800 - The Molecular and Cellular Mechanome

Course Description

Applications of molecular and cellular biophysics and mechanics over various lengths, energy and timescales to describe biological phenomena through an 'omics' systems level perspective to molecular motors, cell machinery, mechanotransduction, cell migration, cell division, and nonequilibrium receptor ligand interactions. Physical and engineering based descriptions of molecular and cellular machinery incorporating biophysics and statistical and continuum mechanics perspectives. Modern and historical results, instrumentation, and measurement techniques. Prerequisite: Junior standing. FALL. [3]

CHBE4805 - Biomolecular Engineering and Design

Course Description

Approaches for interrogating and controlling biological function on a molecular and cellular level. Applications to biotechnology fields such as diagnostics, therapeutics, and regenerative medicine. Focus areas include concepts of molecular recognition, extracellular and intracellular signal transduction, protein engineering, genome engineering, cellular engineering, and tissue engineering. Prerequisites: ChBE 2150 or BSCI 1510. [3]

CHBE4810 - Metabolic Engineering

Course Description

Analysis and synthesis of metabolic networks using principles of thermodynamics, kinetics, and transport phenomena. Computational approaches for predicting metabolic phenotypes. Experimental techniques to measure and manipulate key metabolic variables including pathway fluxes, protein/gene expression, enzyme regulation, and intracellular metabolite concentrations. Prerequisite: BSCI 1510 or CHBE 2150; junior standing. [3]

CHBE4820 - Immunoengineering

Course Description

Approaches and technologies for manipulating and studying the immune system. Topics include fundamentals of immunology, immunology tools and methods, vaccines and immunotherapies, drug delivery principles, and materials engineering for immunomodulation. Prerequisite: ChBE 2150 or BSCI 1510. [3]

CHBE4825 - Biomaterials for Drug Delivery

Course Description

Overview, design, and characterization of biomaterials used in biological systems for drug delivery. Molecular principles, polymer synthesis, controlled release, stimuli-responsive materials, biomimetic materials, biological considerations, and delivery strategies. Emphasis on rational design, transport, and applications. Serves as repeat credit for BME 4340. Prerequisite: ChBE 2150 or BSCI 1510. Corequisite: ChBE 3350 or BME 3000. [3]

CHBE4830 - Molecular Simulation

Course Description

Modern tools of statistical mechanics, such as Monte Carlo and molecular dynamics simulation, and variations. Methods, capabilities, and limitations of molecular simulation and applications to simple and complex fluids relevant to the chemical and related processing industries. Prerequisite: CHBE 2200 or ME 2220 or CHEM 3310. [3]

CHBE4840 - Synthesis and Applications of 2D Nanomaterials

Course Description

Structure-property relationships and applications of atomically thin, two-dimensional materials and 2D/layered systems. Preparation by mechanical exfoliation, solution processing, and bottom-up synthesis. Nucleation/growth of 2D materials via gas/solid, liquid/solid, and catalytic/phase transformation reactions. Kinetic vs. thermodynamic processing, stabilizing meta-stable intermediates, interface engineering, and scale-up. Prerequisite: CHEM 1602 or MSE 1500; junior standing. [3]

CHBE4850 - Semiconductor Materials Processing

Course Description

Materials processing unit operations of silicon device manufacturing. Basic semiconductor physics and device theory, production of substrates, dopant diffusion, ion implantation, thermal oxidation and deposition processes, plasma deposition processes, photolithography, wet chemical and plasma etching, and analytical techniques. Lectures alternate with one two-hour laboratory on a weekly basis. FALL. [3]

CHBE4860 - Molecular Aspects of Chemical Engineering

Course Description

Integration of molecular chemistry, property-based thermodynamic descriptions, and a focus on intermolecular energetics for process analysis and product design. Case studies involve molecular, macromolecular, supramolecular, and biomolecular systems. Prerequisite: CHEM 2211 or 2221; CHBE 2200. [3]

CHBE4870 - Polymer Science and Engineering

Course Description

Macromolecular systems with emphasis on the interrelationship of chemical, physical, and engineering properties. Further relation of these properties to synthesis. Physicochemical and biological applications. Prerequisite: CHBE 2200, a basic understanding of organic and physical chemistry. [3]

CHBE4875 - Colloid Science and Engineering

Course Description

Fundamental concepts (surface forces, self-assembly, electrokinetics) and experimental techniques (microscopy, scattering, measurement of charge) in colloid science. Applications to personal care products, energy devices, and drug delivery. Prerequisite: ChBE 2200, ChBE 3300. [3]

CHBE4880 - Corrosion Science and Engineering**Course Description**

Aqueous-phase metal and alloy corrosion phenomena. Fundamental chemistry and electrochemistry theories, as applied to corroding systems. Specific forms of corrosion including pitting, crevice corrosion, and galvanic corrosion. Methods for corrosion control based on electrochemical fundamentals. Prerequisite: CHBE 3300. SPRING. [3]

CHBE4900W - Chemical Engineering Laboratory II**Course Description**

Laboratory experiments in unit operations covering reactions and separations. Interpretation of data for equipment and process design. Methods of hazard analysis, their application to lab-scale unit operations, and the scale-up of chemical processes from laboratory data. Written reports and oral presentations are emphasized. One 5-hour laboratory per week. Prerequisite: CHBE 3200, CHBE 3250, CHBE 3350, CHBE 3900W or BME 3900W or CHEM 3315. FALL. [3]

CHBE4950W - Chemical Engineering Process and Product Design**Course Description**

A systematic approach to design and safety practices for chemical process operations leading to the identification of a team-based capstone design project. Design, economic evaluation of alternatives, ethics, and cost and safety analysis of chemical, biological, and petroleum process and products. Systems-based process integration design methodologies. Steady-state simulation using chemical engineering design software. Three lecture hours and one two-hour laboratory each week. Prerequisite: CHBE 3200, CHBE 3250, CHBE 3350. FALL. [4]

CHBE4951W - Chemical Engineering Design Projects**Course Description**

Continuation of a team-based design project from ChBE 4950W. Evaluations through periodic oral and written presentations, a final written report, and a poster report. Emphasis on design tools and methodologies, economic assessment, and hazard analysis leading to a recommended chemical product or process design that meets key safety and economic criteria. Prerequisite: CHBE 4950W. SPRING. [3]

CHBE4959 - Professional Practice of Safety in Chemical Engineering Design**Course Description**

Elements of professional engineering practice. Hazard analysis methodologies applied to chemical products and processes are emphasized and applied to lab-scale unit operations. Professional practice of the design of safe chemical products and processes is examined through case studies. Corequisite: ChBE 4950W. FALL. [1]

Chemistry

CHEM1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE Credit)

CHEM1010 - Introductory Chemistry**Course Description**

General principles for non-science majors or those not planning on taking additional chemistry courses. The periodic table, chemical reactions, properties of solutions, and atmospheric chemistry with connections to global environmental issues. No prior chemistry experience required. Not a prerequisite for advanced courses in chemistry. Not open to students who have earned credit for CHEM 1601, 2211, or 2221 without permission. Total credit for this course and 1601, 2211, or 2221 will not exceed 3 credit hours. Credit reduced from second course taken (or test or transfer credit) as appropriate. [3] (MNS) (CORE B) (LE MNS)

CHEM1010L - Introductory Chemistry Laboratory**Course Description**

Laboratory to accompany 1010. One three-hour laboratory per week. Satisfies the AXLE lab course requirement when completed with 1010. Not open to students who have earned credit for CHEM 1601L or 2221L without permission. Total credit for this course and 1601L or 2221L will not exceed 1 credit hour. Credit reduced from second course taken (or test or transfer credit) as appropriate. Corequisite: 1010. [1] (No AXLE credit)

CHEM1020 - Introductory Chemistry**Course Description**

General principles for non-science majors or those not planning on taking additional chemistry courses. Chemistry of water, basic nuclear chemistry, organic and biochemistry, with discussion of the chemistry of common medicines and nutritional chemistry. No prior chemistry experience required. Not a prerequisite for advanced courses in chemistry. Not open to students who have earned credit for CHEM 1602, 2212, or 2222 without permission. Total credit for this course and 1602, 2212, or 2222 will not exceed 3 credit hours. Credit reduced from second course taken (or test or transfer credit) as appropriate. [3] (MNS)

CHEM1020L - Introductory Chemistry Laboratory**Course Description**

Laboratory to accompany 1020. One three-hour laboratory per week. Satisfies the AXLE lab course requirement when completed with 1020. Not open to students who have earned credit for CHEM 1602L or 2222L without permission. Total credit for this course and 1602L or 2222L will not exceed 1 credit hour. Credit reduced from second course taken (or test or transfer credit) as appropriate. Corequisite: 1020. [1] (No AXLE credit)

CHEM1030 - The Chemistry of French Culture**Course Description**

Chemistry through the lens of French culture: food, art, terroir, and the commitment to sustainability. Taught in English. Intended for non-science majors. No prior chemistry experience required; not a prerequisite for advanced courses in chemistry. Not open to students who have earned credit for CHEM 1601, 2211, or 2221 without permission. Total credit for this course and 1601, 2211, or 2221 will not exceed 3 credit hours. Credit reduced from second course taken (or test or transfer credit) as appropriate. [3] (MNS)

CHEM1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

CHEM1601 - General Chemistry**Course Description**

General principles of chemistry for science and engineering students. Composition and structure of matter, chemical reactions, bonding, solution chemistry, and kinetics. Thermodynamics, equilibrium, acids and bases, electrochemistry, and coordination compounds. Three lectures per week and a recitation period. Not open to students who have earned credit for CHEM 1010 without permission. Serves as repeat credit for 1010.

Corequisite: 1601L. [3] (MNS) (CORE B) (LE MNS)

CHEM1601L - General Chemistry Laboratory**Course Description**

Laboratory to accompany 1601. One three-hour laboratory per week. Satisfies the AXLE lab course requirement when completed with 1601. Not open to students who have earned credit for CHEM 1010L without permission.

Serves as repeat credit for CHEM 1010L. Prerequisite or corequisite: 1601. [1] (No AXLE credit)

CHEM1602 - General Chemistry**Course Description**

Continuation of 1601. General principles of chemistry for science and engineering students. Composition and structure of matter, chemical reactions, bonding, solution chemistry, and kinetics. Thermodynamics, equilibrium, acids and bases, electrochemistry, and coordination compounds. Three lectures per week and a recitation period. Not open to students who have earned credit for CHEM 1020 without permission. Serves as repeat credit for 1020. Prerequisite: 1601. Corequisite: 1602L. [3] (MNS) (CORE D) (LE MNS)

CHEM1602L - General Chemistry Laboratory**Course Description**

Laboratory to accompany 1602. One three-hour laboratory per week. Satisfies the AXLE lab course requirement when completed with 1602. Not open to students who have earned credit for CHEM 1020L without permission.

Serves as repeat credit for CHEM 1020L. Prerequisite: 1601L. Corequisite: 1602. [1] (No AXLE credit)

CHEM2100 - Introduction to Analytical Chemistry**Course Description**

Fundamental quantitative analytical chemistry with emphasis on principles of analysis, separations, equilibria, stoichiometry and spectrophotometry. Prerequisite: CHEM 1602 and CHEM 1602L. Corequisite: 2100L. [3] (MNS)

CHEM2100L - Analytical Chemistry Laboratory**Course Description**

Laboratory to accompany Chemistry 2100. One four-hour laboratory per week. Satisfies the AXLE lab course requirement when completed with 2100. Prerequisite or corequisite: 2100. [1] (No AXLE credit)

CHEM2211 - Organic Chemistry for Advanced Placement Students**Course Description**

Fundamental types of organic compounds; their nomenclature, classification, preparations, reactions, and general application. Three hours of lecture and one hour of recitation each week. Not open to students who have earned credit for CHEM 2211. Total credit for this course and CHEM 2221 will not exceed 3 credit hours. Prerequisite: enrollment limited to first-year students with advanced placement chemistry scores of 5, or the approval of the director of undergraduate studies. Corequisite: 2221L. [3] (MNS)

CHEM2212 - Organic Chemistry for Advanced Placement Students**Course Description**

Continuation of 2211. Fundamental types of organic compounds; their nomenclature, classification, preparations, reactions, and general application. Three hours of lecture and one hour of recitation each week. Not open to students who have earned credit for CHEM 2222. Total credit for this course and CHEM 2222 will not exceed 3 hours. Prerequisite: enrollment limited to first-year students with advanced placement chemistry scores of 5, or 2211, or the approval of the director of undergraduate studies. Corequisite: 2222L. [3] (MNS)

CHEM2221 - Organic Chemistry**Course Description**

Fundamental types of organic compounds. Nomenclature and classification. Preparations, reactions, and general application. Three hours of lecture and one hour of recitation each week. Serves as repeat credit for CHEM 2211. No credit for graduate students in chemistry. Prerequisite: 1602. Corequisite: 2221L. [3] (MNS)

CHEM2221L - Organic Chemistry Laboratory**Course Description**

Laboratory to accompany 2211 or 2221. One four-hour laboratory per week. Satisfies the AXLE lab course requirement when completed with 2211 or 2221. Prerequisite or corequisite: 2211 or 2221. [1] (No AXLE credit)

CHEM2222 - Organic Chemistry**Course Description**

Continuation of 2221. Fundamental types of organic compounds. Nomenclature and classification. Preparations, reactions, and general application. Three hours of lecture and one hour of recitation each week. Serves as repeat credit for CHEM 2212. Prerequisite: 2211 or 2221. Corequisite: 2222L. [3] (MNS)

CHEM2222L - Organic Chemistry Laboratory**Course Description**

Laboratory to accompany 2212 or 2222. One four-hour laboratory per week. Satisfies the AXLE lab course requirement when completed with 2212 or 2222. Prerequisite or corequisite: 2212 or 2222. [1] (No AXLE credit)

CHEM3010 - Inorganic Chemistry**Course Description**

A survey of modern inorganic chemistry including coordination compounds and the compounds of the main-group elements. Representative reactions and current theories are treated. Prerequisite or corequisite: 3300 or 3310. [3] (MNS)

CHEM3020 - Introduction to Bioinorganic Chemistry**Course Description**

Functions of inorganic elements in living cells. The manner in which coordination can modify the properties of metallic ions in living systems. Prerequisite: 2212 or 2222. [3] (MNS)

CHEM3120 - Instrumental Analytical Chemistry**Course Description**

Chemical and physical principles of modern analytical chemistry instrumentation. Prerequisite: 2100 and either 2212 or 2222. [3] (MNS)

CHEM3135W - Forensic Analytical Chemistry**Course Description**

Techniques, methodologies, data collection, and interpretation. Laboratory experience with drug analysis, toxicology, trace, and arson analysis. Two hours of lecture and one four-hour laboratory per week. Prerequisite: 2100 and 2100L. [3] (MNS)

CHEM3300 - Physical Chemistry: Quantum Mechanics, Spectroscopy, and Kinetics**Course Description**

Chemical kinetics and principles of quantum chemistry applied to molecular structure, bonding, and spectroscopy. Prior study of multivariable calculus is expected. No credit for graduate students in chemistry. Prerequisite or corequisite: PHYS 1501, 1601, or 1911. Prerequisite: CHEM 1602; MATH 1201 or 1301. [3] (MNS)

CHEM3310 - Physical Chemistry: Chemical Thermodynamics and Equilibrium**Course Description**

Chemical thermodynamics and equilibrium, their statistical foundation, and applications to chemical phenomena. Prerequisite or corequisite: PHYS 1501, 1601, or 1911. Prerequisite: CHEM 1602; MATH 1201 or 1301. [3] (MNS)

CHEM3315 - Physical Chemistry Laboratory**Course Description**

Experiments in chemical thermodynamics and kinetics. Data analysis and presentation. No credit for graduate students in chemistry. One three-hour laboratory or one lecture per week. Calculus through Math 2300 recommended. Prerequisite or corequisite: CHEM 3300 or 3310. Prerequisite: 2222L and either MATH 1201 or 1301. [1] (No AXLE credit)

CHEM3320 - Biophysical Chemistry**Course Description**

Applications of chemical thermodynamics, kinetics, quantum chemistry, and spectroscopy in biochemistry and chemical biology. Students interested in an in-depth coverage of these topics are recommended to take CHEM 3300 and CHEM 3310 sequence; not open to students who have completed 3300 and 3310. This course is not eligible for the chemistry major; it is eligible for the chemistry minor. Prerequisite or corequisite: PHYS 1501, 1601, or 1911. Prerequisite: CHEM 1602; MATH 1201 or 1301; and BSCI 1510. [3] (MNS)

CHEM3333 - Special Offering**Course Description**

Topics vary by section and instructor. May be repeated for credit; students may register for more than one section of this course in the same semester. Not eligible toward the major or minor. [3] (MNS)

CHEM3600 - Chemical Literature**Course Description**

Assigned readings and problems in the nature and use of the chemical literature. Prerequisite: 2212 or 2222. [1] (No AXLE credit)

CHEM3610 - Introduction to Nanochemistry**Course Description**

Synthesis, characterization, and assembly of nanoscale materials. No credit for graduate students in chemistry. Prerequisite: 1602. [3] (MNS)

CHEM3630 - Macromolecular Chemistry: Polymers, Dendrimers, and Surface Modifications

Course Description

Synthesis and characterization of macromolecular materials including linear, branched, dendrimetric, and star polymers. Mechanical and physiochemical properties of polymeric types. Kinetics of living polymerization. Applications to nanostructures, templates, and advanced devices. Prerequisite: 1602. [3] (MNS) (CORE B) (LE MNS)

CHEM3710 - Bioorganic Chemistry

Course Description

Essential metabolites including vitamins, steroids, peptides, and nucleotides. Consideration of phosphate esters and the synthesis of oligodeoxynucleotides. Three lectures per week. Prerequisite: 2212 or 2222. Corequisite: BSCI 2520. [3] (MNS)

CHEM3715 - Chemistry of the Coral Reef

Course Description

Application of quantitative analytical chemistry techniques and spectroscopic methods to characterize molecules with potential materials chemistry or medicinal chemistry applications. In-depth chemistry research experience; mandatory participation in all scheduled field research and laboratory sessions. Prerequisite: 2100, 2100L, 2222, 2222L [3] (MNS)

CHEM3841 - Readings for Honors

Course Description

Open only to students in the departmental honors program. General reading supervised by research adviser. [2] (No AXLE credit)

CHEM3842 - Readings for Honors

Course Description

Open only to students in the departmental honors program. Continuation of 3841, with emphasis on research planned. [2] (No AXLE credit)

CHEM3860 - Undergraduate Research

Course Description

Open to students who have earned at least 8 hours of credit and a minimum GPA of 2.7 in chemistry, with consent of the director of undergraduate studies and the sponsoring faculty member. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3] (No AXLE credit)

CHEM3902 - Pedagogy for Chemical Education

Course Description

[Previously listed as CHEM 2620] Pedagogical techniques for the chemistry classroom. Knowledge application in discussion sections and development of teaching materials. Consent of Instructor required for registration. Offered on a graded basis only. May be repeated once for credit. Prerequisite: 2212 or 2222. [1] (No AXLE Credit)

CHEM3980 - Honors Research

Course Description

Open only to students in the departmental honors program. Original research supervised by research adviser, to be reported in thesis form with oral examination thereon. [2-4]

CHEM4050 - Introduction to Organometallic Chemistry**Course Description**

A general description of the preparation, reaction chemistry, molecular structure, bonding, and spectroscopic identification of organometallic compounds of the transition metals. Prerequisite or co-requisite: 3010 or 3020. [3] (MNS)

CHEM4210 - Organic Chemistry III: Structure & Mechanisms**Course Description**

Stereochemistry and conformational analysis; mechanisms of organic reactions; linear free-energy relationships; reactive intermediates. Three lectures and one recitation hour per week. No corequisite lab. Prerequisite: either 2212 or 2222. [3] (MNS)

CHEM4220 - Spectroscopic Identification of Organic Compounds**Course Description**

Theoretical and practical aspects of spectroscopic methods, with an emphasis on NMR spectroscopy, for structural characterization of organic compounds. Prerequisite: 2212 or 2222. [3] (MNS)

CHEM4230 - Physical Organic Chemistry**Course Description**

Structure and bonding in organic molecules. Reactive intermediates and organic reaction mechanisms. Prerequisite: 3300 or 3310. [3] (MNS)

CHEM4240 - Advanced Organic Reactions**Course Description**

A comprehensive study of organic reactions and their application to the preparation of small molecules. Prerequisite: 4210. Three lectures per week. [3] (MNS)

CHEM4350 - Statistical Thermodynamics**Course Description**

Statistical mechanics and chemical equilibrium. Distribution laws, partition functions, and thermodynamic properties of atoms and molecules. Applications to gases, liquids, and solids. Prerequisite: either 3300 or 3310, and Math 2300. [3] (MNS)

CHEM4720 - Drug Design and Development**Course Description**

Concepts of drug design; physical chemistry of drug interactions with receptors, enzymes, and DNA; drug absorption and distribution. Organic chemistry of drug metabolism; mechanism of action for selected therapeutic classes. Prerequisite: 3710 or BSCI 2520. [3] (MNS)

CHEM4965 - Advanced Integrated Laboratory**Course Description**

Multidisciplinary laboratory projects. Experimental design, synthetic techniques, chemical analysis, spectroscopy, and computational methods. Offered on a graded basis only. Limited to senior majors. Prerequisite: 2100, 2100L. [3] (No AXLE credit)

CHEM4966 - Advanced Integrated Laboratory**Course Description**

Continuation of 4965. Offered on a graded basis only. Limited to senior majors. Prerequisite: 4965. [3] (No AXLE credit)

CHEM4980 - Honors Research**Course Description**

Open only to students in the departmental honors program. Original research supervised by research adviser, to be reported in thesis form with oral examination thereon. [2-4] (No AXLE credit)

CHEM4999 - Honors Research**Course Description**

Open only to students in the departmental honors program. Original research supervised by research adviser, to be reported in thesis form with oral examination thereon. [2] (No AXLE credit)

Cherokee

CHRK1101 - Cherokee Language I (Duke)**Course Description**

Taught at Duke. Part of the Less-commonly-taught language consortium. [3]

CHRK1102 - Elementary Cherokee II (Duke)**Course Description**

Taught at Duke. Part of the Less-commonly-taught language consortium. Prerequisite: CHRK 1101. [3]

CHRK2201 - Intermediate Cherokee I (Duke)**Course Description**

Taught at Duke. Part of the Less-commonly-taught language consortium. Prerequisite: CHRK 1102. [3]

CHRK2202 - Intermediate Cherokee II (Duke)**Course Description**

Taught at Duke. Part of the Less-commonly-taught language consortium. Prerequisite: CHRK 2201. [3]

Chinese

CHIN1011 - Basic Chinese**Course Description**

Designed exclusively for students with no previous exposure to the language. The basic pronunciation, grammar, and writing system of Mandarin Chinese. Simple conversation, the pinyin Romanization system, basic Chinese characters, and cultural elements embedded in the language. No credit for students who have earned credit for 1101 or a more advanced Chinese language course. [3] (No AXLE credit)

CHIN1012 - Basic Chinese**Course Description**

Continuation of 1011. No credit for students who have earned credit for 1101 or a more advanced Chinese language course. Prerequisite: 1011. [3] (No AXLE credit)

CHIN1101 - Elementary Chinese I**Course Description**

Introduction to Modern Chinese pronunciation, grammar, conversation, reading, and writing. No credit for students who have earned credit for 1012 or a more advanced Chinese language course. [4] (No AXLE credit)

CHIN1102 - Elementary Chinese II**Course Description**

Continuation of 1101. Introduction to Modern Chinese pronunciation, grammar, conversation, reading, and writing. No credit for students who have earned credit for a more advanced Chinese language course. Prerequisite: 1012 or 1101. [4] (INT) (CORE LA)

CHIN1231 - Calligraphy**Course Description**

Basic skills of writing standard script kaishu. Basic aesthetic of Chinese calligraphy. No Chinese language background necessary. [1] (No AXLE credit)

CHIN2201 - Intermediate Chinese I**Course Description**

Oral and written language training. No credit for students who have earned credit for a more advanced Chinese language course. Prerequisite: 1102. [4] (INT) (CORE LA)

CHIN2202 - Intermediate Chinese II**Course Description**

Continuation of 2201. Language training in oral and written Chinese. No credit for students who have earned credit for a more advanced Chinese language course. Prerequisite: 2201. [4] (INT) (CORE LA)

CHIN2211 - Chinese for Heritage Learners I**Course Description**

Intended for students who have some informal training in listening and speaking Mandarin Chinese. Basic literacy and other aspects of language proficiency. Offered on a graded basis only. No credit for students who have earned credit for a more advanced Chinese language course. [3] (INT) (CORE LA)

CHIN2212 - Chinese for Heritage Learners II**Course Description**

Continuation of 2211. Intended for students who have some informal training in listening and speaking Mandarin Chinese. Basic literacy and other aspects of language proficiency. Offered on a graded basis only. No credit for students who have earned credit for a more advanced Chinese language course. Prerequisite: 2211. [3] (INT) (CORE LA)

CHIN3301 - Advanced Chinese I**Course Description**

Readings in Chinese culture to enhance proficiency in oral and written Chinese. No credit for students who have earned credit for a more advanced Chinese language course. Prerequisite: 2202. [3] (INT) (CORE LA)

CHIN3302 - Advanced Chinese II**Course Description**

Continuation of 3301. Readings in Chinese culture to enhance proficiency in oral and written Chinese. No credit for students who have earned credit for a more advanced Chinese language course. Prerequisite: 3301. [3] (INT) (CORE LA)

CHIN3302W - Advanced Chinese II**Course Description**

Reading and writing essays about modern Chinese culture and society. Repeat credit for 3302. No credit for students who have earned credit for a more advanced Chinese language course. Graded basis only. Prerequisite: 3301. [3] (INT)

CHIN3851 - Independent Study**Course Description**

Designed primarily for majors who want to study Chinese not regularly offered in the curriculum. Must have consent of instructor. May be repeated for a total of 12 credits in 3851 and 3852 combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum 12 credits total for all semesters of CHIN 3851 and 3852] (No AXLE credit)

CHIN3852 - Independent Study**Course Description**

Designed primarily for majors who want to study Chinese not regularly offered in the curriculum. Must have consent of instructor. May be repeated for a total of 12 credits in 3851 and 3852 combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum 12 credits total for all semesters of CHIN 3851 and 3852] (No AXLE credit)

CHIN4001 - Fourth-year Conversational Chinese**Course Description**

Idiomatic usage and strategies for oral communication and understanding of Chinese urban culture and society. Texts drawn from short TV clips reflecting ordinary lives of Beijing people. Prerequisite: 3302. [2] (CORE LA)

CHIN4002 - 4th-Year Conversational Chinese II**Course Description**

Continuation of 4001. Idiomatic usage and strategies for oral communication and understanding of Chinese urban culture and society. Texts drawn from short TV clips reflecting ordinary lives of Beijing people. Prerequisite: 3302. [2] (No AXLE credit) (CORE LA)

CHIN4401 - Business Chinese I**Course Description**

Language skills for listening, speaking, reading, and writing in business environments. Modern China from economic and business perspectives. Prerequisite: 3302 or 3302W. [3] (INT) (CORE LA)

CHIN4402 - Business Chinese II**Course Description**

Continuation of 4401. Language skills for listening, speaking, reading, and writing in business environments. Modern China from economic and business perspectives. Prerequisite: 4401. [3] (INT)

CHIN4403 - Readings in Modern Chinese Media**Course Description**

Books, newspapers, Internet, and television documents and productions pertaining to political, social, and economic issues in China, including foreign trade-related issues. Prerequisite: 3302 or 3302W. [3] (INT)

CHIN4404 - Readings in Modern Chinese Media**Course Description**

Continuation of 4403. Books, newspapers, and Internet sources pertaining to political, social, and cultural issues. Prerequisite: 3302 or 3302W. [3] (INT) (CORE LA)

CHIN4405 - Classical Chinese Literature and Philosophy**Course Description**

Classical writings by Confucius, Sunzi, and Zhuangzi. Poems by Li Bai and Du Fu. Excerpts from The Dream of the Red Chamber. Linguistic comparisons between classical and modern Chinese. Prerequisite: 3302 or 3302W. [3] (INT) (CORE LA)

CHIN4406 - Readings in Modern Literary Chinese**Course Description**

1910 to the present. Chinese literature and poetry. Linguistic transformations that produced modern literary Chinese. Prerequisite: 3302 or 3302W. [3] (INT) (CORE LA)

Cinema and Media Arts

CMA1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

CMA1002W - Moving Images and Analytical Thinking**Course Description**

Moving images and new media from various genres, periods, and national contexts. May be repeated for credit once if there is no duplication in topic. Offered on a graded basis only. [3] (HCA)

CMA1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

CMA1200 - War on Screen**Course Description**

Representations of World War II and the fight against Nazi Germany in Hollywood and other cinemas, contemporary video games, television, and installation art. How current modes of warfare and the global war on terror have changed the conventions of depicting war. Taught in English. [3] (HCA)

CMA1400 - Introduction to Video Games**Course Description**

Scholarly study and technical production of immersive digital experiences. Economic and cultural landscape of video games. No prior experience needed; open to students of all backgrounds and majors. [3] (HCA)

CMA1500 - Fundamentals of Film and Video Production**Course Description**

Technologies and techniques of filmmaking. Digital video cameras, staging and lighting, sound recording, post-production sound, and image editing. Offered on a graded basis only. [3] (HCA) (CORE A, B)

CMA1600 - Introduction to Film and Media Studies**Course Description**

Stylistic tendencies and narrative strategies, genres, and theoretical approaches. Live-action cinema, animation, experimental cinema, television, and computer-generated moving images. [3] (HCA) (CORE B, C) (LE HFA)

CMA1820W - Virtual Worlds**Course Description**

Virtual reality promises to immerse users in places and moments that were once inaccessible. History of human attempts to conquer space and time to achieve "presence" with the distant past, faraway lands, future, and even God. Students design and create analog or digital experiences using virtual worlds as a storytelling device. [3] (P)

CMA2100 - Digital Storytelling, Interactive Narratives and Digital Memory**Course Description**

Impact of digital technologies on narrative, identity, and social memory through readings and creative digital projects. Unique benefits of digital media for effective and meaningful storytelling. Social function and art of storytelling across a variety of digital applications and platforms. No prior technological skills or media arts experience necessary. Offered on a graded basis only. [3] (HCA) (CORE A, D) (LE HFA)

CMA2210 - The Art of Editing**Course Description**

Theory, practice, and art of video post-production with primary emphasis on video editing. Prerequisite: 1500. Serves as repeat credit for CMA 3891, section 01 in Spring 2023, Spring 2024 and Spring 2025 and CMA 3891, section 02 in Fall 2022. [3] (HCA)

CMA2240 - Narrative Filmmaking**Course Description**

Fictional media production. Art and practice of scripted storytelling for cinema, television, and digital media. Offered on a graded basis only. Not open to students who completed CMA 3891-01 offered fall 2022. Prerequisite: 1500. [3] (HCA)

CMA2250 - 16mm Filmmaking**Course Description**

Camera operation, lighting, non-sync sound design, and film pre-production for 16 mm and celluloid film. Offered on a graded basis only. Prerequisite 1500. [3] (No AXLE credit)

CMA2260 - Digital Production Workshop**Course Description**

Digital cinematography, sound design, and editing. Individual and group projects. Offered on a graded basis only. Prerequisite 1500. [3] (No AXLE credit)

CMA2270 - Documentary Filmmaking**Course Description**

Nonfiction media production. History, theory, practice, and ethical considerations of nonfiction modes. Offered on a graded basis only. Not open to students who completed CMA 3891-02 offered spring 2022. Prerequisite: 1500. [3] (HCA)

CMA2290 - Alternate Media Modes**Course Description**

Genres, styles, and techniques outside of the dominant modes of media-making. Emphasis on production. Offered on a graded basis only. [3] (HCA)

CMA2300 - Film and Media Theory**Course Description**

Historical overview of the major analytical and critical approaches to the study of film as an aesthetic and cultural form. Contemporary perspectives on cinema, video, and new media. Prerequisite: 1600. [3] (P)

CMA2301 - Race in Film and Media**Course Description**

Racialization through cinema and modern media's infrastructures and aesthetics. Imbrication of race and audiovisual culture in wider cultural contexts, such as the histories of capitalism, the Civil Rights movement, and questions of gender and sexuality. [3] (HCA) (CORE C, E) (LE HFA)

CMA2302 - Global Queer Cinema and Media**Course Description**

Aesthetics and circulation of queer cinema in different national and transnational contexts. Impacts of queer cinema and theory in relation to globalization, diaspora, and transnational politics. [3] (HCA) (CORE C, E) (LE HFA)

CMA2370 - Film and Media Aesthetics**Course Description**

Cinema, television, and digital media. Advanced historical, cultural, and textual analysis. Form, genre, movements, style, and technology. [3] (HCA)

CMA2400 - History of World Cinema**Course Description**

Survey of world film history from 1895 to the present. Key films and filmmakers. Historical, aesthetic, national, and political contexts of films and film movements. [3] (HCA) (CORE A, C) (LE HFA)

CMA2500W - Screenwriting**Course Description**

Techniques of screenwriting. [3] (HCA)

CMA2510W - Writing for the Stage and Screen**Course Description**

Techniques for writing plays and screenplays with critical attention to dramatic themes and characterization. [3] (HCA)

CMA2530W - Modern Israeli Culture**Course Description**

Social and cultural history of modern Israel from the establishment of the State in 1948 to the present. Representations of national identity, collective belonging, and historical memory in public culture. Offered on a graded basis only. Serves as repeat credit for JS 2530/2530W. [3] (INT)

CMA2600W - Advanced Screenwriting**Course Description**

Story structure, character development, and dialogue. Prerequisite: 2500W. [3] (HCA)

CMA2610 - History of German Film**Course Description**

A curated presentation of the history of German cinema with special emphasis on its sociocultural contexts and artistic achievements. Discussion will include pertinent theories of cinematography and cinematic narration. Taught in English. [3] (INT)

CMA3257 - Virtual Reality Design**Course Description**

Interdisciplinary, project-based introduction to Virtual Reality (VR). Creation of immersive environments. Student projects guided by faculty mentors to create real-world, consequential VR simulations relevant to, and innovative in, their respective fields. Note: This class is not open to students with a Computer Science major or minor, CS students should enroll in CS 4249. Serves as repeat credit for students who have completed UNIV 3279. [3] (MNS)

CMA3333 - Special Offerings**Course Description**

Topics vary by section and instructor. May be repeated for credit; students may register for more than one section of this course in the same semester. [3]

CMA3726 - New Media**Course Description**

History, theory, and design of digital media. Literature, video, film, online games, and other interactive narratives. Not open to students who have completed ENGL 1111 section 60. Serves as repeat credit for CMA 3333 01, section 01 in Fall 2020, and for ENGL 3333, section 01 in Fall 2020. [3] (HCA)

CMA3770 - Russian Cinema**Course Description**

Masterpieces of Russian and Soviet cinema from the silent period to the present. Montage theory, propaganda film, politics of the art house, and rise of the Russian blockbuster. Films by master directors Eisenstein, Vertov, Tarkovsky, Sokurov, and Zvyagintsev. Soviet musicals and contemporary popular cinema. Knowledge of Russian not required. [3] (INT)

CMA3771 - Global Korean Cinema**Course Description**

From the colonial period to the Korean Wave in the new millennium. Film criticism, transnational and national contexts of film production, aesthetics of auteurs and genres, and local and global receptions of Korean cinema. [3] (INT)

CMA3772 - French and Francophone Cinema**Course Description**

The themes and art of film in France and the French-speaking world. Offered in French at Vanderbilt in France and in English at Nashville. When offered in English, this course does not count toward the minor, and writing must be done in French to count toward the major. [3] (INT)

CMA3773 - Classic Italian Cinema**Course Description**

From the 1910s to the 1970s. Selected works from Neorealism to Art Film. Relationship between cinema and the other arts. Contrasting film styles, including abstraction and realism, and tradition and transgression. Knowledge of Italian is not required. [3] (INT)

CMA3774 - Contemporary Italian Cinema**Course Description**

From the 1970s to the present. Postmodern forays into metafiction, parody, and political and social critique. The return to realism and New Regionalism in the twenty-first century. Knowledge of Italian is not required. [3] (HCA)

CMA3850 - Independent Study**Course Description**

Projects are arranged with individual professors and must be confirmed by the director of Cinema and Media Arts within two weeks of the beginning of classes; otherwise the student will be dropped from the rolls. [Variable credit: 1-3 each semester. Limit of 6 hours for 3850 and 3851 combined for majors.] (No AXLE credit)

CMA3851 - Independent Study**Course Description**

Projects are arranged with individual professors and must be confirmed by the director of Cinema and Media Arts within two weeks of the beginning of classes; otherwise the student will be dropped from the rolls. [Variable credit: 1-3 each semester. Limit of 6 hours for 3850 and 3851 combined for majors.] (No AXLE credit)

CMA3880 - Internship Training**Course Description**

Under faculty supervision, students from any discipline can gain experience working on projects related to film and media in public or private organizations. Responsibilities include conducting background research and developing skills in film and media study and production. Hours for background readings and research will be completed in CMA 3881 concurrently with 3880. Normally a 2.90 grade point average, 6 hours of prior work in Cinema and Media Arts, and approval of the student's plan by the director of undergraduate studies are required. A research paper and report must be submitted at the end of the semester during which the internship training is completed. Offered on a Pass/Fail basis only and must be taken concurrently with 3881. Hours of 3880 will not count toward the Film Studies Major or minor. Corequisite: 3881. [Variable credit: 1-9] (No AXLE credit)

CMA3881 - Internship Readings and Research**Course Description**

Under faculty supervision, students from any discipline can gain experience working on projects related to film and media in public or private organizations. Responsibilities include conducting background research and developing skills in film and media study and production. Hours for background readings and research will be completed in CMA 3881 concurrently with CMA 3880. Normally a 2.90 grade point average, 6 hours of prior work in Cinema and Media Arts, and approval of the student's plan by the director of undergraduate studies are required. A research paper and report must be submitted at the end of the semester during which the internship training is completed. Readings and research conducted under the supervision of a member of the Cinema and Media Arts program and a substantial research paper or written project (such as a screenplay, treatment, or production plan related to the Training component) is required. Corequisite: 3880. [Variable credit: 1-6] (No AXLE credit)

CMA3891 - Special Topics in Film and Video Production**Course Description**

Topics vary. May be repeated more than once if there is no duplication of topic. Prerequisite: 1500. [3] (No AXLE credit)

CMA3892 - Special Topics in the Study of Film**Course Description**

Topics vary. May be repeated more than once if there is no duplication of topic. [3] (HCA)

CMA3893 - Special Topics in National Cinema and Movements**Course Description**

Major directors, genres, styles of film-making in a specific national context. May be repeated for credit more than once if there is no duplication in topic. [3] (HCA)

CMA4961 - Senior Seminar on Criticism, Theory, and History**Course Description**

Advanced reading and research in film. Offered on a graded basis only. Prerequisite: 1600 and senior standing. [3] (No AXLE credit)

CMA4962 - Senior Seminar on Film Practice**Course Description**

Advanced independent filmmaking, portfolio assembly, and professionalism. Offered on a graded basis only. Prerequisite: 1500 and senior standing. [3] (No AXLE credit)

CMA4998 - Senior Honors Research**Course Description**

Acquisition, reading, and analysis of primary source research material. Open only to senior honor students. [3]
(No AXLE credit)

CMA4999 - Senior Honors Thesis**Course Description**

Writing a thesis under the supervision of the thesis advisor. Open only to senior honor students. Prerequisite: 4998. [3] (No AXLE credit)

Civil Engineering

CE2101 - Civil and Environmental Engineering Information Systems**Course Description**

Information technologies used by civil and environmental engineers. Lab and project-oriented course focusing on developing skills in engineering drawings, computer graphics, plans reading, leveling, mapping, and GIS. Integration of CAD and surveying with team-based projects. FALL [3]

CE2120 - Sustainable Design in Civil and Environmental Engineering**Course Description**

Concepts and methods of sustainability; resilience in civil engineering design. Best practices. Economic, social, and environmental analysis. Ratings, indices, and measurements. Local, regional, and federal policy. Challenges posed by climate change. Sustainability and resilience rating systems. Applications to development and design. FALL. [3]

CE2200 - Statics**Course Description**

Vector analysis of two- and three-dimensional equilibrium of particles, rigid bodies, trusses, frames, and machines. Internal forces, shear and moment diagrams, cables, centroids, moments of inertia, and friction. Credit offered for only one of CE 2200 or BME 2100. Corequisites: MATH 1301, PHYS 1601. FALL, SPRING, SUMMER [3]

CE2205 - Mechanics of Materials**Course Description**

Stress and strain; tension, compression, and shear; Hooke's law, Mohr's circle, combined stresses, strain-energy. Beams, columns, shafts, and continuous beams. Deflections, shear and moment diagrams. Prerequisite: CE 2200. FALL, SPRING, SUMMER. [3]

CE2860 - Introduction to Undergraduate Research**Course Description**

Introduction to undergraduate research under the direction of a Civil and Environmental Engineering faculty member. Students in the School of Engineering may only receive open elective credit for any course numbered 2860. [1-3]

CE2989 - Numerical Methods in Civil and Environmental Engineering

Course Description

Introduction to concepts, algorithms, and methods of numerical analysis, including: (i) linear algebra and matrix computations concepts; (ii) solving linear and nonlinear systems of equations; (iii) matrix decompositions; (iv) Newton's method and its variants; (v) stability and convergence of numerical methods; (vi) numerical interpolation and integration; (vii) finite-difference methods for solving differential equations; (viii) optimization problems and linear programming. Applications to basic problems in civil and environmental engineering. Prerequisite: CS 1100 or 1101 or 1103 or DS 1100. Corequisite: MATH 2420. SPRING [3].

CE3100W - Civil and Environmental Engineering Laboratory

Course Description

A team project-oriented course that integrates principles of engineering design, simulation, and experimentation as applied to civil engineering. Emphasis on experimental design, data analysis, and technical communication. Prerequisite: CE 2205. SPRING. [2]

CE3200 - Structural Analysis

Course Description

Classification; nature of loads and their calculation; analysis of statically determinate and indeterminate beams, trusses, and frames using classical methods (integration, moment area, energy) and matrix methods; basics of nonlinear behavior; structural analysis software. Prerequisite: CE 2205. FALL. [3]

CE3205 - Structural Design

Course Description

Loads and their identification; issues of safety and uncertainties; steel and concrete behavior and design of components in compression, tension, bending, shear; application to simple structural systems; use of the AISC Steel Specifications; sustainability issues. Prerequisite: CE 3200. SPRING [3]

CE3250 - Geotechnical Engineering

Course Description

Origin, formation, identification, and engineering properties of soils. Discussion on index properties, soil moisture, soil structure, compressibility, shear strength, stress analysis, Rankine and Coulomb earth pressure theories and bearing capacity. Laboratory experiences. Graduate credit for earth and environmental sciences majors. Prerequisite: CE 2205. FALL. [3]

CE3300 - Risk, Reliability, and Resilience Engineering

Course Description

Fundamental concepts in probability and statistical inference. Counting methods, discrete and continuous random variables, and their associated distributions. Sampling distributions, point estimation, confidence intervals, and hypothesis testing. Applications of probability and statistics to risk, reliability, and resilience of engineering systems. Prerequisite: MATH 2300. SPRING. [3]

CE3501 - Transportation Systems Engineering

Course Description

Planning, design, and operations of transportation systems. Particular emphasis on the design process, traffic engineering, urban transportation planning, the analysis of current transportation issues, and the ethics of transportation safety. SPRING. [3]

CE3700 - Fluid Mechanics

Course Description

Physical properties of fluids, fluid statics; integral and differential equations of conservation of mass, energy, and momentum; principles of real fluid flows: boundary layer effects, flow through pipes, flow in open channels, drag forces on bodies. Emphasis on civil and environmental engineering applications. Credit not awarded for both CE 3700 and ME 3224. Prerequisite: ME 2190, MATH 2420. FALL, SUMMER. [3]

CE3700L - Fluid Mechanics Laboratory

Course Description

Team project-oriented course. Practical applications of fluid mechanics principles through laboratory exercises and field trips. Corequisite: CE 3700. FALL. [1]

CE3705 - Water Resources Engineering

Course Description

Engineering of water resources and sewerage systems that control the quantity, quality, timing, and distribution of water to support human habitation and the needs of the environment. Closed conduit flow, open channel flow, surface hydrology, groundwater hydrology, and contaminant transport. Prerequisite: CE 3700 or CHBE 3300 or ME 3224. SPRING. [3]

CE3841 - Directed Study

Course Description

Directed individual study of a pertinent topic in civil and environmental engineering. May include literature review and analysis, analytical investigations, and/or experimental work. Prerequisite: Junior standing, completion of two CE courses, and one-page proposal approved by supervising faculty member and chair. [1-3 each semester]

CE3842 - Directed Study

Course Description

Continuation of CE 3841 in the same or another area of civil and environmental engineering. Prerequisite: CE 3841 and one-page proposal approved by supervising faculty member and chair. [1-3 each semester]

CE3843 - Directed Study

Course Description

Continuation of CE 3842 in the same or another area of civil and environmental engineering. Prerequisite: CE 3842 and one-page proposal approved by supervising faculty member and chair. [1-3 each semester]

CE3860 - Undergraduate Research

Course Description

Independent research under the direction of a Civil and Environmental Engineering faculty member. Prerequisite: Junior standing or consent of the faculty adviser. No more than 6 hours of courses numbered 3860 and 3861 can be credited toward the degree. [1-3]

CE3861 - Undergraduate Research

Course Description

A continuation of research in 3860 or in a different area of Civil and Environmental Engineering. No more than 6 hours of courses numbered 3860 and 3861 can be credited toward the degree. [1-3]

CE3890 - Special Topics**Course Description**

0-3

CE4100 - Geographic Information Systems (GIS)**Course Description**

Principles of computerized geographic information systems (GIS) and analytical use of spatial information. Integration with global positioning systems (GPS) and internet delivery. Includes GIS software utilization and individual projects. SPRING. [3]

CE4150 - Energy Systems Engineering**Course Description**

Physical principles of energy conversion. Energy sources and usage. Sustainability and carrying capacity. Systems tools and economics for energy systems. Energy distribution and storage. Future energy system design. Prerequisite: MATH 2300. SPRING. [3]

CE4200 - Advanced Structural Steel Design**Course Description**

Advanced topics in column and beam design: elastic and inelastic analysis and design of continuous beams, composite beams, torsion design, behavior and design of bolted and welded connections, structural planning and design of structural systems such as multistory buildings. Prerequisite: CE 3205. FALL. [3]

CE4205 - Intelligent Transportation Systems**Course Description**

Elements of intelligent transportation system (ITS) architecture. Survey of component systems. Analysis of potential impacts. Field operational tests, analysis methods, deployment initiatives and results. SPRING. [3]

CE4210 - Advanced Reinforced Concrete Design**Course Description**

Design and behavior of two-way slab systems. Yield line theory. Shear and torsion analysis and design. Serviceability requirements and control of deflections of reinforced concrete systems. Prestressed concrete. Prerequisite: CE 3205. SPRING. [3]

CE4211 - Mechanics of Composite Materials**Course Description**

Review of constituent materials (reinforcements, matrices, and interfaces) and fabrication processes. Prediction of properties of unidirectional and short fiber materials (micromechanics). Anisotropic elasticity (derivation of Hooke's law for anisotropic materials, macromechanics of laminated composites). Analysis of laminated composites based on Classical Lamination Theory. Behavior of composite beams and plates. Special topics (creep, fracture, fatigue, impact, and environmental effects). Prerequisite: CE 2205, MSE 1500, MSE 1500L. SPRING. [3]

CE4240 - Infrastructure Systems Engineering**Course Description**

Systems-level approach to the infrastructure of the built environment. Elements of systems engineering. Case studies of infrastructure under duress. Smart infrastructure. Transportation, building, and water and wastewater supply and distribution systems. Infrastructure interdependencies and concepts of smart cities. Applications to infrastructure system design. FALL. [3]

CE4250 - Foundation Analysis and Design**Course Description**

Study of shallow and deep foundation elements and systems for civil engineering structures considering geotechnical, structural, and construction aspects. Corequisite: CE 3205. SPRING. [3]

CE4300 - Reliability and Risk Case Studies**Course Description**

Review of historical events involving successes and failures in managing system reliability and risk from a wide range of perspectives, including design, production, operations, organizational culture, human factors and exogenous events. Analysis of risk factors leading to event occurrence, as well as event consequences in terms of impacts to public health, safety, security and environmental protection. Evaluation of risk mitigation strategies based on achievable goals, technical and political feasibility, and economic impact. Cases drawn from natural disasters, industrial accidents, and intentional acts. Prerequisite: Junior standing. FALL. [3]

CE4320 - Data Analytics for Engineers**Course Description**

Programming, analysis, and visualization of real data for the purposes of informing decision making in engineering problems. Statistical modeling in a practical and applied perspective; application of data analytics to bridge the gap between data and decisions; fundamentals of design of experiments. Prerequisite: CE 3300 or MATH 2810 or MATH 2820. FALL. [3]

CE4340 - Risk and Decision Analysis**Course Description**

Risk quantification, risk perception, decision-making under uncertainty, risk communication. Model risk and decisions using analytical and simulation approaches. Focus on theory and methodology, applications in engineering, environmental systems, business, and healthcare. Prerequisite: CE 3300 or MATH 2810 or MATH 2820. FALL. [3]

CE4400 - Construction Project Management**Course Description**

Theory and application of the fundamentals of construction project management. The construction process and the roles of professionals in the process. Overview of the construction project from conception through completion. Application of management practices including planning, directing, cost minimizing, resource allocation, and control of all aspects of construction operations and resources. Credit given for only one of ENGM 3700, CE 4400, or EECE 4950. Prerequisite: CE 3205. FALL. [3]

CE4401 - Advanced Construction Project Management**Course Description**

Current and critical issues in the construction industry, including best practices developed at the Construction Industry Institute (CII). Guest lecturers include representatives of the CII and visiting industry leaders. Prerequisite: CE 4400. FALL. [3]

CE4405 - Construction Estimating**Course Description**

Estimation of material, labor, and equipment quantities, including costing and pricing of construction projects. Application of estimating practices using real-world examples and project estimating software. Corequisite: CE 4400. FALL. [3]

CE4410 - Construction Planning and Scheduling

Course Description

Fundamentals of construction planning and scheduling. Application of management practices including: process planning; directing, costing; resource allocation; and controlling all aspects of construction operations and resources, from pre-construction through operation and maintenance. Use of real-world examples and project scheduling software. Prerequisite: CE 4400. SPRING. [3]

CE4415 - Construction Materials and Methods

Course Description

Implications of design realities, material specifications, code limitations, and regulations on the construction process. Natural and man-made materials, construction techniques, and other issues that impact quality, constructability, and life-cycle assessment. SUMMER. [3]

CE4420 - Construction Law and Contracts

Course Description

Review of case studies involving successes and failures in legal principles and landmark cases relevant to civil engineering and construction. Contracts, torts, agency and professional liability, labor laws, insurance, expert testimony, arbitration, patents and copyrights, sureties, and ethics. Prerequisite: CE 4400. SPRING. [3]

CE4425 - Building Information Modeling

Course Description

Generation and management of building data during its life cycle. Three-dimensional, real-time, dynamic modeling to increase productivity in building design and construction. Considerations of building geometry, spatial relationships, geographic information, and building components. Corequisite: CE 4400. FALL. [3]

CE4430 - High Performance and Green Buildings

Course Description

Design and construction of high performance buildings and related systems in buildings. Leadership in Energy and Environmental Design (LEED) green Building Rating System (TM) building approach to sustainability. Prerequisite: CE 4400. SPRING. [3]

CE4500 - Transportation Systems Design

Course Description

Geometric analysis of transportation ways with particular emphasis on horizontal and vertical curve alignment and superelevation. Design of highways, interchanges, intersections, and facilities for pedestrians, and air, rail, and public transportation. Prerequisite: CE 3501 or 3601. SPRING. [3]

CE4505 - Urban Transportation Planning

Course Description

Analytical methods and the decision-making process. Transportation studies, travel characteristic analysis, and land-use implications are applied to surface transportation systems. Emphasis is on trip generation, trip distribution, modal split, and traffic assignment. Planning processes in non-urban settings are also presented. Prerequisite: CE 3501 or CE 3601. SPRING [3]

CE4510 - Traffic Engineering**Course Description**

Analysis of the characteristics of traffic, including the driver, vehicle, volumes, capacities, congestion, roadway conditions, complete streets and accidents. Traffic regulations, markings, signing, signalization, and safety programs are also discussed. Prerequisite: CE 3501 or CE 3601. FALL. [3]

CE4950 - Civil Engineering Design I**Course Description**

A capstone design course for civil engineering students. Includes project conception, design, economic evaluations, safety, reliability, ethics, social and environmental impact, licensure, and government regulations. Projects may be interdisciplinary, competition-oriented, or traditional civil engineering projects. Prerequisite: CE 3205. FALL [1].

CE4951 - Civil Engineering Design II**Course Description**

Continuation of CE 4950. The course involves an oral presentation and the submission of a final design report. Prerequisite: CE 4950. SPRING. [2]

CE4959 - Senior Engineering Design Seminar**Course Description**

Elements of professional engineering practice. Professionalism, licensing, ethics and ethical issues, intellectual property, contracts, liability, risk, reliability and safety, interdisciplinary teams and team tools, codes, standards, professional organizations, careers, entrepreneurship, human factors, and industrial design. Prerequisite: senior standing. Corequisite: CE 4950. FALL. [1]

Classical Hebrew

CHEB1101 - Beginning Classical Hebrew I**Course Description**

Alphabet, basic grammar, and vocabulary. Short readings from the Bible. No credit for students who have earned credit for a more advanced Classical Hebrew language course. Offered on a graded basis only. [3] (No AXLE credit)

CHEB1102 - Beginning Classical Hebrew II**Course Description**

Transition to extensive reading of the Bible. No credit for students who have earned credit for a more advanced Classical Hebrew language course. Offered on a graded basis only. Prerequisite: 1101. [3] (INT) (CORE LA)

CHEB2200 - Intermediate Classical Hebrew**Course Description**

Review of grammar and expanding vocabulary. Selected readings in prose and poetry from the Bible. No credit for students who have earned credit for a more advanced Classical Hebrew language course. Prerequisite: 1102. [3] (INT) (CORE LA)

CHEB2300 - Ugaritic
Course Description

Orthography, phonology, morphology, and syntax. Introduction to approaches of comparative Semitics and historical Hebrew grammar. Selected readings from various genres illustrating language and literature of ancient Canaan. Prerequisite: 1102. [3] (INT (CORE LA))

CHEB3010 - Historical Hebrew Grammar
Course Description

Linguistic origins and development within Northwest Semitic subgroup. Phonology, morphology, and lexicon. Theory and method in historical linguistics and comparative Semitics. Selected readings in literary, documentary, and epigraphic texts. Prerequisite: 2200. [3] (HCA)

CHEB3020 - Classical Hebrew Poetry
Course Description

History and genres of ancient verse. Selected readings from the Bible, including Job and Psalms. Prerequisite: 2200. [3] (HCA)

CHEB3030 - West Semitic Inscriptions
Course Description

Orthography, phonology, morphology, and syntax. Studying Hebrew, Aramaic, Phoenician, and Moabite epigraphic texts. Theory and method in historical linguistics and comparative Semitics. Prerequisite: 2200. [3] (HCA)

Classics

CLAS1001 - Commons iSeminar
Course Description

Topics vary. General Elective credit only. [1] (No AXLE credit)

CLAS1010 - Introduction to Mediterranean Studies
Course Description

History and geography of southern Europe, north Africa, and Near East from Iron Age through Middle Ages (ca. 1000 BCE-1500 CE). Greeks, Romans, and related peoples. Abrahamic religions. Case studies in complexity and change, community and identity, innovation and prosperity, power and conflict, and environment and cosmos. Cultural transmission and reception. [3] (INT) (CORE C, E) (LE HFA)

CLAS1020 - Introduction to Mediterranean Archaeology
Course Description

Iron Age through Middle Ages (ca. 1000 BCE-1500 CE). Remains of Greeks, Romans, and related peoples of southern Europe, north Africa, and the Near East. Society, economy, religion, urbanism. Human settlement and natural environment. Classical and Renaissance paradigms. Modern theory of material and visual culture. Techniques of data collection, analysis, and curation [3] (SBS) (CORE C) (LE HFA)

CLAS1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

CLAS1120 - Greek Civilization**Course Description**

A survey of the history and achievements of Greece from its Mycenaean origins to the Roman domination. Topics include literature, art, athletics, Periclean Athens, the conquest of Alexander, and the Hellenistic age. [3] (INT) (CORE B, C) (LE HFA)

CLAS1130 - The Greek Myths**Course Description**

A study of the nature of the Greek myths, with consideration of the related Near Eastern myths and the early history of myths in Greece. Both the divine and the heroic myths, with some attention to the development of these myths in Italy and to their influence upon art and literature. [3] (HCA) (CORE C) (LE HFA)

CLAS1140 - Ancient Medicine and Its Legacy**Course Description**

Theories and practices of medicine in the ancient Greco-Roman world; Hippocratic and Galenic writings. Ethics and socio-cultural values. Interactions with philosophical traditions. The Classical heritage of modern medicine. [3] (SBS) (CORE C) (LE HFA)

CLAS1150 - Roman Civilization**Course Description**

Ancient Roman civilization from mythical foundations to the fall of the empire. A historical survey of topics including art and architecture, city life, agriculture, religion, law, slavery, public entertainment, and literature. [3] (INT) (CORE B, C) (LE HFA)

CLAS1200W - Classics and Contemporary Culture**Course Description**

Reception and appropriation of Greco-Roman culture by the Western world and its relationship to contemporary critical issues. Sociopolitical concerns, including racism, colonialism, and political extremism. Offered on a graded basis only. [3] (P) (CORE A, E) (LE HFA)

CLAS2100 - History of the Ancient Near East**Course Description**

From the neolithic period to the conquests of Alexander the Great, in the geographical area from Persia to Troy and Egypt. Special attention to the history of Israel. [3] (INT)

CLAS2110 - History of Greece to Alexander the Great**Course Description**

The Greek world from the beginning of the Mycenaean Age (1650 B.C.) to the end of the Classical period. Special attention to the relationship between political history and the development of Hellenism. [3] (INT)

CLAS2120 - The Greek World from Alexander the Great to the Roman Empire**Course Description**

The eastern Mediterranean from the rise of Macedon and Alexander the Great to the High Roman Empire. Social, cultural, political, and religious changes. Issues of imperialism and colonialism, and questions of identity in a geographically expansive Greek world. [3] (INT)

CLAS2150 - History of the Roman Republic**Course Description**

The growth and evolution of the Roman world, from the foundation of the city in the seventh century B.C. to the reign of Caesar Augustus. The Romans' unification of Italy, conquest of the Mediterranean and western Europe, adoption of Hellenism, and overthrow of the Republic. [3] (INT)

CLAS2160 - History of the Roman Empire**Course Description**

The Roman world from Augustus to the collapse of the western empire in the fifth century. Political, military, social, and religious history. Special attention given to problems arising from use of the primary sources as well as to controversies in modern scholarship. [3] (INT)

CLAS2180 - The Mediterranean World from Late Antiquity to the Middle Ages**Course Description**

Eastern Roman Empire from Constantine to Arab conquests. Political, social, cultural, and religious history, including monasticism, barbarian invasions, changing roles of Emperor and Church, and birth of Islam. Developments in urban life and landscape. [3] (INT)

CLAS2200 - Archaic and Classical Greek Art and Architecture, 1000 to 400 B.C.E.**Course Description**

Sculpture, vase painting, architecture, and the minor arts. Formal and stylistic developments in relation to changing cultural background. [3] (HCA)

CLAS2210 - Late Classical Greek and Hellenistic Art and Architecture**Course Description**

Sculpture, vase painting, architecture, and the minor arts from after the Parthenon to the Roman Empire. Media that developed significantly in this period, such as wall painting and mosaic. [3] (HCA)

CLAS2220 - Cities of the Ancient Mediterranean World: Architecture & Built Environments**Course Description**

Comparative studies around the Mediterranean and adjacent regions, 4th millennium BCE to 4th century CE. Origins and evolution; environmental, social, and economic determinants of urban form; city planning and amenities; engineering and architecture. Formal, material, comparative, and theoretical approaches. Serves as repeat credit for HART 2200. No credit for students who have earned credit for HART 5200. [3] (SBS)

CLAS2250 - Roman Art and Architecture**Course Description**

Sculpture, architecture, and painting from the tenth century B.C.E. to the early fourth century C.E. Daily life of the Romans as seen in excavations of the towns of Pompeii and Herculaneum. Serves as repeat credit for HART 2250. [3] (HCA) (CORE: C) (LE: HFA)

CLAS2260 - The Art of Pagans, Christians, and Jews**Course Description**

Religious art of the Roman Empire in late antiquity. Visual art reflecting religious beliefs and practices. Greco-Roman cults, early Christianity, and Rabbinical Judaism. [3] (HCA)

CLAS2270 - Early Christian and Byzantine Art**Course Description**

The development of architecture, sculpture, painting, and the minor arts from the third through eleventh centuries. Serves as repeat credit for HART 2270. [3] (HCA) (CORE: A, C) (LE: HFA)

CLAS2300 - Ancient Science**Course Description**

Major traditions of scientific thought and practice in the ancient Mediterranean world: emergence, aims, methods and achievements. Relationship between science and society, ancient and modern. [3] (SBS)

CLAS3000 - Classical Tradition in America**Course Description**

Influences of classical Greece and Rome on the literature, politics, architecture, and values of the United States from the colonial period to the present. [3] (US)

CLAS3010 - The Ancient Origins of Religious Conflict in the Middle East**Course Description**

Religious oppositions in the eastern Mediterranean world from the Maccabean revolt to the Muslim conquests of the seventh century; beginnings of religious militancy; challenges of monotheism to Greco-Roman civilization; conversion, persecution, and concepts of heresy and holy war in Christianity, Judaism, and Islam. [3] (P)

CLAS3020 - The Classical World on Film**Course Description**

Modern cinematic depictions of the mythology, drama, and history of ancient Greece and Rome, accompanied by readings from ancient sources. The Trojan War, Greek tragedy, and the Roman empire. Emphasis on how antiquity is used to express modern concerns and ideologies. [3] (HCA)

CLAS3030 - Death, Disease, and Health in the Ancient World**Course Description**

From the Bronze Age to early Christianity and Late Antiquity. Biological history of the Greeks, Romans, and other Mediterranean peoples. Changing concepts of death and afterlife; interpretations of disease; medical thought and practice. Healing, epidemics, natural catastrophe, and dietary variation. Evidence from classical literature, archaeology, bones and teeth. [3] (SBS)

CLAS3100 - Women, Sexuality, and the Family in Ancient Greece and Rome**Course Description**

The status and role of women, law and the regulation of the private sphere, sexuality and gender roles, demography and family structure, marriage, children, religion, domestic architecture and the household economy, ancient critiques of the family, and the impact of Christianity. [3] (SBS)

CLAS3110 - Warfare in the Ancient Mediterranean**Course Description**

Continuity and change in ancient Greek and Roman warfare 800 B.C. to A.D. 120. Social, political, and religious aspects of war. Effects of war, imperialism, and militarism on internal and external populations. [3] (INT)

CLAS3120 - Humor, Ancient to Modern**Course Description**

Ancient comic forms juxtaposed with modern theories of humor. Aristophanic Old Comedy, New Comedy, and Satire. Modern parallels. [3] (HCA)

CLAS3130 - Greek Tragedy**Course Description**

Plays by Aeschylus, Sophocles, and Euripides. Development of the genre in ancient Athens. Historical, political, and religious contexts of production. Modern stage adaptations. Not open to students who have completed CLAS 1111 section 6. [3] (HCA)

CLAS3140 - Sport & Competition Ancient Mediterranean**Course Description**

History of practices and ideologies in Greek and Roman cultures from Archaic Period to end of Roman Empire. Representation through literary, archaeological, and artistic evidence. Relationship with religion, politics, and economics. Comparison of values and practices with modern athletics and Olympic Games. [3] (INT)

CLAS3160 - Roman Law and Social History**Course Description**

Relationship of law and society as illustrated by legal, literary, epigraphic, and papyrological evidence. Views and methodologies of leading modern scholars. Focus on methodology. Marriage, family, personal status, the economy, and judicial system. Basic familiarity with Roman history or law is expected. Serves as repeat credit for HIST 2238. [3] (SBS)

CLAS3190 - Augustan Rome**Course Description**

Social, administrative, religious, and military reforms. Common themes in art, architecture, and literature; changes in national identity in the transition from Republic to Empire. Serves as repeat credit for students who have earned credit for 3190W. Basic familiarity with Roman history is expected. [3] (HCA)

CLAS3190W - Augustan Rome**Course Description**

Social, administrative, religious, and military reforms. Common themes in art, architecture, and literature; changes in national identity in the transition from Republic to Empire. Basic familiarity with Roman history is expected. [3] (HCA)

CLAS3200 - The Greek City**Course Description**

The example of ancient Athens. The stoa, the theatre, the house, and fortifications. Institutions such as the courts, the public assembly, and the family. Literary, historical, archaeological, and philosophical sources. [3] (SBS)

CLAS3210 - Religions of the Ancient Mediterranean**Course Description**

Ancient religious practices and beliefs through the evidence of archaeological sites, material remains, and written texts. Cross-cultural comparisons of sanctuaries, rituals, priesthoods, and sacred texts and objects. Consideration of mystery cults, magic, and alternative groups. [3] (INT)

CLAS3220 - The Trojan War in History, Art, and Literature**Course Description**

Representations in Classical Greek art, literature, and archaeological evidence. The composition of the Homeric epics; the meaning of the Trojan War to later audiences. [3] (HCA)

CLAS3230 - Alexander the Great**Course Description**

Alexander's rise to power and conquests in Europe, Asia, and Africa; the legacy of his introduction of Greek culture to the East; his significance to later audiences. Offered on a graded basis only. [3] (HCA)

CLAS3240 - Greek Culture in the Roman World**Course Description**

Literature, culture, and politics from the 1st to 4th centuries AD. Developments in rhetoric, elite and popular entertainment, scholarship, and medicine. Relationship of literature to imperial rule. Administration through the prisms of cultural identity, cosmopolitanism, citizenship, religion, and the development of ruling classes. [3] (INT)

CLAS3250 - Judaism and Rome**Course Description**

From the second century BCE to ca. 800 CE. Sites of interaction, languages, cultural ties, religious tensions, and political conflicts. Readings include Maccabees, the Septuagint, Aristeeas, Josephus, Philo, the rabbis, the New Testament, early Christian authors. Serves as repeat credit for 3250W. [3] (INT)

CLAS3250W - Judaism and Rome**Course Description**

From the second century BCE to ca. 800 CE. Sites of interaction, languages, cultural ties, religious tensions, and political conflicts. Readings include Maccabees, the Septuagint, Aristeeas, Josephus, Philo, the rabbis, the New Testament, early Christian authors. Serves as repeat credit for 3250. [3] (INT)

CLAS3260 - Plato: Knowledge, Reality, and Goodness**Course Description**

Major works of one of the most influential thinkers in history. The dialogues: Meno, Phaedo, Republic, and others. Theory of the forms, arguments for immortality, nature of the good. Relevant contemporary thinkers. [3] (HCA)

CLAS3300 - Akkadian**Course Description**

Introduction to the cuneiform script and to the grammar of Akkadian, the language of ancient Mesopotamia. Selected readings in Old Babylonian (CODEX Hammurabi, Mari letters) and Neo-Assyrian texts (Creation Poem, Gilgamesh Epic). [3] (INT)

CLAS3301 - Akkadian**Course Description**

Continuation of 3300. Introduction to the cuneiform script and to the grammar of Akkadian, the language of ancient Mesopotamia. Selected readings in Old Babylonian (CODEX Hammurabi, Mari letters) and Neo-Assyrian texts (Creation Poem, Gilgamesh Epic). [3] (INT) (CORE LA)

CLAS3310 - Culture of the Ancient Near East**Course Description**

A survey of highly sophisticated Near East cultures of the last three millennia before the common era (B.C.). Discussion of political histories, and the social, religious, and intellectual heritage of Mesopotamia, Egypt, and Anatolia through excavated artifacts and written documents. [3] (INT)

CLAS3320 - The Amarna Age**Course Description**

The Amarna period from the sixteenth through the twelfth centuries B.C.E., as illumined by excavations of palaces and temples in Egypt, Anatolia, Canaan, and Mesopotamia as well as the vast historical, legal, and literary documents of the period. Focus on the internationalism and theological speculation of the period as seen through the powerful personalities and accomplishments of leaders such as Thutmose III, Suppiluliumas, Ramses II, and the spiritually influential Akhenaten. [3] (INT)

CLAS3333 - Pandemics and Society in Historical Perspective**Course Description**

Religious, racial, political, economic and human (psychological) consequences of global pandemics in the pre-modern world, from Antiquity to the Black Death (1348). Assess ways contagion transforms societies and its relation to concurrent issues of violence and social justice. [3] (HCA)

CLAS3350 - History of Early and Medieval Christianity**Course Description**

Expansion from second through fifteenth centuries across the Mediterranean into Asia, Africa, and Europe. Believers' practice and doctrine, relationship with Roman Empire, development of the Church, and social and cultural history of believers from after New Testament into late Middle Ages. Global perspective. Roots of Catholicism, Protestantism, and Eastern Christianity. [3] (INT)

CLAS3360 - Early Christian Poetry**Course Description**

Composition and reception of verse from Late Antiquity to the Early Middle Ages. Historical, cultural, and geographic contexts of religious poetry and hymnody from the New Testament through the 9th century. Greek and Roman models, Christian literary innovations, and influence on modern writers. Readings in translation from Syriac, Greek, Latin, and Old English. [3] (INT)

CLAS3370 - The History of Syriac Christianity**Course Description**

Christians who spoke the Aramaic dialect during Late Antiquity to modern times from the Near East to the Persian Gulf, India, and China. Culture and literature under the Byzantine Empire and the Islamic States in the Middle East. History and theology of religious communities. Historiographical debates about Syriac origins and development. [3] (INT)

CLAS3380 - Desert Spirituality in Early Christianity**Course Description**

Rise of asceticism in Late Antiquity. History and geography of asceticism in Syria and Egypt. Diversification and spread across the Mediterranean region. Selected readings in translation of sayings, hagiography, theology, and verse. Legacy in modern belief. [3] (INT)

CLAS3600 - Seminar in the Digital Humanities**Course Description**

Theory, method, and applications in history, classics, and religious studies. Focus on historical data and research tools in the study of the Mediterranean world. Integration and manipulation of textual and spatial data. Scholarly interfacing and public access. New media. Developing research plans. [3] (SBS)

CLAS3700 - Uncovering Greek Religion: Cults, Festivals, and Sanctuaries in the Ancient World**Course Description**

Paganism to Judaism and early Christianity. Material culture, including architecture, sculpture, votive dedications, and topography of sanctuaries. Relationship between religion and culture. Politics, warfare, and athletics. Impact of ancient cults on modern Greece. Taught in Greece. Offered on a graded basis only. [3] (INT)

CLAS3710 - Archaeology, History, and Culture in Greece: Kenchreai Field School**Course Description**

Archaeological field school at the site of Kenchreai with seminars and excursions in southern Greece. Basic techniques in excavation, survey, and the analysis of architecture, artifacts, and bones. Explorations of churches, temples, houses, and tombs. Focus on Greece during the Roman Empire and late antiquity. Landscape settlement, cult practice, cultural and social diversity, and funerary ritual. Offered on a graded basis only. [3] (INT)

CLAS3720 - History and Art of Ancient Rome**Course Description**

The mid-second century BCE to the mid-second century CE. Investigating significant sites, monuments, and museum collections in Rome and locations throughout southern Italy. Monumental and domestic architecture, wall paintings, sculpture, coins, and ancient sources. [3] (INT)

CLAS3730 - The Roman to Medieval Near East: Caesarea Excavations, Israel**Course Description**

From Herod the Great to the Mamluk conquest. Excavation of the site of Caesarea on the Mediterranean coast. Social, cultural, economic, and religious history. Maritime commerce; Roman rule; and the Christian, Jewish, and Muslim communities. Archaeological methods, geospatial analysis, and processing artifacts. Monumental architecture, urban topography, and littoral environment. Daily field and laboratory work with additional seminars and excursions. [3] (INT)

CLAS3850 - Independent Study**Course Description**

Completion of a substantial research paper in either classics or the classical tradition under the direction of a faculty sponsor. Consent of both the faculty sponsor and the director of undergraduate studies is required. May be repeated for a total of 6 credits if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits for all semesters of CLAS 3850] (No AXLE credit)

CLAS3880 - Internship Training**Course Description**

Under faculty supervision, students can gain experience in a range of Classics-related programs at public or private institutions including museums and/or federal agencies. Skills can be developed in the areas of public speaking and engagement, digital humanities and cultural heritage management. Credit hours earned are based upon actual work performed at the internship site. A minimum of 1 credit hour in background readings and research must be completed in CLAS 3881 concurrently with, and regardless of, the number of hours earned in 3880. A substantial research paper or report must be submitted at the end of the semester during which the internship is completed. These credit hours may NOT count in the minimum required for the CLAS major or minor. Normally, a 3.0 grade point average, 6 hours of prior work and prior approval of a specific plan of work by the director of undergraduate studies in Classical and Mediterranean Studies are required. Offered on a Pass/Fail basis only and must be taken concurrently with CLAS 3881. Corequisite: 3881. Variable credit. [1-9] (No AXLE credit)

CLAS3881 - Internship Readings and Research**Course Description**

Under faculty supervision, students can gain experience in a range of Classics-related programs, at public or private institutions, including museums and/or federal agencies. Skills can be developed in the areas of public speaking and engagement, digital humanities, and cultural heritage management. Credit hours earned are based upon readings or research supervised by CLAS faculty to lend some intellectual foundation to the internship experience. A minimum of 1 credit hour in background readings and research must be completed in 3881 concurrently with, and regardless of, the number of hours earned in 3880. A substantial research paper or report must be submitted at the end of the semester during which the internship training is completed. These credit hours may count in the minimum required for the CLAS major or minor. Normally, a 3.0 grade point average, 6 hours of prior work and prior approval of a specific plan of work by the director of undergraduate studies in Classical and Mediterranean Studies are required. Offered on a graded basis only and must be taken concurrently with 3880. Co-requisite: 3880. Variable credit: [1-6] (No AXLE credit)

CLAS3890 - Special Topics**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (INT)

CLAS4998 - Senior Honors Thesis**Course Description**

Open only to seniors in the departmental honors program. [3] (No AXLE credit)

CLAS4999 - Senior Honors Thesis**Course Description**

Open only to seniors in the departmental honors program. [3] (No AXLE credit)

Communication Studies

CMST1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

CMST1002 - Introduction to Communication Studies**Course Description**

Theoretical foundations and practice of human communication. Argument and advocacy; public address; and critical analysis of media and culture. [3] (HCA) (CORE B, C) (LE HFA)

CMST1002W - Introduction to Communication Studies**Course Description**

Theoretical foundations and practice of human communication. Argument and advocacy; public address; and critical analysis of media and culture. Serves as repeat credit for students who have completed 1002. [3] (HCA)

CMST1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

CMST1500 - Fundamentals of Public Speaking**Course Description**

Theory and practice in speaking before an audience. Problems of preparation, content, organization, language, and delivery are treated. [3] (HCA) (CORE A, C) (LE HFA)

CMST1501 - Public Communication of Science**Course Description**

Theory and practice of speaking before an audience. Designed around the communication of science to non-specialists. Issues of adaptation, organization, evidence, delivery, and style. [3] (HCA)

CMST1850 - Interpersonal Communication**Course Description**

A study of both the theory and application of verbal and nonverbal communication as they occur in relatively unstructured person-to-person and small group settings. [3] (SBS)

CMST2100 - Argumentation and Debate**Course Description**

A course in the practice of debate examining argumentation theory. Emphasis on forms of reasoning and use of evidence in debate. Prerequisite: 1500. [3] (HCA) (CORE A, D) (LE HFA)

CMST2110 - Persuasion**Course Description**

The theory and practice of persuasion with particular emphasis on speech composition, the use of language and its relationship to oral style, structure, and the relationship of structure to the process of speech preparation. Prerequisite: 1500. [3] (HCA) (CORE A) (LE HFA)

CMST2120 - Business Communication**Course Description**

Theory and practice of communication in relation to businesses and organizations with application to leadership, values and ethics, strategic communication theory, and organizational conflict. Prerequisite: 1500. [3] (HCA) (CORE A) (LE HFA)

CMST2432 - Soccer: Media, Art, and Society**Course Description**

Relationship of soccer to political power, globalization, mass media, gender, migration, national identity, and transnational commerce. History of the game and its tactics. Representations of soccer in various artistic media such as literature, film, poetry, and video art. Taught in English. Not open to students who have earned credit for GER 1111.09. [3] (INT)

CMST2750 - Communication, Sports, and Society**Course Description**

How sport informs both domestic and international politics, identity, cultures, interpersonal relationships, and nationalism. Case studies in activism, documentaries, film, museums, public discourse, speeches, and sports media. [3] (HCA)

CMST2800 - Rhetoric and Civic Life**Course Description**

Public discourse and the duties and prerogatives of citizenship. Theory, models, and criticism of rhetoric and oratory in their deliberative, forensic, and epideictic settings. [3] (HCA) (CORE C, E) (LE: HFA)

CMST2850 - Science, Rhetoric, and Public Controversy**Course Description**

Historical and contemporary case studies of public debates over science. Rhetorical strategies of scientists and public advocates; ethical and social implications. [3] (HCA)

CMST2900 - Values in Modern Communication**Course Description**

An examination of values, explicit and implicit, in communication situations in modern American society. The course begins with the discovery and analysis of values and applies this process to technological innovation and rhetorical choice, interpersonal communication, advertising and consumerism, and mass-media persuasion. [3] (P)

CMST2950 - Media and Visual Culture**Course Description**

A study of the nature, effects, reasons for the effects, ethics, regulation, and criticism of contemporary mass media communication. Political causes, news reporting, commercial advertising, and similar sources of rhetoric are included. [3] (HCA)

CMST3000 - Rhetoric of the American Experience, 1640-1865**Course Description**

A critical and historical examination of the methods and effects of public debate and other attempts to influence the attitudes, affective response, and behavior of the American people. Attention to the rhetorical features of selected issues and speakers from colonial times through the Civil War. [3] (US)

CMST3001 - Rhetoric of the American Experience, 1865 to 1945**Course Description**

Critical and historical examination of the methods and effects of public debate and other attempts to influence the attitudes, affective response, and behavior of the American people. Attention to the rhetorical features of selected issues and speakers from 1865 to 1945. [3] (US)

CMST3002 - Rhetoric of the American Experience, 1945-Present**Course Description**

Critical and historical examination of the methods and effects of public debate and other attempts to influence the attitudes, affective response, and behavior of the American people. Attention to the rhetorical features of selected issues and speakers from 1945 to the present. [3] (US)

CMST3050 - Histories of Public Communication**Course Description**

Methods and effects of public debate and other attempts to influence the attitudes, affective response, and behavior of speakers and audiences in situated historical contexts. [3] (HCA)

CMST3100 - Rhetoric of Social Movements**Course Description**

The role of communication in the creation, development, and function of social movements. The analysis of specific rhetorical acts. The study of the arguments, patterns of persuasion, and communication strategies of selected social movements. [3] (US)

CMST3110 - Women, Rhetoric, and Social Change**Course Description**

Historical influences on women's social activism and engagement with public culture; rhetorical issues facing women advocates. Rhetorical strategies used by them in the U.S. and around the globe. [3] (US)

CMST3120 - Rhetoric of U.S. Religion**Course Description**

American religious discourse in historical and contemporary contexts. Religious traditions and influential rhetorical texts. Significant religious controversies. [3] (US)

CMST3130 - Rhetoric of Technoscience**Course Description**

Technoscience in historical, cultural, and political contexts. Significant scientific and technological texts, both scholarly and popular. How definitions of science and technology change across time and contexts and why this matters. How rhetoric is integral to improving communication about science, technology, and the practices of science and engineering. [3] (HCA)

CMST3140 - Communication and the First Amendment**Course Description**

Principles, interpretations, and controversies related to the First Amendment of the United States' Constitution. Emphasis on freedom of religion, freedom of speech, and freedom of the press. [3] (US)

CMST3150 - Law, Media, and Society**Course Description**

Historical and contemporary studies of legal controversies and their mediation through print, television, film, and emergent media. Practices and politics of advocates involved in legislation and legal reform. Serves as repeat credit for CMST 3890, Section 01 in Fall 2016. [3] (HCA)

CMST3200 - Social Media and Everyday Life**Course Description**

Social media as assemblage of forms and communicative practices that create sociality in everyday life. Global and ethnographic perspectives. Not open to students who earned credit for 3890 section 1 in spring 2019. [3] (P)

CMST3210 - Media, Communication, and the Environment**Course Description**

How media frame environmental issues. Representations of nature; communicative strategies of scientists and activists; political implications of dominant and alternate frames. Serves as repeat credit for students who earned credit for 3890 section 02 in Fall 2024. [3] (HCA)

CMST3220 - Digital Communication**Course Description**

Digital platforms, aesthetics, and infrastructures. Their implications for public discourse, expressive cultures, social justice, and political power. Serves as repeat credit for students who earned credit for CMST 3890 section 01 in Spring 2025. [3] (HCA)

CMST3250W - Ethics in Science and Technology Communication**Course Description**

Theories of ethics and social justice. Who communicates about science, including scientists, journalists, public relations professionals, and museum specialists; where they communicate (from journal articles to social media); and their audiences. How ethics may change across these contexts. Unique ethical dimensions such as managing hype, conveying risk, and engaging misinformation. [3] (HCA)

CMST3600 - Rhetorical Traditions**Course Description**

Development of rhetorical concepts from classical Greece to the present. Significant rhetoricians and texts. The impact of context on rhetoric. [3] (HCA)

CMST3620 - Rhetoric, Culture, and Critique**Course Description**

Rhetorical criticism of cultural texts and artifacts, including oratory, mass media, and other forms of public discourse. Fundamentals of effective rhetorical analysis and writing. Repeat credit for students who have completed 3620W. [3] (HCA)

CMST3620W - Rhetoric, Culture, and Critique**Course Description**

Rhetorical criticism of cultural texts and artifacts, including oratory and mass media. Fundamentals of rhetorical analysis and writing. Repeat credit for students who have completed 3620. [3] (HCA)

CMST3700 - Political Communication**Course Description**

Impact of mass-mediated communication on U.S. electoral politics. Pragmatic and ethical influences on the dissemination of information to voters during campaigns. [3] (HCA)

CMST3710 - Cultural Rhetorics of Film**Course Description**

Film as rhetorical response to historical and cultural change. Filmic treatment of historical trauma; related genres, such as horror and melodrama. [3] (HCA)

CMST3720 - Communicating Gender**Course Description**

Dominant modes of communicating gender ideology. Effects on policy, politics, and popular culture. Includes theories of rhetoric, gender, sexuality, race, and social class. [3] (P)

CMST3730 - Communication, Culture, and Consciousness**Course Description**

The relationship between the primary means of communication in a culture and its influence on knowledge and subjectivity. Orality, literacy, and print, electronic, and digital communication. [3] (P)

CMST3730W - Communication, Culture, and Consciousness**Course Description**

Relationship between the primary means of communication in a culture and its influence on knowledge and subjectivity. Orality and literacy. Print, electronic, and digital communication. Repeat credit for students who have earned credit for 3730. [3] (P)

CMST3740 - Rhetoric of Health and Medicine**Course Description**

Cultural construction of medicine and health through narratives, metaphors, and bodily practices. Case studies in art, ethics, activism, and public controversy. Serves as repeat credit for CMST 3890, Section 01 in Spring 2016. [3] (P)

CMST3750 - Rhetoric of the Body**Course Description**

Cultural construction of the body from a rhetorical perspective. Case studies include the history of disability, theories of pollution and pain, and bodily ethics. Serves as repeat credit for CMST 3890, Section 01 in Fall 2017. [3] (P)

CMST3760 - Queer Rhetorics**Course Description**

Intellectual, political, and cultural developments between queer theory and communication studies. Theories of performativity and normativity; representations of LGBTQ movements; evolving understandings of queer communities in communication research. Troubling the very idea of "queer" and considering how identity markers such as race, class, gender, gender identity, and disability refine its conceptual and political possibilities. [3] (P)

CMST3800 - Art, Media, and Advocacy**Course Description**

Design as communication and activism. Student-designed research and creative projects aimed at social and cultural change. Offered on a graded basis only. Prerequisite: 1500. [3] (HCA)

CMST3840 - Directed Readings**Course Description**

Supervised reading and writing in a selected field of the discipline under the guidance of a faculty supervisor. Consent of both the faculty supervisor and the director of undergraduate studies required. Normally open only to majors in communication studies. May be repeated for a total of 6 credits in 3850 and 3840 combined, but students may earn only up to 3 credits per semester of enrollment. [3; maximum of 6 credits total for all semesters of CMST 3850 and 3840] (No AXLE credit)

CMST3850 - Independent Study**Course Description**

A research project in rhetorical criticism to be arranged with the individual instructor. Designed for students who have taken either 3000 or 3001. May be repeated for a total of 6 credits in 3850 and 3840 combined, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for all semesters of CMST 3850 and 3840] (No AXLE credit)

CMST3890 - Selected Topics in Communication Studies**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

CMST4940 - Seminars in Selected Topics**Course Description**

Topics of special interest. May be repeated for a total of 6 credits in 4940 and 4941 combined if there is no duplication in topic. Students may enroll in more than one section of this course per semester of enrollment. Prerequisite: 15 hours of Communication Studies. [3; maximum of 6 credits total for all semesters of CMST 4940 and 4941] (No AXLE credit)

CMST4941 - Seminars in Selected Topics**Course Description**

Topics of special interest. May be repeated for a total of 6 credits in 4940 and 4941 combined if there is no duplication in topic. Students may enroll in more than one section of this course per semester of enrollment. Prerequisite: 15 hours of Communication Studies. [3; maximum of 6 credits total for all semesters of CMST 4940 and 4941] (No AXLE credit)

Communication of Science and Technology

CSET1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

CSET1500 - Communicating Science

Course Description

Theory and practice of communicating science to general audiences. Public speaking and communicating in other media. Problems of audience analysis, content, organization, delivery, and language. [3] (CORE A) (LE: SBS)

CSET2100 - Science Communication Tools and Techniques

Course Description

Translating technical research for a general readership. Benefits and limitations of different formats, texts, and media for telling stories about science. [3] (HCA) (CORE A) (LE SBS)

CSET2110 - Data Visualization for Science Communication

Course Description

Translating complex scientific data into compelling, understandable, and visually impactful narratives. Leveraging visual communication principles and user-experience design practices. Visual design skills, science communication, education, and outreach. Bridging the gap between intricate scientific concepts and diverse audiences through visuals. [3] (MNS) (CORE B, D) (LE: SBS)

CSET2130 - The Trial of Galileo and its Background

Course Description

The interdependence of cosmological theories and religious teachings from the eighth century BCE to the end of the seventeenth century. Examines scientific works and religious texts, including those of Aristotle, Thomas Aquinas, Copernicus, Luther, Galileo, and Newton. [3] (P)

CSET2140 - The Soviet Science: A History of Triumph and Tragedy

Course Description

Historical development of Soviet Science from pre-WWI era. Growth of scientific exploration in the turbulent decade from 1914 to 1924: the Stalinist Era and Cold War. Impact on Soviet society and the world. Role of Soviet scientists in dismantling the totalitarian regime in the U.S.S.R. [3] (INT)

CSET2141 - Trial of Oppenheimer

Course Description

The historical development of Quantum Mechanics with its impact on Physics and our general world perspective culminating with the usage of atomic and nuclear energy for both military and peaceful purposes. Trial of J.R. Oppenheimer and the formation of modern hard science practices and procedures. [3]

CSET2150 - The Space Race: Reaching to the Moon

Course Description

Historical development of the Space Race between the U.S. and the U.S.S.R. during the second half of the 20th century. Moon landing. Pioneers of rocket science Tsiolkovsky, Goddard, and Fritz von Opel. Nazi V2 rocket; Saturn V and N1 rockets. Public faces of the space-race von Braun and Korolev. [3] (US) (CORE C) (LE: SBS)

CSET2200 - Crafting the Science Podcast (The Sounds of Science)

Course Description

How podcasts communicate compelling ideas and stories in science. How scientists and producers reach new audiences. Exploring existing podcasts in the media landscape. Producing original audio stories. [3] (HCA) (CORE A) (LE: HFA)

CSET2300 - The Interview: How to Talk to a Human**Course Description**

The arts of speaking and listening. The basics of a taped interview. Dynamics between interviewer and interviewee. Topics include conflict mediation, psychotherapy, negotiation, restorative justice, social work, and oral history. Practice with interview techniques. [3] (HCA)

CSET2420W - Art and Science: A Shared Past**Course Description**

Art and science as ways of knowing the world. Renaissance to the present with focus on histories of observation and experiment. Alchemy, anatomy, museums, photography, and taxidermy. Organization of knowledge, labor, and creativity. [3] (P)

CSET2440 - Improv and Science Communication**Course Description**

Exploration and practice of the use of improv in communicating science. Literature examination of improv as a performance based art form. Practice of improv through in-class games and forms. Personal reflections on performances. Final performance is a science communication improv show to a general audience. Serves as repeat credit for CSET 3890-01 offered Spring 2025 and Spring 2024. [3] (CORE: A, C) (LE: SBS)

CSET2500 - Science for Everyone**Course Description**

Survey of "great ideas" of science. Impact of science on daily life. Hierarchical approach of scientific concepts from basic building blocks of the universe to matter to chemical reactions to the central dogma of biology and evolution to climate change. Using scientific concepts as citizens and participating in the public discourse that is the fabric of democracy. [3] (MNS) (CORE: LB) (LE MNS)

CSET2550 - Genetic Breakthroughs: The Promise and the Problems**Course Description**

Major advancements in genetics and genomics and their impacts. Examination of scientific practices to critique both the scientific literature and the popular coverage of this work. Recognizing how science produces new questions, not definitive answers, and how these questions emerge in the context of the societies that produce them. [3] (MNS)

CSET2560 - Science for Supervillains**Course Description**

Examine science and technologies exploited by supervillains to achieve world domination. Readings and discussions will reveal how these fictional schemes have real-world correlates that pose existential threats to humanity, and students will grapple with how we can summon our inner superhero to address them. [3] (CORE D, E)

CSET2850 - Science, Rhetoric, and Public Controversy**Course Description**

Historical and contemporary case studies of public debates over science. Rhetorical strategies of scientists and public advocates; ethical and social implications. [3] (HCA)

CSET3090 - Making Science Policy**Course Description**

Interactions between science, technology, and policy, including regulatory failures, funding controversies, and the public perception of the value of scientific research. American context and comparative perspectives. Multidisciplinary approach drawing on political science, philosophy, economics, sociology, and history. [3] (SBS)

CSET3110 - Food Science and Policy**Course Description**

The history and science of food, how it is sourced and processed, and the government agencies responsible for policy. Explores trends in food consumption, nutrition research, and nutraceuticals, and the changing narratives of what is considered "healthy" through an experiential inquiry learning lab. [3] (CORE: LB)

CSET3200W - Technical Writing**Course Description**

Introduction to technical and professional composition for careers in science, business, and industry. [3] (HCA)

CSET3215W - The Art of Blogging**Course Description**

Conventions of the rapidly evolving literary form of blogging. Creation and maintenance of a personal blog. Critique of online journalism across many genres, including activism, politics, science, and arts and culture. Interaction with professional bloggers. Serves as repeat credit for students who have completed ENGL 3215/3215W. [3] (HCA)

CSET3220W - Fiction: Parsing the Science**Course Description**

Representations of science and scientists in fiction; its effects on personal attitudes and perspectives of those who consume science fiction. Impact on readers' trust, fear, and skepticism both of scientific process and scientists themselves. Efficacy and ethics of fictional narrative for communicating science. [3] (HCA).

CSET3230 - Exploring and Writing the Science Essay**Course Description**

How science essays capture experiences, ideas, and journeys in science unlike any other form. The development of the medium. How science communicators use essays to engage with diverse audiences. The benefits and challenges of writing in a medium without clear boundaries. Research and reporting skills for science essays. [3]

CSET3240W - Pop Science: The Art and Impact of Popular Science Writing**Course Description**

Mechanics and influence of popular science writing in the 21st century. Students will critique bestselling books and award-winning journalism; develop and publish their own blogs with a focus on science, technology, and the environment; and interact with top science writers, editors, and podcasters. Not open to students who have earned credit for 3890 section 01 offered fall 2019. [3] (SBS)

CSET3241W - Ethical Questions in Communication at First Contact**Course Description**

Ethical questions in science fiction literature about interactions between humankind and extraterrestrial sentient entities. Consequences of ineffective communication. Potential influence of these questions and novels on modern society. [3] (MNS)

CSET3250W - Ethics in Science and Technology Communication

Course Description

Theories of ethics and social justice. Who communicates about science, including scientists, journalists, public relations professionals, and museum specialists; where they communicate (from journal articles to social media); and their audiences. How ethics may change across these contexts. Unique ethical dimensions such as managing hype, conveying risk, and engaging misinformation. [3] (HCA)

CSET3257 - Virtual Reality Design

Course Description

Interdisciplinary, project-based introduction to Virtual Reality (VR). Creation of immersive environments. Student projects guided by faculty mentors to create real-world, consequential VR simulations relevant to, and innovative in, their respective fields. Note: This class is not open to students with a Computer Science major or minor, CS students should enroll in CS 4249. Serves as repeat credit for students who have completed UNIV 3279. [3] (MNS)

CSET3258 - Virtual Reality: Digitizing a Medieval Castle

Course Description

Digitizing techniques and procedures of historical monuments. The building that will be the object of digitalization is the Maglic Castle 13th century fortress in Serbia, Europe. On location. Offered on a graded basis only. [3]

CSET3261 - Immigrant Scientists

Course Description

Impact of immigrant scientists on scientific and technological developments in the United States. Professional, political, religious, and economic aspects of immigration and immigrant scientists. Strategies to increase the positive impact of immigrant scientists in today's globalized, competitive, and complex world. [3] (US)

CSET3281W - Scientists and the State

Course Description

Ethical questions faced by scientists when working for the state. The role of the scientist as obedient bureaucrat or defender of moral principles. The scientist as traitor or hero. [3] (P)

CSET3300 - Science Filmmaking

Course Description

Short-form science filmmaking. Video production and other online science media. Research-based best practices. Corequisite: CSET 2100. [3] (HCA)

CSET3310 - Geological Filmmaking: Exploring Deep Time through Cinema

Course Description

Exploring geology through the cinematic lens across formal, material, and temporal dimensions. Collaboration and discovery of new ways of seeing the world and understanding our place in it. Course requires travel to investigation sites. Prerequisite or corequisite: EES 1510/1510L. [3] (HCA)

CSET3320W - Environmental Journalism: Investigating Climate Change

Course Description

Science, solutions, stakeholders, players, politics, history, and local impacts of climate change. Students pursue their own local reporting, investigating the effects of climate change and the emerging green economy in Nashville. Not open to students who have earned credit for 3890 section 01 offered spring 2020 or ENGL 3896 section 01 offered spring 2020 or ENGL 3896 section 01 offered spring 2019. [3] (SBS)

CSET3333 - Special Offerings

Course Description

Topics vary. May be repeated for credit if there is no duplication in topic. [3]

CSET3410 - Telling Stories with Data

Course Description

Public understanding of complex issues in the age of big-data. Data analysis using Tableau. Narratives created as personal stories, posters, games, maps, sculptures, and sound from large data sets. Emotive, aesthetic, and practical effects of different presentation methods; metrics for assessing impact. Studio approach with case studies, and hands-on work with tools and technologies. Serves as repeat credit for CSET 3890, section 01 in Fall 2020. [3] (SBS)

CSET3420 - Advanced Scientific Presentations

Course Description

Strategies for making effective presentations across the science disciplines and technical fields. Techniques to overcome challenges commonly faced by researchers. Learning skills in creating compelling research stories, tailoring presentations to intended audiences, creating effective visual representations of data, and preparing and delivering successful scientific presentations. No credit for students who have earned credit for 5420. [3]

CSET3510 - Science, Skepticism, and Uncertainty

Course Description

Skepticism as both constructive framework and debilitating doubt. Scientific inquiry and public science communication. Relationship between science, skepticism, and public attitudes toward uncertainty through a survey of major scientific controversies and debates. Frameworks for the analysis of public scientific and anti-scientific discourses. [3]

CSET3840 - Directed Study

Course Description

Individual research and scholarly investigation in science, engineering, or medicine. Usually conducted in a laboratory setting. May be repeated for credit more than once, but students may earn only up to 3 credits per semester of enrollment. [1-3] (No AXLE credit)

CSET3841 - Project in Science Writing and Communicating

Course Description

Presentation of scientific, engineering, or medical research, including biographical and historical background where appropriate, in one or more presentation styles (written, visual, web), under faculty supervision. May be repeated for credit more than once, but students may earn only up to 3 credits per semester of enrollment. Prerequisite: 3840 and approval of the program director. [1-3] (No AXLE credit)

CSET3880 - Internship Training**Course Description**

Under faculty supervision, students from any discipline can gain experience in a broad range of public and private agencies, institutions, and programs in projects related to the effective communication of scientific or technical knowledge or information. Corequisite: 3881. [1-9] (No AXLE credit)

CSET3881 - Internship Readings & Research**Course Description**

Under faculty supervision, students from any discipline can gain experience with agencies, institutions, and programs in projects related to the effective communication of scientific or technical knowledge or information. [1-6] (No AXLE credit)

CSET3890 - Special Topics**Course Description**

Topics as announced. May be repeated for credit more than once if there is no duplication in topic, but students may earn only 3 credits per semester of enrollment. [1-3] (No AXLE credit)

CSET3891 - Special Topics in Writing Skills**Course Description**

Advanced instruction in telling scientific stories through writing. Topics vary. Counts toward the Telling Scientific Stories: Writing Skills requirement. May be repeated for credit if there is no duplication in topic. [1-3] (May count for Axle: HCA only when offered for 3 credit hours)

CSET3892 - Special topics in Science and Narrative**Course Description**

Advanced instruction in telling scientific stories using tools and techniques other than traditional writing. Counts toward the Telling Scientific Stories: Science and Narrative requirement. Topics vary. May be repeated for credit if there is no duplication in topic. [1-3] (May count for Axle: HCA when offered for 3 credit hours)

CSET3893 - Special topics in Bridging the Sciences and Humanities**Course Description**

Advanced instruction in topics that bridge the sciences and the humanities. Counts toward the Bridging the Sciences and Humanities requirement. Topics vary. May be repeated for credit if there is no duplication in topic. [1-3] (May count for Axle: P when offered for 3 credit hours)

CSET4998 - Honors Thesis**Course Description**

Limited to students admitted to the Communication of Science and Technology Honors program. May be repeated for credit once, but students may earn only up to 3 credits per semester of enrollment. Prerequisite: 3840 and 3841. [1-3] (No AXLE credit)

CSET6200 - Crafting the Science Podcast (The Sounds of Science)**Course Description**

How podcasts communicate compelling ideas and stories in science. How scientists and producers reach new audiences. Exploring existing podcasts in the media landscape. Producing original audio stories. [3]

Computer Science

CS1000 - The Beauty and Joy of Computing

Course Description

Fundamental concepts of computing including abstraction, algorithms, design, and distributed computation. Hands-on curriculum focusing on translating ideas into working computer programs and developing a mastery of practical computational literacy. The relevance and societal impact of computer science are emphasized. Students in the School of Engineering may only receive open elective credit for CS 1000. FALL, SPRING. [3]

CS1100 - Applied Programming and Problem Solving with Python

Course Description

Foundations of computing using Python. Programming fundamentals. Designing, debugging, running programs. Scalar, vector, and matrix computations for scientific computing and data science. Numeric and text processing. Basic data visualization techniques. Intended for students other than computer science and computer engineering majors. Not open to students who have earned credit for CS 1104. FALL, SPRING. [3]

CS1101 - Programming and Problem Solving

Course Description

An intensive introduction to algorithm development and problem solving on the computer. Structured problem definition, top down and modular algorithm design. Running, debugging, and testing programs. Program documentation. Not open to students who have earned credit for CS 1104 without permission. Total credit for this course and CS 1104 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. FALL, SPRING. [3]

CS1103 - Introductory Programming for Engineers and Scientists

Course Description

Problem solving on the computer. Intended for students other than computer science and computer engineering majors. Methods for designing programs to solve engineering and science problems using MATLAB. Generic programming concepts. FALL, SPRING. [3]

CS1104 - Programming and Problem Solving with Python

Course Description

An intensive introduction to algorithm development and problem solving using the Python programming language. Structured problem definition, top down and modular algorithm design. Running, debugging, and testing programs. Program documentation. Not open to students who have earned credit for CS 1100, DS 1100, or CS 1101 without permission. Total credit for this course and CS 1100 will not exceed 4 credit hours. Total credit for this course and DS 1100 will not exceed 4 credit hours. Total credit for this course and CS 1101 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. FALL, SPRING. [3]

CS1151 - Computers and Ethics

Course Description

Analysis and discussion of problems created for society by computers, and how these problems pose ethical dilemmas to both computer professionals and computer users. Topics include: computer crime, viruses, software theft, ethical implications of life-critical systems. FALL, SPRING. [3]

CS2123 - Digital Systems

Course Description

(Also listed as ECE 2123). Digital systems and hardware fundamentals of computer architectures, from logic gates and sequential logic to simple processor (e.g. von Neumann) architectures. Boolean algebra, information representation, state machines, digital system design, processors, instruction execution, I/O handling, and concepts. CS 2123 is not open to students who have earned credit for ECE 2116. Serves as repeat credit for ECE 2123. Corequisite: CS 2123L. FALL, SPRING [3].

CS2123L - Digital Systems Laboratory

Course Description

(Also listed as ECE 2123L). Laboratory for CS 2123. One three-hour laboratory per week. Serves as repeat credit for ECE 2123L. CS 2123L is not open to students who have earned credit for ECE 2116L. Corequisite: CS 2123. FALL, SPRING [1].

CS2201 - Program Design and Data Structures

Course Description

Also listed as ECE 2201. Continuation of CS 1101/1104. The study of elementary data structures, their associated algorithms and their application in problems; rigorous development of programming techniques and style; design and implementation of programs with multiple modules, using good data structures and good programming style. Serves as repeat credit for ECE 2201. Prerequisite: CS 1101 or 1104. FALL, SPRING. [3]

CS2204 - Program Design and Data Structures for Scientific Computing

Course Description

Also listed as ECE 2204. Data structures and their associated algorithms in application to computational problems in science and engineering using Python. Time and memory complexity; dynamic memory structures; sorting and searching; advanced programming and program-solving strategies; efficient software library use. Serves as repeat credit for ECE 2204. Prerequisite: CS 1100 or DS 1100. FALL, SPRING. [3]

CS2212 - Discrete Structures

Course Description

Survey of the mathematical tools necessary for an understanding of computer science. Sets, relations, functions, basic counting techniques, permutations, combinations, graphs, recurrence relations, simple analysis of algorithms, O-notation, Boolean algebra, propositional calculus, and numeric representation. Prerequisite: A course in computer science or two semesters of calculus. FALL, SPRING. [3]

CS2218 - Microcontrollers

Course Description

(Also listed as ECE 2218). Microprocessor and microcontroller architecture with emphasis on control applications. Usage of assembly language and interfacing with programs written in high-level languages. Interfacing and real-time I/O with microprocessors, control algorithms, and networking with microcontrollers. Serves as repeat credit for ECE 2218. Prerequisite: ECE 2116 or 2123; one of CS 1101, 1103, or 1104. Corequisite: CS 2218L. SPRING. [3].

CS2218L - Microcontrollers Laboratory

Course Description

(Also listed as ECE 2218L). Laboratory for CS 2218. A small structured project is required. One three-hour laboratory per week. Serves as repeat credit for ECE 2218L. Corequisite: CS 2218. SPRING. [1]

CS2231 - Computer Organization

Course Description

The entire hierarchical structure of computer architecture, beginning at the lowest level with a simple machine model (e.g., a simple von Neumann machine). Processors, process handling, IO handling, and assembler concepts. Graduate credit not given for computer science majors. Prerequisite: CS 2201. Corequisite: EECE 2116, EECE 2116L. FALL, SPRING. [3]

CS2281 - Computer Architecture

Course Description

(Also listed as ECE 2281). Introduction to computer architecture from a programmer's perspective. Fundamentals: Boolean logic, combinational and sequential logic circuits, information representation in binary form. The von Neumann instruction set architecture, programmer's model of a processor. Low-level programming using the C language, and its mapping to machine instructions. Memory hierarchy and performance issues. Input/output methods and advanced processors: multi-core, GPUs. CS 2281 is not open for students who have earned credit for ECE 2281 without permission. Serves as repeat credit for ECE 2281. Prerequisite: CS 2201. Corequisite: CS 2281L. FALL, SPRING [3].

CS2281L - Computer Architecture Laboratory

Course Description

(Also listed as ECE 2281L). Laboratory for CS 2281. One three-hour laboratory per week. CS 2281L is not open for students who have earned credit for ECE 2281L without permission. Serves as repeat credit for ECE 2281L. Corequisite: CS 2281. FALL, SPRING [1]

CS2860 - Introduction to Undergraduate Research

Course Description

Introduction to undergraduate research under the direction of Computer Science faculty. Students may take a maximum of 3 credit hours towards the degree. Not open to students who have earned credit for CS 3860, 3861, or 3251 without permission. Prerequisite: CS 1100 or CS 1101. [1-3]

CS3250 - Algorithms

Course Description

Advanced data structures, systematic study and analysis of important algorithms for searching; sorting; string processing; mathematical, geometrical, and graph algorithms, classes of P and NP, NP-complete and intractable problems. Prerequisite: CS 2201, CS 2212. FALL, SPRING. [3]

CS3251 - Intermediate Software Design

Course Description

Also listed as ECE 3251. High quality development and reuse of architectural patterns, design patterns, and software components. Theoretical and practical aspects of developing, documenting, testing, and applying reusable class libraries and object-oriented frameworks using object-oriented and component-based programming languages and tools. Serves as repeat credit for ECE 3251. No credit for students who have earned credit for CS 5251. Prerequisite: CS 2201 or ECE 2201. FALL, SPRING [3]

CS3252 - Theory of Automata, Formal Languages, and Computation

Course Description

Also listed as ECE 3452. Finite-state machines and regular expressions. Context-free grammars and languages. Pushdown automata. Turing machines. Undecideability. The Chomsky hierarchy. Computational complexity. Serves as repeat credit for ECE 3452. No credit for students who have earned credit for CS 5252 or ECE 5452. Prerequisite: CS 2212. SPRING. [3]

CS3253 - Parallel Functional Programming

Course Description

Conceptual and practical aspects of designing, implementing, and debugging parallel software programs using functional programming language features and frameworks. Systematic reuse of scalable and robust software patterns and architectures for parallel programs. Prerequisite: CS 1101, CS 3251. FALL. [3]

CS3254 - Concurrent Object-Oriented Programming

Course Description

Conceptual and practical aspects of designing, implementing, and debugging concurrent software programs using object-oriented programming language features and frameworks. Systematic reuse of scalable and robust software patterns and architectures for concurrent programs. Prerequisite: CS 1101, CS 3251. SPRING. [3]

CS3255 - Numerical Methods for Computer Science and Engineering

Course Description

Numerical and mathematical methods used in computer graphics, computational physics, robotics, vision, and learning. Algorithms for solving linear systems, determining matrix eigenstructures, nonlinear optimization, interpolation and extrapolation, integration and differentiation, solving ordinary and partial differential equations, and parallel programming. Emphasis on efficient implementations and applications. Prerequisites: MATH 2410 or MATH 2501 or MATH 2600; CS 2201 or 2204; CS 2212. Corequisites: MATH 2400 or MATH 2420 or MATH 2610. FALL [3]

CS3258 - Introduction to Computer Graphics

Course Description

Also listed as ECE 3258. 2D rendering and image-based techniques, 2D and 3D transformations, modeling, 3D rendering, graphics pipeline, ray-tracing, and texture-mapping. Serves as repeat credit for ECE 3258. No credit for students who have earned credit for CS 5258 or ECE 5258. Prerequisite: MATH 2400, 2410, 2501 or 2600; CS 3251 or ECE 3251. SPRING. [3]

CS3259 - Computer Animation

Course Description

Principles and techniques of computer animation. Topics include storyboarding, camera control, skeletons, inverse kinematics, splines, keyframing, motion capture, dynamic simulation, particle systems, facial animation, and motion perception. Students work in groups on the design, modeling, animation, and rendering of a computer animation project. Prerequisite: MATH 2400, 2410, 2501, or 2600; CS 2201. FALL. [3]

CS3262 - Applied Machine Learning

Course Description

Fundamentals of machine learning with emphasis on practical applications to data science problems. Supervised learning (linear and logistic regression, decision trees, support vector machines, neural networks, and deep learning), unsupervised learning (feature selection, data clustering, dimensionality reduction); ethical principles and social implications of machine learning. Does not count as CS Depth elective towards the Computer Science major or minor. Prerequisite: One of CS 1100, 2201, or 2204; one of BME 3200, BSCI 3270, CE 3300, DS 2100, ECON 1500 or 1510, MATH 2810 or 2820 or 2821, PSY 2100, PSY-PC 2110, or SOC 2100. FALL, SPRING. [3]

CS3265 - Database Management Systems

Course Description

Also listed as ECE 3265. Logical and physical organization of databases. Data models and query languages, with emphasis on the relational model and its semantics. Data independence, security, integrity, concurrency. Serves as repeat credit for ECE 3265. No credit for students who have earned credit for CS 5265 or ECE 5265.

Prerequisite: CS 2201 or ECE 2201. [3]

CS3270 - Programming Languages

Course Description

General criteria for design, implementation, and evaluation of programming languages. Historical perspective. Syntactic and semantic specification, compilations, and interpretation processes. Comparative studies of data types and data control, procedures and parameters, sequence control, nesting, scope and storage management, run-time representations. Problem solving using non-standard languages. Prerequisite: CS 2201; CS 2231 or CS 2123 or ECE 2123 or CS 2281 or ECE 2281. FALL, SPRING. [3]

CS3274 - Modeling and Simulation

Course Description

Also listed as ECE 3274. General theory of modeling and simulation of a variety of systems: physical processes, computer systems, biological systems, and manufacturing processes. Principles of discrete-event, continuous, and hybrid system modeling, simulation algorithms for the different modeling paradigms, methodologies for constructing models of a number of realistic systems, and analysis of system behavior. Computational issues in modeling and analysis of systems. Stochastic simulations. Serves as repeat credit for ECE 3274. No credit for students who have earned credit for CS 5274. Prerequisite: CS 2201 or ECE 2201. [3]

CS3276 - Compiler Construction

Course Description

Review of programming language structures, translation, loading, execution, and storage allocation. Compilation of simple expressions and statements. Organization of a compiler including compile-time and run-time symbol tables, lexical scan, syntax scan, object code generation, error diagnostics, object code optimization techniques, and overall design. Use of a high-level language to write a complete compiler.

Prerequisite: CS 3270. [3]

CS3281 - Principles of Operating Systems I

Course Description

Resource allocation and control functions of operating systems. Scheduling of processes and processors. Concurrent processes and primitives for their synchronization. Use of parallel processes in designing operating system subsystems. Methods of implementing parallel processes on conventional computers. Virtual memory, paging, protection of shared and non-shared information. Structures of data files in secondary storage. Security issues. Case studies. Prerequisite: CS3251; CS 2231 or CS/ECE 2123 or CS/ECE 2281. FALL, SPRING. [3]

CS3282 - Principles of Operating Systems II

Course Description

Projects involving modification of a current operating system. Lectures on memory management policies, including virtual memory. Protection and sharing of information, including general models for implementation of various degrees of sharing. Resource allocation in general, including deadlock detection and prevention strategies. Operating system performance measurement, for both efficiency and logical correctness. Two hours lecture and one hour laboratory. Prerequisite: CS 3281. [3]

CS3860 - Undergraduate Research
Course Description

Open to qualified majors with consent of instructor and adviser. No more than 6 hours of CS 3860/3861/3862 may be counted towards the computer science major. Prerequisite: CS 3251. [1-3 each semester]

CS3861 - Undergraduate Research
Course Description

CS 3861: Open to qualified majors with consent of instructor and adviser. No more than 6 hours of CS 3860/3861/3862 may be counted towards the computer science major. Prerequisite: CS 3251. [1-3 each semester]

CS3862 - Undergraduate Research Project
Course Description

Students work in teams on a supervised research project in computer science. Open to qualified majors with consent of instructor and adviser. No more than 6 hours of CS 3860/3861/3862 may be counted towards the computer science major. Prerequisite: CS 3251. [3]

CS3891 - Special Topics
Course Description

[Variable credit: 1-3 each semester]

CS3892 - Special Topics
Course Description

Fulfills project course requirement in CS major. [3]

CS4239 - Cyber-Physical Systems: Foundations and Project
Course Description

Foundations of cyber-physical systems and the Internet-of-Things. Model-based engineering of cyber-physical systems, including modeling of physical and computational systems, design and implementation techniques, analysis and verification. Includes modeling and analysis assignments, and project using a simulator and a real-time computer system. Serves as repeat credit for ECE 4239. No credit for students who have earned credit for ECE 5239 or CS 5239. Prerequisite: CS 3281 or ECE 4375 or CS 4375; MATH 2300 or 2500; MATH 2410 or 2501 or 2600. SPRING. [3]

CS4240 - Internet of Medical Things
Course Description

Foundational topics in designing Internet of medical things (IoMT). Systems, algorithms and commercialization. Designing to de-risk commercialization from concept to market adoption. Prerequisite: CS 3251. No credit for students who have earned credit for CS 5240. SPRING. [3]

CS4247 - Data Visualization
Course Description

Visualization analysis and design. Perception, color and multiple-view design, interaction, and task analysis for visualization. Techniques for visualizing geographic data, networks, hierarchical and high-dimensional data, and uncertainty. Prerequisites: CS 3250, 3251; MATH 2410 or 2501 or 2600; MATH 2810 or 2820. [3]

CS4249 - Projects in Virtual Reality Design

Course Description

Students work in groups on specification, design, and construction of complex immersive 3D virtual environments. Includes modeling, interaction, usability, rendering, perception, and tracking. Prerequisite: CS 3251. FALL. [3].

CS4260 - Artificial Intelligence

Course Description

Also listed as ECE 4260. Principles and programming techniques of artificial intelligence. Strategies for searching, representation of knowledge and automatic deduction, learning, and adaptive systems. Survey of applications. Serves as repeat credit for ECE 4260. No credit for students who have earned credit for CS 5260 or ECE 5260. Prerequisite: CS 3250; CS 3251 or ECE 3251; MATH 2810 or 2820 or 3640. FALL. [3]

CS4262 - Foundations of Machine Learning

Course Description

Also listed as ECE 4262. Theoretical and algorithmic foundations of supervised learning, unsupervised learning, and reinforcement learning. Linear and nonlinear regression, kernel methods, support vector machines, neural networks and deep learning methods, instance-based methods, ensemble classifiers, clustering and dimensionality reduction, value and policy iteration. Explainable AI, ethics, and data privacy. Serves as repeat credit for ECE 4262. No credit for students who have earned credit for CS 5262 or ECE 5262. Prerequisite: CS 3251 or ECE 3251; one of MATH 2810, 2820, or 3640; one of MATH 2410, 2500, 2501, or 2600. SPRING. [3]

CS4266 - Topics in Big Data

Course Description

Principles and practices of big data processing and analytics. Data storage databases and data modeling techniques, data processing and querying, data analytics and applications of machine learning using these systems. Prerequisite: CS 3251. SPRING. [3]

CS4267 - Deep Learning

Course Description

Also listed as ECE 4467. Models, algorithms, mathematical tools, and machine learning concepts used in deep learning. Modern practical deep feedforward, convolutional, and recurrent networks. Regularization for deep learning and optimization. Practical design methods. Serves as repeat credit for ECE 4467. No credit for students who have earned credit for CS 5267 or ECE 5467. Prerequisite: CS 3250; CS 3251 or ECE 3251; MATH 2410 or 2600; MATH 2810 or 2820. SPRING. [3]

CS4269 - Project in Artificial Intelligence

Course Description

Students work in small groups on the specification, design, implementation, and testing of a sizeable AI software project. Projects (e.g., an "intelligent" game player) require that students address a variety of AI subject areas, notably heuristic search, uncertain reasoning, planning, knowledge representation, and learning. Class discussion highlights student progress, elaborates topics under investigation, and identifies other relevant topics (e.g., vision) that the project does not explore in depth. Prerequisite: CS 4260. SPRING. [3]

CS4275 - Error Analysis in Safety Critical Systems

Course Description

Also listed as ECE 4475. Case study-based course examining errors in safety critical systems, including healthcare and aviation. Errors explored from multiple perspectives, specifically computer science and systems engineering. Serves as repeat credit for ECE 4475. No credit for students who have earned credit for CS 5275 or ECE 5475. Prerequisite: CS 3251 or ECE 3251. SPRING. [3]

CS4277 - Cyber Security**Course Description**

Also listed as ECE 4277. Software issues, secure software design, attacks and detection, identity, sessions, human security mistakes, and security auditing. Serves as repeat credit for ECE 4277. No credit for students who have earned credit for CS 5277. Prerequisite: CS 3251 or ECE 3251. FALL. [3]

CS4278 - Principles of Software Engineering**Course Description**

Also listed as ECE 4278. The nature of software. The object-oriented paradigm. Software life-cycle models. Requirements, specification, design, implementation, documentation, and testing of software. Object-oriented analysis and design. Software maintenance. Serves as repeat credit for CS 4278. No credit for students who have earned credit for CS 5278 or ECE 5278. Prerequisite: CS 3251 or ECE 3251. FALL. [3]

CS4279 - Software Engineering Project**Course Description**

Students work in teams to specify, design, implement, document, and test a nontrivial software project. The use of CASE (Computer Assisted Software Engineering) tools is stressed. Prerequisite: CS 4278. SPRING. [3]

CS4284 - Computer Systems Analysis**Course Description**

Also listed as ECE 4484. Techniques for evaluating computer system performance with emphasis upon application. Topics include measurement and instrumentation techniques, benchmarking, simulation techniques, elementary queuing models, data analysis, operation analysis, performance criteria, case studies. Project involving a real computer system. Serves as repeat credit for ECE 4484. No credit for students who have earned credit for CS 5284 or ECE 5484. Prerequisite: CS 3281. [3]

CS4285 - Network Security**Course Description**

Also listed as ECE 4285. Principles and practice of network security. Security threats and mechanisms. Cryptography, key management, and message authentication. System security practices and recent research topics. Serves as repeat credit for ECE 4285. No credit for students who have earned credit for CS 5285. Prerequisite: CS 4283. [3]

CS4286 - Reverse Engineering for Cybersecurity**Course Description**

Cybersecurity from a practical standpoint. Topics include x86 assembly and reverse engineering, vulnerability analysis, and binary exploitation. Types of security defenses used by modern systems. Malware analysis and Windows-based exploits. Prerequisite: CS 3281. SPRING. [3]

CS4287 - Principles of Cloud Computing**Course Description**

Fundamental concepts of cloud computing, different service models, techniques for resource virtualization, programming models, management, mobile cloud computing, recent advances, and hands-on experimentation. Prereq: CS 3281. [3]

CS4288 - Web-based System Architecture

Course Description

Core concepts necessary to architect, build, test, and deploy complex web-based systems; analysis of key domain requirements in security, robustness, performance, and scalability. Prerequisite: CS 3251. FALL. [3]

CS4289 - Project in Web-Based Software Architecture

Course Description

Project-based course building on core concepts necessary to architect, build, test, and deploy complex web-based systems. Students form teams, propose project ideas, architect their solutions, and build the initial minimum viable project for their application. In-class discussions focus on advanced topics in web-development. Prerequisite: CS 4288. SPRING. [3]

CS4352 - Social Network Analysis

Course Description

Explores recent research on the analysis of social networks and on models and algorithms to abstract their properties and make predictions. Random graph models, network centrality measurements, computational methods of link prediction/recommender systems, clustering and classification on graphs, and network diffusion. Deep learning on graphs including network embedding and graph neural network models and applications. Prerequisites: CS 3250, CS 3251. [3]

CS4359 - Projects in Machine Learning

Course Description

Students work in small groups on the specification, design, implementation, and testing of a sizeable machine learning or deep learning project. Projects can be either application- or algorithm-oriented. Prerequisites: CS 4262, CS 4267, or ECE 4363. No credit for students who have earned credit for CS 5359. SPRING. [3]

CS4375 - Embedded Systems

Course Description

(Also listed as ECE 4375). Design and implementation of embedded computer-based systems. Programming for real-time systems and the Internet of Things. Embedded system modeling, design, analysis, and implementation using real-time and event-driven techniques. A structured project is required. Serves as repeat credit for ECE 4375. Prerequisite: ECE 2218, CS 2201. Corequisite: CS 4375L. FALL. [3]

CS4375L - Embedded Systems Laboratory

Course Description

(Also listed as ECE 4375L). Design and implementation of embedded computer-based systems. Programming for real-time systems and the Internet of Things. Embedded system modeling, design, analysis, and implementation using real-time and event-driven techniques. A structured project is required. Serves as repeat credit for ECE 4375L. Prerequisite: ECE 2218, CS 2201. Corequisite: CS 4375. FALL. [1]

CS4376 - Foundations of Human Computer Interaction

Course Description

Skills and concepts of Human-Computer Interaction (HCI) to enable the design of systems that effectively meet human needs. Social, cognitive, behavioral and contextual aspects of information systems. Informational dimensions of the human-computer interface, and other user-centered design concepts. Includes conceptual problems in HCI and design approaches to interactive prototype construction and evaluation techniques. Prerequisite: CS 3250 or 3251. FALL. [3]

CS4383 - Computer Networks**Course Description**

Computer communications. Network (Internet) architecture. Algorithms and protocol design at each layer of the network stack. Cross-layer interactions and performance analysis. Network simulation tools. Lab and programming assignments. Serves as repeat credit for ECE 4383. No credit for students who have earned credit for CS 5383 or ECE 5383. Prerequisite: CS 3281 or ECE 4375. [3]

CS4959 - Computer Science Seminar**Course Description**

Elements of professional engineering practice, professional education and lifelong learning, intellectual property and software patents, open source and crowd source software development, liability, soft risk safety and security, privacy issues, interdisciplinary teams and team tools, professional organization, careers, entrepreneurship, human computer interaction. Prerequisite: CS 3251. FALL [1]

Conducting

MCON3000 - Conducting**Course Description**

An introductory course of study stressing the fundamentals of movement and gesture as they relate to style, articulation, phrasing, tempo, cueing, etc. Score reading at the piano. Prerequisite: MUSC 2200 or MUTH 2220, MUKH 1134 or 2134, and MUTH 2400. FALL, SPRING. [2]

MCON3010 - Instrumental Conducting**Course Description**

Expansion of basic skills to include longer and more complex musical structures; expanded ability in analysis, memorization, and interpretation; significant independent preparation. Prerequisite: MCON 3000 and consent of instructor. [2] SPRING. Fountain.

MCON3020 - Choral Conducting**Course Description**

Choral conducting and rehearsal techniques, score reading and analysis, methods, and materials of choral music. Prerequisite: MCON 3000 and consent of instructor. SPRING. [2] Biddlecombe. (Offered alternate years.)

MCON3030 - Advanced Conducting Studies**Course Description**

Score preparation, ensemble techniques, rehearsal strategies. Core repertoire. Physical awareness. Ensemble conducting opportunity. Prerequisite: MCON 3010 or 3020. [2]

MCON3040 - Score Reading I**Course Description**

Introduction to score reading at the keyboard in preparation for advanced study in conducting. Development of sight-reading and choral rehearsal skills; two- to four-part score reading. Permission of instructor required. [1]

MCON3041 - Score Reading II**Course Description**

Builds on skills learned in Score Reading I. Reading two- to four-parts at the keyboard in all clefs in preparation for advanced score-reading. Continued development of eye-hand coordination and sight-reading skills. Systematic introduction of transposing orchestral instruments. Prerequisite: MCON 3040 and permission of instructor. [1]

MCON3042 - Score Reading III**Course Description**

Introduction to full orchestral score reading drawn primarily from early-mid Classical repertoire. Development of reading within instrument families and playing full scores with increasing complexity. Prerequisite: MCON 3041 and permission of instructor. [1]

MCON3043 - Score Reading IV**Course Description**

Continuation of the skills learned in MCON 3042 to include reading full orchestral scores from the Romantic-21st Century repertoire. Study of common graduate conducting entrance audition repertoire with emphasis on fluency of playing on the keyboard while following a conductor. Prerequisite: MCON 3042 and permission of instructor. [1]

MCON3050 - Directed Study in Conducting I**Course Description**

Development and execution of a program of study in conducting under the direction of a member of the department. Must be with a mentor other than the student's professor for MCON 3030. Prerequisite: MCON 3041; MUSC 3106; and departmental consent for senior year of the Conducting Concentration. [1]

MCON3051 - Directed Study in Conducting II**Course Description**

Continued development and execution of a program of study in conducting under the direction of a member of the department. Prerequisite: MCON 3050 and departmental consent. [1]

Culture, Advocacy, & Leadership

CAL1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE Credit)

CAL1002 - Fundamentals of Culture, Advocacy, and Leadership**Course Description**

Subject matter and methods of public engagement. Concepts and practices related to citizenship, civil society, and social change. Offered on a graded basis only. [3] (HCA) (CORE C, E) (LE HFA)

CAL1150 - Free Speech, Dangerous Ideas**Course Description**

Contemporary debates over freedom of expression. Case studies on hate speech, pornography, blasphemy, and sedition. Legal, political, and technological dimensions of free speech. Historical and cultural contexts. [3] (P) (CORE C, E) (LE HFA)

CAL1700W - Arguing for Social Change**Course Description**

Practice of narrative, nonfiction writing for social change. History of American investigative journalism and scholarship. Interviewing, research, narrative and revision skills. Serves as repeat credit for HIST 1710W. [3] (HCA)

CAL1800 - Speaking, Leading, Engaging**Course Description**

Speaking and communicating for community engagement. Historical and contemporary case studies. Skill-building for public advocacy. Offered on a graded basis only. [3] (US) (CORE A, C) (LE HFA)

CAL2000 - No Equivalent: Not eligible for credit toward the major or minor.**Course Description**

This course has no Vanderbilt equivalent. It is NOT eligible to count toward a major or minor in CAL.

CAL2050 - Non-Equivalent Credit (CAL Elective)**Course Description**

This course has no Vanderbilt equivalent. Credit is eligible to count toward the major or minor in CAL.

CAL2100 - Sports, Culture, and Society**Course Description**

Multifaceted role of sports in culture and society, past and present. Cross-cultural perspectives on U.S. sports and related practices. [3] (SBS) (CORE B, C) (LE SBS)

CAL2125 - Stories of the City: People, Places, Projects**Course Description**

Methodologies of oral history and curation. Focus on community engagement, storytelling, and public-facing projects. Offered on a graded basis only. [4] (CORE: LB)

CAL2150 - Hip-Hop Culture in America**Course Description**

Hip-hop culture from 1970s to today. Significant texts, music, films, and more trace hip-hop's growth into a force in music, fashion, media, and activism. Music industry in Nashville. [3] (US)

CAL2160 - Designing the Future: AI in Digital Media and Entertainment**Course Description**

Advanced video editing, color grading, audio post-production, motion graphics, visual effects creation, and real-time performance design. Content generation and enhancement workflows, automated processing and optimization, ethical AI usage, and creative authenticity evaluation. Industry-standard workflow optimization, collaborative production methodologies, and portfolio development for AI-integrated media careers. [3] (HCA) (LE: HFA)

CAL2175 - Conspiracy Culture in America**Course Description**

Conspiracy theories in American culture and history. Topics include witch trials, anti-Semitism, anti-Catholicism, the red scare, UFOs, and the Kennedy assassination. Relation of conspiracy theories to broader cultures of knowledge. [3] (US)

CAL2180 - Friction in the Machine: Society, Technology, Safety, Freedom**Course Description**

Structures of individual, communal, corporate and technological freedom. Politics of enclosure, city planning, modern crop science, social media, demolition derby and driverless cars. Ideas about individual, corporate, communal and political freedom. Offered on a graded basis only. [3] (CORE B, C) (LE HFA)

CAL2250 - American Social History Through Dance**Course Description**

Study of American history and culture through dance. Trends related to race, gender, class. Features dance activities in class. Serves as repeat credit for AMER 1002W-02 offered Spring 2020. [3] (CORE A, C) (LE HFA)

CAL2275 - Finding Your Roots: Genealogy, Migration, and the Making of Your Identity**Course Description**

Exploration of self and identity in relationship to place, family, history, and narrative. Archival research and personal reflection on culture, context, and community, culminating in public-facing research project. [3]

CAL2300 - Responsible Advocacy in a Complicated World**Course Description**

Theory and practice of advocacy, community engagement, and shared authority across multiple disciplines. Navigating ethical concerns in community-engaged advocacy work. Offered on a graded basis only. [3] (P) (CORE A, E) (LE HFA)

CAL2460 - Jewish Non-Profits & Philanthropy: History and Practice**Course Description**

Historical development of Jewish non-profit and philanthropic sectors globally and in USA. Survey of Jewish communal organizations, goals, functions, structures, funding models. Organizational behavior. Principles and practices of Jewish communal leadership. Contemporary issues, challenges and controversies in Jewish NFP sector. Serves as repeat credit for JS 2460. [3] (INT)

CAL2500 - American Cultures: Past, Present, Future**Course Description**

American cultural history from earliest contact between North American indigenous peoples and Europeans to the present. Popular norms and beliefs as well as literature, art, and philosophy. Ideas of exceptionalism, democracy, and the marketplace; struggles over inclusion and citizenship; and the U.S. role in globalization. [3] (US)

CAL2650 - Sports Leadership & Engagement**Course Description**

A practicum course to complement other 1.5 credit-hour courses related to the Sports and Society minor. Research and project-based learning guided by a faculty member associated with Sports and Society. Pre-approval from faculty mentor required to enroll. [1.5]

CAL2700 - Religion, Politics, and American Culture**Course Description**

Political role of religion and religious role of politics. Christian Nationalism; religious social activism; atheism in America; emergent religions and political resistance; immigration, religion, and community. [3] (US)

CAL2725W - Why Argue About Politics?: An Approach to Deliberative Democracy**Course Description**

Ideals and practices of deliberative democracy in the US. Prospects for deliberation and conversation in a divided political era. [3] (CORE A, E) (LE HFA)

CAL2750 - Cultures of Resistance in American History**Course Description**

Study of riots, rebellions, protests across history. Questions of social change and political violence. Tactics, demonstrations, music, symbolism, networks, and more. Examples include West Virginia coal wars, the Tulsa massacre, and the urban unrest of the 1960s. Serves as repeat credit for AMER 1002W-01 offered Spring 2024. [3] (CORE C, E) (LE HFA)

CAL2800 - Global Perspectives on American Cultures**Course Description**

Production and representation of culture. International, hemispheric considerations of America. Nationalism, conquest, colonialism, race, gender, and inequality. [3] (INT) (CORE B, C) (LE HFA)

CAL3200 - Democracy, Deliberation, and Lived Experience**Course Description**

Exploring and debating government in people's everyday lives. Imagining new ways of democratic life. Research projects involving various people, communities, and groups. [3] (US)

CAL3300 - Beer Me! The Science, History, and Culture of Brewing**Course Description**

Science of beer and the cultures of brewing past and present. Beer ingredients, styles, and tasting. Alcohol addiction and abuse. Brewing process from beginning to end. Must be 21 or older to take this course. [3]

CAL3850 - Independent Readings & Research**Course Description**

Independent readings and/or research. May be repeated for a total of 6 credits if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for all semesters] (No AXLE credit)

CAL3880 - Internship Training**Course Description**

Offered on a pass/fail basis only and must be taken concurrently with 3881. Under faculty supervision, students intern in public or private organizations, conduct background research and reading, and submit a research paper at the end of the semester during which the internship training is complete. Background reading and research will be completed in 3881 concurrently with the completion of internship training, 3880; a minimum of 3 hours of 3881 must be completed, independent of hours taken in 3880. Corequisite: 3881. [Variable credit: 1-6] (No AXLE credit)

CAL3881 - Internship Readings and Research**Course Description**

Under faculty supervision, students intern in public or private organizations, conduct background research and reading, and submit a research paper at the end of the semester during which the internship training is completed. Background reading and research will be completed in 3881 concurrently with the completion of internship training, 3880; a minimum of 3 hours of 3881 must be completed, independent of hours taken in 3880. Corequisite: 3880. [3-6]. (No AXLE credit)

CAL3890 - Special Topics**Course Description**

May be repeated for credit if there is no duplication in topic. [3] (No AXLE credit)

CAL4000 - Practicum and Internship Experience**Course Description**

Discussion and application of concepts related to leadership and civic engagement. Development of research projects related to scholarly and professional experiences beyond the borders of campus. Consideration of the ethical dimensions of working with people, groups, and organizations outside of the university. [3] (No AXLE credit)

CAL4500 - American Futures**Course Description**

Reinvestigation of key concepts around culture, advocacy, and leadership. Student-led seminar and research workshop culminating in public-facing research project. Offered on a graded basis only. [3] (US)

CAL4998 - Senior Honors Research**Course Description**

Acquisition, reading, and analysis of primary source research material. Open only to senior honors students. [3] (No AXLE credit)

CAL4999 - Senior Honors Thesis**Course Description**

Writing an honors thesis under the supervision of the thesis adviser. [3] (No AXLE credit)

Data Science

DS1000 - Data Science: How Data Shape Our World

Course Description

Accessible, engaging, applied introduction to data science for students from all colleges and majors. Data summary and data visualization; causality and correlation; sampling, resampling, and uncertainty; prediction with linear regression; classification, clustering, and machine learning; ethics. Topics introduced with real-world datasets using a statistical programming language for hands on experience in data science. Enrollment limited to freshmen, sophomores, and juniors. Serves as repeat credit for students who have earned credit for PSCI 2300. [3]

DS1100 - Applied Programming and Problem Solving with Python

Course Description

Foundations of computing using Python. Programming fundamentals. Designing, debugging, running programs. Scalar, vector, and matrix computations for scientific computing and data science. Numeric and text processing. Basic data visualization techniques. Intended for students other than computer science and computer engineering majors. Not open to students who have earned credit for CS 1104 or CS 2204 without permission. Total credit for this CS/DS 1100 and CS 1104 will not exceed 4 credit hours. Total credit for CS/DS 1100 and CS 2204 will not exceed 5 hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3]

DS2100 - Statistics for Data Science

Course Description

Introduction to descriptive and inferential statistics using computational and resampling approaches from data science. Probability, measurement, random variables, distributions, central tendency, variability, confidence intervals, measures of uncertainty, estimation, prediction, hypothesis testing and inference, replicability, power, effect size, t-tests, correlation, univariate ANOVA, and simple linear regression. Examples from wide range of disciplines. [3]

DS3100 - Fundamentals of Data Science

Course Description

Obtaining, manipulating, processing, cleaning, wrangling, visualizing, and analyzing data; effectively communicating results from data analyses. Imputation, multiple linear and logistic regression, regularization, dimensionality reduction, maximum likelihood, model selection, general linear model. Ethics, privacy, and security in data science. Statistical computing for data science in R. Prerequisites: One of: CS 1100, 1101, or 1104. One of: DS 2100, BME 2400, BSCI 3270, CE 3300, ECON 1500, ECON 1510, MATH 2810, MATH 2821, PSY 2100, PSY-PC 2110, or SOC 2100. [4]

DS3262 - Applied Machine Learning

Course Description

Fundamentals of machine learning with emphasis on practical applications to data science problems. Supervised learning (linear and logistic regression, decision trees, support vector machines, neural networks, and deep learning), unsupervised learning (feature selection, data clustering, dimensionality reduction); ethical principles and social implications of machine learning. Intended for students other than computer science majors. Prerequisites: One of CS 1100, CS 2201, or CS 2204; one of DS 2100, BME 2400, BSCI 3270, CE 3300, ECON 1500 or 1510, MATH 2810 or 2820 or 2821, PSY 2100, PSY-PC 2110, SOC 2100. [3]

DS3850 - Independent Study in Data Science

Course Description

Development of research project by individual student under direction of a faculty sponsor. Project must involve (1) development, evolution, or implementation of data science methods, (2) application of data science to one or more fields in the physical, life, or social sciences, engineering, arts, or humanities, or (3) study impact of data on society and its institutions. Consent of both the faculty sponsor and Director of the DS minor required. [1-4]

DS3851 - Independent Study in Data Science

Course Description

Continuation of DS 3850 under the direction of same or different faculty sponsor. [1-4]

DS3891 - Special Topics in Data Science

Course Description

May be repeated for credit if there is no duplication of topic. [3].

Digital Fabrication

DF2100 - Rapid Prototyping

Course Description

Fundamentals of design, prototyping, and entrepreneurship for all disciplines. Practical aspects of modeling and 3D printing functional parts. Machine elements and metrology to facilitate the design process. Operation of 3D printers and other CNC machines through CAM, slicers, and G-code. Leveraging AI to produce lighter, stronger, and more compact models (generative design). Students print their own prototypes and iterate on their designs. FALL, SPRING. [3].

DF3860 - Undergraduate Research in Digital Fabrication

Course Description

Supervised projects employing digital fabrication tools and techniques under the direction of a faculty sponsor culminating in a report of the activities and findings. Consent of both the faculty sponsor and the Director of the DF minor is required. Prerequisite: DF 2100. [1-3; maximum of 6 hours total]

DF3890 - Special Topics

Course Description

[1-3]

Digital Humanities

DHUM1100 - Introduction to Digital Humanities

Course Description

Hands-on experience with essential technologies including digital archives, geospatial humanities, and data and text analysis. History, sub-fields, and major debates; quantitative and qualitative research; intersections of race, gender, and technology; and software studies. Offered on a graded basis only. [3] (HCA)

DHUM1200 - Digital Public Humanities

Course Description

Digital technologies engaging the public in the preservation, sharing, and appreciation of cultural heritage, both historical and contemporary. Collections and exhibits, geospatial humanities, 3D environments, storytelling, crowdsourcing, social media, and smartphone applications. Democratic openness, histories of cultural appropriation, and marginalization. Offered on a graded basis only. [3] (HCA)

DHUM1300 - Computational Humanities

Course Description

Computational analysis of texts, images, video, and sound recordings. Text analysis and data analysis using Python and R, fundamentals of machine learning, creating and using databases, and statistical modeling for humanities research. Debates and controversies surrounding computational humanities. Writing about computational research for humanities audiences. No prior statistical or computing experience is necessary. Offered on a graded basis only. [3] (MNS)

Earth and Environmental Sciences

EES1001 - Commons iSeminar

Course Description

Topics vary. General Elective credit only. [1] (No AXLE credit)

EES1030 - Oceanography (With Laboratory)

Course Description

An introduction to the geology, biology, chemistry, and physics of the marine environment. Serves as repeat credit for EES 1035. Corequisite: 1030L. [3] (MNS) (LE MNS)

EES1030L - Oceanography Laboratory

Course Description

Laboratory to accompany 1030. Corequisite: 1030. One three-hour laboratory per week. Satisfies the AXLE lab course requirement when completed with 1030. Satisfies the CORE Inquiry Lab requirement when completed with 1030 at Vanderbilt. [1] (No AXLE credit) (CORE:LB)

EES1035 - Oceanography (Lecture Only)

Course Description

An introduction to the geology, biology, chemistry, and physics of the marine environment. Serves as repeat credit for EES 1030. [3] (MNS) (CORE B, D) (LE MNS)

EES1081 - Introduction to the Atmosphere

Course Description

The science of the atmosphere: principles of weather and climate; the atmosphere as part of the Earth system; weather forecasting; hurricanes, tornadoes, and severe storms; human impacts, such as air pollution and climate change. [3] (MNS)

EES1081L - Introduction to the Atmosphere Lab**Course Description**

Laboratory to accompany 1081. Corequisite: 1081. One three-hour laboratory per week. Satisfies the AXLE lab course requirement when completed with 1081. [1] (No AXLE credit)

EES1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

EES1200 - Introduction to Environmental Science and Sustainability**Course Description**

Use of science for understanding environment and sustainability issues. Biodiversity and conservation, human-environment interactions, natural resources, energy, waste and pollution, environmental health and justice, ethics, economics, and policy. Historical trends and future projections. Not open to students who have earned credit for EES 4750. [3] (MNS)

EES1510 - The Dynamic Earth: Geological Sciences (with Lab)**Course Description**

Processes that have changed the earth. Relation between these processes and their products (e.g., earthquakes, minerals and rocks, mountains, oceanic features); interactions between processes affecting the solid, liquid, and gaseous components of earth; impact on humans. Serves as repeat credit for EES 1515. Corequisite: 1510L. [3] (MNS) (LE MNS)

EES1510L - Dynamic Earth Laboratory**Course Description**

Laboratory to accompany 1510. Corequisite: 1510. One three-hour laboratory per week. Satisfies the AXLE lab course requirement when completed with 1510. Satisfies the CORE Inquiry Lab requirement when completed with 1510 at Vanderbilt. [1] (No AXLE credit) (CORE: LB)

EES1515 - The Dynamic Earth: Geological Sci (Lecture only)**Course Description**

Processes that have changed the earth. Relation between these processes and their products (e.g., earthquakes, minerals and rocks, mountains, oceanic features); interactions between processes affecting the solid, liquid, and gaseous components of earth; impact on humans. Serves as repeat credit for EES 1510. [3] (MNS) (CORE B, D) (LE MNS)

EES2110 - Introduction to Climate Science**Course Description**

Science, policy, history, and causes of climate change on Earth in the last 2 million years; evidence of human impacts on climate since 1850; future climate change and its economic, social, and ecological consequences; economic, technological, and public policy responses. Prerequisite or corequisite: 1030, 1081, 1200 or 1510 or ENVS 1101. [3] (MNS) (CORE B, E) (LE MNS)

EES2114 - Above and Below the Surface: The Caribbean between Climate Change and Tourism

Course Description

Caribbean islands, history, tourism, and ecology. Human-environment interactions. Under water and above water ecologies; Scuba diving and environmental research. Development of interdisciplinary critical thought. Applied research. [3] (INT)

EES2150 - Science, Risk, and Policy

Course Description

Assessment and management of deadly risks: comparison of markets, regulatory agencies, and courts for managing risks; cultural and scientific construction of risk; psychology of risk perception; case studies such as Hurricane Katrina, mad cow disease, and air pollution. [3] (P)

EES2220W - History of Antarctic Exploration and Governance

Course Description

Scientific and economic drivers motivating explorers. Late 19th and early 20th century expeditions; geology and scientific discoveries. The Antarctic Treaty and modern governance. Serves as repeat credit for students who completed EES 4891 02 in Fall 2022. [3] (HCA)

EES2309W - Mountains to the Sea: Perspectives on Society, Politics, and the Environment

Course Description

How physical environments shape politics, religion, economy, cultural practices and infrastructure. Climate, soils, natural hazards, transportation, water, food, and mineral resources. Contestation over climate change and pollution. [3] (INT)

EES2510 - Earth Systems through Time

Course Description

Effects of feedbacks between the geologic cycles on the lithosphere, hydrosphere, biosphere, and atmosphere at diverse intervals in the Earth's history. Present and future implications. Interpretations of evidence recorded in Earth materials. Three hours of lecture and one laboratory per week. Prerequisite: 1030 and 1030L, 1081 and 1081L, or 1510 and 1510L. [4] (MNS)

EES2550 - Earth Materials

Course Description

Solid materials that make up the earth: rock, soil, and sediment, with emphasis on the minerals that are their major constituents. Hand specimen, optical, and X-ray methods of description and identification. Physical and chemical processes that form and modify earth materials and the use of these materials in interpreting earth processes of the past and present. Field trips. Three lectures and one laboratory per week. Prerequisite: 1030 and 1030L, 1081 and 1081L, or 1510 and 1510L. Prerequisite or corequisite: CHEM 1601. [4] (MNS)

EES2580 - Earth System Dynamics

Course Description

Transport and motion in Earth's systems. Conservation of mass, energy, and momentum over space and time. Earth's processes that lead to and regulate the transport of these quantities. Quantifying Earth's dynamical behavior and describing it with models. Prerequisite: either 1030/1030L, 1081/1081L, or 1510/1510L; and either PHYS 1501, 1601, or 1911; prerequisite or corequisite: MATH 1100, 1201, or 1301. [3] (MNS)

EES3220 - Life Through Time**Course Description**

Ecology, classification, and evolution of important groups of fossils, emphasizing invertebrates. Change in marine ecosystems through geologic time. Causes and effects of rapid evolution events and mass extinctions. Three hours of lecture and one laboratory period per week. Prerequisite: 2510, or BSCI 1511. [4] (MNS)

EES3260 - Petrology**Course Description**

Nature, distribution, and theories of origin of igneous, metamorphic, and sedimentary rocks. Mineralogy as a function of rock-forming conditions. Laboratory emphasis on description and interpretation of rocks, using hand sample and microscope techniques. Field trips. Three lectures and one laboratory period per week. Prerequisite: 2550. [4] (MNS)

EES3280 - Environmental Geochemistry**Course Description**

Chemistry of Earth's surface including the interaction of solids, liquids, and gases. Earth's biogeochemical cycles. Natural and anthropogenic transformations in the Critical Zone. Collection and analysis of environmental samples in the field. Prerequisite: 1030/1030L, 1081/1081L, or 1510/1510L; prerequisite or corequisite: CHEM 1601. [4] (MNS)

EES3310 - Global Climate Change**Course Description**

Scientific principles and policy applications. Earth's past; evidence of human impact; future climate change; and economic, social, and ecological consequences. Economic, technological, and public policy responses. Prerequisite: 1030, 1081, 1510 or 2110; prerequisite or corequisite: PHYS 1501, 1601, or 1911. [4] (MNS)

EES3330 - Sedimentology**Course Description**

The origin and composition of sedimentary particles, their transportation to the site of deposition, actual deposition, and the processes involved in lithifying sediments into solid rock. Emphasis on interpretation of ancient source areas and depositional environments. Terrigenous, carbonate, and other rock types will be studied. Field trips. Three lectures and one laboratory period. Corequisite 2510, 2550, or 2580. [4] (MNS)

EES3333 - Climate and Society: Drowning Cities**Course Description**

Climate change, sea-level fluctuations, and floods from antiquity to the present. Science of climate, coasts, and rivers. Interdisciplinary analysis of urban form and history. Physical, social, technological, and aesthetic influences. Past, present, and future cities in Near East, Europe, Asia, and North America, including Nashville, New Orleans, and New York. Not open to students who completed 3333 or HART 3333 offered fall 2020. [3] (P)

EES3340 - Structural Geology and Rock Mechanics**Course Description**

Principles of rock deformation from microscopic to mountain range scales. Stress and strain; mechanisms of deformation; geometries of faulting and folding. Interpreting geologic maps and constructing cross sections. Applications to tectonics, natural resources, and earthquakes. Corequisite: 2510, 2550, or 2580. [4] (MNS)

EES3841 - Directed Study**Course Description**

Readings in related fields and/or laboratory research in pursuit of a scholarly project conceived and executed under the supervision of a faculty member. Open to senior majors and graduate students or by consent of the department chair. Does not count toward minimum requirements for the major. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 2 credits per semester of enrollment. [1-2] (No AXLE credit)

EES3842 - Directed Study**Course Description**

Readings in related fields and/or laboratory research in pursuit of a scholarly project conceived and executed under the supervision of a faculty member. Open to senior majors and graduate students or by consent of the department chair. Does not count toward minimum requirements for the major. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 2 credits per semester of enrollment. [1-2] (No AXLE credit)

EES3851 - Independent Study**Course Description**

Readings with related field and/or laboratory research in pursuit of a scholarly project conceived and executed under the supervision of a faculty member. Open to senior majors and graduate students. Other students must have consent of department chair. Does not count toward minimum requirements for the major. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3] (No AXLE credit)

EES3852 - Independent Study**Course Description**

Readings with related field and/or laboratory research in pursuit of a scholarly project conceived and executed under the supervision of a faculty member. Open to senior majors and graduate students. Other students must have consent of department chair. Does not count toward minimum requirements for the major. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3] (No AXLE credit)

EES3865 - Field Investigations**Course Description**

Content varies according to location and disciplinary focus. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3] (MNS)

EES3875 - Community Engaged Science**Course Description**

Partnering with community organizations addressing real-world problems. Communication, reflection, collaborative problem solving, and environmental justice. May include field and lab work and community meetings. Final projects presented to community audience. Open only to junior and senior EES majors and minors or by instructor permission. Prerequisite: 2510. [3] (MNS)

EES3880 - Internship Training in EES

Course Description

Under faculty supervision, students from any discipline can gain experience in a broad range of public and private organizations focused on work in Earth and Environmental Sciences. Credit hours earned are based upon actual work performed at the internship site. A minimum of 3 credit hours in background readings and research must be completed in 3881 concurrently with and regardless of the number of hours earned in 3880. A thorough/substantial research paper or report must be submitted at the end of the semester during which the internship is completed. These credit hours may NOT count for the EES major or minor. Normally, a 2.7 grade point average, 6 hours of prior work in EES, and prior approval of a specific plan of work by the director of undergraduate studies in EES are required. Offered on a Pass/Fail basis only and must be taken concurrently with 3881. Co-requisite: 3881. [1-9] (No AXLE credit)

EES3881 - Internship Readings and Research in EES

Course Description

Under faculty supervision, students from any discipline can gain experience in a broad range of public and private organizations focused on work in Earth and Environmental Sciences. Credit hours earned are based upon readings or research supervised by EES faculty to lend some intellectual foundation to the internship experience. A minimum of 3 credit hours in background readings and research must be completed in 3881 concurrently with and regardless of the number of hours earned in 3880. A thorough/substantial research paper or report must be submitted at the end of the semester during which the internship training is completed. These credit hours may not count for the EES major or minor. Normally, a 2.7 grade point average, 6 hours of prior work in EES, and prior approval of a specific plan of work by the director of undergraduate studies in EES are required. [3-6]

EES4231 - Paleobiology

Course Description

Macroevolutionary processes as observed through the fossil record. Inference of evolutionary relationships, physiology, reproduction, behavior, and ecology. Fundamentals of paleobiology, paleoecology, paleoclimates, macroecology, biogeography, geology, geochemistry, anthropology, and conservation paleobiology. Effects of climate change and human impacts, in deep-time. Prerequisite: BSCI 1511. [3] (MNS)

EES4233 - Conservation Biology

Course Description

Ecological, evolutionary, social, and economic aspects of biodiversity loss and ecosystem disruption due to human activities. Climate change, habitat fragmentation, species overexploitation, and invasive species. Sustainable development, habitat restoration, and species reintroduction. Prerequisite: 2510. [3] (MNS)

EES4238 - Ecology

Course Description

Population biology, evolutionary ecology, community structure, with emphasis on species interactions, including competition, predation, and symbiosis. Prerequisite: 2510. [3] (MNS)

EES4300 - Earth's Natural Resources

Course Description

How natural resources are formed, produced, and used. Geological controls on resource distribution in space and time. Analysis of historical trends and prediction of future resource availability. Environmental impacts of mining, use, and disposal. Fossil fuels, alternative energy sources, nuclear fuels, metals, industrial minerals, water, soil, and elements used in agriculture. Synthesis of relevant knowledge from geosciences, chemistry, engineering, and economics. Open only to junior and senior EES majors and minors or by instructor permission. Prerequisite: EES 1030 or EES 1510. [3] (MNS)

EES4420 - Geomorphology**Course Description**

Analysis of the Earth's landforms, their morphology, history, and the processes that form them. The building of relief and its subsequent transformation by geologic processes on hillslopes, rivers, coasts, wetlands, and glaciers. The natural history and human impacts on land forms. Field trips. Familiarity with basic physics (mechanics) is expected. Prerequisite: 1030 or 1081 or 1510. [3] (MNS)

EES4440 - Glacial Geology**Course Description**

Metamorphism of snow and ice; mass balance at snow and ice surfaces; and rheology of ice. Destruction and creation of landscapes by glacial movement and debris. Response of ice bodies to changes in climate; physical, chemical, and biological evidence of climate change; and methods of paleoclimate reconstruction. Glacial impacts on societies through sea-level, hazards, coastlines, and water supplies. Prerequisite: 1030 or 1081 or 1510. [3] (MNS)

EES4480 - Mass Extinctions**Course Description**

Synthesizing causes, consequences, and dynamics of past mass extinction events. Using fossil records to interpret current and future trends in biodiversity loss. Prerequisite: 2510 or 2580 [3] (MNS)

EES4550 - Transport Processes in Earth and Environmental Systems**Course Description**

Principles of conservation and constitutive transport laws; classic and emerging styles of modeling natural systems. Prior study of basic calculus (functions, derivatives, integrals) and physics (mechanics) is expected. Prerequisite: senior or graduate standing with a major in Earth and Environmental Sciences, Biological Sciences, Chemistry, Mathematics, Physics, or the School of Engineering. [3] (MNS)

EES4600 - Geochemistry**Course Description**

Application of chemistry to study the distribution and cycling of elements in the crust of the earth. Includes chemical bonding and crystallization, phase rules and phase diagrams, chemical equilibria, theories on the origin of elements, earth, ocean, atmosphere, and crust. Prerequisite: 2550 and CHEM 1602. [3] (MNS)

EES4650 - Physics of the Climate System**Course Description**

Physical processes affecting the climate system. Global energy balance of Earth and planets. Surface temperature and how it is regulated. Electromagnetic radiation and its interaction with atmospheric gases, clouds, and aerosols. Ocean heat storage, cloud and precipitation processes, and the impact of sea and inland ice on temperature. Processes that govern the water and carbon cycle. Permission of instructor required to enroll. [3] (MNS)

EES4680 - Paleoclimates**Course Description**

Fluctuations in Earth's climate with an emphasis on the past 700 million years. Forcings and feedback that influence climate and drive change. Techniques used to reconstruct past climate change using marine and terrestrial geologic deposits and geochronologic methods. Prerequisite: 2110 and ENVS 1101; or corequisite: 2510, 2550, or 2580. [3] (MNS)

EES4760 - Agent- and Individual-Based Computational Modeling

Course Description

Applications in natural, social, and behavioral sciences and engineering. Designing, programming, and documenting models. Using models for experiments. Examples from environmental science, ecology, economics, urban planning, and medicine. Familiarity with basic statistics and proficiency in algebra are expected. [3] (MNS)

EES4820 - Paleoecological Methods

Course Description

Tools used to interpret past environments and climates, including plant microfossils, pollen and phytoliths, vertebrate morphology, and dental microwear and mesowear. Geochemical tools such as stable isotopes and rare earth elements. Integrating methods for paleontological and anthropological studies, including the use of databases and meta-analyses. Readings from primary sources. Prerequisite: 1030 or 1081 or 1510. Serves as repeat credit for BSCI 4820 prior to Fall 2025, or BSCI 3820 Fall 2025 forward. [3] (MNS)

EES4830 - Volcanic Processes

Course Description

Nature, behavior, and origin of volcanoes. Magmatic processes that lead to eruptions. Eruptive processes and volcano construction. Impacts of volcanism on Earth's surface environment. Prerequisite: 3260. [3] (MNS)

EES4891 - Special Topics

Course Description

Topics vary. May be repeated for credit more than once by permission of the director of undergraduate studies. Students may enroll in more than one section of this course each semester. Prerequisite: 1030 or 1510 or 1081. [1-3] (No AXLE credit)

EES4951 - Career Pathways in the Earth and Environmental Sciences

Course Description

Interactions with professionals to learn about their personal journeys and current opportunities. Goals, knowledge, and skills to create materials and professional plans. Prerequisite: any EES course or ENV5 1101.[1] (No AXLE credit)

EES4961 - Senior Seminar

Course Description

Integrating concepts and information from diverse fields. Offered on a graded basis only. Limited to seniors in the final semester of the major. [1] (No AXLE credit)

EES4996 - Senior Honors Seminar I

Course Description

Research methods and scientific writing and communication, including work towards senior honors project, thesis, and oral presentation. Open only to senior departmental honors candidates. Does not count toward minimum requirements for major. Corequisite: 4998 [1] (No Axle Credit)

EES4997 - Senior Honors Seminar II

Course Description

Research methods and scientific writing and communication, including work towards senior honors project, thesis, and oral presentation. Open only to senior departmental honors candidates. Does not count toward minimum requirements for major. Prerequisite: 4996, Corequisite: 4999 [1] (No AXLE Credit)

EES4998 - Senior Honors Research**Course Description**

Independent research under faculty supervision that culminates in an oral presentation and written thesis submitted to the faculty. Open only to departmental honors candidates. Does not count toward minimum requirements for the major. [2] (No AXLE credit)

EES4999 - Senior Honors Research**Course Description**

Independent research under faculty supervision that culminates in an oral presentation and written thesis submitted to the faculty. Open only to departmental honors candidates. Does not count toward minimum requirements for the major. [2] (No AXLE credit)

Economics

ECON1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

ECON1010 - Principles of Macroeconomics**Course Description**

The role of scarcity and prices in allocating resources. National income, fluctuations in unemployment and price level, monetary and fiscal policy. [3] (SBS) (CORE B) (LE SBS)

ECON1020 - Principles of Microeconomics**Course Description**

The behavior of households and business in markets. Competition, monopoly, and rivalry in product and factor markets. Equilibrium. Income distribution. International trade. [3] (SBS) (CORE B) (LE SBS)

ECON1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

ECON1500 - Economic Statistics**Course Description**

The use of quantitative data in understanding economic phenomena. Probability, sampling, inference, and regression analysis. Not open to students who have earned credit for 1510. Total credit for this course and 1510 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite: Math 1100, 1200, or 1300. [3] (SBS) (CORE D) (LE SBS)

ECON1510 - Intensive Economic Statistics

Course Description

Quantitative techniques in economic analysis. Probability sampling, inference, and multiple regression. Not open to students who have earned credit for 1500. Total credit for this course and 1500 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate.

Prerequisite: MATH 1100, 1200 or 1300. [3] (SBS)

ECON2100 - Labor Economics

Course Description

Introduction to labor markets in the United States. Foundations and applications of labor supply and demand, immigration and immigration policies, investment in human capital, wage policies of employers, minimum wage legislation, labor market discrimination and remedial programs, effects of labor unions, and unemployment.

Prerequisite: 1010 and 1020. [3] (SBS)

ECON2150 - Economic History of the United States

Course Description

Economic development of the United States from the Colonial period to the present. Interrelated changes in economic performance, technology, institutions, and governmental policy. Prerequisite: 1010 and 1020. [3] (US) (CORE B, D) (LE SBS)

ECON2160 - Strategic Analysis

Course Description

Introduction to sequential and simultaneous games. Backward induction, equilibrium, pure and mixed strategies. Cooperation and conflict, the prisoner's dilemma, threats, promises, and credibility. Brinkmanship, uncertainty, the role of information, auction design, bidding strategies, and bargaining. Voting and agenda control.

Prerequisite: 1010 and 1020. [3] (SBS) (CORE B) (LE SBS)

ECON2170 - Environmental Economics

Course Description

Public policies to address market failures. Energy policy, climate change, biodiversity, globalization, and population growth. Sustainable economic activity, recycling, valuing environmental amenities, addressing ethical dilemmas, and resolving disputes. Offered on a graded basis only. Prerequisite: 1010 and 1020. [3] (SBS)

ECON2180 - Sports Economics

Course Description

Intercollegiate and professional sports leagues. Competitive balance, player labor markets, and owner capital markets. Theories of league expansion, rival leagues, franchise relocation, and sports venue finance.

Comparisons of international sports leagues. Offered on a graded basis only. Prerequisite: 1010 and 1020. [3] (SBS) (CORE C) (LE SBS)

ECON2210 - Economics and Legal Institutions

Course Description

Theoretical study of legal institutions. Economic consequences of legal frameworks as they pertain to individual and group behavior. Prerequisite: ECON 1020. [3] (SBS) (CORE B) (LE SBS)

ECON2220 - Latin American Development**Course Description**

Economic growth and structural change. Historical legacies, import-substitution, debt crisis, inflation, and macroeconomic stabilization. Regional and national economic integration, migration, and conflict. Poverty, inequality, and policies. No credit for graduate students in economics. Prerequisite: 1010. [3] (SBS) (CORE B, D) (LE SBS)

ECON2260 - International Economics**Course Description**

Causes, consequences, and conduct of economic interactions among sovereign nations. Trade in goods and services; international monetary and financial interactions; winners and losers; exchange rates and the balance of payments; economic organizations. Offered on a graded basis only. Prerequisite: 1010 and 1020. [3] (SBS).

ECON2300 - Money and Banking**Course Description**

A study of commercial banks and other intermediaries between savers and investors in the United States, including the government's role as money creator, lender, and regulator of private credit, and the effects of financial institutions on aggregate economic activity. Prerequisite: 1010 and 1020. [3] (SBS) (CORE B) (LE SBS)

ECON2340 - Plunder and Pillage: The Economics of Warfare and Conflict**Course Description**

International and domestic economic conflict. Offensive and defensive strategies. Fortifications, strategic bombing, and conscription. Corporate takeovers, bargaining failures, and labor strikes. Prerequisites: 1010 and 1020. [3] (SBS)

ECON2350 - Health Care Policy**Course Description**

Health care markets in the United States. Supply and demand, social insurance policies, pharmaceuticals, malpractice, and health care reform. Prerequisite: 1010 and 1020. [3] (SBS) (CORE B) (LE SBS)

ECON2890 - Special Topics**Course Description**

Topics of special interest. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: 1010 and 1020. [3] (No AXLE credit)

ECON3010 - Intermediate Microeconomic Theory**Course Description**

Development of the techniques of analysis for problems of resource allocation. Theories of choice and production for individual economic agents in competitive and monopolistic environments. Behavior of markets. Determination of prices, wages, interest, rent, and profit. Income distribution. Not open to students who have earned credit for 3012. Total credit for this course and 3012 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite: 1010, 1020, and either MATH 1100, 1200, or 1300. [3] (SBS)

ECON3012 - Microeconomics**Course Description**

Consumer choice and firm behavior from the fundamentals of preference and production theory. Calculus-based optimization. Price-determination, analysis of market equilibrium, perfect competition and the effect of market power in monopolies and oligopolies. Efficiency, welfare, and market failures. Not open to students who have earned credit for 3010. Total credit for this course and 3010 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite: 1010, 1020, and either MATH 1201 or 1301. [3] (SBS)

ECON3020 - Intermediate Macroeconomic Theory**Course Description**

National income accounting and analysis. Classical, Keynesian, and contemporary models determining national income, employment, liquidity, price level, and economic growth. Not open to students who have earned credit for 3022. Total credit for this course and 3022 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite: 1010, 1020, and either MATH 1100, 1200, or 1300. [3] (SBS)

ECON3022 - Macroeconomics**Course Description**

Contemporary models of national income, employment, interest rates, price level, and economic growth. Decisions underlying consumption and investment behavior, as well as the effect of government policies. Not open to students who have earned credit for 3020. Total credit for this course and 3020 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite: 1010, 1020, and either MATH 1201 or 1301. [3] (SBS)

ECON3032 - Applied Econometrics**Course Description**

Quantitative economic analysis with emphasis on multivariate regression. Measurement, specification, estimation, inference, prediction, and interpretation of econometric models. Experience with data and computer applications. Not open to students who have earned credit for 3035 or 3050. Total credit for this course and 3035 will not exceed 3 credit hours. Total credit for this course and 3050 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite: 1020; either 1500, 1510, or both MATH 2820L and either MATH 2810 or 2820; and either Math 1201 or 1301. [3] (SBS)

ECON3035 - Econometric Methods**Course Description**

Properties and problems in estimating economic relationships with multiple regression. Statistical and econometric theory to address empirical questions. Hands-on experience with economic data analysis with programming in statistical software. Not open to students who have earned credit for 3032 or 3050. Total credit for this course and 3032 will not exceed 3 credit hours. Total credit for this course and 3050 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite: 1020, either 1500, 1510, or both MATH 2820L and either MATH 2810 or 2820; and either Math 1201 or 1301. [3] (SBS)

ECON3050 - Introduction to Econometrics**Course Description**

Quantitative methods of economic analysis. Measurement, specification, estimation, and interpretation of economic models. Econometric computation using microcomputers. Not open to students who have earned credit for 3032 or 3035. Total credit for this course and 3032 will not exceed 3 credit hours. Total credit for this course and 3035 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Not offered after AY 2019-20. Prerequisite: 3010 or 3012 and either 1500 or 1510; or MATH 2820L with either MATH 2810 or MATH 2820. [3] (SBS)

ECON3100 - Wages, Employment, and Labor Markets**Course Description**

Theories and empirical evidence of the determinants of wages and employment. Compensating differentials, education and human capital, migration and labor mobility, discrimination, incentive pay, wage inequality.

Prerequisite: 3010 or 3012. [3] (SBS)

ECON3110 - Poverty and Discrimination**Course Description**

Theories and empirical evidence concerning inequality, poverty, and discrimination, and their relationship to economic growth. Evaluation of anti-poverty and anti-discrimination policies. Prerequisite: 3012; and one of 3032, 3035. [3] (SBS)

ECON3150 - Topics in the Economic History of the U.S.**Course Description**

Analysis of major issues and debates in American economic history. Prerequisite: 3010 or 3012. [3] (US)

ECON3160 - Economic History of Europe**Course Description**

Sources of Western European economic progress. Organization of overseas merchant empires, origins of the Industrial Revolution, the role of property rights, demographic patterns, and changing living standards.

Prerequisite: 3010 or 3012. [3] (SBS)

ECON3170 - Environmental and Natural Resource Economics**Course Description**

Theories of benefit-cost analysis, externalities, and public goods applied to study environmental market failures. Empirical methods applied to nonmarket valuation of environmental amenities and policy evaluation. Theories of optimal control and use applied to study energy, forests, fisheries, water, and climate change. Prerequisites:

3012; 3032 or 3035. [3] (SBS)

ECON3200 - Public Finance**Course Description**

Theories of the state and collective decisions, fiscal federalism, public goods and externalities. Tax theory: equity, efficiency, and growth. Taxation of goods, factors, and corporations. Cost-benefit analysis. Prerequisite: 3010 or 3012. [3] (SBS)

ECON3210 - Economics of Education**Course Description**

Models of educational investment and role of government in education provision. Effects of education on social and economic outcomes, the behavior of institutions that produce education, and the design and implementation of public policies that affect the level and distribution of educational resources. Prerequisite:

ECON 3012. [3] (SBS)

ECON3230 - Urban Economics**Course Description**

Urban growth, development of suburbs, location of firms, housing markets, transportation, property taxes, and local government services. Offered on a graded basis only. Prerequisite: 3010 or 3012. [3] (SBS)

ECON3250 - Industrial Organization

Course Description

Models of market structure and behavior from monopoly and oligopoly to perfect competition. Strategic interaction between a firm and its customers and between a firm and its competitors. Firm practices and government policies that promote or hinder the efficient operation of markets. Offered on a graded basis only. Prerequisite: 3010 or 3012. [3] (SBS)

ECON3270 - Economics of Information and Communications Technology

Course Description

The Internet, cloud computing, social networks, e-commerce, and Internet telephony as influencers of commerce and consumer welfare. Streaming content, big data, informatics, and open source software in economic perspective. Property rights, competition, and regulation in cyberspace. Prerequisite: 3010 or 3012. [3] (SBS)

ECON3300 - Financial Instruments and Markets

Course Description

Theoretical and empirical approaches to the analysis of monetary and other financial instruments. Portfolio analysis, interest rate risk, and financial futures and options markets. Prerequisite: Either 3010 or 3012; and either 3020 or 3022. [3] (SBS)

ECON3330 - Economics of Risk

Course Description

Decision making under risk and uncertainty. Expected utility, risk aversion, and the value of information. Investments, insurance, and lotteries. Moral hazard and adverse selection. Prospect theory. Serves as repeat credit for ECON 3893-01 in Fall 2016. Prerequisite: 3010 (or 3012) with either 1500 or 1510; or Math 2820L with either Math 2810 or Math 2820. [3] (SBS)

ECON3350 - Economics of Health

Course Description

Demand for health and health care. Value of health, life, and medical innovation. Health insurance. Supply and organization of health care services. U.S. health care reforms. Prerequisite: 3010 or 3012. [3] (SBS)

ECON3600 - International Trade

Course Description

International trade in goods and services. Patterns of trade; gains and losses from trade, tariffs, and other commercial policies; economic integration; and international factor movements. Offered on a graded basis only. Prerequisite: 3010 or 3012. [3] (SBS)

ECON3610 - International Finance

Course Description

Economics of international monetary, financial, and macroeconomic relationships. Effects of monetary and fiscal politics in open economies, balance of payments, exchange rate determination, and international monetary institutions. Prerequisite: 3020 or 3022. [3] (SBS)

ECON3650 - Development Economics**Course Description**

Determinants of national economic growth for pre-industrial and newly industrial countries. Inequality and poverty. Imperfect credit markets and microfinance. Political constraints and corruption. Policy issues relevant to developing economics. Prerequisite: 3010 or 3012, and either 1500, 1510, 3032, 3035, or 3050. [3] (INT)

ECON3698 - Junior Honors Research**Course Description**

Honors thesis proposal under the supervision of a thesis adviser and the Director of Honors. Open only to junior majors with the approval of the Director of Honors. Prerequisite: 3010 or 3012. [1] (No AXLE credit)

ECON3700 - Economic Growth**Course Description**

Determinants of macroeconomic growth. Mathematical theories of exogenous and endogenous growth. Comparison of growth rates across countries and time. The effect of growth rates on economic well-being. The effect of tax rates. Prerequisite: 3010 or 3012, and 3020 or 3022. [3] (SBS)

ECON3750 - Econometrics for Big Data**Course Description**

Econometric methods for analyzing large datasets. Model selection, regularization, classification, resampling, tree-based methods, and support vector machines. Forecasting stock prices, prediction of housing prices, and determination of wages. Prerequisite: 3010 or 3012; either 3032, 3035, 3050; or MATH 2820L with MATH 2810 or 2820. [3] (SBS)

ECON3851 - Independent Study in Economics**Course Description**

A program of independent reading in economics, arranged in consultation with an adviser. Limited to students having written permission from an instructor and the director of undergraduate studies. Prerequisite: 3010 or 3012. [Variable credit: 1-3 each semester, or 1-6 for departmental honors candidates; maximum of 12 hours in 3851 and 3852 combined for departmental honors students; maximum of 6 hours in 3851 and 3852 combined for other students] (No AXLE credit)

ECON3852 - Independent Study in Economics**Course Description**

A program of independent reading in economics, arranged in consultation with an adviser. Limited to students having written permission from an instructor and the director of undergraduate studies. Prerequisite: 3010 or 3012. [Variable credit: 1-3 each semester, or 1-6 for departmental honors candidates; maximum of 12 hours in 3851 and 3852 combined for departmental honors students; maximum of 6 hours in 3851 and 3852 combined for other students] (No AXLE credit)

ECON3893 - Selected Microeconomic Topics**Course Description**

Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: 3010 or 3012. [3] (No AXLE credit)

ECON3894 - Selected Macroeconomic Topics**Course Description**

Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: 3020 or 3022. [3] (No AXLE credit)

ECON4050 - Topics in Econometrics**Course Description**

Emphasis on applications. May include generalized method of moments, empirical likelihood, resampling methods, and nonparametric techniques. Prerequisite: 3032, 3035, or 3050. [3] (SBS)

ECON4110 - Macroeconomic Models for Policy Analysis**Course Description**

Mathematical models of overlapping generations, rational expectations, and open economies with price rigidities applied to social security, government debt, exchange rates, monetary policy, and time inconsistent optimal policy. Prerequisite: 3020 or 3022. [3] (SBS)

ECON4210 - Law and Economics**Course Description**

The influence of legal rules and institutions on the behavior of individuals and on economic efficiency and equity. Applications from civil procedure as well as property, contract, tort, and criminal law. Offered on a graded basis only. Prerequisite: 3010 or 3012 and either 1500, 1510, 3032, 3035, or 3050. [3] (SBS)

ECON4220 - Social Choice Theory**Course Description**

Strategic and non-strategic social choice theory. Preference aggregation, formal models of voting, and matching. Prerequisite: 3010 or 3012 or PHIL 3003 or any Mathematics course numbered 2500 or above. [3] (SBS)

ECON4230 - Political Economy of Elections**Course Description**

Microeconomic and game-theory analysis of political institutions and elections. Study of party and candidate positioning; efficiency of political competition; polarization; and information provision and processing. Prerequisite: 3012 or PSCI 2259. [3] (SBS)

ECON4240 - Political Economy of Institutions and Development**Course Description**

Theoretical mathematical and empirical models; nations' prosperity or poverty. Institutions as factors for disparity in economic development. Familiarity with basic methods of regression analysis is expected. No credit for students who completed ECON 3893 section 01 offered fall 2022. Prerequisite or corequisite: ECON 3012 or PSCI 2259. [3] (SBS)

ECON4260 - Game Theory with Economic Applications**Course Description**

Rational decision-making in non-cooperative, multi-person games. Single play and repeated games with complete and incomplete information. Economic applications of games, such as auctions, labor-management bargaining, pricing and output decisions in oligopoly, and common property resources. Prerequisite: 3010 or 3012. [3] (SBS)

ECON4280 - Experimental Economics**Course Description**

Design, methodology, and interpretation of economic experiments. Laboratory experiments with applications in labor markets, discrimination, and voluntary contributions. Offered on a graded basis only. Not open to students who have earned credit for 3893 section 01 offered fall 2019. Prerequisite: 3010 or 3012; and 1500 or 1510, or MATH 2820L with MATH 2810 or MATH 2820. [3] (SBS)

ECON4510 - Seminar in Macroeconomic Policy**Course Description**

Intensive study of three or four current problems in economic policy. Studies in topics such as macroeconomic policy for the year ahead, financial market issues, international economic policy issues. Repeat credit for students who have completed 4510W. Limited to majors in economics and public policy. Prerequisite: 3010 or 3012; and 3020 or 3022. [3] (SBS)

ECON4510W - Seminar in Macroeconomic Policy**Course Description**

Intensive study of three or four current problems in economic policy. Studies in topics such as macroeconomic policy for the year ahead, financial market issues, international economic policy issues. Repeat credit for students who have completed 4510. Limited to majors in economics and public policy. Prerequisite: 3010 or 3012; and 3020 or 3022. [3] (SBS)

ECON4520W - Seminar on Globalization**Course Description**

Causes of global economic integration. Winners and losers. World Trade Organization, international environmental treaties, labor and capital markets. U.S. leadership. Offered on a graded basis only. Prerequisite: 3010 or 3012; and either 1500, 1510, 3032, 3035, or 3050. [3] (SBS)

ECON4530 - Seminar in Microeconomic Policy**Course Description**

Intensive study of three or four current problems in microeconomic policy. Repeat credit for students who have completed 4530W. Limited to majors in economics and public policy. Prerequisite: 3010 or 3102. [3] (SBS)

ECON4530W - Seminar in Microeconomic Policy**Course Description**

Intensive study of three or four current problems in microeconomic policy. Repeat credit for students who have completed 4530. Limited to majors in economics and public policy. Prerequisite: 3010 or 3012. [3] (SBS)

ECON4540W - Economics of Conflict**Course Description**

Economic relationships that appropriate value from other parties. War, crime, litigation, family quarrels, and rent-seeking. The visible hand, principal-agent problems, and negative sum games. Prerequisite: 3010 or 3012. [3] (SBS)

ECON4550 - Seminar in Sports Economics**Course Description**

Issues and debates. Offered on a graded basis only. Prerequisite: 2180, and 3010 or 3012. [3] (SBS)

ECON4981 - Honors Seminar**Course Description**

Discussion of selected topics and senior thesis research. Open only to seniors in the departmental honors program. Prerequisite: 3010 or 3012. [1] (No AXLE credit)

ECON4982 - Honors Seminar**Course Description**

Discussion of selected topics and senior thesis research. Open only to seniors in the departmental honors program. Prerequisite: 3010 or 3012. [1] (No AXLE credit)

ECON4998 - Senior Thesis**Course Description**

Limited to and required of all candidates for departmental honors. Prerequisite: 3010 or 3012. [1-3] (No AXLE credit)

ECON4999 - Senior Thesis**Course Description**

Limited to and required of all candidates for departmental honors. Prerequisite: 3010 or 3012. [1-3] (No AXLE credit)

Education

EDUC1001 - Commons iSeminar**Course Description**

Commons iSeminar, a 1-hour small seminar experience, open to first-year students. Students and faculty will collaboratively explore a specialized topic in depth in this university-wide seminar sponsored by The Ingram Commons. General Elective credit only. [1]

EDUC1220 - Society, the School, and the Teacher**Course Description**

Introduces the relationship between society's goals and those of the school. Studies the community setting and the school, the social, political, and instructional organization of a school, and the roles and values of a teacher. Field experience. [3]

EDUC1227 - Society, the School, and the Teacher**Course Description**

Introduces the relationship between society's goals and those of the school. Studies the community setting and the school, the social, political, and instructional organization of a school, and the roles and values of a teacher. Writing intensive. [3]

EDUC2160 - Cultural Diversity in American Education**Course Description**

(Also listed as SPED 2060) Focuses on cultural diversity and the ways in which it has been defined and treated in the American educational system. An interdisciplinary perspective informs the course, with particular attention to history, sociology, psychology, anthropology, and educational literatures. [3]

EDUC3030 - Learning and Instruction**Course Description**

Introduces theories of learning and explores their utility for the design of learning environments. Contrasts socio-cultural and cognitive approaches toward concepts and categories, problem solving, and model-based reasoning. [3]

EDUC3120 - Children in Families and Schools**Course Description**

Examines the cultural, social-political, historical, and collaborative influences of families and educational institutions on children's development and learning. Emphasis on understanding family-school connections and developing partnerships to foster maximum growth of children. [3]

EDUC3140 - Learning and Development in Early Childhood Education**Course Description**

Applying an understanding of learning and development, students examine a variety of early childhood curriculum models based upon their assumptions about learning and development. Students consider how the role of the classroom teacher and the establishment of classroom norms are shaped by each curricular model. An imbedded 20-hour practicum enables students to see different curricular models and to interact with preschool children. [3]

EDUC3212 - Introduction to Reading Processes and Assessment**Course Description**

Develops an understanding of reading and of elementary students as readers. Examines theoretical models, approaches, and the development of reading in elementary classrooms. Candidates will investigate how children learn to read, explore assessments that reveal student understanding of reading, and apply this knowledge in scaffolding reading with individual students. Provides informal assessment and teaching experiences within a school setting. [3]

EDUC3214 - Theory and Methods of Reading Instruction in Elementary Schools**Course Description**

Examines approaches, strategies, and methods for teaching reading in elementary classrooms with attention paid to philosophies and principles of instructional practice designed to individualize instruction and support literacy development. Discusses underlying concepts and theories pertaining to literacy instruction and relates these to classroom practice. Although grounded in the philosophy that reading and writing are not discrete entities, the course focuses on reading. Prerequisite: EDUC 3212; Corequisite: EDUC 3215 and EDUC 3216. [3]

EDUC3215 - Language Arts in Elementary Schools**Course Description**

Examines the nature of language development in the elementary school years with attention paid to principles and practices for teaching English language arts, particularly related to writing instruction. Consideration of instructional practices designed to individualize instruction and support literacy development will occur. Prerequisite: EDUC 3212; Corequisite: EDUC 3214 and EDUC 3216. [3]

EDUC3216 - Practicum in Teaching Elementary Reading and Language Arts**Course Description**

: Field experiences in a variety of elementary classroom settings designed to provide practical experience and reflection on the teaching of reading and the language arts. Prerequisite: EDUC 3212; Corequisite: EDUC 3214 and EDUC 3215. [3]

EDUC3240 - Practicum in Elementary Science and Social Studies

Course Description

Field experiences in a variety of school, grade level, and instructional settings, designed to integrate and apply teaching skills developed in the elementary science and social studies methods courses. Corequisite: SCED 3240 and SSED 3240. [3]

EDUC3270 - Managing Instructional Settings

Course Description

Examines several planning and management philosophies and a variety of practices for use with early childhood and/or elementary school students. [2]

EDUC3280 - Planning & Assessment Strategies

Course Description

Students will explore the research-based curriculum design process of backwards planning by learning about the theory behind teaching toward a course Big Idea, essential questions, and identified content standards. Students will also learn how to identify and write equity-based classroom assessments and lesson plans. The course has a field-embedded component that requires students to spend 9 to 12 hours in the field. [3]

EDUC3310 - Classroom Ecology

Course Description

This course explores how teachers make design choices for an environment that creates optimal conditions for student learning. Design elements include social and cultural contexts of learning, social/emotional learning, motivations for learning, and appropriate assessments. This is an introductory general methods class. Students will take specific methods classes in their area of teaching. [3]

EDUC3537 - Scholarly Writing and Thinking

Course Description

Students will engage in academic thinking processes such as identifying productive research questions about timely topics, evaluating and synthesizing literature, and composing academic writing in a range of genres (e.g., annotated bibliographies and literature reviews). Students will be able to view, emulate, and practice writing processes that are a part of the production of conference proposals, theoretical commentaries, and/or empirical research articles. Through drafting, revising, editing, and workshopping with peers and instructors, each student will receive ample feedback on their written work and develop the necessary skills for professional research and writing. [3]

EDUC3547 - Language Curriculum Design

Course Description

This course focuses on language curriculum design, considering multilingual learners' interests and goals, relevant research in the field of language teaching, curricular coherence, and language teaching philosophies. Principles of language curriculum design are applied to the evaluation, adaptation, supplementation, and creation of curriculum that can be used in future language teaching contexts with learners across the lifespan. [3]

EDUC3575 - Multimodality & Multilingualism

Course Description

Digital communication today often involves the use of multiple modes—including visuals, sounds, text, and movement—to make meaning. In this graduate seminar, we will explore theoretical perspectives and current educational research within the rapidly expanding field of multimodality. We will devote particular attention to understanding how multilingual learners make meaning across modes and languages in and out of school. In addition to critically engaging with scholarship, you will also gain experience analyzing and creating various digital products that interweave multiple languages and modalities. We will also consider the pedagogical implications for designing instruction that effectively integrates technology to support emergent bilingual students' language and literacy learning. Along with gaining a broad understanding of the scholarship at the intersections of multimodality and multilingualism, this course will also provide opportunities for students to delve into specific topics and applications of interest. [3]

EDUC3620 - Social and Philosophical Aspects of Education

Course Description

Exploration of the interaction between contemporary social problems and various philosophies in relation to educational theory, policy, and practice. [3]

EDUC3720 - Principles of Multilingual Education

Course Description

This survey course examines theoretically and empirically supported practices to support equitable education of multilingual students, many of whom are designated as "English Language Learners" in US school systems. Introductions to the following topics are included: second language acquisition, instructional strategies, program models, assessment, and ways to support students in mobilizing their cultural and linguistic resources. This course does not fulfill any ESL endorsement requirement. [3]

EDUC3730 - Foundations of Multilingual Education

Course Description

This course focuses on the historical, political, legal, theoretical, and educational influences that shape learning for multilingual learners who are learning English as an additional language. Emphasis is placed on (1) investigating and mobilizing multilingual learners' resources in instruction, (2) analyzing relevant policies and programs that shape the experiences and outline rights and responsibilities of students, families, and educators, and (3) developing a personalized philosophy with plans for advocacy, collaboration and ongoing professional learning that can improve educational opportunities for multilingual learners. [3]

EDUC3740 - Methods for Educating Multilingual Learners

Course Description

This course focuses on bilingual and linguistically appropriate curriculum materials and instruction for multilingual students across the disciplines (English language arts, science, mathematics, social studies). The course emphasizes research-based practices that support multilingual students labeled as "Multilingual learners (MLs)" including but not limited to (1) communicative language teaching, (2) the Sheltered Instruction Observation Protocol (SIOP), (3) translanguaging, and (4) learners' strategy use.. [3]

EDUC3742 - Practicum: Multilingual Learners

Course Description

In this practicum, students will work in a classroom with multilingual learners and a mentor teacher. Students will observe their mentor teacher, support learners, plan and implement lessons, reflect on their instruction, analyze factors that support learning, discuss and act on feedback, and make plans for ongoing professional learning. Students will meet regularly with a university supervisor. This course is required for ESL Endorsement and TESOL Certificate. [3]

EDUC3750 - Educational Linguistics and Second Language Acquisition

Course Description

This course explores multiple components of language and focuses on the understanding and application of linguistic theory and second language acquisition to the teaching of English learners. Topics covered include the structure of the English language, language as a system, language acquisition and development, language variation, theories of second language acquisition, and instructional and applied opportunities for fostering oral and written discourse. This course integrates linguistics knowledge from a variety of languages, emphasizes the use of multiple languages in multilingual learners' experiences, and fosters an asset-centered, sociolinguistics approach to language study and instruction. [3]

EDUC3760 - Assessment of Multilingual Learners

Course Description

This course focuses on theoretical and practical aspects of assessing bilingual and multilingual students learning English in a variety of contexts. Emphasis is placed on theories and issues affecting the assessment of English learners; critical engagement with a range of assessment tools and types; and practical applications for the construction and implementation of language learner assessment. [3]

EDUC3770 - Language Socialization and Variation

Course Description

This course provides a sociocultural view of language development and uses. Specific topics covered include examination of components and characteristics of language structure as they relate to different language variations, discourse patterns, and ways in which they relate to discourse differences among social groups. The students in this class will analyze the socio-political nature of language standards and "standard" usage and investigate ways in which teachers can integrate language variations and linguistic diversity into teaching practices. Prerequisite: EDUC 3750 or equivalent course.[3]

EDUC3790 - Qualitative Language Analysis

Course Description

This Qualitative Language Analysis course introduces students to some of the characteristics and approaches to designing and conducting qualitative language research analysis. Students will gain experience in various qualitative analysis techniques for purposes of either carrying out a research project or designing courses and materials derived from the results of their analysis. [3]

EDUC3850 - Independent Study in Education

Course Description

Semi-independent study on selected topics in education. Consent of instructor required. May be repeated. [1-3]

EDUC3860 - Honors Research in Education

Course Description

Individual programs of reading on the conduct of research studies in education. May be repeated. Consent of instructor required. [1-3]

EDUC3861 - Initial Fieldwork in Educational Studies

Course Description

Field-based application of Education Studies coursework, providing students an opportunity to integrate and apply theory and practice to learning in out-of-school settings. Students are placed in culturally diverse education settings and are given opportunities to engage in practitioner observations, learning design and implementation, and guided reflective practice. [3]

EDUC3862 - Advanced Fieldwork in Educational Studies**Course Description**

Advanced experience for Education Studies coursework, providing students an opportunity to develop independent experience in out-of-school settings and to apply at an advanced level theory and practice to learning in out-of-school settings. Students are placed in culturally diverse education settings and are given opportunities to engage in practitioner observations, learning design and implementation, and guided reflective practice. [3]

EDUC3871 - Practicum in Secondary Education I**Course Description**

Field experience in middle and secondary school settings. Designed for secondary education majors in their sophomore year. [3]

EDUC3872 - Practicum in Secondary Education II**Course Description**

Field experience in middle and secondary school settings. Designed for secondary education majors in their junior year. [1]

EDUC3890 - Special Topics in Education**Course Description**

Exploration of special issues on topics related to education. May be repeated for credit with change of topic. [1-3]

EDUC4950 - Capstone Fieldwork in Educational Studies**Course Description**

Capstone experience for Education Studies coursework, providing students an opportunity to develop independent experience in out-of-school settings and to apply at an advanced level theory and practice to learning in out-of-school settings. Students are placed in culturally diverse education settings and are given opportunities to engage in practitioner observations, learning design and implementation, and guided reflective practice. Capstone experiences should include opportunities for students to develop, direct or implement learning opportunities with increasing independence from field partners. [6]

EDUC4951 - Student Teaching in Early Childhood**Course Description**

Observation and teaching experience for students seeking PreK-3 licensure. Undergraduate credit only. Prerequisite: admission to student teaching. [9]

EDUC4952 - Student Teaching in the Elementary School**Course Description**

Observation and teaching experience in elementary schools. Undergraduate credit only. Prerequisite: admission to student teaching. [9]

EDUC4953 - Student Teaching in the Secondary School**Course Description**

Observation and teaching experience in secondary schools. Undergraduate credit only. Prerequisite: admission to student teaching. [9]

EDUC4961 - Student Teaching Seminar: Early Childhood**Course Description**

Seminar to accompany EDUC 4951. A \$300.00 Teacher Performance Assessment fee is associated with this course. [3]

EDUC4962 - Student Teaching Seminar: Elementary**Course Description**

Seminar to accompany EDUC 4952. A \$300.00 Teacher Performance Assessment fee is associated with this course. [3]

Electrical & Computer Engineering

ECE2112 - Circuits**Course Description**

Development of basic electrical circuit element models, signal representations, and methods of circuit analysis. Matrix methods and computer techniques. Demonstrations of physical components, measurement techniques, and transient phenomena. Corequisite: MATH 2300; PHYS 1602. FALL, SPRING. [3]

ECE2112L - Circuits Laboratory**Course Description**

Experiments in electrical theory, circuits, and components, including linear circuit theorems, operational amplifiers, comparators, oscillators, multivibrators, data converters, diode circuits, transistors as digital switches, sensors and transducers, data transmission circuits, and first-order filters. Corequisite: ECE 2112. FALL, SPRING. [1]

ECE2123 - Digital Systems**Course Description**

(Also listed as CS 2123). Digital systems and hardware fundamentals of computer architectures, from logic gates and sequential logic to simple processor (e.g. von Neumann) architectures. Boolean algebra, information representation, state machines, digital system design, processors, instruction execution, I/O handling, and machine instruction set concepts. ECE 2123 is not open to students who have earned credit for ECE 2116. Serves as repeat credit for CS 2123. Corequisite: ECE 2123L. FALL, SPRING [3].

ECE2123L - Digital Systems Laboratory**Course Description**

(Also listed as CS 2123L). Laboratory for ECE 2123. One three-hour laboratory per week. ECE 2123L is not open to students who have earned credit for ECE 2116L. Serves as repeat credit for CS 2123L. Corequisite: ECE 2123. FALL, SPRING [1].

ECE2201 - Program Design and Data Structures**Course Description**

Also listed as CS 2201. Continuation of CS 1101/1104. The study of elementary data structures, their associated algorithms and their application in problems; rigorous development of programming techniques and style; design and implementation of programs with multiple modules, using good data structures and good programming style. Serves as repeat credit for CS 2201. Prerequisite: CS 1101 or 1104. FALL, SPRING. [3]

ECE2204 - Program Design and Data Structures for Scientific Computing

Course Description

Also listed as CS 2204. Data structures and their associated algorithms in application to computational problems in science and engineering using Python. Time and memory complexity; dynamic memory structures; sorting and searching; advanced programming and program-solving strategies; efficient software library use. Serves as repeat credit for CS 2204. Prerequisite: CS 1100 or DS 1100. FALL, SPRING. [3]

ECE2213 - Circuits II

Course Description

Steady-state and transient analysis of electrical networks with emphasis on Laplace transform methods and pole-zero concepts. Prerequisite: ECE 2112, PHYS 1602. Corequisite: ECE 2213L, MATH 2400 or 2420. FALL, SPRING. [3]

ECE2213L - Circuits II Laboratory

Course Description

Laboratory for ECE 2213. One three-hour laboratory per week. Corequisite: ECE 2213. FALL, SPRING. [1]

ECE2214 - Analog Circuits and Systems

Course Description

Steady-state and transient analysis of electrical networks with emphasis on Laplace and Fourier transform methods and pole-zero concepts. No credit for students who have earned credit for ECE 2213 or 3214. Prerequisite: ECE 2112, PHYS 1602. Corequisite: MATH 2400 or 2420. FALL, SPRING. [3]

ECE2218 - Microcontrollers

Course Description

(Also listed as CS 2218). Microprocessor and microcontroller architecture with emphasis on control applications. Assembly language and interfacing with programs written in high-level languages. Interfacing and real-time I/O with microprocessors, control algorithms, and networking with microcontrollers. Serves as repeat credit for CS 2218. Prerequisite: ECE 2116 or 2123; one of CS 1101, 1103, or 1104. Corequisite: ECE 2218L. SPRING. [3].

ECE2218L - Microcontrollers Laboratory

Course Description

(Also listed as CS 2218L). Laboratory for ECE 2218. A small structured project is required. One three-hour laboratory per week. Serves as repeat credit for CS 2218L. Corequisite: ECE 2218. SPRING. [1]

ECE2281 - Computer Architecture

Course Description

(Also listed as CS 2281). Introduction to computer architecture from a programmer's perspective. Fundamentals: Boolean logic, combinational and sequential logic circuits, information representation in binary form. The von Neumann instruction set architecture, programmer's model of a processor. Low-level programming using the C language, and its mapping to machine instructions. Memory hierarchy and performance issues. Input/output methods and advanced processors: multi-core, GPUs. ECE 2281 is not open for students who have earned credit for CS 2281 without permission. Serves as repeat credit for CS 2281. Prerequisite: CS 2201. Corequisite: ECE 2281L. FALL, SPRING [3].

ECE2281L - Computer Architecture Laboratory

Course Description

(Also listed as CS 2281L). Laboratory for ECE 2281. One three-hour laboratory per week. ECE 2281L is not open for students who have earned credit for CS 2281L without permission. Serves as repeat credit for CS 2281L. Corequisite: ECE 2281. FALL, SPRING [1].

ECE2860 - Introduction to Undergraduate Research

Course Description

Introduction to undergraduate research under the direction of ECE faculty. Students in the School of Engineering may only receive open elective credit for ECE 2860. [1-3].

ECE3214 - Signals and Systems

Course Description

Fundamental signals, systems, and linear algebra concepts necessary for the study of communications and control systems. Includes continuous-time and discrete-time signal and system concepts, Fourier analysis in both continuous and discrete-time, Z-transform, and the FFT. Prerequisite: ECE 2112. FALL, SPRING. [3]

ECE3233 - Electromagnetics

Course Description

Electromagnetic field theory. Maxwell's equations from a historical approach. Electromagnetic waves with regard to various media and boundary conditions. Prerequisite: PHYS 1602. Corequisite: MATH 2400 or 2420. FALL. [3]

ECE3235 - Electronics I

Course Description

Semiconductor devices and electronic circuits. Diodes, BJT and MOS transistors. Device models, modes of operation, biasing. Small-signal models, low-frequency analysis of single- and multi-stage analog amplifiers, simple amplifier design. Large signal models, dc analysis of digital circuits. Prerequisite: ECE 2112. Corequisite: ECE 3235L. FALL. [3]

ECE3235L - Electronics I Laboratory

Course Description

Laboratory for ECE 3235. One three-hour laboratory per week. Corequisite: ECE 3235. FALL. [1]

ECE3251 - Intermediate Software Design

Course Description

Also listed as CS 3251. High quality development and reuse of architectural patterns, design patterns, and software components. Theoretical and practical aspects of developing, documenting, testing, and applying reusable class libraries and object-oriented frameworks using object-oriented and component-based programming languages and tools. Serves as repeat credit for CS 3251. No credit for students who have earned credit for CS 3251. Prerequisite: CS 2201 or ECE 2201. FALL, SPRING [3]

ECE3258 - Introduction to Computer Graphics

Course Description

Also listed as CS 3258. 2D rendering and image-based techniques, 2D and 3D transformations, modeling, 3D rendering, graphics pipeline, ray-tracing, and texture-mapping. Serves as repeat credit for CS 3258. No credit for students who have earned credit for CS 3258 or ECE 3258. Prerequisite: MATH 2400, 2410, 2501 or 2600; CS 3251 or ECE 3251. SPRING. [3]

ECE3274 - Modeling and Simulation**Course Description**

Also listed as CS 3274. General theory of modeling and simulation of a variety of systems: physical processes, computer systems, biological systems, and manufacturing processes. Principles of discrete-event, continuous, and hybrid system modeling, simulation algorithms for the different modeling paradigms, methodologies for constructing models of a number of realistic systems, and analysis of system behavior. Computational issues in modeling and analysis of systems. Stochastic simulations. Serves as repeat credit for CS 3274. No credit for students who have earned credit for CS 5274. Prerequisite: CS 2201 or ECE 2201. [3]

ECE3452 - Theory of Automata, Formal Languages, and Computation**Course Description**

Also listed as CS 3252. Finite-state machines and regular expressions. Context-free grammars and languages. Pushdown automata. Turing machines. Undecideability. The Chomsky hierarchy. Computational complexity. Serves as repeat credit for CS 3252. No credit for students who have earned credit for CS 5252 or ECE 5452. Prerequisite: CS 2212. SPRING. [3]

ECE3860 - Undergraduate Research**Course Description**

Supervised projects in electrical engineering, computer engineering, or related fields. Consent of instructor required. No more than 6 hours of ECE 3860 and 3861 may be applied toward graduation. [1-3]

ECE3861 - Undergraduate Research**Course Description**

Supervised projects in electrical engineering, computer engineering, or related fields. Consent of instructor required. No more than 6 hours of ECE 3860 and 3861 may be applied toward graduation. [1-3]

ECE3891 - Special Topics**Course Description**

[1-3 each semester]

ECE3892 - Special Topics**Course Description**

[1-3 each semester]

ECE4239 - Cyber-Physical Systems: Foundations and Project**Course Description**

Foundations of cyber-physical systems and the Internet-of-Things. Model-based engineering of cyber-physical systems, including modeling of physical and computational systems, design and implementation techniques, analysis and verification. Includes modeling and analysis assignments, and project using a simulator and a real-time computer system. Serves as repeat credit for CS 4239. No credit for students who have earned credit for CS 5239 or ECE 5239. Prerequisite: CS 3281 or ECE 4375 or CS 4375; MATH 2300 or 2500; MATH 2410 or 2501 or 2600. SPRING. [3]

ECE4257 - Control Systems I**Course Description**

Theory and design of feedback control systems, steady-state and transient analysis, stability considerations. Model representation. State-variable models. Prerequisite: ECE 2213, 2214, or 3214. FALL. [3]

ECE4260 - Artificial Intelligence**Course Description**

Also listed as CS 4260. Principles and programming techniques of artificial intelligence. Strategies for searching, representation of knowledge and automatic deduction, learning, and adaptive systems. Survey of applications. Serves as repeat credit for CS 4260. No credit for students who have earned credit for CS 5260 or ECE 5260. Prerequisite: CS 3250; CS 3251 or ECE 3251; MATH 2810 or 2820 or 3640. FALL. [3]

ECE4262 - Foundations of Machine Learning**Course Description**

Also listed as CS 4262. Theoretical and algorithmic foundations of supervised learning, unsupervised learning, and reinforcement learning. Linear and nonlinear regression, kernel methods, support vector machines, neural networks and deep learning methods, instance-based methods, ensemble classifiers, clustering and dimensionality reduction, value and policy iteration. Explainable AI, ethics, and data privacy. Serves as repeat credit for CS 4262. No credit for students who have earned credit for CS 5262 or ECE 5262. Prerequisite: CS 3251 or ECE 3251; one of MATH 2810, 2820, or 3640; one of MATH 2410, 2500, 2501, or 2600. SPRING. [3]

ECE4267 - Power System Analysis**Course Description**

Analysis of large transmission and distribution networks. Analysis of power lines, load flow, short circuit studies, economic operation, and stability. Prerequisite: ECE 2213 or 2214. [3]

ECE4268 - Distributed Electrical Energy Systems**Course Description**

Uses of photovoltaics and wind as well as micro-hydro, fuel cells, and geothermal for producing electricity. Comparison with traditional generating methods based on the prime movers (steam, gas, etc.) and types (primarily three-phase) of electrical generators used. The economics of stand-alone and grid connected systems are covered. Prerequisite: ECE 2112. [3]

ECE4275 - Microelectronic Systems**Course Description**

Active devices in the context of digital systems, with an emphasis on embedded systems integration. Characteristics and utilization of different digital integrated circuit families, common bus structures and protocols and real-world interfaces (comparators, A/D/A conversion). Prerequisite: ECE 2112; ECE 2116 or ECE 2123. SPRING. [3]

ECE4277 - Cyber Security**Course Description**

Also listed as CS 4277. Software issues, secure software design, attacks and detection, identity, sessions, human security mistakes, and security auditing. Serves as repeat credit for CS 4277. No credit for students who have earned credit for CS 5277. Prerequisite: CS 3251 or ECE 3251. FALL. [3]

ECE4278 - Principles of Software Engineering**Course Description**

Also listed as CS 4278. The nature of software. The object-oriented paradigm. Software life-cycle models. Requirements, specification, design, implementation, documentation, and testing of software. Object-oriented analysis and design. Software maintenance. Serves as repeat credit for CS 4278. No credit for students who have earned credit for CS 5278 or ECE 5278. Prerequisite: CS 3251 or ECE 3251. FALL. [3]

ECE4283 - Principles and Models of Semiconductor Devices

Course Description

Physical principles of operation of the p-n junction, MOS field-effect transistor, and bipolar transistor. Fundamentals of charge transport, charge storage, and generation-recombination; application to the operation of MOSFET and BJT. Device modeling with emphasis on features and constraints of integrated circuit technologies. Prerequisite: ECE 3235. [3]

ECE4284 - Integrated Circuit Technology and Fabrication

Course Description

Monolithic integrated circuit technology. Basic semiconductor properties and processes that result in modern integrated circuit. Bipolar and MOSFET processes and structures. Fabrication, design, layout, and applications as regards semiconductor microelectronic technologies. Prerequisite: ECE 3235. SPRING. [3]

ECE4285 - Network Security

Course Description

Also listed as CS 4285. Principles and practice of network security. Security threats and mechanisms. Cryptography, key management, and message authentication. System security practices and recent research topics. Serves as repeat credit for CS 4285. No credit for students who have earned credit for CS 5285. Prerequisite: CS 4283. [3]

ECE4286 - Audio Engineering

Course Description

Engineering aspects of high fidelity sound reproduction, with emphasis on digital audio and loudspeakers. Analog-to-digital and digital-to-analog conversion, data storage, perceptual coding, loudspeaker design. Prerequisite: ECE 2213 or 2214; ECE 3235. [3]

ECE4287 - Engineering Reliability

Course Description

Topics in engineering reliability with emphasis on electrical devices and systems. Reliability concepts and models. Risk analysis. Lifetime evaluation. System examples. Prerequisite: ECE 3235 or ECE 4275. [3]

ECE4288 - Optoelectronics

Course Description

Fundamentals and applications of light generation, propagation, and modulation in passive and active optoelectronic components. Waveguides, lasers, electro-optic modulators, and emerging optoelectronic technology for optical communication, computing, and sensing applications. Prerequisite: ECE 3233 or equivalent. SPRING. [3]

ECE4289 - Spacecraft Systems

Course Description

Spacecraft electrical and electronic subsystems with emphasis on practical limitations and hazards in space. Analysis of environments, mechanisms of failure, and implications for design. Prerequisite: ECE 3235 or 4275. SPRING. [3]

ECE4334 - RF and Microwave Design

Course Description

Modeling of components and transmission structures at RF and microwave frequencies (30 MHz to 30 GHz), with emphasis on the effects of materials and geometry on passive structures for filtering and impedance matching. Modeling and design of active circuits and components such as RF amplifiers with input and output impedance matching structures. Prereq: ECE 3233. SPRING. [3]

ECE4335 - Fundamentals of Quantum Engineering

Course Description

Overview of quantum effects in microelectronics and introduction to quantum computing. The needs, opportunities, and challenges of extending current computing paradigms to quantum-enhanced microelectronics technologies are discussed. Students are introduced to basis states of quantum systems and principles of superposition and entanglement, qubits, and basic algorithms relevant to quantum computing. Practical implementations of quantum computing are illustrated. A student project on current developments in quantum computing is required. Prerequisites: One of PHYS 1602, 1912, or 2255. SPRING. [3]

ECE4353 - Image Processing

Course Description

Digital imaging and computational photography. Image formation. Point processing. Color perception and manipulation. Spatial filtering via convolution. 2D Fourier transforms. Frequency-domain filtering. Intensity quantization. High dynamic range imaging. Resampling for image resizing, rotation, and warping. Image compositing. Panorama generation. Noise reduction. Mathematical morphology. Image compression. Three lectures and one three-hour virtual laboratory. Prerequisite: CS 1101 or 1104; MATH 2400, 2410, 2501, or 2600. FALL. [4]

ECE4354 - Computer Vision

Course Description

Computational processes. Python and OpenCV for real-time processing. Feature detection: edges, corners, and oriented histogram methods. Feature matching. Scale space. Projective geometry. Camera models. Stereopsis. Image rectification. Multi-baseline stereo. Motion estimation. 3D reconstruction. Machine learning for computer vision including multilayer neural networks. Prerequisite: ECE 4353. SPRING. [3]

ECE4356 - Digital Signal Processing

Course Description

Discrete-time signals and systems. Applications of Digital Signal Processing (DSP) sampling, digital filtering, FFTs, etc. Three lectures and one laboratory period. Prerequisite: MATH 2300. SPRING. [4]

ECE4358 - Control Systems II

Course Description

Modern control design. Discrete-time analysis. Analysis and design of digital control systems. Nonlinear systems and optimum control systems. Fuzzy control systems. Two lectures and one laboratory. Prerequisite: ECE 4257. SPRING. [3]

ECE4363 - Applied Statistical Machine Learning

Course Description

Application of mathematical techniques that form the foundation of machine learning and artificial intelligence. Probability and statistics, applications of Bayes theorem, matrix analysis, LMS and maximum likelihood estimation. Classification techniques, linear and basis function regressions. Estimation and sampling of probability distributions. Data partitioning and n-fold cross-validation. Recursive Bayesian estimation. Methods of dimensionality reduction. The perceptron, kernel methods, support vector machines, and Gaussian processes. Prerequisite: One of MATH 2810, MATH 2820, or BME 2400. FALL. [3]

ECE4370 - Engineering for Surgery

Course Description

Engineering for surgery and other medical interventions, with theory and project experience. Data visualization and analysis, medical image processing, machine learning and deep learning, image registration, image-guided surgery, medical image acquisition, and bio-modeling. Prerequisite: CS 2201 or 2204. FALL. [3]

ECE4375 - Embedded Systems

Course Description

(Also listed as CS 4375). Design and implementation of embedded computer-based systems. Programming for real-time systems and the Internet of Things. Embedded system modeling, design, analysis, and implementation using real-time and event-driven techniques. A structured project is required. Serves as repeat credit for CS 4375. Prerequisite: ECE 2218, CS 2201. Corequisite: ECE 4375L. FALL. [3]

ECE4375L - Embedded Systems Laboratory

Course Description

(Also listed as CS 4375L). Design and implementation of embedded computer-based systems. Programming for real-time systems and the Internet of Things. Embedded system modeling, design, analysis, and implementation using real-time and event-driven techniques. A structured project is required. Serves as repeat credit for CS 4375L. Prerequisite: ECE 2218, CS 2201. Corequisite: ECE 4375. FALL. [1]

ECE4377 - FPGA Design

Course Description

Design and applications of field-programmable gate arrays, Electronic Design Automation (EDA) tools for design, placement, and routing. Hardware description languages. Implementation of designs on prototype FPGA board. Prerequisite: ECE 2116 or 2123. [3]

ECE4380 - Electronics II

Course Description

Integrated circuit analysis and design. High frequency operation of semiconductor devices. Frequency-response and feedback analysis of BJT and MOS analog amplifier circuits, multi-stage frequency-compensated amplifier design. Transient analysis of BJT and MOS digital circuit families. Digital-to-analog and analog-to-digital conversion circuits. Prerequisite: ECE 2213 or 2214; ECE 3235. SPRING. [3]

ECE4383 - Computer Networks

Course Description

(Also listed as CS 4383.) Computer communications. Network (Internet) architecture. Algorithms and protocol design at each layer of the network stack. Cross-layer interactions and performance analysis. Network simulation tools. Lab and programming assignments. Serves as repeat credit for CS 4383. No credit for students who have earned credit for ECE 5383 or CS 5383. Prerequisite: CS 3281 or ECE 4375. [3]

ECE4385 - VLSI Design**Course Description**

Integrated circuit and fabrication techniques; CAD tools for design, layout, and verification; parasitic elements and their effects on circuit performance; system-level design experience is gained by completing design and layout phases of a project. Prerequisite: ECE 2116 or ECE 2123; ECE 3235. FALL. [3]

ECE4467 - Deep Learning**Course Description**

Also listed as CS 4267. Models, algorithms, mathematical tools, and machine learning concepts used in deep learning. Modern practical deep feedforward, convolutional, and recurrent networks. Regularization for deep learning and optimization. Practical design methods. Serves as repeat credit for CS 4267. No credit for students who have earned credit for CS 5267 or ECE 5467. Prerequisite: CS 3250; CS 3251 or ECE 3251; MATH 2410 or 2600; MATH 2810 or 2820. SPRING. [3]

ECE4475 - Error Analysis in Safety Critical Systems**Course Description**

Also listed as CS 4275. Case study-based course examining errors in safety critical systems, including healthcare and aviation. Errors explored from multiple perspectives, specifically computer science and systems engineering. Serves as repeat credit for CS 4275. No credit for students who have earned credit for CS 5275 or ECE 5475. Prerequisite: CS 3251 or ECE 3251. SPRING. [3]

ECE4484 - Computer Systems Analysis**Course Description**

Also listed as CS 4284. Techniques for evaluating computer system performance with emphasis upon application. Topics include measurement and instrumentation techniques, benchmarking, simulation techniques, elementary queuing models, data analysis, operation analysis, performance criteria, case studies. Project involving a real computer system. Serves as repeat credit for CS 4284. No credit for students who have earned credit for CS 5284 or ECE 5484. Prerequisite: CS 3281. [3]

ECE4950 - Program and Project Management for ECE**Course Description**

Methods for planning programs and projects. Organization structures and information management for project teams. Communications between project teams and clients, government agencies, and others. Motivational factors and conflict resolution. Budget/schedule control. Similar to ENGM 3700, but preparatory to the ECE senior design project course, ECE 4951. Credit given for only one of ENGM 3700, CE 4400 or ECE 4950. Prerequisite: senior standing. Corequisite: ECE 4959. FALL. [3]

ECE4951 - Electrical and Computer Engineering Design**Course Description**

Based on product specifications typically supplied by industrial sponsors, teams of students responsible for the formulation, execution, qualification, and documentation of a culminating engineering design. The application of knowledge acquired from earlier coursework, both within and outside the major area, along with realistic technical, managerial, and budgetary constraints using standard systems engineering methodologies and practices. Prerequisite: ECE 4950, at least one DE course, senior standing. SPRING. [3]

ECE4959 - Senior Engineering Design Seminar

Course Description

Elements of professional engineering practice. Professionalism, licensing, ethics and ethical issues, intellectual property, contracts, liability, risk, reliability and safety, interdisciplinary teams and team tools, codes, standards, professional organizations, careers, entrepreneurship, human factors, and industrial design. Prerequisite: senior standing. Corequisite: ECE 4950. FALL. [1]

Engineering Management

ENGM2160 - Engineering Economy

Course Description

Economic evaluation and comparison of alternatives: interest, periodic payments, depreciation, criteria, and analytical procedures in investment decision-making, and cost-estimating. FALL, SPRING. [3]

ENGM2210 - Technology Strategy

Course Description

Critical issues faced by chief technology officers. Assessment of technological capabilities and opportunities, formulation of a technical plan for the product portfolio and commercialization, management of intellectual property, and economic analysis. Prerequisite: Sophomore standing. FALL, SPRING. [3]

ENGM2440 - Applied Behavioral Science

Course Description

Leadership styles, power team building, conflict resolution, management resolution, interviewing techniques. FALL, SPRING, SUMMER. [3]

ENGM3000 - Enterprise System Design

Course Description

Design of complex enterprise systems and processes including enterprise requirements analysis, process-mapping, modeling, performance measurement, benchmarking, solution development, and change management. Prerequisite: ENGM 2210 or BUS 2700, junior standing. FALL, SPRING. [3]

ENGM3010 - Systems Engineering

Course Description

Fundamental considerations associated with the engineering of large-scale systems. Models and methods for systems engineering and problem solving using a systems engineering approach. Prerequisite: ENGM 2210, junior standing. FALL, SPRING. [3]

ENGM3100 - Finance and Accounting for Engineers

Course Description

Time value of money, capital budgeting and formation, financial accounting and reporting, double entry bookkeeping, taxation, performance ratio measurements, and working capital management. Probabilistic models for expected net present value and rate of return, dividend pricing models for alternative growth scenarios, cost and market based models for average cost of capital, taxation algorithms, and regression analysis for individual firm betas. Prerequisite: Junior standing. FALL, SPRING, SUMMER. [3]

ENGM3200 - Technology Marketing**Course Description**

Strategies for marketing technology-based products and services. Demand analysis, segmentation, distribution, and personal selling. Economic analysis from inception to end use. Prerequisite: ENGM 2210 or BUS 1600, junior standing. FALL. [3]

ENGM3300 - Technology Assessment and Forecasting**Course Description**

Methods of forecasting technological advancements and assessing their potential intended and unintended consequences. Delphi method, trend exploration, environmental monitoring, and scenario development. Prerequisite: Junior standing. SPRING. [3]

ENGM3350 - Organizational Behavior**Course Description**

Study of the factors that impact how individuals and groups interact and behave within organizations, and how organizations respond to their environment. Motivation theory, communication within organizations, group dynamics, conflict management, decision making, power, strategic planning, organizational culture, and change. Focus on utilizing analytical tools to understand organizations: symbolic, political, human resources, and structural. Prerequisite: ENGM 2440. [3]

ENGM3600 - Technology-Based Entrepreneurship**Course Description**

Identification and evaluation of opportunities: risks faced by entrepreneurs, market assessment, capital requirements, venture capital acquisition, legal structures, tax implications for sharing technology-based businesses. Prerequisite: junior standing. FALL. [3]

ENGM3650 - Operations and Supply Chain Management**Course Description**

Manufacturing strategy, process analysis, product and process design, total quality management, capacity planning, inventory control, supply chain design, and advanced operations topics. Modeling and analysis using cases and spreadsheets. Prerequisite: Junior standing. FALL. [3]

ENGM3700 - Program and Project Management**Course Description**

Scheduling, cost estimation/predictions, network analysis, optimization, resource/load leveling, risk/mitigation, quality/testing, international projects. Term project required. Provides validated preparation for the Project Management Institute CAPM certification for undergraduates or the PMP for graduate students. Credit given for only one of ENGM 3700, CE 4400, or EECE 4950. Prerequisite: Junior standing. FALL, SPRING, SUMMER. [3]

ENGM3850 - Independent Study**Course Description**

Readings or projects on topics in engineering management under the supervision of the ENGM faculty. Consent of instructor required. [1-3 each semester, not to exceed a total of 3].

ENGM3851 - Independent Study**Course Description**

Readings or projects on topics in engineering management under the supervision of the ENGM faculty. Consent of instructor required. [1-3 each semester, not to exceed a total of 3]

ENGM3890 - Special Topics**Course Description**

Variable credit, 1-3 each semester. [1-3]

ENGM3891 - Special Topics**Course Description**

[Variable credit: 1-3 each semester]

ENGM4500 - Product Development**Course Description**

Project-based course focused on the methods for managing the design, development, and commercialization of new products. Generating product concepts, developing a prototype strategy, modeling financial returns, securing intellectual property, designing retail packaging, and performing market testing to establish an optimal price. Teams include Engineering and MBA students. Prerequisite: ENGM 2210; ENGM 3700 or CE 4400 or EECE 4950; junior standing. SPRING. [4]

ENGM4800 - Wealth Management for Engineers**Course Description**

Foundations of financial planning; managing basic assets, credit, and insurance needs; employee incentive plans such as stock options, deferred compensation and severance; managing investments in stocks, bonds, mutual funds, and real estate; retirement and estate planning such as 401k, 403b, IRA, Roth, estate preservation. Students in the School of Engineering may only receive open elective credit for ENGM 4800. SPRING [1]

ENGM4951 - Engineering Management Capstone Project**Course Description**

Application of engineering management concepts through team projects sponsored by faculty or seed-stage technology companies. Thinking, analysis, and planning processes needed to commercialize a concept and develop a business plan for presentation to investors. Prerequisite: ENGM 2210; ENGM 3000 or 3010. Corequisite: ENGM 3700. SPRING. [3]

Engineering Science

ES1001 - Engineering Commons iSeminar**Course Description**

Topics vary. Open elective credit only. [1]

ES1115 - First-year Engineering Seminar**Course Description**

First-year Engineering Seminar. [1]

ES1151 - Engineering Ethics**Course Description**

Ethical issues in the practice of engineering in modern society. Topics include major ethical constructs, professional codes of ethics, and ethical issues related to sustainability, equity, product design, technology, failures, risk, and life-critical systems. Counts only as Liberal Arts Core or Open Elective credit for School of Engineering students. FALL, SPRING. [3] (LE HFA)

ES1401 - Introduction to Engineering, Module1**Course Description**

First of three required discipline-specific modules for Introduction to Engineering credit providing an introduction to engineering analysis and design. Discipline-specific modules selected based on individual choice. Students choose three different disciplines for the three modules and all three must be completed in one semester for full course credit. Emphasis is on contemporary engineering problem solving in a discipline-specific context. FALL. [1]

ES1402 - Introduction to Engineering, Module 2**Course Description**

Continuation of ES 1401. ES 1401-1403 must be completed in one semester for full course credit. FALL. [1]

ES1403 - Introduction to Engineering, Module 3**Course Description**

Continuation of ES 1402. ES 1401-1403 must be completed in one semester for full course credit. FALL. [1]

ES2100W - Technical Communications**Course Description**

Instruction and practice in written and oral communication. Emphasis is on organization and presentation of information to a specific audience for a specific purpose. Course includes writing and editing reports of various lengths, preparing and using visual aids, and presenting oral reports. Prerequisite: Sophomore standing. FALL, SPRING. [3]

ES2700 - Engineering Career Development**Course Description**

A practical course designed to help students succeed in the job/internship search and career development. Interviewing, networking, online tools, elevator pitch, career fair strategies, career center resources, company research techniques, resumes, cover letters, negotiating, follow-up messages. FALL [1]

ES2900 - Engineering and Public Policy**Course Description**

Role of federal policy in supporting and promoting engineering and science for the benefit of the U.S. Ways engineering, science and public policy impact each other. Federal government involvement, policy making, federal budget, role of universities and national labs, national defense, homeland security, biomedical enterprise. SPRING [3]

ES3230 - Ships Engineering Systems**Course Description**

Ship characteristics and types, including design and control, propulsion, hydrodynamic forces, stability, compartmentation, and electrical and auxiliary systems. Theory and design of steam, gas turbine, and nuclear propulsion. FALL. [3]

ES3231 - Navigation**Course Description**

Naval piloting procedures. Charts, visual and electronic aids, and theory and operation of magnetic and gyro compasses; inland and international rules of the nautical road. The celestial coordinate system, including spherical trigonometry and application for navigation at sea. Environmental influences on naval operations. SPRING. [3]

ES3232 - Ships Weapons Systems**Course Description**

Theory and employment of weapons systems, including the processes of detection, evaluation, threat analysis, weapon selection, delivery, guidance, and explosives. Fire control systems and major weapons types, including capabilities and limitations. Physical aspects of radar and underwater sound. Command, control, and communications and means of weapons system integration. SPRING. [3]

ES3233 - Naval Operations**Course Description**

Methods of tracking and intercepting at sea. Maritime maneuvering problems, formation tactics, and shipboard operations. Naval communications, ship behavior and maneuvering, and applied aspects of ship handling. Prerequisite: ES 3231. FALL. [3]

ES3300 - Energy and Sustainability - An Engineering Approach**Course Description**

Uses basic understanding of mechanics, thermodynamics, and electrodynamics to describe primary and secondary energy generation and use. Emphasis on current applications, energy efficiency at both the source and demand sides, and future (near and long-term) energy scenarios. Various economic models are explored. Prerequisite: junior or senior standing. [3]

ES3860 - Undergraduate Research**Course Description**

Independent study under the direction of a faculty member with expertise in the area of study. [1-3 each semester]

ES3884 - Internship**Course Description**

Internship credit for work approved by the Associate Dean of the School of Engineering. A written scholarly project must be produced in the internship. Course must be taken P/F. May be repeated for credit; maximum of total 4 hours. No more than 2 hours may count toward degree requirements. FALL, SPRING, SUMMER. [1]

ES3885 - Structured Internship**Course Description**

Observation and working experience in technology-based areas of sponsoring firm. Analyze, design, and/or improve the critical systems, processes, workflows, or software applications that align operations with the business mission. Students must work primarily on site for 24 hours / full week and prorated hours for partial weeks, starting the first week of classes and ending no later than the end of classes. Offered only in connection with the undergraduate engineering management program at VU-NYC. [6]

ES3890 - Special Topics**Course Description**

Technical elective courses of special current interest. No more than six semester hours of these courses may be credited to the student's record. Prerequisite: consent of instructor. FALL, SPRING. [1-3]

ES4950 - Senior Capstone Experience I**Course Description**

Based on project specifications typically supplied by industrial sponsors or part of a student's immersive experience. Students are responsible for the formulation, execution, qualification, and documentation of a culminating capstone experience. Application of knowledge acquired from earlier coursework, both within and outside the engineering core area, along with realistic technical, managerial, and budgetary constraints using standard systems engineering methodologies and practices. Prerequisite: Senior standing. Corequisites: ES 4959, ENGM 3700. Fall. [1]

ES4951 - Senior Capstone Experience II**Course Description**

Based on project specifications typically supplied by industrial sponsors or part of a student's immersive experience. Students are responsible for the formulation, execution, qualification, and documentation of a culminating capstone experience. Application of knowledge acquired from earlier coursework, both within and outside the engineering core area, along with realistic technical, managerial, and budgetary constraints using standard systems engineering methodologies and practices. Prerequisite: ES 4950, Senior standing. SPRING. [3]

ES4959 - Senior Engineering Design Seminar**Course Description**

Elements of professional engineering practice. Professionalism, licensing, ethics and ethical issues, intellectual property, contracts, liability, risk, reliability and safety, interdisciplinary teams and team tools, codes, standards, professional organizations, careers, entrepreneurship, human factors, and industrial design. Prerequisite: Senior standing. FALL. [1]

English

ENGL1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

ENGL1100 - Composition**Course Description**

For students who need to improve their writing. Emphasis on writing skills, with some analysis of modern nonfiction writing. [3] (No AXLE credit)

ENGL1101 - Creative Writing Tutorial: Fiction**Course Description**

Individual instruction in writing fiction. Offered on a pass/fail basis only. May be repeated for credit up to a total of three hours. [1] (No AXLE credit)

ENGL1102 - Creative Writing Tutorial: Poetry**Course Description**

Individual instruction in writing poetry. Offered on a pass/fail basis only. Not open to students who have earned credit for ENGL 3851 section 07 without permission. Total credit hours for this course and ENGL 3851 section 7 will not exceed 1 credit hour. Credit hours reduced from most recent course taken (or from test or transfer credit) as appropriate. [1] (No AXLE credit)

ENGL1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

ENGL1210W - Reading Fiction**Course Description**

Diverse narratives and themes in influential short stories and novels; fiction's role in cultural and personal identity; techniques for analysis. Each section will have a specific theme—see English Departmental Course Descriptions. [3] (HCA) (CORE A, C) (LE HFA)

ENGL1220W - Art of Drama**Course Description**

Close study of representative plays of the major periods and of the main formal categories (tragedy, comedy) and written explication of these forms. [3] (HCA) (CORE A, C) (LE HFA)

ENGL1230W - Literature and Analytical Thinking**Course Description**

Close reading and writing in a variety of genres drawn from several periods. Productive dialogue, persuasive argument, and effective prose style. Offered on a graded basis only. [3] (HCA)

ENGL1250W - Introduction to Poetry**Course Description**

Close study and criticism of poems. The nature of poetry, and the process of literary explication. [3] (HCA) (CORE A, C) (LE HFA)

ENGL1260W - Introduction to Literary and Cultural Analysis**Course Description**

Analysis of a range of texts in social, political, and aesthetic contexts. Interdisciplinary study of cultural forms as diverse as poetry, advertisement, and film. [3] (HCA) (CORE A, C) (LE HFA)

ENGL1270W - Reading with Critical Theory**Course Description**

Selected critical approaches to literature. [3] (HCA) (CORE A, C) (LE HFA)

ENGL1272 - Literature and Structures of Society**Course Description**

How the structures of literature illuminate or conceal the structure of society. Emphasis on diverse, often contradictory perspectives that challenge and reshape conventional views; signifying potential of objects; literature's influence on societal transformation. Each section has its own theme—see English Departmental Course Descriptions. [3] (CORE A, B) (LE HFA)

ENGL1275W - Ethics in Literature (Writing seminar)**Course Description**

Key ethical questions raised by literature. How literature influences and challenges ethical norms; paradigms of judgment; historical contexts and power dynamics. Each section has its own theme—see English Departmental Course Descriptions. [3] (HCA) (CORE A, E) (LE HFA)

ENGL1280 - Beginning Fiction Workshop**Course Description**

Introduction to writing prose fiction. [3] (HCA) (CORE A) (LE HFA)

ENGL1285 - Beginning Nonfiction Workshop**Course Description**

Introduction to writing creative nonfiction. [3] (HCA) (CORE: A) (LE HFA)

ENGL1290 - Beginning Poetry Workshop**Course Description**

Introduction to the art of writing poetry. [3] (HCA) (CORE A) (LE HFA)

ENGL1295 - Beginning Creative Writing Workshop**Course Description**

Writing in three different creative modes: poetry, short story, and creative nonfiction. The elements of imaginative writing while cultivating one's own voice. [3] (CORE A) (LE HFA)

ENGL1300W - Intermediate Composition**Course Description**

A writing course including the analysis of essays from a variety of disciplines. [3] (HCA)

ENGL2200 - Foundations of Literary Study**Course Description**

Fundamentals of literary study: close reading; analytic writing; historical context; abstract reasoning in theory; creative expression. [3] (HCA)

ENGL2230 - Power of Storytelling**Course Description**

Write compelling stories while exploring different genres and traditions across cultures and media. Use fiction to persuade, influence, and connect with others. [3] (AXLE: HCA) (CORE A, C) (LE HFA)

ENGL2232 - The Craft of Fiction**Course Description**

A practical introduction to the elements of writing stories. Develop reading skills by analyzing a range of narratives and styles and enhance your own creative expression by drafting original stories. [3] (AXLE: HCA) (CORE A, C) (LE HFA)

ENGL2234 - The Craft of Poetry**Course Description**

A hands-on, enriching introduction to writing poetry. Appreciation for forms, rhythms, and imagery as you analyze diverse poems and cultivate your own poetic voice. [3] (CORE A, C) (LE HFA)

ENGL2236 - Writing a Novel**Course Description**

Prepare for and participate in the November 'National Novel Writing Month' challenge. From concept to completion, bringing fictional world to life. [3] (AXLE: HCA) (CORE A, C) (LE HFA)

ENGL2238 - The Graphic Novel**Course Description**

The dynamic, immersive craft of graphic novels—no drawing skills required. Developing sequential narrative art through engaging works like those of Marjane Satrapi and Alison Bechdel. Blending words and images to create graphic fiction or nonfiction. Serves as repeat credit for ENGL 1111 section 63 offered Fall 2023. [3] (HCA) (CORE A, C) (LE HFA)

ENGL2239 - Persuasive Journalism**Course Description**

A practical introduction to shaping public opinion and knowledge through popular news media. Study contemporary forms of journalism and their persuasive techniques and craft compelling, accurate narratives that engage a broad audience. [3] (AXLE: HCA) (CORE A, B) (LE HFA)

ENGL2242 - Shakespeare for the Contemporary Age**Course Description**

Shakespeare's impact through recent performances, adaptations, and rewritings. His works' relevance in contemporary settings and their influence on modern media. [3] (AXLE: HCA) (CORE A, C) (LE HFA)

ENGL2246 - Love Books**Course Description**

Evolution of love in literature from Antiquity to Early Modernity. Diverse portrayals, including spiritual and erotic, across genres of epic, lyric, and drama. Examine love's impact on subjectivity, identity, and social order and critique through Lucretius, Ovid, Virgil, and Renaissance authors. [3] (CORE A, C) (LE HFA)

ENGL2248 - The Curious Pursuit of Knowledge**Course Description**

The transformation of curiosity from vice to virtue during the Scientific Revolution. Early modern scientific concepts in dialogue with literary texts by Donne, Marlowe, Shakespeare, and others. The interaction between experimental science and literature, and interplay among evidence, plausibility, and narrative. How the pioneers of science communicated their discoveries to skeptical audiences. [3] (CORE A, C) (LE HFA)

ENGL2249 - Monsters**Course Description**

The monstrous in literature and film, ranging from the medieval to the contemporary across a variety of genres. The role of the monstrous in fashioning and challenging the boundaries of the human. Serves as repeat credit for ENGL 1111 section 66 offered Spring 2024. [3] (HCA) (CORE A, C) (LE HFA)

ENGL2250 - Speculative Fiction**Course Description**

Afro-futurist and fantasy narratives that explore alternate realities and imagine the future of humanity in relation to non-humans. Experiments with literary forms that confront societal, technological, and ethical dilemmas. Authors include Octavia Butler, Ursula Le Guin, Nnedi Okorafor, and Jeff Vandermeer. [3] (AXLE: HCA) (CORE C, E) (LE HFA)

ENGL2251 - Future Bodies: Dystopian Fiction**Course Description**

What makes a body human, and what rights do human bodies have? Examining these questions in novels like *The Handmaid's Tale*, *Never Let Me Go*, and *The Hunger Games*. Why fiction matters to bodies now and in the future. [3] (HCA) (CORE A, C) (LE HFA)

ENGL2253 - Caribbean Poetry**Course Description**

Caribbean poetry in a postcolonial context. Poets to include Edward Kamau Brathwaite, Derek Walcott, Dionne Brand, and others. Responses to colonial legacies, migration, race, and the politics of English. Poetry's role in narrating and reimagining historical and contemporary realities. [3] (CORE A, C) (LE HFA)

ENGL2254 - Storytelling in American Verse: Frost to Dove**Course Description**

Narrative verse in American poetry. Innovations by Robert Frost, Robinson Jeffers, Gwendolyn Brooks, and Rita Dove as they respond to historical events such as the Great Depression, World Wars, migrations, and the Civil Rights movement. Lyricism and epic; deploying and breaking form. Serves as repeat credit for ENGL 1111 section 25 offered Fall 2023. [3] (HCA) (CORE A, C) (LE HFA)

ENGL2255 - Rise of the American Novel**Course Description**

Early foundations of the American novel through the post-Civil War period. How authors like Lydia Maria Child and Charles Brockden Brown invented genres such as American Gothic and Historical Romance and addressed crises like Indian Removal and slavery. Novels that shaped America's collective imagination and envisioned alternative histories and futures. [3] (AXLE: HCA) (CORE A, C) (LE HFA)

ENGL2256 - Oceans and Literature**Course Description**

Cultures of seashores and ocean explored through autobiography, fiction, poetry, and art. The transformations of identity, body, and imagination provoked by life at sea. Literary and artistic responses to oceanic challenges—from threats to the Great Barrier Reef to the Pacific's vast plastic gyres. Featured works include Coleridge's 'Rime of the Ancient Mariner,' and Turner's sea-themed paintings. [3] (CORE A, C) (LE HFA)

ENGL2257 - Environmental and Climate Humanities

Course Description

Ecological crises and modes of environmental thinking in literature and other media. Historical role of representation in reinforcing or challenging environmental ideologies. The interplay between social conflict and climate change; influence of gender, race, and class on environmental narratives. Methodological approaches such as ecocriticism, environmental justice, and activism provide a broad perspective. [3] (AXLE: HCA) (CORE A) (LE HFA)

ENGL2264 - Imagining Asian America

Course Description

Representation of Asian Americans and their integral roles in American culture and imagination. Diverse histories of Asian American ethnic groups; themes of identity, immigration, and resistance across fiction, poetry, films, games, and other cultural forms. Serves as repeat credit for ENGL 1111 section 03 offered Spring 2024. [3] (P) (CORE B, C) (LE HFA)

ENGL2275 - Writing About Place

Course Description

How location shapes identity and relationships in fiction, non-fiction, and poetry about place. Investigate Vanderbilt and its neighboring areas by writing personal narratives and histories, examining how places evolve and influence individuals and communities. Significance of physical space in personal and communal life. [3] (AXLE: HCA) (CORE: A, C) (LE: HFA)

ENGL2280 - Pop Music and Its Meanings

Course Description

Pop songs as complex texts that reveal insights about contemporary life. Lyrics as poetry; how musical elements shape meaning; readings include America's leading music historians and critics. Artists as interpreters of societal trends and personal struggles. No prior musical knowledge expected. [3] (AXLE: HCA) (CORE A, C) (LE: HFA)

ENGL2282 - Toni Morrison

Course Description

Beginning with Morrison's two early novels, *The Bluest Eye* and *Song of Solomon*, and ending with her Nobel-prize winning work, *Beloved*. Race, gender, class, and sexuality; geography and migration; history, trauma, and memory; kinship and community; nation and region; oppression and freedom; language and the artist's role. Serves as repeat credit for ENGL 1111-16. [3] (P) (CORE: A, C) (LE HFA)

ENGL2290 - Modernity and Critique

Course Description

May be repeated for credit if there is no duplication in topic. [3] (No Axle Credit) (CORE: C, E) (LE HFA)

ENGL2292 - Literature, Philosophy, and Culture

Course Description

May be repeated for credit if there is no duplication in topic. [3] (HCA) (CORE: C, E) (LE HFA)

ENGL2310 - British Literature to 1660**Course Description**

Selections from British literature with attention to contexts and literary periods. From the beginnings to 1660. Provides a broad background for more specialized courses and is especially useful for students considering advanced studies in literature. [3] (HCA) (CORE A, B) (LE HFA)

ENGL2311 - British Literature from 1660 to the present**Course Description**

Selections from British literature with attention to contexts and literary periods. From 1660 to the present. Provides a broad background for more specialized courses and is especially useful for students considering advanced studies in literature. [3] (HCA) (CORE C, E) (LE HFA)

ENGL2316 - Representative American Writers**Course Description**

Selections from the entire body of American literature with attention to contexts and literary periods. Provides a broad background for more specialized courses and is especially useful for students considering advanced studies in literature. Repeat credit for students who have completed 2316W. [3] (US) (CORE B, C) (LE HFA)

ENGL2316W - Representative American Writers**Course Description**

Selections from the entire body of American literature with attention to contexts and literary periods. Provides a broad background for more specialized courses and is especially useful for students considering advanced studies in literature. Repeat credit for students who have completed 2316. [3] (US) (LE HFA)

ENGL2318 - Classical World Literature**Course Description**

Great Books from the points of view of literary expression and changing ideologies: Classical Greece through the Renaissance. Repeat credit for students who have completed 2318W. [3] (HCA) (CORE B, C) (LE HFA)

ENGL2318W - Classical World Literature**Course Description**

Great Books from the points of view of literary expression and changing ideologies: Classical Greece through the Renaissance. Repeat credit for students who have completed 2318. [3] (HCA) (LE HFA)

ENGL2319 - World Literature, Modern**Course Description**

Great Books from the points of view of literary expression and changing ideologies: The 17th century to the contemporary period. Repeat credit for students who have completed 2319W. [3] (HCA) (CORE B, C) (LE HFA)

ENGL2319W - World Literature, Modern**Course Description**

Great Books from the points of view of literary expression and changing ideologies: The 17th century to the contemporary period. Repeat credit for students who have completed 2319. [3] (HCA) (LE HFA)

ENGL2320 - Southern Literature**Course Description**

The works of Southern writers from Captain Smith to the present. Topics such as the Plantation Myth, slavery and civil war, Agrarianism, and "post-southernism." Authors may include Poe, Twain, Cable, Faulkner, Welty, Percy, Wright. [3] (HCA)

ENGL2330 - Introduction to Environmental Humanities**Course Description**

Interdisciplinary study of human beings' relationship to the environment. Literary, artistic, historical, and philosophical perspectives. Cultural understandings of the environment. [3] (HCA)

ENGL2330W - Introduction to Environmental Humanities**Course Description**

Interdisciplinary study of human beings' relationship to the environment. Literary, artistic, historical, and philosophical perspectives. Cultural understandings of the environment. [3] (HCA)

ENGL2740 - Topics in Literature and Philosophy**Course Description**

Literary, philosophical, and cultural texts on varied philosophical topics. May be repeated for credit if there is no duplication in topic. Students may enroll in more than one section of this course per semester. [3] (HCA)

ENGL2740W - Topics in Literature and Philosophy**Course Description**

Literary, philosophical, and cultural texts on varied philosophical topics. May be repeated for credit if there is no duplication in topic. Students may enroll in more than one section of this course per semester. [3] (HCA)

ENGL3210 - Intermediate Nonfiction Writing**Course Description**

Instruction in the forms and techniques of nonfiction writing. Admission by consent of instructor. May be repeated once for credit. [3] (HCA)

ENGL3215 - The Art of Blogging**Course Description**

Conventions of the rapidly evolving literary form of blogging. Creation and maintenance of a personal blog. Critique of online journalism across many genres, including activism, politics, science, and arts and culture. Interaction with professional bloggers. [3] (HCA)

ENGL3215W - The Art of Blogging**Course Description**

Conventions of the rapidly evolving literary form of blogging. Creation and maintenance of a personal blog. Critique of online journalism across many genres, including activism, politics, science, and arts and culture. Interaction with professional bloggers. Serves as repeat credit for students who have completed 3215. [3] (HCA)

ENGL3220 - Advanced Nonfiction Writing**Course Description**

Further instruction in the form and techniques of nonfiction writing. Admission by consent of instructor. May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course per semester. [3; maximum of 6 credits total for all semesters of ENGL 3220] (HCA)

ENGL3230 - Intermediate Fiction Workshop**Course Description**

Instruction in fiction writing. Supplementary readings that illustrate traditional aspects of prose fiction. Admission by consent of instructor. May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course per semester. [3; maximum of 6 credits total for all semesters of ENGL 3230] (HCA)

ENGL3240 - Advanced Fiction Workshop**Course Description**

Continuing instruction in fiction writing. Admission by consent of instructor. May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course per semester. [3; maximum of 6 credits total for all semesters of ENGL 3240] (HCA)

ENGL3250 - Intermediate Poetry Workshop**Course Description**

Instruction in poetry writing. Supplementary readings illustrating traditional aspects of poetry. Admission by consent of instructor. May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course per semester. [3; maximum of 6 credits total for all semesters of ENGL 3250] (HCA)

ENGL3260 - Advanced Poetry Workshop**Course Description**

Continuing instruction in poetry writing. Admission by consent of instructor. May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course per semester. [3; maximum of 6 credits total for all semesters of ENGL 3260] (HCA)

ENGL3280 - Literature and the Craft of Writing**Course Description**

The forms and techniques of creative writing. Contemporary practices in fiction and poetry in historical context. [3] (HCA)

ENGL3310 - Anglo-Saxon Language and Literature**Course Description**

The study of the Old English language. Selected historical and literary prose. Short heroic poems. [3] (HCA)

ENGL3312 - The Medieval World**Course Description**

English literature and culture in relation to Europe, the Middle East, and Asia. Cross-cultural exchange, national and religious identity, and race. Not open to students who have completed ENGL 3316. Serves as repeat credit for ENGL 3312W. [3] (P)

ENGL3312W - The Medieval World**Course Description**

English literature and culture in relation to Europe, the Middle East, and Asia. Cross-cultural exchange, national and religious identity, and race. Not open to students who have completed ENGL 3316. Serves as repeat credit for ENGL 3312. [3] (P)

ENGL3314 - Chaucer**Course Description**

Study of The Canterbury Tales and Chaucer's world. [3] (HCA)

ENGL3316 - Medieval Literature**Course Description**

The drama, lyrics, romance, allegory, and satire of the fourteenth and fifteenth centuries, studied in the context of the period's intellectual climate and social change. [3] (HCA)

ENGL3318 - The History of the English Language**Course Description**

The development of English syntax. History of the English vocabulary: word formation, borrowing, semantic change, and meter. [3] (HCA)

ENGL3330 - Sixteenth Century**Course Description**

Prose and poetry of the sixteenth century. Emphasis on Spenser and his contemporaries. [3] (HCA)

ENGL3332 - English Renaissance: The Drama**Course Description**

English drama, exclusive of Shakespeare, from 1550-1642: Marlowe, Jonson, Webster, and others. Serves as repeat credit for ENGL 3332W. [3] (HCA)

ENGL3332W - English Renaissance: The Drama**Course Description**

English drama, exclusive of Shakespeare, from 1550-1642: Marlowe, Jonson, Webster, and others. Serves as repeat credit for 3332. [3] (HCA)

ENGL3333 - Special Offerings Online**Course Description**

Topics vary by section and instructor. May be repeated for credit; students may register for more than one section of this course in the same semester. [3]

ENGL3335 - English Renaissance Poetry**Course Description**

Development of the English poetic tradition from 1500-1700. Repeat credit for students who have earned credit for 3335W. [3] (HCA)

ENGL3335W - English Renaissance Poetry**Course Description**

Development of the English poetic tradition from 1500-1700. Repeat credit for students who have earned credit for 3335. [3] (HCA)

ENGL3336 - Shakespeare: Comedies and Histories**Course Description**

About twenty of the major plays considered in chronological order over two terms, with emphasis on Shakespeare's development as a dramatic artist. Primarily comedies and histories. Serves as repeat credit for ENGL 3336W. [3] (HCA)

ENGL3336W - Shakespeare: Comedies and Histories**Course Description**

About twenty of the major plays considered in chronological order over two terms, with emphasis on Shakespeare's development as a dramatic artist. Primarily comedies and histories. Serves as repeat credit for ENGL 3336. [3] (HCA)

ENGL3337 - Shakespeare: Tragedies and Romances**Course Description**

About twenty of the major plays considered in chronological order over two terms, with emphasis on Shakespeare's development as a dramatic artist. Primarily tragedies and romances. [3] (HCA)

ENGL3337W - Shakespeare: Tragedies and Romances**Course Description**

About twenty of the major plays considered in chronological order over two terms, with emphasis on Shakespeare's development as a dramatic artist. Primarily tragedies and romances. Serves as repeat credit for ENGL 3337. [3] (HCA)

ENGL3340 - Shakespeare: Representative Selections**Course Description**

A representative selection of plays, including histories, tragedies, comedies, and romances, designed to give the student a sense of the full range of Shakespeare's work in one semester. Repeat credit for students who have completed 3340W. [3] (HCA)

ENGL3340W - Shakespeare: Representative Selections**Course Description**

Diverse range of literary, philosophical, cultural, and political texts. May be repeated for credit if there is no duplication in topic. Students may enroll in more than one section of this course per semester. [3] (HCA)

ENGL3897W - Special Topics in Critical Theory**Course Description**

Diverse range of literary, philosophical, cultural, and political texts. May be repeated for credit if there is no duplication in topic. Students may enroll in more than one section of this course per semester. [3] (HCA)

ENGL3898 - Special Topics in English and American Literature**Course Description**

Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (HCA)

ENGL3898W - Special Topics in English and American Literature**Course Description**

Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (HCA)

ENGL3899 - Special Topics in Film**Course Description**

Theory and practice of cinema as an aesthetic and cultural form. May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course per semester. [3; maximum of 6 credits total for all semesters of ENGL 3899] (HCA)

ENGL4960 - Senior Year Capstone**Course Description**

Topic chosen by the instructor. Prerequisite: 2200. [3] (No AXLE credit)

ENGL4998 - Honors Colloquium**Course Description**

Background for writing the honors thesis. Emphasis on research methods, critical approaches, and the students' own projects. Limited to seniors admitted to the English Honors Program. [3] (No AXLE credit)

ENGL4999 - Honors Thesis**Course Description**

Prerequisite: 4998. [3] (No AXLE credit)

English Education

ENED2200 - Exploring Literature for Children **Course Description**

Explores characteristics of good literature for children ages birth to 12, authors and illustrators of the genre, and issues in the area of children's literature. [3]

ENED2430 - Fostering Language in Classrooms **Course Description**

Overview of language learning, emphasizing ages 3 - 8 and the role of teachers and parents in fostering growth. Variability associated with culture, income, home language and individual child characteristics is examined from developmental and sociolinguistic perspectives. Students examine language use and teaching as part of an 8 hour practicum in an early childhood classroom. [3]

ENED3310 - Language Study in the Secondary Classroom **Course Description**

Investigates various methods of approaching grammar, vocabulary spelling, semantics, and bi-dialectism in the English classroom. For teachers and prospective teachers of middle school and high school English. [3]

ENED3320 - Untapped Potential: The Power of Books for Fostering Language and Learning **Course Description**

This course fosters an understanding of the importance of developing oral language and thinking skills in read alouds and develops students' competence in implementing instructional strategies in their work with children and families. Course content explores historical trends and lines of inquiry in storybook reading research over the past four decades and engages students in critical conversations about the extent to which current pedagogical practices reflect or rebuff research recommendations. The course explores book selection, vocabulary development, inferential reasoning, the use of repeated readings, responding to students' questions and confusions, and crafting high-cognitive demand discussions in narratives read aloud to children from Pre-K through fourth grade. The roles of adults and approaches to sharing books with children are explored from developmental and cultural perspectives. Content includes careful study and discussion of narrative picture books, criteria for identifying high-quality literature, and extracting worthy story themes with an aim toward developing skill in using books that embody humanizing pedagogies and diverse perspectives. Assignments involve the application of course content to teacher observations, the implementation of multiple readings in embedded fieldwork experiences, book studies, and the opportunities for special projects related to nuanced interest areas. [3]

ENED3340 - Reading and Learning with Print and New Media **Course Description**

Studies print and technology-based approaches to improving reading and content area learning in grades 6-12 with a special emphasis on diverse learners and struggling readers. Drawing on research-based practice, students learn to design, enact, and assess effective reading and literacy instruction. [3]

ENED3357 - Literature, Pop Culture, and New Media **Course Description**

Considers the influence of popular culture and digital technologies on young adult literature and the ways in which societal critique, role of the media, and negotiating identity categories play out in those texts. Examines a wide range of Multigenre, multimodal, and digital fiction focused on various themes such as Real and Imagined Worlds: Gaming and Technology in Texts, Vampires, Zombies, Werewolves and Monsters: Imagining the Other, and Who am I? Race, Class, Gender, and Sexual Identity in Literature. [3]

ENED3370 - Teaching Literature and New Media in the Secondary School**Course Description**

Students study how pedagogy might be developed that connects traditional literature instruction with media popular cultural media. Methods and theories for reading and teaching short stories, poetry, and novels are juxtaposed and interwoven with methods and theories for reading and teaching web sites, comics, film, and other media. Prerequisite: EDUC 3310 or consent of instructor. Corequisite: ENED 3371. [3]

ENED3371 - Professional Year Practicum**Course Description**

Observation, participation, and teaching in middle school and secondary school settings. Corequisite: ENED 3370. [3]

ENED3380 - Teaching Writing in Secondary Schools**Course Description**

Designed to encourage student teachers to examine the complexities of teaching writing in middle and high school settings and to develop a theoretically sound methodology that will allow them to design meaningful, engaging, and thoughtful writing instruction. [3]

ENED3400 - Harry Potter and Children's Literature**Course Description**

Students will examine British Literature related to J.K. Rowling's novels. Students will be asked to relate what they learn from other children's literature to the characters, plot, and themes of the Harry Potter novels as well as the opportunity to perform a variety of critical analyses of a social/cultural phenomena with progressive young adult literature. Additionally, students will explore the film versions of all novels discussed to analyze and critique the adaptations. This is a weekend course that includes week-long travel to the United Kingdom where students will engage in the stories in an experiential journey of local UK sites, studios, and museums. [3]

ENED3850 - Independent Study in English Education**Course Description**

Semi-independent study on selected topics in English education. Consent of supervising instructor required. May be repeated. [1-3]

ENED3890 - Special Topics in English Education**Course Description**

Exploration of special topics related to English education. May be repeated with change of topic. [1-3]

ENED4963 - Student Teaching Seminar: Secondary**Course Description**

Seminar to accompany EDUC 4953. A \$300.00 Teacher Performance Assessment fee is associated with this course. [3]

Ensembles

MUSE1010 - Instrumental Ensembles

Course Description

Open by audition to all Vanderbilt students. Musicians participate in orchestra, wind ensembles, and/or a variety of smaller ensembles on a rotational basis through the course of the semester. Performances include symphonic repertoire from the Classical and Romantic periods as well as standard and new repertoire from Baroque to Contemporary. At least three formal concerts are presented each semester. [1] Fountain, Verrier.

MUSE1020 - Vanderbilt University Singers

Course Description

Open by audition to all Vanderbilt students regardless of major. This choral ensemble performs a wide variety of choral music spanning Renaissance to contemporary music, and often combines with the Vanderbilt Symphony Orchestra on large works. At least two formal concerts per semester. [1] Biddlecombe.

MUSE1030 - Vanderbilt Opera Theatre

Course Description

Open by audition to all Vanderbilt students. Performance material chosen from all forms of lyric theatre: standard operatic repertoire, operetta, and American musical theatre. At least one production is presented. FALL. [1] Shay.

MUSE1200 - Steel Drum/Pan Ensemble

Course Description

Open to all members of the Vanderbilt community, this course provides a laboratory and performance experience drawing on Caribbean steel drums/pans with emphasis on the music and dance repertoires of the island of Trinidad. Lecture-demonstrations and rehearsals in one weekly two-hour session. At least one public performance each semester. No previous experience required. [1] Britain.

MUSE1210 - Steel Drum/Pan Ensemble

Course Description

Open to all members of the Vanderbilt community, this course provides a laboratory and performance experience drawing on Caribbean steel drums/pans with emphasis on the music and dance repertoires of the island of Trinidad. Lecture-demonstrations and rehearsals in one weekly two-hour session. At least one public performance each semester. Ability to read musical notation required. [1] Britain.

MUSE1220 - Steel Drum/Pan Ensemble

Course Description

Open to all members of the Vanderbilt community, this course provides a laboratory and performance experience drawing on Caribbean steel drums/pans with emphasis on the music and dance repertoires of the island of Trinidad. Lecture-demonstrations and rehearsals in one weekly two-hour session. At least one public performance each semester. Ability to read musical notation required. Prerequisite: MUSE 1200 or 1210. [1] Britain.

MUSE1230 - African Performing Ensemble

Course Description

Open to all members of the Vanderbilt community, this course provides a laboratory and performance experience drawing on traditional African musical instruments (drums, percussion, winds) with an emphasis on West African (Ghana) and East African (Uganda) music and dance repertoires. Lecture-demonstrations and rehearsals in one weekly two-hour session. At least one public performance each semester. No previous experience required. [1] Ahima.

MUSE1232 - Advanced African Drumming

Course Description

Advanced laboratory and performance experience drawing on traditional African musical instruments (drums, percussion, winds) with an emphasis on West African (Ghana) and East African (Uganda) music and dance repertoires. Lecture-demonstrations and rehearsals in one weekly two-hour session. At least one public performance each semester. Prerequisite MUSE 1230 or permission from the instructor. [1]

MUSE1310 - Jazz Ensemble: Big Band

Course Description

Open by audition to all Vanderbilt students, this ensemble performs both traditional and modern jazz styles, including dance band, swing, contemporary, and charts currently under development. Improvisation, jazz timbres, and other idiomatic concepts explored through lecture-demonstration and performance. At least one concert is presented each semester. Co-requisite: JAZZ 1000. [1] Middagh

MUSE1320 - Jazz Ensemble: Small Combo

Course Description

Open by audition to all Vanderbilt students. Provides focused laboratory training for performance of composed and improvised small combo jazz traditions. Discussion and application of techniques associated with solo, sectional, and ensemble performance in jazz. At least one concert is presented each semester. Co-requisite: JAZZ 1000. [1]

MUSE1330 - Blair Jazz Choir

Course Description

Open by audition to all Vanderbilt students; ensemble is limited to 12 voices, plus rhythm section. Repertoire includes scat, contemporary, and standard jazz. On- and off-campus performances throughout the semester. [1] Watson Utterstrom

MUSE1340 - Special Ensemble in Jazz and Global Music

Course Description

Annually rotating ensemble focused on a particular musical style representative of jazz or global music traditions. Open to all undergraduates. Co-requisite: JAZZ 1000. [1]

MUSE2120 - Vanderbilt Chorale

Course Description

Open by audition to all Vanderbilt students, this select 36-40 voice choral ensemble performs music in a variety of styles. At least two formal concerts each semester. [1] Biddlecombe.

MUSE2210 - Instrumental Chamber Music

Course Description

Open to all Vanderbilt students by audition or upon recommendation of the private instructor. Size of ensembles may vary. One hour weekly coaching. Two hours of additional rehearsal each week. Performance faculty. [1.0]

MUSE2220 - Chamber Music: Percussion

Course Description

Open to percussion majors and minors. Size of ensembles will vary. One hour weekly coaching and two hours of additional rehearsal (independent of coaching) expected each week. [–Ω or 1] Jung.

MUSE2230 - Chamber Music: Sonata Class for Strings and Piano**Course Description**

One hour weekly class for performance and study of string (violin, viola, cello, bass) and piano sonatas from the standard repertoire, baroque through modern, with each sonata duo receiving thirty minutes of coaching within the class time. Performance of complete sonata during the last class of the semester. Two hours of additional rehearsal each week. Open by consent of instructor. [1] Dorfman, Plummer.

MUSE2240 - Chamber Music: String Quartet**Course Description**

Open by consent of instructor. One hour of coaching and at least two hours of additional rehearsal each week. Variable credit: [0.5-2] Kochanowski.

MUSE2270 - Baroque Chamber Music**Course Description**

Open to all Vanderbilt students with experience on Baroque instruments or upon recommendation of the private instructor. Size of ensembles may vary. Students will receive one hour of coaching and are expected to rehearse at least two additional hours each week. [0.5-1]

MUSE2280 - Chamber Music: Contemporary Music Ensemble**Course Description**

Open to all Vanderbilt students by audition, this ensemble will perform instrumental and vocal chamber works of the modern and contemporary periods. Includes weekly coaching and two required hours of additional rehearsal (independent of coaching) each week. [1]

MUSE2300 - Collaborative Techniques for Pianists**Course Description**

Basic ensemble techniques in vocal and instrumental collaboration, including orchestral reductions, instrumental repertoire, recitatives/arias, songs, and introduction to diction/translation of song texts. Both group and individual coaching. Open to B.Mus. and B.Mus.Arts piano majors or by consent of instructor. [1]

MUSE2310 - Collaborative Piano: Instrumental**Course Description**

Introduces pianists to collaboration with instrumentalists. Weekly coaching with piano instructor and 5 hours practice/rehearsal per week. Standard instrumental repertoire will be assigned. Open by consent of instructor. [Variable credit: 0, 1, or 2 each semester] Dorfman, Nies, Melissa Rose.

MUSE2320 - Collaborative Piano: Vocal**Course Description**

Introduces pianists to collaboration with singers. Weekly coaching with piano instructor and 5 hours practice/rehearsal per week. Focus on standard art song and opera repertoire. Open by consent of instructor. [Variable credit: 1-2 each semester] Dorfman, Nies, Melissa Rose.

MUSE2330 - Vocal Chamber Music**Course Description**

Open by consent of the instructor. One hour weekly coaching for vocal/instrumental duos or ensembles, including singer/piano duos. Two hours of additional rehearsal each week. Variable credit: [0.5-2] Dorfman, Melissa Rose.

Environmental Engineering

ENVE2860 - Introduction to Undergraduate Research

Course Description

Introduction to undergraduate research under the direction of a Civil and Environmental Engineering faculty member. Students in the School of Engineering may only receive open elective credit for any course numbered 2860. [1-3]

ENVE3200 - Environmental Engineering Analysis

Course Description

Introduction to environmental analyses (physical/chemical and biological) for assessing the level of contamination in air, soil, and water and for compliance monitoring. Sample planning/handling/preservation and sampling technique, quality assurance/quality control requirements. Includes uncertainty, analysis and interpretation of data. Corequisite: ENVE 3600. FALL. [1].

ENVE3200L - Environment Engineering Analysis Laboratory

Course Description

Evaluation of unit processes and materials durability. Characterization of water, soil, and recycled materials and wastes to determine environmental compliance and suitability for use. Utilization of the campus and local community as a "living laboratory". Use of advanced instrumentation-based measurement techniques of appropriate parameters. Includes hands-on sample collection, handling, testing and data analysis. Prerequisite: ENVE 3200. SPRING. [2].

ENVE3600 - Fundamentals in Environmental Engineering

Course Description

Parameters affecting environmental quality, including air and water pollutants; treatment techniques to achieve drinking water quality or permit safe discharge to the environment. Sustainability. Contaminant transport and interactions of contaminants with the environment. Risk assessment and governmental regulations covering air, water, solid and hazardous wastes. Residuals management including hazardous and solid waste. Prerequisite: CHEM 1601, PHYS 1601, MATH 2420. FALL. [3]

ENVE3610 - Sustainable Development

Course Description

Quantitative investigation of the role of adequate and renewable resources for continual economic development. Past and present resource challenges, influences of indigenous, national, and international cultures, land use practices, social policy, and economic strategies on infrastructure development. Future challenges posed by climate change, and how market- and government-based policies may be applied in conditions of uncertainty to encourage sustainable development. SPRING. [3]

ENVE3860 - Undergraduate Research

Course Description

Independent research under the direction of a Civil and Environmental Engineering faculty member. Prerequisite: Junior standing or consent of the faculty adviser. No more than 6 hours of courses numbered 3860 and 3861 can be credited toward the degree. [1-3]

ENVE3861 - Undergraduate Research

Course Description

A continuation of research in 3860 or in a different area of Civil and Environmental Engineering. No more than 6 hours of courses numbered 3860 and 3861 can be credited toward the degree. [1-3]

ENVE4305 - Enterprise Risk Management**Course Description**

Development of an organization-wide risk management program for protecting human health, the environment and business continuity. Focus on defining an all-hazards risk management process and program implementation, performing risk assessments, determining and selecting appropriate risk reduction strategies, and influencing risk management decisions internally and externally. Applications drawn from natural disasters, man-made accidents and intentional acts. Prerequisite: Senior standing. SPRING. [3]

ENVE4600 - Environmental Chemistry**Course Description**

Theoretical aspects of physical, organic, and inorganic chemistry applied to environmental engineering. Estimation of chemical parameters based on thermodynamic and structural activity relationships, pH as a master variable, equilibrium processes in the environment, including the carbonate system, metal complexation and precipitation. Prerequisite: CHEM 1601. FALL. [3]

ENVE4605 - Environmental Thermodynamics, Kinetics, and Mass Transfer**Course Description**

Examination of fundamental environmental processes and phenomena. Uses of equilibrium phenomena, process rate and mass transport phenomena to solve a broad range of environmental problems. Prerequisite: CHEM 1602, MATH 2420, ENVE 3600. SPRING. [3]

ENVE4610 - Biological Processes in Environmental Systems**Course Description**

Principles of biology and their application to wastewater treatment processes with emphasis on microbial ecology, bioenergetics, and the role of chemical structure in biodegradability. Utilization kinetics of inhibitory and non-inhibitory organic compounds. Biological process analysis and design (aerobic and anaerobic) for municipal and industrial wastewaters, using a mass balance approach. SPRING. [3]

ENVE4615 - Environmental Assessments**Course Description**

Design and conduct of environmental assessments to evaluate risks posed by infrastructure systems or environmental contamination. Impact analyses for sources, infrastructure modifications, due diligence environmental audits, and contaminated site remedial investigations. Prerequisite: Senior standing. FALL. [3]

ENVE4620 - Environmental Characterization and Analysis**Course Description**

Acquisition and interpretation of environmental data. Principles of chemical measurement, sample collection and sample program design; laboratory safety and good laboratory practices; analytical instrumentation and methods; quality assurance and quality control; and statistical interpretation of data. Hands-on experience through demonstrations featuring state-of-the-art analytical instrumentation. Prerequisite: CE 3600, ENVE 4600. SPRING. [3]

ENVE4625 - Environmental Separations Processes**Course Description**

Fundamentals and applications of separations processes relevant to water and wastewater treatment and other environmental systems. Topics include coagulation/flocculation, sedimentation, granular filtration; advanced separation processes such as various membrane processes, absorption, ion exchange, thermally driven separations, and electrically driven separations including electrodialysis and capacitive deionization. SPRING. [3]

ENVE4700 - Energy and Water Resources

Course Description

Scientific, technological, philosophical, and social issues surrounding approaches to carbon-based energy and alternative energy resources, management of carbon through sequestration, supplying and treating water for agriculture, communities, and industry, and changing climate impacts on regional distribution of water resources. SPRING. [3]

ENVE4705 - Physical Hydrology

Course Description

Development of fundamental bases of hydrological processes. Land-atmosphere processes, surface-water flows, soil moisture dynamics, and groundwater flows. Exposition of physical principles, their embodiment in mathematical models, and their use in interpreting observations in the field and laboratory. Prerequisites: CE 3700 or ME 3224 or ChBE 3300 or EES 4550. FALL. [3]

ENVE4710 - Hydrology

Course Description

The hydrologic cycle, study of precipitation, evapotranspiration, hydrometeorology, stream flow, flood flow, flood routing, storm sewer design, detention basin design, and water quality. Prerequisite: CE 3700, CE 3705. FALL. [3]

ENVE4715 - Groundwater Hydrology

Course Description

The occurrence and flow of ground water. Basic concepts of the effects of varying permeability and capillarity on seepage flow. Flow toward wells, through dikes, and beneath dams. Prerequisite: MATH 2420, CE 3700. SPRING. [3]

ENVE4720 - Surface Water Quality Modeling

Course Description

Analysis of physical, chemical, biological, and physiological contaminants in streams, lakes, and estuaries, and surface water/groundwater interfaces. Analytical and numerical modeling techniques. One- and two-dimension computer simulation of surface water quality. Prerequisite: ENVE 4605. SPRING. [3]

ENVE4800 - Nuclear Environmental Engineering

Course Description

The nuclear fuel cycle and environmental and societal impacts associated with its traditional implementation. Technical and programmatic challenges associated with fuel production, and waste management including processing, storage, transportation, decontamination, decommissioning, and environmental restoration. Technologies and approaches for reducing impacts of the nuclear fuel cycle. Prerequisite: Senior or graduate standing. SPRING. [3]

ENVE4950 - Environmental Engineering Design I

Course Description

Capstone design for environmental engineers. Project conception, design, economic evaluations, safety, reliability, ethics, social and environmental impact, licensure, and government regulations. Projects may be interdisciplinary, competition-oriented, or traditional environmental engineering projects. Prerequisite: ENVE 3600. FALL [1].

ENVE4951 - Environmental Engineering Design II

Course Description

Continuation of ENVE 4950. Course includes an oral presentation and the submission of a final design report. Prerequisite: ENVE 4950. SPRING. [2].

ENVE4959 - Senior Engineering Design Seminar.

Course Description

Elements of professional engineering practice. Professionalism, licensing, ethics and ethical issues, diversity equity and inclusion, intellectual property, contracts, liability, risk, reliability and safety, interdisciplinary teams and team tools, codes, standards, professional organizations, careers, entrepreneurship, human factors, and industrial design. Prerequisite: senior standing. Corequisite: ENVE 4950. FALL. [1].

Environmental and Sustainability Studies

ENVS1001 - Commons iSeminar

Course Description

Topics vary. General Elective credit only. [1] (No AXLE credit)

ENVS1101 - Foundations of Climate Studies

Course Description

Scholarship from across the natural sciences, social sciences, and humanities. History and science of climate change; the cultural and political-economic systems that shape climate injustice. Challenges and possible solutions to the climate crisis. [3] (P) (CORE B, E) (LE SBS)

ENVS2323 - NGOs, Society, and Climate Change

Course Description

(Formerly listed as 3301) Nonprofits as complex and diverse actors engaged in climate mitigation, climate adaptation, policy, and energy justice. Logics of nonprofit organizations; grant-writing. Perspectives and insights from sociology, political science, and nonprofit studies. Serves as repeat credit for SOC 3319 prior to Fall 2025, or SOC 2323 onward. [3] (SBS)

ENVS2324 - Climate Movements

Course Description

Origins and social dynamics of movements that have sought to mitigate, resist, or deny climate change. Climate change inequities and vulnerabilities of poor peoples and nations. Impacts on processes of global social change. Serves as repeat credit for SOC 3314. [3] (SBS) (CORE A, B) (LE SBS)

ENVS3851 - Independent Research and Writing

Course Description

Independent research on issues of theoretical and/or practical relevance to understanding and addressing climate & environmental change. Students may enroll in more than one section of this course each semester. May be repeated for a total of 6 credits. [1-6] (No AXLE credit).

ENVS4101 - Society and the Environment Capstone
Course Description

The relationship between society and the environment. Sustainability, adaptation, climate science, and policy. Open only to junior and senior ENVS minors. [3] (SBS)

ENVS4101W - Society and the Environment Capstone
Course Description

The relationship between society and the environment. Sustainability, adaptation, climate science, and policy. Open only to junior and senior ENVS minors. Repeat credit for students who have completed ENVS 4101. [3] (SBS)

ENVS4961 - Special Topics
Course Description

Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

ENVS4981 - Climate Studies Honors Rsrch
Course Description

Research and writing supervised by program faculty. Students are expected to take 3 credits in the fall and 3 credits in the spring term. Open only to honors candidates. Prerequisite or corequisite: completion of methods and practices requirement for the Climate Studies major. [3; maximum of 9 credits total for all semesters of 4981] [3] (No AXLE credit)

European Studies

EUS1001 - Commons iSeminar
Course Description

Topics vary. General Elective credit only. [1] (No AXLE credit)

EUS2201 - European Society and Culture
Course Description

An interdisciplinary survey of European society, culture, and politics since 1900. [3] (INT) (CORE B, C) (LE HFA)

EUS2202 - European Politics and EU Institutions
Course Description

The European project, its institutional structure, and political dynamics. European Parliament, Commission, Council, Court of Justice. Elections, parties, policies, and governance. Discussion of the legislative process, democracy and illiberalism, border politics, defense mechanisms, environmentalism, economics, memory culture, and education. [3] (INT) (CORE B, C) (LE HFA)

EUS2203 - The Idea of Europe
Course Description

European identity from ancient ideals to its reality as the European Union. Emphasis on Europe as cultural construct and definable space. Historical, political, religious, philosophical, and cultural movements for Europe's claim to legitimacy. [3] (INT) (CORE B, C) (LE HFA)

EUS2204 - European Cultural History**Course Description**

The cultural evolution from 1500s to the present. Cultural production in the fine arts, architecture, and literature as a result of trade and the concentration of political power. Global perspective on the impact of Europe. [3] (INT) (CORE B, C) (LE HFA)

EUS2208 - Conspiracy Theories and Rumors in European and U.S. History**Course Description**

From 1600 to the present. Jesuits, Jews, and the Illuminati. The American and French Revolutions, McCarthyism, UFOs, and New World Order theories. [3] (INT)

EUS2210 - European Avant-Garde Movements**Course Description**

Twentieth-century European aesthetic, political, and social imagination from Expressionism and Dadaism to Fluxus and Happenings. Connection between aesthetics and capitalism. Impact of World Wars on art and literature, gender roles, and 'exoticism'. Art as an institution and literature as performance. [3] (INT)

EUS2212 - Revolutions and Post-Communisms in Eastern Europe and Eurasia, 1981-2010**Course Description**

Life in the Soviet Imperium. Revolutions of 1989 in Eastern Europe. Disintegration of the U.S.S.R., 1989-1991. Challenges of neoliberal transitions to free-market democracies. Post-socialist culture. Ecology and environmentalism; globalization; gender; religion and ideology; mass media; violence; ethno-nationalism; and authoritarianism. Taught in English. Serves as repeat credit for students who have earned credit for HIST 2212, EUS 2212 or RUSS 2810/5810. [3] (P)

EUS2213 - Introduction to European Intellectual Traditions: Ancient and Medieval**Course Description**

Philosophical, religious, and literary foundations. Texts by Homer, Virgil, Augustine, and Dante together with background from the Bible. [3] (HCA)

EUS2214 - Introduction to European Intellectual Traditions: Renaissance and Modernity**Course Description**

Great books of western intellectual traditions through Renaissance to Modernity. Science, technology, religion, imagination, and human individuality. Texts by Dante, Shakespeare, Cervantes, and Goethe. [3] (HCA) (CORE B, C) (LE HFA)

EUS2220 - Religion and Politics in Modern Europe, 1648-Present**Course Description**

Toleration in the Enlightenment; the French Revolution; antisemitism; genocide; secularism and political Islam. [3] (INT)

EUS2222 - Right-wing Populist Parties: Populism in Europe and Beyond**Course Description**

Theoretical and historical concepts of populism. Case studies of populist parties in France, Italy, the Netherlands, Austria, Germany, Poland, and Hungary. [3] (INT)

EUS2228 - The Flight of Vulnerable Migrants to Europe

Course Description

Exploration of refugees' flight from persecution, and their search for protection in Europe. International Refugee Law; "refugee-creating" events in Africa and the Middle East. Geographic pathways and legal processes followed by those who have sought protection. Depictions of their plight in film, music, literature, and the visual arts. [3] (INT) (CORE C, E) (LE HFA)

EUS2230W - European History and Culture Through Immersive Gaming

Course Description

Experiential, game-based study of key historical moments in European history using "Reacting to the Past" (RTP) pedagogy for engaged classroom learning. Offered on a graded basis only. Serves as repeat credit for RPW 3890W-01 Revolutions, offered spring 2023. [3] (HCA)

EUS2240 - Topics in European Studies

Course Description

Topics of special interest on modern European culture or society. May be repeated for credit when topics vary. [3] (No AXLE credit)

EUS2260 - European Cities

Course Description

The history, politics, society, or culture of important European cities. Content varies according to location and disciplinary focus. The course is taught during the May Session in Europe with the cities themselves complementing daily lectures and site visits. Course requirements include preliminary work on campus, a research paper, and one or more examinations. May be repeated for credit in different cities. [3] (INT)

EUS2800 - Pursuing Utopia: Social Justice & Romanticism in the Alps

Course Description

Social justice and literary experiments of writers who sought alternative approaches to art and society in the 'neutral' Alpine settings of Europe. [3] (INT)

EUS3333 - The European Refugee Experience: From Populism to Covid-19

Course Description

Journey of refugees towards protection in Europe; overview of international refugee law. Myriad 'refugee-creating' events, intermediaries, and challenges. [3] (INT)

EUS3850 - Independent Readings and/or Research

Course Description

Independent readings and/or research on approved topics relating to modern European society and culture. [Variable credit: 1-3 each semester, maximum of 6 hours in 3850 and 3851 combined] (No AXLE credit)

EUS3851 - Independent Readings and/or Research

Course Description

Independent readings and/or research on approved topics relating to modern European society and culture. [Variable credit: 1-3 each semester, maximum of 6 hours in 3850 and 3851 combined] (No AXLE credit)

EUS4960 - Senior Tutorial**Course Description**

Supervised readings, joint discussions, and independent research on a modern European topic to be selected in consultation with the director of European Studies. Open only to juniors and seniors. [3] (No AXLE credit)

EUS4998 - Senior Honors Research**Course Description**

Open only to seniors who have been admitted to the European Studies departmental honors program. [3] (No AXLE credit)

Foreign Language Education

FLED3850 - Independent Study in Foreign Language Education**Course Description**

Semi-independent study on selected topics in foreign language education. May be repeated. Consent of instructor required. [1-3]

French

FREN1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

FREN1101 - Introduction to French in the World**Course Description**

Reading, writing, speaking, and listening through an exploration of the French-speaking world. For students who have studied little or no French. No credit for students who have earned credit for a more advanced French language course. [3] (No AXLE credit)

FREN1102 - Introduction to French in the World**Course Description**

Continuation of 1101. Study of the language through an exploration of the French-speaking world. No credit for students who have earned credit for a more advanced French language course. [3] (INT) (CORE LA)

FREN1103 - Accelerated Introduction to French in the World**Course Description**

Intensive course for students who have studied one to three years of French. No credit for students who have earned credit for 1101, 1102, or a more advanced French language course. [3] (INT) (CORE LA)

FREN1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

FREN2201 - Intermediate Francophone language and cultures I**Course Description**

French and Francophone cultures through readings, film, and discussion. Designed for students who have completed elementary-level French. No credit for students who have earned credit for a more advanced French language course. Prerequisite: 1102 or 1103. [3] (INT) (CORE LA)

These hours may not be included in the minimum hours required for the women's and gender studies major. Prerequisite: 3201 and one other 2000-level (or higher) Women's and Gender Studies course, and a 2.90 grade point average. Corequisite: 3882 and/or 3883. [1-9] (No AXLE credit)

GSS3882 - Internship Readings

Course Description

Under faculty supervision, students gain experience combining theoretical and practical work in a project related to social change and focused on women, feminism, or gender. Legislative, community, educational, or non-profit settings. Internship plan developed between student and faculty sponsor, with approval of Women's and Gender Studies program director. A thorough report and research paper are submitted at the end of the semester. Prerequisite: 3201 and one other 3000-level Women's and Gender Studies course, and a 2.90 grade point average. Corequisite: 3880. [Variable credit: 1-3] (No AXLE credit)

GSS3883 - Internship Research**Course Description**

Under faculty supervision, students gain experience combining theoretical and practical work in a project related to social change and focused on women, feminism, or gender. Legislative, community, educational, or non-profit settings. Internship plan developed between student and faculty sponsor, with approval of Women's and Gender Studies program director. A thorough report and research paper are submitted at the end of the semester. Prerequisite: 3201 and one other 2000-level (or higher) Women's and Gender Studies course, and a 2.90 grade point average. Corequisite: 3880. [Variable credit: 1-3] (No AXLE credit)

GSS3891 - Special Topics: Topics in Gender, Culture, and Representation**Course Description**

Topics vary. Prerequisite: 1150 or 1150W or 1160. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

GSS3892 - Special Topics: Topics in Gender, Society, and Political Economy**Course Description**

Topics vary. Prerequisite: 1150 or 1150W or 1160. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

GSS3893 - Selected Topics**Course Description**

Topics vary. Prerequisite: 1150 or 1150W or 1160. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

GSS4950 - Capstone Colloquium**Course Description**

Seminar and workshop intended for immersion enrichment culminating in individual projects. [3]

GSS4960 - Senior Seminar**Course Description**

Advanced reading and research. Prerequisite: 1150 or 1150W or 1160. [3] (No AXLE credit)

GSS4970 - Sexing the Archive: Research Methods in Women's and Gender Studies**Course Description**

Conducting research through a feminist and queer lens. Archival research; examining oral histories using specialized Vanderbilt resources, as well as other local and online archives. Offered on a graded basis only. Prerequisite: 1150, 1150W, or 1160. [3] (HCA)

GSS4998 - Honors Research**Course Description**

Reading and research under the guidance of a faculty supervisor. Consent of both the faculty supervisor and the director of Women's and Gender Studies program required. Open only to honors candidates. May be repeated for a total of 6 credits if there is no duplication in topic. [3-6; maximum of 6 credits total for all semesters of WGS 4998] (No AXLE credit)

GSS4999 - Honors Thesis

Course Description

Open only to seniors in the Women's and Gender Studies Honors Program. May be repeated for a total of 6 credits if there is no duplication in topic. [3-6; maximum of 6 credits total for all semesters of WGS 4999] (No AXLE credit)

German

GER1001 - Commons iSeminar

Course Description

Topics vary. General Elective credit only. [1] (No AXLE credit)

GER1101 - Elementary German I

Course Description

Development of the four language skills of reading, listening, speaking, and writing. No credit for students who have earned credit for a more advanced German language course. [3] (No AXLE credit)

GER1102 - Elementary German II

Course Description

Continuation of 1101. No credit for students who have earned credit for a more advanced German language course. Prerequisite: 1101. [3] (INT) (CORE LA)

GER1105 - Beginning German for Singers and Collaborative Pianists

Course Description

Basic German language skills engaging the art song (Lieder) repertoire. Structures of German through close readings, translations, and analyses of the Lieder texts within their socio-cultural context. [3] (INT)

GER1111 - First-Year Writing Seminar

Course Description

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

GER1442 - War on Screen

Course Description

Representations of World War II and the fight against Nazi Germany in Hollywood and other cinemas, contemporary video games, television, and installation art. How current modes of warfare and the global war on terror have changed the conventions of depicting war. Taught in English. [3] (HCA)

Designed for majors wanting to familiarize themselves with works and authors not covered in the regular curriculum. Prerequisite: 6 hours above 2202. May be repeated for a total of 6 credits if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for all semesters of GRK 3850] (No AXLE credit)

GRK3890 - Special Topics in Greek Literature**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (HCA)

H&OD: Community Leadership and Development**HODC3202 - Community Development Theory****Course Description**

This is a core course in the Community Leadership and Development (CLD) track of the HOD undergraduate program. It is designed to provide a general introduction to the field of community development (CD) by examining appropriate theoretical perspectives. Ecological theory, critical theory, and theories of democracy will be studied for their application to community development issues. The theoretical perspectives examined in the course will also be linked to the diverse fields which inform community development, such as community psychology, sociology, geography, anthropology, education, and planning. Additionally, the course will provide students a more in-depth understanding of particular community development issues by exploring how alternative theoretical perspectives interpret several important community development phenomena. The course will prepare students to understand the theoretical orientations that underlie the dynamics of community development. [3]

HODC3212 - Community Development Organizations and Policies**Course Description**

Introduction to the practice of community development (CD), including analysis of, and experience with, CD issues, organizations, and policies. Prepares students to work with public or community agency staff, administrators, planners, policy-makers, or community organizers and leaders, who require analysis and recommendations on particular community issues. Students may also develop experience as part of a research, intervention, or policy development team. The course also focuses on ways ordinary people can become involved in improving their own neighborhoods, communities, and city. [3]

HODC3232 - Ethics for Human Development Professionals**Course Description**

(Also listed as HOD 5100 for professional students) Normative evaluation of ethical issues in serving human need. Conflicting values within moral dilemmas will be examined from a variety of theoretical perspectives and practical criteria. Case studies of moral issues confronting the individual, the family, service organizations, and the general public will be reviewed. [3]

HODC3242 - Environmental Politics and Justice**Course Description**

Throughout history, humans have shaped the environment to provide food, shelter, energy, profit, and social power. As climate change advances, our relationship to nature is more complex than ever before. On the one hand, societies have an unprecedented capacity to reconfigure the environment through processes that range from genetic manipulation to geo-engineering. On the other hand, the unequal distribution of environmental problems across races, classes, genders, and nations is intensifying and demands critical interrogation. From farmer suicides in India to protests over hydraulic fracturing ("fracking") and oil pipelines in North America, social movements are demanding more democratic control over land and natural resources. In this course, we will explore environmental justice in theory and practice. Drawing on geography, anthropology, history, and critical race studies, we will examine the following questions: What is nature? Who defines and controls it? Why do environmental inequalities arise and how are they maintained? How are groups resisting and organizing around environmental and climate justice concerns? [3]

HODC3262 - Social Entrepreneurship: Principles and Application

Course Description

This course explores the idea and practice of "Social Enterprise", an emerging field where new types of organizational models are leveraging business and markets to address important social issues and unmet needs. The complexity of social issues in the 21st century often necessitates innovative, cross-sector, interdisciplinary solutions and organizational forms. Social Enterprise has emerged as one such model with great promise. This course is designed to provide broad exposure to the activity and key issues in the social enterprise sector, as well as a more specific, hands-on learning through projects, case studies and speakers. (Limited to Sophomore, Junior, and Senior HOD majors and minors)[3]

HODC3342 - Introduction to Community Psychology

Course Description

Theory, research, and action in community psychology. History of mental health care; ecological theories of community, stress, coping, and social support; deviance labeling; community assessment strategies; prevention, empowerment, and community and organizational change programs; societal-level intervention policies. [3]

HODC3352 - Philanthropy and Social Problem Solving

Course Description

Topic: Philanthropy & Social Problem Solving. This course provides an opportunity to engage in the practice of philanthropy, while learning about charitable giving/fundraising, social problem-solving, and the non-profit sector. The semester will be divided into four sections: I. Problem identification; II. Approaches to change; III. Evaluating organizational effectiveness/impact and fit with theories of change; and IV. Decision making. Prerequisites: students must have taken courses in group processes (HOD 1300 or equivalent), organizations (HOD 2100 or equivalent), and systematic inquiry/research methods (HOD 2500 or equivalent), so that they are prepared to work in teams and to analyze both social problems and the organizations that aim to deal with them. [3]

HODC3650 - Community Leadership and Development Seminar

Course Description

Exploration of selected topics related to the community leadership and development track of the Human and Organizational Development Program. May be repeated for credit with change of topic. [3]

HODC3850 - Independent Study in Community Leadership and Development

Course Description

Individual programs of reading or the conduct of research studies in community leadership and development. Consent of supervising faculty member required. May be repeated. [1-3]

HODC3870 - Practicum in Community Leadership and Development

Course Description

An intensive practicum experience. Three contact hours per week required for each credit hour. [1-3]

HODC3890 - Special Topics in Community Leadership and Development

Course Description

Exploration of special issues on topics related to community leadership and development. May be repeated for credit with change of topic. [3]

HODE3205 - Education Policy Analysis Methods

Course Description

How should the government choose among options to address the country's education problems? The main goal of this course is to introduce students to the concepts, methods, and tools useful in performing policy analysis in general, and to give students practice applying the policy analysis methods to real-world educational policy issues including school vouchers, using measures of teacher value-added, financing higher education, and the importance of resources for schooling and student achievement. Prerequisite: HOD 2700 or PSCI 1100. [3]

HODE3215 - Education and Public Policy

Course Description

The course explores contemporary social, philosophical, and political dimensions of education policy, including issues related to civic engagement, equity and school organization, and the ecology of schooling. Course readings and discussions will involve fundamental questions about the relationship between schools and society: What is the purpose of American public education? How do policy values, including equity and excellence, social justice and accountability, shape education policy? How is education policy related to social and economic outcomes and opportunities? Prerequisite: HOD 2700 or PSCI 1100. [3]

HODE3225 - Introduction to Public Finance of Education

Course Description

In this course, we first provide a foundation of knowledge for the economics of the public sector. In this part of the course, we will discuss the appropriate role of government activity in a market economy as well as other behavioral consequences of government policy from the perspective of the consumers, the policymakers, regulators, and general taxpayers. After establishing a better understanding of the economics of the public sector, we will examine economic models to explain real world government policymaking with a specific focus on education policy, including the rationale and mechanisms of funding education as well other important policy issues such as the provision of early childhood education, teacher labor markets, and accountability and school choice programs. [3]

HODE3850 - Independent Study in Education Policy

Course Description

Individual Programs of reading or the conduct of research studies in education policy. Consent of supervising faculty member required. May be repeated. [1-3]

HODE3870 - Practicum in Education Policy

Course Description

An intensive practicum experience. Three contact hours per week required for each credit hour. [1-3]

H&OD: Health & Human Services

HODH3201 - Introduction to Human Services

Course Description

This course is a comprehensive and realistic survey of the diverse and dynamic field of human services. Students will examine: 1) significant historical developments; 2) populations served; 3) social welfare/poverty theories; 4) career opportunities; and 5) controversial and ethical issues. The course will emphasize special tasks and activities that are performed by the contemporary human service worker. [3]

HODH3211 - Introduction to Counseling

Course Description

An overview of the counseling profession: theories, techniques, settings, and specialty areas. In addition to lectures and class discussions, the course includes an experiential component designed to increase students' listening and responding skills. By the end of the course, students will have a clear understanding of what being a counselor entails. [3]

HODH3221 - Health Service Delivery to Diverse Populations

Course Description

This course focuses on the study of value systems of diverse groups, as well as variables related to gender, age, lifestyle, religion, social class, race, geography, and developmental state, and how these relate to health status and health service needs. This course provides students with a basic knowledge and understanding of diversity so that they may be more effective in serving the needs of all people. [3]

HODH3650 - Health and Human Services Seminar

Course Description

Exploration of special issues related to the health and human services track of the Human and Organizational Development Program. May be repeated for credit with change of topic. [3]

HODH3850 - Independent Study in Health and Human Services

Course Description

Individual programs of reading or the conduct of research studies in Health and Human Services. Consent of supervising faculty member required. May be repeated. [1-3]

HODH3870 - Practicum in Health and Human Services

Course Description

An intensive practicum experience. Three contact hours per week required for each credit hour. [1-3]

HODH3890 - Special Topics in Health and Human Services

Course Description

Exploration of selected topics related to health and human services. May be repeated for credit with change of topic. [3]

H&OD: International Leadership and Policy

HODI3200 - Global Dimensions of Community Development

Course Description

The globalization process induces new forms of human organization and transforms existing organizations at the community, national, and international levels. This course provides an understanding of the nature, functioning, and development of organizations affected by globalization in societies different from our own and as they relate to multilateral or global institutions that span different social and cultural settings. To do this, the course explores organizations from a comparative perspective, using the analytical framework of human ecology, in terms of differential access to economic and other productive assets, education and information, security and the rule of law, social capital and cultural identity. [3]

HODI3210 - Leadership and Change in International Organizations

Course Description

This course uses an interdisciplinary case study approach to investigate organizational challenges associated with today's international environment. Students examine the impact of culture, politics, and policy, and other international phenomena such as exchange rates, trade, and capital markets on organizational leadership, structure, and performance. Students also explore various dilemmas that confront decision-makers in international organizations as they attempt to reconcile institutional objectives, individual preferences, and varying cultural norms.[3]

HODI3220 - International Organizations and Economic Development

Course Description

The number of international organizations has proliferated since World War II, and their functions have diversified. Some are altruistic. Others are regulatory. Some serve as forums for debate, others as instruments for military action or enforcement of international agreements in such diverse fields as health, labor, agriculture, human rights, environment, culture, and trade. This course addresses how these organizations are financed, how they are governed, and how they create and manage political controversy. It covers their legal mandates and structure, seeks to develop awareness of issues of human capital and the World Bank, addresses the controversies and debates over globalization and the role of international organizations in the international regulatory environment, and assesses the future of such organizations in an increasingly interdependent world. [3]

HODI3230 - Education and Economic Development

Course Description

This course reviews the history and application of human capital theory. It provides students with examples of applications in economic development policy. It gives students practice in applying common statistical models. It exposes students to current debates in education policy in the World Bank and other international organizations which result from those models. [3]

HODI3240 - Effectiveness in International For-Profit Organizations

Course Description

Intercultural understandings and skills are key in today's job market, due to fast-growing opportunities and challenges in international, multinational and global businesses. In this course students will, through a variety of methodologies, explore the current trends of exploding world trade, emerging nations, competition for talent and resources, and the impact of technology and changing demographics. Additionally, students will develop skills and understandings in working with cultures, managing cross-cultural teams, and the ins and outs of working abroad. [3]

HODI3250 - Building Knowledge Economics in Asia

Course Description

This course focuses on the challenges and opportunities faced by the Asia-Pacific Region in making the transition to knowledge-based economies. Topics cover global, regional, and country-specific policies and initiatives aimed at building the four pillars of the Knowledge Economy (as defined by the World Bank): economic incentive and institutional regime, education, innovation, and information and communications technologies. This course is intended for advanced undergraduate students interested in gaining a deeper understanding of the transformational changes in the vast and diverse region. [3]

HODI3260 - Education in the Asia-Pacific Region: Development, Reform, and Innovation

Course Description

This course focuses on an in-depth analysis of current developments in education and schooling in the vast and diverse Asia-Pacific Region. Students will examine perspectives from educational researchers, policy makers and practitioners on the major issues, concerns and prospects regarding educational developments in the region. [3]

HODI3270 - Global Sustainable Development**Course Description**

This interdisciplinary course will help students to develop a capacity to analyze society-environment relations across spacial scales (from local to the global) using approaches from multiple academic disciplines and professional fields. The course's dual focus on analytical approaches and environmental objects (rather than a typical emphasis on problems) underscores the fact that today's concerned citizens and professionals must be able to analyze complex society-environmental relations from multiple perspectives and at multiple scales. Sustainability demands insights and methods from education, the social sciences, business and organizational studies, the natural sciences, and more. [3]

HODI3850 - Independent Study in International Leadership and Development**Course Description**

Individual programs of reading or the conduct of research in international leadership and development. Consent of supervising faculty member required. May be repeated. [1-3]

HODI3870 - Practicum in International Leadership and Development**Course Description**

An intensive practicum experience. Three contact hours per week required for each credit hour. [1-3]

HODI3890 - Special Topics in International Leadership and Development**Course Description**

Exploration of special topics related to international leadership and development. May be repeated for credit with change of topic. [1-3]

H&OD: Leadership & Organizational Effectiveness

HODL3204 - Leadership Theory and Practice**Course Description**

A systematic study of the formal theories and models of the leadership process and the research supporting and challenging them. Students will complete a wide range of leadership self-assessments; design a leadership self-development plan; and participate in individual and group problem solving, decision making, conflict resolution, and performance appraisal simulations and case studies focusing on personal and organizational effectiveness. Corequisite: HOD 2100. [3]

HODL3224 - Analyzing Organizational Effectiveness**Course Description**

Effective leaders are able to analyze internal results and external trends in order to make effective decisions. Students will gain first-hand knowledge of the financial and strategic issues critical to effective decision-making through a mix of lectures, case studies and one problem-based learning module. The primary focus will be on the relevant critical thinking skills such as: identifying relevant decision criteria, interpreting trends in the underlying data (both financial and operational), and communicating that analysis to executives in a manner that can be readily digested. [3]

HODL3234 - Advanced Organizational Theory

Course Description

A comprehensive study of current theories and applied research in organizational effectiveness. Emphasis is on the principles and practices of organizational restructuring, organizational development and planned changes, systems and processes, self-managed teams, and Total Quality. Experiential learning through simulations and field work will reinforce systematic inquiry, strategic planning, and applied organizational assessment skills. Corequisite: HOD 2100. [3]

HODL3254 - Human Resource Management

Course Description

A comprehensive survey of human resource management theory, procedures, and practices, with emphasis on the organizational leader's role and responsibilities for recruiting and selection, placement and career development, employee relations, labor relations, performance appraisal, compensation and benefits, workplace ethics, equal employment opportunity, safety and health, legislation and workplace regulations, development of personnel policies and practices, and the techniques of strategic human resource planning. [3]

HODL3264 - Evidence-based Practice in Organizations

Course Description

Accessing and using published research in solving organizational and social problems is a cornerstone of movements in management, education, medicine and a range of other fields. Using evidence from academic research has even become part of the definition of ethical practice in many of these fields. As a result, identifying and appraising research studies that might be used to solve individual, team and organizational problems has become a critical skill for practitioners. From this research, practitioners must be prepared to create actionable interventions and to persuade others to adopt them. Prerequisites: HOD 2100 (concurrent enrollment allowed) [3]

HODL3274 - Managing Organizational Change

Course Description

This course focuses on organizational development philosophy and practices of planned change, and the theory and techniques of organizational consulting. Students will participate in simulations and actual organizational development interventions. Prerequisite: HODL 3204 or HODL 3234. [3]

HODL3284 - Gender and Leadership

Course Description

What does the research on leadership tell us? Broad based leadership research has examined leadership by gender (Eagly & Carli, 2007; Gage, Mumma, & Fritz, 2004), feminine and masculine characteristics of leadership (Eagly & Carli, 2007; Pittinsky, Bacon, & Welle, 2007; Valian, 1998), and perceptions of women's ability to lead (Rhode & Kellerman, 2007). Yet much leadership research has typically addressed leadership development from a traditional view: white, male, positional leadership. How can we bring about a shift in the view of leaders and leadership? What role does and can gender identity play in effective approaches to leadership? In what ways can we learn to problematize situations and develop solutions through more contemporary leadership approaches? Utilizing research, popular readings, and voices from leaders from various gender identities, this course will examine the theoretical perspectives of leadership and gender. Exploration of one's view of self-as-leader including gender identity, will also be incorporated. Students will come to understand what we know about gender and leadership through the examination and critique of the scholarship, and learn how to use their own voice to be an advocate for self and others. [3]

HODL3314 - Strategic Planning and Project Management

Course Description

This advanced seminar and workshop-based course focuses on the key organizational processes of strategic planning and project management. Building on prior instruction in leadership and organizational theory and practices, students will complete a critical analysis of strategic leadership theory and models of organizational planning. Activities include evaluation of internal and external factors impacting on planning; participation in strategic planning and project management simulations; evaluation of the performance of selected strategic leaders as planners; and practice with key planning tools and technologies. [3]

HODL3650 - Leadership and Organizational Effectiveness Seminar

Course Description

Exploration of selected topics related to the leadership and organizational effectiveness track of the Human and Organizational Development Program. May be repeated for credit with change of topic. [3]

HODL3850 - Independent Study in Leadership and Organizational Effectiveness

Course Description

Individual Programs of readings or the conduct of research studies in leadership and organizational effectiveness. Consent of supervising faculty member required. May be repeated. [1-3]

HODL3870 - Practicum in Leadership and Organizational Effectiveness

Course Description

An intensive practicum experience. Three contact hours per week required for each credit hour. [1-3]

HODL3890 - Special Topics in Leadership and Organizational Effectiveness

Course Description

Exploration of selected topics related to the leadership and organizational effectiveness track of the Human and Organizational Development Program. May be repeated for credit with change of topic. [3]

Haitian Creole Language

CREO1101 - Elementary Creole I (Duke)

Course Description

Haitian Creole or Kreyòl language. Vocabulary and idioms. Haitian culture. Understanding, speaking, reading, and writing in contexts of health care, Haitian women's rights, and unpaid child servants (restavèk). Offered on a graded basis only. [3] (No AXLE credit)

CREO1102 - Elementary Creole II (Duke)

Course Description

Essential elements of Creole language and aspects of Haitian culture. Speaking, listening, reading, and writing. Exposure to Haitian culture through films, storytelling, games, music, and proverbs. Prerequisite: 1101 or a comparable level of previous Creole language experience, such as familial background in Creole. Offered on a graded basis only. [3] (INT) (CORE LA)

CREO2201 - Intermediate Creole I (Duke)**Course Description**

Understanding, speaking, reading, and writing in cultural context; issues of rural life in Haiti, religion, Frenchified Creole vs popular Creole. Texts, poems, novel excerpts. Focus on contemporary events and debates in Haitian culture. Offered on a graded basis only. Prerequisite: 1102. [3] (INT) (CORE LA)

CREO2202 - Intermediate Creole II (Duke)**Course Description**

Second semester of Intermediate Creole. Offered on a graded basis only. Prerequisite: 2201 or equivalent. [3] (INT) (CORE LA)

CREO3301 - Advanced Haitian-Creole I (Duke)**Course Description**

Listening, speaking, reading, and writing skills. Themes related to Ayiti such as literature(s), language(s), education, history, and different types of Haitian music. Pioneers of Haitian Kreyòl literature and works of Haitian scholars/authors published in the past ten years. Music groups that left their mark on Haitian music. [3] (CORE LA)

CREO3302 - Advanced Haitian-Creole II (Duke)**Course Description**

TBD [3] (CORE LA)

Hebrew

HEBR1101 - Elementary Hebrew**Course Description**

Introduction to alphabet, the basics of grammar, and elementary conversation. Classes meet three times per week with an additional two hours a week required in the language laboratory. No credit for students who have earned credit for a more advanced Hebrew language course. [4] (No AXLE credit)

HEBR1102 - Elementary Hebrew**Course Description**

Continuation of 1101. Greater stress upon conversation and grammar. Classes meet three times a week with an additional two hours a week required in the language laboratory. No credit for students who have earned credit for a more advanced Hebrew language course. Prerequisite: 1101. [4] (INT) (CORE LA)

HEBR2201 - Intermediate Hebrew**Course Description**

Introduction to modern Hebrew reading, conversation, advanced grammar, and conversation. Classes meet three times a week with an additional three hours a week spent in independent work in the language laboratory. No credit for students who have earned credit for a more advanced Hebrew language course. Prerequisite: 1102. [3] (INT) (CORE LA)

HEBR2202 - Intermediate Hebrew**Course Description**

Continuation of 2201. Greater emphasis on reading and writing. Classes meet three times a week with an additional three hours a week spent in independent work in the language laboratory. No credit for students who have earned credit for a more advanced Hebrew language course. Prerequisite: 2201. [3] (INT) (CORE LA)

HEBR2205 - Hebrew for the Professions**Course Description**

Vocabulary and fluency for business, media, networking, and workplace communication in Hebrew; focus on practical, professional contexts and personal branding. Offered on a graded basis only. Taught in Hebrew. Prerequisite: HEBR 2201 or 2202, or equivalent proficiency on placement exam. [3] (AXLE: INT) (CORE: LA)

HEBR2301 - Advanced Hebrew Grammar**Course Description**

Emphasis on syntax and grammar supplemented by listening, speaking, and reading. No credit for students who have earned credit for a more advanced Hebrew language course. Prerequisite: 2202. [3] (INT) (CORE LA)

HEBR2302W - Advanced Hebrew Composition**Course Description**

Development of writing skills through the study of short stories, poems, articles, television, and web materials. Prerequisite: 2301. [3] (INT) (CORE LA)

HEBR3851 - Independent Study in Modern Hebrew**Course Description**

May be repeated for a total of 6 credits in 3851 and 3852 combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total in HEBR 3851 and 3852] (No AXLE credit)

HEBR3852 - Independent Study in Modern Hebrew**Course Description**

May be repeated for a total of 6 credits in 3851 and 3852 combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total in HEBR 3851 and 3852] (No AXLE credit)

Hindi Urdu Language Instruction

HNUR1000 - Hindi-Urdu Writing Systems**Course Description**

Foundational reading and writing skills in Devanagari (Hindi script) or Nastaliq (Urdu script); phonological and orthographic systems; cultural and historical significance of South Asian script traditions. Students choose one script to study, with no prior knowledge of that script. No credit for students who have earned credit for an advanced Hindi-Urdu course in the same script or for ASIA 3892-01 offered Fall 2023 and Fall 2024. Taught in English. [1]

HNUR1101 - Elementary Hindi-Urdu I**Course Description**

Speaking-listening skills and basic grammar. Introduction to reading and writing in Devanagari (Hindi) and Nastaliq (Urdu) scripts and to South Asian cultural materials. No credit for students who have earned credit for a more advanced Hindi-Urdu language course. [4] (No AXLE credit)

HNUR1102 - Elementary Hindi-Urdu II**Course Description**

Reading, writing, speaking, and listening. Cultural contexts of speaking Hindi-Urdu. No credit for students who have earned credit for a more advanced Hindi-Urdu language course. Prerequisite: 1101. [4] (INT) (CORE LA)

HNUR2201 - Intermediate Hindi-Urdu I**Course Description**

Conversational skills, writing, vocabulary, and grammar. Reading texts in Devanagari (Hindi) and Nastaliq (Urdu) scripts. Discussion of cultural materials in Hindi-Urdu. No credit for students who have earned credit for a more advanced Hindi-Urdu language course. Prerequisite: 1102. [4] (INT) (CORE LA)

HNUR2202 - Intermediate Hindi-Urdu II**Course Description**

Reading, writing, speaking, and listening with authentic materials. Common and specialized vocabulary. Cultural contexts of spoken Hindi-Urdu. No credit for students who have earned credit for a more advanced Hindi-Urdu language course. Prerequisite: 2201. [4] (INT) (CORE LA)

HNUR3301 - Advanced Hindi-Urdu I**Course Description**

Reading, writing, speaking, and listening with authentic materials. Advanced vocabulary, literary, and cultural studies. No credit for students who have earned credit for a more advanced Hindi-Urdu language course. Prerequisite: 2202. [3] (INT) (CORE LA)

HNUR3302 - Advanced Hindi-Urdu II**Course Description**

Reading, writing, speaking, and listening with authentic materials. Advanced vocabulary, literary, and cultural studies. No credit for students who have earned credit for a more advanced Hindi-Urdu language course. Prerequisite: 3301. [3] (INT) (CORE LA)

HNUR3321 - Readings in Hindi-Urdu Literature**Course Description**

Advanced readings, topics vary by semester. May be repeated for credit. Prerequisite: HNUR 3301 or instructor permission. No credit for students who have earned credit for a more advanced Hindi-Urdu language course. [3] (HCA) (CORE LA)

HNUR3322 - Introduction to Urdu Literature**Course Description**

Urdu literature, film, and drama. Themes in Urdu-speaking cultures and societies. Topics vary by semester. Taught in Urdu. Intermediate language proficiency in Hindi or Urdu required. Instructor consent required. [3] (INT) (CORE LA)

History

HIST1001 - Commons iSeminar **Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

HIST1038 - Language(s) in the World **Course Description**

Origins and varieties of language communication, its classification and study. Languages of empires. Bible as historical vehicle for language development and writing. Intersections of language and religion. Dialect and translation; communication alternatives including non-spoken, artificial, and non-human languages. Rap. Taboos. Language death. [3] (INT)

HIST1039 - Global History 1453 to Present **Course Description**

Global interaction and the international order. Methodological approaches. Patterns in global flows of people, capital, goods, and ideas. History of human contact, productive capabilities, wealth, and inequalities. Regimes of human differentiation and power, war and peace. [3] (INT)

HIST1040W - Revolutions in the Modern World **Course Description**

Age of Democratic Revolution to the Arab Spring. U.S., French, Haitian, Russian, Iranian Revolutions. Overthrow of traditional regimes; invention of revolutionary states. Democracy, rights, Marxism. Nature of legal, social, and economic change. Radicalization and violence. Global influence and legacy. Offered on a graded basis only. [3] (INT)

HIST1045 - Seizing Nature: Empire and Environment **Course Description**

Empires' contributions to planetary environmental harm. Relationship between colonial domination, racial violence, and climate change. Role of colonial power in environmental transformation; comparative case studies from Africa, Asian, Latin America, North America; early scientific exploration; maritime conquest; settler colonialism; plantation economies; resource extraction. [3] (INT)

HIST1050 - East Asia since 1800 **Course Description**

Traditional orders in China, Japan, Korea, and Vietnam. Encroachment of European empires. Nineteenth- and twentieth-century social and political revolutions. Japanese imperialism and the invention of pan-Asianism. WWII in the Pacific; the rise and persistence of Communism. East Asia as a new center of the global economy in the twenty-first century. [3] (INT)

HIST1060 - Premodern China **Course Description**

The development of Chinese civilization from ancient times to the seventeenth century. The birth and development of the Chinese identity; Confucianism, Taoism and Buddhism; the moral, military, and bureaucratic foundations of the imperial institution; the Silk Road; eunuchs and concubines; the commercial revolution. [3] (INT) (CORE C) (LE HFA)

HIST1061 - Law and Society in China**Course Description**

Evolution of governance and law in China. Law concerning crimes, property, commerce, gender and sexuality. Legal codes and judicial records. [3] (INT)

HIST1070 - China from Empire to the People's Republic**Course Description**

From the seventeenth century to the present. The establishment and expansion of the Qing empire and its clashes with European empires. Twentieth-century revolutions and war with Japan. Mao and the making of the Communist state; post-Mao economic and social reforms. Tibet and ethnic minority issues. [3] (INT) (CORE C, E) (LE HFA)

HIST1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

HIST1160 - Modern South Asia**Course Description**

Early modern South Asia to British imperialism and the independence of India and Pakistan. Colonial society, political movements, caste, gender, and religious "reform." Mass nationalism and Gandhi, religious conflict, and the partition of India and Pakistan. Debates on history and memory. [3] (INT)

HIST1161 - India Before Europe: 3000 B.C.E.-1750 C.E**Course Description**

South Asia from Indus Valley civilization to British imperialism. Era of Vedas, epics, Mauryas, and Guptas. Rise of Buddhism and Jainism. Overseas expansion and trade with Southeast Asia. Early encounters with Islam, followed by Turkic and Mughal rule over north India. Portuguese, Dutch, and British trading ventures in India. End of Mughal rule and beginning of British empire. [3] (INT)

HIST1162 - The East India Company, 1600-1858: The Company That Ruled The World**Course Description**

Formation of an English joint-stock company to trade in Asia. Establishment of trading posts (factories). Conflicts with Mughals, Portuguese, Dutch, and pirates. Shift from trade to politics; Company government in South Asia. Resource extraction and colonialism. Rebellion of 1857 and abolition of the Company. Forerunner of modern corporations. Offered on a graded basis only. [3] (INT)

HIST1190 - A History of Islam**Course Description**

Origins to the present, with emphasis on the modern era. Early and medieval Islam, modernism and fundamentalism. Arabia and the Wahhabis, Iran and Shi'ism, South Asian syncretism, Muslim minorities in Western Europe and the United States. Recent Islamic views on human rights, science, economics, and other religions. [3] (INT) (CORE A, C) (LE HFA)

HIST1200 - The Arab Spring**Course Description**

Roots of the movement and the course of events. The role played by the West and by print and other media. Ideologies throughout the Islamic world. Prospects for the future. [3] (INT)

HIST1250W - African Americans and Africa: From Slavery to Wakanda**Course Description**

Political, economic, cultural, intellectual, and touristic engagements. African American advocacy for Africa; perceptions of Africa and Africans. Back-to-Africa emigrationist movements; tensions between African Americans and African immigrants. Black Panther, Nollywood, and audiovisual Pan-Africanisms. African American African ancestral DNA. [3] (US)

HIST1269 - Introduction to African Studies**Course Description**

Interdisciplinary exploration of the African experience. Human origins, geography, race and ethnicity, and historical and contemporary issues. Shifting theoretical constructions of Africa alongside the social, cultural, political, and economic forces at play across the continent. [3] (INT)

HIST1270 - Early African History**Course Description**

Early history of African civilization and cultural practices; rise of major empires; ecology and religion; Indian and Atlantic Ocean trade economies; the slave trade. Not open to students who have completed 1270W. [3] (INT) (CORE A, C) (LE HFA)

HIST1270W - Early African History**Course Description**

Early history of African civilization and cultural practices; rise of major empires; ecology and religion; Indian and Atlantic Ocean trade economies; the slave trade. Serves as repeat credit for students who have completed HIST 1270. [3] (INT)

HIST1271W - War, Refugees, and Reconciliatory Justice in Africa**Course Description**

Historical and contemporary conflicts. Border wars, civil wars, genocides, terrorism, political violence, and warlordism in Africa. Displacement and refugees; truth and reconciliation commissions; post-conflict justice; peace processes, post-conflict reconstruction. [3] (INT)

HIST1280 - Africa since 1800: The Revolutionary Years**Course Description**

Political, economic, and social patterns in SubSaharan Africa from 1800 to the present. The transition from traditional states and societies, through the colonial interlude and the quest for independence to the modern national setting with its problems of development. Emphasis on the peoples of Nigeria and South Africa. [3] (INT)

HIST1281W - The Making of African Cities: Histories of Globalization and Migration

Course Description

Cultural, political, and environmental history of towns from antiquity to the present. Emergence of early city-states. Relationship between urban formations and natural environments. Trade, migration, and religious networks. Colonial rule and urban planning. Nationalist movements. Expressive cultures. Challenges of urbanization. Development, infrastructure, and technology. [3] (INT)

HIST1320 - The Senses of Happiness: A History

Course Description

Aspects of the experience of happiness through a history of the senses and emotions. Laughter, ecstasy, tasting and smelling, seeing and hearing, prosperity, great outdoors, home and hearth, intimacy, creature companions, and health. [3] (P)

HIST1333 - Great Trials of Twentieth Century Europe

Course Description

Exploration of ideology and law, politics of trials, theory and practice of punishment, perceptions of trials, and relationship of trials to terror and social marginalization. [3] (SBS)

HIST1345 - The World of Rome

Course Description

Origin of the city to the collapse of the Western empire, particularly from Punic Wars to the Severan emperors. Political, military, social, and religious history. Ancient authors and material culture. Not open to students who have earned credit for CLAS 2150 and 2160 without permission. Total credit for this course, CLAS 2150, and 2160 will not exceed 6 hours. Credit hours reduced from third course taken (or from test or transfer credit) as appropriate. [3] (INT) (CORE C) (LE HFA)

HIST1350 - Western Civilization to 1700

Course Description

Judeo-Christian and Greco-Roman foundations to the beginning of the eighteenth century. [3] (INT)

HIST1351W - London: The 2000-Year Invention of a City

Course Description

London from its origins as a Roman camp through its rise as a global city in the modern era. The invention of the city, religious reformation and scientific revolution, overseas trade and exploration, and the development of distinct neighborhoods. London's transformation into the imperial metropole of a global empire, and its evolution as a media and financial center for the wider world. Serves as repeat credit for HIST 1111 section 31. [3] (INT) (CORE: A, C)

HIST1353 - Atlantic History in the Digital Age

Course Description

Atlantic World, fifteenth through nineteenth centuries. Emergence and expansion of the slave trade; encounters between peoples of African, American, and European descent; competing legal and economic imperial modes. Traditional readings-based coursework combined with introduction to related digital history projects and methods. [3] (INT)

HIST1354 - Digital Methods for History Research**Course Description**

Exploring the intersection of history and technology. Focus on digital tools: text analysis, GIS, machine learning with Python, data visualization. Ethical considerations of digital history. Hands-on projects, critical analysis. Bridging humanities and computer science for innovative historical research. [3] (HCA) (CORE D, E) (LE HFA)

HIST1355W - Innovation and Renovation in Renaissance Europe**Course Description**

Renaissance as historical period. Reason versus faith. Materiality. Cultural interactions across political and economic borders. Works by Dante, Petrarch, and Machiavelli. [3] (HCA)

HIST1360 - Modern Europe, 1650 to 1990: States, Economies, and Knowledge**Course Description**

Modern European history from the Thirty Years War to the end of the Cold War. History of states, economies, and the production of knowledge. [3] (INT)

HIST1368 - Rio de Janeiro: Culture and Citizenship in the Marvelous City**Course Description**

From the nineteenth century to the present. Race, class, and gender. Film and literary sources. Modernity and marginalization. [3] (INT)

HIST1370 - Colonial Latin America**Course Description**

Survey of Latin American history from pre-Columbian times to the early nineteenth century. Iberian, Amerindian and African background; the conquest; construction of colonial society and institutions; wars for independence. [3] (INT)

HIST1375 - Latinx Histories of the US South**Course Description**

Latin American origin communities in the South from the early 1900s to the present. Migration experiences, evolution of US immigration policy, urban and rural economies, work and labor organizing, race and regional politics, and civil rights mobilizations. Mexican farm workers in Louisiana and Arkansas, women cigar laborers in Tampa, and rural Latinx communities in today's many meatpacking towns. Demographic patterns, undocumented life-ways, and collective placemaking endeavors of the last 30 years. [3] (US) (CORE C, E) (LE HFA)

HIST1378 - Social Movements in Latin America, 1780-1912**Course Description**

Citizenship and state formation. Race, gender, and nation. Tupac Amaru insurgency, Brazilian abolitionism, and the first Black political party in Cuba. [3] (P)

HIST1379W - The Inquisition in the New World: Law, Deviance, and Heresy in Colonial Mexico**Course Description**

Inquisition as a window on colonial law and culture in Mexico. Church, state, and empire. Religious change. Gender, race and ethnicity, and religious practices. Understandings of orthodoxy, heresy, deviance, and cultural practices. [3] (P)

HIST1380 - Modern Latin America**Course Description**

A survey of Latin American history from the early nineteenth century to the present. Wars for independence; rise of new nations and export-oriented economies; case studies in revolution, nationalism, and reform in the twentieth century; U.S.-Latin American relations. [3] (INT)

HIST1383 - Slave Resistance in the Americas**Course Description**

Resistance across North and South America. Slave flight, marronage, and full-blown rebellion. Free black towns in Florida, Mexico, Panama, and Colombia created by former slaves. Problems of evidence and voice through primary sources of free and enslaved Africans and their descendants. Sources by historians and archaeologists. Art and material culture of rebels. Offered on a graded basis only. [3] (INT)

HIST1384 - Law, Gender, and Slave Emancipation in Latin America**Course Description**

Afro-Latin America in the long 19th century. How slavery endured and shaped modern statecraft in Latin America. Gendered and racialized labor and social structures after slavery. Gradual-abolition and free-womb laws. [3] (INT)

HIST1385W - Disease and Disorder in the Atlantic World**Course Description**

Spanish Atlantic from Columbus through the Haitian Revolution. Smallpox, slavery, and rebellion. [3] (INT)

HIST1390 - America to 1776: Discovery to Revolution**Course Description**

North American colonies from the Iberian Atlantic dominion through the zenith of the British Empire. The impact of the European quest for empire on Native American and West African societies. The emergence of colonial North America within the context of European imperial rivalries and Native American political and economic networks. [3] (US)

HIST1395 - The Underground Railroad**Course Description**

Runaway slaves and their assistance from free blacks, whites, and other slaves. Impact on the course of slavery. Mechanisms of slave holders to capture and return the enslaved. Offered on a graded basis only. [3] (US)

HIST1400 - U.S. 1776-1877: Revolution to Civil War and Reconstruction**Course Description**

Independence and establishment of new political institutions. Westward expansion, economic expansion, formation of a distinctive American culture. Development of mass party politics, evangelical Protestantism, and reform movements. Sectional conflict over slavery, Civil War; Reconstruction, and the dawn of the Gilded Age. [3] (US)

HIST1405 - A History of Nashville during the Civil War**Course Description**

Causes of the war; international, political, and economic perspectives. Military history. Strategy and logistics; railroads and rivers. Technological and medical developments. Battle of Franklin. Battle of Nashville. Tennessee and the Western theatre. [3] (US)

HIST1410 - U.S. 1877-1945: Reconstruction through World War II**Course Description**

Economic, political, and social history during the era of industrialization, mass immigration, the rise of mass culture, the Great Depression, and the two world wars. [3] (US)

HIST1420 - U.S. Post-1945: Cold War to the Present**Course Description**

Political, international, social, and cultural currents that have shaped contemporary America. [3] (US)

HIST1422W - FDR, the New Deal, & War**Course Description**

1930s and 1940s United States' domestic and foreign policy during the presidency of Franklin D. Roosevelt. U. S. global ascendancy and rise of the new welfare state. [3] (US)

HIST1425W - Body, Mind, and Soul: Elvis, Dylan, Springsteen and Postwar America**Course Description**

Rock and roll's transformation of American culture. Focus on three pivotal artists and their role in the history of each of their breakout decades: the 1950s, 1960s, and 1970s. Readings and listenings on the African American roots of rock, the gendered dimensions of the genre, the role of dissent and accommodation in popular music. Issues of youth, alienation, religion, and individuality. [3] (US)

HIST1427 - United States in the 1970s**Course Description**

The 1970s as pivotal to cultural, economic, and social change. Vietnam, Watergate, and economics of stagflation. Fundamental changes in race and gender relations. Transformations through and in music, film, and television. U.S. national politics, concluding with an analysis of the causes of the "Reagan Revolution." [3] (US)

HIST1427W - The United States in the Seventies**Course Description**

The 1970s as pivotal to cultural, economic, and social change. Vietnam, Watergate, and economics of stagflation. Fundamental changes in race and gender relations. Transformations through and in music, film, and television. U.S. national politics, concluding with an analysis of the causes of the "Reagan Revolution." [3] (US)

HIST1430W - North American Indians and the Environment**Course Description**

North American Indians' interaction with their environments over time and space. Challenges posed by colonial practices and government policies. American Indian communities' projects in U.S. and Canada to sustain spiritual and material connection to natural world. [3] (US)

HIST1431 - The United States in the 1990s**Course Description**

The 1990s as a key decade of economic, political, and cultural change in the United States. End of the Cold War and Reagan era. Rise of post-industrial economy, polarization, and "culture wars." Transformations in media technologies, music, and film. [3] (US) (CORE C) (LE HFA)

HIST1438 - African American History to 1865**Course Description**

Political, cultural, socioeconomic, and intellectual history of African Americans from their arrival in colonial America through the end of the U.S. Civil War. History of and resistance to slavery. [3] (US) CORE (A, C) (LE HFA)

HIST1440 - African American History since 1877**Course Description**

The political, socioeconomic, and intellectual history of African American people from the end of Reconstruction to the present. Special emphasis on African American cultural and institutional history and the twentieth-century protest movements. [3] (US)

HIST1470 - History of Exploration**Course Description**

Antiquity to the present. Voyages of discovery, including land expeditions and exploration of extreme depths, high altitudes, and outer space. Technologies of travel and measurement. Voyaging as exploration of the self. Cultural shifts as consequences of encounters with new places and peoples. [3] (INT)

HIST1480 - The Darwinian Revolution**Course Description**

Intellectual structure and social context of evolutionary ideas from 1700 to the present. Pre-Darwinian evolutionary theories. Darwin's life and work. Racial theories and eugenics. Comparative reception of Darwinism in the United States and Europe. Conflict between science and religion. [3] (P)

HIST1490W - Galileo, Darwin, Einstein: Lives and Times**Course Description**

The lives of three pivotal scientists through personal and scientific biographies, from Renaissance Italy through Victorian England to twentieth-century Europe and America. Serves as repeat credit for HIST 1111 section 30. [3] (HCA) (CORE: A, C)

HIST1500 - History of Modern Sciences and Society**Course Description**

The end of the Scientific Revolution to the present. Sciences arising from the fields of Natural Philosophy (physics, astronomy, mathematics, and chemistry) and Natural History (geology and the life sciences). The clockwork universe, atomism and the Chemical Revolution; evolutionary theory (physical, geological, and biological); thermodynamics; and quantum theory. Colonial empires, industry, professional specialization, cultural modernism, and nuclear fear. [3] (P) (CORE B, C) (LE HFA)

HIST1510 - The Scientific Revolution**Course Description**

The production and dissemination of knowledge of the natural world during the period of the Scientific Revolution, covering roughly from 1450 to 1700. Cosmology and astrology, navigation, alchemy, religion and philosophy, and medicine. [3] (P) (CORE B, C) (LE HFA)

HIST1510L - Scientific Revolution Digital History Lab**Course Description**

Optional lab accompanying HIST 1510. Digital history tools and building digital projects. Prerequisite or corequisite: 1510. [1] (No AXLE credit)

HIST1515 - Virtual Reality and the Humanities

Course Description

Workshop in humanistic dimensions of interactive immersive environments including video games and simulations. History and theory of the medium as well as tools and practices in their creation. [3] (HCA)

HIST1518 - New Media for the Humanities

Course Description

Understanding the significance of media in academic communication for the humanities across time, as well as building the skills necessary to communicate ideas around humanistic scholarship in the twenty-first century. [3]

HIST1520 - Science and the Sea

Course Description

Histories of science and environment. Effect of science on our conception of the ocean; effect of working at sea on our practice of science. Navigators' travel journals, oceanographers' reports, and recent writings by historians of ocean science. [3] (P)

HIST1522 - Global Environmental History

Course Description

How humans and other beings (animals, insects, bacteria, and more) have changed the course of human history. Symbolic, political, and economic dimensions of human-non-human interaction across global history, including domestication, imperial conquest, agriculture, colonization, industrialization and urbanization, conservation, and climate change. Material previously offered as a first-year writing seminar. Not open to students who have earned credit for HIST 1111 section 42. [3] (P) (CORE: C, E)

HIST1525 - Global History of Pests

Course Description

Beginnings of sedentary agriculture to present with emphasis on modern period. Cultural, social, political, and economic aspects. Catastrophes and religion. Insects and empire. Public health and changing views of disease vectors. Language of pests and race. Impact of pesticides. Food production. Environmental justice. [3] (SBS)

HIST1530 - Climate History

Course Description

Early modern period to the present. Cultural, social, political, and economic aspects. The Little Ice Age, imperial expansion, and resistance. Scientific knowledge of environmental change. Capitalism, famine, and natural disasters. Climate change and the future. Environmental justice. [3] (INT)

HIST1545 - History of International Law

Course Description

The evolution and historical roots of the international legal system from a global perspective from the early modern era to the late twentieth century. [3]

HIST1550 - Legal History of the United States to 1865

Course Description

American legal history from the colonial era to 1865. Legal processes contributing to American Revolution. The Constitution, development of early laws and legal institutions, judicial and legislative action in early nineteenth century, and evolution of separate legal categories for women, American Indians, and African Americans. [3] (US)

HIST1551 - Legal History of the United States since 1865**Course Description**

American legal history from 1865 to the present. Transformation of state police power under the 14th Amendment, centralization of federal government and the federal administrative state. Ways courts and legislatures have managed civil liberties in times of crisis; civil rights revolution. [3] (US)

HIST1580 - Crime and Punishment in Early Modern Europe 1400-1800**Course Description**

Changing definitions of crime, the classification of criminals, and the nature of punishment. "Real" crimes such as vagrancy, theft, and murder; imaginary crimes such as Jewish ritual murder and witchcraft. Connections with long-term social, legal, and cultural transformations. [3] (HCA)

HIST1582W - Witchcraft, supernatural phenomena, and print culture in England, 1558-1650**Course Description**

Role of printed broadsides, woodcuts, pamphlets, and treatises in spreading and influencing ideas about the supernatural. Responses to demonic possession, "monstrous" events, and magic. Social, legal, cultural, and religious contexts. Influence of expectations about gender and class. Development of theological and skeptical views. [3] (INT)

HIST1583 - History of German Thought**Course Description**

From the Enlightenment to the present. German philosophy and critical theory in their social and political context. History of German intellectual movements. German thought as part of German culture. Taught in English. [3] (HCA)

HIST1584W - Foreigners and Citizens: Law and Rights in Modern Europe**Course Description**

French Revolution to late 20th century. Laws, institutions, and debates over citizenship and human rights. Experiences of refuge, migration, assimilation, and ethnic cleansing. Influence of nationalism, communism, liberalism, secularism, and multiculturalism on discourses of civil and human rights. [3] (INT) (CORE A, B) (LE HFA)

HIST1586W - Nazi Germany, the Holocaust, and Digital Humanities**Course Description**

Local studies of Nazi Germany and the Holocaust using the tools of digital humanities. Map-generation using Arc-GIS and data linking. [3] (INT)

HIST1589 - Introduction to Modern Jewish History**Course Description**

Meaning and origins of modern Jewish history from 1492. The diverse experiences of Jewish communities across the globe. Men's and women's redefinition of Jewish identity as they confronted modernity. Rise of secular rights for Jews but also of new forms of persecution. No credit for students who have earned credit for JS 1040. [3] (P) (CORE: B, C) (LE: HFA)

HIST1590 - Artificial Intelligence and Society

Course Description

History and overview of artificial intelligence: socioeconomic, political, ethical, cultural, and environmental implications. Theories of scientific and technological innovation. Benefits and risks of advanced informatic machines. Ethical responsibilities of researchers. Short-term and long-term policies for governance and regulation. Serves as repeat credit for students who earned credit for HUM 1610 offered Fall 2023. [3] (P)

HIST1600 - European Economic History, 1000-1700

Course Description

From the commercial revolution of High Middle Ages to Industrial Revolution. Interconnections of economic forces with politics, society, and cultures. Rise of long distance trade; development of business and accounting techniques; public finance; monetary trends; advent of capitalist ethic. [3] (SBS)

HIST1605 - Economic Thought in Historical Perspective

Course Description

Economic thinkers and ideas from Antiquity to the Modern Era. Comparative, cross-cultural and international contexts, including America, Europe, China, Africa, India and the Middle East. Impact on institutions and economic organization. [3] (SBS)

HIST1610 - Global History of Debt

Course Description

Concepts of credit and debt. Rise of credit economy, debt and imperialism, globalization of sovereign borrowing, gold standard and international finance, and debt crises. Morality and laws of debt; political dimensions of aid and indebtedness. [3] (P)

HIST1640 - History of American Capitalism

Course Description

the development of American capitalism from the colonial period to the twenty-first century. The reasons for and effects of capitalist growth; the ways in which a largely agrarian society emerged as an industrial and commercial leader and shaped the ways Americans produced and lived. The political, social, and cultural dimensions of economic change. The global context of American development. [3] (US)

HIST1660 - American Enterprise

Course Description

Evolution of the form, organization, and structure of the American business firm from colonial times to the present. Entrepreneurs, labor management, financial capital, distribution, invention, and government regulation. [3] (US)

HIST1665 - Capital, Labor, and Democracy in the United States

Course Description

Nineteenth century to present. Tensions and connections between capitalism and democracy. Basic introduction to the social and political history of workers, business, politics, and organized labor. Questions of power and economic inequality as expressed in American political culture. [3] US

Course Description

Salem witchcraft trials, Aaron Burr's treason trial, Emmett Till murder trial, and O.J. Simpson's murder trial as lenses to examine central themes in American culture, history, and memory. [3] (US)

HIST1669 - Making the Case for Civil Rights**Course Description**

Court cases and contexts that framed the 20th century struggle for African American civil rights. Not open to students who have earned credit for HIST 2690 without permission. [3] (HCA)

HIST1672 - Six Pretty Good Books on U.S. Politics and Democracy**Course Description**

Historical and contemporary political problems in the U.S. Analysis, debate, and discussion. Critical reading of semi-popular, semi-academic texts. [3] (US)

HIST1690 - Sea Power in History**Course Description**

U.S. Navy's role in foreign and defense policies from the American Revolution to the present. Broad principles, concepts, and elements of sea power throughout history. Technological advances, interservice relations, strategies, and governmental policies pertaining to sea power. Designed to meet the NROTC requirement. Offered on a graded basis only. [3] (US)

HIST1691 - Evolution of Warfare**Course Description**

Antiquity to the present. Evolution of strategic principles. Influence of technological, economic, moral, psychological, and political factors. Case studies from a soldier's perspective. Repeat credit for students who have completed NS 2311. [3] (No AXLE credit)

HIST1693 - Fundamentals of Maneuver Warfare**Course Description**

[Replaces HIST 1692 Amphibious Warfare] Broad aspects of warfare and their interactions with maneuver warfare doctrine. Focus on the United States Marine Corps as the premier maneuver warfare fighting institution. Historical influences on current tactical, operational, and strategic implications of maneuver warfare practices. Case studies. Enrollment preference to NROTC students. Repeat credit for students who have completed HIST 1692. [3] (No AXLE credit)

HIST1699 - Militarization in 20th Century American Society**Course Description**

Militarization as shaping 20th century American society. Conscription and citizenship; meanings of national identity; martial masculinities and femininities; impacts of war on racial politics; militarized welfare state; Cold War urbanisms; and militarized policing. [3] (US)

HIST1700 - Western Military History to 1815**Course Description**

War in culture, politics, and society; technology, the Military Revolution and state-formation. [3] (INT)

HIST1702 - History of Strategic Thought**Course Description**

The history of strategic thought from Vegetius to space and cyber war. Strategic thought in its historical context including Chinese strategy. Irregular warfare, insurgency and counterinsurgency, the revolution in military affairs, air power, naval strategy, drones, concepts of future warfare, AI. No credit for students who have earned credit for HIST 4960. [3]

HIST1710W - Arguing for Social Change**Course Description**

Practice of narrative, nonfiction writing for social change. History of American investigative journalism and scholarship. Interviewing, research, narrative and revision skills. Serves as repeat credit for CAL 1700W. [3] (HCA)

HIST1725 - United States and the Middle East**Course Description**

U.S. involvement in the Middle East with emphasis on the period after 1945. Special attention on the Israeli-Palestinian conflict. Serves as repeat credit for 1725W. [3] (US)

HIST1725W - United States and the Middle East**Course Description**

U.S. involvement in the Middle East with emphasis on the period after 1945. Special attention on the Israeli-Palestinian conflict. Offered on a graded basis only. Serves as repeat credit for 1725. [3] (US)

HIST1730 - The U.S. and the Cold War**Course Description**

U.S. history, 1945-1991. Emphasis on foreign policy and competition with Soviet Union. Impact of Cold War on American society. [3] (US) (CORE B) (LE HFA)

HIST1735W - United States Intelligence Community, 1940 to the present**Course Description**

Intelligence collection and analysis, covert action, and espionage in American foreign policy from World War II through the Cold War and 9/11. Legislative efforts to regulate and restrain. Contemporary dilemmas with terrorism, great power conflict, and technological advances. [3] (US)

HIST1740 - The U.S. and the Vietnam War**Course Description**

Origins of American involvement, the reasons for escalation, and the Vietnamese response to intervention. The impact on America's domestic politics, the growth of the anti-war movement, and the economic, social, and cultural effects of the conflict. [3] (US) (CORE C, E) (LE HFA)

HIST1760 - History of Christian Traditions**Course Description**

Origins to the present. Jewish origins, formation of a Catholic tradition, church-state relations, and the social and cultural contexts of changing Christian beliefs and practices. [3] (HCA) (CORE A, C) (LE HFA)

HIST1770 - United States' Religious History**Course Description**

Religion's influence on the body politic and culture of society. Readings from several religious communities. How race, gender, and ethnicity shape religious identity. [3] (US)

HIST1780W - Self and Society in the United States

Course Description

Selfhood and identity development from the early Republic to the present. The role of race, class, and gender but also religion, politics, work, technology, and media in shaping selves in the United States. Readings include autobiographies, fiction, etiquette manuals, advertisements, and scientific tracts. Offered on a graded basis only. [3] (HCA)

HIST1882W - Japan Through Historical Fiction

Course Description

Premodern and modern history of Japan through works of Japanese historical fiction. Culture, religion, and society. Relationship between history and literature. [3] (INT) (CORE A, C) (LE HFA)

HIST2100 - Politics and Catastrophe in Modern China

Course Description

Influence of politics on culture, society, government, and the military. The Cultural Revolution to Tiananmen Square. [3] (INT)

HIST2101 - Chinese Empire from the Margins

Course Description

Qing dynasty 1644 to 1912. Contemporary China's territorial, ethnic, and environmental issues in the historical context of the Qing imperial expansion and frontier management. Demographic composition of China's 56 officially-recognized ethnic groups. Territorial reach from the Gobi deserts in the northwest to subtropical forests in the south. Minority ruling group the Manchus over the Han majority and other culturally distinct groups. [3] (P)

HIST2102 - Introduction to Brazil

Course Description

A multidisciplinary survey of Brazil from pre-Columbian times to the present, emphasizing culture, economic and political patterns, social issues, literature, and the arts in historical perspective. [3] (INT)

HIST2105 - Chinese Thought

Course Description

Confucianism and Philosophical Daoism. The Confucian Four Books, the Daodejing (Laozi), Zhuangzi, and Neo-Confucianism. [3] (INT)

HIST2106 - A Global History of Tea

Course Description

Origins in China to its spread around the world. Role of tea in culture and world events, as a driver of commerce, science, and exploration. Links to Buddhism and political power in East Asia. Diverse functions in different cultures. Tea as trade commodity. Manner of preparation and use. [3] (INT)

HIST2107 - Chinese Economic History

Course Description

China's economic history from the Bronze Age to the present. Creation and development of markets. Links among political power, transportation, trade, and money. 12th century proto-Industrial Revolution, early modernization, Communism, and hybrid free market under socialism. Prerequisite: 1060 or 1070 [3] (INT)

HIST2108 - Environment and Economy in China since 1700

Course Description

Economic activities and their interactions with the environment. Long-term patterns in imperial China, with focus on the modern period. Water control and the Chinese state. Property rights and resource management. Demography and food security. Waste and recycling. Development, revolution, and nature. Global China and ecological civilization. [3] (INT)

HIST2108W - Environment and Economy in China since 1700

Course Description

Economic activities and their interactions with the environment. Long-term patterns in imperial China and the modern period. Water control and the Chinese state. Property rights and resource management. Demography and food security. Waste and recycling. Development, revolution, and nature. Global China and ecological civilization. [3] (INT)

HIST2110 - Crisis Simulation in East Asia

Course Description

Strategic motivations and behaviors of international actors. Simulations of the decision-making process during critical historical moments in the East Asian context through role-playing and video games. Offered on a graded basis only. [3] (INT)

HIST2111 - China and the United States: Intertwined Histories

Course Description

Cultural, social, and economic interactions 1700s to the present. Chinese porcelain and tea trade in colonial America; American involvement in opium trade. Chinese students in the United States; American missionaries in China. Military conflicts and alliances. Mutual formation of cultural perceptions and misperceptions. [3] (P) (CORE C, E) (LE HFA)

HIST2112 - Traditional Chinese Medicine: Theories and Practices

Course Description

Historical encounters and divergences between medicine in China and in the West. Chinese medical classics, including the Inner Canon of the Yellow Emperor and early herbal manuals. The creation of Traditional Chinese Medicine in the People's Republic of China and the emergence of Chinese medicine as alternative medicine in the U.S. Serves as repeat credit for ASIA 2630. [3] (P) (LE: HCA)

HIST2114 - Premodern Japan

Course Description

Japanese civilization from ancient times to the Meiji Restoration (1868). Connections between culture and politics; relations with neighboring regions in East Asia. [3] (INT)

HIST2115 - Play and Pleasure in Early Modern Japan

Course Description

Cultural history of Tokugawa Japan (1603-1868), with emphasis on daily life and popular entertainment in the capital of the warrior government, Edo (present-day Tokyo). Woodblock prints, pleasure quarters, kabuki theatre, commoner carnivals, and popular literature. [3] (INT)

HIST2860 - Women and Gender in the U.S. since 1865**Course Description**

Social and cultural history of the intertwined ideas and practices of gender, race, and sexuality. Exploration of experiences, representations, and activism in feminist and gay rights movements, interracial unions, marriage and the family, black women's activism, suffrage, and sexual revolutions. [3] (US)

HIST2900 - Making Worlds in the 20th Century**Course Description**

Projects in imagining and remaking the world as a "whole," including Euro-American colonial empire, anti-colonial radicalisms, socialisms, population sciences, and environmentalisms. What kinds of world(s) did the people involved in systems envision? How did they inform and clash with each other? Offered on a graded basis only. [3] (P)

HIST2995 - Antisemitism: A History**Course Description**

Pre-history and history of modern anti-Jewish sentiments and actions from the Middle Ages to the present; focus on Europe and the United States. [3] (INT)

HIST3000W - The History Workshop**Course Description**

Introduction to the "historian's craft." Reconstructing the past using primary documents such as diaries, letters, memoirs, and declassified government papers. Methods of historical research and reasoning through individual projects. Offered on a graded basis only. [3] (SBS)

HIST3010 - Pornography and Prostitution in History**Course Description**

Commercialization of the sex trade, Renaissance to the present. Political scandal, capitalism, and globalization; effects of technological change, from the printing press to the Internet. Readings from anthropology, psychology, and feminist theory. [3] (P)

HIST3040 - Health and the African American Experience**Course Description**

Disparities in the health care of African Americans, the training of black professionals, and the role of black medical institutions. The intersection between black civic involvement and health care delivery; the disproportionate impact of disease and epidemics within the African American population. [3] (US)

HIST3045W - Eugenics in the U.S., 1865-present**Course Description**

Comparative perspective. Compulsory sterilization, restrictive immigration acts, "fitter family" contests, medical genetics, and eugenic counseling. Ideas and practices shaped by attitudes toward race, gender, class, and disability. [3] (US)

HIST3050 - Innovation**Course Description**

Origin, reception, and cultural impact of technological innovation. New technologies from the mid-nineteenth century through present-day Silicon Valley and their technical, social, economic, and political dimensions. [3] (P)

HIST3070W - Science, Technology, and Modernity**Course Description**

Social, cultural, intellectual, and artistic responses to the challenges posed by modern science and technology from the mid-nineteenth to the mid-twentieth centuries. Offered on a graded basis only. [3] (P)

HIST3090 - Tokyo: History and Image**Course Description**

Tokyo and its representation in various media from the mid-nineteenth century to the present and imaginings of the future. The city's physical development and image in photographs, films, novels, essays, and other textual and visual materials produced within Japan and beyond. [3] (INT)

HIST3100 - Pirates of the Caribbean**Course Description**

Imperial competition for control of the Caribbean and state-sponsored piracy. The economic and political consequences of piracy in the Caribbean. The life of pirates aboard ship and in port. [3] (INT)

HIST3110 - Trade and Politics in Monsoon Asia, 1400-1800**Course Description**

Early modern maritime Asia. Economic dynamics, trade networks, and political engagements. Commercial and monetary connections. Material culture and conspicuous consumption. The Great Divergence. Clashes of empires. Changing maritime policies and economic thought. Pirates, smugglers, and warlords. Migration and mixed identities. [3] (INT)

HIST3111 - Debates in Chinese History**Course Description**

Contentious topics in historical scholarship on Qing and twentieth-century China. Borderland studies, the New Qing History, and China-Europe Great Divergence. The tribute system, models of international order, colonialism and law, and the Communist Revolution. Definitions of "China." Prerequisite: HIST 1060, 1070, or 2108. [3] (INT)

HIST3112W - China and the World**Course Description**

China's role in global currents since the seventeenth century. China as engine of early-modern global trade. The Chinese diaspora's transnational impact. Cosmopolitan semi-colonial cities (such as Shanghai) as incubators of global modernity. China as an innovator and exporter of cultural "goods" in the twentieth century, from revolution to medicine. Offered on a graded basis only. Repeat credit for students who have earned credit for HIST 3112. [3] (INT)

HIST3113 - Traditional Chinese Medicine: Encountering Science**Course Description**

Competition and dialogue between Chinese and Western medicine. Historical debates about anatomy and the reality of the body. Efforts to "scientize" Chinese medicine. Current integration of Chinese and biomedical practice in the US, use of biomedical standards to evaluate Chinese medicine's efficacy, critical evaluation of current scientific literature. Serves as repeat credit for ASIA 3630. Prerequisite: ASIA 2630 or HIST 2112. [3] (P)

HIST3120 - Weimar Germany: Modernism and Modernity, 1918-1933**Course Description**

Culture and politics. Mass politics, mass media, economic crisis, and social tensions. Architecture, film, theater, painting, and philosophy. Serves as repeat credit for students who have earned credit for 3120W. [3] (HCA)

HIST3120W - Weimar Germany: Modernism and Modernity, 1918-1933**Course Description**

Politics and culture. Mass media, economic crisis, and social tensions. Architecture, film, theater, painting, and philosophy. Serves as repeat credit for students who have earned credit for 3120. [3] (HCA)

HIST3140 - History of New Orleans**Course Description**

The city since its founding. Interactions between urban society and natural environment; historical and cultural significance of New Orleans in light of post-Katrina disaster and reconstruction. [3] (US)

HIST3150 - Cities of Europe and the Middle East**Course Description**

Cities of "East" and "West" in the modern period; distinguishing characteristics and shared patterns of urban modernity across different geographies. Conceptions of the European, Middle Eastern, and Islamic metropolis. [3] (INT)

HIST3170 - The Federalist Papers**Course Description**

Classic works on American constitutionalism and government and their views on human nature and republicanism. The framers' rejection of democracy and fear of legislative abuses. The Constitution's emphasis on institutional protections for liberty and checking abuses of power. [3] (US)

HIST3180 - Making of Modern Paris**Course Description**

The social and cultural history of Paris from the old regime to the present. Paris versus the French provinces; revolutionary upheavals; challenges of rapid urbanization. Paris as a literary, artistic, and consumer capital; its changing physical landscape. Immigration and the globalization of Paris. [3] (INT)

HIST3190 - Religion, Culture, and Commerce: The World Economy in Historical Perspective

Course Description

Cross-cultural trade in a broad chronological and geographical framework. Pre-modern and modern times, western and non-western locales. The role of religion in economic exchange and the movement of commodities. Offered on a graded basis only. [3] (HCA)

HIST3200 - Poverty and Wealth in Africa

Course Description

Slave trades, colonialism, and historical and contemporary poverty. Food insecurity. "Africa Rising" narratives. Economic growth, impact of Chinese investments; aid and debt. Solving poverty and creating sustainable prosperity. [3] (INT)

HIST3209 - Sex, Marriage, and the Body in Islamic Law

Course Description

Islamic laws related to gender from the seventh century to the present. Qur'an and the Hadith on veiling, marriage, adultery, and men's and women's dress. Differences between Sunni and Shi'ite inheritance codes. Medieval jurists' understanding of reproduction and pregnancy. Modern developments, ranging from the movement for equal voting rights to new technologies such as ultrasounds. Offered on a graded basis only. [3] (P)

HIST3210 - Muslims, Christians, and Jews in Medieval Spain

Course Description

Coexistence and conflict from 711 to 1492. The blend of cultures, languages, religions, and societies under both Christian and Islamic rule. Offered on a graded basis only. Not open to students who have earned credit for JS 1111 Section 01 without permission. Total credit for this course and JS 1111 Section 01 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (INT)

HIST3215 - The Other 1492: Muslims and Jews in Iberia and Beyond

Course Description

History of Muslims and Jews in Iberia and diaspora from the Medieval through modern eras. Muslim Spain (Al-Andalus) and Christian Spain; forced conversions, the Inquisition, expulsion, resettlement, and real and imagined return. [3] (INT)

HIST3220W - Images of India

Course Description

Images in and of South Asia as studied through maps, religious imagery, print culture, cinema, and architecture. The politics of visual stereotypes of India. The visual history of Orientalism, modernity, gender, and religion in South Asia. [3] (INT)

HIST3230 - The Art of Empire

Course Description

Visual media in the establishment of modern empires, with emphasis on Western Europe. Image-making and power; art in cultural exchange and the definition of race, ethnicity, and gender. [3] (HCA)

HIST3240W - Culture of the Sixties in Europe and the U.S.

Course Description

Youth, rock 'n roll, sexual attitudes, black power, counterculture, and conservative reaction. Cultural revolution or myth. [3] (INT)

HIST3260 - Revolutionary England, 1603-1710**Course Description**

Causes, nature, and consequences of the English Revolution and the Glorious Revolution. Religious struggle, the fiscal-military state; political thought; parliament and party politics. The Stuart dynasty; the English Republic; court culture and civil war. Serves as repeat credit for HIST 2383. [3] (HCA)

HIST3270 - Religion and the Occult in Early Modern Europe**Course Description**

Popular and learned ideas about religion and the supernatural within the context of the religious reforms of the sixteenth century. Alchemical and astrological practices to ghosts, werewolves, fairies, and other supernatural beings. The witch craze phenomenon of 1560-1650. Offered on a graded basis only. [3] (HCA)

HIST3275 - Religion and Popular Culture in Nineteenth-Century Europe**Course Description**

Popular religious beliefs and practices in their social, cultural, political, and gender contexts. Concentration on Britain, France, and Germany. Offered on a graded basis only. [3] (SBS)

HIST3280 - Popular Cultures in Modern Latin America**Course Description**

1800 to the present. Music, theater, literature, art, dance, and religion. Cultural performance among popular groups and their attempts to construct, control, and commercialize expression. [3] (INT)

HIST3285 - Citizenship, Literature, and Slavery**Course Description**

Literature, law, citizenship, and slavery; 19th century; comparative and transnational; literary and historiographical methods. [3] (INT)

HIST3290 - Nazism, Genocide, and the Law**Course Description**

Legal responses to genocide in the aftermath of Nazism. Prosecution of Holocaust perpetrators and war criminals from Nuremberg Trials to today. Restitution and compensation. Later prosecution for crimes against humanity and its relation to post-WWII precedents. Transitional justice and witnessing. [3] (INT)

HIST3296 - Owning Things and People: History of Property Law in Comparative Perspective**Course Description**

History of property and property law in a global context from early modern to modern eras. Definitions of property, ownership, and regulation; concepts of public and private property; legal concepts of ownership; relationship between property, power, and rights. Prerequisite: 3000W. [3]

HIST3297 - A History of Inheritance in Global Context**Course Description**

Examines the diverse theories and practices from antiquity to modernity; relationships between social structure and property; and the inherited structures of caste, illegitimacy, inequality, and status. Also explores intersections of inheritance and citizenship, nationality, race, and gender. [3]

HIST3310W - Bible in the Greek World

Course Description

Politics, language and culture in the Ancient Near East before and after Alexander. The Diaspora, Philo, and ancient libraries. The Septuagint's creation and translation in the Hellenistic world. Relation to the Bible and Christianity. Offered on a graded basis only. Not open to students who have earned credit for JS 2640 or JS 2640W. [3] (HCA)

HIST3333 - Pandemics and Society in Historical Perspective

Course Description

Religious, racial, political, economic and human (psychological) consequences of global pandemics in the pre-modern world, from Antiquity to the Black Death (1348). Assess ways contagion transforms societies and its relation to concurrent issues of violence and social justice. [3] (HCA)

HIST3700 - The Ethics of History

Course Description

Exploration of the ethics of history-writing and the uses of the past, historical scholars' responsibilities to those they study, to the general public, and to other historians, especially. Why write history? What obligations do historians have to make their scholarship "relevant" to present debates, like reparations, for example? Offered on a graded basis only. [3] (P)

HIST3746 - Workshop in English and History

Course Description

(Also listed as English 3746) Team-taught by a historian and an interdisciplinary scholar. Explores intersection of disciplines through close examination of texts in historical context. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Preference to students majoring in the English-History program. [3] (No AXLE credit)

HIST3850 - Independent Study

Course Description

A program of reading in one field of history to be selected in consultation with an adviser. Normally limited to qualified majors in history. Approval of faculty adviser and director of undergraduate studies required. May be repeated for credit once if there is no duplication in topic and not twice from the same instructor, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits for all semesters of HIST 3850] (No AXLE credit)

HIST3865 - Archival Research

Course Description

Introduction to utilizing physical and digital archives for historical research. Trends and debates surrounding archives; skills in identifying and analyzing documents. Culminates in research and writing project based on archival sources. For undergraduate students seeking an immersive archival research experience and for MA students working toward thesis. Offered on a graded basis only. [3]

HIST3880 - Internship Training

Course Description

Under faculty supervision, students from any discipline can gain experience in a broad range of public and private agencies, institutions, and programs. In some cases, such as historical societies or museums, history is a central part of the organization's missions; in other cases, the student will play a role in managing the institution's records or writing its history. Two options are available. (1) full-time: 12-15 hours total, including 6-9 hours in 3880, 3 hours in 3881, and 3 hours in 3882. (2) Part-time: 6-9 hours total, including 3-6 hours in 3880 and 3 hours in either 3881 or 3882. To be accepted for either option, students must have a 2.90 grade point average and 6 hours of prior work in history; they must submit a specific plan for the internship to the director of undergraduate studies. After completing the internship, all students must write a thorough report. Must be taken Pass/Fail and concurrently with 3881 and/or 3882. These hours may not be included in the minimum hours required for the history major. Corequisite: 3881 and/or 3882. [3-9] (No AXLE credit)

HIST3882 - Internship Readings

Course Description

Under faculty supervision, students from any discipline can gain experience in a broad range of public and private agencies, institutions, and programs. In some cases, such as historical societies or museums, history is a central part of the organization's missions; in other cases, the student will play a role in managing the institution's records or writing its history. Two options are available. (1) full-time: 12-15 hours total, including 6-9 hours in 3880, 3 hours in 3881, and 3 hours in 3882. (2) Part-time: 6-9 hours total, including 3-6 hours in 3880 and 3 hours in either 3881 or 3882. To be accepted for either option, students must have a 2.90 grade point average and 6 hours of prior work in history; they must submit a specific plan for the internship to the director of undergraduate studies. After completing the internship, all students must write a thorough report. Readings and a substantial interpretive essay on topics related to the internship training, under the supervision of a member of the Vanderbilt Department of History. Corequisite: 3880. [3] (No AXLE credit)

HIST3883 - Internship Research

Course Description

Under faculty supervision, students from any discipline can gain experience in a broad range of public and private agencies, institutions, and programs. In some cases, such as historical societies or museums, history is a central part of the organization's missions; in other cases, the student will play a role in managing the institution's records or writing its history. Two options are available. (1) full-time: 12-15 hours total, including 6-9 hours in 3880, 3 hours in 3882, and 3 hours in 3883. (2) Part-time: 6-9 hours total, including 3-6 hours in 3880 and 3 hours in either 3882 or 3883. To be accepted for either option, students must have a 2.90 grade point average and 6 hours of prior work in history; they must submit a specific plan for the internship to the director of undergraduate studies. After completing the internship, all students must write a thorough report. Students will write a substantial research paper under the supervision of a member of the Vanderbilt Department of History. Corequisite: 3880. [3] (No AXLE credit)

HIST3890 - Selected Topics in History

Course Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

HIST3980W - Junior Honors Seminar in History

Course Description

The first semester of a three-semester sequence of honors study leading to the writing of an honors thesis in history. Introduction to historical thinking, research, and writing. Readings from the major fields of historical scholarship, representing the United States, Europe, Latin America, and Asia. Open to juniors beginning honors work in history, or to qualified history majors with the approval of the director of undergraduate studies. [3] (SBS)

HIST4444 - Project on Unity and American Democracy**Course Description**

Special topics. Axle category may vary by department and topic. [3]

HIST4960 - Majors Seminar**Course Description**

Advanced reading, research, and writing. Topics vary. Offered on a graded basis only. Limited to juniors and seniors and intended primarily for history majors. Prerequisite: 3000W or 3980W. May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3; maximum of 6 credits total for all semesters of HIST 4960] (No AXLE credit)

HIST4980 - Senior Honors Research Seminar**Course Description**

Presentation and discussion of drafts and chapters of honors theses in progress. Offered on a graded basis only. Open only to senior departmental honors students. [3] (No AXLE credit)

HIST4981 - Senior Honors Research Seminar**Course Description**

Continuation of 4980. Offered on a graded basis only. Open only to seniors in the departmental honors program. Prerequisite: 4980. Corequisite: 4999. [3] (No AXLE credit)

HIST4999 - Senior Honors Thesis**Course Description**

Writing an honors thesis under the supervision of a thesis adviser and the Director of Honors. Open only to seniors in the departmental honors program. Offered on a graded basis only. Prerequisite: 4980. Corequisite 4981. [3] (No AXLE credit)

History Of Art

HART1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

HART1100 - History of Western Art: Ancient to Medieval**Course Description**

Visual and material culture of Europe and the Ancient Near East from the Paleolithic through the late Medieval period. Egypt, Greece, and Rome; early Christianity and Islam. Form, content, and meaning of works of art and architecture in their cultural context. [3] (HCA) (CORE C) (LE HFA)

HART1105 - History of Western Art: Renaiss to Modern**Course Description**

Major artistic movements from the Renaissance to the Modern era and the developments in painting, sculpture, and architecture. Works of specific artists and cultural factors that affect the visual arts from production to reception. [3] (HCA) (CORE C) (LE HFA)

HART1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

HART1120 - History of Western Architecture**Course Description**

Architecture in Europe, Western Asia, and North America from the early first millennium BCE to the present. Form and function; historical, social, and spatial contexts; architects and patrons. Not open to students who have earned credit for HART 1121 without permission. Total credit for this course and HART 1121 will not exceed 5 hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (HCA)

HART1121 - History of Western Architecture I**Course Description**

From prehistoric Europe and Western Asia to Renaissance Italy and the Ottoman Golden Age. Form and function; historical, social, spatial contexts; architects and patrons. Not open to students who have earned credit for HART 1120 without permission. Total credit for this course and HART 1120 will not exceed 5 hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (HCA) (CORE C) (LE HFA)

HART1122 - History of Western Architecture II**Course Description**

From 1700 to the present; Piranesi, Wren, Viollet-le-Duc, Wright, and Venturi. Buildings, urban schemes, and landscapes in relation to aesthetic, cultural, social, and political contexts. Later reappraisals by historians and designers; relevance to contemporary practice and discourse. Not open to students who have earned credit for HART 1120 without permission. Total credit for this course and HART 1120 will not exceed 5 hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (INT) (CORE A, C) (LE HFA)

HART1200 - Arts of East Asia**Course Description**

A survey of sculpture, painting, and architecture in China, Japan, and Korea. Historical, religious, philosophical, and cultural background. [3] (INT) (CORE A, C) (LE HFA)

HART1205 - Arts of South and Southeast Asia**Course Description**

Second millennium BCE to present. Formation of political and social identities as reflected in artistic productions. Development of artistic traditions in response to cultural exchange and political dynamics. [3] (INT)

HART1210W - Art and Ritual in Asia**Course Description**

From prehistory to the present. Social and religious functions of the arts of China, India, Japan, Korea, and Himalayas. Select examples explored in museum visits, lectures, discussions, and varied writing projects. [3] (INT) (CORE A, C) (LE HFA)

HART1220 - History of Asian Architecture

Course Description

Cultural traditions of Asia from the first millennium BCE to the nineteenth century through the study of architecture. Cities, temples, and domestic structures of China, Japan, Korea, South Asia (India and Pakistan), and Southeast Asia. [3] (INT) (CORE A, C) (LE HFA)

HART1285W - Introduction to Medieval Art

Course Description

From the third to fifteenth century; Late Antique period to Late Gothic period. Architecture, sculpture, painting, and the minor arts of Western Europe in historical context, including Byzantine and Islamic art. Not open to students who have earned credit for HART 2285 without permission. Total credit for this course and HART 2285 will not exceed 3 hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (INT) (CORE A, C) (LE HFA)

HART1300 - Monuments and Masterpieces

Course Description

The social and cultural history of the world in fourteen great works, including the Athenian Parthenon, the Pantheon in Rome, the Konjikido in Japan, Michelangelo's Sistine Chapel, and the U.S. Capitol. Sculpture, painting, architecture, and the decorative arts. [3] (INT) (CORE C, E) (LE HFA)

HART1330W - Heaven on Earth: Sacred Sites in World History

Course Description

From prehistory to the 19th century. Great works of world religious architecture in their social and cultural context. Monuments, temples, tombs, shrines, and other sacred sites. Cross-cultural and trans-historical comparative perspective. How formal attributes of space and architecture shape religious experience and meaning. [3] (SBS)

HART1400 - U.S. Icons and Monuments

Course Description

From 1776 to present. How and why images of people, historical events, and symbols are revered. Implications for national identity, historical memory, consumerism, and political ideologies. The U.S. Capitol, Statue of Liberty, Mount Rushmore, Marilyn Monroe, and Michael Jordan. Not open to students who have earned credit for HART 1111 Section 13 without permission. Total credit for this course and HART 1111 Section 13 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (US) (CORE C, E) (LE HFA)

HART1500W - Impressionism

Course Description

Painting style developed by Monet, Renoir, Pissarro, Cassatt, Morisot, and others, with emphasis on changing atmospheric effects. Work of the French Impressionists from formal, social, political, and intellectual perspectives. Impact of French Impressionism across Europe and North America. [3] (HCA)

HART1600 - Global Modern Art

Course Description

Transnational art ca. 1700-1960. Cultural cross-pollination between Europe and Americas, Asia, and Africa as well as global modernisms. Art of New Spain, Orientalism, Realisms, Global Surrealism, and Geometric Abstraction in South America. [3] (INT) (CORE C, E) (LE HFA)

HART1740W - Introduction to Design Studies**Course Description**

Strategies for understanding the reciprocal relationship between design and human experience. Historical and contemporary examples in fields including fashion, climate change, violence, activism, and public health. Social control, nationalism, history and memory, and othering practices. [3] (HCA) (CORE A, E) (LE HFA)

HART1750W - African American Arts**Course Description**

Blackness and black culture as subject and context for African American visual arts from the 20th and 21st centuries. Emphasis on arts derived from African American cultural perspectives. Not open to students who have earned credit for HART 2750 without permission. Total credit for this course and HART 2750 will not exceed 3 hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (P)

HART2100 - Architecture and the Mapping of Empire in Asia**Course Description**

Use of architecture to express and delimit empire in Asia from the 3rd century BCE through the 20th century CE. Cosmology in the construction of cities, temples, and tombs. Physical manifestations of divine kingship and royal divinities. Appropriation of ancient models to enhance legitimacy. Architecture as an expression of ethnic/state identities. [3] (P) (LE HFA)

HART2102 - Art Markets in Asia Before 1800**Course Description**

Introduction to the circulation of art throughout East, South, West, Central, and Southeast Asia considering factors such as production, exchange, patronage, connoisseurship and collecting. Imperial courts, diplomatic presentations, religious institutions, merchant networks, cross-cultural trade. Economic, social, and artistic assessments of value. [3] (CORE B, C) (LE HFA)

HART2105W - Sacred Geographies of China**Course Description**

Ideas of the sacred as expressed in houses, temples, monasteries, and cities in traditional China; influence of built environment on social and spiritual lives. Charms and building magic; building site selection based on natural landforms and constellations; garden as terrestrial residence for divinity; the imperial city as a sacred center. Serves as repeat credit for students who earned credit for HART 1111-11. [3] (INT) (CORE A, C) (LE HFA)

HART2110 - Arts of China**Course Description**

Artistic production from the Neolithic period through the Qing dynasty in relation to religious and cultural contexts. [3] (HCA) (CORE A, C) (LE HFA)

HART2112W - The Arts of China during the Liao-Song Period**Course Description**

Art and architecture of China during the Liao-Song period from C.E. 907 to C.E. 1279. Political, religious, and aesthetic contexts. Influence of coastal trade and pilgrimage in transformations of painting, sculpture, ceramics, and architecture. [3] (INT) (CORE: A, C) (LE: HFA)

HART2120 - Arts of Korea**Course Description**

History of Korean art and visual culture from ancient times to the present. Intersections of art, literature, religion, and politics, and cultural interactions with China and Japan. [3] (INT)

HART2130 - Arts of Japan**Course Description**

Artistic production from the Neolithic through Meiji periods in relation to religious and cultural contexts. [3] (HCA) (CORE A, C) (LE HFA)

HART2150 - East Asian Architecture and Gardens**Course Description**

East Asian religious, vernacular, and garden architecture from the second century CE to the present. Influence of Buddhism on East Asian architecture, fengshui, and site selection, garden as religious landscape, Asia in modern architecture. [3] (HCA)

HART2151 - Architecture and Gardens in Imperial China**Course Description**

Built environment of imperial China from the 2nd century BCE to the 19th century. City planning, palaces, temples, monasteries, gardens, and vernacular architecture; historical developments and regional variation. [3] (INT) (CORE A, C) (LE HFA)

HART2155W - Healing and Art in China**Course Description**

Early healing practices and their influence on the arts in premodern China. Materiality and technology of individual craft traditions as related to the human body; magical healing texts, talismans, and dharanis; the art of the Buddha of Medicine; transformative herbs and the development of the aesthetic garden; and tea consumption as medicine and art. Not open to students who completed HART 5155. [3] (HCA) (CORE A, C) (LE HFA)

HART2160 - Art and Architecture of Buddhist Asia**Course Description**

Appearance, creation, and function of Buddhist art works from South to East Asia. Iconographic and stylistic analysis of architecture, sculpture, painting, and other arts; relationship between ideology, text, and image; Buddhism and state formation. [3] (INT) (CORE A, C) (LE HFA)

HART2165 - Modern and Contemporary Asian Art**Course Description**

Arts of East, South, and Southeast Asia, 1800 to present, from the emergence of modernity to participation in the "global turn" in contemporary art. Painting, sculpture, architecture; new media including installation, performance, photography, film, and video. Social, political, and historical contexts. [3] (INT)

HART2175 - Modern and Contemporary Indian Architecture**Course Description**

From nineteenth-century British colonial rule to the present. Built environment of Indian subcontinent in local and global contexts. Eighteenth-century Jaipur and urban planning, the British Raj, Calcutta, Allahabad, and Edwin Lutyens' New Delhi. Le Corbusier, Louis Kahn, the Neo-Gothic of Bombay, and contemporary architecture. [3] (INT)

1940 to present. Painting, sculpture, photography, performance and film examined in relationship to political, cultural, historical, and aesthetic contexts on and off the African continent. Tradition, colonialism and post-colonialism, diaspora, nationalism, and gender. Issues regarding collecting, exhibiting, and selling contemporary African art. [3] (INT) (CORE C, E) (LE HFA)

HART2200 - Cities of the Ancient Mediterranean World: Architecture & Built Environments**Course Description**

Comparative studies around the Mediterranean and adjacent regions, 4th millennium BCE to 4th century CE. Origins and evolution; environmental, social, and economic determinants of urban form; city planning and amenities; engineering and architecture. Formal, material, comparative, and theoretical approaches. Serves as repeat credit for CLAS 2220. No credit for students who have earned credit for HART 5200. [3] (SBS)

HART2210 - Art and Architecture of Ancient Egypt**Course Description**

Art, architecture, and culture of Egypt from the fourth millennium through the Old, Middle, and New Kingdoms. Sculpture, wall painting, architecture, and material culture. [3] (HCA)

HART2214 - Art and Architecture of the Ancient Americas**Course Description**

Visual arts and built environments of indigenous South America, North America, and the Caribbean prior to European contact. Sacred, cultural, and historical influences on architecture and iconography. [3] (INT)

HART2220 - Greek Art and Architecture**Course Description**

The Bronze Age, including the Minoans and Myceneans, through the Hellenistic period. The social and cultural contexts of material and visual culture. Vase-painting, sculpture, architecture, and more utilitarian artifacts. [3] (HCA) (CORE C) (LE HFA)

HART2225 - Archaic and Classical Greek Art and Architecture, 1000 to 400 B.C.E.**Course Description**

Sculpture, vase painting, architecture, and the minor arts. Formal and stylistic developments in relation to changing cultural background. [3] (HCA)

HART2230 - Late Classical Greek and Hellenistic Art and Architecture**Course Description**

Sculpture, vase painting, architecture, and the minor arts from after the Parthenon to the Roman Empire. Media that developed significantly in this period, such as wall painting and mosaic. [3] (HCA)

HART2250 - Roman Art and Architecture

Course Description

Sculpture, architecture, and painting from the tenth century B.C.E. to the early fourth century C.E. Daily life of the Romans as seen in excavations of the towns of Pompeii and Herculaneum. [3] (HCA) (CORE C) (LE HFA)

HART2254W - Pompeii: Life and Death of a Roman City

Course Description

Ancient Pompeii as case study of the ancient Roman city. Urban form, architecture and infrastructure; domestic design and decoration, furnishings and personal effects, organic remains and conservation. Interdisciplinary approaches – archaeological evidence, written records, other sources – explore identity, aesthetics, religion, economics, politics, gender, and class. Offered on a graded basis only. [3] (HCA) (CORE A, C)(LE HFA)

HART2260 - The Art of Pagans, Christians, and Jews

Course Description

Religious art of the Roman Empire in late antiquity. Visual art reflecting religious beliefs and practices. Greco-Roman cults, early Christianity, and Rabbinical Judaism. Serves as repeat credit for CLAS 2260. [3] (HCA) (CORE A, C) (LE HFA)

HART2270 - Early Christian and Byzantine Art

Course Description

The development of architecture, sculpture, painting, and the minor arts from the third through eleventh centuries. Serves as repeat credit for CLAS 2270. [3] (HCA) (CORE A, C) (LE HFA)

HART2275 - The Cross and the Crescent: Byzantine-Islamic Confluences in Art

Course Description

Developments at the interface of Byzantium and early Muslim empires, ca. 500-1000 C.E. Cross-cultural processes shaping visual sensibilities. Doctrinal issues and aniconism mirrored in architecture, ornament, mosaics, illuminated manuscripts, coinage. Exemplary sites: San Vitale in Ravenna, Hagia Sophia in Istanbul, Dome of the Rock in Jerusalem, and the Umayyad mosque in Damascus. [3] (INT)

HART2285 - Medieval Art

Course Description

The development of architecture, sculpture, painting, and the minor arts in Europe from the eleventh through the fifteenth centuries. Not open to students who have earned credit for HART 1285W without permission. Total credit for this course and HART 1285W will not exceed 3 hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. No credit for students who have earned credit for HART 5285. [3] (HCA) (CORE C) (LE HFA)

HART2288W - Art of the Book

Course Description

Material and visual composition of medieval manuscripts; working with medieval and contemporary artists' books in Vanderbilt's Special Collections. Audience, changing popularity of texts and illustrations, and concerns of patrons and artists. Exemplary works include the "Book of Kells," "Luttrell Psalter," and "Tres Riches Heures." Offered on a graded basis only. [3] (HCA)

HART2290 - Gothic Paris**Course Description**

From the twelfth to the fifteenth century. Architecture, sculpture, painting, and the luxury arts. No credit for students who have earned credit for HART 5290 or DIV 5422. [3] (INT) (CORE C) (LE HFA)

HART2302 - Art and the Market in Europe, 1400-1700**Course Description**

Intersection of artistic production and economics in early modern Europe from Renaissance through Baroque eras. Focus on Italy and the Netherlands: Florence, Bruges, Antwerp, Amsterdam. Cultural and societal contexts; valuation, supply and demand, patronage, collection practices, role of masters' workshops. Artists such as Botticelli, Leonardo, Rubens, Rembrandt, Vermeer. [3] (INT) (CORE A, C) (LE: HFA)

HART2310 - Italian Art to 1500**Course Description**

Early development of art and architecture primarily in central Italy from the late thirteenth through the fifteenth centuries. The works of Giotto, Duccio, Donatello, Masaccio, and Botticelli. The age of the Medici in Florence. Not open to students who have earned credit for HART 3320 or 3320W without permission. Total credit for this course and HART 3320 or 3320W will not exceed 4 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (HCA)

HART2320W - The Italian Renaissance Workshop**Course Description**

Development of artists' shops, 14th into 16th century. Organization and production. Painting and sculpture techniques. Role of artists in society. Fra'Angelico, Andrea del Verrocchio and the young Leonardo da Vinci, and Sandro Botticelli. Firsthand study of works in the Kress Collection at Vanderbilt. Offered on a graded basis only. Not open to students who have earned credit for HART 3320W without permission. Total credit for this course and 3320W will not exceed 3 hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (HCA) (CORE A, D) (LE HFA)

HART2323 - Early Renaissance Florence**Course Description**

Painting and sculpture in fifteenth-century Florence. Ghiberti, Donatello, Masaccio, Fra Angelico, and Botticelli. Verrocchio and the young Leonardo. Stylistic progression; iconographic interpretation and meaning; the role of patronage and audience; and original physical and cultural context. The Italian Renaissance workshop. [3] (HCA) (CORE A, C) (LE HFA)

HART2325 - Great Masters of the Italian Renaissance**Course Description**

From the late Gothic to the High Renaissance. Landmarks in painting, sculpture, and architecture in central Italy. Trecento Sienese masters; Giotto, Donatello, Botticelli, and Leonardo in Florence; and Michelangelo and Raffaello in Rome. Tempera and fresco technique; civic, ecclesiastic, and domestic buildings; and stylistic progression. [3] (INT) (CORE A, C) (LE HFA)

HART2330 - Italian Renaissance Art after 1500**Course Description**

High Renaissance and Mannerist art in sixteenth-century Italy, considering Florentine masters such as Leonardo, Michelangelo, and Pontormo, the Roman school of Raphael, and the Venetians from Giorgione and Titian to Tintoretto. [3] (HCA) (CORE A, C) (LE HFA)

HART2340W - The Art of Venice**Course Description**

Renaissance art in Venice and the Veneto during the 15th and 16th centuries. The Golden Age. Painters Bellini, Mantegna, Giorgione, Titian, Tintoretto; architecture of Palladio. Stylistic progression and the development of oil painting. The altarpiece, religious and mythological narrative, and role of portraiture. Context and meaning, civic, state, and ecclesiastical patronage, and consideration of audience. Offered on a graded basis only. [3] (HCA)

HART2342W - Venice: Between Land and Sea, Late Antiquity to Present**Course Description**

Venetian history and visual and material culture from environmental and geographical perspectives. Late antiquity to present with emphasis on the early modern period. Art and architectural history, urbanism, cultural geography, environmental history. Engineering and water management; trade and colonialism; tourism and climate change. Offered on a graded basis only. [3] (SBS)

HART2360 - Northern Renaissance Art**Course Description**

Painting, sculpture, and graphic arts in the Low Countries, France, and Germany from the end of the fourteenth century through the Reformation. Historical, social, religious, and stylistic factors. Not open to students who have earned credit for HART 2362 or 3366 without permission. Total credit for this course and HART 2362 will not exceed 4 credit hours. Total credit for this course and HART 3366 will not exceed 5 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (HCA)

HART2362 - Fifteenth-Century Northern European Art**Course Description**

Painting, sculpture, prints, and court art in the Low Countries, France, and Germany. Historical, social, economic, religious, and technical analysis. Jan van Eyck, Rogier van der Weyden, and Hieronymus Bosch. Not open to students who have earned credit for HART 2360 without permission. Total credit for this course and 2360 will not exceed 4 hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (HCA) (LE HFA) (CORE A, C)

HART2390 - Seventeenth-Century Art**Course Description**

European painting, sculpture, architecture, and graphic arts. Caravaggio, Bernini, Velazquez, Rubens, and Rembrandt. [3] (HCA) (CORE A, C) (LE HFA)

HART2600 - Eighteenth-Century Art**Course Description**

The history of European painting, sculpture, and printmaking from the Late Baroque era to the rise of Neoclassicism (1675-1775). Geographical focus on Italy and France. Artists include Maratti, Rusconi, Carriera, Tiepolo, Watteau, Chardin, Fragonard, and others. [3] (HCA)

HART2620 - Nineteenth-Century European Art**Course Description**

French Revolution to the early twentieth century. International context for artistic movements. The rise of abstraction and the relationship between art, politics, and social change. [3] (INT)

HART2622 - Neoclassicism and Romanticism

Course Description

A survey of major artists and monuments of visual culture considered in their political, social, economic, spiritual, and aesthetic contexts from 1760 to 1840. [3] (HCA)

HART2625 - French Art in the Age of Impressionism

Course Description

The Social Realism of Daumier and Courbet; Manet and Aesthetic Realism; Monet, Renoir, Pissarro, Degas, Morisot, and Impressionism; and the rise of Neo- and Post-Impressionism with Seurat and van Gogh. [3] (INT)

HART2650 - Nineteenth-Century Architecture: Theory and Practice

Course Description

European and North American architecture from the French Revolution to the First World War. The relationships among architecture and technology, political regimes, social formations, and conceptions of history. Neoclassicism, Gothic Revival, Second Empire, the Arts-and-Crafts Movement, and Commercial Architecture. [3] (HCA)

HART2660 - American Art to 1865

Course Description

Painting and sculpture of the United States from Colonial times to 1865 with an emphasis on iconography, social history, race, and gender. [3] (US)

HART2662 - Art and the Environment in the United States

Course Description

Environmental concerns as conveyed through the visual arts, 1800 to present. Nature and the formation of national identity and empire; landscape painting, materials and ecology; land art and environment as medium; photography and the visualization of disaster. [3] (US) (CORE C, E) (LE HFA)

HART2665 - The Vanderbilts as Patrons: Taste-Makers of Gilded-Age Art and Architecture

Course Description

The Vanderbilts' roles as patrons and taste-makers in translation of European architectural and artistic styles to the United States. Famed Vanderbilt estates such as Biltmore in Asheville, NC and the Breakers in Newport, RI. [3] (HCA)

HART2680 - British Art: Tudor to Victorian

Course Description

Art and visual culture in the British Isles from the reign of Henry VIII in the sixteenth century to Queen Victoria and the rise of the pre-Raphaelites in the nineteenth century. Portraiture and landscape painting, relationship between art and empire, rise of the Royal Academy, and patterns of patronage. Holbein, Hogarth, Gainsborough, Reynolds, Lawrence, and Turner. [3] (HCA)

HART2708 - Twentieth-Century British Art

Course Description

Painting, sculpture, installation, film and video, and performance in the context of national culture and political history. [3] (HCA)

HART2710 - European Modernism, 1865-1945**Course Description**

Focus on painting with some consideration of collage, readymade, prints, and photography. Social-historical approach to the study of style including Post-Impressionism, Symbolism, Art Nouveau, Cubism, Futurism, Dada, Surrealism. Henri Matisse, Pablo Picasso, Marcel Duchamp, Piet Mondrian, Hannah Höch, Salvador Dalí. [3] (HCA) (CORE: C) (LE HFA)

HART2720 - Modern Architecture**Course Description**

A survey of nineteenth-century styles from Federal to Victorian, and major twentieth-century architects and designers from Wright and the Bauhaus to Eames and Kahn. City planning and preservation. [3] (HCA) (CORE C, E) (LE HFA)

HART2722 - Modern Art and Architecture in Paris**Course Description**

Immersive study of major monuments and museums in central Paris, art capital of the Western world during the 19th-20th centuries. Paintings of Monet, Braque, and Magritte; architecture of Guimard and Nouvel. Visits to Musée d'Orsay, Centre Pompidou, Parc de la Villette, Musée Rodin, Villa Savoye. Offered on a graded basis only. [3] (HCA)

HART2735 - History of Photography**Course Description**

Uses and meanings of photography from its invention (c. 1839) to the present. Ways of thinking about the medium and its status as a separate discipline in relation to the history of art. [3] (HCA)

HART2737 - History of Performance Art**Course Description**

History and theory of performance art in the twentieth century. Interdisciplinary approach covering dance, theater, film/video, and cabaret with focus on performance activities of artists trained in visual arts. Futurism, Dada, Ballet Russes, Bauhaus, Modern Dance, Drag, and Feminist Body Art. [3] (P) (CORE A, C) (LE HFA)

HART2740 - Modern Design**Course Description**

From 1850 to present. How thinkers shaped practice. Relationships among modernity, modernism, and design. Historical debates over utopia, gender, social reform, inequality, and aura. Role in world's fairs, empire, fashion, international politics, domesticity. Close study of design exhibitions. [3] (HCA) (CORE B, E) (LE HFA)

HART2750 - African American Art**Course Description**

Colonial Era to the present. Artwork and artists in their political, cultural, social, historical, and aesthetic contexts. Relationship between race and representation. Not open to students who have earned credit for HART 1750W without permission. Total credit for this course and HART 1750W will not exceed 3 hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (P) (CORE C, E) (LE HFA)

HART2755 - Women in Art since 1850**Course Description**

Painting, sculpture, photography, and performance by European and American women artists. Intersections of gender, race, and sexuality in visual production. Feminist methods in art history. [3] (P) (CORE A, C) (LE HFA)

HART2760 - Early American Modernism, 1865-1945

Course Description

Painting and sculpture of the United States between the Civil War and the Second World War with emphasis on iconography, social history, class, and gender. [3] (US) (CORE C, E) (LE HFA)

HART2765 - Art Since 1945

Course Description

Painting, sculpture, assemblage, collage, performance, and conceptual art produced primarily in the United States from end of WWII to present with emphasis on theory and social, political context. Abstract Expressionism, the New York School, Minimalism, Video Art, Postmodernism. Robert Rauschenberg, Andy Warhol, Yoko Ono, Robert Morris, Cindy Sherman. [3] (US) (LE HFA)

HART2772 - Contemporary Art and Biennial Exhibitions

Course Description

From 1850 to present. Origins of world fairs, the Crystal Palace, Venice Biennale, and modern exhibitions. Core themes: Globalization of art, decolonized thinking and art making, the relation between locality and globality, and the commercialization of contemporary art. Offered on a graded basis only. [3] (P)

HART2775 - History of Prints

Course Description

Woodcut, engraving, etching, and lithography from the fifteenth to the twentieth century. Scientific, devotional, ornamental, and documentary functions. Dürer, Piranesi, Hogarth, Daumier, and Kollwitz. Advances in technique and marketing, relationship to fine art, and place in popular culture. [3] (HCA)

HART2777W - Color and Culture

Course Description

Pigments, palettes, symbolism, perception, from antiquity to the present. Color as interpreted by artists, art historians, and critics, in the practice of art, in contemporary culture and commerce, and in the training of artists. Offered on a graded basis only. [3] (P)

HART2779 - Histories of Global Urbanism

Course Description

Cultural interactions between peoples and built environment. Worldwide roots of urban form and life from first glimmers of modernity to recent history's standardized and networked commercial, post-colonial, and post-industrial city. Aesthetic appreciation of and engagement with urban planning, architecture, storytelling, intimacy, and informality. [3] (INT) (B,C) (LE HFA)

HART2780 - History of Western Urbanism

Course Description

Urban form and planning from antiquity to the present. The integration of architecture and landscape. Diachronic surveys. Case studies, including Nashville. [3] (P)

HART2781 - Los Angeles Architecture and Urbanism

Course Description

Urban planning, everyday people, and analysis of multicultural life of a contemporary city and its suburbs, 1920s to present. Popular culture, high technology, and histories of art, music, and architecture under late capitalism. Not open to students who earned credit for HART 1111 section 21 offered Spring 2024. [3] (SBS)

HART2782 - Storied Places: History of Landscape Design**Course Description**

Landscape architecture as art form in Europe, Western Asia, and North America, from antiquity to the present. Stewardship and manipulation of land and water. Design of gardens and green spaces. Social and political meanings and messages. [3] (HCA)

HART2783 - New York City: Architecture and Urbanism**Course Description**

History of the built environment of New York City from seventeenth century to the present; emphasis on 20th century. Analyzes architecture, urban planning, technologies of construction and transportation, the development of neighborhoods, urban parks with attention to class and race, immigration, economics, and local manifestations of global forces. [3] (US) (CORE A, C) (LE: HFA)

HART2805 - Introduction to Museum Studies**Course Description**

Fundamentals of museum history; diversity, theory, current practices, and ethics related to collecting and collection management, interpretation, and display. Global perspective with emphasis on Euro-American museums. Museums of Art, Anthropology, History, and Science. Includes site visits to local museums. [3] (P) (CORE B, E) (LE HFA)

HART2808W - Contemporary Issues in Museums and Markets**Course Description**

Current practices and controversies. Museum ethics, collection care, finances and administration. Markets, provenance, heritage, and tourism. Local emphasis, but through a lens of historical and contemporary global events and case studies. Interdisciplinary approach. Includes site visits to local museums and guest speakers. Repeatable once for credit with no duplication in content. Offered on a graded basis only. [3] (P) (CORE A, E) (LE: HFA)

HART2810W - Museum Exhibition**Course Description**

Culture of museums and exhibition. Object handling, storage, and display. Ethics of exhibition including of objects from various cultures. Contextual presentation of art. May be repeated for credit if there is no duplication in topic. Offered on a graded basis only. [3] (P) (CORE A, C) (LE HFA)

HART2812 - Museum Practice**Course Description**

Focused, immersive, case- and project-based introduction to specific aspects of museum practice for the purposes of skill development. Precedents, innovations, and current applications. Rotating topics to include education and outreach, technology, collection management. Repeatable once for credit with no duplication in content. Offered on a graded basis only. [3] (P)

HART2815 - Digital Heritage: Methods and Practice**Course Description**

Case-based introduction to digital applications in history of art and archaeology. Theory, research design, current methods of photogrammetry, 2D and 3D modeling, and immersive environments. Mapping and spatial analysis. Data management and digital publishing. May be repeated for credit with permission of the faculty. [3] (HCA)

HART2815W - Digital Heritage: Methods and Practice**Course Description**

Case-based introduction to digital applications in history of art and archaeology. Theory, research design, current methods of photogrammetry, 2D and 3D modeling, and immersive environments. Mapping and spatial analysis. Data management, digital publishing, writing formats. May be repeated for credit with permission of the faculty. [3] (HCA) (CORE A, D) (LE HFA)

HART2820 - Architectural Heritage: Research and Documentation**Course Description**

Case-based. Immersive and collaborative analysis of buildings of architectural and historical importance. On-site survey, exploration, and archival investigation; consideration of design, function, renovation, and historic preservation. Offered on a graded basis only. May be repeated for credit with no duplication in content. [3] (US)

HART3140 - Healing and Art in East Asia**Course Description**

Influence of early healing practices on the development of the arts of East Asia. Magical healing texts, talismans, and tattoos; diagramming the body and the landscape; and the art of the Buddha of Medicine. Gardens and growing transformative herbs. Tea as medicine and art. Serves as repeat credit for HONS 1820W Section 28. [3] (HCA)

HART3164W - Art of Buddhist Relic and Reliquary**Course Description**

From second century BCE to present. Relic veneration and construction of reliquaries from a visual perspective. Beautification, ritualization, use and abuse, and bodily issues spanning India, China, Korea, Japan, and Southeast Asia. [3] (INT)

HART3172 - Himalayan Art: Art of the Divine Abode**Course Description**

Art of Nepal and Tibet from its inception to the present. Religious and cultural contexts. Initial western responses; Hindu and Buddhist art and architecture in Nepal; Tibetan Buddhist Art; artistic productions in the Tibetan diaspora; and souvenir art in Nepal. [3] (INT)

HART3173W - Art and Empire in India**Course Description**

Art of India between the Mughal and British empires. Rise of colonialism and nationalism; cross-cultural encounters; and emergence of new institutions and technology. Offered on a graded basis only. [3] (P)

HART3174 - The South Asian Temple**Course Description**

From its inception to the present. Morphological and stylistic analysis. Anthropological and ethnographical approach to temples as living communal entities. [3] (INT)

HART3224 - Greek Sculpture**Course Description**

Style, materials, and techniques ca. 900-31 B.C. Sculptors' craft and their reasons for the creation of both free-standing and architectural sculpture. [3] (HCA)

HART3226 - Greek Vases and Society**Course Description**

Ancient Greek vases as social documents. Interdisciplinary approaches, including historiographic, stylistic, semiotic, contextual, and scientific. Production, trade, and the functions of vases in funerary and ritual contexts, particularly the symposium. The development of black- and red-figure vase painting and iconography. [3] (HCA)

HART3228W - Gender and Sexuality in Greek Art**Course Description**

Iconography of vase-painting and sculpture, from the Archaic through the Hellenistic periods. Visual constructions of bodies, poses, gestures, and dress, reflecting cultural attitudes towards courtship, marriage, rape, prostitution, and homosexuality. Emphasis on methodological approaches and comparisons with modern societies. Offered on a graded basis only. [3] (HCA)

HART3233 - Climate and Society: Drowning Cities**Course Description**

Climate change, sea-level fluctuations, and floods from antiquity to the present. Science of climate, coasts, and rivers. Interdisciplinary analysis of urban form and history. Physical, social, technological, and aesthetic influences. Past, present, and future cities in Near East, Europe, Asia, and North America, including Nashville, New Orleans, and New York. Not open to students who completed 3333 or EES 3333 offered fall 2020. [3] (P)

HART3240W - Ancient Landscapes**Course Description**

Greco-Roman attitudes toward nature. Exploitation and stewardship of resources. Country-house and garden design. Representations of mythological and sacred landscapes in painting and poetry. [3] (HCA)

HART3256W - Roman Architecture and Power**Course Description**

Prestige building projects and architectural expressions of social, political, religious, and technological power in Rome and across its Empire. Public and private architecture; state institutions, infrastructure, and city dwellers; Romanization and resistance. Late antique transformations, modern legacies. [3] (HCA)

HART3272 - Portraits in Late Antiquity**Course Description**

Social, political, and religious functions of portraits from the first century through the sixth century CE. Issues of representation, including the construction of identity, social status, mediation of presence through image, and what constitutes a likeness. Portraits as memorials, as objects of veneration, and idealized models. Influences on later portraiture. [3] (HCA)

HART3274 - Art and Empire from Constantine to Justinian**Course Description**

An interdisciplinary study of Roman social, political, religious, and art historical developments in the fourth through sixth centuries CE. [3] (HCA)

HART3332 - Raphael and the Renaissance

Course Description

Art in Central Italy, ca. 1400-1520, with a focus on Raffaello Sanzio. His origin and artistic formation in Urbino and Perugia, early commissions in Florence, mature works and legacy in Rome. Predecessors Masaccio, Donatello, Piero della Francesca, and Pietro Perugino. Contemporaries Leonardo and Michelangelo. Taught on location in Italy. [3] (INT)

HART3334 - Michelangelo's Life and Works

Course Description

Sculpture, painting, architecture, and graphic works. Poetry and letters. Cultural, historical, religious, and political climate of his day. Influence upon artists. Critical reception. Repeat credit for students who have completed 3334W. [3] (HCA)

HART3334W - Michelangelo's Life and Works

Course Description

Sculpture, painting, architecture, and graphic works. Poetry and letters. Cultural, historical, religious, and political climate of his day. Influence upon artists. Critical reception. Repeat credit for students who have completed 3334. [3] (HCA)

HART3364W - The Court of Burgundy

Course Description

The visual arts of the Dukes of Burgundy (1363-1477) in cultural context. Portraiture, chivalry, costume, storytelling, and ceremony. Artists include Claus Sluter, Jan van Eyck, and Rogier van der Weyden. [3] (HCA)

HART3605W - French Art in the Age of Louis XV: From Rococo to Neoclassicism

Course Description

Court art and visual culture 1715 to 1775. Aesthetic development in painting, sculpture, interior design, and architecture. Watteau, Boucher, Fragonard, Falconet, Boffrand. HART3712W - Surrealism

Course Description

20th- and 21st-century painting, sculpture, film, photography, and computer-generated and internet-based new media. Origins in France to international proliferation. Salvador Dalí, René Magritte, Luis Buñuel, Meret Oppenheim, and Frida Kahlo. Stylistic, thematic, and ideological issues in their historical and cultural context. [3] (HCA)

HART3718W - Twentieth-Century Mexican Art: Painting, Cinema, Literature

Course Description

From muralism to performance art. Relationship between artistic style and historical context. Analysis of ideological content. Rivera, Orozco, Kahlo, Modotti, Paz. Offered on a graded basis only. [3] (HCA)

HART3725W - The Skyscraper: Modern Urban Icon

Course Description

Development of the architectural type from the late 19th to the mid-20th century, seen from stylistic, technological, urban, artistic, and economic perspectives. [3] (HCA)

HART3730 - Twentieth-Century Sculpture

Course Description

Definitions, materials, movements, theories, and related practices, including architecture. [3] (HCA)

HART3740 - History of Sound Art

Course Description

From twentieth century to present. Use of sound as artistic medium. Experimental practices; the relationship of art and technology; sound art's position between music, performance and installation art. Cage, Cardiff, Paik, Rosenfeld, and Trimpin. [3] (HCA)

HART3753W - Imaging the "Other" in Art

Course Description

Representations of racial difference in North America and Europe, 19th-21st centuries. Orientalism, colonialism, primitivism, anthropology, the use of racial and ethnic stereotypes, and the politics of display. [3] (HCA)

HART3757W - Women in Architecture

Course Description

Women's contributions to the built environment as architects, patrons, critics, and social reformers, primarily in the 19th and 20th centuries. Perspectives of feminism, gender, race, and sexuality studies. Julia Morgan, Eileen Gray, Charlotte Perriand, Denise Scott Brown, and Zaha Hadid. [3] (P)

HART3765W - Monuments and Memorials, 1900 to present

Course Description

Global memorialization practices in Europe, North America, and post-colonial settings. Memorials to Holocaust, civil rights movements, acts of terrorism. Monuments in and of multiple wars. Themes include counter-monuments, history and memory, and preservation. Offered on a graded basis only. [3] (HCA)

HART3766W - Post-1871 Berlin Monuments, Memorials, and City Planning

Course Description

Berlin's city planning; monuments and memorials from the beginning of the German Empire. Political, social, and cultural history, including World War II, the Holocaust, and the Cold War. Brandenburg Gate, Berlin Palace, Reichstag, Holocaust Memorial, Jewish Museum, and Berlin Wall. [3] (P)

HART3767W - Neo-Dada and Pop Art**Course Description**

Artistic movements at the end of modernism and beginning of postmodernism, 1955-1980. Intersection with music, consumer culture, advertising, and economics. Jackson Pollock, Robert Rauschenberg, Jasper Johns, Andy Warhol, and Roy Lichtenstein. Issues of gender and sexuality through construction of femininity and masculinity. [3] (US)

HART3790 - Monumental Landscapes of Provence**Course Description**

First millennium BCE to the present. Architecture and art, physical geography and natural resources in Mediterranean France. Greek-Gallic interactions, Roman urbanism, medieval institutions, and modern painting and design. Based in Aix-en-Provence and Marseille. [3] [HCA]

HART3810 - Exhibiting Historical Art**Course Description**

Research and exhibition of art in the permanent collection of the Vanderbilt University Fine Arts Gallery. Research methods and principles of object organization and display, illustrated via selected objects that vary annually. May be repeated for credit if there is no duplication in topic. Offered on a graded basis only. [3] (HCA)

HART3810W - Exhibiting Historical Art**Course Description**

Research and exhibition of art in the permanent collection of the Vanderbilt University Fine Arts Gallery. Research methods and principles of object organization and display, illustrated via selected objects that vary annually. May be repeated for credit if there is no duplication in topic. Offered on a graded basis only. [3] (HCA)

HART3825W - Meaning and Form in Architecture**Course Description**

Human-made environment in various cultural contexts; historical and theoretical perspectives. Diverse approaches and methodologies for addressing formalism in architecture and the visual arts. [3] (P)

HART3840 - Directed Study**Course Description**

Registration only with agreement of instructor involved and with written approval of the director of undergraduate studies. May be repeated for a total of 6 credits, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for all semesters of HART 3840] (No AXLE credit)

HART3850 - Independent Research**Course Description**

Supervised work in extension of regular offerings in the curriculum. Registration only with agreement of instructor involved and with written approval of the director of undergraduate studies. May be repeated for a total of 6 credits, but students may earn only up to 3 credits per semester of enrollment. [1-3] (No AXLE credit)

HART3880 - Internship Training**Course Description**

Students gain experience in a broad range of arts-related programs, at public or private institutions, including museums, and/or federal agencies. Students may take 1-3 hours in 3883, which includes background research, done concurrently with a one-semester internship program (3880), leading to submission of a research paper at the end of that semester. A 3.0 grade point average, approval of a specific plan by the department, and at least 6 hours of prior work in History of Art is required. Offered only on a pass/fail basis only and must be taken concurrently with 3883. Will not count as part of the minimum hours for the History of Art major or minor. Corequisite: 3883. [Variable credit: 1-9] (No AXLE credit).

HART3883 - Internship Research**Course Description**

Students gain experience in a broad range of arts-related programs, at public or private institutions, including museums, and/or federal agencies. Students may take 1-3 hours in 3883, which includes background research, done concurrently with a one-semester internship program (3880), leading to submission of a research paper at the end of that semester. A 3.0 grade point average, approval of a specific plan by the department, and at least 6 hours of prior work in History of Art is required. Readings and critiqued assignments under faculty supervision. Will not count as part of the minimum hours for the History of Art major or minor. Corequisite: 3880. [Variable credit: 1-3] (No AXLE credit).

HART3890 - Selected Topics**Course Description**

May be repeated for credit twice if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3; maximum of 9 credits total for all semesters of HART 3890] (No AXLE credit)

HART4960 - Advanced Seminar**Course Description**

An undergraduate seminar involving advanced In-depth reading, research, and writing in a particular area of art history. Limited to juniors and seniors with preference to majors. May be repeated for credit once if there is no duplication in topic and not twice from the same instructor. Students may enroll in more than one section of this course each semester. Offered on a graded basis only. [3; maximum of 6 credits total for all semesters of 295; maximum of 9 credits for HART Honors candidates] (HCA)

HART4998 - Honors Research**Course Description**

Research to be done in consultation with a member of the faculty in history of art. Open only to those beginning honors work in history of art. May be repeated for a total of 6 credits. [1-6; maximum of 6 credits total for all semesters of HART 4998] (No AXLE credit)

HART4999 - Honors Thesis**Course Description**

Open only to seniors in the departmental honors program. Students completing this course with distinction, including a thesis and final examination, will earn honors in history of art. Prerequisite: 4998. May be repeated for a total of 6 credits. [1-6; maximum of 6 credits total for all semesters of HART 4999] (No AXLE credit)

HART5155 - Healing and Art in China

Course Description

Early healing practices and their influence on the arts in premodern China. Materiality and technology of individual craft traditions as related to the human body; magical healing texts, talismans, and dharanis; the art of the Buddha of Medicine; transformative herbs and the development of the aesthetic garden; and tea consumption as medicine and art. Not open to students who completed HART 2155W. [3]

HART5302 - Art and the Market in Europe, 1400-1700

Course Description

(Also offered as HART 2302) Intersection of artistic production and economics in early modern Europe from Renaissance through Baroque eras. Focus on Italy and the Netherlands: Florence, Bruges, Antwerp, Amsterdam. Cultural and societal contexts; valuation, supply and demand, patronage, collection practices, role of masters' workshops. Artists such as Botticelli, Leonardo, Rubens, Rembrandt, Vermeer. No credit for students who have earned credit for HART 2302. [3]

Honors

HONS1810W - College Honors Seminar in the Humanities and Creative Arts

Course Description

Offered on a graded basis only. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [3] (HCA)

HONS1820W - College Perspectives Honors Seminar

Course Description

Offered on a graded basis only. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [3] (P)

HONS1830W - College Honors Seminar in Behavioral and Social Sciences

Course Description

Offered on a graded basis only. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [3] (SBS)

HONS1840W - College Honors Seminar in History and Culture of the United States

Course Description

Offered on a graded basis only. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [3] (US)

HONS1850W - College Honors Seminar in Mathematics and Natural Science

Course Description

Offered on a graded basis only. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [3] (MNS)

HONS1860W - College Honors Seminar in International Cultures

Course Description

Offered on a graded basis only. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [3] (INT)

HONS3810 - Service Development Sem.**Course Description**

Conducting community service in an ethical manner. Civic engagement, equity, equality, community organizing, allyship, justice, empowerment, and service learning. Lectures, interactive workshops, guest speakers, site visits, and short projects with local firms. Offered on a graded basis only. [1]

HONS3830 - Leadership Development Sem**Course Description**

Introduction and cultivation of leadership skills: communication, organization, delegation, strategic thinking, conflict resolution, time management, mentorship, personnel development, giving and receiving feedback. Lectures, interactive workshops, guest speakers, site visits, and short internships with local companies. Offered on a graded basis only. [1]

HONS3850 - Research Development Seminar**Course Description**

Introduction and cultivation of research skills: library science, search and prompt writing, finding topics, defining scope, note-taking, literature reviews, structure of research projects, methodologies, attention to details, time management, citation, communication and presentation of findings. Lectures, interactive workshops, guest speakers, site visits, and short research projects. Offered on a graded basis only. [1]

HONS3870 - Professional Development Sem**Course Description**

Introduction and cultivation of professional skills: networking, resume and cover-letter writing, pitches, problem-solving, data analytics, negotiation, and effective communication. Lectures, interactive workshops, guest speakers, site visits, and short internships with local companies. Offered on a graded basis only. [1]

Human & Organizational Development

HOD1001 - Commons iSeminar**Course Description**

Commons iSeminar, a 1-hour small seminar experience, open to first-year students. Students and faculty will collaboratively explore a specialized topic in depth in this university-wide seminar sponsored by The Ingram Commons. General Elective credit only. [1]

HOD1250 - Applied Human Development**Course Description**

Introduction to the processes of human development and how such development can be influenced. Emphasis is placed on social development and implications for solving personal and professional problems. The course focuses on late adolescent and young adult development. [3]

HOD1300 - Small Group Behavior**Course Description**

Designed to improve the student's ability to analyze behavioral patterns in groups such as leadership, conflict, and decision making and group roles. The student is expected to improve his/her abilities by effective participation in the group as well as in written analyses. Problems for analysis are drawn from events in the group and from theoretical readings. [3]

HOD2100 - Understanding Organizations

Course Description

Organizations are comprised of individuals with diverse interests functioning within rapidly changing, complex environments, often with limited resources. Accordingly, understanding organizations requires multiple perspectives and approaches to problem-solving. Students in the course will learn to apply organizational theories to specific challenges in order to generate potential solutions that promote organizational health. HOD 2100 can substitute for BUS 1400 in the business minor. Serves as repeat credit for BUS 1400. [3]

HOD2260 - Economics of Human Resources

Course Description

An introduction to economics, with heavy emphasis on microeconomics of the family, household, consumer, and business firm. Applications to the economics of government, poverty, discrimination, labor markets, the environment, education, and other human resource and human development topics will be included. The class will be primarily lecture format with some small group interactions and discussions. Prerequisite - Statistics Course: PSY-PC 2110, PSY 2100, ECON 1500, MATH 2810 or MATH 2820. [3]

HOD2400 - Talent Management and Organizational Fit

Course Description

The course provides a general overview of social, economic, and other environmental factors impacting the world of work and helps students in understanding how organizations are responding to this changing landscape. The course also enables students to critically engage this context by developing competencies and skills which will be applicable in a diversity of settings. [3]

HOD2500 - Systematic Inquiry

Course Description

This course offers an introduction to social science research methods covering qualitative and quantitative approaches. Students will develop the ability to critically analyze research studies as well as collaborate with others to conduct studies of their own, reporting their results in a professional format. [3]

HOD2600 - Continuous Improvement in Organizations

Course Description

Whether your future work is in a startup or a multinational corporation, a for-profit or non-profit organization, or a job that makes things or develops people, the tools of continuous improvement can help you push your organization beyond the status quo. Successful organizations look to what they can improve upon to better meet their organizational goals and improve performance. In this course, you will learn and apply methods of continuous improvement (e.g., Kaizen, Lean, and Improvement Science), including the Plan, Do, Check (or Study), Act cycles to improve organizational processes and practices. Students will both individually and collaboratively apply these methods to case studies as well as to personal and organizational aspects that they want to improve. Pre-requisite: HOD 2500 [3]

HOD2700 - Public Policy

Course Description

An exploration of the creation, interpretation, implementation, and evaluation of public policy in the United States. Main emphases include key analytical/theoretical perspectives necessary for understanding the policy making process (problem Identification, agenda setting, formulation, adoption, Implementation, and evaluation), and main factors that influence policy making at the national and state levels. Particular attention is paid to the development of student analytic and writing skills. [3]

HOD3200 - Introduction to Data Science

Course Description

Provides students with both theoretical and practical knowledge of data science, including accessing data, analyzing data, and presenting data analysis. Data access topics include web scraping, using application programming interfaces and database queries. Data analysis topics include linear regression, logistic regression, and basics of unsupervised machine learning. Data analysis will also cover cross validation. Data presentation topics include univariate and bivariate graphs, lattice graphing, mapping and interactive graphics. Emphasizes literate programming as basis for access, analysis and presentation. Prerequisite: Introductory Statistics or permission of instructor. [3]

HOD3250 - Causal Inference

Course Description

The purpose of this course is to prepare participants to design and carry out social science research estimating the effects of educational interventions, programs and policies that is sufficiently credible to influence decisions about these educational practices and for publication in scholarly, social science journals including education and public policy. A second purpose is to enable participants to fairly and rigorously evaluate the contributions and limitations of empirical social science manuscripts that address significant causal questions for education practice and policymaking. The course will develop your understanding of the theoretical constructs that underlie causal inference, contribute to your understanding of some aspects of descriptive social science, and aid you in the development of appropriate criteria for assessing the contributions of particular studies to social science research literature. Prerequisites: HODE 3205 (or equivalent), PSY-PC 2115 (or equivalent), and PSY-PC 3735 (or equivalent) and permission of instructor. [3]

HOD3275 - Practical Meta-analysis

Course Description

The topics covered in this seminar will include the major steps involved in conducting meta-analysis, with particular emphasis on the technical issues and statistical analyses distinctive to this form of research. Specifically, the course will focus on providing students with the skills needed to be intelligent consumers of systematic reviews and meta-analyses: conduct a systematic, replicable search of the literature used to identify studies eligible for a meta-analysis; create and analyze meta-analytic databases using appropriate statistical techniques; and prepare written reports of meta analytic findings. Prerequisites: PSY-PC 2110 and PSY-PC 3735 [3]

HOD3300 - Judgment and Analytical Reasoning

Course Description

This course presents the cognitive, emotional, and contextual factors that affect judgment and decision-making. Through real-world examples, students will learn to identify common errors in human reasoning and develop an understanding of a variety of analytic strategies to overcome them. The primary tool for conducting these analyses will be Microsoft Excel. (Developing proficiency in Excel for analysis and reporting findings is a secondary goal of this course.) Features and functions of Excel will be taught in the context of the course content and third-party validation of Excel skills will be obtained through Microsoft Certification at the Basic and Expert levels. Serves as repeat credit for HOD 3890-01 in Fall 2018 and for HOD 3890-02 in Spring 2019. [3]

HOD3850 - Independent Study in Human and Organizational Development

Course Description

Individual programs of reading or the conduct of Research studies in human and organizational development. Consent of supervising faculty member required. May be repeated. [1-3]

HOD3860 - Directed Research

Course Description

Consent of supervising faculty member required. May be repeated. [1-3]

HOD3864 - Research Experience**Course Description**

This course provides undergraduate students in HOD direct experience in conducting research. The course is designed for students interested in going on to graduate school as well as students who want to gain experience in generating knowledge in an information economy. The course conducts a review of research methodologies and requires students to critically read and deconstruct published research studies. Data analysis skills are sharpened in the computer lab and put into practice on their own research. Students conduct several independent research projects during the semester. Prerequisite: HOD 2500 and a statistics class. [3]

HOD3870 - Practicum in Human and Organizational Development**Course Description**

An intensive practicum experience. Three contact hours per week required for each credit hour. [1-3]

HOD3890 - Special Topics in Human and Organizational Development**Course Description**

Exploration of special issues on topics related to human and organizational development. May be repeated for credit with change of topic. [3]

HOD4949 - Capstone Design**Course Description**

Students partner with the HOD Capstone team and campus resources to explore, develop, and implement a successful capstone design process. The Capstone Design process requires students to engage in content, accomplish learning objectives, and meet deadlines. Students who successfully meet the learning objectives and demonstrate readiness will be confirmed for the HOD capstone semester. Corequisites or Prerequisites: HOD 1250, 1300, 2100, 2500, 2700, and 2400 (2400 is only required if on HOD Track structure) [0].

HOD4950 - Capstone Partnership**Course Description**

Students complete an immersive learning experience with an organization, collecting field notes and observations, conducting informational interviews and internal research, and completing workplace duties as assigned. Prerequisite: HOD 1250, 1300, 2100, 2400, 2500, 2700, and 4949 (2400 required only if on HOD Track structure). Corequisite: HOD 4951, 4952, 4953 [3-6]

HOD4951 - Critical Reflexivity and Systems Thinking**Course Description**

Students develop skills in critical reflection using a case study model to process and analyze workplace behavior using theories from earlier coursework. Students demonstrate engagement with capstone site stakeholders, visually diagram the different parts of the systems that interact internally and externally with the capstone site, and clearly define the relationships between the different parts of their capstone and the systems they impact. Prerequisite: HOD 1250, 1300, 2100, 2400, 2500, 2700, and 4949 (2400 required only if on HOD Track structure). Corequisite: HOD 4950, 4952, 4953 [3]

HOD4952 - Mapping Future Personal and Professional Development**Course Description**

Students use research tools and personal development strategies to identify future goals and map next steps in their academic and professional journey. The course reflection is built upon retrospectives developed from each of the HOD core courses. Students use the material in their retrospectives and personal learning goal reflections to map their professional and personal future. Prerequisite: HOD 1250, 1300, 2100, 2400, 2500, 2700, and 4949 (2400 required only if on HOD Track structure). Corequisite: HOD 4950, 4951, 4953 3 [3]

HOD4953 - Analysis and Contribution**Course Description**

Students use methods from human centered design to analyze key factors impacting organization and develop a project-centered contribution to capstone site. Prerequisite: HOD 1250, 1300, 2100, 2400, 2500, 2700, and 4949 (2400 required only if on HOD Track structure). Corequisite: HOD 4950, 4951, 4952 [3]

HOD4978 - Senior Thesis**Course Description**

Senior Thesis [3]

HOD4980 - Human and Organizational Development Honors Seminar**Course Description**

Open to students majoring in Human and Organizational Development who are admitted to the Honors Program. [3]

HOD4987 - Human and Organizational Development Honors Seminar**Course Description**

Open to students majoring in Human and Organizational Development who are admitted to the Honors Program. Course carries writing requirement credit for Peabody students. [3]

Humanities

HUM1610 - Selected Topics**Course Description**

Topics Vary. May be repeated more than once if there is no duplication of topic. [3] (No AXLE credit)

Humanities Education-PC

HMED2250 - Introduction to Arts Education**Course Description**

Acquaints the student with the philosophical and pedagogical base with which to develop competence in teaching the arts. [2]

HMED3850 - Independent Study in Humanities Education**Course Description**

Semi-independent study on selected topics in humanities education. May be repeated. Consent of faculty supervisor required. [1-3]

HMED3890 - Special Topics in Humanities Education**Course Description**

Explores special topics related to humanities education. May be repeated with change of topic. [1-3]

Immersion Vanderbilt

IMM2200 - Introduction to Law II (Law Immersion II) **Course Description**

This course provides students with a basic foundation in legal reasoning, research, and writing to prepare them to draft structured memoranda explaining law and policy. Open to sophomores and juniors who have completed IMM 2100 Introduction to Law I and are pursuing a Law Immersion plan. [2]

Interdisciplinary Studies

INDS1111 - First-Year Writing Seminar **Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

INDS1599 - Spectatorship and Performance Cultures in the UK and Ireland **Course Description**

Maymester abroad. Spectatorship as a cultural practice; attendance at contemporary plays, musicals, sporting events, heritage sites, and site-specific performances. [3] (P)

INDS3831 - Global Citizenship and Service **Course Description**

This course is offered by the Vanderbilt Initiative for Scholarship and Engagement (VISAGE). Graduate students may take this course for graduate credit. A service-learning course introducing students to themes and interpretations of global citizenship. Intended to be followed by 3832. [3] (INT)

INDS3832 - Global Community Service **Course Description**

This course is offered by the Vanderbilt Initiative for Scholarship and Engagement (VISAGE). Graduate students may take this course for graduate credit. Students will design and conduct research projects in collaboration with faculty mentors. Prerequisite: 3831. [1-3] (No AXLE credit)

INDS3833 - Seminar in Global Citizenship and Service **Course Description**

This course is offered by the Vanderbilt Initiative for Scholarship and Engagement (VISAGE). Graduate students may take this course for graduate credit. Project- and research-based seminar drawing on student experiences and learning in 3831 and 3832. Prerequisite: 3832. [3] (INT)

INDS3880 - Interdisciplinary Internship **Course Description**

Internship credit for work approved by the designated Associate Dean of Arts and Science. A written scholarly project must be produced in the internship. Must be taken P/F. Repeatable twice for a maximum of 3 credit hours in 3880 (and 3884) combined. [1] (No AXLE credit)

INDS3884 - Interdisciplinary Internship**Course Description**

Internship credit for summer work approved by the designated Associate Dean of Arts and Science. A written scholarly project must be produced in the internship. Course must be taken P/F. May be repeated for credit; maximum of 3 credit hours in 3881, 3882, 3883, and 3884 combined. [1] (No AXLE credit)

INDS3990 - Interdisciplinary internship Training**Course Description**

Under faculty supervision students from any discipline can gain experience in a variety of public and private settings. Students must be classified as a sophomore or higher and in good academic standing at the time the credit is earned. Must be taken on a Pass/Fail basis. Prerequisite or co-requisite: 3991 [1-3] (No AXLE credit)

INDS3991 - Interdisciplinary Internship Readings and Research**Course Description**

Under faculty supervision students from any discipline can gain experience in a variety of public and private settings. Students must be classified as a sophomore or higher and in good academic standing at the time the credit is earned. A thorough research paper or written report is required at the end of the semester. Must be taken on a graded basis only. [1-3] (No AXLE credit)

Italian

ITA1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

ITA1101 - Elementary Italian**Course Description**

Introduction to reading, writing, and speaking through an exploration of Italian culture. For students who have studied little or no Italian. No credit for students who have earned credit for a more advanced Italian language course. [3] (No AXLE credit)

ITA1102 - Elementary Italian**Course Description**

Study of the language through an exploration of Italian culture. No credit for students who have earned credit for a more advanced Italian language course. Prerequisite: 1101. [3] (INT) (CORE LA)

ITA1103 - Intensive Elementary Italian**Course Description**

One-semester intensive course for students who have some knowledge of Italian or of another romance language. No credit for students who have earned credit for 1101, 1102, or a more advanced Italian language course. [3] (INT) (CORE LA)

ITA1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

ITA2203 - Intermediate Italian**Course Description**

Life and art in the diverse regions of Italy through an integrated four-skills approach of reading, writing, listening and speaking. No credit for students who have earned credit for a more advanced Italian language course. Prerequisite: 1102 or 1103. [3] (INT) (CORE LA)

ITA2501W - Grammar and Composition**Course Description**

Syntax, idiomatic expressions, and current usage. Prerequisite: 2203. [3] (INT) (CORE LA)

ITA2614 - Conversation**Course Description**

Development of oral proficiency through analysis and discussion of films, magazine articles, and contemporary art and literature. Prerequisite: 2203. [3] (INT) (CORE LA)

ITA2700 - Great Italian Works in English Translation**Course Description**

Italian literature and culture from the Middle Ages to modernity. Founding of the Italian language through the "three crowns" of fourteenth-century Tuscany: Dante, Petrarch, and Boccaccio. Italian Renaissance and its European-wide repercussions disseminating humanist and historicist traditions. Risorgimento and nationhood. Michelangelo, Leonardo, Ariosto, Tasso, Vico, Leopardi, Calvino, Morante, Pasolini. [3] (INT)

ITA3000 - Introduction to Italian Literature**Course Description**

Critical reading of major works of Italian literature from the beginning to the present. Prerequisite: 2501W. [3] (HCA)

ITA3041 - Italian Civilization**Course Description**

The politics, intellectual, social, artistic, and economic history of Italy from 1300 to the present, with emphasis on major political and philosophical authors. Taught in English. [3] (INT)

ITA3100 - Literature from the Middle Ages to the Renaissance**Course Description**

The ideas and forms of the Trecento, Quattrocento, and Cinquecento, as reflected in the philosophy, history, literature, and art history of these periods. Major writers and their influence on Western European literatures. Prerequisite: 2501W. [3] (HCA)

ITA3240 - Dante's Divine Comedy**Course Description**

Dante's language and philosophical tenets through the study of style, characters, and themes. Taught in English. [3] (HCA)

ITA3242 - Dante in Historical Context**Course Description**

Dante's philosophical and critical works in their medieval historical context and his influence in building a modern Western civilization. Knowledge of Italian not required. [3] (HCA)

ITA3340 - Famous Women from Antiquity to Renaissance**Course Description**

Texts on famous women from Antiquity to the Renaissance in Latin, Italian, French, and English literature. Reception, contemporary criticism, and theory. Texts in English translation; taught in English. [3] (HCA)

ITA3500 - Baroque, Illuminismo, and Romanticism in Italy**Course Description**

Literature of the seventeenth through nineteenth centuries, with particular reference to the influence of European literatures in Italy. Prerequisite: 2501W. [3] (HCA)

ITA3600 - Twentieth-Century Literature: Beauty and Chaos**Course Description**

Poetry and prose in social and historical context. Prerequisite: 2501W. [3] (HCA)

ITA3601 - The City in Time and Space**Course Description**

Functions, forms, and representations of the Italian city in different historical periods. Analysis of space and identity in Italy. Concepts and tools from urban studies to narrative and visual representations of the city. [3] (INT)

ITA3640 - Classic Italian Cinema**Course Description**

From the 1910s to the 1970s. Selected works from Neorealism to Art Film. Relationship between cinema and the other arts. Contrasting film styles, including abstraction and realism, and tradition and transgression. Knowledge of Italian is not required. [3] (INT)

ITA3641 - Contemporary Italian Cinema**Course Description**

From the 1970s to the present. Postmodern forays into metafiction, parody, and political and social critique. The return to realism and New Regionalism in the twenty-first century. Knowledge of Italian is not required. [3] (HCA)

ITA3642 - Italian Visual Culture**Course Description**

Parallels between Italian literature and the visual arts, including painting, cinema, and intermediality. Focus on the representation of the visual arts in literature, the representation of literature in the visual arts, and Italy as the cradle of Western visual culture. Prerequisite: 2203. [3] (HCA)

ITA3701 - City Fictions**Course Description**

Interdisciplinary exploration of how Italian authors, directors, and artists aspire to change the way readers and viewers understand and experience urban realities. Social, cultural, geographical, and architectural aspects of Italian cities as depicted in fiction, travel literature, cinematic images, the visual arts, and music. Prerequisite: 2203. [3] (P)

ITA3702 - Topics in Contemporary Italian Civilization**Course Description**

Short stories, historical documents, and articles from the press. Prerequisite: 2501W. [3] (No AXLE credit)

ITA3703 - Italy: A World Cultures & Languages**Course Description**

Diversity in Italian culture and language from earliest records to the present. Communicative aspects of contemporary Italian; improvement of phonetic skills and understanding of social, cultural, and linguistic aspects. Oral and written sources in standard and regional Italian, with a focus on mass media. Prerequisite: 2203. [3] (P)

ITA3704 - Made-in-Italy: Italianness in Italy and Abroad**Course Description**

Cultural, historical, and economic analysis of Italian brands and products in Italy and the USA, and the aspects that determine their quality or representative mark. Fashion brands, design products, architectural styles, and popular music from local and global perspectives. Italian and American artistic and cinematic representations of Made-in-Italy. Taught in English. [3] (INT)

ITA3705 - Italian Food Studies: History, Culture, and Identity**Course Description**

Historical, geographical, and socio-economic dimensions of Italian cuisine from the Middle Ages to the present. Food's pivotal role in defining identity and culture. Social justice, nutrition, regionalism, and the intersection of food with health, wealth, and communication. "Mediterranean diet," localism, Slow Food movement, immigrant contributions to food production, and food insecurity. Theoretical insights and practical understanding. [3] (INT)

ITA3740 - Imaginaries of Italian migration in USA**Course Description**

The history of Italian immigration in the United States. American representations of Italians and Italian-Americans from 1900 to the present. Cinematographic and literary images of Italians and Italian Americans. Historical and anthropological scholarship. Films, fiction, ethnic marketing, and travel writing. Knowledge of Italian is not required. [3] (US)

ITA3802 - Contemporary Italian Society and Culture**Course Description**

Capitalism and modernization, immigration, and multiculturalism. Racism, youth culture, gender, sexuality, and feminism. Changing definitions of family. Regionalism, entertainment, and sport. Prerequisite: 2203. [3] (P)

ITA3803 - Mediterranean Culture (taught in Sicily and Italy)**Course Description**

Culture and history of the Mediterranean. Taught in Sicily and the Italian peninsula. Knowledge of Italian is not required. [3] (HCA)

ITA3850 - Independent Study**Course Description**

A reading course, the content of which varies according to the needs of the individual student. Primarily designed to cover pertinent material not otherwise available in the regular curriculum. May be repeated for a total of 12 credits over a four-semester period, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 12 credits total for four semesters of ITA 3850] (No AXLE credit)

ITA3890 - Special Topics in Italian Literature**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: 2501W. [3] (No AXLE credit)

Japanese

JAPN1011 - Basic Japanese I**Course Description**

Simple conversation, writing system, and reading. Designed exclusively for students with little or no previous exposure to Japanese. No credit for students who have earned credit for 1101 or a more advanced Japanese language course. [3] (No AXLE credit)

JAPN1012 - Basic Japanese II**Course Description**

No credit for students who have earned credit for 1101 or a more advanced Japanese language course. Prerequisite: 1011. [3] (No AXLE credit)

JAPN1013 - Practical Japanese Conversation**Course Description**

Conversational skills for everyday communication in actual Japanese cultural situations. Interpersonal and presentational speaking and listening proficiency. Prerequisite: 1012 or instructor permission. [2] (No Axle Credit) (CORE LA)

JAPN1101 - Elementary Japanese I**Course Description**

Acquisition of oral-aural skills and basic grammar. Introduction to reading and writing Japanese syllabaries and Chinese characters. No credit for students who have earned credit for 1012 or a more advanced Japanese language course. [4] (No AXLE credit)

JAPN1102 - Elementary Japanese II**Course Description**

No credit for students who have earned credit for a more advanced Japanese language course. Prerequisite: 1012 or 1101. [4] (INT) (CORE LA)

JAPN1231 - Tadoku: Extensive Reading in Japanese**Course Description**

Develop reading skills in Modern Japanese, using extensive reading method. May be repeated once; students may earn up to 2 hours credit. Prerequisite: 1011 or 1101. [1] (No AXLE credit) (CORE LA)

JAPN2201 - Intermediate Japanese I**Course Description**

Development of conversational skills and linguistic competence. Syntax, writing, and reading. No credit for students who have earned credit for a more advanced Japanese language course. Prerequisite: 1102. [4] (INT) (CORE LA)

JAPN2202 - Intermediate Japanese II**Course Description**

No credit for students who have earned credit for a more advanced Japanese language course. Prerequisite: 2201. [4] (INT) (CORE LA)

JAPN2232 - Japanese through Manga**Course Description**

Reading and analysis of Japanese comic books. Language skills and knowledge of contemporary Japanese popular culture. Basic knowledge of hiragana and katakana required. Prerequisite or corequisite: 2201. [1] (No AXLE credit) (CORE LA)

JS3830 - Contemporary Jewish Issues**Course Description**

Projects will vary according to the instructor. Service to community will be integral part of course. [3] (No AXLE credit)

JS3840 - Directed Readings**Course Description**

Advanced readings and research on a selected topic done under the supervision of a faculty mentor. [3] (No AXLE credit)

JS3850 - Independent Study**Course Description**

A research project carried out under the supervision of a faculty mentor. May be repeated for a total of 6 credits if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for all semesters of JS 3850] (No AXLE credit)

JS3880 - Internship Training**Course Description**

Under faculty supervision, students gain experience in any of a variety of settings, such as community, municipal, or government agencies. A thorough report and research paper are required. Must be taken on a Pass/Fail basis only and must be taken concurrently with 3883. Corequisite: 3883. [Variable credit: 1-3] (No AXLE credit)

JS3883 - Internship Research**Course Description**

Under faculty supervision, students gain experience in any of a variety of settings, such as community, municipal, or government agencies. A thorough report and research paper are required. Students will write a research paper drawing on their experiences in 3880. Corequisite: 3880. [3] (No AXLE credit)

JS3890 - Special Topics**Course Description**

Topics as announced. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

JS3892 - Topics in Ancient and Medieval Jewish History**Course Description**

From antiquity to 1492. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

JS3894 - Topics in Modern Jewish History**Course Description**

From 1492 to the present. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

JS4301 - Jewish Language and Paleography**Course Description**

Advanced study in a language of the Jewish people with a particular focus on the linguistic and paleographic features that define its cultural context. Each section focuses on one of the following languages: Aramaic, Ladino, Judaeo-Arabic, Rabbinic Hebrew, or Yiddish. May be repeated for credit up to two times when the language studied differs. Consent of instructor required. [3] (INT)

JS4960 - Senior Seminar**Course Description**

Advanced reading and research in a particular area of Jewish studies. [3] (No AXLE credit)

JS4970 - Senior Project in Jewish Studies**Course Description**

Readings and independent research. Prerequisite: senior standing. [3] (No AXLE credit)

JS4980 - Senior Honors Research Seminar

Course Description

Presentation and discussion of progress being made on honors theses. Open only to senior departmental honors students. [3] (No AXLE credit)

JS4981 - Senior Honors Research Seminar

Course Description

Presentation and discussion of progress being made on honors theses. Open only to senior departmental honors students. [3] (No AXLE credit)

K'iche' - Mayan Language

KICH1101 - Elementary K'iche' I

Course Description

Kaqchikel, K'iche', or Q'eqchi'. Basic speaking, reading, and writing skills. Offered on a graded basis only. Serves as repeat credit for students who have earned credit for ANTH 2612. [3] (No AXLE credit)

KICH1102 - Elementary K'iche' II

Course Description

Intermediate level course with advanced grammar. Counterfactual constructions, deixis, verbal derivations of positional roots, sound symbolic verbs, and verbal nominalizations. Vocabulary and idioms. Various literary genres. Serves as repeat credit for ANTH 2614. Offered on a graded basis only. Prerequisite: 1101 or ANTH 2612. [3] (INT) (CORE LA)

KICH2201 - Intermediate K'iche' I

Course Description

Vocabulary, listening, and speaking skills. Modern and colonial texts. Cultural context of linguistic practices in K'iche' communities. Serves as repeat credit for ANTH 3614. Offered on a graded basis only. Prerequisite: 1102. [3] (INT) (CORE LA)

KICH2202 - Intermediate K'iche' II

Course Description

Taught in K'iche'. Advanced vocabulary, grammar, syntax, reading, and writing. Colonial and modern texts. Serves as repeat credit for ANTH 3615. Offered on a graded basis only. Prerequisite: 2201 or ANTH 3614. [3] (INT) (CORE LA)

Keyboard Harmony

MUKH1130 - Introductory Keyboard Harmony

Course Description

Introduction to repertoire, technique, transposition, harmonization, improvisation, and sight reading. Designed for B.Mus. and B.Mus.Arts students who have no piano background. Provides preparation for the Keyboard Harmony sequence. FALL. [1] Koutsoukos.

MUKH1131 - Keyboard Harmony I**Course Description**

Development of basic technique, reading proficiency, elementary transposition. Diatonic harmony at the keyboard. Prerequisite: placement exam or MUKH 1130. Not open to students who have completed MUKH 2133 or 2134. [1]

MUKH1132 - Keyboard Harmony II**Course Description**

Development of basic technique, reading proficiency, elementary transposition. Diatonic harmony at the keyboard. Prerequisite: placement test or MUKH 1131. Not open to students who have completed MUKH 2133 or 2134. [1] Koutsoukos

MUKH1133 - Keyboard Harmony III**Course Description**

Harmonization of melodies, improvisation of small musical forms, transposition in all keys with cadences and modulations, four-part score reading. Prerequisite: MUKH 1132. Strongly recommended: C- or above in 1132. Not open to students who have completed MUKH 2133 or 2134. [1] Koutsoukos.

MUKH1134 - Keyboard Harmony IV**Course Description**

Harmonization of melodies, improvisation of small musical forms, transposition in all keys with cadences and modulations, four-part score reading. Prerequisite: MUKH 1133. Strongly recommended: C- or above in 1133. Not open to students who have completed MUKH 2133 or 2134. [1] Koutsoukos.

MUKH2133 - Accelerated Keyboard Harmony I**Course Description**

Functional skills are reinforced with pedagogy, music theory, harmony, and ear training. Topics include improvisation, musical styles, and computer MIDI technology. For keyboard majors or by consent of instructor. Prerequisite: placement test. Not open to students who have completed MUKH 1131-1132 or 1133-1134. FALL. [2] Krieger.

MUKH2134 - Accelerated Keyboard Harmony II**Course Description**

Intensive study of materials presented in MUKH 2133. Prerequisite: 2133. Strongly recommended: C- or above in 2133. Not open to students who have completed 1133, 1134. SPRING. [2] Krieger.

Korean

KOR1101 - Elementary Korean I**Course Description**

Introduction to Korean language for students who have no previous knowledge of Korean. Basic skills in speaking, listening, reading, and writing, with a focus on oral proficiency. No credit for students who have earned credit for a more advanced Korean language course. [4] (No AXLE credit)

KOR1102 - Elementary Korean II**Course Description**

Basic skills in speaking, listening, reading, and writing, with a focus on oral proficiency. No credit for students who have earned credit for a more advanced Korean language course. Prerequisite: 1101 [4] (INT) (CORE LA)

KOR2201 - Intermediate Korean I**Course Description**

Speaking, listening, reading, and writing, with intensive exercises for spelling, basic grammar, and vocabulary. Cultural aspects of daily life in Korea. No credit for students who have earned credit for a more advanced Korean language course. Prerequisite: 1102. [4] (INT) (CORE LA)

KOR2202 - Intermediate Korean II**Course Description**

Speaking, listening, reading, and writing, with intensive exercises for spelling, basic grammar, and vocabulary. Cultural aspects of daily life in Korea. No credit for students who have earned credit for a more advanced Korean language course. Prerequisite: 2201. [4] (INT) (CORE LA)

KOR3301 - Advanced Korean I**Course Description**

Emphasis on formal speaking and writing. Introduction of four-character idioms and basic Chinese characters. No credit for students who have earned credit for a more advanced Korean language course. Prerequisite: KOR 2202. [3] (INT) (CORE LA)

KOR3302 - Advanced Korean II**Course Description**

Emphasis on formal speaking and writing. Introduction of four-character idioms and basic Chinese characters. No credit for students who have earned credit for a more advanced Korean language course. Prerequisite: 3301. [3] (INT) (CORE LA)

KOR3851 - Independent Study**Course Description**

[1-3] (No AXLE credit)

KOR3852 - Independent Study**Course Description**

[1-3] (No AXLE credit)

KOR4401 - Readings in Modern Korean I**Course Description**

Authentic materials excerpted from cultural, literary, and business writings. Prerequisite: 3302. [3] (HCA) (CORE LA)

KOR4402 - Readings in Modern Korean II**Course Description**

Authentic materials excerpted from cultural, literary, and business writings. Prerequisite: 4401. [3] (HCA) (CORE LA)

Latin

LAT1101 - Beginning Latin I

Course Description

Practice in speaking and writing. No credit for students who have earned credit for a more advanced Latin language course. Graded basis only. [3] (No AXLE credit)

LAT1102 - Beginning Latin II

Course Description

Transition to literary Latin. Emphasis on comprehension of texts. No credit for students who have earned credit for a more advanced Latin language course. Graded basis only. Prerequisite: 1101. [3] (INT) (CORE LA)

LAT1103 - Intensive Elementary Latin

Course Description

The equivalent of Latin 1101 and 1102. This course presents the elements of the Latin language at an accelerated pace. Designed for students who have completed one or two years of Latin in high school but are not prepared to enter Latin 1102. No credit for students who have earned credit for 1101, 1102, or a more advanced Latin language course. [5] (INT) (CORE LA)

LAT2201 - Intermediate Latin: Prose

Course Description

Review of Latin grammar and selected reading from major Latin authors. No credit for students who have earned credit for a more advanced Latin language course except 2202. [3] (INT) (CORE LA)

LAT2202 - Intermediate Latin: Poetry

Course Description

Selected reading from the major Latin poets. No credit for students who have earned credit for a more advanced Latin language course. [3] (INT) (CORE LA)

LAT3010 - The Writings of Caesar

Course Description

Selections from The Civil War and The Gallic War. Literary style and historical context. Prerequisite: 2202. [3] (HCA) (CORE LA)

LAT3020 - Cicero and the Humanistic Tradition

Course Description

Study of Cicero's career and thought, and of his contribution to the development of the concept of humanitas. Readings from his letters, speeches, or philosophical works. Prerequisite: 2202. [3] (HCA)(CORE LA)

LAT3030 - Latin Letters

Course Description

The literary letters of Seneca and Pliny, with a brief introduction to the personal correspondence of Cicero and the letters discovered at Vindolanda. Prerequisite: 2202. [3] (HCA) (CORE LA)

LAT3040 - The Roman Historians**Course Description**

Selections from Sallust, Livy, and Tacitus, with attention to their objectives and methods; analysis of Roman historiography and its relation to Greek and early Christian historiography. Prerequisite: 2202. [3] (HCA) (CORE LA)

LAT3050 - Suetonius**Course Description**

Selections from the works of one of Rome's most important biographers, read in the context of the Latin biographical tradition as well as the political and social background. Prerequisite: 2202. [3] (HCA) (CORE LA)

LAT3060 - Tacitus**Course Description**

Selections from the works of one of Rome's most important historians, read in the context of historiographical tradition and political and social background. Prerequisite: 2202. [3] (HCA) (CORE LA)

LAT3070 - Sallust**Course Description**

Selected works of one of Rome's most important historians, read in the context of historiographical tradition and political and social background. Prerequisite: LAT 2202. [3] (HCA) (CORE LA)

LAT3100 - Roman Comedy**Course Description**

Reading of selected comedies of Plautus and Terence: study of the form of Roman comedy and its relation to the Greek New Comedy. Prerequisite: 2202. [3] (HCA) (CORE LA)

LAT3110 - Catullus**Course Description**

Reading and interpretation of Catullus' poems; aesthetic, political, and rhetorical contexts; fundamentals of Latin meter. Prerequisite: 2202. [3] (HCA) (CORE LA)

LAT3120 - Lucretius: De Rerum Natura**Course Description**

Lucretius' poem studied both in the tradition of Epicurean philosophy and as a landmark in the development of the Latin didactic epic; background material in the fragments of Epicurus and some treatment of the Epicurean movement in Italy and especially in Rome. Prerequisite: 2202. [3] (HCA) (CORE LA)

LAT3130 - Vergil: The Aeneid**Course Description**

An intensive study of the entire poem, in the context of the epic tradition. Prerequisite: 2202. [3] (HCA) (CORE LA)

LAT3140 - The Lyric Poetry of Horace**Course Description**

Reading and interpretation of Horace's Epodes and Odes; relation to the Greco-Roman lyric tradition and to Augustan politics. Prerequisite: 2202. [3] (HCA) (CORE LA)

LAT3150 - Latin Elegy**Course Description**

Authors who created a new type of love poetry during the rule of emperor Augustus: Tibullus, Propertius, Ovid, and Sulpicia. Construction and contestation of gender roles; political contexts; development of the elegiac couplet; modern responses. Prerequisite: 2202. [3] (HCA) (CORE LA)

LAT3160 - Ovid**Course Description**

Reading and interpretation of selections from the Metamorphoses or other works of Ovid. Prerequisite: 2202. [3] (HCA) (CORE LA)

LAT3170 - Roman Satire**Course Description**

The satires of Horace and Juvenal; the origins of Roman satire; history and conventions of the genre; background reading in other Roman satirists. Prerequisite: 2202. [3] (HCA) (CORE LA)

LAT3180 - Neronian Writers**Course Description**

Selections from authors in the literary renaissance during the reign of the artistic Emperor Nero, including Seneca, Lucan, Persius, and Petronius. Stylistic innovations, literary merits, and cultural contexts. Prerequisite: 2202. [3] (HCA) (CORE LA)

LAT3200 - Early Christian Writers**Course Description**

Selections from the writings of Latin Christians, from the account of Perpetua's martyrdom to the Confessions of Augustine. Prerequisite: 2202. [3] (HCA) (CORE LA)

LAT3300 - Ancient Conspiracy - Theory and Practice**Course Description**

Selected works of two of Rome's most important historians, Livy and Sallust, and Cicero's speeches; Bacchanalian and Catilinarian conspiracies, read in the context of historiographical tradition and political and social background. Prior knowledge of intermediate Latin is expected. [3] (HCA) (CORE LA)

LAT3850 - Independent Study**Course Description**

Designed for majors wanting to familiarize themselves with works or authors not covered in the regular curriculum. Prerequisite: 6 hours above 2202. May be repeated for a total of 6 credits if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for all semesters of LAT 3850] (No AXLE credit)

LAT3890 - Special Topics in Latin Literature**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (HCA)

LAT5101 - Beginning Latin I**Course Description**

Practice in speaking and writing. No credit for students who have earned credit for a more advanced Latin language course. Graded basis only. [3]

Latin Amer Caribbean Studies

LACX1201 - Introduction to Latin American, Caribbean, and Latinx Studies**Course Description**

Foundational course for interdisciplinary study of Americans of Hispanic heritage and their communities. History and cultural production. Interconnections and differences among diverse Hispanic communities. [3] (P)

LACX1202 - Introduction to Caribbean Studies: The Origins of the Modern World**Course Description**

Organized in four different modules: Colonialism, Capitalism, Citizenship, and Culture. How conquest and slavery forged colonial and postcolonial societies in the Americas where race and racialization played a crucial part in the development of the modern nation state. Offered on a graded basis only. [3] (P)

LACX1210 - Contemporary Chicanx Studies**Course Description**

Historical, social, and political contexts of Chicanxs (Mexican Americans) in the U.S. Contemporary debates and future directions. Scholarship and creative writing related to Chicanx experience. [3] (HCA)

LACX1380 - Trouble in Paradise: Law, Tourism, and Globalization in the Caribbean**Course Description**

The Caribbean as a paradoxical site of leisure and vulnerability, analyzing intersections of globalization, law, and political economy. Case studies on tourism economies, environmental crises, and cultural festivals. How colonial legacies, governance, and legal frameworks structure dispossession, labor, and development across the region. [3] (INT) (CORE C, E)

LACX1469 - Fútbol-Soccer: Culture, Gender, and Belonging**Course Description**

Formerly HIST 1469. Recurring topics and debates in sports history; differences in academic and popular history of sport. Changing agendas of sports history, including emphases on transnational and imperial processes. Perspectives on questions of power and social hierarchies as these relate to popular culture and belonging. Serves as repeat credit for HIST 1469. [3] (US) (CORE C, E) (LE HFA)

LACX2000 - No Equivalent: Not eligible for credit toward the major or minor.**Course Description**

This course has no Vanderbilt equivalent. It is NOT eligible to count toward a major or minor in LACX.

LACX2050 - Non-Equivalent Credit (LACX Elective)**Course Description**

Description: This course has no Vanderbilt equivalent. Credit is eligible to count toward the major or minor in LACX.

LACX2106W - Cultivating the Americas: Plants and Culture through Vanderbilt's Latin American Garden

Course Description

Study of plants housed in the Latin America Garden; globalization of plants beginning in the sixteenth century; plants as medicines, food, and in religious practices in the Americas; agricultural crops in political and economic relationships. Writing process. [3] (INT)

LACX3500 - Climate Catastrophe? History of Environmental Law in Latin America and the Caribbean

Course Description

Comparative perspective from Colonial Period to present. Creation of laws and their impact. How marginalized groups navigated and/or resisted laws. Agriculture, mining, land-ownership, climate change. [3] (INT)

LACX3850 - Independent Study

Course Description

1-3 credits per semester; maximum of 12 credits total for four semesters of LATS 3850. [1-3] (No AXLE credit)

LACX3880 - Internship Training

Course Description

Under faculty supervision, students can gain experience in a variety of settings relative to the Latinx experience. A research paper must be submitted. Normally, a 2.7 GPA, 6 hours of prior work in LACX (or LATS) and prior approval of a specific plan by the director are required. [1-9] (No AXLE credit)

LACX3881 - Internship Readings and Research

Course Description

Under faculty supervision, students can gain internship experience relative to the Latinx experience. Hours earned based upon readings and research supervised by CLACX faculty to lend intellectual foundation to the internship experience. A research paper must be submitted at the end of the semester during which the internship is completed. [3-6] (No AXLE credit)

LACX3891 - Special Topics in Latin American, Caribbean, and Latinx St

Course Description

Selected special topics suitable for interdisciplinary examination from the perspective of the social sciences and humanities. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

LACX4961 - Capstone Seminar: LACX Literature and Culture

Course Description

Overview of cultural production, history, and political and socioeconomic experiences of Hispanic people living in the United States. Synthesis of issues, traditions, approaches, and problems. [3] (HCA)

Latin American Studies

LAS1001 - Commons iSeminar

Course Description

Topics vary. General Elective credit only. [1] (No AXLE credit.)

LAS1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

LAS2101 - Introduction to Latin America**Course Description**

A multidisciplinary survey of Latin America from pre-Columbian times to the present emphasizing culture, economic and political patterns, social issues, literature, and the arts in a historical perspective. [3] (INT)

LAS2102 - Brazil: Past, Present, and Future**Course Description**

A multidisciplinary survey of Brazil from pre-Columbian times to the present. Culture, economic and political patterns, social issues, literature, and the arts in historical perspective. [3] (INT)

LAS2150W - Afro-Diasporic Legacies**Course Description**

African-heritage's influence on music, art, literature, and social movements of the Americas. Historical roots of the African diaspora from the transatlantic slave trade to legacies of colonialism. Evolution of Afro-Latin-Caribbean music, impact of African spiritual practices, ramifications of Black social movements, and contemporary visual arts of the African diaspora. [3] (HCA)

LAS2301 - Music of Protest and Social Change in Latin America**Course Description**

Politics of musical culture. Music both as a marker of sociopolitical change and as an agent of political transformation. [3] (INT)

LAS3852 - Independent Study**Course Description**

A program of independent readings or research to be selected in consultation with the center's undergraduate adviser. Open only to juniors and seniors. May be repeated for a total of 12 credits in 3851 and 3852 combined over a four semester period, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 12 credits total for four semesters of LAS 3851 and 3852] (No AXLE credit)

LAS3880 - Internship Training**Course Description**

Under faculty supervision, students gain experience working in a variety of settings, such as civic, corporate, cultural, government, health, media, political, research, and social welfare organizations in the United States and Latin America. Background reading and research will be completed in Latin American Studies 3881 concurrently with the completion of internship training, Latin American Studies 3880. A minimum of 3 hours of 3881 must be completed, independent of hours taken in 3880. Students may earn up to 6 hours of 3881 credit. A research paper and report must be submitted at the end of the semester during which the internship training is completed. A 2.90 grade point average, 6 hours of prior work in Latin American Studies, and prior approval of the director of undergraduate studies of the student's plans are required. Offered on a Pass/Fail basis only and must be taken concurrently with 3881. Hours of 3880 cannot be included in the minimum number of hours counted toward the Latin American Studies major or minor. Corequisite: 3881. [1-9] (No AXLE credit)

LAS3881 - Internship Readings and Research**Course Description**

Under faculty supervision, students gain experience working in a variety of settings, such as civic, corporate, cultural, government, health, media, political, research, and social welfare organizations in the United States and Latin America. Background reading and research will be completed in Latin American Studies 3881 concurrently with the completion of internship training, Latin American Studies 3880. A minimum of 3 hours of 3881 must be completed, independent of hours taken in 3880. Students may earn up to 6 hours of 3881 credit. A research paper and report must be submitted at the end of the semester during which the internship training is completed. A 2.90 grade point average, 6 hours of prior work in Latin American Studies, and prior approval of the director of undergraduate studies of the student's plans are required. Corequisite: 3880. [3-6] (No AXLE credit)

LAS4550 - Gender, Sexuality, and Family in Latin America**Course Description**

Evolution of Latin American identity over time. [3] (INT)

LAS4901 - Research Seminar**Course Description**

Selected topics for the interdisciplinary study of Latin America. [3] (No AXLE credit)

Latino and Latina Studies

LATS3831 - Latino and Latina Business and Entrepreneurship**Course Description**

Research on Nashville's growing Latino and Latina communities. Types of businesses and how they function. Issues affecting businesses within the communities. Work with local community leaders. A service learning course. [3] (SBS)

Malagasy

MALA1101 - Elementary Malagasy I (Duke)**Course Description**

Malagasy language, spoken by 25 million people in Madagascar and the Comoro Islands. Speaking, listening, reading, and writing. [3] (No AXLE credit)

MALA1102 - Elementary Malagasy II (Duke)**Course Description**

Continuation of 1101. Speaking, listening, reading, writing the Malagasy language, which is spoken by 25 million people in Madagascar and the Comoro Islands. [3] (INT) (CORE LA)

MALA2201 - Intermediate Malagasy I (Duke)**Course Description**

Content-based approach focusing on aspects of Malagasy culture and society, with emphasis on the study of authentic audio and written texts. Prerequisite: 1102. [3] (INT) (CORE LA)

Materials Science & Engineering

MSE1500 - Materials Science I **Course Description**

Concepts of materials science developed from an understanding of the atomic and molecular structure of materials and their relationship to the properties of matter. Mechanical, electrical, physical, chemical, and magnetic properties of metals, ceramics, organics, composites, and semiconductors are covered. Corequisite: MSE 1500L. SPRING. [3]

MSE1500L - Materials Science Laboratory **Course Description**

Laboratory for MSE 1500. One three-hour laboratory per week. Corequisite: MSE 1500. SPRING. [1]

MSE2205 - Strength and Structure of Engineering Materials **Course Description**

Laboratory supplement to CE 2205. Students conduct experiments on the strength behavior of materials and simple engineering structures. Includes: tension and bending, fasteners, photoelastic analysis of stress concentrators, strain gage instrumentation to determine principal stresses, bending and deflection curves for simple beams, loaded columns, and short struts. Corequisite: CE 2205. FALL. [1]

MSE2500 - Materials Science II **Course Description**

Functional materials based on their electromagnetic, thermal and optical properties. Electrical and magnetic behavior of materials, semiconductivity, band gap engineering, nanostructures, and new materials, such as metamaterials. Case studies of devices found in modern vehicles, homes, communications systems, and computing devices. Prerequisite: MSE 1500. FALL. [3]

MSE3860 - Undergraduate Research **Course Description**

Open to select engineering students to do research under the guidance of a faculty member. A formal written report is required. [1-3]

MSE3890 - Special Topics **Course Description**

Technical elective courses of special current interest. No more than two semesters of this course may be credited to the student's record. Prerequisite: consent of instructor. [Variable credit: 1-3 each semester] (Offered on demand)

Math Education

MTED2200 - Mathematics for Elementary Teachers **Course Description**

This course is the first of a sequence designed for those students seeking elementary licensure with an emphasis on grades preK-3. The course deals with issues of both content and pedagogy that are relevant to these grades. The course is prerequisite to MTED 3250 and may be taken concurrent with MTED 3251. [3]

MTED2300 - Pedagogy Seminar

Course Description

This pedagogy seminar accompanies a core course in the College of Arts & Sciences and examines the process of teaching and learning of that course content. Students enrolled in the core course lecture may elect to participate in this accompanying one credit pedagogy seminar. This optional seminar will be team-taught by the core course instructor and an education faculty member. [1]

MTED3050 - Designing Computing for Learning and Everywhere Else

Course Description

In this course, students will learn how to design tools and curricula to support learning computer science in creative ways that connect with other disciplines and practices. We will explore various beginner friendly computing modalities (e.g., Scratch, MakeCode). Students will critically examine the strengths and limitations of these platforms in supporting learning and self-expression across contexts and disciplines. Through this, students will design and create tools that address critical challenges or opportunities in learning and leveraging computational thinking for learning. [3]

MTED3250 - Teaching Mathematics in Elementary Schools

Course Description

This course is the second in a sequence of courses designed for those students seeking elementary licensure with an emphasis on grades 2-5. This course deals with issues of both content and pedagogy that are relevant to these grades. This course may be taken concurrent with MTED 3251. Prerequisite: MTED 2200. [2]

MTED3251 - Practicum in Elementary Mathematics

Course Description

Field experiences providing students an opportunity to integrate and apply teaching skills developed in the elementary mathematics course. Students are placed in a local elementary school classroom and are given opportunities to engage in classroom observations, curriculum planning and implementation, and guided reflective practice. Prerequisite: MTED 2200 Corequisite: MTED 3250. May be taken only once. [3]

MTED3320 - Introduction to Literacies in Mathematics

Course Description

This course is intended for licensure candidates in secondary education for mathematics and for other students who want to explore the concepts and practices of disciplinary literacy that is the links between content and communication. [3]

MTED3360 - Computers, Teaching, and Mathematical Visualization

Course Description

Examining the 7-14 mathematics curriculum as a body of ideas that students can develop over time and the use of computer environments to support teaching and learning them. [3]

MTED3370 - Teaching Mathematics in Secondary Schools

Course Description

Study of conceptual structure, curriculum, objectives, instructional approaches, materials, learning theory, and philosophies of assessment as they relate to teaching mathematics in middle and secondary schools. Prerequisite: EDUC 3310 or consent of instructor. Corequisite: MTED 3371. [3]

MTED3371 - Professional Year Practicum**Course Description**

Observation, participation, and teaching in middle school and secondary school settings. Corequisite: MTED 3370 [3]

MTED3850 - Independent Study in Mathematics Education**Course Description**

Semi-independent study on selected topics in mathematics education. May be repeated. Consent of supervising instructor. [1-3]

MTED3890 - Special Topics in Mathematics Education**Course Description**

Exploration of special topics related to mathematics education. May be repeated with change of topic. [3]

MTED4963 - Student Teaching Seminar: Secondary**Course Description**

Seminar to accompany EDUC 4953. A \$300.00 Teacher Performance Assessment fee is associated with this course. [3]

Mathematics

MATH1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

MATH1005 - Pre-calculus Mathematics**Course Description**

Inequalities, functions and graphs, trigonometric identities, theory of equations. Designed for students who plan to take either 1200-1201 or 1300-1301 but need a stronger background in algebra and trigonometry. [3] (No AXLE credit)

MATH1010 - Probability and Statistical Inference**Course Description**

For students not planning to major in science, engineering, or mathematics. Discrete and continuous probability models (exponential, binomial, Poisson, normal). Law of large numbers; conditional probability and Bayes theorem; counting techniques and combinatorics. Descriptive statistics: measures of central tendency and dispersion, histograms. [3] (No AXLE credit)

MATH1011 - Probability and Statistical Inference**Course Description**

For students not planning to major in science, engineering, or mathematics. Linear regression, correlation, hypothesis testing. Confidence intervals, sampling distributions, statistical inference. Prerequisite: 1010. [3] (MNS)

MATH1100 - Survey of Calculus

Course Description

A basic course in the rudiments of analytic geometry and differential and integral calculus with emphasis on applications. Designed for students who do not plan further study in calculus. Not open to students who have earned credit for MATH 1200, 1201, or 1300 without permission. Total credit for this course and MATH 1200 will not exceed 4 credit hours; Total credit for this course and MATH 1300 will not exceed 5 credit hours; Total credit for this course and MATH 1201 will not exceed 6 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [4] (MNS)

MATH1111 - First-Year Writing Seminar

Course Description

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

MATH1200 - Single-Variable Calculus I

Course Description

A first semester calculus course covering differential calculus in the context of optimization and other applications to the social sciences. Review of functions and trigonometry. Exponential and logarithmic functions, inverse functions. Limits and asymptotic behavior, differentiation, rules of differentiation, related rates, maximum and minimum values, curve sketching. Not open to students who have earned credit for MATH 1100 or 1300 without permission. Total credit for this course and MATH 1100 will not exceed 4 credit hours; Total credit for this course and MATH 1300 will not exceed 5 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (MNS)

MATH1201 - Single-Variable Calculus II

Course Description

A second semester calculus course covering Integration with a particular view toward modeling problems in the social sciences using differential equations. Antiderivatives, the Fundamental Theorem of Calculus, areas and volumes, techniques of integration. First-order differential equations. Linear approximation, Euler's and Newton's methods. Probability. Students who have earned credit for 1100 or 1301 will earn only two credits for this course. Not open to students who have earned credit for MATH 1100, 1300, or 1301 without permission. Total credit for this course and MATH 1100 or 1301 will not exceed 6 credit hours; Total credit for this course and MATH 1300 will not exceed 5 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite: 1200. [3] (MNS) (CORE B) (LE MNS)

MATH1300 - Accelerated Single-Variable Calculus I

Course Description

Functions, limits, differentiation of algebraic functions, integration, applications including extrema problems, areas, volumes, centroids, and work. Not open to students who have earned credit for MATH 1100, 1200, or 1201 without permission. Total credit for this course and MATH 1100, 1200, or 1201 will not exceed 5 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [4] (MNS) (CORE B) (LE MNS)

MATH1301 - Accelerated Single-Variable Calculus II

Course Description

Differentiation and integration of transcendental functions, applications, methods of integration, coordinate geometry, polar coordinates, infinite series. Not open to students who have earned credit for MATH 1201 without permission. Total credit for this course and MATH 1201 will not exceed 6 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite: 1300 or 1201. [4] (MNS) (CORE B) (LE MNS)

MATH2100 - Introduction to Mathematical Reasoning and Exposition

Course Description

Logic, proof writing, sets, quantifiers, proof by contradiction and contrapositive, mathematical induction, relations, functions (injections, surjections, and bijections), selected topics from number theory. Not open to students who have earned credit for MATH 2500, MATH 2501, or MATH 2600. Corequisite: MATH 2300. [1.5] (No AXLE credit)

MATH2300 - Multivariable Calculus

Course Description

Vectors, curves, and surfaces in space. Functions of several variables, partial derivatives, multiple integrals. Vector integral calculus, including line and surface integrals. Not open to students who have earned credit for MATH 2310, 2500, or 2501 without permission. Total credit for this course and MATH 2310 or 2501 will not exceed 4 credit hours; total credit for this course and MATH 2500 will not exceed 5 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite: 1301 or 2200. [3] (MNS) (CORE B) (LE MNS)

MATH2310 - Multivariable Calculus with Matrix Algebra

Course Description

Vectors and matrix operations. Linear transformations, dimension, and rank. Solutions of systems of linear equations. Eigenvalues and eigenvectors. Lines, planes, and subspaces. Limits, continuity, and the derivative of functions of several variables and vector-valued functions. Extremum and constrained optimization. Multiple integrals and change of variables. Applications to probability and statistics. Not open to students who have earned credit for MATH 2300, 2400, 2410, 2500, 2501, or 2600 without permission. Total credit for this course and MATH 2300, 2400, 2500, or 2501 will not exceed 4 credit hours; total credit for this course and MATH 2410 or 2600 will not exceed 6 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite: 1301. [4] (MNS)

MATH2400 - Differential Equations with Linear Algebra

Course Description

Scalar differential equations, Laplace transforms, systems of differential equations. Gauss-elimination, algebra of matrices, determinants, vector spaces, linear operators, eigenvalues and eigenvectors. Intended for students in Biomedical Engineering, Electrical Engineering and Computer Engineering. Not open to students who have earned credit for MATH 2310, 2410, 2420, 2500, 2501, or 2610 without permission. Total credit for this course and MATH 2310, 2410, 2420, 2500, 2501, or 2610 will not exceed 4 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite or corequisite: 2300. [4] (No AXLE credit)

MATH2410 - Methods of Linear Algebra

Course Description

Vectors and matrix operations. Linear transformations and fundamental properties of finite dimensional vector spaces. Solutions of systems of linear equations. Eigenvalues and eigenvectors. Not open to students who have earned credit for MATH 2310, 2400, 2500, 2501, or 2600 without permission. Total credit for this course and MATH 2310 will not exceed 6 credit hours; total credit for this course and MATH 2400 or 2501 will not exceed 4 credit hours; total credit for this course and MATH 2500 will not exceed 5 credit hours; total credit for this course and MATH 2600 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite or corequisite: 2300. [3] (MNS) (CORE B) (LE MNS)

MATH2420 - Methods of Ordinary Differential Equations

Course Description

Linear first-order differential equations, applications, higher order linear differential equations, complementary and particular solutions, applications, Laplace transform methods, series solutions, numerical techniques. Not open to students who have earned credit for MATH 2400 or 2610 without permission. Total credit for this course and MATH 2400 will not exceed 4 credit hours; total credit for this course and MATH 2610 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite: 2300, 2310, or 2501. [3] (MNS) (CORE B) (LE MNS)

MATH2500 - Multivariable Calculus and Linear Algebra

Course Description

Vector algebra and geometry; linear transformations and matrix algebra. Real and complex vector spaces, systems of linear equations, inner product spaces. Functions of several variables and vector-valued functions: limits, continuity, the derivative. Extremum and nonlinear problems, manifolds. Multiple integrals, line and surface integrals, differential forms, integration on manifolds, theorems of Green, Gauss, and Stokes. Eigenvectors and eigenvalues. Emphasis on rigorous proofs. Not open to students who have earned credit for MATH 2300, 2310, 2400, 2410, or 2600 without permission. Total credit for this course and MATH 2300 or 2410 will not exceed 5 credit hours; total credit for this course and MATH 2310 or 2400 will not exceed 4 credit hours; total credit for this course and MATH 2600 will not exceed 6 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Open only to first-year students with a test score of 5 on the Calculus-BC Advanced Placement examination. [4] (MNS)

MATH2501 - Multivariable Calculus and Linear Algebra

Course Description

Continuation of 2500. Vector algebra and geometry; linear transformations and matrix algebra. Real and complex vector spaces, systems of linear equations, inner product spaces. Functions of several variables and vector-valued functions: limits, continuity, the derivative. Extremum and nonlinear problems, manifolds. Multiple integrals, line and surface integrals, differential forms, integration on manifolds, theorems of Green, Gauss, and Stokes. Eigenvectors and eigenvalues. Emphasis on rigorous proofs. Not open to students who have earned credit for MATH 2300, 2310, 2400, 2410, or 2600 without permission. Total credit for this course and MATH 2300, 2310, 2400, 2410, or 2600 will not exceed 4 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite: 2500 and first-year standing. [4] (MNS) (CORE B) (LE MNS)

MATH2600 - Linear Algebra

Course Description

Algebra of matrices, real and complex vector spaces, linear transformations, and systems of linear equations. Eigenvalues, eigenvectors, inner product spaces, and orthonormal bases. Designed primarily for mathematics majors. Not open to students who have earned credit for MATH 2310, 2410, 2500, or 2501 without permission. Total credit for this course and MATH 2410 will not exceed 3 credit hours; total credit for this course and MATH 2310 or 2500 will not exceed 6 credit hours; total credit for this course and MATH 2500 will not exceed 5 credit hours; total credit for this course and MATH 2501 will not exceed 4 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite or corequisite: 2300 or 2310. [3] (MNS) (CORE B) (LE MNS)

MATH2610 - Ordinary Differential Equations

Course Description

First- and second-order differential equations, applications. Matrix methods for linear systems; stability theory of autonomous systems; existence and uniqueness theory. Intended for mathematics and advanced science majors. Not open to students who have earned credit for MATH 2400 or 2420 without permission. Total credit for this course and MATH 2400 will not exceed 4 credit hours; total credit for this course and MATH 2420 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite: concurrent enrollment in 2501; or prior credit for either 2501 or both 2300 or 2310 and either 2410 or 2600. [3] (MNS) (CORE B) (LE MNS)

MATH2810 - Probability and Statistics for Engineering

Course Description

Discrete and continuous probability functions, cumulative distributions. Normal distribution. Poisson distribution and Poisson process. Conditional probability and Bayes' formula. Point estimation and interval estimation. Hypothesis testing. Covariance and correlation. Linear regression theory and the principle of least squares. Monte Carlo methods. Intended for students in Electrical Engineering and Computer Engineering. Not open to students who have earned credit for MATH 2820 without permission. Total credit for this course and MATH 2820 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite: 2300, 2310, or 2501. [3] (No AXLE credit) (CORE D) (LE MNS)

MATH2820 - Introduction to Probability and Mathematical Statistics

Course Description

Discrete and continuous probability models, mathematical expectation, moment generating functions, and joint densities. Point estimation, confidence intervals, hypothesis testing, and applications. Students taking 2820 are encouraged to take 2820L concurrently. Not open to students who have earned credit for MATH 2810 without permission. Total credit for this course and MATH 2810 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite: 2300, 2310, or 2501. [3] (MNS) (CORE D) (LE MNS)

MATH2820L - Statistics Laboratory

Course Description

Applications of the theory developed in 2820. Emphasis on data analysis and interpretation. Topics include the one- and two-sample problems, paired data, correlation and regression, chi-square, and model building. Pre- or corequisite: 2810 or 2820. [1] (No AXLE credit)

MATH2821 - Introduction to Applied Statistics

Course Description

Review of basic applied statistics. Analysis of variance as a technique for interpreting experimental data. Generalized likelihood ratio principle, confounding, multiple comparisons, introduction to response surface methodology, and nonparametric methods. Experimental designs: completely randomized, nested, orthogonal contrasts, randomized block, Latin squares, factorial, and fractional factorial. Prerequisite: 2810 or 2820. [3] (MNS) (CORE D) (LE MNS)

MATH3000 - History of Mathematics

Course Description

Major developments in mathematics from ancient times to the early twentieth century. Emphasis both on the historical perspective and the mathematics; assignments include many exercises and theorems. Highly recommended for teacher candidates. Prerequisite: 2501 or both 2300 (or 2310) with either 2410 or 2600. [3] (MNS) (CORE C) (LE MNS)

MATH3010 - Intensive Problem Solving and Exposition

Course Description

Intended to develop widely-applicable mathematical skills. Basic principles such as induction, the pigeonhole principle, symmetry, parity, and generating functions. Prerequisite: 2410, 2600, or 2501. [3] (MNS) (CORE A) (LE MNS)

MATH3100 - Introduction to Analysis

Course Description

Properties of real numbers, compactness and completeness. Limits, sequences and series, uniform convergence, and power series. Basic properties of functions on the real line, and the elementary theory of differentiation and integration. Emphasis on methods of proof used in advanced mathematics courses. Prerequisite: 2501 or both 2300 (or 2310) with either 2410 or 2600. [3] (MNS)

MATH3110 - Complex Variables

Course Description

Complex numbers, analytic and elementary functions, transformations of regions. Complex integrals, Cauchy's integral theorem and formula, Taylor and Laurent series. The calculus of residues with applications, conformal mappings. Prerequisite: 2410, 2600, or 2501. [3] (MNS)

MATH3120 - Introduction to Partial Differential Equations

Course Description

Initial- and boundary-value problems for partial differential equations using separation of variables in conjunction with Fourier series and integrals. Explicit solutions of problems involving the heat equation, the wave equation, and Laplace's equation. Prerequisite: Either 2410, 2600, or 2501 and either 2400, 2420, or 2610. [3] (MNS)

MATH3130 - Fourier Analysis

Course Description

Fourier series topics including convolution, Poisson kernels, Dirichlet kernels, and pointwise and mean-square convergence. Integral transforms including one-dimensional and multidimensional Fourier integrals, Fourier inversion formula and Plancherel theorem, Poisson summation formula, Radon transform, and X-ray transform. Fourier analysis on Abelian groups including finite Fourier analysis and fast Fourier transform. Applications to signal processing, Shannon sampling theory, and/or compressed sensing. Prerequisite: Either 2501; or both 2300 (or 2310) with either 2410 or 2600. [3] (MNS)

MATH3200 - Introduction to Topology

Course Description

Open sets, closed sets, continuity, compactness, and connectivity. Subspaces, product spaces, and quotient spaces. Knot theory, topology of surfaces, and applications. Prerequisite: 2410, 2600, or 2501. [3] (MNS)

MATH3210 - Transformation Geometry

Course Description

Transformations of the plane, groups of transformations, reflections, glide reflections, classification of the isometries of the plane, frieze groups, analysis of frieze patterns, wall paper groups, and analysis of wall paper patterns. Especially recommended for prospective teachers of mathematics. Prerequisite: 2410, 2600, or 2501. [3] (MNS)

MATH3230 - Introduction to Differential Geometry

Course Description

Smooth maps, tangent space, and surfaces and hypersurfaces in n -dimensional Euclidean space. Inverse and Implicit Function theorems. Sard's theorem. Transversality. Degree of a map; intersection theory modulo 2. Orientability and oriented intersection number. Prerequisite: 2501 or both 2300 and either 2410 or 2600. [3] (MNS)

MATH3300 - Abstract Algebra

Course Description

Fundamental properties of integers and polynomials. Elementary properties of groups, rings, integral domains, fields, and lattices. Prerequisite: 2410, 2600, or 2501. [3] (MNS)

MATH3310 - Introduction to Mathematical Logic

Course Description

Development of the first order predicate calculus and fundamental metamathematical notions. Prerequisite: 2410, 2600, or 2501. [3] (MNS)

MATH3320 - Error-Correcting Codes and Cryptography

Course Description

Applications of algebra to reliability and secrecy of information transmission. Error-correcting codes, including linear, Hamming, and cyclic codes, and possibly BCH or Reed-Solomon codes. Cryptography, including symmetric-key, DES and RSA encryption. Prerequisite: 2410, 2600, or 2501. [3] (MNS)

MATH3330 - Advanced Linear Algebra

Course Description

Orthogonal bases, orthogonal projections, Gram-Schmidt orthogonalization, Householder transformations, and Courant-Fisher min-max Theorem. Normal, self-adjoint matrices, pseudo inverses, and positive definite and semi-definite matrices. Matrix decompositions including QR factorization, diagonalization, Jordan decomposition, and singular value decomposition. Hilbert spaces, linear functionals, and Riesz Representation Theorem. Applications include least squares problems, regression models, optimization, data denoising, principle component analysis, and dimension reduction for data analysis. Serves as repeat credit for Math 3890 section 01 in Spring 2018 or Spring 2019. Prerequisite: 2410 or 2501 or 2600. [3] (MNS)

MATH3600 - Advanced Engineering Mathematics

Course Description

Vector analysis including directional derivatives, transformation of coordinates, divergence and curl. Line integrals, surface integrals, and divergence theorem. Stokes' theorem. Functions of a complex variable, including limits, derivatives, and Cauchy-Riemann equations. Exponential, trigonometric, hyperbolic, and logarithmic functions. Complex integrals, Cauchy's integral theorem and formula. Taylor and Laurent series. Calculus of residues. Prerequisite: 2400, 2420, or 2610. [3] (MNS)

MATH3620 - Introduction to Numerical Mathematics

Course Description

Numerical solution of linear and nonlinear equations, interpolation and polynomial approximation, non-numerical differentiation and integration. Least-squares curve fitting and approximation theory, numerical solution of differential equations, errors and floating point arithmetic. Application of the theory to problems in science, engineering, and economics. Student use of the computer is emphasized. Familiarity with computer programming is expected. Prerequisite: Either 2410, 2600, or 2501, and either 2400, 2420, or 2610. [3] (MNS) (CORE D) (LE MNS)

MATH3630 - Mathematical Modeling in Biology and Medicine

Course Description

Basic mathematical modeling tools, such as interpolation, least-squares regression, difference equations, and ordinary and partial differential equations. Statistical analysis of data, support vector machines, and computer simulation. Familiarity with computer programming is expected. Prerequisite: Either 2410, 2600, or 2501, and either 2400, 2420, or 2610. [3] (MNS)

MATH3640 - Probability

Course Description

Combinatorics, probability models (binomial, Poisson, normal, gamma, etc.), Stochastic independence, generating functions, limit theorems and types of convergence, bivariate distributions, transformations of variables. Markov processes and applications. Prerequisite: 2810 or 2820. Co-requisite 2410, 2501, or 2600 [3] (MNS)

MATH3641 - Mathematical Statistics

Course Description

Distribution theory, order statistics, theory of point estimation and hypothesis testing, normal univariate inference, Bayesian methods, sequential procedures, regression, nonparametric methods. Students interested in applications may take 2820L. Prerequisite: 3640. [3] (MNS)

MATH3650 - Introduction to Financial Mathematics

Course Description

Theory of interest including time value of money, annuities, rates of return, yield curves, and immunization. Pricing of financial instruments including annuities, bonds, stocks, and derivatives using arbitrage-free assumptions. Foundational for actuarial science. Prerequisite: 2300, 2310, or 2501. Corequisite: 2810, 2820, or 3640. [3] (MNS)

MATH3651 - Actuarial Models

Course Description

Probabilistic analysis of insurance. Single-life models, including time-value of benefits, life annuities, premiums, and benefit reserves: Multiple-decrement models; Multiple-life models. Probabilistic topics: Markov chains and Poisson processes. Prerequisite: 3650 and either 2810, 2820 or 3640. [3] (MNS)

MATH3660 - Mathematical Modeling in Economics

Course Description

Modeling microeconomic problems of supply and demand, profit maximization, and Nash equilibrium pricing. Auctions and bargaining models. Statistical models and data analysis. Computational experiments. Prerequisite: 2300, 2310, or 2501. [3] (MNS)

MATH3670 - Mathematical Data Science

Course Description

Linear methods for regression and classification, bias-variance tradeoff, and basis expansions and regularization. Kernel methods, support vector machines, dimension reduction, and clustering algorithms. Serves as repeat credit for MATH 3890-01 in Fall 2017. Prerequisite: one of 2810, 2820, or 3641; and one of 2410, 2501, or 2600. [3] (MNS)

MATH3700 - Discrete Mathematics**Course Description**

Elementary combinatorics including permutations and combinations, the principle of inclusion and exclusion, and recurrence relations. Graph theory including Eulerian and Hamiltonian graphs, trees, planarity, coloring, connectivity, network flows, some algorithms and their complexity. Selected topics from computer science and operations research. Prerequisite: 2410, 2600, or 2501. [3] (MNS)

MATH3710 - Mathematical Game Theory**Course Description**

Zero-sum games and the Minimax Theorem. General-sum games and existence of Nash equilibria. Extensive games with incomplete and imperfect information and construction of normal forms. Repeated games and repetition with discounting. Cooperative games, Shapley's Theorem, and Nash bargaining. Construction and verification of strategies. Prerequisite: 2410, 2600, or 2501. [3] (MNS)

MATH3800 - Theory of Numbers**Course Description**

Factorization of integers, Fundamental Theorem of Arithmetic, congruences, Wilson's theorem. Fermat's theorem, arithmetic functions, perfect numbers, Law of Quadratic Reciprocity. Diophantine equations, Pythagorean triples, sums of squares. Prerequisite: 2410, 2600, or 2501. [3] (MNS)

MATH3859 - Independent Study**Course Description**

Reading and independent study in mathematics under the supervision of an adviser. Designed primarily for honors candidates, but open to others with approval by department chair. [Variable credit: 1-3 each semester, not to exceed 6 without departmental permission] (No AXLE credit)

MATH3890 - Selected Topics for Undergraduates**Course Description**

Topics vary. May be repeated for a total of 12 credits in 3890 and 3895 combined if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: 2501; or both 2300 (or 2310) with either 2410 or 2600. [1-3; maximum of 12 credits total for all semesters of MATH 3890 and 3895 combined] (No AXLE credit)

MATH4110 - Partial Differential Equations**Course Description**

Classification of equations: equations of elliptic, parabolic, and hyperbolic type. Separation of variables, orthonormal series, solutions of homogeneous and nonhomogeneous boundary value problems in one-, two-, and three-dimensional space. Possible additional topics include subharmonic functions and the Perron existence theorem for the Laplace equation of Sturm-Liouville theory. Prerequisite: Either 2410, 2600, or 2501, and either 2400, 2420, or 2610. [3] (MNS)

MATH4200 - Topology**Course Description**

Connectedness, compactness, countability, and separation axioms. Complete metric spaces. Function spaces. Prerequisite: 2501, 3200, or 4220. [3] (MNS)

MATH4201 - Topology**Course Description**

The fundamental group and covering spaces. Topology of surfaces. Simplicial complexes and homology theory. Homotopy theory. Prerequisite: 4200. [3] (MNS)

MATH4300 - Modern Algebra**Course Description**

Group theory through Sylow theorems and fundamental theorem of finitely generated abelian groups. Prerequisite: 3300. [3] (MNS)

MATH4301 - Modern Algebra**Course Description**

Introductory theory of commutative rings and fields, and additional topics such as Galois theory, modules over a principal ideal domain and finite dimensional algebras. Prerequisite: 4300. [3] (MNS)

MATH4310 - Set Theory**Course Description**

The basic operations on sets. Cardinal and ordinal numbers. The axiom of choice. Zorn's lemma, and the well-ordering principle. Introduction to the topology of metric spaces, including the concepts of continuity, compactness, connectivity, completeness, and separability. Product spaces. Applications to Euclidean spaces. Strongly recommended for beginning graduate students and for undergraduates who plan to do graduate work in mathematics. Prerequisite: 2501; or both 2300 (or 2310) with either 2410 or 2600. [3] (MNS)

MATH4320 - Lattice Theory and the Theory of Ordered Sets**Course Description**

An introduction to basic concepts and theorems in lattice theory and the theory of ordered sets with connections to universal algebra and computer science. Boolean algebras, modular and distributive lattices, ordered topological spaces, algebraic lattices and domains, fixed point theorems, cosets, free lattices. Prerequisite: 3300. [3] (MNS)

MATH4600 - Numerical Analysis**Course Description**

Finite difference and variational methods for elliptic boundary value problems, finite difference methods for parabolic and hyperbolic partial differential equations, and the matrix eigenvalue problem. Student use of the computer is emphasized. Prerequisite: 3620. [3] (MNS)

MATH4610 - Methods of Mathematical Physics**Course Description**

Linear operators on vector spaces, matrix theory, and Hilbert spaces. Functions of a complex variable and calculus of residues. Ordinary and partial differential equations of mathematical physics, boundary value problems, special functions. Prerequisite: Either 2410, 2600, or 2501, and either 2400, 2420, or 2610. [3] (MNS)

MATH4620 - Linear Optimization**Course Description**

Linear programming and its applications. Formulation of linear programs. The simplex method, duality, complementary slackness, dual simplex method, and sensitivity analysis. The ellipsoid method. Interior point methods. Applications to networks, management, engineering, and physical sciences. Familiarity with computer programming is expected. Prerequisite: either 2410, 2600, or 2501. [3] (MNS)

MATH4630 - Nonlinear Optimization**Course Description**

Mathematical modeling of optimization problems. Theory of unconstrained and constrained optimization, including convexity and the Karush-Kuhn-Tucker conditions. Derivative- and non-derivative-based methods. Familiarity with computer programming is expected. Prerequisite: 2501; or both 2300 (or 2310) and either 2410 or 2600. [3] (MNS)

MATH4650 - Financial Stochastic Processes**Course Description**

The theory of stochastic processes and applications to financial economics. Brownian motion; martingales; Itô's Lemma; stochastic integration. Monte Carlo simulations with variance reduction techniques. Applications include discrete-time option pricing and delta hedging. Prerequisite: 3650 and either 2810, 2820, or 3640. [3] (MNS)

MATH4651 - Evaluation of Actuarial Models**Course Description**

Applications of statistics to the evaluation and selection of actuarial models. Severity, frequency, and aggregate models. Measure of risk. Applications of Bayesian analysis to credibility theory. Simulation and bootstrap methods. Prerequisite: 3651, 3641, and 4650. [3] (MNS)

MATH4700 - Combinatorics**Course Description**

Elements of enumerative analysis including permutations, combinations, generating functions, recurrence relations, the principle of inclusion and exclusion, and Polya's theorem. Some special topics will be treated as class interest and background indicate (e.g., Galois fields, theory of codes, and block designs). Students unfamiliar with permutations, combinations, and basic counting techniques should take 3700 prior to 4700. Prerequisite: 2410, 2600, or 2501. [3] (MNS)

MATH4710 - Graph Theory**Course Description**

The mathematical theory of networks. Traversing graphs using paths, cycles, and trails. Matchings and other graph factors. Coloring of vertices and edges. Connectivity and its relation to paths and flows. Embeddings of graphs in surfaces, especially the plane. Prerequisite: linear algebra. Students unfamiliar with basic ideas of graph theory, including paths, cycles, and trees, should take 3700 prior to 4710. [3] (MNS)

MATH4999 - Senior Thesis**Course Description**

A written presentation of research results, original for the student but not usually original in the larger sense. The regulations governing the writing of a master of arts thesis in mathematics will apply to the writing of the senior thesis. [3] (No AXLE credit)

Mechanical Engineering

ME1150 - Automotive Components Seminar**Course Description**

General automotive knowledge for engineering and design considerations. Basic component function, terminology and design. Suspension (including suspension kinematics), steering (including steering geometry), driveline, transmission, engine and braking. [1]

ME1151 - Laboratory in Machining**Course Description**

Machining and fabrication of metals and plastics. Fabrication, design and manufacturability of parts or components. [1]

ME1152 - Laboratory in Welding**Course Description**

Theory of welding processes and welding of metals. Design, fabrication, and manufacturability of parts or components using welding processes. [1]

ME1153 - Computer Aided Design**Course Description**

Use of computers for solid modeling of machine parts and assemblies. [1]

ME2160 - Introduction to Mechanical Engineering Design**Course Description**

Design fundamentals, computer-aided design, machine fabrication techniques, technical drawing, team-based learning, and a comprehensive design project. Prerequisite: ES 1401-1403 and Mechanical Engineering major. FALL. [3]

ME2171 - Instrumentation Laboratory**Course Description**

Techniques associated with engineering measurements, curve fitting, presentation, and analysis of data. Corequisite: MATH 2300. SPRING. [2]

ME2190 - Dynamics**Course Description**

The principles of dynamics (kinematics and kinetics) of particles and rigid bodies. Mechanical vibrations. Continuous media. Prerequisite: CE 2200, PHYS 1601. Corequisite: MATH 2300. FALL, SPRING, SUMMER. [3]

ME2220 - Thermodynamics**Course Description**

Application of the first and second laws to energy transformation processes and properties of technologically important materials. Prerequisite: PHYS 1601, MATH 2300. FALL, SPRING, SUMMER. [3]

ME2273 - How to Make (Almost) Anything**Course Description**

No-tech to high-tech tools and strategies for design. Practical aspects of 2D and 3D CAD and 3D scanning for additive manufacturing and laser cutting. Hands-on experience with molding and casting, sewing, composite manufacturing, foam fabrication, vacuum forming, material selection, electronics, and other methods to facilitate the prototyping process. Open to first-years, sophomores, and juniors. No prior engineering knowledge is required. All majors are eligible. Serves as repeat credit for ME 3273. [3]

ME2373 - Make it Real and Make it Matter**Course Description**

Team-based, semester-long design-build-test project with an external sponsor; customer insights; translation to requirements and constraints; concept development; prototyping; iterative client engagement. Axiomatic design; advanced prototyping methods; design for manufacturing; AI tools in the design process. All majors eligible. Prerequisite: ME 2273 or DF 2100. [3]

ME3202 - Machine Analysis and Design**Course Description**

Application of the principles of mechanics of materials to the analysis and synthesis of machine elements. Corequisite: CE 2205. FALL. [3]

ME3204 - Mechatronics**Course Description**

Design of analog and digital electromechanical sensors and actuators, signal and power electronics, and application of digital microcontrollers to mechatronic systems. Prerequisite: EECE 2112; CS 1100 or 1101 or 1103 or 1104. SPRING. [3]

ME3224 - Fluid Mechanics**Course Description**

Physical properties of fluids, surface tension, viscosity; fluid statics and dynamics; control volume analysis of mass, momentum, and energy; dimensional analysis, similitude, and modeling; viscous flows in pipes; drag and lift on immersed bodies. Prerequisite: ME 2190, MATH 2420. Credit not awarded for both ME 3224 and CE 3700. FALL. [3]

ME3234 - System Dynamics**Course Description**

Energy-based modeling of dynamic mechanical, electrical, thermal, and fluid systems to formulate linear state equations, including system stability, time domain response, and frequency domain techniques. Three lectures and one three-hour laboratory. Prerequisite: ME 2190, MATH 2420. FALL. [4]

ME3248 - Heat Transfer**Course Description**

Steady-state and transient heat transfer by conduction, forced and free convection and radiation, including heat transfer by boiling and condensing vapors. Application is made to practical design problems. Prerequisite: ME 2220, ME 3224. SPRING. [3]

ME3273 - How to Make (Almost) Anything and Make it Matter**Course Description**

No-tech to high-tech tools and strategies for design. Practical aspects of 2D and 3D CAD for additive manufacturing and laser cutting. Hands-on experience with molding and casting, sewing, composite manufacturing, foam fabrication, vacuum forming, material selection, and other methods to facilitate the prototyping process. Application of human-centered design in a team-based semester-long project with an external sponsor. Open to sophomores and juniors only. No prior engineering knowledge is required; all majors are eligible. Serves as repeat credit for ME 2273. [3]

ME3850 - Independent Study**Course Description**

Under the direction of a faculty member, students study in a focused area of mechanical engineering culminating in an engineering report of the activities and findings. [1-3 each semester; maximum of 6 hours total for all semesters of ME 3850]

ME3860 - Undergraduate Research**Course Description**

Under the direction of a faculty member, students conduct a research project. A formal, written report is required. No more than 6 hours of ME 3860 can be credited toward the degree. [1-3]

ME3890 - Special Topics**Course Description**

Technical elective courses of special current interest. FALL, SPRING, SUMMER. [Variable credit: 1-3 each semester] (Offered on demand)

ME4213 - Energetics Laboratory**Course Description**

Experimental methods in heat transfer, fluid mechanics, and thermodynamics as applied to energy conversion systems and their analyses. Prerequisite: Senior standing. FALL. [2]

ME4221 - Intermediate Thermodynamics**Course Description**

Application of principles of thermodynamics to vapor and gas cycles, mixtures, combustion, and compressible flow. Prerequisite: ME 2220. Corequisite: MATH 2420. [3]

ME4226 - Gas Dynamics**Course Description**

Compressible flow from subsonic to supersonic. Shock waves, expansion waves, shock tubes, and supersonic airfoils. Prerequisite: ME 3224. [3]

ME4236 - Linear Control Theory**Course Description**

Classical and modern approaches to the analysis and design of single-input/single-output (SISO) and multiple-input/multiple-output (MIMO) linear time invariant control systems. Classical (frequency-domain) and modern (state-space) approaches to SISO and MIMO control, including optimal control methods. Prerequisite: ME 3234. FALL. [3]

ME4251 - Modern Manufacturing Processes**Course Description**

Manufacturing science and processes. A quantitative approach dealing with metals, ceramics, polymers, composites, and nanofabrication and microfabrication technologies. Prerequisite: ME 3202. Corequisite: ME 4950. [3]

ME4258 - Engineering Acoustics

Course Description

The wave equation and its solutions; acoustic sources; reflection and transmission of sound; propagation in pipes, cavities, and waveguides; noise standards and effects of noise on people; principles of noise and vibration control; signal processing in acoustics; environmental noise measurement and control; and various contemporary examples. Prerequisite: MATH 2400 or 2420. [3]

ME4259 - Engineering Vibrations

Course Description

Theory of vibrating systems and application to problems related to mechanical design. Topics include single degree of freedom systems subject to free, forced, and transient vibrations; systems with several degrees of freedom, methods of vibration suppression and isolation, and critical speed phenomena. Prerequisite: ME 2190, MATH 2420. [3]

ME4260 - Energy Conversion

Course Description

Energy resources, use, and conservation are studied. The fundamentals of positive displacement machinery, turbo-machinery, and reactive mixture are introduced and used to examine various forms of power-producing systems. Prerequisite: ME 2220, ME 3224. [3]

ME4261 - Basic Airplane Aerodynamics

Course Description

Study of the atmosphere; analysis of incompressible and compressible flows, shock waves, boundary layer and skin friction drag, lift and drag forces over airfoils and wings, and flight performance; aircraft stability and control, wing icing, and parachute-based recovery; history of flight and aerodynamics. Corequisite: ME 3224. [3]

ME4262 - Environmental Control

Course Description

Heating and cooling systems, energy conservation techniques, use of solar energy and heat pumps. Prerequisite: ME 2220. Corequisite: ME 3248. [3]

ME4263 - Computational Fluid Dynamics and Multiphysics Modeling

Course Description

Computational modeling of viscous fluid flows and thermal-fluid-structure interaction. Computational techniques including finite-difference, finite-volume, and finite-element methods; accuracy, convergence, and stability of numerical methods; turbulence modeling; rotating machinery; multiphase flows; and multiphysics modeling. Prerequisite: ME 3224. SPRING. [3]

ME4264 - Internal Combustion Engines

Course Description

Thermodynamics of spark ignition and compression ignition engines; gas turbines and jet propulsion. Prerequisite: ME 2220. [3]

ME4265 - Direct Energy Conversion

Course Description

The principles and devices involved in converting other forms of energy to electrical energy. Conversion devices: electro-mechanical, thermoelectric, thermionic, fluid dynamic, and fuel cell. Prerequisite: ME 2220. [3]

ME4267 - Aerospace Propulsion**Course Description**

Application of classical mechanics and thermodynamics to rocket and aircraft propulsion. Design and performance analysis of air-breathing and chemical rocket engines. Advanced propulsion systems for interplanetary travel. Contemporary issues in aerospace propulsion: space exploration, renewable fuels. Prerequisite: ME 2220, ME 3224. [3]

ME4271 - Robotics**Course Description**

History and application of robots. Robotic mechanical architecture, mobility analysis of linkages, rotations and rigid body transformations and their parametrizations. Homogeneous coordinates of points and lines, exponential coordinates of rotation and twist coordinates, direct and inverse position analysis of serial manipulators and elimination theory. Serial robot statics and compliance, motion interpolation/path planning, instantaneous kinematics and Jacobian formulations. Lagrangian dynamics of serial robots, and motion control. Prerequisite: One of MATH 2400, 2410, 2500, 2501, or 2600. [3]

ME4272 - Applied Robotics**Course Description**

Hands-on use of commercial robots including programming, robotic operating systems, external metrology (e.g. optical/magnetic trackers) for robot guidance, robot registration to task space with medical applications, robot path planning, camera calibration, and visual servoing. Prereq: ME 4271. Familiarity with a high level programming language (e.g. Python, C++) is recommended. [3]

ME4273 - Bio-inspired Robotics**Course Description**

(Also listed as ME 5273). Biologically inspired materials, sensors, actuators, devices, and robots designed for medical applications. Recent technological advancements in biomechanics of biological systems and progress in developing bio-inspired robotic systems aimed at understanding, diagnosing, and treating diseases in medical contexts. No credit for students who have earned credit for 5273. Prerequisites: CS 1100 or 1101 or 1103 or DS 1100. [3]

ME4275 - Finite Element Analysis**Course Description**

Development and solution of finite element equations for solid mechanics and heat transfer problems. Commercial finite element and pre- and post-processing software. Prerequisite: CE 2205, MATH 2420. [3]

ME4280 - Advanced Dynamics of Mechanical Systems**Course Description**

Development of methods for formulating differential equations to model mechanical systems, including formalisms of Newton-Euler, Lagrange, and virtual work methods to two- and three-dimensional systems. Prerequisite: ME 2190, MATH 2420. [3]

ME4284 - Modeling and Simulation of Dynamic Systems**Course Description**

Incorporates bond graph techniques for energy-based lumped-parameter systems. Includes modeling of electrical, mechanical, hydraulic, magnetic and thermal energy domains. Emphasis on multi-domain interaction. Prerequisite: ME 3234. [3]

ME4950 - Design Synthesis**Course Description**

Development of the design process: problem definition, design specifications, solution identification, idea synthesis, modeling and simulation, and design completion. Critical elements include problem selection, idea synthesis, and proposal writing. Individual design synthesis study projects required. Prerequisite: ME 2160 and senior standing in Mechanical Engineering. FALL. [2]

ME4951 - Engineering Design Projects**Course Description**

Each student participates in a major group design project. Lectures will cover case studies and topics of current interest in design. Prerequisite: ME 4950. SPRING. [3]

ME4959 - Senior Engineering Design Seminar**Course Description**

Elements of professional engineering practice. Professionalism, licensing, ethics and ethical issues, intellectual property, contracts, liability, risk, reliability and safety, interdisciplinary teams and team tools, codes, standards, professional organizations, careers, entrepreneurship, human factors, and industrial design. Prerequisite: senior standing. Corequisite: ME 4950. FALL. [1]

Medicine, Health, and Society

MHS1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

MHS1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

MHS1500 - Introduction to Microbiology**Course Description**

Diversity of bacteria and viruses. Genetics and metabolism of bacteria. Pathogenesis, host immune defense mechanisms, rationale for antimicrobial drugs. Bacteria, fungi, viruses, and parasites important to humans. No credit for students who have earned credit for NURS 1500. [3-4] (MNS)

MHS1600 - Introduction to Nutrition and Health for a Changing World**Course Description**

Nutrition science and research; basic principles of digestion and absorption; role of specific nutrients and dietary practices in health promotion and chronic disease prevention. Nutrition throughout the lifespan. Not intended for students who have previously taken NURS 1601 or NURS 1602. [3] (MNS)

MHS1920 - Politics of Health**Course Description**

Sociocultural analysis of the conflicts, definitions, inequalities, and structures of power that influence health. [3] (P)

MHS1930 - Social Dimensions of Health and Illness**Course Description**

Multidisciplinary introduction to health conditions from perspectives of anthropology, economics, history, political science and policy studies, philosophy, religious studies, and sociology. Guest lectures by representatives of various disciplines. [3] (P)

MHS1950 - Theories of the Body**Course Description**

Interdisciplinary study of the human body through critical theory, history, philosophy, art, and popular culture. How cultural understandings of bodies reflect broader social, political, scientific, and legal regimes. [3] (HCA)

MHS1960 - Health Humanities**Course Description**

Cultural, political, and material aspects of human health through novels, memoirs, articles, poems, and films. Serves as repeat credit for students who have earned credit for MHS 3890-04 offered spring 2019 and fall 2018. [3] (HCA)

MHS2100 - Foundations of Medicine, Health, and Society**Course Description**

Social science and humanities perspectives on the study of health and medicine. Not open to students who have earned credit for any of MHS 1920, 1930, 1950, 1960, or 2110. [3] (P)

MHS2110 - American Medicine and the World**Course Description**

Social foundations of medical authority. Health disparities in the United States and abroad. Effects of social settings of medical research, evaluation, and treatment on health outcomes. Inequalities in medical knowledge and institutions. [3] (P) (CORE B, C) (LE SBS)

MHS2120 - Health Social Movements**Course Description**

Health inequality and inequity based on race, ethnicity, gender, class, and sexuality. Issues related to access to health care services. Crusades for certain diseases, illness experiences, and disabilities. Challenging science on etiology, diagnosis, treatment, and prevention. [3] (P)

MHS2130 - Social Movements and Community Action**Course Description**

The literature of social activism. How citizens individually and collectively accomplish and resist social change. Historical and contemporary health movements as case studies to illustrate the advantages and limitations of social change strategies. [3] (SBS)

MHS2140 - Health Care in the United States: Policy and Politics

Course Description

Public health and health care delivery systems. Evolving social and economic climates that shape health. Topics include health care access, cost, quality, and health disparities; trends in health care industries; the global COVID-19 pandemic; and comparative health systems. Not open to students who have completed MHS 3890-06 offered spring 2021, or MHS 3890-03 offered fall 2020. [3] (US)

MHS2150 - Medical Humanities

Course Description

Conceptual and creative analysis of philosophy, literature, art, and music to identify and account for human nature in the medical context. Ethical, practical, and social management of medical technology. Theories of art, music, and literature to understand human creativity and self-explanation in the face of illness and difference. [3] (HCA)

MHS2155 - Insanity, Impropriety, Hysteria & Gender

Course Description

A narrative and medical history of the concept of hysteria as a mental illness with its foundations in nineteenth century psychoanalysis. How gender impacts perception of mental illness, socially appropriate behavior, and whose story is believed as "truth." Four major course themes: medical history, mental health narratives, horror, and comedy. Serves as repeat credit for MHS 3890, section 01 in Fall 2024 and Spring 2025. [3] (HCA)

MHS2210 - Examining Care & Caregiving

Course Description

Various cultural conceptions of what counts as good care, drawn from anthropology, sociology, films, and literature. Medicare, Medicaid; home healthcare of older adults in the United States, South Korea, Denmark, and Thailand. Drug treatment and sexual assault survivor programs. Provision of care during epidemics and pandemics. Not open to students who have completed MHS 3890-01 offered Spring 2021.[3] (P)

MHS2220 - Vaccines and Public Health Policy

Course Description

History of vaccination; specific episodes utilized to prevent illness, disability, and death. Social, ethical, and political controversies that vaccines have generated. Serves as repeat credit for MHS 3890-04 offered Spring 2024. [3] (SBS) (CORE B, D) (LE SBS)

MHS2230 - Masculinity and Men's Health

Course Description

Interdisciplinary approach to men's health issues and to perceptions of masculinity. The history of men's diseases. Men in clinical settings. Social policies that affect men's health behaviors. [3] (P)

MHS2240 - Bionic Bodies, Disability Cultures

Course Description

Historical and cultural evolution of prosthetics, artificial limbs, and other assistive technologies. Shifts in social views resulting from war, economics, and art and design. [3] (HCA)

MHS2250 - War and the Body**Course Description**

Impact of war on the human body. Anthropology of the body and theories of bodily experience. Production, representation, and experience of war and of military and medical technologies on a bodily level. Acceptable and unacceptable types of harm. [3] (P) (CORE C, E) (LE SBS)

MHS2260 - LGBTQ Health Disparities**Course Description**

LGBTQ terminology and history related to health; frameworks, theories, and research methods; potential solutions to reduce LGBTQ health inequities. Roles of interpersonal influences, family and close relationships, community and social organizations. Public policy, public health, and healthcare interventions. [3] (SBS) (CORE B, D) (LE SBS)

MHS2270 - Racial and Ethnic Health Disparities**Course Description**

[Formerly listed as MHS 1940] Relationship between health outcomes and race and ethnicity. Historical and contemporary factors influencing differences in health outcomes, including mental health, HIV/AIDS, and other chronic diseases. Explanations of health disparities and of strategies to reduce them. [3] (SBS)

MHS2280 - AI and Environment**Course Description**

AI in the context of environmental, political, and scientific challenges. Research skills to analyze, visualize, and communicate AI's environmental impacts. [3] (SBS) (CORE: LB)

MHS2310 - Chinese Society and Medicine**Course Description**

Medicine and health in contemporary China. Social organization of medical care, social determinants of health and disease, social construction of health and disease, and health-related social problems. [3] (SBS)

MHS2320 - Medicine, Law, and Society**Course Description**

Survey of issues in medicine and law, including the physician-patient relationship, medical malpractice, organ donation, healthcare financing, and the limits and powers of the government to protect the public's health. [3] (SBS) (CORE B, E) (LE SBS)

MHS2330 - Men's Health Research & Policy**Course Description**

Concepts and theories of men's health. Global and domestic issues. Effect of men's social and economic advantages on health outcomes. Strategies to improve men's health; relationships between cultural values and health policy; and cultural explanations that shape men's health campaigns. [3] (SBS)

MHS2333 - Policing the Pandemic**Course Description**

Full description pending. [3]

MHS2350 - Italian Representations of Wellness and Illness**Course Description**

From 1300 to the present. Depictions of health and sickness in Italian literature, art, and film. Historical, cultural, and social dimensions of health in Italy and changes in the societal approach to health. Italian society's views on health, wellness, and the stigmatization of physical and mental illness. [3] (INT)

MHS2375 - Families in Turbulent Times**Course Description**

Intergenerational contemporary issues that impact individual and family stress; change and resiliency strategies that impact health and access to healthcare. No credit for students who have earned credit for MHS 5375. Serves as repeat credit for students who completed MHS 3890-08 offered Fall 2022, or MHS 3890-02 offered Spring 2023, or MHS 3890-08 offered Fall 2023. [3] (SBS)

MHS2410 - HIV/AIDS in the Global Community**Course Description**

Medical, social, political, economic, and public policy dimensions of HIV/AIDS. Prevention and treatment strategies, social stigma, and discrimination. [3] (P)

MHS2420 - Economic Demography and Global Health**Course Description**

Economic consequences of demographic change in developing and developed countries. Links between socioeconomic status and health; relationship between health and economic growth; determinants of fertility, mortality, and migration. [3] (SBS) (CORE: LB)

MHS2430 - Social Capital and Health**Course Description**

Theoretical approaches to social capital and their applications to the social production of disease and illness. Theoretical background of social capital; the conceptualization and measurement of social capital; and the multiple roles of social capital as a social antecedent of health. [3] (SBS) (CORE LB)

MHS2510 - Caring for Vulnerable Populations**Course Description**

Humanitarian aid and the risks and responsibilities in providing for vulnerable populations. Differences between acute and chronic crises. Geopolitical, cultural, clinical, and practical factors. [3] (No AXLE credit)

MHS2520 - Autism in Context**Course Description**

Multiple manifestations. Impact, questions, and debates. Familial, educational, sociological, legal, and medical contexts. [3] (SBS)

MHS2530 - Guns in America**Course Description**

Role of guns in the U.S. through the lenses of history, sociology, law, medicine, public health, and other disciplines. Prevalence and distribution of guns. Injury prevention, lawful possession, and use of firearms. Gun crime, mass shootings, mental illness, politics, and gun culture. Serves as repeat credit for MHS 3890-04 offered Fall 2023 and MHS 3890-04 offered Fall 2024. [3]

MHS2610 - Global Health Crises

Course Description

Development of global health priorities, responses to emerging crises, and unintended consequences of global health interventions. [3] (INT)

MHS2700 - Trauma, Violence, & Health

Course Description

Various types of traumas and how they impact people and communities; short- and long-term psychological, behavioral, and physical effects. Influences on physical and mental health, interactions with the health care system and health care providers, educational outcomes, and quality of relationships. Theories of trauma, interventions, empirical studies, and mass traumas, with attention to issues of diverse populations and multiculturalism. Serves as repeat credit for students who have completed MHS 3890 section 02 offered fall 2019, or 3890 section 07 offered spring 2020, or 3890 section 02 offered fall 2020, or 3890 section 07 offered spring 2021, or 3890 section 01 offered summer 2021, or 3890 section 01 offered fall 2021, or 3890 sections 07 or 08 offered spring 2022. [3] (P)

MHS2800 - Foundations of Population Health Theory and Practice

Course Description

Causes of morbidity and mortality. Socioeconomic, behavioral, and environmental factors of health. Role of government in protecting health. Analytic methods and recent challenges or controversies in the field. Noticing and interpreting through a population health lens, responding to strengthen population health, and reflecting on ethics and evaluating interventions. Serves as repeat credit for students who have earned credit for MHS 3890 section 05 offered Fall 2023, or MHS 3890 section 06 offered Spring 2024. [3] (SBS)

MHS2900 - Incarceration, Policy, and Health in U.S. and Globally

Course Description

Health and healthcare among incarcerated individuals and communities affected by incarceration. Intersection of incarceration, public policy, and health. Frameworks and research methods used to study incarceration and health. Potential solutions to improve health outcomes. [3] (SBS)

MHS2920 - Medicine on Trial

Course Description

Medicine as an object of dispute and a source of evidence in courts of law. Key cases and issues in Western law. Medicine adjudicated in religious, military, tribal, national, and international courts. [3] (SBS)

MHS2940 - Race, Citizenship, and Health

Course Description

Social and historical impacts of immigration, settlement, nation formation, labor exploitation, imperialism, and globalization on populations categorized as victims, vectors of disease, or sanitary citizens. Health as a key site in which the meaning of race and citizenship are developed and navigated. [3] (P)

MHS2950 - Healing Animals

Course Description

Animals as subjects of medical research and as patients in veterinary medicine. Health of animals as friends, food, entertainment, and vectors of disease. Celebration and concealment of the centrality of animals in modern medicine through legal, economic, social, and emotional techniques. [3] (P)

MHS2970 - Politics of AI and Health Care**Course Description**

AI law, policy, and advocacy in historical and political contexts. Policies of organizations, countries, and global governance. Develop skills to investigate and design justice-based approaches to AI. Emphasis on AI in medicine. Serves as repeat credit for MHS 3890, section 07 in Spring 2025. [3] (P)

MHS3000 - Undergraduate Seminar**Course Description**

Advanced reading, research, and writing. Topics vary. Limited to juniors and seniors with preference to majors in Medicine, Health, and Society. May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Offered on a graded basis only. [1-3; maximum of 6 credits total for all semesters of MHS 3000] (No AXLE credit)

MHS3010 - Global Health Principles and Practice**Course Description**

Introduction to major global health principles and practices in the developing and developed world. Perspectives of public health practitioners and critical thinking about global health challenges and solutions. [3] (P)

MHS3020 - U.S. Public Health Ethics and Policy**Course Description**

Critical perspectives on ethical and policy issues in U.S. public health. [3] (P)

MHS3030 - Community Health Research**Course Description**

Conceptual and methodological challenges. Focus on descriptive studies and intervention research to address health disparities in chronic diseases and psychiatric disorders. [3] (SBS)

MHS3040 - Designing Healthy Publics**Course Description**

Politics of public health and the built environment in U.S. cities from the nineteenth century to the present. Critical perspectives on health promotion, research, and design. Nashville as a case study. [3] (US)

MHS3045 - Epidemics and Society**Course Description**

Disease outbreaks shaping society throughout history. National responses to epidemics; legacy of colonialism and its influences on health outcomes. Critical thinking about global health challenges, strategies, and solutions. [3] (INT)

MHS3050W - Medicine and Literature**Course Description**

Narrative analysis, and other humanistic, interpretative practices of relevance to medicine and health. [3] (HCA)

MHS3060 - Mental Health in Adolescence**Course Description**

Mental health diagnoses as experienced in the adolescent population; evidence-based treatment options and self-care strategies utilized in clinical and community settings. Serves as repeat credit for students who have earned credit for MHS 3890-07 offered Fall 2022 or MHS 3890-01 offered Spring 2023. [3]

MHS3070W - Creative Writing as a Medical Instrument**Course Description**

Medical memoir as a mode of self discovery. Patient narratives as an essential act of empathy. Chronicling the body's story as an act of healing. Serves as repeat credit for MHS 3890, section 03 in Fall 2023 and Fall 2024. [3] (HCA)

MHS3075 - Mental Health Policy**Course Description**

Contemporary policymaking and research on mental health. Legislative and care-related approaches to mental health and substance use in historical context. The opioid epidemic; special populations, and current active policy debates. Serves as repeat credit for MHS 3890, section 11 in Fall 2022. [3] (No Axle Credit)

MHS3080 - Clinical Ethics in Practice**Course Description**

Critical engagement of ethical concerns, responses and ethical justifications in actual health care situations. Case studies presented by clinical ethicists and health care professionals. [3] (HCA)

MHS3110 - Global Health and Social Justice**Course Description**

Global health institutions, policies, and practices. Issues of social justice. Anthropological, sociological, and scientific studies that address the social, moral, political and economic factors influencing the definition of and response to global health problems. [3] (P)

MHS3120 - Medicine, Technology, and Society**Course Description**

Tensions between art and science in medicine. The effects of science and technology on the doctor-patient relationship. Social and ethical issues raised by new biomedical developments. Serves as repeat credit for MHS 3260. [3] (SBS)

MHS3140 - Afrofuturism and Cultural Criticisms of Medicine**Course Description**

Exploration of Afrofuturism as a literary genre and its critique of the impact of techno-science and medicine on black health, life, and futurity. Multidisciplinary approach in understanding novels, memoirs, and secondary texts. [3] (HCA)

MHS3150 - Death and Dying in America**Course Description**

Interdisciplinary introduction to thanatology; changes in medicine and attitudes towards dying as they reshape the American way of death in a multicultural landscape. [3] (P)

MHS3210 - Health, Development, and Culture in Guatemala
Course Description

Social dimensions of health in Guatemalan communities. History, culture, and political economy. Spanish language skills strongly recommended. Instructor consent required. [3] (INT)

MHS3212 - Health, Development, and Culture in Guatemala
Course Description

Social and political dimensions of health and development in Guatemala through fieldwork and service learning in rural Maya communities in Quetzaltenango and Sololá°. Prerequisite: 3210. [1-3] (No AXLE credit)

MHS3220 - Healthcare Organizations
Course Description

Key healthcare organizations in the context of policies governing the U.S. healthcare system. How organizations and policies shape the meaning of health and the dynamics of medical encounters. [3] (SBS)

MHS3250 - Perspectives on Trauma
Course Description

Trauma as a framework for understanding individual and collective suffering. Trauma in the context of medicine, war, and politics, and of racial, sexual, and gender inequalities. Alternative ways of conceptualizing feeling, memory and loss. [3] (SBS)

MHS3260 - Health Politics of Data, Surveillance, and Security
Course Description

Critical exploration of data, surveillance, and security as social products and processes shaping human life and health. Social, political, and historical contexts of quantification, algorithmic decision-making, data commodification, and security practices. Technology as tool of inequality and site of resistance and self-determination. Serves as repeat credit for MHS 3120. [3] (P)

MHS3310 - Healthcare Systems Comparisons
Course Description

Maymester. Travel to France and Italy. Comparison of US healthcare system to universal healthcare systems. On-site healthcare facilities visits. Role of government, insurance coverage and financing, strategies, quality of care, disparities, care coordination, electronic health records, costs, innovations and reforms. Taught in English. Offered on a graded basis only. [3] (INT)

MHS3320 - Introduction to U.S. Health Care Policy
Course Description

Key features of U.S. health care system. Financing and delivery; historical trends; and comparisons to other countries. Methods of health policy evaluation. [3] (SBS)

MHS3333 - Health Policy and the Trump Administration
Course Description

Full description pending. [3]

MHS3350 - Medicine, Religion, and Spirituality

Course Description

How individuals, families, and communities deal with such life events as birth, serious illness and injury, disability, war, and death through the combined belief in medicine and religion. Sources include fiction, poetry, drama, film, and texts. Research seminar. [3] (No AXLE credit)

MHS3450 - Mental Illness Narratives

Course Description

Mental illness experiences through memoir, film, and spoken word. Serves as repeat credit for MHS 3890 Section 01 in Spring 2017. [3] (P)

MHS3830 - Service Learning

Course Description

Under faculty supervision, students will design a program of community service associated with a set of learning objectives. The service component (3830) should benefit both the recipient and the provider of the service, offering the latter opportunities for self-reflection, self-discovery, and the development of values, skills, and knowledge. A central objective must be firsthand experience of a central issue or issues studied in sociology, psychology, political science, economics, or another academic discipline. The MHS program will work to find placements for interested students. The other component, 3831, will consist of an independent study in the relevant discipline and must be closely linked to the issue(s) addressed in 3830. For example, a student may provide services to the elderly in nursing homes and use 3831 to study how state and federal policies affect the delivery of health care and other services to nursing home populations. To be accepted, students must have a 2.90 overall grade point average and 6 hours of prior work in approved MHS courses. They must submit a specific plan for the service-learning experience to the MHS program director. Must be taken Pass/Fail and concurrently with 3831. These hours shall not be included in the minimum hours required for the MHS major or minor. After completing the experience, all students must write a thorough report. Corequisite: 3831. [1-3] (No AXLE credit)

MHS3831 - Service Learning Research and Readings

Course Description

Under faculty supervision, students will design a program of community service associated with a set of learning objectives. The service component (3830) should benefit both the recipient and the provider of the service, offering the latter opportunities for self-reflection, self-discovery, and the development of values, skills, and knowledge. A central objective must be firsthand experience of a central issue or issues studied in sociology, psychology, political science, economics, or another academic discipline. The MHS program will work to find placements for interested students. The other component - 3831 - will consist of an independent study in the relevant discipline and must be closely linked to the issue(s) addressed in 3830. For example, a student may provide services to the elderly in nursing homes and use 3831 to study how state and federal policies affect the delivery of health care and other services to nursing home populations. To be accepted, students must have a 2.90 overall grade point average and 6 hours of prior work in approved MHS courses. They must submit a specific plan for the service-learning experience to the MHS program director. Students will write a substantial research or interpretative paper under the supervision of a Vanderbilt faculty member on a topic related to their service learning experience. Corequisite: 3830. [1-3] (No AXLE credit)

MHS3850 - Independent Study

Course Description

A program of reading and/or research in one area of MHS studies to be selected in consultation with an adviser. Normally limited to qualified MHS minors or majors. Approval of faculty adviser and MHS program director required for enrollment. May be repeated for credit once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. (However, students in the MHS honors program may count a total of 12 hours in MHS 3850, including the 6 hours in the senior year devoted to preparation of the honors thesis. The same instructor will ordinarily supervise work on the honors thesis in both fall and spring semesters; a student may work with a thesis adviser who has previously supervised an independent study with that student.) [1-3; maximum of 6 credits for all semesters of MHS 3850; maximum of 12 credits for students in the MHS honors program] (No AXLE credit)

MHS3880 - Internship Training

Course Description

Under faculty supervision, students from any discipline can gain experience in a broad range of public and private agencies, institutions, and programs devoted to health care, public health, health-related policy and research. Two options are available. (1) Full-time: 12-15 hours total, including 6-9 hours in 3880, and 6 hours in 3881. (2) Part-time: 2-9 hours total, including 1-6 hours in 3880 and 1-3 hours in 3881. To be accepted for either option, students must have a 2.90 grade point average and 6 hours of prior work in approved MHS courses; they must submit a specific plan for the internship to the MHS program director. After completing the internship, all students must write a thorough report. Note: All work for an internship must be completed during a single semester or summer. Must be taken Pass/Fail and concurrently with 3881. These hours shall not be included in the minimum hours required for the MHS major or minor. Corequisite: 3881. [Variable credit: 1-9] (No AXLE credit)

MHS3881 - Internship Readings and Research

Course Description

Under faculty supervision, students from any discipline can gain experience in a broad range of public and private agencies, institutions, and programs devoted to health care, public health, health-related policy and research. Two options are available. (1) Full-time: 12-15 hours total, including 6-9 hours in 3880, and 6 hours in 3881. (2) Part-time: 2-9 hours total, including 1-6 hours in 3880 and 1-3 hours in 3881. To be accepted for either option, students must have a 2.90 grade point average and 6 hours of prior work in approved MHS courses; they must submit a specific plan for the internship to the MHS program director. After completing the internship, all students must write a thorough report. Note: All work for an internship must be completed during a single semester or summer. Students will write a substantial research or interpretative paper under the supervision of a regular Vanderbilt faculty member. Corequisite: 3880. [Variable credit: 1-6] (No AXLE credit)

MHS3890 - Special Topics

Course Description

May be repeated for credit if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3] (No AXLE credit)

MHS4010 - Psychiatry, Culture, and Globalization

Course Description

Cross-cultural analysis of mental illness; the emergence of cultural psychiatry; and the globalization of biopsychiatry and neuroscience. [3] (P)

MHS4050 - Narrative and Medicine: Stories of Illness and the Doctor-Patient Relationship

Course Description

Use of classical and contemporary illness narratives to understand the doctor-patient relationship. Focus on patient stories in clinical settings. [3] (HCA)

MHS4400 - Quantitative Research Methods

Course Description

Basic skills in generating, interpreting, and presenting statistical evidence. Emphasis on applied skills. No credit for students who have earned credit for MHS 6400. [3] (SBS)

MHS4998 - Honors Research

Course Description

Offered on a graded basis only. Limited to seniors admitted to the departmental honors program. [3] (No AXLE credit)

MHS4999 - Honors Thesis

Course Description

Offered on a graded basis only. Limited to seniors admitted to the departmental honors program. [3] (No AXLE credit)

Military Science-PC

MS-PC1210 - Leadership and Personal Development

Course Description

Leadership is one of the most compelling topics of our time, and might be one of the most important attributes for effectiveness in all levels of human endeavor. The success of one of the most admired and respected institutions in our country, the military is founded upon the understanding and effective application of leadership, and the development of leaders. This course introduces students to the personal challenges and competencies that are critical to effective leadership. The focus is on developing basic knowledge and comprehension of leadership attributes and core leader competencies in a universal setting and exploring potential applications of these principles and practices at Vanderbilt, in the military and in the corporate world. [1]

MS-PC1210L - Leadership and Personal Development Lab

Course Description

Leader development is a continuous process of training, assessment and feedback with the goal of instilling and enhancing desirable behavior in individuals and organizations. Within the military science curriculum, this process is called the Leadership Development Program (LDP), modeled after the principles spelled out in Field Manual 22-100, Army Leadership, and standardized both on campus and Leadership Development and Assessment Course (LDAC) environments. The flexible methodology of LDP accommodates personalized, individual development at all levels of proficiency throughout the officer educational experience, from program entry to commissioning. The LDP includes basic leadership training, periodic assessment and counseling at both team and individual levels by experience observers. Trends and deficiencies are identified and addressed with retraining and reassessment in a continuous cycle. Effective leader development is progressive, building on lessons learned and maximizing individual potential. This course introduces students to the leadership development process by providing structured leadership opportunities in a variety of training settings. Student performance in leadership roles is assessed and notable strengths and weaknesses are identified. A plan for improvement is discussed in detail during one-on-one counseling sessions. [1]

MS-PC1230 - Leadership and Personal Development II

Course Description

What motivates others to follow a person is intriguing, inspiring and alluring. Through routine observation, we learn from leaders regardless of the setting (military, business, education, etc.) This course provides an overview of leadership fundamentals such as setting direction, problem-solving, listening and providing feedback. You will explore dimensions of leadership, values, attributes, skills, and actions in a military context through practical, hands-on, and interactive exercises. [1]

MS-PC1230L - Leadership and Personal Development II Lab

Course Description

Leader development is a continuous process of training, assessment and feedback with the goal of instilling and enhancing desirable behavior in individuals and organizations, this process is called the Leadership Development Program. Effective leader development is progressive, building on lessons learned and maximizing individual potential. This course introduces students to the leadership development process by providing structured leadership opportunities in a variety of training settings. A plan for improvement is discussed in detail during one-on-one counseling sessions. [1]

MS-PC2150 - Foundations of Leadership

Course Description

This course introduces the process of understanding and defining leaders in order to develop leadership skills appropriate for future commissioned Army officers. The class is broken down into five key skill development areas: 1) values and ethics, 2) personal development, 3) officership, 4) leadership and, 5) tactics and techniques. The class emphasizes individual leadership values and characteristics with a focus on Leadership Theory and Interpersonal Communications, Army Values, Troop Leading Procedures, Problem Solving, and Team Building in a military environment. [2]

MS-PC2150L - Foundations of Leadership Lab

Course Description

This lab builds upon the classroom topics in MS-PC 2150 and introduces the process of understanding and defining leaders in order to develop leadership skills appropriate for the future commissioned officers. The lab is broken down into five key skill development areas: 1) leadership, 2) values and ethics, 3) personal development, 4) professional Officership, and 5) various tactics, techniques, and procedures. The lab emphasizes individual leadership values and characteristics with a focus on Leadership Theory and Interpersonal Communications, Army Values, Troop Leading Procedures, Problem Solving, and Team Building in a military environment. [1]

MS-PC2160 - Foundations of Tactical Leadership

Course Description

This course builds upon MS-PC 2150. The course is broken down into five key skill development levels: 1) leadership, 2) values and ethics, 3) personal development, 4) professional officership, and 5) various tactics, techniques, and procedures. This class will focus on individual leadership development where the student begins to plan, organize, and lead small teams and groups in situational training exercises. Students begin to apply leadership skills at the smallest unit level. [2]

MS-PC2160L - Foundations of Tactical Leadership Lab

Course Description

This course builds upon MS-PC 2150 and 2150L. The lab is broken down into five key skill development levels: 1) leadership, 2) values and ethics, 3) personal development, 4) professional officership, and 5) various tactics, techniques, and procedures. This class will focus on individual leadership development where the student begins to plan, organize, and lead small teams and groups in situational training exercises. Students begin to apply leadership skills at the smallest unit level. [1]

MS-PC3110 - Leadership and Problem Solving

Course Description

This course builds upon your skills developed in MS-PC 2160 (1520, and continues to develop leadership, Officership skills, self-awareness, and critical thinking skills through challenging scenarios related to small-unit tactical operations. Cadets receive systematic and specific feedback on their leadership values, attributes, skills, and actions. Prerequisites: MS-PC 1210, 1230, 2150, and 2160 [3]

MS-PC3120 - Applied Team Leadership

Course Description

Challenging scenarios related to small-unit tactical operations are used to develop self-awareness and critical thinking skills. Cadets receive systematic and specific feedback on their leadership values, attributes, skills, and actions. Open to ROTC Cadets only. Prerequisite: MS 211. [3]

MS-PC3850 - Independent Study in Military Science

Course Description

Individual study of selected topics or research in the Military Science Department. Consent of supervising faculty member required. May be repeated. [1-3]

MS-PC4150 - Leadership and Ethics

Course Description

Students develops proficiency in planning, executing, and assessing complex operations, functioning as a member of a staff, and providing leadership-performance feedback to subordinates. Students are given situational opportunities to assess risk, make sound ethical decisions, and provide coaching and mentoring to fellow ROTC Cadets. Open to ROTC Cadets only. [3]

MS-PC4160 - Leadership in a Complex World

Course Description

This course explores the dynamics of leading in the complex situations of current military operations in the contemporary operating environment. It introduces the concept of culture, its components, how culture influences human behavior, the impact of culturally influenced behavior on military operations, and how to analyze and apply cultural considerations in the planning and execution of military operations. Open to ROTC Cadets only. Prerequisite: MS-PC 4150. [3]

Minor in Legal Studies

ULAW1000 - Introduction to Law and the Legal System

Course Description

This course will introduce students to the study of American law. It is a required course designed to give students the knowledge and skills that will prepare them for the other courses that contribute to a Minor in Legal Studies, as well as applying to and succeeding in law school. What are the institutions (such as the legislature and the courts) and sources of law (such as statutes and judicial decisions) that comprise the American legal system? How do you read a judicial decision and understand how law develops over time? How do you “think like a lawyer”? This course may focus on a particular subject matter, such as administrative law or negotiations, to introduce the basic concepts. [3]

ULAW2100 - Access to Justice

Course Description

How do lower-income people navigate and experience the civil and criminal legal systems? This course will consider what “access to justice” means and requires, both for the structure of our legal systems and at a practical level. Students will be introduced to a range of topics that may include the right to counsel, the role of non-lawyers, the use of technology, legal design, and legal literacy. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2120 - AI, Law, and Society

Course Description

Artificial Intelligence and law are closely linked. For example, discussions abound in the legal profession about the extent to which AI will replace lawyers with respect to some of the work they do. But the relationship between AI and law is far more complicated. This course will discuss the diverse ways in which AI, law and society influence one another, including questions of how law should regulate AI and which institutions should enforce any such regulation, as well as theoretical questions about personhood, agency, and autonomy. The course will explore these issues using the examples of military robots and self-driving cars. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2200 - Behavioral Law and Economics

Course Description

Economic analysis of law has long influenced discussions of law, whether to explain how the law works or shape how it should work. Traditional principles of law and economics make certain assumptions about human behavior, positing that people function as rational actors in making decisions in the market. The role of law is to address the effects of such behavior on markets and participants. But human behavior is more complex, which has consequences for law. Behavioral law and economics concerns the psychological and cognitive biases that affect decision-making by consumers in markets as well as decision-making by lawyers, judges, and juries. This course will introduce traditional principles of law and economics to explore the importance of behavioral law and economics to law. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2300 - Constitutional Law: Structure of Government and Equal Protection of the Law

Course Description

This course will offer an introduction to Constitutional Law. Students will study issues related to the structure of our federal government, including the powers of the three branches (Congress, the President, and the Courts) as well as the relationship among them and with the States. Students will also study the individual rights protected under the 14th Amendment, with a focus on equal protection of the law. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2330 - Contract Law

Course Description

A contract is an agreement between parties that creates a duty enforceable by law. Contract law, which consists of the legal principles that govern contracts, is among the most important to institutions and individuals alike. This course will cover various principles of Contract Law, including whether a contract exists, what makes it legally valid, how is it interpreted when questions arise, and what happens when a party breaks or “breaches” it. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2350 - Corporate Law: The Structure of Business Entities

Course Description

This course will provide an introduction to Corporate Law. The course will focus on the core legal principles that govern the foundation of business entities. What is a “corporation”? What obligations or “fiduciary duties” do corporate directors and officers have to the corporation? What legal protections exist for shareholders of the corporation? In addition to covering the fundamental legal principles, this course will also consider theoretical issues such as whether corporations should prioritize maximizing economic value for shareholders over the interests of other stakeholders. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2370 - Courts and Social Policy

Course Description

This course will consider the role of courts in our governmental system. Are they overstepping their boundaries when they take an active role in public policy formation and institutional management? Are they interfering with the proper functioning of other government institutions, such as Congress, the Presidency or state governments? Are they acting on the basis of law or merely expressing the political preferences of the judges? Are they upholding or violating the rule of law? Are they supporting or undermining democratic government? With the nation waiting in anticipation to see what the current Supreme Court will do, this is a crucial time for us, as a nation, to address these questions. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2380 - Criminal Law and Procedure

Course Description

This course will acquaint students with the basic pillars of the criminal justice system: why we have criminal punishment, how we define crime, and the process we use to punish it. Criminal law subject matter will include the elements of crime, defenses (such as self-defense, the insanity defense, and defenses based on neuroscience), the death penalty and sentencing more generally, and whether we criminalize too much conduct. Criminal procedure subject matter will include an examination of police stop and frisk and surveillance practices, pretrial detention, how plea-bargaining works, and the operation of the jury. The course will also cover the system’s impact on people of color, the phenomenon known as mass incarceration, and the current movement to abolish aspects of the criminal legal system. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2440 - Education Law

Course Description

American schools have long been battlegrounds for the nation’s most highly charged political and cultural conflicts. New fights over student speech and the rights of transgender students have piled on top of continuing struggles over racial segregation, school prayer, special education, and educational finance. In this class, we will explore a range of legal and policy issues facing American public and private K-12 schools. More broadly, we will grapple with pressing questions about the relationship between schooling and the state in a pluralist democracy. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2500 - Foreign Relations and International Law

Course Description

This course will address treaties, human rights, climate change and trade from the perspective of both domestic U.S. law and international law. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2540 - International Protection of Human Rights

Course Description

This course will study the rules, institutions, and legal theories that seek to protect basic liberties for all people in connection with the interrelated field of international humanitarian law. The course will emphasize (1) specific "hot button" subjects within human rights law (including the death penalty, hate speech, refugee rights, and gender rights); (2) judicial and legislative authorities that interpret and implement legal rules relating to these subjects; and (3) public and private actors who seek redress for those whose rights have been violated. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2542 - Introduction to Artificial Intelligence in the Legal Profession

Course Description

This course provides a broad survey of artificial intelligence technology and its relationship to law and legal practice. Students will gain foundational knowledge of AI systems and explore their applications across various areas of legal work. The course examines ethical considerations, legal challenges, and current regulatory developments in AI and law. Designed for students without technical backgrounds and builds AI/legal literacy from introductory concepts, preparing students to adapt to continued evolution in this field. [3]

ULAW2545 - Justice and the Constitution

Course Description

Is the Constitution just? To what extent does the Constitution embody and protect justice to individuals and groups in our society? To answer these questions, this course examines the ways in which the Constitution advances and protects different aspects of justice, including procedural justice, retributive justice, distributive justice, libertarian justice, and racial and gender-based justice. The materials will include foundational philosophical work on these different aspects of justice and Supreme Court doctrines that bear on these issues. The overriding goal is to understand the Constitution's account of justice. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2546 - Punishment and Mass Incarceration

Course Description

Mass Incarceration is one of the most serious legal and social issues in the United States today. Our excessive rate of imprisonment, exacerbated by equivalently high rates of probation, makes us an extreme outlier among democratic nations. Mass incarceration affects nearly all groups in our society, but disproportionately impacts racial minorities, wreaking havoc on the lives of individuals, their families and their communities. This course is an inquiry into the causes and effects of this strange and destructive policy. It's divided into six units. The first explores the idea of punishment and the use of incarceration as a mode of punishment, relying on a wide variety of sources that include philosophy, religion, history, sociology and literature, and delineating the basic types of arguments that these sources deploy. The second unit provides a description of the nature and effect of mass incarceration as it exists at present, based on observers' accounts, first person narratives by prisoners, and documentary films. The third unit discusses the prisoners' rights litigation of the 1960s through 80s, and its impact on prison conditions and prison populations. The fourth considers various explanations that have been advanced to explain mass incarceration in the U.S., including racism, classism, political manipulation, mass media and voter preferences. In the final unit, alternatives to imprisonment will be assessed, including electronic monitoring, restorative justice and prison abolition. The course requirements are participation in the seminar discussions and one paper at the end that will give you a chance to state your own views about the subject matter. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2560 - Juvenile Justice

Course Description

This course will offer an introduction to “juvenile justice” systems in the United States. Juvenile justice refers to the legal mechanisms for responding to children who violate the criminal law—thefts, assaults, even homicides—or who break rules that apply only to children—such as running away, truancy, or possessing alcohol or firearms. Juvenile justice systems aspire to reflect the deep differences between children and adults, and to preserve children’s ability to grow into healthy, responsible adults. Those systems also frequently fall short, both reflecting and exacerbating racial disparities. Students will learn to understand and critique concepts such as the “school-to-prison pipeline,” as well as the societal choice to treat some children as legal adults subject to serious criminal sentences such as life without parole. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2580 - Law and Psychology

Course Description

This course will invite students to explore the various ways in which law as a system reflects theories of human behavior, is driven by human behavior, and shapes human behavior. This underlying human element in how law is made, enforced, and experienced is often implicit, resting on folk theories that may be out of sync with the psychological sciences. Students will examine important concepts in criminal and civil law in light of scientific studies that bear on the behaviors at issue—such as what conditions actually cause a person to confess to a crime they didn’t commit. We will also explore the way that ordinary humans decide legal issues—for example, how judges’ emotions may affect their work. Students will gain valuable insight into law as a human enterprise. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2590 - Legal Research and Writing

Course Description

This course will introduce students to the basics of legal research and writing. Students will learn how to find relevant caselaw and analyze legal issues. They will learn how to draft documents in diverse areas of the law and legal practice. Written assignments may include preparing a legal brief for a court, a memorandum to a senior law partner, a letter to a client, and a request from a public agency. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2800 - Patent Law

Course Description

This course will provide a broad overview of U.S. patent law. The course will explore the structure and theory of the U.S. patent system, what types of inventions can be patented, the requirements for a valid patent, the patent application process, how to read a patent document, and the scope and enforcement of patent rights. Knowledge of patent law can be a tremendous advantage for scientists, engineers, doctors, entrepreneurs, and other professionals who regularly interact with technology and innovation. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2820 - The Presidential Administration: Law and Policy

Course Description

This course analyses policy and legal decisions made by a recent presidential administration, with a focus on how and why the Administration made the decisions it did, the substance of its policies, and the policies' success or failure. The presidential administration that is the focus of the course may vary each time the course is offered. Timely issues will be discussed, and may include, but are not limited to, response to national emergencies, student loan policy, industrial policy, climate change, consumer protection, antitrust enforcement, and foreign policy and national security. Former Administration officials and staff will be featured guests on a weekly basis to provide an insider's view on how decisions were made. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

ULAW2890 - Separation of Powers: Theory, Doctrine, and Practice
Course Description

Political philosophers have long posited that the powers of the state should be divided into different institutions. The course begins by surveying foundational theories of division of state authority, culminating in theories that inspired the framers of the U.S. Constitution. It then considers the extent to which contemporary constitutional doctrines of separation of powers reflect these theories. Finally, the course engages contemporary work in political science which describes the dynamics among the branches of government in practice. The course aims to provide an understanding of the goals of separating governmental powers and an appreciation of the ways in which our current doctrines and institutions do and do not achieve those goals. Prerequisite/Corequisite: ULAW 1000 Introduction to American Law. [3]

Music Business/Entrepreneurship

MENT1120 - The Business of Music
Course Description

A general survey of music in the world of commerce. Systems of the contemporary music business, with special emphasis on the recording industry. Music business professionals as guest lecturers. FALL, SPRING. [3] Porter.

MENT1135 - Arts Administration: Best Practices and Careers in the Arts Organization Marketplace
Course Description

A study of best practices and development of marketable skills in arts administration. Investigation of arts administration employment opportunities, roles and responsibilities in executive leadership, finances, fundraising, artistic leadership, education, organizational development, and marketing and media. Leading arts institutions are studied as models for arts administration careers and professional advancement. Guest artist administrators will further class discussion and real world application. [1]

MENT1140 - Creating Funding and Non-Profit Vehicles for 21st Century Community Service
Course Description

Strategies for planning, financing, supporting, and sustaining an artistic and social development mission. Specific tools for creating mission-driven music, arts and community service organizational structures. SPRING. [2] Korn.

MENT3100 - Career Preparedness: The Business of a Music Professional
Course Description

Prepares students for a career in music and its related fields. Emphasis on essential skills for building a portfolio, leveraging digital content online, fiscal management, interviewing/auditioning, audience engagement, basic marketing/branding, copyright/ownership, career adaptability, and developing an artistic vision. Course will be led by a rotation of faculty. [1]

MENT3110 - 21st Century Artistry: Advanced Skills in Live Performance, Technology and Communication
Course Description

Skills for artistry, employment, audience engagement, communications, and the business of live music performance and recording. Emphasis on live and recorded stage and communication presentation; utilization of laptops as recording and live technologies; and creative application of technology, creativity, advocacy and business skills for employment. Prerequisite: MUTH 2400 or permission of instructor. [3]

MENT3200 - Career Preparedness II: Music Entrepreneurship and Community Engagement

Course Description

Explores the intersection of music, entrepreneurship, and community impact. Students will learn to design, fund, and implement projects that advance their careers while fostering meaningful connections with audiences and communities. Deeper dives into the financial, legal, and administrative sides of the music business, with several externally-focused projects and guest speakers. Spring [1] Wilson.

MENT3880 - Music Internship (1 credit)

Course Description

Academic research and writing related to a co-requisite internship experience under the direction of a faculty sponsor. Prerequisite: 2.9 GPA, sophomore standing, and approval of project prospectus by faculty sponsor and by Associate Dean. May be repeated for credit, up to 1 credit per semester of enrollment. FALL, SPRING. [1].

MENT3881 - Music Internship (3 credits)

Course Description

An extensive academic program of study related to a co-requisite internship experience under the direction of a faculty sponsor. Prerequisite: 2.9 GPA, sophomore standing, and approval of project prospectus by faculty sponsor and by Associate Dean. May be repeated for credit, up to 3 credits per semester of enrollment. FALL, SPRING, SUMMER. [3].

MENT3882 - Summer Music Internship

Course Description

Academic research and writing related to a co-requisite internship experience under the direction of a faculty sponsor. Prerequisite: 2.9 GPA, sophomore standing, and approval of project prospectus by faculty sponsor and by Associate Dean. Offered on a pass/fail basis only. May be repeated for credit, up to 1 credit per semester of enrollment. SUMMER. [1].

Music Composition

COMP1100 - Composition Workshop

Course Description

Collaborative workshop specifically designed for non-composition majors and/or non-music majors. Includes introduction to compositional techniques, study of composers and their works, principles of scoring and the study of notation, including experimental types. Prerequisite or Corequisite: MUTH 1210 or MUTH 2200. [3]

COMP1150 - Composition (Elective/Minor/Concentration)

Course Description

Individual instruction and seminars. A variety of media, styles, and forms. Electronic and experimental techniques. Prerequisite: COMP 1100 and/or departmental approval. [Variable credit: 1-3 each semester]

COMP2100 - Intermediate Composition (B.Mus.Arts and Integrated Studies First-Years/Sophomores)

Course Description

Individual instruction and seminars. A variety of media, styles, and forms. Electronic and experimental techniques. Open only to B.Mus.Arts and integrated studies composition majors. [2]

COMP2301 - Intermediate Composition I (Composition Majors Freshmen/Sophomores)**Course Description**

Individual instruction and seminar. A variety of media, styles, and forms. Electronic and experimental techniques. Open only to composition majors; instructor as assigned. [2] Link, Michael Rose, Slayton.

COMP2302 - Intermediate Composition II (Composition Majors Freshmen/Sophomores)**Course Description**

Individual instruction and seminar. A variety of media, styles, and forms. Electronic and experimental techniques. Open only to composition majors; instructor as assigned. Prerequisite: COMP 2301. [2] Link, Michael Rose, Slayton.

COMP2303 - Intermediate Composition III (Composition Majors Freshmen/Sophomores)**Course Description**

Individual instruction and seminar. A variety of media, styles, and forms. Electronic and experimental techniques. Open only to composition majors; instructor as assigned. Prerequisite: COMP 2302. [2]

COMP2304 - Intermediate Composition IV (Composition Majors Freshmen/Sophomores)**Course Description**

Individual instruction and seminar. A variety of media, styles, and forms. Electronic and experimental techniques. Open only to composition majors; instructor as assigned. Prerequisite: COMP 2303. [3] Link, Michael Rose, Slayton.

COMP3978 - Junior Thesis**Course Description**

Completion of an extended paper based upon musical analysis. Open only to composition majors. Topic subject to approval. Progress monitored via tutorials. Completion of Junior Thesis is a pre-requisite for COMP 4970 and COMP 4303. [1] Kurek, Link, Michael Rose, Slayton.

COMP4100 - Advanced Composition (B.Mus.Arts and Integrated Studies Juniors/Seniors)**Course Description**

Individual instruction and seminars. A variety of media, styles, and forms. Electronic and experimental techniques. Only open to B.Mus.Arts and Integrated Studies Juniors/Seniors. [2]

COMP4301 - Advanced Composition I (Composition Majors Juniors/Seniors)**Course Description**

Continuation of 2301-2304. Open only to composition majors. A 4th credit may be elected with instructor approval for focused opportunities such as analysis, repertoire study, etc. Prerequisite: COMP 2304. [3-4 each semester] Link, Michael Rose, Slayton.

COMP4302 - Advanced Composition II (Composition Majors Juniors/Seniors)**Course Description**

Continuation of 2301-2304. Open only to composition/theory majors. A 4th credit may be elected with instructor approval for focused opportunities such as analysis, repertoire study, etc. Prerequisite: COMP 4301. [3-4 each semester] Link, Michael Rose, Slayton.

COMP4303 - Advanced Composition III (Composition Majors Juniors/Seniors)**Course Description**

Continuation of 2301-2304. Open only to composition/theory majors. A 4th credit may be elected with instructor approval for focused opportunities such as analysis, repertoire study, etc. Prerequisite: COMP 4302, COMP 3978. [3-4 each semester] Link, Michael Rose, Slayton.

COMP4304 - Advanced Composition IV (Composition Majors Juniors/Seniors)**Course Description**

Continuation of 2301-2304. Open only to composition majors. A 4th credit may be elected with instructor approval for focused opportunities such as analysis, repertoire study, etc. Prerequisite: COMP 4303. [3-4 each semester] Link, Michael Rose, Slayton.

COMP4970 - Senior Composition Recital**Course Description**

Planning, rehearsing, and performing in a concert devoted solely to a student's own work. Open only to composition majors. Corequisite: COMP 4303. [1] Kurek, Link, Michael Rose, Slayton.

Music Pedagogy

MPED3110 - Piano Pedagogy**Course Description**

Principles and procedures of teaching piano. Individual and group instruction techniques observed and discussed. Practicum with private students. Designed for B.Mus. and B.Mus.Arts piano majors. Permission of instructor required. FALL. [2] (Offered alternate years)

MPED3120 - Suzuki Violin Pedagogy**Course Description**

Principles and procedures of teaching violin using the Suzuki Violin School, books 1-4. Individual and group instruction techniques observed and discussed. Designed for junior or senior violin/viola students. Violin for class use required. Open by consent of instructor. FALL [3] (Offered alternate years)

MPED3121 - Suzuki Violin Pedagogy**Course Description**

Principles and procedures of teaching violin using the Suzuki Violin School, books 1-4. Individual and group instruction techniques observed and discussed. Designed for junior or senior violin/viola students. Violin for class use required. Open by consent of instructor. Prerequisite: MPED 3120. SPRING [3] (Offered alternate years)

MPED3125 - Violin/Viola Pedagogy**Course Description**

Principles and procedures of teaching violin and viola. Emphasis on pedagogical literature and specific teaching techniques. Practicum with private students. Prerequisite: B.Mus. and B.Mus.Arts students with completion of four semesters of 2100 or 2200 in violin or viola. [2]

MPED3127 - Cello Pedagogy**Course Description**

Early cello pedagogy, with strong emphasis on the major pedagogical influences of Suzuki. Prerequisite: B.Mus. and B.Mus.Arts students with completion of four semesters of CLLO 2100 or 2200. [2]

MPED3128 - Harp Pedagogy**Course Description**

Principles and procedures of teaching harp. Emphasis on pedagogical literature and specific teaching techniques. Prerequisite: B.Mus. and B.Mus.Arts students with completion of 4 semesters of HARP 2100 or 2200, or permission of instructor. FALL [2]

MPED3129 - Bass Pedagogy**Course Description**

Principles and procedures of teaching bass. Emphasis on pedagogical literature and specific teaching techniques. Practicum with private students. Prerequisite: B.Mus. and B.Mus.Arts students with completion of four semesters of BASS 2100 or BASS 2200. [2]

MPED3130 - Vocal Pedagogy**Course Description**

Principles and procedures of teaching voice. Psychological and physiological approaches. Practicum with private students. Corequisite: VOIC 4100 or VOIC 4200 FALL. [2]

MPED3140 - Woodwind Pedagogy**Course Description**

Principles and procedures of teaching woodwind instruments. Emphasis on pedagogical literature and specific teaching techniques. Prerequisite: B.Mus. and B.Mus.Arts students with completion of four semesters of 2100 or 2200 in major instrument, or permission of instructor. [2]

MPED3142 - Brass Pedagogy**Course Description**

Principles and procedures of teaching brass instruments. Emphasis on pedagogical literature and specific teaching techniques. Prerequisite: B.Mus. and B.Mus.Arts students with completion of two semesters of 2100 or 2200 in a brass instrument, or permission of instructor. Fall. [2]

MPED3144 - Percussion Pedagogy**Course Description**

Principles and procedures of teaching percussion instruments. Emphasis on pedagogical literature and specific teaching techniques. Prerequisite: B.Mus. and B.Mus.Arts students with completion of four semesters of PERC 2100 or 2200. [2]

MPED3870 - Pedagogy Practicum**Course Description**

Principles and procedures of private teaching. Reading and research under the direction of a faculty sponsor, consistent with requirements for Independent Study. Practicum with private students. Consent of the faculty sponsor is required. Repeatable for credit, variable 1-2 hours each semester. [1-2] Staff.

MPED3880 - Pedagogy Internship

Course Description

Focused experience in the teaching of performance under the direction of a faculty sponsor in that performance area (consent required). Involves a specific program of regular consultation between student and supervising teacher. Open only to students seeking concentration in pedagogy. Prerequisite: MREP 3310 or 3311, 3300, 3330, or MUSO 3850 (in field) and MPED 3110, 3100, or 3130 or MUSO 3850 (in field). [Repeatable for credit, variable 1-3 hours each semester.] Staff. [1-3]

Music Repertoire/Literature

MREP2110 - Brass Orchestral Repertoire

Course Description

Exploration of the standard orchestral repertoire with emphasis on the late Romantic period. Performance of selected excerpts, coached and conducted. May be repeated for credit. [2]

MREP2120 - Orchestral Repertoire for Percussion

Course Description

Exploration of the standard orchestral repertoire for percussion instruments, exclusive of timpani, with emphasis on score analysis, instrument selection, and performance techniques. Selected excerpts coached and conducted. [1]

MREP2121 - Orchestral Repertoire for Timpani

Course Description

Exploration of the standard orchestral repertoire for timpani. Emphasis on score analysis, editing, stick selection, and performance practice. Selected excerpts coached and conducted. [1]

MREP2130 - String and Harp Orchestral Repertoire

Course Description

Analysis and coaching of the standard orchestral repertoire, including opera and ballet, with emphasis on style and technical problems. Selected excerpts in like instrument groups (violin, viola, cello, bass, harp). May be repeated for credit. [1]

MREP2140 - Woodwind Orchestral Repertoire

Course Description

Exploration of the standard orchestral repertoire with emphasis on performance practice. Performance of selected excerpts, coached and conducted. Not recommended for first-year students. May be repeated for credit. [1]

MREP2141 - Saxophone Orchestral and Wind Band Repertoire

Course Description

Exploration of the standard orchestral and wind band repertoire with emphasis on performance practice. Performance of selected excerpts, coached and conducted. Not recommended for freshmen. Prerequisite: B.Mus. and B.Mus.Arts students or permission of instructor. [1]

MREP2150 - Survey of Orchestral Repertory: From Monteverdi to the Dawn of Modernism

Course Description

A course which exposes student musicians to a broad selection of important works from 1624-1934 (with occasional vocal or chamber pieces for added context), with an emphasis on their basic musical features and cultural importance. Composers examined include Vivaldi, Bach, Haydn, Mozart, Beethoven, Schubert, Tchaikovsky, Mahler, Stravinsky, Dawson, Barber, and Crawford Seeger. [2]

MREP3310 - Piano Literature I

Course Description

A survey of works for piano from the seventeenth through the nineteenth centuries, within the context of historical perspective, stylistic awareness, and pianism. Designed primarily for piano majors. [2]

MREP3311 - Piano Literature II

Course Description

A survey of works for piano from the nineteenth through the twenty-first centuries, within the context of historical perspective, stylistic awareness, and pianism. Designed primarily for piano majors. [2]

MREP3330 - Vocal Literature

Course Description

Survey of literature for solo voice from the seventeenth century to the present, with focus on traditional art songs of the great masters of the genre. Prerequisite: MUTH 2300, MUSL 2200W. Corequisite: VOIC 4100 or VOIC 4200. [2]

Music Teacher Education

MUED1010 - Woodwind Methods

Course Description

Development of performance skills and teaching methods for flute, clarinet, oboe, bassoon, and saxophone. Includes teaching techniques and problems relative to woodwind instruments, care and minor repairs, and instructional materials. Open only to B.Mus. students; or permission of instructor. FALL. [1] Uteley.

MUED1020 - Brass Methods

Course Description

Development of performance skills and teaching methods for trumpet, french horn, trombone, euphonium, and tuba. Includes teaching techniques and problems relative to brass instruments, care and minor repairs, and instructional materials. Open only to B.Mus. students; or permission of instructor. SPRING. [1]

MUED1030 - Strings Methods

Course Description

Development of performance skills and teaching methods for violin, viola, cello, and double bass. Includes teaching techniques and problems relative to string instruments, care and minor repairs, and instructional materials. Open only to B.Mus. students; or permission of instructor. FALL. [1] Bingham.

MUED1040 - Percussion Methods**Course Description**

Development of performance skills and teaching methods for snare drum, timpani, mallet instruments, and other percussion instruments. Includes teaching techniques and problems relative to all percussion instruments, care and minor repairs, and instructional materials. Open only to B.Mus. students; or permission of instructor. FALL. [1] Vinson.

MUED1080 - Piano Skills for the Music Educator**Course Description**

Focused study in score reading, sight reading, and collaborative techniques to prepare for classroom teaching. Includes vocal and instrumental repertoire. [1]

MUED2100 - Introduction to Music Education**Course Description**

{Previously MUED 2010} Focus on lesson planning, proper teaching sequences, observation techniques, classroom instruments, and verbal/non-verbal instruction. First in a sequence of three methods-based courses in teaching music. Open to all B.Mus. students. [3] T. Biddlecombe

MUED2110 - Seminar in Choral Literature and Arranging**Course Description**

Teaching techniques, knowledge of choral repertoire, and arranging skills as applicable to K-12 choral programs. Tonal, harmonic, and melodic analysis, score marking and preparation, voicing, and classroom concerns. Repertoire drawn from the American Choral Directors Association reading lists, All-State honor choir lists, and other applicable sources to encompass a broad range of genres, styles, levels of difficulty, ethnicities, and musical periods. Prerequisite: MUTH 2200 and approval of instructor. SPRING. [3] M. Biddlecombe. (Offered alternate years)

MUED2120 - Seminar in Teaching Orchestra**Course Description**

Instructional strategies for string and full orchestras from the middle school through high school and youth orchestra levels. Topics to include rehearsal techniques, repertoire, materials, secondary string class instruction, and performance practices. Prerequisite: MUED 1030 and MCON 3000, or permission of instructor. SPRING. [2] (Offered alternate years.)

MUED2130 - Seminar in Orff/Kodály Methods**Course Description**

Teaching general music with emphasis on Orff and Kodály principles and practices. Planning, instruction, and evaluation using techniques and materials from a variety of sources. FALL. [2] Ramsey. (Offered alternate years)

MUED2140 - Seminar in Teaching Jazz Styles**Course Description**

Principles and practices for teaching instrumental jazz styles. Rehearsal techniques (including observation), repertoire, jazz education philosophies, and stylistic elements for soloists, combos, and larger ensembles. MUED 2140 satisfies pedagogy requirement for Jazz Studies Majors. Prerequisite: MUSO 1220 or permission of instructor. SPRING. [2] Middagh.

MUED2150 - Seminar in Teaching Marching Band**Course Description**

Techniques and materials for Marching Band instruction. Organization, administration, literature, technology, auxiliary groups. Planning, writing, arranging and teaching halftime performances. Prerequisite or corequisite: MCON 3000 or permission of instructor; corequisite: participation in marching band. FALL. [2]

MUED2180 - Seminar in Inclusive Inquiry in Music Education**Course Description**

A focus on leading future music educators through a process of reflection on marginalized peoples, practices in the field of music education that lead to marginalization, and strategies for improved and increased inclusion in school music programs. To this end, a critical lens will be used to examine the culture, norms, traditions, and practices inherent in American music education. [2]

MUED3010 - Intermediate Instrumental Methods and Materials**Course Description**

Topics include applied teaching techniques, primary and early secondary band/orchestra literature, and lesson planning. Second in a sequence of three methods-based courses in teaching music. Prerequisite: MUED 2100 (previously listed as 2010). [2]

MUED3020 - Intermediate Choral Methods and Materials**Course Description**

Topics include rote teaching, primary and early secondary choral literature, vocal modeling, intermediate sequencing, and solfege implementation. Second in a sequence of three methods-based courses in teaching music. Prerequisite: MUED 2100 (previously listed as 2010). [2]

MUED3870 - Practicum in Music Teaching**Course Description**

Observation, participation, and supervised music teaching in a variety of school, grade level, and instructional music settings, designed to integrate and apply musical knowledge and teaching skills developed within the degree program. Weekly seminar included. Includes SMART music studio technology and GarageBand technology. SPRING. [1]

MUED3871 - Practicum in Music Teaching II**Course Description**

Observation, participation, and supervised music teaching in a variety of school, grade level, and instructional music settings, designed to integrate and apply musical knowledge and teaching skills developed within the degree program. Weekly seminar included. Prerequisite: MUED 3870. SPRING. [1]

MUED3872 - Practicum in Music Teaching III**Course Description**

Observation, participation, and supervised music teaching in a variety of school, grade level, and instructional music settings, designed to integrate and apply musical knowledge and teaching skills developed within the degree program. Weekly seminar included. Prerequisite: MUED 3871 and any two from MUED 2110-2170. SPRING. [1]

MUED3880 - Experiential Instruction in Music I**Course Description**

Field-based experience with a precollege ensemble or university band organization. Experience will include classroom preparation, leading sectionals or portions of rehearsals, and/or other appropriate activities as assigned by the lead teacher. Attendance at culminating performance is required. [.5] Biddlecombe.

MUED3881 - Experiential Instruction in Music II**Course Description**

Field-based experience with a precollege ensemble or university band organization. Experience will include classroom preparation, leading sectionals, leading portions of rehearsals, and/or other appropriate activities as assigned by the lead teacher. [.5]

MUED3882 - Experiential Instruction in Music III**Course Description**

Field-based experience with a precollege ensemble or university band organization. Experience will include classroom preparation, leading sectionals or portions of rehearsals, and/or other appropriate activities as assigned by the lead teacher. Attendance at culminating performance is required. [1]

Music Technology

MTEC1302 - History of Classical Recording**Course Description**

A survey of the five main periods - acoustic, electric, LP, stereo and digital - of recorded classical music. Students will listen to the recordings of such legendary artists as Caruso, Paderewski, Kreisler, Toscanini and Callas. The profound impact of recording technology on performance practice itself will also be thoroughly considered. [3]

MTEC1340 - Technology for Musicians**Course Description**

Introduction to music related computer technology essential to the contemporary musician, including basic principles of MIDI, audio editing, audio effects, and computer music notation. [1]

MTEC2342 - Fundamentals of Audio Technology**Course Description**

Introduction to analog and digital audio, recording/editing in a digital audio workstation, microphones, signal processing, and audio-based music production techniques. Hands-on creative projects. Prerequisite: MTEC 1340, or demonstrated musical literacy and permission of instructor. [1]

MTEC2344 - Electronic Music Production and Sound Design**Course Description**

Introduction to hardware and software synthesizers, manipulation of basic waveforms, and sampling. Design of original virtual instruments and hands-on creative projects. Prerequisite: MTEC 1340 or permission of instructor. [2]

MTEC2346 - Mixing Techniques

Course Description

Project-based focus on the improvement of student productions through effective mixing techniques. Exploration and application of balance, equalization, dynamics, reverb, compression, and other signal processing techniques. Discussion of genre specific techniques for acoustic and electronic music styles. Prerequisites: MTEC 2342, MTEC 2344, or instructor consent. [2]

MTEC2348 - Sound and Music Production for Games

Course Description

A study of sound and music production and implementation for games. Presents a solid foundation of knowledge and skills to prepare for entry-level work as a sound designer at a game development company or as a freelance game audio professional, including experience with typical game audio workflow and an historical overview of the video game industry. [3]

MTEC2350 - Artificial Intelligence and the Creative Musician

Course Description

An introduction to the fundamental concepts by exploring the relationship between music and AI in the past and present. Topics include generative music systems, randomness, algorithmic music, machine learning, philosophical concerns, and explorations of current composition tools. No prior experience with AI needed. Open to all undergraduate students. Pre-requisite: MTEC 1340 and either MUTH 2100 or MUTH 1200; or permission of instructor. [2]

MTEC3800 - Capstone Music Production Portfolio

Course Description

This course is designed for senior students studying Music Technology to develop a professional portfolio showcasing their technical and creative work. Emphasis will be placed on artistic vision, technical proficiency, and professional standards in music production and technology. [2]

Music Theory

MUTH1111 - First-Year Writing Seminar - Music in Fiction

Course Description

Considers meanings of music in contemporary fiction by way of representative music and literature. Includes consideration of classical, jazz, hip-hop, and popular music in short stories and novels. Familiarity with musical notation is expected. [3]

MUTH1135 - Mozart

Course Description

The music of Wolfgang Amadeus Mozart. Techniques for listening to different genres of classical music. Emphasis on style and structure, music theory and history, and Mozart's life and character. No musical background assumed. Does not count toward major or minor in music. SPRING. [3]

MUTH1200 - Survey of Music Theory

Course Description

Presents 18th- to 20th-century harmonic practice. Designed to develop music theory skills through written exercises of figured and unfigured basses; harmonization of melodies; and study of ear training, using sight-singing exercises and melodic and harmonic dictation. Not open to students who have completed MUTH 2100 or 2200. Does not count toward a major in music. [3] Bingham.

MUTH1210 - Survey of Music Theory

Course Description

Presents 18th- to 20th-century harmonic practice. Designed to develop music theory skills through written exercises of figured and unfigured basses; harmonization of melodies; and study of ear training, using sightsinging exercises and melodic and harmonic dictation. Prerequisite: MUTH 1200. Not open to students who have completed MUTH 2100 or 2200. Does not count toward a major in music. [3] Bingham.

MUTH2100 - The Syntax of Music

Course Description

Basic elements of music and notation (including computer notation), introduced through a wide variety of styles. Includes non-tonal and non-Western repertoire. Reinforcement of the elements of MUTH 2110/Aural Skills Level I throughout. B.Mus. and B.Mus.Arts students enrolled in MUTH 2100 should also be enrolled in MUSO 1340. Corequisite: MUTH 2110. FALL. [2]

MUTH2110 - Aural Skills in Tonal Practice (I)

Course Description

Study via guided improvisation, lecture, performance, and notation exercises: intervals, modes, triads, dominant seventh chords, diatonic tonality, major and minor keys and degree function, various systems of solfege and number, harmonization, notation and performance of simple rhythmic textures. Corequisite: MUTH 2100. FALL [1]

MUTH2200 - Harmonic Idioms of the Common Practice Period

Course Description

Principles of harmonic progression in the context of music from the common practice period. Includes figured bass realization, harmonization, analysis, composition, contrapuntal idioms, modulation. B- or above in MUTH 2100 is required. Prerequisite: MUTH 2100; corequisite: MUTH 2220. [3]

MUTH2220 - Aural Skills in Tonal Practice (II)

Course Description

Study via guided improvisation, lecture, performance, and dictation: chromatic function in melody, inversion, seventh chords, tonicization and modulation, common chromatic substitutions, transposition, hearing form, notation and performance of complex rhythmic textures. Prerequisite: MUTH 2110; corequisite: MUTH 2200. [1]

MUTH2300 - Musical Expansions: the Twentieth Century to the Present

Course Description

Late-Romantic, modernist, and postmodern compositional practices, including freely chromatic and non-functional harmony, ordered and unordered sets, post-tonal formal design, contemporary rhythmic devices, indeterminacy, and quotation. Prerequisite: C- or above in MUTH 2200; corequisite: MUTH 2330. [3]

MUTH2330 - Aural Skills in Non-Tonal Practices

Course Description

Study via sight-singing, dictation, score-reading, listening, improvisation, and lecture: 20th-century scale forms, modes of limited transposition, serialism, free atonality, common atonal trichords, notation and performance of advanced rhythmic textures. Prerequisite: MUTH 2220; corequisite: MUTH 2300. [1]

MUTH2400 - Elements of Analysis

Course Description

A study of analytical concepts and methodologies applied to harmonic, rhythmic, and structural aspects of diverse musical practices and styles. Approaches to interpreting and creating musical meaning through listening and/or score study. Prerequisite: C- or above in MUTH 2300. [3]

MUTH2440 - Aural Skills & Performance Readiness

Course Description

The use of Aural Skills as a lens into practical performance psychology. A broad survey of readings for discussion, performance exercises with group feedback, private coachings, and journaling will offer participants a chance to discover their own optimal mindset for calm, dependable performance. Counts as a Semester 4 Special Topics seminar in the Aural Skills core. Prerequisite: MUTH 2330. [1]

MUTH2441 - Aural Skills on the Podium

Course Description

Application of Aural Skills to conducting: Focus on choral and instrumental works of the 20th and 21st centuries, conducting techniques, analysis, rhythmic exercises, rehearsal organization, and sigh-singing skills critical for communication between conductor and ensemble. Counts as a Semester 4 Special Topics seminar in the Aural Skills core. [1]

MUTH2442 - Aural Skills in Application to Rehearsal, Teaching, and Performance

Course Description

Application of Aural Skills to musical situations encountered outside of class: individual preparation, teaching, coaching, and ensemble skills in rehearsal and performance. Focus on Aural Skills as practice method, students' instrumental and/or vocal repertoire, solfège methods, pedagogy, and score-study for high level artistry in performance. Counts as a Semester 4 Special Topics seminar in the Aural Skills core. [1]

MUTH2443 - Advanced Fundamentals of Aural Skills

Course Description

Comprehensive review of skills studied in MUTH 2110, 2220, and 2330 with the goal of enhanced mastery. Focus on a fluency-based model to develop high levels of skill and real-time perception of rhythm, meter, intervals, chords, and harmony. Counts as a semester four special topics seminar in the Aural Skills core. [1]

MUTH2444 - Aural Skills in Rhythm and Meter

Course Description

Application of Aural Skills to understanding rhythm and meter at multiple levels. Readings for in-class discussion, written and performance assignments, and in-class listening. Topics include polyrhythms and metric modulation, phrase rhythm and hypermeter, phrase structure and form, metrical consonance and dissonance, and perception of rhythm. Counts as a Semester 4 Special Topics seminar in the Aural Skills core. Prerequisite: MUTH 2330. [1]

MUTH2445 - Aural Skills Level IV Seminar: Musicianship Through Movement

Course Description

This course explores the art of musical expression through the principles and techniques of Jacques-Dalcroze. Using the theoretical framework of enactive cognition, students will engage in a reflective practice synthesizing reading, expressive movement, rhythm, and improvisation in music from a broad array of styles and cultures. Prerequisite: MUTH 2330. [1]

MUTH3100 - Individual Theory Instruction (Elective)

Course Description

Individual instruction and seminars. Score analysis and style-study composition. Prerequisite: MUTH 2400 and consent of instructor. May be repeated for credit. [Variable credit: 1-3 each semester] Music theory faculty.

MUTH3101 - Individual Aural Skills Instruction

Course Description

Intensive or advanced individual study of solfège, rhythm, sight-singing, clef-reading, transposition, dictation, and/or development of audiation within a primary performance discipline. Pre-requisite: completion of core Aural Skills sequence (MUTH 244X) and consent of instructor. May be repeated for credit. May be taken in conjunction with Advanced Aural Skills Seminar 1-4 (MUTH 3450, 3460, 3470, 3480). Variable credit: [1-3]. Aural skills faculty.

MUTH3110 - Orchestration

Course Description

Technical and aesthetic considerations in composing or transcribing for individual orchestral instruments, sections, and full orchestra. Score analysis and composition projects. Prerequisite: B- or above in MUTH 2100. [3]

MUTH3120 - Jazz Theory

Course Description

An exploration of harmonic syntax, melodic construction, and song forms in jazz. Includes analysis, directed listening, and practice hearing jazz chords and chord progressions. Prerequisite: MUTH 1210 or 2200. [2]

MUTH3130 - Techniques of Choral Composition

Course Description

Technical and aesthetic considerations involved in arranging and composing for combinations of voices, from two-part to larger choral ensembles, accompanied and unaccompanied. Score analysis and composition projects. Prerequisite: MUTH 2200 or consent of instructor. SPRING. [3] Carl Smith. (Offered alternate years)

MUTH3140 - Historical Traditions in Composition and in Performance

Course Description

A course which exposes student musicians to a broad selection of important works from 1624-1934 (with occasional vocal or chamber pieces for added context), with an emphasis on their basic musical features and cultural importance. Composers examined include Monteverdi, Bach, Haydn, Mozart, Beethoven, Schubert, Schumann, Tchaikovsky, Mahler, Stravinsky, Dawson, Barber, and Crawford Seeger. Prerequisite: MUTH 2200. FALL [3]. Russell Platt.

MUTH3150 - Early Keyboard Literature

Course Description

Keyboard music from the late fifteenth to the early eighteenth century. Compositional techniques and performance practices; study of period instruments; literature for clavichord, harpsichord, organ, and fortepiano. FALL. [2] Carl Smith. (Offered alternate years)

MUTH3160 - 16th-Century Counterpoint

Course Description

Principles of voice leading and linear structure through the study of 16th-century counterpoint. Graduated composition exercises, performance, repertoire analysis, historical approaches to theory, study of text setting, meter, and form. Prerequisite: MUTH 2400. [3]

MUTH3170 - Techniques of Composing for Media

Course Description

Techniques for effective composing for media such as film, television, games, and Internet, including composing with virtual instruments, digital audio mixing and synchronizing to video. Creation of a 5-7 minute original sound track or film composing demo reel. Prerequisite: COMP 1100 or MUTH 2400 or permission of instructor. FALL. [2] Kurek.

MUTH3180 - Musical Instruments, Acoustics, and the Creative Musician

Course Description

Musical Instruments, Acoustics, and the Creative Musician. In this course we focus on the meeting point of the physics of sound, musical instrument materials, and human creativity. We will consider such topics as overtones, subharmonics, sound synthesis, instrument design, tuning and temperament systems, perception and illusion, and the embodied experience of the performer. We explore the relationship between science and culture and look at how the physical shape of instruments influences art (and how art shapes instruments). Throughout the course, we are guided by creativity and innovation by drawing upon musical repertoire and instrumental performance practices. Enrolled students will be selected randomly from the wait list after they have demonstrated minimum qualifications via a short quiz. Students must have a basic understanding in both music and math. On the music side, a comfort with basic music note reading and the elements of Western music (intervals, scales, rhythms). On the math side, comfort with precalculus, including basic trig, logs, and exponentials. [3]

MUTH3200 - Chromatic Harmony in the Romantic Era

Course Description

Intensive analysis of challenging standard repertoire by three generations of Romantic composers, whose ingenious extensions of Classic period strategies of tonal organization require interpretive tools beyond the scope of the core theory curriculum. Investigation of both large and small forms. Focus on relationships between harmonic and structural symmetries. Prerequisite: MUTH 2300. [3]

MUTH3210 - Post-tonal Analysis

Course Description

Exploration of the post-tonal analytical techniques through intensive study of selected works of composers from the early 20th century to the present, including Debussy, Scriabin, Schoenberg, Berg, Webern, Stravinsky, Copland, Dallapiccola, Boulez, Cage, Berio, Feldman, Lachenmann. Prerequisite: MUTH 2400. SPRING. [2] Slayton. (Offered alternate years.)

MUTH3220 - Musical Explorations: Bartók

Course Description

Indepth study of the life and music of Béla Bartók; includes detailed investigation of salient theoretical concepts, formal structures, and the composer's integration of various regional folk musics into his own works. Prerequisites: MUTH 2400 or permission of instructor. SPRING [2] Slayton

MUTH3222 - Musical Explorations: Britten**Course Description**

An introduction to the music of Benjamin Britten through close analysis of representative compositions and exploration of the composer's substantial recorded legacy. Focus on the formal and theoretical aspects of Britten's work with a detailed consideration of how musical resources and compositional techniques are employed to suggest a sense of place. Prerequisite: MUTH 2400 or permission of instructor. SPRING. [2] Deakin.

MUTH3230 - Electronic Music for Composers**Course Description**

This course provides composers with a range of approaches for creating electronic music. Students will focus on historical context, technical concepts, and new hardware and software programs through hands-on creative projects. [2]

MUTH3450 - Advanced Aural Skills Seminar 1**Course Description**

Direct application of Aural Skills at more demanding levels, as well as reinforcement of existing knowledge from the Aural Skills core. Focus on score reading, practice strategies, performance, dictation, and analysis. Prerequisite: completion of core Aural Skills sequence (MUTH 244X). [1]

MUTH3460 - Advanced Aural Skills Seminar 2**Course Description**

Direct application of Aural Skills at more demanding levels. Focus on score reading, practice strategies, performance, dictation, and analysis. Prerequisite: MUTH 3450. [1]

MUTH3470 - Advanced Aural Skills Seminar 3**Course Description**

Direct application of Aural Skills at more demanding levels. Focus on score reading, dictation, performance psychology, audition preparation, and Aural Skills as it pertains to career strategy. Prerequisite: MUTH 3460. [1]

MUTH3480 - Advanced Aural Skills Seminar 4**Course Description**

Direct application of Aural Skills at more demanding levels. Focus on score reading, dictation, performance psychology, audition preparation, and Aural Skills as it pertains to career strategy. Prerequisite: MUTH 3470. [1]

MUTH3890 - Special Topics in Music Theory**Course Description**

Advanced study in theory, focused on various topics from year to year, including such areas as advanced counterpoint, analysis of a specific composer, Schenkerian analysis, etc. Prerequisite: varies by topic. [2-3] Music theory faculty.

Musicians' Wellness

MWEL1120 - The Alexander Technique I**Course Description**

An accurate kinesthetic sense of the structure and movement of the body through hands-on and verbal instruction in body mapping and the principles developed by F. M. Alexander. Emphasis on ordinary daily activities. Offered on a pass/fail basis only. FALL, SPRING. [1] Ahner.

MWEL1121 - The Alexander Technique II**Course Description**

Further exploration of the principles of the technique applied to daily activities and developmental movement. Emphasis on individual experiences within the context of the class. Offered on a pass/fail basis only. Prerequisite: MWEL 1120. FALL, SPRING. [1] Ahner.

MWEL1130 - Meditation for Musicians**Course Description**

A practice-centered approach helps students develop a regular meditation routine. Each weekly session involves meditation, in-class reading, listening, and performance. Offered on a pass/fail basis. [1]

MWEL1140 - Tai Chi for Musicians**Course Description**

Principles of Tai Chi applied to musical performance. The practice and understanding of anatomical movement, with emphasis on prevention of injury. Offered on a pass/fail basis. [1]

MWEL1150 - Chakra Yoga**Course Description**

Study of the seven chakras, or energy centers, of the body. Emphasis on aligning the chakras through gentle yoga practice (beginner level), and cultivating student well-being. Offered on a pass/fail basis. FALL, SPRING. [1]

MWEL1160 - Nurturing the Mental Health of Musicians**Course Description**

This course will address prevalent mental health issues that students may encounter, on-stage or in the classroom. In an inclusive and supportive environment, topics such as performance anxiety and depression will be explored, from both a clinical and musical perspective. Students will be given tools and resources to help support their mental health and well-being. [1]

MWEL2120 - The Performer and the Body**Course Description**

Application of the Alexander Technique in a small group setting with attention to aspects of musical performance, including practice skills and performance anxiety. Offered on a pass/fail basis. May be repeated once for credit. Prerequisite: MWEL 1120. B.Mus. and B.Mus.Arts students or permission of the instructor. [1] FALL.

Musicianship

MUSC2100 - Musicianship Level I

Course Description

Examination of the sound properties of pitches, intervals and rhythms and their notation in real time. Focus is on diatonic scales and modes. Lectures, discussion, real-time listening experiences, dictation, sight-singing, score reading, and improvisation are integrated throughout the course. Corequisite: MUTH 2100. FALL. [1] McGuire, Williams.

MUSC2200 - Musicianship Level II

Course Description

Continuation of Musicianship Level I. Focus on the employment of pitches, intervals and rhythms in functional tonal contexts. Lectures, discussion, real-time listening experiences, dictation, sight-singing, score reading, and improvisation are integrated throughout the course. Prerequisite: MUSC 2100; corequisite: MUTH 2200. SPRING. [1] McGuire, Williams.

MUSC2300 - Musicianship Level III

Course Description

Continuation of Musicianship II. Focus on tonal modulation and chromaticism. Lectures, discussion, real-time listening experiences, dictation, sight-singing, score reading, and improvisation are integrated throughout the course. Prerequisite: MUSC 2200; corequisite: MUTH 2300. FALL. [1] McGuire.

MUSC2400 - Musicianship Level IV

Course Description

Continuation of Musicianship III. Focus on the employment of pitches, intervals and rhythms in non-tonal contexts. Lectures, discussion, real-time listening experiences, dictation, sight-singing, score reading, and improvisation are integrated throughout the course. Prerequisite: MUSC 2300; corequisite: MUTH 2400. SPRING. [1] McGuire.

MUSC3106 - Advanced Musicianship VI

Course Description

Further development of aural skills, including techniques for hearing, singing, reading, and writing tonal and atonal music in real time. Prerequisite: MUSC 3105. SPRING. [1] Ploger.

MUSC3108 - Advanced Musicianship VIII

Course Description

A continuation of techniques studied in MUSC 3107. Hearing in tonal and atonal music, including extended harmonic and melodic structures, complex rhythmic elements, and score reading. Discussion of pedagogical approaches to teaching aural studies. Prerequisite: MUSC 3107. SPRING. [1] Ploger

Musicology/Ethnomusicology

MUSL1100 - Global Soundscapes

Course Description

An exploration of music within specific global soundscapes in the context of the shifting and self-consciously intercultural soundscapes of the 20th and 21st centuries. Through lectures, ethnographic workshops, class projects, and listening, students will explore music in relationship to topics such as migration, politics, identity, festivity, and everyday life. Not open to students who have completed MUSL 2100. [3] (CORE C, E)

MUSL1105 - African Music**Course Description**

A survey of selected traditional and popular music of Africa. Historical, social, and cultural contexts; listening; some performances in class. SPRING. [3]

MUSL1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through class discussion, oral presentations, and written expression. Topics vary. Open to freshmen only. FALL. [3] Musicology and Ethnomusicology faculty.

MUSL1200 - Introduction to Western Classical Music**Course Description**

An introduction to the literature of music from AD 600 to the present through a study of selected works. Extensive listening is required. Not open to students who have completed MUSL 2200W. Counts toward a minor, but not a major, in music. [3] (CORE A, C)

MUSL1210 - The Concerto**Course Description**

A close study of representative works, from the Baroque invention of the concerto principle up to modernist and contemporary adaptations. Focus on structural listening. No previous training in music required. FALL. [3] Michael Rose. (Offered alternate years)

MUSL1220 - Symphonic Music in Western Culture**Course Description**

A course which will examine the way that the growing genres of symphony, concerto, and symphonic poem coincided with the development of the symphony orchestra as a cultural institution. Course work will include listening to repertory works by such composers as Mozart, Beethoven, Tchaikovsky, Mahler, Walker, and Ustvolskaya and discussing the biographical and societal context that surrounded them. [3] (CORE A, C)

MUSL1240 - Opera for Everyone**Course Description**

An introduction to opera for non-music majors who want to listen and watch for pleasure as well as critical engagement. The ability to read a score is not required. [3] (CORE A, C)

MUSL1300 - Music, the Arts, and Ideas**Course Description**

The changing historical relationships among music, literature, fine arts, and philosophy. Musical developments as responses to social, political, and economic circumstances. FALL. [3] Link. (CORE C, E)

MUSL1310 - Love and Death in Music**Course Description**

Perspectives on two great problems of human life throughout the history of Western music. Themes include idealized love, sexual pathology, love and realism, love of God, confronting death, transcending death. Connections of music to visual arts, literature, film. No musical background required. [3] Michael Rose. (Offered alternate years)

MUSL1320 - The Music of the Outliers

Course Description

Seminar centering on the music of composers who were/are unorthodox in their thinking, who resisted prescribed notions of what music is and challenged the world around them to think about sound in new ways. Topics include the "reactionary" climate of the 20th century; modernism and post-modernism; electronics in music; minimalism and microtonalism; performance art and "Art-Pop." Not open to students who have completed MUTH 2400. Does not count toward a major in music. No prior experience in music necessary. Maymester [3] Slayton

MUSL1330 - Cross-Currents in Music and Art

Course Description

Survey of selected pairings or groupings of artists and composers through four centuries of art and music in Europe and the United States. [3] Michael Rose.

MUSL1340 - Music, Sports, and Society

Course Description

The intersection of sports and music in 20th and 21st century U.S. and global contexts explored through lecture, small-group discussion and a "humanities lab" approach. [3] (CORE A, C)

MUSL1600 - American Popular Music

Course Description

American culture and identity explored through the lens of the nation's music and the people that shaped it. Students will examine the characteristics of popular music and develop listening skills, identify key musical features, and contextualize its meaning within a broader historical narrative. FALL, SPRING. [3] (CORE A, C)

MUSL1610 - Musical Theatre in America: A Cultural History

Course Description

From eighteenth century melodrama and vaudeville through the musicals of the 1940s and 1950s to the contemporary emphasis on integration of spectacle, dance, and other theatrical arts. Readings, live productions, guest lecturers, and film. SPRING. [3] (CORE A, C)

MUSL1620 - Jazz and American Culture

Course Description

The impact of jazz on American and global culture both historically and in the present day. How jazz is created and interpreted; its diverse performative forms; its role as a direct expression of the cultural context in which it is produced; and its influence on contemporary music, aesthetics, and popular culture. FALL, SPRING. [3] (CORE A, E)

MUSL1630 - The Blues: Music, Meaning, and Influence

Course Description

The historical and ongoing impact of Blues on American and global culture, aesthetics, and soundscapes. Students will examine the Blues as a direct expression of the cultural context in which they are produced, examining their creation, performance, interpretation, and cultural context. SPRING. [3] (CORE C, E)

MUSL1640 - Country Music

Course Description

A musical and cultural survey of the talents, traditions, and trends of country music from its roots in diverse folk traditions to its current status as a multi-million dollar global industry. Focus on the music, creators, and performers of that music; its cultural and social contexts; and its marketing and consumption. FALL, SPRING. [3] (CORE C, E)

MUSL1650 - History of Rock Music

Course Description

History and development of rock and roll music and its performance from the 1950s to the present. Major artists from each decade, subgenres (rockabilly, R&B, folk, soul, metal, pop, alternative, etc.) and technological, cultural, and economic developments that helped shape the music. FALL, SPRING [3] (CORE A, C)

MUSL1660 - Music and Tourism: Music City Museum & Memorabilia

Course Description

Through an immersive educational experience in greater Nashville, students will learn the basics of ethnographic fieldwork by focusing on the relationship between music fandom and music tourism. This discussion-based class includes guest lectures and class trips to music landmarks and sites throughout the city. Students will gain a deeper understanding of Nashville as a musical place and the role we, as music fans, tourists, and listeners, play in the production and presentation of Music City. FALL. [3] (CORE A, C)

MUSL1670 - Rap and Hip Hop Culture

Course Description

The history of Hip Hop music and culture from the 1970s to the present, emphasizing the cultural spaces that led to the development of Hip Hop and the many Black experiences and identities that shaped its evolution. Topics include its political and social impact; race, gender and cultural relations; economic and social barriers; and the exploitation of this music and culture for global consumption. FALL, SPRING [3] (CORE C, E)

MUSL2100 - Music as Global Culture

Course Description

Music and musical cultures from around the world. Students will approach indigenous music theories on their own terms in order to understand and complement the complexities of contemporary Western Music performance styles and expectations. Emphasis on fundamental elements (e.g., rhythm, pitch, harmony, and form) of diverse musical practices. Transcription, notation, and analysis of a variety of melodic and rhythmic forms. Not open to students who have completed MUSL 1100. Prerequisite: Open to B.Mus. and B.Mus.Arts students, declared second majors, or with demonstrated musical literacy and permission of instructor. [3] (CORE C, E)

MUSL2110 - Music in Latin America and the Caribbean

Course Description

An introduction to a wide variety of musical genres and traditions in Latin America and the Caribbean. Indigenous, folk, popular, and art music forms and their social function, meaning, historical development, cultural blending, and cross-hybridization. SPRING. [3] Simonett. (CORE A, C)

MUSL2120 - Music in Southeast Asia

Course Description

An introduction to the varied musical and performing cultures of Southeast Asia through historical and ethnographic perspectives. Court music traditions, music in religious rituals, dance and theater, popular and (western) art music practices in the region. Includes some hands-on learning of musical instruments and repertoire. [3]

MUSL2130 - Music and the Environment

Course Description

An exploration of how music, sound, nature, and culture interact both with and within the environment, engage in current issues of conservation and sustainability, and influence musical creation and expression. We will employ methodologies drawn from musicology, ethnomusicology, sound studies, ecology, environmental history, and ecocriticism to consider musical portraiture of the natural world, historical soundscapes, sonic representations of the environmental past, animal and interspecies musical performance, digital nonhuman musical environments, soundscape ecology, the music/sound of environmental change, and social-activist roles of music in periods of environmental crisis. To emphasize the importance of musical thinking about the interconnections of people and planet, this course culminates in ecomusicological explorations of the Anthropocene. [3]

MUSL2140 - Death, Culture, and Music in the West

Course Description

Ceremonies surrounding death, dying, and remembrance from a musical perspective from the Middle Ages to the digital age. Graveside farewells, visitations, and wakes; Requiems by Mozart, Verdi, and others; popular musics as expressions of personal grief, public mourning, and protest. FALL. [3]

MUSL2150 - Music, Identity, and Diversity

Course Description

Issues of multiculturalism and intersections with musical expression in America. Cultural determinants, such as race, gender, ethnicity, class, religion, language, ideology, folklore, and history will be studied critically. Prerequisite: any MUSL course or AMER 1002. FALL. [3]

MUSL2200W - Music in Western Culture

Course Description

An overview of music in the Western art tradition, including its basic historical periods, styles, genres and disciplines. Tangible applications of historical, analytical, and cultural thinking to musical performance. Guided discussion, varied writing assignments, and presentations. Prerequisite: Open to B.Mus. and B.Mus.Arts students, declared music minors/second majors, or with demonstrated musical literacy and permission of instructor. SPRING. [3] (CORE A, C) Musicology faculty. (CORE A, C)

MUSL2310 - The Bible and Music

Course Description

An investigation of Biblical texts (Old Testament/Tanach; Deuterocanonical texts/Old Testament Apocrypha; New Testament) that have inspired musical settings and the musical settings themselves. Emphasis on literary and musical analysis and interpretation. No musical or scriptural background assumed. FALL. [3] Rose and Levine.

MUSL2320 - Exploring the Cinematic Soundtrack

Course Description

Relationships among soundtrack, image, and narrative in film. The complex of music, sound, and dialog in a variety of American films, from silents to Hollywood blockbusters and cartoons. Topics include diegesis, temporality, continuity, and musical style. Discussion, video, and film research, reading, and listening. No musical background required. SPRING. [3] Link. (CORE A, C)

MUSL2330 - Film Music and Genre

Course Description

Relationships between film genre, musical narration and signification. Case studies from horror, sci-fi, Bollywood, Blaxploitation, feminist and international cinema. [3]

MUSL2340 - Music in Narrative Fiction

Course Description

Exploration of music as an explicit narrative presence in fiction of the 20th and 21st centuries. Examination of the roles of music as plot device, symbol, setting, and character development as embodied in various genres including popular, classical, and jazz. Analysis of complete novels and short fiction combined with the theoretical, social, and historical analysis of music, with synthesis in creative responses. [3]

MUSL2350 - The Miracle of Venice: Sound, Space, Vision, and Power

Course Description

In perhaps no other country were the arts so intimately fused with a sense of national mission as in the Republic of Venice, a miniature semi-democratic nation-state which emerged during the death throes of the Roman Empire and which collapsed with the Napoleonic invasion of 1797. This course will celebrate and evaluate those magnificent works of music, architecture, art, and film produced by artists living in the city, and, increasingly after 1797, by fascinated foreigners. The class will combine elements of lecture, seminar, and independent study, designed to allow for the maximization of each student's interests, musical and otherwise. There is no formal prerequisite. [3]

MUSL2600 - American Music and American Identities

Course Description

A history of music in the United States, 1620 to the present. Topics include its indigenous and immigrant roots; distinctly American musical traditions such as shape-notes, minstrelsy, jazz, twentieth-century syntheses; and music as a vehicle for social commentary, protest, cultural expression, and identity-building. FALL. [3] (CORE C, E)

MUSL2610 - Music of the South

Course Description

The rich musical soundscape of the American South considered from the perspectives of its diverse music, the intersection of people, landscape, and soundscape of the region, and the sonic and cultural influence of the American South on the broader American and global soundscapes. Prerequisite: any MUSL course or AMER 1002. FALL [3] (Offered alternate years)

MUSL2620 - DIY Movements: Hip Hop, Punk, and the Democratization of America's Pop

Course Description

The DIY music movement in the United States and abroad in its aesthetic and historical context. Hip Hop, punk, and emergent genres considered as musical and performative forms and as cultural products, shaped by the creative ethos and can-do spirit of their creators. Prerequisite: any MUSL course. [3] (CORE A, C)

MUSL3100 - Music of the 20th and 21st Centuries

Course Description

An exploration of the wealth and diversity of European and American art music since 1900. Emphasis on the historical, cultural, philosophical, and technological contexts that encourage an approach to this music on its own terms. Prerequisite: B.Mus. and B.Mus.Arts students and second majors, MUSL 2200W and 2100; music minors, MUSL 2200W or 1200; or permission of instructor. [3]

MUSL3120 - Music and Cultural Tourism in Bali

Course Description

This Maymester course will introduce students to the traditional music and arts of Bali, such as gamelan, dance, and puppet theater, through an immersive musical and cultural experience. Students will learn through a combination of lectures by Professors Miranda and Fry and workshops led by local musicians and artists at the Mekar Bhuana Centre in Denpasar. Students will also have the opportunity to perform in a showcase at the end of the program. Excursions to a gamelan metalsmith and instrument maker, puppet museum, and temple ceremony will complement the hands-on workshops. Throughout the program, students will also learn the challenges presented by cultural tourism, especially for the local community, and what some Balinese organizers are doing to create a more equitable and sustainable tourist industry. [3]

MUSL3160 - Gender and Rock Music

Course Description

An exploration of the ways that gender intersects with performativity in rock on stage, in the studio, behind the scenes, and as fans. Special attention to performing femaleness in a "masculine" genre. Prerequisite: any MUSL or GSS course. [3]

MUSL3213 - Artist, Community, and Democracy

Course Description

Communities of diverse artists, minority viewpoints, and cultural pluralism in a democratic society. Contemporary United States with cross-cultural and historical comparisons. [3]

MUSL3220 - Opera in the 17th and 18th Centuries

Course Description

In-depth study of five or six representative works. Score and libretto analysis, reception history, cult of the performer, role of the contemporary producer-director. Prerequisite: B.Mus. and B.Mus.Arts students and second majors, MUSL 2100, 2200W, and 3100; music minors, MUSL 2200W or 1200; or permission of instructor. FALL. [3] Calico.

MUSL3221 - Opera in the 19th Century

Course Description

In-depth study of five or six representative works. Score and libretto analysis, reception history, cult of the performer, role of the contemporary producer-director. Prerequisites: B.Mus. and B.Mus.Arts students and second majors, MUSL 3100; music minors, MUSL 2200W or 1200; or permission of instructor. SPRING. [3] Calico.

MUSL3222 - Mahler Symphonies: Songs of Irony

Course Description

An exploration of large orchestral works of Gustav Mahler emphasizing their demonstration of the synthesis of symphony and song and their reflection of nineteenth-century German philosophies of irony. Prerequisites: B.Mus. and B.Mus.Arts students and second majors, MUSL 3100; music minors, MUSL 2200W or 1200; or permission of instructor. SPRING. [3] Lovensheimer.

MUSL3223 - Music in the Age of Beethoven and Schubert

Course Description

The musical legacy of each composer in culture and (especially) social context: patrons, family, and friends. Prerequisites: B.Mus. and B.Mus.Arts students and second majors, MUSL 3100; music minors, MUSL 2200W or 1200; or permission of instructor. FALL. [3] Cyrus, Lowe, Shadle.

MUSL3224 - Haydn and Mozart

Course Description

An in-depth look at the music of Haydn and Mozart in cultural and social contexts. Prerequisite: B.Mus. and B.Mus. students and second majors, MUSL 3100; music minors, MUSL 2200W or 1200; or permission of instructor. FALL. [3] Lowe.

MUSL3225 - Brahms and the Anxiety of Influence

Course Description

A study of Brahms' large-scale orchestral works and other selected literature from the perspective of 'influence.' Musical relationships to Couperin, JS Bach and sons, Beethoven, Wagner, Schoenberg and others. Topics include Brahms' self-image; Brahms as conductor, performer and editor; stylistic fingerprints; popular and folk elements; Brahms and later composers; his relationship to Clara; the Wagner-Brahms debate. Prerequisites: B.Mus. and B.Mus.Arts students and second majors, MUSL 3100; music minors, MUSL 2200W or 2100; or permission of instructor. FALL. [3] Cyrus. (Offered alternate years)

MUSL3226 - The String Quartet

Course Description

An intensive exploration of the string quartet. Topics for discussion include origins and history of the genre, rhetoric, audience, reception, interpretation, and performance practice. Prerequisite: B.Mus. and B.Mus.Arts students and second majors, MUSL 3100; music minors, MUSL 2200W or 1200; or permission of instructor. SPRING. [3] Lowe.

MUSL3227 - Music in the Age of Revolution, 1789-1848

Course Description

Explores developments in genres, styles, patronage, and careers brought on by socioeconomic and political change from late Haydn to Wagner. Topics include nationalism, Romanticism, rise of the middle class, touring virtuoso, composer/critic. Musical analysis, historical and cultural context. Prerequisites: B.Mus. and B.Mus.Arts students and second majors, MUSL 3100; music minors, MUSL 2200W or 1200; or permission of instructor. FALL. [3] Calico, Shadle.

MUSL3228 - J.S. Bach: Learned Musician & Virtual Traveler

Course Description

Explores the life and works of high baroque composer J.S. Bach, who developed a highly cosmopolitan, erudite musical style. Course will include structural and stylistic analysis and will also address biography, cultural context, and performance practice. Prerequisites: B.Mus. and B.Mus.Arts students and second majors, MUSL 3100; music minors, MUSL 2200W or 1200; or permission of instructor. SPRING. [3] Lowe.

MUSL3229 - Robert Schumann and the Romantic Sensibility

Course Description

An exploration of Robert Schumann's music and criticism within the context of German Romanticism. B.Mus. and B.Mus.Arts students and second majors, MUSL 3100; music minors, MUSL 2200W or 1200; or permission of instructor. SPRING. [3] Lovensheimer.

MUSL3230 - Music and the Construction of National Identity

Course Description

An in-depth exploration of the tools used to construct national musical identities during the long nineteenth century (ca. 1789-1914), including compositional style, performance techniques, and music criticism. Addresses topics from Western Europe, Eastern Europe, and the Americas. Prerequisite: B.Mus. and B.Mus.Arts students and second majors: MUSL 3100; music minors: MUSL 1200 or 2200W; or permission of instructor. SPRING. [3] Shadle.

MUSL3231 - The Art of Program Music: Tone Painting and Symphonic Poetry

Course Description

An in-depth exploration of the style, philosophical basis, and possible meanings of program music, broadly defined. Examples will be taken from the sixteenth century to the present with a focus on the long nineteenth century (1789-1914). Pre-requisite: B.Mus majors, B.Mus.Arts majors, and second majors: MUSL 3100; music minors: MUSL 2200W or 1200; or permission of instructor. [3]

MUSL3232 - God, Sex, and Politics in Early Music

Course Description

An exploration of the intersecting topics of religious practice, love and sexuality, and power structures in early music. Students will gain familiarity with many of the major currents, cultures, composers, and contexts of Western European music from ca. 1100-1650. In addition to the primary themes of the course, we will entertain such other musically relevant topics as mathematics, early music theory, mysticism, the role of women in early music, the development of notation, and questions of performance and interpretation. Prerequisite: B.Mus. and B.Mus.Arts students and second majors, MUSL 3100; music minors, MUSL 2200W or 1200; or permission of instructor. [3] Lowe

MUSL3234 - Modernist, Contemporary, and Experimental Opera

Course Description

Opera since the early twentieth century and relevant analytical tools. Begins with canonical works representing a range of compositional styles and entry points for examination. The second half builds on those skills and adds new modes of investigation appropriate for repertoire since 2000. [3]

MUSL3235 - Music, Pandemics, and History

Course Description

Musical experiences from the COVID-19 pandemic juxtaposed with an historical corpus of music responding to disease outbreaks, epidemics, and pandemics, including balcony singing and processions, plague masses, chants and motets requesting intercession, fundraisers and educational music, and cantatas celebrating deliverance. [3]

MUSL3236 - Music, Gender, and Sexuality

Course Description

Exploration of gender and sexuality in Western art and vernacular musical traditions. Topics include gendered musical forms, genres, and performance; feminist music criticism; ideologies of musical authorship and genius; musical canons; and musical representations of gender and sexuality. [3]

MUSL3237 - Women and Music

Course Description

An investigation of the roles women have played in the development of Western music - performance, composition, patronage, education -and the social and economic factors that have influenced their position. [3]

MUSL3238 - Global Jazz

Course Description

An exploration of jazz's movement, transformation, and meaning in today's world. Through a series of global case studies, this course will address jazz and its connection to place, history, globalization, politics, media, and identity. [3]

MUSL3239 - Music and Dance**Course Description**

This course explores the dynamic relationship between music and dance in its varied global traditions. Ballet and other classical forms, stylized dances as concert music, social dancing, dance and movement in popular culture, folk dance traditions, dance as healing. [3]

MUSL3240 - Music and Medievalisms**Course Description**

Musical representations of the past from revivals to imaginative recreations, seen through the lens of TV, film, opera, and popular music. How portrayals of the Middle Ages by Wagner, Disney, heavy metal fans and others reflect, distort, and reinvent historical realities. Pre-requisites: B.Mus and B.Mus.Arts students and second majors, MUSL 3100; music minors, MUSL 2200W or 1200; or permission of instructor. SPRING. [3]

MUSL3850 - Independent Study**Course Description**

Development and execution of a program of study in musicology or ethnomusicology under the direction of a member of the department. (See Academic Regulations section.) Repeatable for credit, variable up to 3 hours per semester. Musicology faculty. [1-3]

MUSL3890 - Selected Topics in Music History**Course Description**

Selected methodological approaches focused on a particular topic. Offerings have included "Music and the American Presidency," "Schoenberg and the Word," "Mingus, Monk, and Miles: Jazz Biography and Jazz Composition," "Stephen Sondheim and the American Musical," and "Mozart Piano Concertos." Prerequisite: varies by topic. May be repeated for credit when topics vary. [3] Musicology faculty.

MUSL3891 - Selected Topics in Ethnomusicology**Course Description**

Selected methodological approaches focused on a particular topic. In this seminar-style course, students will examine music as a social process in order to understand what music is and what it means to its practitioners and audiences. Pre-requisite: varies by topic (typically one from : MUSL 1100, 1105, 2100, 2110, 2120). May be repeated for credit when topics vary. [3]

MUSL3892 - Selected Topics in Popular Music**Course Description**

Selected methodological approaches focused on a particular popular music genre, locale, or performer(s). Pre-requisite: varies by topic (typically one from: MUSL 1600, 1620, 1630, 1640, 1650, 1660, 1670, 2610, 2620, 3160, AADS 2166, CAL 2150). May be repeated for credit when topics vary. [3]

MUSL4978 - Senior Thesis**Course Description**

Completion of an extended paper based in musicological or ethnomusicological research under the supervision of a faculty sponsor. Progress monitored via tutorials. Open only to seniors. Prerequisite: MUSL 3100. Variable credit, 1-3 hours each semester; may be repeated once. Musicology faculty. [1-3]

MUSL4998 - Senior Honors Thesis**Course Description**

Independent research on a musicological or ethnomusicological topic, culminating in a written thesis submitted to the faculty. Progress monitored via tutorials. Students completing this course with distinction, including a thesis and an oral defense, will earn honors or highest honors in music literature and history. Open only to students in the department honors program. Prerequisite: departmental approval of formal prospectus. [3] Musicology faculty.

MUSL4999 - Senior Honors Thesis**Course Description**

Independent research on a musicological or ethnomusicological topic, culminating in a written thesis submitted to the faculty. Progress monitored via tutorials. Students completing this course with distinction, including a thesis and an oral defense, will earn honors or highest honors in music literature and history. Open only to students in the department honors program. Prerequisite: departmental approval of formal prospectus. [3] Musicology faculty.

Nanoscience and Nanotechnology

NANO2500 - Nanoscale Innovation and Making**Course Description**

Introduction to nanotechnology from concept through commercialization. Case studies, overview of nanofabrication methods, entrepreneurship, and business strategy. Includes hands-on project in the VINSE facilities and development of a product pitch. FALL [3].

NANO3000 - Imaging Techniques in Nanoscale Engineering**Course Description**

Principles and practical applications. Processes behind signal formation and use in characterizing material and biological systems at the nanoscale. Includes hands-on laboratory experiments that highlight the characterization capabilities of modern transmission electron, scanning electron, and focused ion beam scanning electron microscopes for imaging nanostructures. Prerequisite: MATH 1301; CHEM 1602 or MSE 1500. FALL. [3]

Naval Science

NS1100 - Introduction to Naval Science (Navy and Marine option)**Course Description**

No Credit Toward Current Degree. [3]

NS1300 - Naval Operations (Navy option)**Course Description**

No Credit Toward Current Degree. [3]

NS1690 - Sea Power in History (nrotc)**Course Description**

U.S. Navy's role in foreign and defense policies from the American Revolution to the present. Broad principles, concepts, and elements of sea power throughout history. Technological advances, interservice relations, strategies, and governmental policies pertaining to sea power. Designed to meet the NROTC requirement; no credit toward History major or minor. Offered on a graded basis only. [3]

NS1691 - Evolution of Warfare (nrotc)**Course Description**

Antiquity to the present. Evolution of strategic principles. Influence of technological, economic, moral, psychological, and political factors. Case studies from a soldier's perspective. [3] (No AXLE credit)

NS1693 - Fundamentals of Maneuver Warfare (Nrotc)**Course Description**

Broad aspects of warfare and their interactions with maneuver warfare doctrine. Focus on the United States Marine Corps as the premier maneuver warfare fighting institution. Historical influences on current tactical, operational, and strategic implications of maneuver warfare practices. Case studies. [3] (No AXLE credit)

NS2410 - Organization and Management (Navy & Marine option)**Course Description**

[3]

NS2420 - Leadership and Ethics (Navy & Marine option)**Course Description**

No Credit Toward Current Degree. [3]

Naval Science - Peabody

NS-PC2410 - Leadership and Management**Course Description**

This course presents a comprehensive study of organizational behavior and management with special emphasis on situational leadership in the military and civilian sectors and the development of your skills in organizational thinking and problem solving. You will explore a variety of leadership and management topics, including the classical theories of management, motivation and communication. FALL. [3]

NS-PC4242 - Leadership and Ethics**Course Description**

An exploration of major Western ethical philosophy in the development and application of leadership to enhance objective, sound and timely decision-making in the most challenging of environments. This course follows theoretical examination with case studies and practical application to emphasize the importance of ethical reasoning to leadership, and explores components of character and integrity in decision making. SPRING. [3]

Neuroscience

NSC1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

NSC1400 - Neuroscience**Course Description**

Physiology of nerve cells, sensory and motor systems, sleep, speech, and sexual behavior. Clinical topics include the chemical basis of psychosis, diseases of the brain, and repair mechanisms after brain injury. [3] (MNS) (CORE B) (LE MNS)

NSC2222 - Classical Neuroscience**Course Description**

History of key concepts in modern neuroscience, their context and impact through the original scientific articles that introduced them, with emphasis in their application in furthering oral and writing science communication skills. [3] (MNS)

NSC2235 - Biological Basis of Mental Disorders**Course Description**

(Formerly listed as NSC 3235 prior to Fall 2025) Cellular and molecular neuropathology of cortical dysfunction resulting from affective disorders, drug addiction, neurodegenerative disease, and stroke. Prerequisite: NSC 1400 (or 2201 prior to Fall 2025) and BSCI 1510. [3] (MNS) (CORE B) (LE MNS)

NSC2260 - Psychopharmacology**Course Description**

(Formerly listed as NSC 3260 prior to Fall 2025) Synaptic actions of therapeutic and recreational drugs. Research approaches for drug actions and substance use disorder. Circuit mechanisms of effects on cognition and behavior. Serves as repeat credit for NSC 3630 or PSY 3630 (if taken Spring 2023 or earlier). Prerequisite: NSC 1400 (or 2201 prior to Fall 2025). [3] (MNS) (CORE B) (LE MNS)

NSC2269 - Developmental Neuroscience**Course Description**

(Formerly listed as NSC 3269 prior to Fall 2025) Normal and abnormal brain development. Cell division, migration, and death; synapse formation and plasticity; and clinical syndromes. Prerequisite: 1400 (or 2201 prior to Fall 2025). [3] (MNS) (CORE B) (LE MNS)

NSC3240 - Neurobiology of Addiction**Course Description**

Neural basis of the regulation and dysregulation of reward processing. Pathophysiology of addiction. Serves as repeat credit for NSC 3891 Section 01 in Spring 2016. Prerequisite 1400 (formerly 2201). [3] (MNS)

NSC3245 - Drug Discovery for Neuropsychiatric Disorders**Course Description**

Discovery and development of novel medicines for neurological and psychiatric illness. History of drug discovery, target identification and validation, and medicinal chemistry. In vitro high-throughput screening, drug metabolism, and pharmacokinetics. Prerequisite: 2201. [3] (MNS)

NSC3250 - Neurological Disease

Course Description

Biological basis of neurological diseases and their treatments. Neurodevelopmental disorders, TBI, Alzheimer's, Huntington's, and Parkinson's Disease. Established knowledge, patient experiences, mechanisms of pharmacological treatments, and ongoing research. Data from primary literature and clinically-relevant case studies. No credit for students who completed NSC 3891 section 01 offered Fall 2021 or 2022. Prerequisite: 2201. [3] (MNS)

NSC3251 - GABA

Course Description

Role of GABA in neural function/dysfunction. GABA receptor structure and function in disorders such as epilepsy, addiction, and anxiety. How primary literature informs our current understanding of inhibition in the nervous system. No credit for students who completed NSC 3891 section 01 offered spring 2021 or spring 2022, or section 03 offered fall 2019. Prerequisite: NSC 1400 (formerly 2201). [3] (MNS)

NSC3252 - Neurophysiology

Course Description

Electrical mechanisms within the nervous system and the lab techniques used to investigate them. Principles of current flow; basis of the resting potential; structure and function of voltage-gated and neurotransmitter-gated ion channels; generation and propagation of action potentials; circuit model of a neuron. Prerequisite: 2201. Not open to students who completed NSC 3891 section 02 Neurophysiology offered fall 2022, fall 2021, fall 2020. [3] (MNS)

NSC3270 - Computational Neuroscience

Course Description

Theoretical, mathematical, and simulation models of neurons, neural networks, or brain systems. Computational approaches to analyzing and understanding data from behavior, neurophysiology, electrophysiology, or brain imaging. Simulation methods for neural models. Course taught using Python. Recommended: NSC 1400 (formerly 2201). Prerequisite: either DS 1100/CS 1100, 1101, 1103, or 1104 (or a more advanced programming course); and either MATH 1200 or 1300 (or a more advanced calculus course). No credit for students who have earned credit for NSC 6270 or PSY 6270. [3] (MNS)

NSC3272 - Structure and Function of the Cerebral Cortex

Course Description

Classic and current concepts of cerebral function. Species differences, receptive field organization, neurotransmitters, modifications by experience, and behavioral effects. Prerequisite: 2201. [3] (MNS)

NSC3274 - Neuroanatomy

Course Description

Functional and comparative anatomy of nervous systems, emphasis on vertebrate brains. Fundamental concepts, organizational principles, structure, connectivity, and how these relate to function and behavior. Demonstrations using plates with human brain sections. Offered on a graded basis only. Prerequisite: 2201. [3] (MNS)

NSC3275 - Working Memory**Course Description**

Properties and neural basis of working memory. Conceptual models and levels of analysis. Experimental techniques of neural signals related to cognitive functions. Neural circuits and neurotransmitter systems. Localization in the brain; modalities; capacity; duration; evolution; development of working memory. Training, individual differences and disorders. Serves as repeat credit for NSC 3892 01 offered Spring 2024, Spring 2023, Spring 2022, Spring 2021. Prerequisite: NSC 1400 (formerly 2201). [3] (MNS)

NSC3630 - Drugs and Behavior**Course Description**

Drug effects on neural circuits, human physiology, individual psychology, and society. Prior to spring 2023, serves as repeat credit for students who have earned credit for NSC 3260. Serves as repeat credit for students who have earned credit for PSY 3630. Prerequisite: 1200 or NSC 2201. [3] (SBS)

NSC3851 - Independent Reading in Neuroscience**Course Description**

Reading and discussion of research papers on a selected topic under direction of a faculty sponsor. Consent of both faculty sponsor and the director of honors and independent study is required. May be repeated for credit once if there is no duplication in topic, but students may earn only up to 1 credit per semester of enrollment. [1; maximum of 2 credits for all semesters of NSC 3851] (No AXLE credit)

NSC3860 - Introduction to Neuroscience Research.**Course Description**

Research and reading in the laboratory of a member of the Neuroscience Program. Consent of the Director of Honors and Independent Research is required. Serves as repeat credit for students who have completed 290. [1] (No AXLE credit)

NSC3861 - Undergraduate Research**Course Description**

Original student research on a defined problem in neuroscience under the direction of a faculty sponsor with "Entering Research Bootcamp" discussion section. Consent of both the faculty sponsor and the director of independent studies is required. Prerequisite: 3860 or both 1400 (formerly 2201) and sophomore standing. [3] (No AXLE credit)

NSC3862 - Undergraduate Research**Course Description**

Continuation of 3861. Original student research on a defined problem in neuroscience under the direction of a faculty sponsor. Consent of both the faculty sponsor and the director of honors and independent studies is required. Prerequisite: 3861. [3] (No AXLE credit)

NSC3863 - Advanced Research in Neuroscience**Course Description**

Original student research on a defined problem in neuroscience under the direction of a faculty sponsor with some independence in the design and execution of the project. Consent of both the faculty sponsor and the director of honors and independent studies is required. Prerequisite: 3862. [3] (No AXLE credit)

NSC3864 - Advanced Research in Neuroscience**Course Description**

Continuation of a research project on a defined problem in neuroscience under the direction of a faculty sponsor with some independence in the design and execution of the project. Consent of both the faculty sponsor and the director of honors and independent studies is required. May be taken for credit more than once, but students may earn only up to 3 credits per semester. Prerequisite 3863. [3] (No AXLE credit)

NSC3891 - Special Topics in Cellular and Molecular Neuroscience**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: 2201. [3] (MNS)

NSC3892 - Special Topics in Systems and Integrative Neuroscience**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: 2201. [3] (MNS)

NSC4961 - Integrative Neuroscience**Course Description**

Structure and function of nervous systems. Emphasis on the vertebrate brain and the relationship of anatomy, physiology, and biochemistry to sensory perception, cognition, motor activity, and learning and memory. Prerequisite: 2201 and senior standing. [3] (MNS)

NSC4961W - Integrative Neuroscience**Course Description**

Structure and function of nervous systems. Emphasis on the vertebrate brain and the relationship of anatomy, physiology, and biochemistry to sensory perception, cognition, motor activity, and learning and memory. Serves as repeat credit for 4961. Prerequisite: 2201 and senior standing. [3] (MNS)

NSC4969 - Senior Seminar in Neuroscience**Course Description**

Seminar with advanced reading, discussion, and writing on a specific topic in neuroscience. Limited to seniors. [3] (No AXLE Credit)

NSC4999 - Honors Research**Course Description**

Participation in a research project under the direction of a faculty sponsor. Consent of both the faculty sponsor and the director of honors and independent study is required. May be repeated for credit more than once, but students may earn only up to 4 credits per semester of enrollment. [2-4] (No AXLE credit)

Next Steps

NEXT1000 - Principles of Self-Advocacy

Course Description

This course will focus on orienting students enrolled in Next Steps to their college experience and providing self-reflection and goal-setting activities to promote success. This course will provide students with knowledge and understanding of self, strategies for advocacy within the classroom and community, and support for leadership development. Students will build awareness and skills in self-advocacy, civic engagement and social justice, disability identity, and leadership. These goals will be achieved through integrated approaches such as service-learning, critical and reflective journaling, lecture, discussion, and community-based immersion. [3]

NEXT1001 - Foundations of Career Exploration I

Course Description

This course will focus on laying the foundation for career development for students enrolled in Next Steps following the National Colleges and Employers' Career Readiness standards. Through in-class activities and field work exploring career industries, students will develop an understanding of their strengths, skills, and goals while learning to evaluate how this connects to employment opportunities. This course will focus on a broad-level exploration of career industries and personal development. [3]

NEXT1002 - Health and Wellness

Course Description

This course will focus on introducing basic topics of health and wellness, with individualized exploration of personal health related to 1) nutrition and food safety, 2) mental health, and 3) sexual health. This course will provide students with knowledge of kitchen safety, skills to support nutrition, and proper food storage. This course will provide students with an understanding of positive mental wellbeing, through developing strategies for: time management and life balance, managing stress, and resource mapping. Lastly, this course will provide students with a greater understanding of the body and anatomy, family and personal values, consent, and emotional and physical risks. Students will have hands-on opportunities to implement strategies discussed in class in individualized ways. These goals will be achieved through integrated approaches such as service-learning, critical and reflective journaling, lecture, discussion, and community-based immersion. [3]

NEXT1003 - Foundations of Career Exploration II

Course Description

This course will build upon the foundation for career development for students enrolled in Next Steps following the National Colleges and Employers' Career Readiness standards. Through in-class activities and field work exploring career industries, students will begin learning how to use technology in their work, communicate professionally, think critically, and demonstrate professionalism both in the classroom and at field work experiences. Students' exploration will narrow in on specific industries or careers of interest, and students will begin to evaluate and think more critically about their career goals, workplace accommodations, and professional identity. Pre-requisite: NEXT 1001 [3]

NEXT1004 - Personal Finance and Responsibility

Course Description

This course will provide students with knowledge and understanding of financial literacy and essential money management skills. This course will introduce essential interpersonal skills, such as active listening, effective communication, and personal accountability. Additionally, this course will introduce and explore topics in independent living including personal home safety, home management, and community mapping. Students will build awareness and skills in budgeting, credit management, and financial safety. These course goals will be achieved through integrated approaches such as service learning, critical and reflective journaling, lecture, discussion, and community-based immersion experiences. [3]

NEXT1005 - Internship I**Course Description**

This course will build upon the two previous foundational courses, Foundations of Career Exploration I and Foundations of Career Exploration II for students enrolled in Next Steps following the National Colleges and Employers' Career Readiness standards. Through in-class activities and on-campus internship, students will continue building on important workplace skills and begin defining their personal career goals. Students will complete internship experiences tied to their personal career goals, apply knowledge of the Americans with Disabilities Act (ADA) in the workplace, and develop essential skills in professionalism, networking, teamwork, and professional communication to support their career development. [3]

NEXT1006 - Emotional Intelligence and Building Social Capital**Course Description**

This course will develop students' essential interpersonal and social skills, including active listening, effective communication, personal accountability, and emotional regulation. Students will explore strategies for recognizing, understanding, and managing their emotions, including stress management, emotional self-awareness, and techniques for maintaining emotional balance in challenging situations. Emphasis will be placed on building and sustaining social capital through the development of meaningful relationships, community engagement, and collaborative problem-solving. These course goals will be achieved through integrated approaches such as service-learning, critical and reflective journaling, lecture, discussion, and community-based immersion experiences. [3]

NEXT1007 - Internship II**Course Description**

This course will build upon the three previous foundational courses, Foundations of Career Exploration I, Foundations of Career Exploration II, and Internship I, for students enrolled in Next Steps following the National Colleges and Employers' Career Readiness standards. Through in-class activities and on-campus internships, students will continue building important workplace skills and further define their personal career goals. Students will complete internship experiences tied to their personal career goals, learn about networking, job searching, and beginning a new job, and develop essential skills in professionalism, networking, teamwork, and professional communication to support their career development. Pre-requisites: NEXT 1001, NEXT 1003, and NEXT 1005 [3].

Other Music Courses

MUSO1000 - Recital Attendance**Course Description**

Weekly recitals in solo and chamber music settings, presented by students enrolled for performance instruction, and six additional faculty/student recitals and concerts. Required of all music degree (B.Mus.) students. (See Academic Regulations section of Catalog.) Offered on a pass/fail basis. [0] Melissa Rose.

MUSO1001 - Commons iSeminar**Course Description**

Open to first-year students of all four undergraduate schools. Topics approved by Blair faculty. Students may propose topics through the associate dean. No credit toward a major or minor in music. General Elective credit only. FALL, SPRING. [1] Staff.

MUSO1130 - Percussion Seminar**Course Description**

Overview of percussion in Western and non-Western cultures from pre-history to present. Emphasis on European/American orchestral practices. Representative works for study chosen from symphony, opera, oratorio, and other orchestral/choral sources. [1]

MUSO1201 - Lyric Theatre Workshop I**Course Description**

Introduction to the various performance elements of the lyric theatre experience: acting, movement, improvisation, use of the voice, stage combat, and scene study. Open to all Vanderbilt students by consent of instructor. [1]

MUSO1202 - Lyric Theatre Workshop II**Course Description**

Various performance elements of the lyric theatre experience: acting, movement, improvisation, use of the voice, stage combat, and scene study. Prerequisite: MUSO 1201. SPRING. [1] Shay.

MUSO1203 - Lyric Theatre Workshop for Instrumentalists**Course Description**

Beginning acting and movement techniques for the lyric stage as they pertain to instrumental musicians. Memorized texts, acting improvisation, and stage movement are explored to gain better connection to the music, fellow collaborators, and the audience. Application to individual instrumental repertoire required. Open by consent of instructor. SPRING. [1] Shay.

MUSO1210 - Baroque Performance for Strings**Course Description**

Aspects of period instrument performance adaptable to modern instruments and modern bows. Articulation, ornamentation, the rule of the down-bow, the influence of dance, and other technical and stylistic issues. Baroque bow provided. Culminates in a lecture-performance. May be repeated for credit. [1]

MUSO1230 - Lyric Writing Workshop**Course Description**

Designed to help students find their unique voice as lyricists through lecture, reading, exercises, discussion, and lyric analysis. Does not count toward a major or minor in music. [1]

MUSO1240 - Songwriting and Elements of Music Theory**Course Description**

(Previously MUTH 1120) Introduction to fundamental elements of music as they apply to popular songwriting techniques. Selected readings on the technical and aesthetic facets of songwriting. Listening analysis and discussion of songs in a variety of current styles. Selected aural skills as they relate to the songwriter's craft. Class visits by successful songwriters. Designed for students with little or no technical training in music. Does not count toward a major or minor in music. FALL, SPRING. [3] Walker.

MUSO1241 - Songwriting II

Course Description

(Previously MUTH 1125) Project-based class designed to refine and advance skills developed in MUSO 1240 (previously MUTH 1120). Focuses on effective musical and lyrical thematic treatment. Extensive study of rewriting techniques; frequent performances of student compositions. Selected readings on the technical and aesthetic facets of songwriting. Listening, analysis, and discussion of songs in a variety of current styles. Occasional Monday night sessions with guest songwriters and experts in the field. Does not count toward a major or minor in music. May be repeated once for credit. Prerequisite: MUSO 1240 (previously MUTH 1120). FALL, SPRING. [3] Walker.

MUSO1310 - Music, Mind, and Body

Course Description

This course explores the art of musical expression through the principles and techniques of Jacques-Dalcroze. Using the theoretical framework of enactive cognition, students will engage in a reflective practice synthesizing reading, expressive movement, rhythm, and improvisation in music from a broad array of styles and cultures. [2]

MUSO1400 - Diction for Singers: English and Italian

Course Description

An introduction to the International Phonetic Alphabet as applied to lyric English and Italian diction. FALL. [1] Montgomery.

MUSO1410 - Diction for Singers: German

Course Description

High German diction, using the International Phonetic Alphabet. Prerequisite: 1400 or permission of the instructor. SPRING. [1] Montgomery.

MUSO1420 - Diction for Singers: French

Course Description

French stage diction, using the International Phonetic Alphabet. Prerequisite: 1400 or permission of the instructor. FALL. [1] Montgomery.

MUSO1501 - Community Music Partnerships: Fundamentals and Applications I

Course Description

Development of practical skills for music-making in a variety of community service contexts. Interactive setting with a focus on skills of collaboration and communication, both as artists and with a community partner. Culminates in small case-study group performance projects. [1]

MUSO1502 - Community Music Partnerships: Fundamentals and Applications II

Course Description

Application of essential skills of programming, audience development, marketing, and collaboration, through a mentored, project-based experience with a community partner in metro Nashville. Culminates in a public performance in collaboration with the community partner. Prerequisite: MUSO 1501. [1]

MUSO2100 - Music Criticism and Writing

Course Description

A practical guide to writing professional music criticism. Readings include selected writings of the great critics, literary authors, program annotators and bloggers. Assignments involve listening exercises, written reviews and program notes. Difference in style among classical, jazz and rock critics will be considered. Prerequisites: MUSL 2200W and MUSL 2100, or permission of instructor. FALL. [2] Pitcher.

MUSO2200 - The Movement of Line

Course Description

By examining in detail interrelated examples from calligraphy, drawing, verse, and music, this course seeks to discover common elements of concept and construction in diverse forms of linear movement. Sophomore standing and an ability to read a single line of music required. [3]

MUSO3010 - Performance in Practice, IES Vienna

Course Description

Open by audition to students in the IES Vienna program. The workshop is designed to offer vocalists and instrumentalists the opportunity to expand repertoire and enhance performance skills. Rehearsal and discussion of aspects of selected works in relation to the challenge of performance. May be repeated once for credit. [2] Staff.

MUSO3060 - Directed Study in Music Medicine Research

Course Description

This course explores the intersections of classical music with the fields of patient recovery, ICU environments, and clinical research. Therapeutic music has been shown to provide significant physical and mental health benefits to patients. Students in the health-care setting provide live and virtual-live music for patients; learn about qualifiable benefits for patients, families, and clinicians; explore quantifiable benefits for patients; and develop research skills focused on the patient/problem, intervention, comparison, and outcomes. Mentorship provided by the senior faculty team. Open to all students. Variable credit, [1-3]

MUSO3100 - Music and Cognition

Course Description

Theories and research about the cognition of music, appreciation, and performance. Selected musical topics include timbre, consonance, dissonance, tuning, melody, rhythm, scales, modes, chords, and composition. Concepts and research from the psychological sciences emphasize sensory mechanisms, perceptual discriminations, pattern recognition, categorization, transfer of learning, and motor coordination. Prerequisite: one course in music or psychology. [3]

MUSO3112 - Singing Theology and Justice in Christian Traditions

Course Description

This course will explore the diversity of Christian congregational song by analyzing the texts and music from global and ecumenical perspectives through historical, literary, musical, and theological lenses. Particular attention will be paid to how sacred music expresses theology while also speaking to social justice issues such as race, class, ethnicity, ability, sex, gender, and sexual orientation. This course is particularly designed for students who will be choosing music for their specific contexts in a variety of settings - both inside and outside of church walls. (This course is cross-listed at the Divinity School as DIV 5412) [3]

MUSO3850 - Independent Study**Course Description**

Development of a project or a program of reading under the direction of a faculty sponsor. Consent of the faculty sponsor is required. (See Academic Regulations section.) [Repeatable for credit, variable up to 3 hours per semester.] Staff. [1-3]

MUSO3970 - Junior Recital**Course Description**

Students are encouraged to prepare a joint recital, shared with another degree candidate. See Blair Academic Regulations section of the Undergraduate Catalog for detailed requirements. Open by permission of instructor. [1]

MUSO4970 - Senior Recital**Course Description**

See Blair Academic Regulations section of the Undergraduate Catalog for detailed requirements. Open by permission of instructor. [1]

MUSO4972 - Jazz Concentration Recital**Course Description**

See Blair Academic regulations section of the Undergraduate Catalog for detailed requirements. Open by permission of instructor. [1]

Peabody College

PBDY2100 - Introduction to Post-Secondary Learning Needs**Course Description**

This course provides an introduction to learning in higher education for first semester students. Students will be exposed to research on metacognition, executive functioning, learning strategies and goal-setting and allows students opportunities to self-evaluate their learning strengths and needs based on literature focused on adolescent and young-adult learning. [3]

PBDY3890 - Special Topics in Peabody College**Course Description**

This course will help you learn to navigate the rapidly evolving landscape of artificial intelligence (AI). We'll break down how AI works, how to use it more effectively, and tackle hard questions around privacy, transparency, sustainability, equity, power, even creepiness. You'll get to explore how AI is starting to transform everything from healthcare and security to education, the arts, business, and your social life, in ways ranging from inspired to troubling. AI is truly everywhere now--it even helped write this course description. [3]

Peabody Honors Scholars

PSCH1817 - Peabody Honors Seminar in the Humanities and Creative Arts**Course Description**

Offered on a graded basis only. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to six credits per semester of enrollment. [3]

PSCH1827 - Peabody Perspectives Honors Seminar**Course Description**

Offered on a graded basis only. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to six credits per semester of enrollment. [3]

PSCH1837 - Peabody Honors Seminar Behavioral and Social Sciences**Course Description**

Offered on a graded basis only. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to six credits per semester of enrollment. [3]

PSCH1847 - Peabody Honors Seminar in History and Culture of the United States**Course Description**

Offered on a graded basis only. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [3]

PSCH1857 - Peabody Honors Seminar in Mathematics and Natural Science**Course Description**

Offered on a graded basis only. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to six credits per semester of enrollment. [3]

PSCH1867 - Peabody Honors Seminar in International Cultures**Course Description**

Offered on a graded basis only. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to six credits per semester of enrollment. [3]

PSCH2115 - Peabody Scholars Seminar II**Course Description**

Seminar for Peabody Scholars in the second year of study. Topics vary. [0-3]

PSCH4965 - Peabody Scholars Capstone Seminar I**Course Description**

Capstone Seminar for Peabody Scholars to be taken fall semester of the senior year. [0-3]

PSCH4966 - Peabody Scholars Capstone Seminar II**Course Description**

Capstone Seminar for Peabody Scholars to be taken spring semester of the senior year. [0-3]

Performance Instruction: Banjo

BNJO1100 - Banjo**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open for elective credit. New students by interview only. Fees apply to non-B.Mus. students [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Brown.

Performance Instruction: Bass

BASS1100 - Double Bass (elective/ minors/ second majors)

Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus. students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Meyer, Reist, Wanner.

BASS2100 - Double Bass (B.Mus.Arts and Integrated Studies Freshmen/Sophomores)

Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies majors. [2] Reist, Wanner.

BASS2200 - Double Bass (Performance Majors Freshmen/Sophomores)

Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [4] Meyer, Reist, Wanner.

BASS4100 - Double Bass (B.Mus.Arts and Integrated Studies Juniors/Seniors)

Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies juniors and seniors. [2] Reist, Wanner.

BASS4200 - Double Bass (Performance Majors Juniors/Seniors)

Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Meyer, Reist, Wanner.

Performance Instruction: Bassoon

BSSN1100 - Bassoon (elective/ minor / second major)

Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Kolkay.

BSSN2100 - Bassoon (B.Mus.Arts and Integrated Studies Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies majors. [2] Kolkay.

BSSN2200 - Bassoon (Performance Majors Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [4] Kolkay.

BSSN4100 - Bassoon (B.Mus.Arts and Integrated Studies Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies juniors and seniors. [2] Kolkay.

BSSN4200 - Bassoon (Performance Majors Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Kolkay.

Performance Instruction: Cello

CLLO1100 - Cello (elective credit and General Music Minors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] K. Cassel, Mansell, S. Reist, Wang.

CLLO2100 - Cello (B.Mus.Arts and Integrated Studies Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies majors. [2] Wang.

CLLO2200 - Cello (Performance Majors Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [4] Wang.

CLLO4100 - Cello (B.Mus.Arts and Integrated Studies Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies juniors and seniors. [2] Wang.

CLLO4200 - Cello (Performance Majors Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Wang.

Performance Instruction: Clarinet

CLAR1100 - Clarinet (elective/ minor / second major)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Jackson, Lee.

CLAR2100 - Clarinet (B.Mus.Arts and Integrated Studies Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus. and Integrated Studies majors. [2] Jackson.

CLAR2200 - Clarinet (Performance Majors Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [4] Jackson.

CLAR4100 - Clarinet (B.Mus.Arts and Integrated Studies Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies juniors and seniors. [2] Jackson.

CLAR4200 - Clarinet (Performance Majors Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Jackson.

Performance Instruction: Drumset

DRUM1100 - Drumset (elective credit)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] D. Phillips.

Performance Instruction: Euphonium

EUPH1100 - Euphonium (elective/ minor / second major)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Long.

EUPH2100 - Euphonium (B.Mus.Arts and Integrated Studies Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies majors. [2] Long.

EUPH2200 - Euphonium (Performance Majors Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [4] Long.

EUPH4100 - Euphonium (B.Mus.Arts and Integrated Studies Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies juniors and seniors. [2] Long.

EUPH4200 - Euphonium (Performance Majors Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Long.

Performance Instruction: Fiddle

FDDL1100 - Fiddle
Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open for elective credit. Fees apply to non-B.Mus.B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Combs, Plohman.

Performance Instruction: Flute**FLUT1100 - Flute (elective/music minors/2nd majors)**
Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Barth, Dunnivant.

FLUT2100 - Flute (B.Mus.Arts and Integrated Studies Freshmen/Sophomores)
Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies majors. [2] Barth.

FLUT2200 - Flute (Performance Majors Freshmen/Sophomores)
Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [4] Barth.

FLUT4100 - Flute (B.Mus.Arts and Integrated Studies Juniors/Seniors)
Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies juniors and seniors. [2] Barth.

FLUT4200 - Flute (Performance Majors Juniors/Seniors)
Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Barth.

Performance Instruction: Guitar Classical

GTR1010 - Introduction to Guitar I

Course Description

A foundation in basic guitar technique that will prepare students for future studies in classical, jazz, or popular styles of guitar. Emphasis on chordal accompaniment, development of reading skills, improvisational techniques with melodies and chords. One 50-minute group lesson weekly. Fees apply to non-B.Mus./B.Mus.Arts students. [1] Kimbrough.

GTR1020 - Introduction to Guitar II

Course Description

A foundation in basic guitar technique that will prepare students for future studies in classical, jazz, or popular styles of guitar. Emphasis on chordal accompaniment, development of reading skills, improvisational techniques with melodies and chords. One 50-minute group lesson weekly. Prerequisite: GTR 1010 or permission of instructor. Fees apply to non-B.Mus./B.Mus.Arts students. [1] Kimbrough.

GTR1030 - Fingerboard Harmony

Course Description

Individual instruction in advanced guitar skills: modal positions, modal patterns, score reading, arpeggios, transposition, and chord progressions. Fees apply to non-B.Mus. students. Prerequisite: GTR 1020 or permission of instructor. FALL, SPRING. [1-2 variable hours, based on lesson length as agreed on with instructor.] Kimbrough

GTR1100 - Guitar (elective/ minor / second major)

Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Todd.

Performance Instruction: Harp

HARP1100 - Harp (elective/ minor / second major)

Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Agresta Copely.

HARP2100 - Harp (B.Mus.Arts and Integrated Studies Freshmen/Sophomores)

Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies majors. [2] Copely.

HARP2200 - Harp (Performance Majors Freshmen/Sophomores)

Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [4] Shaffer.

HARP4100 - Harp (B.Mus.Arts and Integrated Studies Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies juniors and seniors. [2] Agresta Copely.

HARP4200 - Harp (Performance Majors Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Shaffer.

Performance Instruction: Harpsichord

HRPS1100 - Harpsichord**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students [1-2 variable credit hours, based on lesson length and repertoire as agreed on with instructor]. Brecht.

HRPS1120 - Harpsichord Continuo**Course Description**

Accompanying repertoire from the 17th and 18th centuries. Topics include playing from figured and unfigured bass lines, playing simple 4-part exercises, and constructing inventive accompaniments. Recommended for harpsichord, organ, and collaborative piano students; audition required for non-keyboard majors. Concurrent enrollment in HRPS 1100 recommended. [1]

Performance Instruction: Horn

HORN1100 - Horn (elective/ minor / second major)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Norton.

HORN2100 - Horn (B.Mus.Arts and Integrated Studies Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies majors. [2] Norton.

HORN2200 - Horn (Performance Majors Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [4] Norton

HORN4100 - Horn (B.Mus.Arts and Integrated Studies Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies juniors and seniors. [2] Norton.

HORN4200 - Horn (Performance Majors Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Norton

Performance Instruction: Jazz

JAZZ1000 - Global Jazz Forum**Course Description**

Weekly observation and participation. Required of all B.Mus. jazz studies majors and students enrolled in MUSE 1310, 1320, or 1340. [0]

JAZZ1100 - Jazz Private Instruction**Course Description**

Private instruction on standard jazz instruments and voice. Repertory and techniques chosen to meet individual needs. Open by audition. Private lesson fees apply to non-B.Mus./B.Mus.Arts students. May be repeated for credit. [Variable credit: 1-2 each semester. Multiple section enrollment possible. Students may accrue up to 6 credits per semester of enrollment]. Barber, Coffin, Dudley, Kimbrough, Middagh, Phillips, Spencer, Watson Utterstrom.

JAZZ1150 - Jazz and Commercial Arranging**Course Description**

Individual instruction in jazz and commercial arranging, content ranging from lead sheet writing to studio orchestra. Repertory and techniques chosen to meet individual needs. [1-2] Middagh

JAZZ2100 - Jazz (B.Mus. and B. Mus. Arts Jazz Studies First Years/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus. and B. Mus. Arts Jazz Studies majors. [2]

JAZZ2310 - Jazz Improvisation I: The Blues

Course Description

(Previously JAZZ 1210) Introduction to the techniques of jazz improvisation. Development of basic performing technique with in-depth study of the blues form and its variations. [1]

JAZZ2320 - Jazz improvisation II: The Great American Songbook

Course Description

(Previously JAZZ 1220) Intermediate study techniques for jazz improvisation. In-depth study of rhythm changes, the Great American Songbook, and jazz standards. Introduction to re-harmonization techniques.

Prerequisite: JAZZ 2310 (Previously JAZZ 1210). [1]

JAZZ2330 - Jazz Improvisation III: Post-bop and Beyond

Course Description

(Previously JAZZ 1230) Advanced study in techniques for jazz improvisation. In-depth study of contemporary jazz compositions, structured- and free-forms, and original student compositions. Prerequisite: JAZZ 2310 (previously JAZZ 1210) and JAZZ 2320 (previously JAZZ 1220). [1]

JAZZ4100 - Jazz (B.Mus. and B. Mus. Arts Jazz Studies Juniors/Seniors)

Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open to B.Mus. and B. Mus. Arts jazz studies majors juniors and seniors. [2]

Performance Instruction: Mandolin

MNDL1100 - Mandolin

Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open for elective credit. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Pearcy

Performance Instruction: Oboe

OBOE1100 - Oboe (elective/ minor / second major)

Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Hauser, Wiesmeyer.

OBOE2100 - Oboe (B.Mus.Arts and Integrated Studies Freshmen/Sophomores)

Course Description

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies majors. [2] Hauser.

OBOE2200 - Oboe (Performance Majors Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [4] Hauser.

OBOE4100 - Oboe (B.Mus.Arts and Integrated Studies Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies juniors and seniors. [2] Hauser.

OBOE4200 - Oboe (Performance Majors Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Hauser.

Performance Instruction: Organ

ORGN1100 - Organ (elective/ minor / second major)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Brecht.

Performance Instruction: Percussion

PERC1010 - Introduction to Percussion**Course Description**

Basic percussion techniques with emphasis on rolls, embellishments, sticking combinations, and their applications for concert and popular musical styles. Prerequisite: previous musical experience and an understanding of notation. One 50-minute group lesson weekly. Fees apply to non-B.Mus./B.Mus.Arts students. [1]

PERC1100 - Percussion (elective/ minor / second major)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Jung.

PERC2100 - Percussion (B.Mus.Arts and Integrated Studies Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies majors. [2] Jung.

PERC2200 - Percussion (Performance Majors Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [4] Jung.

PERC4100 - Percussion (B.Mus.Arts and Integrated Studies Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Specialized study in drumset, jazz vibraphone or contemporary marimba is available. Open only to B.Mus.Arts and Integrated Studies juniors and seniors; and for elective credit to Percussion Performance juniors and seniors. [2] Jung.

PERC4200 - Percussion (Performance Majors Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Specialized study in drumset, jazz vibraphone or contemporary marimba is available. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Jung.

Performance Instruction: Piano

PIAN1010 - Introduction to Piano I**Course Description**

A total-musicianship approach to the piano. Repertoire, technique, and sight reading are studied. Also includes the study of transposition, harmonization, and improvisation. One 50-minute group lesson weekly. Fees apply. Not open to B.Mus./B.Mus.Arts students. FALL, SPRING. [1]

PIAN1020 - Introduction to Piano II**Course Description**

A total-musicianship approach to the piano. Repertoire, technique, and sight reading are studied. Also includes the study of transposition, harmonization, and improvisation. One 50-minute group lesson weekly. Prerequisite: PIAN 1010 or permission of instructor. Fees apply. Not open to B.Mus./B.Mus.Arts students. FALL, SPRING. [1]

PIAN1030 - Early Intermediate Piano Repertoire**Course Description**

Students will learn classical piano repertoire along with popular songs that include keyboard concepts. Keyboard harmony and technique will be used to support the student's adventure through piano literature. A daily sight reading component will help build confidence in grand staff reading. Open to students who have completed MUKH 1131 or PIAN 1020. [1]

PIAN1100 - Piano (elective/ minor / second major)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Conner, Dorfman, Hwang, Krieger, Middleton, Nies, Reagan, Yang.

PIAN2100 - Piano (B.Mus.Arts and Integrated Studies Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies majors. [2] Dorfman, Krieger, Nies.

PIAN2200 - Piano (Performance Majors Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [4] Dorfman, Krieger, Nies.

PIAN4100 - Piano (B.Mus.Arts and Integrated Studies Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies juniors and seniors. [2] Dorfman, Krieger, Nies.

PIAN4200 - Piano (Performance Majors Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Dorfman, Krieger, Nies.

Performance Instruction: Saxophone

SAX1100 - Saxophone (elective/ minor / second major)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Utey.

SAX2100 - Saxophone (B.Mus.Arts and Integrated Studies Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies majors. [2] Utey.

SAX2200 - Saxophone (Performance Majors Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [4] Utley.

SAX4100 - Saxophone (B.Mus.Arts and Integrated Studies Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies juniors and seniors. [2] Utley.

SAX4200 - Saxophone (Performance Majors Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Utley.

Performance Instruction: Steel Pan

STPN1100 - Steel Drum**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open for elective credit. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Britain.

Performance Instruction: Trombone

TROM1100 - Trombone (elective/ minor / second major)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Wilson.

TROM2100 - Trombone (B.Mus.Arts and Integrated Studies Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies majors. [2] Wilson.

TROM2200 - Trombone (Performance Majors Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [4] Wilson.

TROM4100 - Trombone (B.Mus.Arts and Integrated Studies Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies juniors and seniors. [2] Wilson.

TROM4200 - Trombone (Performance Majors Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Wilson.

Performance Instruction: Trumpet

TRPT1100 - Trumpet (elective/ minor / second major)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Kunkee, Sibaja.

TRPT2100 - Trumpet (B.Mus.Arts and Integrated Studies Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies majors. [2] Sibaja.

TRPT2200 - Trumpet (Performance Majors Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [4] Sibaja.

TRPT4100 - Trumpet (B.Mus.Arts and Integrated Studies Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies juniors and seniors. [2] Sibaja.

TRPT4200 - Trumpet (Performance Majors Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Sibaja.

Performance Instruction: Tuba

TUBA1100 - Tuba (elective/ minor / second major) **Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Long.

TUBA2100 - Tuba (B.Mus.Arts and Integrated Studies Freshmen/Sophomores) **Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies majors. [2] Long.

TUBA2200 - Tuba (Performance Majors Freshmen/Sophomores) **Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [4] Long.

TUBA4100 - Tuba (B.Mus.Arts and Integrated Studies Juniors/Seniors) **Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies juniors and seniors. [2] Long.

TUBA4200 - Tuba (Performance Majors Juniors/Seniors) **Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Long.

Performance Instruction: Viola

VLA1010 - Viola for Violinists **Course Description**

Technical principles, practices, and strategies for violinists learning viola. Investigation of solo and chamber music repertoire; historical evolution of the viola. Viola provided. Prerequisite: Approval of violin instructor and course instructor. FALL, SPRING. [1] Plummer.

VLA1100 - Viola (elective/ minor / second major) **Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.]

VLA2100 - Viola (B.Mus.Arts and Integrated Studies Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus. and Integrated Studies majors. [2] Plummer.

VLA2200 - Viola (Performance Majors Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [4] Kochanowski, Plummer.

VLA2600 - Advanced Scales for Violists**Course Description**

The purpose of this course is to teach and maintain fundamental viola technique through systematic scale study. Over the course of each semester, students will focus on 3 octave major and minor scales, arpeggios, 3rds, 6ths, 8ves, fingered 8ves and 10ths, and various bow strokes in every key. [1]

VLA4100 - Viola (B.Mus.Arts and Integrated Studies Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies juniors and seniors. [2] Kochanowski, Plummer..

VLA4200 - Viola (Performance Majors Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Kochanowski, Plummer.

Performance Instruction: Violin

VLN1100 - Violin (elective/ minor / second major)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.] Blackwell, Combs, Heard, Huebl, McGann, Miahky, Romero Ramos.

VLN2100 - Violin (B.Mus.Arts and Integrated Studies Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies majors. [2] Heard, Huebl, Miahky.

VLN2200 - Violin (Performance Majors Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [4] Heard, Huebl, Miahky.

VLN2600 - Advanced Scales for Violinists**Course Description**

The purpose of this course is to teach and maintain fundamental violin technique through systematic scale study. Over the course of each semester, students will focus on 3 octave major and minor scales, arpeggios, 3rds, 6ths, 8ves, fingered 8ves and 10ths, and various bow strokes in every key. [1]

VLN4100 - Violin (B.Mus.Arts and Integrated Studies Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies juniors and seniors. [2] Heard, Huebl, Miahky.

VLN4200 - Violin (Performance Majors Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Heard, Huebl, Miahky.

Performance Instruction: Voice

VOIC1010 - Introduction to Voice I**Course Description**

Vocal anatomy, fundamentals of breathing and healthy phonation, posture, performance anxiety, listening skills and dealing with tension. Appropriate for beginning singers who have never taken private voice lessons and are interested in Musical Theater, Pop Music, Commercial music, Opera, and other genres. Fees apply. [2]

VOIC1100 - Voice (elective/ minor / second major)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. New students by interview only. Prerequisite is VOIC 1020. Fees apply to non-B.Mus./B.Mus.Arts students. [1-2 variable credits, based on lesson length and repertoire as agreed on with instructor.]

VOIC2100 - Voice (B.Mus.Arts and Integrated Studies Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies majors. [2] Jarman, T. Nelson, Shay.

VOIC2200 - Voice (Performance Majors Freshmen/Sophomores)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to freshman and sophomore performance majors. [3] Jarman, Nelson, Shay.

VOIC4100 - Voice (B.Mus.Arts and Integrated Studies Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to B.Mus.Arts and Integrated Studies juniors and seniors. [2] Jarman, Nelson, Shay.

VOIC4200 - Voice (Performance Majors Juniors/Seniors)**Course Description**

Individual instruction focused on the art and practice of the instrument, with emphasis on tone quality, technique, rhythm, interpretation, and literature. Open only to junior and senior performance majors. Prerequisite: successful completion of upper divisional hearing. [4] Jarman, Nelson, Shay.

Persian

PERS1101 - Elementary Persian I**Course Description**

Development of reading, listening, speaking, and writing skills. Not open to students who have earned credit for a more advanced Persian language course without permission. Credit hours will be reduced from most recent course taken (or from test or transfer credit) as appropriate. [3] (INT)

PERS1102 - Elementary Persian II**Course Description**

Development of reading, listening, speaking, and writing skills. No credit for students who have earned credit for a more advanced Persian language course. Prerequisite: 1101. [3] (INT) (CORE LA)

PERS2201 - Intermediate Persian I**Course Description**

Intensive work in spoken Persian with emphasis on vocabulary acquisition, reading comprehension, and writing skills. Advanced grammar, modern Persian word formation, verb aspect usage, and structure of complex sentences. Prerequisite: 1102. [3] (INT) (CORE LA)

PERS2202 - Intermediate Persian II

Course Description

Intensive work in spoken Persian with emphasis on vocabulary acquisition, reading comprehension, and writing skills. Advanced grammar, modern Persian word formation, verb aspect usage, and structure of complex sentences. Advanced readings in poetry. Prerequisite: 2201. [3] (INT) (CORE LA)

Philosophy

PHIL1001 - Commons iSeminar

Course Description

Topics vary. General Elective credit only. [1] (No AXLE credit)

PHIL1002 - Introduction to Philosophy

Course Description

An introduction to the basic problems of philosophy based upon readings in the works of selected leading philosophers. Repeat credit for students who have completed 1002W. [3] (HCA) (CORE A, C) (LE HFA)

PHIL1002W - Introduction to Philosophy

Course Description

An introduction to the basic problems of philosophy based upon readings in the works of selected leading philosophers. Repeat credit for students who have completed 1002. [3] (HCA) (LE HFA)

PHIL1003 - General Logic

Course Description

A study of the uses of language, definition, informal fallacies, the theory of the syllogism, the basic operations of modern symbolic logic, and selected issues in inductive logic and scientific method. Emphasis is placed on the ambiguities and pitfalls of ordinary usage and on techniques for translating ordinary arguments into formal logic. [3] (MNS) (CORE B, D) (LE HFA)

PHIL1004 - Introduction to Asian Philosophy

Course Description

Philosophical thought of Asian origin, especially India and China, from ancient times to the present, theoretical and practical concerns. Repeat credit for students who have completed 1004W. [3] (INT) (CORE C) (LE HFA)

PHIL1004W - Introduction to Asian Philosophy

Course Description

Philosophical thought of Asian origin, especially India and China, from ancient times to the present, theoretical and practical concerns. Repeat credit for students who have completed 1004. [3] (INT) (LE HFA)

PHIL1005 - Introduction to Ethics

Course Description

A study of theories of the good life and of the nature of virtue. Readings in major texts and discussion of selected problems. Serves as repeat credit for PHIL 1005W. [3] (P) (CORE C, E) (LE HFA)

PHIL1005W - Introduction to Ethics**Course Description**

A study of theories of the good life and of the nature of virtue. Readings in major texts and discussion of selected problems. Serves as repeat credit for PHIL 1005. [3] (P)

PHIL1008 - Introduction to Medical Ethics**Course Description**

Moral issues in the practice of medicine, biomedical research, policies and regulations related to health care. Repeat credit for students who have completed 1008W. [3] (P) (CORE E) (LE HFA)

PHIL1008W - Introduction to Medical Ethics**Course Description**

Moral issues in the practice of medicine, biomedical research, policies and regulations related to health care. Repeat credit for students who have completed 1008. [3] (P)

PHIL1009 - Introduction to Philosophy of Artificial Intelligence**Course Description**

Philosophical questions concerning the nature, possibility, and ethics of artificial intelligence. [3] (HCA) (CORE B, D) (LE HFA)

PHIL1100 - Introduction to Business Ethics**Course Description**

Ethical issues arising from business and professional practice. Topics will include: corporate social responsibility, employee rights, technology and privacy in the workplace, corporate governance, and globalization. [3] (P)

PHIL1103 - Justice**Course Description**

Different understandings of and debates concerning justice. Equality and freedom, individualism and community, diversity, patriotism, and representation. [3] (HCA) (CORE C, E) (LE HFA)

PHIL1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

PHIL1200 - The Meaning of Life**Course Description**

Accounts of life's meaning. The relations between ways of living, happiness, and the fact of death. The individual's role in giving meaning to life. Readings from Mill, Tolstoy, Kierkegaard, and several contemporary thinkers. Repeat credit for students who have completed 1200W. [3] (HCA) (CORE A, C) (LE HFA)

PHIL1200W - The Meaning of Life**Course Description**

Accounts of life's meaning. The relations between ways of living, happiness, and the fact of death. The individual's role in giving meaning to life. Readings from Mill, Tolstoy, Kierkegaard, and several contemporary thinkers. Repeat credit for students who have completed 1200. [3] (HCA)

PHIL1865 - Civil War: Philosophical Perspectives**Course Description**

Problems in social and political philosophy as seen through the lens of the U.S. Civil War. Moral criteria for justifying secession and war, existential perspectives on mass death, ethical paradoxes of slaveholding in a democratic republic, meanings of race and nation, uses and abuses of history and memory. [3] (HCA)

PHIL2100 - Ancient Philosophy**Course Description**

An examination of the major Greek and Roman philosophers with emphasis on the works of Plato and Aristotle. [3] (HCA) (CORE C) (LE HFA)

PHIL2101 - Hellenistic and Late Ancient Philosophy**Course Description**

Philosophical ideas of Stoics, Cynics, Epicureans, skeptics, Peripatetics, Neoplatonists, and early monotheist thinkers such as Philo, Origen, and Philoponus. [3] (HCA)

PHIL2102 - Medieval Philosophy**Course Description**

Comparative study of key figures in Islamic, Jewish, and Christian philosophy as they struggle with the philosophy of logic, metaphysics, language, culture, politics, ethics, and nature. [3] (INT)

PHIL2103 - Modern Philosophy**Course Description**

An examination of the major philosophers of modern Europe from Descartes and Spinoza through Locke, Berkeley, Hume, and Kant. [3] (HCA)

PHIL2104 - Nineteenth-Century Philosophy**Course Description**

A study of selected themes and writings from nineteenth-century European philosophers. [3] (INT) (CORE: C, E) (LE: HFA)

PHIL2109 - Twentieth-Century Continental Philosophy**Course Description**

A study of selected twentieth-century philosophers such as Derrida, Foucault, and Lacan. [3] (HCA)

PHIL2110 - Contemporary Philosophy**Course Description**

An examination of selected problems treated in recent philosophical literature such as meaning, perception, knowledge, truth, and freedom. Readings from the Anglo American analytical and the phenomenological traditions. [3] (HCA)

PHIL2608 - Death and Dying**Course Description**

Death and dying. Ethical issues. Work on concepts central to ethical reasoning about life, dying, and death, and on topics such as end-of-life decision making, euthanasia, advance directives, allocation, and equipoise. [3] (HCA) (CORE C, E) (LE HFA)

PHIL2620 - Ethics of Artificial Intelligence**Course Description**

Ethical issues in the use and development of artificial intelligence. [3] (HCA) (CORE D, E) (LE HFA)

PHIL2660 - Philosophy of Music**Course Description**

Music and meaning, language, emotion, expression, interpretation, performance, the body, and politics. No musical background is required. [3] (HCA)

PHIL2661 - Philosophy of Sport**Course Description**

Philosophical examination of sports, athletics, games, and play. Fairness, competition, cheating, aesthetics, embodiment, and doping. Role models, gender, exploitation, luck, and sports ethics. [3] (P)

PHIL2662 - Embodiment and Identity**Course Description**

Classical philosophers, phenomenologists, and contemporary thinkers. Metaphysical and ethical themes of embodiment; relation to self-identity. Applications in health, sports, politics, race, and gender. Serves as repeat credit for PHIL 1111 section 32 offered Spring 2024 and Spring 2022. [3] (HCA) (CORE C) (LE HFA)

PHIL2665 - Race and Racism**Course Description**

Race and related concepts, including ethnicity, caste, class, gender, nation, and intersectionality. Discrimination, xenophobia, prejudice, bias, oppression, and privilege. [3] (P) (CORE B, E) (LE HFA)

PHIL3003 - Formal Logic and Its Applications**Course Description**

A self-contained course designed to convey an understanding of the concepts of modern formal logic, to develop convenient techniques of formal reasoning, and to make some applications of them in one or more of the following: psychology, linguistics, structuralist studies, information and computer sciences, and the foundations of mathematics. Philosophy 1003 is not required. [3] (MNS)

PHIL3004 - Advanced Asian Philosophy**Course Description**

Classical Asian philosophical texts. Historical development of practices and ideas; translation and interpretation issues; comparisons with European and other traditions of thought. [3] (INT)

PHIL3005 - Jewish Philosophy
Course Description

Introduction to Jewish philosophy and the philosophical achievement of such major figures as Philo, Saadia, Maimonides, Levinas, and selected contemporary thinkers. [3] (HCA)

PHIL3006 - Islamic Philosophy
Course Description

Introduction to the major figures of Islamic philosophy including Kindi, Razi, Farabi, Avicenna, and Ibn Khaldun. [3] (INT)

PHIL3007 - French Feminism
Course Description

Introduction to the tradition of French feminist philosophy, including relevant works by Beauvoir, Cixous, Irigaray, Kristeva, LeDoeuff, Kofmann, and others. [3] (No AXLE credit)

PHIL3008 - American Philosophy
Course Description

A study of the works of selected American philosophers from the colonial period to the present. [3] (US)

PHIL3009 - Existential Philosophy
Course Description

A study of two or three existential philosophers and selected problems that arise in relation to their thought. [3] (HCA)

PHIL3010 - Phenomenology
Course Description

Selected readings from such thinkers as Husserl, Sartre, and Merleau-Ponty on the structures of experience, the sources and limits of knowledge, mind, and body, interpersonal relations, and the meaning of freedom. [3] (HCA)

PHIL3011 - Critical Theory
Course Description

The Frankfurt School; mass culture, ideology, and modernism in the arts; the disenchantment of reason; alienation and fascism; the prospects for experience and political critique. Readings include Adorno, Horkheimer, Marcuse, Benjamin, and Habermas. [3] (HCA)

PHIL3012W - Writing as Political Resistance
Course Description

Writings from the political margins from authors under house arrest, in exile, or in prison. Expressions of active resistance to oppressive, and occasionally violent, political institutions. [3] (P)

PHIL3013 - History of Aesthetics
Course Description

History of philosophy of art, aesthetic experience, creativity, criticism, and related concepts. [3] (HCA)

PHIL3014 - Modernistic Aesthetics**Course Description**

Abstraction, nontraditional media, mixed media, new media, changes in artistic institutions, and the death of art. [3] (HCA)

PHIL3103 - Immanuel Kant**Course Description**

Kant's revolutionary critique of the foundations of human knowledge, moral obligation, and religious faith, with readings from his three Critiques and lesser works. [3] (HCA)

PHIL3104 - Kierkegaard and Nietzsche**Course Description**

A study of selected works. [3] (HCA)

PHIL3105 - Hegel**Course Description**

Selected works and themes. Experience, reason, freedom, history, and sociality. Modernity, dialectics, religion, and art. [3] (HCA)

PHIL3333 - Special Offering**Course Description**

Topics vary. [3]

PHIL3600 - Philosophy of Knowledge**Course Description**

Nature, sources, and scope of scientific, moral, and religious belief. Justification, knowledge, and skeptical challenges to their legitimacy. [3] (HCA)

PHIL3601 - Metaphysics**Course Description**

Selected problems in metaphysics such as ultimate explanation, meaning of existence, time and eternity, freedom and determinism, and science and religion. [3] (HCA)

PHIL3602 - Philosophy of History**Course Description**

Focus on alternative conceptions of time and history in Aristotle, Augustine, Kant, Hegel, Heidegger, and Benjamin. [3] (HCA)

PHIL3603 - Philosophy of Education**Course Description**

Analysis of educational concepts. Educational implications of theories of knowledge and theories of the individual. Emphasis on higher education. [3] (HCA)

PHIL3604 - Gender and Sexuality**Course Description**

Recent theories of the relation between sex, gender, and sexuality. Construction of gendered identities, and their relation to embodiment, gender politics, ethics and epistemology. [3] (P)

PHIL3605 - Contemporary Ethical Theory**Course Description**

A study of theories about the cognitive foundations of ethical discourses. Prerequisite: 1005. [3] (HCA)

PHIL3606 - Moral Problems**Course Description**

A discussion of specific moral problems such as the justification of abortion and euthanasia. Moral theories such as utilitarianism will be discussed, but the emphasis will be on their relevance to the solution of moral problems. Repeat credit for students who have completed 3606W. Prerequisite: 1005. [3] (P)

PHIL3606W - Moral Problems**Course Description**

A discussion of specific moral problems such as the justification of abortion and euthanasia. Moral theories such as utilitarianism will be discussed, but the emphasis will be on their relevance to the solution of moral problems. Repeat credit for students who have completed 3606. Prerequisite: 1005. [3] (P)

PHIL3607 - Philosophy of Religion**Course Description**

A study of various problems concerning religious experiences; ideas about religion and divinity. [3] (HCA)

PHIL3608 - Ethics and Medicine**Course Description**

Selected ethical issues raised by clinical practice, medical theories, and biomedical research and technology. Not open to students who have earned credit for PHIL 1111-03 without permission. Total credit for this course and PHIL 1111-03 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite: 1005, 1008, or 1008W. [3] (P)

PHIL3609 - Ethics and Business**Course Description**

Moral problems in the business world including irresponsible marketing, conflict between profit and social conscience, resource use, public regulation of business, and the value of competition. Prerequisite: 1005. [3] (P)

PHIL3610 - Ethics and Law**Course Description**

Moral problems in the practice of law including conflicts of interest, confidentiality, limits of advocacy, and the obligations of lawyers to clients, courts, and the public. Repeat credit for students who have completed 3610W. Prerequisite: 1005 or 1005W. [3] (SBS)

PHIL3610W - Ethics and Law**Course Description**

Moral problems in the practice of law including conflicts of interest, confidentiality, limits of advocacy, and the obligations of lawyers to clients, courts, and the public. Repeat credit for students who have completed 3610. Prerequisite: 1005. [3] (SBS)

PHIL3611 - Environmental Philosophy**Course Description**

Environmental ethics (animal rights, respect for nature, the land ethic), science and the natural world, the aesthetics of nature, global justice, and sustainability. [3] (P)

PHIL3612 - Ethics and Animals**Course Description**

Ethical issues raised by human interactions with animals, including laboratory experiments, factory farming, hunting, zoos, and pet ownership. Challenges to ethical theory provoked by extending rights to animals. [3] (HCA)

PHIL3615 - Philosophy of Film**Course Description**

Challenges posed by film forms to traditional aesthetics and the novel philosophical approaches created to deal with them. Topics include the nature of the film image, film and experiential time, cinematic genres, the problem of mass art, and feminist critiques of spectatorship. Weekly screenings. [3] (HCA)

PHIL3616 - Philosophy and the Natural Sciences**Course Description**

Philosophical issues in the methodology, conceptual structure, patterns of explanation, historical development, and cultural impact of the natural sciences. Metaphysical and ethical implications. [3] (P)

PHIL3617 - Philosophy of Language**Course Description**

Philosophical problems in the methodology of linguistics, relations between thought and language, theories of meaning and symbolism, the nature of metaphor, the philosophical implications of theories of language acquisition. [3] (SBS)

PHIL3618 - Philosophy and Literature**Course Description**

Philosophical topics in novels or poetry. Examples include: meaning of life, linguistic meaning, good and evil, aesthetic value, and human freedom. Repeat credit for students who have completed 3618W. [3] (HCA)

PHIL3618W - Philosophy and Literature**Course Description**

Philosophical topics in novels or poetry. Examples include: meaning of life, linguistic meaning, good and evil, aesthetic value, and human freedom. Repeat credit for students who have completed 3618. [3] (HCA)

PHIL3620 - Political and Social Philosophy**Course Description**

Central issues and arguments concerning individual liberty, political authority, democracy, and justice. Key texts and arguments. Contemporary debates. [3] (P)

PHIL3621 - Early Modern Political Philosophy**Course Description**

A study of competing accounts of the best form of political association, which differ from Locke, through the works of Machiavelli, Hobbes, Spinoza, and Rousseau. [3] (INT)

PHIL3622 - Contemporary Political Philosophy**Course Description**

A focused and extended examination of selected topics in contemporary political theory, such as justice, liberty, rights, tolerance, and autonomy. Content varies depending on instructor. [3] (P)

PHIL3623 - Modern Philosophies of Law**Course Description**

Contemporary theories of legal validity, legal liability (criminal and civil), and contractual obligation with special attention to the controversy between legal positivism and "natural law" theories and the assessment of contemporary economic analyses of legal rights. [3] (SBS)

PHIL3630 - Philosophy of Mind**Course Description**

Selected problems in the philosophy of mind. Relation between mind and body, the nature of consciousness, the problem of other minds, the status of self-knowledge, and the possibility of machine and other intelligence. Connections with empirical investigations in related cognitive disciplines. [3] (SBS)

PHIL3632 - Ethics & the Beginnings of Life**Course Description**

Philosophical examination of procreative and reproductive ethics, including: whether and when existence is a harm, arguments for and against procreating rather than adopting, the use of reproductive technologies for genetic "enhancement," the moral status of fetuses, the moral and legal permissibility of abortion, and the social costs of abortion bans. Offered on a graded basis only. Prerequisite: PHIL 1005/1005W or 1008/1008W. [3] (P)

PHIL3635 - Ethics and Mental Health**Course Description**

Understandings of mental health. Impact on categorization and treatment of mental disorder. Ethical issues in mental health care contexts. Wider social contexts. [3] (P)

PHIL3657 - Humanity, Evolution, and God**Course Description**

The impact of the idea of evolution on our conception of personhood. Theistic and non-theistic approaches to philosophical anthropology, ethics and society, the theory of knowledge, the mind-body problem, and relations with the environment and other species. [3] (P)

PHIL3661 - Topics in Aesthetics**Course Description**

Philosophy of art and aesthetic theory. [3] (HCA)

PHIL3665 - Racial Justice Lab**Course Description**

Application of philosophical race theory to concrete problems of racial justice. Collaborative, problem-centered exercise culminating in student-designed projects. Themes vary by semester. Offered on a graded basis only. [3] (P)

PHIL3851 - Independent Readings**Course Description**

Designed for majors not in the departmental honors program. Consists of a project to be carried out under the supervision of a member of the department. All projects must be approved by the department. May be repeated for a total of 12 credits in 3851 and 3852 combined over a four semester period if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [1-6; maximum of 12 credits total for four semesters of PHIL 3851 and 3852] (No AXLE credit)

PHIL3852 - Independent Readings**Course Description**

Designed for majors not in the departmental honors program. Consists of a project to be carried out under the supervision of a member of the department. All projects must be approved by the department. May be repeated for a total of 12 credits in 3851 and 3852 combined over a four semester period if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [1-6; maximum of 12 credits total for four semesters of PHIL 3851 and 3852] (No AXLE credit)

PHIL3891 - Selected Topics**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

PHIL3892 - Selected Topics**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit) (No AXLE credit)

PHIL3900 - Figures in Philosophy**Course Description**

[3] (HCA)

PHIL3903 - Kant's Theoretical Philosophy**Course Description**

Immanuel Kant's 1781/1787 Critique of Pure Reason in context of his earlier philosophy and broader system of philosophy. [3] (HCA)

PHIL3905 - History of Normative Ethics**Course Description**

Normative ethics in Western philosophy, including eudaimonism, virtue ethics, deontology, utilitarianism, and care ethics. Historical texts and contemporary applications. [3] (HCA)

PHIL3910 - History of Philosophy**Course Description**

[3] (HCA)

PHIL3920 - Topics in Philosophy**Course Description**

[3] (HCA)

PHIL3922 - Democracy**Course Description**

Democratic government: duty to vote, alternatives to full suffrage, the epistemic dimension of democratic authority, and various cognitive dysfunctions that democracy encourages. Readings from contemporary journal literature. [3] (HCA)

PHIL4999 - Honors Independent Study**Course Description**

Designed for students in the Honors Program in philosophy. Consists of guided reading, periodic reports, and work on honors thesis. May be repeated for credit once, but students may earn only up to 6 credits per semester of enrollment. [3-6; maximum of 12 credits total for all semesters of PHIL 4999] (No AXLE credit)

Physics

PHYS1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

PHYS1010 - Introductory Physics**Course Description**

Normally accompanied by 1010L; may be accompanied by 1020L. Motion, forces, conservation laws, light, heat, and electricity. Quantum theory, the atomic nucleus, elementary particles, and properties of materials. Special relativity, Big Bang, and cosmology. Primarily intended for those who do not expect to major in science. [3] (MNS) (LE MNS)

PHYS1010L - Introductory Physics Laboratory**Course Description**

Laboratory to accompany 1010 or 1020. Corequisite: 1010 or 1020. One three-hour laboratory per week. Satisfies the AXLE lab course requirement when completed with 1010 or 1020. Satisfies CORE Inquiry Lab when completed with 1010. [1] (No AXLE credit) (CORE: LB)

PHYS1020 - Physics for Future Leaders**Course Description**

General physics relevant to public policy. Energy and its generation; the greenhouse effect; light and radiation; nuclear fission and nuclear weapons; quantum mechanics and semiconductors; science on the internet; government funding of science. [3] (MNS) (CORE D) (LE MNS)

PHYS1020L - Introductory Physics Laboratory**Course Description**

Laboratory to accompany 1020; may accompany 1010. Pre- or Corequisite: 1010 or 1020. One three-hour laboratory per week. Satisfies the AXLE lab course requirement when completed with 1010 or 1020. Offered on a graded basis only. [1] (No AXLE credit) (CORE LB)

PHYS1030 - The Edge of Knowledge: Black Holes, Quantum Gravity and the Fundamental Laws of Nature**Course Description**

A general introduction to theoretical physics for non-physics majors. The "deep" questions in theoretical physics: quantum mechanics, black holes, the big bang, the ultimate nature of reality. Present state of knowledge about the fundamental laws of nature; efforts to deepen our understanding of these laws. [3]

PHYS1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

PHYS1501 - Introductory Physics for the Life Sciences I**Course Description**

Normally accompanied by 1601L. Calculus-based introduction to physics taught within the context of life science applications. Mechanics, fluids, sound, thermal, and statistical physics. Prospective majors are strongly advised to take Math 1300 or a higher level calculus course. Prior study of calculus or concurrent enrollment in Math 1100, 1200, or 1300 is expected. Serves as repeat credit for PHYS 1601. Not open to students who have earned credit for 1901 without permission. Credit for this course and 1901 will not exceed 5 credit hours. [3] (MNS) (LE MNS)

PHYS1501L - Laboratory for Introductory Physics for the Life Sciences I**Course Description**

Laboratory to accompany Physics 1501. Normally accompanied by 1501. Satisfies the AXLE lab course requirement when completed with 1501 (strongly preferred) or 1601. Serves as repeat credit for PHYS 1601L. Not open to students who have earned credit for 1901 without permission. Credit for this course and 1901 will not exceed 5 credit hours. Credit reduced from second course taken (or test or transfer credit) as appropriate. [1] (No AXLE credit)

PHYS1502 - Introductory Physics for the Life Sciences II

Course Description

Normally accompanied by 1502L. Calculus-based introduction to physics taught within the context of life science applications. Electricity and magnetism; geometric and physical optics; atomic, nuclear, and quantum physics. Prospective majors are strongly advised to take Math 1301 or a higher level calculus course. Prior study of calculus or concurrent enrollment in Math 1100, 1201, or 1301 is expected. Serves as repeat credit for PHYS 1602. Not open to students who have earned credit for 1902 without permission. Credit for this course and 1902 will not exceed 5 credit hours. Prerequisite: PHYS 1501 or 1601. [3] (MNS)

PHYS1502L - Laboratory for Introductory Physics for the Life Sciences II

Course Description

Laboratory to accompany Physics 1502. Normally accompanied by 1502. Satisfies the AXLE lab course requirement when completed with 1502 (strongly preferred) or 1602. Serves as repeat credit for PHYS 1602L. Not open to students who have earned credit for 1902 without permission. Credit for this course and 1902 will not exceed 5 credit hours. Credit reduced from second course taken (or test or transfer credit) as appropriate. [1] (No AXLE credit)

PHYS1601 - General Physics I

Course Description

Normally accompanied by 1601L. Calculus-based introduction to general physics and its applications. Mechanics, heat, and sound. Potential majors are strongly advised to take MATH 1300 or a higher level calculus course. Prior study of calculus or concurrent enrollment in MATH 1200 or 1300 is expected. Serves as repeat credit for PHYS 1501. Not open to students who have earned credit for 1901 without permission. Credit for this course and 1901 will not exceed 5 hours. Credit reduced from second course taken (or test or transfer credit) as appropriate. [3] (MNS) (CORE B) (LE MNS)

PHYS1601L - General Physics Laboratory I

Course Description

Laboratory to accompany Physics 1501 and Physics 1601. Satisfies the AXLE lab course requirement when completed with 1501 or 1601. Serves as repeat credit for PHYS 1501L. Not open to students who have earned credit for 1901 without permission. Credit for this course and 1901 will not exceed 5 credit hours. Credit reduced from second course taken (or test or transfer credit) as appropriate. Pre- or co-requisite 1501 or 1601. [1] (No AXLE credit) (CORE: LB)

PHYS1602 - General Physics II

Course Description

Normally accompanied by 1602L. Calculus-based introduction to general physics and its applications. Electricity and magnetism, optics, modern physics. Potential majors are strongly advised to take MATH 1301 or a higher level calculus course. Prior study of calculus or concurrent enrollment in MATH 1201 or 1301 is expected. Serves as repeat credit for PHYS 1502. Not open to students who have earned credit for 1902 without permission. Credit for this course and 1902 will not exceed 5 hours. Credit reduced from second course taken (or test or transfer credit) as appropriate. [3] (MNS) (CORE B) (LE MNS)

PHYS1602L - General Physics Laboratory II

Course Description

Laboratory to accompany Physics 1602. Satisfies the AXLE lab course requirement when completed with 1602 (strongly preferred) or 1502. Serves as repeat credit for PHYS 1502L. Not open to students who have earned credit for 1902 without permission. Credit for this course and 1902 will not exceed 5 credit hours. Credit reduced from second course taken (or test or transfer credit) as appropriate. Pre- or co-requisite: 1502 or 1602. [1] (No AXLE credit) (CORE: LB)

PHYS1911 - Principles of Physics I

Course Description

Classical dynamics, conservation laws, gravitation, wave motion, and thermodynamics. Designed for first-year students who plan to major in physics or in related disciplines. Three lectures and a weekly discussion on modern topics of interest. Not open to students who have earned credit in PHYS 1501, 1601, 1901, or 2051 without permission. Total credit for this course and PHYS 1501, 1601, or 2051 will not exceed 4 credit hours. Total credit for this course and PHYS 1901 will not exceed 5 credit hours. Credit reduced from second course taken (or test or transfer credit) as appropriate. Corequisite: MATH 1301. [4] (MNS) (CORE B) (LE MNS)

PHYS1912 - Principles of Physics II

Course Description

Continuation of 1911. Electromagnetism, optics, relativity, quantum mechanics, and atomic and nuclear physics. Designed for first-year students who plan to major in physics or in related disciplines. Three lectures and a weekly discussion on modern topics of interest. Not open to students who have earned credit in PHYS 1502, 1602, 1902, or 2053 without permission. Total credit for this course and PHYS 1502, 1602, or 2053 will not exceed 4 credit hours. Total credit for this course and PHYS 1902 will not exceed 5 credit hours. Credit reduced from second course taken (or test or transfer credit) as appropriate. Corequisite: MATH 2300 or 2500. [4] (MNS) (LE MNS)

PHYS1912L - Laboratory Skills for Physicists I

Course Description

Fundamental laboratory skills and techniques. Experimental design, instrumentation, data handling and analysis, documentation, presentation of results. Prerequisite: 1501, 1601, 1911, or 2051. Corequisite: 1502, 1602, 1912, or 2053. [1] (No AXLE credit) (CORE LB)

PHYS2100 - Math Applications for Physics

Course Description

Analytical methods for physical models and theory. Derivatives and partial derivatives, infinite series (including Fourier series and Taylor series), vector calculus, complex numbers, linear algebra, and tensors, differential equations with application in physics. [3] (MNS)

PHYS2210 - Classical and Quantum Optics

Course Description

Geometrical optics, including reflection, refraction, ray tracing, and aberrations. Physical optics, including wave theory, absorption, dispersion, diffraction, and polarization. Quantum optics, including photon theory, lasers, entanglement, teleportation, and the statistics of quantum noise in optical signaling. No credit for students who have earned credit for 5210. Prerequisite: either 1502 or 1602 or 1912; and either MATH 1201 or 1301. [3] (MNS)

PHYS2255 - Modern Physics and the Quantum World

Course Description

Relativity. Experimental basis of quantum physics. Structure of the atom. Wave properties of matter. The hydrogen atom. Atomic and statistical physics. Prerequisite: either 1502, 1602, 1902 (or 1912), or 2053. Corequisite: MATH 2300 or 2500. [3] (MNS)

PHYS2255L - Laboratory Skills for Physicists II

Course Description

Fundamental laboratory skills and techniques. Experimental design, instrumentation, data handling and analysis, documentation, presentation of results. Prerequisite: 1502, 1602, 1912, or 2053; and 1912L or one of 1501L or 1601L and one of 1502L or 1602L. Corequisite: 2255 or 3651. [1] (No AXLE credit)

PHYS2275 - Classical Mechanics

Course Description

Calculus of variations. Lagrangian and Hamiltonian dynamics. Conservation laws. Vector algebra and coordinate transformations. Gravity and potential energy. Free, forced, damped, and nonlinear harmonic oscillations. The anharmonic oscillator and chaos. Orbital and rotational angular momentum. Gravitational and Coulomb central-force problems. Motion in non-inertial reference frames. Coupled oscillators and normal modes. Rigid-body motion. Continuous systems and the wave equation. Serves as repeat credit for PHYS 2270 and 2271.

Prerequisite: 2255 or 3651. [3] (MNS)

PHYS2290 - Electricity, Magnetism, and Electrodynamics I

Course Description

Electrostatic fields and potentials. Gauss's law. Electrical properties of insulators, semiconductors, and metals. The Lorentz force. Magnetic fields and forces. Electromagnetic induction, Maxwell's equations, and electromagnetic waves. Prerequisite: 2255 or 3651; and either MATH 2400, 2420, or 2610. [3] (MNS)

PHYS2291 - Electricity, Magnetism, and Electrodynamics II

Course Description

Electromagnetic waves in dielectrics and conductors. Electromagnetic radiation in waveguide structures. Relativistic electrodynamics. Magnetism as a relativistic phenomenon. Prerequisite: 2290. [3] (MNS)

PHYS2300 - Quantum Computation

Course Description

Algorithms, error correction, and cryptography. Physics of information processing, quantum logic. Shor's factoring algorithm and Grover's search algorithm. Quantum circuits, measurements, entanglement, and teleportation. No-cloning and no-deleting theorems. Prerequisite: Math 1300. (MNS) [3]

PHYS2660 - Experimental Nanoscale Fabrication and Characterization

Course Description

Laboratory course introduction to nanofabrication and characterization. Independent and original research in nanotechnology and nanoscience. Nanomaterials, nanoelectronics, and photonics. [3] (MNS)

PHYS2953L - Advanced Physics Laboratory: Introduction to Experimental Research

Course Description

Fundamental physics experiments and measurements. Statistical analysis of measured data. One laboratory per week. Prerequisite: 2255L, and either 2255 or 3651; or 1912 and either 2255 or 3651; or either 2250W or 2260W. [1] (No AXLE credit)

PHYS3122 - Physics of Living Systems

Course Description

Physical principles applied to biological phenomena. Development of physical models of biological systems on scales ranging from molecules to organisms. Biological applications of mechanics, thermodynamics, and dynamical systems. Prerequisite: 1502, 1602, 1912, or 2053; and MATH 2400, 2420, or 2610. [3] (MNS)

PHYS3125 - Health Physics**Course Description**

Theory and instrumentation in health physics and radiological physics. Radiation shielding design, methods of external and internal dosimetry, and radiation regulatory issues. Prerequisite: 2255 and either Math 1201 or 1301. [3] (MNS)

PHYS3200 - Statistical Physics**Course Description**

Temperature, work, heat, and the first law of thermodynamics. Entropy and the second law of thermodynamics. Kinetic theory of gases with applications to ideal gases and electromagnetic radiation. Serves as repeat credit for students who have completed 3207. Prerequisite or corequisite: 2270 or 2275. [3] (MNS)

PHYS3600 - Seminar in Presenting Physics Research**Course Description**

Introduction, instruction, and practice in skills for presenting scientific research results. May be repeated for credit once, but students may earn only 1 credit per semester of enrollment and may count only 1 credit toward the major or minor in physics. Prerequisite: major or minor in Physics; and 2255 or 3651. [1] (No AXLE credit)

PHYS3640 - Physics of Condensed Matter**Course Description**

Crystal structure and diffraction. Phonons and lattice vibrations. Free-electron theory of metals. Elementary band theory of solids. Semiconductors. Optical properties of insulators. Applications to solid-state devices, magnetism, and superconductivity. Prerequisite: 2275 and 3200. Corequisite: 2255. [3] (MNS)

PHYS3645 - Radiation Detectors and Measurement**Course Description**

Basic physics principles and applications of radiation detecting instruments, with laboratory exercises. Techniques and instrumentation for nuclear radiation detection and measurements as they relate to health physics (radiation safety) and nuclear physics. Prerequisite: 2255 or 3125. [4] (MNS)

PHYS3651 - Quantum Mechanics I**Course Description**

Wave-particle duality, indeterminacy, superposition, the Schrödinger equation, angular momentum, the hydrogen atom, and spin and indistinguishability. Prerequisite: 2255; and Mathematics: MATH 2400; or one of (MATH 2410, 2600, 2501) and one of (MATH 2420, 2610). [3] (MNS)

PHYS3652 - Quantum Mechanics II**Course Description**

Time-independent and time-dependent perturbation theory, matrix theory, scattering, applications to atomic physics, condensed matter physics, and astrophysics. Prerequisite: 2290 and 3651. [3] (MNS)

PHYS3660 - Introduction to Particle Physics**Course Description**

Weak, strong, and electromagnetic forces as evidenced by the interactions of elementary particles. Classification of particles and experimental techniques. Corequisite: 2255 or 3651. [3] (MNS)

PHYS3790 - Computational Physics**Course Description**

Topics in modern physics analyzed exclusively with computer programs. Finite difference approaches to the Schrödinger and Maxwell equations. Solutions of nonlinear equations. Molecular dynamics. Monte Carlo simulations. Growth models and random walks. Serves as repeat credit for PHYS 2237. Prerequisite: Any three of 2255, 2275, 2290, 3200, 3651. [3] (MNS)

PHYS3820 - Methods in Physics Laboratory Teaching**Course Description**

Developing and running physics labs and classroom lecture demonstrations. Understanding safety protocols. Enrollment open only to students who are Secondary Education, Elementary Education, or Education Studies majors, are also either Physics majors or minors, and who have completed any 12 credit hours in satisfaction of requirements for major or minor in Physics. [3] (MNS)

PHYS3850 - Undergraduate Research**Course Description**

Research and scholarly investigation or directed readings in physics under close supervision of sponsoring faculty member. Enrollment by arrangement with sponsoring faculty member and approval of director of undergraduate studies. May be repeated for credit, for a total of no more than 10 total credit hours and for no more than 5 credit hours per semester. [1-5] (No AXLE credit)

PHYS3890 - Selected Topics**Course Description**

[1-3] (No AXLE credit)

PHYS4005 - Mathematical Methods for Physicists**Course Description**

Linear spaces and operators; matrix algebra; differential equations; Green's function; and complex analysis. Variational calculus; perturbation methods; group theory. Prerequisite: 2275, 2290; and one of MATH 2400, 2420, or 2610. [3] (MNS)

PHYS4020 - Advanced Electrodynamics**Course Description**

Electrostatics, potentials, boundary value problems, multipole moments, polarization, magnetostatics, Maxwell's equations, electromagnetic wave propagation, dissipative and conductive media. Prerequisite or corequisite: 4005. [3] (MNS)

PHYS4111 - Professional Scientific Writing**Course Description**

Preparing abstracts, journal articles, grant proposals, and fellowship applications. Communicating effectively by writing from the readers' perspective. Designing clear and information-rich figures. No credit for students who have earned credit for 8111. [3]

PHYS4998 - Honors Research and Senior Thesis

Course Description

Independent experimental or theoretical investigations of basic problems in physics under faculty supervision, culminating in a written thesis submitted and an oral defense presented to a departmental faculty examination committee. Required for departmental honors in Physics. Enrollment by arrangement with sponsoring faculty member and approval of director of undergraduate studies. May be repeated for a total of 10 credits, but students may earn only up to 6 credits per semester of enrollment. Prerequisite: major in Physics, junior or senior standing. [1-6] (No AXLE credit)

Political Science

PSCI1001 - Commons iSeminar

Course Description

Topics vary. General Elective credit only. [1] (No AXLE credit)

PSCI1100 - Introduction to American Government and Politics

Course Description

A descriptive survey of the constitutional and structural principles, processes, and functions of the American governmental system. [3] (US) (Core B) (LE SBS)

PSCI1101 - Introduction to Comparative Politics

Course Description

Democracy, communism, and authoritarian rule in developed and developing countries; political institutions and public policy in diverse national settings; principles of comparative analysis. [3] (SBS) (CORE B) (LE: SBS)

PSCI1102 - Introduction to International Politics

Course Description

Significant patterns and trends in twentieth-and twenty-first-century world politics: modes of conducting relations among nations, instruments for promoting national and supranational interests, and controls over international disputes. Emphasis upon episodes throwing light on the causes of war and the conditions of peace. [3] (SBS) (CORE B) (LE SBS)

PSCI1103 - Justice

Course Description

Different understandings of and debates concerning justice. Equality and freedom, individualism and community, diversity, patriotism, and representation. [3] (HCA) (CORE C, E) (LE HFA)

PSCI1104 - Introduction to Quantitative Political Science

Course Description

Application of tools of scientific inquiry to the study of politics. Research design, hypothesis testing, and measurement. Methodological approaches for answering political questions including experiments, descriptive and inferential statistics, and qualitative analysis. No credit for students who earned credit for PSCI 3893 section 03 offered Fall 2023. [3] (SBS) (CORE B) (LE SBS)

PSCI1111 - First-Year Writing Seminar

Course Description

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

PSCI1150 - U.S. Elections

Course Description

Examination of the presidential and congressional elections. The recruitment of candidates, nomination processes, financing campaigns, media coverage, polling, predictive models, and implications of results. (during presidential election years). [3] (US)

PSCI2105 - Game Theory for National Security

Course Description

Introduction to Game Theory with applications to National Security. Applications of complete and incomplete information games to contemporary topics in national security. Deterrence, signaling, alliance formation, cyber defense, and crisis bargaining. [3]

PSCI2170 - ROCCA Lab I: Collaborative Research Skills

Course Description

Basics of research design and social science communication. Participate in collaborative research projects under faculty supervision in the ROCCA Lab. Not open to students who have earned credit for 3895 section 01 offered spring 2020. Requires application to instructor. [3] (SBS)

PSCI2171 - ROCCA Lab II: Quantitative Reasoning

Course Description

The intuition of quantitative reasoning. Collaborative research under faculty supervision in the ROCCA Lab. Not open to students who have completed 3895 section 01 offered spring 2020. Requires application to instructor. [3] (SBS)

PSCI2201 - Power and Resistance

Course Description

Modern and contemporary political theories of power and resistance. Disciplinary power, biopower, sovereign power, and economic power. Law, violence, and revolution. [3] (HCA)

PSCI2202 - Ancient Political Thought

Course Description

Greek and Roman political traditions. Plato, Aristotle, Cicero, and early Christian thinkers. Questions of justice, equality, democracy, and political knowledge. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (HCA)

PSCI2203 - History of Modern Political Philosophy

Course Description

Intensive analysis of the principal political philosophers in the modern tradition. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (HCA)

PSCI2204 - American Political Thought**Course Description**

An analytical study of American political theories and their impact upon our political institutions. Serves as repeat credit for students who completed 2204W or PSCI 3896 offered Spring 2024. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (US) (CORE A, C) (LE SBS)

PSCI2204W - American Political Thought**Course Description**

An analytical study of American political theories and their impact upon our political institutions. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (US) (CORE A, C) (LE SBS)

PSCI2205 - Contemporary Political Theory**Course Description**

Debates in contemporary political thought. Justice, democracy, freedom, identity, and individualism. Includes emerging contemporary theories. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (HCA)

PSCI2207 - Liberalism and Its Critics**Course Description**

The liberal tradition in political theory and its major challengers. Critical debates surrounding the relationship between individuals and political community, rights, freedom and equality. Repeat credit for students who have completed 2207W. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (HCA)

PSCI2207W - Liberalism and Its Critics**Course Description**

The liberal tradition in political theory and its major challengers. Critical debates surrounding the relationship between individuals and political community, rights, freedom and equality. Repeat credit for students who have completed 2207. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (HCA)

PSCI2208 - Law, Politics, and Justice**Course Description**

Contemporary and classical theories of law and society: rights theories, gender and the law; law and transitions to democracy; law between nations. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (HCA)

PSCI2209 - Issues in Political Theory**Course Description**

Topics vary from semester to semester. May be repeated once if there is no overlap with previous offerings. Prerequisite: 2202, 2203, or 2205. [3] (No AXLE credit)

PSCI2210 - West European Politics**Course Description**

Analysis of political development, social forces, institutions, and public policy in Great Britain, France, Germany, Italy, and Sweden. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (INT)

PSCI2211 - Terrorism and Intrastate Conflict**Course Description**

Intrastate conflict and terrorism. Political violence. Organizational economics of militant groups; strategies for counterinsurgency. Data explorations and quantitative analyses. Offered on a graded basis only. No credit for students who have earned credit for 3895 section 02 offered fall 2018 or 3895 section 01 offered fall 2017. Prerequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2212W - Populism in Europe and Beyond**Course Description**

Rise of populist parties in advanced democracies. Theoretical and conceptual questions underlying the nature of populism. Right-wing populist parties from programs and voter base to organization and party leadership. Not open to students who have earned credit for 3894 section 01 offered fall 2019, or for EUS 2240 section 02 offered fall 2018, or for EUS 2240 section 01 offered spring 2018, or for 3895 section 01 offered spring 2017. [3] (SBS)

PSCI2213 - Democratization and Political Development**Course Description**

Comparative study of political development, with a focus on institutions. The effect of political choices about voting systems, executive and legislative powers, cabinet formation, and other institutions on political competition, parties and government stability. Cases from established democracies and countries undergoing democratization. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2214 - Democratic Erosion in Comparative Perspective**Course Description**

Comparative study of democratic erosion with a focus on democratic decline in the twenty-first century. Characteristics of modern democratic regimes. Causes and consequences of democratic erosion. Corruption, disinformation ("fake news"), inequality, polarization, and populism. Prerequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2215 - Change in Developing Countries**Course Description**

Comparative study of political and economic change in developing countries. Political implications of ethnicity, economic dependency, and environmental degradation. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2216 - The Chinese Political System**Course Description**

Governmental institutions and political processes in the People's Republic of China with emphasis upon the interaction of traditional and revolutionary elements. Some attention to Taiwan since 1950 and to the overseas Chinese as parts of the Chinese political universe. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (INT)

PSCI2217 - Development in South Asia**Course Description**

Political economy of development in South Asian countries, with a focus on India, Pakistan, and Bangladesh. Democracy, growth, poverty, inequality, education, health, and gender equity. Offered on a graded basis only. No credit for students who have earned credit for 3894-01 offered fall 2016, fall 2017, or fall 2018. [3] (SBS)

PSCI2218 - Politics of Post-Soviet Russia and Ukraine**Course Description**

Russia and Ukraine's economic, social, and political transition after collapse of the Soviet Union. Road to the War in Ukraine. Formation of national identities. Success and failure of economic and political reforms. Rise of nondemocratic regimes. Not open to students who earned credit for PSCI 3894 section 02 offered spring 2024. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2219 - Politics of Mexico**Course Description**

A survey of contemporary Mexican politics from a comparative perspective. Interaction of economic, social, and political forces that led to the demise of one of the world's most durable one-party political regimes and the prolonged transition to democracy. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2220 - Crisis Diplomacy**Course Description**

Foreign policy decision making and strategy. Emphasis on differences between crises that lead to war and those that do not. Foreign relations of Britain, France, Germany, Russia, and Japan. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2221 - Causes of War**Course Description**

Scientific study of the onset of expansion and consequences of war; conditions of peace, emphasizing alliances, arms races, and crisis escalation. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2222 - American Foreign Policy**Course Description**

Critical analysis of major international and domestic factors shaping U.S. foreign relations as reflected in selected twentieth- and twenty-first-century experiences. Not open to students who have earned credit for PSCI 1111-01 without permission. Total credit for this course and PSCI 1111-01 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2223 - European Political Economy and Economic Institutions**Course Description**

Policy-making processes of key economic institutions that influence the global political economy. International and financial regulatory reforms. World Trade Organization negotiations and current European economic issues. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2224W - Gender and Politics**Course Description**

Gender inequality; political representation; women and politics. Not open to students who have earned credit for 3894 section 02 offered spring 2020, 3894 section 02 offered spring 2018. [3] (SBS)

PSCI2225 - International Political Economy**Course Description**

Survey of major issues involving the interaction of political and economic forces at the global level. Particular attention to theories of interdependence and imperialism, the position of developing countries in the international system, multinational corporations, and the economic origins of war. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2226 - International Law and Organization**Course Description**

The role of international law and international organizations in the contemporary global political system. Focus on the evolution and impact of international law, the United Nations, the International Monetary Fund (IMF), and selected regional organizations. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2227 - War and State Development**Course Description**

Effects of war on development of political and economic institutions. Tax collection, political representation, nationalism, bureaucracy, and markets. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2228W - The Political Economy of Gender**Course Description**

Female labor force participation; women's political representation; gender equality. Not open to students who have earned credit for PSCI 3894 section 01 offered spring 2020. [3] (SBS)

PSCI2230 - Middle East Politics**Course Description**

Cross-national analysis of political institutions, political economies, and processes of change in the Middle East. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2231 - The Politics of Autocracy**Course Description**

Contemporary autocracy, broadly construed. How regimes come to power; institutional choices leaders make and their implications for other outcomes such as citizen welfare and prospects for democratization. Serves as repeat credit for PSCI 3894, section 02 in Fall 2021. [3] (SBS)

PSCI2232 - Contentious Politics in the Americas**Course Description**

Causes and consequences of political protest. Social movements in the United States and Latin America. Grievances, material and symbolic resources, political opportunities, cultural frames, repertoires of mobilization, and emotions. Offered on a graded basis only. Prerequisite: PSCI 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2234 - Introduction to US National Security**Course Description**

Definitions of national security with focus on US institutions and the policy process. Major philosophical traditions including realism, neo-realism, liberalism, etc. Current challenges to securing territory, allies, trade, infrastructure, etc. Prerequisite: 1100 or 1102. [3]

PSCI2235 - The United States Military**Course Description**

Structure and culture of the U.S. military across all branches. Policy issues related to the armed forces. The soldier and military in art and popular culture. [3] (US)

PSCI2236 - The Politics of Global Inequality**Course Description**

Causes of international inequality in the distribution of wealth. The emergence of rich and poor nations, and rich and poor people. Factors related to economic development, and their impact on income distribution. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2237 - African Politics**Course Description**

Pre-colonial to the present. State-building, socioeconomic development, public service provision, and foreign interventions. Conflict including: separatism, insurgency, slavery, genocide, and gender-based violence. Rise of democracy including party systems, voting behavior, electoral competition, fraud. Identity politics of ethnicity, gender, class, and clash of Western and local norms. Offered on a graded basis only. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2238 - Identity Politics in Comparative Perspective**Course Description**

Causes and consequences of the politics of racial and ethnic identities across the developing world. Ethnic politics, affirmative action, immigration, urbanization, and violent conflict. Prerequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS) (CORE C) (LE SBS)

PSCI2239 - Ethnic Politics**Course Description**

Effect of ethnic identity and ethnic heterogeneity on political phenomena such as elections, violence, party formation, democracy, development. Effect of political phenomenon on ethnic identity activation and change in ethnic categories and heterogeneity. [3] (SBS)

PSCI2240 - Political Parties**Course Description**

Theories of party formation, organization, and behavior. Historical development of party systems. Criteria for the comparative evaluation of party systems. Parties as instruments of citizen control. Implications for electoral outcomes, coalition formation, legislative decision making, and public policy. Prerequisite or co-requisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2240W - Political Parties**Course Description**

Theories of party formation, organization, and behavior. Historical development of party systems. Criteria for the comparative evaluation of party systems. Parties as instruments of citizen control. Implications for electoral outcomes, coalition formation, legislative decision making, and public policy. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. Serves as repeat credit for students who have completed 2240. [3] (SBS)

PSCI2241 - U.S. State Governments**Course Description**

Description Influence of U.S. state governments in daily life. Constitutional framework surrounding federalism vis-a-vis structures of state governing bodies. Electoral systems. Representation by the three branches of government. Public policymaking on the state level. [3] (SBS)

PSCI2242W - Inter-branch Policy-making in the United States**Course Description**

Policy-making in the United States by all three branches of government. Political conflict between Congress, the president, executive branch agencies, and the courts. Inter-branch bargaining over public policy. [3] (SBS)

PSCI2243 - Political Campaigns and the Electoral Process**Course Description**

Theories of representation and democratic accountability; electoral strategies and tactics, including political polling and analysis. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2244W - Congress, the President, and Public Schools**Course Description**

Political mechanisms driving education policy. Federalism, separation of church and state, organized interests, teachers, testing and accountability, school choice, grants-in-aid, school lunches, desegregation, and education of children with disabilities. Serves as repeat credit for students who completed 3893-04 in spring 2022. Prerequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2245 - The American Presidency**Course Description**

Constitutional, historical, and political aspects. Attention to electing and nominating president, presidential leadership and personality, governing, and relations with Congress and the public. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (US)

PSCI2246W - Civil Conflict and Civilians**Course Description**

Regional case studies of territorial jurisdiction, succession, natural resources, colonial legacies, and socio-political identities. Criminal conflict in Mexico; intervention in El Salvador and Guatemala; African civil wars; and failed uprisings in the Middle East. Social movements and out-migration. Causes, duration, and consequences of civil conflicts. [3] (SBS)

PSCI2249 - Elections and Voting Around the World**Course Description**

Comparative analysis of elections. Theories of representation, voter turnout, voter choice, and campaign dynamics. [3] (SBS)

PSCI2251 - The Politics of U.S. and Global Immigration**Course Description**

Political, philosophical, and moral issues. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (INT)

PSCI2252 - The Politics of Migration Across the Americas

Course Description

Cross-national analysis of migration trends. Political causes and consequences of migration. Immigration and asylum policies across Americas; focus on U.S., Mexico, Central America, Venezuela. Prerequisite or co-requisite: PSCI 1100, 1101, 1102, or 1103 [3] (SBS)

PSCI2253 - Public Administration

Course Description

What administrative agencies do and why. Effective management in the public sector, including public budgeting, implementation, personnel management, and communication with the public and the press. Serves as repeat credit for PSCI 3893-03 in Spring 2017 and PSCI 3893-01 in Fall 2015. [3] (SBS)

PSCI2254W - Research on Immigrant Nashville

Course Description

Immigration and refugee policy. Political, legal, and social aspects of refugee/immigrant communities in Nashville. Prerequisite: PSCI 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2255 - Public Policy Problems

Course Description

Specific problems of public policies and their relations to political and institutional structures. Particular policy problems vary from semester to semester. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (No AXLE credit)

PSCI2256 - Politics of Public Policy

Course Description

Understanding and navigating the policy process. Public opinion, media, elections, interest groups, and agenda settings. Legislatures, executives, decision making, implementation, and policy feedback. Current policy issues. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2257 - Presidential Transitions

Course Description

What it means to become president and how to plan for an effective transition. Constitutional, legal, and political requirements. Prior coursework in American politics is expected. Serves as repeat credit for 3893 section 02 offered Spring 2024. [3] (SBS)

PSCI2259 - Political Strategy and Game Theory

Course Description

Campaigns and elections, legislative politics, political bargaining, and political organization. Applications of decision and game theory. Models of complete and perfect information, and games of incomplete information. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2260 - Politics of Government Assistance

Course Description

Political mechanisms driving public policy in the United States. Attention to how federalism, Congress, the president, and public opinion shape social welfare programs. Prerequisite: PSCI 1100. [3] (US)

PSCI2262 - The Judicial Process**Course Description**

Functioning of the judiciary in the American political process; operation and powers of the courts; non-legal aspects of the judicial process; political role and effects of judicial decisions. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2263 - Religion and Politics**Course Description**

Religion in modern societies. Faith and civic culture, religion's presence in the public square, religion and colonialism, abortion, gay marriage, faith-based initiatives. Historical works and contemporary contributions to debates. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (HCA)

PSCI2264W - Ideas and Presidential Power: From the Founding to the Present**Course Description**

How ideas have served as claims to presidential power and transformed the presidency as an institution. Separation of powers, executive power, Commander in Chief, mandates, national representation, responsible party government, unitary executive theory, Deep State, descriptive representation, social movements, and American exceptionalism. [3] (SBS)

PSCI2265 - Constitutional Law: Powers and Structures of Government**Course Description**

U.S. constitutional system and fundamental principles of constitutional interpretation. Judicial development of principles of distribution and scope of governmental powers. Case method. No credit for students who have earned credit for 261. Repeat credit for students who completed 261a prior to fall 2009. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (US)

PSCI2266 - Constitutional Law: Civil Liberties and Rights**Course Description**

Supreme Court's interpretation of the Bill of Rights and the Fourteenth Amendment. Case method. No credit for students who have earned credit for 261. Repeat credit for students who earned credit for 261b prior to fall 2009. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (US)

PSCI2267 - Participation and Political Representation in America**Course Description**

History of voting rights and the efficacy of representation in the American political system. Felony disenfranchisement, race and politics, and redistricting. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (US)

PSCI2268 - Courts and Social Policy**Course Description**

Court boundaries vis-a-vis role in public policy formation and institutional management. Intrusion into, or proper functioning of, other government institutions such as Congress, the Presidency, or state governments. Basis of law versus political preferences of the judges. Court's role in supporting or undermining democratic government. [3-4] (US)

PSCI2269 - U.S. Law and Representation**Course Description**

Election law and democratic institutions of governance. Voting systems. Race and representation. Case method. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (US)

PSCI2273 - Conflict Management**Course Description**

Conflict management in international and domestic disputes. Negotiation, mediation, adjudication, intervention, and peacekeeping. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2274 - Nature of War**Course Description**

Warfare from ancient to contemporary times. Western and non-Western perspectives. Views from political science, philosophy, history, and official U.S. military doctrine. Interplay among international politics, military strategy, technology, and psychology. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2275 - Politics and Strategy of Weapons of Mass Destruction**Course Description**

Causes and effects of the spread of nuclear, biological and chemical weapons, and the history of their use. Responses to the proliferation of WMD, including deterrence, preventive war, and non-proliferation agreements. Nuclear strategy from the Cold War to the present; WMD terrorism. Prerequisite: 1102. [3] (SBS)

PSCI2278 - Music, Politics, & Power in Comparative Perspective**Course Description**

Popular music and politics in comparative context. Music as reflection and catalyst of political change. War and violent conflict, dictatorship, elections, identity, protests, and economic development. Musical composition and lyricism. Impact of music on political events and phenomena, particularly outside the context of the United States. [3] (P)

PSCI2279 - Logic of Politics**Course Description**

Rational choice analysis of politics. Individual and collective choice. Collective action, public goods, and externalities. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3] (SBS) (CORE B) (LE SBS)

PSCI2300 - Quantitative Political Science I: Computing**Course Description**

Techniques and tools to understand political phenomena using data. Programming and basic data analysis in R. Data cleaning, visualization, regression, text analysis, machine learning. Serves as repeat credit for students who have earned credit for DS 1000. [3] (SBS)

PSCI2301 - Quantitative Political Science II: Statistics**Course Description**

Methodology for quantitative empirical political science; research design and interpretation, statistical inference, R programming; locating, accessing, and wrangling data. Not open to students who earned credit for any of PSCI 2270, PSCI 2310, or PSCI 2321. Prerequisite or Corequisite: PSCI 2300 or DSCI 1000. [3] (SBS)

PSCI2310 - Understanding Policy Data: Analysis and Interpretation

Course Description

Methodology of empirical social science research; design and interpretation; inferences and applicability. Identifying a research question to collecting data to establishing and implementing a suitable model for analysis. Not open to students who completed 3894-01 offered spring 2022. [3] (SBS)

PSCI2321 - Solving Political Problems with Data

Course Description

Data science and research methods applied to real-world problems. Quantitative analysis in a small-group setting. Data wrangling, data visualization, statistical analysis, R programming, writing and interpretation of analytic reports. Prerequisite: 2300 or DS 1000. [3] (No Axle Credit)

PSCI2400W - Political Economy of Corruption

Course Description

Concepts and measures of corruption; corruption in different arenas of the public sector; anti-corruption strategies. Case studies from political science, economics, and anthropology. Offered on a graded basis only. Serves as repeat credit for students who have completed 3894 section 02 offered Fall 2020. Prerequisite or corequisite: PSCI 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI2405W - Political Economy of International Development

Course Description

Links between politics, economics, and public policy in international development, through both theoretical and applied perspectives. State building, democracy, rule of law, endowments, colonialism, education, healthcare, social assistance, and gender. Case studies from around the world. Not open to students who have completed 3894 section 02 offered spring 2021. [3] (SBS)

PSCI3150 - Board Games and American Politics

Course Description

Understanding American politics through board games and other simulations. Examines important themes of American politics, including the Constitution, elections, partisanship, bureaucracy, conflict, and diplomacy. [3] (SBS)

PSCI3156 - Quantitative Political Science: Conducting Research

Course Description

[Formerly offered as 2270] Research designs and methods used by social scientists; data sources, location and access; the logic of causal inference; emphasis on practice of designing a research project. Prerequisite: any one of PSCI 1100, 1101, 1102, 1103, 1104; OR DS 1000; OR PSCI 2300. [3] (SBS)

PSCI3205 - Public Opinion Data Analysis

Course Description

The process of measuring public opinion. Design of questions and hypotheses in scientific research. Use of statistical software to analyze surveys. Prerequisite or corequisite: PSCI 1100 or PSCI 2300. [3] (SBS)

PSCI3206 - Radical Political Theory

Course Description

Major frameworks of modern and contemporary political theory. Subjection and domination, communism and capitalism, feminism and politics of work, neoliberalism and biopower, and colonialism and politics of race. [3] (HCA)

PSCI3211 - The European Union**Course Description**

Political and economic integration. Origins, institutions, decision processes, policies, achievements, and prospects of the European integration movement. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (INT)

PSCI3217 - Latin American Politics**Course Description**

Cross-national analysis of political institutions, cultures, and processes of change in Latin America. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (INT)

PSCI3218 - Public Opinion and Democracy in Latin America**Course Description**

Practicum on survey research methods with applications in Latin America. Questionnaire design, analyzing survey data, and interpreting results. Serves as repeat credit for PSCI 3894-05 in Spring 2017. [3] (SBS)

PSCI3219 - La política de América Latina**Course Description**

Optional discussion taught in Spanish. Open to students concurrently enrolled in PSCI 3217, and who have proficiency in Spanish at or above intermediate-level. Corequisite: 3217. [1] (No AXLE credit)

PSCI3220 - Business and Politics in Developing Countries**Course Description**

Intersection of politics and economics in the Global South. Core theories connecting states, markets, and international development. Application of these theories to topics in the political economy of development. Serves as repeat credit for PSCI 3894 section 03 in Spring 2024. [3] (SBS)

PSCI3227 - International Politics of East Asia**Course Description**

Political relations between governments in East Asia; role of East Asia in the world. Theories applied to contemporary issues. Economic interdependence, security challenges, and China as a global power. Military alliances, nuclear weapons, territorial disputes, and prospects for armed conflict. Prerequisite or corequisite: 1100, 1101, or 1102. [3] (SBS)

PSCI3228 - International Politics of Latin America**Course Description**

Examination of Latin America's role in the international and inter-American system. Special attention to the international response to revolutionary change in the area, and to the region's major actors and their changing relationship with the United States, with other major powers, and with other actors such as multinational corporations and international financial institutions. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (INT)

PSCI3229 - Strategy and International Politics**Course Description**

Strategic behavior and strategic choices arising from interactive decision making within the context of international politics. General principles of strategy. In-class experiments and game playing. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI3235 - Political Islam**Course Description**

Rise of political Islam. Origins, goals, and practices of specific Islamic groups throughout the Middle East. Global and local causes of Islamic political mobilization, and the American response to that mobilization. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (INT)

PSCI3241 - American Public Opinion and Voting Behavior**Course Description**

The development and dynamics of political opinion and its effects on voting and public policy. Models of political behavior. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI3242 - Police and Prisons**Course Description**

Political mechanisms driving crime policy, policing outcomes, and modern mass incarceration. Theories of punishment, racial disparities, public opinion, and reform. Serves as repeat credit for PSCI 3891-01 section 01 in Spring 2017. [3] (SBS)

PSCI3243 - Urban Politics**Course Description**

Issues and challenges confronting American cities and metropolitan areas. Policy remedies and options available to government and the private sector. Prerequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI3244 - The Legislative Process**Course Description**

Legislative organization and processes in the U.S. Congress. Attention to parties, elections, institutional structure, interest groups, and other branches of government as they relate to the legislative process. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI3246 - American Political Development**Course Description**

Political change in the United States. State formation and evolving structure and capacities of American national government. Construction of the political community. How governing institutions have adapted to change. Roots of present-day events and issues in American politics. [3] (SBS)

PSCI3247 - American Political Culture**Course Description**

Content, historical development, and political consequences of the American public's deeply rooted values concerning how the political system ought to work and the ends it ought to serve. Attention to regional variation. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (US)

PSCI3249 - American Public Opinion and American Politics**Course Description**

Origins and effects of public opinion on politics in the United States. Influence of values, emotion, prejudice, and news information on individual political views. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI3250 - Group Conflict and Cooperation in U.S. Politics**Course Description**

Psychological and institutional sources of division and unity in American politics. Identity formation and change, explicit and implicit racial attitudes, and political tolerance. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI3252 - Business and Public Policy**Course Description**

Relationships among business, public policy, and political strategy in the United States and other political systems. Lobbying and legislative politics, antitrust and regulation, intellectual property, international trade, and ethics and corporate social responsibility. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI3253 - Ethics and Public Policy**Course Description**

Political and moral values in assessing policy-making, public policies and processes, and policy impacts. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (HCA)

PSCI3254 - Political Psychology**Course Description**

Interface between politics and the psychological processes of individuals and groups. Cognition, emotion, identity and intergroup relations, leadership, and extremism. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. Serves as repeat credit for PSY 3540. [3] (SBS)

PSCI3258 - Democratic Theory and Practice**Course Description**

Theories of democratic institutions, practices, and values in historical and contemporary political thought. Impact of popular participation on issues of justice, equality, individual freedom, and political power. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (HCA)

PSCI3260 - Introduction to American Law**Course Description**

Law as a component of public policy and the political system; the elements and rationale of private law. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI3262 - Election Law**Course Description**

Exploration of legal issues related to political representation, the foundations of democracy, voting systems, and the role of political institutions. Prerequisite: PSCI 1100. [3] (SBS)

PSCI3264W - Global Feminisms**Course Description**

Global politics through feminist perspectives. Interrelated systems of power. Race, gender, sexuality, colonialism, and imperialism. Health, genocide, and slavery. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (INT)

PSCI3265 - Human Rights in Activism**Course Description**

Role of human rights in struggles against injustice. Identification of key problems of injustice addressed by a human rights framework. Problems with human rights as a tool for activism. Discussion in contemporary politics. Intellectual and legal traditions that have developed around human rights. No credit for students who have earned credit for PSCI 3896 section 01 offered fall 2016. Offered on a graded basis only. [3] (P)

PSCI3266 - Climate Change Justice**Course Description**

The challenge of addressing catastrophic climate change. Rationales for integrating or separating global climate and justice goals. Relationship between greenhouse gas emissions and poverty. Global and local public and private policy for climate change and justice. Offered on a graded basis only. [3] (INT)

PSCI3268 - American Health Policy**Course Description**

Structure of the American health care system. Challenges to providing care and improving health. Private and public insurance, inequality, cost growth, quality of care, and reform. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI3270 - Human Rights**Course Description**

Factors affecting government violation of human rights. Patterns of violations and their explanations. Domestic and international solutions to protect human rights. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI3271 - Feminist Theory and Research**Course Description**

Introduction to feminist works in the social sciences. Development of feminist analysis. Important issues, feminist theories, and approaches to social criticism. Methodological challenges to feminist research. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (P)

PSCI3272 - The War in Iraq (2003-2011)**Course Description**

The structure of and changes in the U.S. military during the war. Strategic and tactical dilemmas. Development of Iraqi political institutions. American foreign policy making. Serves as repeat credit for PSCI 3272W. Serves as repeat credit for PSCI 3894, section 01, in Spring 2023. [3] (US)

PSCI3272W - The War in Iraq, 2003-2011**Course Description**

The structure of and changes in the U.S. military. Development of Iraqi political institutions. American foreign policy making. Serves as repeat credit for PSCI 3272. Prerequisite or corequisite: 1100, 1101 1102, 1103, or 1150. [3] (US)

PSCI3273 - Networks and Politics**Course Description**

How webs of social relationships affect political behavior; applications to American politics, Comparative politics and international relations. Both online and offline social networks. Concepts, theory, and empirics. Prerequisite: 1101 or 1102. [3] (SBS)

PSCI3273W - Networks and Politics**Course Description**

How webs of social relationships affect political behavior; applications to American politics, comparative politics and international relations. Both online and offline social networks. Concepts, theory, and empirics. Serves as repeat credit for 3273. Prerequisite: 1101 or 1102. [3] (SBS)

PSCI3274 - Advanced Readings in Middle East Politics**Course Description**

Recent books on Middle East. Relevance of works to regional political, social, and economic problems. Prerequisite: 2230. [3] (P)

PSCI3275 - National Security**Course Description**

How states ensure their national security. Origins of the security dilemma; the use of power, deterrence, coercion, engagement, and interstate cooperation in settling disputes. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI3333 - Law, Politics, and Justice in Times of Crisis**Course Description**

Contemporary and classical theories of law, politics and justice: rights theories, gender, race and the law; law and democratic politics; political institutions. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (HCA)

PSCI3400 - Political Economy of Elections**Course Description**

Microeconomic and game-theory analysis of political institutions and elections. Study of party and candidate positioning; efficiency of political competition; polarization; and information provision and processing. Prerequisite: ECON 3012 or PSCI 2259. [3] (SBS)

PSCI3401 - Political Economy of Institutions and Development**Course Description**

Theoretical mathematical and empirical models; nations' prosperity or poverty. Institutions as factors for disparity in economic development. Familiarity with basic methods of regression analysis is expected. Serves as repeat credit for ECON 3893, section 01 offered Fall 2022. Prerequisite or corequisite: ECON 3012 or PSCI 2259. [3] (SBS)

PSCI3700W - Mass Media and American Politics**Course Description**

Impact of evolving media environment on U.S. politics. Changes in media; influence on public opinion, elected officials, and policymaking. Not open to students who have completed 3893 section 01 offered fall 2019. [3] (SBS)

PSCI3701 - Political Biography and Political Leadership**Course Description**

The profession of politics through the lens of political biographies. American and European political leaders, including civil rights and legislative leaders, mayors, and presidents. American political development. Offered on a graded basis only. Instructor approval required to enroll. [3] (SBS)

PSCI3841 - Directed Study
Course Description

Participation in research projects under the direction of a faculty supervisor. Consent of both the faculty supervisor and the director of undergraduate studies is required. Open only to junior and senior majors. May be repeated for a total of 6 credits in 3841, 3842, 3851, and 3852 combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [1-3] (No AXLE credit)

PSCI3842 - Directed Study
Course Description

Participation in research projects under the direction of a faculty supervisor. Consent of both the faculty supervisor and the director of undergraduate studies is required. Open only to junior and senior majors. May be repeated for a total of 6 credits in 3841, 3842, 3851, and 3852 combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [1-3; maximum of 6 credits total for all semesters of PSCI 3841, 3842, 3851, and 3852] (No AXLE credit)

PSCI3851 - Independent Research
Course Description

Development of a research project by the individual student under direction of a faculty sponsor. Consent of both the faculty sponsor and the director of undergraduate studies is required. Normally open only to majors in political science. May be repeated for a total of 6 credits in 3841, 3842, 3851, and 3852 combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [1-3; maximum of 6 credits total for all semesters of PSCI 3841, 3842, 3851, and 3852] (No AXLE credit)

PSCI3852 - Independent Research
Course Description

Development of a research project by the individual student under direction of a faculty sponsor. Consent of both the faculty sponsor and the director of undergraduate studies is required. Normally open only to majors in political science. May be repeated for a total of 6 credits in 3841, 3842, 3851, and 3852 combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [1-3; maximum of 6 credits total for all semesters of PSCI 3841, 3842, 3851, and 3852] (No AXLE credit)

PSCI3880 - Internship Training
Course Description

Under faculty supervision, students from any discipline gain experience with local, state, national, and international government offices or other politically related organizations. A thorough report and research paper are submitted at the end of the semester. Completion of 6 hours of political science, normally a 2.90 grade point average, and prior department approval of the student's plan are required. May be taken on a Pass/Fail basis only and must be taken concurrently with 3882 and/or 3883. These hours may not be included in the minimum hours required in the political science major. Corequisite: 3882 and/or 3883. [1-9] (No AXLE credit)

PSCI3881 - Internship Readings and Research**Course Description**

Under faculty supervision, students from any discipline can gain experience in a variety of settings relevant to Political Science. Hours earned are based upon readings and/or research supervised by a faculty member. A minimum of 1 hour in background readings and research must be completed in PSCI 3881 concurrently with and regardless of the number of hours earned in PSCI 3880. A substantial research paper must be submitted at the end of the semester during which the internship training is completed. These hours may count in the minimum required for the major. Normally, a 3.0 grade point average, 6 hours of prior work in Political Science, and prior approval of a specific plan of work by the director of undergraduate studies are required. Offered on a graded basis only and must be taken concurrently with PSCI 3880. Corequisite: PSCI 3880. [1-6] (No AXLE credit)

PSCI3891 - Topics in Contemporary Politics**Course Description**

Political, governmental, and policy issues. May be repeated for credit when topics vary. No more than three hours may be counted toward the major. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [1-3] (No AXLE credit)

PSCI3893 - Selected Topics in American Government**Course Description**

Topics of special interest. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (No AXLE credit)

PSCI3894 - Selected Topics in Comparative Politics**Course Description**

Topics of special interest. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (No AXLE credit)

PSCI3895 - Selected Topics in International Politics**Course Description**

Topics of special interest. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (No AXLE credit)

PSCI3896 - Selected Topics in Political Theory**Course Description**

Topics of special interest. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (No AXLE credit)

PSCI3897 - Selected Topics**Course Description**

Topics of special interest. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. No more than a total of 6 credits may be earned for 3897 and 3898 combined. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (No AXLE credit)

PSCI4000 - Honors Seminar**Course Description**

Preparation and completion of an honors project. Project planning, social science writing, and preparation for thesis defense. [3] (No Axle credit)

PSCI4238 - Comparative Political Parties**Course Description**

Political parties and their role in the democratic process of modern liberal western democracies, focusing on party systems and party organizations. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (SBS)

PSCI4257 - The Politics of Capitalism**Course Description**

Commerce and capitalism in social and political life from the eighteenth century to the present. Questions of justice and equality, freedom, and democratic politics. Prerequisite or corequisite: 1100, 1101 1102, 1103, or 1150. [3] (HCA)

PSCI4277 - Future of Warfare**Course Description**

Political, societal, and technological factors that could affect the future conduct of warfare. Insurgency and counterinsurgency. Military operations other than war. Prerequisite or corequisite: 1100, 1101 1102, 1103, or 1150. [3] (SBS)

PSCI4444 - Unity and American Democracy**Course Description**

Special topics. Axle category may vary by department and topic. [3]

PSCI4998 - Senior Honors Research**Course Description**

Open only to seniors in the departmental honors program. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (No AXLE credit)

PSCI4999 - Senior Honors Research**Course Description**

Open only to seniors in the departmental honors program. Prerequisite or corequisite: 1100, 1101, 1102, 1103, or 1150. [3] (No AXLE credit)

Portuguese

PORT1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

PORT1103 - Intensive Elementary Portuguese**Course Description**

Accelerated introduction to reading, writing, speaking, and listening. Emphasis on practical usage. Intended for students with prior or current study of another Romance language. No credit for students who have earned credit for 1101, 1102, or a higher level Portuguese language course. [3] (INT) (CORE LA)

PORT1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

PORT2203 - Intermediate Portuguese**Course Description**

Review of Portuguese grammar with emphasis on conversation, composition, and reading of modern Portuguese literary texts. No credit for students who have earned credit for a higher level Portuguese language course. Prerequisite: 1103. [3] (INT) (CORE LA)

PORT2205 - Portuguese and Global Health**Course Description**

Speaking, reading, and writing; advanced grammar. Health in Brazil and Lusophone Africa, through literary texts, films, articles, and public health publications. Virtual language-learning partnerships with medical students in Lusophone Africa. Prerequisite: 2203. [3] (INT)

PORT2900 - Brazilian Civilization through English Language Material**Course Description**

The cultural heritage of Brazil from its earliest days to the present. National identity, race relations, and Brazil's emergence as a major force in the Americas and beyond. Taught in English. Not open to students who have earned credit for PORT 1111 Section 01 without permission. Total credit for this course and PORT 1111 Section 01 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (P)

PORT2995 - African Voices in Portuguese**Course Description**

Late-colonial and postcolonial literature, film, and popular culture. Works from Angola, Mozambique, Cabo Verde, Guinea-Bissau, and African migrant communities in Portugal. Imperialism, migration, national identity, and race. Language of instruction will be English and all works assigned will have an English translation. Students in the Portuguese minor or Spanish and Portuguese major should complete written assignments in Portuguese and are encouraged to read works in the original Portuguese. [3] (P)

PORT3301 - Portuguese through the Arts**Course Description**

Writing and presentation skills in Portuguese through encounters with the arts. Visual, performing, and literary arts from Brazil, Portugal, and Lusophone Africa. Prerequisite: 2203. [3] (INT) (CORE LA)

PORT3302 - Brazilian Pop Culture**Course Description**

Development of written and oral communication skills through the study of Brazilian popular culture. Movies, music, television, and magazines. Prerequisite: 2203. [3] (INT) (CORE LA)

PORT3303 - Introduction to Luso-Brazilian Literature**Course Description**

Critical readings and methods of literary analysis. Masterpieces from Portugal and Brazil from all genres in several periods. Conversation and writing. Prerequisite: 3301 or 3302. [3] (HCA) (CORE LA)

PORT3850 - Independent Study**Course Description**

A reading course, the content of which varies according to the needs of the individual student. Primarily designed to cover pertinent material not otherwise available to the student in the regular courses of the curriculum. [Variable credit: 1-3 hours, not to exceed 12 over a four-semester period] (No AXLE credit)

PORT3891 - Special Topics in Portuguese and Brazilian Literature or Civilization in English**Translation****Course Description**

Does not count toward a major or minor in Portuguese. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

PORT3892 - Special Topics in Portuguese Language, Literature, or Civilization**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: 3303. [3] (No AXLE credit)

PORT4350 - Portraits of Brazil: Culture, Society and the Arts**Course Description**

Themes in Brazilian culture and society. Literature, theater, popular music, media, and key essays by Brazilian intellectuals. Taught in Portuguese. Prerequisite: 3301 or 3302. [3] (P)

PORT4420 - Brazilian Literature through the Nineteenth Century**Course Description**

Main literary trends, principal writers and works of Brazilian literature, from colonial beginnings through the nineteenth century. Study of the works of Gregório de Matos, Gonçalves Dias, Alencar, Machado de Assis, and Euclides da Cunha. Prerequisite: 3303. [3] (HCA)

PORT4425 - Modern Brazilian Literature**Course Description**

Brazilian literature from the Semana de Arte Moderna to the present. Modernist and neo-Modernist movements. Prerequisite: 3303. [3] (HCA)

PSY1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

PSY1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

PSY1200 - General Psychology**Course Description**

A survey of modern scientific psychology. Topics include development, perception, motivation, learning, thinking, remembering, emotion, intelligence, special aptitudes, and personality development. General applications to human behavior. The student must either analyze published research or be a subject in current research. Not open to students who have earned credit for 1111, sections 1, 2, or 3. Total credit hours for this course and 1111 (sections 1, 2, or 3) will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (SBS) (CORE B) (LE MNS)

PSY2100 - Quantitative Methods**Course Description**

Principles and methods for the statistical analysis of experiments, with emphasis on applications in psychology. Descriptive and inferential statistics. Prerequisite: 1111 section 1, 2, or 3 or 1200; or a major in Child Development, Child Studies, or Cognitive Studies. [3] (MNS) (CORE D) (LE MNS)

PSY2150 - Principles of Experimental Design**Course Description**

Theory and research methods in psychological science. Philosophy of science, ethical issues, experimental design, and data interpretation. Prerequisite: 2100 or PSY-PC 2110. [3] (SBS) (CORE LB)

PSY2200 - Abnormal Psychology**Course Description**

Mental and emotional disorders. Definitions of adequate human functioning processes that disrupt functioning. Methods of evaluation and treatment. Prerequisite: 1111 section 1, 2, or 3 or 1200; or a major in Child Development, Child Studies, or Cognitive Studies. [3] (SBS) (CORE B) (LE MNS)

PSY2210 - Social Psychology**Course Description**

The influence of social conditions upon behavior in interpersonal and group relations. Perception, judgment, learning, and attitudes. Prerequisite: 1111 section 1, 2, or 3 or 1200; or a major in Child Development, Child Studies, or Cognitive Studies. [3] (SBS) (CORE B) (LE MNS)

PSY2220 - Cognitive Psychology**Course Description**

Attention, pattern recognition, knowledge representation, language, reasoning, and human intelligence. [3] (SBS) (CORE B) (LE MNS)

PSY2230 - Sensation and Perception**Course Description**

Current theory and research in sensation and perception, including an analysis of philosophical and biological issues. Biological organisms' acquisition, processing, and use of information about objects and events in the environment. Vision, audition, taste, smell, and touch. Prerequisite: Either PSY 1111 section 1, 2, or 3 or 1200; or a major in Child Development, Child Studies, or Cognitive Studies. [3] (MNS) (CORE B) (LE MNS)

PSY3200 - The Predictive Brain**Course Description**

Introduction to Predictive Processing theory and its neuroanatomical, neurophysiological, and behavioral evidence. Hands-on experiments conducted in-class to demonstrate predictive processing on perception and action. Readings and presentations of scientific papers on predictive processing. Prior familiarity with data analysis in Python/Matlab or prior computer programming experience is suggested. Offered on a graded basis only. Serves as repeat credit for PSY 3892 section 01 offered Spring 2025. Prerequisite: NSC 1400: Neuroscience (formerly NSC 2201). [3]

PSY3270 - Computational Neuroscience**Course Description**

Theoretical, mathematical, and simulation models of neurons, neural networks, or brain systems. Computational approaches to analyzing and understanding data from behavior, neurophysiology, electrophysiology, or brain imaging. Simulation methods for neural models. Course taught using Python. Recommended: NSC 1400 (formerly 2201). Prerequisite: either DS 1100/CS 1100, 1101, 1103, or 1104 (or a more advanced programming course); and either MATH 1200 or 1300 (or a more advanced calculus course). [3] (MNS)

PSY3540 - Psychology of Politics and Policy**Course Description**

Underpinnings of political ideologies, behavior, identity, and decision-making. How perceptions, attitudes, and actions influence policy and systems. How individuals shape and are shaped by the political environment, applying cognitive, social, clinical, and neuroscience to real-world problems. Serves as repeat credit for PSCI 3254. [3] (SBS)

PSY3560 - Sports Psychology**Course Description**

Current views of performance enhancement and team building. Theories of personality, goal setting, and interpersonal dynamics. Careers in sports psychology. [3] (No AXLE credit)

PSY3600 - Personality**Course Description**

Major theories of personality development, methods of assessment, and results of research, with an emphasis on normal behavior. [3] (SBS)

PSY3605 - Industrial and Organizational Psychology**Course Description**

Scientific theories in cognitive, social, and personality psychology to improve work motivation and performance. Job analysis and assessment methods. Leadership, teamwork, and cross-cultural issues. [3] (SBS)

PSY3610 - Introduction to Clinical Psychology**Course Description**

Historical foundations, professional ethics, principles of clinical assessment and therapy, and areas of specialization such as health psychology. [3] (SBS)

PSY3615 - Emotion**Course Description**

Definitions and functions of emotion. Emotion and health, emotion and psychopathology, individual differences, and emotional development. Prerequisite: 1111 section 1, 2, or 3 or 1200; or a major in Child Development, Child Studies, or Cognitive Studies. [3] (SBS)

PSY3620 - Schizophrenia**Course Description**

Neurological, psychological, cultural, and evolutionary perspectives. Genetics, epidemiology, symptomatology, sex differences, and affect. Prerequisite: PSY 2200 (formerly 3100) or NSC 1400 (formerly 2201). [3] (SBS)

PSY3625 - Depression**Course Description**

Psychological and biological perspectives on unipolar and bipolar affective disorders. Assessment and classification, epidemiology, genetics, family environment, and treatments. [3] (SBS)

PSY3630 - Drugs and Behavior**Course Description**

Drug effects on neural circuits, human physiology, individual psychology, and society. Prior to spring 2023, serves as repeat credit for students who have earned credit for NSC 3260. Serves as repeat credit for NSC 3630. Prerequisite: NSC 2201 (prior to Fall 2025) or NSC 1400 (Fall 2025 onward). [3] (SBS)

PSY3635 - Health Psychology**Course Description**

Neurophysiological, endocrine, and immune systems. Factors underlying health habits and lifestyles. Methods to enhance health behaviors and prevent illness. Stress management. Reciprocal interactions among behavior, thoughts, and physiology with resulting effects on physical and psychological health and illness. [3] (SBS)

PSY3640 - Positive Psychology**Course Description**

Optimal functioning in human psychology. Interdisciplinary approaches to well being, character strengths and virtues, positive emotions, and clinical implications. Not open to students who have earned credit for 1111, section 13. Total credit hours for this course and 1111, section 13, will not exceed 3 hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (SBS)

PSY3645 - Psychiatric Epidemiology**Course Description**

Distribution and determinants of mental disorders across populations; measurement strategies; prevalence and incidence over time; causal inference using observational and quasi-experimental designs (DAGs, natural experiments, sibling/twin comparisons, instrumental variables); environmental exposures and disparities; translation to intervention and policy. Serves as repeat credit for PSY 3893 section 02 offered Spring 2025 or Spring 2024. Prerequisite: PSY 2200. [3]

PSY3650 - Addiction**Course Description**

Historical and contemporary issues in drug addiction. Integration of theoretical and empirical models through analysis of biological, psychological, and societal factors that cause and maintain addiction. Serves as repeat credit for PSY 3893 section 01 offered Fall 2025 or Fall 2024. [3]

PSY3700 - Movement**Course Description**

Psychological, computational, and neural perspectives on the activities of looking, reaching, grasping, speaking, smiling or frowning, walking and running. [3] (MNS)

PSY3705 - Human Sexuality**Course Description**

Dimensions of sexuality, characteristics of healthy sexuality, anatomy and physiology, identity, gender roles, relationships, health, sexualization, and sexuality through the life cycle. [3] (P)

PSY3715 - Evolution of Brains and Behavior**Course Description**

Comparative study of brains, behavior, and how they evolved. Why different animals behave the way they do, how that depends on what brains they have, and how they got to be that way. [3] (SBS)

PSY3730 - Learning and Memory**Course Description**

Principles of learning and memory and their neural bases. Classical and operant conditioning; declarative and procedural memories; working memory and cognitive control. Strategies for optimizing learning in college; emotional and social influences; aging and diseases of the brain. Not open to students who have earned credit for 1111, section 8. Total credit hours for this course and 1111, section 8, will not exceed 3 hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (SBS).

PSY3755 - Behavioral Decision-making**Course Description**

Affective, cognitive, and motivational processes involved in human judgment and decision-making. Accurate and inaccurate judgments. Optimal and suboptimal decisions. Offered on a graded basis only. [3] (MNS)

PSY3760 - Mind and Brain**Course Description**

Concepts of cognitive neuroscience. Relationship between the brain and perception, cognition, attention, memory, language, thought, emotion, social judgments, and consciousness. [3] (MNS)

PSY3765 - Social Cognition and Neuroscience**Course Description**

Neural underpinnings of social perceptions, evaluations, and decisions. Face perception, attraction and reward processing, social co-operation and competition, decision-making, and moral judgments. Offered on a graded basis only. [3] (SBS)

PSY3775 - Human Memory**Course Description**

Single- and dual-process models of recognition memory; context and the role of time in memory search; interference versus decay in theories of forgetting. Theories of association, memory for sequences, and memory disorders. [3] (MNS)

PSY3780 - The Visual System**Course Description**

Interdisciplinary approach to the ways that humans see and interpret their visual environment. Structure of the eye and brain, including optics. Physiology of individual cells and groups of cells. Machine vision and models of visual function, visual attention, and mechanisms of complex visual perception. [3] (MNS)

PSY3785 - Brain Damage and Cognition**Course Description**

Effects of neurological impairment from stroke, injury, or disease on perception, speech, memory, judgment, and behavior. Relationship between brain systems and cognitive systems. [3] (SBS)

PSY3810 - Spatial Cognition**Course Description**

Cognitive and neural processes involved in spatial learning, memory, and navigation. Types and nature of spatial knowledge; path integration and wayfinding; gender and cultural differences in navigational skill; effects of technology (e.g., mapping applications); aging and diseases of the brain; comparative perspectives (humans vs. other mammals & insects). Serves as repeat credit for PSY 3810W or PSY 3891-01 in Fall 2017. [3] (SBS)

PSY3810W - Spatial Cognition**Course Description**

Cognitive and neural processes involved in spatial learning, memory, and navigation. Types and nature of spatial knowledge; path integration and wayfinding; gender and cultural differences in navigational skill; effects of technology (e.g., mapping applications); aging and diseases of the brain; comparative perspectives (humans vs. other mammals & insects). Serves as repeat credit for PSY 3810. [3] (SBS)

PSY3840 - Directed Study**Course Description**

Participation in ongoing research projects under direction of a faculty sponsor. Consent of both the faculty sponsor and the director of undergraduate studies is required. Open only to juniors and seniors. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3] (No AXLE credit)

PSY3850 - Independent Study**Course Description**

Development of a project by the individual student under direction of a faculty sponsor. Consent of both the faculty sponsor and the director of undergraduate studies is required. Open only to juniors and seniors. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3] (No AXLE credit)

PSY3880 - Internship Training
Course Description

Under faculty supervision, students from any discipline can gain experience in a broad range of public and private organizations, institutions and agencies. Work must be related to issues within the spectrum of psychological science, including, but not limited to, neuroscience, clinical psychology, applied psychology, human development, behavior and performance. Credit hours earned are based upon actual work performed at the internship site. A minimum of 3 credit hours in background reading and research must be completed in PSY 3881 concurrently with and regardless of the number of hours earned in PSY 3880. A substantial research paper or report must be submitted at the end of the semester during which the internship is completed. These credit hours may NOT count in the minimum required for the Psychology major or minor. Normally, a 3.0 grade point average, 6 hours of prior course work in Psychology, and prior approval of a specific plan of work by the Director of Undergraduate Studies in Psychology are required. Offered on a Pass/Fail basis only and must be taken concurrently with PSY 3881. Corequisite: PSY 3881 Variable credit. [1-9] No AXLE Credit.

PSY3881 - Internship Readings and Research
Course Description

Under faculty supervision, students from any discipline can gain experience in a broad range of public and private organizations, institutions and agencies. Work must be related to issues within the spectrum of psychological science, including, but not limited to, neuroscience, clinical psychology, applied psychology, human development, behavior and performance. Credit hours earned are based upon readings or research supervised by one or more faculty to lend some intellectual foundation to the internship experience. At least one faculty supervisor must be a member of the Psychology Department in the College of Arts and Science at Vanderbilt. A minimum of 3 credit hours in background readings and research must be completed in PSY 3881 concurrently with and regardless of the number of hours earned in PSY 3880. A substantial research paper or report must be submitted at the end of the semester during which the internship training is completed. These credit hours may not count in the minimum required for the Psychology major or minor. Normally a 3.0 grade point average, 6 hours of prior course work in Psychology and prior approval of a specific plan of work by the Director of Undergraduate Studies in Psychology are required. Offered on a graded basis only and must be taken concurrently with PSY 3880. Corequisite: PSY 3880. [3-6] (No AXLE credit)

PSY3890 - Special Topics in Perception
Course Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: 3750. [3] (No AXLE credit)

PSY3891 - Special Topics in Cognitive Psychology
Course Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: 3120. [3] (No AXLE credit)

PSY3892 - Special Topics in Neuroscience
Course Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: NSC 1400 (formerly 2201). [3] (No AXLE credit)

PSY3893 - Special Topics in Clinical Psychology
Course Description

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: 3100. [3] (No AXLE credit)

PSY3894 - Special Topics in Social Psychology**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: 3110. [3] (No AXLE credit)

PSY3895 - Special Topics in Cognitive Neuroscience**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: PSY 2220 (formerly 3120) or NSC 1400 (formerly 2201). [3]

PSY3980 - Honors Seminar**Course Description**

Individual readings, reports, and seminar discussions of research areas representative of psychological science at Vanderbilt. The ethical conduct of research, advanced research methods and design, and philosophy of science are representative content areas. Open only to departmental honors candidates. [3] (No AXLE credit)

PSY3981 - Honors Seminar**Course Description**

Individual readings, reports, and seminar discussions of the basic areas of psychology. Selection of topics will provide some freedom to pursue individual interests. Open only to departmental honors candidates. [3] (No AXLE credit)

PSY3990 - Teaching Psychological Science**Course Description**

Taken concurrently with an undergraduate course-coordinator or course-assistant appointment. Responsibilities and challenges, teaching techniques, and student engagement. Student-centered learning and teaching. Culminates with each student preparing and delivering one classroom session. Instructor's permission required to register. [3] (SBS)

PSY3995 - Directed Study for Learning Assistants**Course Description**

Participation as a Learning Assistant for a PSY course under direction of a PSY faculty member. Consent of both the course instructor and the director of undergraduate studies is required. Open only to juniors and seniors. May be repeated for credit. Offered on a graded basis only. [1-3] (No AXLE credit)

PSY3996 - Pedagogy Seminar**Course Description**

Theory and application of pedagogical techniques specific to assistant teaching of courses in Psychology. Learning and memory, teaching ethics, culture and equity in learning environments. Offered on a graded basis only. [1] (No AXLE credit)

PSY3998 - Delivery of Psychological Services**Course Description**

Scientific knowledge about human psychopathology and practical applications in a community setting. Community placement and classroom attention to service delivery, skills, ethics, and professional development. Prerequisite: 3100. [3] (SBS)

PSY4218 - Computational Cognitive Modeling**Course Description**

Computational modeling of human perception and cognition. Model implementation, parameter estimation, and statistical model evaluation; developing and testing new models; stochastic processes, simulation, and Monte Carlo methods; high-performance computing. Recommended: prior (or concurrent) completion of PSY 3120, 3760, 3775, 3780, or NSC 3270. Prerequisite: one of DS 1100/CS 1100, CS 1101, 1103, or 1104. [3] (MNS)

PSY4219 - Scientific Computing for Psychological and Brain Science**Course Description**

Computer programming, scientific computing methods, and high performance computing applied to psychological and brain sciences problems, such as experimental control, data analysis and visualization, image and signal processing, optimization, and simulation. Some prior coursework in psychology or neuroscience recommended. Prerequisite: DS 1100/CS 1100 or CS 1101 or 1104. [3] (MNS)

PSY4220 - Bayesian Modeling with Python**Course Description**

Statistical and cognitive modeling. Models of memory, psychophysics, categorization, and decision-making. Probabilistic programming in Python. Bayesian parameter estimation and model comparison. Recommended: prior completion of one or more of 3120, 3755, 3760, 3775, or 3780. Prerequisite: one of 4218, CS 1101, 1103, 1104, or NSC 3270. [3] (MNS)

PSY4352 - Advanced Topics in Clinical Psychology**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: 3100. [3]

PSY4543 - Advanced Topics in Perception**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: PSY 3750. [3]

PSY4551 - Advanced Topics in Cognitive Psychology**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: PSY 3120. [3]

PSY4553 - Advanced Topics in Cognitive Neuroscience**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: PSY 3120 or NSC 2201. [3]

PSY4720 - Experimental Methods in Behavioral Neuroscience**Course Description**

Experimental methods in behavioral neuroscience. Computer-based data acquisition and analysis, statistical reasoning, and manuscript preparation. Prerequisite: 1200 and NSC 2201. [3] (MNS)

PSY4730 - Laboratory in Experimental Psychology**Course Description**

Experimental methods in psychological science. Evaluation of scientific literature, development of testable hypotheses, and computer-based experimentation including programming, data collection, and analysis. Prerequisite: 2150; and 2100 or PSY-PC 2110. [3] (MNS)

PSY4744 - Advanced Topics in Neuroscience**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: NSC 2201. [3]

PSY4750 - Scientific Writing in Psychology and Neuroscience**Course Description**

Journal articles, grants, scientific papers, press releases, and dissertations. Revising and editing. Offered on a graded basis only. Not open to students who earned credit for 8750. [3]

PSY4775 - Models of Human Memory**Course Description**

Mathematical and computational models of the cognitive processes underlying human memory. Attribute-based models, instance theories, neural network models, retrieved-context models, executive function, and working memory models. Methods of fitting models to empirical data. Prerequisite: 3775, and one of CS 1101, 1103, or 1104. [3] (MNS)

PSY4998 - Honors Thesis**Course Description**

Participation with a staff member in work leading toward the senior thesis. This work may consist of readings and reports or active participation in research and will culminate in an independent research report. Open only to departmental honors candidates. Prerequisite: 3980 or 3981. [3] (No AXLE credit)

PSY4999 - Honors Thesis**Course Description**

Participation with a staff member in work leading toward the senior thesis. This work may consist of readings and reports or active participation in research and will culminate in an independent research report. Open only to departmental honors candidates. Prerequisite: 3980 or 3981. [3] (No AXLE credit)

Psychology-PC

PSY-PC1001 - Commons iSeminar**Course Description**

Commons iSeminar, a 1-hour small seminar experience, open to first-year students. Students and faculty will collaboratively explore a specialized topic in depth in this university-wide seminar sponsored by The Ingram Commons. General Elective credit only. [1]

PSY-PC1115 - First-Year Seminar**Course Description**

Topics of interest designed for first year students. Does not count in the writing requirement of the Liberal Education Core. [3]

PSY-PC1117 - First Year Writing Seminar**Course Description**

Topics of interest for first year students. Courses are writing intensive and may be applied to the Peabody Liberal Education Core writing requirement. Repeatable with change of topic. [3]

PSY-PC1205 - Minds, Brains, Contexts, and Cultures**Course Description**

An introduction to the cognitive studies major. Readings, lectures, and discussions are focused on thinking and understanding, especially as related to the brain, immediate context, and culture. These topics are considered from a variety of perspectives, including those taken from philosophy; literature; cognitive, social, and developmental psychology; sociology; psychiatry; and cultural anthropology. [3]

PSY-PC1207 - Minds, Brains, Contexts, and Cultures**Course Description**

An introduction to the cognitive studies major. Readings, lectures, and discussions are focused on thinking and understanding, especially as related to the brain, immediate context, and culture. These topics are considered from a variety of perspectives, including those taken from philosophy; literature; cognitive, social, and developmental psychology; sociology; psychiatry; and cultural anthropology. May be applied toward the Peabody Liberal Education Core writing requirement. [3]

PSY-PC1250 - Developmental Psychology**Course Description**

An overview of human development emphasizing the period from conception through adolescence. Course content includes research methods as well as in-depth coverage of selected topics in cognitive, social, emotional, and physical development. [3]

PSY-PC1257 - Developmental Psychology**Course Description**

This writing-intensive course provides an overview of human development emphasizing the period from conception through adolescence. Course content includes research methods as well as in-depth coverage of selected topics in cognitive, social, emotional, and physical development. May be applied toward the Peabody Liberal Education Core writing requirement. Students will not receive credit for this course if they have completed PSY-PC 1250. [3]

PSY-PC2110 - Introduction to Statistical Analysis**Course Description**

Introductory course emphasizes selection, application, and interpretation of measures of relative frequency, location, dispersion, and association. Approaches to statistical inferences are emphasized. Prerequisite: proficiency in high school algebra. Students with a 5 on AP Statistics or credits from ECON 1500, PSY 2100, or MATH 2810/2820 are strongly discouraged from taking this class. [3]

PSY-PC2115 - Advanced Introduction to Statistics**Course Description**

This calculus-based introductory statistics course emphasizes concepts and techniques in descriptive and inferential statistics. The orientation and data examples are taken from the social/behavioral sciences. Emphasis is placed on statistical theory, analysis, and interpretation of data, from both exploratory and confirmatory perspectives. Prerequisites: Math 1300 and 1301 or equivalent. [3]

PSY-PC2120 - Statistical Analysis**Course Description**

Second course in statistics for undergraduates. Multifactor analysis of variance designs (including repeated measures), and goodness of fit and contingency analyses. Prerequisite: PSY-PC 2110 or PSY 2100 or ECON 1500 or MATH 2810 or a score of 5 on the AP Statistics exam. [3]

PSY-PC2170 - Experimental Research Methods in Child Development**Course Description**

Focuses on how experimental methods are used to understand processes of child development. Through readings, class discussion, writing, and research experiences, the class considers excellent examples of classic and contemporary experimental studies of child development. Prerequisite: PSY-PC 1205/1207 or PSY-PC 1250 or PSY 1200 and PSY 2100 or PSY-PC 2110 or ECON 1500 or MATH 2810 or a score of 5 on the AP Statistics Exam. [3]

PSY-PC2180 - Experimental Research Methods in Cognitive and Language Sciences**Course Description**

Focuses on how experimental methods are used to understand processes of cognitive and language sciences. Through readings, class discussion, writing, and research experiences, the class considers excellent examples of classic and contemporary experimental studies in the fields of cognitive and language sciences. Prerequisite: PSY-PC 1205/1207 or PSY-PC 1250 or PSY 1200 and PSY 2100 or PSY-PC 2110 or ECON 1500 or MATH 2810 or a score of 5 on the AP Statistics Exam. [3]

PSY-PC2200 - Cognition in Context**Course Description**

An in-depth exploration of research and theories explaining how cognitive processes affect human functioning in modern society. We will explore basic processes such as attention, memory, language, problem solving, and action as they occur in a wide range of meaningful contexts including education, society and politics, psychopathology, the arts, and emerging technologies. Prerequisite: PSY-PC 1205/1207, or 2250 or PSY 1200. [3]

PSY-PC2250 - Cognitive Aspects of Human Development**Course Description**

Introduction to research and theory in cognitive development. Emphasis on infancy and on early and middle childhood. Topics may include development of language, memory, sensation and perception, problem solving, concepts and theories, effects of media, sociocultural support for development, developmental disorders, and logical mathematical reasoning. Prerequisite: PSY-PC 1205/1207 or 1250 or PSY 1200. [3]

PSY-PC2257 - Cognitive Aspects of Human Development

Course Description

Introduction to research and theory in cognitive development. Emphasis on infancy and on early and middle childhood. Topics may include development of language, memory, sensation and perception, problem solving, concepts and theories, effects of media, sociocultural support for development, developmental disorders, and logical mathematical reasoning. Prerequisite: PSY-PC 1205/1207 or 1250 or PSY 1200. May be applied toward the Peabody Liberal Education Core writing requirement.[3]

PSY-PC2260 - Seminar on Developmental Disabilities

Course Description

Before delving into the many controversies in the disability field, this course first addresses such fundamentals as different models of intellectual and developmental disabilities (IDD's; e.g., medical and social models, neurodiversity), the history of the field, and the strengths and challenges of people with specific etiologies of IDD (e.g., environmental, autism spectrum disorder, genetic syndromes). The seminar then focuses on a range of pressing concerns for people with IDD (e.g., disparities in healthcare, advances in prenatal genetic testing, needs of families, and inequities in the penal system). In doing so, the seminar intersects with divergent perspectives from medicine, genetics, law, social justice, psychology, education, public opinion and social policies. [3]

PSY-PC2270 - Seminar on Human Diversity

Course Description

The seminar begins with key concepts related to human diversity: cultural and structural competence, cultural humility, stigma, prejudice, implicit bias, microaggressions, colorblindness, privilege, race, ethnicity, the biology of skin color, intersectionality, and co-synthesis. With these concepts as a backdrop, the course then focuses on different "isms" or "phobias," e.g., racism, sexism, ableism, ageism, nationalism, antisemitism, homophobia, transphobia, islamophobia. An emphasis is placed on how these "ism" and "phobias" relate to: (1) health and mental health care disparities; (2) incarceration disparities, and (3) student experiences at Vanderbilt. Students also learn tools that facilitate their self-awareness of, and life-long learning about, human diversity. [3]

PSY-PC2300 - Social and Emotional Context of Cognition

Course Description

An exploration of such social factors as the individual's values, beliefs, and emotions and their contributions to the basic cognitive processes involved in social perception, complex decision making, and problem solving. Topics include the social construction of perceived reality, attitude formation and change, heuristics and biases in social inference, and the role of emotion in coping and problem solving. [3]

PSY-PC2400 - Social and Personality Development

Course Description

An overview of basic concepts and current research in social and personality development. Specific topics include research methods, development of self, social cognition, achievement motivation, prosocial behavior, moral development, aggression, gender role development, family and cultural influences. Prerequisite: PSY-PC 1205/1207 or 1250 or PSY 1200. [3]

PSY-PC2500 - Infancy

Course Description

The behavior and physiological development of infants reflect a complex interaction between evolutionary history and genetics, prenatal environmental influences, and early postnatal experience. An overview of each of these topics is provided through classroom discussions and reading assignments focusing on recent empirical studies and major theoretical issues. Prerequisite: PSY-PC 1250. [3]

PSY-PC2550 - Adolescent Development
Course Description

Examines theory, research, and other literature pertinent to the development and education of adolescents (ages 12-19). Specific topics include: cognitive and social development; issues in identity, intimacy, autonomy, and sexuality; family-adolescent relationships; peer relationships; school achievement and organization; choices and decision making related to work. [3]

PSY-PC2600 - Educational Psychology
Course Description

Examines the applications of psychological theories and research to teaching and learning settings. Focuses on cognitive development, problem solving and critical thinking, learning theories, motivation, social contexts, individual differences, classroom issues, and evaluation issues. Prerequisite: PSY-PC 1205/1207 or 1250 or PSY 1200. [3]

PSY-PC2700 - Abnormal Child Psychology
Course Description

This course will cover etiology, assessment, and treatment of psychological disorders (e.g., depression, anxiety, disruptive behavior disorders, autism spectrum disorders) emerging in childhood and adolescence. We will examine the development and treatment of psychopathology from an integrative perspective, including biological, cognitive, behavioral, cultural and environmental perspectives, and explore current issues and challenges in the field. Prerequisites: One course from PSY-PC 1205, 1207, 1250, or PSY 1200. [3]

PSY-PC3130 - Introduction to Formal Linguistics
Course Description

This course is a general introduction to formal linguistics, the scientific study of human language. We will focus on the major core subfields of linguistics: morphology, phonetics, phonology, syntax, and semantics. This course also touches on questions of sociolinguistics, language variation, and language change. [3]

PSY-PC3140 - Psychology of Language
Course Description

This course covers the basics of the psychology of language, understanding the cognitive processes that underlie language production, language comprehension, and the use of language in society. Through understanding these processes, students will learn ways in which they can improve their own communication skills. [3]

PSY-PC3145 - Natural Language Processing
Course Description

This course will focus on using computers to analyze language data for linguistic elements related to cognitive processing. The goal of the course is to provide students with the background and computing skills necessary to independently analyze and assess language features in naturally occurring text. At the lexical level, this will include assessments of words and morphemes for features related to complexity and sentiment. At the syntactic level, analyses will examine part-of-speech tagging, dependency parsing, and phrasal and clausal complexity. At the semantic level, lexical relationships along with cohesion features will be examined. All analyses will be computational, and students will be introduced to the Python programming language and appropriate Python packages. The course will be practice-based, and the final project will require students to analyze language data of interest to their field of research, discuss the data from an analytical language perspective, and model outcomes. No background knowledge in computer programming is necessary to be successful in this course. [3]

PSY-PC3150 - Language Development
Course Description

An overview of language development with an emphasis on relevant research in linguistics, developmental psychology, and comparative psychology. Specific topics covered include research methods, speech perception, conversational competence, word learning, pragmatic development, and syntactic competence. The course is intended for students beyond the first year. [3]

PSY-PC3160 - Bilingualism and Second Language Learning
Course Description

Learn the psychological and brain processes that underlie bilingualism and second language acquisition. Explore state of the art techniques in psychology such as brain imaging and eye-tracking as applied to multi-lingual speakers. Learn about bilingual language processing and learning. Develop the ability to critically evaluate the literature. [3]

PSY-PC3170 - Cognitive Science of Reading
Course Description

Learn the relation of speech to reading in different writing systems. Understand the nature of visual word recognition. Explore how reading develops and is affected by dyslexia through experiments and formal models. Investigate the neural substrate of reading development and disability. Examine the causes of reading failure and how science can inform practice. Develop the ability to critically evaluate the literature and use it to apply to education. [3]

PSY-PC3180 - How We Talk
Course Description

The course will examine how language is used in conversational settings. The course will focus on empirical studies of the psychology of language and will examine the cognitive, social, and contextual processes that guide every-day language use. Prerequisite: PSY-PC 3130 or 3140. [3]

PSY-PC3190 - Language and the Brain
Course Description

Learn brain anatomy underlying language. Understand nonscientific methods used to study language such as neuroimaging and Lesion approaches. Explore brain basis of the lexical processing of nouns, verbs and morphology, and the comprehension of sentences. Investigate the neural substrate and behavioral manifestation of language disorders such as aphasia. Examine the cortical machinery of reading and writing, and their disorders such as dyslexia and dysgraphia. Develop the ability to critically evaluate the literature. [3]

PSY-PC3200 - Introduction to Clinical Psychology
Course Description

This course provides an overview of the science and practice of clinical psychology, with an emphasis on child and adolescent clinical psychology. Clinical research, psychological assessment, psychotherapy, and related issues will be discussed in class. Students examine the techniques used by clinical psychologists to assess and treat psychopathology, and research investigating the efficacy of these techniques. Students will examine the science of clinical psychology by reviewing research from scientific journals on the effects of a specific type of psychotherapy for a specific psychological disorder. Previous courses in abnormal psychology, abnormal child psychology, and psychological research methods/statistics are highly recommended. [3]

PSY-PC3210 - Hospitalized Child**Course Description**

This course is designed for individuals who want to know more about the psychosocial needs of children, adolescents and families in health care settings and situations. Some of the specific topics covered in this course include: impact of illness and hospitalization on the family; social and developmental issues and how they interface with health care; normative development within the hospital; psychosocial roles of various healthcare team members; preparation of patients and families for health care experiences; utilizing play for therapeutic purposes; spirituality and its impact on the child and family's health care experience; the child who is dying; pediatric palliative and hospice care; an introduction to the field of child life; and an introduction to the field of pediatric / family advanced practice nursing. [3]

PSY-PC3220 - Pediatric Research Design**Course Description**

This course is designed for individuals interested in conducting pediatric healthcare research with children and their families. The class explores current inquiry paradigms, research processes and procedures, methodology and elements of design, and evidence-based techniques for supporting children and families during healthcare research encounters and improving the quality and efficacy of medical and psychosocial care and research with/for children. [3]

PSY-PC3230 - Play-Based Intervention**Course Description**

This course is designed for individuals interested in using play-based techniques to meet the psychosocial needs of children and families experiencing stress. The concept of "play" is explored from a variety of developmental, psychological, professional, and educational standpoints using seminal texts from leading theorists. Applications of play to promote coping and development for children and families experiencing stress, illness, or discord are considered. Some of the specific topics covered in this course include historical and contemporary play theories, evidence-based uses of play for assessment and intervention, and the implications of play for children's rights and welfare. [3]

PSY-PC3650 - Advanced Topical Seminar**Course Description**

An advanced seminar intended for juniors and seniors in which a particular topic within cognitive studies is considered in depth. Topics vary. May be repeated for credit with change of topic. Prerequisite: PSY 1200 or PSY 1250 or PSY-PC 1205 or PSY-PC 1207 or PSY-PC 1250. This course is intended for students beyond the first year unless otherwise specified in the class schedule note. [3]

PSY-PC3722 - Psychometric Methods**Course Description**

Covers the fundamental concepts of psychological measurement and testing, examines a sample of most important psychometric instruments in current use, provides observation of testing, and considers knowledge essential to making wise use of testing information in research and applied child development settings. Prerequisites: PSY-PC 1250 or 1205/1207 or PSY 1200 and PSY-PC 2110 or PSY 2100 or ECON 1500 or MATH 2810 or a 5 on the AP Statistics Exam. [3]

PSY-PC3724 - Psychometrics

Course Description

The basic objectives of this course are for students to learn the fundamental concepts, methods, and principles of educational and psychological measurement. Particular attention will be devoted to reliability and validity issues underlying psychometric theory from original sources, and how psychometric theory relates to the assessment of individual differences or human psychological diversity more generally. Students should choose between PSY-PC 3722 and this course inasmuch as credit for both is not allowed. This course is more demanding in that students will be reading original sources; it is especially relevant to students seeking advanced training in the social sciences or research careers. Prerequisite: PSY-PC 2110 or PSY 2100 and PSY-PC 2120. [3]

PSY-PC3727 - Modern Robust Statistical Methods

Course Description

Covers modern statistical methods designed to handle violations of statistical assumptions that can compromise classic parametric procedures. More specifically, the student will learn about the classic assumptions of independence, normality, and equal variances that underlie many standard procedures, and become familiar with modern methods that perform vastly better than the classic procedures when assumptions are violated, yet offer few performance penalties under many realistic situations where assumptions are violated. Prerequisite: PSY-PC 2110 or PSY 2100 (or equivalent), and PSY-PC 2120. [3]

PSY-PC3735 - Correlation & Regression

Course Description

Covers modern correlation and regression techniques, including linear regression, multiple regression, polynomial regression, interaction effects, univariate and multivariate outlier detection, data transformation algorithms, handling of missing data, nonlinear regression, logistic regression, Poisson regression, variable selection procedures, and regression diagnostics and graphics. Prerequisite: PSY-PC 2110 or PSY 2100 (or equivalent), and PSY-PC 2120. [3]

PSY-PC3737 - Structural Equation Modeling

Course Description

This course introduces the basic principles of path analysis, confirmatory factor analysis, and latent variable structural modeling, which constitutes a powerful set of statistical tools for examining correlational, observational, and even experimental data in the social sciences. Computer techniques for conducting these analyses will also be taught: the LISREL program in particular, but AMOS will also be introduced. [3]

PSY-PC3738 - Introduction to Item Response Theory

Course Description

Students are introduced to the basic concepts of educational and psychological measurement, classical test theory (CTT), and item response theory (IRT). These concepts will be taught with practice by illustrating the construction of tests. Prerequisite: PSY-PC 2110 or PSY 2100 and PSY-PC 3722. [3]

PSY-PC3742 - Death, Grief, and Loss

Course Description

Loss, including but not limited to death, is a universal human event, yet it is a highly contextualized experience. This course is designed for those hoping to work with or study individuals in the throes of loss, whether that loss is of a family member or an aspect of oneself or capabilities. We will use film, literature, and scholarly research to reflect on the developmental, social, psychological, cultural, and spiritual components of death and loss, using seminal and contemporary theories to understand the forms and functions of grief and mourning. We will reflect on our own experiences of loss and grief as we engage with representations from varied perspectives. We will explore the palliative medicine and hospice care movement, the emergence and evolution of death with dignity, and their impact on the loss and grief experiences of dying individuals and their families. Throughout, we will turn our attention to evidence-based practices for supporting children and adults experiencing loss and living with grief in a variety of social and clinical settings [3].

PSY-PC3743 - Factor Analysis

Course Description

This course covers primarily Exploratory Factor Analysis (EFA), which is extensively used in psychology, education, medicine, and management to investigate the underlying dimensionality of unobserved constructs (e.g., intelligence, psychopathology). The theory behind factor analysis is covered alongside hands-on application to data, exposure to uses of factor analysis in the applied literature, and instruction in popular EFA software. Key topics include model specification, fit and evaluation, rotation methods, questionnaire development, sample size and power issues, and extensions to confirmatory factor models. Prerequisite: PSY-PC 2110 or PSY 2100 (or equivalent), and PSY-PC 2120. [3]

PSY-PC3746 - Multivariate Statistics

Course Description

This course covers several classical multivariate statistical topics: principal component analysis, rotation, canonical correlations, multidimensional scaling, correspondence analysis, hierarchical clustering. Matrix algebra and basics about multivariate data will be taught at the beginning. The course has both theoretical and applied components. R will be used as the primary computing tool. Prerequisite: PSY-PC 2110 or PSY 2100 (or equivalent), and PSY-PC 2120. [3]

PSY-PC3749 - Applied Nonparametric Statistics

Course Description

This course covers nonparametric statistical methods useful when the assumptions of ordinary parametric statistics are not met, and for developing custom statistical techniques useful when other methods do not exist. Coverage is given to distribution-free procedures, sign tests, contingency tables, median tests, chi-square and other goodness-of-fit tests, rank correlations, randomness tests, ordinal regression, Monte Carlo methods, resampling methods (bootstrap and jackknife), tests of independence, 1-sample, 2-sample, and k-sample methods, permutation tests, function smoothing, and splines. Emphasis is placed on underlying theory, application to data, and software. Prerequisite: PSY-PC 2110 or PSY 2100 (or equivalent), and PSY-PC 2120. [3]

PSY-PC3850 - Independent Study

Course Description

Development of an independent study project by the individual student under the direction of a faculty sponsor. Intended primarily for juniors and seniors. Consent of both the faculty sponsor and the director of undergraduate studies is required. May be repeated for credit. [1-3]

PSY-PC3860 - Directed Research

Course Description

Participation in an empirical research project under the direction of a faculty sponsor. Consent of both the faculty sponsor and the director of undergraduate studies is required. May be repeated for credit. [1-3]

PSY-PC3870 - Field Work in Psychology for Undergraduates

Course Description

Offered to provide field experience appropriate to the student's interests. Open only to students majoring in child development, child studies, or cognitive studies. May be repeated. Consent of instructor required. [1-3]

PSY-PC3890 - Special Topics in Psychology

Course Description

Advanced exploration of a psychological orientation to current issues. May be repeated with change of topic. [3]

PSY-PC3980 - Honors Seminar
Course Description

Open only to Junior level students in the Psychology and Human Development Department honors program. [3]

PSY-PC3981 - Honors Seminar
Course Description

Open only to junior-level students in the Psychology and Human Development Department honors program. [3]

PSY-PC4998 - Honors Thesis
Course Description

Open only to Senior level students in the Psychology and Human Development Department honors program. [3]

PSY-PC4999 - Honor Thesis
Course Description

Open only to Senior level students in the Psychology and Human Development Department honors program. [3]

Public Policy Studies

PPS1001 - Commons iSeminar
Course Description

Topics vary. General Elective credit only. [1] (No AXLE credit)

PPS2200 - Social Contexts of Public Policy
Course Description

Sociological underpinnings and aims. Theoretical and empirical works in sociology, anthropology, political science, and economics. Public policy outcomes and their relation to broader social structures, goals, and values. [3] (SBS)

PPS2250 - History and Ethics of Public Policy
Course Description

U.S. domestic and international policy-making. Domestic and comparative history; ethics frameworks relevant to public policy. [3] (SBS)

PPS3100 - Cities in the 21st Century
Course Description

Local policy and politics. Education, crime, health, finance, development, and transportation. Urban government and management. No credit for students who have earned credit for 3890-01 offered fall 2015, fall 2016, fall 2017, or fall 2018. [3] (SBS)

PPS3150 - Public Finance
Course Description

State and local government finance. Revenue sources including taxation, debt, and fees. Financing and budgeting tools. The politics of financial decision making for state and local governments. No credit for students who have earned credit for 3890-01 offered spring 2017 or spring 2018. [3] (SBS)

PPS3160 - Public Advocacy**Course Description**

Development of policy research and discourse skills. Framing issues, telling stories, and choosing and presenting facts in support of a policy position. Navigating policy bureaucracy. Serves as repeat credit for PPS 3890, section 02 in Spring 2019. [3] (SBS)

PPS3200 - Research Methods for Public Policy Analysis**Course Description**

Surveys in public policy analysis. Types, design, modes of implementation, sampling strategies, and data collection. Data management, cleaning, and analysis. [3] (SBS)

PPS3250 - Advanced Quantitative Methods for Public Policy**Course Description**

Causal inference, the empirical toolkit for public policy analysis. Potential outcomes framework, multivariate regression, matching estimators, randomized controlled trials, instrumental variables, difference-in-differences, and regression discontinuity. [3] (SBS) (CORE: LB)

PPS3850 - Independent Research in Public Policy**Course Description**

Normally only open to majors in Public Policy Studies. May be repeated for a total of 6 credit hours, but students may only earn up to 3 credits per semester of enrollment. [1-3] (No AXLE credit)

PPS3890 - Special Topics**Course Description**

Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

PPS4960 - Senior Seminar on Research in Public Policy**Course Description**

Supervised research project in policy area incorporating methodologies and analytical insights from more than one discipline. Offered on a graded basis only. [3] (SBS)

PPS4980 - Senior Honors Seminar**Course Description**

Senior honors thesis development. [3] (No AXLE credit)

PPS4981 - Senior Honors Seminar**Course Description**

Senior honors thesis development. [3] (No AXLE credit)

PPS4999 - Senior Honors Thesis**Course Description**

Supervised readings and independent research for honors thesis. Open to seniors in the PPS honors program. [3] (No AXLE credit)

Religious Studies

RLST1001 - Commons iSeminar **Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

RLST1010 - Encountering Religious Diversity **Course Description**

Essential beliefs and practices of the world's major religious traditions. Hinduism, Buddhism, Judaism, Christianity, and Islam. Contemporary scholarship and perspectives on religious encounters from each of these traditions. [3] (HCA) (CORE C, E) (LE HFA)

RLST1100 - Black Religion in America **Course Description**

Colonial period to the present. Historical and thematic survey of the religious innovations and expressions of African-descended people in the United States. Role of religion in Black enslavement, politics, culture, and identity. Institutional and non-institutional religiosity. Christianity, Islam, conjure, music, and pop culture. [3] (US)

RLST1111 - First-Year Writing Seminar **Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

RLST1190W - Introduction to Southern Religion and Culture **Course Description**

An exploration of the histories of evangelical and non-evangelical expressions in Southern religious culture from the colonial period to the present. The evangelical thrust of Southern culture, with some attention to Catholicism, Judaism, and other religious modes considered outside the mainstream of that culture. [3] (SBS)

RLST1200 - Introduction to Judaism **Course Description**

Comprehensive historical overview of Judaism as a religion and a culture. The main ideas and institutions of Judaism, the centrality of the Hebrew Bible and the meaning of interpretation, thinkers, and movements in Jewish civilization, from rabbinic Judaism, medieval philosophy, mysticism, to modern thought, Zionism, and the foundation of the State of Israel. Recent Jewish self-representation in art. [3] (HCA)

RLST1208 - Themes in the Hebrew Bible **Course Description**

A thematic introduction to the Hebrew Scripture/Old Testament. Selected themes-such as creation, revelation, covenant, law, suffering, messianic expectation - are traced through the diverse parts of the Bible (Pentateuch, Prophetic Writings, and Wisdom Literature) as well as in early Jewish texts. The comparison of the various expressions of these themes shows both the distinctiveness of each document and the continuity of the Biblical faith through the centuries. [3] (HCA)

RLST1309 - Themes in the New Testament**Course Description**

A comparative study of New Testament documents following central themes - such as salvation; evil and sin; the roles of Christ, God, and the Spirit; discipleship; the church; sacred history. The distinctive teaching of each New Testament document as related to a concrete historical setting. Comparison with similar themes in Jewish and Hellenistic texts of that period. [3] (HCA) (CORE C, E) (LE HFA)

RLST1330W - The Gnostic Gospels**Course Description**

Gnostic writings of the 2nd-4th centuries; relationship to other early Christian writings; modern views of Gnosticism. [3] (HCA)

RLST1500 - Introduction to Islam**Course Description**

An historical overview of the different religious traditions in Islam, their basis in the Qur'an and life of the Prophet, their proliferation in the medieval period, and their response to the challenge of modernity. Topics include sunni and shi'i Islam, evolution of law and theology, sufism and political philosophy. Islam in Africa, India, Spain, and southeast Asia as well as the Middle East. [3] (HCA) (CORE: C, E)

RLST1637 - Religions of Tibet and the Himalaya**Course Description**

Sixth century CE to the present. Religious ideas and practices. Myth, cosmology, doctrine, pilgrimage, and ritual. Adaptation of religious tradition to changing historical and cultural contexts. Encounters among Tibetan Buddhism, Bv'an, Catholicism, and modernity. [3] (INT)

RLST1700 - Religions in China**Course Description**

Major religious traditions of China. Taoism, Buddhism, Confucianism, state-sponsored religious systems, and popular religion. Thought and practice from ancient times to the present. [3] (INT)

RLST1710 - Religions of Japan**Course Description**

Early myths to present-day practices. Buddhism, Shinto, Shugendo, Christianity, and new religious movements. Cosmology, ritual, death, and modernity. Thematic explorations through film. [3] (INT)

RLST1820 - Religion, Sexuality, Power**Course Description**

Historical, cultural, social scientific, and philosophical theories of how religious and political ideas and institutions are related to and dependent upon assumptions and ideologies of sex, gender, and race. Politics and public discourse on sex and religion. [3] (SBS)

RLST2110 - Mindfulness, Religion, and Healing**Course Description**

Histories of contemporary mindfulness practices; their origins in both Buddhist and U.S liberal religious traditions. Current uses in medicine, religion, and other spheres of society. Secularization, cultural appropriation, and social consciousness/amnesia. Not open to students who completed RLST 3890-03 offered spring 2022. [3] (US) (CORE C, E) (LE HFA)

RLST2112 - Approaches to Religion**Course Description**

Theories and methods for the academic study of religious traditions. Not open to students who earned credit for RLST 4960W. [3] (CORE A, C) (LE HFA)

RLST2134 - Asian and Asian-American Religions in the United States**Course Description**

Practices and transformations of Asian religions in the United States by Asian immigrants and their children. Race, gender, sexuality, politics, nationalism, and media. [3] (HCA) (CORE A, C) (LE HFA)

RLST2210W - Constructions of Jewish Identity in the Modern World**Course Description**

How Jewish thinkers at the end of the nineteenth and early twentieth centuries addressed the question of individual and collective identity. Cultural, political, and religious definitions of modern Jewish identity, the role and the reinvention of national myths; the "Jewry of muscles," the "New Hebrews," the Zionist myth narratives in Zionism. [3] (HCA)

RLST2220 - Jewish Ethics**Course Description**

A study of the logic and basic values that, in the Jewish tradition, guide thinking about moral problems. Examination of family and social ethical issues found in Talmud and other Jewish classical texts. Basic religious views of modern Jewish thinkers and their relation to contemporary Jewish life. Offered alternately with 1200. [3] (HCA)

RLST2229W - Contested Ground: Sacred Sites Across the Ancient World**Course Description**

Sacred places and structures from the Paleolithic to the medieval period. Comparisons of religious sites worldwide. Cultural heritage and the historical and contemporary politics of ancient religious sites. [3] (P)

RLST2234 - Women in Judaism**Course Description**

Judaism and feminism. Women in the Hebrew Bible, Jewish law, natural philosophy, and history. Case studies in Jewish medieval and modern contexts; problems of assimilation and cultural specificity in modern society. [3] (INT)

RLST2250W - History of the Bible**Course Description**

Jewish and Christian Bibles from the formation of earliest bibles to the present. Major forms of the Bible, major interpretive approaches, and impact on politics and culture. [3] (HCA)

RLST2310 - Interpreting the Gospels**Course Description**

The Synoptic Gospels through history and culture. Focus on either Matthew, Mark, or Luke; a survey of the interpretations of the Gospel from its original historical context, through the history of the church, and more recently in Catholic and Protestant churches after the Holocaust, in African American churches, and in feminist circles. [3] (HCA)

RLST2315 - Introduction to Christian Ideas**Course Description**

Ancient, modern and contemporary debates in theology. Ideas of God, Jesus, Spirit, salvation, evil, and liberation. Key questions of science, belief, theism, race, gender, and colonial impact of Christian ideas. St. Paul, Augustine, Calvin, Tillich, Gutierrez, Cone, Daly, and Althaus-Reid. [3] (HCA) (CORE A, E) (LE HFA)

RLST2318 - Intersex in Christian Traditions: Perspectives from Science, Law, Culture, and Theology**Course Description**

Lived experiences of intersex people; issues encountered due to binary understanding of sex/gender in science, law, culture, and Christian theology and liturgy. Sex/gender as a spectrum. Offered on a graded basis only. [3] (HCA)

RLST2461 - Islam in Africa**Course Description**

Social and cultural development of Islam across Africa from the eighth century to the present, as illuminated by historical, ethnographic, and literary sources. Interplay between Muslims and outside religious groups, jihads in pre-colonial Africa, and Islam during European colonization. Attention to Sub-Saharan Africa. [3] (INT)

RLST2471 - Religion in Africa**Course Description**

Indigenous religious forms from pre-colonial Africa to the present. Creation myths, notions about gods and spirits, ritual, magic, witchcraft, art, shamanism, and ancestry. Interplay of indigenous religions with Islam and Christianity. [3] (INT)

RLST2473 - Religion and Climate Change**Course Description**

Role of religion in climate change and as response to planetary catastrophe. Religious and literary texts. Historical, philosophical, and anthropological work. [3] (P)

RLST2552 - Islam in the Modern World**Course Description**

Impact of colonialism on Muslim societies and everyday life in the cities of the Middle East. Analysis through literary, religious, political, and ethnographic texts. Relationship of Sharia to the modern state; impact of modernity on the understanding and practice of religion. [3] (INT)

RLST2644 - Buddhist Traditions**Course Description**

Historical and thematic survey of foundational, Mahayana, and esoteric Buddhist traditions. Mythology, doctrine, meditation, devotional practices, and institutions. Contemporary case studies from Asia and North America. [3] (INT) (CORE C)

RLST2664 - Foundations of Hindu Traditions**Course Description**

Hindu cosmology and the ritual structure of sacrifice. The effect of the law of cause and effect (karma) on the moral order of the universe (dharma). The emergence of bhakti devotion to key gods and goddesses. The escape from the cycle of lives through yoga, introspection, and devotion. Pilgrimage mapping and the sacred geography of ancient and modern India. Classical mythology of the Vedas, Epics, and Puranas. [3] (INT) (CORE C) (LE HFA)

RLST2811 - Natural Science and the Religious Life**Course Description**

How scientific discoveries and religious teachings are related. Descriptions of the physical universe from Aristotle through Albert Einstein are compared to contemporaneous definitions of the moral life by religious thinkers such as Thomas Aquinas, Martin Luther, Immanuel Kant, and Martin Buber. [3] (P)

RLST2881 - Myth and History in Religious Biography**Course Description**

Religious biography and hagiography as distinct literary genres. Hero mythology and narrative patterning. Ways religions construct unique biographical images by combining the historical life with religious belief. Examples from lives of Jesus, Buddha, Muhammad, Luther, Caitanya, Shinran, and Mama Lola. Interpretive strategies include hermeneutic theory, modes of history, structuralism, and feminism; additional theoretical perspectives on translation, orality, and reader response criticism. [3] (HCA)

RLST2921 - Ethics and Ecology**Course Description**

Relationships among humans, nature, and the sacred. The role of religious and spiritual traditions in shaping attitudes and behaviors regarding nonhuman nature. Topics include eco-centered ethics, multi-species justice, climate ethics, and alternative sustainable scenarios. [3] (SBS) CORE (A, E) (LE HFA)

RLST2930 - Women and Religion**Course Description**

Themes and issues in the traditions and texts of selected Western religions from a feminist perspective. Biblical and theological images of women, sources of religious authority, psychological and ethical implications of feminist approaches to religion. [3] (P) (CORE B, C) (LE HFA)

RLST2940 - Great Books of Literature and Religion**Course Description**

"Great Books" of the Western intellectual tradition, tracing Greco-Roman and Judeo-Christian literature and culture from their origins to synthesis in the medieval period. [3] (HCA)

RLST3007 - Religion Culture and Society**Course Description**

Relationships between cultural, political, and social dynamics and religion. How religions and spiritual practices shape cultures and are changed by them. Contexts and issues that arise from the religious and spiritual dimensions of human life. [3] (HCA)

RLST3079 - The Sacred and the Secular**Course Description**

Ethnographies of ritual and religious life. Politics of secularism and religious revival. Issues in anthropology, literature, and philosophy. Christianity, Hinduism, Islam, and Native American Religions. [3] (P)

RLST3119 - Martin Luther King, Jr., and the Social Roles of Religion

Course Description

King as religious leader and agent of social change. His views of the social roles of religion seen against the background of late nineteenth-century dissenting traditions and the early twentieth-century social gospel movement in America. Critical evaluations in terms of classical Christian views (e.g., Aquinas, Luther, Calvin, Wesley). [3] (US)

RLST3129 - Race and Religion in America

Course Description

The religious foundations of racial myths, symbols, images, conflicts, and cultures from the sixteenth century to the present. Gender, violence, sexuality, media, and popular culture. [3]. (US)

RLST3130 - Afro-Asian Religious Encounters

Course Description

Religious innovations and transformations produced by historical, cultural, and political connections and exchanges between African Americans, Asians, and Asian Americans. Race, gender, politics, colonialism, and media. [3] (US)

RLST3142 - Slave Religion and Culture in the American South

Course Description

The cosmologies, theologies, ethics, rituals, and material realities of enslaved Africans and African-Americans beginning in pre-colonial Africa and ending in the Civil War. Music, Movement, Myth, Magic, and Sexuality. [3] (US)

RLST3178 - Native American Religious Traditions

Course Description

Diversity of First Nation religious traditions in North America, especially Eastern Woodlands and Plains. Spiritual and cultural dimensions of diversity, cosmologies, stereotypes, cultural resilience, creativity and storytelling, humor, rituals and practices, healing, and sovereignty. [3] (HCA)

RLST3225 - Sexuality in the Hebrew Bible and the Ancient Near East

Course Description

Issues of sexuality in the Hebrew Bible in the context of the Ancient Near East. Homosexuality, virginity, and incest. [3] (HCA)

RLST3229 - The Holocaust: Its Meanings and Implications

Course Description

Interdisciplinary study of the systematic destruction of European Jewish communities during WWII. Historical, social, political, cultural developments that led to it. Psychological and sociological dimensions of its aftermath. Philosophical and theological problems it raises for both Jews and Christians. [3] (P)

RLST3230 - Images of Mary in Christian Thought and Practice

Course Description

History of Marian theology and devotion from an ecumenical perspective; diverse contemporary perspectives (Feminist, Latinx, Black, Womanist, Asian, Queer, ecumenical, and interreligious) of Mary, and how the arts can reinforce oppressive views of Mary as well as create new and liberating views. [3]

RLST3270 - Jewish Theories of Religion

Course Description

Critical analysis and discussion of modern Jewish constructions of religion: politically, symbolically, ethically, normatively, and aesthetic-mystically. Selected readings from Cohen, Buber, Rosenzweig, Kaplan, and social philosophers such as Simmel and Habermas on the function, nature, and meaning of religion in secular culture. [3] (P)

RLST3304W - Evangelical Protestantism and the Culture Wars

Course Description

Evangelical traditions from the reformation to their present manifestations in twentieth-century America. Debates concerning the authority of the scripture, the person of Jesus Christ, evangelism, and soul-winning mission, revivalism and social reform, church-state relations, the relationship between science and religion, Biblical vs. "New" morality, and other areas of cultural cleavage. [3] (US)

RLST3306 - Global Interpretations of Christian Scriptures

Course Description

Comparative interpretations of Biblical texts by Christians in Africa, Asia, Latin America, and Oceania - with those by Orthodox Christians in Eastern Europe and the Middle East, and by Catholics and Protestants in Western Europe and North America. The role of culture in each type of biblical interpretation. [3] (INT)

RLST3312 - The Pauline Interpretation of Christianity

Course Description

An introduction to Pauline Christianity and its place in the early church, using the letters of Paul, the deuteropauline letters, and the portrait of Paul in Acts. [3] (HCA)

RLST3313 - Ethics of the New Testament

Course Description

Major ethical teachings as presented in New Testament documents, letters, and as interpreted through history and cultures. [3] (HCA)

RLST3316 - Christianity in the Reformation Era

Course Description

The setting of the Reformation (c. 1500-1648) and its developments together with consideration of some of the significant ecclesiastical, theological, and historical issues of the period. Attention to backgrounds and causes and examination of major individuals and ecclesiastical patterns. The aim of the course is to help students understand and interpret the events, become familiar with some of the major theological documents, and reflect upon questions of continuing historical interest that have come out of the Reformation. [3] (HCA)

RLST3350 - Christian-Jewish Relations in Medieval and Early Modern Europe

Course Description

Political and cultural history from the medieval persecutions to the expansion of religious toleration in the Enlightenment. Close consideration of legal toleration, banishments, re-admissions, and the impact of Christian reform movements. [3] (INT)

RLST3380 - History Christian Tradition

Course Description

Christian traditions from the origins to the present. Such themes as Christology, church and state, and the social and cultural contents of changing Christian beliefs, and views of the Church. [3] (HCA)

RLST3561 - Islam in South Asia**Course Description**

History of Islam in South Asia. Cultural memory of conquest. Inter-religious interactions. Sufism and Bhakti. Mughal traditions of cosmopolitanism. Legacy of colonialism. Impact of Partition. Shared popular culture and shared sacred spaces. [3] (INT)

RLST3650 - Classical Philosophies of India**Course Description**

Hindu and Buddhist traditions. The six "mainstream" schools (darsana) of Hindu thought and their interaction with Buddhist philosophy in ancient India. [3] (INT)

RLST3669 - Sacred Space in the Tibetan World**Course Description**

Creation, mediation, and reproduction of sacred space from artifacts to built structures to geographies. Narrative, ritual, and cosmological aspects of Tibetan Buddhist, Bv'an, and local religious traditions. Cases include premodern to modern periods, and local to global contexts. [3] (INT)

RLST3670W - Buddhism and the State**Course Description**

Models relating Buddhism and the state in ancient and modern Asia. Kingship and spiritual leadership; sacred territory and national identity; legitimation theory and its alternatives; and religious responses to the modern state. Case studies from India, Nepal, Thailand, Burma, Tibet, Mongolia, China, and Japan. [3] (INT)

RLST3747 - Daoist Tradition**Course Description**

Historical and thematic survey of the Daoist tradition in China. Philosophical classics and religious scriptures, as well as social history are covered. Daoism today. [3] (HCA)

RLST3749 - Zen Buddhism**Course Description**

A study of the development of Zen Buddhism in China and Japan with special attention to its basic philosophy, its position within Mahayana Buddhism, its meditational techniques, and its contemporary significance. [3] (INT)

RLST3753 - East Asian Buddhism**Course Description**

East Asian Buddhist texts. Key Buddhist ideas, values, practices, and institutions. Chronological surveys of key developments in major historical periods. [3] (INT)

RLST3775 - Chinese Religions through Stories**Course Description**

Analysis of narratives from various religious traditions and genres within early and medieval China. The role of narrative in Chinese religious, cultural, and political life. Primary texts in English translation. Offered on a graded basis only. [3] (INT)

RLST3850 - Independent Study**Course Description**

May be repeated for a total of 6 credits in 3850 and 3851 combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for all semesters of RLST 3850 and 3851] (No AXLE credit)

RLST3851 - Independent Study**Course Description**

May be repeated for a total of 6 credits in 3850 and 3851 combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for all semesters of RLST 3850 and 3851] (No AXLE credit)

RLST3890 - Special Topics in Religious Studies**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

RLST3900 - Mysticism and Spirituality, Comparative Study**Course Description**

Hindu, Buddhist, Jewish, and Christian texts, practices, and figures historically categorized as "mystics." Genealogies of the term "spirituality" as contemporary rubric for mystical and psycho-affective experiences. Philosophical, historical, and textual perspectives. [3] (P)

RLST3926 - Ancient Goddesses**Course Description**

Ancient concepts of the feminine divine in literature and iconographic evidence. Specific goddesses, their spheres of influence, and their place in the various pantheons. Cultic practices and religious syncretism across cultures, including Mesopotamia, Egypt, and Ancient Israel. Offered on a graded basis only. [3] (INT)

RLST3940 - The Nature of Evil**Course Description**

Human evil as expressed in the Shoah, religious fundamentalism, and ethnic cleansing. Theological, philosophical, biological, and literary texts. Evil transformed by scientific inquiry since 1600. [3] (HCA)

RLST3941 - Religion, Science, and Evolution**Course Description**

Interactions between science and religion from antiquity to Charles Darwin. Subsequent modifications of Darwinism and religious responsibilities to evolutionary theories. [3] (SBS)

RLST4100 - Native American Philosophies**Course Description**

Shared concepts and principles among contemporary Native American writers. Time, space, personhood, ecology, and healing. Spirituality and narrative ontology. [3] (HCA)

RLST4371 - Through the Eyes of the Other: A History of Muslim-Christian Relations

Course Description

Travelogues and interpretive accounts of encountering the religious and cultural 'Other,' Christian or Muslim. Increased awareness of long-standing relationship between two major religious traditions. Offered on a graded basis only. [3] (HCA)

RLST4551 - Islamic Mysticism

Course Description

Origins and development of mystical traditions in Islam; rise of asceticism; early Sufis; development and systematization of Sufi orders and teachings; evolution of theosophical dimensions of mysticism; present day Sufism and its spread in North America; comparison of Islamic mysticism with other forms of mysticism. [3] (HCA)

RLST4551W - Islamic Mysticism

Course Description

Origins and development of mystical traditions in Islam; rise of asceticism; early Sufis; development and systematization of Sufi orders and teachings; evolution of theosophical dimensions of mysticism; present day Sufism and its spread in North America; comparison of Islamic mysticism with other forms of mysticism. [3] (HCA)

RLST4554 - The Qur'an and Its Interpreters

Course Description

The Qur'an and the Islamic tradition of interpretation. The treatment of Biblical prophets, Jesus and Satan. Interpretations will be drawn from all time periods including rationalist, dogmatic, Shi'i and mystical schools of interpretation. [3] (INT)

RLST4554W - The Qur'an and Its Interpreters

Course Description

The Qur'an and the Islamic tradition of interpretation. The treatment of Biblical prophets, Jesus and Satan. Interpretations will be drawn from all time periods including rationalist, dogmatic, Shi'i and mystical schools of interpretation. [3] (INT)

RLST4562 - Culture, Religion, and Politics of the Arab World

Course Description

Diversity and unity in Arab culture. Religious, sociopolitical, and historical factors shaping Arab identity in the modern age. Encounters and relationships between Arabs and the Western world. The Israeli-Palestinian conflict. [3] (INT)

RLST4593 - Advanced Seminar in Islamic Tradition

Course Description

Analysis of original Arabic texts, manuscript reading, and research methods. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (HCA)

RLST4665 - Mythologies and Epics of South Asia

Course Description

Classical Hindu and Buddhist mythologies of South Asia. Sanskrit Mahabharata and Ramayana epics. Regional adaptations of mythical themes in vernacular languages. Buddhist and Islamic narratives of romance and chronicle. Interpretive and performance strategies. Oral, literary, and visual modes of representation. Political deployment of myths. [3] (INT)

RLST4666 - Devotional Traditions of South Asia: Hindu, Muslim, Sikh

Course Description

Mythology of Hindu pantheon and worship through devotion or bhakti. Techniques for inculcating devotion through meditation, temple rituals, and pilgrimage. Entry of Islam into South Asia. Shi'i and Sufi practices. Sikh traditions. Role of vernacular languages in creating local traditions. Hindu-Muslim interaction, syncretism, and shared sacred space. Challenges to orthodoxy. [3] (INT)

RLST4774 - Japanese Mythology

Course Description

Antiquity to the present. Classic myths and re-tellings over time. Introduction to theoretical frameworks including comparative and historical. Politics, gender, and performance. [3] (INT)

RLST4834 - Religion and Psychotherapy in the United States

Course Description

Diverse ways psychotherapists relate the religious to the psychological since Freud. Psychotherapeutic tools and the religious. Role of the religious in humanistic, feminist, and decolonial psychotherapies. "Triumph of the therapeutic," the religious in liberation psychology, and the clinical use of spiritual practices. [3] (SBS)

RLST4835 - Freudian Theories and Religion

Course Description

A critical assessment of psychoanalytic theories as an explanation of religious behavior. Study of the basic structure of these theories followed by a systematic critique of texts by Sigmund Freud and Erik Erikson. Examination of religious narrative forms. [3] (SBS)

RLST4836 - The Religious Self according to Jung

Course Description

The religious core of human existence as related to the concepts of the archaic unconscious and the birth of the self in C. G. Jung's analytical psychology. Study of the life and thought of Jung as illustrated by his autobiography, Memories, Dreams, Reflections. Critical assessment of his theory as a means for understanding religious phenomena. [3] (SBS)

RLST4837 - Psychology of Religious Myth and Ritual

Course Description

Examination of religious rituals and myths from both Christian and other traditions. Critical review of major psychological theories of ritual and myth. Their relevance to an understanding of myth and ritual as religious phenomena. [3] (SBS)

RLST4938 - Marriage in the Ancient Near East and the Hebrew Bible**Course Description**

Religious, legal, and socio-economic aspects of marriage. Survey of ancient Sumerian, Assyrian, Babylonian, and Egyptian sources, and relevant sections of the Hebrew Bible. Marriage as an institution at the beginning of recorded history. [3] (INT)

RLST4939 - Religious Autobiography**Course Description**

The construction of identity in religious autobiography: motivations (personal salvation, witness, proselytism); relationships among self, God, and religious tradition; role of memory; cultural, gender, and religious differences. Readings may include Augustine, Gandhi, Malcolm X, Angelou, Wiesel. [3] (P)

RLST4970 - Majors Colloquium**Course Description**

Regular presentations and critical readings of student projects and professional writings. May be repeated for credit twice for a total of 3 credit hours. Open only to majors. [1] (No AXLE credit)

RLST4998 - Senior Honors Thesis**Course Description**

Reading of primary research sources and writing an honors thesis under the supervision of the thesis adviser. Open only to senior departmental honors students. [3] (No AXLE credit)

RLST4999 - Senior Honors Thesis**Course Description**

Reading of primary research sources and writing an honors thesis under the supervision of the thesis adviser. Open only to senior departmental honors students. [3] (No AXLE credit)

Robert Penn Warren Center

RPW2333 - Rethinking Pandemics**Course Description**

In this highly interactive class, students will participate in live action role play [LARP] to explore the complex medical and social dimensions of public health crises in the past. We will focus primarily on first-hand accounts of specific diseases (plague, smallpox, and cholera) as experienced from Antiquity to the nineteenth century. Students will also produce their own creative, first-hand accounts about their experiences with COVID-19. This work will be submitted to the COVID-19 archives at the Vanderbilt University Libraries so researchers and students in the future can learn more about the ways we lived through, and made sense of, the current moment. Not open to students who have completed 2333W. [3] (HCA)

RPW2333W - Rethinking Pandemics**Course Description**

In this course, students will analyze first-hand accounts of pandemics to understand how public health crises were experienced and documented. They will make connections between lived experiences in the past to understand in deeper ways their own experiences during the current pandemic and create personal, first-hand accounts that document their experiences with COVID-19. (HCA) [3]

RPW2610W - A Hands On History of the American Research University

Course Description

Vanderbilt as a case study of the American research university after the Civil War. Literary and artistic works. Thematic and chronological attention: Rise of the University; the Gilded Age; Great Depression; World War II and the Cold War; the Civil Rights Movement; and the present day. Primary documents from the University Archives and Special Collections. [3] (US)

RPW3890W - Special Topics

Course Description

[3] (HCA)

Russian

RUSS1001 - Commons iSeminar

Course Description

Topics vary. General Elective credit only. [1] (No AXLE credit)

RUSS1101 - First-Year Russian

Course Description

Elementary conversation and reading with an emphasis on everyday situations. Introduction to Russian culture and life through contemporary Russian materials. No credit for students who have earned credit for a more advanced Russian language course. [4] (No AXLE credit)

RUSS1102 - First-Year Russian

Course Description

Continuation of 1101 with emphasis on reading and talking about texts. No credit for students who have earned credit for a more advanced Russian language course. Prerequisite: 1101. [4] (INT) (CORE LA)

RUSS1105 - Beginning Conversation

Course Description

Expansion of grammar and vocabulary from RUSS 1101 and 1102. Basic fluency in speaking and aural comprehension. Vocabulary building, extemporaneous speaking, verb conjugation and governance, declension, and other language challenges. Literature, film, and extracts from broadcast media. Prerequisite: 1101. Prerequisite or Corequisite: 1102. [2] (No AXLE credit)

RUSS1111 - First-Year Writing Seminar

Course Description

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

RUSS1500 - Introduction to Russian and East European Studies

Course Description

History and culture of Russia and East Europe, 1700-present. Political history, intellectual history, literature, and culture of region. Russia and East Europe in historical and geopolitical context. [3] (P) (CORE B, C) (LE HFA)

RUSS1874 - Russian Fairy Tales

Course Description

Perspectives from history, psychology, politics, gender, and religion. Fairy tale adaptations by Pushkin, Tolstoy, Stravinsky, Nabokov, Bulgakov, and others. Knowledge of Russian is not required. [3] (INT) (CORE B, C) (LE HFA)

Postwar Soviet society and culture; de-Stalinization and the sixties generation; Gorbachev, perestroika, and disintegration; contemporary history. [3] (INT)

RUSS3303 - Advanced Grammar and Reading

Course Description

Advanced grammar and reading skills. Prerequisite: 2202. [3] (INT)

RUSS3305 - Advanced Conversation and Composition

Course Description

Advanced conversation and composition skills. Prerequisite: 2202. [3] (INT)

RUSS3306 - Advanced Russian Language through Culture and Literature

Course Description

Literature, history, aesthetics, and politics in Russian-speaking cultures. May be repeated for credit if there is no duplication in topic. Prerequisite: 2202. [3] (INT) (CORE LA)

RUSS3307 - Advanced Russian Language through Visual Culture and Media**Course Description**

Cinema, media arts, visual culture, and media history of Russian-speaking cultures from pre-digital to the digital age. May be repeated for credit if there is no duplication in topic. Prerequisite: 2202. [3] (HCA) (CORE LA)

RUSS3308 - Advanced Russian Language through Russian Society**Course Description**

Seminal aspects of Russian literature, culture, and civilization through interdisciplinary lenses. May be repeated for credit if there is no duplication in topic. Prerequisite: 2202. [3] (P) (CORE LA)

RUSS3333 - Special Offering**Course Description**

Topics vary. [3]

RUSS3850 - Independent Readings**Course Description**

Designed for majors and qualified undergraduates. Projects are carried out under the supervision of a member of the department. All projects must be approved by the department. May be repeated for a total of 6 credits over a four-semester period in 3850 and 3851 combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for four semesters of RUSS 3850 and 3851] (No AXLE credit)

RUSS3851 - Independent Readings**Course Description**

Designed for majors and qualified undergraduates. Projects are carried out under the supervision of a member of the department. All projects must be approved by the department. May be repeated for a total of 6 credits over a four-semester period in 3850 and 3851 combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [3; maximum of 6 credits total for four semesters of RUSS 3850 and 3851] (No AXLE credit)

RUSS3880 - Internship Training**Course Description**

Under faculty supervision, students gain experience working in a variety of settings, such as civic, corporate, cultural, government, health, media, political, research, and social welfare organizations in the United States and Russia. Background reading and research must be completed in Russian 3881 concurrently with 3880. A minimum of 3 hours of 3881 must be completed, independent of hours taken in 3880. Students may earn up to 6 hours of 3881 credit. A research paper and report must be submitted at the end of the semester during which the internship training is completed. A 2.90 grade point average and prior approval of the director of undergraduate studies of the student's plans are required. Offered on a Pass/Fail basis only and must be taken concurrently with 3881. Hours of 3880 cannot be included in the minimum hours counted toward the Russian majors or minors. Corequisite: 3881. [Variable credit: 1-9] (No AXLE credit)

RUSS3881 - Internship Readings and Research

Course Description

Under faculty supervision, students gain experience working in a variety of settings, such as civic, corporate, cultural, government, health, media, political, research, and social welfare organizations in the United States and Russia. Background reading and research in Russian 3881 must be completed concurrently with 3880. A minimum of 3 hours of 3881 must be completed, independent of hours taken in 3880. Students may earn up to 6 hours of 3881 credit. A research paper and report must be submitted at the end of the semester during which the internship training is completed. A 2.90 grade point average and prior approval of the director of undergraduate studies of the student's plans are required. Corequisite: 3880. [Variable credit: 3-6] (No AXLE credit)

RUSS3890 - Selected Topics

Course Description

May be repeated for a total of 12 credit hours in 3890 and 3891 combined if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3; maximum of 12 credit hours total for all semesters of RUSS 3890 and 3891] (No AXLE credit)

RUSS3891 - Selected Topics

Course Description

May be repeated for a total of 12 credit hours in 3890 and 3891 combined if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3; maximum of 12 credit hours total for all semesters of RUSS 3890 and 3891] (No AXLE credit)

RUSS4999 - Senior Honors Thesis

Course Description

[3] (No AXLE credit)

Sanskrit

SNSK1101 - Elementary Sanskrit I

Course Description

Fundamental elements of Sanskrit language in Devanagari script. [3] (No AXLE credit)

SNSK1102 - Elementary Sanskrit II

Course Description

Development of reading, pronunciation, recitation, and grammatical proficiency. Materials from classical works of religion, philosophy, folklore, drama, and poetry. Discussion of Sanskrit milieu and historical development. Prerequisite: 1101. [3] (HCA)

SNSK2201 - Intermediate Sanskrit I

Course Description

Readings in authentic works of philosophy, religion, poetry, history, and drama. Prerequisite: 1102. [3] (HCA)

SNSK2202 - Intermediate Sanskrit II

Course Description

Readings in authentic works of philosophy, religion, poetry, history, and drama. Prerequisite: 2201. [3] (HCA)

SNSK3301 - Advanced Sanskrit I**Course Description**

Advanced training in Sanskrit language and literature. Drama, poetry, religion, philosophy, and law.
Prerequisite: 2202. [3] (HCA)

SNSK3302 - Advanced Sanskrit II**Course Description**

Advanced training in Sanskrit language and literature. Drama, poetry, religion, philosophy, and law.
Prerequisite: 3301. [3] (HCA)

Science Education

SCED2330 - Pedagogy Seminar**Course Description**

This pedagogy seminar accompanies a core course in the College of Arts & Sciences and examines the process of teaching and learning of that course content. Students enrolled in the core course lecture may elect to participate in this accompanying pedagogy seminar. This optional seminar will be team-taught by the core course instructor and an education faculty member. [2]

SCED3240 - Teaching Science in Elementary Schools**Course Description**

Study of the nature of science, discovery (inquiry) teaching and learning, curriculum approaches, goals and standards, trends, instructional and assessment strategies, and resources and materials for teaching science in grades K-5, with emphasis on grades 2-5. [2]

SCED3320 - Introduction to Literacies in Science**Course Description**

This course is intended for licensure candidates in secondary science education and for other students who want to explore the concepts and practices of disciplinary literacy, that is, the links between content and communication. [3]

SCED3370 - Teaching Science in Secondary Schools**Course Description**

Study of instructional approaches, materials, curriculum resources, trends, inquiry teaching and learning, for teaching in secondary schools. Required for secondary school licensure in the sciences. Prerequisite: EDUC 3310 or consent of instructor. Corequisite: SCED 3371. [3]

SCED3371 - Professional Year Practicum**Course Description**

Observation, participation, and teaching in middle school and secondary school settings. Corequisite SCED 3370 [3]

SCED3400 - Modeling in the Secondary Science Classroom**Course Description**

This course is intended for licensure candidates in secondary science education and for other students who want to explore modeling in the secondary science classroom. [3]

SCED3850 - Independent Study in Science Education**Course Description**

Semi-independent study on selected topics in science education. May be repeated. Consent of supervising instructor required. [1-3]

SCED3890 - Special Topics in Science Education**Course Description**

Exploration of a special topic related to science education. May be repeated with change of topic. [1-3]

SCED4963 - Student Teaching Seminar: Secondary**Course Description**

Seminar to accompany EDUC 4953. A \$300.00 Teacher Performance Assessment fee is associated with this course. [3]

Scientific Computing

SC3250 - Scientific Computing Toolbox**Course Description**

Use of computational tools in multiple science and engineering domains. Simulations of complex physical, biological, social, and engineering systems, optimization and evaluation of simulation models, Monte Carlo methods, scientific visualization, high performance computing, or data mining. Prerequisite: CS 2201 or 2204; MATH 1100 or higher. FALL. [3]

SC3260 - High Performance Computing**Course Description**

Parallel computing, grid computing, GPU computing, data communication, high performance security issues, performance tuning on shared-memory-architectures. Prerequisite: CS 2201 or 2204. SPRING. [3]

SC3850 - Independent Study**Course Description**

Development of a research project by the individual student under the direction of a faculty sponsor. Project must combine scientific computing tools and techniques with a substantive scientific or engineering problem. Consent of both the faculty sponsor and one Director of the SC minor is required. Prerequisite: SC 3250. [1-3]

SC3851 - Independent Study**Course Description**

Development of a research project by the individual student under the direction of a faculty sponsor. Project must combine scientific computing tools and techniques with a substantive scientific or engineering problem. Consent of both the faculty sponsor and one Director of the SC minor is required. Prerequisite: SC 3250. [1-3 each semester]

SC3890 - Special Topics

Course Description

[1-3]

Social Studies Education

SSED2100 - Scientific and Historical Reasoning in Young Children

Course Description

This course focuses on issues of the development of subject matter reasoning and understanding in young children. The course will examine the interplay between informal and formal experiences that influence the development of scientific and historical reasoning as children transition from their intuitive theories to a more formal study of subject matter disciplines. [3]

SSED2300 - Pedagogy Seminar

Course Description

This pedagogy seminar accompanies a core course in the College of Arts & Sciences and examines the process of teaching and learning of that course content. Students enrolled in the core course lecture may elect to participate in this accompanying one credit pedagogy seminar. This optional seminar will be team-taught by the core course instructor and an education faculty member. [1]

SSED3240 - Teaching Social Studies in Elementary Schools

Course Description

Study of conceptual structure of social studies curricula with emphasis on curricular objectives, instructional approaches, teaching materials, and evaluative strategies focusing on teaching social studies in grades K-5, with emphasis on grades 2-5. Corequisite: SCED 3240 and EDUC 3240. [2]

SSED3260 - Human Geography

Course Description

(Also listed as SSED 6240 for Professional Students) An examination of the human and cultural aspects of various regions of the world including the spatial manifestations of culture, population distribution and movements, language, religion, ethnicity, political geography and resource issues. The course examines human geography themes at local, national and international levels and probes the nature of geographical thinking and the characteristics of geography as a social science. [3]

SSED3320 - Introduction to Literacies in the Social Studies

Course Description

This course is intended for licensure candidates in secondary education for social studies and for other students who want to explore the concepts and practices of disciplinary literacy that is the links between content and communication. [3]

SSED3370 - Teaching Social Studies in Secondary Schools

Course Description

Instructional principles and techniques of teaching social studies. Required of students seeking secondary school licensure in social studies, a social science field, or history. Prerequisite: EDUC 3310 or consent of instructor. Corequisite: SSED 3371. [3]

SSED3371 - Professional Year Practicum**Course Description**

Observation, participation, and teaching in middle school and secondary school settings. Corequisite: SSED 3370 [3]

SSED3850 - Independent Study in Social Studies Education**Course Description**

Semi-independent study on selected topics in social studies education. May be repeated. Consent of supervising instructor required. [1-3]

SSED3890 - Special Topics in Social Studies Education**Course Description**

Exploration of special topics related to social studies education. May be repeated with change of topic. [1-3]

SSED4963 - Student Teaching Seminar: Secondary**Course Description**

Seminar to accompany EDUC 4953. A \$300.00 Teacher Performance Assessment fee is associated with this course. [3]

Sociology

SOC1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE Credit)

SOC1010 - Introduction to Sociology**Course Description**

The study of human society; the nature of culture and its organization. Processes of communication, socialization, mobility, population growth. Repeat credit for students who have completed 1010W or 1011. [3] (SBS) (CORE B, E) (LE SBS)

SOC1011 - Introduction to Sociology: Seminar**Course Description**

The study of human society; the nature of culture and its organization. Processes of communication, socialization, mobility, population growth. Repeat credit for students who have completed 1010. [3] (SBS) (CORE A, B) (LE SBS)

SOC1015 - Contemporary Social Issues**Course Description**

Social issues and policy. Cohesion, conflict, change, and inequality in modern societies. Basic sociological concepts and methods. Serves as repeat credit for 1015W. [3] (SBS) (CORE B, E) (LE SBS)

SOC1015W - Contemporary Social Issues (Writing Seminar)**Course Description**

Social issues and policy. Cohesion, conflict, change, and inequality in modern societies. Basic sociological concepts and methods. Serves as repeat credit for 1015. [3] (SBS) (CORE A, B) (LE SBS)

SOC1020 - Contemporary Social Issues**Course Description**

Social change, conflict, and inequality in modern societies. Basic sociological concepts and methods as they apply to social issues and policy. Focus varies by section. Repeat credit for students who have completed 1020W. [3] (SBS) (CORE B, E) (LE SBS)

SOC1020W - Contemporary Social Issues**Course Description**

Social change, conflict, and inequality in modern societies. Basic sociological concepts and methods as they apply to social issues and policy. Focus varies by section. Repeat credit for students who have completed 1020. [3] (SBS) (CORE A, B) (LE SBS)

SOC1030 - Environment and Technology: Sociological Approaches**Course Description**

Inequality, population, social change, technology, and the state. Application of concepts from general sociology and environmental sociology to environmental problems across institutional sectors such as food, water, energy, health, and transportation. Serves as repeat credit for SOC 1030W. [3] (SBS) (CORE B, E) (LE SBS)

SOC1030W - Environment and Technology: Sociological Approaches (Writing Seminar)**Course Description**

Environment, population, social change, technology, inequality, and the state. Application of concepts from general sociology and environmental sociology to environmental problems across institutional sectors such as food, water, energy, health, and transportation. Serves as repeat credit for 1030. [3] (SBS) (CORE A, B) (LE SBS)

SOC1040 - Men and Women in American Society**Course Description**

This course focuses on ideas about masculinity and femininity and how these ideas carry with them inequalities in the distribution of power and resources available to men and women. We examine how gender permeates seemingly neutral aspects of everyday life - how we date, sexuality, family life, work relationships, political life, media images. Repeat credit for students who have completed 1040W. [3] (P)

SOC1040W - Men and Women in American Society**Course Description**

This course focuses on ideas about masculinity and femininity and how these ideas carry with them inequalities in the distribution of power and resources available to men and women. We examine how gender permeates seemingly neutral aspects of everyday life - how we date, sexuality, family life, work relationships, political life, media images. Repeat credit for students who have completed 1040. [3] (P)

SOC1050 - Health & Population: Sociological Approaches**Course Description**

Case studies of contemporary issues and policies related to health and population. Cohesion, conflict, change, and inequality in modern societies. Basic sociological concepts and methods. Serves as repeat credit for 1050W. [3] (SBS) (CORE B, E) (LE SBS)

SOC1050W - Health & Population: Sociological Approaches (Writing Seminar)**Course Description**

Case studies of contemporary issues and policies related to health and population. Cohesion, conflict, change, and inequality in modern societies. Basic sociological concepts and methods. Serves as repeat credit for 1050. [3] (SBS) (CORE A, B) (LE SBS)

SOC1060 - Politics, Law, and Conflict: Sociological Approaches**Course Description**

Case studies of contemporary issues and policies related to politics, law and conflict. Cohesion, conflict, change, and inequality in modern societies. Basic sociological concepts and methods. Serves as repeat credit for 1060W. [3] (SBS) (CORE B, E) (LE SBS)

SOC1060W - Politics, Law, and Conflict: Sociological Approaches (Writing Seminar)**Course Description**

Case studies of contemporary issues and policies related to politics, law and conflict. Cohesion, conflict, change, and inequality in modern societies. Basic sociological concepts and methods. Serves as repeat credit for 1060. [3] (SBS) (CORE A, B) (LE SBS)

SOC1070 - Race, Ethnicity & Gender: Sociological Approaches**Course Description**

Case studies of contemporary issues and policies related to race, ethnicity and gender. Cohesion, conflict, change, and inequality in modern societies. Basic sociological concepts and methods. Serves as repeat credit for 1070W. [3] (SBS) (CORE B, E) (LE SBS)

SOC1070W - Race, Ethnicity & Gender: Sociological Approaches (Writing Seminar)**Course Description**

Case studies of contemporary issues and policies related to race, ethnicity and gender. Cohesion, conflict, change, and inequality in modern societies. Basic sociological concepts and methods. Serves as repeat credit for 1070. [3] (SBS) (CORE A, B) (LE SBS)

SOC1080 - Culture, Institutions, and Socialization: Sociological Approaches**Course Description**

Case studies of contemporary issues and policies related to culture, institutions and socialization. Cohesion, conflict, change, and inequality in modern societies. Basic sociological concepts and methods. Serves as repeat credit for 1080W. [3] (SBS)

SOC1080W - Culture, Institutions, and Socialization: Sociological Approaches (Writing Seminar)**Course Description**

Case studies of contemporary issues and policies related to culture, institutions and socialization. Cohesion, conflict, change, and inequality in modern societies. Basic sociological concepts and methods. Serves as repeat credit for 1080. [3] (SBS) (CORE A)

SOC1111 - First-Year Writing Seminar

Course Description

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

SOC2100 - Statistics for Social Scientists

Course Description

Descriptive and inferential statistics with social science research applications. Sampling issues; describing data with measures of central tendencies and dispersion; hypothesis testing using categorical and continuous indicators; multivariate techniques for continuous, categorical, and time dependent data. Limited to majors and minors in Sociology, Public Policy Studies, and Communication of Science and Technology, with preference given to Sociology majors and minors. [3] (SBS) (CORE B, D) (LE SBS)

SOC2102 - Introduction to Social Research

Course Description

Overview and evaluation of research strategies. Interpretation of qualitative and quantitative data. Research methods and design. Evaluate research ethics, research hypotheses, and literature reviews. Prerequisite: 1010, 1010W, 1020, 1020W, or 1030. Open only to sociology, environmental sociology, and public policy majors. [3] (SBS) (CORE LB) (LE SBS)

SOC2103 - Computational Methods in Sociology

Course Description

Reading, understanding and conducting computational sociological research. Data collection and management in Python and R, text analysis, machine learning, social network analysis, computational ethnography. Ethical issues in computational research. Prerequisite: SOC 2100. [3]

SOC2201 - The Family

Course Description

Study of the relationship of family structure to social organization. Comparative and historical approaches to the family. Recent changes in the American family. Courtship, marriage, marital adjustment, parenthood, and family dissolution in relation to contemporary American society. [3] (P) (CORE B, C) (LE SBS)

SOC2202 - Schools and Society: The Sociology of Education

Course Description

How schools affect individuals and relate to institutions: the government, the economy, social classes, and families. How social attributes, including race and class, affect academic achievement. Controversies such as desegregation and intelligence testing. [3] (SBS) (CORE B, C) (LE SBS)

SOC2203 - Sociology of Religion

Course Description

Theories of the nature, function, and structure of religion. Religion in America, including fundamentalism, the Black Church, and cults. How religion changes and is changed by secular society. [3] (SBS) (CORE B, C) (LE SBS)

SOC2205 - Seeing Social Life**Course Description**

History, theory, and ethics of visual images in sociological research. Truth status of visual data. How individuals and groups use photographs to make sense of social worlds. Race, ethnicity, gender, social class, and their visual documentation. Methods for collection and analysis of visual data, especially photographs. Prerequisite: SOC 1010, 1010W, 1020, 1020W, 1041, 1041W, or ANTH 1101. [3] (SBS) (CORE C, D) (LE SBS)

SOC2206 - Artistic Dreams, Communities, and Pathways**Course Description**

Artists' dreams and their pathways to creative careers and expressive lives. Seizing opportunities posed by history and surmounting societal obstacles to entering the creative class. Organizations, institutions, and communal spaces that encourage creative careers and living expressive lives. Not open to students who have earned credit for SOC 1111 section 18 without permission. Total credit hours for this course and SOC 1111 section 18 will not exceed 3 credit hours. Credit hours reduced from most recent course taken (or from test or transfer credit) as appropriate. [3] (SBS) (CORE B) (LE SBS)

SOC2210 - Cultural Consumption and Audiences**Course Description**

How audiences and consumers engage with art and culture - from popular music to film, classical art, fashion, and food. [3] (SBS) (CORE B, C) (LE SBS)

SOC2211 - Cultural Production and Institutions**Course Description**

(Formerly listed as SOC 3202 prior to Fall 2025) The production of culture. The role of artists, firms, and markets in creating cultural objects, ideas, and practices, including novels, television and news, science, music, visual arts, and food. [3] (SBS) (CORE B, C) (LE SBS)

SOC2212 - Art in Everyday Life**Course Description**

Art and the public sphere. Cultural analysis, critical theory, art production and reception, curation, ethnography. [3] (SBS) (CORE B, C) (LE SBS)

SOC2213 - Artists, Community, and Democracy**Course Description**

Communities of diverse artists, minority viewpoints, and cultural pluralism in a democratic society. Contemporary United States with cross-cultural and historical comparisons. [3] (SBS) (CORE C, E) (LE SBS)

SOC2230 - Sociology Through Baseball**Course Description**

Baseball as a social institution. Group dynamics; baseball as work and business. Free agency and law; race and ethnic relations. Globalization. Serves as repeat credit for students who have earned credit for 3224W. [3] (SBS) (CORE B, C) (LE SBS)

SOC2230W - Sociology Through Baseball (writing seminar)**Course Description**

Baseball as a social institution. Group dynamics, baseball as work and business. Free agency and law, race and ethnic relations, and globalization. Serves as repeat credit for students who have earned credit for 2230. [3] (SBS) (CORE A, B) (LE SBS)

SOC2290 - Contemporary American Society**Course Description**

Shifts in the political, economic, and social structure of the United States; changes in technology, demography, and social mores. [3] (US) (CORE B, C) (LE SBS)

SOC2300 - Principles of Experimental Sociology**Course Description**

How manipulation of social structures changes behaviors. Theory construction, development of testable hypotheses, philosophy of science, research ethics, and experimental methods. Offered on a graded basis only. Prerequisite: SOC 2100. [3] (SBS)

SOC2321 - Environment and Development**Course Description**

Relationship between economic development and the natural environment. Implications of development on our contemporary ways of life and the environmental conditions of our planet. Different models of development for both Western industrial and developing societies, from early imperialism to contemporary globalization. Current global environmental crises, problems of environmental inequality and injustice, and social movements for alternative development initiatives. [3] (SBS) (CORE B, E) (LE SBS)

SOC2322 - Environment, Health, and the Politics of Science**Course Description**

Basic concepts in the sociology of science and their applications to controversies in the health and environmental sciences. Toxins and risk, nutrition, and health. Health and environmental aspects of emerging technologies. Case studies to develop generalizable social-science hypotheses. [3] (SBS) (LE SBS)

SOC2323 - NGOs, Society, and Climate Change**Course Description**

(Formerly listed as 3319) Nonprofits as complex and diverse actors engaged in climate mitigation, climate adaptation, policy, and energy justice. Logics of nonprofit organizations; grant-writing. Perspectives and insights from sociology, political science, and nonprofit studies. Serves as repeat credit for ENVS 3301 prior to Fall 2025, or ENVS 2323 onward. [3] (SBS) (LE SBS)

SOC2325 - Business, Civil Society, and the Environment**Course Description**

Environmental sustainability and social responsibility; interactions among private sector, civil society, state, and consumers. Social movements and industry, politics of green consumption, and rise of third-party certification movements and private governance. Agriculture, fishing, and forestry industries. [3] (SBS) (CORE: B, E) (LE SBS)

SOC2350 - Society and Medicine**Course Description**

Cultural and social factors in the perception, definition, diagnosis, treatment, and distribution of disease. Doctor-patient relations; role of nurses and other health professions. Social consequences of hospitals, medical technology, medical specialization, and health insurance. [3] (SBS) (LE SBS)

SOC2351 - Race, Gender, and Health**Course Description**

Effect of racial and ethnic background, gender, socioeconomic status, sexual identity, and age or generation on the experiences of health, illness, medical institutions, and work in the health professions. [3] (SBS)

SOC2352 - Social Networks and Health**Course Description**

How social networks generate health inequality. Survey instruments for measuring social networks. Network-based concepts and theories, including social integration, cohesion, capital, regulation, support, negative interactions and exchanges, negative social comparison, contagion, and social cost. [3] (SBS) (LE SBS)

SOC2370 - Global Demography**Course Description**

Global population history. Causes and consequences of fertility and mortality change. Global population challenges, from poverty and food insecurity to low fertility and aging. Population, development, the environment, and our prospects to feed a world of over 9 billion people by mid-century. [3] (INT) (CORE B, C) (LE SBS)

SOC2371 - Immigration in America**Course Description**

Theories of international migration, with an emphasis on migration as a social process. Economic and social impact, including assimilation, immigrant incorporation, and the second generation. The migrant experience, including transnational practices, and how immigration redefines race, ethnicity, and gender. Immigration history of the United States. Current U.S. immigration law and policy. Debate on open borders. [3] (SBS) (CORE B) (LE SBS)

SOC2372 - The Environment, Mental Health, and Society**Course Description**

Broad overview of the field of mental health and the environmental from a sociological and social scientific lens. [3] (CORE B) (LE: SBS)

SOC2600 - Self, Society, and Social Change**Course Description**

Problems and prospects for individual participation in social change; volunteering, community service, and philanthropy; role of individuals and voluntary associations in social change. [3] (SBS) (CORE B, E) (LE SBS)

SOC2601 - Politics, State, and Society**Course Description**

The relationship between state and society; the nature and distribution of power in democratic society; the social conditions necessary for democracy; social movements and protest in political change; and the politics of public policy making. Attention to political actions, definitions of citizenship, and political ideology. [3] (SBS) (CORE B, E) (LE SBS)

SOC2603 - Class, Status, and Power**Course Description**

Analysis of the competition for jobs, advancement, and income. The influence of social background, education, politics, race, sex, changes in national economy, and other factors will be considered. Theoretical and empirical analysis focusing on the United States. [3] (SBS) (LE SBS)

SOC2604 - U.S. Social Movements**Course Description**

Historical origins, mobilization, strategies, outcomes, and legacies of U.S. social movements, including anti-racism, civil rights, environmental, feminist, labor, LGBTQIA+, and urban movements. [3] (US) (CORE B, E) (LE SBS)

SOC2650 - Criminology**Course Description**

The nature, distribution, causes, and control of crime with emphases on contemporary American society and a broad range of types of crime. [3] (SBS) (CORE B, E) (LE SBS)

SOC2651 - Deviant Behavior and Social Control**Course Description**

The social causes of, and societal reactions to, several types of deviant behavior (e.g., juvenile delinquency, crime, sex deviance, mental illness). Examines the probable consequences of suggested solutions to reduce different types of deviant behavior. [3] (SBS) (CORE B, E) (LE SBS)

SOC2652 - Delinquency and Juvenile Justice**Course Description**

The nature, distribution, causes and control of juvenile delinquency and the operation of the juvenile justice system in contemporary American society. [3] (SBS) (CORE B, E) (LE SBS)

SOC2653 - American Policing: Evolution and Controversy**Course Description**

History of US policing, source of maintenance of its power. Selected police brutality and other misconduct including current events. Police unions, militarization, force continuum, consent decrees, asset forfeiture. Role of media and community. Probing look at role of the police. Serves as repeat credit for SOC 3333 section 01 offered Spring 2023, SOC 3333 section 01 offered Spring 2022, SOC 3333 section 01 offered Spring 2021. [3] (SBS)

SOC2700 - Racial and Ethnic Minorities in the United States**Course Description**

Status of blacks, Asians, Hispanics, and other minorities. Migration, identity and association, and strategies to improve group status and reduce intergroup tensions. Comparisons to other countries. [3] (SBS) (LE SBS)

SOC2701 - Racial Domination, Racial Progress**Course Description**

Racial and ethnic relations in contemporary American society. Impact of race and ethnicity on education, economics, politics, family, and health. Study of Whites, Blacks, Hispanics, Asians, and Native Americans. Color-blind ideology. [3] (SBS) (LE SBS)

SOC2702 - Social Psychology of Prejudice**Course Description**

Prejudice and its amelioration. Problems of relations between blacks and whites in the United States. [3] (SBS) (LE SBS)

SOC2710 - Gender in Society**Course Description**

Theoretical approaches to gender relations with a focus on the contemporary U.S. Evolution of gender stereotypes, gender socialization over the life course, gender in social interactions, institutional sources of gender inequality, and intersections of gender with race, social class, and sexual identity. Topics include work, school, families, health, and intimate relationships. [3] (SBS)

SOC2720 - Race, Gender, and Sport**Course Description**

Manifestations of race and gender in sport. Emphasis on race and gender ideologies and the associated inequalities in sport in America. International comparisons for context. [3] (SBS) (LE SBS)

SOC2799 - Womb to Tomb: The Life Course**Course Description**

Stages of life: birth, school and work, coupling, child rearing, retirement and death. Rites of passage that mark transitions between those stages. Importance of life events to individual biographies, and how race, gender, sexuality, class, and other social differences shape those events. Cultural differences. [3] (SBS)

SOC3001 - Sociological Perspectives**Course Description**

Major classical and contemporary sociological perspectives such as symbolic interactionism, functionalism, and conflict sociology. Attention to the orientation and style of outstanding representatives of each perspective. Analysis in terms of basic concepts, central questions, substantive themes, methodology, and bearing on contemporary social issues. [3] (P)

SOC3003 - Research Practicum**Course Description**

Review of sociological concepts and methods coupled with experience in data collection and analysis as applied to a research project underway by one or more sociology faculty members. May be repeated for a total of 6 credits if there is no duplication of content. [3] (No AXLE credit)

SOC3204 - Tourism, Culture, and Place**Course Description**

Nature of tourist encounters. Marketing and displaying culture to tourists. Implications for urban economies and landscapes, and for tourists and locals. Ethics and dilemmas. Nashville as case study. Field-trip based learning. Frequent travel off-campus will pose scheduling conflicts with other classes immediately prior or after. Prerequisite 1010 or other Sociology class. [3] (SBS)

SOC3207 - Popular Culture Dynamics**Course Description**

Examination of theories and research that link culture and society. Consideration of the mass media arts with particular emphasis on popular music. Focus on creators, industry, and audiences. [3] (SBS)

SOC3210 - Creative Industries**Course Description**

Creation, production, and reception of cultural products such as music, film, and novels, drawing on the sociology of culture, economic sociology, and organizational sociology. [3]

SOC3231 - Contemporary Latin America**Course Description**

Current history and long-term trends; regional trade. Development strategies and social inequalities. Hispanic Americans, immigration, and the U.S. border; the war on drugs. Race, music, and popular culture. [3] (INT)

SOC3232 - Contemporary Mexican Society**Course Description**

Sociological understanding of contemporary Mexican society. Historical roots of the modern Mexican state. Economic, political, and social institutions operating in Mexico, formal and informal structures, and their consequences. [3] (INT)

SOC3236 - American Jewish Life**Course Description**

Diversity, individualism, and change in Jewish life. Food and culture, memory and identity, gender and assimilation, Reform-Conservative-Orthodox culture wars. [3] (SBS)

SOC3240 - Emergent Technologies and Social Life**Course Description**

Integration of new technologies into contemporary social life; structural dynamics of socio-technical systems. Foundational theories of technology in society. Digital, data-driven, and automated technologies through recent field-defining monographs; mutually influential relationship between technical and social currents. [3] (SBS)

SOC3242 - Artificial Intelligence in Social Systems**Course Description**

Artificial intelligence across social institutions. Inequality reflected and perpetuated through data and automation. Cutting-edge questions and problems from a sociological perspective. [3] (SBS)

SOC3302 - Poverty, Health, and Politics**Course Description**

Politics of poverty, health, and social welfare policy in the U.S. from the 1930s to the present. Profiles of poverty and health. Social change, social movements, advocacy, and social enterprise. [3] (SBS)

SOC3303 - Social Dynamics of Mental Health**Course Description**

Definition and classification of mental health and mental illness. Emphasis on social factors affecting mental health. Different ways of responding to persons in poor mental health and consequences of particular responses. [3] (SBS)

SOC3306 - Gender and Medical Work**Course Description**

Gender inequality in the health professions. Relationship between gender inequality and other forms of inequality in health care work. [3] (SBS)

SOC3311 - Climate Change and Society**Course Description**

The sociology of climate change, including efforts to reduce greenhouse gases and problems caused by climate change. Comparative analysis of how governments and businesses develop strategies to adapt to climate change. [3] (SBS)

SOC3314 - Environmental Inequality and Justice**Course Description**

Relationships between social inequalities and environmental degradation, both in the U.S. and internationally. Distribution of environmental hazards across race and class, natural resource rights and management, urban health and sustainability, climate injustices, and environmental justice movements. Serves as repeat credit for students who earned credit for ENVS 2324. [3] (SBS)

SOC3315 - Human Ecology and Society**Course Description**

Demography, social organization, technology, and the global environment. Shifting energy systems; sustainable industries; food production. Growth vs. development. Affluence, waste, and recycling. [3] (INT) (CORE B, E) (LE SBS)

SOC3317 - Energy Transitions and Society**Course Description**

Comparisons of contemporary societies' transition to low-carbon energy systems. Emphasis on renewable energy and energy efficiency. Perspectives include both wealthy and poor countries. [3] (INT)

SOC3318 - Sociology of Green Jobs**Course Description**

Comparative, historical, and theoretical perspectives of the contemporary transformation of work and employment in green jobs. Emphasis on the U.S. economy. [3] (SBS)

SOC3333 - Special Offering**Course Description**

Topics vary. [3]

SOC3602 - Change and Social Movements in the Sixties**Course Description**

Mid-1950s to mid-1970s. The rise and influence of social movements in the 1960s, including civil-rights, student, anti-Vietnam War, feminist, and countercultural. [3] (SBS)

SOC3603 - Women and Social Activism**Course Description**

History of women's participation in social movements. Women's citizenship, environmentalism, second- and third-wave feminism, hate movements, and global feminist activism. Theories of mobilization, collective identity, strategy, and movement outcomes. Not open to students who have earned credit for SOC 1111 Section 17 without permission. Total credit for this course and SOC 1111 Section 17 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3] (SBS)

SOC3605 - Law and Social Movements**Course Description**

Social activists and their relationship to the law and legal institutions. Activist litigation, movement legislative influence, protest policing, government surveillance of activists, and rights consciousness. Civil rights, women's, LGBT, environmental, and labor movements. [3] (SBS)

SOC3611 - Women and the Law**Course Description**

History of laws in the U.S. subordinating women. Efforts by feminists to achieve substantive and procedural equity. Employment, educational, reproductive, and criminal law, and women's role in the legal profession. [3] (P)

SOC3613 - Law and Society**Course Description**

Law, inequality, and racial, ethnic, gender, and economic groups in society. Operation of the legal system, including lawyers, courts, and police. Advantages and disadvantages in law. Law's role in social change. [3] (SBS)

SOC3615 - Human Behavior in Organizations**Course Description**

Organizations are treated as resources in the production and distribution of goods and services. Case analyses from the economy are reviewed to diagnose "organizational pathologies" and to understand reciprocal impacts among organizational structures, leaders, and citizens. [3] (SBS)

SOC3616 - Women and Public Policy in America**Course Description**

A study of public policies as they affect women in contemporary American society. Issues considered include participation of women in the labor force; effects of employment patterns on the family; birth control, abortion, and health care policies; child care; participation of women in political processes; divorce, child support, and custody; affirmative action policies; present governmental remedies and proposed alternatives. [3] (SBS)

SOC3624 - Prison Life**Course Description**

Prison life from the perspective of prisoners, officials, and the society in which they operate. [3] (SBS)

SOC3711 - Women, Gender, and Globalization**Course Description**

Globalization and its impact on women and gender relations. Multinational corporations, economic development, and inequality; new forms of work; human rights; feminist movements for change. [3] (INT)

SOC3723 - Gender, Sexuality, and the Body**Course Description**

The body is a physical marker of gender and sexuality. Biological reproduction is saturated with social meanings - shaping ideas about masculinity, femininity, the gender division of labor, and heterosexuality. In this course, we will look at the body as reflexive project and as the site of historical and ideological significance. We address race, ethnicity, physical abilities, and class in explaining variations in cultural ideals. [3] (SBS)

SOC3724 - Gender Identities, Interactions, and Relationships**Course Description**

Gender identities form and influence interactions in friendships, intimate relations, families, education, and other institutions. Changes and continuities in gender roles within the United States and ways in which race, class, and sexual orientation intersect processes of gender relations. [3] (SBS)

SOC3851 - Independent Research and Writing**Course Description**

May be repeated for a total of 6 credits. Students may enroll in more than one section of this course each semester. [1-6; maximum of 6 credits total for all semesters of 3851] (No AXLE credit)

SOC3880 - Internship Training**Course Description**

Under faculty supervision, students gain experience in any of a variety of settings, such as civic, corporate, cultural, government, health, media, political, research, and social welfare organizations. Background reading and research will be completed in Sociology 3881 concurrently with the completion of internship training, Sociology 3880. A minimum of 3 hours of 3881 must be completed with hours taken in 3880. A research paper and report must be submitted at the end of the semester during which the internship training is completed. A 2.90 grade point average, completion of 6 hours of prior work in sociology, and prior departmental approval of the student's plans are required. Offered on a pass/fail basis only and must be taken concurrently with 3881. Hours of 3880 may not be included in the minimum hours counted toward the sociology major. Corequisite: 3881. [1-9] (No AXLE Credit)

SOC3881 - Internship Readings and Research**Course Description**

Under faculty supervision, students gain experience in any of a variety of settings, such as civic, corporate, cultural, government, health, media, political, research, and social welfare organizations. Background reading and research will be completed in Sociology 3881 concurrently with the completion of internship training, Sociology 3880. A minimum of 3 hours of 3881 must be completed with hours taken in 3880. A research paper and report must be submitted at the end of the semester during which the internship training is completed. A 2.90 grade point average, completion of 6 hours of prior work in sociology, and prior departmental approval of the student's plans are required. Corequisite: 3880. [3-6] (No AXLE credit)

SOC4961 - Seminars in Selected Topics**Course Description**

May be repeated for a total of 6 credits if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3; maximum of 6 credits total for all semesters of 4961] (No AXLE credit)

SOC4981 - Honors Research**Course Description**

Research and writing supervised by department staff culminating in the Senior Honors Thesis. Work consists of both background reading and active research. May be repeated for a total of 12 credits if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. Open only to honors candidates. Prerequisite or corequisite: 3002. [3-6; maximum of 12 credits total for all semesters of 4981] (No AXLE credit)

SPAN1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

SPAN1100 - Elementary Spanish I for True Beginners**Course Description**

Designed exclusively for students with no previous exposure to Spanish. Development of basic listening, speaking, reading, and writing skills with Spanish-speaking culture through a communicative approach. Conducted primarily in Spanish. Not open to students with previous training in Spanish. Three hours of classroom instruction. Students continuing in Spanish take 1102. No credit for students who have already completed 1100 or have earned credit for a more advanced Spanish language course. Students wishing to repeat this course must take 1101 for repeat credit. [3] (No AXLE credit)

SPAN1101 - Elementary Spanish I**Course Description**

Basic listening, speaking, reading, and writing skills. Communicative approach and exposure to aspects of Spanish-speaking cultures. Conducted entirely in Spanish. Three hours of classroom instruction. Intended for students with some study of the language at the elementary level. Entrance by departmental placement test. Serves as repeat credit for students who have completed 1100. No credit for students who have earned credit for a more advanced Spanish language course. [3] (No AXLE credit)

SPAN1102 - Elementary Spanish II**Course Description**

Further development of listening, speaking, reading, and writing skills using a communicative approach. Exposure to aspects of Spanish-speaking culture. Conducted entirely in Spanish. Three hours of classroom instruction. Students continuing in Spanish take 2201. No credit for students who have earned credit for a more advanced Spanish language course. Prerequisite: 1100 or 1101. [3] (INT) (CORE LA)

SPAN1103 - Intensive Elementary Spanish**Course Description**

A communicative approach to reading, writing, listening, and speaking for students who have studied one to three years of Spanish. Rigorous review of elementary Spanish through three hours of class instruction. Departmental Spanish placement exam score of 275-364. Students continuing in Spanish take 2201. No credit for students who have earned credit for 1100, 1101, or 1102. No credit for students who have earned credit for a more advanced Spanish language course. [3] (INT) (CORE LA)

SPAN1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

SPAN2201 - Intermediate Spanish I**Course Description**

Development of intermediate linguistic competence in Spanish using a communicative approach. Study of cultures of Spanish-speaking countries by incorporating authentic materials. Three hours of classroom instruction. Intended for students who have earned credit for 1102 or 1103 or in consultation with the placement test scores on departmental website. No credit for students who have earned credit for a more advanced Spanish language course. [3] (INT) (CORE LA)

SPAN2202 - Intermediate Spanish II**Course Description**

Development of intermediate linguistic competence in Spanish using a communicative approach. Study of cultures of Spanish-speaking countries by incorporating authentic materials. Three hours of classroom instruction. Intended for students who have earned credit for SPAN2201. No credit for students who have earned credit for a more advanced Spanish language course. [3] (INT) (CORE LA)

SPAN2203 - Intermediate Spanish**Course Description**

Development of intermediate linguistic competence in Spanish (listening, speaking, reading, and writing) using a communicative approach. Study of cultures of Spanish-speaking countries by incorporating authentic materials. Four hours of classroom instruction plus one hour of independent research activities. Intended for students who have earned credit for 1102 or 1103 or have a departmental placement score of 365-409. No credit for students who have earned credit for a more advanced Spanish language course. [5] (INT) (CORE LA)

SPAN2204 - Intensive Intermediate Spanish**Course Description**

Development of intermediate linguistic competence in Spanish using a communicative approach. Study of cultures of Spanish-speaking countries by incorporating authentic materials. Three hours of classroom instruction. Intended for students with the indicated placement test scores on departmental website. Not open to students who have completed 2201 or 2202. No credit for students who have earned credit for a more advanced Spanish language course. [3] (INT) (CORE LA)

SPAN2780 - Intensive Spanish**Course Description**

A one-month intensive course in the Spanish language, meeting before regular classes begin. Emphasis is placed on conversation, reading, composition, and grammar. Offered only in the Vanderbilt in Spain program. [3] (INT) (CORE LA)

SPAN2980 - Design Your Successful Study Abroad Experience**Course Description**

Pre-departure course empowers each student to make informed decisions about their study abroad experience to ensure it has a lasting, positive, practical impact on their personal, academic, and professional development. Considers key elements of design of an immersive experience through exposure to ideas about sustainability, language proficiency, and intercultural competence. Serves as repeat credit for SPAN 1001, section 01 in Spring 2022 and SPAN 1001, section 04 in Spring 2024. Taught in English. [1]

SPAN2981 - Coming Back: Navigating Re-Entry After Studying Abroad

Course Description

While often overlooked, the process of re-entry holds keys to successful integration into the life students left behind to study abroad. Attentiveness to this next stage can bring significant dividends in terms of contentment, professional focus, and continued personal and academic growth initiated during a study abroad program. Prerequisite: completion of any semester-long study abroad program. Taught in English. [2]

SPAN2990 - Images of the Feminine in Spanish Cinema

Course Description

Spanish national cinema from the death of Francisco Franco to the present. Stories written, directed, and told by men about women. Taught in English with subtitled films. [3] (P)

SPAN2995 - Contemporary Latin American Prose Fiction in English Translation

Course Description

Themes and techniques of the contemporary novel, novella, and short story written by both men and women in Spanish America and Brazil. No credit for graduate students in Spanish or Portuguese. [3] (HCA)

SPAN3290 - Introduction to Spanish for the Professions

Course Description

Fifth semester Spanish language course. Recognizing and appreciating cultural diversity within professional environs. Intended for students who have completed 2202 or 2204 or by placement test score. [3] (INT) (CORE LA)

SPAN3301W - Intermediate Spanish Writing

Course Description

Development of abilities in composition tasks related to expository writing. Focus on rhetorical techniques for organizing information, vocabulary abilities, and emphasis on collaborative work. Students write several short papers and a final long paper. Intended for students who have earned credit for 2202, or 2203 (prior to Fall 2021), or 2204, or have a departmental Spanish placement exam score of 460 or higher. [3] (INT) (CORE LA)

SPAN3302 - Spanish for Oral Communication through Cultural Topics

Course Description

Development of speaking skills through the study of Spanish and Hispanic culture, and Spanish and Spanish-American current affairs. Texts drawn from contemporary articles, short stories, TV news, documentaries, and Web materials. Different registers of spoken Spanish. The development of effective strategies for oral communication. Prerequisite: 3290 or 3301W. Students with advanced oral skills will be placed in a higher level course. [3] (INT) (CORE LA)

SPAN3303 - Introduction to Spanish and Spanish American Literature

Course Description

Critical reading and methods of literary analysis. Selections cover all genres in several periods. Prerequisite: one of SPAN 3290 or 3301W or 3310W; and 3302. [3] (HCA) (CORE LA)

SPAN3304 - Contemporary Issues in the Spanish-Speaking World

Course Description

Cultural phenomena in economics, politics, health care, law, popular music, family, and cuisine. Professional proficiency and cultural literacy through four primary themes: movement, power, health, and intimacy. Prerequisite: one of SPAN 3290 or 3301W or 3310W; and 3302. [3] (INT) (CORE LA)

SPAN3310W - Spanish for Heritage Speakers**Course Description**

Advanced-level Spanish writing skills for academic and professional contexts. For heritage speakers of Spanish who have a personal, familial, or community connection to Spanish but received the majority of their formal education in English. [3] (INT) (CORE LA)

SPAN3320 - Introduction to Hispanic Cultural Studies**Course Description**

An examination of contemporary Hispanic culture through a variety of media (newspapers, magazines, comics, Web sites), arts, and entertainment. Prerequisite: one of SPAN 3290 or 3301W or 3310W; and 3302. Not open to students who have studied abroad. [3] (INT)

SPAN3325 - The Way of Saint James**Course Description**

Origins and development of the Way of Saint James, or Camino de Santiago, through an examination of literature, art, history, and cultural and religious issues. Contributions from the cult of Saint James and the Way to Spanish national identity. Prerequisite: one of SPAN 3290 or 3301W or 3310W; and 3302. [3] (HCA)

SPAN3330 - Cultural Studies in the Andes**Course Description**

Contemporary Andean culture through the lenses of anthropology and archaeology. Popular and elite artistic productions, cultural syncretism, and festive culture. Gender and society. Emphasis on hands-on learning on site. Locations include Lima, Cuzco, and Machu Picchu. Maymester only. Prerequisite: 3301W and 3302. [3] (INT)

SPAN3333 - Special Offerings**Course Description**

Topics vary. [3]

SPAN3340 - Advanced Conversation**Course Description**

An intercultural approach contrasting Hispanic and American perspectives. Discussions and oral presentations on contemporary issues. For students with a high level of oral proficiency, especially those returning from a semester abroad. Offered on a graded basis only. Prerequisite: one of SPAN 3290 or 3301W or 3310W; and 3302. [3] (INT) (CORE LA)

SPAN3345 - Spanish in Business and the Global Economy**Course Description**

Cultural competency in terminology related to the global economy, management, banking and accounting, human resources, marketing, finance, imports and exports. Economies of the Spanish speaking world and current economic realities through business case study analysis, individual research, and entrepreneurial engagement. Offered on a graded basis only. Prerequisite: one of SPAN 3290 or 3301W or 3310W; and 3302. [3] (INT)

SPAN3350 - Spanish for the Legal Profession**Course Description**

Advanced conversation course emphasizing specialized Spanish legal terminology. The development of linguistic proficiency and cultural competency. Vocabulary acquisition, grammar review, translation practice, oral presentations, and written papers. Prerequisite: one of SPAN 3290 or 3301W or 3310W; and 3302; and one of 3303 or 3304. [3] (INT)

SPAN3355 - Advanced Conversation through Cultural Issues in Film**Course Description**

Spanish and Latin American films as the basis for discussion and analysis of linguistic, historic, cultural, and social issues. Offered on a graded basis only. Prerequisite: one of SPAN 3290 or 3301W or 3310W; and 3302; and one of 3303 or 3304. [3] (INT)

SPAN3360 - Spanish Civilization**Course Description**

The development of Spanish culture from the Middle Ages to the present in the context of Western civilization. Discussion of historical background, literary and artistic trends, and political and socioeconomic patterns. Not open to students who have attended Vanderbilt in Spain. Prerequisite: 3301W and 3302. [3] (INT)

SPAN3365 - Film and Recent Cultural Trends in Spain**Course Description**

The cinema and Spanish cultural evolution during and after the Franco dictatorship. Prerequisite: 3303. [3] (INT)

SPAN3370 - Spanish American Civilization**Course Description**

The development of Spanish American culture from colonial times to the present; discussion of basic institutions, political and socioeconomic patterns, education, the arts, and folklore. Prerequisite: 3301W and 3302. [3] (INT)

SPAN3375 - Film and Culture in Latin America**Course Description**

Latin American cinema in historical perspective. Screenings, critical readings, and supplementary texts. Prerequisite: 3303. [3] (P)

SPAN3380 - The Spanish Language**Course Description**

An advanced grammar course with emphasis on problem constructions, stylistics, and composition. Offered only in the Vanderbilt in Spain program. [3] (INT)

SPAN3385 - Creative Writing and Advanced Grammar**Course Description**

Development of writing skills through advanced grammatical concepts, vocabulary, and writing techniques and the production of short stories, essays, poems, and other forms of textual discourse. Prerequisite: 3303. [3] (INT)

SPAN3390 - Engineering in the Spanish-speaking World

Course Description

Historical and contemporary achievements of engineering in Spain and Spanish America. Current issues and developments in civil, mechanical, electrical, chemical, and biomedical engineering in the context of global climate change, sustainability, and energy efficiency in the Spanish-speaking world. Prerequisite: one of SPAN 3290 or 3301W or 3310W; and 3302. [3] (INT)

SPAN3395 - Sustainability and Society in the Hispanic World Across the Professions

Course Description

Representative case studies of sustainability in the Spanish-speaking world, both as a broad ethical imperative and through the lens of different professions: business, education, engineering, law, medicine, and political science. Prerequisite: SPAN 3303 or 3304. No credit for students who have earned credit for SPAN 3891, section 02 in Spring 2024 or SPAN 3891, section 01 in Spring 2025. [3] (INT)

SPAN3535 - Mercado de Maravillas: Foods of Spain and Hispanic America in Today's Global Marketplace

Course Description

Impacts of climate change around food products of Spain and Latin America. Sustainability, fair trade, social issues, and global trade trends. History, production, exportation, marketing of a wide range of food and food products, i.e. olive oil, wine, coffee, cacao/chocolate, seafood, etc. SPAN 3345, Spanish in Business and the Global Economy, is recommended. Not open to students who earned credit for 3891 section 01 offered spring 2024. [3] (HCA)

SPAN3830 - Spanish, Health and Society

Course Description

Advanced linguistic and cultural tools for the study of human anatomy, and chronic and common diseases (prevention, detection, symptoms and diagnostic tests, treatment and follow-up). Comprehensive analysis of the current state of health of the Latino population. Physical and mental well-being, public policy, and health care in the United States. Service-learning component in the Latinx community, Prerequisite: one of SPAN 3290 or 3301W or 3310W; and 3302; and one of 3303 or 3304. [3] (INT)

SPAN3835 - Latino Immigration Experience

Course Description

Literature and film that depict the immigration and assimilation experiences of the main Latino groups. Service to the Latino community integral part of course work. Prerequisite: 3303. [3] (P)

SPAN3840 - Undocumented in the U.S.

Course Description

Nashville-area Latinx community. Challenges faced by refugees, asylum seekers, and those living undocumented in the United States. Rhetoric surrounding the permeability of the border, and the dangerous journeys made by asylum and opportunity seekers. U.S. foreign intervention; historical and current immigration polemics. Service-learning course. Offered on a graded basis only. Prerequisite: one of SPAN 3290 or 3301W or 3310W; and 3302; and one of 3303 or 3304. [3] (P)

SPAN3845 - Nashville en español: Language and Culture for Students Returning From Study Abroad

Course Description

Provides students returning from studying abroad opportunities to explore, within a formal academic environment, pressing questions raised by their immersion in another country. Learning dynamics of healthy cross-cultural communication and advancing language skills by exploring Nashville's Spanish-speaking communities. Prerequisite: 3303 and completion of a study abroad program. [3] (INT)

SPAN3850 - Independent Study**Course Description**

Designed primarily for majors. Projects are arranged with individual professors and must be approved by the director of undergraduate studies before the close of registration in the semester of the project. May be repeated for a total of 12 credits over a four semester period, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 12 credits total for four semesters of SPAN 3850] (No AXLE credit)

SPAN3860 - Emprendimiento: Global Supply Chain and Entrepreneurship in the Spanish Speaking World**Course Description**

Experiential course on entrepreneurship, innovation, and social enterprise in the Spanish speaking world, including the rapidly growing Latino entrepreneurial segment of the U.S. economy. Global supply chain and labor issues, role of culture in building viable businesses. Service learning, travel embedded. Offered on a graded basis only. Prerequisite: SPAN 3303, 3304, or 3345. [3]

SPAN3880 - Internship Training**Course Description**

Under faculty supervision, students gain experience in public or private organizations and complete research and readings. Offered on a pass/fail basis only and must be taken concurrently with 3881. Prerequisite: one of SPAN 3290 or 3301W or 3310W; and 3302; and one of 3303 or 3304. Corequisite: 3881. [1] (No AXLE credit)

SPAN3881 - Internship Readings and Research**Course Description**

Under faculty supervision, students gain experience in public or private organizations, and complete research and readings. Must be taken concurrently with 3880. Prerequisite: one of SPAN 3290 or 3301W or 3310W; and 3302; and one of 3303 or 3304. Corequisite: 3880. [3] (No AXLE credit)

SPAN3891 - Special Topics in Hispanic Culture**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: one of SPAN 3290 or 3301W or 3310W; and 3302; and one of 3303 or 3304. [3] (No AXLE credit)

SPAN3892 - Special Topics in Spanish Language and Linguistics**Course Description**

May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: one of SPAN 3290 or 3301W or 3310W; and 3302; and one of 3303 or 3304. [3] (No AXLE credit)

SPAN3893 - Special Topics in Hispanic Literature**Course Description**

Prerequisite: 3303. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3] (No AXLE credit)

SPAN3894 - Special Topics in Spanish and Spanish-American Literature and Culture in English Translation

Course Description

Study of the literature and culture of the Spanish-speaking world in English translation. Topics vary by semester. [3] (No Axle credit)

SPAN4250 - Imagine and Write: Creative Writing in Spanish

Course Description

Writing in different styles, genres, and registers: poem, newspaper article, fairy tale, dramatic monologue/dialogue, song lyric, film script, love letter, and journal entry. Offered on a graded basis only. Not open to students who have completed Span 3385. Prerequisite: 3303. [3] (HCA)

SPAN4300 - Introduction to Spanish Linguistics

Course Description

Major linguistic subsystems of the Spanish language. Morphology, syntax, phonetics and phonology. Semantics and pragmatics, dialectology, and sociolinguistics. No previous knowledge of linguistics required. Prerequisite: 3301W and 3302. [3] (SBS)

SPAN4310 - Translation and Interpretation

Course Description

Theory and practice of translation and interpretation, both from English to Spanish and Spanish to English. Practical knowledge of the basic modes of translation (direct and oblique) and interpretation (sight, consecutive, and simultaneous). Emphasis on the fundamentals of translation in legal, medical, literary, business, commercial, media, sports, and other fields. Prerequisite: one of SPAN 3290 or 3301W or 3310W; and 3302; and one of 3303 or 3304. [3] (SBS)

SPAN4315 - Contrastive Analysis of Spanish and English

Course Description

A comparison of the phonological, morphological, and syntactical structures of Spanish and English to demonstrate the similarities and differences between the linguistic systems of these two languages. Prerequisite: 3301W and 3302. [3] (SBS)

SPAN4320 - The Sounds of Spanish

Course Description

Analysis of the production, nature, and systemic function of the sounds of the Spanish language, as well as of problems frequently experienced by non-native speakers. Both standard and dialectal features of Spanish are examined. Offered on a graded basis only. Prerequisite: 3301W and 3302. [3] (SBS)

SPAN4325 - Language Variation in the Hispanic World

Course Description

Formation, general characteristics, distinctive features, and geographical extension of the principal dialectal regions of Spain and Spanish America. Both historical and modern dialects are considered. Emphasis on non-standard dialectal varieties of Spanish. Prerequisite: 3301W and 3302. [3] (SBS)

SPAN4330 - Words and Stems**Course Description**

A morphological presentation of the structural principles governing the creation of noun, verb, adjective, and adverb along with an overview of the formation of the underlying stems. Prerequisite: 3301W and 3302. [3] (SBS)

SPAN4335 - Grammatical Structure of Spanish**Course Description**

An introduction to the principles of modern Spanish morphology (word formation) and syntax (phrase structure and usage) through an analysis of the native speaker's organization of reality and use of language to reflect and to express that organization. Prerequisite: 3301W and 3302. [3] (SBS)

SPAN4340 - History of the Spanish Language**Course Description**

Origins and evolution of the Spanish (Castilian) language. Emphasis on the phonological and morphological development of Spanish within historical and cultural contexts of the Iberian Peninsula. Prerequisite: 3301W and 3302. [3] (SBS)

SPAN4345 - The Languages of Spain**Course Description**

Origins, development, and the contemporary sociolinguistic situation of the principal languages and dialects of Spain, including Castilian, Catalan, Galician, and Basque. Prerequisite: 3301W and 3302. [3] (SBS)

SPAN4350 - Communicating Across Cultures**Course Description**

Relationships among discourse, identity, and culture. Linguistic construction of ethnicity and gender. Latin American and U.S. Latino ways of speaking. Prerequisite: 3303. [3] (SBS)

SPAN4355 - Spanish in Society**Course Description**

Language variation and linguistic change. Regional, socioeconomic, gendered, and ethnic differences in spoken Spanish. Language as it shapes the identities of speakers. Language use in social contexts with comparisons to English. Prerequisite: 3303. [3] (SBS)

SPAN4360 - Discourse Analysis**Course Description**

Linguistic pragmatics. Speech acts in conversation as patterned activity rather than unpredictable behavior. Implications, presuppositions, discourse markers, and other pragmatic units. Comparisons with English. Prerequisite: 3303. [3] (SBS)

SPAN4400 - The Origins of Spanish Literature**Course Description**

From its beginnings to the Renaissance; the creation of a social order and a cultural tradition. Close study of three literary landmarks - Poema del Cid, Libro de Buen Amor, La Celestina - and other prose and poetry selections. Prerequisite: 3303. [3] (HCA)

SPAN4405 - Literature of the Spanish Golden Age**Course Description**

Representative works from early modern Spain, including poetry, prose, and drama of the Renaissance and Baroque periods. Prerequisite: 3303. [3] (HCA)

SPAN4410 - Spanish Literature from the Enlightenment to 1900**Course Description**

Essays and Neoclassic literature. Romanticism, Realism, and Naturalism. Representative works and authors from all genres. Prerequisite: 3303. [3] (HCA)

SPAN4415 - Spanish Literature from 1900 to the Present**Course Description**

Representative authors and works. Prerequisite: 3303. [3] (HCA)

SPAN4420 - Spanish American Literature from the Conquest to 1900**Course Description**

Development of all forms from colonial times to the end of the 19th century. Patterns of interaction of Amerindian, African, and European cultural traditions. Unity and diversity of Spanish American literature. Prerequisite: 3303. [3] (HCA)

SPAN4425 - Spanish American Literature from 1900 to the Present**Course Description**

The works of Neruda, Borges, Paz, Garcia Marquez and others. Prerequisite: 3303. [3] (HCA)

SPAN4430 - Contemporary Mexican Literature and Culture**Course Description**

Twentieth- and twenty-first-century-Mexican history through literature, the visual arts, film, and performance. Taught in Spanish. Offered on a graded basis only. Prerequisite: 3303. [3] (INT)

SPAN4440 - Development of the Short Story**Course Description**

From early manifestations in Spain through its current forms in Spain and Spanish America. Prerequisite: 3303. [3] (HCA)

SPAN4445 - Development of the Novel**Course Description**

From the seventeenth century through Realism and Naturalism in Spain and Spanish America. Prerequisite: 3303. [3] (HCA)

SPAN4450 - The Contemporary Novel**Course Description**

New forms in the twentieth-century novel in Spain and Spanish America. Prerequisite: 3303. [3] (HCA)

SPAN4455 - Development of Drama**Course Description**

Spanish theatrical works from 1600 to 1900, including the Golden age comedia, neoclassicism, romanticism, and early realism in drama. Prerequisite: 3303. [3] (HCA)

SPAN4465 - The Theory and Practice of Drama**Course Description**

Critical works and plays from different periods. Introduction to the principles of dramaturgy. Prerequisite: 3303. [3] (HCA)

SPAN4470 - Development of Lyric Poetry**Course Description**

Popular and traditional forms; the sonnet and other Renaissance and Baroque classical forms. Romanticism. Prerequisite: 3303. [3] (HCA)

SPAN4475 - Contemporary Lyric Poetry**Course Description**

From Modernism to the present in Spain and Spanish America. Prerequisite: 3303. [3] (HCA)

SPAN4500 - Critique of Technology: Perspectives from the Hispanic World**Course Description**

Insights from modern literature and other arts reframing technology's role in culture. Popular works of social commentary from Latin American fiction writers and filmmakers. Offered on a graded basis only. Serves as repeat credit for SPAN 3893 section 01 in Spring 2023, Spring 2022, or Spring 2021. Prerequisite: 3303. [3] (HCA)

SPAN4550 - The Theory and Practice of Literary Translation**Course Description**

Theoretical approaches and their consequences for the interpretation of translated texts. Practical application of these principles in the translation of both Spanish and Portuguese texts into English. Taught in Spanish. Written work in Spanish or Portuguese. Prerequisite: 3303. [3] (HCA) (CORE LA)

SPAN4620 - Love and Honor in Medieval and Golden Age Literature**Course Description**

The evolution of the key themes of love and honor in works from various genres of medieval and Golden Age Spanish literature with special attention to sociohistorical context. Prerequisite: 3303. [3] (HCA)

SPAN4640 - Don Quixote**Course Description**

Directed reading and intensive study of the novel. Prerequisite: 3303. [3] (HCA) (CORE LA)

SPAN4670 - Spanish Realism**Course Description**

Methods of, implications to, and pitfalls of creating realistic characters in nineteenth-century Spanish novels. Prerequisite 3303. [3] (HCA)

SPAN4690 - Alterity and Migration in Spain**Course Description**

Historical and literary texts about nationalism and cultural difference. Representations of contact with Africa, the Americas, and Asia; regional identities; immigration; gender and racial issues. Prerequisite: 3303. [3] (P)

SPAN4700 - Feminisms and Literature**Course Description**

Socio-historical context of "women's lit" and the literary canon of the twentieth century. High art and popular literature and culture through the lens of today's Latin American and intersectional feminisms. Prerequisite SPAN 3303. [3] (P)

SPAN4720 - Literary Genres and National Identities in Latin America**Course Description**

A comparative approach to the rise of the national literary traditions from independence to the latter half of the twentieth century. Indigenist novels, abolitionist narratives, and gaucho poetry by colonial figures, including African slaves, indigenous peoples, and Argentine Gauchos. Prerequisite: 3303. [3] (P)

SPAN4725 - Jungle Narratives in Latin America**Course Description**

From the colonial period to the present. Evolution of the representation of the jungle. Prerequisite: 3303. [3] (HCA)

SPAN4730 - Modern Latin American Poetry**Course Description**

Development of poetry in Spanish America and Brazil during the twentieth century. Major poets and movements, including both Spanish American Modernismo and Brazilian Modernismo. Poetry as a genre; composition and discussion of students' poetry. Taught in Spanish. Prerequisite: 3303. [3] (HCA)

SPAN4740 - Spanish-American Literature of the Boom Era**Course Description**

The Boom novel of the 1960s: Carlos Fuentes' *La muerte de Artemio Cruz*, Julio Cortázar's *Rayuela*, Mario Vargas Llosa's *La ciudad y los perros*, Guillermo Cabrera Infante's *Tres tristes tigres*, and Gabriel García Márquez's *Cien años de soledad*. Prerequisite: 3303. [3] (HCA)

SPAN4741 - Spanish-American Literature of the Post-Boom Era**Course Description**

The post-Boom novel from the 1970s to the present; analysis of related films. Manuel Muig's *Boquitas pintadas*, Me llamo Rigoberta Menchú, Laura Esquivel's *Coma agua para chocolate*, Reinaldo Arenas's *Viaje a La Habana*, and Daisy Rubiera Castillo's *Reyita, sencillamente*. Prerequisite: 3303. [3] (P)

SPAN4750 - Afro-Hispanic Literature**Course Description**

From nineteenth-century slave narrative to modern writers such as Miguel Barnet, Alejo Carpentier, and Quince Duncan. Prerequisite: 3303. [3] (P)

SPAN4755 - Latina and Latin American Women Writers**Course Description**

Contemporary writing of women in Latin America and of Latinas in the United States. Representation of sexuality and the maternal body. Prerequisite: 3303. [3] (P)

SPAN4760 - Literature and Medicine**Course Description**

Modern intersections of literature and medicine in Latin America. From the social hygiene literature of the nineteenth century to the autobiographical disease narrative of the late twentieth century. Prerequisite 3303. [3] (P)

SPAN4765 - Latin American Fiestas: Mexico, The Andes, and the Caribbean**Course Description**

Comparative analysis of the celebration phenomenon as a stark contrast to everyday reality. Festive integration of Amerindian, African, and European legacies embedded in the identity of three Latin American regions. Colonial and contemporary texts, paintings, and film. Serves as repeat credit for SPAN 3893 Section 01 in Fall 2017. Prerequisite: 3303. [3] (P)

SPAN4810 - Images of the City**Course Description**

Literary representations of cityscapes in Spain and Latin America. Prerequisite: 3303. [3] (HCA)

SPAN4980 - Undergraduate Seminar**Course Description**

Close contextual readings of major Hispanic literary texts through selected critical approaches. Open to junior and senior majors in Spanish; required of candidates for honors. Prerequisite: 3303. [3] (HCA)

SPAN4998 - Senior Honors Thesis**Course Description**

[3] (No AXLE credit)

SPAN4999 - Senior Honors Thesis**Course Description**

[3] (No AXLE credit)

Special Education

SPED1001 - Commons iSeminar**Course Description**

Commons Seminar, a 1-hour small seminar experience, open to first-year students. Students and faculty will collaboratively explore a specialized topic in depth in this university-wide seminar sponsored by The Ingram Commons. General Elective credit only. [1]

SPED1175 - Freshmen Seminar**Course Description**

Provides students with an overview of the undergraduate program in special education. Faculty members from each program area share their experiences and research projects. Students complete a 15-hour service project with individuals with disabilities in the community. [1]

SPED1210 - Introduction to Exceptionality**Course Description**

Examines issues and trends in special education and overviews the characteristics of persons with disabilities. Covers essential issues and theories relating to special education and the development of exceptional persons with special attention to normal and atypical human development. Multi-cultural, humanistic, and legal issues are addressed. [3]

SPED2160 - Heterogeneity in American Education**Course Description**

This course focuses on heterogeneity in the American educational system. Topics focus on the range of ethnic, socioeconomic, linguistic, religious, disability, educational provider, and geographic variation among students in U.S. schools. An interdisciplinary perspective informs the course, with particular attention to history, sociology, psychology, anthropology, and educational literature. [3]

SPED2317 - Managing Academic and Social Behavior**Course Description**

This course is designed to prepare students to manage classroom behavior using behavioral principles. Definition and measurement of behavior, reinforcement strategies, systematic program development, basic formats for classroom instruction, and techniques for monitoring student progress are presented. Emphasizes procedures for increasing academic and socially appropriate behavior through classroom activities. Students apply their skills in classroom settings. [3]

SPED3850 - Independent Study in Special Education**Course Description**

Semi-independent study of selected topics in special education. May be repeated. Consent of instructor required. [1-3]

SPED3890 - Special Topics in Special Education**Course Description**

Study of selected topics or issues related to special education such as teaching culturally or linguistically diverse learners, accommodating academic diversity in classrooms, or augmentative communication techniques. May be repeated for credit with change in topic. [3]

SPED3980 - Honors Seminar in Special Education**Course Description**

This seminar is completed as part of the Honors Program in Special Education, which is designed to allow students experiences working with a faculty member on research activities. The course is taken during the junior year concurrent with engagement in research with a faculty mentor's team for at least five hours per week. During weekly meetings, students will be introduced to various research methodologies, read and discuss articles and studies that use a variety of research designs, examine and share their roles on a faculty mentor's team, and ultimately, complete and share an Honors Project at the end of the spring semester. Acceptance into the Honors Program and permission of the instructor are required. [1]

SPED4950 - Student Teaching Seminar

Course Description

Students complete assignments and structured activities that demonstrate their ability to apply knowledge, skills, and dispositions acquired during the core courses and field-based experiences of the special education major. The weekly seminar discussion focuses on understanding situations and solving problems that naturally occur during the student teaching experience. A \$300.00 Teacher Performance Assessment fee is associated with this course. Must co-register for either SPED 4954 or 4951. [3]

SPED4951 - Student Teaching in Special Education

Course Description

Observation, participation, and classroom teaching for undergraduate students in any area of exceptionality. Placements are dependent on license areas. Prerequisite: Admission to student teaching. Corequisite: SPED 4950. [9]

Special Education: High Incidence

SPEDH3308 - Understanding Students with Severe and Persistent Academic and Behavior Difficulties

Course Description

This course has three main components. The first component will focus on the cognitive, perceptual, language, academic, and social/emotional characteristics and needs of students with severe and persistent academic and behavior difficulties. The second component will focus on special education law and developing IEPs. The final component will focus on developing lesson plans and general strategies for teaching students with severe and persistent academic and behavior difficulties. Prerequisite: SPED 1210. [3]

SPEDH3318 - Assessment for Students with Severe and Persistent Academic and Behavior Difficulties

Course Description

This course focuses on the diagnosis and evaluation of students with severe and persistent academic and behavior difficulties using a variety of developmentally appropriate curriculum based measurements, criterion-referenced, and norm-referenced tests in the academic and vocational subject areas. Emphasis is on the interpretation of information from assessments into Individualized Education Program annual goals and objectives and instructional programming strategies. Specific considerations is given to the reporting of assessment information to parents, teachers and other support personnel to determine appropriate placement levels within the continuum of services. Prerequisite: SPED 1210. Co-requisite: 1 hour of SPED 3871. [3]

SPEDH3328 - Teaching Mathematics to Students with Severe and Persistent Academic and Behavior Difficulties: K-8

Course Description

This methodological course consists of two components. The first focuses on the possible causes for disabilities in the area of mathematics and assessment of those disabilities. The second emphasizes explicit teaching procedures, direct instruction, and instructional design principles that apply to teaching mathematics in grades K-8. Prerequisite: SPED 1210 and 3308. [3]

SPEDH3338 - Teaching Reading to Students with Severe and Persistent Academic and Behavior Difficulties

Course Description

Presents empirically validated instructional procedures to address the reading deficits of students with severe and persistent academic and behavior difficulties. Integration of explicit teaching procedures, direct instruction, and instructional design principles that apply to a range of academic domains are emphasized. Proficiency in the development of assessment profiles, instructional lessons, monitoring of progress through curriculum-based measures and data-based decision making is required. Candidates apply skills in classroom settings.

Prerequisite: SPED 1210 and 3308. Co-requisite: 1 hour of SPED 3871. [3]

SPEDH3348 - Language and Learning

Course Description

This course examines writing and language development, the written and language difficulties encountered by students with high incidence disabilities, assessment and instruction of writing and language difficulties, as well as cultural diversity and writing and language differences. Not open to students who have earned credit for SPEDS 2430 without permission. Total credit for this course and SPEDS 2430 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3]

SPEDH3358 - Advanced Reading Methods for Students with Severe and Persistent Academic and Behavior Difficulties

Course Description

This course focuses on advanced methods of assessment and instruction methods related to teaching reading. Candidates in this course will gain competency in using formative assessments to identify students with severe and persistent reading difficulties, as well as expertise in and knowledge of teaching approaches and curricula for improving decoding, vocabulary, fluency, and comprehension abilities. Prerequisite: SPED 1210 and 3338.

Co-requisite: 1 hour of SPED 3871. [3]

SPEDH3368 - Teaching Middle School Students with Severe and Persistent Academic and Behavior Difficulties

Course Description

This middle school course for teaching students with severe and persistent academic and behavior difficulties has two components. The first focuses on teaching English Language Arts across the curriculum at the middle school, including reading literature and informational text, language development, writing, speaking, and listening. The second component focuses on skills needed for collaborating with other school personnel and preparing students to transition to high school. [3]

SPEDH3378 - Teaching High School Students with Severe and Persistent Academic and Behavior Difficulties

Course Description

This is an introductory course in teaching students with severe and persistent academic and behavior problems at the high school setting. The first half of the course covers models of teaching special education at the secondary level, transition-related legislation, post-school outcomes of high school students with disabilities, and dropout prevention within a context of cultural diversity. The second half focuses on empirically-based secondary special education strategies, including academic/study skills and accommodations, social skills, self-determination, ITP development, and career education and employment. [3]

SPEDH3388 - Teaching Mathematics to Students with Severe and Persistent Academic and Behavior Difficulties 6-12

Course Description

This mathematics methods course for teaching 6-12th grade students with severe and persistent academic and behavior difficulties consist of two major components. The first component focuses on the possible causes of math disabilities and assessment of math disabilities. The second component emphasizes instructional design principles, explicit teaching procedures, interventions, and mathematics pedagogy at the secondary level. [3]

SPEDH3398 - Teaching in Secondary Schools: Students with Severe Academic & Behavior Difficulties

Course Description

This is an introductory course in teaching students with severe and persistent academic and behavior problems at the secondary (middle and high school) level. This is an introductory course in teaching students with disabilities at the secondary (middle and high school) level. This course will cover preparing teacher candidates to work with 6-12 grade students with high-incidence disabilities for post-secondary transition planning, understanding outcomes and legislation; adolescent development and barriers to student success; special education instructional models and strategies in secondary schools, including adolescent literacy development, academic and social skills, career and technical education, and self-determination. [3]

SPEDH3661 - Advanced Fieldwork in Mild/Moderate Disabilities

Course Description

Students will participate in field-work in special education, specifically in classrooms for students with mild/moderate exceptionalities and/or autism. Students will complete activities tied to a fieldwork in special education seminar. This course may be repeated. [3]

SPEDH3778 - School and Classroom Supports Teaching Students Academic Behavior Difficulties

Course Description

This course focuses on practices to support teaching and learning of students with severe and persistent academic and behavior difficulties. Core topics include the following: (1) Effective classroom management to enhance appropriate behavior, prevent problem behavior, and support students at-risk for and with behavior difficulties; (2) Research, efficacy and models of co-teaching; (3) Collaboration with colleagues and families; (4) Technology use to support instruction and accessibility; and (5) Ethical professional behavior. [3]

SPEDH3871 - Field Work in Special Education for Mild/Moderate Disabilities

Course Description

Field-based application of correlated course content to classroom strategies. Planning, implementation, and evaluating instructional procedures for students with mild to moderate disabilities. May be repeated. Prerequisites: SPED 1210 [1-3].

Special Education: Severe

SPEDS2120 - Issues in Family Intervention

Course Description

An overview of different approaches, current issues, and problems involved in working with and supporting families. Emphasis is placed on how a child with disabilities affects and is affected by parents, siblings, the extended family, and the community. Strategies for effective communication for the purpose of information sharing and collaborative planning with families are provided. [3]

SPEDS2430 - Introduction to Language and Communication

Course Description

Overview of normal language development, psycholinguistic terminology and research, speech and language disorders and their remediation, and specific intervention procedures for the development of speech and language skills in children and youth. Not open to students who have earned credit for SPEDH 3348 without permission. Total credit for this course and SPEDH 3348 will not exceed 3 credit hours. Credit hours reduced from second course taken (or from test or transfer credit) as appropriate. [3]

SPEDS2450 - Augmentative and Alternative Communication

Course Description

This course is designed to provide an overview of the field of augmentative and alternative communication (AAC) for use with young children and school-age children with severe disabilities. Specifically, the course will provide an overview of the theories that are important to the understanding of appropriate uses of AAC systems, and the course will provide information about the efficacy of these systems with students with severe disabilities. Topics will include guidelines for selecting, implementing, using, and monitoring the use of AAC systems. [3]

SPEDS3300 - Methods of Instruction for Students with Autism, Intellectual, and Multiple Disabilities

Course Description

Provides information on the nature and needs of individuals with severe disabilities and the roles of federal, state, and local agencies in providing services to this population. Emphasis is placed on strategies for the acquisition and generalized use of age appropriate functional skills in natural community-based settings. Methods for developing and implementing individualized programming across specialized curricular areas such as communicative, cognitive, functional academic, motor, domestic living/self-help, recreation/leisure, vocational and general community living skills. Must co-register for SPEDS 3871. [3]

SPEDS3312 - Procedures in Transition to Adult Life

Course Description

(Also listed as HODC 3312) Overview of history, legislation, and practice in the areas of community and employment integration for persons with disabilities. Emphasis on various strategies for promoting a successful transition from school to life. Students are required to develop instructional plans for integration within the community. Students will apply their skills in community or classroom settings. Prerequisite: SPED 2310. Corequisite: SPEDS 3871. [3]

SPEDS3330 - Characteristics of Students with Low Incidence Disabilities

Course Description

This course provides information on the history, nature, characteristics, and needs of students with exceptionalities. Neurological impairments resulting in motor dysfunction, sensory impairments, and the combination of these are discussed. Information is provided on the physical, medical, and educational management of students with severe, profound, and multiple disabilities in educational settings. Corequisite: SPEDS 3871. [3]

SPEDS3350 - Access to General Education and Teaching Functional Academics

Course Description

The course provides in-depth information on teaching students with severe disabilities. Emphasis is on strategies for the acquisition and generalized use of age-appropriate functional skills in natural school and community-based settings. Methods for developing and implementing individualized programming across specialized curricular areas such as communicative, cognitive, functional academic, motor, domestic living/self-help, recreation/leisure, and general community living skills. Current research evidence to support effective practices is stressed. [3]

SPEDS3600 - Teaching Reading to Students with Severe Disabilities

Course Description

This course will present empirically validated instructional procedures to address the academic deficits of students with severe disabilities across principle domains of reading instruction including oral language, concepts of print, phonological awareness, phonics, vocabulary, comprehension, writing, and content area literacy. Includes integration of explicit teaching procedures, direct instruction, and instructional design principles that apply to a range of academic domains. Proficiency in the development of assessment profiles, instructional lessons, monitoring of progress through curriculum-based measures and data-based decision making is required. Students will apply their skills in classroom settings. Prerequisites: SPED 1210 and SPEDS 3330. Corequisite: SPEDS 3300. [3]

SPEDS3661 - Advanced Fieldwork in Autism, Intellectual, and Multiple Disabilities

Course Description

Students will participate in field-work in special education, specifically in classrooms for students with severe exceptionalities and/or autism. Students will complete activities tied to a fieldwork in special education seminar. This course may be repeated. Corequisite: SPEDS 3667. Prerequisites SPED 3871 both fall and spring. [3]

SPEDS3667 - Seminar in Teaching Students with Autism, Intellectual, and Multiple Disabilities

Course Description

Seminar for undergraduate students related to their field-work in local classrooms with severe disabilities and/or autism. Students will complete various assignments and implement them in a classroom setting. This course may be used to satisfy the Peabody College writing requirement. Prerequisites: SPED 1210, 2120, 2450, SPEDS 3300, 3330, 3312, 3350. Corequisite: SPEDS 3661. [3]

SPEDS3871 - Fieldwork in Autism, Intellectual, and Multiple Disabilities

Course Description

Field-based application of correlated course content to classroom strategies. Planning, implementation, and evaluating instructional procedures for students with severe disabilities. May be repeated. Prerequisites: SPED 1210, SPED 2110, SPED 2430. Fall semester Corequisites: SPED 2310, and SPEDS 3330. Spring Semester Corequisites: SPED 2450, SPEDS 3312, and SPED 3328. [1-3].

Special Education: Vision

SPEDV3150 - Introduction to Students with Visual Impairments and Deafblindness

Course Description

Students with visual impairments, including blindness, low vision, and deafblindness, represent a diverse population. This course provides an introductory overview on individuals with visual impairments including issues and trends around their education and development from early childhood through young adulthood. Students in the class will learn how to collaborate on multidisciplinary teams to support students with visual impairments across learning environments. Considerations for creating accessible assessments, instruction, and interventions for students with visual impairments, including students with additional disabilities, will be examined. At the end of this course, students will have a solid understanding of supports and special considerations for students with visual impairments and deafblindness. [3]

SPEDV3305 - Medical and Educational Implications of Visual Impairments

Course Description

Assessment of sensory function, including integration of information from medical and rehabilitation vision care specialists, as basis for planning, implementing, and monitoring intervention/education for learners with visual impairments, with emphasis on specific visual disorders, functional use of senses, assistive technology for enhancing visual function (i.e., optical and nonoptical devices), and family/child characteristics. Linking structure/function of visual system to most prevalent visual conditions, identifying implications of conditions for development and learning, and identifying appropriate accommodations for optimizing visual function. Roles of teachers of students with visual impairments; medical, educational, and rehabilitation professionals; families; and other team members in optimizing outcomes for students with visual impairments. Content provided through lectures, demonstrations, observations, laboratory dissections, and integrated fieldwork. [3]

SPEDV3315 - Issues & Trends for Teaching Students with Visual Impairments

Course Description

Introduction to the literature, history, principles, programs, practices, and problems in the field of visual impairment/blindness. Role of teacher of students with visual impairments in providing access to the general core curriculum, providing instruction in the expanded core curriculum for students with visual impairments, and introduction to assistive technology. Using assessment and data driven decision making to guide intervention planning, implementation, and progress monitoring. Course content provided through lectures, demonstrations, observations, and integrated fieldwork. [3]

SPEDV3335 - Braille Reading and Writing

Course Description

This course is an introduction to literary braille code (Unified English Braille) and braille codes for mathematics. Students will learn to read and write braille. This course is specifically designed for future teachers of students with visual impairments. Consent of instructor required. [1]

SPEDV3345 - Communication and Literacy Skills for Students with Visual Impairments

Course Description

Promoting/teaching communication and literacy skills, including use of assistive technology for communication and literacy (augmentative communication devices, computer-assisted instruction, keyboarding skills, non-optical devices for enhancing reading and writing, etc.) for students with visual impairments, including those with multiple disabilities. Special emphasis on learning media assessments; assessment of communication and literacy skills for intervention planning, implementation, and program monitoring; accessibility and production of appropriate learning media. Course content provided through lectures, demonstrations, observations, and integrated fieldwork. [3]

SPEDV3355 - Orientation and Mobility for Teachers of Students with Visual Impairments

Course Description

Lectures, discussions, and simulated activities in teaching orientation, mobility concepts and skills to students with visual impairments. Impact of visual impairment on motor and cognitive development and strategies for promoting optimal development and learning, sensory use, and independent travel, including assistive technology. Taught by an orientation and mobility specialist. Course content provided through lectures, demonstrations, observations, and integrated fieldwork. [3]

SPEDV3385 - Educational Access and Collaboration for Students with Visual Impairments

Course Description

Advanced strategies for providing access to the general core curriculum and providing instruction in the expanded core curriculum for students with visual impairments, early intervention and family-centered practices, with particular emphasis on assistive technology and universal design for learning. Course content provided through lectures, demonstrations, observations, and integrated fieldwork. [3]

SPEDV3900 - Teaching Braille**Course Description**

This course focuses on strategies for teaching braille to students with visual impairments, methods of braille production, and an introduction to advance braille codes teachers of students with visual impairments need to be familiar with. Students will read, write, and proofread braille; observe teachers as they teach braille codes to students with visual impairments; and acquire technology skills required to teach and produce braille to students with visual impairments. [2]

Swahili

SWAH1101 - Elementary Swahili I (UVA)**Course Description**

Listening, speaking, reading and writing. Course taught at University of Virginia; Vanderbilt students participate through video conference and/or telepresence classroom. Offered on a graded basis only. [3] (No Axle Credit)

SWAH1102 - Elementary Swahili II (UVA)**Course Description**

Offered on a graded basis only. Prerequisite: 1101. [3] (INT) (CORE LA)

SWAH2201 - Intermediate Swahili I (UVA)**Course Description**

Grammatical skills, speaking, and writing through a reading of Swahili texts. Course taught at University of Virginia; Vanderbilt students participate through video conference and/or telepresence classroom. Offered on a graded basis only. Prerequisite: 1102. [3] (INT) (CORE LA)

SWAH2202 - Intermediate Swahili II (UVA)**Course Description**

Offered on a graded basis only. Prerequisite: 2201. [3] (INT) (CORE LA)

Theatre

THTR1001 - Commons iSeminar**Course Description**

Topics vary. General Elective credit only. [1] (No AXLE credit)

THTR1010W - Writing About Performance**Course Description**

[3] (HCA)

THTR1101 - Theatre Production Practicum**Course Description**

Hands-on participation in various production roles. [1-3] (No AXLE credit)

THTR1111 - First-Year Writing Seminar**Course Description**

Independent learning and inquiry in an environment in which students can express knowledge and defend opinions through intensive class discussion, oral presentations, and written expression. May be repeated for credit once if there is no duplication of topic, but students may earn only up to 3 credits in any 1111 course per semester of enrollment. [3; maximum of 6 credits total for all semesters of 1111] (AXLE credit category varies by section)

THTR1611 - Fundamentals of Acting**Course Description**

The role of the actor in the theatre with emphasis on artistic self-expression through improvisation and development of performance skills. Available on a graded basis only. [3] (HCA) (CORE A)

THTR1701 - Scenic and Costume Production Practicum**Course Description**

Scenic and costume construction skills; production lab for THTR 1711. Offered on a graded basis only. Prerequisite or corequisite: THTR 1711. [1] (No AXLE credit)
