About the School

About the School

The Vanderbilt University School of Medicine administers degree and graduate certificate programs that provide students with the knowledge, skills, and attitudes they need to practice safe, effective, ethical, evidence-based, and patient-centered health care in the twenty-first century, and to contribute to the knowledge base supporting it.

Mission of the School of Medicine

The school's mission includes the education of physicians at all levels of their professional experience: medical school; postgraduate education, including basic science and clinical training; and continuing education and professional development for the practicing physician. In addition several master's level and two additional doctoral degrees in health care professions are offered.

Faculty members teach the practice of exemplary patient care at all levels; model programs of health care delivery, at primary, secondary, and tertiary levels; and fulfill the school's responsibility for community service.

In addition to teaching, members of the medical school faculty have a complementary responsibility to generate new knowledge through research. At Vanderbilt, research encompasses basic scientific questions, issues in clinical care, questions related to the health care system, and scholarship in the medical education process itself. Vanderbilt is recognized as one of the leaders in research among medical schools in the United States.

Vision of the School of Medicine

The vision of Vanderbilt University School of Medicine is to shape a future in which all persons reach their full health potential.

The core values of Vanderbilt University School of Medicine are integrity, inclusion, humility, equity, mutual respect, and excellence.

The mission of Vanderbilt University School of Medicine is to catalyze the advancement of impactful discovery, servant leadership, and lifelong learning.

In order to carry out this mission, we make these strategic commitments:

- To nurture the growth of clinicians, scientists, and educators who will serve and lead their local, national and global communities.
- To create, implement, and disseminate new knowledge that expands understanding of health, disease, and health care systems.
- To teach, learn, and provide compassionate, personalized caring of the highest quality for every patient who seeks our service and to strive to achieve health equity in the populations we serve.
- To embrace a culture of lifelong learning, critical thinking, and innovation so that we continuously improve in all we do.
- To build a diverse community of faculty, staff, and students that expands the richness of our learning environment and enhances excellence in all of our endeavors.
- To cultivate a caring atmosphere and workforce that seeks to eliminate structural racism, promote justice, and establish equity in all endeavors.

The Vanderbilt University School of Medicine Vision and Mission of the School statement was reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 16, 2021.

History of the School

School of Medicine

The first diplomas issued by Vanderbilt University were to sixty-one doctors of medicine in February of 1875, thanks to an arrangement that recognized the University of Nashville's medical school as serving both institutions. Thus, Vanderbilt embraced a fully-organized and functioning medical school even before its own campus was ready for classes in October of that year.

The arrangement continued for twenty more years, until the school was reorganized under control of the Board of Trust. In the early days, the School of Medicine was owned and operated as a private property of the practicing physicians who composed the faculty and received the fees paid by students—a system typical of medical education in the United States at the time. Vanderbilt made no financial contribution to the school's support and exercised no control over admission requirements, the curriculum, or standards for graduation. After reorganization under the Vanderbilt Board in 1895, admission requirements were raised, the course was lengthened, and the system of instruction was changed to include laboratory work in the basic sciences.

The famous report of Abraham Flexner, published by the Carnegie Foundation in 1910 and afterward credited with revolutionizing medical education in America, singled out Vanderbilt as "the institution to which the responsibility for medical education in Tennessee should just now be left." Large grants from Andrew Carnegie and his foundation, and from the Rockefeller-financed General Education Board, enabled Vanderbilt to carry out the recommendations of the Flexner Report. (These two philanthropies, with the addition of the Ford Foundation in recent years, have contributed altogether more than \$20,000,000 to the School of Medicine since 1911.) The reorganized school drew upon the best-trained scientists and teachers in the nation for its faculty. The full benefits of reorganization were realized in 1925 when the school moved from the old South Campus across town to the main campus, thus integrating instruction in the medical sciences with the rest of the university. The school's new quarters were called "the best arranged combination school and hospital to be found in the United States."

In 1977, the School of Medicine moved to the newly completed Rudolph A. Light Hall, which served as the home for School of Medicine educational and administrative activities for 41 years. The seven-story structure, with its 209,000 square feet of space, offered the latest in laboratory equipment, audio-visual, and multi-purpose classroom space. Thousands of VUSM students, faculty and staff have considered Light Hall the home of the School of Medicine, given that it has served as such for the longest single period of the school's history.

Beginning in 1996, several new degree programs became a part of the School of Medicine. These programs span a wide array of health-related fields, including public health (1996), clinical investigation (2000), audiology (2002), medical physics (2002), laboratory investigation (2004-2020), education of the deaf (2006), speech-language pathology (2007), health professions education (2010-2016), applied clinical informatics (2015), genetic counseling (2017), and imaging sciences (2022).

Until April 2016, Vanderbilt University owned and operated several hospitals and clinics collectively known as Vanderbilt University Medical Center, including Vanderbilt University Hospital, Vanderbilt Psychiatric Hospital, and Monroe Carell Jr. Children's Hospital at Vanderbilt, and their associated clinics. Effective April 30, 2016, Vanderbilt University conveyed the clinical assets used in the operation of Vanderbilt University Medical Center to a newly formed, not-for-profit, tax-exempt corporation, which is similarly named Vanderbilt University Medical Center.

Vanderbilt University Medical Center now operates independently of Vanderbilt University. It is clinically and academically affiliated with Vanderbilt University.

In summer 2018, the primary location for Vanderbilt University School of Medicine administrative offices—as well as the classrooms, student lounge, and first-year student lockers for the M.D. program—moved from Light Hall to the Annette and Irwin Eskind Family Biomedical Library and Learning Center (EBL). This new home for the School of Medicine, occupying the second, third, and fourth floors of the EBL, provides a state-of-the-art learning environment, with versatile physical spaces and innovative technology; comfortable, modern gathering spaces for both formal and informal activities for students in the M.D. program; and a bright, airy working environment for School of Medicine faculty and staff. At the same time, Light Hall remains an important venue for learning and co-curricular activities

School of Medicine

for multiple VUSM degree and certificate programs.

School Deans, Directors, and Principal Administrators

JEFFREY R. BALSER, M.D., Ph.D., Dean, School of Medicine

LAWRENCE J. MARNETT, Ph.D., Dean of Basic Sciences

GORDON R. BERNARD, M.D., Senior Associate Dean for Clinical Sciences

DONALD W. BRADY, M.D., Senior Associate Dean for Health Sciences Education

ROBERT S. DITTUS, M.D., M.P.H., Senior Associate Dean for Population Health Sciences

KATHLEEN GOULD, Ph.D., Senior Associate Dean for Biomedical Research, Education and Career Development and Director, Office of Graduate Student Support

C. WRIGHT PINSON, M.B.A., M.D., Senior Associate Dean for Clinical Affairs

DAVID S. RAIFORD, M.D., Senior Associate Dean for Faculty Affairs

CONSUELO H. WILKINS, M.D., M.S.C.I., Senior Associate Dean for Health Equity and Inclusive Excellence; Director, Graduate Certificate Program in Health Equity

WILLIAM COOPER, M.D., M.P.H., Associate Dean for Faculty Affairs

WILLIAM B. CUTRER, M.D., M.Ed., Associate Dean for Undergraduate Medical Education

AMY E. FLEMING, M.D., M.H.P.E., Associate Dean for Medical Student Affairs

MAUREEN A. GANNON, Ph.D., Associate Dean for Faculty Development

KATHERINE E. HARTMANN, M.D., Ph.D., Associate Dean for Clinical and Translational Scientist Development

ALYSSA M. HASTY, Ph.D., Associate Dean for Faculty (Basic Sciences)

STEVEN G. MERANZE, M.D., Associate Dean for Faculty Affairs

JOHN S. PENN, Ph.D., Associate Dean for Faculty Affairs

CHARLES R. SANDERS, Ph.D., Associate Dean for Research (Basic Sciences)

SHANE P. STENNER, M.D., M.S., Associate Dean for Education Design and Informatics

PAUL J. STERNBERG, JR., M.D., Associate Dean for Clinical Affairs

KYLA P. TERHUNE, M.D., Associate Dean for Graduate Medical Education

KIMBERLY N. VINSON, M.D., Associate Dean for Diversity Affairs

CHRISTOPHER S. WILLIAMS, M.D., Ph.D., Associate Dean for Physician Research Education; Director, Medical Scientist Training Program

Vanderbilt University School of Medicine Standing Committees

Executive Faculty of the Vanderbilt University School of Medicine

The Executive Faculty reviews, on a regular basis, the work of the Undergraduate Medical Education Accreditation Standards Committee, in order to monitor School of Medicine compliance with all LCME standards and elements. The Executive Faculty also provides advice and counsel on the formulation of major policies that pertain to LCME compliance.

The Executive Faculty meets monthly during the academic year. The Executive Faculty may additionally meet whenever requested by the dean of the School of Medicine or a majority of the Executive Faculty.

The Executive Faculty of the School of Medicine consists of the dean of the School of Medicine, the chairs of all VUSM clinical and basic sciences departments (except those in the Section of Surgical Sciences), and those center directors in the School of Medicine who report directly to the dean. Voting members from the Section of Surgical Sciences are the chair of the Section and the chair of one of its departments. Ex officio members without voting rights include School of Medicine senior associate deans, associate deans, and Vanderbilt University Medical Center (VUMC) hospital directors. At the discretion of the dean, other non-voting individuals may be invited to attend Executive Faculty meetings when the agenda makes such attendance appropriate.

The dean of the School of Medicine presides at the meetings of the Executive Faculty. In the dean's absence a member of the Executive Faculty who is designated by the dean presides.

Published 7/12/2022

School of Medicine

Executive Committee of the Executive Faculty

The dean appoints an Executive Committee of the Executive Faculty (ECEF) to facilitate the work of the Executive Faculty and to advise on matters requiring decisions. The ECEF possesses the full powers of the Executive Faculty and may act in its stead with full authority. The ECEF may initiate new policies or change previous policies established by the Executive Faculty in matters related to curriculum. Such decisions can be nullified or reversed by a two-thirds majority vote of the Executive Faculty.

The ECEF's roles include:

- The vetting and endorsement of School of Medicine faculty appointments and promotions to the senior ranks (associate professor and professor),
- Evaluation of appeals by department chairs following negative decisions by the Appointments and Promotions Committees of the School of Medicine,
- Evaluation of nominations for promotion of faculty to emeritus status, and
- Evaluation of proposals to transition faculty off of the tenure track.

In addition, the ECEF:

- Reviews the list of School of Medicine students who have met degree requirements and recommends them for degree conferral,
- Evaluates appeals of students who have been dismissed by degree-specific promotions and progress committees,
- Provides input on other matters related to academic policies of importance to the School of Medicine and Vanderbilt University Medical Center, and which require review and action outside the standing meetings of the Executive Faculty. The ECEF is advisory to the dean.

Members: Alice Coogan, James E. Crowe, Eric Hess, Seth Karp, Ege Kavalali, Borden Lacy, Ian Macara, Paul Sternberg, Adam Wright, Wei Zheng.

Faculty Appointments and Promotion Committee (FAPC) and Clinical Practice Appointment and Promotion Committee (CPAPC)

These committees, appointed by the dean, are responsible for consideration of faculty promotion in the School of Medicine and for examination of credentials of candidates for appointment to faculty positions.

FAPC Members: Gaelyn Garrett, Chair. Sean Collins, Eric Delpire, Cathy Eng, Reñe Gifford, Angela Jefferson, Neil Osheroff, S. Trent Rosenbloom, Jill Simmons, Christopher Wright.

Ex officio: Alyssa H. Hasty, John S. Penn, David S. Raiford.

CPAPC Members: Neal R. Patel, Chair. Rony A. Adam, Robert J. Deegan, Robert F. Miller, William M. Petrie, Kris P. Rehm.

Ex officio: John S. Penn, David S. Raiford.

Global Health Education Committee

The Global Health Education Committee (GHEC) supports the vision of the School of Medicine and the Vanderbilt University Medical Center to provide an array of global health education and training opportunities for VUSM and VUMC trainees while simultaneously enhancing the capacity of our partners in a collaborative effort to address global health challenges.

Donald Brady, Natasha Halasa, Julie Lankford, Marie Martin, Melinda New, and Kyla Terhune.

Student Responsibility for Adherence to Policy

Student Responsibility for Adherence to Policy

This VUSM catalog contains Vanderbilt University, School of Medicine and its constituent programs' policies, procedures, and resources intended to inform and guide students, faculty, and staff in their work related to VUSM programs. Several other VU-related resources contain similarly important information. The policies and procedures presented in the VUSM catalog, as well as those presented in each of the following resources, are designed to function in alignment with one another, and students, faculty, and staff are required to be familiar with them:

- **Vanderbilt University Student Handbook.** The handbook covers university policies and regulations on a wide range of topics, including (but not limited to) student conduct, alcohol and controlled substances, student engagement, and sexual misconduct and intimate partner violence. The university-wide policies and procedures in the handbook apply to all Vanderbilt University students, including School of Medicine students. The *Student Handbook* may be found at vanderbilt.edu/student_handbook.
- **Vanderbilt University Enrollment Bulletin.** The bulletin is intended as a single point-of-entry for students to access policies and procedures important to their Vanderbilt University student. This resource is most helpful for accessing university-level resources. For areas where relevant information is provided via school-level or program-level documents/outlets, the bulletin makes references to those resources. The *Enrollment Bulletin* may be found at vanderbilt.edu/enrollmentbulletin/.
- **Explore-VUSM** This website (<https://medschool.vanderbilt.edu/explore-vusm/>) provides all VUSM students with easily accessible information about the School, as well as links to a variety of university and program-specific resources.
- **Program Websites.** All VUSM programs maintain websites containing information important for students, faculty, and staff, as well as applicants and
- **Program Handbooks/MD Gateway.** VUSM programs provide their students with program handbooks containing day-to-day information about the program, with a focus on practical information and procedures. The MD Program offers its students this information via the MD Gateway (<https://medschool.vanderbilt.edu/md-gateway/>).

STUDENT RESPONSIBILITY FOR ADHERENCE TO POLICY:

All students enrolled in Vanderbilt University programs are bound by all applicable Vanderbilt University, School of Medicine, and degree program policies. By enrolling in a VUSM program, every student acknowledges his or her responsibility to abide by and adhere to all institutional and programmatic policies and procedures. Students, therefore, have the responsibility of being familiar with the policies and procedures described in the documents outlined above.

The Vanderbilt University Statement of the Honor Code

Vanderbilt University students pursue all academic endeavors with integrity. They conduct themselves honorably, professionally, and respectfully in all realms of their studies in order to promote and secure an atmosphere of dignity and trust. The keystone of our honor system is self-regulation, which requires cooperation and support from each member of the university community.

The School of Medicine Honor System

The Honor System at Vanderbilt University School of Medicine is conducted by students for the benefit of students, faculty, staff, and patients. The Honor System, as delineated by the Honor Code, requires students to conduct themselves with honor in all aspects of their lives. By demanding great responsibility, the Honor System fosters an environment of freedom and trust that benefits the entire Medical School. In signing this statement upon enrollment, each student agrees to participate in the Honor System and abide by its code.

As representatives of the Vanderbilt University School of Medicine and the medical professions, students pledge to conduct themselves with honor and integrity at all times. The Promotion Committees and the Honor Council serve to protect the environment of trust created by this Honor System. The Promotion Committees periodically evaluate each student's performance with special attention to work and conduct appropriate for professional practice. The Honor Council serves to educate members of the student body about their responsibilities as outlined in the written code; to conduct investigations and hearings regarding reported violations of the code; and to decide the nature of penalties deemed appropriate for such violations. Decisions reached by the Honor Council do not preclude the discussion of reported violations by the Promotion Committees, as the Committees may examine these incidents in the larger context of a student's general performance.

The School of Medicine Honor Code

All students pledge to conduct themselves honorably, professionally, and respectfully in all realms and aspects of medical education and patient care. Under the Honor System, the student pledges that he or she neither gives nor receives unauthorized aid nor leaves unreported any knowledge of such aid given or received by any other student. Unauthorized aid includes the use of any examinations from previous semesters that have not been pre-approved by the course director and made readily available to all other students taking the course. This pledge applies to all course work, examinations, presentations, or any other activities required for the awarding of any of the graduate degrees offered by the school. This pledge encompasses all clinical work involving patient care and representations of patient care information. Any student taking a course in the School of Medicine, regardless of where registered, is under the jurisdiction of the Honor Council of Vanderbilt University School of Medicine (VUSM) and subject to the penalties it may impose.

Constitution

Article I—Name

The name of the council shall be the Honor Council of Vanderbilt University School of Medicine.

Article II—Purpose

1. To receive and evaluate evidence of Honor Code violations and to assure against false accusations.
2. To determine guilt or innocence.
3. To forward to the dean of the School of Medicine appropriate penalties for the guilty.

Article III—Membership and Officers

1. A faculty member shall be appointed by the dean of the School of Medicine as the Honor Council adviser. His/her roles include ensuring that all the rules are followed. In the case of an accusation, he/she will decide with the co-chairs of the Honor Council whether there is sufficient evidence to proceed with a trial after a formal investigation has been carried out.
2. The Honor Council of the School of Medicine shall be composed of representation from all degree-granting graduate programs under the administrative charge of the school. Currently, this includes Doctor of Audiology (Au.D.), Master of Education of the Deaf (M.D.E.), Master of Science–Speech-Language Pathology (M.S.-S.L.P.), Doctor of Medical Physics (D.M.P.), Master of Science in Medical Physics (M.S.M.P.), Master of Public Health

School of Medicine

(M.P.H.), Master of Science in Clinical Investigation (M.S.C.I.), Master of Science–Applied Clinical Informatics (M.S.-A.C.I.), Master of Genetic Counseling (M.G.C.), and Doctor of Medicine (M.D.). Any new graduate degree programs created within the school will become eligible by sufficient enrollment, as stipulated below.

3. The minimum student enrollment limit for a single graduate degree program to be eligible to elect an Honor Council representative is ten. If a program falls below that number, it will not be eligible to have a representative. It will regain eligibility when its enrollment reaches a minimum of ten students. However, some of the programs are closely affiliated; if, in the judgment of the program director(s) of these programs, there is sufficient overlap in required courses, these programs may be thought of as a unit (a.k.a., “affiliated degree programs”) for purposes of Honor Council representation. In these cases, the degree programs will be grouped for representation purposes, and allowed to elect an Honor Council representative on behalf of the affiliated degree programs. Current affiliated degree programs are the Au.D., M.D.E., and M.S.-S.L.P. programs, which will elect two representatives from their combined student cohorts, and the D.M.P. and M.S.M.P. programs, which will elect one representative from their combined student cohorts. All other non-M.D. programs will elect one representative. The M.D. program will follow its traditional practice of electing two representatives from each of the four classes.
4. In the non-M.D. programs, students will vote for Honor Council candidates within their own graduate program or affiliated degree programs. In the M.D. program, students will vote for Honor Council representatives within their own medical student class. Honor Council representatives are elected for one-year terms.
5. Honor Council members will select their own co-chairs. Two co-chairs will be elected from the M.D. program Honor Council representatives, for which all Honor Council representatives will vote, and one co-chair will be elected from the non-M.D. Honor Council representatives, for which all Honor Council representatives will vote. In both cases, co-chairs will be elected by simple majority. Co-chairs are elected for one-year terms and must have served at least one year on the council to be eligible.
6. Voting for Honor Council representatives will be completed no later than April 1 of each year. The new Honor Council will convene to elect its co-chairs no later than April 30. It is the duty of the outgoing Honor Council co-chairs to assure a successful transition. The exception for the April 1 deadline for election of representatives is for incoming medical students who will elect their representatives in September, and for the entering cohort of students in any one-year degree programs, as long as there are at least ten enrolled students in that program.

Article IV—Duties of Officers

1. It shall be the duty of the co-chairs to preside at all meetings of the Honor Council, to arrange for the hearing of any student accused, and to perform all duties common to their office.
2. The co-chairs shall keep full minutes of all meetings and full proceedings of all hearings, which must be kept in permanent. The co-chairs shall notify all members of all hearings, meetings, and retreats and shall perform any other related duties. These responsibilities will be rotated among the three co-chairs throughout the year.
3. Honor Council representatives for each program, together with the co-chairs, will have primary responsibility for conducting an annual program to educate their fellow students about the Honor Council and its processes, and for assuring the timeliness of elections. Program directors and the Honor Council faculty adviser will act in a supportive and advisory capacity.

Article V—Meetings

1. One regular meeting shall be held within four weeks of the start of the school year. At this meeting, the co-chairs of the Honor Council and the faculty adviser will explain the duties and procedures of the Honor Council to the
2. Special meetings may be called by the co-chairs at any time and must be called within ten working days when requested by two or more members of the Honor
3. All meetings shall be conducted according to *Roberts Rules of Order, Newly Revised*.
4. A meeting by the Honor Council to re-evaluate and review the Honor Code should be convened a minimum of every four years.

Article VI—Quorum

A quorum for an Honor Council hearing concerning a violation of the Honor Code is nine. This quorum may be adjusted by the co-chairs in circumstances in which students recuse themselves because the hearing concerns a faculty member who is, or will be, in a supervisory position over them. The absolute minimum for an Honor Council quorum shall be seven. In rare circumstances when a quorum is otherwise unavailable, the senior associate dean for health sciences education will appoint a temporary student member or members to assure a quorum is present to meet the timeline requirements for due process.

Article VII—Hearings

School of Medicine

1. A hearing shall be called by the co-chairs of the Honor Council, if appropriate.
2. The accuser and the accused must be present at all hearings during the presentation of evidence and the accused has a right to question the accuser and any witnesses and make a statement to the Council.
3. Legal counsel will not be allowed for any party at a hearing, but the accused may have present a character witness or non-legally trained faculty adviser if he or she so chooses.
4. Any member of the Honor Council related by birth or marriage to the accused or the accuser or who has any other personal interest in the hearing shall relieve himself/herself from participation in that hearing.
5. The proceedings of the hearing are Any member present at a hearing is not at liberty to discuss its proceedings with anyone other than the members of the Honor Council present at the hearing or other persons with a legitimate need to know, e.g., law enforcement agents.
6. In the event a hearing concerns a charge against a graduate student, a medical student or a faculty member who is in a supervisory role for any Honor Council members, those members shall recuse themselves from participation in the hearing.
7. Upon completion of the review of evidence, the Honor Council in closed executive session shall reach a decision of "guilty" or "not guilty" of violation of the Honor Code by simple majority vote. The Honor Council shall make its determination using an evidentiary standard of "beyond a reasonable doubt." The co-chairs have a vote in all decisions unless contraindicated by *Roberts Rules of Order*.
8. Written notice of the Honor Council decision will be sent to the accused and to the dean of the School of Medicine. The dean will also receive the vote count, a written summary of the case, and an oral report of the case from the co-chairs. The Promotion Committee will not be notified unless a verdict of "guilty" has been found. In the case of a "guilty" verdict, the Promotion Committee will receive a written summary of the proceedings. The written summary also will be kept in the permanent records of the Honor Council.
9. When the Honor Council reaches a decision of "guilty," the penalty, representing the majority opinion of the Honor Council, shall be sent to the dean of the School of The recommended penalties should conform to the severity of offenses and may include expulsion from the School of Medicine, and may also include lesser penalties such as failure of a course, or suspension for a designated period of time.

Article VIII—Publicity

1. Each new student entering the School of Medicine will be informed by the Honor Council as to the functions of the Honor System and his or her obligations to the Honor Each student will be provided a copy of the Constitution and Bylaws of the Honor System and the Honor Code.
2. At the commencement of each academic year, all students shall reaffirm their commitment to the honor system by signing the Honor Code.
3. Names of the members of the Honor Council will be made known to all students upon commencement of each academic year. The Honor Council members will be accessible to any student to address concerns or questions regarding protocol, violations, or other Honor Council issues.

Article IX—Miscellaneous

In case a student withdraws from the School after a charge has been made against him or her and before the hearing, the Honor Council shall record the facts and the accused shall not be allowed to re-enter until he or she has had a hearing before the Honor Council.

Article X—Amendments

Amendments to this Constitution shall require for their adoption the approval of a majority of the total membership of the Honor Council and ratification by a majority of the voting student body. These amendments must be approved by the dean of the School of Medicine and the faculty adviser before becoming final.

Bylaws

Article I—Reporting an Incident

1. If a student or an instructor has reason to believe that a breach of the Honor Code has been committed, he/she must, within seven class days, report the incident in signed written form in one of the following ways:
 1. Directly to one or both of the co-chairs of the Honor Council, or
 2. By way of the faculty adviser who will notify the co-chairs of the Honor Council, or
 3. To any member of the Honor Council, who will report directly and only to either the co-chairs or the faculty adviser.
2. Failure to take action on an incident is a breach of the Honor Code. Students are required to report in writing any suspected violations of the Honor Code.
3. Once an incident is reported, it shall be the responsibility of the Honor Council, not the student or instructor,

School of Medicine

to investigate the incident and determine the next course of action. The student or instructor who reports a violation is charged with maintaining confidence of his or her accusation; the accused is also required to maintain the confidence of the accusation and the Such confidence can be broken only as required in response to law enforcement agencies and to assure access to appropriate advice.

4. Perjury before the dean or any Honor Council member regarding the reporting of or investigation into an incident is a breach of the Honor Code and is subject to punishment.
5. Once an incident has been reported, the co-chairs and the faculty adviser will meet to discuss the The co-chairs shall appoint a committee of two members from the Honor Council to investigate the case and report their findings to the faculty adviser and the co-chairs. These two members shall be ineligible to vote in the event the Honor Council is convened. At the conclusion of the investigation, the co-chairs and faculty adviser will then decide whether to convene the Honor Council. If the decision is made to convene the Honor Council, the student in question will be notified that he/she has been formally accused of a violation of the Honor Code. The Honor Council should be convened within ten class days from the initial reporting of the incident. Both the accuser and the accused will be notified of the nature of the charge as well as the time and place of the assembly of the Honor Council.
6. Once the Honor Council is assembled, the accusation will be presented by the co-chairs, and a hearing will be held by the Honor Council.
7. A student who reports his or her own Honor Code violation will be given consideration for his or her initiative in self-reporting the transgression. The co-chairs, with advice of the faculty adviser, will decide if an investigation is warranted.

Article II—Penalties

1. Penalties given to those declared “guilty” will be recommended by the Honor Council and enforced by the dean of the School of Medicine as he/she sees fit. The final decision and penalty will be reported by the dean to the student involved, to the reporting individual, and to the Honor Council.
2. Penalties may range from the minimum of failure of the assignment to the maximum of expulsion from Vanderbilt University School of Medicine.
3. If the violation was committed under extenuating circumstances, the Honor Council may, by a majority vote, recommend a suspension of the sentence. However, suspension of the sentence shall in no way alter the findings of “guilt” under the Code.

Article III—Appeals

Appeals to any final actions that result from Honor Council hearings can be made with a petition to the Vanderbilt University Appellate Review Board as follows:

1. The appeal petition must be in writing.
2. It must specify the grounds for appeal.
3. It must be filed within seven class days of the original notification of the verdict or within two weeks if school is not in session for seven days following the notification.

Article IV—Summer Honor Council

1. The Summer Council will have official functions from the day following university Commencement exercises until the day class registration begins for the fall semester.
2. In the event that a designated member will not be in Nashville during the summer, the respective program representative should appoint a member of his/her class who will be in Nashville, to be approved by the Honor Council.
3. In the event that both co-chairs will not be in Nashville during the summer, then the faculty adviser should recommend a chair from the members of the Honor Council, subject to Honor Council approval.

Standard of Behavior for Interactions with Vanderbilt University School of Medicine Students

Standard of Behavior for Interactions with Vanderbilt University School of Medicine Students¹

Statement of Standards

All faculty and staff involved with educating Vanderbilt University School of Medicine students are held to high standards of professionalism and patient care. The learning environment is expected to facilitate students’

School of Medicine

acquisition of the professional and collegial attitudes necessary for effective, caring, and compassionate health care. The development and nurturing of these attitudes requires mutual respect between teachers (including faculty, residents, and staff) and students, and between each student and his or her fellow students.² Mutual respect between student and teacher, and between fellow students, may be expressed in many ways but all interactions shall include honesty, fairness, and evenhanded treatment. Behavior that is inimical to the development of mutual respect shall be prohibited. Such behavior may include but is not limited to:

- Harassment of a sexual nature;
- Discrimination or harassment based on race, sex, religion, color, national or ethnic origin, age, disability, military service, sexual orientation, or gender identity.
- Grading, promoting, or otherwise evaluating any student on any basis other than that student's performance or merit.

¹ All Vanderbilt University policies concerning VUSM student interactions with faculty and staff as set forth in the Vanderbilt University Student Handbook, the Faculty Manual, and any other Vanderbilt University publication remain in full force and effect.

² By their express terms, these Standards apply only to interactions which involve one or more students; however, it is hoped that these Standards serve as a guide to all members of the Vanderbilt University School of Medicine community, in all workplace interactions. The reporting procedure outlined herein shall apply only to allegations of the violation of these Standards in interactions involving VUSM student(s).

Comments

The following delineates more clearly the behavior enumerated above that may be inimical to the development of mutual respect between students and teacher, and between fellow students. For purposes of these Comments, the term "person" shall refer to a student in interactions between fellow students or, in student-teacher interactions, to the student or teacher, as appropriate.

- Harassment of a sexual nature may include:
 - Denying the opportunity for training or rewards because of a student's gender;
 - Requesting sexual favors in exchange for grades or other awards;
 - Making unwanted sexual advances;
 - Unreasonable and inappropriate sexual or sexist conduct directed towards any person;
 - Displaying in an unreasonable and inappropriate manner sexually suggestive or pornographic materials; or
 - Grading or evaluating a student based upon gender rather than performance or merit.
- Discrimination and harassment may include:
 - Denying the opportunity for training or rewards because of a student's age, race, religious affiliation, gender, or any other attribute of the student other than merit or performance;
 - Unreasonable and inappropriate conduct directed towards any person which is intended to insult or stigmatize that person;
 - Exclusion of a student from any usual and reasonable expected educational opportunity for any reason other than as a reasonable response to that student's performance or merit;
 - Requiring a student to perform personal services such as shopping or babysitting;
 - Showing favoritism among students based upon any attribute of the student(s) other than performance or merit and thereby reducing educational opportunities available to the nonfavored student(s);
 - Grading or evaluating a student based upon any attribute of a student other than that student's performance or merit;
 - Any physical mistreatment, such as hitting, slapping or kicking, or threatening such physical mistreatment; or
 - Requiring a student to perform menial tasks with the intent to humiliate the student.

Any perceived violation of these Standards of Behavior ("Standards") should be reported in accordance with the following procedure. Violations of these Standards may subject the offender to disciplinary action. These Standards may be amended at any time by the Executive Faculty. The Standards Committee shall be composed of such members as the dean shall appoint from time to time. In cases where there is a potential conflict between the Standards and university policy, university policy prevails.

Reporting Procedure

When a student feels that he or she has been mistreated, the student is encouraged to report the incident to university and/or medical school officials through a variety of reporting mechanisms (these include RISE, Veritas, Origami, trained faculty members, and the Vanderbilt University Title IX office). Students are provided information

School of Medicine

about resources for such reports during orientation. When the mistreatment involves an allegation of discrimination and/or harassment, including sexual misconduct and/or intimate partner violence, Vanderbilt University faculty and staff members must report the incident to the Vanderbilt University Title IX office. If there is a report of sexual misconduct and/or intimate partner violence involving a student, the Sexual Misconduct and Intimate Partner Violence Policy, which can be found in the *Vanderbilt University Student Handbook* (vanderbilt.edu/student_handbook/sexual-misconduct), applies to all Vanderbilt students, including students in the School of Medicine. Please consult that policy for more information.

The Standards of Behavior for Interactions with Students in the Vanderbilt University School of Medicine policy was reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

VUSM Compact Between Teachers and Learners in VUSM Programs

Preamble

As a community of teachers and learners, we acknowledge the fundamental importance of our professional values in creating and maintaining an environment that promotes the highest standard of learning and the highest quality of research, service and patient care. The following principles characterize this environment and guide us in making daily decisions: Respect, Service, Integrity, Accountability, Scholarship, and Compassion. Recognizing that in an academic community we are teachers and learners simultaneously, we make the following commitments with the understanding that each applies to all of us, regardless of our status, whether faculty, resident, clinical staff, or student.

Commitments of Teachers

- We will respect students, colleagues, staff and patients as individuals.‡
- We will strive to provide the highest quality instruction, by preparing adequately for all teaching sessions, using evidence-based content, arriving on time, and admitting any gaps in We will strive for continuous improvement in our teaching efforts by responding to feedback and evaluation.
- We will demonstrate respect for our learners by turning off cell phones and silencing pagers during sessions we teach, unless they are required for service responsibilities.
- We will clearly express learning objectives for all courses and teaching sessions, and understand how these promote the learning objectives of the school. We will clearly define any specific academic and behavioral expectations for our classes.
- We will be aware of institutional and national policies, such as duty hours, and make sure that our expectations are consistent with those policies.
- We will assign tasks that are appropriate for the stage of learning, level of responsibility, and status as If an assigned clinical task conflicts with the personal ethics of a learner, we will discuss this with the learner and attempt to resolve the conflict in a manner that respects the learner while placing priority on the interests and well-being of the patient. We will seek not to require our learners to take actions inconsistent with their personal values.
- We will recognize the responsibilities implicit in our roles as mentors and coaches, and in the spirit of cultivating excellence in our learners, provide timely and constructive feedback.
- We will recognize our status as role models, and in our interactions with patients, staff, students, and colleagues, we will exhibit the same standard of professional behavior that we expect from others.
- We acknowledge that the teacher-learner relationship is a model for the clinician-patient relationship, and will strive to know our students as individuals, answer their correspondences promptly, exercise concern for their well-being, and treat them with compassion.
- We will respect the intellectual property of others and will use online resources, such as VSTAR and Brightspace, in a manner that is consistent with that respect.
- We will demonstrate honesty and integrity in all academic endeavors, including examinations, research efforts, and patient care entries.
- We will strive to create a culture of This culture includes evaluation for disclosure, event analysis, and process change when a safety concern is identified.

Commitments of Learners

- We will respect students, colleagues, staff, and patients as individuals‡
- We will strive for excellence in attaining the knowledge, attitudes, and skills needed for the highest standards

School of Medicine

of practice.

- We will attend all learning sessions designated as required by our programs' We will demonstrate respect towards teachers and peers by arriving on time, turning off cell phones, silencing pagers, and complying with other specific expectations defined by the faculty.
- We will wear appropriate attire. In the classroom setting, our attire should not cause distraction. In practice settings, it should comply with the standards published by the institution.* We will adhere to any additional attire requirements of our programs and courses.
- We will work effectively in teams, respecting the contributions of all members, assuming a fair share of responsibility, and performing leadership tasks with a sense of service to others.
- In practice settings we will acknowledge and seek help if assigned a task that is beyond our level of If an assigned task conflicts with personal ethics, we will discuss this with the supervising faculty or staff member and strive to reach a resolution that places priority on the interests of the patient.
- We will recognize our obligations as a collegial community, sharing knowledge and assisting peers in their quest to achieve professional and personal goals. We will assist our colleagues in distress.
- We will establish the habit of critical reflection, acknowledge gaps in our knowledge, recognize our limitations, and strive for constant self-improvement.
- We will respect the intellectual property of others and will use online resources, such as VSTAR and Brightspace, in a manner that is consistent with that respect.
- We will demonstrate honesty and integrity in all academic endeavors, including examinations, research efforts and patient care entries.
- We will strive to create a culture of safety. We will accept responsibility for errors and near-errors by disclosing them, analyzing them and implementing changes that would prevent similar events in the future.
- In the spirit of continuous quality improvement, we will accept the responsibility of constructive evaluation of our courses and teachers.

The VUSM Compact Between Teachers and Learners in VUSM Programs policy was reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Faculty/Educator Roles

Policy on Multiple Roles

Many VUSM faculty members hold multiple roles in our education program, and we believe that our students benefit from rich relationships with various supportive faculty members. However, faculty members engaged in multiple educational roles can face competing demands, which may directly or indirectly affect (or have the appearance of affecting) an individual's professional judgment in exercising any educator duties and responsibilities.

Of particular concern to students is the intersection of roles involving advising students regarding personal or academic struggles with roles in assessment of student performance or assigning grades. Because not all conflicts can be eliminated, it is necessary to establish a plan for managing and minimizing conflict.

Conflict management typically involves ensuring that any individual in an advising role does not serve as the sole assessor of students in any required course. During the academic year, when individuals are proposed for new roles, assignments are reviewed for potential conflicts. Conflict management plans are created by faculty members involved and are reviewed and maintained by the associate dean for undergraduate medical education (M.D. program) and program director (other VUSM degree programs).

Policy on VUSM Faculty Supervising Family

It is the policy of Vanderbilt School of Medicine that students may not be supervised or graded by a parent or family member.

Policy on VUSM Educators Providing Student Health Care

Vanderbilt University Medical Center physicians occasionally provide clinical care for Vanderbilt students. Some of these faculty members also teach and assess students in the classroom or clinical setting. Should a situation arise in which a Vanderbilt faculty member finds himself/herself in a dual role as care provider and as a teacher/assessor of a Vanderbilt student, he/she must recuse himself/herself from either the teacher/assessor role or the care provider role. Examples of such situations include faculty serving as small group leaders in a course, or as team leaders for clinical learning experiences. Furthermore, if a Vanderbilt faculty member serves as a course or clinical learning experience director, placing him/her in a teacher/assessor role with students in a degree program, he/she should not accept as patients any students in that program.

In order to ensure sufficient sensitivity to the privacy of medical students' electronic health records, their records are equipped with an additional reminder to physicians and other providers regarding the sensitivity of their health records.

When a student has a pre-existing therapeutic relationship as a patient of a faculty member who directs a course or clerkship, the patient-provider relationship should not be disrupted. In these situations, the faculty member must discuss the situation with the student and arrange for an alternative means of assessment in the course or clinical experience.

This arrangement would likely involve identifying a different faculty member to provide the assessment in the course or clinical experience. This policy serves to secure and protect the integrity of the learning environment at the School of Medicine. For questions regarding the implementation of this policy, please contact the senior associate dean for health sciences education.

The Faculty/Educator Roles policy was reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

School of Medicine

Expectations for Conduct Regarding Examinations and Work Submitted for Academic Credit

Faculty and Students' Responsibilities

1. In order to create and maintain an academic environment that promotes the highest professional standards, it is important to be transparent in the expectations of all students regarding conduct in examination settings and regarding all work submitted for academic credit. As stated in the Vanderbilt School of Medicine Honor Code, "By demanding great responsibility, the Honor System fosters an environment of freedom and trust that benefits the entire Medical School." It is the responsibility of the faculty and staff to help protect the trusting environment created when the students agree to and sign the Honor Code pledge.
2. Students are expected to adhere to the VUSM Compact Between Teachers and Learners in VUSM Programs in all courses. In order to facilitate transparency of expectations, students are apprised of any course-specific expectations on the first day of class or during the first week that a course meets.
3. Appropriate attribution is expected for all work submitted for credit and in all entries to the electronic health record. Students must use proper citation practices and are expected to be aware of appropriate mechanisms to avoid plagiarism. Faculty clarify if an assignment may be collaborative.
4. It is the student's responsibility to be aware of and to adhere to the published guidelines for each course.
5. Incidents going before the Honor Council may be separately incorporated into the competency domain assessment and promotion committee review process as appropriate.

The Expectations for Conduct Regarding Examinations and Work Submitted for Academic Credit policy was reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Academic Calendar

School of Medicine Calendar 2022/2023*

FALL SEMESTER 2022**

Classes/clinicals begin for 3rd- and 4th-year M.D. students / Tuesday 5 July
Classes continue for 2nd-year M.D. students / Friday 1 July

Orientation for 1st-year M.D. students / Wednesday 13 July–Friday 15 July
Classes begin for 1st-year M.D. students / Monday 18 July

Fall semester begins for master's and doctoral programs (other than M.D.) / Wednesday 24 August

Labor Day—No classes or clinical activities for M.D. FMK and FCC phase students only. All other M.D. students have usual classes and clinical activities. No classes or clinical activities for master's and doctoral degree programs (other than the MD). / Monday 5 September

Fall break for most master's and doctoral programs (other than M.D.), except Master of Public Health and Master of Genetic Counseling (2nd year only) / Thursday 13 October–Sunday 16

October Wellness Days for 1st-year M.D. students / Saturday 15 October–Tuesday 18 October

Thanksgiving holiday for master's and doctoral programs (other than M.D.) / Saturday 19 November–Sunday 27 November

School of Medicine

Thanksgiving holiday for all M.D. students / Thursday 24 November–Sunday 27 November

Fall classes end for most master's and doctoral programs (other than M.D.) / Thursday 8 December

Final exams end for most master's and doctoral programs (other than M.D.) / Saturday 17 December

Classes/clinicals end for all M.D. students / Friday 16 December

VUSM Administrative offices closed / Friday 23 December 2022–Tuesday 3 January 2023

SPRING SEMESTER 2023**

Classes begin for all M.D. students / Tuesday 3 January

Spring semester begins for most master's and doctoral programs (other than M.D.) / Monday 9 January

Martin Luther King Jr. Day—No class or clinical activities / Monday 16 January

Spring break for master's and doctoral programs (other than M.D.) / Saturday 11 March–Sunday 19 March, except Master of Public Health.

Spring break for 1st- and 2nd-year M.D. students / Saturday 22 April–Sunday 30 April

Spring classes end for most master's and doctoral programs (other than M.D.) / Monday 24 April Class/clinical ends for 4th-year M.D. students / Friday 28 April

Final exams end for most master's and doctoral programs (other than M.D.) / Thursday 4 May Commencement / Friday 12 May

SUMMER SESSION 2023**

May session begins for master's and doctoral programs (other than M.D.) and summer session begins for Master of Genetic Counseling and Master of Public Health / Monday 8 May

Memorial Day—No class or clinical activities / Monday 29 May

May session ends for master's and doctoral programs (other than M.D.) / Saturday 3 June

Full summer session begins for most master's and doctoral programs (other than M.D.) / Tuesday 6 June

Independence Day—No class or clinical activities for VUSM professional degree Programs / Tuesday 4 July

School of Medicine

Summer break for 1st-year M.D. students (Tentative) / Saturday 22 July–Sunday 20 August

Full summer session ends for master's and doctoral programs (other than M.D.) / Friday 11 August

*All dates are subject to change

** Programs other than the MD, check program calendars for exact class dates.

VUSM Tuition, Fees, and Financial Assistance

University and School of Medicine Policies

Tuition and fees are set annually by the Vanderbilt University Board of Trust and are subject to review and change without notice.

Tuition and Fees

Tuition and fee amounts for each program are listed in the corresponding program section of this catalog. Tuition, fees, and all other university charges incurred prior to or at registration are due and payment must be received by August 31 for the fall semester and December 31 for the spring semester (January 31 for the M.D. program). If courses are added *after* the initial billing period, it is the student's responsibility to contact the VU Office of Student Accounts for due dates and amounts related to tuition in order to avoid any holds and/or late payment penalties. All other charges incurred after classes begin are due and payment must be received in full by the last business day of the month in which they are billed to the student. Additional information can be found at vanderbilt.edu/stuaccts.

Refund of Tuition

Students who withdraw officially or who are dismissed from the University for any reason, after the beginning of a term, may be entitled to a partial refund in accordance with University policy, published on the Office of Student Accounts website at vanderbilt.edu/stuaccts/graduate/withdrawal-schedule.php. No refund is made after the date indicated in the University withdrawal schedule published on the VU Office of Student Accounts website. Because MD students have a full-year enrollment term but are assessed tuition in two equal parts (July and January), the published schedule applies to attendance after the July 1 and January 1 assessments.

Late Payment of Tuition and Fees

All charges not paid by the specified due dates may be assessed a late payment fee of \$1.50 on each \$100 owed (minimum late fee of \$5). No transcript (official or unofficial) will be issued for a student who has an outstanding balance. Diplomas of graduating students will not be released until all indebtedness to the university is cleared.

Financial Clearance

Students may not be allowed to register for any term if they have outstanding unpaid balances for any previous term. No transcript, official or unofficial, is issued for a student who has an outstanding balance until the account has been paid. Diplomas of graduating students may be withheld until all bills are paid.

International students must provide documentation of having funds sufficient to meet all tuition, mandatory fees, and living expenses for the anticipated period of enrollment before a visa is issued. More information is available through the VU Office of International Student and Scholar Services.

Tuition Billing for Dual Degree Students

Students pursuing two degree programs are typically classified as being enrolled in only one degree program each semester. Tuition and fees are charged each term based on the degree program in which they are enrolled that semester.

School of Medicine

Costs and Fees

AY 2022-23

The following costs are included with tuition: Professional liability insurance, student long-term disability insurance (pertains to M.D. students only), and verifications.

The university fees found at https://www.vanderbilt.edu/stuaccts/fees/tuition_fees_2022-23_medical.php and described below, are assessed individually and separate from tuition.

Student Services Fee

The university-required student services fee entitles students to use the facilities of Sarratt Student Center and the David Williams II Student Recreation and Wellness Center. The fee also covers admission to certain social and cultural events and subscriptions to certain campus publications. Specific information on this fee is published annually in [Vanderbilt University Student Handbook](#). By payment of an additional fee, students and their spouses may use their identification cards for admission to athletic events.

Professional Liability Insurance

School of Medicine students enrolled in programs that require clinical/patient care responsibilities are automatically covered with professional liability insurance, required of all enrolled students, at the time of registration. Details of the policy are available through [Vanderbilt University Insurance and Risk Management](#), and students are encouraged to familiarize themselves with these details and with their responsibilities in this regard.

Students are covered when they are completing required and elective learning activities related to their courses of study at the Vanderbilt-affiliated hospitals (e.g., Vanderbilt University Medical Center or Nashville Veterans Administration Hospital) or elsewhere as a “visiting student,” providing that (1) the clerkship or other educational experience has prior approval from the School of Medicine as course work for credit, (2) the activities within this experience are consonant with the student’s level of training and experience and are performed under the supervision of appropriate faculty and/or staff, and (3) an academic/clinical affiliation agreement has been executed by both Vanderbilt University and the host institution.

Long-Term Disability Insurance

M.D. students are automatically covered with long-term disability insurance, required of all enrolled medical students, at the time of registration. Details of the policy can be found at medschool.vanderbilt.edu/md-gateway/insurance/.

Student Health Insurance

All degree-seeking students registered at Vanderbilt for four (4) or more hours, or who are actively enrolled in research courses (including, but not limited to dissertation or thesis courses), are required to have adequate health insurance coverage. The University offers a sickness and accident insurance plan through Academic Health Plans that is designed to provide hospital, surgical, and major medical benefits. Students are automatically enrolled in and billed for the University-endorsed policy unless they complete an online waiver by the applicable deadline. Additional information is available at <https://vanderbilt.myahpcare.com/>.

Student Health Fee

This university-required fee provides enhanced support for VU areas serving the health needs of VU students, including the University Counseling Center, the Office of Student Health and the Office of Student Care Coordination.

Transcript Fee

All students entering Vanderbilt for the first time are charged a one-time transcript fee for official university transcripts, usually in the first semester of enrollment.

School of Medicine

Verification Costs

Verification costs cover all required verification processes including criminal background checks and drug screens.

Financial Assistance

Approved educational expenses may be met with funds from a combination of sources, including scholarships (from VU and non-VU sources) and student loans. Federal Direct Unsubsidized Loans and Federal Direct Graduate PLUS loans are two federal government loan programs that furnish a significant amount of support to VUSM students.

Private loans are also available to international students. Additional information and applications for financial aid are online at medschool.vanderbilt.edu/financial-aid/. Applicants desiring more specific information about financial aid resources should contact the School of Medicine Office of Student Financial Aid. (medfinaid@vanderbilt.edu)

Federal Financial Aid Satisfactory Academic Progress

Federal Satisfactory Academic Progress standards (SAP) used to determine eligibility for federal student aid are separate from academic policies that the School of Medicine may require for degree completion. Students must be meeting SAP standards, as defined by the Office of Student Financial Aid and Scholarships, to remain eligible for federal Title IV student aid. The SAP policies for the School of Medicine are available at medschool.vanderbilt.edu/financial-aid/.

Financial Assistance for Dual Degree Students

Students pursuing two degree programs are typically classified as being enrolled in only one degree program each semester. Any scholarship funds awarded would be on the basis of the degree program in which the student was enrolled in a given term. Students do not receive scholarship funds for one degree program while enrolled in another VU degree program.

Master of Imaging Science

The objective of the master of imaging science is to provide innovative and comprehensive education across the full range of biomedical imaging science to create a cohort of graduates prepared to assume leadership roles in applying imaging in academic, clinical, and industrial settings. Full-time students will be able to complete the program in 12 months, and will engage in traditional coursework, seminars, practical laboratories, and an intense research project.

The program is offered under the aegis of the Vanderbilt University Institute of Imaging Science and School of Medicine, and was created in response to the growing recognition of imaging science as a distinct specialty in biomedical research and clinical care. Imaging provides unique information about tissue composition, morphology and function, as well as quantitative descriptions of many fundamental biological processes. Hence, it has attained a position of central importance in much biomedical research and evaluation of clinical interventions and precision medicine. The program will address the need for imaging scientists trained in multiple techniques and modalities, knowledgeable about the ideas that are common to all imaging, and able to develop new applications of imaging in biology and medicine. These individuals must be able to understand and formulate connections between the technical aspects of imaging in multiple modalities and the information that imaging may provide on physiology, biological structure, metabolism, and cellular and molecular processes.

Graduates of the M.I.S. program will:

- Develop the ability to implement technical advances in one or more specific modalities.
- Understand the uses and practical limitations of the major imaging modalities in use today. They will understand the fundamental principles of image formation, contrast mechanisms, and image analysis for each modality.
- Apply expertise in the use and interpretation of multiple imaging modalities in preclinical and/or clinical applications, as well as current research directions.

Applicants should have an undergraduate baccalaureate degree in a basic, applied, biological, physical, computer,

School of Medicine

or social-behavioral science from an accredited university. Mathematical aptitude and basic programming skills are highly encouraged. Our own experiences confirm that students from backgrounds in physics, chemistry or engineering are successful as imaging scientists after appropriate training.

Applicants will be required to submit the following information:

1. Documentation of completed undergraduate degree, and transcripts showing a minimum final GPA of 3.0.
2. TOEFL/IELTS scores (less than 2 years old) required for applicants whose native language is not English. This requirement is waived for students who have completed one year of full-time study with a minimum GPA of 3.0 in an accredited university in the United States.
3. Statement of intended course of study (i.e., full-time or part-time enrollment)
4. Statement of Purpose, including connection to any research experience (1-page limit)
5. Letters of Recommendation (two minimum)
6. Application Fee

Additionally, General Graduate Record Examination (GRE) or Medical College Admission Test (MCAT) scores are recommended, but not required. In cases where the background in math or computing is not clear from the transcript, applicants should clarify what education they have had in calculus, vector or linear algebra and other topics in mathematics and/or computing.

The program is unable to accept international students at this time, but this condition may change and applicants can contact the program to determine the current eligibility requirements. Permanent residents (green card holders) are eligible. Non-native speakers must demonstrate English proficiency with minimum scores:

Paper based TOEFL: 550

Computer based TOEFL: 213

Internet based TOEFL iBT: 80

IELTS: 7

Official GRE/TOEFL/IELTS Scores: Scores should be sent to Vanderbilt University School of Medicine, institution code 1871. A department code is not required.

Courses by Program

Courses by Program

This listing describes coursework offered by The School of Medicine toward the following degree programs: Doctor of Medicine, Doctor of Audiology, Doctor of Medical Physics, Master of Education of the Deaf, Master of Genetic Counseling, Master of Science (Speech-Language Pathology), Master of Science in Medical Physics, Master of Science in Clinical Investigation, Master of Public Health, and Master of Science (Applied Clinical Informatics). Courses in the School of Medicine are offered in semester, modular, and year-long formats. Courses leading to the M.D. do not carry credit hours; other programs use the traditional credit hour designation. The university reserves the right to change the arrangement or content of courses, to change texts and other materials used, or to cancel any course on the basis of insufficient enrollment or for any other reason.

About the School

The Vanderbilt University School of Medicine administers degree and graduate certificate programs that provide students with the knowledge, skills, and attitudes they need to practice safe, effective, ethical, evidence-based, and patient-centered health care in the twenty-first century, and to contribute to the knowledge base supporting it.

Mission of the School of Medicine

The school's mission includes the education of physicians at all levels of their professional experience: medical school; postgraduate education, including basic science and clinical training; and continuing education and professional development for the practicing physician. In addition several master's level and two additional doctoral degrees in health care professions are offered.

Faculty members teach the practice of exemplary patient care at all levels; model programs of health care delivery, at primary, secondary, and tertiary levels; and fulfill the school's responsibility for community service.

In addition to teaching, members of the medical school faculty have a complementary responsibility to generate new knowledge through research. At Vanderbilt, research encompasses basic scientific questions, issues in clinical care, questions related to the health care system, and scholarship in the medical education process itself. Vanderbilt is recognized as one of the leaders in research among medical schools in the United States.

Vision of the School of Medicine

The vision of Vanderbilt University School of Medicine is to shape a future in which all persons reach their full health potential.

The core values of Vanderbilt University School of Medicine are integrity, inclusion, humility, equity, mutual respect, and excellence.

The mission of Vanderbilt University School of Medicine is to catalyze the advancement of impactful discovery, servant leadership, and lifelong learning.

In order to carry out this mission, we make these strategic commitments:

- To nurture the growth of clinicians, scientists, and educators who will serve and lead their local, national and global communities.
- To create, implement, and disseminate new knowledge that expands understanding of health, disease, and health care systems.
- To teach, learn, and provide compassionate, personalized caring of the highest quality for every patient who seeks our service and to strive to achieve health equity in the populations we serve.
- To embrace a culture of lifelong learning, critical thinking, and innovation so that we continuously improve in all we do.
- To build a diverse community of faculty, staff, and students that expands the richness of our learning environment and enhances excellence in all of our endeavors.
- To cultivate a caring atmosphere and workforce that seeks to eliminate structural racism, promote justice, and establish equity in all endeavors.

The Vanderbilt University School of Medicine Vision and Mission of the School statement was reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 16, 2021.

History of the School

School of Medicine

The first diplomas issued by Vanderbilt University were to sixty-one doctors of medicine in February of 1875, thanks to an arrangement that recognized the University of Nashville's medical school as serving both institutions. Thus, Vanderbilt embraced a fully-organized and functioning medical school even before its own campus was ready for classes in October of that year.

The arrangement continued for twenty more years, until the school was reorganized under control of the Board of Trust. In the early days, the School of Medicine was owned and operated as a private property of the practicing physicians who composed the faculty and received the fees paid by students—a system typical of medical education in the United States at the time. Vanderbilt made no financial contribution to the school's support and exercised no control over admission requirements, the curriculum, or standards for graduation. After reorganization under the Vanderbilt Board in 1895, admission requirements were raised, the course was lengthened, and the system of instruction was changed to include laboratory work in the basic sciences.

The famous report of Abraham Flexner, published by the Carnegie Foundation in 1910 and afterward credited with revolutionizing medical education in America, singled out Vanderbilt as “the institution to which the responsibility for medical education in Tennessee should just now be left.” Large grants from Andrew Carnegie and his foundation, and from the Rockefeller-financed General Education Board, enabled Vanderbilt to carry out the recommendations of the Flexner Report. (These two philanthropies, with the addition of the Ford Foundation in recent years, have contributed altogether more than \$20,000,000 to the School of Medicine since 1911.) The reorganized school drew upon the best-trained scientists and teachers in the nation for its faculty. The full benefits of reorganization were realized in 1925 when the school moved from the old South Campus across town to the main campus, thus integrating instruction in the medical sciences with the rest of the university. The school's new quarters were called “the best arranged combination school and hospital to be found in the United States.”

In 1977, the School of Medicine moved to the newly completed Rudolph A. Light Hall, which served as the home for School of Medicine educational and administrative activities for 41 years. The seven-story structure, with its 209,000 square feet of space, offered the latest in laboratory equipment, audio-visual, and multi-purpose classroom space. Thousands of VUSM students, faculty and staff have considered Light Hall the home of the School of Medicine, given that it has served as such for the longest single period of the school's history.

Beginning in 1996, several new degree programs became a part of the School of Medicine. These programs span a wide array of health-related fields, including public health (1996), clinical investigation (2000), audiology (2002), medical physics (2002), laboratory investigation (2004-2020), education of the deaf (2006), speech-language pathology (2007), health professions education (2010-2016), applied clinical informatics (2015), genetic counseling (2017), and imaging sciences (2022).

Until April 2016, Vanderbilt University owned and operated several hospitals and clinics collectively known as Vanderbilt University Medical Center, including Vanderbilt University Hospital, Vanderbilt Psychiatric Hospital, and Monroe Carell Jr. Children's Hospital at Vanderbilt, and their associated clinics. Effective April 30, 2016, Vanderbilt University conveyed the clinical assets used in the operation of Vanderbilt University Medical Center to a newly formed, not-for-profit, tax-exempt corporation, which is similarly named Vanderbilt University Medical Center.

Vanderbilt University Medical Center now operates independently of Vanderbilt University. It is clinically and academically affiliated with Vanderbilt University.

In summer 2018, the primary location for Vanderbilt University School of Medicine administrative offices—as well as the classrooms, student lounge, and first-year student lockers for the M.D. program—moved from Light Hall to the Annette and Irwin Eskind Family Biomedical Library and Learning Center (EBL). This new home for the School of Medicine, occupying the second, third, and fourth floors of the EBL, provides a state-of-the-art learning environment, with versatile physical spaces and innovative technology; comfortable, modern gathering spaces

School of Medicine

for both formal and informal activities for students in the M.D. program; and a bright, airy working environment for School of Medicine faculty and staff. At the same time, Light Hall remains an important venue for learning and co-curricular activities for multiple VUSM degree and certificate programs.

Doctor of Medicine Admission: Policy on Application for Admission to the Doctor of Medicine Program

These policies were approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 28, 2022 and became effective AY 2022-23.*

This policy applies to Vanderbilt University School of Medicine Doctor of Medicine Program

Application to the Doctor of Medicine Policy

Vanderbilt University School of Medicine participates in the American Medical College Application Service (AMCAS). Applications are received online by AMCAS any time after 1 June and before 1 November preceding the anticipated enrollment date the next year.

The Interview Review Subcommittee evaluates AMCAS, secondary application, and letters of evaluation to decide which applicants are invited for an interview. Interviews are typically conducted at Vanderbilt between September and February. The Admission Committee evaluates the application materials and interview reports to decide which applicants are invited to join the entering class. The Admission Committee makes the final decision on acceptances. Invitations to join the class are typically made in December and February.

Vanderbilt does not participate in the Early Decision Program in AMCAS and does not have an Early Assurance Program.

A criminal background check is required after admission to the Doctor of Medicine program and must be received by the school before matriculation.

Application to Dual Degree Programs Policy

Vanderbilt University School of Medicine offers various dual degree programs. Application is made to each program separately, and admission to both programs is required to enter a dual degree program.

Transfer Students Policy

Transfer students are not accepted into the Doctor of Medicine Program at the Vanderbilt University School of Medicine.

**The Transfer Students Policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 27, 2021 and was published on July 19, 2021.*

Non-degree-seeking Students Policy

Non-degree-seeking students are not allowed to enroll in Doctor of Medicine course work offered by the School of Medicine.

**The Non-degree-seeking Students Policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 27, 2021 and was published on July 19, 2021.*

PROCEDURES

Application Procedure for Admission to Medical Scientist Training Program (M.D./Ph.D.)

School of Medicine

- A. Application to the M.D./Ph.D. program is indicated by selecting M.D./Ph.D. degree on the AMCAS application to Vanderbilt University School of Medicine followed by completion of the Medical Scientist Training Program (MSTP) secondary application.
- B. The application is reviewed by the MSTP Admission Subcommittee. Competitive applicants are invited to interview. The Admission Committee makes the final decision on acceptance to the M.D. Program.
- C. Students in the first year of Ph.D. training or in their first year of medical school may also be considered for admission.

Application Procedure for Admission to Oral and Maxillofacial Surgery—Doctor of Medicine Program (OMS-MD)

- A. Applications are accepted through the American Dental Education Association Postdoctoral Application Support Service (ADEA PASS) (www.adea.org/pass/). Applications are accepted from among only US citizens and US permanent residents.
- B. Applications are due by September 1 each year.
- C. Interview invitations are sent directly to selected candidates for September and October interviews. After interviewing, residents are matched via the Postdoctoral Dental Matching Program (natmatch.com/dentres/). Please see the OMFS admission website for more information on applying, at <https://www.vumc.org/deptoralmaxilsurgery/28484>.
- D. One OMS-MD trainee is admitted annually through the OMS residency selection process. The OMS department recommends the selected candidate to the Admission Committee. The Admission Committee makes the final decision on acceptance to the M.D. Program.

Doctor of Medicine Admission: Requirements for Entrance

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 28, 2022 and became effective AY 2022-23.

This policy applies to Vanderbilt University School of Medicine Doctor of Medicine Program

OVERVIEW

The Vanderbilt University School of Medicine Doctor of Medicine program seeks students with a strong background in both science and liberal arts who have their baccalaureate degree from an accredited institution before matriculation. Prospective applicants are encouraged to major in a topic of interest; a major in a non-science course does not affect selection.

POLICY FOR PROSPECTIVE STUDENTS Competency Recommendations

- A. Vanderbilt University School of Medicine (VUSM) recognizes that the undergraduate academic experience of applicants varies greatly. Therefore, we made the decision to move away from specific course requirements to competency recommendations. The expansive and ever-changing landscape of medicine and its practice necessitates that an applicant demonstrate competencies in the natural and life sciences, social sciences, and mathematics. This is based on the American Association of Medical Colleges (AAMC)-Howard Hughes Medical Institute's Scientific Foundations for Future Physicians and the AAMC-Behavioral and Social Science Foundations for Future Physicians.
- B. Competencies can be met through traditional and/or newly established interdisciplinary courses of study in an accredited institution of higher learning. The use of Advanced Placement or other credit is acceptable, but it is strongly encouraged to build stronger competencies through courses taken in college. Although there is no timeframe in which students must meet the competencies, it is recommended that students have recent exposures to most or all of these areas. Mastery of competencies is assessed through use of the AAMC holistic review of application materials including, but not limited to, academic and MCAT performance and letters of evaluation.
- C. Competitive applicants should demonstrate in-depth competency in each of the following areas of study, based on the American Association of Medical Colleges-Howard Hughes Medical Institute's Scientific Foundations for Future Physicians and AAMC-Behavioral and Social Science Foundations for Future Physicians:
 - a. *Biology*: Applicants should demonstrate competence in the understanding of molecular and cellular biology, genetics, and how they regulate organ and organismic structure and function.
 - b. *Chemistry/Biochemistry*: Applicants should demonstrate competence in the basic principles of chemistry as it pertains to living systems.
 - c. *Mathematics/Statistics and Physics*: Applicants should demonstrate competence in the basic principles of physics and mathematics underlying living systems. Applicants should demonstrate basic competence in statistics or biostatistics.

School of Medicine

- d. *Social Sciences and Communication*: It is imperative that the applicant demonstrate competence in the humanistic understanding of patients. It is required that the applicant speaks, writes, and reads English fluently.
- D. The faculty of the Vanderbilt University School of Medicine recognizes its responsibility to present candidates for the M.D. degree who have the knowledge and skills to function in a broad variety of clinical situations and to render a wide spectrum of patient care.

Medical College Admission Test

- A. The Medical College Admission Test (MCAT) is required of all applicants.
- B. The MCAT must be taken within three calendar years before submitting the AMCAS application.
- C. A complete, verified application including an MCAT score is required prior to rendering a decision on offering an interview.

Letters of Evaluation

- A. Vanderbilt University School of Medicine supports the movement for letters to cover the AAMC Core Competencies for Entering Medical Students and encourages applicants to solicit letters from evaluators who can address these competencies.

POLICY FOR ADMITTED STUDENTS

Admitted students must:

- A. Undergo a criminal background check
 - a. The AAMC recommends that all U.S. medical schools obtain a national and/or international background check on applicants upon their initial, conditional acceptance to medical school. In recognition of this recommendation, the AAMC has initiated an AMCAS-facilitated national background check service for individuals applying for entry to M.D. programs. For VUSM, the process is handled by the Director of Admissions in concert with the Criminal Background Check committee. Admitted students are required to notify the Director of Admissions of any arrests and the disposition of any outstanding charges within seven calendar days of the occurrence.
- B. Use the AAMC Choose Your Medical School (CYMS) Tool
 - a. Admitted students are required to indicate their Commit to Enroll in the AAMC CYMS Tool by the date specified by the Director of Admissions. Failure to comply may result in a rescinded offer of acceptance.
- C. Abide by the AAMC Applicant Protocols
- D. Agree to abide by the VUSM Honor Code
- E. Review the Technical Standards
 - a. All admitted students must review the Vanderbilt University School of Medicine Technical Standards and communicate any concerns about the content for application of these Technical Standards to the Director of Admissions or the Associate Dean for Medical Student Affairs prior to acceptance of a spot in class.
- F. Request a deferral prior to April 30th
 - a. Prior to April 30th, admitted students may seek a deferral.
 - b. After April 30th, admitted students may submit a request for the consideration of a deferral. These are typically only granted for unforeseen circumstances.

Doctor of Medicine Selection Factors

Vanderbilt University School of Medicine seeks to matriculate a diverse group of academically exceptional students whose attributes and accomplishments suggest that they will be future leaders and/or scholars in medicine. To accomplish this goal, VUSM provides a review of each candidate by multiple members of the faculty who are broadly representative of the faculty body. The committee uses a holistic approach to evaluate an array of applicant attributes, including academic excellence, personal characteristics, accomplishments in research, leadership, service to others, contribution to diversity (gender, race, ethnicity, sexual orientation, socio-economic background, geographic origin), demonstrated interest in medicine, and participation in extracurricular activities.

Medical Scientist Training Program (MSTP-MD/PhD) Admission

- A. All recommendations applicable to the Doctor of Medicine program apply to MSTP applicants as well. Please refer to the requirements outlined for the Doctor of Medicine program.
- B. Additional requirements include:
 - a. Strong motivation to pursue a career as a physician-scientist

School of Medicine

- b. Significant and substantial prior research experience outside of required laboratory courses
- c. Letters of Evaluation should address the applicant's qualifications for the Medical Scientist Training Program

Oral and Maxillofacial Surgery—Doctor of Medicine Program (OMS-MD) Admission

- A. All course recommendations applicable to the Doctor of Medicine program apply to OMS-MD applicants as well. Please refer to the requirements outlined for the Doctor of Medicine program.
- B. Additional requirements include:
 - a. Applicants must have passed Part 1 and Part 2 of the National Dental Board Examination
 - b. Applicants must have earned a D.M.D./D.D.S. degree or equivalent
 - c. Applicants must be a U.S. citizen or a permanent resident
 - d. Applicants must have demonstrated commitment to postgraduate training in oral and maxillofacial surgery.
- C. In addition, all applicants to the OMS-MD program are required to take the CBSE (Comprehensive Basic Science Examination) administered by the NBME. This examination is taken during or just prior to their final year of dental school.

Doctor of Medicine Admission: Technical Standards for the Doctor of Medicine

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on December 7, 2021 and became effective AY 2022-23.

This policy applies to the Vanderbilt University School of Medicine Doctor of Medicine Program.

Purpose

The purpose of this policy is to describe the technical standards for the Doctor of Medicine program.

Policy Overview

All candidates for the M.D. must possess the intellectual, physical, and emotional capabilities necessary to undertake the required curriculum in a reasonably independent manner, without having to rely on intermediaries, and that all students must be able to achieve the levels of competence required by the faculty to complete medical school and enter residency and clinical practice. Candidates for the M.D. must have abilities and skills in the following areas: observational skills; communication skills; motor skills; intellectual, conceptual, integrative, and quantitative skills; and behavioral and social skills. Technological compensation can be made for some limitations in certain of these areas, but candidates must be able to perform in a reasonably independent manner. The use of a trained intermediary is not allowable as this shifts the reliance of candidates' judgment from their own observation and prioritization to that of another.

Candidates must have sufficient sensory and motor function to independently gather information from patients by physical examination and observation. All candidates should be expected to perform basic laboratory tests (blood and urine analysis, etc.), execute diagnostic procedures (lumbar puncture, venipuncture, etc.), and interpret ancillary diagnostic data (EKGs and X-rays). Candidates should be able to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of physicians are cardiopulmonary resuscitation, the administration of intravenous medication, the application of pressure to stop bleeding, the opening of obstructed airways, the suturing of simple wounds, and the performance of simple obstetrical maneuvers. Such tasks and actions require equilibrium, the coordination of gross and fine muscular movements, and functional use of the senses.

These guidelines are reviewed annually. Any concerns about the content or application of these technical standards should be referred to the School of Medicine director of admissions, or the School of Medicine associate dean for medical student affairs.

Technical Standards *Observational Skills*

School of Medicine

Candidates must assimilate essential information as presented through demonstrations and experiences in the basic sciences. In addition, candidates must be able to:

- Observe a patient accurately and acquire relevant health and medical information, including written documents, images from the medical literature, slides and/or video.
- Interpret X-ray and other graphic images, and digital or analog representations of physiologic data (e.g., EKGs).

The required observation and information acquisition and analysis necessitate the functional use of visual, auditory, and somatic sensation. In any case where a candidate's ability to observe or acquire information through these sensory modalities is compromised, the candidate must demonstrate alternative means and/or abilities to acquire essential observational information.

Communication Skills

Candidates must be able to demonstrate proficiency in the English language such that they can communicate effectively in oral and written form with all members of the health care team. Candidates must be able to communicate with patients in order to elicit information. They must have the capacity for comfortable verbal and non-verbal communication and interpersonal skills, to enable effective caregiving of patients and collaboration within a multidisciplinary team. In any case where a candidate's ability to communicate is compromised, the candidate must demonstrate alternative means and/or abilities to communicate with patients and teams.

Motor Skills

It is required that candidates possess the motor skills necessary to complete and interpret the physical findings of patients. Such actions may require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch. In any case where a candidate's ability to complete and interpret physical findings because of motor skills is compromised, the candidate must demonstrate alternative means and/or abilities to retrieve these physical findings.

Intellectual-Conceptual Skills

Candidates must exhibit the requisite intellectual and conceptual skills to effectively interpret, assimilate, and understand the complex information required to function within our medical school curriculum. Effective participation in learning modalities, such as individual, small group, and lecture formats, in both the classroom and the clinical setting, will be required. Candidates must be able to effectively learn, participate, collaborate, and contribute as a part of a team. They will need to synthesize information effectively both in person and via remote technology. Candidates must be able to interpret causal connections and make accurate, fact-based conclusions based on available data and information. They must be able to formulate a hypothesis, investigate the potential answers and outcomes, and formulate appropriate and accurate conclusions.

Cognitive Skills

Candidates must be able to measure, calculate, reason, analyze, integrate, and synthesize. In addition, the candidate must be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures. Problem solving, a critical skill demanded of physicians, requires all of these intellectual abilities. Candidates must be able to perform these problem-solving skills in a timely fashion.

Behavioral Attributes, Social Skills, and Professional Expectations

Candidates must be able to fully utilize their intellectual abilities, to exercise good judgment, to promptly complete all responsibilities attendant to the diagnosis and care of patients, and to develop mature, sensitive, and effective relationships with patients. Candidates must be able to effectively handle and manage heavy workloads and to function effectively under stress. They must be able to adapt to changing environments and to learn to function in the face of uncertainties inherent in the clinical problems of patients. Candidates must care for all individuals in a respectful and effective manner regardless of gender, age, race, sexual orientation, religion, or any other protected status identified in the university's Non-Discrimination Policy. Professionalism, compassion, integrity, concern for others, interpersonal skills, interest, and motivation are all qualities that are expected throughout the educational processes.

Implementation of Technical Standards

Implementation of Technical Standards in the Admissions Process.

All applicants for admission to the Vanderbilt University School of Medicine will be evaluated according to the same standards and criteria outlined in the Technical Standards. Although these standards serve to delineate the necessary physical and mental abilities of all candidates, they are not intended to deter any candidate for whom

School of Medicine

reasonable accommodation will allow the fulfillment of the complete curriculum.

Implementation of Technical Standards during Degree Candidacy.

Should a candidate have or develop a condition that would place patients, the candidate, or others at risk or that may affect their need for accommodation, an evaluation with an appropriate medical provider followed by assessment through the Vanderbilt University Student Access Services office would be needed to provide recommended accommodations to the School of Medicine. The associate dean for undergraduate medical education (ADUME) and the assistant dean for medical student assessment (and, if needed, the senior associate dean for health sciences education) would review the student assessment and requested accommodations carefully. A complete and careful reconsideration of all the skills, attitudes, and attributes of each candidate will be performed. This includes an assessment of their willingness, desire, and ability to complete the M.D. program curriculum and fulfill all requirements for medical licensure and will be informed by the knowledge that students with varied types of disabilities have the ability to become successful medical professionals.

LCME Element 10.5

Doctor of Medicine Admission: Visiting Student Policy

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on February 25, 2022 and became effective AY 2022-23.

This policy applies to Vanderbilt University School of Medicine Doctor of Medicine Program.

POLICY

Students Visiting from U.S. Medical Schools

Vanderbilt University School of Medicine typically accepts visiting medical students from accredited U.S. medical schools, space and clinical conditions permitting.

The visitor must:

1. Be an enrolled medical student in good academic standing at a U.S. allopathic or osteopathic medical school. (Not all specialties at Vanderbilt University School of Medicine accept osteopathic students.)
2. Have completed all core clinical rotations required by the visitor's home school.
3. Be taking the elective for credit from their own school with their dean's approval.
4. Have adequate professional liability and health insurance coverage.
5. Submit immunization records which are reviewed by Vanderbilt University Student Health Services.
 - a. The visitor must be deemed compliant by student health before being cleared to rotate in a clinical setting.
6. Show proof of an acceptable criminal background check conducted within 12 months of the first date of the rotation.
7. Have taken and passed the USMLE Step 1 exam.

Visiting students may take courses from the approved list which consists of predominately Advanced Clinical Experiences (ACEs) in the School of Medicine, space and clinical conditions permitting and with approval of the course director. Visiting students should not contact the course directors directly. All inquiries must be made through the Office of Enrollment Services. Failure to apply through this office may result in the student's not being able to take the course.

School of Medicine

Visiting students may not enroll for more than four weeks of elective work without special approval.

Students Visiting from Meharry Medical College

The Vanderbilt University School of Medicine has an alliance with Meharry Medical College which allows Meharry medical students to take electives at Vanderbilt, space and clinical conditions permitting, at no cost. Meharry medical students must meet all requirements for visiting students and follow the visiting student application procedures with the exception that Meharry students may be considered for an elective prior to Step 1 results being available.

Students Visiting from Non-U.S. Medical Schools

Vanderbilt University School of Medicine typically accepts a finite number of students from non-U.S. medical schools, space and clinical conditions permitting, during November through April each year. Students from non-U.S. medical schools are eligible for this program if:

1. There are available spaces in existing courses.
2. The student is in their final year of medical school.
3. The student demonstrates proficiency in English as evidenced by the TOEFL score or by enrollment in a medical school in which English is the primary instructional language.
4. The student has been nominated by an institution with whom Vanderbilt has an existing collaboration or by a clinical faculty member at Vanderbilt who already has a professional relationship with the student.

An affiliation agreement must be signed and in place before any student visiting from a U.S. or non-U.S. medical school may rotate at Vanderbilt. Vanderbilt University School of Medicine has adopted the AAMC Universal Clinical Training Agreement (UCTA), endorsed by the Liaison Committee on Medical Education. As a participant in the UCTA, Vanderbilt requires only an implementation letter which adopts the terms of the UCTA.

Visiting Student Application Procedures

Students Visiting from U.S. Medical Schools

Students wishing to visit Vanderbilt University School of Medicine should submit a Visiting Student Application through the Association of American Medical Colleges' (AAMC) Visiting Student Learning Opportunities (VSLO) Program. Applications are processed up to twelve weeks in advance of the requested rotation.

A complete application includes a CV, USMLE Step 1 result, medical school transcript, AAMC Immunization Form, Vanderbilt Required Additional Immunization Addendum, and criminal background check report completed within 12 months prior to the date of enrollment as a visiting student.

All accepted students must confirm their participation by submitting a non-refundable \$160 processing fee payable to Vanderbilt University School of Medicine.

Visitors are required to participate in an orientation with the Office of Enrollment Services on, or prior to, the first day of the rotation which includes training sessions in Bloodborne Pathogens, Standards of Conduct and HIPAA.

Complete information about the Visiting Student Program is online at medschool.vanderbilt.edu/visiting-medical-students/.

School of Medicine

Students Visiting from Non-U.S. Medical Schools

Students visiting from non-U.S. medical schools must pay a \$250 registration fee and \$750 per elective. The elective fee is waived for students at the University of Jordan with which Vanderbilt has a reciprocal relationship.

Information on the program is on the website at medschool.vanderbilt.edu/visiting-medical-students/visiting-international-students/.

LCME Element 10.8

Doctor of Medicine: Dual Degree Programs

The dual degree programs offered at Vanderbilt University allow students to reduce the period of time required to complete each degree separately, usually eliminating one full year of study.

For all M.D. dual degrees except the M.D./Ph.D., the first three years are normally spent in the M.D. degree program. M.D. students may elect to apply for admission to a recognized dual degree program at any time during their first three years in the medical school. Students who apply for admission to the M.D. program during their first year in another recognized dual degree may also be considered for dual degree status.

Due to the blended nature of dual degree experiences, participating students are expected to abide by the School of Medicine Honor Code and to maintain the professional standards of the M.D. degree while participating in degree programs offered in other VU schools, in addition to complying with any standards established by that alternate program. If a student is concerned that expectations between programs may be in conflict, they should confer with the associate dean for medical student affairs.

The following are dual degree programs recognized by the VUSM MD Program:

[M.D./Ph.D. \(Medical Scientist Training Program\)](#)

[M.D./J.D.](#)

[M.D./M.S. in Biomedical Informatics](#)

[M.D./M.Div. and M.D./M.T.S.](#)

[M.D./M.Ed.](#)

[M.D./M.P.H.](#)

[M.D./MBA](#)

School of Medicine

[M.D./M.A. in Medicine, Health, and Society](#)

[M.D./M.S.C.I.](#)

Last reviewed on June 9, 2022

Doctor of Medicine: Graduate Certificate Programs

The School of Medicine offers graduate certificate programs to its students who wish to gain focused expertise in a specific area. Each program has its own admission and completion requirements. Students must submit an "Intent to Enroll" form to document their intention to pursue a certificate, as well as other documentation as needed.

Permission of the degree program director and the certificate program director are required to pursue a certificate.

Doctor of Medicine: Graduate Certificate Programs: Biomedical Ethics

This certificate is designed to enable doctor of medicine students to graduate with a high level of competence in analyzing and resolving ethical issues that they will face in practice and equip them to provide leadership to their colleagues, to the profession, and to the public in biomedical ethics.

Curriculum

This certificate is offered to students in the School of Medicine. Its curriculum consists of three elements:

1. An interdisciplinary graduate seminar, Healthcare Ethics—Theory and Practice (IDIS 7222).
2. A tailored Research Immersion to focus on the student's special research interests within ethics, including options such as selecting a topic within a clinical specialty (for example, pediatrics, internal medicine, surgery, or psychiatry). Projects may combine empirical and conceptual work with mentorship provided by designated mentors within the ethics, education, policy, and society area of the M.D. program Immersion Phase Inquiry Program. The graduate seminar described above is part of the M.D. Immersion Phase Inquiry Program.
3. An apprenticeship with the Clinical Ethics Consult Service, which is offered as an M.D. degree Immersion course. The Ethics Consult Service of the Center for Biomedical Ethics and Society provides formal consultation to VUMC hospitals and conducts a wide range of educational programs in ethics for faculty, staff, fellows, residents, students, and others.

The graduate seminar, the Immersion phase research project, and the Immersion phase consult apprenticeship may be taken separately, but completion of the Certificate in Biomedical Ethics requires successful completion of all three components. More information can be found at medschool.vanderbilt.edu/certificate-programs/biomedical-ethics/.

Doctor of Medicine: Graduate Certificate Programs: Global Health

The certificate promotes training opportunities, research, and learning focused in global health. The need for individuals who are able to work with diverse international populations continues to rise. Through certificate

Published 7/12/2022

School of Medicine

course work, students gain necessary skills and knowledge for working with international populations, particularly when operating in low-resourced settings. Students in Vanderbilt graduate or professional degree programs who fulfill all requirements are granted a Graduate Certificate in Global Health upon receipt of their degrees. Students in the M.P.H. program's Global Health track are not eligible to receive this certificate.

Certificate Requirements (12 credit hours total)

1. Core Course (choose one—additional courses may be taken for 3 elective credits each)
 - Foundations of Global Health (fall semester course)
 - Fundamentals of Global Health (offered online in varying semesters)
 - Essential Skills in Global Health (spring semester course)
2. Elective Courses—at least 9 credit hours in additional global health course work. These courses may be a combination of global health courses or other approved courses that have relevance to global health, including the following offered through VUSM:
 - ISC: Global Health (3 credits)
 - AE in Global Health (3 credits)
 - Special Studies (3 credits)
 - Research immersion in Global Health area (6 credits)
 - Quality improvement project (3-6 hours)
 - ACE: Shade Tree Elective (3 credits)
 - ACE: Spanish Language Peds Clinic (3 credits)
 - Pandemic Medicine ISC (global health track) (3 credits)
 - Case Studies in Tropical Diseases course (1 credit, online)

All courses for this certificate must be taken for graduate credit and involve global health. Students may individually tailor and/or design electives in consultation with faculty. Practicum, thesis, research immersion, and individual learning courses that have relevance to global health may be approved for certificate credit.

To initiate this certificate, submit the "Intent to Enroll" form (http://is.gd/GCGH_intent_to_enroll). Note: Your academic adviser or program director must sign this.

To complete and receive this certificate, submit the Certificate Application (http://is.gd/GCGH_certificate_approval). This application should be submitted at least two months prior to graduation.

More information can be found at medschool.vanderbilt.edu/certificate-programs/global-health/.

Doctor of Medicine: Graduate Certificate Programs: Health Equity

The CDC states that "Health equity is achieved when every person has the opportunity to attain his or her full health potential and no one is disadvantaged from achieving this potential because of social position or other socially determined circumstances." ([cdc.gov/chronicdisease/healthequity/index.htm](https://www.cdc.gov/chronicdisease/healthequity/index.htm)) A growing, critical, and specific body of knowledge elucidates the complex underpinnings of health equity, which include both upstream and downstream factors. Socioeconomic (upstream) factors are shaped by the structures, systems, environments, politics, policies, and distribution of money, power, and resources at global, national, and local levels. Individual (downstream) factors include behavior, lifestyle, gender, identity, genetics, family history, and use of/access to health care.

If society is to make progress toward achieving health equity, a cadre of physician leaders must be cultivated that understands these factors and forces, and possesses skills to intervene at the individual, system, and/or community level to impact meaningful change. The VUSM Certificate in Health Equity is offered to doctor of medicine students who wish to deepen their knowledge and expertise in order to embark on leadership careers in this area.

Curriculum

The Certificate in Health Equity requires the following course work (all required courses are offered through the School of Medicine):

School of Medicine

1. Foundations in Health Equity (FHE) I & II
 - FHE I: Two-week course covering foundational concepts and skills offered twice each year during the second year of medical
 - FHE II: Monthly evening sessions during Immersion Phase during which students work with faculty facilitators to apply foundational concepts in discussing patients they encounter in health care
 2. Complete at least two additional courses in health equity and related The following courses count toward this requirement:
 - ACE Shade Tree Clinical Services Learning
 - ACE: Spanish Language Peds Clinic
 - ACE: Primary Care if taken at community-based locations, such as Siloam and Matthew
 - ISC: Community Healthcare—Patients, Populations, and Systems of Care
 - ISC: Global Health
 - ISC: The National Opioid Crisis – Pain, Policy and Addiction
 - AE: Contagion of Disease—How Social Determinants, Illness Experience, and Resiliency Affect Mental Health
 - AE: Global Health
 - IDIS: Ecology and Health: Climate, Food, and Justice
1. Immersion Experience in Health Equity (minimum two months in length):
 - Mentored experience with individualized learning goals
 - May be related to clinical care, research, public health, or community health
 - Students may use required research immersion blocks to satisfy this requirement
 - Projects can be used to satisfy Foundations of Healthcare Delivery (FHD) Quality Improvement requirement (requires FHD course director approval)

Doctor of Medicine students interested in pursuing the Certificate in Health Equity may learn more at www.vumc.org/healthequity/graduate-certificate-health-equity.

Doctor of Medicine: Graduate Certificate Programs: Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) Health

LGBTQ patients experience disparities in access to and quality of care, leading to preventable, adverse health outcomes including elevated risk for specific chronic diseases and increased rates of suicide and depression. The Certificate in LGBTQ Health is designed to teach Vanderbilt doctor of medicine students how to address these disparities, improve the health of LGBTQ patients, support education around LGBTQ health, and foster research on the optimal ways to care for LGBTQ patients and families.

The Certificate in LGBTQ Health comprises three elements:

1. **Research Immersion in LGBTQ Health.** Students select a research topic within the realm of LGBTQ health. This may include selecting a topic within a clinical specialty, for example, adolescent medicine, infectious disease, psychiatry, or surgery. Projects may combine empirical and conceptual work with mentorship provided by designated mentors.
2. **LGBTQ Health in Inter-professional Practice or Sex, Sexuality, and Sexual Health Elective.** Students choose from one of these two interdisciplinary courses focusing on sexual health in the general population and the specific health care needs of sexual and gender minorities. In addition to the basic sciences underlying the pathophysiology of health in these populations (e.g., HPV infection, HPA dysregulation with chronic stress), clinical specialties highlighted in the course include pediatrics and adolescent medicine, OB/GYN, psychiatry, and internal medicine with content threads from ethics, medico-legal health care, human development, and chronic care.
3. **Capstone Project.** Each student completes a capstone project related to LGBTQ health. This may include development of patient education materials, providing a community or staff training, or implementation of a quality improvement project. The capstone is expected to enable students to demonstrate proficiency and acquired knowledge in the area of LGBTQ health.

Each element may be taken separately, but completion of the Certificate in LGBTQ Health requires successful completion of all three elements. More information can be found at

School of Medicine

medschool.vanderbilt.edu/certificate-programs/lgbtq-health/.

Doctor of Medicine: Graduate Certificate Programs: Neurodevelopmental Disabilities

The Neurodevelopmental Disabilities (NDD) certificate program provides an opportunity for Vanderbilt medical students to receive substantial education and training in the field of neurodevelopmental disabilities. As participants in the Vanderbilt Consortium LEND* program (VCL), medical students work with other graduate students, residents, fellows, and faculty from up to fourteen professions alongside caregivers and self-advocate representatives to receive training to provide culturally-sensitive, patient- and family-centered, interprofessional care to children and youth with special health care needs, including autism, intellectual disability, cerebral palsy, learning disabilities, behavior problems, and genetic syndromes that are associated with NDD.

The program provides an intensive (more than 300 hours), two-semester interprofessional training experience which includes:

- Rigorous weekly core curriculum in NDD,
- Monthly leadership seminar series,
- a Care Navigation Practicum in which trainees assist patients and families in care navigation while learning about socio-ecologic determinants of health and community-based services.
- Opportunity for interdisciplinary clinical experiences and case discussion
- Interprofessional group projects.
- Policy and advocacy activities
- Individualized activities tailored to meet the trainee's professional goals and aspirations

At the completion of this experience, the students will have the requisite knowledge, skills, and attitudes to assume leadership roles in the field of NDD and to provide interprofessional, patient- and family-centered, community-coordinated, culturally competent, and empirically-based services to individuals with NDD and their families.

Participants receive tuition assistance. Successful completion of the VCL program also meets the VUMC Foundations for Healthcare Delivery requirement for an interprofessional experience during the Immersion Phase and LC7-LC8 of the VUMC Learning Communities requirements during the Immersion Phase.

Doctor of medicine students interested in pursuing the certificate in neurodevelopmental disabilities may learn more at the VUSM NDD Certificate webpage: medschool.vanderbilt.edu/certificate-programs/neurodevelopmental-disabilities/

Doctor of Medicine: Honors and Awards

Gold Humanism Honor Society

A chapter of this honor society was founded in 2015 in an effort to recognize, support, and promote the values of humanism and professionalism in medicine. The number of members eligible to be nominated and selected is up to 15 percent of the medical school class. Students are elected into membership by showing that they are exemplars of integrity, excellence, compassion, altruism, respect, empathy, and service.

Founder's Medal

The Founder's Medal, signifying first honors, was endowed by Commodore Cornelius Vanderbilt as one of his gifts to the university. This medal is awarded to the student in the graduating class of the Doctor of Medicine program who, in the judgment of the faculty, has achieved the strongest record in the several areas of personal, professional, and academic performance in meeting the requirements for the doctor of medicine degree during four years of study at Vanderbilt.

Graduation Awards

AMERICAN ACADEMY OF NEUROLOGY MEDICAL STUDENT PRIZE FOR EXCELLENCE IN NEUROLOGY. This award is

School of Medicine

to recognize medical students for excellence in clinical neurology.

BEAUCHAMP SCHOLARSHIP. Endowed and awarded to the student showing the greatest progress in the field of psychiatry.

LONNIE S. BURNETT AWARD IN OBSTETRICS AND GYNECOLOGY. This award is given to the student demonstrating superior performance and who exemplifies the qualities of dedication, leadership, compassion, and integrity in the field of obstetrics and gynecology.

DIXON N. BURNS AWARD IN MEDICAL ETHICS. This is an award given by the Center for Biomedical Ethics and Society to the graduating medical student who has gained distinction in biomedical ethics through notable scholarship, excellence in clinical ethics consultation, and collegial engagement in the life of the center as a medical student.

THE GEORGE AND BARBARA BURRUS MEDICAL MISSIONS AWARD. This award is presented to a student who has demonstrated exceptional interest and participation in providing medical care to the poor during medical school, either locally or abroad.

CHAPMAN SOCIETY AWARD. With nominations generated from the fourth-year class, this award is presented to a member of the graduating class who possesses those intangible qualities of common sense, knowledge, thoughtfulness, personal warmth, gentleness, and confidence which combine to make the "Ideal Doctor"—the person fellow classmates would most like to have as their personal physician.

THE GEOFFREY DAVID CHAZEN AWARD. This award for innovation in medical education was established to recognize a student, resident, fellow, or faculty member who has made special contributions to the educational programs of the Vanderbilt University School of Medicine through the development and implementation of effective innovation in educational approach.

AMOS CHRISTIE AWARD. This award recognizes the student in the graduating class who has demonstrated the outstanding qualities of scholarship and humanity embodied in the ideal pediatrician.

JOHN G. CONIGLIO PRIZE IN BIOCHEMISTRY. This award presented to a medical student who has distinguished him/herself in biochemistry. Both accomplishments in biomedical research and performance in biochemistry courses are considered in evaluating candidates for this award. This award was established by friends of Professor Coniglio on the occasion of his retirement to honor his many contributions to medical education at Vanderbilt.

OSCAR B. CROFFORD AWARD FOR DIABETES/ ENDOCRINE RESEARCH. This award is presented by the Division of Diabetes, Endocrinology, and Metabolism and the Vanderbilt Diabetes Center to the graduating medical student who has performed outstanding research in the area of diabetes and endocrinology. This award was established to honor Dr. Oscar B. Crofford for his contributions to the diabetes research at Vanderbilt and throughout the world.

DEAN'S AWARD. Presented to medical students distinguished by outstanding service to the School of Medicine and the community.

School of Medicine

THE DEAN'S AWARD FOR RESEARCH. This award is presented to the graduating medical student who best exemplifies the attributes that lead to success in basic science or clinical research, namely creativity, dedication, productivity/multiple publications, and careful diligence.

EXCELLENCE IN EMERGENCY MEDICINE. The award for excellence in emergency medicine is given on behalf of the Society for Academic Emergency Medicine. This award recognizes a medical student who demonstrated outstanding ability in and commitment to the specialty of emergency medicine at Vanderbilt University Medical Center.

EXCELLENCE IN INFECTIOUS DISEASES. This award is presented by the Divisions of Infectious Diseases in the Departments of Medicine and Pediatrics to the student who has demonstrated outstanding aptitude and performance in clinical and investigative efforts in infectious diseases or microbiology.

EXCELLENCE IN PUBLIC HEALTH AWARD. This award is distributed by the Physicians Professional Advisory Committee (PPAC) of the United States Public Health Service (USPHS). The purpose is to recognize medical students who conduct public health work in their community and exemplify the USPHS and its mission to protect, promote, and advance the health and safety of our nation.

GERALD FENICHEL AWARD IN NEUROLOGY. Dr. Gerald Fenichel, professor of neurology and pediatrics, founded the Department of Neurology at Vanderbilt University Medical Center and served as chairman from 1969 to 2001. As one of the founders of the Child Neurology Society, his contributions to the fields of neurology and child neurology are immeasurable. This award is presented to a graduating medical student entering neurology or child neurology who has demonstrated outstanding aptitude for clinical neurology and a devotion to patient care.

DONALD M. GASS AWARD IN OPHTHALMOLOGY. This award is established in honor of Dr. J. Donald M. Gass, a graduate of Vanderbilt University School of Medicine, Class of 1957, and a renowned medical retina specialist. This award is given to a student who demonstrates excellence in ophthalmic education and research

GLASGOW-RUBIN CERTIFICATE OF COMMENDATION. This certificate is presented in recognition of women medical students who graduate as honor graduates, with special recognition to any female who is the top graduate. It serves to reaffirm the American Medical Women's Association's commitment to encouraging their continuing achievement.

JAMES T. GWATHMEY PRIZE IN ANESTHESIOLOGY. This award is presented to the graduating medical student who most clearly demonstrates the potential for excellence in academic anesthesiology. It is named after Dr. James Tayloe Gwathmey, a former Vanderbilt medical student who graduated in 1899 and went on to lead the creation of a new medical specialty called anesthesiology.

PAULA C. HOOS AWARD. The first-year class presents this award in recognition of excellence in student teaching in the basic sciences and to express appreciation for the assistance of members of the graduating class.

HOSPITAL AWARD OF EXCELLENCE. This award recognizes the fourth- year medical student, by the chief residents of the services, as having contributed most toward excellent patient care by demonstrating sensitivity, compassion, and concern in clinical responsibilities to patients of Vanderbilt University Medical Center.

RICHARD B. JOHNSTON JR. AWARD. This award is presented to a graduating student entering pediatrics who has demonstrated excellence in academic scholarship and an extraordinary commitment to clinical medicine exemplifying the highest professional standards of the physician- scientist.

School of Medicine

RUDOLPH H. KAMPMEIER PRIZE IN MEDICINE. The Kampmeier Prize is presented by the Department of Medicine to the graduate who, in the judgment of the faculty, best combines high academic achievement with clinical excellence, original scholarship, or research, and demonstrated potential for an academic career.

THE KAUFMAN PRIZE IN MEDICINE. This award honoring J. Kenneth Kaufman, M.D. '39, is presented to a graduating medical student who has demonstrated qualities of humaneness, dedication, and unselfish service in the study of medicine and will apply these qualities in medical practice.

THE TOM NESBITT AWARD. This award is presented by the Nashville Academy of Medicine to honor the outstanding service of Tom Nesbitt, M.D., a member of the academy and the 133rd president of the American Medical Association. This award is presented to the graduating medical student who demonstrates exemplary character and leadership and has an understanding of and appreciation for organized medicine.

DAVID N. ORTH AWARD IN ENDOCRINOLOGY. This award is presented by the Division of Diabetes, Endocrinology, and Metabolism and the Endocrine Society, the largest professional association devoted to all aspects of endocrinology, to a graduating medical student who has demonstrated outstanding performance in clinical or research endocrinology. The award honors Dr. David N. Orth for his contributions to and leadership in endocrinology. He served as director of Vanderbilt's Endocrinology Division and as president of the Endocrine Society.

THE ORTHOPAEDIC SURGERY CLERKSHIP AWARD. This award is presented by the Department of Orthopaedic Surgery to the student who has excelled in both the third and fourth year orthopaedic clerkships, and who has demonstrated outstanding potential in the field of orthopaedic surgery.

ROENTGEN AWARD. This award is given to a graduating medical student who has made important contributions in one of the radiological sciences during four years of study. Named for Wilhelm Conrad Roentgen, a pioneer in diagnostic radiology, the award recognizes discoveries in either clinical or research areas.

THE SCHOOL OF MEDICINE AWARD OF DISTINCTION. This award is presented to the student who has demonstrated outstanding leadership abilities in service to the School of Medicine.

THE H. WILLIAM SCOTT JR. PRIZE IN SURGERY. This award is presented to the graduating medical student who exemplifies the qualities of leadership, performance, and character reflecting the ideal surgeon.

JOHN L. SHAPIRO AWARD FOR EXCELLENCE IN PATHOLOGY. This award, given upon action of the Department of Pathology, recognizes outstanding student performance in pathology. It is given annually or otherwise depending upon action by the department and honors the memory of Dr. John L. Shapiro, who was a professor and chair of the Department of Pathology from 1956 to 1971. Dr. Shapiro remained an active participant in a variety of university and community activities, until his death on July 15, 1983.

MILDRED T. STAHLMAN AWARD. This award, honoring the pioneering spirit and achievements of Vanderbilt pediatrician Mildred Stahlman, is presented to the graduating student entering pediatrics whose performance exemplifies the highest standards of leadership, professionalism, and commitment to improving the lives of children.

TENNESSEE ACADEMY OF FAMILY PHYSICIANS AWARD. This award is presented in recognition of an outstanding

School of Medicine

student in family medicine.

THE LEONARD TOW HUMANISM IN MEDICINE AWARD. PRESENTED BY THE ARNOLD P. GOLD FOUNDATION. This award is given to a graduating student and a faculty member who demonstrate compassion and empathy in the delivery of health care, and who engender trust and confidence in both their patients and colleagues while adhering to professional ethical standards.

STEN H. VERMUND AWARD IN GLOBAL HEALTH. This award recognizes the graduating medical student who has most demonstrated a strong commitment to improving the health of the people of or from a low- or middle-income country through distinguished scholarship, education, and/or contributions to the improvement of clinical care. The award was established in 2017 to honor Dr. Sten H. Vermund, who was the founding director of the Vanderbilt Institute for Global Health.

THE ALBERT WEINSTEIN PRIZE IN MEDICINE. The Weinstein Prize in Medicine is awarded to a student who has demonstrated high academic achievement, superior clinical competence, and the qualities of dedication and professionalism that characterize a good physician.

DAVID L. ZELEAR PH.D. OTOLARYNGOLOGY SCHOLAR-INITIATIVE AWARD. This award is presented to a medical student who excels beyond clinical competence and who has become distinguished for outstanding effort towards the academic mission of otolaryngology—research, teaching, and/or outreach.

Doctor of Medicine Program Overview: Admission Bylaws

VUSM Doctor of Medicine Program Admission Bylaws Article I – Overview and Mission Statements

Section 1 – Introduction: This document is meant to provide Vanderbilt University School of Medicine (VUSM) and constituents with the authority, structure, and procedure for the admissions process for students applying to the MD program. This includes the Regular MD program as well as unique training pathways which include the Medical Scientist Training Program (MSTP) and training for Oral Maxillofacial Surgery (OMS-MD). The overarching principles driving the MD admissions process are enunciated below:

Section 2 – VUSM Mission Statement: The vision of Vanderbilt University School of Medicine is to shape a future in which all persons reach their full health potential.

The core values of Vanderbilt University School of Medicine are integrity, inclusion, humility, mutual respect and excellence.

The mission of Vanderbilt University School of Medicine is to catalyze the advancement of impactful discovery, servant leadership, and lifelong learning.

In order to carry out this mission, we make these strategic commitments:

- To nurture the growth of clinicians, scientists and educators who will serve and lead their local, national and global communities.
- To create, implement and disseminate new knowledge that expands understanding of health, disease and healthcare systems.
- To teach, learn and provide compassionate, personalized caring of the highest quality for every patient who seeks our service and to strive to achieve health equity in the populations we serve.
- To embrace a culture of lifelong learning, critical thinking, and innovation so that we will continuously improve in all we do.
- To build a diverse community of faculty, staff and students that expands the richness of our learning environment and enhances excellence in all of our endeavors.

Section 3 – VUSM Admissions Mission Statement: Vanderbilt University School of Medicine (VUSM) seeks to matriculate a diverse group of academically exceptional students whose attributes and accomplishments suggest that they will be future leaders and/or scholars in medicine.

Section 4 – Authority of the Admissions Committee: The VUSM Admissions Committee is charged by the Dean of the School of Medicine to select all members of each entering VUSM medical student class and is granted sole authority in making all related decisions.

Article II – The Overall Structure of the Admissions Process.

The structure of our admissions process is intended to provide the framework upon which we can evaluate and recruit an outstanding group of diverse students to VUSM in the fairest and most efficient method possible. The process is designed to include a holistic review of applications and to be independent of political or financial influence.

Section 1 – Director and Assistant Director of Medical Admissions:

1. The Director of Medical Admissions reports to the Director of Admissions for Vanderbilt University and works closely with the Senior Associate Dean for Health Sciences Education in the School of Medicine, the Faculty Co-Chairs of the Admissions Committee, the Admissions Leadership Team, and individual members of the Admissions Committee.
2. The Assistant Director of Medical Admissions reports to the Director of Medical Admissions.
3. The following are the roles/duties of the Director and Assistant Director of Medical Admissions:
 - a. Collaborate with the University Enrollment Affairs team in modeling admissions and scholarship

School of Medicine

- strategies toward achieving goals established annually by the Dean of the School of Medicine.
- b. Manage all operations related to the admissions process.
 - c. Work with the Co-Chairs of the Medical School Admissions Committee to ensure interviewers and reviewers are properly trained for their roles.
 - d. Evaluate the admissions process, along with the Co-Chairs of the Admissions Committee and the Admissions Leadership Team, to ensure a continuous quality improvement of said process.
 - e. Assign applicants for review by the various sub-review committees and the Admissions Committee with guidance from the Co-Chairs.
 - f. Supervise the logistics of the interview day.
 - g. Schedule training sessions for review subcommittees and Admissions Committee members and interviewers.
 - h. Manage the Admissions Process compensation program.
 - i. Create a communications flow that includes suspected, invited and matriculated applicants.
 - j. Plan and oversee Second Look Weekend for admitted students and Pre-Med PreVU for pre-med advisers.
 - k. Oversee the admissions portal and coordinate the technical standards of the portal with the Academic Affairs Process and Solution Implementations team.
 - l. Monitor and document application flow and note admissions trends.
 - m. Coordinate the waitlist selection program, with the Faculty Co-Chairs of Admissions and members of the Admissions Committee.
 - n. Interface with the Association of American Medical Colleges (AAMC) and the Group on Student Affairs (GSA) regarding admissions.
 - o. Engage in other recruitment efforts.

Section 2 – Faculty Co-Chairs of Medical School Admissions:

1. Selection and tenure of Faculty Admissions Co-Chairs
 - a. Two Vanderbilt University School of Medicine faculty members shall serve as the Faculty Co-Chairs of the Medical School Admissions Committee. Ideally, these two candidates will represent diverse backgrounds and experiences.
 - b. The Senior Associate Dean for Health Sciences Education will appoint the Co-Chairs with input from the Dean of the VUSM, leadership from the Office of Diversity and Inclusion, prior Admissions Committee Co-Chairs and the Director of Medical Admissions.
2. Co-Chairs will serve five-year terms. These terms should be staggered so that an experienced individual is always in office. Each co-chair may serve again in the position after a gap of at least one year. The faculty Co-Chair is an appointment for five years, with no more than two five-year terms. At the discretion of the Senior Associate Dean for Health Sciences Education and the Dean of Vanderbilt University School of Medicine the Co-Chair position may be extended to facilitate effective transition.
3. The following are the roles/duties of the Co-Chairs. In all cases, the Co-Chairs will collaborate with the Director and Assistant Director of Medical Admissions and the Senior Associate Dean for Health Sciences Education:
 - a. Oversee and continually review the entire admissions process, including MSTP and OMS-MD applicants, with input from the Admissions Leadership Team. The Admission Leadership Team is described below in Section 3. The Faculty Co-Chairs remind committee members and interviewers that all admissions decisions are made free from political or financial influence. In all phases of the review process the Faculty Co-Chairs monitor the process to ensure that no undue influences impact the process of applicant evaluation or selection.
 - b. Recruit a diverse team of application review committee members, Admissions Committee members, and interviewers.
 - c. Conduct training sessions, including conflict of interest training, for the committees and interviewers.
 - d. Organize and lead committee meetings.

Section 3: Admissions Leadership Team:

1. The Admissions Leadership Team, chaired by the Faculty Co-Chairs of the Admissions Committee, includes a representative Dean from the Office of Diversity and Inclusion, the Director of Medical Admissions, the Assistant Director of Medical Admissions, and decision makers and faculty leaders that represent the MSTP and OMS-MD programs.
2. The Admissions Leadership Team communicates regularly and meets as needed but no less than bimonthly to monitor ongoing results of the admissions process and make improvements in the process as indicated.
3. Ongoing communication is provided to the Senior Associate Dean for Health Sciences Education.

School of Medicine

A commitment is made to ensure a candidate's file is reviewed by several faculty members. In all phases of the review process the Faculty Co-Chairs monitor the process to ensure that no undue influences impact the process of applicant evaluation or selection. Authority to review applications in the subcommittees named below have been vested by the Admissions Committee. Quorum for the Admissions Committee and all subcommittees is defined as a simple majority of the voting faculty membership of the committee. Quorum is required for any vote by the committees.

Section 1. MD-only Program:

1. Leadership Team Subcommittee (LTS) members screen primary applications to determine which candidates who did not receive an automatic secondary application will receive a secondary application and be forwarded to the Interview Review Subcommittee (IRS).
2. Interview Review Subcommittee (IRS) members review completed applications including secondary application material and Letters of Evaluation to determine offers for an interview.
3. Admissions Committee (AC) members review files of applicants who have completed their interviews; this committee determines final scores for potential admission and approves the final list of admitted students and wait list.

Section 2. Special Programs:

The role of the Medical Scientist Training Program (MSTP) and Oral Maxillofacial Surgery (OMS-MD) Subcommittees. The constitution of subcommittees for the MSTP and OMFS provides a mechanism for the efficient and effective review of applicants to these specialized training programs. Each subcommittee includes faculty members and students from the School of Medicine who have interest and expertise in the respective area. Each subcommittee has representation on the Admissions Committee and presents evaluated and ranked applicants to the Admissions Committee for consideration for admission.

1. Medical Scientist Training Program (MSTP) subcommittee review process parallels that described for the regular MD program with additions that support the evaluation of applicants to this program that provides integrated training for both the MD and PhD degrees.
2. Oral Maxillofacial Surgery (OMS-MD) subcommittee review process parallels that described for the regular MD program with additions that support the evaluation of recent dental school applicants who will complete an integrated MD degree and Oral Maxillofacial Surgery Residency.

Section 3. Acceptance Process:

The Admissions Committee will have the final authority to admit candidates from the MD-only Program, Medical Scientist Training Program (MSTP), and Oral Maxillofacial Surgery Program (OMS-MD).

At least twice each admissions season, ordinarily in December and February, all applicants reviewed by the Admissions Committee are considered for acceptance by the Admissions Committee with admissions modeling assistance from the Vanderbilt University Enrollment Affairs team.

Section 4. Waitlist

1. The Co-Chairs of the Admissions Committee, in collaboration with the Director and Assistant Director of Medical Admissions, identify applicants as needed from the approved waitlist so as to meet the enrollment goals of the Admissions Committee, including total number of students in the class and broad diversity of the class. These invitations generally occur beginning in late April and may continue as needed until the class matriculates.
2. Admissions are conditional based upon the satisfactory criminal background check and verification of a verified baccalaureate degree upon matriculation.

The VUSM Doctor of Medicine Program Admission Bylaws were reviewed and approved by the Doctor of Medicine Undergraduate Medical Education Committee on June 20, 2022.

Doctor of Medicine Program Overview: Bylaws for the Undergraduate Medical Education Committee

Bylaws for the Undergraduate Medical Education Committee VUSM Doctor of Medicine Program Article I—
Overview and Charge

Published 7/12/2022

School of Medicine

Section 1—Introduction: These bylaws establish the authority, structure, and goals of the Vanderbilt University School of Medicine (VUSM) Undergraduate Medical Education Committee (UMEC), and outline the processes and methodologies used to obtain those goals.

Section 2—Charge: The UMEC is charged by the Dean of the School of Medicine to provide oversight and governance of the program leading to the MD degree. UMEC reports to the dean through the associate dean for undergraduate medical education (UME) and the senior associate dean for health sciences education (HSE), and along with the dean holds final authority for the curriculum as a whole. This includes oversight of the design and delivery of the MD curriculum and the authority to establish and monitor policies governing all aspects of the program, including admissions, student affairs, curriculum, assessment, progress and promotions, and learning environment.

Section 3—Goals: The goals of the UMEC are to assure that the MD program is aligned with the VUSM mission statement, that the execution of the program achieves its stated goals, and that all aspects of the program comply with standards and elements established by the Liaison Committee on Medical Education.

Article 2—Composition and Structure of the UMEC

Section 1—Faculty and Staff Representatives: UMEC shall be composed of members of the School of Medicine faculty, to include:

- Twelve total required clerkship faculty representatives - Two representatives from each of the six departments with required clerkships during the FCC phase (Medicine, Surgery, Pediatrics, Obstetrics/Gynecology, Psychiatry, Neurology). One representative from these core clinical departments will be a Chair, Vice Chair for Education, or Core Program Director. The second core clinical representative will be selected by the department chair after receiving self-nominations from the faculty members of each department. Each serves a term of three years and may serve up to two consecutive terms if re-selected by their departments.
- Six total at-large faculty representatives, four from non-core clinical and two from basic science departments, who are selected by the department chair after receiving self-nominations from the clinical department faculty and basic science department faculty respectively. Each serves a term of three years and may serve up to two consecutive terms.
- Six total Phase faculty representatives - Two representatives from each phase of medical school (ordinarily, the faculty co-chairs of each phase team).
- Three total longitudinal element faculty representatives - One representative from each longitudinal element (Foundations of Health Care Delivery, Research, and Learning Communities).
- Two special program faculty representatives - One representative from the Medical Scientist Training Program (MSTP) and one representative from the Medical Innovators Development Program (MIDP) programs.
- Additional voting members include:
 - The two co-chairs of the Student Curriculum Committee,
 - One representative of the Vanderbilt University Medical Center (VUMC) clinical leadership recruited by the senior associate dean for HSE,
 - Two housestaff representatives recruited through the VUMC Designated Institutional Official,
 - One patient representative recruited from the Patient and Family Advisory Council,
 - And one representative from the Vanderbilt University School of Nursing (VUSN).

Section 2—Ex officio Members: The senior associate dean for HSE, the associate and assistant deans for UME, the associate dean for medical student affairs, the assistant dean for assessment, the associate dean for diversity, and the associate dean for educational design and informatics serve on UMEC as ex officio members. The director of program evaluation and the director of student records shall also serve as ex officio members. Ex officio members are non-voting.

A quorum will be constituted by 19 of 36 voting members

Section 3—Structure of UMEC: UMEC shall consist of an Executive Committee, a Curriculum Monitoring Sub-Committee, and a Policy Sub-Committee. The Executive Committee is chaired by the associate dean for UME and consists of the two sub-committee co-chairs, the associate dean for medical student affairs and the senior

School of Medicine

associate dean for HSE. The Executive Committee is responsible for monitoring the progress of the sub-committees and for monitoring UMEC membership to ensure that these comply with these by-laws. It will oversee the activities of all of the teams that execute and support the curriculum (Phase Teams, Longitudinal Element Teams, Program Evaluation Team, etc.) and will also be responsible for planning the Annual Curriculum Summit.

Each voting representative on UMEC will be assigned to one of the two sub-committees. Faculty co-chairs will serve terms of three years, with the option of serving two consecutive terms. The chairs shall be responsible for all activities of their sub-committees.

Article 3—UMEC and Sub-Committee Functions

Section 1—Policy Sub-Committee: The policy sub-committee will meet every other month, opposite meetings of the full UMEC. It shall carry out the following responsibilities:

- a. Maintain an inventory of all policy related to the MD program, including policies related to the curriculum, student affairs, learning environment and progress and promotions.
- b. Review each policy on a regular basis, at least every three years, or sooner if issues arise.
- c. Annual review of LCME standards and elements related to the MD program to ensure existing policies remain in compliance.
- d. Recommend changes to policy as needed, to be presented for approval to the full UMEC.
- e. Craft new policies as necessary, in response to internally identified needs or external compliance issues. These will be presented to the full UMEC for discussion and approval.

Section 2—Curriculum Monitoring Sub-Committee: The curriculum monitoring sub-committee will meet every other month opposite the full UMEC. It shall carry out the following responsibilities:

- a. Conduct annual reviews of course and longitudinal element evaluations as presented by the respective phase or element teams and ensure alignment with the medical education program objectives.
- b. Prepare and present annual phase and longitudinal element reviews for the full UMEC.
- c. Request and review reports and recommendations from content thread teams as needed.
- d. Review long-term and short-term program evaluation data.
- e. Annual review of LCME standards related to delivery of the curriculum.
- f. Recommend changes in courses and programs based on above reviews and present any major recommendations for change to UMEC for approval. (For example, major change in course length, content areas, teaching and/or assessment approaches.)

Section 3—UMEC (Full Committee): The full committee will meet every other month. Meetings will be devoted to reports from the Curriculum Monitoring and Policy Sub-Committees and to issues identified by the Executive Committee or the Sub-Committees that require discussion and decisions. The agenda will be determined by the UME Executive Committee. UMEC will carry out its responsibilities via the following functions:

- a. Review, revise and/or approve any recommendations for major changes in policy as recommended by the Policy Sub-Committee.
- b. Review, revise and/or approve new policies as recommended by the Policy Sub-Committee.
- c. Request that the Policy Sub-Committee make revisions to existing policy or request creation of new policies if the need emerges from internal VUSM discussions or review of compliance requirements by the UME Accreditation standards committee.
- d. Review and approve annual phase team and longitudinal element reports, along with recommendations that might emerge from the Curriculum Monitoring Sub-Committee.
- e. Approve plans for major changes in courses, new courses or segments of the curriculum, as defined in Article 3: Section 2: item f above.
- f. Review annual program level evaluation data, including but not limited to the AAMC Graduation Questionnaire, the Y2Q survey, the annual VUSM learning system survey, USMLE scores, aggregate promotions and progress data, and results of annual assessment events, such as EPA weeks.
- g. Recommend changes to the curriculum or to major assessment events based on that review.
- h. Sponsor an Annual Curriculum Summit. The UME Executive Committee will determine the agenda, which will focus on topics that would most benefit from input of a wider group of stakeholders. Prior this meeting, the UMEC will distribute a summative program evaluation report to the participating faculty and students and time will be allotted for questions and discussion. Participants in this Summit will include the Dean, department chairs, all elected and ex officio members of UMEC, all phase and longitudinal element teams, members of the Office for Education Design and Informatics, and members of the Program Evaluation and assessment team.

School of Medicine

Article 4—Curricular Teams

Section 1—Phase teams: Phase teams will consist of course, program, and block directors and other faculty members who have major teaching roles in that phase, to include representation from each of the longitudinal elements as well as representation from the student curriculum committee, when needed. There will be teams for the Foundations of Medical Knowledge phase, the Foundations of Clinical Care phase and the Immersion phase. Each phase team will appoint co-chairs who will serve on UMEC and will represent their respective phases at Policy and Curriculum Monitoring Sub-Committee Meetings. Phase teams will meet regularly to carry out the following responsibilities:

- a. Review course content to ensure horizontal integration with special attention to gaps and redundancies.
- b. Review assessment approaches and policies to ensure consistency across similar course types (e.g. clerkships in FCC, ISCs in the Immersion Phase)
- c. Review each required course annually, including student performance, student evaluations, and course director reflections, and make recommendations for improvement.
 1. In Immersion Phase, review aggregate data from each course annually, including student performance data and student evaluations for the Advanced Clinical Experiences, Acting Internships, and Advanced Elective as well as course director reflections for the Integrated Science Courses. The team will make recommendations for improvement.
- d. Review and make recommendations to the Policy Sub-Committee regarding policies specific to the phase, such as attendance and excused absence and duty hours.
- e. Prepare regular reports as needed for the Curriculum Monitoring Sub-Committee.
- f. Review relevant annual data from sources such as the Y2Q Questionnaire, the Graduation Questionnaire, and the annual Learning System Survey.
- g. Prepare a report for the Annual Curriculum Summit to include review of the team's activities over the course of the year, a summary of student performance for the entire year (including any adverse actions, probation, remediation of courses, etc.); evidence of successful integration among phase elements; and any other information deemed important by the phase teams. The team will set annual phase goals accordingly.
- h. Make recommendations for major changes to the Curriculum Monitoring Sub-Committee and UMEC. Major changes requiring higher level approval include:
 1. Addition or deletion of courses to the phase, or changes in numbers of required courses such as ISCs in the Immersion Phase.
 2. Major changes in course length
 3. Changes in major curriculum level requirements, such as changes to the required clinical experiences.

Section 2. Longitudinal Element Teams: Longitudinal Element teams will consist of the faculty members and students charged with oversight of that element. These teams meet regularly to coordinate experiences and to review program evaluation data. Additionally, each longitudinal team will appoint a representative to each phase team. Each longitudinal team will appoint co- chairs who will serve on the Policy and Curriculum Monitoring Sub-Committees and UMEC. In addition, they will prepare an annual report on the element, to include review of the element's evaluations across levels of training. The team will set annual goals accordingly, and the annual review will be presented at the Annual Curriculum Summit.

Section 3. Standing Assessment Team: The Standing Assessment Team is responsible for guiding a programmatic assessment system that directly links assessment to the medical education program objectives and provides consistency throughout the curriculum. The committee will include representation from clinical and foundational science faculty experienced with trainees across all levels of the medical education continuum and is chaired by the Associate Dean for UME or designee. The Standing Assessment Team will provide the following functions:

- a. Serve as consultants to individual courses to promote alignment with overarching programmatic goals and foster best practices in assessment,
- b. Oversee centralized assessment programs and events,
- c. Monitor outcomes and perform continuous quality improvement,
- d. Advise UMEC regarding assessment policy.

Article 5: Curriculum Evaluation and Operations

Section 1—Learning System Integration Team: The Learning System Integration (LSI) Team is a trans-phase collaborative group meeting every other month to focus on operational and logistical issues (such as scheduling,

School of Medicine

faculty demands, space utilization, coordinated communications, IT support, etc.). The LSI Team will refer any programmatic and/or policy issues to UMEC for review and decision-making. Membership will include: leaders of all phase teams and longitudinal elements (FMK, FCC, Immersion; Research, Learning Communities, FHD and VPIL), representation of the assessment and portfolio programs, the SADHSE, the ADUME, the ADMSA, the Assistant Dean for Assessment, the Assistant Dean for UME, the Associate Dean for Educational Design and Informatics, the director of clinical skills development, the associate director of the MSTP, the associate director of MIDP, the director of threads, the director of program evaluation, the director of student records, the Chair of UMEC, the Administrative Officer, and the Chairs of the student curriculum committee. This committee will be chaired by the Associate Dean for UME or designee.

Additional information about the Vanderbilt University School of Medicine faculty, staff, and programs may be found on the web at medschool.vanderbilt.edu.

Doctor of Medicine Program Overview: Major Learning Facilities

The primary location for M.D. program classrooms, the student lounge, and first-year student lockers, as well as Vanderbilt University School of Medicine administrative offices, is the Annette and Irwin Eskind Family Biomedical Library and Learning Center (EBL).

This home for the School of Medicine occupies the second, third, and fourth floors of EBL. It provides a state-of-the-art learning environment, with versatile physical spaces and innovative technology; comfortable, modern gathering spaces for both formal and informal student activities; and a bright, airy working environment for M.D. students and School of Medicine faculty and staff. EBL is located on the same campus as Vanderbilt University Medical Center.

VUMC houses educational sites for the M.D. program as well. Rudolph A. Light Hall provides a venue for select learning and co-curricular activities for the M.D. program. Clinical learning experiences take place throughout VUMC and the Veterans Administration Hospital.

Major VUMC buildings are located within close walking distance to EBL, while away-from-campus locations are in other parts of Nashville and Davidson County.

See [Principal Clinical Education Affiliates](#) and [Credit for Course Work Completed Away](#).

Last reviewed on May 14, 2021.

Doctor of Medicine Program Overview: Standing Program Committees

Doctor of Medicine Admission Committees

The M.D. Program admission committees have the responsibility of reviewing medical school applications for admission and admitting those applicants considered most qualified for admission.

For additional information about these committees, please see the [Doctor of Medicine Program Admission Bylaws](#).

School of Medicine

Undergraduate Medical Education Accreditation Standards Committee

The UME Accreditation Standards Committee (UASC) is established to monitor ongoing compliance of the Vanderbilt University School of Medicine M.D. program with Liaison Committee on Medical Education (LCME) standards and elements.

For LCME accreditation and continuous quality improvement requirements, UASC has the following responsibilities:

1. Continuously monitor compliance with all 12 standards and corresponding elements.
2. Identify standards and elements for which improvements are required to assure compliance.
3. With assistance from other faculty and staff members, develop formal quality improvement processes for these standards that include measurable outcomes.
4. UASC shall have the authority to assure that Quality Improvement processes are iteratively implemented, and outcomes are monitored, in order to achieve necessary results.

UASC shall report to the Executive Faculty of VUSM, which is chaired by the dean of the School of Medicine. It provides annual reports to the Executive Faculty, with additional updates as needed. In addition, it provides intermittent reports to the senior leadership team of Vanderbilt University Medical Center, which reports to the dean of VUSM in his joint role as CEO of VUMC.

Doctor of Medicine Student Promotion Committees

The dean or the dean's designee (usually the senior associate dean for health sciences education [SADHSE]), appoints a Promotion Committee to each of three phases of training (FMK, FCC, Immersion Phase). Promotion Committees meet regularly to review the progress of individual students and the aggregate progress of the cohort of students in its assigned phase. Each promotion committee has the responsibility for making recommendations to the dean and the executive faculty concerning promotion, remedial action, or dismissal as appropriate for each student in the class/phase for which it is responsible.

Each committee consists of at least seven faculty members who represent a variety of clinical and basic science departments, as well as the broad diversity of the School of Medicine community. Each member serves a four-year term, with staggered terms.

The SADHSE appoints a faculty chair for each committee, and the associate dean for undergraduate medical education (ADUME) oversees the promotion committee process. The ADUME and the chair of each committee may determine whether members must be physically present or may participate remotely for any given meeting. A quorum of the Promotion Committee consists of at least four of the voting members of a committee; however, any proposed dismissal requires the participation of all voting members, unless an exception is granted by the SADHSE. The associate dean for medical student affairs (ADMSA), the ADUME, the assistant dean for medical student assessment (aDA), and the associate dean for diversity in medical education, are non-voting ex officio members of each committee.

Doctor of Medicine Undergraduate Medical Education Committee

The Undergraduate Medical Education Committee (UMEC) is charged by the Dean of the School of Medicine to provide oversight and governance of the program leading to the MD degree. UMEC reports to the dean through the associate dean for undergraduate medical education (ADUME) and the senior associate dean for health sciences education (SADHSE), and along with the dean holds final authority for the curriculum as a whole. This includes oversight of the design and delivery of the MD curriculum and the authority to establish and monitor policies governing all aspects of the program, including admissions, student affairs, curriculum, assessment, progress and promotions, and learning environment.

School of Medicine

The goals of the UMEC are to assure that the MD program is aligned with the VUSM mission statement, that the execution of the program achieves its stated goals, and that all aspects of the program comply with standards and elements established by the Liaison Committee on Medical Education.

UMEC consists of an Executive Committee, a Curriculum Monitoring Subcommittee and a Policy Subcommittee. The work of UMEC is supported by the following teams: Phase Teams, Longitudinal Element Teams, Standing Assessment Team, and the Learning System Integration Team.

For more information about the UMEC please see the [Bylaws for the Undergraduate Medical Education Committee](#) VUSM Doctor of Medicine Program page in this catalog.

Medical Scientist Training Program (MSTP) Admission Subcommittee

Medical Scientist Training Program (MSTP) subcommittee review process parallels that described for the regular M.D. program with additions that support the evaluation of applicants to this program that provides integrated training for both the M.D. and Ph.D. degrees. The subcommittee includes numerous institutional leaders and senior scientists with experience and responsibility for M.D. and Ph.D. training.

Medical Scientist Training Program (MSTP) Senior Oversight Committee

The MSTP Senior Oversight Committee provides guidance to the MSTP Leadership Team on program evaluation, strategic planning, and alignment with institutional initiatives.

The committee has the following responsibilities: a) provide guidance to the MSTP Leadership Team in optimizing program outcomes, b) provide input regarding programmatic strategic directions, and c) advise the MSTP ensuring alignment with the Institution's overall mission.

Membership: MSTP Leadership Team, Donald W. Brady, William B. Cutrer, Amy E. Fleming, D. Catherine Fuchs, Kathleen L. Gould, Lawrence J. Marnett, and Jennifer A. Pietenpol.

Doctor of Medicine: Program Policies and Procedures: Assessment Policy

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 26, 2022 and became effective AY 2022-23.

This policy applies to the Vanderbilt University School of Medicine Doctor of Medicine Program.

PURPOSE

To establish assessment practices within the doctor of medicine program.

POLICY

Students are assessed on the medical education program objectives within the six competency domains of patient care, knowledge for practice, practice-based learning and improvement, interpersonal and communication skills, systems-based practice, and professionalism. All students must ultimately meet or exceed the medical education program objectives as a requirement for graduation.

School of Medicine

Assessment occurs in the context of a programmatic curricular alignment such that all assessments are clearly focused on and aligned with the stated learning objectives of each course or clerkship and these objectives are derived from and directly mapped to the medical education program objectives.

Assessment activities contribute to student learning by giving each student ongoing feedback about their performance. Assessments are designed to promote the habits of self-directed learning and include formative and summative assessments of student performance, which serve as the basis for ongoing feedback to the students. Assessment data is available to students in their learning portfolio.

Assessment tools may include written examinations (multiple choice questions, short answer questions, essays), performance assessments (observed structured clinical encounters, workplace-based assessments), assignments (reflections, presentations), portfolios, or other assessments as appropriate for the learning activity.

All courses and clerkships must provide students with information on how and when they are assessed.

All courses and clerkships must provide the opportunity for formative assessment.

Doctor of Medicine: Program Policies and Procedures: Assessment Policy: Grading Policy

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 26, 2022 and became effective AY 2022-23.

This policy applies to the Vanderbilt University School of Medicine Doctor of Medicine Program

PURPOSE

The purpose of this policy is to describe the grading process.

POLICY

The Doctor of Medicine program has established medical education program objectives that are aligned with six domains of competence: patient care, knowledge for practice, practice-based learning and improvement, interpersonal and communication skills, systems-based practice, and professionalism.

Performance across these domains is assessed in every phase. In addition to meeting course requirements, satisfactory performance must be maintained in each domain. Efforts are made by faculty to bring any significant performance concern during a required course or clerkship to the attention of the student early enough to allow sufficient time for improvement to occur. A student for whom major concern persists despite coaching may be given a failing grade (F) for the course and/or may not be promoted despite satisfactory performance in other categories. Grades for all courses are due within six weeks of the last day of the course.

Grading Scales

Pass/Fail: Final grades of Pass (P) or Fail (F) are applied in the following courses:

Published 7/12/2022

School of Medicine

- FMK: All courses
- FCC: All courses
- Immersion: Advanced electives; Learning Communities; PLAN (Inquiry Program); Foundations of Healthcare Delivery (except for Quality Improvement (QI))

Honors/High Pass/Pass/Fail: Final grades of Honors (H), High Pass (HP), Pass (P), Fail (F) are applied in the following courses:

- Immersion: All Advanced Clinical Experiences (ACEs), Integrated Science Courses (ISCs), Acting Internships (AIs), Foundations of Healthcare Delivery: QI and Research Immersions
- An H grade is given to students for superior or outstanding achievement in all aspects of course work and multiple competency domains.
- An HP grade is given to students with superior achievement in several, but not all, aspects/domains.
- A P grade is given to students who demonstrate satisfactory achievement in all aspects/domains. If any aspect of performance is marginal, this is indicated by a designation of “threshold” in the domain(s) of concern.
- An F grade is given for unsatisfactory work resulting in failure. A student receiving a “below threshold” in any competency domain, or “threshold” in multiple domains, may receive an F for the course or clerkship.

Withdrawal: The grade of W is entered onto the transcript when a student withdraws from a course/clerkship after the first day of the course/clerkship but before the halfway point of the course/clerkship. Failure to withdraw before the halfway point of the course/clerkship may result in failure and may impact progress and promotion. The following exceptions apply:

- For Foundations of Healthcare Delivery: Quality Improvement (QI): For each 4-week unit of QI, a student must withdraw from the unit before the halfway point of the unit.
- Learning Communities (LC)—Immersion: For each 4-week unit of LC, a student must withdraw before the halfway point of the unit.
- For Research Immersions—For each 4-week unit of Research Immersions, a student must withdraw from the unit before the halfway point of the unit.
- Failure to withdraw before the halfway point of each QI, LC, or Research Immersion unit may impact the final course grade and/or progress and promotion.

Failure to follow procedures to officially withdraw from a course/clerkship may result in a failure and may impact progress and promotion.

Temporary Grades

P-star (P*): A temporary grade of P* is given to students whose performance is marginal because of important deficiencies in some aspect(s) of course work which precludes awarding academic credit for completion of that course. Students should be assigned a “Below Threshold” in the domain(s) in which they are deficient. P* should not be used to indicate performance that is marginal but does not require course-specific remediation. Such a concern should be indicated as a “Threshold” performance in the relevant competency domain(s). This is then tracked across courses in the learning portfolio. P* should not be used to indicate incomplete work. The P* grade should only be applied if a plan for remediation, such as repeating an exam, has been put in place.

The P* grade may be applicable for academic credit only after that remediation has been completed to the satisfaction of the course director, in which case the P* is converted on the official transcript to a P. No grade higher than a P can be assigned after such remediation, and the domain(s) of concern are marked as “threshold” in the final grade. In the absence of satisfactory remediation, the P* grade is converted on the official transcript to an F. If a transcript is requested before final resolution, the P* is present to indicate the course work has not yet been completed at a satisfactory level. Any remediation plan must be completed in a timely manner: for courses in the Immersion phase, within six weeks of receiving the P* grade; in FCC, within six weeks of completion of the student’s final clerkship block; in FMK, prior to entry into the FCC phase.

Incomplete: A grade of Incomplete is to be used only to reflect that mandatory course work has not been completed (e.g., if the student was ill and did not attempt the final exam). Incomplete should not be used when

School of Medicine

work has been completed but at an unsatisfactory level (i.e., work that requires remediation). Any incomplete course work must be completed in a timely manner: For longitudinal courses in the Immersion Phase, a mutually agreed upon written plan between the course director(s) and student to complete incomplete coursework must be in place within six weeks of the original course end date; for all other Immersion Phase courses, incomplete work must be completed within six weeks of the original course end date; in FCC, within six weeks of completion of the student's final clerkship block; in FMK, prior to entry into the FCC phase. There is no ceiling on the final grading or competency ratings for a student who previously received an Incomplete.

Change of Grade

After submission of a student's final grade in a course or clerkship, the course/clerkship director may request a change of grade. Justification for the request is reviewed by the associate dean for undergraduate medical education or their designee. If the grade change is approved, the ADUME or designee notifies the director of medical student records regarding the justification for the grade change, and the grade change is recorded in the student's record accordingly.

Student **Grievance Concerning Grades, Course and Clerkship Data, and Non-Course/Non-Clerkship-Based Assessments**

Students should seek redress of a problem with a grade, course/clerkship data, or non-course/clerkship-based assessment as soon as possible after receiving the grade, course/clerkship data, or non-course/clerkship-based assessment and in no case later than four weeks after the grade, course/clerkship data, or non-course/clerkship-based assessment is released. Students should confer directly with the course/clerkship director regarding a problem with a grade or course/clerkship data. Students should confer directly with the faculty member in charge of the administration of non-course/clerkship-based assessments regarding a problem with non-course/clerkship-based assessments. Every effort should be made to resolve the problem fairly and promptly at this level. If the student cannot resolve the problem through discussion with the course director or faculty member, within two weeks of talking with the course director or the faculty member, the student should make a formal request of an appeal in writing to the course director or faculty member and the associate dean for medical student affairs (ADMSA). The ADMSA informs the associate dean for undergraduate medical education (ADUME), which prompts a review of the course's assessment practices by the Standing Assessment Team, as well as review of the individual student's situation by the ADMSA, the ADUME, and a neutral faculty reviewer as indicated. If resolution is still not achieved, the ADMSA refers the case to the senior associate dean for health sciences education, who makes the final decision.

Faculty Advisers' Roles and Responsibilities for Grading

The School of Medicine supports an active advising program for students in every year of medical school. This program supports faculty members who are selected and trained to counsel students regarding academic progress, career development, and personal well-being. In order to preserve the integrity of the assessment system and protect students from either real or perceived bias, faculty members who serve in formal advisory roles do not assign summative course or clerkship grades without the assistance of a faculty grading committee. Faculty members who serve as advisers to individual students may provide formative feedback to students as part of other teaching responsibilities. If this feedback is submitted to a course director or grading committee as part of a summative assessment process, the advising relationship is disclosed.

Expectations for Conduct During Examinations and Work Submitted for Academic Credit

Faculty and Students' Responsibilities

Students are expected to comply with the Honor Code of the School of Medicine and the Vanderbilt University School of Medicine Compact Between Teachers and Learners. In addition, students are expected to comply with the rules of the instructor regarding classes, examinations, lab work, clinical placements, or any work/activity for academic credit.

In order to create and maintain an academic environment that promotes the highest professional standards, it is important to be transparent in the expectations of all students regarding conduct in examination settings and regarding all work submitted for academic credit. It is the responsibility of the faculty and staff to help protect the trusting environment created when the students agree to and sign the Honor Code pledge.

In order to facilitate transparency of expectations, students are apprised of appropriate conduct for a given

School of Medicine

course on the first day of class or during the first week that a course meets. Standards of behavior for each course are published in the course syllabus, and course directors explain the pertinent points (especially regarding examinations) verbally as well.

Appropriate attribution is expected for all work submitted for credit and in all entries to the electronic health record. Students must use proper citation practices and are expected to be aware of appropriate mechanisms to avoid plagiarism. Faculty clarify if an assignment may be collaborative.

When in doubt, the student should contact the faculty member.

Incidents reported to the Honor Council may be separately incorporated into the competency domain assessment and promotion committee review process as appropriate.

Expectations for Conduct in Examinations

Personal belongings may not be brought into the seating area of the testing room. All materials, except computers for online examinations, must be left outside the room or deposited in the area designated for personal belongings. Items listed below are not permitted in the seating area of the testing room:

1. Personal digital devices, calculators, or cellular telephones
2. Recording/filming devices
3. Watches with alarms, computer, or memory capability
4. Radios or paging devices
5. Reference materials (books, notes, or papers)
6. Backpacks, briefcases, luggage, coats, or brimmed hats
7. Eyeglasses are permitted, but may be subject to inspection by proctors
8. Earbuds or headphones (with the exception of noise cancelling ear plugs which may be brought into the testing room)

The use of cell phones is prohibited during the examination period, except in explicitly predetermined situations (e.g., multifactor authentication). If a student has a legitimate need to be available to urgent outside communications during the assessment period, the student must make the appropriate arrangements with the Office of Undergraduate Medical Education (OUME) prior to the assessment period. An OUME staff member is designated to receive any urgent communications and notifies the student of outside communications if the need arises.

Students may leave the room only for restroom breaks during the examination. Leaving the room can be disruptive to other students, so it is preferred that students not leave the room unless it is unavoidable.

If a student finishes the exam before time is called, the student should leave quietly and not return to the classroom or immediate outside area until the examination period is over.

For online examinations, students are responsible for confirming device eligibility prior to the date of the exam and for working with the educational technology team as needed.

Exams are closed resource (i.e., no use of reference materials of any kind and must be completed independently) unless otherwise indicated by the course director.

It is prohibited to discuss the exam or course materials with others during the exam.

School of Medicine

The content of exams is confidential, and it is prohibited to discuss the content of exams unless given explicit permission by the course/clerkship director.

Expectations for Conduct in National Board of Medical Examiners (NBME) Examinations

Students must comply with the NBME examination rules. If the NBME rules conflict with the School of Medicine policy, then the NBME rules apply for that examination. For example:

- Cellular telephones may be brought into the testing room for virtual NBME exams
- Students are escorted by a proctor to the restroom; additional testing time is not given

The examination materials used in NBME examinations are confidential, and the confidentiality of examination content must be maintained at all times. It is prohibited to communicate, publish, reproduce, or transmit any part of your exam, in any form, or by any means, verbal or written, for any purpose.

LCME 9.8, Fair and Timely Summative Assessment

Doctor of Medicine: Program Policies and Procedures: Assessment Policy: Narrative Assessment

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 26, 2022 and became effective AY 2022-23.

This policy applies to the Vanderbilt University School of Medicine Doctor of Medicine Program.

PURPOSE

To ensure each student receives a narrative description of their performance.

POLICY

Each student will receive narrative assessments during the curriculum that, when aggregated, provide feedback on their knowledge, skills, attitudes and behaviors, including non-cognitive achievement, in a manner consistent with the medical education program objectives.

- During the pre-clerkship (Foundations of Medical Knowledge) phase, students will receive narrative assessment from their peers, small group facilitators, course directors, and portfolio coaches as well as narrative self-assessment.
- During the clerkship (Foundations of Clinical Care) Phase, students will receive narrative assessment from their Master Clinical Teachers, clerkship directors, supervising faculty and residents, and portfolio coach, as well as narrative self-assessment.
- During the post-clerkship (Immersion) Phase, students will receive narrative assessment from their course directors, supervising faculty and residents, research area director and mentors, and portfolio coaches as well as narrative self-assessment.

School of Medicine

Narrative assessments will be made available to the student, the student's portfolio coach, and the promotions committee via the student's electronic portfolio.

The Medical Student Performance Evaluation (MSPE) is created as a part of a student's permanent record and is submitted according to the Electronic Residency Application Service's timeline for fourth-year medical students. Included in the MSPE are summative comments from performance evaluations throughout medical training. Students participate in the MSPE writing process and the content of the MSPEs is available for the students to review and suggest edits.

Generally, the associate dean for medical student affairs works with students on the creation of the MSPE. However, students may instead choose to work with the associate dean for diversity affairs to create the MSPE. Students are neither asked nor expected to provide any reason or justification for their choice of MSPE writer.

LCME 11.6, Student Access to Educational Records

Doctor of Medicine: Program Policies and Procedures: Assessment Policy: Program Midcourse Feedback Policy

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 26, 2022 and became effective AY 2022-23.

This policy applies to the Vanderbilt University School of Medicine Doctor of Medicine Program

PURPOSE

To ensure that each student is provided with formal feedback early enough to allow sufficient time for remediation.

POLICY

Students will receive formal formative feedback on all required clerkships and all courses four (4) weeks of length or longer at a point in time that has allowed for meaningful observation and also allows for improvement before the end of the course; generally, this will occur at the mid-point of the clerkship or course. The feedback must align with final assessment criteria and must be provided by the course director or a designee with knowledge of the student's performance. The feedback will be documented in a timely manner that is easily viewable by the student.

LCME 9.7, Formative Assessment and Feedback

Doctor of Medicine: Program Policies and Procedures: Assessment Policy: Program Policy for Direct Observation

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on Ap

This policy applies to the Vanderbilt University School of Medicine Doctor of Medicine Program

Published 7/12/2022

School of Medicine

PURPOSE

To ensure each student receives direct observation.

POLICY

All students will be directly observed on all required clerkships while performing patient evaluations, with special attention to those aspects of the evaluation that are most pertinent to that specialty and to the required clinical experiences. The direct observation must be documented in the student's portfolio, along with feedback on the performance.

REFERENCES

LCME 9.4, Assessment System

Doctor of Medicine: Program Policies and Procedures: Assessment Policy: Workplace-based Assessment

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on June 22, 2021 and became effective AY 2021-22.

This policy applies to students in the Foundations of Clinical Care and Immersion Phases.

PURPOSE

The purpose of this policy is to describe the student requirements for requesting clinical workplace-based assessments in the Foundations of Clinical Care and Immersion Phases.

OVERVIEW

Vanderbilt University School of Medicine believes that the attainment of the needed knowledge, skills, attitudes, and competencies is a developmental process. Feedback from clinical experiences is an essential component to support this development. This clinical workplace-based assessment data is subsequently available in the student's portfolio for self-reflection and self-assessment as well as for review by coaches, course directors, and others who support student development. Thus, it is important that students request workplace-based assessments from their clinical experiences.

POLICY

1. Students in the Foundations of Clinical Care (FCC) and Immersion Phases are required to request a minimum number of clinical workplace-based assessments per week.
2. An individual course or clerkship may have additional requirements which will be detailed in the course syllabus.
3. Failure to request the minimum number of assessments will be reflected in the professionalism domain. This may impact course/clerkship grades as well as progress and promotion.

Foundations of Clinical Care Phase

1. FCC students must request a minimum of 2 assessments per week during the core clerkships and the two-week electives.

Immersion Phase

1. Immersion Phase students enrolled in Acting Internships (AIs) and Advanced Clinical Experiences (ACEs) must request a minimum of 1 assessment per week.
 - a. Immersion Phase students enrolled in a longitudinal ACE must request a minimum of 4 assessments over the duration of the course.
2. Immersion Phase students enrolled in Integrated Science Courses (ISCs) must consult the course syllabus for the required number of assessment requests.

Doctor of Medicine: Program Policies and Procedures: Assignments of Students to Clinical Sites

Policy on Student Assignment to Clinical Sites

Published 7/12/2022

School of Medicine

Assignments to clinical sites are made by the clerkship or course director. Students can request an alternate site or clinical assignment when there are extenuating circumstances. To request an alternate site or clinical assignment, students must contact the Associate Dean of Medical Student Affairs (ADMSA) in writing (email is acceptable). Each request will be evaluated on the nature of the request, impact on other students, and available options. Requests based on conflicts of interest, accommodations, compliance issues, and mistreatment will be given priority. In instances where only one site is used for a particular experience, the student may be assigned to a new preceptor or team as able. Students are not provided the opportunity to negotiate with their peers to switch assignments.

Doctor of Medicine: Program Policies and Procedures: Attendance and Leave Policies: Clinical Time Requirements

Doctor of Medicine Clinical Time Requirements Policy

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on February 25, 2022 and became effective AY 2022-23.

For all clinical courses in the Foundations of Clinical Care (FCC) and Immersion Phases:

- All missed time over the allowable 2 days must be made up.
- 75% of the total planned clinical experience in the course MUST be completed in-person (e.g., for courses with a 4-week clinical experience, 3 weeks must be completed in-person)
- Up to 25% of the total planned clinical experience in the course can be completed with virtual clinical experiences
- Virtual clinical experiences include but are not limited to:
 - Self-directed case-based study
 - Simulation
 - Telemedicine encounters
 - Virtual conferences
 - Virtual lectures
 - Virtual MCT encounters
 - Virtual or online cases
 - Virtual rounds

Guidelines

Course/clerkship directors should have a prepared list of virtual activities in which the student could engage. In the case that a student needs to miss more than 2 days of a clinical course, the student and course/clerkship director would work collaboratively to develop a plan to make up missed clinical experiences. This plan must meet the required 75% minimum of planned clinical activities in the entirety of the course being completed through in-person clinical experiences. Virtual clinical experiences cannot exceed a maximum of 25% of the total planned clinical time. The make-up plan would be documented through the absence request process.

The creation of a make-up plan is intended to be student-driven with the approval of the course/clerkship director. While students will be given guidelines and a menu of opportunities for virtual clinical experiences, they will be required to:

- Propose a make-up plan based on the course objectives and their personal learning goals
- Seek course director approval through the formal absence request process
- Document completion of the make-up plan, including a log of virtual experiences
- Complete the make-up plan in the manner and timing that was mutually agreed upon by the student and course/clerkship director

MAKING UP REQUIRED IN-PERSON CLINICAL TIME

Should in-person clinical time be required to be made up, the student and course/clerkship director will work collaboratively to determine the best timing for clinical work. It would be at student and course/clerkship director discretion about when missed clinical experiences could be made up. This will depend on multiple factors including the student's schedule as well as the availability of space in the clinical environment.

- It would be permissible to allow in-person clinical time to be made up on weekends, evenings, or breaks, assuming availability of space in the clinical environment.

School of Medicine

- It would be permissible to allow in-person clinical time to be made up during FCC electives. This would require a waiver of the elective requirement. (See Curriculum Requirements [Link to Quali MD Curriculum Requirements] policy for details).
- Make up of in-person clinical activities will not take precedence over other course work for which the student is currently enrolled.
- If missed FCC in-person clinical time cannot be made up over the course of the FCC phase, it is strongly encouraged that this be made up in June/July prior to the start of the Flex months for Step study. For MSTP students, arrangements must be made to complete missed clinical time prior to the completion of Step study time.
- At the latest, the missed FCC in-person clinical requirements must be made up during the first three months of the Immersion Phase. If it has not been made up by this time, students must take a Flex month to complete the clinical requirements.

EXAMS: For courses/clerkships with required examinations (e.g., shelf exam), the timing of the examination should be discussed with the course/clerkship director.

GRADING: Students will receive an incomplete until the make-up plan (including any virtual and in-person activities) is completed.

Progress and Promotion

Students can be given a provisional promotion to the Immersion Phase contingent on satisfactory completion of their missed in-person clinical requirements (see, MD Student Progress and Promotion policy {LINK TO POLICY IN KUALI}).

MD Curriculum requirements {LINK TO POLICY IN KUALI}

MD Student Progress and Promotions {LINK TO POLICY IN KUALI}

LCME Element 8.8

Doctor of Medicine: Program Policies and Procedures: Attendance and Leave Policies: Leave of Absence

Doctor of Medicine Leave of Absence Policy

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 27, 2021 and was published on July 19, 2021.

This policy applies to Vanderbilt University School of Medicine Doctor of Medicine Program

POLICY

Leave of Absence

A student may request a leave of absence (LOA) from school for any reason (e.g., personal, medical, parental, research, dual degree, etc.), subject to the approval of the associate dean for medical student affairs (ADMSA). The student must submit a written request to the ADMSA, outlining the nature of the requested leave and providing the starting and ending dates. Leave of absence forms are available on the MD Gateway (medschool.vanderbilt.edu/md-gateway/forms). Students may consult with Vanderbilt University Student Access Services (vanderbilt.edu/student-access/) when contemplating a leave of absence, and the ADMSA may consult with Student Access Services when evaluating a request for leave of absence. The ADMSA may grant the student a leave of absence for up to one year, as long as the student is in good academic standing. Prior to LOA, a plan for re-entry into the curriculum and meeting graduation requirements should be outlined with the ADMSA, with the assistance of the associate dean for undergraduate medical education (ADUME) as indicated.

Published 7/12/2022

School of Medicine

A student on LOA may request an extension of the leave beyond one year, subject to the approval of the ADMSA. The student must submit a written request outlining the nature of the requested extension and providing a new ending date. A request for extension of a leave of absence must be submitted to the ADMSA at least three months before the ending date of the approved leave. Requests may be made for additional extensions using the process outlined above.

Upon return from LOA, the student must meet all compliance requirements which may include completing a criminal background check, updating immunization records, and meeting other compliance requirements.

Students who are not in good academic standing may request a leave of absence using the request procedure described above, but approval of the leave may be granted only by the student's Promotion Committee (the request is presented to the Promotion Committee by the ADMSA).

Students pursuing the Ph.D. as part of the Medical Scientist Training Program are not required to request a leave of absence to enter the Ph.D. phase of the program.

Doctor of Medicine: Program Policies and Procedures: Attendance and Leave Policies: Program Attendance Policy

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 26, 2022 and became effective AY 2022-23.

This policy applies to Vanderbilt University School of Medicine Doctor of Medicine Program

Student Absence Request forms are available online at medschool.vanderbilt.edu/md-gateway/forms. A Student Absence Request form must be completed for any absence. Required information includes the date, time, and reason for the absence request. The signatures of (1) the block/clerkship/course director and (2) the associate dean for medical student affairs (ADMSA) or the assistant dean for medical student assessment (aDA) are required. Note that for the Immersion Phase, the ADMSA and the aDA are notified of all absences that are approved, but their signatures are not required. Once the absence request is reviewed the student will be notified if the absence request was or was not approved.

Important Considerations:

- Students should not make travel arrangements prior to receiving notification of the outcome of their request. Approval is not granted just because travel arrangements have been made.
- Unapproved or denied absences are not allowed.
- Students are held responsible for didactic material they miss during approved absences. Make-up work for other activities may be required by course faculty/directors.
- Examples of situations in which make-up work is not allowed, and the student's grade may be affected include:
 - Absences for which no request was made.
 - Absences for which a request was made and denied.

Mandatory Sessions

Students are apprised of the attendance policies for a course on the first day of the course. Attendance standards are provided in course syllabi and in most courses are reviewed verbally by the course director(s). It is the

School of Medicine

student's responsibility to understand which sessions are mandatory, the definitions of approved and unapproved absences and the consequences for unapproved absences.

Mandatory sessions in all phases and courses include:

- Orientation (phase orientations and course orientations)
- Examinations
 - If, due to extenuating circumstances, a student cannot be present for an examination, the student must notify the course leadership, the aDA and the ADMSA immediately. The student should work with course leadership to make arrangements to satisfy the examination requirement. For Foundations of Clinical Care (FCC) regarding National Board of Medical Examiners' (NBME) , regarding NBME shelf clerkship examinations, in special circumstances, students may be granted permission to take a missed shelf exam during standard makeup dates.
- Clinical duties as assigned
- Any sessions designated as mandatory by the phase or course leadership
- Days that would extend a school holiday (not including normal weekend breaks)

It is expected that students will arrive on time for courses and other school-related obligations and demonstrate respect for teachers, fellow students, and others while participating.

Types of Absences

Absences are considered planned or unplanned and can be approved or unapproved. An absence requires formal approval through the absence request process to be considered approved. Any absence for any reason (whether planned or unplanned) that has not received formal approval through the absence request process is considered unapproved.

Planned Absence: Students can request to be excused from mandatory sessions on the basis of serious health issues, need to access health services, family emergencies, religious holy days, or presentation of their work at meetings, or other similar circumstances handled on a case-by-case basis. In these circumstances, students must notify the course leadership and ADMSA or aDA and complete the absence request form at least four (4) weeks in advance for each active course or clerkship in which sessions would be missed if they are requesting an absence. If the mandatory session is a small group session, students should also notify their group facilitator and group mates. If the student will miss clinical duties, they must also alert the supervising resident and/or attending.

- For the Immersion Phase, the Student Absence Request form must be completed at least four (4) weeks from the start of the course. Students do not need to notify the ADMSA or aDA. While students may submit requests to be absent for other life events (e.g., weddings, non-emergent family events, etc.) these absences are highly discouraged and are not likely to be approved given their impact on both the student learning experience and the clinical learning environment. Students are encouraged to plan their flex months to accommodate these major life events.

Unplanned Absence: It is recognized that in some situations (e.g., serious health emergency, family emergency) students are not able to provide advanced notice of an absence. In these circumstances, students should contact the course leadership as soon as possible to explain the absence and notify the ADMSA or aDA. The Student Absence Request form must be completed as soon as possible.

Unapproved Absences: Unapproved absences may be planned or unplanned. Any absence for any reason (whether planned or unplanned) that has not received formal approval through the absence request process is considered unapproved. All absences from mandatory sessions as defined previously are considered unapproved absences. Any planned absence that was denied approval is considered unapproved. Unapproved absences are unacceptable and have a negative impact on the student's competency domain assessment and/or overall grade in the course. Students may fail the course.

Phase-Specific Requirements Foundations of Medical Knowledge (FMK) Phase

1. Mandatory sessions in FMK include all of the mandatory sessions listed for all phases/all courses and:
 - Small group sessions (small groups may include discussion or presentation sessions, team-based or case-based learning sessions, laboratory session, etc., as defined for individual courses)
 - 1st day of the course

School of Medicine

- Last day of the course before an assessment in a block
- 2. Unless stated otherwise, students are not required to attend general lectures in FMK courses. However, because many topics are covered only in lectures and many exam questions are derived directly from this material, attendance in lectures is strongly encouraged.
- 3. *Foundations of Medical Knowledge Phase Personal Days*. It is recognized that life events that are neither serious health issues nor family emergencies may affect a student's schedule. In these cases, students may request a personal day in order to miss a mandatory session. These are considered planned absences. Permission for absence may be granted at the discretion of the individual course directors. The rules that govern the use of personal days are:
 - Personal days are only available in the FMK Phase
 - Students must request permission from the course leadership for each active course in which sessions would be missed in writing and in advance using the appropriate Student Absence Request form.
 - If granted an absence, students who anticipate missing a mandatory small group session due to taking a personal day must notify their group facilitator/clinical team/classmates at least 4 weeks in advance that they are not attending.
 - Students are held responsible for material they miss when taking personal days. At the discretion of the course leadership, students may have to complete a make-up assignment on material they missed.
 - During the FMK phase, students are allowed to take up to a total of three (3) personal days (not more than one day per block).
 - *Personal Day Blackout Periods*. Students may not use a personal day to extend a school holiday (not including normal weekend breaks). Also, students may not use personal days to miss the following sessions, including:
 - i. Examinations
 - ii. First day of any class
 - iii. Orientation
 - iv. Last day of class before an assessment in a block
 - v. Other sessions as determined by course leadership/administration

Foundations of Clinical Care (FCC) Phase

1. Mandatory sessions in FCC include all mandatory sessions listed for all phases/all courses and:
 - All sessions of the longitudinal days, including all large group and small group sessions
2. During the clerkships, students are excused from clinical duties so that they may attend clerkship didactic sessions. Students are strongly encouraged to attend clerkship didactic sessions unless there is an urgent clinical situation or one that enriches their education.
3. A student is not allowed to miss more than two days within a single block. If more than two days are missed, a student must arrange to make up additional time.
4. At the discretion of the senior resident and the attending physician on the ward team, students may occasionally be given time off from clinical duties when working conditions permit. In the event such time off is expected to last longer than 24 hours, a Student Absence Request form must be submitted.

Immersion Phase

1. Mandatory sessions in Immersion Phase include all mandatory sessions listed for all phases/all courses and:
 - Immersion Weeks
 - Face-to-face sessions in longitudinal courses (Foundations of Healthcare Delivery, Learning Communities, and Research courses)
2. If any course or clinical session is going to be missed, the student must complete the Absence Request form. A student cannot miss more than two clinical days. If more than two clinical days are missed, a student must arrange to make up additional time.

REFERENCES

LCME Standard 12, Element 4

Doctor of Medicine: Program Policies and Procedures: Attendance and Leave Policies: Student Work Policy

Student Work Policy Medical Student Duty Hours Policy FMK Phase

Published 7/12/2022

School of Medicine

Vanderbilt University School of Medicine adheres to the following guidelines regarding the amount of scheduled time during a given week of the pre-clerkship phase of the curriculum:

1. Within each week, the students will receive a maximum of 30 (thirty) hours of scheduled instructional time inclusive of longitudinal coursework (e.g., Foundations of Healthcare Delivery and Learning Communities).
2. Not all scheduled time will have mandatory attendance.
3. With occasional exceptions, attendance at didactic lectures within the Foundational Block courses should be encouraged but not required. When possible, they should be recorded and available online for the students to review on their own time.

Foundations of Clinical Care and Immersion Phases

In order to encourage a well-rounded, balanced journey through medical school, and to ensure maximal benefit of educational activities while limiting fatigue that may negatively impact patient care and education, it is the policy of Vanderbilt University School of Medicine that duty hours of medical students should reflect the general guidelines set forth for residents by the Accreditation Council for Graduate Medical Education (ACGME).

Duty Hours are defined as all clinical and educational activities related to the student's current coursework. This includes:

1. All direct patient care activities (whether completed in-house or at home) such as note writing, preparing to present on rounds, completing medical records, reviewing testing, the provision for transfer of patient care, and in-house call activities
2. All mandatory scheduled educational activities such as lectures or small group sessions inclusive of time in longitudinal courses (Foundations of Healthcare Delivery, Learning Communities, and Research and Inquiry Program).

Duty hours DO NOT include time spent:

1. Commuting
2. Reading, studying, or preparing academically for activities that are not scheduled as part of current coursework.
3. Participating in volunteer activities.

We expect that:

1. Total required educational and clinical activities should not exceed eighty hours per week which is inclusive
2. of longitudinal coursework (e.g., Foundations of Healthcare Delivery and Learning Communities in Immersion Phase)
3. Students should take one day off in seven; this is typically a weekend day.
4. Students should be off (free from clinical and educational responsibilities) for eight (8) consecutive hours after a daily duty period/shift before returning to duty.
5. In-house call no more than once every three nights, averaged over the length of the course.
6. Continuous on-site duty should not exceed twenty-four (24) consecutive hours, and up to four (4) additional hours for educational activities (e.g., transitioning care, formal didactics).
7. Should be off (free from clinical and educational responsibilities) for 14 consecutive hours after 24 hours of in-house call.

It is also expected that course directors, supervising house staff and attending physicians are sensitive to student fatigue and total number of hours spent on clinical and educational activities. If any student believes they have worked over the maximum of eighty (80) hours per week or worked more than outlined above, the student should contact the Associate Dean of Undergraduate Medical Education.

The Medical Student Duty Hours Policy was reviewed and approved by the Undergraduate Medical Education Committee on May 26, 2020.

Extracurricular Work or Activities

The School of Medicine does not regulate the outside work or activities of its M.D. program students, although it does take the firm position of discouraging outside work. No outside commitments may be assumed by medical students that may compromise their responsibilities at the medical school. If the outside obligation creates a conflict of interest, a student may be required to discontinue it.

School of Medicine

Student Pay for Work Performed for Credit

Students may not be paid for work performed as part of their elective or required course work for credit. Exceptions to this rule are made only when students are in special programs, such as students on military scholarships, students in funded graduate certificate programs, students in funded M.D./Ph.D. programs, students in MIDP completing certain industry internships, and students in the Oral Surgery program when acting as residents.

Doctor of Medicine: Program Policies and Procedures: Clinical Supervision of Students

Medical Clinical Supervision of Students Policy Purpose & Scope

This policy applies to individuals who supervise medical students across all required and elective clinical activities at all training sites. The purpose of this policy is to provide a safe and supportive learning environment for medical student learning and growth in the clinical setting, to ensure that the school adheres to expectations that protect patients and ensure student safety, and to describe the mandatory training, teaching, and assessment skills required to be a medical student supervisor.

Appropriate supervision ensures that medical students are provided with opportunities to learn that are progressive and commensurate with the student's level of training and in accordance with the supervisor's level of training and specialization.

Supervisors in the Clinical Setting

A Supervisor has the capacity to allow a learner to receive progressive responsibility for patient care. A Supervisor must either hold a faculty appointment and clinical privileges or be supervised in their teaching and assessment role by an individual who has a faculty appointment and clinical privileges. Examples of possible supervisors include:

- Attending Physician within Vanderbilt University School of Medicine's (VUSM) training sites both inpatient and ambulatory
- Resident Physician, Intern, or Fellow in a Graduate Medical Education (GME) program within VUSM
- Allied health professionals, such as Nurses, Physician Assistants, Nurse Practitioners, Social Workers, etc. where appropriate to the clinical activity

Levels of Supervision - Direct vs. Indirect

1. Direct Supervision: The medical student performs a task with the Supervisor physically present in the same location as the student; able to provide direct instructions and feedback to the student in real time; able to take over patient care duties if and when necessary. A resident physician or another health professional acting within their scope of practice may provide direct supervision under the indirect supervision of an attending physician.
2. Indirect Supervision - The Supervisor may not be physically present with the student; however, they are on-duty, immediately available, and can be called to the physical location of the student if and when necessary. The Supervisor verifies in person all relevant components of the history and physical exam that are obtained independently by students and verifies and communicates in person to the patient the assessment and plan.
3. The limitations for the requirements of proximity and timing of supervision, as well as the specific tasks that a student may perform without direct supervision, depends on various factors, including:
 - the level of training of the student;
 - previous experience and skill of the student within the scope of the clinical activity and setting;
 - the familiarity of the supervisor with the student's skills;
 - the acuity of the situation and the degree of risk to the patient.

How VUSM Monitors Clinical Supervision

Any medical student with concerns about the adequacy and availability of supervision they are receiving is encouraged to address their concerns as soon as possible. Medical students are instructed to contact their Course or Clerkship Director regarding any immediate concerns with supervision. Additionally, reports can be made via anonymous feedback through RISE or the Office of Medical Student Affairs.

School of Medicine

Undergraduate Medical Education Committee (UMEC) on October 26, 2020.

Doctor of Medicine: Program Policies and Procedures: Curriculum Requirements

Doctor of Medicine Curriculum Requirements Policy

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 27, 2022 and became effective AY 2022-23.

This policy applies to Vanderbilt University School of Medicine Doctor of Medicine Program.

PURPOSE

To describe the curriculum requirements for the M.D. degree.

POLICY

The curriculum requirements for the MD degree are established by the Undergraduate Medical Education Committee. The Doctor of Medicine program reserves the right to change the curriculum requirements, instructional strategies, and required activities at any point to ensure that all medical education program objectives, competencies, and required clinical experiences are being met. Any changes will be communicated to the students in a timely manner.

Medical Innovators Development Program (MIDP), Medical Scientist Training Program (MSTP), Oral and Maxillofacial Surgery (OMS-MD) students, dual degree students, and Vanderbilt Program in Interprofessional Learning (VPIL) may have additional expectations and should refer to the appropriate sections below.

Curriculum Phases

There are three phases of the curriculum: Foundations of Medical Knowledge (FMK), Foundations of Clinical Care (FCC), and Immersion Phase (IMM). To complete each phase, students must satisfactorily complete the requirements of each phase, including passing each course/clerkship and satisfactorily completing course/clerkship requirements.

Ordinarily, students complete all clerkships before proceeding to the Immersion Phase, but under special circumstances, students may defer one or more clerkships to pursue specific research or clinical interests. Such plans must be approved by the associate dean for undergraduate medical education (ADUME).

Foundations of Medical Knowledge Phase (FMK-Year 1)

This phase is 49 weeks and provides students with a strong foundation in the basic sciences, humanities, and behavioral and social sciences that supports ongoing learning over the ensuing years. For successful completion of the FMK Phase, the following are required:

- Foundations of the profession
- Human Blueprint and Architecture (HBA)
- Microbes and Immunity (M&I)
- Homeostasis
- Renal & Digestion
- Reproduction & Endocrine
- Brain, Behavior and Movement (BBM)

The following longitudinal courses are required:

- Physical Diagnosis (PDx)
- Foundations of Healthcare Delivery (FHD) 1
- Learning Communities (LC)—FMK
- Research-Clinical Applications of Scientific Evidence (CASE)

Foundations of Clinical Care Phase (FCC-Year 2)

Published 7/12/2022

School of Medicine

This phase is 41 weeks and provides students with a strong foundation in clinical care delivery to support the development of clinical skills and clinical reasoning. For successful completion of the FCC Phase, the following are required:

- Cumulative objective structured clinical examination (OSCE)
- FCC Launch
 - This is a one-week course at the start of the FCC Phase. It will be required for the Entering Class of 2021 and subsequent classes. Entering classes prior to 2021 are required to complete the Diagnostics and Therapeutics Course.

Clerkships

- Students must complete discipline-specific clinical clerkships including Surgery (8 weeks), Medicine (8 weeks), Pediatrics (6 weeks), Obstetrics-Gynecology (6 weeks), Neurology (4 weeks), and Psychiatry (4 weeks).
- Electives
 - All students are required to take two (2) two-week electives during the FCC phase. These experiences are designed to allow students to explore focused clinical areas and potential career choices. Students may select from offerings across many clinical disciplines. The scheduling of these electives is linked to the clerkship blocks in Pediatrics and in Obstetrics and Gynecology.
 - A student may request an exemption from one (1) elective requirement if they have a compelling reason. Reasons may include a need to make up clerkship time, illness requiring treatment, or other unavoidable life events that require the student to be away from school. When the student needs an exemption, they must contact the associate dean for medical student affairs (ADMSA) to make a formal request. The decision to grant the exemption is made by the ADUME in consultation with the ADMSA. Only one (1) exemption is permissible. An exempted elective does not appear on the transcript.

The following longitudinal courses are required:

- Foundations of Healthcare Delivery (FHD) 2
- Learning Communities - FCC
- Research-Discovery

Immersion Phase (IMM-Years 3 and 4)

The Immersion phase is 64 weeks and is a highly individualized phase that allows each student to create a schedule based on their future clinical and scholarly trajectory. Students complete a mixture of experiences with varying levels of structured versus workplace learning across multiple clinical disciplines, including acting internships (AIs), integrated science courses (ISCs), advanced clinical experiences (ACEs), and Advanced Electives (AEs). Students may track their progress towards the M.D. degree through the Your Enrollment Services (YES) Degree Audit function.

For successful completion of the Immersion Phase, students must complete 15 four-week blocks or equivalent (e.g., longitudinal ACE) that include:

- Four (4) ACEs
- Four (4) ISCs
- One (1) AI
- Three (3) Research Immersions
- Three (3) competency and interest-driven rotations. These can be ISCs, ACEs, AIs, AEs, or special studies with at least one (1) being a clinical rotation.

Of the 15 required blocks, one (1) must be completed in the primary care setting and one (1) in the acute care setting.

The following longitudinal courses are required during the Immersion Phase:

School of Medicine

- Foundations of Healthcare Delivery (FHD) :
 - Health Care Delivery Immersion I
 - Health Care Delivery Immersion II
 - Interprofessional Education 2
 - Patient Safety
 - Health Care Delivery Immersion III
 - Quality Improvement
 - Students must complete Quality Improvement Units 1, 2, and 3 by the end of block 11 of the intended year of graduation.
 - Learning Communities—Immersion (8 Units)
 - Research:
 - PLAN (Planning, Logistics, and Navigation)
 - Students must complete PLAN before beginning the Research Immersion.
 - Research Immersion
 - Students must complete (or have attained waivers for) all Research Immersion requirements (noted above) by the end of block 3 of the intended year of graduation.
 - Introduction to Core Entrustable Professional Activities
 - This is a one (1) week course that is required in the Immersion Phase. This course includes didactic, small group, and simulation activities to support competency development and readiness for residency.

Refer to the School of Medicine website for a full description of the requirements of the Immersion phase (medschool.vanderbilt.edu/curriculum/immersion/).

Dual Degree Students

For students enrolled in one of the dual-degree programs at Vanderbilt University, the curriculum requirements for the M.D. degree are the same as for M.D. students as listed above with the following exceptions:

- In IMM Phase:
 - see <https://medschool.vanderbilt.edu/md-gateway/dual-degree-requirements/> for IMM Phase requirements.

Medical Innovators Development Program (MIDP) Students

The curriculum requirements for MIDP students are the same as for M.D. students as listed above with the following exceptions:

- In FCC Phase:
 - Innovation Activism is required
 - Research—Discovery is not required
- In IMM Phase:
 - See <https://medschool.vanderbilt.edu/md-gateway/midp-requirements/> for IMM Phase requirements.

Medical Scientist Training Program (MSTP) Students

MSTP students will typically complete the FMK and FCC phases, exit for graduate studies, then return for a single remaining medical school year to complete the Immersion Phase.

For students enrolled in the MSTP, the curriculum requirements for the M.D. degree are the same as for M.D. students as listed above with the following exceptions:

- In FMK Phase:
 - MSTP Seminar Series is required
 - Foundations of Biomedical Research I is required
- In FCC Phase:
 - Research-Discovery is not required
 - Foundations of Biomedical Research II is required
- In IMM Phase:
 - See <https://medschool.vanderbilt.edu/md-gateway/mstp-c20-requirements/> for IMM Phase requirements.
 - Clinical Preceptorship Program-Foundations of Healthcare Delivery (CPP-FHD) is required.

School of Medicine

- Introduction to Core EPAs is not required

Oral and Maxillofacial Surgery-Doctor of Medicine Curriculum Requirements (OMS-MD) Students

Students in the OMS-MD program meet in full the requirements for the doctor of medicine after three years of full-time training. The curriculum requirements for OMS-MD students are the same as for M.D. students as listed above with the following exceptions:

- In FCC Phase:
 - Research-Discovery is not required
- In IMM Phase, only the following are required:
 - ACE: Primary Care
 - ACE: Emergency Medicine
 - 6 blocks of AI: Anesthesiology for OMFS
 - 1 block of AI: AI: Oral & Maxillofacial Surgery

Vanderbilt Program in Interprofessional Learning (VPIL) Students

The curriculum requirements for VPIL students are the same as for M.D. students as listed above with the following exceptions:

- In FMK Phase:
 - FHD 1 is not required
 - Interprofessional Clinic: VPIL1 is required
- In FCC Phase:
 - Interprofessional Clinic: VPIL2 is required
- In IMM Phase,
 - FHD-IPE 2 is not required if Interprofessional Clinic: VPIL 1 and Interprofessional Clinic: VPIL 2 have been satisfactorily completed

Doctor of Medicine: Program Policies and Procedures: Degree Requirements

Doctor of Medicine Program Degree Requirements Policy

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on February 25, 2022 and became effective AY 2022-23.

This policy applies to Vanderbilt University School of Medicine Doctor of Medicine Program

POLICY

In order to graduate with the doctor of medicine, all M.D. students must:

- Have satisfactorily completed the medical curriculum. (See Curriculum Requirements [Link to Quali page MD Curriculum Requirements])
- Have attained or acquired all required medical education program objectives.
- Have satisfactorily completed the required clinical experiences.
- Have taken Step 1 and Step 2 Clinical Knowledge (CK) of the United States Medical Licensing Examination by the following deadlines: waivers must be approved by ADMSA or ADUME
 - Have taken Step 1 or Step 2CK prior to orientation week of the Immersion phase.
 - Have taken the remaining Step exam (Step 1 or Step 2CK) by February 1 of their 4th year/final year of medical school.
- Have no outstanding unpaid balances with the university, other than sanctioned educational loans.

Length and Delivery of Program

In accordance with the requirements of the Liaison Committee on Medical Education, candidates for the M.D. must have spent at least 130 weeks of study as matriculated medical students. The maximum time for enrollment in required M.D. course work is six years, including time spent on approved personal and/or medical leave(s) of absence. Time spent on leave of absence related to an approved alternate academic pathway (e.g., pursuing another degree, completing a research year, etc.) does not count toward the six-year maximum time to complete the M.D.*

School of Medicine

**Any student who exits the M.D. curriculum for approved experiences (research, dual degrees, leave of absence, etc.) encounters different course options upon return. Requirements for these students are aligned with expectations in the year of entry by applying the closest equivalent experiences available. Such students must meet with the associate deans of medical student affairs and undergraduate medical education to clarify requirements for their degrees.*

Medical Scientist Training Program (MSTP)

The MSTP is a dual endeavor between the Vanderbilt University School of Medicine and the Vanderbilt University Graduate School. Trainees are required to fulfill the requirements for both the M.D. and the Ph.D. degrees. Since some competencies for the M.D. are met by the graduate school experience, it is possible for MSTP students matriculating July 2013 or after to complete the M.D. program in a total of three years. The MSTP allows both dual and alternating enrollment in the School of Medicine and the Graduate School.

The cornerstone of the Vanderbilt MSTP is training in scientific inquiry afforded by a rigorous Ph.D. experience. After completing the first two years of medical school and at least two laboratory rotations, trainees select a laboratory and department for graduate studies. This selection is typically formalized before the end of the second year of medical school.

Requirements for successful completion of the Ph.D. degree are determined by the graduate program and the Ph.D. thesis must be successfully defended prior to reentry into medical school.

LCME Element 9.9

Doctor of Medicine: Program Policies and Procedures: Disclosure of Offenses

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 27, 2022 and became effective AY 2022-23.

This policy applies to the Vanderbilt University School of Medicine Doctor of Medicine Program

POLICY

1. From the time of enrollment through M.D. degree conferral, students are required to report to the associate dean for medical student affairs (ADMSA) any arrest, criminal charge, and disposition or conviction of any arrest or charge occurring after their initial background check.
2. Students are also required to report:
 - a. Allegations, investigations, disciplinary action from any licensing board, and any actions that may impact their participation in the program; and
 - b. Any adverse information resulting from subsequent criminal background checks obtained by any organization, even one unaffiliated with Vanderbilt University.
3. Reports must be made to the ADMSA as soon as possible but in no event later than seven (7) calendar days of the event or reason giving rise to the reason for the report.
4. In addition to the initial background check performed at enrollment, students are required to undergo another background check by February 1st of the year prior to graduation.
 - a. Additional background checks may be required (e.g., clinical placement at an outside institution, including the Veterans Affairs Medical Center).

Doctor of Medicine: Program Policies and Procedures: Faculty Support and Advising Roles

Faculty Support and Advising Roles

Many individuals provide advising and support to VUSM students. Each of the advising roles at Vanderbilt is defined in a manner that makes it distinct from, yet complimentary to, the other roles in the system. Each faculty member in an advising role undergoes development on the specific role as well as the overall advising system. The product of faculty development is an adviser who is able to perform his or her advising role responsibilities and is also able to refer students to resources as appropriate to individual student needs.

Managing Multiple Faculty Roles

Faculty members engaged in multiple educational roles can face competing demands, which may directly or indirectly affect (or have the appearance of affecting) an individual's professional judgment in exercising any educator duties and responsibilities. Of particular concern to students is the intersection of roles involving advising students regarding personal or academic struggles with roles in assessment of student performance or assigning grades.

To identify and manage potential conflicts, the VUSM administration established a system that defines compatible and incompatible faculty roles within the educational enterprise. Authority over this system resides centrally, with the Office of the Senior Associate Dean for Health Sciences Education (SADHSE).

The Educator Role Matrix (online at vanderbi.lt/rolematrix) illustrates roles that have been identified as including some potential for conflict. The matrix places advising roles in one of two categories as they relate to assessment activity: (1) Manageable conflict, and (2) Incompatible conflict. For manageable conflicts (yellow on matrix), the adviser must develop and submit for approval by the senior associate dean for health sciences education a conflict management plan that mitigates or eliminates the role conflict.

The Office of Undergraduate Medical Education (OUME) maintains records of Role Conflict Management Plans. (Management plans are available to students upon request.) When roles are determined to be incompatible (red on matrix), the faculty member must relinquish either the assessing or advising role. Before each new academic year, the associate dean for undergraduate medical education (ADUME) reviews all educators' roles and existing conflict management plans to ensure that they conform to the school's standards. Any new conflict management plans are required to be completed prior to the commencement of the academic year.

Key Advisory Roles

Senior Associate Dean for Health Sciences Education (SADHSE): The SADHSE is a member of the VUSM administration. Her/his primary role is oversight of educational affairs for the School of Medicine. The SADHSE may not occupy any of the advisory or assessment roles contained in the Educator Role Matrix, with the exception of course director provided a grading committee is in place.

Associate Dean for Medical Student Affairs (ADMSA): The ADMSA is a member of the VUSM administration. Her/his primary role is advising on academic, career, and personal concerns. The ADMSA has office hours and meets with students in all years of training. The ADMSA is the primary VUSM official designated to write each student's Medical Student Performance Evaluation, but students may request that another school official complete the MSPE. The ADMSA also writes letters of recommendation for students applying for scholarships or various academic opportunities. The ADMSA oversees the Colleges program, the Student Wellness Program, RISE (the mistreatment reporting system), and the Careers in Medicine program. The ADMSA has access to all academic records. The ADMSA may not occupy any of the advisory or assessment roles contained in the Educator Role Matrix, with the exception of course director provided a grading committee is in place.

Associate Dean for Undergraduate Medical Education (ADUME): The ADUME is a member of the VUSM administration. Her/his primary role in the medical school involves development and delivery of curriculum and

School of Medicine

assessment for the M.D. degree. The ADUME has office hours and can meet with students in any year of training to discuss academic and career concerns. The ADUME frequently meets with students who are navigating the curriculum to maximize various academic opportunities. The ADUME has access to all academic records and administers the Promotion Committee process. The ADUME may not occupy any of the advisory or assessment roles contained in the Educator Role Matrix, with the exception of course director provided a grading committee is in place.

Associate Dean for Diversity Affairs (ADDiversity): The ADDiversity is a member of the VUSM administration. One of her/his roles includes advising students on academic, career, and personal concerns. ADDiversity is a secondary VUSM official designated to write student's Medical Student Performance Evaluation, but students may request that another school official complete the MSPE. The ADDiversity also oversees RISE (the mistreatment reporting system).

Assistant Dean for Undergraduate Medical Education (aDUME): The aDUME is a member of the VUSM administration. Her/his primary role in the medical school involves development and delivery of curriculum and assessment for the M.D. degree. The aDUME frequently may meet with students who are navigating the curriculum to maximize various academic opportunities. The aDUME has access to all academic records. The aDUME may occupy the advisory or assessment roles of Portfolio Coach and/or Course Director with an acceptable conflict management plan in place.

Assistant Dean for Medical Student Assessment (aDA): The aDA is a member of the VUSM administration. Her/his primary role is to identify and assist students with performance issues. One of the key roles of the assistant dean for assessment is to direct the Student Assistance Program (SAP). The goal of the SAP is to provide students with guidance in study skills, test-taking strategies, and general advice for academic success within a rigorous medical school curriculum. The aDA serves as an academic resource for students, meeting with individuals as indicated and coordinating tutoring in partnership with course directors. The aDA communicates with Vanderbilt University Student Access Services in the event that a student requires accommodation. The aDA helps to coordinate Promotion Committee meetings by preparing the meeting agenda, assembling the academic data to be reviewed, attending all meetings and reporting on student progress/concerns, as needed, and following up with students, as needed, after promotions committee meetings occur. The aDA has access to all academic records. The aDA may not occupy any of the advisory or assessment roles contained in the Educator Role Matrix, with the exception of course director provided a grading committee is in place.

College Mentor (CM): CMs are VUSM faculty members who manage the activities of and advising programs within the VUSM Colleges and Learning Communities. CMs serve assigned students as advisers in the areas of professional wellness and career counseling. CMs are involved with programming throughout the year in the school's Student Wellness Program and Careers in Medicine program. CMs also serve as teachers in the VUSM Learning Communities, focusing on content in medical humanities, metacognition, ethics, leadership, and policy. The CMs do not grade students in learning communities, but instead provide formative feedback. CMs may have teaching or supervisory roles with their college mentees in the context of other academic activities. However, role conflict management plans are created to ensure that they do not grade their mentees in those activities. CMs do not have access to student academic records (grades, etc.). A student may grant a CM access to his/her academic record and may revoke such permission at any time without negative consequences.

Portfolio Coach (PC): The PCs are VUSM faculty members who work with an assigned group of students throughout medical school. The PC role was created as part of Curriculum 2.0. Each member of an entering class is assigned an individual coach from the cohort of coaches appointed for their class. Students meet individually with their assigned PCs three times during the first phase of medical school and at least twice during each subsequent phase. Portfolio coaches play a vital role in the Curriculum 2.0 assessment system. PCs have access to the academic records of only the students to whom they are assigned. They coach individual students in developing the skills for informed self-assessment and lifelong learning. They help students critically appraise data about their performance and translate those assessments into action plans for future learning. PCs have an active role in the assessment of assigned students' progress through the curriculum. The PC may occupy several of the assessment roles contained in the Educator Role Matrix provided there is an approved conflict management plan.

School of Medicine

Specialty Adviser (SA): As students approach their senior year of medical school, they are urged to choose an adviser from the specialty in which they will apply for residency. Specialty advisers are VUSM faculty members. Once established, this advisory relationship exists for the duration of the residency application and the National Residency Match processes. SAs provide academic and career counseling, strategic schedule planning, and interviewing advice specific to the specialty of choice. SAs do not have access to student academic records (grades, etc.). The primary goal of this relationship is to provide students with resources to most effectively obtain a successful residency match.

The Faculty Support and Advising Roles Policy and Matrix was reviewed and approved by the Undergraduate Medical Education Committee on May 26, 2020.

Doctor of Medicine: Program Policies and Procedures: Medical Education Program Objectives (MEPOs)

Medical Education Program Objectives (MEPOs)

The following set of Medical Education Program Objectives (MEPOs) was formally adopted by the Undergraduate Medical Education Committee in December of 2021, following an extensive design and refinement process that began at the 2021 Annual Curriculum Summit. These MEPOs drive medical education across the MD program, including the selection and appropriate placement of curriculum content within courses/clerkships and curriculum phases, and the review and revision of the curriculum.

Patient Care

- PC1. Gather essential and accurate information about patients, their values and preferences, and social contributors of health through history-taking, physical examination, and the use of relevant data.
- PC2. Interpret clinical information and formulate a prioritized differential diagnosis that reflects the use of medical knowledge in a clinical reasoning process, recognizing and addressing potential uncertainty and individual bias.
- PC3. Formulate personalized management plans that include reassessment and follow-up, based on evaluation of clinical conditions; scientific evidence; patients' values, beliefs, and behaviors; and potential barriers to care.

Interpersonal Communication Skills

- IPCS1. Communicate effectively with colleagues, patients, and families, demonstrating cultural humility.
- IPCS2. Demonstrate sensitivity, honesty, and compassion during difficult conversations (e.g., discordance, ethical dilemmas, end of life, adverse events, disclosure of errors).
- IPCS3. Adapt verbal and nonverbal communication strategies to promote inclusive and collaborative care within interprofessional teams.

Knowledge for Practice

(Previously Medical Knowledge)

- KP1. Demonstrate deep knowledge of foundational science, clinical science, and health systems science and their contribution to health, illness, and the promotion of wellness.
- KP2. Apply the scientific method and appropriate study designs to evaluate questions of interest and to collect, analyze, and disseminate new information.
- KP3. Integrate newly acquired information with prior knowledge to provide clinical care and manage uncertainty.

Practice-Based Learning and Improvement

- PBLI1. Identify personal strengths and weaknesses in knowledge, skills, and attitudes, develop individualized learning goals, and implement plans to promote lifelong learning.
- PBLI2. Analyze practice systematically by incorporating feedback, utilizing quality improvement methods, and applying relevant literature to improve performance and achieve equitable outcomes.

School of Medicine

- PBLI3. Seek, critically appraise, and apply scientific evidence to improve the care of diverse individuals, populations, and communities.

Systems-Based Practice

- SBP1. Apply systems thinking to the care of patients, the health of communities, and the performance of institutions, recognizing complex interdependencies of health care microsystems and macrosystems.
- SBP2. Coordinate care and participate in collaborative interprofessional teams to deliver high-value care.
- SBP3. Demonstrate system citizenship by proactively contributing to a culture of safety, system improvement, and a learning health system.

Professionalism

- PR1. Demonstrate healthy coping mechanisms to manage conflict between personal wellness and professional responsibilities.
- PR2. Demonstrate ethical thinking in interactions with patients, colleagues, and the institution.
- PR3. Demonstrate conscientiousness, discernment, and honesty in interactions with patients, colleagues, and the institution.
- PR4. Demonstrate professional duty and accountability to patients, colleagues, the institution, and the public including compliance with relevant laws, policies, and regulations.
- PR5. Demonstrate core behaviors of servant leadership in working with others.

Doctor of Medicine: Program Policies and Procedures: Program Evaluation

Doctor of Medicine Program Evaluation Policy

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 27, 2021 and was published on July 19, 2021.

This policy applies to Vanderbilt University School of Medicine Doctor of Medicine Program

PURPOSE

The primary purpose of this policy is to provide a policy for the oversight of curriculum/program evaluation for the Doctor of Medicine program.

OVERVIEW

Curriculum/program evaluation seeks to obtain information to determine if medical students are experiencing the best possible learning experiences during their medical school career, if medical students are meeting educational program objectives and whether the school and curriculum are fulfilling their mission and goals. There are four major components to curriculum/program evaluation at VUSM:

- Course evaluation examines how the design and organization of courses and their content support medical student learning and achievement of learning objectives.
- Phase evaluation examines the impact of courses and the interaction of phase components on medical student learning and achievement of phase objectives.
- Program evaluation examines the impact of the overall curriculum and the interaction of its components on medical student learning and the achievement of educational program objectives.
- Educator assessment examines the performance of individual faculty, residents, and fellows in providing instruction to medical students.

Curriculum improvement is a community effort. All VUSM students, staff and faculty have a role in identifying needs and implementing strategies for improvement.

POLICY

- A. The Undergraduate Medical Education Committee (UMEC) is charged with central oversight of the curriculum. UMEC regularly reviews reports describing the performance of the system, making recommendations for improvement and monitoring the impact of changes.
- B. The Office of Undergraduate Medical Education Evaluation and Assessment Team oversees the implementation of all curriculum and program evaluation activities for the M.D. program. This oversight includes both the ongoing curriculum/program, as well as pilot studies or innovations. The Evaluation and Assessment Team is responsible for ensuring that all evaluation is conducted in a systematic and rigorous

Published 7/12/2022

School of Medicine

manner. This includes:

- Design and oversight of evaluation plan including methodology and content
- Design and distribution of evaluation instruments
- Data collection, reporting, and archiving

- C. **Students are required to complete every VUSM-developed course and/or program evaluation survey that they receive from the Office of Undergraduate Medical Education Evaluation and Assessment Team.** Students who do not complete surveys will be reported to the associate dean of undergraduate medical education and the Promotions Committee. Completing program and course evaluations is a vital part of the continuous improvement process at VUSM. However, students may opt out of any VUSM-developed evaluation survey and/or any assigned VUSM-developed evaluation focus group. Any student wishing to opt-out must request a meeting with the associate dean for undergraduate medical education to discuss their reasons for wanting to be excused from the requirement to respond to a survey or participate in a focus group. This process must be started before the day the survey closes.
- D. In recognition that students are providing feedback about a system in which they are also being assessed, specific steps have been put in place to protect students from any real or perceived bias related to the provision of quality improvement information. Data that are collected in evaluation activities developed by VUSM or received from the AAMC are stored on secure servers managed by the Office of Undergraduate Medical Education.
- a. There are two levels of access to evaluation data stored in secure locations.
 - i. Individually identifiable data
 1. The Evaluation and Assessment Team Program Manager and staff receive non-disclosure training and do not share identifiable data.
 2. The Director of Evaluation and Assessment, the Associate Dean for Undergraduate Medical Education, and the Assistant Dean for Undergraduate Medical Education may review individually identifiable data as needed in the context of programmatic review.
 - ii. De-identified data
 1. The Senior Associate Dean for Health Sciences Education, members of UMEC, and other faculty and student leadership engaged in program improvement processes may be provided with de-identified data for programmatic review.
 - b. Routine access to evaluation data will be managed by the Evaluation and Assessment Team Program Manager. Non-routine requests for access will be referred to the Director of Evaluation and Assessment and, if necessary, the Associate Dean for Undergraduate Medical Education.

DEFINITIONS

Evaluation

The measurement of effectiveness of the curriculum and school programs, not individual student performance.

Doctor of Medicine: Program Policies and Procedures: Progress and Promotion

Doctor of Medicine Progress and Promotion

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 29, 2022 and became effective AY 2022-23.

This policy applies to Vanderbilt University School of Medicine Doctor of Medicine program

PURPOSE

The purpose of this policy is to describe the progress and promotions process.

POLICY AND PROCEDURES

The Promotion Committees, in consultation with representatives of the faculty responsible for instruction, are charged with making recommendations to the dean and the executive faculty regarding the progress and promotion of students. The executive faculty of the School of Medicine has final responsibility for the

Published 7/12/2022

School of Medicine

determination of medical student progress in the school.

Students who interrupt the four-year doctor of medicine program for any reason (e.g., dual degree program, leave of absence, etc.) and then return, follow the promotion procedures applicable to the class with which they are scheduled to graduate upon their return; however, as much as feasible, their academic requirements are aligned with expectations at the time of their entry to the School of Medicine. Such students are expected to confer with the associate dean for undergraduate medical education (ADUME) and the associate dean for medical student affairs (ADMSA) to clarify expectations prior to registering on their return.

[MD Grading Policy](#)

[MD Faculty Support and Advising Roles](#)

LCME Standard 10.3

Doctor of Medicine: Program Policies and Procedures: Progress and Promotion: Portfolio Reviews

Portfolio Review Process

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 29, 2022 and became effective AY 2022-23.

The student and their portfolio coach participate in the portfolio review process. This process summarizes evidence in the student's learning portfolio to determine if the student is meeting performance expectations and to direct future learning. At designated times for each phase, students complete a self-assessment of performance in each competency domain guided by templates in the portfolio and coaches complete an independent review of the student portfolio.

For each competency domain, students and coaches assign an overall progress level of:

- Below Threshold—indicates a failing performance
- Threshold—indicates a marginal performance that meets expectations in some areas but not all
- Target—indicates a performance that meets all expectations

Because this process integrates performance evidence across courses, it is possible that a student's performance could be designated as "Threshold" or "Below Threshold" in a competency domain despite passing grades in all courses. For any performance deficiency that is serious enough to result in a course failure or a final assessment of a domain as "Below Threshold" by a course director, the student and coach must assign the impacted domain(s) as "Below Threshold" as well.

Because the attainment of competencies is a developmental process, the performance levels that define below threshold, threshold, and target progress with the phases of the curriculum.

In addition to assigning a progress level for each competency domain, students write a narrative summary

Published 7/12/2022

School of Medicine

for their assigned progress level, complete a reflection, and develop personal learning goals and plans. Students must specifically address any competency domain(s) with a progress level of Threshold or Below Threshold in their learning goals and plan.

During the student-coach meetings, coaches and students review assessments, discuss and attempt to resolve any differences in progress level determinations, and review the learning goals and plans for appropriateness. If differences between student and coach interpretations of assessment evidence were not resolved during the student-coach meeting, this is indicated in the coach assessment. The original student self-assessment, the coach assessment, and the report of the joint assessment resulting from the student-coach meeting are retained in the portfolio and available for the Promotion Committee to review.

Doctor of Medicine: Program Policies and Procedures: Progress and Promotion: Promotion Committees

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 29, 2022 and became effective AY 2022-23.

Promotion Committee Process

The Promotion Committees may include faculty from the basic science and clinical departments within the School of Medicine. Each Promotion Committee member is assigned a cohort of students to follow throughout the phase. Prior to each meeting, Promotion Committee members review the portfolio and learning plan of each assigned student. Promotion Committee members have complete access to the assessment evidence in the learning portfolios of all their assigned students to assist them in making determinations regarding progress and promotion.

If a committee member cannot attend a meeting in person or remotely, the assistant dean for medical student assessment (aDA) will present student information on behalf of the committee member. The committee member assigned to the student shares with the aDA any information that they may have assembled in preparation for the meeting. As requested by the Promotion Committee, discussion may include input from the student's portfolio coach, clerkship/course directors, and other members of the committee.

As requested by the Promotion Committee, clerkship/course directors for their respective phases attend Promotion Committee meetings to provide information about the class as a whole and to answer questions that committee members may pose regarding a student's performance.

Portfolio Coaches attend committee meetings during which any of their assigned students are scheduled for presentation to provide information about a student's response to feedback and their learning plan and to answer questions that committee members may pose regarding the student's performance. If a portfolio coach is unable to attend, the assistant dean for undergraduate medical education (aDUME) or the aDA may provide information and answer questions on behalf of the portfolio coach.

A quorum of the Promotion Committee shall consist of at least four of the voting members of a committee; however, any proposed dismissal requires the participation of all voting members, unless an exception is granted by the senior associate dean for health sciences education (SADHSE).

Meetings occur three times during each phase of the curriculum (the Foundations of Medical Knowledge Phase (FMK), the Foundations of Clinical Care Phase (FCC) and the Immersion Phase (IMM). Additional meetings may be called by the ADUME if performance or conduct concerns arise regarding any individual student or as needed at the discretion of the ADUME.

Students to be discussed during committee meetings include:

- any student making "satisfactory progress with concern";
- any student on probation;

School of Medicine

- any student with a failing or marginal course grade;
- any student with a domain progress level of Threshold or Below Threshold;
- any student not making satisfactory progress on the required clinical experiences;
- any student seeking special privileges that require the committee's permissions; and
- other students as deemed necessary by faculty or administration for any other reason, including a conduct concern.

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 29, 2022 and became effective AY 2022-23.

Promotion Committee Recommendations

Each promotion committee is charged with making recommendations as follows:

Recommendations on Student Progress

Promotion Committee members review data in their assigned students' portfolios to assess whether students are making satisfactory progress towards attaining the achievement levels required for promotion to the next phase, or towards graduation, based on review of the assessment data compiled in each student's portfolio. Any students on probation are closely re-evaluated during these meetings.

1. *Satisfactory Progress:* Generally, for students with progress levels for all domains at Target or Reach and passing grades in all courses
2. *Satisfactory Progress with Concern:* Generally, for students with 1-2 domains at Threshold (regardless of course grades) and/or P* course grade
3. *Unsatisfactory Progress:* Generally, for students with >2 domains at Threshold, persistent Threshold performance in any single domain over time, or any domain Below Threshold (regardless of course grades), and/or a failing course grade. Ordinarily these students are placed on academic probation. (See section on Probation below)

Students with a designation of "Satisfactory Progress with Concern" receive a Letter of Concern from the Promotion Committee that outlines domains(s) of concern and expectations for improvement. Letters of Concern (LOCs) are not reported in the Medical Student Performance Evaluation (MSPE). LOCs are not generally reported externally and are intended to assist students in avoiding adverse actions; see section on Adverse Action below. However, LOCs will be disclosed in response to a Family Educational Rights and Privacy Act (FERPA) request and if required by law. Students then work with their coach to establish a personal learning plan (PLP) which includes learning goal(s) and a learning plan that specifically addresses the committee's concern(s). The student must enact the PLP prior to the next promotions committee meeting. The PLP and the student's progress will be reviewed at the next committee meeting. The Promotion Committee may require additional meetings between the coach and such students during the period between Promotion Committee meetings. Students who fail a required block, course, or clerkship must repeat that element, or must have an alternate remediation plan that is approved by the course director. The remediation plan must be articulated in the PLP.

Recommendations on Student Promotion

Recommendations regarding promotion are made at the end of the FMK phase and the end of the FCC phase to the Executive Faculty for a decision. In view of the integrated and individualized nature of the Immersion phase, meetings during this phase focus on the academic progress of each student, granting eligibility for the national residency matching process and certifying eligibility for graduation.

Promotion Committees determine whether students are ready for promotion based on successful completion of all phase requirements, as evidenced by passing grades in all required courses, and satisfactory progress in each VUSM Core Competency Domain. The Promotion Committee's determination of satisfactory progress in competency domains is based on review of the assessment documentation compiled in each student's learning portfolio. Students must fully participate in the self-assessment and personalized learning plan process in order to be promoted to the next phase.

School of Medicine

The FMK and FCC Phase Promotion Committees make one of the following recommendations for each student:

1. Promotion to next phase
2. Provisional promotion contingent upon authorized delayed completion of specified requirement(s). To support the individualized nature of our curriculum, situations may arise in which it is appropriate to permit special scheduling of educational opportunities. Students not on probation may request such scheduling flexibility through the ADUME. Some students, in compliance with approved targeted remediation plans, may also be eligible for this action.
3. Promotion on probation which includes a targeted remediation plan
4. Not eligible for promotion
 - a. Targeted remediation, with later re-evaluation for promotion
 - b. Repeat the phase on probation
 - c. Dismissal

Targeted remediation may include repeating a failed exam, retaking a failed course, and/or specialized coaching for deficits in specific domains.

The Immersion Promotion Committee makes one of the following recommendations for each student in the Fall of the anticipated final academic year of training:

1. Promotion to senior status (eligible for match process)
2. Promotion on probation (eligible for match process) which includes a targeted remediation plan [\[1\]](#)
3. Not eligible for promotion
 - a. Targeted remediation, with later re-evaluation for promotion to senior status
 - b. Dismissal

The Immersion Promotion Committee makes one of the following recommendations for each student in the Spring of the anticipated final academic year of training:

1. Recommended for graduation
2. Not eligible for graduation
 - a. Targeted remediation on probation, with later re-evaluation for “recommended for graduation”
 - b. Dismissal

Because the Promotion Committee reviews a student’s assessments across courses, it is possible for a student to pass all courses and still have performance or conduct within a competency domain(s) that warrants probation or dismissal.

Students are notified in writing by the committee chair and the ADUME of all Promotion Committee recommendations. For Promotion Committee recommendations other than promotion, students are also informed in person (if possible) by the ADMSA or designee to facilitate appropriate support and advising.

Adverse Actions Probation

Promotion Committees ordinarily recommend that a student be placed on probation if course grades include: any failures, competency progress levels persistently at Threshold in a single domain despite coaching or remediation, or competency progress levels Below Threshold in any single domain.

Probation generally monitors performance in active course and clinical work for a period of time as specified by the Promotion Committee. Probation serves three functions:

School of Medicine

- It serves as official documentation that the student is deficient in areas related to academic performance and/or competency development and expectations.
- It provides a pathway that the student must follow for probation to be lifted. This may include remediation, maintaining appropriate performance standards, and/or adhering to professional expectations.
- It describes the consequences that result if a student does not meet stated expectations during the period of probation.

Probation is noted in the Medical Student Performance Evaluation and will be reported to external organizations, including in graduation verifications (e.g., for medical licensure).

The PLPs for students who are placed on probation must include a remediation plan that explicitly addresses the domain(s) of concern identified by the Promotion Committee. The committee may add requirements to the PLP, such as regular meetings with the ADMSA or other advisers, and/or recommendations such as elimination of extracurricular activities that may be interfering with satisfactory academic progress.

All students who are placed on probation receive a letter from the ADUME and the chair of the Promotion Committee that outlines reasons for the probation, requirements and recommendations for addressing deficiencies, conditions for removal of probation, including an expected time frame, and actions that may be taken if conditions are not met.

Any student on probation is presented at subsequent Promotion Committee meetings to determine whether there has been satisfactory progress. At that time, the committee may recommend the following actions:

1. Remove probation: Domain(s) of concern now at Target. Probation can be removed at any Promotion Committee regular meeting if students have satisfactorily addressed deficiencies, even if this is before the time frame originally designated by the Promotion Committee.
2. Continue probation: Domain(s) of concern not yet at Target but progress is being made or the time frame for progress originally designated by the Promotion Committee has not yet been met.
3. Recommend dismissal: If a student who is on probation receives a P* or failing grade in a course or demonstrates persistent Threshold or Below Threshold performance in any competency domain, the Promotion Committee considers dismissal.

Temporary Suspension

The School of Medicine reserves the right, through the SADHSE (or designee), to temporarily suspend a student for conduct disrupting or otherwise negatively impacting the learning environment, pending referral to the Promotion Committee or other appropriate process. The SADHSE notifies the student in writing of the conditions of the temporary suspension. If the student is reinstated, the student works with the ADMSA to address any course work missed during the suspension.

Dismissal

Promotion Committees ordinarily recommend dismissal only after a student has been given a reasonable probationary period to address deficiencies. Most often, this reasonable period consists of a full academic phase or academic year. Dismissal may also be recommended at any time for a student who demonstrates either a singular egregious behavior or is involved in one or more serious incidents inconsistent with the expectations for medical students at VUSM or in violation of university policy.

A decision to recommend dismissal requires participation of all promotion committee members unless an exception is granted by the SADHSE. The committee meets as soon as possible to consider the situation, including its severity, and renders a recommendation. The ADMSA meets with the student prior to the committee meeting to hear the student's explanation, including any mitigating circumstances that could affect the committee's recommendations. The ADMSA presents the student's explanation, as well as any mitigating

School of Medicine

circumstances, to the Promotion Committee. Alternately, the student may elect to appear before the committee in person, submit an explanation in writing, or ask another faculty member to appear on their behalf.

Any recommendation for dismissal is presented by the ADUME to the dean or the dean's designee (typically the SADHSE). If the dean or designee accepts the recommendation of dismissal, written notice of this decision is provided to the student. The dean or designee may reverse the recommendation, in which case the dean or designee responds in writing to the Promotion Committee. In this circumstance, the Promotion Committee considers whether probation or other action is appropriate under the guidelines above.

Other Promotion Committee Actions Eligibility for Special Experiences

All committees may serve a role in recommending students for special opportunities, such as dual degrees or leaves of absence.

Certification for Participation in Residency Match Process

Students apply to residency programs during the fall semester of the intended academic year of graduation. In the spring semester, the School of Medicine must officially certify that students participating in the match process are eligible for graduation. The Promotion Committee for the Immersion Phase reviews student progress to make this determination in February. Any student with insufficient completion of requirements for graduation (accounting for planned course work in February, March, and April) could be withheld from the match process.

[\[1\]](#) Disclosures will be made consistent with the National Resident Matching Program requirements.

Doctor of Medicine: Program Policies and Procedures: Progress and Promotion: Student Recourse Regarding Promotion Committee Recommendations

Student Recourse Regarding Promotion Committee Recommendations

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on April 29, 2022 and became effective AY 2022-23.

Probation/Non-promotion

Students may ask for reconsideration of any recommendation for probation or non-promotion. The request must be made in writing (which may include electronic mail) to the associate dean for medical student affairs within seven (7) calendar days of delivery of the committee recommendation. Reviews are carried out by the senior associate dean for health sciences education. The student may meet with the SADHSE or present any additional information in writing. The SADHSE reviews the information presented by the student, information from the associate dean for undergraduate medical education, and input from the relevant promotion Committee (to include minutes, letters issued by the Committee, and direct input from the Committee Chair). The SADHSE (1) upholds the Promotion Committee recommendation, (2) requests a meeting of the Promotion Committee for reconsideration of additional information, or (3) reverses the recommendation. The decision of the SADHSE is provided in writing to the student and to the Promotion Committee. Even if the SADHSE reverses a recommendation of the committee, the SADHSE can require that the student follow any committee requirements and/or recommendations for addressing deficiencies.

Dismissal

Upon a decision of dismissal, a student is notified in writing of that decision and of the following options:

1. Voluntary withdrawal from VUSM. The decision to withdraw must be presented in writing (which may include electronic mail) by the student to the ADMSA within seven (7) calendar days after the student is informed of the decision for dismissal.
2. If the student does not request to withdraw within the seven-day period, the dismissal takes effect on the eighth calendar day.
3. The student must make a formal request for appeal in writing to the ADMSA (which may include electronic

School of Medicine

mail) so that it is received by the ADMSA within seven (7) calendar days after the student is informed of the decision for dismissal. A student who requests an appeal forfeits the option to withdraw. The ADMSA serves as the student's information resource in the appeals process and informs the ADUME and the SADHSE of the student's request for appeal.

If a dismissal decision is appealed, the student is placed on administrative leave and may not participate in patient care duties until the appeal is resolved. The dean or dean's designee, usually the SADHSE, assembles and convenes a review panel consisting of at least five (5) members of the executive committee of the executive faculty for an appeal review meeting within 30 days. In this review, the role of the dean or dean's designee is purely administrative, and they have no decision-making authority in this context. In preparation for the meeting, the ADUME makes available any relevant information/documentation to the panel, which includes all the assessment components of the student's portfolio. The ADMSA provides information to the student about the process. The student may choose to be present at the appeal review meeting and/or make a presentation in writing, which may contain documentation from other students, faculty members, and/or other sources. The student cannot have other representatives at this meeting. The chair of the Promotion Committee and the ADUME attend this meeting to present the findings of the Promotion Committee. The ADMSA also attends the meeting to answer questions from the review panel. The review meeting is conducted without the presence of attorneys for either party. However, either party may consult with its own counsel prior to the review meeting or during any breaks that might take place during the meeting. If the review panel upholds the decision, the student is dismissed without the opportunity to withdraw. If the review panel reverses the decision, the review panel provides the Promotion Committee with its written findings and refers to the Promotion Committee for consideration of whether probation is appropriate and, if so, for determination of the requirements and conditions to accompany probation. The decision of the review panel is final for the school.

Withdrawal from School

Students who wish to withdraw from the School of Medicine for any reason must do so in writing to the associate dean for medical student affairs. In some cases, the student may be able to receive a refund of tuition, but it is important that the student discuss this decision with VUSM Office of Enrollment Services staff before moving forward with the process. A student who has been dismissed from school, but decides to appeal the decision, is no longer able to choose to withdraw. If a student withdraws, reentry is possible only through the application process.

Doctor of Medicine: Program Policies and Procedures: Residents as Teachers

Doctor of Medicine Program Residents as Teachers Policy

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on October 27, 2020 and was published on July 19, 2021.

This policy applies to Vanderbilt University School of Medicine Doctor of Medicine Program

PURPOSE

To outline how Vanderbilt University Medical Center (VUMC) graduate medical education (GME) programs prepare residents and fellows for their role in teaching medical students.

OVERVIEW

Residents and fellows play an important instructional role in the clinical education of medical students. In order to fulfill that responsibility, residents and fellows need to be familiar with the competencies and milestones expected of medical students and have orientation and teaching resources available to enhance their teaching and assessment skills.

POLICY

1. All incoming residents and fellows are required to attend GME New Resident and Fellow Orientation, which includes an orientation to their roles and responsibilities as teachers.
 - A. Attendance is collected and monitored centrally by the Office of GME and the Associate Dean for GME.
 - B. The orientation covers the following topics:

School of Medicine

- a. Setting a positive learning environment
 - b. Setting expectations
 - c. Principles of feedback
 - d. Microskills of teaching
2. Residents and fellows who will teach medical students participate in departmental clerkship orientations where they receive a copy of the clerkship objectives.
 3. Residents and fellows who evaluate or assess medical students receive an annual online attestation form requiring them to review and acknowledge receipt of the medical school's graduation milestones and competencies and clerkship objectives.
 4. The VUMC Educator Development Program and the GME Office offer teaching development workshops to help faculty, residents, fellows, and instructors improve teaching skills. Attendance is monitored centrally by the Educator Development Program and the GME Office.
 5. Clinical departments offer additional teaching development workshops to residents and fellows, including topics such as the creating a positive learning climate, setting expectations on the clerkship, giving effective feedback, precepting, team leadership, and small group facilitation. Participation is monitored by the Associate Dean for GME and the residency program directors.

RELATED LCME STANDARDS

9.1: Preparation of Resident and Non-Faculty Instructors

PRINCIPLES

At Vanderbilt University School of Medicine (VUSM) and VUMC, we value the role residents and fellows play in the teaching and learning of medical students. We believe in the importance of supporting residents and fellows in their roles as teachers and providing excellent training for this role.

Accountable Dean or Director: Associate Dean for GME/DIO

Doctor of Medicine: Program Policies and Procedures: Student Support and Advising

Doctor of Medicine Program Student Support and Advising Policy

This policy was approved by the Doctor of Medicine Undergraduate Medical Education Committee on December 7, 2021 and became effective AY 2022-23.

This policy applies to the Vanderbilt University School of Medicine Doctor of Medicine Program.

Purpose

The purpose of this policy is to describe the options and expectations for student support and advising.

Policy

Vanderbilt University School of Medicine provides comprehensive advising resources to promote student wellness and success in medical school. The advising program provides distinct resources to address the three domains of student life: academic, career, and personal. Students are introduced to the system of advising at orientation prior to entering their first year of medical school. Subsequent discussions of advising resources take place in a number of settings during the first semester of medical school. In addition to the formal advising system, a variety of other resources for student academic support exist, including phase/course/clerkship directors, course self-assessment modules, group study, and optional review sessions.

Students are strongly encouraged to seek assistance and support of various types as needed during training. The abilities to self-identify a need for assistance/support and to reach out to resources are important professional skills, and students are expected to develop these skills during their medical school careers.

LCME Element 11

Doctor of Medicine: Program Policies and Procedures: Transportation

During their medical school careers, students may be placed for educational experiences in clinical sites located away from the Vanderbilt University campus. Generally speaking, students should be prepared to drive up to 35 miles from the Vanderbilt University campus to reach off-site placements. Students are responsible for their own transportation to and from all clinical sites for educational experiences, including all costs associated with that travel.

Last reviewed on May 14, 2021.

Doctor of Medicine Special Programs: Medical Scientist Training Program

The central goal of the Medical Scientist Training Program at Vanderbilt is to identify, mentor, and foster the careers of a diverse workforce of superior future leaders in academic medicine, industry, and government who are dedicated to improving human health through research, clinical activities, and leadership. Based on solid clinical training and rigorous, highly impactful research training, our program fosters the development of independent scientific careers. We provide students with an integrated curriculum comprising a strong core education in medicine and intensive training in scientific inquiry. Successful completion of the program leads to attainment of both the M.D. and Ph.D. degrees. MSTP students come from a diverse applicant pool drawn from throughout the nation and abroad.

For additional information about the Vanderbilt MSTP visit the program website at medschool.vanderbilt.edu/mstp.

Information pertaining to the Degree Requirements for this program is available in the Medical Scientist Training Program (MSTP) section of the [Doctor of Medicine Program Degree Requirements Policy](#).

Information pertaining to the Entrance Requirements for the Medical Scientist Training Program can be found in the MSTP section of the [Doctor of Medicine Requirements for Entrance](#).

Information pertaining to the Application Process for the Medical Scientist Training Program can be found in the Application Procedure for Admission to Medical Scientist Training Program section of the

[Policy on Application for Admission to the Doctor of Medicine Program](#).

MSTP Financial Support

Funding for tuition and stipend is provided for those who gain admission to the Medical Scientist Training Program. A training grant from the NIH supports a portion of the expenses for the MSTP; the remainder comes from institutional support and philanthropy. Students who do not maintain good academic standing risk losing this financial support.

Doctor of Medicine Special Programs: Oral and Maxillofacial Surgery (OMS-MD)

The Vanderbilt University Medical Center offers an Oral and Maxillofacial Surgical (OMS) Residency Program that, in collaboration with Vanderbilt University School of Medicine, allows qualified individuals to complete a

Published 7/12/2022

School of Medicine

Vanderbilt University M.D. in three years and thereafter progress directly into the VUMC OMS residency. The Vanderbilt University Oral and Maxillofacial Surgical Residency Program and VU M.D. program accept one student each year to this program. The OMS-MD curriculum allows trainees to meet graduation requirements for the doctor of medicine at the end of three years, at which point the Vanderbilt University M.D. is conferred. During the last three of six years in the OMS-MD program, the trainees continue full time in the VUMC OMS residency program.

With a case-based, system-based learning model and personalized medical school curriculum, there are generous opportunities for the OMS resident-medical student to explore areas of personal interest and emphasis programs for an outstanding medical/surgical education. The program prepares residents for the community practice of oral and maxillofacial surgery as well as for advanced fellowship training and academic careers. Areas of clinical strength include the comprehensive management of all facets of facial trauma, benign head and neck infections, trigeminal nerve injuries, head and neck pathology, orthognathic surgery, facial reconstruction, secondary cleft care, and dentoalveolar surgery and implants with an emphasis on implant site development.

Information pertaining to the Degree Requirements for this program is available in the [Doctor of Medicine Program Degree Requirements Policy](#).

Information pertaining to the Entrance Requirements for the Oral and Maxillofacial Surgery-Doctor of Medicine Program can be found in the OMS section of the [Doctor of Medicine Requirements for Entrance](#).

Information pertaining to the Application Process for the OMS can be found in the Application Procedure for Admission to Oral and Maxillofacial Surgery—Doctor of Medicine Program section of the [Policy on Application for Admission to the Doctor of Medicine Program](#).

Last reviewed on March 6, 2022.

Doctor of Medicine Tuition, Fees, and Financial Aid

Tuition for the academic year 2022-23 is \$64,882. Detailed information pertaining to estimated cost of attendance is found at medschool.vanderbilt.edu/financial-aid/md-cost-of-attendance.

Payment of Tuition and Fees

For students enrolled in the Doctor of Medicine program, one half of tuition, fees, and other university charges is due and payable by 31 August. The second half of tuition, fees, and other university charges is due and payable by 31 January. Additional information can be found on the [School of Medicine Tuition, Fees, and Financial Aid](#) page of this catalog and at vanderbilt.edu/stuaccts.

Students in the Medical Scientist Training Program (MSTP) are principally enrolled in either the School of Medicine or the Graduate School. Each MSTP student receives a full scholarship from the MSTP that covers tuition and fees for the first year, second year, and final year of medical school as well as the first graduate school year. The thesis advisor is responsible for tuition, stipend, and fees from second year of graduate school through the date of Ph.D. dissertation defense.

Financial Assistance

Education leading to the doctor of medicine requires a careful consideration of financial commitment by prospective students and their families. Financial planning is an important part of the student's preparation for medical school.

Scholarships awarded on the basis of merit and need are available through Vanderbilt. Financial aid from school

School of Medicine

sources must be considered a supplement to governmental and other sources, rather than the primary source of funds necessary to attend medical school. Scholarships may not be adequate to meet students' demonstrated need, but approved educational expenses are met with funds from a combination of sources, including loans. Government funds that furnish significant loans to medical students are the Federal Direct Unsubsidized Loan and the Federal Direct Graduate PLUS loans. Private loans are also available to all students, including international students.

For Financial Assistance information pertaining to the Medical Scientist Training Program (MSTP) and the Oral Maxillofacial Surgery (OMS-MD) program, please see [Special Programs](#).

Additional information and applications for financial aid are online at medschool.vanderbilt.edu/financial-aid/. Applicants desiring more specific information about financial aid resources should contact the medical school Office of Enrollment Services, Financial Aid.

Last reviewed on April 22, 2022.

Faculty

For a list of current faculty, please visit vanderbilt.edu/faculty-affairs/faculty-registry/.

Hearing and Speech Sciences Education: Doctor of Audiology: Academic Policy: Degree Requirements

Requirements to Earn Degree

All candidates for the Doctor of Audiology must have satisfactorily completed all residency, academic course, and clinical practica requirements of the program.

A minimum of 98 credit hours (academic coursework and clinical practicum) are required for the Au.D.

Length and Delivery of Program

The candidate for the Au.D. degree generally spends eleven academic semesters completing the program and is expected to be enrolled in the School of Medicine during each fall, spring, and summer semester until completion of the degree.

The normal time frame for completion of required course work for the doctor of audiology degree is four years. If an individual requires additional time due to unusual circumstances (e.g., remediation, leave of absence), the degree program may extend the maximum amount of time to complete the degree to five years.

Curriculum and Tracks

The Vanderbilt DHSS offers a specialty track training for Au.D. students in early identification and management of infants and children with hearing loss. Students enrolled in the specialty track will have additional course work and practicum experience that will prepare them to work with infants and children who are deaf or hard of hearing. This interdisciplinary approach to training—by combining some core courses with speech-language pathology, audiology, and deaf education students while continuing separate courses that are specific to their disciplines—is unique to our Vanderbilt program.

There is also specialty track training in vestibular sciences. Students who decide to follow this specialty track will, at graduation, possess specialized skills in the assessment of the peripheral and central vestibular system (i.e., vestibulo-ocular, vestibulo-spinal, and vestibulo-colic reflexes). Additionally, graduates will understand what rehabilitative options are available to patients with either unilateral or bilateral vestibular system impairments. Course work will include three (3) formal courses in vestibular sciences. Specialty track students will have practicum experiences in the Balance Disorders Clinic which assesses approximately 1,400 patients each year. It

School of Medicine

is our intention for specialty track students to be offered the opportunity to have a concentrated clinical Maymester experience at a clinical site separate from Vanderbilt University. Finally, it will be expected that the capstone project conducted by the specialty track student will be in a vestibular system/balance topic area.

Externship

Au.D. students must complete a fourth-year clinical externship which begins during the summer of the third year and must continue for a minimum of ten months.

Dissertation/Capstone

All Au.D. students must complete a capstone project. The doctoral capstone project comprises 6 credit hours taken in years 2 and 3.

Course List

A full list of program courses is provided in this catalog under [Courses by Program](#).

Hearing and Speech Sciences Education: Doctor of Audiology: Academic Policy: Progress and Promotion

Periodic Reviews

Student performance is reviewed twice a year, and failure to appropriately develop clinical skills or maintain satisfactory academic progress can result in probationary status, which must be alleviated to continue in the program.

Satisfactory Academic Progress and Good Standing

All students who maintain at least a 3.0 GPA and have earned at least a B- in all course work and clinical practica are classified as in good standing through their demonstration of satisfactory academic progress.

Graduation

The Department of Hearing and Speech Sciences follows School of Medicine policy for general degree requirements. See the [Academic Policies for All School of Medicine Programs](#) page of this catalog.

Program Commencement

Degree candidates must have successfully completed all curriculum, academic, clinical, and residency requirements (applicable to the degree sought) to be allowed to participate in the ceremony. A student completing degree requirements in the summer or fall semester is invited to participate in Commencement the following May. However, the semester in which the degree was earned is the one recorded on the diploma and the student's permanent record.

Formal Remediation and Probation Formal Remediation Plan

Students who receive a grade of C+ or poorer in academic courses and/or clinical courses/practica, whether required or elective, may be required to remedy the grade as specified in a formal remediation plan. If the course in question is prerequisite for another course, the student is required to remedy the grade before being permitted to proceed.

Possible remedies include re-examination, course/practica repetition, and/or prerequisite examination prior to entering a higher-level course. Credit may be given based on re-examination or satisfactory repetition of the course/practica work, but the original grade remains on the record and may be counted in the computations as cause for dismissal if additional poor performance occurs.

Probation

Failure to appropriately develop clinical skills, failure to earn at least a B- in a single course, or failure to maintain a GPA equal to or above 3.0, results in probationary status which must be alleviated in order to continue in the program. The faculty committee recommends removal of probationary status when a student has demonstrated a continuing record of satisfactory performance in succeeding units of academic study/clinical practica and maintains a GPA of at least 3.0.

Dismissal

School of Medicine

Students placed on academic and/or clinical probation who do not perform in a satisfactory manner during the subsequent academic year, including meeting the formal goals specified in their remediation plan, are considered for dismissal from school unless there are mitigating circumstances approved by the appropriate faculty committee, vice chair of graduate studies, and chair, DHSS. Students on probation may be considered for dismissal from school if their academic and/or clinical performance continues at a marginal level, even though there may be no recorded failures.

The Department of Hearing and Speech Sciences follows School of Medicine policy for formal remediation, probation, dismissal, and appeals. See the [Academic Policies for All School of Medicine Programs](#) chapter of this catalog for more information on these topics.

Eligibility to Reapply

Students who are dismissed from the program are not eligible to reapply.

Hearing and Speech Sciences Education: Doctor of Audiology: Academic Policy: Student Assessment

Grades

The Department of Hearing and Speech Sciences follows School of Medicine policy for grades. See the [Academic Policies for All School of Medicine Programs](#) page of this catalog.

Grade Grievance Procedure

Students should seek redress of a problem with a grade as soon as possible after receiving the grade and in no case later than four weeks after the grade is released. Students with a problem should confer directly with the course director. Every effort should be made to resolve the problem fairly and promptly at this level. If the student cannot resolve the problem through discussion with the course director, the student should request an appeal by writing (email is acceptable) to the program director within two weeks of speaking with the course director. (The course director also should be included on the request for appeal.) In cases where the course director is also the degree program director, the appeal should be made to the assistant dean of health sciences education or his/her designee. If resolution is not achieved by the program director/assistant dean of health sciences education, the case is referred to the senior associate dean of health sciences education or his/her designee, who makes the final decision. At each level of review, the course's assessment practices are reviewed, and the individual student's situation considered.

Clinical Assessment

All Au.D. students are expected to make satisfactory progress in developing clinical skills by participating in clinical practicum throughout their time in the program. The first semester of clinical practicum involves more observation and guidance than actual hands-on experience. Students are graded in the first semester of practicum, primarily based on attendance, punctuality, professionalism, and active engagement in the learning process. In subsequent semesters, clinical supervisors assess clinical performance/learning for competency areas specific to the clinical setting. Grades for practicum assignments and case conference may be reduced for unexcused absences from either clinic or clinical case conference according to prevailing departmental guidelines.

Hearing and Speech Sciences Education: Doctor of Audiology: Academic Policy: Student Support and Advisory Services

Academic Advisory Resources

The program director has an open-door policy for all students in the Au.D. program.

Health and Wellness

See the [Life at Vanderbilt](#) page of this catalog.

Hearing and Speech Sciences Education: Doctor of Audiology: Accreditation

The doctor of audiology (Au.D.) education program (residential) at Vanderbilt University is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association, 2200 Research Blvd., #310, Rockville, MD 20850, (800) 498-2071 or (301) 296-5700.

School of Medicine

Hearing and Speech Sciences Education: Doctor of Audiology: Admission

Admission Requirements

The Au.D. program encourages applicants with backgrounds in such areas as communication disorders and other health-related professions, biomedical sciences, psychology, and psychoacoustics. All students must possess GRE scores consistent with Vanderbilt standards, a strong record of past academic achievement, a commitment to hearing health care, excellent oral and written communication skills, a willingness to work collaboratively, a strong work ethic, perseverance, and strong organizational and time management skills.

Undergraduate Prerequisites

There are no specific undergraduate prerequisites for the Au.D. However, courses related to the profession and basic sciences are helpful.

A course in normal language development is strongly encouraged but not mandatory. Students who do not have an undergraduate course in normal language development are required to take the Master of Science in Speech-Language Pathology (M.S.-SLP) course in Child Language Acquisition during the Au.D. program.

Please visit our website at medschool.vanderbilt.edu/hearing-speech/ for additional information.

Application Process Application Deadline: January 15

The application, test scores, and all supporting materials must be received by January 15.

Application Fee

Non-refundable \$50.00 application fee

Statement of Purpose (personal statement)

The Statement of Purpose is a required and an important part of the application. The DHSS has no set criteria for the personal statement; it should be no less than one page but no more than 1-1/2 pages (single spaced).

Required Materials

Transcripts/Academic information

Official transcripts, which also should be sent after the completion of the applicant's degree, must be sent directly to Vanderbilt according to instructions below. Applicants will be prompted to upload academic records for each college or university attended when officially submitting an application. An academic record can be in the form of a legible scanned copy of a transcript or an academic record from the institution's Student Information System portal. If applicants are currently enrolled, the academic record should be submitted after the fall semester grades have been posted, if possible.

If applicants don't have official transcripts during the application, unofficial transcripts can be provided instead. Official transcripts are required only after an offer of admission is made and accepted. To be considered official, a transcript must be sent directly from the applicant's institution to Vanderbilt. Official transcripts are submitted as instructed at registrar.vanderbilt.edu/academic-records/external-degree-verifications.php. Please do not mail transcripts to the department office.

Letters of Recommendation

Three letters of recommendation are required and up to five maximum may be submitted. Letters of recommendation should be from individuals who can speak to the applicant's academic abilities and accomplishments and likelihood of the applicant's success in a clinical or research program such as faculty and or supervisors.

Recommenders are strongly encouraged to submit their letters electronically. The application allows the applicant to identify their recommenders and the system notifies them (on the applicant's behalf) by e-mail.

School of Medicine

When the electronic recommendations are submitted, they are “attached” to the application, and the applicant receives an email message confirming receipt of each recommendation.

Please note: email addresses should be proofed for accuracy before finalizing the application. If an incorrect email address is entered into the system, the recommender will not receive the request for recommendation.

If applicants choose not to use the electronic method, it is their responsibility to contact their recommenders and provide them with the DHSS recommendation link found on the department’s website at medschool.vanderbilt.edu/hearing-speech/ under Academic, Au.D., Application Information. Paper letters of recommendation should be mailed to Vanderbilt University CDM, PMB 407833, 2301 Vanderbilt Place, Nashville, TN 37240-7833 and should be received in that office by the application deadline.

Test Scores

Official GRE scores come electronically from the Educational Testing Service (ETS) and are required for all applicants. Official TOEFL scores are required for all applicants whose native language is not English, even if the applicant has completed a 4- year degree in a U.S. institution. The scores should be sent to institution code 1871. The department code is not required to attach official scores to the application.

Important Note: It is the applicant’s responsibility to allow sufficient time for the ETS to score and report test results. Please refer to the ETS website (www.ets.org/gre) to access the Detailed Score Reporting Schedule for the GRE exam.

Resume/CV or Supplemental Materials

Applicants may upload a resume/cv or other documents the committee may review by accessing the status page of the application and adding the documents in the “upload materials” section.

Tuition Scholarships

Given that most graduate students need financial assistance, need is not a factor; financial awards are offered based on merit, using criteria very similar to those used to judge acceptance into the program. There are no additional forms to complete for scholarships.

Special Requirements for International Applicants

Test of English as a Foreign Language (TOEFL) is required for all international applicants whose native language is not English, even if an applicant has completed a 4-year degree at a U.S. Institution. Since the Au.D. is a clinical practice degree, it is critical that students have robust written and spoken English skills. Consequently, a TOEFL score of at least 110 is expected for successful applicants.

Financial Resources: To meet requirements for entry into the United States, international applicants must demonstrate that they have sufficient financial resources to cover the cost of their education. Please be prepared to provide evidence of this funding.

Selection Criteria, Offer, and Acceptance

All students must possess GRE scores consistent with Vanderbilt standards, a strong record of past academic achievement, a commitment to hearing health care, excellent oral and written skills, a willingness to work collaboratively, a strong work ethic, perseverance, and organizational and time management skills. The GRE, GPA, and letters of recommendation are components that contribute to our holistic admissions practices, which also consider diversity, leadership, educational background, and research experiences, among others.

Admission Decisions

Admission decisions are mailed by March 15.

Response from Students: April 15

School of Medicine

If a written response is not received or if the offer is not accepted through the online portal by April 15, the department has the right to rescind the offer of admission and financial award. Confirmed receipt of an email to the vice chair of graduate studies, specifying the applicant's decision, by April 15th can be used to extend the deadline for receipt of the written response.

Transfer Students/Credits

Transfer credit is not accepted for the Au.D. program. Transfer students may apply and, if accepted, generally start at the beginning of the academic year, and complete the program's curriculum in its entirety.

Non-degree-seeking Students

Non-degree-seeking students are allowed to enroll in audiology courses offered by the School of Medicine with approval from the instructor and vice chair of graduate studies on a case-by-case basis. In many cases, class size and/or resource limitations prevent this approval from occurring.

Visiting Students

Visiting students are not allowed to enroll in audiology courses offered by the School of Medicine.

Hearing and Speech Sciences Education: Doctor of Audiology: Contact Information

Additional information may be obtained by contacting program officials at [Contact | Hearing and Speech Sciences | Vanderbilt University](#).

Hearing and Speech Sciences Education: Doctor of Audiology: Dual Degrees

Au.D./Ph.D. in Hearing and Speech Sciences

The pursuit of the Au.D./Ph.D. dual degree is appropriate for students planning careers that combine clinical and research components, focus primarily on research, or include teaching and research. The dual degree Au.D./Ph.D. program allows students to complete the Au.D./Ph.D. degrees in one to two terms less than the time required to complete both degrees separately.

Students may apply for direct admission to pursue a dual degree in the Au.D./Ph.D. or may choose to apply progressively for the Ph.D. after one-and-a-half years of study in the Au.D. program. Those wishing to apply for direct admissions to the Au.D./Ph.D. program should apply to the Ph.D. program and indicate the dual degree interest in their personal statement. Progressive application includes a written request to the expected mentor and the vice chair of graduate studies, prior to the January application deadline during the applicant's second year. Direct applications for the dual Au.D./Ph.D. degree are reviewed by the Hearing and Speech Sciences admissions committee. Interested applicants may obtain more information by contacting Todd Ricketts, vice chair of graduate studies, Department of Hearing and Speech Sciences.

Hearing and Speech Sciences Education: Doctor of Audiology: Other Program Policy and Procedure

Program Evaluation

The Department of Hearing and Speech Sciences chair has regular meetings with staff, students, and faculty and the outcomes of these meetings, in combination with curriculum review committee meetings, employer surveys, alumni surveys, and supervisor evaluations, are used to identify areas of potential program improvement. These areas are then discussed in regular meetings (typically monthly) of the full DHSS faculty and considered during annual revisions of department pillar goals.

Leave of Absence

Graduate programs in the DHSS require continuous registration for fall, spring, and summer semesters. Students who need to interrupt their studies (Au.D., M.D.E., and M.S.-S.L.P.) must apply to the vice chair of graduate studies, DHSS, and receive written approval for a leave of absence. Students who need to take a leave of absence for any reason, including medical/mental health or family leave, must first contact the vice chair of graduate studies to initiate the leave. Prior to taking a leave of absence, a plan for re-entry into the curriculum and meeting graduation requirements will be developed in collaboration with the vice chair of graduate studies as part of the leave approval process. If it is not possible to develop a plan for return prior the leave being granted due to (for example) a medical or mental health emergency, the student should contact the vice chair of graduate studies as soon as they are able during the leave to develop a plan.

School of Medicine

Students may also consult with the Vanderbilt Student Access Services office (vanderbilt.edu/student-access/) when considering taking a leave of absence.

A leave of absence may be granted for a period of up to 14 months. Those on leave of absence are required to communicate with the vice chair of graduate studies at least one month prior to their return from leave of absence, in order to ensure proper enrollment upon their return. Those who do not communicate with the program prior to returning may not be allowed to enroll for courses.

Prior to returning from medical leaves of absence (including mental health), students must provide documentation from all care providers indicating that the medical reason for their leave of absence has been resolved sufficiently that they are able to resume their program, with or without reasonable accommodations. If any accommodations are needed, students must submit a request for an accommodation to the Vanderbilt University Student Access Services Office as early as possible prior to their return. Upon return from leave of absence, students must meet all compliance requirements, which may include completing a criminal background check and/or fingerprinting, updating immunization records, and meeting other compliance requirements.

Degree completion timelines are governed by policies of the medical school and the degree program, as appropriate.

Attendance Class

Students are expected to attend all classes. Attendance regulations assume that academic and clinical success is the student's primary goal when pursuing a graduate degree. The weight given to class attendance in determining course grades is an academic matter; therefore, instructors are responsible for allowing make-up work in the case of absences. If a grade penalty exists, it should be noted in the course syllabus.

Clinic

Student attendance is required at every clinical session throughout the duration of each practicum assignment unless otherwise scheduled by the supervisor. Only those absences due to illness or similar unanticipated emergencies may be excused; these should be reported immediately directly to the supervisor. For additional information, see your clinic handbook.

Any absences from class or clinic due to illness, death of an immediate family member, or similar unanticipated emergencies that affect more than one class or clinic period should be reported to the vice chair of graduate studies as soon as possible. The VCGS will work with the student and affected parties to ensure that adequate and reasonable accommodations are provided for without penalty to the student. In the case of medical issues including mental health difficulties with long-term implications, the student is encouraged to contact the Vanderbilt Student Access Services vanderbilt.edu/student-access/ office directly to arrange accommodations.

Honor Code

Each student will be compliant with the Vanderbilt University School of Medicine Honor Code guidelines. Every academic year each student will sign, by written or electronic signature, an acknowledgement indicating that the student will follow the Honor Code rules and requirements.

Student Work Policy

Students are typically allowed to work 10 hours per week outside of their scheduled classes while school is in session. All student workers need to request the approval of the VCGS prior to beginning employment.

Transportation

Students may be placed for educational experiences in clinical sites located away from the Vanderbilt University campus including counties surrounding Davidson County (Nashville). Students should be prepared to drive up to 60 miles (one way) from the Vanderbilt University campus to reach off-site placements. External placements may be up to three days per week for an entire semester. Students are responsible for their own transportation to and from all clinical sites for educational experiences, including all costs associated with that travel.

School of Medicine

Honors and Awards

Jay W. Sanders Award. For outstanding clinical and academic achievements in audiology.

Ohde-Grantham Award for Excellence in Student Research. For students who exemplify excellence in research in any of the departmental disciplines.

Laura Knox Humanitarian Award. For students who possess and exemplify compassion for others through service leadership.

Hearing and Speech Sciences Education: Doctor of Audiology: Program Overview

The doctor of audiology (Au.D.) is a four-year post-baccalaureate degree that is administered through the Vanderbilt University School of Medicine. The program provides clinical education preparing for professional certification and/or licensure in Audiology. The Au.D. replaced the master of science degree as the requirement for the entry-level practitioner of audiology.

The doctor of philosophy (Ph.D.) degree continues to be offered to students interested in becoming teacher/investigators.

At present, Vanderbilt's Au.D. program is ranked #1 in the nation by *U.S. News and World Report*.

Department of Hearing and Speech Sciences Mission

The DHSS is dedicated to serving persons with communicative and related disorders through treatment, education, and research; enhancing our knowledge of communicative and related disorders; shaping the future of communication disorders and related disciplines through national and international leadership; promoting public awareness and prevention of communicative and related disorders; ensuring continuous improvement of operations through personal and professional development; and generating measurable benefits for our community, employees, students, clients and their families, and other customers. As part of this mission, the Au.D. program ensures that students complete all academic course and clinical practica requirements for certification standards in audiology.

Standing Program Committees Admission Committee

This committee has the responsibility of making recommendations concerning admission and scholarships for applicants to the Au.D., M.D.E., and M.S.-S.L.P. programs. The committee oversees and continually reviews the admission process. It typically meets twice per academic year. Membership includes all DHSS faculty.

Promotion Committee

This committee monitors student progress toward completing the Au.D. degree requirements and makes recommendations regarding promotion, remedial action, or dismissal as appropriate for each student. This committee meets at least twice per academic year but is called to meet, in addition to these regular meetings, when there is a student of concern identified. Membership includes all DHSS audiology program faculty.

Curriculum Committee

This committee continually monitors and reviews the Au.D. curriculum. Any recommended changes to the curriculum are made to the DHSS faculty. Membership includes all DHSS audiology program faculty.

Program's Major Facilities

Practicum sites include the Vanderbilt University Medical Center, Monroe Carell Jr. Children's Hospital at Vanderbilt, and the Vanderbilt Bill Wilkerson Center for Otolaryngology and Communication Sciences. Additional sites include the Veterans Affairs Medical Center and various other hospitals, outpatient clinics, and private practices in the middle Tennessee area.

Hearing and Speech Sciences Education: Doctor of Audiology: Tuition, Fees, and Cost of Attendance

School of Medicine

For information about university and School of Medicine costs and fees please refer to the [School of Medicine Tuition, Fees, and Financial Aid](#) page of this catalog.

Academic Year 2022-23	
Tuition, 1st, 2nd, 3rd years	\$44,586
Tuition, 4th year	8,828
Hourly rate	1,689

Detailed information pertaining to estimated cost of attendance is found at medschool.vanderbilt.edu/financial-aid/doctor-of-audiology-cost-of-attendance.

Payment of Tuition and Fees

Students registered for a full-time course load (eight hours or more for fall and spring and six hours or more for summer) are billed at the block tuition rate for the term in which they are enrolled. Students registered for less than a full-time course load (seven hours or fewer in the fall and spring or five 5 hours or fewer in the summer) are billed at the hourly tuition rate for the term in which they are enrolled. Certain courses are designated to trigger full-time enrollment (and block tuition billing) even though the number of credits carried by the course is fewer than eight.

Hearing and Speech Sciences Education: Master of Education of the Deaf: Academic Policy: Degree Requirements

Requirements to Earn Degree

All candidates for the master of education of the deaf must have satisfactorily completed all residency, academic course, and practica requirements of the program.

Length and Delivery of Program

The candidate for the M.D.E. program spends at least three academic semesters of graduate study at Vanderbilt. Candidates for the master of education for the deaf degree are expected to be enrolled in the School of Medicine during each fall, spring, or summer semester until completion of the degree.

The normal time frame for completion of required course work for the master of education of the deaf degree is one to two years, depending on student's academic background upon entering the program. If an individual requires additional time due to unusual circumstances (e.g., remediation, leave of absence), the degree program may extend the maximum amount of time to complete the degree to three years.

Curriculum and Tracks

For M.D.E. students on the one-year track, a minimum of 37 semester hours (academic coursework and practicum) are required. Students on the two-year track must complete a minimum of 64 semester hours (academic coursework and practicum) for the M.D.E. and endorsement in special education hearing in PreK 12. For two-year students not seeking endorsement, a minimum of 58 semester hours (academic coursework and practicum) are required.

Internship/Externship

Maymester internship/externship, designed to provide students with a unique opportunity for a three-week intensive practicum working with deaf and hard-of-hearing children, is required for graduation.

Other Degree Requirements

Students must also complete a service obligation experience which provides them with the opportunity to gain an enhanced understanding of children with hearing loss and their families. Service obligations require a minimum of 100 hours during the first year of enrollment. At least half of the hours should involve direct child contact.

Course List

School of Medicine

A full list of program courses is provided in this catalog under [Courses by Program](#).

Hearing and Speech Sciences Education: Master of Education of the Deaf: Academic Policy: Progress and Promotion

Periodic Reviews

Student performance is reviewed twice a year, and failure to appropriately develop clinical skills or maintain satisfactory academic progress can result in probationary status, which must be alleviated to continue in the program.

Satisfactory Academic Progress and Good Standing

All students who maintain at least a 3.0 GPA and have earned at least a B- in all course work are classified as in good standing through their demonstration of satisfactory academic progress.

Graduation

The Department of Hearing and Speech Sciences follows School of Medicine policy for general degree requirements. See the [Academic Policies for All School of Medicine Programs](#) page of this catalog.

Formal Remediation and Probation *Formal Remediation Plan*

Students who receive a grade of C+ or poorer in academic courses and/or clinical courses/practica, whether required or elective, may be required to remedy the grade as specified in a formal remediation plan. If the course in question is prerequisite for another course, the student is required to remedy the grade before being permitted to proceed.

Possible remedies include re-examination, course/practica repetition, and/or prerequisite examination prior to entering a higher-level course. Credit may be given based on re-examination or satisfactory repetition of the course work, but the original grade remains on the record and may be counted in the computations as cause for dismissal, if additional poor performance occurs.

Probation

Failure to appropriately develop teaching skills, failure to earn at least a B- in a single course, or failure to maintain a GPA equal to or above a 3.0, results in probationary status which must be alleviated to continue in the program.

Dismissal

Students placed on academic and/or practica probation who do not perform in a satisfactory manner during the subsequent academic year, including meeting the formal goals specified in their remediation plan, are considered for dismissal from school unless there are mitigating circumstances approved by the appropriate faculty committee, vice chair of graduate studies, and chair, DHSS. Students on probation may be considered for dismissal from school if their academic and/or practica performance continues at a marginal level, even though there may be no recorded failures.

The Department of Hearing and Speech Sciences follows School of Medicine policy for formal remediation, probation, dismissal, and appeals. See the [Academic Policies for All School of Medicine Programs](#) chapter of this catalog for more information on these topics.

Eligibility to Reapply

Students who are dismissed from the program are not eligible to reapply.

Hearing and Speech Sciences Education: Master of Education of the Deaf: Academic Policy: Student Assessment

Grades

The Department of Hearing and Speech Sciences follows School of Medicine policy for grades. See the [Academic Policies for All School of Medicine Programs](#) page of this catalog.

School of Medicine

Grade Grievance Procedure

Students should seek redress of a problem with a grade as soon as possible after receiving the grade and in no case later than four weeks after the grade is released. Students with a problem should confer directly with the course director. Every effort should be made to resolve the problem fairly and promptly at this level. If the student cannot resolve the problem through discussion with the course director, the student should request an appeal by writing (email is acceptable) to the program director within two weeks of speaking with the course director. (The course director also should be included on the request for appeal.) In cases where the course director is also the degree program director, the appeal should be made to the assistant dean of health sciences education or his/her designee. If resolution is not achieved by the program director/assistant dean of health sciences education, the case is referred to the senior associate dean of health sciences education or his/her designee, who makes the final decision. At each level of review, the course's assessment practices are reviewed, and the individual student's situation considered.

Hearing and Speech Sciences Education: Master of Education of the Deaf: Academic Policy: Student Support and Advisory Services

Academic Advisory Resources

The program director has an open-door policy for all students in the program.

Health and Wellness

See the [Life at Vanderbilt](#) page of this catalog.

Hearing and Speech Sciences Education: Master of Education of the Deaf: Accreditation

Council for the Accreditation of Educator Preparation (CAEP)

CAEP

1140 19th Street NW, Suite 400

Washington DC, 20036

(202) 223-0077

caepnet.org

Hearing and Speech Sciences Education: Master of Education of the Deaf: Admission

We encourage all interested students to apply for our graduate program. The program will be one year in length (three semesters: fall, spring, and summer including Maymester) for those entering with teacher certification in deaf education and two years (five semesters: fall, spring and summer including Maymester in year 1, fall and spring in year 2) for those entering with teacher certification in an area other than deaf education. The two-year program leads to an endorsement in special education preK-12 hearing.

Admission Requirements

Students entering the Master of Education of the Deaf program are required to have an undergraduate degree in deaf education, special education, early childhood education, or general education and must have teacher certification.

Application Process Application Deadline: January 15

The application, test scores, and all supporting materials must be received by January 15.

Application Fee

Non-refundable \$50.00 application fee

Statement of Purpose (personal statement)

The Statement of Purpose is a required and an important part of the application. The DHSS has no set criteria for the personal statement; it should be no less than one page but no more than 1-1/2 pages (single spaced).

School of Medicine

Required Materials

Transcripts/Academic information

Official transcripts, which also should be sent after the completion of the student's degree, must be sent directly to Vanderbilt according to instructions below. Students will be prompted to upload their academic record for each college or university they have attended when they officially submit their application. An academic record can be in the form of a legible scanned copy of a transcript or an academic record from the institution's Student Information System portal. If students are currently enrolled, the academic record should be submitted after their fall semester grades have been posted, if possible.

If students don't have their official transcripts during the application, unofficial transcripts can be provided instead. Official transcripts are required only after an offer of admission is made and accepted. To be considered official, a transcript must be sent directly from your institution to Vanderbilt. Official transcripts are submitted as instructed at registrar.vanderbilt.edu/academic-records/external-degree-verifications.php.

Letters of Recommendation

Three letters of recommendation are required and up to five maximum may be submitted. Letters of recommendation should be from individuals who can speak to the applicant's academic abilities and accomplishments and likelihood of the applicant's success in a clinical or research program such as faculty and or supervisors.

Recommenders are strongly encouraged to submit their letters electronically. The application allows the applicant to identify their recommenders and the system notifies them (on the applicant's behalf) by email. When the electronic recommendations are submitted, they are "attached" to the application, and the applicant receives an email message confirming receipt of each recommendation.

Please note: email addresses should be proofed for accuracy before finalizing the application. If an incorrect email address is entered into the system, the recommender will not receive the request for recommendation.

If applicants choose not to use the electronic method, it is their responsibility to contact your recommenders and provide them with the DHSS recommendation link found on the department's website at medschool.vanderbilt.edu/hearing-speech under Academic, M.D.E., Application Information. Paper letters of recommendation should be mailed to Vanderbilt University CDM, PMB 407833, 2301 Vanderbilt Place, Nashville, TN 37240-7833 and should be received in that office by the application deadline.

Test Scores

Official GRE scores come electronically from the Educational Testing Service (ETS) and are required for all applicants. Official TOEFL scores are required for all applicants whose native language is not English, even if the applicant completed a 4- year degree in a U.S. institution. The scores should be sent to institution code 1871. The department code is not required to attach official scores to the application.

Important Note: It is the applicant's responsibility to allow sufficient time for the ETS to score and report test results. Please refer to the ETS website (<http://www.ets.org/gre>) to access the Detailed Score Reporting Schedule for the GRE exam.

Resume/CV or Supplemental Materials

Applicants may upload a resume/cv or other documents the committee may review by accessing the status page of the application and adding the documents in the "upload materials" section.

Tuition Scholarships

School of Medicine

Given that most graduate students need financial assistance, need is not a factor; financial awards are offered based on merit, using criteria very similar to those used to judge acceptance into the program. There are no additional forms to complete for scholarships.

Special Requirements for International Applicants

Test of English as a Foreign Language is required of all international applicants whose native language is not English, even if the applicant completed a 4-year degree at a U.S. institution.

Financial Resources: In order to meet requirements for entry into the United States, international applicants must demonstrate that they have sufficient financial resources to cover the cost of their education. Please be prepared to provide evidence of this funding.

Selection Criteria, Offer, and Acceptance

All students must possess GRE scores consistent with Vanderbilt standards, a strong record of past academic achievement, a commitment to hearing health care, excellent oral and written skills, a willingness to work collaboratively, a strong work ethic, perseverance, and organizational and time management skills. The GRE, GPA, and letters of recommendation are components that contribute to our holistic admissions practices, which also consider diversity, leadership, educational background, and research experiences, among others.

Admission Decisions

Admission decisions are mailed by March 15.

Response from Students: April 15

If a written response is not received or if the offer is not accepted through the online portal by April 15, the department has the right to rescind the offer of admission and financial award. Confirmed receipt of an email to the director of graduate studies specifying your decision, by April 15th, may be used to extend the deadline for receipt of the written response.

Transfer Students/Credits

Transfer credit is not accepted for the M.D.E. program. Transfer students may apply and, if accepted, generally start at the beginning of and complete the program's curriculum in its entirety.

Non-degree-seeking Students

Non-degree-seeking students can enroll in M.D.E. courses offered by the School of Medicine with approval from the instructor and vice chair of graduate studies on a case-by-case basis. In many cases, class size and/or resource limitations prevent this approval from occurring.

Visiting Students

Visiting students are not allowed to enroll in M.D.E. courses offered by the School of Medicine.

Hearing and Speech Sciences Education: Master of Education of the Deaf: Contact Information

Additional information may be obtained by contacting program officials at [Contact | Hearing and Speech Sciences | Vanderbilt University](#).

Hearing and Speech Sciences Education: Master of Education of the Deaf: Other Program Policy and Procedure

Program Evaluation

The Department of Hearing and Speech Sciences chair has regular meetings with staff, students, and faculty and the outcomes of these meetings, in combination with curriculum review committee meetings, employer surveys, alumni surveys, and supervisor evaluations, are used to identify areas of potential program improvement. These areas are then discussed in regular meetings (typically monthly) of the full DHSS faculty and considered during annual revisions of department pillar goals.

Leave of Absence

School of Medicine

Graduate programs in the DHSS require continuous registration for fall, spring, and summer semesters. Students who need to interrupt their studies (Au.D., M.D.E., and M.S.-S.L.P.) must apply to the vice chair of graduate studies, DHSS and receive written approval for a leave of absence. Students who need to take a leave of absence for any reason, including medical/mental health or family leave, must first contact the vice chair of graduate studies to initiate the leave. Prior to taking a leave of absence, a plan for re-entry into the curriculum and meeting graduation requirements will be developed in collaboration with the vice chair of graduate studies as part of the leave approval process. If it is not possible to develop a plan for return prior the leave being granted due to (for example) a medical or mental health emergency, the student should contact the vice chair of graduate studies as soon as they are able during the leave to develop a plan.

Students may also consult with the Vanderbilt Student Access Services office (vanderbilt.edu/student-access/) when considering taking a leave of absence.

A leave of absence may be granted for a period of up to 14 months. Those on leave of absence are required to communicate with the vice chair of graduate studies at least one month prior to their return from leave of absence, in order to ensure proper enrollment upon their return. Those who do not communicate with the program prior to returning may not be allowed to enroll for courses.

Prior to returning from medical leaves of absence (including mental health), students must provide documentation from all care providers indicating that the medical reason for their leave of absence has been resolved sufficiently that they are able to resume their program, with or without reasonable accommodations. If any accommodations are needed, students must submit a request for an accommodation to the Vanderbilt University Student Access Services Office as early as possible prior to their return. Upon return from leave of absence, students must meet all compliance requirements, which may include completing a criminal background check and/or fingerprinting, updating immunization records, and meeting other compliance requirements.

Degree completion timelines are governed by policies of the medical school and the degree program, as appropriate.

Attendance Class

Students are expected to attend all classes. Attendance regulations assume that academic and clinical success is the student's primary goal when pursuing a graduate degree. The weight given to class attendance in determining course grades is an academic matter; therefore, instructors are responsible for allowing make-up work in the case of absences. If a grade penalty exists, it should be noted in the course syllabus.

Educational Practica

Student attendance is required at every practica session throughout the duration of each practicum assignment unless otherwise scheduled by the supervisor. Only those absences due to illness or similar unanticipated emergencies may be excused; these should be reported immediately and directly to the supervisor. For additional information, see your clinic handbook.

Any absences from class or practica due to illness, death of an immediate family member, or similar unanticipated emergencies that affect more than one class or practica period should be reported to the vice chair of graduate studies as soon as possible. The VCGS will work with the student and affected parties to ensure that adequate and reasonable accommodations are provided for without penalty to the student. In the case of medical issues including mental health difficulties with long-term implications, the student is encouraged to contact the Vanderbilt Student Access Services office directly to arrange accommodations.

Honor Code

Each student will be compliant with the Vanderbilt University School of Medicine Honor Code guidelines. Every academic year, each student will sign, by written or electronic signature, an acknowledgement indicating that the student will follow the Honor Code rules and requirements.

Student Work Policy

All student workers must request approval from the M.D.E. program director prior to beginning student

School of Medicine

employment.

Transportation

Students may be placed for educational experiences in sites located away from the Vanderbilt University campus. Students should be prepared to drive up to 60 miles from the Vanderbilt University campus to reach off-site placements. Students are responsible for their own transportation to and from all sites for educational experiences, including all costs associated with that travel.

Honors and Awards

Ohde-Grantham Award for Excellence in Student Research. For students who exemplify excellence in research in any of the departmental disciplines.

Laura Knox Humanitarian Award. For students who possess and exemplify compassion for others through service leadership.

Hearing and Speech Sciences Education: Master of Education of the Deaf: Program Overview

The Department of Hearing and Speech Sciences offers a Master of Education of the Deaf program. This one- to two-year program emphasizes skills related to effectively planning and implementing specialized instruction for children and youth with hearing loss.

The DHSS is home to a unique, interdisciplinary approach to teacher training by combining training in audiology, speech-language pathology, and deaf education. Please visit our website at medschool.vanderbilt.edu/hearing-speech for additional information.

Department of Hearing and Speech Sciences Mission

The DHSS is dedicated to serving persons with communicative and related disorders through treatment, education, and research; enhancing our knowledge of communicative and related disorders; shaping the future of communication disorders and related disciplines through national and international leadership; promoting public awareness and prevention of communicative and related disorders; ensuring continuous improvement of operations through personal and professional development; and generating measurable benefits for our community, employees, students, clients and their families, and other customers.

Standing Program Committees Admission Committee

This committee has the responsibility of making recommendations concerning admission and scholarships for applicants to the Au.D., M.D.E., and M.S.-S.L.P. programs. The committee oversees and continually reviews the admission process. It typically meets twice per academic year. Membership includes all DHSS faculty.

Promotion Committee

This committee monitors student progress toward completing the M.D.E. degree requirements and makes recommendations regarding promotion, remedial action, or dismissal as appropriate for each student. This committee meets at least twice per academic year but is called to meet in addition to these regular meetings, when there is a student of concern identified. Membership includes all DHSS M.D.E. program faculty.

Curriculum Committee

This committee continually monitors and reviews the M.D.E. curriculum. Any recommended changes to the curriculum are made to the DHSS faculty. Membership includes all DHSS M.D.E. program faculty.

Program's Major Facilities

The Mama Lere Hearing School in our National Center for Childhood Deafness and Family Communication serves as one of the practicum placements for the DHSS deaf education program. This early childhood school for children who are deaf or hard of hearing is known for its outstanding work in the areas of speech development, auditory training, cochlear implant habilitation, language, and reading. In addition, M.D.E. students complete practicum hours in urban and rural settings in the greater Nashville area.

Hearing and Speech Sciences Education: Master of Education of the Deaf: Tuition, Fees, and Cost of Attendance

School of Medicine

For information about university and School of Medicine costs and fees please refer to the [School of Medicine Tuition, Fees, and Financial Aid](#) page of this catalog.

Academic Year 2022-23 Tuition	
Tuition, 1st year (12 months)	\$44,586
Tuition, 2nd year (9 months)	\$29,724
Hourly rate	1,689

Detailed information pertaining to estimated cost of attendance is found at medschool.vanderbilt.edu/financial-aid/master-of-education-of-the-deaf-cost-of-attendance.

Payment of Tuition and Fees

Students registered for a full-time course load (eight hours or more for fall and spring and six hours or more for summer) are billed at the block tuition rate for the term in which they are enrolled. Students registered for less than a full-time course load (seven hours or fewer in the fall and spring or five 5 hours or fewer in the summer) are billed at the hourly tuition rate for the term in which they are enrolled. Certain courses are designated to trigger full-time enrollment (and block tuition billing) even though the number of credits carried by the course is fewer than eight.

Hearing and Speech Sciences Education: Master of Science (Speech-Language Pathology): Academic Policy: Degree Requirements

Requirements to Earn Degree

All candidates for the master of science (Speech-Language Pathology) must have satisfactorily completed all residency, academic course, and clinical practica requirements of the program.

For M.S.-S.L.P. students with an undergraduate background in communication sciences and disorders, a minimum of 52 semester hours (academic coursework and clinical practicum) are required for the master's degree.

For M.S.-S.L.P. students without an undergraduate background in communication sciences and disorders, a minimum of 61 semester credit hours (academic coursework and clinical practicum) are required. Curriculum requirements, course content, and the number and distribution of credit hours are determined by the M.S.-S.L.P. program faculty.

Length and Delivery of Program

The candidate for the M.S.-S.L.P. spends at least five academic semesters of graduate study at Vanderbilt. Candidates for the M.S.-S.L.P. are expected to be enrolled in the School of Medicine during each fall, spring, and summer semester until completion of their degree requirements.

The normal time frame for completion of required course work for the master of science in Speech-Language Pathology is two years. If an individual requires additional time due to unusual circumstances (e.g., remediation, leave of absence), the degree program may extend the maximum amount of time to complete the degree to three years.

Curriculum and Tracks

Enrollment in clinical practicum is required during each semester of the student's enrollment. Students should complete 25 clock hours of guided clinical observation of clinical service provision conducted and supervised by a person with the Certificate of Clinical Competence (CCC) in speech-language pathology from the American Speech-Language-Hearing Association. If guided observations have not been completed prior to enrollment in the M.S.-S.L.P. program, the student completes the guided observation during the initial weeks of clinical placements each semester. Sufficient guided observation is completed in each clinical placement before a student

School of Medicine

participates in direct patient contact. Specialty tracks which provide special training in the areas of Language and Literacy in the Schools, Pediatric Hearing Loss, Research (Master's Thesis) and Autism are available. Details of the additional coursework and experiences required for these tracks are described during orientation.

Internships/Externship

During the final semester of enrollment, the student completes a 10-week full-time externship (at least 32 hours per week). Students are expected to have completed a minimum of 300 clinical clock hours prior to initiation of the externship.

Course List

A full list of program courses is provided in this catalog under [Courses by Program](#).

Hearing and Speech Sciences Education: Master of Science (Speech-Language Pathology): Academic Policy: Progress and Promotion

Periodic Reviews

Student performance is reviewed twice a year, and failure to appropriately develop clinical skills or maintain satisfactory academic progress can result in probationary status, which must be alleviated to continue in the program.

Satisfactory Academic Progress and Good Standing

All students who maintain at least a 3.0 GPA and have earned at least a B- in all course work and clinical practica are classified as in good standing through their demonstration of satisfactory academic progress.

Graduation

The Department of Hearing and Speech Sciences follows School of Medicine policy for general degree requirements. See the [Academic Policies for All School of Medicine Programs](#) page of this catalog.

Formal Remediation and Probation Formal Remediation Plan

Students who receive a grade of C+ or poorer in academic courses and/or clinical courses/practica, whether required or elective, may be required to remedy the grade as specified in a formal remediation plan. If the course in question is prerequisite for another course, the student is required to remedy the grade before being permitted to proceed. Possible remedies include re-examination, course/practica repetition, and/or prerequisite examination prior to entering a higher-level course. Credit may be given based on re-examination or satisfactory repetition of the course/practica work, but the original grade remains on the record and may be counted in the computations as cause for dismissal if additional poor performance occurs.

Probation

Failure to appropriately develop clinical skills, failure to earn at least a B- in a single course, or a failure to maintain a GPA equal to or above a 3.0 results in probationary status which must be alleviated to continue in the program.

Dismissal

Students placed on academic and/or clinical probation who do not perform in a satisfactory manner during the subsequent academic year including meeting the formal goals specified in their remediation plan may be considered for dismissal from school unless there are mitigating circumstances approved by the appropriate faculty committee, vice chair of graduate studies, and chair, DHSS. Students on probation may be considered for dismissal from school if their academic and/or clinical performance continues at a marginal level, even though there may be no recorded failures.

The Department of Hearing and Speech Sciences follows School of Medicine policy for formal remediation, probation, dismissal, and appeals. See the [Academic Policies for All School of Medicine Programs](#) chapter of this catalog for more information on these topics.

Eligibility to Reapply

Students who are dismissed from the program are not eligible to reapply.

School of Medicine

Hearing and Speech Sciences Education: Master of Science (Speech-Language Pathology): Academic Policy: Student Assessment

Grades

The Department of Hearing and Speech Sciences follows School of Medicine policy for grades. See the [Academic Policies for All School of Medicine Programs](#) page of this catalog.

Grade Grievance Procedure

Students should seek redress of a problem with a grade as soon as possible after receiving the grade and in no case later than four weeks after the grade is released. Students with a problem should confer directly with the course director. Every effort should be made to resolve the problem fairly and promptly at this level. If the student cannot resolve the problem through discussion with the course director, the student should request an appeal by writing (email is acceptable) to the program director within two weeks of speaking with the course director. (The course director also should be included on the request for appeal.) In cases where the course director is also the degree program director, the appeal should be made to the assistant dean of health sciences education or his/her designee. If resolution is not achieved by the program director/assistant dean of health sciences education, the case is referred to the senior associate dean of health sciences education or his/her designee, who makes the final decision. At each level of review, the course's assessment practices are reviewed, and the individual student's situation considered.

Clinical Assessment

All M.S.-S.L.P. students are expected to make satisfactory progress in developing clinical skills by participating in clinical practicum throughout their time in the program. The first semester of clinical practicum involves more observation and guidance than actual hands-on experience. Grading in the first semester is primarily based on attendance, punctuality, professionalism, and active engagement in the learning process during clinic assignments. In subsequent semesters, clinical supervisors assess clinical performance/learning for competency areas specific to the clinical setting. Grades for practicum assignments may be reduced for unexcused absences from clinic according to prevailing departmental guidelines.

Competency Assessment

Each student prepares a formal case report on a client or clinical procedure during the final year of the two-year program, with guidance from a clinical faculty member or clinical supervisor, for presentation to faculty, staff, and student peers. The quality of the case presentation is assessed formally by faculty and staff members regarding specific content elements.

Hearing and Speech Sciences Education: Master of Science (Speech-Language Pathology): Academic Policy: Student Support and Advisory Services

Academic Advisory Resources

The program director has an open-door policy for all students in the M.S.-S.L.P. program.

Health and Wellness

See the [Life at Vanderbilt](#) page of this catalog.

Hearing and Speech Sciences Education: Master of Science (Speech-Language Pathology): Accreditation

The master of science education program in speech-language pathology (residential) at Vanderbilt University is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association, 2200 Research Blvd., #310, Rockville, MD 20850, (800) 498-2071 or (301) 296-5700.

Hearing and Speech Sciences Education: Master of Science (Speech-Language Pathology): Admission

Admission Requirements

Students with backgrounds in such areas as communication disorders and other health-related professions, biomedical sciences, psychology, and linguistics are encouraged to apply.

School of Medicine

It is necessary for all M.S.-S.L.P. applicants to have satisfied the following prerequisites prior to matriculation in the Vanderbilt program.

1. Biological Sciences (at least one college-level course, for example, Intro to Biology)
2. Physics or Chemistry (at least one college-level course in either area, examples, Introduction to Chemistry, Physics I)
3. Statistics (course work must be statistics and not a research methods class)
4. Social/Behavioral Sciences (at least one college-level course in an area such as psychology, political science, economics, or anthropology)

The above four areas of study are required by the Council for Clinical Certification in Audiology and Speech-Language Pathology (CFCC), credentialing body of the American Speech-Language-Hearing Association for applicants seeking certification in speech-language pathology. Vanderbilt DHSS requires that students complete these prerequisites prior to enrollment in the M.S.-S.L.P. program.

Please visit our website at medschool.vanderbilt.edu/hearing-speech/ for additional information.

Application Process Application Deadline: January 15

The application, test scores, and all supporting materials must be received by January 15.

Application Fee

Non-refundable \$50.00 application fee

Statement of Purpose (personal statement)

The Statement of Purpose is a required and an important part of the application. The DHSS has no set criteria for the personal statement; it should be no less than one page but no more than 1-1/2 pages (single spaced).

Required Materials

Transcripts/Academic information

Official transcripts, which also should be sent after the completion of an applicant's degree, must be sent directly to Vanderbilt according to instructions below. Applicants will be prompted to upload an academic record for each college or university attended when officially submitting an application. An academic record can be in the form of a legible scanned copy of a transcript or an academic record from the institution's Student Information System portal. If an applicant is currently enrolled, submit an academic record after the fall semester grades have been posted, if possible.

If official transcripts are not available at the time of application, unofficial transcripts can be provided instead. Official transcripts are required only after an offer of admission is made and accepted. To be considered official, a transcript must be sent directly from your institution to Vanderbilt. Official transcripts are submitted as instructed at registrar.vanderbilt.edu/academic-records/external-degree-verifications.php. Please do not mail transcripts to the department office.

Letters of Recommendation

Three letters of recommendation are required and up to five maximum may be submitted. Letters of recommendation should be from individuals who can speak to the applicant's academic abilities and accomplishments and likelihood of the applicant's success in a clinical or research program such as faculty and or supervisors.

Recommenders are strongly encouraged to submit their letters electronically. The application allows the applicant to identify their recommenders and the system notifies them (on the applicant's behalf) by e-mail. When the electronic recommendations are submitted, they are "attached" to the application, and the applicant receives an email message confirming receipt of each recommendation.

School of Medicine

Please note: email addresses should be proofed for accuracy before finalizing the application. If an incorrect email address is entered into the system, the recommender will not receive the request for recommendation.

If applicants choose not to use the electronic method, it is their responsibility to contact your recommenders and provide them with the DHSS recommendation link found on the department's website at medschool.vanderbilt.edu/hearing-speech/ under Academic, M.S.-S.L.P., Application Information. Paper letters of recommendation should be mailed to Vanderbilt University CDM, PMB 407833, 2301 Vanderbilt Place, Nashville, TN 37240-7833 and should be received in that office by the application deadline.

Test Scores

Official GRE scores come electronically from the Educational Testing Service (ETS) and are required for all applicants. Official TOEFL scores are required for all applicants whose native language is not English, even if the applicant has completed a 4- year degree in a U.S. institution. The scores should be sent to institution code 1871. The department code is not required in order for your official scores to attach to the application.

Important Note: It is the applicant's responsibility to allow sufficient time for the ETS to score and report test results. Please refer to the ETS website (www.ets.org/gre) to access the Detailed Score Reporting Schedule for the GRE exam.

Resume/CV or Supplemental Materials

Applicants may upload resume/cv or other documents the committee may review by accessing the status page of the application and adding the documents in the "upload materials" section.

Tuition Scholarships

Given that most graduate students need financial assistance, need is not a factor; financial awards are offered based on merit, using criteria very similar to that used to judge acceptance into the program. There are no additional forms to complete for scholarships.

Special Requirements for International Applicants

Test of English as a Foreign Language (TOEFL) is required for all international applicants whose native language is not English, even if the applicant has completed a 4-year degree at a U.S. institution. Since the M.S.-S.L.P. is a clinical practice degree, it is critical that students have robust written and spoken English skills. Consequently, a TOEFL score of at least 110 is expected for successful applicants.

Financial Resources: In order to meet requirements for entry into the United States, international applicants must demonstrate that they have sufficient financial resources to cover the cost of their education. Please be prepared to provide evidence of this funding.

Selection Criteria, Offer, and Acceptance

All students must possess GRE scores consistent with Vanderbilt's standards, a strong record of past academic achievement, a commitment to perseverance, and exceptional organizational and time-management skills. The GRE, GPA, and letters of recommendation are components that contribute to our holistic admissions practices, which also consider diversity, leadership, educational background, and research experiences, among others.

Admission Decisions

Admission decisions are mailed by March 15.

Response from Students: April 15

If a written response is not received, or acceptance is not accomplished through the online portal, by April 15 the Department has the right to rescind the offer of admission and financial award. Confirmed receipt of an email to the director of graduate studies specifying a decision by April 15th can be used to extend the deadline for receipt

School of Medicine

of the written response.

Transfer Students/Credits

Transfer credit is not accepted for the M.S.-S.L.P. program. Transfer students may apply and, if accepted, generally start at the beginning of and complete the program's curriculum in its entirety.

Non-degree-seeking Students

Non-degree-seeking students are allowed to enroll in M.S.-S.L.P. courses offered by the School of Medicine with approval from the instructor and vice chair of graduate studies on a case-by-case basis. In many cases, class size and/or resource limitations prevent this approval from occurring.

Visiting Students

Visiting students are not allowed to enroll in S.L.P. courses offered by the School of Medicine.

Hearing and Speech Sciences Education: Master of Science (Speech-Language Pathology): Contact Information

Additional information may be obtained by contacting program officials at [Contact | Hearing and Speech Sciences | Vanderbilt University](#).

Hearing and Speech Sciences Education: Master of Science (Speech-Language Pathology): Other Program Policy and Procedure

Program Evaluation

The Department of Hearing and Speech Sciences chair has regular meetings with staff, students, and faculty and the outcomes of these meetings, in combination with curriculum review committee meetings, employer surveys, alumni surveys, and supervisor evaluations, are used to identify areas of potential program improvement. These areas are then discussed in regular meetings (typically monthly) of the full DHSS faculty and considered during annual revisions of department pillar goals.

Leave of Absence

Graduate programs in the Department of Hearing and Speech Sciences require continuous registration for fall, spring, and summer semesters. Students who need to interrupt their studies (Au.D., M.D.E., and M.S.-S.L.P.) must apply to the vice chair of graduate studies, DHSS and receive written approval for a leave of absence. Students who need to take a leave of absence for any reason, including medical/mental health or family leave, must first contact the vice chair of graduate studies to initiate the leave. Prior to taking a leave of absence, a plan for re-entry into the curriculum and meeting graduation requirements will be developed in collaboration with the vice chair of graduate studies as part of the leave approval process. If it is not possible to develop a plan for return prior the leave being granted due to (for example) a medical or mental health emergency, the student should contact the vice chair of graduate studies as soon as they are able during the leave to develop a plan.

Students may also consult with the Vanderbilt Student Access Services office (vanderbilt.edu/student-access/) when considering taking a leave of absence.

A leave of absence may be granted for a period of up to 14 months. Those on leave of absence are required to communicate with the vice chair of graduate studies at least one month prior to their return from leave of absence, in order to ensure proper enrollment upon their return. Those who do not communicate with the program prior to returning may not be allowed to enroll for courses.

Prior to returning from medical leaves of absence (including mental health), students must provide documentation from all care providers indicating that the medical reason for their leave of absence has been resolved sufficiently that they are able to resume their program, with or without reasonable accommodations. If any accommodations are needed, students must submit a request for an accommodation to the Vanderbilt University Student Access Services Office as early as possible prior to their return. Upon return from leave of absence, students must meet all compliance requirements, which may include completing a criminal background check and/or fingerprinting, updating immunization records, and meeting other compliance requirements.

School of Medicine

Degree completion timelines are governed by policies of the medical school and the degree program, as appropriate.

Attendance Class

Students are expected to attend all classes. Attendance regulations assume that academic and clinical success is the student's primary goal when pursuing a graduate degree. The weight given to class attendance in determining course grades is an academic matter; therefore, instructors are responsible for allowing make-up work in the case of absences. If a grade penalty exists, it should be noted in the course syllabus.

Clinic

Student attendance is required at every clinical session throughout the duration of each practicum assignment unless otherwise scheduled by the supervisor. Only those absences due to illness or similar unanticipated emergencies may be excused; these should be reported immediately and directly to the supervisor. For additional information, see your clinic handbook.

Any absences from class or clinic due to illness, death of an immediate family member, or similar unanticipated emergencies that affect more than one class or clinic period should be reported to the vice chair of graduate studies as soon as possible. The VCGS will work with the student and affected parties to ensure that adequate and reasonable accommodations are provided for without penalty to the student. In the case of medical issues including mental health difficulties with long-term implications, the student is encouraged to contact the Vanderbilt Student Access Services vanderbilt.edu/student-access/ office directly to arrange accommodations.

Honor Code

Each student will be compliant with the Vanderbilt University School of Medicine Honor Code guidelines. Every academic year each student will sign, by written or electronic signature, an acknowledgement indicating that the student will follow the Honor Code rules and requirements.

Student Work Policy

Students are typically allowed to work ten hours per week outside of their scheduled classes while school is in session. All student workers need to request the approval of the vice chair of graduate studies prior to beginning employment.

Transportation

Students may be placed for educational experiences in clinical sites located away from the Vanderbilt University campus including counties surrounding Davidson County (Nashville). Students should be prepared to drive up to 60 miles (one way) from the Vanderbilt University campus to reach off-site placements. External placements may be up to three days per week for an entire semester. Students are responsible for their own transportation to and from all clinical sites for educational experiences, including all costs associated with that travel.

Honors and Awards

Russell J. Love Award. For outstanding clinical and academic achievements in speech-language pathology.

Ohde-Grantham Award for Excellence in Student Research. For students who exemplify excellence in research in any of the departmental disciplines.

Laura Knox Humanitarian Award. For students who possess and exemplify compassion for others through service leadership.

Hearing and Speech Sciences Education: Master of Science (Speech-Language Pathology): Program Overview

The master of science education program in speech-language pathology is administered through the Vanderbilt University School of Medicine. The program provides clinical education preparing for professional certification in speech-language pathology. The five- or six-semester M.S.-S.L.P. program (depending on background) spans up to two calendar years of full-time study.

School of Medicine

Students without a background in communication disorders require an extra semester. Many clinical opportunities are available throughout the program. The program culminates in a ten-week (at least 32 hours per week) clinical externship. The program meets or exceeds American Speech-Language-Hearing Association certification requirements.

Courses in cochlear implants, autism, and speech-language pathology practice in the schools are a part of the curriculum for students with interests in those areas. There is also a thesis option. At present, Vanderbilt's M.S.-S.L.P. program is ranked #1 in the nation by *U.S. News and World Report*.

Department of Hearing and Speech Sciences Mission

The DHSS is dedicated to serving persons with communicative and related disorders through treatment, education, and research; enhancing our knowledge of communicative and related disorders; shaping the future of communication disorders and related disciplines through national and international leadership; promoting public awareness and prevention of communicative and related disorders; ensuring continuous improvement of operations through personal and professional development; and generating measurable benefits for our community, employees, students, clients and their families, and other customers.

The mission of the M.S.-S.L.P. is to present students with an evidence-based education leading to appropriate and effective clinical service in the context of a department engaged in and allowing exposure to cutting-edge research.

Standing Program Committees Admission Committee

This committee has the responsibility of making recommendations concerning admission and scholarships for applicants to the Au.D., M.D.E., and M.S.-S.L.P. programs. The committee oversees and continually reviews the admission process. It typically meets twice per academic year. Membership includes all DHSS faculty.

Promotion Committee

This committee monitors student progress toward completing the M.S.-S.L.P. degree requirements and makes recommendations regarding promotion, remedial action, or dismissal as appropriate for each student. This committee meets at least twice per academic year but is called to meet in addition to these regular meetings, when there is a student of concern identified. Membership includes all DHSS S.L.P. program faculty.

Curriculum Committee

This committee continually monitors and reviews the M.S.-S.L.P. curriculum. Any recommended changes to the curriculum are made to the DHSS faculty. Membership includes all DHSS S.L.P. program faculty.

Program's Major Facilities

Practicum sites include the Vanderbilt University Medical Center, Monroe Carell Jr. Children's Hospital at Vanderbilt, and the Vanderbilt Bill Wilkerson Center for Otolaryngology and Communication Sciences. Additional sites include the Veterans Affairs Medical Center, hospitals, outpatient clinics, and private practices in the Middle Tennessee area.

Hearing and Speech Sciences Education: Master of Science (Speech-Language Pathology): Tuition, Fees, and Cost of Attendance

For information about university and School of Medicine costs and fees please refer to the [School of Medicine Tuition, Fees, and Financial Aid](#) page of this catalog.

Academic Year 2022-23 Tuition

Tuition, 1st year	\$44,586
Tuition, 2nd year (6 semester students)	44,586
Tuition, 2nd year (5 semester students)	29,724
Hourly rate	1.689

School of Medicine

Detailed information pertaining to estimated cost of attendance is found at medschool.vanderbilt.edu/financial-aid/master-of-science-speech-language-pathology-cost-of-attendance.

Payment of Tuition and Fees

Students registered for a full-time course load (eight hours or more for fall and spring and six hours or more for summer) are billed at the block tuition rate for the term in which they are enrolled. Students registered for less than a full-time course load (seven hours or fewer in the fall and spring or five 5 hours or fewer in the summer) are billed at the hourly tuition rate for the term in which they are enrolled. Certain courses are designated to trigger full-time enrollment (and block tuition billing) even though the number of credits carried by the course is fewer than eight.

Learning Environment: Expectations for Conduct Regarding Examinations and Work Submitted for Academic Credit

Faculty and Students' Responsibilities

1. In order to create and maintain an academic environment that promotes the highest professional standards, it is important to be transparent in the expectations of all students regarding conduct in examination settings and regarding all work submitted for academic credit. As stated in the Vanderbilt School of Medicine Honor Code, "By demanding great responsibility, the Honor System fosters an environment of freedom and trust that benefits the entire Medical School." It is the responsibility of the faculty and staff to help protect the trusting environment created when the students agree to and sign the Honor Code pledge.
2. Students are expected to adhere to the VUSM Compact Between Teachers and Learners in VUSM Programs in all courses. In order to facilitate transparency of expectations, students are apprised of any course-specific expectations on the first day of class or during the first week that a course meets.
3. Appropriate attribution is expected for all work submitted for credit and in all entries to the electronic health record. Students must use proper citation practices and are expected to be aware of appropriate mechanisms to avoid plagiarism. Faculty clarify if an assignment may be collaborative.
4. It is the student's responsibility to be aware of and to adhere to the published guidelines for each course.
5. Incidents going before the Honor Council may be separately incorporated into the competency domain assessment and promotion committee review process as appropriate.

The Expectations for Conduct Regarding Examinations and Work Submitted for Academic Credit policy was reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Learning Environment: Faculty/Educator Roles

Policy on Multiple Roles

Many VUSM faculty members hold multiple roles in our education program, and we believe that our students benefit from rich relationships with various supportive faculty members. However, faculty members engaged in multiple educational roles can face competing demands, which may directly or indirectly affect (or have the appearance of affecting) an individual's professional judgment in exercising any educator duties and responsibilities.

Of particular concern to students is the intersection of roles involving advising students regarding personal or academic struggles with roles in assessment of student performance or assigning grades. Because not all conflicts can be eliminated, it is necessary to establish a plan for managing and minimizing conflict.

Conflict management typically involves ensuring that any individual in an advising role does not serve as the sole assessor of students in any required course. During the academic year, when individuals are proposed for new roles, assignments are reviewed for potential conflicts. Conflict management plans are created by faculty members involved and are reviewed and maintained by the associate dean for undergraduate medical education (M.D. program) and program director (other VUSM degree programs).

School of Medicine

Policy on VUSM Faculty Supervising Family

It is the policy of Vanderbilt School of Medicine that students may not be supervised or graded by a parent or family member.

Policy on VUSM Educators Providing Student Health Care

Vanderbilt University Medical Center physicians occasionally provide clinical care for Vanderbilt students. Some of these faculty members also teach and assess students in the classroom or clinical setting. Should a situation arise in which a Vanderbilt faculty member finds himself/herself in a dual role as care provider and as a teacher/assessor of a Vanderbilt student, he/she must recuse himself/herself from either the teacher/assessor role or the care provider role. Examples of such situations include faculty serving as small group leaders in a course, or as team leaders for clinical learning experiences. Furthermore, if a Vanderbilt faculty member serves as a course or clinical learning experience director, placing him/her in a teacher/assessor role with students in a degree program, he/she should not accept as patients any students in that program.

In order to ensure sufficient sensitivity to the privacy of medical students' electronic health records, their records are equipped with an additional reminder to physicians and other providers regarding the sensitivity of their health records.

When a student has a pre-existing therapeutic relationship as a patient of a faculty member who directs a course or clerkship, the patient-provider relationship should not be disrupted. In these situations, the faculty member must discuss the situation with the student and arrange for an alternative means of assessment in the course or clinical experience.

This arrangement would likely involve identifying a different faculty member to provide the assessment in the course or clinical experience. This policy serves to secure and protect the integrity of the learning environment at the School of Medicine. For questions regarding the implementation of this policy, please contact the senior associate dean for health sciences education.

The Faculty/Educator Roles policy was reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Learning Environment: Standard of Behavior for Interactions with Vanderbilt University School of Medicine Students

Standard of Behavior for Interactions with Vanderbilt University School of Medicine Students¹ Statement of Standards

All faculty and staff involved with educating Vanderbilt University School of Medicine students are held to high standards of professionalism and patient care. The learning environment is expected to facilitate students' acquisition of the professional and collegial attitudes necessary for effective, caring, and compassionate health care. The development and nurturing of these attitudes requires mutual respect between teachers (including faculty, residents, and staff) and students, and between each student and his or her fellow students.² Mutual respect between student and teacher, and between fellow students, may be expressed in many ways but all interactions shall include honesty, fairness, and evenhanded treatment. Behavior that is inimical to the development of mutual respect shall be prohibited. Such behavior may include but is not limited to:

- Harassment of a sexual nature;
- Discrimination or harassment based on race, sex, religion, color, national or ethnic origin, age, disability, military service, sexual orientation, or gender identity.
- Grading, promoting, or otherwise evaluating any student on any basis other than that student's performance or merit.

¹ All Vanderbilt University policies concerning VUSM student interactions with faculty and staff as set forth in the Vanderbilt University Student Handbook, the Faculty Manual, and any other Vanderbilt University publication remain in full force and effect.

² By their express terms, these Standards apply only to interactions which involve one or more students;

Published 7/12/2022

School of Medicine

however, it is hoped that these Standards serve as a guide to all members of the Vanderbilt University School of Medicine community, in all workplace interactions. The reporting procedure outlined herein shall apply only to allegations of the violation of these Standards in interactions involving VUSM student(s).

Comments

The following delineates more clearly the behavior enumerated above that may be inimical to the development of mutual respect between students and teacher, and between fellow students. For purposes of these Comments, the term “person” shall refer to a student in interactions between fellow students or, in student-teacher interactions, to the student or teacher, as appropriate.

- Harassment of a sexual nature may include:
 - Denying the opportunity for training or rewards because of a student’s gender;
 - Requesting sexual favors in exchange for grades or other awards;
 - Making unwanted sexual advances;
 - Unreasonable and inappropriate sexual or sexist conduct directed towards any person;
 - Displaying in an unreasonable and inappropriate manner sexually suggestive or pornographic materials; or
 - Grading or evaluating a student based upon gender rather than performance or merit.
- Discrimination and harassment may include:
 - Denying the opportunity for training or rewards because of a student’s age, race, religious affiliation, gender, or any other attribute of the student other than merit or performance;
 - Unreasonable and inappropriate conduct directed towards any person which is intended to insult or stigmatize that person;
 - Exclusion of a student from any usual and reasonable expected educational opportunity for any reason other than as a reasonable response to that student’s performance or merit;
 - Requiring a student to perform personal services such as shopping or babysitting;
 - Showing favoritism among students based upon any attribute of the student(s) other than performance or merit and thereby reducing educational opportunities available to the nonfavored student(s);
 - Grading or evaluating a student based upon any attribute of a student other than that student’s performance or merit;
 - Any physical mistreatment, such as hitting, slapping or kicking, or threatening such physical mistreatment; or
 - Requiring a student to perform menial tasks with the intent to humiliate the student.

Any perceived violation of these Standards of Behavior (“Standards”) should be reported in accordance with the following procedure. Violations of these Standards may subject the offender to disciplinary action. These Standards may be amended at any time by the Executive Faculty. The Standards Committee shall be composed of such members as the dean shall appoint from time to time. In cases where there is a potential conflict between the Standards and university policy, university policy prevails.

Reporting Procedure

When a student feels that he or she has been mistreated, the student is encouraged to report the incident to university and/or medical school officials through a variety of reporting mechanisms (these include RISE, Veritas, Origami, trained faculty members, and the Vanderbilt University Title IX office). Students are provided information about resources for such reports during orientation. When the mistreatment involves an allegation of discrimination and/or harassment, including sexual misconduct and/or intimate partner violence, Vanderbilt University faculty and staff members must report the incident to the Vanderbilt University Title IX office. If there is a report of sexual misconduct and/or intimate partner violence involving a student, the Sexual Misconduct and Intimate Partner Violence Policy, which can be found in the *Vanderbilt University Student Handbook* (vanderbilt.edu/student_handbook/sexual-misconduct), applies to all Vanderbilt students, including students in the School of Medicine. Please consult that policy for more information.

The Standards of Behavior for Interactions with Students in the Vanderbilt University School of Medicine policy was reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Learning Environment: Student Responsibility for Adherence to Policy

This VUSM catalog contains Vanderbilt University, School of Medicine and its constituent programs’ policies, procedures, and resources intended to inform and guide students, faculty, and staff in their work related to

School of Medicine

VUSM programs. Several other VU-related resources contain similarly important information. The policies and procedures presented in the VUSM catalog, as well as those presented in each of the following resources, are designed to function in alignment with one another, and students, faculty, and staff are required to be familiar with them:

- **Vanderbilt University Student Handbook.** The handbook covers university policies and regulations on a wide range of topics, including (but not limited to) student conduct, alcohol and controlled substances, student engagement, and sexual misconduct and intimate partner violence. The university-wide policies and procedures in the handbook apply to all Vanderbilt University students, including School of Medicine students. The *Student Handbook* may be found at vanderbilt.edu/student_handbook/.
- **Vanderbilt University Enrollment Bulletin.** The bulletin is intended as a single point-of-entry for students to access policies and procedures important to their Vanderbilt University student. This resource is most helpful for accessing university-level resources. For areas where relevant information is provided via school-level or program-level documents/outlets, the bulletin makes references to those resources. The *Enrollment Bulletin* may be found at vanderbilt.edu/enrollmentbulletin/.
- **Explore-VUSM** This website (<https://medschool.vanderbilt.edu/explore-vusm/>) provides all VUSM students with easily accessible information about the School, as well as links to a variety of university and program- specific resources.
- **Program Websites.** All VUSM programs maintain websites containing information important for students, faculty, and staff, as well as applicants and
- **Program Handbooks/MD Gateway.** VUSM programs provide their students with program handbooks containing day-to-day information about the program, with a focus on practical information and procedures. The MD Program offers its students this information via the MD Gateway (<https://medschool.vanderbilt.edu/md-gateway/>).

STUDENT RESPONSIBILITY FOR ADHERENCE TO POLICY:

All students enrolled in Vanderbilt University programs are bound by all applicable Vanderbilt University, School of Medicine, and degree program policies. By enrolling in a VUSM program, every student acknowledges his or her responsibility to abide by and adhere to all institutional and programmatic policies and procedures. Students, therefore, have the responsibility of being familiar with the policies and procedures described in the documents outlined above.

Learning Environment: The School of Medicine Honor System

The Honor System at Vanderbilt University School of Medicine is conducted by students for the benefit of students, faculty, staff, and patients. The Honor System, as delineated by the Honor Code, requires students to conduct themselves with honor in all aspects of their lives. By demanding great responsibility, the Honor System fosters an environment of freedom and trust that benefits the entire Medical School. In signing this statement upon enrollment, each student agrees to participate in the Honor System and abide by its code.

As representatives of the Vanderbilt University School of Medicine and the medical professions, students pledge to conduct themselves with honor and integrity at all times. The Promotion Committees and the Honor Council serve to protect the environment of trust created by this Honor System. The Promotion Committees periodically evaluate each student's performance with special attention to work and conduct appropriate for professional practice. The Honor Council serves to educate members of the student body about their responsibilities as outlined in the written code; to conduct investigations and hearings regarding reported violations of the code; and to decide the nature of penalties deemed appropriate for such violations. Decisions reached by the Honor Council do not preclude the discussion of reported violations by the Promotion Committees, as the Committees may examine these incidents in the larger context of a student's general performance.

The School of Medicine Honor Code

All students pledge to conduct themselves honorably, professionally, and respectfully in all realms and aspects of medical education and patient care. Under the Honor System, the student pledges that he or she neither gives nor receives unauthorized aid nor leaves unreported any knowledge of such aid given or received by any other student. Unauthorized aid includes the use of any examinations from previous semesters that have not been pre-approved by the course director and made readily available to all other students taking the course. This pledge applies to all course work, examinations, presentations, or any other activities required for the awarding of any of the graduate degrees offered by the school. This pledge encompasses all clinical work involving patient care

School of Medicine

and representations of patient care information. Any student taking a course in the School of Medicine, regardless of where registered, is under the jurisdiction of the Honor Council of Vanderbilt University School of Medicine (VUSM) and subject to the penalties it may impose.

Constitution Article I—Name

The name of the council shall be the Honor Council of Vanderbilt University School of Medicine.

Article II—Purpose

1. To receive and evaluate evidence of Honor Code violations and to assure against false accusations.
2. To determine guilt or innocence.
3. To forward to the dean of the School of Medicine appropriate penalties for the guilty.

Article III—Membership and Officers

1. A faculty member shall be appointed by the dean of the School of Medicine as the Honor Council adviser. His/her roles include ensuring that all the rules are followed. In the case of an accusation, he/she will decide with the co-chairs of the Honor Council whether there is sufficient evidence to proceed with a trial after a formal investigation has been carried out.
2. The Honor Council of the School of Medicine shall be composed of representation from all degree-granting graduate programs under the administrative charge of the school. Currently, this includes Doctor of Audiology (Au.D.), Master of Education of the Deaf (M.D.E.), Master of Science-Speech-Language Pathology (M.S.-S.L.P.), Doctor of Medical Physics (D.M.P.), Master of Science in Medical Physics (M.S.M.P.), Master of Public Health (M.P.H.), Master of Science in Clinical Investigation (M.S.C.I.), Master of Science-Applied Clinical Informatics (M.S.-A.C.I.), Master of Genetic Counseling (M.G.C.), and Doctor of Medicine (M.D.). Any new graduate degree programs created within the school will become eligible by sufficient enrollment, as stipulated below.
3. The minimum student enrollment limit for a single graduate degree program to be eligible to elect an Honor Council representative is ten. If a program falls below that number, it will not be eligible to have a representative. It will regain eligibility when its enrollment reaches a minimum of ten students. However, some of the programs are closely affiliated; if, in the judgment of the program director(s) of these programs, there is sufficient overlap in required courses, these programs may be thought of as a unit (a.k.a., “affiliated degree programs”) for purposes of Honor Council representation. In these cases, the degree programs will be grouped for representation purposes, and allowed to elect an Honor Council representative on behalf of the affiliated degree programs. Current affiliated degree programs are the Au.D., M.D.E., and M.S.-S.L.P. programs, which will elect two representatives from their combined student cohorts, and the D.M.P. and M.S.M.P. programs, which will elect one representative from their combined student cohorts. All other non-M.D. programs will elect one representative. The M.D. program will follow its traditional practice of electing two representatives from each of the four classes.
4. In the non-M.D. programs, students will vote for Honor Council candidates within their own graduate program or affiliated degree programs. In the M.D. program, students will vote for Honor Council representatives within their own medical student class. Honor Council representatives are elected for one-year terms.
5. Honor Council members will select their own co-chairs. Two co-chairs will be elected from the M.D. program Honor Council representatives, for which all Honor Council representatives will vote, and one co-chair will be elected from the non-M.D. Honor Council representatives, for which all Honor Council representatives will vote. In both cases, co-chairs will be elected by simple majority. Co-chairs are elected for one-year terms and must have served at least one year on the council to be eligible.
6. Voting for Honor Council representatives will be completed no later than April 1 of each year. The new Honor Council will convene to elect its co-chairs no later than April 30. It is the duty of the outgoing Honor Council co-chairs to assure a successful transition. The exception for the April 1 deadline for election of representatives is for incoming medical students who will elect their representatives in September, and for the entering cohort of students in any one-year degree programs, as long as there are at least ten enrolled students in that program.

Article IV—Duties of Officers

1. It shall be the duty of the co-chairs to preside at all meetings of the Honor Council, to arrange for the hearing of any student accused, and to perform all duties common to their office.
2. The co-chairs shall keep full minutes of all meetings and full proceedings of all hearings, which must be kept in permanent. The co-chairs shall notify all members of all hearings, meetings, and retreats and shall perform any other related duties. These responsibilities will be rotated among the three co-chairs throughout the year.
3. Honor Council representatives for each program, together with the co-chairs, will have primary responsibility for conducting an annual program to educate their fellow students about the Honor Council

School of Medicine

and its processes, and for assuring the timeliness of elections. Program directors and the Honor Council faculty adviser will act in a supportive and advisory capacity.

Article V—Meetings

1. One regular meeting shall be held within four weeks of the start of the school year. At this meeting, the co-chairs of the Honor Council and the faculty adviser will explain the duties and procedures of the Honor Council to the
2. Special meetings may be called by the co-chairs at any time and must be called within ten working days when requested by two or more members of the Honor
3. All meetings shall be conducted according to *Roberts Rules of Order, Newly Revised*.
4. A meeting by the Honor Council to re-evaluate and review the Honor Code should be convened a minimum of every four years.

Article VI—Quorum

A quorum for an Honor Council hearing concerning a violation of the Honor Code is nine. This quorum may be adjusted by the co-chairs in circumstances in which students recuse themselves because the hearing concerns a faculty member who is, or will be, in a supervisory position over them. The absolute minimum for an Honor Council quorum shall be seven. In rare circumstances when a quorum is otherwise unavailable, the senior associate dean for health sciences education will appoint a temporary student member or members to assure a quorum is present to meet the timeline requirements for due process.

Article VII—Hearings

1. A hearing shall be called by the co-chairs of the Honor Council, if appropriate.
2. The accuser and the accused must be present at all hearings during the presentation of evidence and the accused has a right to question the accuser and any witnesses and make a statement to the Council.
3. Legal counsel will not be allowed for any party at a hearing, but the accused may have present a character witness or non-legally trained faculty adviser if he or she so chooses.
4. Any member of the Honor Council related by birth or marriage to the accused or the accuser or who has any other personal interest in the hearing shall relieve himself/herself from participation in that hearing.
5. The proceedings of the hearing are Any member present at a hearing is not at liberty to discuss its proceedings with anyone other than the members of the Honor Council present at the hearing or other persons with a legitimate need to know, e.g., law enforcement agents.
6. In the event a hearing concerns a charge against a graduate student, a medical student or a faculty member who is in a supervisory role for any Honor Council members, those members shall recuse themselves from participation in the hearing.
7. Upon completion of the review of evidence, the Honor Council in closed executive session shall reach a decision of “guilty” or “not guilty” of violation of the Honor Code by simple majority vote. The Honor Council shall make its determination using an evidentiary standard of “beyond a reasonable doubt.” The co-chairs have a vote in all decisions unless contraindicated by *Roberts Rules of Order*.
8. Written notice of the Honor Council decision will be sent to the accused and to the dean of the School of Medicine. The dean will also receive the vote count, a written summary of the case, and an oral report of the case from the co-chairs. The Promotion Committee will not be notified unless a verdict of “guilty” has been found. In the case of a “guilty” verdict, the Promotion Committee will receive a written summary of the proceedings. The written summary also will be kept in the permanent records of the Honor Council.
9. When the Honor Council reaches a decision of “guilty,” the penalty, representing the majority opinion of the Honor Council, shall be sent to the dean of the School of The recommended penalties should conform to the severity of offenses and may include expulsion from the School of Medicine, and may also include lesser penalties such as failure of a course, or suspension for a designated period of time.

Article VIII—Publicity

1. Each new student entering the School of Medicine will be informed by the Honor Council as to the functions of the Honor System and his or her obligations to the Honor Each student will be provided a copy of the Constitution and Bylaws of the Honor System and the Honor Code.
2. At the commencement of each academic year, all students shall reaffirm their commitment to the honor system by signing the Honor Code.
3. Names of the members of the Honor Council will be made known to all students upon commencement of each academic year. The Honor Council members will be accessible to any student to address concerns or questions regarding protocol, violations, or other Honor Council issues.

Article IX—Miscellaneous

In case a student withdraws from the School after a charge has been made against him or her and before the

School of Medicine

hearing, the Honor Council shall record the facts and the accused shall not be allowed to re-enter until he or she has had a hearing before the Honor Council.

Article X—Amendments

Amendments to this Constitution shall require for their adoption the approval of a majority of the total membership of the Honor Council and ratification by a majority of the voting student body. These amendments must be approved by the dean of the School of Medicine and the faculty adviser before becoming final.

Bylaws Article I—Reporting an Incident

1. If a student or an instructor has reason to believe that a breach of the Honor Code has been committed, he/she must, within seven class days, report the incident in signed written form in one of the following ways:
 1. Directly to one or both of the co-chairs of the Honor Council, or
 2. By way of the faculty adviser who will notify the co-chairs of the Honor Council, or
 3. To any member of the Honor Council, who will report directly and only to either the co-chairs or the faculty adviser.
2. Failure to take action on an incident is a breach of the Honor Code. Students are required to report in writing any suspected violations of the Honor Code.
3. Once an incident is reported, it shall be the responsibility of the Honor Council, not the student or instructor, to investigate the incident and determine the next course of action. The student or instructor who reports a violation is charged with maintaining confidence of his or her accusation; the accused is also required to maintain the confidence of the accusation and the Such confidence can be broken only as required in response to law enforcement agencies and to assure access to appropriate advice.
4. Perjury before the dean or any Honor Council member regarding the reporting of or investigation into an incident is a breach of the Honor Code and is subject to punishment.
5. Once an incident has been reported, the co-chairs and the faculty adviser will meet to discuss the The co-chairs shall appoint a committee of two members from the Honor Council to investigate the case and report their findings to the faculty adviser and the co-chairs. These two members shall be ineligible to vote in the event the Honor Council is convened. At the conclusion of the investigation, the co-chairs and faculty adviser will then decide whether to convene the Honor Council. If the decision is made to convene the Honor Council, the student in question will be notified that he/she has been formally accused of a violation of the Honor Code. The Honor Council should be convened within ten class days from the initial reporting of the incident. Both the accuser and the accused will be notified of the nature of the charge as well as the time and place of the assembly of the Honor Council.
6. Once the Honor Council is assembled, the accusation will be presented by the co-chairs, and a hearing will be held by the Honor Council.
7. A student who reports his or her own Honor Code violation will be given consideration for his or her initiative in self-reporting the transgression. The co-chairs, with advice of the faculty adviser, will decide if an investigation is warranted.

Article II—Penalties

1. Penalties given to those declared “guilty” will be recommended by the Honor Council and enforced by the dean of the School of Medicine as he/she sees fit. The final decision and penalty will be reported by the dean to the student involved, to the reporting individual, and to the Honor Council.
2. Penalties may range from the minimum of failure of the assignment to the maximum of expulsion from Vanderbilt University School of Medicine.
3. If the violation was committed under extenuating circumstances, the Honor Council may, by a majority vote, recommend a suspension of the sentence. However, suspension of the sentence shall in no way alter the findings of “guilt” under the Code.

Article III—Appeals

Appeals to any final actions that result from Honor Council hearings can be made with a petition to the Vanderbilt University Appellate Review Board as follows:

1. The appeal petition must be in writing.
2. It must specify the grounds for appeal.
3. It must be filed within seven class days of the original notification of the verdict or within two weeks if school is not in session for seven days following the notification.

Article IV—Summer Honor Council

1. The Summer Council will have official functions from the day following university Commencement

School of Medicine

exercises until the day class registration begins for the fall semester.

2. In the event that a designated member will not be in Nashville during the summer, the respective program representative should appoint a member of his/her class who will be in Nashville, to be approved by the Honor Council.
3. In the event that both co-chairs will not be in Nashville during the summer, then the faculty adviser should recommend a chair from the members of the Honor Council, subject to Honor Council approval.

Learning Environment: The Vanderbilt University Statement of the Honor Code

Vanderbilt University students pursue all academic endeavors with integrity. They conduct themselves honorably, professionally, and respectfully in all realms of their studies in order to promote and secure an atmosphere of dignity and trust. The keystone of our honor system is self-regulation, which requires cooperation and support from each member of the university community.

Learning Environment: VUSM Compact Between Teachers and Learners in VUSM Programs

Preamble

As a community of teachers and learners, we acknowledge the fundamental importance of our professional values in creating and maintaining an environment that promotes the highest standard of learning and the highest quality of research, service and patient care. The following principles characterize this environment and guide us in making daily decisions: Respect, Service, Integrity, Accountability, Scholarship, and Compassion. Recognizing that in an academic community we are teachers and learners simultaneously, we make the following commitments with the understanding that each applies to all of us, regardless of our status, whether faculty, resident, clinical staff, or student.

Commitments of Teachers

- We will respect students, colleagues, staff and patients as individuals.‡
- We will strive to provide the highest quality instruction, by preparing adequately for all teaching sessions, using evidence-based content, arriving on time, and admitting any gaps in We will strive for continuous improvement in our teaching efforts by responding to feedback and evaluation.
- We will demonstrate respect for our learners by turning off cell phones and silencing pagers during sessions we teach, unless they are required for service responsibilities.
- We will clearly express learning objectives for all courses and teaching sessions, and understand how these promote the learning objectives of the school. We will clearly define any specific academic and behavioral expectations for our classes.
- We will be aware of institutional and national policies, such as duty hours, and make sure that our expectations are consistent with those policies.
- We will assign tasks that are appropriate for the stage of learning, level of responsibility, and status as If an assigned clinical task conflicts with the personal ethics of a learner, we will discuss this with the learner and attempt to resolve the conflict in a manner that respects the learner while placing priority on the interests and well-being of the patient. We will seek not to require our learners to take actions inconsistent with their personal values.
- We will recognize the responsibilities implicit in our roles as mentors and coaches, and in the spirit of cultivating excellence in our learners, provide timely and constructive feedback.
- We will recognize our status as role models, and in our interactions with patients, staff, students, and colleagues, we will exhibit the same standard of professional behavior that we expect from others.
- We acknowledge that the teacher-learner relationship is a model for the clinician-patient relationship, and will strive to know our students as individuals, answer their correspondences promptly, exercise concern for their well-being, and treat them with compassion.
- We will respect the intellectual property of others and will use online resources, such as VSTAR and Brightspace, in a manner that is consistent with that respect.
- We will demonstrate honesty and integrity in all academic endeavors, including examinations, research efforts, and patient care entries.
- We will strive to create a culture of This culture includes evaluation for disclosure, event analysis, and process change when a safety concern is identified.

Commitments of Learners

- We will respect students, colleagues, staff, and patients as individuals‡
- We will strive for excellence in attaining the knowledge, attitudes, and skills needed for the highest standards of practice.
- We will attend all learning sessions designated as required by our programs' We will demonstrate respect

School of Medicine

towards teachers and peers by arriving on time, turning off cell phones, silencing pagers, and complying with other specific expectations defined by the faculty.

- We will wear appropriate attire. In the classroom setting, our attire should not cause distraction. In practice settings, it should comply with the standards published by the institution.* We will adhere to any additional attire requirements of our programs and courses.
- We will work effectively in teams, respecting the contributions of all members, assuming a fair share of responsibility, and performing leadership tasks with a sense of service to others.
- In practice settings we will acknowledge and seek help if assigned a task that is beyond our level of If an assigned task conflicts with personal ethics, we will discuss this with the supervising faculty or staff member and strive to reach a resolution that places priority on the interests of the patient.
- We will recognize our obligations as a collegial community, sharing knowledge and assisting peers in their quest to achieve professional and personal goals. We will assist our colleagues in distress.
- We will establish the habit of critical reflection, acknowledge gaps in our knowledge, recognize our limitations, and strive for constant self-improvement.
- We will respect the intellectual property of others and will use online resources, such as VSTAR and Brightspace, in a manner that is consistent with that respect.
- We will demonstrate honesty and integrity in all academic endeavors, including examinations, research efforts and patient care entries.
- We will strive to create a culture of safety. We will accept responsibility for errors and near-errors by disclosing them, analyzing them and implementing changes that would prevent similar events in the future.
- In the spirit of continuous quality improvement, we will accept the responsibility of constructive evaluation of our courses and teachers.

Master of Genetic Counseling: Academic Policy: Degree Requirements

Requirements to Earn Degree

1. Minimum of 60 hours of didactic course work, with an overall grade point average of at least a 'B';
2. Successful completion of required practica; and
3. Successful completion of a research project.

Length and Delivery of Program

Candidates for the M.G.C. degree normally spend five academic semesters at Vanderbilt and are expected to be enrolled in the School of Medicine during each fall, spring, or summer semester until completion of the degree.

The normal time for completion of the required course work for the M.G.C. degree is 21 months, over five consecutive terms. If an individual requires additional time due to unusual circumstances (e.g., remediation, leave of absence), a student may, with approval of the M.G.C. program director, take up to three years to complete the degree.

Curriculum

Vanderbilt M.G.C. students participate in a wide range of activities during their time in the program to prepare them for the American Board of Genetic Counseling (ABCG) certifying exam, including course work, practicum

School of Medicine

experiences, and research experiences.

The normal progression of a student through the M.G.C. curriculum is outlined at medschool.vanderbilt.edu/mgc.

The curriculum draws its content from various departments, and courses are taught by faculty members from multiple disciplines. The curriculum is subject to annual review and revision by the Curriculum Committee.

Course Work

A complete listing of the courses with descriptions can be found on the [Courses by Program](#) page of this catalog and on the program website: medschool.vanderbilt.edu/mgc/academics/timeline.

Practica

Practicum experiences are an integral part of training genetic counseling professionals. Starting in the spring semester of the first year, students complete approximately 50 weeks of practicum experience. Over ten 5-week blocks, students work with certified genetic counselors and Ph.D. and/or M.D. geneticists in the ABGC-defined practice areas of adult, cancer, pediatric, and prenatal. Experiences in specialty clinics and genetics laboratories are part of the practica. There is also opportunity to work in industry and philanthropic settings.

Thesis

Vanderbilt M.G.C. students are required to complete a research project during their 21-months of training. As part of this requirement, students are enrolled in a two-part course, Research for Genetic Counselors 1 (GC6610) and Research for Genetic Counselors 2 (GC6615), during the first year. These courses explore the research process, with a focus on articulating the value of research to the practice of genetic counseling. The courses introduce the research knowledge and skills students need to develop and complete their thesis research, including principles of study design, critical reading of the literature, developing a statistical plan, quantitative and qualitative research methods, collection and management of data, human subjects research and the IRB, the informed consent process, and research ethics. As topics are discussed in class, students apply what they have learned to the development of their theses.

More information about the research program is available online, at medschool.vanderbilt.edu/mgc.

Master of Genetic Counseling: Academic Policy: Progress and Promotion

The M.G.C. program follows the School of Medicine policy on the [VUSM Student Progress and Promotion](#) page in the Student Progress and Promotion section of this catalog. Additional program specific policy follows.

The M.G.C. program has a continuous process of student feedback and assessment. The goal is to identify early in the development of knowledge, skills, and attitudes, those that are below expectations in order to mitigate barriers to achieving mastery. The Academic Progress and Promotion Committee (APPC) is the main mechanism for this process and an ad hoc meeting can be convened if pressing issues arise.

Periodic Reviews

The academic progress of each M.G.C. student is reviewed by the M.G.C. APPC twice each academic year, once in the fall semester and once in the spring semester.

During each APPC meeting, one of the following promotion determinations is made for each student:

Satisfactory Progress

Student is determined to be maintaining satisfactory academic progress

- In spring term, decision to promote [1st year] or graduate [2nd year]

Satisfactory academic progress with concern/remediation (Good standing and promotion [or contingency for promotion])

School of Medicine

Student is determined to be maintaining satisfactory academic progress, but requires formal remediation

- In spring term, establish contingencies to promote [1st year] or graduate [2nd year]

Academic probation unsatisfactory progress (Not in good standing—remediation required; promotion [or contingency for promotion])

Student is determined not to be maintaining satisfactory academic progress

- In spring term, establish contingencies to remove probation and to promote [1st year] or graduate [2nd year]

Dismissal

Recommendation of student dismissal from the program is made to the dean of the School of Medicine

- Dismissal follows a period of academic probation if the student does not return to making satisfactory academic progress through prescribed remediation.

Satisfactory Academic Progress and Good Standing

M.G.C. students must maintain satisfactory academic progress in all program learning activities (course work, thesis, and clinical experiences) at all times.

In order to be promoted and to graduate, students must maintain the following satisfactory academic progress standards:

Course work: 'B' or above grade average While a student may obtain a 'B-' in an individual course, maintenance of at least a 'B' grade average overall is required to maintain satisfactory academic progress.

Thesis development: Expectations of progress met

Clinical skills: Progress in ascertainment of clinical skills/competencies

Any unexcused absence(s) during a term are considered as part of the promotion review process and may negatively affect student academic progress and promotion or commencement.

Students are notified in writing of any APPC determination that the student is not making satisfactory progress. The basis for the decision and the requirements for promotion are documented. The decision is also reviewed biannually in the student's meeting with the program director.

The M.G.C. program student support and advisory systems work collaboratively with students on remediation plans and to facilitate students' access to resources to assist the student in returning to satisfactory academic progress status.

Graduation Promotion Committee Endorsement

In the spring term, the APPC is charged with making recommendations to the program director regarding progress, promotion, or graduation of students.

Allowance for Delaying Graduation

If an individual requires additional time due to unusual circumstances (e.g., remediation, leave of absence), a student may, with approval of the M.G.C. program director, take up to three years to complete the degree.

Program Commencement

Degrees are granted by the university in May, August, and December. Those students who wish to "walk" but did

School of Medicine

not complete all degree requirements by May of that year are permitted to walk during the School of Medicine Commencement of the following year.

Formal Remediation and Probation

The M.G.C. Academic Progress and Promotion Committee may require a student to engage in a process of formal remediation in order to return to making satisfactory academic progress.

Formal Remediation Plan

In such cases, the student works with the M.G.C. program director to develop an individualized plan and timeline for remediation. Others who may provide input into or participate in the development and implementation of a student's remediation include the M.G.C. practicum coordinator, the APPC, the student's academic adviser and research adviser.

The formal remediation process is intended to be supportive of struggling students, not punitive. Depending on the nature of the academic challenges cited by the APPC, a plan for remediation might include, but is not limited to:

- Completion (or re-completion) of past assignments,
- Completion of additional assignments,
- Clinical cases with specific indications, or
- Other clinical experiences.

Referral to Vanderbilt University resources, such as the Student Care Network, may be made for academic and/or personal counseling.

Documentation related to the APPC determination (including noted performance deficiencies), the remediation plan, and the outcome of remediation are documented in the student's file.

Probation

Students who do not successfully complete formal remediation, as required by the M.G.C. Academic Progress and Promotion Committee, may be placed on probation. Students placed on probation by the APPC are notified through a letter from the program director that outlines the reasons for the probation, the requirements and recommendations for addressing deficiencies, conditions for removal of probation, expected time frame, and actions that are taken if conditions are not met. Students placed on probation for any reason are required to complete a specific remediation plan that has been approved by the program director and the APPC. The remediation plan may include requirements placed on the student, such as regular meetings with advisers, elimination of extracurricular activities that may be interfering with satisfactory academic progress, etc.

All students on probation are reviewed by the program director and the APPC at least once each semester to determine whether satisfactory academic progress has been made. At that time the program director and the APPC may take the following actions:

Remove probation

Probation may be removed if the student has adequately addressed deficiencies, even if this is before the designated time frame cited in the remediation plan.

Continue probation

Progress is being made.

Recommend dismissal

Performance continues to be unsatisfactory. Written notification is provided to the student regarding the outcome of this review. Probation is considered an adverse action and may be reported in future graduation verifications and other requests for information.

Dismissal

School of Medicine

Dismissal for unsatisfactory academic progress takes place only after a student has been given a reasonable probationary period to address deficiencies. For the master of genetic counseling, this reasonable period usually consists of one academic term. The M.G.C. program follows School of Medicine policy for formal remediation, probation, dismissal, and appeals. See the [VUSM Student Progress and Promotion](#) page of this catalog for more information on these topics.

Eligibility to Reapply

Students dismissed from the program for academic reasons may re-apply through the GC National Match process.

Master of Genetic Counseling: Academic Policy: Student Assessment

Grades

In addition to the School of Medicine policy found on the [Academic Policies for All School of Medicine Programs](#) page in the Student Assessment and Grading section, the M.G.C. program has the following numerical equivalents for letter grades:

A	93-100
A-	90-92
B+	87-89
B	83-86
B-	80-82
C	75-79
F	74 and below

Courses in which a student earns less than a 'B-' do not count toward degree completion and must be repeated. While a student may obtain a 'B-' in an individual course, maintenance of at least a 'B' grade average overall is required to maintain satisfactory academic progress. Students can track their course work grades online through the course management system.

Grade Grievance Procedure

Students should seek redress of a problem with a grade as soon as possible after receiving the grade and in no case later than four weeks after the grade is released. Students with a problem should confer directly with the course director. Every effort should be made to resolve the problem fairly and promptly at this level. If the student cannot resolve the problem through discussion with the course director, the student should request an appeal by writing (email is acceptable) to the program director within two weeks of speaking with the course director. (The course director also should be included on the request for appeal.) In cases where the course director is also the degree program director, the appeal should be made to the assistant dean of health sciences education or his/her designee. If resolution is not achieved by the program director/assistant dean of health sciences education, the case is referred to the senior associate dean of health sciences education or his/her designee, who makes the final decision. At each level of review, the course's assessment practices are reviewed, and the individual student's situation taken into account.

Practica Assessment

Successful completion of required practica is assessed by acquisition of clinical skills and collection of diverse and robust rotation experiences which satisfy ACGC and ABGC requirements. Clinical skill acquisition is assessed by the end of each five-week rotation block. Rotations experiences are tracked and managed through an on-line tracking system (see medschool.vanderbilt.edu/mgc for additional assessment detail and procedural guidance).

Competency Assessment

In accordance with ACGC Standards and Guidelines, students will gain skills and knowledge and will complete clinical cases required to be eligible for the ABGC genetic counseling board exam. Professional competencies set forth by the ABGC can be found at abgc.net/for-diplomates/practice-standards.

Research Progress Assessment

The thesis requirement is met by satisfying the criteria set forth by the Research Review Committee and the Academic Progress and Promotion Committee (APPC), below. Completion of the following goals demonstrates

School of Medicine

progress towards this requirement unless otherwise agreed by the APPC.

By the end of the following terms the student:

First year—Fall

Completes successfully the course Research for Genetic Counselors 1 (GC6610), including timely submission of all required assignments.

First year—Spring

Completes successfully the course Research for Genetic Counselors 2 (GC6615), including timely submission of all required assignments. This includes completion of thesis proposal and its approval after presenting it to the student's thesis committee.

Second year—Fall

Completes predetermined goals set jointly with the student's thesis committee by the end of the summer. These goals may include Institutional Review Board Approval, plan for data analysis, submission of first figure, and completion of an outline of manuscript.

Second year—Spring

Submits to committee for approval a manuscript formatted for the target journal and Presents thesis to committee and other invited members of faculty. Publication is encouraged, but not a graduation requirement.

Board Exams

Graduates of ACGC-accredited programs are eligible to apply for Active Candidate status from the ABGC and apply to sit for the certifying exam. Please visit ABGC.net for details regarding the certification exam.

Master of Genetic Counseling: Academic Policy: Student Support and Advisory Services

Academic and Career Advisory Resources

The goal of the Vanderbilt M.G.C. Advising Program is to support students in achieving their maximum educational potential while fostering professional development and clinical competency.

Objectives

- To enhance open lines of communication between students and the program director, administration, and faculty.
- To provide the student an adviser with whom they can discuss academic questions, progress, concerns, etc.
- To enhance professional development.
- To address issues in a constructive manner.

Advisers work with students to:

- Promote student growth and development.
- Assist students in assessing their interests and abilities, examine their educational goals, decision making, and developing short- and long-term plans to meet their objectives.
- Discuss and clarify educational, career, and life goals.
- Provide accurate and timely information and interpret professional, institutional, and program education requirements.
- Evaluate and monitor student academic program and achievement of goals.

School of Medicine

- Reinforce student self-direction and self-sufficiency.
- Identify appropriate resources relating to educational, career, personal concerns, or skill/learning deficiencies when necessary.
- Identify educational, institutional, and community resources (e.g., internships, scholarships, etc.).
- Collect and distribute relevant data about student needs, preferences, and performance for use in program decisions and policy.

Acknowledgement: Modified from the Council for Advancement of Standards in Higher Education
<https://www.cas.edu/>.

Approach

The M.G.C. Advising Program uses a combined prescriptive and developmental approach. A prescriptive approach is utilized to ensure students enroll in all required courses. A developmental approach is utilized to help promote student growth and professional development. The following tenets are assumed:

- The individual student must be considered as a whole.
- Each student is a unique person and must be treated as such.
- The total environment of the student is educational and must be used to help the student achieve full development.
- The major responsibility for a student's personal and social development rests with the student and his/her personal resources.

Logistics

Students are matched with an academic adviser who guides and monitors their progress throughout their time in the M.G.C. program. Advisers keep documentation of meetings with students. Summary of all meetings are kept in the student's file.

Adviser Responsibilities

- To meet with student as recommended/requested and no less than prior to each APPC meeting
- To listen to student concerns
- To provide constructive feedback
- To assist in finding on- and off-campus resources for academic success (e.g., tutoring, counseling, etc.)
- To communicate student concerns or concerns regarding the student to program director or appropriate program administration
- Represent student at Academic Progress and Promotion Committee when concerns exist

Student Responsibilities

- To meet with adviser as recommended/requested and no less than prior to each APPC meeting
- To keep adviser informed of academic performance and potential problems
- To discuss with adviser any issues with clinical rotations, supervisors, etc.
- To keep adviser informed of thesis progress

Schedule for Adviser Meetings

Advisers and students are required to meet at least once each term. Meetings are required near the end of the term so that information from the meetings can be included in promotion committee discussions (promotion committee meetings take place in all terms except summer).

Recommended Schedule:

- First Year—Fall: Introductions and goal-setting meeting (during weeks 1-2)
- First Year—Fall: Mid- to late-semester advising meeting
- First Year—Spring: Mid- to late-semester advising meeting
- End of First Year—Summer: Review of clinical and research milestones/progress
- Second Year—Fall: Mid- to late-semester advising meeting
- Second Year—Spring: Early- to mid-semester advising meeting (at least 3 months prior to graduation, to ensure student is on track for on-time graduation)
- Second Year—Spring: Career advising, as needed

Advising meetings may happen as frequently as advisers and students feel appropriate to address student needs. Students will also meet with program leadership as appropriate to the need and no less than twice a year.

School of Medicine

Health and Wellness

In addition to the Student Care Network and other useful student resources found on the [Life at Vanderbilt](#) page of this catalog, M.G.C. faculty members and those in the program leadership are available as resources to students to discuss challenges related to work-life balance and other stressors that can accompany launching a new career, as well as life in general. Faculty members are trained during their faculty orientation about the limits to this professional role and how to recognize when students may be in need of more specialized resources, such as those provided through VU student health or the Title IX office. Faculty members are also trained to make referrals to available resources, whether doing so directly or by providing resources to students who wish to self-refer.

The M.G.C. program director is available to consult with faculty members who have concerns regarding a student's well-being. By the same token, members of the Vanderbilt University School of Medicine administration, including the assistant dean for health sciences education and the senior associate dean for health sciences education, are available to the program director to consult on questions that may arise regarding student welfare.

Conflicting Faculty Roles

The M.G.C. program Educator Role Matrix (<http://vanderbi.lt/mgcrolematrix>) demonstrates faculty/administration dual roles that can lead to potential conflicts of interest. Incompatible roles are avoided, if at all possible, when assigning advisers. Roles for potential conflict should be mitigated with an action plan.

Master of Genetic Counseling: Accreditation

The Vanderbilt University Master of Genetic Counseling program has been granted accreditation as a New Program by the Accreditation Council for Genetic Counseling (ACGC) effective January 31, 2019. Additional information may be found on the ACGC website at qceducation.org and on the VUSM website at medschool.vanderbilt.edu/mgc.

7918 Jones Branch Drive Suite 300

McLean, VA 22102 USA

(703) 506-7667

<http://www.qceducation.org>

Master of Genetic Counseling: Admission

Admission Requirements Eligibility

1. Eligible candidates for the Vanderbilt M.G.C. program are required to have completed a baccalaureate degree from an accredited institution. Coursework in biology, chemistry, biochemistry, general or human genetics, statistics, and psychology is highly recommended.
2. Applicants are expected to have familiarity with the field of genetic counseling and be able to express their understanding of the field in their application essays and as part of the interview process. Resources to explore the field can be found here: https://padlet.com/snm_sig/tb434in81aif57oh
3. Applicants are expected to possess an ability to communicate clearly and compassionately with others. Individuals for whom English is not their native language are required to provide scores from the Test of English as a Foreign Language (TOEFL), which is administered by the Educational Testing Service in Princeton, New Jersey. Information about this exam is available at <http://www.ets.org/toefl>. The minimum acceptable score on the paper-based TOEFL is 570, and for the Internet-based test, 88. The Vanderbilt Institution Code for TOEFL is 1871. Although International English Language Testing System (IELTS) test scores are not required, applicants who have taken the IELTS may report their scores in the online application.
4. The Vanderbilt Master of Genetic Counseling is unable to accept international students at this time. Students who are permanent residents (Green Card holders) are eligible to apply.

Application Process

1. Apply through the online Vanderbilt University application apply.vanderbilt.edu/apply/.
2. Register with the Genetic Counseling Admissions Match through National Matching Services at

School of Medicine

natmatch.com/gcadmissions/index.html.

Complete information about the application process is available online at medschool.vanderbilt.edu/mgc/admission/apply.

Academic Transcripts

Applicants must provide transcripts for prior undergraduate and graduate work as part of their online application for admission. Students enrolled in a course of study at the time of application are required to provide an unofficial transcript as part of the online application, and then provide the final, official transcript as soon as it is available. More information on submitting final transcripts is available at <https://registrar.vanderbilt.edu/academic-records/external-degree-verifications.php>.

An official transcript, documenting degree(s) and completed course work, is required before February 28th. Please see <https://registrar.vanderbilt.edu/academic-records/external-degree-verifications.php> for details on external degree verifications.

-

Information about verification of academic work at institutions outside of the U.S. may be found here. <https://registrar.vanderbilt.edu/academic-records/international-degrees.php>. International students with questions about the prior degree verification process may contact the External Education team at prior-degree-review@vanderbilt.edu.

Selection Criteria, Offer, and Acceptance

The M.G.C. Admission Committee values diverse academic backgrounds in its applicants. Applicants should have evidence of success to ensure they are well prepared for graduate work. Evidence of success can be demonstrated through undergraduate or post-graduate studies, or products of employment success such as publications or upward advancement or leadership in a related field.

The M.G.C. program does not have a minimum GPA requirement. Graduate Record Examination (GRE) scores are not part of the application review and should not be submitted. The M.G.C. Admission Committee takes a holistic approach to ensure each applicant's potential to be academically equipped to succeed in the M.G.C. program.

In addition to evidence of academic success, the MGC Admission Committee considers the following when making admission decisions:

- Familiarity with the field of genetic counseling
- Unique interests and life experiences
- Evidence of leadership skills
- Communications skills
- Community involvement
- Exposure to research process
- Exposure to the health care setting
- Work experience
- Cultural humility and awareness

As an ACGC Accredited program we participate in the Genetic counseling admission match. Please see <https://natmatch.com/gcadmissions/> for information about Genetic Counseling Admission Match including match overview, rules, schedule of dates and algorithm. Summary statistics about the results of the Match for applicants are also available including data.

Transfer Students/Credits

In general, the M.G.C. program is unable to allow transfer credits; however, on occasion, students may transfer graduate credit with prior written approval of the program director.

Non-degree-seeking Students

With prior written permission of the program director, non-degree-seeking students may audit or enroll for credit in MGC courses.

School of Medicine

Visiting Students

Students enrolled in an ACGC accredited program may email the program director for information about clinical rotations at VUMC-affiliated clinical sites. Institutional agreements are arranged through VUMC.

Master of Genetic Counseling: Contact Information

Additional information may be obtained by contacting program officials at [Contact | Master of Genetic Counseling | Vanderbilt University](#).

Master of Genetic Counseling: Other Program Policy and Procedure

Program Evaluation

Note: The term “evaluation” is used to refer to the measurement of effectiveness of the curriculum, including courses and other learning activities, as well as M.G.C. program faculty and administrators, not individual student performance.

The purpose of evaluation at Vanderbilt University School of Medicine M.G.C. program is to provide timely information that can be used to determine the effectiveness of the M.G.C. curriculum and teaching. The evaluation ultimately measures whether the program is accomplishing its mission. The evaluation process supports continuous improvement of all program components.

Curriculum and teaching improvement is a community effort. All M.G.C. students, faculty, and staff have a role in identifying needs and implementing strategies for improvement. For that reason, every M.G.C. student is required to complete each M.G.C. curriculum, program and faculty/administrator evaluation survey.

The M.G.C. leadership and committee chairs, with guidance from the M.G.C. Advisory Board, broadly oversee the system of program and faculty evaluation. However, it is important to the program that students are included in the review, synthesis and discussion of evaluation data, as well as the development of program changes that result from that data. Therefore, a recent graduate (once the program graduates a class) and at least one currently enrolled student are part of the evaluation team. Student representatives discuss program outcomes with their student colleagues, provide reports and interpretations, and make recommendations for improvement.

Types of Evaluations

Program evaluation examines the impact of overall curriculum and the interaction of its components and the learning environment on student learning. At VUSM, program evaluation activities include but are not limited to:

- *Course evaluations.* These evaluations are completed by all students for each course. Course evaluations cover important course quality indicators, including level of difficulty, course structure/organization, instructor effectiveness, text quality and give the student an opportunity to provide an overall course rating.
- *Rotation evaluations.* These evaluations are completed by all students for each rotation. Rotation evaluations allow students to provide meaningful feedback pertaining to the quality of supervision and mentorship they received at the rotation site. This feedback allows M.G.C. program administrators the opportunity to assess the quality of training sites and to develop targeted training for site supervisors and mentors.
- *Overall program evaluations (surveys).* These surveys and focus groups are used to gather data regarding evaluation of the overall program. Students, faculty, leadership, alumni and employers are asked to complete these evaluation tools.
- *Faculty and administrator evaluations.* These evaluations are conducted by all key program personnel, including the program leadership and primary instructional faculty/course directors. Feedback from faculty is elicited on how Program Leadership can better support instructional faculty. Leadership receives feedback on their delineated job responsibilities from students and faculty. Students provide feedback via exit survey and alumni survey. Program faculty, course directors, and clinical supervisors have the opportunity to provide feedback about Program Leadership on an anonymous survey.
- *Focus groups.* The Center for Teaching conducts focus groups of the students and faculty as needed by

School of Medicine

the program to evaluate if program is meeting the mission, goals and strategic plan. More informally the program director meets regularly with the students to hear any concerns or suggestions.

- *Data from student assessments.* Student performance in courses is used to assess curriculum and the program annually. In addition the American Board of Genetic Counselors reports aggregate data to the program regarding alumni's performance on the certifying exam. The overall scores and the breakdown of performance of alumni in the different domains and competencies are reviewed by the Curriculum Committee. These data factor into the program and curriculum evaluation process.
- *Evaluation data and the Program Improvement Process.* Data from the above describe evaluations are compiled annually by the program coordinator under the direction of the program director.

Data are distributed for review. Responsible individuals and/or committees summarize data. Areas of improvement are addressed with action plans and measurable goals to assess progress toward improvement.

Leave of Absence

A student may request a leave of absence (LOA) from school for any reason (personal, medical, etc.). All LOAs must be approved by the M.G.C. program director. A student wishing to request an LOA should make an appointment to speak with the M.G.C. program director about the request (unless an emergency LOA). Following that meeting the student is required to submit a written request to the M.G.C. program director, outlining the nature of the requested leave and providing the starting and ending dates. Students may consult with Vanderbilt University Student Access Services (vanderbilt.edu/student-access/) when contemplating a leave of absence, and program administrators may consult with student access services when evaluating a request for leave of absence.

The program director may grant the student a leave of absence for up to one year as long as the student is in good academic standing. Prior to leave, a plan for re-entry into the curriculum and meeting requirements for graduation should be outlined with the program director, with the assistance of the student's adviser, as needed.

Students who are not in good academic standing may request a leave of absence using the request procedure described above, but approval of the leave may be granted only by the M.G.C. Academic Progress and Promotion Committee. The request is presented to the APPC by the M.G.C. program director.

Attendance

Attendance is required at all M.G.C. program activities unless prior approval for absence is provided by a course instructor or clinical supervisor (for single session absences) or the M.G.C. program director (for multiple-session or multiple-day absences).

Classroom Attendance Policy

Students are required to attend all class sessions, unless otherwise directed. A course instructor may choose to make an exception for a student with extenuating circumstances. The student must contact the instructor to request an exception before the anticipated absence. The following guidelines may be used by M.G.C. faculty to guide decisions about approving absences from classroom sessions:

- 4 credit hour courses: 1-2 absences may be permitted (only with prior instructor notification and approval)
- 3 credit hour courses: 1-2 absences may be permitted (only with prior instructor notification and approval)
- 2 credit hour courses: 1 absence may be permitted (only with prior instructor notification and approval)
- 1 credit hour courses: For courses that meet 4-6 times during a semester, attendance is required in every class (unless specific arrangements have been made in advance of enrolling in the course).

Clinical Rotation Attendance Policy

Each student is expected to attend clinical learning opportunities, in each rotation, on designated days as scheduled. Clinics generally operate Monday through Friday with specific dates/times designated. Due to clinic start times, this may mean arriving to clinic prior to 8:00 a.m. and occasionally not leaving until after 5:00 p.m., to ensure that all clinic preparation and assignments have been completed. Students are expected to maintain regular contact with rotation supervisors to be aware of any changes to the clinical schedule.

Procedures for Requesting Absences

Planned Absences

School of Medicine

Students who anticipate being absent for more than one class or clinical session are required to email a request to the M.G.C. program director in advance outlining the need for the absence. In these circumstances, students are responsible for notifying their instructors (classroom and clinical) in advance about their planned absence, and they are responsible for making arrangements to make up any work missed during the absence.

Emergency Absences

In the case of an emergency absence (i.e., illness, emergency, death in family), the student is required to contact the M.G.C. program director as soon as the student becomes aware of the need to be absent. The program director contacts the student's course instructors and/or clinical supervisors. If the absence extends beyond one day, the student must keep the program director updated regarding the anticipated duration of time away. Any absence due to illness greater than three days requires a doctor's note, to be provided to the Program Director.

Students should not attend any program activities, including lectures/student laboratory and clinical practica, if they experience any of the following:

- Vomiting
- Diarrhea
- Fever greater than 101 degrees F
- Diagnosis of a communicable illness

Upon returning from an emergency absence, students are responsible for completing all work and/or assignments missed during the absence, as required the instructor/supervisor. This may require the student to arrive early or stay late in order to make up missed work.

Unexcused Absences

All absences from mandatory sessions that are not excused (using processes above for planned and emergency absences) are considered unexcused absences. Unexcused absences are unacceptable and may have a negative effect on the student's overall academic progress through the program. All sessions/educational activities are mandatory unless otherwise indicated in the course syllabus/clinical expectations materials. Please contact the course or program director with any questions.

Make-Up Policy

Each M.G.C. program course director is responsible for establishing policies concerning make-up policies. Any such policies, including points for attendance and/or participation, penalties for absences, limits on excused absences, total allowable absences, etc., are specified in the course syllabus provided to students at the beginning of the course term.

Weather Policy

It is very rare for VUSM educational activities to be cancelled for weather-related reasons. However, there are days in which the weather is severe and dangerous for travel. If VU classes are cancelled by the chancellor, M.G.C. students and faculty receive an email from the M.G.C. program director with instructions.

Safety is our primary concern. Winter weather may make road conditions unsafe, even if classes are not cancelled by the university. In this situation, students are urged to use their best judgment about commuting in inclement weather. If a student is unable to get to campus due to weather conditions, he or she should notify the course instructor/clinical supervisor prior to class or clinical session, and make arrangements with the instructor to make up any missed work.

Faculty members may cancel class sessions if they feel that it is appropriate. The M.G.C. program assists faculty in scheduling make-up classes for all canceled class sessions.

Honor Code Attestation

Each student will be compliant with the Vanderbilt University School of Medicine Honor Code guidelines. Every academic year, each student will sign, by written or electronic signature, an acknowledgement indicating that the student will follow the Honor Code rules and requirements.

School of Medicine

Student Work Policy

Vanderbilt University Master of Genetic Counseling program students are not offered paid employment opportunities as a function of their student enrollment. However, enrolled students have access to resources available through Vanderbilt University Student Employment. More information is available at vanderbilt.edu/studentemployment/. It is recommended that students not work more than ten hours a week during academic terms.

Transportation

During their participation in the M.G.C program, students may be required to travel off campus for educational experiences. Local travel to off-campus sites is generally limited to one-way trips of not more than 35 miles.

M.G.C. students may be placed in locations outside of the local area in rotational experiences for extended (several weeks) periods of time. In which case, students are responsible for all travel expenses during this time.

Master of Genetic Counseling: Program Overview

The Master of Genetic Counseling (M.G.C.) is built on a foundation of medical education excellence, broad clinical expertise and innovation in genetics research through collaboration with Vanderbilt University and Vanderbilt University Medical Center. The M.G.C. is awarded by Vanderbilt University School of Medicine, with academic administrative oversight provided by the Vanderbilt University School of Medicine Office of Health Sciences Education. The program is offered in collaboration with the Vanderbilt Genetics Institute of Vanderbilt University Medical Center. More information about the Vanderbilt M.G.C. program is available online, at medschool.vanderbilt.edu/mgc.

Program Mission/Goals/Objectives Vanderbilt Genetics Institute Mission

The mission of the Vanderbilt Genetics Institute is to promote genomic discovery and advance understanding of the human genome. Application of new discoveries will ultimately translate into improved patient care through better diagnosis, treatment, and prevention of human disease.

Vanderbilt Master of Genetic Counseling Program Mission

The mission of the Master of Genetic Counseling (M.G.C.) program is to educate diverse genetic counselors who will be leaders in genomic medicine, striving to increasing access to care, education, and research in genetic counseling.

The program goals are to:

- Matriculate diverse graduate students in genetic counseling who are empowered to succeed in the expanding field of genetics, genomics, and personalized medicine.
- Facilitate faculty and student collaboration with Vanderbilt researchers to enable significant contributions in the areas of genetics and genomics, genetic counseling, and personalized medicine.
- Improve access to genetic services by increasing the number of providers and expanding awareness about the field.

Graduates of the M.G.C. program will:

- Expand their knowledge about genetics and genomics and practice the application of this understanding in medicine as set forth by the Accreditation Council for Genetic Counseling (ACGC) standards.
- Develop skills to sensitively convey complex medical information to health care consumers and providers, utilizing appropriate evidence-based approaches to practice, as outlined in the ACGC competencies.
- Evaluate and analyze research to formulate important questions, and apply critical thinking and appropriate investigational methods to pursue answers to those questions.

Vision

The vision of the Vanderbilt M.G.C. program is to be on the forefront of genetics and genetic services research, to create a nurturing environment to foster genetic counseling training, and to nest the program in a strong, connected academic and medical community.

Standing Program Committees

School of Medicine

Committee members can be found on our website: <https://medschool.vanderbilt.edu/mgc/people/standing-program-committees/>

Vanderbilt Genetic Counseling Program Advisory Board

The Vanderbilt Genetic Counseling Program Advisory Board has an overarching responsibility to assist in the development and ongoing evaluation of the graduate program. The board is responsible for ensuring that the curriculum is in line with the program's mission and with the ACGC accreditation standards for the genetic counseling profession.

Program Implementation Committee

The Program Implementation Committee includes the program leadership and program coordinator. This committee convenes regularly to ensure smooth program operations.

Admission Committee

The Admission Committee is responsible for reviewing applications for the M.G.C. program, for inviting applicants to interview, and for making recommendations of candidates for admission to the program.

The Admission Committee is appointed and chaired by the program director. It consists of seven to nine M.G.C. faculty members (one of which is also a member of the Diversity Committee). Members may include individuals from the program leadership. Committee members serve a three-year term, with inaugural committee members appointed for a three-year term within a staggered succession schedule.

Curriculum Committee

The Curriculum Committee is charged with development and oversight of the M.G.C. program curriculum. The Curriculum Committee is appointed by the program director.

Research Review Committee (RRC)

The role of the Research Review Committee is to establish and ensure adherence to policies and procedures for the M.G.C. thesis requirement. The RRC develops guidelines and recommends resources to ensure the success of each student in thesis development and completion. The RRC is appointed by the program director and consists of at least three M.G.C. faculty members. The RRC is responsible for 1) oversight implementation of the thesis process into the curriculum and 2) supervision of the faculty research advisers.

Diversity Committee

The purpose of the Diversity Committee is to increase the number of underrepresented students in the field of genetics counseling. The committee meets annually to establish and review M.G.C. program diversity goals and its progress toward meeting them. Committee members are appointed by the M.G.C. program director. The Diversity Committee includes at least one member from each of the following groups: M.G.C. program leadership, M.G.C. Advisory Board, M.G.C. faculty, and at least one former or current student.

Academic Progress and Promotion Committee (APPC)

The APPC meets at least twice per academic year to review each student's academic progress through the program curriculum. The APPC has the responsibility to make recommendations to the program director concerning promotion, remedial action, or dismissal, as appropriate, for each student in the program.

The Academic Progress and Promotion Committee consists of six members with a quorum being at least 3 voting members present. The six voting members are program faculty members, all whom are board certified in genetics/genetic counseling or have extensive experience in training or working with genetic counselors. Voting members would serve for three years. The program director is a non-voting member, ex officio.

The fall meeting of the APPC each year reviews academic progress for both cohorts of students. The spring

Published 7/12/2022

School of Medicine

meeting reviews academic progress for both cohorts and also makes promotion decisions (for first-year cohort, decisions include promotion to second year; for second-year cohort, decisions include recommendation of students to the program director for graduation).

Program's Major Facilities

The M.G.C. office is located in Light Hall room 510. Classes are held as assigned on the 4th or 5th floor of Light Hall. Students complete the majority of their rotations at Vanderbilt University Medical Center sites. Students may consider an off-campus rotation as an elective. Please visit medschool.vanderbilt.edu/mgc/practicum for more information about practica.

Master of Genetic Counseling: Tuition, Fees, and Cost of Attendance

For information about university and School of Medicine costs and fees please refer to the [School of Medicine Tuition, Fees, and Financial Aid](#) page of this catalog.

Academic Year 2022-23 Tuition

Tuition, first and second year	\$43,260
Hourly rate	1,733

Detailed information pertaining to cost of attendance is found at medschool.vanderbilt.edu/financial-aid/master-of-genetic-counseling-cost-of-attendance.

Payment of Tuition and Fees

Students registered for a full-time course load (eight hours or more for fall and spring and six hours or more for summer) are billed at the block tuition rate for the term in which they are enrolled. Students registered for less than a full-time course load (seven hours or fewer in the fall and spring or five hours or fewer in the summer) are billed at the hourly tuition rate for the term in which they are enrolled. Certain courses are designated to trigger full-time enrollment (and block tuition billing) even though the number of credits carried by the course is fewer than eight.

Please refer to the [School of Medicine Tuition, Fees, and Financial Aid](#) page of this catalog for more information about university costs and School of Medicine fees. Additional information can be found at vanderbilt.edu/stuacct.

Financial Aid

No program scholarship funds are provided to students enrolled in the Vanderbilt University Master of Genetic Counseling program. Vanderbilt University School of Medicine participates in the Federal Direct Student Loan Program. Prospective and admitted M.G.C. students may apply for federal loans to help support their attendance at Vanderbilt University. Information about federal loans and how to apply for them may be found on the [VUSM Office of Student Financial Aid](#) website.

Master of Imaging Science

The objective of the master of imaging science is to provide innovative and comprehensive education across the full range of biomedical imaging science to create a cohort of graduates prepared to assume leadership roles in applying imaging in academic, clinical, and industrial settings. Full-time students will be able to complete the program in 12 months, and will engage in traditional coursework, seminars, practical laboratories, and an intense research project.

The program is offered under the aegis of the Vanderbilt University Institute of Imaging Science and School of Medicine; and was created in response to the growing recognition of imaging science as a distinct specialty in biomedical research and clinical care. Imaging provides unique information about tissue composition, morphology and function, as well as quantitative descriptions of many fundamental biological processes. Hence, it has attained a position of central importance in much biomedical research and evaluation of clinical interventions and precision medicine. The program will address the need for imaging scientists trained in multiple techniques and modalities, knowledgeable about the ideas that are common to all imaging, and able to develop new applications of imaging in biology and medicine. These individuals must be able to understand and formulate connections between the technical aspects of imaging in multiple modalities and the information that

School of Medicine

imaging may provide on physiology, biological structure, metabolism, and cellular and molecular processes.

Graduates of the master's program in Imaging Science will:

- Develop the ability to implement technical advances in one or more specific modalities.
- Understand the uses and practical limitations of the major imaging modalities in use today. They will understand the fundamental principles of image formation, contrast mechanisms, and image analysis for each modality.
- Apply expertise in the use and interpretation of multiple imaging modalities in preclinical and/or clinical applications, as well as current research directions.

Applicants should have an undergraduate baccalaureate degree in a basic, applied, biological, physical, computer, or social-behavioral sciences from an accredited university. Mathematical aptitude and basic programming skills are highly encouraged. Our own experiences confirm that students from backgrounds in physics, chemistry or engineering are successful as imaging scientists after appropriate training.

Applicants will be required to submit the following information:

1. Documentation of completed undergraduate degree, and transcripts showing a minimum final GPA of 3.0.
2. TOEFL/IELTS scores (less than 2 years old) required for applicants whose native language is not English. This requirement is waived for students who have completed one year of full-time study with a minimum GPA of 3.0 in an accredited university in the United States.
3. Statement of intended course of study (i.e., full-time or part-time enrollment)
4. Statement of Purpose, including connection to any research experience (1-page limit)
5. Letters of Recommendation (two minimum)
6. Application Fee

Additionally, General Graduate Record Examination (GRE) or Medical College Admission Test (MCAT) scores are recommended, but not required. In cases where the background in math or computing is not clear from the transcript, applicants should clarify what education they have had in calculus, vector or linear algebra and other topics in mathematics and/or computing.

The program is unable to accept international students at this time; but this condition may change, and applicants can contact the program to determine the current eligibility requirements. Permanent residents (green card holders) are eligible. Non-native speakers must demonstrate English proficiency with minimum scores:

Paper based TOEFL: 550

Computer based TOEFL: 213

Internet based TOEFL iBT: 80

IELTS: 7

Official GRE/TOEFL/IELTS Scores: Scores should be sent to Vanderbilt University School of Medicine, institution code 1871. A department code is not required.

Master of Public Health: Academic Policy: Degree Requirements

Requirements to Earn Degree

Candidates for the full-time M.P.H. degree option must complete 42 academic credit hours of course work over five academic terms. Candidates for the part-time M.P.H. degree option must complete 42 academic credit hours of course work over seven to eleven terms. The 42 credit hours include core and track-specific courses, as well as courses associated with the public health practicum and culminating experience. Satisfactory completion of

Published 7/12/2022

School of Medicine

the public health practicum, an interprofessional education activity, and the culminating experience is required for all students.

Length and Delivery of Program

The M.P.H. program can be completed on a full-time or part-time basis. Students choose the full-time or part-time option prior to matriculation. The full-time M.P.H. option is completed in two academic years (five terms), starting in the fall term and ending in the spring of the following academic year.

The part-time M.P.H. option is completed over three or four academic years, starting in the fall term and ending in the spring.

The maximum time allowed to complete the degree for both the full-time and part-time options is four years, unless there are unusual circumstances which merit an extension of this limit.

M.P.H. Program Competencies and Curriculum

The M.P.H. program faculty members teach and assess 22 foundational competencies and 5 track specific competencies required for accreditation by the Council on Education for Public Health. Students are assessed and demonstrate competencies through course work and other degree requirements.

Foundational Competencies Evidence-based Approaches to Public Health

- Apply epidemiological methods to the breadth of settings and situations in public health practice.
- Select quantitative and qualitative data collection methods appropriate for a given public health context.
- Analyze quantitative and qualitative data using biostatistics, informatics, computer-based programming and software, as appropriate.
- Interpret results of data analysis for public health research, policy, or practice.

Public Health and Health Care Systems

- Compare the organization, structure, and function of health care, public health, and regulatory systems across national and international settings.
- Discuss the means by which structural bias, social inequities, and racism undermine health and create challenges to achieving health equity at organizational, community, and societal levels.

Planning and Management to Promote Health

- Assess population needs, assets, and capacities that affect communities' health.
- Apply awareness of cultural values and practices to the design or implementation of public health policies or programs.
- Design a population-based policy, program, project, or intervention.
- Explain basic principles and tools of budget and resource management.
- Select methods to evaluate public health programs.

Policy in Public Health

- Discuss multiple dimensions of the policy-making process, including the roles of ethics and evidence.
- Propose strategies to identify stakeholders and build coalitions and partnerships for influencing public health outcomes.
- Advocate for political, social, or economic policies and programs that will improve health in diverse populations.
- Evaluate policies for their impact on public health and health equity.

Leadership

- Apply principles of leadership, governance, and management, which include creating a vision, empowering others, fostering collaboration, and guiding decision making.
- Apply negotiation and mediation skills to address organizational or community challenges.

Communication

- Select communication strategies for different audiences and sectors.
- Communicate audience-appropriate public health content, both in writing and through oral presentation.
- Describe the importance of cultural competence in communicating public health content.

School of Medicine

Interprofessional Practice

- Perform effectively on interprofessional teams.

Systems Thinking

- Apply systems thinking tools to a public health issue.

Track-Specific Competencies

Epidemiology Track

1. Compare the strengths and weaknesses of observational study designs and select an appropriate observational study design for population-based research. (VU Epi1)
2. Evaluate sources of public health evidence for bias, including selection bias, information bias, and bias due to confounding. (VU Epi2)
3. Build of multivariable regression models and interpret statistical output from these models to make appropriate statistical inference. (VU Epi3)
4. Perform regression diagnostics, including residual analyses to assess how well models fit the data, inspect the presence of outliers, and assess the fulfillment of model assumptions. (VU Epi4)
5. Describe and apply the ethical foundation for research regulations and their principles as applied to human subjects research, including autonomy, beneficence, and justice. (VU Epi5)

Global Health Track

1. Identify historical and emerging issues of significance in global health from an interdisciplinary vantage point. (VU GH1)
2. Apply a research method(s) and/or programmatic intervention(s) used to ameliorate health and developmental problems, particularly in low-resource settings. (VU GH2)
3. Describe fundamentals of organizational behavior and change, particularly in low-resource settings. (VU GH3)
4. Demonstrate understanding of the policy process through the development of tools to influence policy design, implementation, or evaluation. (VU GH4)
5. Integrate knowledge of cultural humility and health equity into global health research, policy, practice, or advocacy efforts. (VU GH5)

Health Policy Track

1. Identify the main features and challenges related to the financing, incentives, and delivery of health care services and public health systems in the United States. (VU HP1)
2. Describe the complementary roles of individualized health care services and population-based interventions in maintaining and improving health status. (VU HP2)
3. Evaluate policies and apply theories of health insurance and the incentives that various approaches to coverage and provider payment create in the health system. (VU HP3)
4. Analyze the impact of changes in public health policy and health care financing and service delivery on elements such as health care cost growth, quality of care, and access to services. (VU HP4)
5. Conceptualize the data and research methods necessary to address questions of significance to policymakers and other relevant system actors. (VU HP5)

Public Health Practicum

All students in the M.P.H. program complete a public health practicum. The public health practicum is a supervised practical field experience designed to provide students the opportunity to develop and apply the knowledge and skills acquired in the academic program in a public health agency or other environment in which a public health function is performed. Students work with the practicum director on an individual basis to identify, arrange, and complete a satisfactory field experience that fulfills the program's practicum requirements. Additional information about the Public Health Practicum can be found at medschool.vanderbilt.edu/mp/academics/practicum.

Interprofessional Education

Interprofessional Education (IPE) is an integral part of public health and a required component of the M.P.H. program. The IPE requirement is composed of a didactic foundation, which is delivered as part of PUBH 5516 Public Health Practice, as well as a practical experience. For the practical experience, students participate in an interprofessional activity. Students may select an IPE activity from a list of pre-approved options or they may

School of Medicine

propose their own.

Culminating Experience

The culminating experience is a graduation requirement for all students in the M.P.H. program. The culminating experience allows each student to demonstrate synthesis of the M.P.H. foundational and track-specific competencies and produce a high-quality written product that is developed and delivered in a manner that is useful to external stakeholders. The culminating experience is completed at the end of the course of study, with final deliverables due in the student's final term (typically the spring term). Students have two options for their culminating experience.

Option 1: Thesis

All students who choose the thesis option take protocol development and thesis courses. Students engage in mentored research or other original scholarly work. The final product may take the form of a manuscript to submit for publication, a grant application, program evaluation report, training manual, strategic plan, policy paper, or other format appropriate to the student's educational and professional goals and approved by the thesis adviser. Research is typically based on secondary data analysis. Additional information about the thesis can be found at medschool.vanderbilt.edu/mp/academics/thesis.

Option 2: Capstone

All students who choose the capstone option take the Capstone Portfolio Development course. This course is designed to guide students through the preparation of their capstone products. Students also take a series of specific graduate- or professional-level courses in a designated focus area that aligns with the student's educational and professional goals. The capstone provides students an opportunity to further hone their practical public health skills in an area of interest. Students develop an ePortfolio which includes a written product that describes their capstone deliverable which is either: 1) a resource tool kit, or 2) a specific tool for an external organization. Examples of public health tools include a needs assessment, monitoring and evaluation plan, program evaluation report, strategic plan, training manual, policy statement, grant, etc. Additional information about the Capstone can be found at medschool.vanderbilt.edu/mp/capstone.

Course List

A full list of program courses is provided in this catalog under [Courses by Program](#).

Master of Public Health: Academic Policy: Progress and Promotion

Periodic Reviews

Each student meets with their academic adviser at least twice per year. Academic advising meetings provide the opportunity to discuss course selection, progress toward meeting the degree requirements, and any academic challenges and how they may be addressed. Additional meetings may take place as needed at the student's or adviser's request.

Satisfactory Academic Progress and Good Standing

A cumulative grade point average of at least 3.0 is required for graduation. A semester average of at least 3.0 is required to remain in good academic standing. A student whose cumulative grade point average falls below 3.0 may be placed on probation for one semester. If at the end of the semester the grade point average is still below 3.0, the student may be dismissed from the program based on unsatisfactory academic performance. Students may withdraw in lieu of dismissal.

Repeating a Course

Students who receive a final course grade of C+ or lower may be required to retake the course or complete additional course requirements before progressing in the program.

Graduation Promotion Committee Endorsement

In the spring term, the Admission and Promotion Committee is charged with making recommendations to the program director regarding progress, promotion, or graduation of students.

Allowance for Delaying Graduation

Students who need more than two years to complete the M.P.H. degree requirements on a full-time basis, or students who need more than three years to complete the degree on a part-time basis, may propose a revised

School of Medicine

degree completion plan. This plan should include a term-by-term list of completed, in progress, and anticipated degree requirements, along with a reasonable timeline for completing the degree requirements. The revised degree completion plan must be approved by the track director and program director, in writing. For incomplete courses, the relevant course director's written approval is also required.

Program Commencement

The university holds its annual Commencement ceremony following the spring semester. Degree candidates must have successfully completed all curriculum requirements by the published deadlines in order to participate in the ceremony. A student completing degree requirements in a summer or fall semester may participate in Commencement the following May, and ordinarily the degree will be conferred at the end of the term in which requirements are completed. Any student unable to participate in a Commencement ceremony will receive his/her/their diploma by mail.

Formal Remediation and Probation

A student may be placed on academic probation if the student's cumulative grade point average falls below 3.0, or their course grades include any failures. If at the end of the semester of academic probation the grade point average is still below 3.0, the student may be dismissed from the program based on unsatisfactory academic performance.

Students placed on probation are notified in a letter from the program director that outlines the reasons for the probation; the requirements and recommendations for addressing deficiencies; the conditions for removal of probation, including an expected time frame; and actions that will be taken if conditions are not met.

Students placed on probation for any reason will be required to complete a specific remediation plan that has been approved by the track director and program director. The remediation plan may include requirements of the student, such as regular meetings with advisers, elimination of extracurricular activities that may be interfering with satisfactory academic progress, etc.

All students on probation will be reviewed by the M.P.H. program's director at least once each semester to determine whether satisfactory academic progress has been made. At that time the program's director may take the following actions:

1. Remove probation: Probation may be removed if the student has satisfactorily addressed deficiencies, even if this is before the time frame originally designated by the program director.
2. Continue probation: Progress is being made.
3. Recommend dismissal: Performance continues to be unsatisfactory.

Written notification is provided to the student regarding the outcome of this review.

Probation is considered an adverse action and may be reported in future graduation verifications and other requests for information.

Dismissal

Typically, students will be recommended for dismissal only after they have been given a reasonable probationary period to address deficiencies. The M.P.H. program follows School of Medicine policy for formal remediation, probation, dismissal, and appeals. See the [VUSM Student Progress and Promotion](#) page of this catalog for more information on these topics.

Eligibility to Reapply

If a student withdraws from the M.P.H. program, reentry is possible only through the application process.

Master of Public Health: Academic Policy: Student Assessment

Student performance is assessed in every course and program requirement. Program faculty bring any significant performance concerns during a required course to the attention of the student early enough to allow

School of Medicine

sufficient time to develop a remediation plan. A student for whom major concern persists despite coaching may be given a failing grade (F) for the course and/or may not be promoted despite satisfactory performance in other courses. Course requirements and grading information are detailed in the course syllabus.

Grades

The M.P.H. program uses the VUSM grading scale, presented on the page of this catalog titled [VUSM Student Assessment and Grading](#).

Grade Grievance Procedure

Students should seek redress of a problem with a grade as soon as possible after receiving the grade and in no case later than four weeks after the grade is released. Students with a concern should confer directly with the course director. Every effort should be made to resolve the problem fairly and promptly at this level. If the student cannot resolve the problem through discussion with the course director, the student should request an appeal by writing (email is acceptable) to the program director within two weeks of speaking with the course director. The course director also should be included on the request for appeal. In cases where the course director is also the degree program director, the appeal should be made to the assistant dean of health sciences education or his/her designee. If resolution is not achieved by the program director/assistant dean of health sciences education, the case is referred to the senior associate dean of health sciences education or his/her designee, who makes the final decision. At each level of review, the course's assessment practices are reviewed and the individual student's situation taken into account.

Master of Public Health: Academic Policy: Student Support and Advisory Services

Academic Advisory Resources Academic Adviser

Each student meets with their academic adviser at least twice per year. Academic advising meetings provide the opportunity to discuss course selection, progress toward meeting the degree requirements, and any academic challenges and how they may be addressed. Additional meetings may take place as needed at the student's or adviser's request.

Mentoring Committee

Each student has a mentoring committee of three to four members (faculty, community/governmental professionals and professional staff) during their time in the M.P.H. program. The student is responsible for scheduling a full meeting of their mentoring committee at least once per term. The meetings are an opportunity for the student to garner insight from an interdisciplinary team of experienced professionals on long-term directions for the student's training and career.

While the process of identifying members of the mentoring committee may vary from one track to another, students are expected to submit a confirmed list of their mentoring committee members by December of the first year. Changes to mentoring committees may be approved by the track director, if needed.

Practicum Advising

Starting in the fall of their first year, students meet periodically with the practicum director on an individual basis to discuss the types of skills and experiences they would like to develop during the public health practicum, and potential sites and activities that align with their goals.

Thesis and Capstone Advisers

The thesis and capstone advisers serve as the course directors for the course or series of courses associated with the thesis or capstone, respectively. In this role, the adviser guides students through the planning, development, and writing of the final thesis or capstone product. Each student also has a primary thesis or capstone mentor who is directly connected to the student's thesis or capstone and who can provide more content-specific support.

Career Advisory Support Career Advising

Students may meet with their track director and/or the practicum director for individual career advising meetings to discuss topics such as creating a targeted job search plan, resumes, CVs, and cover letters, LinkedIn and online networking, preparing for interviews, applying to advanced degree programs, fellowships, and letters of recommendation. These meetings are scheduled as needed, at the student's request.

School of Medicine

In addition to individual career advising meetings, career development offerings for students in the M.P.H. program include:

- M.P.H. Career Development Series
- Edge Seminar Series
- Newman Society Seminar Series

Additional information about M.P.H. program career development offerings can be found at medschool.vanderbilt.edu/mph/current-students/career-development.

Health and Wellness

See the [Life at Vanderbilt](#) page of this catalog.

Conflicting Faculty Roles

In addition to the information about faculty and educator roles on the [Education at the Vanderbilt University School of Medicine](#) page of this catalog, M.P.H. track directors are responsible for avoiding conflicts of interest when assisting students in identifying professional members for their mentoring committee.

Master of Public Health: Accreditation

The Master of Public Health program is accredited by the Council on Education for Public Health, 1010 Wayne Avenue, Suite 220, Silver Spring, MD 20910.

Master of Public Health: Admission

Admission Requirements

Eligible candidates include those with bachelor's, master's, or doctoral degrees. At least two years of relevant, post- undergraduate professional experience is strongly preferred, but is not required.

Application Process

Applications are submitted through SOPHAS (sophas.org), the centralized application for programs of public health. The SOPHAS application requirements for the M.P.H. program at Vanderbilt University are listed below:

- Current curriculum vitae or resume
- Three academic/professional letters of recommendation
- Statement of purpose and objectives
- Official transcripts for all prior academic degrees and post-secondary course work
- Official standardized test score reports:
 - TOEFL scores are required for international applicants; this requirement is waived for applicants who have received an academic degree from an institution where English was the language of instruction.
 - Applicants are not required or expected to submit GRE or MCAT scores with their application in SOPHAS. Applications without scores will not be penalized in the review process. Applicants may choose to self-report their GRE or MCAT scores in SOPHAS.

Interviews are not required as part of the application process. To view application deadlines and additional information about the admission process, please visit medschool.vanderbilt.edu/mph/admissions.

Selection Criteria, Offer, and Acceptance

The Admissions Committee evaluates the application materials and decides which applicants are invited to join the entering class. The program seeks applicants with strong academic backgrounds and clear public health goals. Applicants should be able to articulate how the Vanderbilt M.P.H. relates to their career aspirations.

Admission notifications and offers of program scholarship funding are sent to applicants by email in the spring. Admitted applicants are asked to confirm their intention to matriculate no later than April 15.

A criminal background check is required and must be completed over the summer, before matriculation. Additional information about the background check and other new student requirements is sent by email during the summer.

School of Medicine

Transfer Credits

Up to 15 academic credit hours of prior graduate-level course work from other schools at Vanderbilt or other accredited universities may be applied to the required 42 credit hours needed for the degree, conditional upon the approval of the Admission Committee and the relevant course directors. Only those courses for which a student has received a grade of B or its equivalent will be considered for incoming credit transfer.

Students in the M.P.H. program may audit courses offered by other departments and programs with the approval of the course instructor. Students may take graduate- and professional-level courses relevant to their M.P.H. degree offered by other departments and programs for credit toward their degree with the approval of their M.P.H. track director.

Non-degree-seeking Students

Non-degree-seeking students may take courses in the M.P.H. program as long as they meet the program's admission requirements (i.e., completion of bachelor's, master's, or doctoral degree). Registration in a course is contingent upon completion of any course prerequisites, instructor approval, M.P.H. program approval, and space in the class. Tuition is charged according to the number of credit hours taken. A one-time transcript fee (\$100) may apply for first-time Vanderbilt University students. A Student Services Fee of \$291 in the fall and spring terms, and \$99 in the summer term applies. In addition, a Student Health Fee of \$369 in the fall and spring terms, and \$108 in the summer term may apply. Auditing is not permitted in M.P.H. program courses.

Master of Public Health: Contact Information

Additional information may be obtained by contacting program officials at [Contact Us | Master of Public Health | Vanderbilt University](#).

Master of Public Health: Dual Degrees

M.D./M.P.H.

The dual M.D./M.P.H. program is typically completed on a full-time basis in five years. Students must apply separately to the School of Medicine M.D. and M.P.H. programs and be accepted by both programs to pursue the dual M.D./M.P.H. Typically, M.D. students apply to the M.P.H. program in the fall of their second or third year of medical studies.

Additional information may be found at medschool.vanderbilt.edu/mph/md-mph.

M.P.H./M.Ed. (International Education Policy and Management)

The M.P.H./M.Ed. in International Education Policy and Management program is a seven academic term program that is typically completed on a full-time basis in three years of study. Students must apply and be accepted separately to both the M.P.H. program in the School of Medicine and the M.Ed. program in Peabody College of Education and Human Development.

Students in this dual M.P.H./M.Ed. program must enroll for a minimum of three terms (fall, spring, and summer) in the School of Medicine, with the M.P.H. as their primary degree program. During these three terms, they complete 36 or more credit hours of required M.P.H. course work, including the public health practicum and culminating experience during the summer term.

Additional information about the M.Ed. (International Education Policy and Management) can be found at peabody.vanderbilt.edu/programs/international-education-policy-and-management-med.

M.P.H./M.A. (Latin American Studies)

The dual M.P.H./M.A. (Latin American Studies) program is a seven academic term program that is completed in three years of study. Students must apply and be accepted separately to both the M.P.H. program in the School of Medicine and the M.A. in Latin American Studies program in the Graduate School.

School of Medicine

Students in the dual M.P.H. M.A. (Latin American Studies) program must enroll on a full-time basis for a minimum of three terms (fall, spring, and summer) in the School of Medicine, with the M.P.H. as their primary degree program. During these three terms, they complete 36 or more credit hours of required M.P.H. course work, including the public health practicum and culminating experience during the summer term.

Additional information about the M.A. in Latin American Studies may be found at

as.vanderbilt.edu/clas/graduate-programs/ma-latin-american-studies.

Master of Public Health: Other Program Policy and Procedure

Program Evaluation

The purpose of evaluation in the M.P.H. program is to provide timely information that can be used to determine the effectiveness of program's curriculum and teaching and, ultimately, to determine whether the program is accomplishing its goals. The evaluation process supports continuous improvement of all program components. All students, faculty members, and staff members have a role in identifying needs and implementing strategies for improvement.

In the M.P.H. program, evaluation activities include, but are not limited to:

- Course evaluations
- Practicum and culminating experience evaluations
- Interprofessional education (IPE) evaluations
- Student assessment data
- Exit surveys and exit interviews
- Admissions and graduate outcomes data

Course evaluations, practicum evaluations, IPE evaluations, and culminating experience evaluations include sections for the evaluation of faculty course instructors, teaching assistants, practicum site supervisors, IPE preceptors, culminating experience advisors, mentors, and relevant administrators. Specific feedback from these evaluations is reviewed by the program director, the Curriculum Committee, and the relevant faculty member or individual with the goal of improvement.

In addition, feedback from faculty course instructors, practicum site supervisors, IPE preceptors, culminating experience advisors, mentors, and relevant administrators is elicited on how the program leadership can better support them.

Data from evaluation activities are compiled on a semester or annual basis and distributed to the program leadership and Curriculum Committee for review. Responsible individuals and/or committees summarize data. Areas of improvement are addressed with action plans and measurable goals to assess progress toward improvement. Updates on progress toward improvement are discussed at subsequent meetings.

Student Engagement

Students have formal and informal opportunities to participate in program-level policy- and decision making.

Students are selected to serve on the program's Advisory, Curriculum, and Diversity Committees during their M.P.H. training. Committee members are expected to attend and participate in committee meetings. Students interested in serving as committee members should contact their track director and request to be considered.

Each class has a student class representative who serves as a liaison between the students and the M.P.H. program leadership. The class representative is also responsible for coordinating events and activities and sharing information with their classmates. Information about the position and election procedures can be found in

Published 7/12/2022

School of Medicine

the *M.P.H. Student Handbook* located at medschool.vanderbilt.edu/mph.

With respect to policy and decision making in the School of Medicine, non-M.D. degree programs with enrollment of ten or more may have one student representative on the Honor Council. Rising second-year M.P.H. students nominate and vote to select an Honor Council representative to serve for one year. More information, including the Honor Council bylaws, can be found in the [School of Medicine Honor System](#) page.

Honor Code Attestation

Each student will be compliant with the Vanderbilt University School of Medicine Honor Code guidelines. Every academic year, each student will sign, by written or electronic signature, an acknowledgement indicating that the student will follow the Honor Code rules and requirements.

Leave of Absence

Students who wish to interrupt their study must request a leave of absence in writing from the program director. Students may consult with Vanderbilt University Student Access Services (vanderbilt.edu/student-access/) when contemplating a leave of absence, and program administrators may consult with student access services when evaluating a request for leave of absence. The program director will provide a decision regarding the request. A one-time leave of absence may be granted for a maximum of one year for students seeking a master's degree.

Students taking a leave of absence are responsible for meeting with the program director prior to the leave in order to plan for their course work and timeline for successful degree completion following their return. Students who do not register for classes before the ending date of a leave of absence may be disenrolled and required to request reinstatement to the program. The maximum time allowed to complete the degree is four years, unless there are unusual circumstances which merit an extension of this limit.

Attendance

Students are required to attend all class sessions, unless this requirement is specifically waived by the course director. The course instructor may choose to make an exception for a student with extenuating circumstances. The student should contact the instructor to request an exception before the anticipated absence.

Student Work Policy

It is recommended that students work no more than twenty hours per week during academic terms. Students should contact their track director to discuss increasing their work hours.

Transportation

During their time in the M.P.H. program, students may participate in experiential learning activities at sites located a distance from the Vanderbilt University campus. Students are responsible for their own transportation to and from sites for educational experiences, including all costs associated with that travel. The maximum distance from the Vanderbilt University campus that students may be required to drive to reach off-site placements is generally 35 miles.

Master of Public Health: Program Overview

The Master of Public Health (M.P.H.) is an interdisciplinary program designed to train research scientists and public health professionals to be innovative and effective leaders dedicated to improving public health. The program is accredited by the Council on Education for Public Health.

The M.P.H. program allows students from all academic and professional backgrounds, as well as clinical specialties, to customize their public health education and integrate their specific research and career interests with the support of committed faculty mentors.

As part of their application, students choose one area of concentration for their studies from among the program's three tracks: epidemiology, global health, and health policy.

School of Medicine

Additional information about the M.P.H. program can be found at medschool.vanderbilt.edu/mph.

Program Mission/Goals/Objectives Mission

The mission of the M.P.H. program is to train future research scientists and public health professionals to be innovative and effective leaders dedicated to improving public health.

Goals and Objectives

To fulfill its mission, the M.P.H. program has the following goals and objectives:

1. Educate innovative and effective public health researchers, educators, and practitioners
 - Recruit culturally diverse students who will make substantial contributions to public health
 - Engage students with interdisciplinary faculty who demonstrate commitment to educating and mentoring future public health leaders
 - Facilitate active learning through classroom and experiential training opportunities
2. Advance knowledge in the public health sciences through research and discovery
 - Contribute to the public health scientific evidence base
 - Engage in collaborative and interdisciplinary research
 - Compete successfully for funding in the public health sciences
3. Participate in development and implementation of public health programs and policies
 - Build and foster community partnerships that bridge public health science and practice
 - Engage in collaborations, including research, training, and service activities with governmental agencies and community partners in the U.S. and abroad
 - Disseminate public health knowledge and promote implementation of effective public health policies and practices

Standing Program Committees Admission and Promotion Committee

The Admission and Promotion Committee monitors student progress toward completing the M.P.H. degree requirements and makes recommendations to the program regarding promotion, remedial action, or dismissal as appropriate for each student. This committee also has the responsibility of making recommendations concerning admission and scholarships for applicants to the M.P.H. program. The committee oversees and continually reviews the admission process. It typically meets four to six times per academic year.

Advisory Committee

The Advisory Committee provides oversight of the evaluation and planning efforts for the program, including review of attainment of stated goals and objectives. The committee facilitates the long-range planning efforts of the program and provides other guidance to the program as requested. It explores ways to strengthen ties to key constituencies, including public health practitioners, public health researchers, students, alumni, and faculty. The Advisory Committee meets once per year and more often as needed.

Curriculum Committee

The Curriculum Committee is charged with providing oversight of M.P.H. program curriculum and related instruction consistent with the program's mission, goals, objectives, and values and appropriate for demonstrated professional competencies as identified by the program. The committee monitors and, as needed, makes recommendations regarding courses offered within the program for relevance of learning objectives, appropriateness of procedures for assessing student competencies, and quality of faculty and student performance within courses. The committee meets three times per academic year.

Diversity Committee

The Diversity Committee provides oversight for M.P.H. program inclusion and diversity efforts. The program considers diversity to represent a broad range of individual characteristics consistent with Vanderbilt University policies, including diversity in race, sex, religion, color, national or ethnic origin, age, disability, military service, sexual orientation, gender identity, and gender expression.

The committee monitors and, as needed, makes recommendations regarding the inclusion and diversity of students, faculty, and staff to increase ways in which the public health workforce reflects the populations that we serve. The committee also provides recommendations for strategies to provide diverse perspectives in the program's curricular offerings and to provide students with insight into particular issues that underrepresented and/or disadvantaged groups face.

School of Medicine

Program's Major Facilities

The M.P.H. program office and classroom are located on Vanderbilt University's campus in suite 1010 on the tenth floor of the 2525 West End Avenue building.

Master of Public Health: Tuition, Fees, and Cost of Attendance

For information about university and School of Medicine costs and fees please refer to the [School of Medicine Tuition, Fees, and Financial Aid](#) page of this catalog.

Academic Year 2022-23 Tuition

Tuition, 1st year	\$41,997
Tuition, 2nd year	20,998
Hourly rate	1,751

Estimated Cost of Attendance

The total estimated cost of attendance is an amount established by the School of Medicine's Office of Student Financial Aid as reasonable costs for attending the program on a full-time basis. The estimated cost of attendance is used in calculations to determine the amount of financial aid for which a full-time student may be eligible. It includes direct costs such as tuition, the student services fee, and the transcript fee, as well as indirect costs. The indirect costs are grouped into the following categories: books/supplies, rent/utilities, meals, personal (including the student health insurance fee), transportation, and loan fees. It is expected that most students can live within these costs. The actual cost of attendance for each student will vary depending on the individual's specific needs and preferences.

For detailed information pertaining to estimated cost of attendance see medschool.vanderbilt.edu/financial-aid/master-of-public-health-cost-of-attendance.

Payment of Tuition and Fees

Students registered for a full-time course load (8-18 credit hours for the fall and spring terms and 6-8 credit hours or the summer term) are billed at the block tuition rate for the term in which they are enrolled. Students registered in more than a full-time course load (more than 18 credit hours in the fall and spring terms and more than 8 credit hours in the summer term) are charged the block tuition rate plus the per-credit-hour tuition rate for courses above the full-time course load. Students registered for less than a full-time course load (seven hours or fewer in the fall and spring terms or five hours or fewer in the summer term) are billed at the hourly tuition rate for the term in which they are enrolled.

Registration in the following second-year courses constitutes a full-time course load:

- PUBH 5599: Thesis Research I (year 2 fall term)
- PUBH 7999: Thesis Research II (year 2 spring term)
- PUBH 5531: Capstone ePortfolio Development - Part 1 (year 1 fall term)
- PUBH 5532: Capstone ePortfolio Development - Part 2 (year 2 spring term)

Students registered in these courses in their final year of training are charged the block tuition rate, even though they may be registered for less than 8 credit hours.

Students registered for a part-time course load (1-7 credit hours for the fall and spring terms and 1-5 credit hours for the summer term) are charged a per-credit-hour tuition rate of \$1,751 per hour.

Students choose to enroll in the program as full-time or part-time student at the time they matriculate. Should extenuating circumstances arise, they may change from full-time to part-time or part-time to full-time once during the course of their training, with written approval from the Program Director.

School of Medicine

Please refer to the [School of Medicine Tuition, Fees and Financial Aid](#) page of this catalog for more information about university costs and School of Medicine fees. Additional information can be found at vanderbilt.edu/stuaccts.

Master of Science (Applied Clinical Informatics): Academic Policy: Degree Requirements

Requirements to Earn Degree

The program provides a 36-credit hour curriculum in 21 months, with a course work intensive first year followed by a second year devoted to a capstone project.

Length and Delivery of Program

The normal time frame for completion of required course work for the M.S.-A.C.I. is 21 months. The maximum time frame for completion of this degree is three years.

Curriculum

The curriculum emphasizes a deep theoretical and practical understanding of the care process, informatics concepts, information technologies, computer science, and the changing social, organizational, and economic context in which health care is delivered. This understanding is developed through course work, over 240 hours of practicum experience that uses real health information technology data and systems and health care contexts, and a mentored capstone project.

Didactics

Expert faculty comprising the largest biomedical informatics department in the U.S. lead nine M.S.-A.C.I. courses. These courses include the core content for informatics and health professionals outlined by the AMIA Practice Analysis and Core Competencies for those intending to apply for the American Board of Medical Specialties Clinical Informatics Certification, HIMSS Certified Professional in Healthcare Information & Management Systems certification (CPHIMS), or the emerging AMIA Advanced Health Informatics Certification:

- Introduction to Clinical Informatics
- Health Information Systems and Applications
- The Health System
- Clinical Information Systems
- Clinical Decision Support
- Clinical Workflow
- Data Standards
- Information System Lifecycle
- Management and Organizational Change

Practicum Experience

A practicum experience requires a minimum of 240 clock hours, to be completed over the year-2 program. The practicum requirement can be satisfied in highly flexible ways, e.g., at VUMC, at home institution, or at other sites (with M.S.-A.C.I. program approval). The trainee must be embedded (i.e., assigned to participate as a member) in an interdisciplinary team that is addressing a significant clinical informatics challenge. This includes attending regular team meetings and participating in analysis of issues, planning, and implementation of recommendations from the team. The interdisciplinary teams must include physicians, nurses, other health care professionals, administrators, and information technology/system personnel, as appropriate.

Capstone Project

A required capstone project running throughout the program provides students with knowledge and skills required to design and conduct applied research studies to evaluate the efficacy of informatics applications in the clinical environment. Based on personal career objectives and informatics challenges that they identify in practice, the capstone project may be completed as a cohort, a sub-cohort group, or individually, depending on its design and the needs of our learners. The project begins in the first year and continues in the second year. Each student selects a Capstone Project Committee, which includes a committee chair (a DBMI faculty member), a practice mentor (someone within the student's home department or organization), and the M.S.-A.C.I. capstone course director.

Course List

School of Medicine

A full list of program courses is provided in this catalog under [Courses by Program](#).

Master of Science (Applied Clinical Informatics): Academic Policy: Progress and Promotion

Periodic Reviews

In the spring term, the Admission and Promotion Committee is charged with making recommendations to the program director regarding progress, promotion, or graduation of students.

Satisfactory Academic Progress and Good Standing

All students who maintain at least a 3.0 GPA and have earned at least a B- in all course work/practica, are considered to be making satisfactory academic progress. M.S.-A.C.I. students must register each fall, spring, and summer semester with no breaks in registration to remain in good standing, except in cases of approved leave of absence.

Graduation Promotion Committee Endorsement

In the spring term, the Admission and Promotion Committee is charged with making recommendations to the program director regarding progress, promotion, or graduation of students.

Allowance for Delaying Graduation

Graduation may be delayed beyond the normal time required to complete for formal remediation or approved leave(s) of absence.

Formal Remediation and Probation Formal Remediation Plan

Students who receive a grade of C+ or poorer in academic courses may be required to remedy the grade as specified in a formal remediation plan. Possible remedies include re-examination or course/practica repetition. Credit may be given on the basis of re-examination or satisfactory repetition of the course/practica work, but the original grade remains on the record and may be counted in the computations as cause for dismissal, if additional poor performance occurs.

Probation

Students who do not successfully complete a formal remediation plan may be placed on probation. Students who fall below an average of 3.0 are placed on probation for one semester. If the student's performance does not improve during the semester, the program director, the vice-chair for educational affairs, and the department chair will decide whether to dismiss the student or to allow the continuation of probation. If, at the end of the second semester, the student's grade point average remains below 3.0, the student is advised to withdraw or face dismissal from the program.

Dismissal

The M.S.-A.C.I. program follows School of Medicine policy for formal remediation, probation, dismissal, and appeals. See the [VUSM Student Progress and Promotion](#) page of this catalog for more information on these topics.

Master of Science (Applied Clinical Informatics): Academic Policy: Student Assessment

Grades

The M.S.-A.C.I. program follows School of Medicine policy for grades. See the Grading Policies presented on the [VUSM Student Assessment and Grading](#) page of this catalog.

Non-didactic courses are graded using Pass/Fail grading.

Grade Grievance Procedure

Students should seek redress of a problem with a grade as soon as possible after receiving the grade and in no case later than four weeks after the grade is released. Students with a problem should confer directly with the course director. Every effort should be made to resolve the problem fairly and promptly at this level. If the student cannot resolve the problem through discussion with the course director, the student should request an appeal by writing (email is acceptable) to the program director within two weeks of speaking with the course

School of Medicine

director. (The course director also should be included on the request for appeal.) In cases where the course director is also the degree program director, the appeal should be made to the assistant dean of health sciences education or his/her designee. If resolution is not achieved by the program director/assistant dean of health sciences education, the case is referred to the senior associate dean of health sciences education or his/her designee, who makes the final decision. At each level of review, the course's assessment practices are reviewed and the individual student's situation taken into account.

Practicum Assessment

The practicum experience requires that the trainee is embedded (i.e., assigned to participate as a member) in an interdisciplinary team that is addressing a significant clinical informatics challenge. This includes attending regular team meetings and participating in analysis of issues, planning, and implementation of recommendations from the team. The interdisciplinary teams may include physicians, nurses, other health care professionals, administrators, and information technology/system personnel, as appropriate. The student will be graded (Pass/Fail) by the practicum course director after each rotation, based on assessments by rotation leaders.

Master of Science (Applied Clinical Informatics): Academic Policy: Student Support and Advisory Services

Academic and Career Advisory Resources

The program director has an open-door policy for all students in the M.S.-A.C.I. program.

Health and Wellness

See the [Life at Vanderbilt](#) page of this catalog.

Master of Science (Applied Clinical Informatics): Admission

Admission Requirements

Applicants must hold a bachelor's, master's, or doctoral degree. At least two years of relevant, post-undergraduate professional experience, education, or training is strongly preferred. GRE, MCAT, or other pre-professional equivalent test scores are strongly recommended, but not required. The Test of English as a Foreign Language (TOEFL), which is administered by the Educational Testing Service in Princeton, New Jersey, is required for applicants whose primary language is not English. The Program requires applicants to meet or exceed a score of 600. International applicants who have obtained at least a masters level degree from an accredited US university are not required to provide TOEFL scores.

Applicants are not required to have formal training in computer science or a related discipline, but they need to demonstrate a strong interest and aptitude in clinical informatics.

Students without a computational background are encouraged to take at least one introductory-level course in computer science before entering the program.

Application Process

New students may matriculate only in the fall term. To apply for the M.S.-A.C.I. program, candidates should submit an online application and all supporting materials by the priority deadline, April 30th. Applications from candidates who apply after the priority deadline will receive consideration for admission as space permits.

Online applications are submitted at apply.vanderbilt.edu/apply.

Program to which you are applying: Medicine-Non MD Program: Master of Science in Applied Clinical Informatics
Degree: MSACI

Complete information about the application process is available online at medschool.vanderbilt.edu/biomedical-informatics/msaci.

School of Medicine

Admission Offer and Acceptance

Admission decisions are made on an ongoing basis once all required documents have been received and an application is ready to be assessed. Applicants who are admitted to the program receive an email communication from the program director with further instructions and a deadline to accept the offer of admission.

Transfer Students/Credits

The M.S.-A.C.I. program does not accept transfer students.

Non-degree-seeking Students

The M.S.-A.C.I. program does not allow non-degree-seeking students to enroll in M.S.-A.C.I. courses.

Visiting Students

The M.S.-A.C.I. program does not allow visiting students.

International Students

International students are eligible to apply for admission to the M.S.-A.C.I. degree program. International students are required to attend the one- to two-day sessions every semester via a conferencing platform during the hours set by the program (regardless of time zone differences). International students also must complete synchronous course requirements via a video conferencing platform on Thursday evenings from 5:00–8:00 p.m. CST each week, regardless of time zone differences. Because of the program's primarily online format international students on student visas (F or J) are ineligible to participate in the program in person.

Master of Science (Applied Clinical Informatics): Contact Information

Additional information may be obtained by contacting program officials at [Contact Information | Biomedical Informatics | Vanderbilt University](#).

Master of Science (Applied Clinical Informatics): Other Program Policy and Procedure

Program Evaluation

The M.S.-A.C.I. performs course evaluations at the end of each term. These evaluations are sent to all students enrolled in didactic courses. Course evaluations cover important course quality indicators, including level of difficulty, course structure/organization, instructor effectiveness, and text quality, and they also give students an opportunity to provide overall feedback.

Leave of Absence

Students who wish to interrupt their study must request a leave of absence in writing from the program director. The written request must outline the nature of the requested leave and provide the starting and ending dates for the of absence. Students may consult with Vanderbilt University Student Access Services (vanderbilt.edu/student-access/) when contemplating a leave of absence, and program administrators may consult with student access services when evaluating a request for leave of absence. The program director will provide a written decision regarding the request.

A one-time leave of absence may be granted for a maximum period of one year, as long as the student is in good academic standing. Students taking a leave of absence are responsible for meeting with the program director prior to the leave in order to plan for their course work and timeline for successful degree completion following their return. Students who do not register for classes before the ending date of a leave of absence may be disenrolled from the program and required to request reinstatement.

Attendance

All students are expected to attend each class session (online and face-to-face). Students must notify the instructor if they will miss a class session. It is the responsibility of the student to obtain class notes and assignments. For significant absences, such as missing greater than two classes per semester, a remediation plan must be submitted to the course director and program director.

Honor Code

School of Medicine

Each student will be compliant with the Vanderbilt University School of Medicine Honor Code guidelines. Every academic year, each student will sign, by written or electronic signature, an acknowledgement indicating that the student will follow the Honor Code rules and requirements.

Student Work Policy

M.S.-A.C.I. students are allowed to work full time as long as students can meet program expectations and degree requirements.

Master of Science (Applied Clinical Informatics): Program Overview

The Department of Biomedical Informatics at Vanderbilt University offers a two-year M.S. (Applied Clinical Informatics) (M.S.-A.C.I.) degree program. At many institutions, the role of clinical informatics leaders (known as clinical informaticians) has evolved from introducing electronic health records and practice transformation techniques to the effective evaluation and improvement of patient outcomes. Increasingly, local improvements must be integrated into accountable-care organizations, clinically integrated networks, and other inter-organization collaborations that emphasize both quality improvement and cost reduction. These factors create a profound need for trained informatics professionals from a variety of clinical and nonclinical disciplines who share a deep theoretical and practical understanding of the care process, informatics concepts, and the changing social, organizational, and economic context in which health care is delivered.

Vanderbilt's M.S. (Applied Clinical Informatics) is designed to develop leaders who are prepared to advance the science and practice of clinical informatics. The M.S.-A.C.I. program is designed for clinicians who desire rigorous, practical informatics training (e.g., board-certified and non-boarded physicians, nurses, pharmacists) and professionals from a wide range of disciplines (e.g., information technology, public health, health care policy, business management, research informatics) who contribute and collaborate to promote safe, efficient, and effective health care.

Program Mission/Goals/Objectives

The objective of the program is to provide innovative clinical informatics education for working professionals in the health care field, with graduates assuming leadership roles in the application and innovation of clinical informatics nationally.

The M.S.-A.C.I.'s goal is to develop clinical informaticians who are capable of developing and leading innovative applications of information technology and information systems that address clinical, research, and public health priorities.

Standing Program Committees Admission and Promotion Committee

The Admission and Promotion Committee is responsible for reviewing applications for the M.S.-A.C.I. program, for inviting applicants for a personal or phone interview, and for making recommendations of candidates for admission to the program.

In the spring term, the Admission and Promotion Committee is charged with making recommendations to the program director regarding progress, promotion, or graduation of students.

The Admission and Promotion Committee is appointed by the program director and consists of three to five program leaders (one of whom is the program director). Scott Nelson, Chair. Josh Peterson, Yaa Kumah-Crystal, and Dara Mize.

Advisory and Curriculum Committee

The Advisory and Curriculum Committee (ACC) is charged with development and oversight of the M.S.-A.C.I. program curriculum. It also provides oversight of the evaluation and planning efforts for the program, including review of attainment of stated goals and objectives. The committee facilitates the long-range planning efforts of the program and provides other guidance to the program as requested. The ACC consists of all M.S.-A.C.I. course directors, and DBMI vice chair for educational affairs. The ACC meets once per year, or more often as needed.

School of Medicine

Program's Major Facilities

The M.S.-A.C.I. program office and meeting rooms are located on the 14th and 15th floors of the 2525 West End Avenue building, which is also where the main offices of the Department of Biomedical Informatics are located. The M.S.-A.C.I. is primarily an online program. M.S.-A.C.I. students are required to complete synchronous course requirements via video conferencing on Thursday evenings from 5:00–8:00 p.m. CST each week. The program also requires students to attend a one-to-two-day, in-person or via video conferencing, session every semester at the 2525 West End Avenue location.

Master of Science (Applied Clinical Informatics): Tuition, Fees, and Cost of Attendance

For information about university and School of Medicine costs and fees please refer to the [School of Medicine Tuition, Fees, and Financial Aid](#) page of this catalog.

Academic Year 2022-23 Tuition

Tuition, 1st year	\$49,581
Tuition, 2nd year	14,168
Hourly Rate	1,772

The M.S.-A.C.I. is a distance education program. The total estimated costs of attendance are based on costs of living in Nashville, Tennessee, but many M.S.-A.C.I. students live in other locations with varying costs of living. Detailed information pertaining to cost of attendance is found at medschool.vanderbilt.edu/financial-aid/master-of-science-in-applied-clinical-informatics-cost-of-attendance.

Payment of Tuition and Fees

Students registered for a full-time course load (eight hours or more for fall and spring and six hours or more for summer) are billed at the block tuition rate for the term in which they are enrolled. Students registered for less than a full-time course load (seven hours or fewer in the fall and spring or five hours or fewer in the summer) are billed at the hourly tuition rate for the term in which they are enrolled. Certain courses are designated to trigger full-time enrollment (and block tuition billing) even though the number of credits carried by the course is fewer than eight.

Master of Science in Clinical Investigation: Academic Policy: Degree Requirements

Requirements to Earn Degree

- Candidates for the M.S.C.I. must complete 35 semester credit hours of the core course work.
- Completion of a final project in the form of a submission ready, extramural grant or an original article for publication in a peer-reviewed journal is also required.
- Students who are unable to complete a grant or manuscript may submit a thesis. The thesis should include a brief introduction explaining why a grant or manuscript could not be submitted. No oral presentation is required. The thesis should include a brief statement of the student's role in the work to be described in the research report and a 10-to-15-page report outlining the hypothesis tested, background and significance of the work, the experimental approach and methods, data analysis/sample size calculations, anticipated results and pitfalls, results to date, interpretation of results, discussion of results, and future plans. The thesis is reviewed and approved by the Promotion Committee.

Length and Delivery of Program

The program typically takes two years (five academic terms) of full-time enrollment to complete. The maximum time to degree is six years.

Core courses are provided in two formats:

- Intense courses that meet three hours each day (e.g., 8:00 m. to 11:00 a.m.) for four weeks
- Courses that can be offered less intensively (two to four hours a week for several months).

The course schedule is designed to maximize protected time for clinical and translational research.

Applicants who desire to matriculate as a part-time, degree-seeking student should consult with and receive

School of Medicine

approval, before applying part-time to the M.S.C.I. program, from: 1. the M.S.C.I. Program Director, or designee, 2. their mentor, and 3. sponsoring Administrative Officer. Students approved for part-time pacing will select a program of study of three academic years (eight academic terms) or four academic years (eleven academic terms) before matriculation.

The admissions letter will include the pacing approved for the applicant for the duration of matriculation; a carbon copy of the admissions letter is shared with the applicant's mentor and Administrative Officer or Grants Manager.

Curriculum and Tracks

Candidates must complete 35 credit hours of didactic coursework covering the essentials of study design, biostatistics, ethics, drug development, and data analysis. It is expected that coursework comprises 20 percent of the candidate's time commitment.

Mentored Research Apprenticeship

The core of the M.S.C.I. program is the completion of a mentored research project. The research must have a clinical or translational orientation and involve direct measurements on patient-derived data or the use of investigational therapeutic or diagnostic techniques. The mentor must be an established physician-scientist with experience in clinical and translational research. Use of the Vanderbilt University Clinical Research Center is encouraged. The research project accounts for 80 percent of the candidate's commitment to the program.

Master's Final Project

The candidate submits a manuscript to a peer-reviewed journal, provides a completed proposal for a federal or major foundation grant, or develops a master's thesis based on his or her research project. Completion of the thesis requirement is evaluated by the M.S.C.I. Promotion Committee.

Other Degree Requirements

Career Path Development: In addition to the formal curriculum, a monthly seminar series, "Clinical Scientist Career Seminars," permits candidates to meet successful clinical and translational researchers. Topics of discussion include academic "rules of the road," time management, promotion/tenure issues, grants management, and authorship.

Candidates hone their scientific communication skills through a presentation at the annual Translational Research forum conducted in the fall. The directors host networking events with the candidates, clinical investigators, mentors, and visiting scientists.

Course List

A full list of program courses is provided in this catalog under [Courses by Program](#).

Master of Science in Clinical Investigation: Academic Policy: Progress and Promotion

Periodic Reviews

Candidates will meet annually with the M.S.C.I. program director, or designee to review progress. Year 1 candidates will meet during the spring term and year 2 candidates will meet during the fall term.

Satisfactory Academic Progress and Good Standing

A cumulative grade point average of at least B- is required for graduation. A semester average of at least B- is required to remain in good academic standing. A student whose cumulative grade point average falls below B- may be placed on probation for one semester. If at the end of the semester the grade point average is still below B-, the student may be dismissed from the program based on unsatisfactory academic performance.

Graduation Promotion Committee Endorsement

The subsequent step in the graduation process is a review and approval of the student's thesis by the M.S.C.I. Promotion Committee.

Allowance for Delaying Graduation

It is anticipated that all students will complete the graduation requirements by the end of the fifth semester of enrollment. Graduation may be delayed by formal remediation of course work or an approved leave of absence.

School of Medicine

In the case of any potential delays, the student is allowed to extend the graduation date by six months, twice (total of one year). In unusual circumstances (including, but not limited to health problems, change of jobs, move to another institution), an additional extension up to one year will be considered by program leadership. During a period of extension, the student will be enrolled in the Research Extension course, a status that incurs no tuition costs.

Program Commencement

The university holds its annual Commencement ceremony following the spring semester. Degree candidates must have completed successfully all curriculum requirements and have passed all prescribed examinations by the published deadlines to be allowed to participate in the ceremony. A student completing degree requirements in a summer or fall semester may participate in Commencement the following May, and ordinarily the degree will be conferred at the end of the term in which requirements are completed. Any student unable to participate in a Commencement ceremony will receive his or her diploma by mail.

Formal Remediation and Probation Formal Remediation Plan

A student may be required to engage in a process of formal remediation if a need to improve performance or progress is identified (i.e., course grade or examination results that indicate student struggles to or fails to grasp basic learning objectives or core competencies). In such cases, the student works with the M.S.C.I. program director to develop an individualized plan and timeline for remediation.

Probation

A student may be placed on academic probation if the student's cumulative grade point average falls below B-, or their course grades include any failures. If at the end of the semester of academic probation the grade point average is still below B-, the student may be dismissed from the program based on unsatisfactory academic performance.

Students placed on probation are notified through a letter from the program director that outlines the reasons for the probation; the requirements and recommendations for addressing deficiencies; the conditions for removal of probation, including an expected time frame; and actions that will be taken if conditions are not met.

Students placed on probation for any reason will be required to complete a specific remediation plan that has been approved by the program director. The remediation plan may include requirements for the student, such as regular meetings with advisers, elimination of extracurricular activities that may be interfering with satisfactory academic progress, etc.

Students may appeal to the senior associate dean for health sciences education for reconsideration of the decision to place the student on probation.

All students on probation will be reviewed by the program director at least once each semester to determine whether satisfactory academic progress has been made. At that time the program director may take the following actions:

1. Remove probation: Probation may be removed if students have satisfactorily addressed deficiencies, even if this is before the time frame originally designated by the program director and the academic progress review committee.
2. Continue probation: Progress is being made.
3. Recommend dismissal: Performance continues to be unsatisfactory.

Written notification is provided to the student regarding the outcome of this review.

Probation is considered an adverse action and may be reported in future graduation verifications and other requests for information.

Dismissal

School of Medicine

The M.S.C.I. program follows School of Medicine policy for formal remediation, probation, dismissal, and appeals. See the [VUSM Student Progress and Promotion](#) page of this catalog for more information on these topics.

Eligibility to Reapply

If a student withdraws from the M.S.C.I. program, reentry is possible only through the application process.

Master of Science in Clinical Investigation: Academic Policy: Student Assessment

Grades

Students in the Master of Science in Clinical Investigation program will be evaluated in each course. Letter grades, consistent with grading policy established in the [VUSM Student Assessment and Grading](#) section on the Academic Policies for All School of Medicine Programs page of this catalog, will be given by the course director, based on attendance, class work, homework, test results, and final exams.

Only courses with a grade of B- or better will count toward the M.S.C.I. program requirements. Courses for which a grade of C+ or lower is awarded will need to be retaken.

Master's research, master's capstone, research extension, and case studies courses are graded on a pass/fail scale and are not considered in calculating the GPA.

Grade Grievance Procedures

Students should seek redress of a problem with a grade as soon as possible after receiving the grade and in no case later than four weeks after the grade is released. Students with a problem should confer directly with the course director. Every effort should be made to resolve the problem fairly and promptly at this level. If the student cannot resolve the problem through discussion with the course director, the student should request an appeal by writing (email is acceptable) to the program director within two weeks of speaking with the course director. (The course director also should be included on the request for appeal.) In cases where the course director is also the degree program director, the appeal should be made to the assistant dean of health sciences education or his/her designee. If resolution is not achieved by the program director/assistant dean of health sciences education, the case is referred to the senior associate dean of health sciences education or his/her designee, who makes the final decision. At each level of review, the course's assessment practices are reviewed and the individual student's situation taken into account.

Master of Science in Clinical Investigation: Admission

Admission Requirements

Eligible candidates for the M.S.C.I. program include:

- Board-eligible physicians enrolled in a fellowship program at Vanderbilt or Meharry Medical College
- Vanderbilt or Meharry residents with protected time for research
- Vanderbilt medical students with protected time for research after the third year of medical education
- Vanderbilt faculty members with the consent of their department chairs
- Postdoctoral Ph.D.'s anticipating a career in clinical and translational research
- Ph.D. candidates in the School of Nursing anticipating a career in patient-oriented research, and Scholars external to Vanderbilt/Meharry will be considered based on the availability of a suitable mentor within Vanderbilt and the related professional background of the candidate.

Application Process

Candidates must submit an application that includes biographical information, references, career goals, and a specific proposal for a clinical and translational research project. The research proposal must identify the candidate's mentor. Applications will be judged on the quality of the science proposed, on the commitment of the mentor to the career development of the candidate, and on the overall impact of the training program on the applicant's career development.

Normally students enter the program at the start of the fall term. Under special circumstances students may enter the program in the spring or summer terms, with the approval of the program director.

The priority application deadline is February 28. Applicants who apply for the M.S.C.I. program after the February 28 priority deadline will receive consideration for admission if space permits. A completed application and required supporting documents must be received at least 45 days before the start date of the term in which the student matriculates into the program.

Candidates must be in good standing with their home department at all stages during admission and remain in good standing with the home department and the M.S.C.I. program throughout matriculation.

Required Application Materials

Published 7/12/2022

School of Medicine

1. The electronic application system may be accessed at: apply.vanderbilt.edu/apply/

Area of Study: Medicine-Non MD Program: Clinical Investigation

1. Letter from mentor documenting commitment to the candidate's career development and, if part-time applicant, mentor's commitment to part-time attendance and completion of degree. Please include a copy of the mentor's curriculum vitae.
2. Three letters of recommendation (may include mentor).
3. Letter from division director or department chair assuring 80 percent protected time for research.
4. Research Plan: The three-to-five-page proposal should describe specific aims, background and significance, experimental methods, procedures, and long-term Research Plans exceeding the five-page limit will be returned. Be sure to provide a title for your project.
5. Curriculum vitae of the applicant.
6. Statement of how this proposed research plan fits into your career objectives. You may upload your research plan, curriculum vitae, and career statement in the application section labeled Statement of Purpose.
7. Letter from responsible person or department on official letterhead, stating confirmation of tuition payment throughout matriculation and, if applicable, support for part-time attendance.
8. Undergraduate and medical school official transcripts must come directly from the issuing institution, not the candidate. Official transcripts are submitted as instructed at registrar.vanderbilt.edu/academic-records/external-degree-verifications.php.

Candidates submitting official transcripts from international institutions should refer to the Office of the University Registrar's guidelines [at registrar.vanderbilt.edu/academic-records/external-degree-verifications.php](https://registrar.vanderbilt.edu/academic-records/external-degree-verifications.php). International students with questions about the prior degree verification process may contact the Office of the University Registrar.

Selection Criteria, Offer, and Acceptance

Proposals will be evaluated on the following criteria:

- Proposals must outline clinical and translational research that is hypothesis driven and mechanistic.
- Performance of the project must be feasible within a two-year period.
- Project mentors must have extramural research grant funding that is assured for the duration of the project.
- Sponsoring departments will be expected to guarantee that 80 percent of the candidate's professional time will be devoted to the goals and objectives of the M.S.C.I. program.

Transfer Credits

The M.S.C.I. program allows matriculated students to transfer equivalent graduate-level courses taken up to two years prior to admission into the Vanderbilt M.S.C.I. program. Only courses taken at accredited institutions will be considered; a maximum of 6 credit hours are allowed for transfer into the M.S.C.I. program. Determination of equivalence will be made by the program director in consultation with the course director.

Non-degree-seeking Students

Non-degree-seeking enrollees (special students) are often individuals who enroll in a course to determine if the Vanderbilt M.S.C.I. program is a good fit for their academic needs and career trajectory. The cost of tuition for a non-degree-seeking student is the established per credit hour for the academic year. The purchase of textbooks, software, and other research supplies is the responsibility of the non-degree-seeking student.

Auditing M.S.C.I. courses is not allowed.

Visiting Students

Scholars external to Vanderbilt/Meharry will be considered based on the availability of a suitable mentor within Vanderbilt and secured funding.

Master of Science in Clinical Investigation: Contact Information

Additional information may be obtained by contacting program officials at [Arnita L. King, MEd | Master of Science in Clinical Investigation | Vanderbilt University](mailto:Arnita.L.King@vanderbilt.edu).

School of Medicine

Master of Science in Clinical Investigation: Other Program Policy and Procedure

Program Evaluation

Program evaluation for M.S.C.I. is performed with four different metrics:

1. Student course evaluations, administered by the M.S.C.I. program for every course offered in the program at the end of the term.
2. After student graduation, successful job placement is assessed.
3. After student graduation, successful publication of peer-reviewed manuscripts is assessed.
4. After student graduation, grant funding from federal and major foundations is assessed.

Specific feedback from course evaluations is reviewed by the faculty member responsible for the course and the program director with the goal of improvements in the presentation of course material during the next offering of the course.

Other materials are evaluated by the program director and subsequently by the faculty with the aim of providing overall program feedback, which helps direct program modifications and improvements. These evaluations occur on an annual basis.

Leave of Absence

A student may request a leave of absence from school for any reason (personal, medical, maternity/paternity, research, dual degree, etc.), subject to the approval of the program director. The student must submit a written request to the program director, outlining the nature of the requested leave and providing the starting and ending dates. Students may consult with Vanderbilt University Student Access Services (vanderbilt.edu/student-access) when contemplating a leave of absence, and program administrators may consult with student access services when evaluating a request for leave of absence.

The program director may grant the student a leave of absence for up to one year, as long as the student is in good academic standing. Prior to leave, a plan for re-entry into the curriculum and meeting requirements for graduation should be outlined with the program director.

A student on leave of absence may request an extension of the leave beyond one year, subject to the approval of the program director. The student must submit a written request outlining the nature of the requested extension and providing a new ending date. A request for extension of a leave of absence must be submitted to the program director at least three months before the ending date of the approved leave. Requests may be made for additional extensions using the process outlined above.

Upon return from a leave of absence, the student must complete and update immunization records and all other compliance requirements.

Attendance

All students are expected to attend each class session. Students should notify the instructor should they knowingly have to miss a class. It is the responsibility of the student to obtain class notes and assignments. Penalty for non-class attendance is at the discretion of the instructor and/or the program director.

Honor Code

Each student will be compliant with the Vanderbilt University School of Medicine Honor Code guidelines. Every academic year, each student will sign, by written or electronic signature, an acknowledgement indicating that the student will follow the Honor Code rules and requirements.

Honors and Awards

All honors and awards are contingent upon available funds to support the award. Part-time students are not eligible for honors and awards.

School of Medicine

M.S.C.I. Hazinski. Merit scholarship in honor of Dr. Thomas Hazinski; partial tuition scholarship after the use of the employee tuition benefit, if eligible.

M.S.C.I. Diversity. Merit scholarship for URM scholars (underrepresented in medicine); partial tuition scholarship after the use of the employee tuition benefit, if eligible.

M.S.C.I. Clinical Research. Merit scholarship for emerging physician-scientists who demonstrate a commitment to pursue clinical and translational science and research along with a clinical practice; partial tuition scholarship after the use of the employee tuition benefit, if eligible.

Master of Science in Clinical Investigation: Program Overview

The Master of Science in Clinical Investigation (M.S.C.I.) program trains investigators in the techniques and processes used in clinical and translational research. This program provides a direct, mentored experience in clinical and translational investigation and, through didactic work, provides trainees with a strong foundation in study design, biostatistics, biomedical ethics, human genetics, drug and device development, and genomics. Graduates compete for grants such as the NIH K23, VA Career Development Award, NIH R01, and major foundation grants. More information is available online at medschool.vanderbilt.edu/msci/.

Program Mission/Goals/Objectives Mission

The mission and objective of the M.S.C.I. program is to train investigators in the techniques and processes utilized in clinical and translational research. The means to accomplish this mission include didactic coursework, a mentored experience in clinical investigation, and career path development, which culminates with the completion of a final project.

Goals

To cultivate the following:

Outstanding Academician:

- Researcher, mentor
- Clinician/educator, teacher
- Administrator, patient advocate, policy maker

Industry:

- Knowledgeable about molecular biology, pharmacology, and genomics
- Gifted clinical researcher
- Able to move with the speed of commerce

Objectives

- Train investigators in the techniques and processes utilized in clinical and translational
- Provide trainees, through didactic courses and a mentored experience in clinical investigation, a strong foundation in the core skills and methods necessary for success in clinical and translational. Such skills include the following:
 - Biostatistics and experimental design
 - Biomedical ethics
 - Issues in the drug discovery process
 - Data management
 - Medical and grant writing, and
 - Scientific communication skills
- Strengthen Vanderbilt's pre-eminent leadership role in the development of future leaders in clinical and translational research
- Benefit society by training and nurturing biomedical scientists whose efforts will improve human health.

Standing Program Committees M.S.C.I. Admission Committee

The M.S.C.I. Admission Committee annually reviews candidates for admission by gauging the quality of the candidate's research proposal, career objectives, and the primary mentor's commitment to the candidate's career pathway and trajectory. The M.S.C.I. program director and associate director serve as ex officio reviewers, and the M.S.C.I. program manager acts as the convener.

School of Medicine

Christina Bailey, Evan Brittain, Richard Ho, J. Matthew Luther, Ashley Shoemaker, Jay Wellons.

M.S.C.I. Promotion Committee

In the event an M.S.C.I. candidate does not submit a peer-reviewed manuscript or major federal or foundation grant application as the M.S.C.I. final project, the M.S.C.I. Promotion Committee reviews the submitted master's thesis. In addition to the M.S.C.I. leadership team, the M.S.C.I. Promotion Committee includes:

Prince Kannankeril, Laura Goff, Pratik Pandharipande, Alan Storrow.

Executive Advisory Committee

The Executive Advisory Committee provides strategic insight to the national and international clinical and translational research communities for the Master of Science in Clinical Investigation program. The M.S.C.I. Executive Advisory Committee meets triennially during the spring. The composition of the EAC includes the M.S.C.I. Program leadership and:

Consuelo Wilkins, Chair. Robert Dittus, Susan Guttentag, Katherine E. Hartmann, T. Alp Ikizler, Ege Kavalali, Todd Rice, Steve Webber. Senior Associate Dean of OHSE, Ex-officio.

M.S.C.I. Curriculum Committee

The M.S.C.I. Curriculum Committee ensures the quality of the curriculum and program development based on the needs for educated and trained clinical and translational scientists. The M.S.C.I. Curriculum Committee meets ad hoc. In addition to the M.S.C.I. leadership team, the M.S.C.I. Curriculum Committee includes:

Joey Barnett, Kelly Birdwell, Tina Hartert, Antonio Hernandez, Quinn Wells.

Program's Major Facilities

The M.S.C.I. program office is located on the second level of the Annette and Irwin Eskind Family Biomedical Library and Learning Center, 2209 Garland Avenue, in room 230. The classrooms are located in Rudolph A. Light Hall, 2215 Garland Avenue.

Master of Science in Clinical Investigation: Tuition, Fees, and Cost of Attendance

For information about university and School of Medicine costs and fees please refer to the [School of Medicine Tuition, Fees, and Financial Aid](#) page of this catalog.

Academic Year 2022-23 Tuition

Tuition, 1st year	\$42,396
Tuition, 2nd year	21,198
Hourly rate	1,818

Details pertaining to the estimated cost of attendance are available at medschool.vanderbilt.edu/financial-aid/master-of-science-in-clinical-investigation-cost-of-attendance.

Payment of Tuition and Fees

Students approved for full-time enrollment are billed at the block tuition rate for the term in which they are enrolled. Students approved for less than a full-time enrollment are billed at the hourly tuition rate for the term in which they are enrolled.

Medical Physics Education: Master of Science in Medical Physics: Academic Policy: Degree Requirements

Requirements to Earn Degree

Candidates for the M.S.M.P. must complete a total of 47 semester credit hours. The curriculum includes didactic classroom and laboratory instruction with an emphasis on either diagnostic imaging or radiotherapy physics.

School of Medicine

Students may select either a thesis option or non-thesis option.

- Degree requirements for the non-thesis option include participation in a clinical practicum. Students in the non-thesis option are required to complete professional introductory clinical rotations or practicum. The practicum is specific to the areas of clinical diagnostic and nuclear medicine imaging or radiation therapy.
- Degree requirements for the thesis option include successful completion of a master's thesis project.

Length and Delivery of Program

The normal time frame for completion of required course work for the master of science in medical physics is two academic years (five terms). The maximum time for completion of this degree is no more than three years.

Curriculum and Tracks

The M.S.M.P. program offers tracks in both radiotherapy medical physics and diagnostic imaging medical physics. Students may choose a thesis or non-thesis option in either discipline. All students and applicants may access additional information by visiting our website at medschool.vanderbilt.edu/medical-physics/.

Other Degree Requirements

Candidates must pass an oral qualifying exam before the end of their final term in the program.

Course List

A full list of program courses is provided in this catalog under [Courses by Program](#).

Medical Physics Education: Master of Science in Medical Physics: Academic Policy: Progress and Promotion

Satisfactory Academic Progress and Good Standing

A term average of 3.0 is required to remain in "good standing."

Graduation

A cumulative average of 3.0 is required to graduate.

Allowance for Delaying Graduation

Graduation may be delayed beyond the normal time required to complete for formal remediation or approved leave(s) of absence. (See M.S.M.P. program Leave of Absence section below.)

Program Commencement

Degrees are granted by the university in May, August, and December. Those students who wish to "walk" but did not complete all degree requirements by May of that year are permitted to walk during the School of Medicine Commencement of the following year.

Formal Remediation

A student whose cumulative grade point average falls below 3.0 is considered as "not in good standing." A remedial action plan is developed with the student, appropriate faculty member(s), and the program director. The remedial action plan may result in the student's having to take additional time to complete the degree requirements. If at the end of the next two consecutive terms, the cumulative grade point average is still below 3.0, adverse action may be taken including probation and/or dismissal.

Probation and Dismissal

The M.S.M.P. program follows School of Medicine policy for formal remediation, probation, dismissal, and appeals. See the [VUSM Student Progress and Promotion](#) page of this catalog for more information on these topics.

Medical Physics Education: Master of Science in Medical Physics: Academic Policy: Student Assessment

Grades

The M.S.M.P. program uses the VUSM grading scale, presented in the chapter of this catalog titled [VUSM Student](#)

School of Medicine

Assessment and Grading.

- C grade is the minimum grade permitted for a core course within the medical physics curriculum.
- C- grade does not earn graduate credit hours towards graduation.

Pass/Fail Grading

No Pass/Fail graded courses are accepted for credit within the program.

Repeating a Course

Students are required to repeat a core course for which a grade below a C was received. After repeating a course, both courses are reflected on the transcript, but the second grade earned is the one used in computing the student's grade point average.

Grade Grievance Policy

Students should seek redress of a problem with a grade as soon as possible after receiving the grade and in no case later than four weeks after the grade is released. Students with a problem should confer directly with the course director. Every effort should be made to resolve the problem fairly and promptly at this level. If the student cannot resolve the problem through discussion with the course director, the student should request an appeal by writing (email is acceptable) to the program director within two weeks of speaking with the course director. (The course director also should be included on the request for appeal.) In cases where the course director is also the degree program director, the appeal should be made to the assistant dean of health sciences education or his/her designee. If resolution is not achieved by the program director/assistant dean of health sciences education, the case is referred to the senior associate dean of health sciences education or his/her designee, who makes the final decision. At each level of review, the course's assessment practices are reviewed and the individual student's situation taken into account.

Auditing a Course

Medical Physics students may audit one or more courses (above the 38-hour didactic required credit hours) with the instructor's and program director's permission. Medical physics students may not audit a core course (one that is required to earn the degree). In addition, students may not audit an elective course whose credits are included in the required 38 didactic hours. For more information refer to the Auditing a Course information on the [Academic Policies for All School of Medicine Programs](#) page of this catalog.

Examinations

Format of student examinations is at the discretion of the course instructor. Students are expected to be present for the exam on the scheduled exam date. Should a student knowingly have to be absent on the scheduled exam date, the student should meet with the instructor and ask to take the exam early. Should the student miss class the day of the scheduled exam, the student must meet with the instructor for instructions concerning taking a makeup exam.

Note: Some instructors may not allow make-up exams or the make-up exams may be different from the original exam. Additionally, students who missed an exam shall not discuss exam materials with any student until the make-up exam has been taken.

Board Exams Recommended Test Dates for the American Board of Radiology (ABR) Exams Part I and II

Students successfully completing year 1 are encouraged to take the ABR Exam Part I during the summer between year 1 and year 2.

Medical Physics Education: Master of Science in Medical Physics: Academic Policy: Student Support and Advisory Services

Academic and Career Advisory Resources

The program director has an open door policy for all students in the M.S.M.P. program.

Health and Wellness

See Vanderbilt University Student Resources in the [Life at Vanderbilt](#) chapter of this catalog.

Medical Physics Education: Master of Science in Medical Physics: Accreditation

Published 7/12/2022

School of Medicine

Committee on Accreditation of Medical Physics Education Programs (CAMPEP)

Fax: 571-298-1301

campep_admin@campep.org

campep.org

Medical Physics Education: Master of Science in Medical Physics: Admission

The CAMPEP-accredited master of science in medical physics is offered at Vanderbilt University in the diagnostic imaging and the therapeutic tracks. Students are accepted for admission in the fall term (mid-August). No students are admitted for the spring or summer terms.

Admission Requirements

- Bachelor's degree in physics, applied physics, physical science, or engineering (with the equivalent of a minor in physics) from an accredited college or university.
- Physics prerequisite courses or equivalent include Calculus III, Differential Equations, Modern Physics, Modern Physics Lab, Computer Programming Language or demonstrated equivalent, and at least 2 out of the following 4 junior/senior level undergraduate physics courses: Electricity and Magnetism, Classical Mechanics, Quantum Mechanics, and Thermodynamics. Also, although not a prerequisite, we strongly encourage some formal knowledge of statistics.
- The successful candidate should have a minimum undergraduate GPA of 3.0/4.0 or a B average.
- The general GRE is required. The suggested minimum acceptable score for admission is a total of 312, with a minimum score on the quantitative section of 156.
- The GRE advanced physics exam is not required.
- Students from non-English speaking countries are required to demonstrate proficiency in English by submitting results of the Test of English as a Foreign Language (TOEFL). The suggested minimal acceptable score on the TOEFL exam is a 600 (paper)/250 (computer)/100 (internet).

Application Process

The application process consists of two steps: Pre-screening and campus visit

Pre-screening

Applicants must use the electronic application system and submit the following items by mid-December of the previous admission year (exact deadline date is published at the program website:

medschool.vanderbilt.edu/medical-physics/admission/):

- Completed electronic application form
- Transcripts for all college classes: submit transcripts via online application system **and, in addition**, send an official hard copy of all college transcripts to Vanderbilt University as instructed at [External Degree Verifications | Academic Records | University Registrar | Vanderbilt University](#).
- Three academic/professional references
- GRE General score (the GRE ETS code to submit scores to our program is 1871)
- Statement of Purpose
- Application fee. The application fee is mandatory for all initiated applications and is non-refundable, regardless of whether your application is considered complete and/or whether your application is reviewed by our application

Based on these materials, a number of candidates are selected for a campus visit or teleconference (international candidates only). The candidates that have not been selected are informed that they have not passed our pre- screening process, and their applications have been declined for admission for this period.

Campus Visit

Published 7/12/2022

School of Medicine

Applicants selected in the pre-screening process are contacted to schedule a campus visit or for teleconference interviews not later than mid-January of the admission year. In the campus visit, the applicant meets and informally interviews with the program director, faculty members, staff, and current students. The program director discusses the curricula in therapy and diagnostic imaging physics, the M.S.M.P. and D.M.P., and the student applicant selection process. It would be most beneficial at the time of interview if the applicants have a clear understanding of their career interests in therapy and/or diagnostic imaging medical physics and additionally have carefully considered the choice of the M.S.M.P. or D.M.P. program. Furthermore, we strongly encourage shadowing of a medical physicist prior to the campus visit. The campus interview process is generally completed within five to six hours. Any travel expenses associated with the campus visit (airline, ground transportation, hotel, etc.) are at the expense of the student.

Offer and Acceptance

The Medical Physics Faculty Committee reviews the applications and decides by late February of the admission year. Candidates are notified in writing regarding their admission status: accepted, on waiting list, or denied. Accepted candidates must officially accept or decline admission in writing by April 15 of the admission year.

Transfer Credits

At the discretion of the program director, students may petition for transfer credit in accordance with the policy established in the [YUSM Enrollment, Course Registration, and Student Status](#) page of this catalog. In general, no more than 6 credit hours earned from an accredited institution may be applied toward degree graduation requirements.

Non-Medical Physics Student Course Enrollment

Courses offered in medical physics are open only to degree-seeking students in the Medical Physics program (i.e., D.M.P. or M.S.M.P.). On rare occasions, a course director may allow a Vanderbilt student (graduate or undergraduate) to audit or enroll in a medical physics course for credit. In these circumstances, the student also must obtain permission to enroll in the course from the director of the primary program in which the student is enrolled.

Visiting (non-Vanderbilt) Students

Visiting students are not allowed to enroll in courses offered by the medical physics program.

Medical Physics Education: Master of Science in Medical Physics: Contact Information

Additional information may be obtained by contacting program officials at [Medical Physics | Vanderbilt University](#).

Medical Physics Education: Master of Science in Medical Physics: Other Program Policy and Procedure

Program Evaluation

The program evaluation—for both M.S.M.P. and D.M.P.—is performed with four different metrics:

1. Student course evaluations, administered by the School of Medicine for every course offered in the program at the end of the term.
2. After student graduation, successful passing of Part 2 of the American Board of Radiology certification examination is assessed.
3. After student graduation, successful job placement is assessed.
4. Two years after the graduate takes Part 3 of the American Board of Radiology certification examination, a survey is conducted to assess the graduate's overall satisfaction with the program.

Specific feedback from course evaluations is reviewed by the faculty member responsible for the course and the program director with the goal of improvements in the presentation of course material during the next offering of the course.

Other materials are evaluated by the program director and subsequently by the faculty with the aim of providing overall program feedback that helps direct program modifications and improvements. These evaluations occur on an annual basis.

Leave of Absence

School of Medicine

Students who wish to interrupt their study (personal, sickness, etc.) must request a leave of absence from the program director. Students may consult with Vanderbilt University Student Access Services (vanderbilt.edu/student-access/) when contemplating a leave of absence, and program administrators may consult with student access services when evaluating a request for leave of absence. Granting of a leave of absence is at the discretion of the Medical Physics Faculty Committee acting within the policies and procedures of the Vanderbilt University School of Medicine. Students who do not request and receive approval for a leave of absence may be required to request reinstatement to the program. Students' requests are based on the following considerations:

- A. Before the conclusion of the 1st semester and/or 2nd semester of the first year, a student may seek leave of absence status for the remainder of the academic year. (**Caveat:** A student who has been granted a leave of absence will not complete the total S.M.P. degree requirements within the minimum time of 21-22 months.)
- B. During the 1st year summer term, 2nd year fall term, or 2nd year spring term, a student may seek leave of absence status for the remainder of the term (and up to a total of 6 months thereafter). (**Caveat:** A student who has been granted a leave of absence will not complete the total M.S.M.P. degree requirements within the minimum time of 21-22 months.)

Students may request a leave of absence provided the two following conditions are met:

1. The student possesses "in good standing" student status
2. The student petitions in writing a request for a leave of absence stating the rationale for the leave. Should the request be for a medical leave of absence, the student must submit a Vanderbilt University School of Medicine- sanctioned health professional's letter of support.

Students requesting a medical leave of absence must additionally provide a Vanderbilt University School of Medicine-sanctioned health professional's letter stating that the student's health is sufficient for return to classes.

Should a student not meet the requirements above, consideration for permission to reapply and re-enter the applicant pool for the next school year is made by the Medical Physics Faculty Committee on a student-by-student basis.

Attendance

All students are expected to attend each class period. Students should notify the instructor should they knowingly have to miss a class. It is the responsibility of the student to obtain class notes and assignments. Penalty for non-class attendance is at the discretion of the instructor and/or the program director.

Holidays

The following days are designated as holidays by the university:

- New Year's Day
- Martin Luther King Jr. Day
- Memorial Day
- July 4th
- Labor Day
- Thanksgiving
- Christmas

Student Work Policy

Students in year 1 are allowed to work part time up to a maximum of 20 hours per week with permission of the program director. Students in year 2 are allowed to work part time up to a maximum of 15 hours per week with permission of the program director.

Professional Conduct

Students are expected to attend class, remain in "good academic standing" academically, participate in clinical activities (including QA procedures), and interact with faculty, staff, students, and patients in a professional manner.

Additionally, students are to exhibit personal behavior in accordance with the School of Medicine student

School of Medicine

conduct codes. A student who does not exhibit professional conduct meets with the program director, and a remedial action plan is developed with the student, appropriate faculty member(s), and the program director. If professional conduct does not improve, disciplinary action may be taken that could eventually lead to advising the student to withdraw or face dismissal.

Honor Code

Each student will be compliant with the Vanderbilt University School of Medicine Honor Code guidelines. Every academic year, each student will sign and date, either electronically or in writing, a copy of the Honor Code indicating that the student will follow the Honor Code rules and requirements.

Dress Code

Students who enter the clinical areas (Radiation Oncology and Diagnostic Radiology) must dress appropriately as professionals, being aware of the presence of patients in a clinical-services department. Blue jeans, t-shirts, shorts, and beach footwear are considered non-professional dress.

Vanderbilt ID

Vanderbilt students and employees are required to wear Vanderbilt ID badges at all times while on campus. This is a security matter and is enforced by Vanderbilt representatives including the Vanderbilt Police Department. Some campus buildings require Vanderbilt ID badge recognition for entrance.

Vanderbilt Radiation Badge

Students attending labs and/or practicum sessions where x-ray equipment is present should wear a Vanderbilt radiation badge. Vanderbilt radiation badges—granted by the Vanderbilt Environmental Health and Safety office — are processed for all new students during the mandatory orientation session before starting the program.

Transportation

During their participation in the M.S.M.P. program, students may be required to travel off campus for educational experiences. Generally speaking, local travel to off-campus sites is limited to one-way trips of not more than 55 miles.

M.S.M.P. students may be placed in locations outside of the local area, in rotational experiences, for an extended (several weeks) period of time. In which case, students are responsible for all travel expenses during this time.

For more information please see the Transportation section in the Academic Policies for All School of Medicine Programs chapter of this catalog.

Medical Physics Education: Master of Science in Medical Physics: Program Overview

Medical physics is an applied branch of physics devoted to the application of concepts and methods from physics to the diagnosis and treatment of human disease.

Medical physicists are scientists concerned with three primary areas of activity: clinical service and consultation, research and development, and teaching. Clinically, medical physicists are called upon to contribute scientific advice and resources to solve physical problems arising in radiological medical physics. Medical physics research typically involves the discovery and development of new instrumentation and technology, new medical diagnostic and therapeutic procedures, and tests using existing technologies. Historically, this type of activity has been primarily in radiological imaging and radiation oncology, but it now has a growing breadth of involvement throughout medicine.

Many medical physicists not only provide clinical service in health care facilities, but also have faculty appointments at universities and colleges, work in the industry as scientists and/or consultants, and are responsible for teaching future medical physicists, resident physicians, medical students, and hospital technical staff.

School of Medicine

Vanderbilt University offers the CAMPEP-accredited master of science in medical physics (M.S.M.P.), in therapy and diagnostic imaging physics tracks.

Program Mission/Goals/Objectives

The following is based on the AAPM Strategic Plan:

- Vision: Improving health through the education of leaders in medical physics
- Mission: Advancing medicine through excellence in the education of medical physicists

Standing Program Committees Master of Science in Medical Physics and Doctor of Medical Physics Super-Steering Committee

The super-steering committee supervises and monitors the graduate programs in medical physics (D.M.P and M.S.M.P.). It is composed of the chair of the Department of Radiation Oncology or her/his designee, the chair of the Department of Radiology and Radiological Sciences or her/his designee, the program director, the associate program director, and one member of the medical physics faculty elected by the Medical Physics Faculty Committee.

Medical Physics Faculty Steering Committee

The Medical Physics Faculty Steering Committee discusses and approves admission of new students, curriculum, and policy changes for the M.S.M.P. and the D.M.P. It is composed of all medical physics teaching faculty. The Medical Physics Faculty Steering Committee is chaired by the Program Director or, should he not be available, the Associate Program Director. This committee meets at least twice a year in compliance with CAMPEP requirements.

Therapeutic Sub-Steering Committee

The Therapeutic Sub-Steering Committee supervises and monitors the medical physics program in the therapeutic track.

Diagnostic Imaging Sub-Steering Committee

The Diagnostic Imaging Sub-Steering Committee supervises and monitors the medical physics programs in the diagnostic imaging track.

Program's Major Facilities

These interdisciplinary degree programs are administered through the Department of Radiation Oncology and the Department of Radiology and Radiological Sciences in the School of Medicine and involve faculty and courses from the Vanderbilt University School of Medicine, the Department of Radiology and Radiological Sciences, the Department of Radiation Oncology, the College of Arts and Science, the Department of Physics and Astronomy, and the School of Engineering (Department of Biomedical Engineering).

Medical Physics Education: Master of Science in Medical Physics: Tuition, Fees, and Cost of Attendance

For information about university and School of Medicine costs and fees please refer to the [School of Medicine Tuition, Fees, and Financial Aid](#) page of this catalog.

Academic Year 2022-23 Tuition

Tuition, 1st year	\$42,513
Tuition, 2nd year	28,348
Hourly Rate	1,719

Additional details regarding the estimated cost of attendance are available at medschool.vanderbilt.edu/financial-aid/master-of-science-in-medical-physics-cost-of-attendance.

Payment of Tuition and Fees

Students registered for a full-time course load (eight hours or more for fall and spring and six hours or more for summer) are billed at the block tuition rate for the term in which they are enrolled. Students registered for less than a full-time course load (seven hours or fewer in the fall and spring or five hours or fewer in the summer) are

School of Medicine

billed at the hourly tuition rate for the term in which they are enrolled. Certain courses are designated to trigger full-time enrollment (and block tuition billing) even though the number of credits carried by the course is fewer than eight.

Medical Physics Education: Professional Doctorate in Medical Physics: Academic Policy: Degree Requirements

Requirements to Earn Degree

Candidates for the D.M.P. must complete a total of 92 semester hours. Of this total, 50 semester credit hours are in didactic classroom and laboratory instruction emphasizing diagnostic imaging physics. In addition, candidates must complete an independent research project for 6 research credit hours. Students also are required to complete 30 semester credit hours of professional clinical rotations. Clinical training totals a minimum of 24 months. Limited introductory clinical training called practicum (approximately three full-time equivalent months) occurs in year 2; students receive 6 professional credit hours for the successful completion of the practicum. The didactic hours and practicum are completed in years one and two, and the clinical training credit hours and the 6 research credit hours are completed in years three and four.

Students in the D.M.P. program who complete all of the necessary degree requirements for the M.S.M.P. degree, including passing the oral qualifying exam, are awarded the M.S.M.P. (in passing). Thus, D.M.P. students entering year 3 are regarded as having completed a graduate degree in medical physics and can correctly be referred to as "medical physics residents."

Length and Delivery of Program

The normal time frame for completion of required course work for the doctorate in medical physics is four academic years. The maximum time for completion of this degree is no more than five years.

Curriculum and Tracks

The D.M.P. program offers a diagnostic imaging medical physics track. The clinical medical physics experience gained in years three and four is equivalent to a two-year medical physics residency.

All students and applicants may access this information and more online by visiting our webpage at medschool.vanderbilt.edu/medical-physics/.

Other Degree Requirements

Candidates must pass an oral qualifying exam by the end of their fifth term in the program.

Course List

A full list of program courses is provided in this catalog under [Courses by Program](#).

Medical Physics Education: Professional Doctorate in Medical Physics: Academic Policy: Other Program Policy and Procedure

Program Evaluation

The program evaluation—for both M.S.M.P. and D.M.P.—is performed with four different metrics:

1. Student course evaluations, administered by the School of Medicine for every course offered in the program at the end of the term.
2. After student graduation, successful passing of Part 2 of the American Board of Radiology certification examination is assessed.
3. After student graduation, successful job placement is assessed.
4. Two years after the graduate takes Part 3 of the American Board of Radiology certification examination, a survey is conducted to assess the graduate's overall satisfaction with the program.

Specific feedback from course evaluations is reviewed by the faculty member responsible for the course and the program director with the goal of improvements in the presentation of course material during the next offering of the course.

School of Medicine

Other materials are evaluated by the program director and subsequently by the faculty with the aim of providing overall program feedback that helps direct program modifications and improvements. These evaluations occur on an annual basis.

Leave of Absence

Students who wish to interrupt their study (personal, sickness, etc.) must request a leave of absence from the program director. Students may consult with Vanderbilt University Student Access Services (vanderbilt.edu/student-access/) when contemplating a leave of absence, and program administrators may consult with student access services when evaluating a request for leave of absence. Granting of a leave of absence is at the discretion of the

Medical Physics Faculty Committee acting within the policies and procedures of the Vanderbilt University School of Medicine. Students who do not request and receive approval for a leave of absence may be required to request reinstatement to the program. Students' requests are based on the following considerations:

- A. Before the conclusion of the 1st semester and/or 2nd semester of the first year, a student may seek leave of absence status for the remainder of the academic year. (**Caveat:** A student who has been granted a leave of absence will not complete the total S.M.P. degree requirements within the minimum time of 21-22 months.)
- B. During the 1st year summer term, 2nd year fall term, or 2nd year spring term, a student may seek leave of absence status for the remainder of the term (and up to a total of 6 months thereafter). (**Caveat:** A student who has been granted a leave of absence will not complete the total S.M.P. degree requirements within the minimum time of 21-22 months. OR,
- C. Following conferral of the M.S. degree, at any time during year 3 or year 4, a student may seek leave of absence status for the remainder of a three-month rotation (and up to a total of three months thereafter). The student can petition the Medical Physics Faculty Committee to reenter rotations at the beginning of a new term. (**Caveat:** A student who has been granted a leave of absence will not complete the total D.M.P. degree requirements within the minimum time of 46)

Students may request a leave of absence provided the two following conditions are met:

1. The student possesses "in good standing" student
2. The student petitions in writing a request for a leave of absence stating the rationale for the leave. Should the request be for a medical leave of absence, the student must submit a Vanderbilt University School of Medicine- sanctioned health professional's letter of support.

Students petition the Medical Physics Faculty Committee to reenter rotations at the beginning of a new term. Students requesting a medical leave of absence must additionally provide a Vanderbilt University School of Medicine-sanctioned health professional's letter stating that the student's health is sufficient for return to classes.

Should a student not meet the requirements above, consideration for permission to reapply and re-enter the applicant pool for the next school year is made by the Medical Physics Faculty Committee on a student-by-student basis.

Attendance

All students are expected to attend each class period. Students should notify the instructor should they knowingly have to miss a class. It is the responsibility of the student to obtain class notes and assignments. Penalty for non-class attendance is at the discretion of the instructor and/or the program director.

Vacation Time (year 3 and year 4)

Fifteen vacation days per year are granted to D.M.P. students in year 3 and year 4. The student must complete an *absence from duty* form submitted to and approved by the program director.

Holidays

The following days are designated as holidays by the university:

School of Medicine

- New Year's Day
- Martin Luther King Jr. Day
- Memorial Day
- July 4th
- Labor Day
- Thanksgiving
- Christmas

Sick Time

Sick days are not to exceed ten days per year. Physician note required for greater than two consecutive sick days. Time-off for illness in excess of ten sick days per calendar year is subtracted from vacation time bank. Sick days are not to be interpreted as additional vacation time.

Interview Days

Students in year 4 are allowed a maximum of four interview days over and above the fifteen vacation days. Permission must be requested and granted by the program director. The student must also complete an *absence from duty* form and have it approved by and submitted to the program director.

Student Work Policy

Students in year 1 are allowed to work part time up to a maximum of 20 hours per week with permission of the program director. Students in year 2 are allowed to work part time up to a maximum of 15 hours per week with permission of the program director. Students in year 3 and year 4 are considered as residents and hence are required to be in the respective clinical department at a minimum of 40+ hours per week; hence, regular, part-time employment is discouraged.

Professional Conduct

Students are expected to attend class, remain in "good academic standing" academically, participate in clinical activities (including QA procedures), and interact with faculty, staff, students, and patients in a professional manner. Additionally, students are to exhibit personal behavior in accordance with the School of Medicine student conduct codes. A student who does not exhibit professional conduct meets with the program director, and a remedial action plan is developed with the student, appropriate faculty member(s), and the program director. If professional conduct does not improve, disciplinary action may be taken that could eventually lead to advising the student to withdraw or face dismissal.

Honor Code

Each student will be compliant with the Vanderbilt University School of Medicine Honor Code guidelines. Every academic year each student will sign, either electronically or in writing, an acknowledgement indicating that the student will follow the Honor Code rules and requirements.

Dress Code

Students who enter the clinical areas (Radiation Oncology and Diagnostic Radiology) must dress appropriately as professionals, being aware of the presence of patients in a clinical-services department. Blue jeans, t-shirts, shorts, and beach footwear are considered non-professional dress.

Vanderbilt ID

Vanderbilt students and employees are required to wear Vanderbilt ID badges at all times while on campus. This is a security matter and is enforced by Vanderbilt representatives including the Vanderbilt University Police Department. Some campus buildings require Vanderbilt ID badge recognition for entrance.

Vanderbilt Radiation Badge

Students attending labs and/or practicum sessions where x-ray equipment or other sources of radiation are present should wear a Vanderbilt radiation badge. Third- and fourth-year students must wear a Vanderbilt radiation badge at all times when they are in the clinic. Vanderbilt radiation badges—granted by the Vanderbilt Environmental Health and Safety Office—are processed for all new students during the mandatory orientation session before starting the program.

Transportation

During their participation in the D.M.P. program, students may be required to travel off campus for educational experiences. Generally speaking, local travel to off-campus sites is limited to one-way trips of not more than 55

School of Medicine

miles.

D.M.P. students may be placed in locations outside of the local area, in rotational experiences, for an extended (several weeks) period of time. In which case, students are responsible for all travel expenses during this time.

For more information please see the Transportation information on the Academic Policies for All School of Medicine Programs page of this catalog.

Medical Physics Education: Professional Doctorate in Medical Physics: Academic Policy: Progress and Promotion

Satisfactory Academic Progress and Good Standing

A term average of 3.0 is required to remain in “good standing.”

Graduation

A cumulative grade point average of 3.0 is required for graduation.

Allowance for Delaying Graduation

Graduation may be delayed beyond the normal time required to complete a formal remediation or an approved leave(s) of absence. (See [D.M.P. program Leave of Absence](#) section.)

Program Commencement

All degree requirements (didactic, research, and clinical) are satisfied by the end of June in the fourth year; the students are dismissed by July 1 of that year. A graduation ceremony is organized at that time to celebrate their achievements. No diplomas are presented during the program ceremony. The D.M.P. diplomas are formally issued by the university at the end of the summer term of the fourth year (mid-August). Those students who wish to “walk” are permitted to do so during Commencement the following May.

Formal Remediation

A student whose cumulative grade point average falls below 3.0 is considered as “not in good standing.” A remedial action plan is developed with the student, appropriate faculty member(s), and the program director. The remedial action plan may result in the student’s having to take additional time to complete the degree requirements. If, at the end of the next two consecutive terms, the cumulative grade point average is still below 3.0, adverse action may be taken, including probation and/or dismissal.

Probation and Dismissal

The D.M.P. program follows School of Medicine policy for formal remediation, probation, dismissal, and appeals. See the [VUSM Student Progress and Promotion](#) page of this catalog for more information on these topics.

Medical Physics Education: Professional Doctorate in Medical Physics: Academic Policy: Student Assessment

Grades

The D.M.P. Program uses the VUSM grading scale, presented in the page of this catalog titled [VUSM Student Assessment and Grading](#).

Academic grades for individual clinical rotations during year 3 and year 4 are on the scale A, B, C, or Fail.

- C grade is the minimum grade permitted for a core course within the medical physics curriculum.
- C- grade does not earn graduate credit hours towards graduation.

Pass/Fail Grading

No Pass/Fail graded courses are accepted for credit within the program.

Repeating a Course

School of Medicine

Students are required to repeat a core course for which a grade below a C was received. After repeating a course, both course grades are reflected on the transcript, but the second grade earned is the one used in computing the student's grade point average.

Grade Grievance Policy

Students should seek redress of a problem with a grade as soon as possible after receiving the grade and in no case later than four weeks after the grade is released. Students with a problem should confer directly with the course director. Every effort should be made to resolve the problem fairly and promptly at this level. If the student cannot resolve the problem through discussion with the course director, the student should request an appeal by writing (email is acceptable) to the program director within two weeks of speaking with the course director. (The course director also should be included on the request for appeal.) In cases where the course director is also the degree program director, the appeal should be made to the assistant dean of health sciences education or his/her designee. If resolution is not achieved by the program director/assistant dean of health sciences education, the case is referred to the senior associate dean of health sciences education or his/her designee, who makes the final decision. At each level of review, the course's assessment practices are reviewed and the individual student's situation taken into account.

Auditing a Course

Medical physics students may audit one or more courses (above the 50-hour didactic required credit hours) with the instructor's and program director's permission. Medical physics students may not audit a core course (one that is required to earn the degree). In addition, students may not audit an elective course whose credits are included in the required 50 didactic hours. For more information refer to the Auditing a Course information on the [Academic Policies for All School of Medicine Programs](#) page of this catalog.

Examinations

Format of student examinations is at the discretion of the course instructor. Students are expected to be present for the exam on the scheduled exam date. Should a student knowingly have to be absent on the scheduled exam date, the student should meet with the instructor and ask to take the exam early. Should the student miss class the day of the scheduled exam, the student must meet with the instructor for instructions concerning taking a makeup exam.

Note: Some instructors may not allow make-up exams or the make-up exams may be different from the original exam. Additionally, students who missed an exam shall not discuss exam materials with any student until the make-up exam has been taken. Failure to follow this requirement will be considered an Honor Code violation.

Clinical Assessment

At the conclusion of year 2 (summer term), the student is assigned a clinical physics mentor by the program director. The clinical physics mentor is responsible for the student's completion of year 3 and year 4 requirements. Each of the clinical rotations for year 3 is repeated in year 4. The intent of the repeat rotations is that the student observe and participate during year 3 and gain the necessary training and experience for competency in each clinical area in year 4. Evaluation for completion of each rotation may include documentation, reports, and competency examinations. The clinical physics mentor is responsible for collection and scoring of the evaluation materials. Academic grades for individual rotations are on the scale A, B, C, or Fail. Semester grades are submitted to the School of Medicine Registrar's Office with a copy given to the program director.

The student must successfully complete the necessary requirements and acquired clinical skills before the clinical physics mentor and program director allow progression to the next rotation. Should the student not successfully complete a rotation with the minimum grade of C, the clinical physics mentor and program director meet with the student to discuss remedial action to resolve the discrepancy. The student is required to correctly complete all documentation and reports in a timely manner and may be required to take a written or oral examination over the materials within that rotation; the student's failing semester grade cannot be raised above a grade of C. Should the student not successfully complete the remedial assignments and/or fail the oral examination, that rotation must be retaken at the conclusion of year 4 (summer term). Hence, this extends clinical rotations beyond the normal twenty-four-month period.

The D.M.P. medical physics program and the School of Medicine require a cumulative GPA of 3.0 at the time of

Published 7/12/2022

School of Medicine

graduation. With the successful completion of all clinical rotations, the student will have received a total of 30 credit hours during years 3 and 4.

Other Assessment Systems D.M.P. Research Project

During the summer of year 2 and the fall of year 3, each D.M.P. student chooses a clinical research project. The project must be approved by both the program director and the clinical physics director. A mentor is selected to guide the student's research efforts. The project should be approximately equivalent to a three-to-four-month full-time effort (FTE). The project results are in a written format consistent with a manuscript submission to a medical physics scientific journal. The project is defended during a student presentation to faculty, staff, and students. Projects should be completed on or before March 30 of year 4.

Board Exams Recommended Test Dates for the American Board of Radiology (ABR) Exams Parts I and II

Students successfully completing year 1 are encouraged to take the ABR Exam Part I during the summer between year 1 and year 2. Students successfully completing year 4 are encouraged to take ABR Exam Part II during the summer after their graduation.

Medical Physics Education: Professional Doctorate in Medical Physics: Academic Policy: Student Support and Advisory Services

Academic and Career Advisory Resources

The program director has an open door policy for all students in the D.M.P. program. Students are also assigned a clinical physics mentor during years 3 and 4. The mentor guides the student through the clinical requirements of the program and ensures completion and documentation of the student's clinical assessments.

Health and Wellness

Phone: 571-298-1239

Fax: 571-298-1301

campep_admin@campep.org

campep.org

Medical Physics Education: Professional Doctorate in Medical Physics: Admission

The CAMPEP-accredited professional doctorate in medical physics is offered at Vanderbilt University in the diagnostic imaging track. Students are accepted for admission only in the fall term (mid-August). No students are admitted for the spring or summer terms.

Admission Requirements

- Bachelor's degree in physics, applied physics, physical science, or engineering (with the equivalent of a minor in physics) from an accredited college or university.
- Physics prerequisite courses or equivalent include Calculus III, Differential Equations, Modern Physics, Modern Physics Lab, Computer Programming Language or demonstrated equivalent, and at least 2 out of the following 4 junior/senior level undergraduate physics courses: Electricity and Magnetism, Classical Mechanics, Quantum Mechanics, and Thermodynamics. Also, although not a prerequisite, we strongly encourage some formal knowledge of statistics.
- The successful candidate should have a minimum undergraduate GPA of 3.0/4.0 or a B average.

School of Medicine

- The general GRE is required. The suggested minimal acceptable score for admission is a total of 312, with a minimum score on the quantitative section of 156.
- The GRE advanced physics exam is not required.
- Students from non-English-speaking countries are required to demonstrate proficiency in English by submitting results of the Test of English as a Foreign Language (TOEFL). The suggested minimum acceptable score on the TOEFL exam is 600 (paper)/250 (computer)/100 (internet).

Application Process

The application process consists of two steps: Pre-screening and campus visit

Pre-screening

Applicants must use the electronic application system and submit the following items by mid-December of the previous admission year (exact deadline date is published at the program website:

medschool.vanderbilt.edu/medical-physics/admission/):

- Completed electronic application form
- Transcripts for all college classes: submit transcripts via online application system **and, in addition**, send an official hard copy of all college transcripts to Vanderbilt University as instructed at [External Degree Verifications | Academic Records | University Registrar | Vanderbilt University](#).
- Three academic/professional references
- GRE General score (the GRE ETS code to submit scores to our program is 1871)
- Statement of Purpose
- Application fee. The application fee is mandatory for all initiated applications and is non-refundable, regardless of whether your application is considered complete and/or whether your application is reviewed by our application

Based on these materials, a number of candidates are selected for a campus visit or teleconference (usually, international candidates only). The candidates that have not been selected are informed that they have not passed our pre-screening process, and their applications have been declined for admission for this period.

Campus Visit

Applicants selected in the pre-screening process are contacted to schedule a campus visit or for teleconference interviews not later than mid-January of the admission year. In the campus visit, the applicant meets and informally interviews with the program director, faculty members, staff, and current students. The program director discusses the curricula in therapy and diagnostic imaging physics, the M.S.M.P. and D.M.P., and the student applicant selection process. It would be most beneficial at the time of interview if the applicants have a clear understanding of their career interests in therapy and/or diagnostic imaging medical physics and additionally have carefully considered the choice of the M.S.M.P. or D.M.P. program. Furthermore, we strongly encourage shadowing of a medical physicist prior to the campus visit. The campus interview process is generally completed within five to six hours. Any travel expenses associated with the campus visit (airline, ground transportation, hotel, etc.) are at the expense of the student.

Offer and Acceptance

The Medical Physics Faculty Committee reviews the applications and decides by late February of the admission year. Candidates are notified in writing regarding their admission status: accepted, on waiting list, or denied. Accepted candidates must officially accept or decline admission in writing by April 15 of the admission year.

Transfer Credits

At the discretion of the program director, students may petition for transfer credit in accordance with the policy established in the [VUSM Enrollment, Course Registration, and Student Status](#) page of this catalog. In general, no more than 6 credit hours earned from an accredited institution may be applied toward degree graduation requirements.

Non-Medical Physics Student Course Enrollment

Courses offered in medical physics are open only to degree-seeking students in the Medical Physics program (i.e., D.M.P. or M.S.M.P.). On rare occasions, a course director may allow a Vanderbilt student (graduate or undergraduate) to audit or enroll in a medical physics course for credit. In these circumstances, the student also must obtain permission to enroll in the course from the director of the primary program in which the student is enrolled.

Visiting (non-Vanderbilt) Students

School of Medicine

Visiting students are not allowed to enroll in courses offered by the Medical Physics program.

Medical Physics Education: Professional Doctorate in Medical Physics: Contact Information

Additional information may be obtained by contacting program officials at [Medical Physics | Vanderbilt University](#).

Medical Physics Education: Professional Doctorate in Medical Physics: Program Overview

Medical physics is an applied branch of physics devoted to the application of concepts and methods from physics to the diagnosis and treatment of human disease.

Medical physicists are scientists concerned with three primary areas of activity: clinical service and consultation, research and development, and teaching. Clinically, medical physicists are called upon to contribute scientific advice and resources to solve physical problems arising in radiological medical physics. Medical physics research typically involves the discovery and development of new instrumentation and technology, new medical diagnostic and therapeutic procedures, and tests using existing technologies. Historically, this type of activity has been primarily in radiological imaging and radiation oncology, but it now has a growing breadth of involvement throughout medicine.

Many medical physicists not only provide clinical service in health care facilities, but also have faculty appointments at universities and colleges, work in the industry as scientists and/or consultants, and are responsible for teaching future medical physicists, resident physicians, medical students, and hospital technical staff.

Vanderbilt University offers the CAMPEP-accredited professional doctorate in medical physics (D.M.P.), in the diagnostic imaging physics track.

Program Mission/Goals/Objectives

The following is based on the AAPM Strategic Plan:

- Vision: Improving health through the education of leaders in medical physics
- Mission: Advancing medicine through excellence in the education of medical physicists

Standing Program Committees Master of Science in Medical Physics (M.S.M.P) and Doctor of Medical Physics (D.M.P) Super-Steering Committee

The super-steering committee supervises and monitors the graduate programs in medical physics (D.M.P and M.S.M.P.). It is composed of the chair of the Department of Radiation Oncology or her/his designee, the chair of the Department of Radiology and Radiological Sciences or her/his designee, the program director, the associate program director, and one member of the medical physics faculty elected by the Medical Physics Faculty Committee.

Medical Physics Faculty Steering Committee

The Medical Physics Faculty Steering Committee discusses and approves admission of new students, curriculum, and policy changes for the M.S.M.P. and the D.M.P. It is composed of all medical physics teaching faculty. The Medical Physics Faculty Steering Committee is chaired by the Program Director or, should he not be available, the Associate Program Director. This committee meets at least twice a year in compliance with CAMPEP requirements.

Diagnostic Imaging Sub-Steering Committee

The Diagnostic Imaging Sub-Steering Committee supervises and monitors the medical physics programs in the diagnostic imaging track.

Therapeutic Sub-Steering Committee

The Therapeutic Sub-Steering Committee supervises and monitors the medical physics programs in the therapeutic track.

School of Medicine

Program's Major Facilities

These interdisciplinary degree programs are administered through the Department of Radiation Oncology and the Department of Radiology and Radiological Sciences in the School of Medicine and involve faculty and courses from the Vanderbilt University School of Medicine, the Department of Radiology and Radiological Sciences, the Department of Radiation Oncology, the College of Arts and Science, the Department of Physics and Astronomy, and the School of Engineering (Department of Biomedical Engineering).

Medical Physics Education: Professional Doctorate in Medical Physics: Tuition, Fees, and Cost of Attendance

For information about university and School of Medicine costs and fees please refer to the [School of Medicine Tuition, Fees, and Financial Aid](#) page of this catalog.

Academic Year 2022-23 Tuition

Tuition, 1st, 2nd years	\$42,981
Tuition, 3rd, 4th years	36,120
Hourly Rate	1,719

Detailed information regarding the estimated cost of attendance is available at medschool.vanderbilt.edu/financial-aid/professional-doctorate-in-medical-physics-cost-of-attendance.

Payment of Tuition and Fees

Students registered for a full-time course load (eight hours or more for fall and spring and six hours or more for summer) are billed at the block tuition rate for the term in which they are enrolled. Students registered for less than a full-time course load (seven hours or fewer in the fall and spring or five hours or fewer in the summer) are billed at the hourly tuition rate for the term in which they are enrolled. Certain courses are designated to trigger full-time enrollment (and block tuition billing) even though the number of credits carried by the course is fewer than eight.

Principal Clinical Education Affiliates: Facilities

Vanderbilt University Hospital

Vanderbilt University Hospital (VUH) opened in 1980, with the major addition of the Critical Care Tower in 2009. The hospital is dynamic, growing, and dedicated to meeting the most critical and complex needs of our region, continuing Vanderbilt's more than century-old tradition of offering the best in patient care.

Many patients seen in the hospitals are from states other than Tennessee, with the majority coming from Kentucky, Alabama, and Mississippi.

Adjacent and attached to VUH is Medical Center East, an inpatient and outpatient services building, housing operating rooms, patient rooms for Labor and Delivery, three floors of inpatient specialty care such as a surgical and transplant unit, the Vanderbilt Bill Wilkerson Center and the Vanderbilt Orthopaedics Institute.

The Monroe Carell Jr. Children's Hospital at Vanderbilt

The Monroe Carell Jr. Children's Hospital at Vanderbilt opened as a stand-alone facility in 2004 and is a place of hope and healing for pediatric patients and their families. Recognized as one of the premier children's hospitals in the nation by *U.S. News and World Report* for twelve years running, Children's Hospital cares for the sickest patients in the region and beyond.

Children's Hospital is the most comprehensive pediatric facility in Tennessee, providing services including neurosurgery, cancer treatment, trauma care, transplant, and much more. Children's Hospital operates the region's only Level I pediatric trauma unit and a neonatal intensive care unit with the highest designated level of care.

School of Medicine

The facility is filled with state-of-the-art equipment and information systems to provide the best treatment for patients. It offers a variety of family accommodations to help fulfill its mission of patient-and family-centered care. In addition, Children's Hospital is a top-ranked teaching and research facility. As a nonprofit organization, the hospital cares for children of Tennessee and surrounding states regardless of their ability to pay.

Vanderbilt Psychiatric Hospital

Vanderbilt Psychiatric Hospital, which opened in 1985, provides inpatient and partial hospitalization services to children, adolescents, and adults with psychiatric and substance abuse problems. Services include 24-hour crisis assessment.

vanderbilthealth.com/service-line/behavioral-health

The Vanderbilt Clinic

The Vanderbilt Clinic (TVC), a comprehensive outpatient facility, opened in 1988 and houses more than 100 medical specialty practice areas, clinical laboratories, a center for comprehensive cancer treatment, and an outpatient surgery center.

Vanderbilt Stallworth Rehabilitation Hospital

Vanderbilt Stallworth provides comprehensive inpatient and outpatient rehabilitation services for adult and pediatric patients with neurological, orthopaedic, and other injuries, as well as chronic conditions and disabilities. The hospital specializes in treating stroke, brain, and spinal cord injury; multiple traumas; amputations; hip fracture; and other diagnoses. Stallworth is a designated Stroke Center of Excellence and repeatedly exceeds national benchmarks for patient satisfaction and functional outcomes. This hospital is a joint venture with Encompass Health Corporation.

vanderbiltstallworthrehab.com

Vanderbilt-Ingram Cancer Center

Vanderbilt-Ingram Cancer Center (VICC) is Tennessee's only National Cancer Institute (NCI)-designated Comprehensive Cancer Center providing treatment for both adult and pediatric cancer patients. It is also a member of the National Comprehensive Cancer Network, a nonprofit alliance of twenty-six of the world's elite cancer centers collaborating to improve cancer care for patients everywhere. The Cancer Center unites physicians and scientists in research programs in key areas. VICC is ranked in the top 10 in competitively-awarded NCI grant support.

VICC is one of the few centers in the country with a comprehensive program for cancer survivors regardless of age, type of cancer, or where they received their oncology treatment. The center's clinical trials program includes robust work in Phase I drug development and designation by the NCI for Phase I and Phase II clinical trials.

The center also boasts several donor-supported research initiatives, including the Frances Williams Preston Laboratories established by the T. J. Martell Foundation, the A. B. Hancock Jr. Memorial Laboratory for Cancer Research, and the Robert J. Kleberg, Jr., and Helen C. Kleberg Center for Personalized Cancer Medicine.

vicc.org

Vanderbilt Kennedy Center for Research on Human Development

The Vanderbilt Kennedy Center strives to improve life for people with disorders of thinking, learning, perception, communication, mood, and emotion caused by disruption of typical development. Its core values include the pursuit of scientific knowledge with creativity and purpose; the education of scientists, practitioners, families, and community leaders; the facilitation of discovery by Kennedy Center scientists; and the translation of knowledge into practice. The center is one of fourteen National Institutes of Health research centers on mental retardation and other developmental disabilities. It has also been named a University Center for Excellence on Developmental Disabilities Education, Research, and Service by the federal Administration on Developmental Disabilities. The center is an interdisciplinary research, training, diagnostic, and treatment institute, embracing faculty and resources available through Vanderbilt University Medical Center, the College of Arts and Science, and Peabody College.

School of Medicine

<https://vkc.vumc.org/vkc>

Vanderbilt Diabetes Center

The Vanderbilt Diabetes Center provides a comprehensive approach to diabetes for patients of all ages that includes all aspects of health related to diabetes. It also offers programs to equip the next generation of caregivers and scholars. Other programs support the diabetes-related research of VUMC faculty members.

vanderbilthealth.com/diabetesandendocrinology/

Center for Experiential Learning and Assessment (CELA)

The Center for Experiential Learning and Assessment (CELA) provides an educationally rich simulation environment for training our students and other health care professionals to practice the highest quality clinical care. Simulation technology has now become a standard for medical education, surgical training, and health care team training. Such programs have resulted in improved performance, quicker response time, and less deviation from practice standards. Healthcare simulators increase trainee confidence and competence, improve patient safety, and can also yield cost and process efficiencies. The work is grounded in theory-based research and informed by the best educational practices for competent clinical practice. CELA is also instrumental in conducting rigorous research that extends knowledge and practice of experiential learning and assessment by simulations. The center consists of three programs: the Program in Human Simulations, the Simulation Technologies Program, and the Programs in Surgical and Anatomical Simulation. The Program in Human Simulations brings the traditional standardized patient methods toward a broader use of simulations involving all aspects of human interaction in medicine. The Simulation Technologies Program emphasizes the sophisticated use of computers, task trainers, virtual reality and mannequin-based technologies to simulate clinical challenges. The Program in Surgical and Anatomical Simulation is possible thanks to cadaveric gifts made through the Anatomical Donations Program. All programs provide both unique and integrated approaches to training our medical students in a safe and effective educational environment.

Rudolph A. Light Hall

Light Hall provides classroom and laboratory space for students in the School of Medicine. It houses the Department of Biochemistry, the Department of Molecular Physics and Biophysics, and the Howard Hughes Medical Institute.

Ann and Roscoe Robinson Medical Research Building

Laboratories and academic space for pharmacology, biochemistry, and molecular physiology and biophysics are housed in the Ann and Roscoe Robinson Medical Research Building. The eight-story building is also home to the A. Hancock Jr. Memorial Laboratory for Cancer Research.

Frances Preston Medical Research Building

This building is named in honor of the late Frances Williams Preston, President and CEO of Broadcast Music, Incorporated. This building consolidates the Vanderbilt-Ingram Cancer Center's programs into one primary location on the VUMC campus.

Medical Research Building III

MRB III houses research laboratories, teaching laboratories, research support areas, offices, conference rooms, classrooms, and a greenhouse for research and teaching. It is a joint undertaking of the College of Arts and Science and VUMC.

Medical Research Building IV

MRB IV houses a significant amount of wet lab space and supports continued growth in VUMC research programs.

Medical Center North

The Newman Clinical Research Center, an inpatient orthopaedic unit, and multiple general- and specialty-care units are inside Medical Center North. The complex also houses laboratories and administrative support services for VUMC.

Faculty and administrative offices and research space for medical school departments are in Medical Center North. The original portions of the building were completed in 1925. Since that time a number of connecting

School of Medicine

wings and buildings have been added.

Vanderbilt Health One Hundred Oaks

This 440,000-square-foot doctors' office suite opened for patient care in 2009 and is designed for easy access off the interstate highway system, abundant surface parking, automated check-in, and integrated services, labs, and radiology. It houses numerous specialty clinics, primary care services, and advanced imaging facilities.

Vanderbilt Health Williamson County

Vanderbilt Health Williamson County offers more than 250 physicians in practices ranging from primary care to sports medicine, GI, cancer care, imaging, and pediatrics.

Vanderbilt Dayani Center for Health and Wellness

The Vanderbilt Dayani Center is a medically based fitness/health promotion center that specializes in modifying risk factors, for conditions including cardiovascular disease, weight management, stress, sedentary lifestyle, and smoking. It was the first Certified Medical Fitness Center in Tennessee, is closely aligned with the Department of Physical Medicine and Rehabilitation, and serves patient care, research, and education functions within VUMC.

vanderbilthealth.com/service-line/dayani-center-health-and-wellness

VUMC Strategy and Innovation Office

The Strategy and Innovation Office's mission is to accelerate change in health care. It provides methods for reducing time to results, conducts research through demonstration projects, and supports active learning through sessions that leverage facts during solution design.

vumc.org/strategy/SAI

Vanderbilt Heart and Vascular Institute

The Vanderbilt Heart and Vascular Institute is a comprehensive and integrated program offering diagnosis, treatment, minimally invasive therapies, surgical intervention, disease management, state-of-the-art techniques, and personalized treatment programs to meet each patient's unique needs.

vanderbilthealth.com/service-line/heart-and-vascular-care

Vanderbilt Bill Wilkerson Center for Otolaryngology and Communication Sciences

The Vanderbilt Bill Wilkerson Center is devoted to comprehensive patient care, education, and research in the field of communication disorders and diseases, as well as ailments of the ear, nose, throat, head, and neck.

vanderbilthealth.com/service-line/vanderbilt-bill-wilkerson-center

Vanderbilt Transplant Center

The Vanderbilt Transplant Center, one of the Southeast's largest, is a multidisciplinary alliance of transplant specialists. Each transplant program within the center represents a collaboration of medical and surgical professionals working together in the best interests of the transplant patient.

vanderbilthealth.com/service-line/transplant-center

Principal Clinical Education Affiliates: Graduate Medical Education

Vanderbilt University Medical Center has built a strong reputation as a national and international leader in medical education of health professionals, research in medical science, and patient care. Residency training began at Vanderbilt University Medical Center with just twelve residents in 1925. Now, VUMC trains more than 1,000 house staff in over 100 accredited residency and fellowship programs.

Residency Training

Medical school graduates preparing for clinical practice usually spend three or more years in residency training prior to sitting for the certification examination in their chosen specialty. Such supervised experiences at Vanderbilt cover an incredibly broad range of specialties and allow the learner to gain graduated responsibility with the ultimate goal of independent practice. Vanderbilt attracts highly qualified candidates from diverse backgrounds, ensuring a House Staff that is devoted to delivering safe, high-quality patient care, to succeeding in their chosen discipline, and to teaching other learners in the process. As a result, the House Staff take their responsibility in medical student teaching as both an honor and a privilege and devote considerable time to the

School of Medicine

medical students.

In addition to their primary responsibilities at Vanderbilt University Medical Center (including Vanderbilt University Hospital, Monroe Carell Jr. Children's Hospital at Vanderbilt, the Vanderbilt Psychiatric Hospital, and The Vanderbilt Clinic), the residents also work in a variety of other clinical settings across Nashville including sites such as the Veterans Administration Hospital and Williamson County Medical Center with supervision by outstanding faculty in each setting.

Vanderbilt University Medical Center (VUMC) is a major referral center and consequently has a patient population with complex pediatric, medical and surgical problems. The Veterans Administration Hospital, adjacent to VUMC, serves veterans and their families from throughout the mid-south and is an important component of the teaching program.

Post-Residency Clinical Fellowships

After residency training, many physicians choose to pursue further subspecialization through a clinical fellowship. Fellows admitted to these programs must have completed an approved residency program. These training programs have as their goal the training of physicians for practice and certification in a medical subspecialty. As with the above, the fellows are expected to participate in departmental activities related to teaching, clinical services, and research and serve as another outstanding resource for medical student education.

Principal Clinical Education Affiliates: Office for Continuous Professional Development

Vanderbilt University School of Medicine and Vanderbilt University Medical Center (VUMC) are committed to the continuous professional development of VUMC physicians and others in the health professions. At VUMC, continuing medical education (CME) is considered an integral part of the continuum of medical education, starting with the undergraduate experience, progressing through graduate medical education, and culminating with ongoing continuing medical education and continuing professional development. The Division of CME sponsors learning opportunities for physicians and other members of the health care team that enable them to provide the very best possible care to their patients and perform optimally in their other professional responsibilities as measured by improvements in competence, performance, and patient healthcare quality. The Vanderbilt University Medical Center, Office for Continuous Professional Development, Division of CME maintains Accreditation from the Accreditation Council for Continuing Medical Education (ACCME), recognizing demonstrated engagement with the quality improvement enterprise in a way that supports physician learning and quality patient care.

Vanderbilt has also been recognized by the Multi-Specialty Board of the American Board of Medical Specialties (ABMS) as a certified site for the Maintenance of Certification (MOC) Portfolio Program. The MOC Portfolio Program was established by ABMS to permit institutions such as Vanderbilt to provide support to physicians who are pursuing Maintenance of Certification Part IV projects, thus aligning physicians' performance improvement requirements with the institution's performance improvement goals. The Vanderbilt MOC Portfolio Program is a collaborative effort of the Office of Quality, Safety and Risk Prevention, the Informatics Center, and the Office for Continuous Professional Development.

Inquiries about CME or MOC should be directed to the Office for Continuous Professional Development or to departments and divisions about specific programming.

Principal Clinical Education Affiliates: Related VUMC Committees

Vanderbilt Institute for Clinical and Translational Research (VICTR) Scientific Review Committee

The VICTR Scientific Review Committee meets regularly to act upon research proposals requesting support for the use of the VICTR resources including the Clinical Research Center, Health Services Research, Biomedical Informatics, Biomedical Statistics, Research Cores, and Research Support Services.

Harvey Murff, Co-chair; Alan Storrow, Co-chair. Donald Alcendor, Melinda Aldrich, Eric Austin, Calum Avison,

School of Medicine

Margaret Benningfield, Evan Brittain, Zhongmao Guo, David Haas, Rizwan Hamid, Darlene Jenkins, Tiye Link, and Ashley Shoemaker. Ex officio: Gordon R. Bernard, Italo Biaggioni, Frank E. Harrell, Kevin Niswender.

Vanderbilt Human Research Protections Program and Institutional Review Board Committees (IRB)

The Vanderbilt Human Research Protections Program (HRPP) supports and facilitates the IRB process, the purpose of which is to protect human research subjects engaged by Vanderbilt University and Vanderbilt University Medical Center research studies. The HRPP administers the Vanderbilt Institutional Review Board Committees, assuring the policies and procedures of Vanderbilt University and Vanderbilt University Medical Center are effective and applied in compliance with state and federal laws and regulations, as well as consistent with the policies of the FWA with DHHS, OHRP, FDA, NIH, OCR, and other applicable federal agencies. The VU/VUMC IRB Committees may also serve as the single IRB for other entities upon request consistent with any existing agreements.

In addition, the Vanderbilt HRPP performs and documents quality assurance activities (including internal and external monitoring) to assure compliance with state and federal regulations. These activities include directed audits and post-approval monitoring visits. Based on these reviews, the HRPP formulates and implements, as needed, recommendations for investigators and their staff. The HRPP also takes enforcement action on non-compliance according to HRPP policies and procedures, as necessary.

The HRPP conducts ongoing educational programs for investigators, key study personnel, IRB Committee members, and HRPP staff.

Vanderbilt Institutional Review Board (IRB) Committees

- Integrated Sciences Committee
- Health Sciences Committee #1
- Health Sciences Committee #2
- Health Sciences Committee #3
- Sub-Committees of the IRB
 - Radioactive Drug Research Committee
 - Institutional Biosafety Committee for Human Subjects
 - Institutional Human Pluripotent Cell Research Oversight

Principal Clinical Education Affiliates: Tennessee Valley Healthcare System of the Veterans Administration

The Tennessee Valley Healthcare System (TVHS), a part of the U.S. Department of Veterans Affairs, is a Level 1A, integrated tertiary healthcare system comprised of two hospitals, the Alvin C. York Campus in Murfreesboro, Tennessee, and the Nashville Campus in Nashville, Tennessee. TVHS has over 20 community-based outpatient clinics located in Tennessee and Kentucky. TVHS provides ambulatory care, primary care, and secondary care in acute medicine and surgery; specialized tertiary care; transplant services; spinal cord injury outpatient care; and a full range of extended care and mental health services.

TVHS's Nashville Campus is the only VA facility supporting all solid organ transplant programs, including bone marrow transplants and is a national referral site for bone marrow and solid organ transplants. The York Campus is a network referral center for mental health services, long term psychiatric care, geriatrics, and extended care. TVHS provides a full range of specialized medical services.

VUMC is co-located with the TVHS Nashville campus, and they collaborate on many research and educational endeavors, with hundreds of students and providers cross-affiliated with both organizations.

Principal Clinical Education Affiliates: VA Academic Partnership Council for the Department of Veterans Affairs, Tennessee

The VA Academic Partnership Council is the fundamental administrative unit for policy development and evaluation of educational and research programs at the affiliated Department of Veterans Affairs, Tennessee

School of Medicine

Valley Healthcare System (TVHS). It is composed of senior faculty members of the School of Medicine and others who are associated with TVHS.

Principal Clinical Education Affiliates: VUSM Office for Diversity Affairs

The Office for Diversity Affairs (ODA) was created in 1991 as the Office of Minority Student Affairs to support students from traditionally underrepresented groups in medicine (URMs), within the medical school. This work was viewed as foundational to the development of a broader program to imbed diversity and inclusion into the fabric of VUSM and VUMC.

Over the last decade, the ODA has worked to build a culture and climate committed to valuing and building diversity and inclusion into the framework of the medical school and medical center. This has been facilitated by a number of activities to foster inclusiveness and maintain a positive learning environment. Among these are the Levi Watkins Jr. M.D. Lecture, the Martin Luther King, Jr., Day Lecture, Hidden VUMC Figures, and the unveiling of URM faculty portraits. The ODA maintains working relationships with various medical student organizations focused on reducing health disparities that affect marginalized populations, including African Americans, Hispanics, Asian-Americans, Pacific Islanders, those who identify as LGBTQ, as well as others.

School of Medicine Calendar 2022/2023*

FALL SEMESTER 2022**

Classes/clinicals begin for 3rd- and 4th-year M.D. students / Tuesday 5 July
Classes continue for 2nd-year M.D. students / Friday 1 July

Orientation for 1st-year M.D. students / Wednesday 13 July–Friday 15 July
Classes begin for 1st-year M.D. students / Monday 18 July

Fall semester begins for master's and doctoral programs (other than M.D.) / Wednesday 24 August

Labor Day—No classes or clinical activities for M.D. FMK and FCC phase students only. All other M.D. students have usual classes and clinical activities. No classes or clinical activities for master's and doctoral degree programs (other than the MD). / Monday 5 September

Fall break for most master's and doctoral programs (other than M.D.), except Master of Public Health and Master of Genetic Counseling (2nd year only) / Thursday 13 October–Sunday 16

October Wellness Days for 1st-year M.D. students / Saturday 15 October–Tuesday 18 October

Thanksgiving holiday for master's and doctoral programs (other than M.D.) / Saturday 19 November–Sunday 27 November

Thanksgiving holiday for all M.D. students / Thursday 24 November–Sunday 27 November

Fall classes end for most master's and doctoral programs (other than M.D.) / Thursday 8 December

Final exams end for most master's and doctoral programs (other than M.D.) / Saturday 17 December

Classes/clinicals end for all M.D. students / Friday 16 December

School of Medicine

VUSM Administrative offices closed / Friday 23 December 2022–Tuesday 3 January 2023

SPRING SEMESTER 2023**

Classes begin for all M.D. students / Tuesday 3 January

Spring semester begins for most master's and doctoral programs (other than M.D.) / Monday 9 January

Martin Luther King Jr. Day—No class or clinical activities / Monday 16 January

Spring break for master's and doctoral programs (other than M.D.) / Saturday 11 March–Sunday 19 March, except Master of Public Health.

Spring break for 1st- and 2nd-year M.D. students / Saturday 22 April–Sunday 30 April

Spring classes end for most master's and doctoral programs (other than M.D.) / Monday 24 April Class/clinical ends for 4th-year M.D. students / Friday 28 April

Final exams end for most master's and doctoral programs (other than M.D.) / Thursday 4 May Commencement / Friday 12 May

SUMMER SESSION 2023**

May session begins for master's and doctoral programs (other than M.D.) and summer session begins for Master of Genetic Counseling and Master of Public Health / Monday 8 May

Memorial Day—No class or clinical activities / Monday 29 May

May session ends for master's and doctoral programs (other than M.D.) / Saturday 3 June

Full summer session begins for most master's and doctoral programs (other than M.D.) / Tuesday 6 June

Independence Day—No class or clinical activities for VUSM professional degree Programs / Tuesday 4 July

Summer break for 1st-year M.D. students (Tentative) / Saturday 22 July–Sunday 20 August

Full summer session ends for master's and doctoral programs (other than M.D.) / Friday 11 August

*All dates are subject to change

** Programs other than the MD, check program calendars for exact class dates.

School of Medicine

Additional information about the Vanderbilt University School of Medicine faculty, staff, and programs may be found on the web at medschool.vanderbilt.edu.

Vanderbilt University School of Medicine Policy: Academic Policies for the School of Medicine: VUSM Attendance

Programs may require attendance at some or all activities. Such requirements are communicated to students in program documentation (e.g., this catalog, course syllabi, etc.). Also provided are requirements and procedures to request approval for and document absences, policies regarding maximum allowed absences, and requirements for making up learning activities/course work missed during absences.

A School of Medicine program may take appropriate administrative action in response to unexplained or unexcused student absence. For example, students may be placed on leave of absence or on temporary suspension.

The Academic Policies for All School of Medicine Programs were reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Vanderbilt University School of Medicine Policy: Academic Policies for the School of Medicine: VUSM Commencement

The university holds its annual Commencement ceremony following the spring semester. Degree candidates must have completed successfully all curriculum requirements and have passed all prescribed examinations by the published deadlines to be allowed to participate in the ceremony. A student completing degree requirements in a summer or fall semester may participate in Commencement the following May, and ordinarily the degree is conferred at the end of the term in which requirements are completed. Any student unable to participate in a Commencement ceremony receives his or her diploma by mail.

The Academic Policies for All School of Medicine Programs were reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Vanderbilt University School of Medicine Policy: Academic Policies for the School of Medicine: VUSM Degree Requirements

Students must successfully complete all applicable requirements in order to earn a degree from a VUSM program. All degree requirements must be completed within the maximum time allowed by the respective degree. Exceptions to the maximum allowable time-to-degree may be considered by the senior associate dean for health sciences education. Programs may require students to successfully complete examinations conducted by entities other than Vanderbilt University School of Medicine in order to graduate. Students who are not in good academic standing are not eligible to receive a degree. Also, Vanderbilt University requires that all balances due on student accounts be paid before a degree will be conferred and/or verified.

Toward the end of each student's study as part of a VUSM degree program, his/her academic record is audited by the VUSM Office of Student Records to ensure compliance with all degree requirements. Students who have met degree requirements are recommended to the dean for conferral of diplomas by the VUSM Executive Committee of the Executive Faculty each spring.

Each School of Medicine degree program establishes its degree requirements, within the parameters and requirements established by Vanderbilt University. Programs may require students to pass qualifying or other examinations specific to the field of study as a requirement for graduation, whether administered by Vanderbilt University or another institution. Students enrolled at Vanderbilt University School of Medicine must complete required course work at VUSM or a VUSM affiliate institution, unless otherwise explicitly indicated. Students must

School of Medicine

complete program requirements within the maximum amount of time allowed to complete the degree.

The Academic Policies for All School of Medicine Programs were reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Vanderbilt University School of Medicine Policy: Academic Policies for the School of Medicine: VUSM Disclosure of Offenses Post-Background Check Completion

A criminal background check is required of all students prior to matriculation. In addition, currently enrolled students are required to immediately report to the associate dean for undergraduate medical education and the associate dean for medical student affairs (MD Program) or their program director and the assistant dean for health sciences education (other VUSM degree programs) any arrest, criminal charge, or conviction occurring after their background checks have been completed. Required disclosure also includes, but is not limited to, allegations, investigations, and/or disciplinary action from any licensing board.

Vanderbilt University School of Medicine Policy: Academic Policies for the School of Medicine: VUSM Enrollment, Course Registration, and Student Status

Enrollment Requirements

All VUSM students (including special students) are required to have been admitted to a program and enrolled at Vanderbilt University in order to register for and take VUSM courses. All full-time students must register each term with no breaks in registration to remain in good standing, except in cases of approved leave of absence. Students who fail to enroll for course work in a term in which leave of absence has not been approved are considered withdrawn and must apply for readmission.

Students pursuing dual degrees are designated with primary enrollment in one degree or the other during each registration period. This may affect program scholarships, so students should be aware of such ramifications prior to pursuing a dual degree.

Academic Load and Credit Hours

The M.D. degree program is considered to be a full-time program and as such all students enrolled in that degree are classified as full-time students and are expected to adhere to the expectations of full-time students. For programs other than the M.D., the academic load for full-time status in the fall and spring semesters is 8 or more hours. A student who wishes to carry more than 16 hours must secure authorization from the degree program director before registration. Three-quarter-time status is 6 to 7 hours; half-time status is 4 to 5 hours. The summer full-time load is 6 or more hours; three-quarter-time load is 5 hours, and half-time load is 3 to 4 hours. Eligibility for most federal financial assistance requires a minimum of half-time enrollment.

Credit hours are semester hours (e.g., a three-hour course carries credit of 3 semester hours). One semester credit hour represents at least three hours of academic work per week, on average, for one semester. Academic work includes, but is not necessarily limited to, lectures, laboratory work, homework, research, class readings, independent study, internships, practica, studio work, recitals, practicing, rehearsing, and recitations. Some Vanderbilt courses may have requirements that exceed this definition.

Course Registration

Students register for courses using the Vanderbilt University enrollment/registration system, called YES (Your Enrollment Services), at yes.vanderbilt.edu unless individual programs or courses indicate otherwise. Course work must be completed during the term in which the student is registered, unless a student receives a grade of Incomplete for the course.

Changes in Registration

Changes to term-long courses are allowed only within the change period (the first ten days of the term). A student may formally withdraw from a course after the end of the change period with the permission of the faculty member, and a grade of W is given. Withdrawals from courses that do not run the full term are allowed until the mid-point of the course, and a grade of W is given. After the mid-point of the term, a student is not permitted to withdraw from the course except in rare instances of extenuating circumstances and with approval

School of Medicine

of the program director. Students should also be aware of financial ramifications of dropping a course after the change period.

Auditing a Course

Auditing is allowed in some programs, but not all. Program-specific sections in this catalog provide more information about whether a specific program allows courses to be audited.

In programs where auditing is allowed, a request must be submitted to and approved by both the program director and course instructor. Only students otherwise registered for regular, credit-bearing courses are allowed to audit a course. Students who audit are expected to attend class regularly. The number of courses that a student is allowed to audit during a given term may be limited by the program director. Audits are recorded on the student's transcript. A grade of AW is entered onto a transcript when a student withdraws from an audited course after the change period (the first ten days of the term).

Special Students

Some, but not all, School of Medicine programs admit special, non-degree-seeking students. School of Medicine programs are not required to admit special students. Information about the special student policies of individual programs is available in the relevant degree program section of this catalog.

Special students admitted as non-degree-seeking students may register for selected courses. Students seeking special student status must submit an application to the program offering the course. Approval of the instructor and the program administration is required to take the course. Special students may be required by the program to meet the same admission requirements as the program's degree-seeking students. Registration for individual classes is contingent upon availability of space in the course.

Credit for Course Work Completed Away

School of Medicine degree programs may allow students to obtain Vanderbilt University credit for learning experiences completed at other institutions. An affiliation agreement must be signed and in place prior to any domestic or international learning experience, in order to obtain credit for such work. Vanderbilt University School of Medicine has endorsed the Association of American Medical College's Uniform Clinical Training Agreement (UCTA) that was endorsed by the Liaison Committee on Medical Education. As a participant on the UCTA registry, Vanderbilt requires only an implementation letter for any school that has also adopted the UCTA, regardless of the degree program in which the student is enrolled. For information about whether or not VUSM maintains an executed affiliation with a specific institution, please contact the VUSM Office of Enrollment Services.

Transfer Credit

Only those courses for which a student has received a grade of B (or its equivalent) or higher are considered for incoming credit transfer. Refer to the appropriate program section of this catalog for information about the number of transfer credit hours that may be applied toward degree graduation requirements.

Applicants must notify degree program directors, prior to admission, if they intend to petition for transfer credit. Transfer credit is approved at the discretion of the associate dean for undergraduate medical education (MD Program) or degree program director (other VUSM degree programs) and then endorsed and processed by the director of student records for the School of Medicine. Credit is not given for courses taken in the Vanderbilt University Division of Unclassified Studies.

Credit for Courses Taken as an Undergraduate

Students may not receive credit for course work taken prior to beginning a VUSM degree program if the course credit was used to satisfy requirements of a previous degree. Students wishing to transfer in graduate-level credit for previously completed course work must make such a request prior to admission to the program (see Transfer Credit above).

Leave of Absence

Students who wish to interrupt their study must request a leave of absence in writing from the associate dean for medical student affairs (M.D. program) or the program director (other VUSM degree programs). The

School of Medicine

dean/program director provides the student a written decision regarding the request. A one-time leave of absence may be granted for a maximum of one year for students seeking a master's or doctoral degree. On rare occasions a second leave of absence for a period of up to a year may be allowed for doctoral students and Master of Science in Clinical Investigation students.

Students taking a leave of absence are responsible for meeting with the associate dean for medical student affairs (M.D. program) or the program director (other VUSM degree programs) prior to the leave in order to plan for their course work and timeline for successful degree completion following their return. Students who do not register for classes taking place in the term following the end of a leave of absence will be disenrolled and required to request reinstatement to the program. All programs have limits to the time within which all degree requirements must be completed, and it is the student's responsibility to be aware of these limits. Students are advised to consult the appropriate degree program section of this catalog for more information. Students should also discuss with VUSM Office of Enrollment Services and VU Office of Student Accounts staff the financial implications (i.e., tuition/fee charges and financial aid) of taking a leave of absence before moving forward with the process.

Withdrawal from the University

Students who wish to withdraw from the university for any reason must do so in writing to the associate dean for medical student affairs (M.D. program) or the program director (other VUSM degree programs). In some cases, the student may be able to receive a refund of tuition, (more tuition refund information is found at vanderbilt.edu/stuaccts/graduate/withdrawal-schedule.php) but it is important that the student discuss this decision with VUSM Office of Enrollment Services staff before moving forward with the process. A student who has been dismissed from school, but decides to appeal the decision, is no longer able to choose to withdraw. If a student withdraws, reentry is possible only through the application process.

The Academic Policies for All School of Medicine Programs were reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Vanderbilt University School of Medicine Policy: Academic Policies for the School of Medicine: VUSM Program Evaluation

Note: The term "evaluation" is used to refer to the measurement of effectiveness of School of Medicine programs, not individual student performance. Focuses of evaluation in this context may include the curriculum (courses and other learning activities), as well as faculty and administrators.

The purpose of evaluation at Vanderbilt University School of Medicine is to provide timely information that can be used to determine the effectiveness of programs' curricula and teaching and, ultimately, to determine whether programs are accomplishing their goals. Therefore, program evaluation supports continuous improvement of all program components. All VUSM students, faculty members, and staff members have a role in identifying needs and implementing strategies for improvement. For that reason, VUSM students may be required by degree programs to complete curriculum, program, and/or faculty/administrator evaluations.

Program evaluations examine the impact of overall curriculum and the interaction of its components and the learning environment on student learning. At VUSM, program evaluation activities include, but are not limited to:

- Course evaluations
- Rotation evaluations
- Overall program evaluations
- Faculty and administrator evaluations
- Data from student assessments (e.g., student course passage rates, rates of board exam passage, etc.)

Each VUSM program establishes its own evaluation strategy and methodologies. Various evaluation administration tools are used by different programs. More information about a specific program's evaluation strategies and tools may be found in program materials in this catalog, as well as elsewhere online. Data collected for evaluation purposes by all VUSM programs must be stored securely, and the privacy of those involved in evaluation protected appropriately and in accordance with relevant laws and regulations.

School of Medicine

The Academic Policies for All School of Medicine Programs were reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Vanderbilt University School of Medicine Policy: Academic Policies for the School of Medicine: VUSM Student Assessment and Grading

Grading Policies

The Doctor of Medicine program uses a grading scale different from that of the other VUSM professional degree programs. Details of the M.D. program grading scale are presented in the M.D. program section of this catalog.

For VUSM professional degree programs other than the M.D.:

Grade = Quality Points Per Hour

A+ = 4.0

A = 4.0

A- = 3.7

B+ = 3.3

B = 3.0

B- = 2.7

C+ = 2.3

C = 2.0

C- = 1.7 (No earned hours. Quality hours and quality points only.)

F = No credit

Degree programs may choose not to use plus or minus letter grades. For any assignment, project, or activity, the course director retains discretion over the specific requirements and expectations which comprise the final letter grade.

Course work approved for transfer into a degree program carries earned hours, but not quality hours. Therefore, those courses are not computed in the grade point average.

Pass/Fail Grading

Some courses may be designated as pass/fail. The grades for these courses are not calculated into the GPA unless the final grade is F. Degree-seeking students may not elect to take a graded course as pass/fail. Non-degree-seeking students may be allowed by a program to elect to take a course pass/fail.

Incomplete

The grade I (Incomplete) may be used at the discretion of the instructor in those cases in which the student is not able to complete course work in the normal time. An I that is not replaced by a letter grade within one year may be changed to an F at the discretion of the instructor.

In Progress

The grade IP (In Progress) may be used at the discretion of the instructor as a temporary grade in those cases in which insufficient information is available to assign a final grade. The IP ultimately is replaced by a final, permanent grade.

School of Medicine

Withdrawn

The grade of W is entered onto the transcript when a student withdraws from a course (or from the degree program) after the close of the change period (the first ten days of the term) but before the end of the term.

Grade Change Policy

A grade recorded in the University Registrar's Office (on a transcript) may be changed only upon the written request of the instructor. Grade changes requested for reasons *other than* transcription or computational error are subject to review and written approval by the program director (or equivalent position) of the program in which the course is based. After review by the program director, a request for change of grade is submitted to the Director of Medical Student Records and recorded in the student's record accordingly.

Grade Grievance Procedure

Students should seek redress of a problem with a grade as soon as possible after receiving the grade and in no case later than four weeks after the grade is recorded. Students with a problem should confer directly with the course director. Every effort should be made to resolve the problem fairly and promptly at this level. If the student cannot resolve the problem through discussion with the course director, the student should request an appeal by writing (email is acceptable) the designated official for the student's program. Please refer to the appropriate program section of this catalog for more information.

The Academic Policies for All School of Medicine Programs were reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Vanderbilt University School of Medicine Policy: Academic Policies for the School of Medicine: VUSM Student Compliance Requirements

All Vanderbilt University School of Medicine students are required to be in compliance with the rules and regulations that govern professional student education. In order to attain and/or maintain this compliance, students must provide information or complete compliance activities at various times throughout their VUSM careers.

Students are contacted at appropriate intervals to make them aware of their responsibilities to meet these requirements and to notify them about the process for doing so. Specific requirements vary by degree program; more information about compliance requirements for each degree program are available from the program. Failure to complete the requirement by the stated deadlines results in the student's removal from educational activities.

The Academic Policies for All School of Medicine Programs were reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Vanderbilt University School of Medicine Policy: Academic Policies for the School of Medicine: VUSM Student Contact Information

The School of Medicine may need to reach students during their educational careers for any number of reasons, so students are required to maintain current contact information through YES, including mailing address, and phone contact information. Each student should provide two phone numbers: 1) his/her personal cell phone, and 2) a cell or landline phone of a family member contact for cases of emergency. Students are expected to update this information immediately when changes occur by logging in to YES (Your Enrollment Services) at yes.vanderbilt.edu and clicking on the Personal Information link. Vanderbilt University and the School of Medicine use the student's official university email account for all communications. Students are expected to check their Vanderbilt University email account on at least a daily basis. Students who are unable to check their email daily (e.g., if taking approved absence) are expected to use out-of-office notifications during the time they will not be checking email daily.

The Academic Policies for All School of Medicine Programs were reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

School of Medicine

Vanderbilt University School of Medicine Policy: Academic Policies for the School of Medicine: VUSM Student Progress and Promotion

Academic Progress and Promotion

School of Medicine degree program students are expected to progress academically through the program at a pace that ensures that students attain current and relevant professional knowledge, skills and attitudes. Students are expected to maintain satisfactory academic progress at all times. Each program establishes the normal time and maximum time allowed to progress through the program and complete the degree. Since grades are a significant element in determination of satisfactory academic progress, it is the student's responsibility to be aware of the minimum satisfactory grade level required for courses to be applied toward degree requirements. In addition, students are responsible for understanding experiential learning (clinical rotations, practica, etc.) requirements and minimum standards of performance (including semester GPA and cumulative GPA) required to maintain satisfactory academic progress in order to remain in good academic standing. (See each program's degree requirements and academic policies in the relevant degree program section of this catalog.)

Each student's progress is evaluated at least annually by an academic progress review committee. Committee name, size and membership varies by program, but all operate under the supervision of the School of Medicine and the policies contained in this catalog. Committees are populated by faculty members well versed in the program's degree requirements and in acceptable academic standards and performance for the program and its related profession.

Academic progress review committees review students' progress and may make the following determinations at each scheduled meeting:

- Satisfactory academic progress (Good standing and promotion)
- Satisfactory academic progress with concern/remediation (Good standing and promotion [or contingency for promotion])
- Academic probation unsatisfactory progress (Not in good standing—remediation required; promotion [or contingency for promotion])
- Dismissal (after failing to successfully remediate)

Students are notified in writing of the committee's determination if academic progress is deemed to be unsatisfactory. Degree programs' student support and advisory systems work with committees to facilitate the best possible outcome for all students.

For programs other than the M.D., a cumulative grade point average of at least 3.0 is required for graduation. A student should maintain a semester GPA of at least 3.0 to remain in good academic standing. A student whose cumulative GPA falls below 3.0 may be placed on probation for one semester. If at the end of the semester the grade point average is still below 3.0, the student may be dismissed from the program based on unsatisfactory academic performance. Students may withdraw in lieu of dismissal.

Repeating a Course

Students may be required to repeat a course after having received a grade below the level deemed acceptable for graduation credit by the degree program. In rare instances, in some programs, students may make a request of the program director to re-take a course if doing so would significantly benefit the student's academic performance and progress. Both courses are reflected on the transcript, but the second grade earned is the one used in computing the student's grade point average. Students should refer to their program policies for more information about whether the option to retake courses is available in the program.

Probation

Students placed on probation are notified through a letter from the associate dean for undergraduate medical education (M.D. program) or the program director (other VUSM degree programs) and/or the academic progress review committee that outlines the reasons for the probation; the requirements and recommendations for addressing deficiencies; the conditions for removal of probation, including an expected time frame; and actions that are taken if conditions are not met. Students placed on probation for any reason are required to complete a specific remediation plan that has been developed by the associate dean for undergraduate medical education

School of Medicine

(M.D. program) or the program director (other VUSM degree programs) in consultation with the academic progress review committee. The remediation plan may include requirements placed on the student, such as regular meetings with faculty/advisers, elimination of extracurricular activities that may be interfering with satisfactory academic progress, etc.

All students on probation will be reviewed by the academic progress review committee at least once each term to determine the student's academic progress. At that time, the academic progress review committee may take the following actions:

1. Remove probation: Probation may be removed if the student has satisfactorily addressed deficiencies, even if this is before the time frame originally designated in the student's probation notification letter.
2. Continue probation: Progress is being made.
3. Recommend dismissal: Performance continues to be unsatisfactory.

Written notification is provided to the student regarding the outcome of this review.

Probation is considered an adverse action and may be reported in future graduation verifications and other requests for information. More information about how programs may report probation information is contained in the program-specific sections of this catalog, as well as in program information elsewhere online.

Appeal of Probation/Non-promotion

Students may request reconsideration of any decision for probation or non-promotion. The request must be made in writing within seven calendar days of receiving the decision from the program's academic progress review committee. Requests must be made to the associate dean for medical student affairs (M.D. program) or the program director (other VUSM degree programs). The student may meet with or present any additional information in writing to the senior associate dean for health sciences education, who reviews the information presented by the student, the degree program director, and the deliberations of the academic progress review committee. The SADHSE makes a determination to: 1) uphold the decision, 2) reverse the decision, or 3) request that the academic progress review committee meet for reconsideration of additional information. The SADHSE notifies the student, the degree program director and the academic progress review committee in writing of his or her decision. In the case of a reversal, the SADHSE may require that the student follow requirements and/or recommendations of the academic progress review committee for addressing deficiencies.

Dismissal

Academic progress review committees will recommend dismissal for unsatisfactory academic progress only after a student has been given a reasonable probationary period (at least one term) to address deficiencies.

Dismissal may also be recommended at any time a student demonstrates a singular egregious behavior; involvement in one or more serious incidents inconsistent with the expectations for students at VUSM; violation of Vanderbilt University policy or that of VUSM educational/clinical affiliate institutions; or demonstrating a pattern of unprofessional behavior. In such cases, the associate dean for medical student affairs and/or the associate dean for undergraduate medical education (M.D. program) or the program director (other VUSM degree programs) and the academic progress review committee consider the situation, including its severity, as quickly as possible and render a recommendation to the School of Medicine dean or the dean's designee.

A decision to recommend dismissal requires participation of all academic progress review committee members, unless an exception is granted by the SADHSE. The committee will meet as soon as possible to consider the situation, including its severity, and render a recommendation. The student may meet with the associate dean for medical student affairs (M.D. program) or the program director (other VUSM degree programs) prior to any academic progress review committee meeting to present an explanation, including any mitigating circumstances. The associate dean for medical student affairs (M.D. program) or the program director (other VUSM degree programs) presents the student's explanation, as well as any mitigating circumstances, to the academic progress review committee. Alternately, the student may elect to appear before the academic progress review committee in person or to submit in writing his or her explanation and any other information to be considered by the academic progress review committee. A student may also ask a non-committee faculty member to offer information on behalf of him or her at the meeting.

School of Medicine

If a recommendation for dismissal is made by the academic progress review committee, the associate dean for undergraduate medical education (M.D. program) or the program director (other VUSM degree programs) presents this recommendation to the dean or the dean's designee, which is normally the senior associate dean for health sciences education (SADHSE). The dean (or designee) takes into consideration any mitigating factors presented in writing by the student. The dean or designee shares his or her decision in writing (accepts dismissal or rejects dismissal) with the program's academic progress review committee. The dean or designee may reverse the recommendation, if he or she disagrees with the decision. If the dismissal decision is reversed, the academic progress review committee then considers whether probation or other action is appropriate under the guidelines above (see Probation).

If the dean/SADHSE affirms the recommendation of dismissal, the decision is described in a notice to the student written by the academic review committee chair, along with the associate dean for undergraduate medical education (M.D. program) or the program director (other VUSM degree programs). This notification is presented to the student, in person whenever possible, by the associate dean for medical student affairs or associate dean for undergraduate medical education (M.D. program) or the program director (other VUSM degree programs). If the student is unable or unwilling to meet regarding the dismissal decision, the student is informed of the decision in writing by secure file transfer notification sent to the student's Vanderbilt University email account. If the school cannot confirm receipt of the electronic notification, a hard copy is mailed to the student's local address, as listed in YES. The window of time for the student to communicate his or her choice from the options listed below starts on the date the email notice is sent.

In this notification the dismissal decision and the following options are presented, in writing, to the student:

1. Voluntary withdrawal from VUSM. The decision to withdraw must be presented in writing by the student to the associate dean for medical student affairs (M.D. program) or the program director (other VUSM degree programs) within seven (7) calendar days of the date the dismissal notification email was sent to the student.
2. If the student does not request to withdraw within the seven (7)-calendar-day window, the dismissal takes effect on the eighth calendar day.
3. The student may appeal the dismissal. (See Appeal of Dismissal.) A student who requests an appeal forfeits the option to withdraw. In addition, the student is placed on administrative leave and may not participate in patient care duties until the appeal is resolved.

Appeal of Dismissal

A student who decides to appeal a decision of dismissal must submit a written request to the associate dean for medical student affairs (M.D. program) or the assistant dean for health sciences education (other VUSM degree programs) within seven (7) calendar days of the date the dismissal notification email was sent to the student. The associate dean for medical student affairs (M.D. program) or the assistant dean for health sciences education (other VUSM degree programs) informs the SADHSE and the associate dean for undergraduate medical education (M.D. program) or the relevant program director (other VUSM degree programs) of the student's request for appeal.

If a dismissal decision is appealed, the student is placed on administrative leave and may not participate in patient care duties until the appeal is resolved. The dean or dean's designee, usually the SADHSE, assembles and convenes a review panel consisting of at least five (5) members of the School of Medicine Executive Committee of the Executive Faculty (from among them a chair is designated) for a hearing within thirty (30) calendar days of receipt of the written request from the student, unless the chair of the review panel determines that there are valid reasons to extend this time frame. In this review, the role of the dean or dean's designee is purely administrative, and he or she has no decision-making authority in this context.

In preparation for the review, the associate dean for undergraduate medical education (M.D. program) or the program director (other VUSM degree programs) makes available any relevant information/documentation for the panel's review. The associate dean for medical student affairs (M.D. program) or the assistant dean for health sciences education (other VUSM degree programs) provides the student information about the appeal process. The student may choose to be present at the appeal review meeting and/or to make a presentation in

School of Medicine

writing. Information presented by the student may contain documentation from other students, faculty members, and/or other sources.

The student is not allowed to have other representatives at the review. The chair of the degree program's academic progress review committee attends the review to present the findings of the progress review committee. In the case of the M.D. program, the associate dean of undergraduate medical education also attends, and the associate dean for medical student affairs attends the meeting to answer questions from the review panel. The review meeting is conducted without the presence of attorneys for either party. However, either party may consult with its own counsel prior to the review meeting or during any breaks that might take place during the meeting.

If the review panel upholds the decision, the student is dismissed without the opportunity to withdraw. If the review panel reverses the decision, the review panel provides the program's academic progress review committee with its written findings and refers to that committee for consideration of whether probation is appropriate for the student and, if so, determination of conditions that would accompany probation. The decision of the review panel is final for the school.

Temporary Suspension

The School of Medicine reserves the right, through the SADHSE (or designee), to temporarily suspend a student for conduct disrupting or negatively impacting the learning environment, pending the student's referral to the degree program's academic progress review committee. The SADHSE notifies the student in writing of the conditions of the temporary suspension. If the student is reinstated, the student works with the associate dean for medical student affairs (M.D. program) or the program director (other VUSM degree programs) to address any course work missed during the suspension.

The Academic Policies for All School of Medicine Programs were reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Vanderbilt University School of Medicine Policy: Academic Policies for the School of Medicine: VUSM Student Work/Extracurricular Activities

Student Duty Hours

In order to encourage a well-rounded, balanced journey through training, it is the policy of Vanderbilt University School of Medicine that duty hours of students should reflect the general guidelines set forth by nationally recognized accreditation organizations relevant to specific degree programs. Details regarding each program's expectations for student duty hours are included in the program-specific sections of this catalog.

Extracurricular Work or Activities

The School of Medicine does not regulate the outside work or activities of its students, although it does take the firm position of discouraging outside work. Outside commitments assumed by School of Medicine students must not

compromise their responsibilities.

Students may not be paid for work performed as part of their elective or required course work for credit.

Exceptions to this rule are made only when students are in special programs, such as students on military scholarships, students in funded graduate certificate programs, students in funded M.D./Ph.D. programs, students in the MIDP program completing certain industry internships, and students in the Oral Surgery program when acting as residents.

The Academic Policies for All School of Medicine Programs were reviewed and approved by the Executive Faculty

School of Medicine

of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Vanderbilt University School of Medicine Policy: Academic Policies for the School of Medicine: VUSM Transportation

During their School of Medicine careers, students may be placed for educational experiences in sites located a distance from the Vanderbilt University campus. Students are responsible for their own transportation to and from all sites for educational experiences, including all costs associated with that travel. Each VUSM program establishes the maximum distance from the Vanderbilt University campus that students may be required to travel in a single day to reach off-site placements. Students are advised to contact their respective programs for additional information.

The Academic Policies for All School of Medicine Programs were reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Vanderbilt University School of Medicine Policy: Admission to the School of Medicine: VUSM Requirement for Background Investigation

A criminal background check is required of all students prior to matriculation. Upon notification of admission to a VUSM degree program, the student is provided information about how to complete the criminal background investigation. Program leadership reviews all items flagged on criminal background reports and may consult the ad hoc VUSM Criminal Background Check Committee for advice on any report. While individuals with flagged background reports are not automatically disqualified from enrollment in VUSM degree programs, Vanderbilt University and the School of Medicine reserve the right to withdraw an offer of admission to any individual with one or more disqualifying events on a criminal background report.

The Admission to School of Medicine Programs policies were reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Vanderbilt University School of Medicine Policy: Admission to the School of Medicine: VUSM Requirements for Baccalaureate Degree

Consistent with Vanderbilt University policy governing professional degree programs, all VUSM degree program students are required to have been awarded the baccalaureate degree from an accredited institution prior to matriculation.

Admitted students are required to provide official documentation of the baccalaureate degree prior to matriculation to all VUSM degree programs. Instructions for submitting documentation of the baccalaureate degree are available in the relevant degree program section of this catalog. Additional information about degree verifications may also be found on the Vanderbilt University Registrar website.

The Admission to School of Medicine Programs policies were reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Vanderbilt University School of Medicine Policy: Admission to the School of Medicine: VUSM School Policy on International Students

School of Medicine degree programs may admit international students, but only programs with proper U.S. Department of Homeland Security approval may do so. To determine whether or not a particular VUSM degree program admits international students, please refer to the individual program section of this catalog.

An individual who possesses a United States Permanent Resident Card (a.k.a., a Green Card) is eligible to apply to all VUSM degree programs.

School of Medicine

The Admission to School of Medicine Programs policies were reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Vanderbilt University School of Medicine Policy: Admission to the School of Medicine: VUSM School Policy on Language Proficiency

Vanderbilt University School of Medicine requires its students to be proficient in the English language, both written and spoken. VUSM programs may establish admission requirements based on English-language proficiency, such as minimum TOEFL scores. Admission policies for individual programs are available in the relevant degree program sections of this catalog.

The Admission to School of Medicine Programs policies were reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Vanderbilt University School of Medicine Policy: Admission to the School of Medicine: VUSM School Policy on Transfer Students

School of Medicine degree programs may admit transfer students, but not all programs do. To determine whether or not a particular VUSM degree program admits transfer students, please refer to the individual program section of this catalog. Policies regarding review of incoming transfer credits are contained in the VUSM academic policy section of this catalog.

The Admission to School of Medicine Programs policies were reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Vanderbilt University School of Medicine Policy: Admission to the School of Medicine: VUSM School Policy on Visiting Students

School of Medicine degree programs may offer learning opportunities to visiting students from other institutions, but not all programs do. For more information about whether or not a particular VUSM degree program allows visiting students (and any application/admission requirements), please refer to the individual program section of this catalog.

An affiliation agreement must be signed and in place before any domestic or international visiting student may enroll to study at Vanderbilt University. Vanderbilt University School of Medicine has signed on to the AAMC Uniform Clinical Training Agreement (UCTA) that was endorsed by the Liaison Committee on Medical Education. As a participant in this medical school registry, Vanderbilt requires only an implementation letter for any school that has signed on to the UCTA, regardless of the degree program in which the student is enrolled.

The Admission to School of Medicine Programs policies were reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Vanderbilt University School of Medicine Policy: Admission to the School of Medicine: VUSM Technical Standards

All candidates for admission must possess sufficient intelligence, integrity, and personal and emotional characteristics with or without reasonable accommodation to meet the academic requirements of the respective School of Medicine program without fundamental alteration in the nature of the program. Requests for disability-related reasonable accommodation should be made to Vanderbilt University Student Access Services (SAS). The senior associate dean for health sciences education, the admission committee for the applicable degree program, and Vanderbilt University SAS are responsible for interpreting these technical standards as they may apply to an individual applicant to a School of Medicine program, as well as to any enrolled student. In addition, the School of Medicine interprets and implements these standards consistently with any applicable federal and state law.

School of Medicine

Each VUSM degree program may enunciate more detailed Technical Standards specific to that degree program.

Program-specific standards may be found in the relevant degree program section of this catalog.

The Admission to School of Medicine Programs policies were reviewed and approved by the Executive Faculty of the Vanderbilt University School of Medicine Committee on June 17, 2020.

Vanderbilt University School of Medicine Standing Committees

Executive Faculty of the Vanderbilt University School of Medicine

The Executive Faculty reviews, on a regular basis, the work of the Undergraduate Medical Education Accreditation Standards Committee, in order to monitor School of Medicine compliance with all LCME standards and elements. The Executive Faculty also provides advice and counsel on the formulation of major policies that pertain to LCME compliance.

The Executive Faculty meets monthly during the academic year. The Executive Faculty may additionally meet whenever requested by the dean of the School of Medicine or a majority of the Executive Faculty.

The Executive Faculty of the School of Medicine consists of the dean of the School of Medicine, the chairs of all VUSM clinical and basic sciences departments (except those in the Section of Surgical Sciences), and those center directors in the School of Medicine who report directly to the dean. Voting members from the Section of Surgical Sciences are the chair of the Section and the chair of one of its departments. Ex officio members without voting rights include School of Medicine senior associate deans, associate deans, and Vanderbilt University Medical Center (VUMC) hospital directors. At the discretion of the dean, other non-voting individuals may be invited to attend Executive Faculty meetings when the agenda makes such attendance appropriate.

The dean of the School of Medicine presides at the meetings of the Executive Faculty. In the dean's absence a member of the Executive Faculty who is designated by the dean presides.

Executive Committee of the Executive Faculty

The dean appoints an Executive Committee of the Executive Faculty (ECEF) to facilitate the work of the Executive Faculty and to advise on matters requiring decisions. The ECEF possesses the full powers of the Executive Faculty and may act in its stead with full authority. The ECEF may initiate new policies or change previous policies established by the Executive Faculty in matters related to curriculum. Such decisions can be nullified or reversed by a two-thirds majority vote of the Executive Faculty.

The ECEF's roles include:

- The vetting and endorsement of School of Medicine faculty appointments and promotions to the senior ranks (associate professor and professor),
- Evaluation of appeals by department chairs following negative decisions by the Appointments and Promotions Committees of the School of Medicine,
- Evaluation of nominations for promotion of faculty to emeritus status, and
- Evaluation of proposals to transition faculty off of the tenure track.

In addition, the ECEF:

- Reviews the list of School of Medicine students who have met degree requirements and recommends them for degree conferral,
- Evaluates appeals of students who have been dismissed by degree-specific promotions and progress committees,
- Provides input on other matters related to academic policies of importance to the School of Medicine and Vanderbilt University Medical Center, and which require review and action outside the standing meetings

School of Medicine

of the Executive Faculty. The ECEF is advisory to the dean.

Members: Alice Coogan, James E. Crowe, Eric Hess, Seth Karp, Ege Kavalali, Borden Lacy, Ian Macara, Paul Sternberg, Adam Wright, Wei Zheng.

Faculty Appointments and Promotion Committee (FAPC) and Clinical Practice Appointment and Promotion Committee (CPAPC)

These committees, appointed by the dean, are responsible for consideration of faculty promotion in the School of Medicine and for examination of credentials of candidates for appointment to faculty positions.

FAPC Members: Gaelyn Garrett, Chair. Sean Collins, Eric Delpire, Cathy Eng, Reñe Gifford, Angela Jefferson, Neil Osheroff, S. Trent Rosenbloom, Jill Simmons, Christopher Wright.

Ex officio: Alyssa H. Hasty, John S. Penn, David S. Raiford.

CPAPC Members: Neal R. Patel, Chair. Rony A. Adam, Robert J. Deegan, Robert F. Miller, William M. Petrie, Kris P. Rehm.

Ex officio: John S. Penn, David S. Raiford.

Global Health Education Committee

The Global Health Education Committee (GHEC) supports the vision of the School of Medicine and the Vanderbilt University Medical Center to provide an array of global health education and training opportunities for VUSM and VUMC trainees while simultaneously enhancing the capacity of our partners in a collaborative effort to address global health challenges.

Donald Brady, Natasha Halasa, Julie Lankford, Marie Martin, Melinda New, and Kyla Terhune.

VUSM Tuition, Fees, and Financial Assistance: Costs and Fees

Costs and Fees AY 2022-23

The following costs are included with tuition: Professional liability insurance, student long-term disability insurance (pertains to M.D. students only), and verifications.

The university fees found at https://www.vanderbilt.edu/stuaccts/fees/tuition_fees_2022-23_medical.php.

and described below, are assessed individually and separate from tuition.

Student Services Fee

The university-required student services fee entitles students to use the facilities of Sarratt Student Center and the David Williams II Student Recreation and Wellness Center. The fee also covers admission to certain social and cultural events and subscriptions to certain campus publications. Specific information on this fee is published annually in [Vanderbilt University Student Handbook](#). By payment of an additional fee, students and their spouses may use their identification cards for admission to athletic events.

Professional Liability Insurance

School of Medicine students enrolled in programs that require clinical/patient care responsibilities are automatically covered with professional liability insurance, required of all enrolled students, at the time of registration. Details of the policy are available through [Vanderbilt University Insurance and Risk Management](#), and students are encouraged to familiarize themselves with these details and with their responsibilities in this regard.

Students are covered when they are completing required and elective learning activities related to their courses

Published 7/12/2022

School of Medicine

of study at the Vanderbilt-affiliated hospitals (e.g., Vanderbilt University Medical Center or Nashville Veterans Administration Hospital) or elsewhere as a “visiting student,” providing that (1) the clerkship or other educational experience has prior approval from the School of Medicine as course work for credit, (2) the activities within this experience are consonant with the student’s level of training and experience and are performed under the supervision of appropriate faculty and/or staff, and (3) an academic/clinical affiliation agreement has been executed by both Vanderbilt University and the host institution.

Long-Term Disability Insurance

M.D. students are automatically covered with long-term disability insurance, required of all enrolled medical students, at the time of registration. Details of the policy can be found at medschool.vanderbilt.edu/md-gateway/insurance/.

Student Health Insurance

All degree-seeking students registered at Vanderbilt for four (4) or more hours, or who are actively enrolled in research courses (including, but not limited to dissertation or thesis courses), are required to have adequate health insurance coverage. The University offers a sickness and accident insurance plan through Academic Health Plans that is designed to provide hospital, surgical, and major medical benefits. Students are automatically enrolled in and billed for the University-endorsed policy unless they complete an online waiver by the applicable deadline. Additional information is available at <https://vanderbilt.myahpcare.com/>.

Student Health Fee

This university-required fee provides enhanced support for VU areas serving the health needs of VU students, including the University Counseling Center, the Office of Student Health and the Office of Student Care Coordination.

Transcript Fee

All students entering Vanderbilt for the first time are charged a one-time transcript fee for official university transcripts, usually in the first semester of enrollment.

Verification Costs

Verification costs cover all required verification processes including criminal background checks and drug screens.

VUSM Tuition, Fees, and Financial Assistance: Financial Assistance

Approved educational expenses may be met with funds from a combination of sources, including scholarships (from VU and non-VU sources) and student loans. Federal Direct Unsubsidized Loans and Federal Direct Graduate PLUS loans are two federal government loan programs that furnish a significant amount of support to VUSM students.

Private loans are also available to international students. Additional information and applications for financial aid are online at medschool.vanderbilt.edu/financial-aid/. Applicants desiring more specific information about financial aid resources should contact the School of Medicine Office of Student Financial Aid. (medfinaid@vanderbilt.edu)

Federal Financial Aid Satisfactory Academic Progress

Federal Satisfactory Academic Progress standards (SAP) used to determine eligibility for federal student aid are separate from academic policies that the School of Medicine may require for degree completion. Students must be meeting SAP standards, as defined by the Office of Student Financial Aid and Scholarships, to remain eligible for federal Title IV student aid. The SAP policies for the School of Medicine are available at medschool.vanderbilt.edu/financial-aid/.

Financial Assistance for Dual Degree Students

Students pursuing two degree programs are typically classified as being enrolled in only one degree program each semester. Any scholarship funds awarded would be on the basis of the degree program in which the student was enrolled in a given term. Students do not receive scholarship funds for one degree program while enrolled in another VU degree program.

School of Medicine

VUSM Tuition, Fees, and Financial Assistance: University and School of Medicine Policies

Tuition and fees are set annually by the Vanderbilt University Board of Trust and are subject to review and change without notice.

Tuition and Fees

Tuition and fee amounts for each program are listed in the corresponding program section of this catalog. Tuition, fees, and all other university charges incurred prior to or at registration are due and payment must be received by August 31 for the fall semester and December 31 for the spring semester (January 31 for the M.D. program). If courses are added *after* the initial billing period, it is the student's responsibility to contact the VU Office of Student Accounts for due dates and amounts related to tuition in order to avoid any holds and/or late payment penalties. All other charges incurred after classes begin are due and payment must be received in full by the last business day of the month in which they are billed to the student. Additional information can be found at vanderbilt.edu/stuaccts.

Refund of Tuition

Students who withdraw officially or who are dismissed from the University for any reason, after the beginning of a term, may be entitled to a partial refund in accordance with University policy, published on the Office of Student Accounts website at vanderbilt.edu/stuaccts/graduate/withdrawal-schedule.php. No refund is made after the date indicated in the University withdrawal schedule published on the VU Office of Student Accounts website. Because MD students have a full-year enrollment term but are assessed tuition in two equal parts (July and January), the published schedule applies to attendance after the July 1 and January 1 assessments.

Late Payment of Tuition and Fees

All charges not paid by the specified due dates may be assessed a late payment fee of \$1.50 on each \$100 owed (minimum late fee of \$5). No transcript (official or unofficial) will be issued for a student who has an outstanding balance. Diplomas of graduating students will not be released until all indebtedness to the university is cleared.

Financial Clearance

Students may not be allowed to register for any term if they have outstanding unpaid balances for any previous term. No transcript, official or unofficial, is issued for a student who has an outstanding balance until the account has been paid. Diplomas of graduating students may be withheld until all bills are paid.

International students must provide documentation of having funds sufficient to meet all tuition, mandatory fees, and living expenses for the anticipated period of enrollment before a visa is issued. More information is available through the VU Office of International Student and Scholar Services.

Tuition Billing for Dual Degree Students

Students pursuing two degree programs are typically classified as being enrolled in only one degree program each semester. Tuition and fees are charged each term based on the degree program in which they are enrolled that semester.

Life at Vanderbilt

Accommodations for Students with Disabilities

Student Access provides accommodations to students with disability-related limitations. Common accommodations include, but are not limited to, extended time for testing, assistance with locating sign language interpreters, audio textbooks, physical adaptations, supplemental notes, and reading services. Students may also request accommodations related to housing, dining, and transportation. Accommodations are determined on an individual, case-by-case basis. Specific concerns pertaining to student accommodations or access on campus should be directed to the Office for Student Access (studentaccess@vanderbilt.edu) or by calling (615) 343-9727. For additional information please visit the Student Access website: vanderbilt.edu/student-access.

Bishop Joseph Johnson Black Cultural Center

The Bishop Joseph Johnson Black Cultural Center provides educational and cultural programming designed to highlight the history and cultural experiences of African Americans. Initially referred to as "the Afro House," in

School of Medicine

1984, the center was named in honor of the first African American student admitted to Vanderbilt University in 1953, Bishop Joseph Johnson (B.D. '54, Ph.D. '58). The BCC activities focus on providing student support and development, campus enrichment, and community engagement.

Student Support and Development (Inclusion)

One of the major aims of the BCC is student support and development. To accomplish this objective, the BCC offers student-driven programming, mentoring initiatives, organizational meeting spaces, service opportunities, and leadership skills training. The BCC also serves as a haven for students, with opportunities for informal fellowship with other students of all levels and backgrounds as well as with faculty and staff.

Campus Enrichment (Diversity)

With campus programming focused on Africans and African Americans, the BCC enriches the overall campus environment by promoting intercultural competence. Specifically, the BCC works with numerous campus partners to sponsor lectures, musical performances, art exhibitions, films, and discussions on African and African American history and culture.

Community Engagement (Equity)

Additionally, the BCC engages in community outreach and service by working with various civic and cultural groups in the Nashville area. Through community programs and by supporting students as they tutor and mentor young people from underserved areas in the city, the BCC advocates for social justice and equity on campus and in the larger community.

The BCC is located in the center of campus directly behind Buttrick Hall and across from the main campus mailroom. For more information, please call (615) 322-2524 or visit vanderbilt.edu/bcc.

David Williams II Recreation and Wellness Center

Vanderbilt's David Williams II Recreation and Wellness Center is a fully functioning facility for Vanderbilt students, faculty, and staff.

More than two-thirds of Vanderbilt students utilize program spaces such as fitness rooms, participate in club sports, intramurals, group fitness classes, and many more of the student program offerings. The variety of programs available for meeting students' diverse interests include over 30 club sports teams, and intramural sports such as softball, flag football, basketball, table tennis, and soccer.

The facility features a 289,000-square-foot layout that houses four full-sized courts for basketball, volleyball, and badminton; five racquetball and two squash courts; four-lane bowling alley; five group fitness classrooms; more than 14,000 square feet of weight and fitness room space; rock-climbing wall; seven multipurpose rooms; and an indoor field house featuring 120-yard turf field surrounded by a 300-meter track. The exterior surroundings include more than seven acres of field space, including three natural grass fields and one turf field.

There is a diverse selection of group fitness classes offered weekly, and a variety of wellness offerings that students can benefit from such as healthy eating through Vandy Cooks and personalized nutrition coaching.

If you are seeking outdoor adventure, you can create your own adventure trip with tips and gear from the outdoor rental center.

The Student Services fees support our facilities, fields, and programs (see Financial Information). Student spouses must also pay a fee to use the facilities.

School of Medicine

For additional information, please visit us at yu.edu/vandyrec.

Follett Higher Education at Vanderbilt

The Vanderbilt University Bookstore is operated by Follett Higher Education and is located at 2525 West End Avenue. This bookstore offers textbooks (new, used, digital, and rental), computers, supplies, dorm accessories, licensed Vanderbilt merchandise, and best-selling books.

The bookstore features extended hours of operation and hosts regular special events. Free customer parking is available in the 2525 garage directly behind the bookstore. For more information, visit bkstr.com/vanderbiltstore or call (615) 343-2665.

Inclusive Excellence

Diversity, inclusion, and community engagement are essential cornerstones of Vanderbilt's commitment to equity and trans-institutional discovery and learning. The Office for Inclusive Excellence has as its mission to work in partnership with members of the Office of the Provost and Vanderbilt colleges and schools to ensure that we advance the success and affirmation of all students and faculty. The Office for Inclusive Excellence oversees and establishes strategic initiatives to promote academic success, professional and cultural education, and inclusivity and belonging. Visit vanderbilt.edu/inclusive-excellence for more information.

International Student and Scholar Services

ISSS advises and supports international students and scholars attending Vanderbilt. Through advising appointments, workshops, and programming, ISSS facilitates the understanding of a student's non-immigrant status and what is needed to maintain it. ISSS is responsible for overseeing, monitoring, and reporting international student and scholar data through SEVIS to the Department of Homeland Security, along with staying abreast of immigration policy and regulations and reconciling student and government databases. The office works with campus partners to raise awareness throughout the Vanderbilt community of issues important to international students and scholars. Additionally, ISSS provides programming and person-centered advising to help students and scholars during their transition to Vanderbilt and throughout their time here. For additional information on ISSS services, visit vanderbilt.edu/issss.

Margaret Cuninggim Women's Center

The Margaret Cuninggim Women's Center leads co-curricular campus initiatives related to women's and gender issues. The center partners with many departments, programs, and individuals across campus to raise awareness about the ways in which gender shapes and is shaped by our lived experiences. Because its aim is to make the Vanderbilt community more inclusive and equitable, the center encourages all members of the Vanderbilt community to take part in its events and resources.

The Women's Center celebrates women and their accomplishments and fosters empowerment for people of all identities. The center offers education, support and advocacy around a variety of issues, including gender stereotyping, gender equity, leadership, parenting, body image, disordered eating, pregnancy and reproduction, sexual health, and more. The Women's Center is open Monday through Friday, 8:00 a.m. to 5:00 p.m. and is located at 2304D Vanderbilt Place, Franklin House. For more information, please call (615) 322-4843, email womenctr@vanderbilt.edu, or visit vanderbilt.edu/womenscenter.

Nondiscrimination, Anti-Harassment, Anti-Retaliation, and Sexual Misconduct

The Title IX Office (vanderbilt.edu/title-ix) and/or the Equal Opportunity and Access Office (vanderbilt.edu/eoa) investigate allegations of prohibited discrimination, harassment, and retaliation involving members of the Vanderbilt community. This includes allegations of sexual misconduct and other forms of power-based personal violence. Mary Roy is Vanderbilt's Title IX coordinator.

School of Medicine

If you believe that a member of the Vanderbilt community has engaged in prohibited discrimination, harassment, or retaliation, please contact the Equal Opportunity and Access Office. If the offense is criminal in nature, you may file a report with Vanderbilt University Police Department.

The Title IX Office also facilitates the provision of supportive measures and other accommodations for students affected by sexual misconduct and power-based personal violence. Some examples of these supportive measures are no contact orders, adjusted course schedules, and housing changes.

Specific concerns pertaining to prohibited discrimination, harassment, or retaliation should be directed to the Equal Opportunity and Access Office at (615) 343-9336. Allegations of sexual misconduct and other forms of power-based personal violence, should be directed to the Title IX Office at (615) 343-9004.

Office of LGBTQI Life

The Lesbian, Gay, Bisexual, Transgender, Queer, and Intersex (LGBTQI) Life office is a welcoming space for individuals of all identities and a resource for information and support about gender and sexuality. LGBTQI Life serves the entire Vanderbilt community through education, research, programming, support, and social events. The office also serves as a comfortable study and socializing space, as well as a connection point to the greater Nashville LGBTQIA+ community. In addition, LGBTQI Life conducts tailored trainings and consultations for the campus and community. The Office of LGBTQI Life is located in the K. C. Potter Center, Euclid House, 312 West Side Row. For more information, please visit vanderbilt.edu/lgbtqi.

Office of the University Chaplain and Religious Life

The Office of the University Chaplain and Religious Life provides opportunities to explore and practice religion, faith, and spirituality and to more deeply understand one's personal values and social responsibility via educational programming, encounters with various faith perspectives, and engagement with religious and spiritual communities. The office welcomes and serves all students, faculty, and staff and provides an intellectual home and ethical resource for anyone in the Vanderbilt community seeking to clarify, explore, and deepen understanding of their lives and/or faith.

Recognizing the importance of exploring one's faith in community, the office facilitates opportunities for individuals of a shared faith to worship/practice their particular religious tradition. Whether guided by one of our affiliated chaplains or a student-run religious organization, these groups foster a sense of community and common values. For a complete listing of campus religious groups, resources, services, and programming opportunities, visit vanderbilt.edu/religiouslife.

Official University Communications

Certain federal statutes require that information be delivered to each student. Vanderbilt delivers much of this information via email. Official electronic notifications, including those required by statutes, those required by university policy, and instructions from university officials, will be sent to students' Vanderbilt email addresses: user.name@vanderbilt.edu. Students are required to be familiar with the contents of official university notifications, and to respond to instructions and other official correspondence requiring a response. Some messages will include links to the YES Message Center, which is a secure channel for official communication of a confidential nature. However, students should not wait to receive such a message, and should check YES frequently to remain current on official, confidential communications.

The university makes every effort to avoid inundating students with nonessential email (often called "spam"), and maintains separate lists from which students may unsubscribe for announcements of general interest.

Project Safe Center

The Project Safe Center partners with students, faculty, and staff to create a campus culture that rejects sexual violence and serves as a resource for all members of the Vanderbilt community. The Project Safe Center provides support to survivors of intimate partner violence and engages the campus community in prevention of sexual assault, dating violence and domestic violence, and stalking.

School of Medicine

Bystander intervention training, an online education module addressing sexual violence, and a variety of programs and presentations on consent, healthy relationships, and violence prevention are available through the Project Safe Center. A 24-hour support hotline answered by Project Safe's victim resource specialists is available at (615) 322-SAFE (7233).

The Project Safe Center, located at 2304H Vanderbilt Place (in the Cumberland House along West Side Row), is open for drop-in appointments Monday through Friday, 8:00 a.m. to 5:00 p.m.

For more information, please call (615) 875-0660 or visit vanderbilt.edu/projectsafe.

Schulman Center for Jewish Life

The 10,000-square-foot Ben Schulman Center for Jewish Life is the home of Vanderbilt Hillel. The goal of the center is to provide a welcoming community for Jewish students at Vanderbilt and to further religious learning, cultural awareness, and social engagement. Vanderbilt Hillel is committed to enriching lives and enhancing Jewish identity. It provides a home away from home, where Jews of all denominations come together, united by a shared purpose. The Schulman Center is also home to Grin's Cafe, Nashville's only kosher and vegetarian restaurant. For further information about the Schulman Center, please call (615) 322-8376 or email hillel@vanderbilt.edu.

Student Care Network

The Student Care Network is a holistic network of services and resources pertaining to health and wellness available to all Vanderbilt University students. Primary offices include Student Care Coordination, the University Counseling Center, the Student Health Center, and the Center for Student Wellbeing. Students also have access to a wide range of additional on-campus, virtual, and community resources through the Student Care Network - from the Vanderbilt Recreation and Wellness Center to the Project Safe Center - and a variety of community providers. To facilitate finding resources, students may refer to the Student Care Network website: vanderbilt.edu/studentcarenetwork/, or contact Student Care Coordination at vanderbilt.edu/carecoordination/.

Medical Notification Policy

Absences & Coursework Adjustments - Dean's Notification

A Dean's Notification is provided to faculty when a student (1) has a serious illness, injury, or medical treatment or (2) is involved in a personal matter necessitating supportive measures to restore or preserve access to the University's educational programs and activities and (3) either situation is not reasonably likely to resolve immediately. An appropriate University official working directly with the student—including, but not limited to, staff from Student Care Coordination (SCC), the University Counseling Center (UCC), the Student Health Center (SHC), Residential Experience, Project Safe, and the Title IX Office—must make the determination that the situation qualifies for a Dean's Notification. Upon making that determination, the official will notify SCC or the Title IX Office, as appropriate, to coordinate with the student's academic dean to formally request that instructors adjust coursework or absence policies. Alternatively, academic deans will apply the same analysis when a student directly approaches them with a request and may consult with SCC. It is the instructor's prerogative to determine what, if any, adjustments are appropriate.

Dean's Notifications are not reasonable accommodations as issued by Student Access, nor should they be used in lieu of a leave of absence. Dean's Notifications generally expire no later than two weeks after notice is sent by the academic dean to instructors. Adjustments needing more than two weeks should be evaluated by the appropriate University official to determine if accommodations or a leave of absence is more appropriate. Supportive measures issued by the Title IX Office may be extended beyond the initial two-week period on a case-by-case basis.

School of Medicine

Absences & Coursework Adjustments - Minor Illnesses & Routine Appointments

Vanderbilt University expects students to be honest with their instructors about their ability to attend class and/or complete course work, and asks instructors to work with students on these issues. Therefore, the primary offices of the Student Care Network (SCC, UCC, SHC, and Center for Student Wellbeing (CSW)) do not provide notes for minor illnesses or routine appointments that may lead to missed classes and/or a delay in completion of assignments. Instead, the primary offices provide students with cards documenting visits to their office, which student may use in discussion with their instructors regarding absences and/or missed work to demonstrate that they sought care for a medical issues. The reason for the visit and any details of minor illnesses or routine appointments are not provided on the card. A student's right to privacy, particularly as it relates to medical information, is one of the important issues that guides this policy. In addition, since there is great variability in each student's response to minor illnesses, the primary offices cannot always predict which students will miss assignments and/or classes in response to such ailments. Honest communication between students and their instructors can better address these situations.

For more serious illnesses or medical emergencies resulting in absences or missed coursework, refer to the [Dean's Notification section](#).

Student Care Coordination

The [Student Care Coordination](#) is committed to supporting undergraduate, graduate, and professional students in successfully navigating life events related to academic stress and/or medical, mental health, and/or other personal concerns that may interfere with a student's ability to achieve their academic and personal goals. This team of Student Care Coordinators are often the central and first point of contact for students to help identify needs and determine the most appropriate resources in Vanderbilt's Student Care Network and in the Nashville community to address concerns. Student Care Coordinators collaborate with students to develop a student success plan, share education about and facilitate connections to appropriate on and off-campus resources, and provide accountability through supportive follow up meetings. Student Care Coordinators work closely with campus partners, including the Center for Student Wellbeing, the University Counseling Center, the Student Health Center, the Office of Housing and Residential Experience, and faculty and staff to help maintain the safety and health of Vanderbilt students.

In addition, Student Care Coordination supports the Campus Assessment, Response, and Evaluation (CARE) Team and Welfare Panel and coordinates support for students returning from medical leaves of absence. Student Care Coordination's goal is for students to have the right support, in the right place, at the right time. Information about scheduling an appointment with Student Care Coordination is available at vanderbilt.edu/carecoordination/.

Confidentiality

Though staff typically have a background in mental health services, it is important to understand that work with a Student Care Coordinator is not counseling or therapy. The services of Student Care Coordination fall under the Family Educational Rights and Privacy Act (FERPA). This means the content of meetings with a Student Care Coordinator will be kept private to the extent possible; however, information may be shared on a need-to-know basis with appropriate personnel within Vanderbilt University in order to coordinate and provide you with the best care. If it is necessary to share information with off-campus providers or others, you will be asked to sign a written release.

Student Health Center

The Student Health Center provides primary care and some specialty services for students. Services include routine medical care, chronic disease management, office-based gynecology, travel medicine, nutrition services, and sports medicine. The Student Health Center also has a lab and can perform some office-based tests and can also send samples to the Vanderbilt Medical Center laboratory as needed.

The Student Health Center's hours of operation are posted on the center's website: vumc.org/student-health/about-center. Students seeking treatment should call ahead at 615-322-2427 to schedule appointments.

Published 7/12/2022

School of Medicine

Online appointments are available for most types of appointments: vumc.org/student-health/online-appointments. Telemedicine appointments are also available for some types of visits.

Students with urgent issues will be seen on a “same-day” basis, and if no appointment time is available, will be worked in on a “first-come, first-served” basis, and triaged according to severity of illness.

Emergency on-call consultation services are available at 615-322-2427, 24 hours a day, seven days a week. More detailed information about services and health related topics may be found at the Student Health Center website: vumc.org/student-health/.

Immunization Requirements

The State of Tennessee requires certain immunizations and tuberculosis screening for all students (undergraduate, graduate, and professional). ***Students not in compliance with these mandated immunizations and tuberculosis screening will NOT be allowed to register for classes.*** Waivers for required vaccines may be granted for religious or medical reasons. Waiver requests are reviewed by the Student Health Center and the Title IX and Student Discrimination Office or Student Access Services. Instructions for providing waiver request documentation can be found on the immunizations requirements website: vumc.org/student-health/immunization-requirements-new-students.

Immunization requirements include:

1. **Meningococcal meningitis vaccine (one injection after age 16)** for all incoming students living in on-campus housing.
2. **Measles, mumps, and rubella (2 injections)** for all incoming students.
3. **Varicella vaccine (two injections)** for all students who have not had documented chickenpox or bloodwork proof of immunity.
4. **Tuberculosis screening**, which includes on-line risk assessment followed by blood testing or skin testing when indicated.

All incoming students must upload a Student Health Center Immunization and Tuberculosis Screening Requirements form. Instructions and further information are located on the immunizations requirements website: vumc.org/student-health/immunization-requirements-new-students. The completed Immunization and Tuberculosis Screening Requirements form must be uploaded to the Student Health Center immunization portal by May 15, 2022. The form also collects important health history information that enables the Student Health Center staff to better serve individual student needs.

Charges

There are no office-visit co-pays for most routine visits, but students will incur small charges for some medications that are dispensed; there are also small co-pays associated with some office procedures or specialty visits (such as colposcopy). Many of the supplies, medications or in-house lab tests are free of charge. If charges are incurred, credit cards and the Commodore Card may be used for payment at the Student Health Center.

Any lab tests not performed at the Student Health Center are sent to the Vanderbilt University Medical Center and are billed to the student's health insurance company by the Medical Center. In addition, when a student is referred to a specialist outside of the Student Health Center, charges incurred are billed by that clinic to the student's health insurance company. Any amount remaining after health insurance has paid its share is the student's responsibility. If a student has an Emergency Department visit after-hours because of a serious illness or injury, the Medical Center will bill the student and his/her/their insurance company.

Sports Medicine specialists from the Medical Center come to Student Health for the convenience of the students, but these visits are not free of charge; the Sports Medicine specialists will bill the insurance on file for the student. The applicable co-pays will be billed by the Vanderbilt University Medical Center (not Student Health) after the visit.

School of Medicine

Confidentiality

Care provided at the Student Health Center is confidential in compliance with the Health Insurance Portability & Accountability Act (HIPAA) regulations. It is only with explicit written consent from the student that the Student Health Center may communicate with Deans, parents, professors, or other health care professionals. HIPAA does have a clause that allows notification of families in the event that the student is in an emergency or life-threatening situation.

Vanderbilt University Medical Center personnel will ask treated students in the Emergency Department about notification of staff in Housing and Residential Experience and the Student Health Center. Except in cases of a life-threatening emergency, notification requires the student's permission and is strongly encouraged. This practice enables the University to provide support and assistance to students and their families.

Quarantine

Vanderbilt University must enforce public health mandates as required by public health authorities, and may also follow Medical Center and Student Health Center recommendations when the University determines them to be in the best interest of the Vanderbilt community and the public. Based on the aforementioned mandates and/or recommendations, the University may issue directives to students regarding isolation and/or quarantine. As a result, among other needed interventions, students in campus housing, or students traveling as part of Vanderbilt programs or activities, may be required to relocate so that appropriate isolation and/or quarantine can be accomplished. Failure to comply with University directives may result in corrective action through the University's accountability process.

The University Counseling Center

The University Counseling Center (UCC) provides mental health assessment, support, and treatment for students. The UCC promotes social justice and an affirming caring culture through clinical outreach, consultation, and training services. The UCC knows that each student is unique both in terms of their identity and lived experiences, and works with campus partners to provide a comprehensive pathway of support options for students that are flexible and attentive to each individual's particular needs, opportunities, and challenges in a spirit of collaboration and mutual respect.

The diverse team of clinical professionals includes psychologists, licensed counselors including substance use specialists, doctoral interns, practicum students, postdoctoral fellows, and psychiatric medical providers representing a wide variety of backgrounds and identities. Services include short-term individual therapy, a variety of group therapy and workshops options, drop-in consultations, ADHD and learning disabilities evaluations, and psychiatric assessment and treatment.

Students with pressing/acute issues may visit the UCC without appointment to meet with the Urgent Care Counseling clinician. If there are multiple students seeking Urgent Care Counseling services, the students will be seen on a "first-come, first-served" basis. Flexibility is maintained to address student needs according to level of acuity. Additionally, students may seek brief support for distressing situations through the UCC's daily drop-in consultation services as detailed on the UCC's website: vanderbilt.edu/ucc/services/drop-in-consultation/. This program enables students to have rapid access to a counselor for support and guidance. The UCC staff is also available to all VU community for consultations about students of concern and other mental health-related questions.

The UCC is open according to the schedule posted on the center's website: vanderbilt.edu/ucc. Students seeking to schedule a first appointment should visit Student Care Coordination's website at vanderbilt.edu/carecoordination or call 615-343-WELL (9355).

The UCC also focuses on prevention and education programs, often collaborating with the Center for Student Wellbeing to design and deliver programs such as MAPS (Mental Health Awareness & Prevention of Suicide) and

School of Medicine

ADHD skill-building workshops. These initiatives are designed to foster coping skills and overall resilience and mental health.

More details about services may be found at the UCC website: vanderbilt.edu/ucc.

Charges

The UCC does not charge for services. Students requiring laboratory testing are referred to the Student Health Center. Charges for these tests are made in accordance with Student Health Center policies.

Confidentiality

The UCC is a confidential setting under the Family Educational Rights and Privacy Act (FERPA). To the extent permitted by law, the UCC does not share information about students or anything discussed in session, with the exception of safety concerns, which may override the confidentiality policy. For example, limits of confidentiality include situations that involve imminent risk to a client or another individual, and situations involving elder or child abuse. The UCC encourages students to sign a written release of information form if they would like for the UCC to share information with members of the student's family or others. The UCC may share attendance and additional minimally necessary information with the other primary Student Care Network offices, including Student Care Coordination, Student Health Center, and Center for Student Wellbeing for the purposes of care coordination.

Center for Student Wellbeing

The Center for Student Wellbeing cultivates engagement in lifelong well-being practices and endeavors to create a culture that supports students' personal development and academic success through a holistic and integrative framework. The Center's areas of focus include, for example, alcohol and other drug education and recovery support, self-care and personal growth, strengthening physical and emotional health, developing academic skills and time management, and support for supporting students in distress. The Center provides prevention programming, individual coaching, skill building workshops, substance use screenings, meditation and yoga, and referrals to campus resources.

New appointments for Center for Student Wellbeing services may be scheduled through Student Care Coordination or by contacting the CSW at 615-322-0480 or healthydores@vanderbilt.edu. Information is available at vanderbilt.edu/healthydores/.

Student Health Insurance Plan (SHIP) Eligibility

Degree and non-degree seeking students (excluding Division of Unclassified (DUS) and Consortium students) enrolled in 4+ credit hours, a 0-credit research/dissertation course, or any other course that is considered to equate to full-time enrollment are automatically enrolled in and will be billed for SHIP underwritten by Aetna and administered by Academic HealthPlans (AHP), unless they complete the online waiver process. Information about the plan is available online at vanderbilt.myahpcare.com/. In addition, students may email SHIP@vanderbilt.edu with questions.

Cost

The annual premium, which is approved each year by the Board of Trust, is billed to students through their student account. The premium is a separate charge from tuition.

Coverage Period

Coverage for students begins August 12 and extends through August 11 the following calendar year. If a student withdraws from school within the first 31 days of a coverage period, they will not be covered under the Policy and the full premium will be refunded, less any claims paid. After 31 days, the student will be covered for the remainder of the Plan year providing plan premiums are paid, and no refund will be allowed. Graduating within 31 days of the start of the coverage period shall not be considered a withdrawal from school.

School of Medicine

Coverage Benefits

SHIP provides hospital, surgical, and major medical benefits. A brochure explaining the limits, exclusions, and benefits of the plan is available online at vanderbilt.myahpcare.com/ and the [Student Care Network](#) website. SHIP requires that the Student Health Center be the student's primary care provider in Nashville, but will provide coverage for referrals to specialists when a referral is made by a Student Health Center. SHIP does not require referrals for behavioral health.

Waiver of Insurance Plan

A student who does not wish to subscribe to SHIP must notify the University of comparable coverage under another policy. Comparable criteria coverage for domestic and international students is found at vanderbilt.edu/studentcarenetwork/waive/.

Waiver of the student insurance plan does not affect eligibility for services at the Student Health Center. The online waiver process may be found online at vanderbilt.myahpcare.com/waiver. The insurance charge will not be waived if the online process is not completed by August 1 for the fall semester, or by January 4 for students who are newly enrolled for the spring semester. **The waiver process must be completed each academic year.** Newly enrolled eligible summer session students planning to take full-time coursework in the fall must complete both a summer waiver form due July 22 and a fall waiver form due August 1. Additional information about the waiver process may be found on the Student Care Network website.

A student who does not wish to subscribe to SHIP must notify the University of comparable coverage under another policy. Comparable criteria coverage for domestic and international students is found at vanderbilt.edu/studentcarenetwork/waive/.

Waiver of the student insurance plan does not affect eligibility for services at the Student Health Center. The online waiver process may be found online at vanderbilt.myahpcare.com/waiver. The insurance charge will not be waived if the online process is not completed by August 1 for the fall semester, or by January 4 for students who are newly enrolled for the spring semester. **The waiver process must be completed each academic year.** Newly enrolled eligible summer session students planning to take full-time coursework in the fall must complete both a summer waiver form due July 22 and a fall waiver form due August 1. Additional information about the waiver process may be found on the Student Care Network website.

Family Coverage

An additional premium is charged for family insurance coverage. An eligible student who wishes to provide coverage for their spouse and/or children, may do so at vanderbilt.myahpcare.com/. It is the student's responsibility to enroll their dependents each year. Dependents are not automatically enrolled.

Qualifying Events for Students and Dependents

Students who initially waive coverage can request to add coverage if they experience a qualifying event. Examples of a qualifying event include (a) reaching the age limit of another health insurance plan, (b) loss of health insurance through marriage or divorce, (c) involuntary loss of coverage from another health insurance plan, and (d) entering the United States of America. A qualifying event does not include a student who is seeking enrollment to gain access to a benefit that was exhausted under their private insurance plan. Coverage will be effective beginning the first day following the loss of coverage, and the charges will be added to the student's account. Eligible dependents may also be added if the student experiences one of the following qualifying events: (a) marriage, (b) birth of a child, (c) divorce, (d) the dependent entering the country for the first time, or (e) the dependent losing coverage under another insurance plan. Requests to add coverage based on a qualifying event must be received within 31 days of the qualifying event. Forms received more than 31 days after the qualifying event will not be processed.

Student Centers

A variety of facilities, programs, and activities are provided in multiple student center locations or spaces

School of Medicine

managed by our team - Alumni Hall, Benton Chapel, The Commons Center, E. Bronson Ingram College, Kissam Center, Rothschild College, Zeppos College, Engineering and Science Building, Community Event Space, Sarratt Student Center | Rand Hall, and the Student Life Center. Our team is located in Rand 307 and can be contacted at eventservices@vanderbilt.edu or (615) 322-2448.

Sarratt Student Center | Rand Hall is the main student center hub, housing a 300-seat cinema, art gallery, art studios, multicultural lounge, large and small meeting spaces, and a courtyard. The facility is also home to Vanderbilt Student Communications, radio station, TV studio, and the Pub at Overcup Oak restaurant. Rand Hall houses the Rand Dining Center, a multipurpose venue, meeting and seminar rooms, plus large, open lounge space. Some of the offices located in Sarratt Student Center | Rand Hall include Student Affairs, Arts and Campus Events, Greek Life, International Student and Scholar Services, Student Access, Student Center for Social Justice and Identity, Student Organizations, Leadership and Service, Student Care Coordination and Student Accountability, Community Standards and Academic Integrity. Also included in this facility is a United States Postal Service office.

The Vanderbilt Student Life Center is the university's large event space. It is both the fulfillment of students' vision to have a large social space on campus and a wonderful complement to Sarratt Student Center | Rand Hall. The Student Life Center has more than 18,000 square feet of event and meeting space, including the 9,000-square-foot Commodore Ballroom, which is one of the most popular spaces to have events on campus. The center is also home to the Career Center, Global Safety, and Office of Experiential Learning and Immersion Vanderbilt.

The Commons Center is the community crossroads of The Ingram Commons living and learning community. It has it all: the Dining Hall and great food; a living room with a concert-grade grand piano, and the occasional live musical performance; a small rec room with cardio equipment, free weights, and weight machines; meeting and study rooms; and academic support services like the Writing Studio, the Career Center, and the CASPAR pre-major advising center. The third floor of The Commons Center is the home of the Department of Political Science.

Alumni Hall was the original student center on campus when the building opened in 1925. Re-opened in fall 2013 after a yearlong renovation that transformed every space in the facility, Alumni Hall has returned to its role as a student center after serving other purposes over the years. In the renovated Alumni Hall, students have access to an exercise room as well as several new meeting and event spaces. The Vanderbilt Graduate School calls Alumni Hall home, and lounge space on the first floor serves as a robust hub for student life within the Graduate School community.

Opened in fall 2014 and fall 2018, respectively, Kissam Center for Warren and Moore College and E. Bronson Ingram College are part of the Vanderbilt residential college system. Kissam Center is home to meeting and event spaces, the Kissam Market, and Kissam Kitchen. E. Bronson Ingram College offers a dining facility, including the award-winning Bamboo Bistro pho concept.

Zeppos College opened in the fall of 2020 and is the fourth residential college and first to open in the West End neighborhood. It features a state-of-the-art dining hall, great room, study lounges, and several other event spaces designed to help foster community among students and residential faculty.

Benton Chapel is the largest and main chapel for Vanderbilt University. Dedicated in 1959, the chapel would become the ecumenical home for the various ministries, classes, promotions and special events in the lives of the students, staff, faculty and community here at Vanderbilt. Although decorated in a Christian theme, no one denomination is prevalent making the chapel available to be used by different denominations and traditions through the week.

Engineering and Science Building is a 250,000 square foot structure and home to both the ESB, which includes

Published 7/12/2022

School of Medicine

laboratories, classrooms and a state-of-the-art clean room, and Vanderbilt's Innovative Pavilion, which includes the Wond'ry and its makerspace.

Opened in fall 2020 as part of the reimagined West End Neighborhood, the Community Event Space is home to many student organization programs, rehearsals and events. The space has two large floors, one with a full-length mirror that allows for the ideal rehearsal space for our performing arts groups. In the Fall 2021 semester, we opened the Multicultural Community Space. This space serves as the hub of activity for many of our multicultural student organizations. And in Fall 2022, we will open the Student Organizations, Leadership and Service space.

Student Records (Family Educational Rights and Privacy Act)

Vanderbilt University is subject to the provisions of federal law known as the Family Educational Rights and Privacy Act (also referred to as FERPA). This act affords matriculated students certain rights with respect to their educational records. These rights include:

1. The right to inspect and review their education records within 45 days of the day the University receives a request for access. Students should submit to the Office of the University Registrar written requests that identify the record(s) they wish to inspect. The Office of the University Registrar will make arrangements for access and notify the student of the time and place where the records may be inspected. If the Office of the University Registrar does not maintain the records, the student will be directed to the University official to whom the request should be addressed.
2. The right to request the amendment of any part of their education records that a student believes is inaccurate or Students who wish to request an amendment to their educational record should write the University official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. If the University decides not to amend the record as requested by the student, the student will be notified of the decision and advised of his or her right to a hearing.
3. The right to consent to disclosures of personally identifiable information contained in the student's education records to third parties, except in situations that FERPA allows disclosure without the student's consent. These exceptions include:
 - Disclosure to school officials with legitimate educational interests. A "school official" is a person employed by the University in an administrative, supervisory, academic or research, or support-staff position (including University law enforcement personnel and health staff); contractors, consultants, and other outside service providers with whom the University has contracted; a member of the Board of Trust; or a student serving on an official University committee, such as the Honor Council, Student Conduct Council, or a grievance committee, or assisting another school official in performing his or her A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.
 - Disclosure to parents if the student is a dependent for tax purposes
 - Disclosure to appropriate individuals (e.g., parents/guardians, spouses, housing staff, health care personnel, police,) where disclosure is in connection with a health or safety emergency and knowledge of such information is necessary to protect the health or safety of the student or other individuals.
 - Disclosure to a parent or legal guardian of a student, information regarding the student's violation of any federal, state, or local law, or of any rule or policy of the institution, governing the use or possession of alcohol or a controlled substance if the University has determined that the student has committed a disciplinary violation with respect to the use or possession and the student is under the age of 21 at the time of the disclosure to the parent/guardian.
 - Disclosure to various authorized representatives of government entities (such as, compliance with Student and Exchange Visitors Information System [SEVIS], Solomon Amendment, etc).

FERPA provides the university the ability to designate certain student information as "directory information." Directory information may be made available to any person without the student's consent unless the student gives notice as provided for, below. Vanderbilt has designated the following as directory information: the student's name, address, telephone number, email address, student ID photos, major field of study, school, classification, participation in officially recognized activities and sports, weights and heights of members of athletic teams, dates of attendance, degrees and awards received, the most recent previous educational agency or institution attended by the student, and other information that would not generally be considered harmful or an invasion of privacy if disclosed. Any student who does not wish disclosure of directory information should notify the Office of the University Registrar in writing. No element of directory information as defined above is released for students who request nondisclosure except as required by statute.

School of Medicine

The request for nondisclosure does not apply to class rosters in online class management applications, or to residential rosters—or rosters of groups a student may join voluntarily—in online, co-curricular engagement applications, or rosters of other information on the websites of student organizations that a student may join. Neither class rosters in online class management applications, nor residential rosters in online co-curricular engagement applications, are available to the public.

As of January 3, 2012, the U.S. Department of Education’s FERPA regulations expand the circumstances under which students’ education records and personally identifiable information (PII) contained in such records—including Social Security Numbers, grades, or other private information—may be accessed without consent. First, the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or state and local education authorities (“Federal and State Authorities”) may allow access to student records and PII without consent to any third party designated by a Federal or State Authority to evaluate a federal- or state-supported education program. The evaluation may relate to any program that is “principally engaged in the provision of education,” such as early childhood education and job training, as well as any program that is administered by an education agency or institution.

Second, Federal and State Authorities may allow access to education records and PII without consent, to researchers performing certain types of studies, in certain cases even when the University objects to or does not request such research. Federal and State Authorities must obtain certain use-restriction and data security promises from the third parties that they authorize to receive PII, but the Authorities need not maintain direct control over the third parties.

In addition, in connection with Statewide Longitudinal Data Systems, State Authorities may collect, compile, permanently retain, and share without student consent, PII from education records, and may track student participation in education and other programs by linking such PII to other personal information that they obtain from other Federal or State data sources, including workforce development, unemployment insurance, child welfare, juvenile justice, military service, and migrant student records systems.

If a student believes the university has failed to comply with FERPA, he or she may file a complaint using the Student Complaint and Grievance Procedures as outlined in the *Student Handbook*. If dissatisfied with the outcome of this procedure, students may file a written complaint with the Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue SW, Washington, DC 20202-5920.

Questions about the application of the provisions of the Family Educational Rights and Privacy Act should be directed to the Office of the University Registrar or to the Office of General Counsel.

The Commodore Card

The Commodore Card is your official Vanderbilt ID. It is used for identification, for access to residence halls, academic buildings, and campus events, the rec center, libraries and as a debit card for meal plans and other purchases on and off campus. You will receive a digital Commodore Card on your iOS or Android device which you can provision prior to arriving at Vanderbilt, so you are all set the moment you step foot on campus. You will also receive a plastic card for some activities such as using Nashville public transit.

Physical ID cards are issued at the Commodore Card Office, 184 Sarratt Student Center, Monday through Friday from 8:30 am – 4:00 pm. Digital ID cards are available for iOS and Android devices. For more information, please visit vanderbilt.edu/cardservices.

VA Compliance Statement

Any covered individual will be able to attend or participate in the course of education during the period beginning on the date on which the individual provides to the educational institution a certificate of eligibility for

School of Medicine

entitlement to educational assistance under chapter 31 or 33 (a “certificate of eligibility” can also include a “Statement of Benefits” obtained from the Department of Veterans Affairs’ (VA) website – eBenefits, or a VAF 28-1905 form for chapter 31 authorization purposes) and ending on the earlier of the following dates:

1. The date on which payment from VA is made to the institution.
2. 90 days after the date the institution certified tuition and fees following the receipt of the certificate of eligibility.

Vanderbilt University will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual’s inability to meet his or her financial obligations to the institution due to the delayed disbursement funding from VA under chapter 31 or 33.

Vanderbilt Child and Family Center

Vanderbilt Child and Family Center provides support and resources to the community of Vanderbilt families across the spectrum of life. As reflected in our provision of new parent support, early childhood education, family life resources, and elder care support, VCFC values the university’s commitment to the education of the whole person and cultivation of lifelong learning. Visit vanderbilt.edu/child-family-center.

Vanderbilt Directory

Individual listings in the online People Finder Directory consist of the student’s full name, Vanderbilt email address, and campus mailing address (if available). Students may elect to add additional contact information to their listings, including school, academic classification, local phone number, local address, permanent address, cellphone, pager, and fax numbers. Student listings in the People Finder Directory are available to the Vanderbilt community via logon ID and e-password. Students may choose to make their online People Finder listings available to the general public (i.e., viewable by anyone with access to the internet), or to block individual directory items. Students who have placed a directory hold with the Office of the University Registrar will not be listed in the online directory.

Directory information should be kept current. Students may report address changes, emergency contact information, and missing person contact information via the web by logging in to YES (Your Enrollment Services) <https://yes.vanderbilt.edu> and clicking on the Personal Information link.

Vanderbilt University Police Department

The Vanderbilt University Police Department, (615) 322-2745, is a professional law enforcement agency dedicated to the protection and security of Vanderbilt University and its diverse community (police.vanderbilt.edu).

The Vanderbilt University Police Department comes under the charge of the Office of the Vice Chancellor for Administration. As one of Tennessee’s larger law enforcement agencies, the Vanderbilt University Police Department provides comprehensive law enforcement and security services to all components of Vanderbilt University including the academic campus, Vanderbilt University Medical Center, Vanderbilt Health at One Hundred Oaks, and a variety of university-owned facilities throughout the Davidson County area.

The Police Department includes a staff of more than one hundred people, organized into three divisions under the Office of the Associate Vice Chancellor and Chief of Police: Operations Division (Main Campus, Medical Center, and 100 Oaks Precincts), Administrative Division, and Auxiliary Services Division. All of Vanderbilt’s commissioned police officers have completed officer training at a state-certified police academy and are required to complete on-the-job training as well as attend annual in-service training. Vanderbilt police officers hold Special Police Commissions and have the same authority as that of a municipal law enforcement officer, while on property owned by Vanderbilt, on adjacent public streets and sidewalks, and in nearby neighborhoods. When a Vanderbilt student is involved in an off-campus offense, police officers may assist with the investigation in cooperation with local, state, or federal law enforcement. The department also employs non-academy-trained officers called community service officers (commonly referred to as CSOs) who lend assistance 24/7 to the Vanderbilt community through services that include providing walking escorts, providing jump starts, and unlocking cars. For non-emergency assistance from a community service officer, dial (615) 322-2745 (2-2745).

School of Medicine

from an on-campus extension).

The Vanderbilt University Police Department provides several services and programs to members of the Vanderbilt community:

VandyRide

The Vanderbilt University Police Department administers the VandyRide escort system at Vanderbilt University. The VandyRide escort system provides vehicular escorts to designated locations on campus. The service consists of vans that operate from 6:00 p.m. to 3:30 a.m. GPS technology allows students to track VandyRide on their route via computer or mobile phone using the VandySafe app, setting up text message alerts to let them know when a van will be arriving at their stop. Please visit vanderbilt.edu/movevu/commuter-options to download the app.

Stop locations were chosen based on location, the accessibility of a secure waiting area, and student input. Signs, freestanding or located on existing structures, identify each stop. A walking escort can be requested to walk a student from his/her stop to the final destination. An ADA van is also accessible to students with mobility impairments. For complete information about the VandyRide service, including routes, stops, and times, please visit vandyvans.com or call (615) 322-2554.

As a supplement to the VandyRide van service, walking escorts are available for students walking to and from any location on campus during nighttime hours. Walking escorts are provided by VUPS officers. The telephone number to call for a walking escort is either (615) 322-2745 (2-2745 from a campus phone) or (615) 421-8888 (1-8888 from a campus phone), after which, a representative from VUPD will be dispatched to the caller's location, or to a designated meeting point to accompany the caller to his or her destination.

Emergency Phones

Emergency telephones (Blue Light Phones) are located throughout the university campus, Medical Center, and 100 Oaks.

Each phone has an emergency button that when pressed automatically dials the VUPD Communications Center.

An open line on any emergency phone will activate a priority response from an officer. An officer will be sent to check on the user of the phone, even if nothing is communicated to the dispatcher. Cooperation is essential to help us maintain the integrity of the emergency phone system. These phones should be used only for actual or perceived emergency situations.

An emergency response can also be activated by dialing 911 from any campus phone. Cellphone users can dial (615) 421-1911 to summon an emergency response on campus. Cellphone users should dial 911 for off-campus emergencies. Callers should be prepared to state the location from which they are calling.

Exchange Area

The Vanderbilt University Police Department has designated the lobby of the Police building located at 111 28th Ave South as an "Exchange Area." The Exchange Area is for Vanderbilt University students, faculty, and staff to trade legal items bought and sold online on various secondhand applications in a safe environment. Either the seller or buyer must be Vanderbilt affiliated (student, faculty, or staff). The affiliated person must complete the online registration form at police.vanderbilt.edu/safedeal prior to the actual trade.

Security Notices

In compliance with the U.S. Department of Higher Education and the Jeanne Clery Act, Security Notices are issued to provide timely warning information concerning a potentially dangerous situation on or near Vanderbilt

School of Medicine

University. This information is provided to empower our students and employees with the information necessary to make decisions or take appropriate actions concerning their own personal safety. Security Notices are distributed throughout Vanderbilt to make community members aware of significant crimes that occur at the university. They are distributed through Vanderbilt email lists and through the department's webpage, police.vanderbilt.edu/pdfs/annual-security-report.pdf.

Educational and Assistance Programs

The Crime Prevention Unit of Vanderbilt University Police Department offers programs addressing issues such as sexual assault, domestic violence, workplace violence, personal safety, RAD (Rape Aggression Defense) classes, and victim assistance. VUPD provides additional services including property registration (for bikes, laptops, etc.), lost and found, weapons safekeeping, and Submit a Crime Tip. For further information on available programs and services, call (615) 322-7846 or visit police.vanderbilt.edu/services.

Additional information on security measures and crime statistics for Vanderbilt is available from the Vanderbilt University Police Department, 111 28th Avenue South, Nashville, Tennessee 37212. Information is also available at police.vanderbilt.edu.

Annual Security Report

The *Vanderbilt University Annual Security Report* is published each year to provide you with information on security-related services offered by the university and campus crime statistics in compliance with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act and the Tennessee College and University Security Information Act.

This booklet is prepared with information provided by the Nashville Metropolitan Police Department, the Department of Student Athletics, Office of the Dean of Students, the Office of Housing and Residential Experience, and the Vanderbilt University Police Department. It summarizes university programs, policies, and procedures designed to enhance personal safety for everyone at Vanderbilt.

A copy of this report may be obtained by writing or calling the Vanderbilt University Police Department, 111 28th Avenue South, Nashville, Tennessee 37212, or by telephone at (615) 875-9157. A PDF copy of this report may also be obtained on the website at police.vanderbilt.edu/crimeinfo/index.php.

Vanderbilt University

Accreditation

Vanderbilt University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award bachelor's, master's, and doctoral degrees. Questions about the accreditation of Vanderbilt University may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website (www.sacscoc.org).

Please contact SACSCOC only in relation to Vanderbilt's accreditation. Inquiries about admission requirements, educational programs, and financial aid should be directed to the university.

Equity, Diversity, and Inclusion

Excellence at Vanderbilt is inextricably tied to the university's commitment to fostering an inclusive community where people of all identities, backgrounds, and perspectives can thrive. The Vice Provost for Strategic Initiatives and the Vice Chancellor for Equity, Diversity and Inclusion and Chief Diversity Officer work in partnership with students, faculty, and staff to identify and implement best practices that advance equity, diversity, and inclusion across campus in pursuit of building and supporting an inclusive community enriched by a broad variety of experiences and knowledge. Visit vanderbilt.edu/diversity for more information.

School of Medicine

Mission, Goals, and Values

Vanderbilt University is a center for scholarly research, informed and creative teaching, and service to the community and society at large.

Vanderbilt will uphold the highest standards and be a leader in the quest for new knowledge through scholarship, dissemination of knowledge through teaching and outreach, and creative experimentation of ideas and concepts.

In pursuit of these goals, Vanderbilt values most highly intellectual freedom that supports open inquiry, equality, compassion, and excellence in all endeavors.

Modification Policy and Nondiscrimination Statement

The university reserves the right, through its established procedures, to modify the requirements for admission and graduation and to change other rules, regulations, and provisions, including those stated in this bulletin and other publications, and to refuse admission to any student, or to require the withdrawal of a student if it is determined to be in the interest of the student or the university. All students, full time or part time, who are enrolled in Vanderbilt courses are subject to the same policies.

Policies concerning noncurricular matters and concerning withdrawal for medical or emotional reasons can be found in the Student Handbook, which is on the Vanderbilt website at vanderbilt.edu/student_handbook.

NONDISCRIMINATION STATEMENT

In compliance with federal law, including the provisions of Title VI and Title VII of the Civil Rights Act of 1964, Title IX of the Education Amendment of 1972, Sections 503 and 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act (ADA) of 1990, the ADA Amendments Act of 2008, Executive Order 11246, the Vietnam Era Veterans Readjustment Assistance Act of 1974 as amended by the Jobs for Veterans Act, and the Uniformed Services Employment and Reemployment Rights Act, as amended, and the Genetic Information Nondiscrimination Act of 2008, Vanderbilt University does not discriminate against individuals on the basis of their race, sex, sexual orientation, gender identity, religion, color, national or ethnic origin, age, disability, military service, covered veterans status, or genetic information in its administration of educational policies, programs, or activities; admissions policies; scholarship and loan programs; athletic or other university-administered programs; or employment. In addition, the university does not discriminate against individuals on the basis of their gender expression. Requests for information, inquiries or complaints should be directed to these offices: Equal Opportunity and Access Office, eoaa@vanderbilt.edu, telephone (615) 343-9336; Title IX Office, Title IX Coordinator, titleix@vanderbilt.edu, telephone (615) 343-9004, 110 21st Avenue South, Suite 975, Nashville TN 37203; Student Access Office, studentaccess@vanderbilt.edu, telephone (615) 343-9727.

Paper copies of this information about educational records may be obtained by writing the Office of the University Registrar, Vanderbilt University, PMB 407701, 110 21st Avenue South, Suite 110, Nashville, Tennessee 37240-7701, or by calling (615) 322-7701. For more information, see the “Student Records (Family Educational Rights and Privacy Act)” section of this catalog.

The Jean and Alexander Heard Libraries

The Jean and Alexander Heard Libraries system at Vanderbilt University houses nearly five million items and provides access to millions more resources through its nine campus libraries: Central Library (A&S); Peabody Library; Annette and Irwin Eskind Family Biomedical Library and Learning Center; Walker Management Library; Wilson Music Library; Massey Law Library; Stevenson Science and Engineering Library; the Divinity Library; and the Special Collections Library. These libraries share an online presence that provides access to an integrated catalog of print and e-resources, as well as information about library services, workshops, programs, exhibitions, research guides, and librarian subject specialists.

Library staff teach students to be information literate and help them develop research skills in an increasingly complex information environment. Students can connect with a librarian in person or ask questions through the library website. Library spaces across campus offer quiet individual study spaces, group study, and instructional rooms, as well as learning commons and cafes. Faculty- and student-curated exhibitions throughout the libraries offer intellectual and creative insights that encourage students to think critically and see their own work in new ways. Students, faculty, and staff come to the library to read in a cozy nook, meet friends for group study, grab a quick meal, or attend an author’s talk. Even if you are off campus, digital library resources are at your fingertips via your phone, laptop, or computer.

The oldest items in the library date from ca. 2500 BCE, and new publications are being added every day. Among the collection strengths are: Latin American history, politics, and culture; the History of Medicine Collections; the W. T. Bandy Center for Baudelaire and Modern French Studies; the Southern Literature and Culture Collections; the United States Playing Card Collection; and the Vanderbilt Television News Archive, the world’s most extensive archive of television news covering 1968 to present. The libraries are also involved in digital scholarship, publishing and partnering with faculty on the *Revised Common Lectionary*, one of the first published

School of Medicine

web-based resources of scriptural readings for the liturgical year, *Ecclesiastical and Secular Sources for Slave Societies*, a digital preservation program for endangered documents related to slave societies, the *Global Music Archive*, a multimedia archive for traditional and popular song, music, and dance of Africa and the Americas, and *Syriaca*, a digital project for the study of Syriac literature, culture, and history.

Get to know your libraries and your librarians early in your career at Vanderbilt. They have the information you need—and can help you transform that information into knowledge, creativity, and success.

The University

Commodore Cornelius Vanderbilt, who gave a million dollars to build and endow Vanderbilt University in 1873, expressed the wish that it “contribute . . . to strengthening the ties which should exist between all geographical sections of our common country.”

A little more than a hundred years later, the Vanderbilt Board of Trust adopted the following mission statement: “We reaffirm our belief in the unique and special contributions that Vanderbilt can make toward meeting the nation’s requirements for scholarly teaching, training, investigation, and service, and we reaffirm our conviction that to fulfill its inherited responsibilities, Vanderbilt must relentlessly pursue a lasting future and seek highest quality in its educational undertakings.”

Today as Vanderbilt pursues its mission, the university more than fulfills the Commodore’s hope. It is one of a few independent universities with both a quality undergraduate program and a full range of graduate and professional programs. It has a strong faculty of more than 4,200 full-time members and a diverse student body of more than 12,800.

The 334-acre campus is about one and one-half miles from the downtown business district of the city of Nashville, combining the advantages of an urban location with a peaceful, parklike setting of broad lawns, shaded paths, and quiet plazas.

The schools of the university offer the following degrees:

College of Arts and Science. Bachelor of Arts.

Blair School of Music. Bachelor of Music, Bachelor of Musical Arts.

Divinity School. Master of Divinity, Master of Theological Studies, Master of Theology, Doctor of Ministry.

School of Engineering. Bachelor of Engineering, Bachelor of Science, Master of Engineering.

Graduate School. Master of Arts, Master of Fine Arts, Master of Liberal Arts and Science, Master of Science, Doctor of Philosophy.

Law School. Master of Laws, Doctor of Jurisprudence.

School of Medicine. Master of Education of the Deaf, Master of Genetic Counseling, Master of Public Health, Master of Science in Clinical Investigation, Master of Science in Medical Physics, Master of Science (Applied Clinical Informatics, Speech-Language Pathology), Doctor of Audiology, Doctor of Medical Physics, Doctor of Medicine.

School of Nursing. Master of Science in Nursing, Doctor of Nursing Practice.

Owen Graduate School of Management. Master of Accountancy, Master of Business Administration, Master of Management in Health Care, Master of Marketing, Master of Science in Finance.

Peabody College. Bachelor of Science, Master of Education, Master of Public Policy, Doctor of Education.

No honorary degrees are conferred.

University Courses

By tackling pressing real-world problems and addressing big questions, University Courses educate the whole student and promote lifelong learning. The courses leverage the natural synergies across Vanderbilt’s ten schools and colleges, giving students the opportunity to reach beyond their area of study and interact with faculty at the intersection of disciplines. Each course promotes trans-institutional learning while providing opportunities to embrace diverse perspectives. For more information, visit vu.edu/university-courses.
